Re: Great Lakes Basin Railroad
Docket No. FD-35952

Dear Mr. Navecky:

I am writing in regards to the proposed Great Lakes Basin Railroad. Specifically, I am concerned about the vibrations affecting the numerous old mine shafts in our area. I live in Vienna Township, Grundy County, Illinois. Our township was mined heavily years ago. The GLB Railroad is currently shown to pass within a quarter-mile of my home. The mining maps do not show that there were any mines directly beneath my property, but what is to say that there were shafts there that were not memorialized? What worries me is that the vibrations from the GLB Railroad will cause the old mine shafts to collapse resulting in sink holes and possible damage to properties. I would appreciate if you would take this into consideration during your analysis. Thank you for your time.

Sincerely,

Sara J. Wollgast
