To Whom it may Concern.

The train track should go above the state Canal, below the power lines all the way to the Highway 50 junction that goes to scipis.

The loading complex could be on the north side of the Highway. The trucks could haul coal up to it and save Silina from all that dust and it's on a level grade.

This would be the Cheapest, Cleanest, and Best way.

LEAVE THE FARMERS
ALONE!

That way there would be no interference with Canals and Irrigation systems.
