

I object to the Canadian National Railroad (CN) purchase of the EJ&E freight line from U.S. Steel. CN's plans to use the line as a Chicago bypass route for its freight traffic will greatly impact the quality of everyday life for communities around the rail line.

I am particularly concerned about blocked traffic flow, 911 emergency response delays, and increased noise & noxious fumes that will result from this acquisition. I fear the lengthy travel delays will hurt local businesses and the economy, and devalue our homes and property.
