Eminent domain should only be for State and Federal projects. We definitely do not want either one of these private funded projects. Railroad and expressway are going to be major obstruction to farmers as they travel between fields because of few crossings that are planned to be built. There is no demand or need by the people in the area and no need by other railroads in the area for another railroad or expressway. One railroad with its noise and blocked roads is enough. You would not want either one of these in your back yard either. This is going to devalue my property. No to either of these two projects.
