EI - 20744

Dec. 10, 2014

Mr. Dave Navecky, Surface Transportation Board

395 E Street , SW

Washington DC 20423-0001

Re: Docket No FD 35852

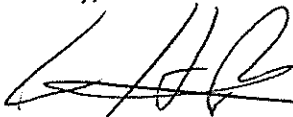

Dear Mr Navecky,

Thank you for the opportunity to publically comment on the outrageous "Port Canaveral Rail Extension" proposal. I believe it is abundantly obvious that this proposed rail extension is replete with a host of environmental concerns to both the Merritt Island National Wildlife Refuge and the Indian River Lagoon and important security concerns for Kennedy Space Center...as well.

It almost seems so outrageous that one could possibly come to the belief that the Canaveral Port Authority made this proposal as a joke. Unfortunately that is not the case. Also unfortunately, there appears to be a viable alternative, i.e; taking advantage of the proposed widening of SR 528, that almost completely ameliorates both the environmental and security concerns mentioned above. This alternative appears to be completely ignored by the Authority.

Please accept this input as..."completely opposed" to the "Port Canaveral Rail Extension" as currently proposed.

Sincerely,

Lawrence H. Baker Lt Col, USAF Retired
