Hello,

I have a few questions after reading through your plan.

1. I noticed that you have 2 options, one being "The Craig Route" and the other "The Wells Draw Route" I favor these, even though it will cost more money because it will not be on tribal land. I worry that the UTE tribe will somehow try to take ownership of the track, and because it would be on their lands. I also fear that they may try to stop operation of the track without being compensated for the land use because the tracks will be on their land.
2. I also worry about how much our taxes will go up. We as Citizens of the USA are being taxed to death, and the possibility that the UTE tribe will not be taxed because it will be on federal land or tribal land, and I for one just can't keep affording to pay more taxes. I think it is a good idea to get the railroad here because it can make our economy better, and hopefully increase jobs for our great community.

I do look forward to hearing back from you soon.

Thanks for your time,

Nancy

Have a Great Day!
