Transcript:

I would like to make a negative comment about the acquisition of the railroad. This railroad is going to be running within a 1000ft of my daughter's bedroom window. You will be carrying hazardous materials, you will be greatly increasing the amount of rail traffic going directly behind my house seriously affecting my property value and cutting off a lot of the city from emergency services. This is wrong! You know it's wrong and we need to stop it now. This is ridiculous. I gladly talk to anybody who wants to talk to me about what I think about this. Thank you.
