

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

The proposed acquisition of the ETHE Railroad by foreign-owned Can. National will have a disastrous impact on the community where I live in terms of safety, environmental impact & will severely affect the property values for all homes & businesses in the area. The hardship created by having 20 mile-long trains crossing numerous community roads, emergency accesses, housing developments, wetlands & forest preserves each day. I implore you not to approve this acquisition.
