Re: Docket Nos. FD-36470 and FD-36471, WildEarth Guardians' Objection to Notices of Exemption and Comments

Dear Ms. Brown:

WildEarth Guardians submits to the U.S. Surface Transportation Board ("STB") the following objection and comments regarding Rio Grande Pacific Corporation and Colorado, Midland, and Pacific Railway Company Notices of Exemption filed with the Surface Transportation Board on December 31, 2020. The Notices of Exemption include:

- FD-36470: A Notice of Exemption for Rio Grande Pacific Corporation ("RGPC") to continue in control of its subsidiary, Colorado, Midland, and Pacific Railway Company ("CMPR") upon CMPR becoming a Class III railroad; and
- FD-36471: A Notice of Exemption for CMPR to lease from Union Pacific Railroad Company and operate 163.1 miles of rail line in Colorado.

With these Notices of Exemption, RGPC and CMPR aim to restart rail traffic on a 163-mile rail line that has been abandoned since 1996. This rail line runs through environmentally sensitive landscapes in central Colorado, including along rivers that are enormously popular and vital for outdoor recreationists and businesses, over the high mountain Tennessee Pass, which supports fragile alpine and sub-alpine ecosystems, next to several designated Wilderness Areas, through a National Monument, and along the Arkansas River of southern Colorado. Much of the rail line runs within or near federal and state public lands, which are used extensively for outdoor recreation and support fish and wildlife, many of which are imperiled.

Restarting rail traffic on this stretch of abandoned rail line poses myriad potentially significant environmental and health impacts, including a 100% increase in rail traffic, increases

in air and water pollution, more noise, impacts to outdoor recreationists and businesses that depend on the quality of the outdoors in the vicinity of the rail line, impacts to fish and wildlife and their habitat, and the creation of new and more severe risks associated with derailments and spills of potentially hazardous substances along the rail line.

WildEarth Guardians is a nonprofit environmental advocacy group dedicated to protecting and restoring wildlife, wild places, wild rivers, and health in the American West. We have members and supporters in Colorado and throughout the United States who would be harmed if traffic is restarted on this stretch of abandoned rail line. With this filing, we are also submitting a petition signed by 5,796 people from Colorado and other states who are greatly concerned over the environmental, health, and welfare impacts of the potential for rail traffic to resume on this line. See Exhibit 1, Petition to STB With Signatories.

On behalf of our members and supporters, we request the STB reject the Notices of Exemption. If the STB does not reject the Notices, we request:

- At a minimum, we request the STB provide more time for interested parties to submit additional detailed information to guide the STB's review and ultimate determinations.
- To this end, we also urge the STB to request additional information from RGPC and CMPR to better ascertain their future plans for operations and the scope of potential impacts associated with these operations.
- We also request the STB require an environmental review and assessment of the potentially significant impacts of resuming traffic on this rail line, consistent with the National Environmental Policy Act.
- Such a review and assessment must address the direct, indirect, and cumulative impacts of rehabilitating the abandoned rail line, of rail traffic, and of derailments and spills that would inevitably arise upon the resumption of rail traffic on this line.
- This review and assessment must also engage and solicit public input, particularly from those who would be most impacted by the resumption of rail traffic.

Below we provide more detailed comments.

The Proposals Amount to New Rail Construction

While RGPC and CMPR's Notices of Exemption claim that they are simply leasing and then operating an existing rail line, the 163 mile long rail line in question has been abandoned for 25 years and is surely in various states of disrepair along its entire length. Reports have indicated CMPR will have to spend hundreds of millions of dollars to rehabilitate and/or repair the existing rail line in order to resume traffic.

Given this, we are very concerned that the proposal before the STB amounts to the construction of a new rail line, or at a minimum the *de facto* construction of a new rail line. Although ostensibly Union Pacific owns the line and it may not have been subject to

abandonment proceedings, this does not mean that the consequence of approving CMPR's operation of the rail line will not be akin to construction of a rail line. At a minimum, we urge the STB to ascertain what rehabilitation/reconstruction will be necessary and at what cost if CMPR's request is approved.

The Exemptions Are Not Appropriate

We object to the Notices of Exemption and urge the STB to reject the Notices. For one, the transaction and service at issue here is not of limited scope. RGPC and CMPR aim to restart rail traffic on a 163 mile line that has been out of service for 25 years, an act that poses new potentially significant impacts to the region's communities, economies, environment, health, and quality of life. Exemptions are not appropriate in this case given the broad scope of activities that would be authorized and the potential impacts.

Given the broad scope of what RGPC and CMPR have proposed, we are very concerned that an application for a certificate of public convenience and necessity should have been filed, rather than Notices of Exemption. We urge the STB to require submission of an application for a certificate of public convenience and necessity as the proper means of approving RGPC and CMPR's operation of the 163 mile long rail line at issue.

The Notices Contain False or Misleading Information

Both Notices of Exemption claim that the actions will not significantly affect the quality of the human environment. This is misleading and not supported. The aim of the Notices is to secure STB authorization to resume rail traffic on a line that has been abandoned for 25 years. The resumption of rail traffic will introduce new potentially significant environmental, health, and socioeconomic impacts in a region of Colorado that has not experienced such impacts for more than 25 years. The resumption of rail traffic will introduce new sources of air and water pollution, new impacts to communities in the region, new impacts to protected landscapes, including the Browns Canyon National Monument, which was designated in 2015, and new impacts to outdoor recreationists and outdoor recreation businesses that are highly dependent upon the quality of the environment.

The Notice in FD-36471 seems most egregious. In the Notice, it is asserted that there would not be a 100% increase in rail traffic on any segment of the line. This does not appear true. Currently, the line at issue experiences zero rail traffic. Upon resuming operations of the line, rail traffic will increase by 100%, increasing from none to some. Given this, it does not appear that CMPR's lease and operation of the rail line are exempt from certain environmental review provisions, particularly related to air quality.

An Environmental Review Must be Prepared

Finally, it appears that contrary to the assertions of RGPC and CMPR, an environmental review must be prepared pursuant to the National Environmental Policy Act. At a minimum an

environmental assessment must be prepared, although we believe that given the scope and context of the impacts, that an environmental impact statement is required.

An environmental assessment is at least required given that the operational changes would exceed the thresholds set forth at 49 C.F.R. § 1105.7(e)(5). In particular, the proposal would lead to an increase of rail traffic of at least 100%. Currently, there is no rail traffic on the line and there has not been for 25 years. RGPC and CMPR are now seeking approval from the STB to resume rail traffic.

An environmental assessment must not only analyze and assess air quality impacts, but must fully address the past, present, and reasonably foreseeable direct, indirect, and cumulative impacts to the full human environment. This includes addressing impacts to:

- Water quality and wetlands, particularly high elevation wetlands that could be impacted by derailments or spills, as well as water quality within important water bodies, including the Eagle River, Arkansas River, Tennessee Creek, and other important streams in the area.
- Fish and wildlife, particularly threatened and endangered species listed under the U.S. Endangered Species Act. The high mountain area of Tennessee Pass is known to support populations of Canada lynx, a protected threatened species. We also believe the Colorado Department of Parks and Wildlife should be consulted to ensure impacts to wildlife and their critical habitats are fully analyzed, assessed, and mitigated.
- Public lands, including designated lands such as Browns Canyon National Monument. Designated in 2015, Browns Canyon National Monument protects a stretch of Arkansas River noted for its pristine nature, wildness, and importance to outdoor recreationists, including river rafters and guides. Other public lands that will be impacted include National Forest lands.
- Socioeconomic impacts, particularly impacts to communities and businesses that are heavily dependent upon the quality of the outdoor environment, especially in relation to recreation within and along the Eagle and Arkansas Rivers.
- Climate impacts related to the direct, indirect, and cumulative release of greenhouse gas emissions. It is incumbent upon the STB to ensure impacts to the climate are fully disclosed and mitigated and that an objective and accurate analysis of energy conservation impacts is prepared.

Additionally, the environmental review must address the impacts associated with reconstruction and/or rehabilitation of the existing rail line. After being abandoned for 25 years, segments of the line are surely in disrepair

We appreciate the opportunity to register our objections and provide our comments. Again, we urge the STB to provide more time for interested parties to submit comments and urge close and careful scrutiny of the proposals from RGPC and CMPR. Their proposal is not a simple matter of paperwork or actions that are very narrow in scope. Their proposal is to

operate a 163 mile line that has been abandoned for 25 years, which will lead to the *de facto* construction of a new line and a 100% increase in traffic. We urge the STB to object to the Notices of Exemption.

Sincerely,

Jeremy Nichols

Re: Docket Numbers FD-34670 and FD-34671

Dear Surface Transportation Board:

We, the undersigned, urge you to reject the Notices of Exemption filed by the Colorado, Midland, and Pacific Railway Company to restart operations on 163 miles of abandoned rail line in Colorado.

This rail line was abandoned in 1996, nearly 25 years ago, due to derailments and other difficulties and costs in operating trains in the Rocky Mountain high country of Colorado.

Since abandonment, this area has come to support vibrant outdoor recreation and conservation that is dependent upon a clean, safe, and healthy environment, including clean air and water. Notably, Browns Canyon National Monument was designated to protect a portion of the Arkansas River, which the current abandoned line runs through.

We are very concerned that this proposal would open the door for dangerous oil train traffic in the Rocky Mountains. The parent company of Colorado, Midland, and Pacific has concurrently applied to build a new railroad in Utah to haul crude oil. Resuming rail operations would provide convenient access for oil to be shipped.

The company seeking the exemptions claims there will be no environmental impacts associated with resuming operations of the rail line. This is preposterous. Restarting operations would increase traffic by 100%. This will lead to a myriad of very serious potential environmental impacts, including:

- Air quality impacts, including impacts to adjacent Class I wilderness areas in the mountains of Colorado.
- Water quality impacts, particularly impacts from potential train derailments that could irreversibly contaminate headwater streams, the Colorado River, Eagle River, and Arkansas River.
- Impacts to the climate related to the burning of fossil fuels, including the processing and burning of any oil shipped from Utah.
- Impacts to protected lands, including Browns Canyon National Monument and other public lands in the area.

- Impacts to fish, wildlife, plants, and their habitats, in particular imperiled species such as native cutthroat trout and Canada lynx.
- Impacts to communities and businesses that are now more dependent on the quality of the outdoors than ever.

The Notices of Exemption filed by the Colorado, Midland, and Pacific Railway Company are an attempt to sidestep environmental and public scrutiny. The proposal must be rejected.

Sincerely,

[See attached signatories]
