Surface Transportation Board

Attn: Phillips Johnson-Ball,

RE: Env. Filing STB, Fin. Dock 35087

I am a resident of Frankfort, Illinois. I plead with you to deny the Canadian Company from purchasing the railroads which go thru our residential community. We are very concerned that the dramatic increase in rail traffic will prove extremely dangerous to not only our children and schools, but also to persons such as me, who is a senior citizen and depends on open roads to hospitals and medical facilities which are so critical to our continuing well being.

In addition the prospect of increased taxes due to the huge amounts of money required to make the crossings safer which it seems the Canadian Company wants us at the local level to pay. This seems unconscionable to me.

Please take our serious concerns in consideration which you make your decision.

Very Sincerely yours,

EDWARD WOLF
