STB Finance Docket No. 35087

The Barrington area has very few roads to accomodate the rail traffic we now have, let alone the auto population. The three thruways all have rails crossing them. It can take me 20-30 mins. to drive my child to school (2 1/2 miles from home) Throw in additional rail traffic and we will be gridlocked. I work accross from the track that one child lost his life - this too will increase. We do not have the road system in this town to allow us alternate routes of any kind!
