

September 21, 2008

Dear Mrs Johnson:

I understood by writing I can
voice mine & my wife's opinion against
the acquisition of the EJ & E R.R.

The problems this sale would
create is unimaginable to people
not living in this area. With the
huge increase in population which
spawns an increase in traffic. The
main and secondary roads are congested
and back up all day, every day;
not only with vehicles, but with school
buses, and trucks trying to get on &
off of expressways. The roads as they
stand now are almost at the point
of not being able to handle delays,
due to extra long trains, which
leads to our constant road
constructions. The majority of our
roads are only two lanes.

Lastly, this will contribute to pollution, extra travel time.

& a waste of gasoline. Today nobody can afford higher gas prices.

The routes used by Canadian National Railway Corporation presently will not add to our or their problems.

Please consider
an alternative.

Thank you

Ed Henke
