ATTN: Dave Navecky - Docket No. FD35952

Surface Transportation Board
Office of Environmental Analysis
395 E. Street SW
Washington, DC 20423-0001

Dear Mr. Navecky:

I would like to express my concern over the proposed Great Lakes Basin Transportation, LLC rail line project. Docket # 35952. I oppose the project and ask the Surface Transportation Board to deny the proposal.

Our environmental objections are:

1. Potable Water.

Well for property would be in right of way. This is the only place where we could find water. We drilled three other dry wells.

2. Soil erosion.

We are enrolled in federal program for soil erosion into the Johnny Run Creek due to excess soil erosion.

3. Wildlife Restoration Program.

We are invested to set aside program for natural wildlife renewal, which is working. We have ducks, geese, egrets, pheasant, fox and deer using our property for nesting inhabiting in the location.

Land locking of farm.

The railroad r.o.w. would land lock our farm. As this is our only crossing of creek to the rest of the farm.

Respectfully Submitted
