Transcript:

I'm calling about the proposal by Canadian National Railway Corporation and I wanted to express my no for the vote, I would encourage you to vote no. I believe that there is not only the environmental concerns, there's the concerns that there is no plans to do any upgrades, at least in the near future and while all these trains have been going through Chicago and their surrounding suburbs, they've made overpasses and they've made all these arrangements throughout the years and now you're talking about taking over the train tracks out here where people have built and everything is on the street level and it would cause a major, major back up. I work in Oreland Park, it's about a 23 mile drive, and I do in fact, cross over the railroad on Renwick and it would seriously impede my to and from work, and there's other places I go throughout the Joliet, Plainfield, Shorewood area and it would aversely affect me and my transportation. I strongly urge the Congressmen to deny this and thank you
