Dear Mr. Johnson-Ball,

As a resident of Lake Zurich, FL, I  
am writing to express my concern over  
the pending acquisition of E J + E by  
Canadian National. During the past fifteen  
years I have seen a gradual increase  
in the amount of train traffic which has  
already created increased waiting  
at crossings. Based on CN's plans to  
redirect traffic to E J + E line, the  
amount of traffic will have a huge  
negative impact, from increased noise,  
to environmental pollution (CN is  
already dumping materials → #35087

up and down the tracks right  
next to the tracks themselves. Huge  
barrels and black plastic bags .... since  
when is this area considered a  
garbage dump??

Please consider these environmental  
impacts when you consider this  
acquisition and do not allow  
CN to Acquire EIT+E.

Thank you for reading  
this, and for your concern.

Sincerely,

Mary Bennett
