Please do not permit the GLBT railroad to continue its application process and build a railroad. There is no need for such a railroad and it will utterly ruin the community that I live in. To take someone's land by eminent domain for such a project is horrible. The laws that were in place 100 years ago were to build the infrastructure of our country. The communities that build up around them were built knowing that the railroad was in their backyard. We purposefully moved to a country setting that is safe, quiet and peaceful. In no way would we have built our farm in this location if we knew a railroad line was going to be built in the future. A great part of our net worth is in our farm, a net worth that will be greatly reduced if the railroad is in our community. We own a horse farm and the added noise will also be stressful on the animals. The railroad is slated to run quite near our farm. An accident along the line will be devastating to our community. How can a private investor, use government grants be allowed to take our land and build such a monstrosity in our community? A project that cannot even prove that it is necessary to the infrastructure of our country.
