How will CN's proposed acquisition of the EJ&E impact you?

I worked for the EMD division of G.P. He built the locomotives. The average length of a RR Car is 65-80 ft long. A 200 car cut of length will be approx. 3 mi. long. There is also a RR intersection west of Barrington where the U.P. & E J & E tracks intersect. If a 200 Car train is stopped at the intersection, the train would block about 3 mi. or 5 or 6 intersections. The traffic would be tremendous and back up for miles.
