#E1-670 Feb 20 -
R2

RECEIVED
FEB 26 2007

The proposed rail will create traffic congestion along with safety hazards for train + vehicles colliding at crossings as many persons use this route to commute work + home.

The Dust by the train + grinding will create additional allergies to humans not to mention pollution to the existing mammals + wild life, air covering with fine dust causing mental suffocation to man + plant life.

The Dust + oil from the rail system will Pollute groundwater + shallow water wells.

The rail vibration + loading will collapse shallow wells and leave the area residents with out water or Polluted Drinking water.

The rail system will also turn a beautiful + Pleasant Farming + ranching Community to virtual Purgatory as one will want to live + Property will eventually be unsellable and

(over)

loss of revenues and the
destruction of a historical
area and loss of good farm
land and farmers.

The Large Corporation is do not
care less about the environment
Public health or wildlife
as long as the Corporation
can turn over a Profit to suit the
self.

The Rail and quarry will not
produce any or very little
revenue or economic impact
on the community or country
or increased population.
