As a doctor, it concerns me about the impact of a 4-fold increase in train traffic will have on the air quality and environment. Air quality, because these trains go through housing areas with high children populations. I'm sure their health will be impacted.

Pollution & noise will not only affect people but also the wildlife. Now in Lombossee Creek Preserve, which abuts the tracks, coyotes, raccoons, beavers, muskrats, large snapping turtles and many other creatures live. They won't be there after the increase in pollution & noise caused by the increase in train traffic.

Has CNR given plans on how they will control pollution, noise & contamination? How this increase in train traffic will influence wildlife? I haven't seen anything. I bet they wouldn't get away with this in a heavily populated part of Canada!

What scoping meeting did you attend? (Please circle): Mundelein, Barrington, Joliet, Matteson, Gary, West Chicago, Chicago.
