Message: I speak in opposition to the route plan of this proposed railroad in the Lowell, Indiana area for the following reasons:

1. It bisects our land being used for residential development.
2. The proposed route right-of-way comes within 20 feet of the last home in the second phase of our development,
3. The proposed route is contiguous to the Lowell Middle School and on our property.
4. The proposed route will significantly disturb and disrupt the natural drainage in an already difficult and challenging drainage area.
5. The proposed route will significantly disrupt traffic flow over multiple county roads which surround our land.
6. There are substantially better route options further south of Lowell contiguous to already existing RR right-of-ways.
