Yeah. I guess I'm being recorded here for a comment. I have a part time job that requires that I drive over those tracks on my way to and from the job and right now with limited train access, there's times where that train track is jammed up with a slow moving train for quite a long period of time every day. So, I can imagine if it doubles in its scope of travel, it's going to be very difficult to travel to and from my job. But I know how I'm almost 54 years old and I know how government works and I know that this is going to be passed because somebody's got some heavy pockets with money being stashed in it and from this, the money's going to talk. And I know it's going to pass without any problem and everybody's going to have to deal with all the problems of it because somebody . . . well probably many people . . . are getting their pockets lined really deep with a lot of money over this. So, I don't worry about it. I know how the government operates. I know why the country's going to hell. And it's going to pass. So, my comments were worthless. Who gives a shit? It's going to pass. So, just do what you're going to do. Have fun with your money while it lasts and somewhere down the road we'll find out a lot of people got their pockets lined with it. That's my comment. Have a good day. Thanks. Bye.
