RE:Docket No FD-35952

Dear Mr. Navecky:

I have farms and houses in Grundy County, Illinois and will be greatly affected by the proposed unnecessary rail road..

Eminent domain for railroads was instituted 150 years ago when our country needed it so railroads could connect the country. It's not needed today. I urge you to reject the application from GLB Railroad. The damage to the environment will enormous, as will the affect on property values. .

The rail line is not needed; it only creates a profit opportunity for the railroads. Our current infrastructure is easily supporting the rail traffic; GLB's proposal is only for their benefit, not the citizens of Illinois and Indiana.

Sincerely,

Douglas E. Croft
