Transcript:

On the purchase of the EJE Railroad. The congestion in our town is out of sight. The roads are 20 miles behind, I mean 20 years behind in improvement, you expect us to have to wait for a train that's two miles long at a crossing that's two lanes wide that should be four lanes wide, this is outrageous. We can not have this kind of congestion with a railroad besides the congestion we already have with the roads. Thank you very much.
