Transcript:

I work and live in the same community of Plainfield and I do have to cross the railroad tracks to and from work and it is already a huge inconvenience and I do plan my arrivals and departures based on the trains, current train schedule. My building where I work is like half a mile away from the railroad tracks and the traffic buildup due to trains currently running is huge. Our traffic is already more than our streets can handle and the added railway crossings, the numerous railway crossings will hugely impact our town, village, commute, noise, the noise is unbelievable, I can hear it from my home and I'm three miles away from the railroad tracks, and not to mention the emergency response time from our fire department and other emergency agencies. They too have to cross those same railroad tracks to get to many homes and that is a huge concern of mine. So please do all you can to stop the acquisition of this railway system happening. Thank you
