Transcript:

I'm calling about the EJ railroad that's going to go right through my backyard. If you are environmental people you should know that 28 trains coming a mile long through your property everyday is so hazardous, it isn't even funny. We are cut off from everything here in Frankfort. If we had an emergency, the fire department, the ambulance, the police, they can not get to our house. The railroads are totally blocked off. There is no way in or out with this railroad coming through our property and the environment with hazardous waste traveling through our properties which are on, near, or quite near the railroad tracks it is going to be bad for our environment, for our children, for everybody. How you could even think of purchasing this railroad is beyond me, because it has hazardous waste running through the neighborhood and they said expect at least one accident on this a year because there's going to be so many trains going through and you probably won't be able to make a phone call with 28 trains going through a day. I am so upset that the people in Washington have the nerve to even have this come to this point and they have done nothing is beyond me. This must be taken care of because we're here paying big taxes and they expect us to pay more. They want us to pay for their improvements. That is idiotic, like everything else the government does. I am totally, totally unhappy about this whole situation. I sure hope they take this into consideration when they vote because everybody for 50 miles around is totally upset with what this government has done. Thank you and good bye.
