RE: Docket No. 35087

I am writing in support of the proposed acquisition of the EJ&E Railway by the CN. I feel that this makes a lot sense for rail transportation in the Chicago region by reducing the chronic rail traffic congestion in the area. The EJ&E that is now under-utilized would make for a more efficient way of moving rail traffic around the region. Public safety would be greatly enhanced and the people of the Chicago area would greatly benefit.

Thank You,

Robert Olson
