Transcript:

I believe that you should not allow the Canadian National purchase of the EJ & E lines because CN has not demonstrated any willingness to meet the needs of the communities along the EJ&E line or to provide long-term commitment to the region. We have the issues of the Starline and Amtrak service expansion in the Chicago area and a 400% increase in rail traffic along those lines will severely impact communities along that area. So, again, I request that the STB deny CN's purchase of the EJ&E unless they can put forth sufficient mitigation and help ease the burden of the taxpayers in this community. Thank you.
