Dear Consulting Party,

Thanks to those of you who participated in our first Section 106 consulting party call for the Tongue River Railroad Construction (TRRC) Project held on February 11th. We have drafted the meeting notes and have attached them below. Please let me know if you believe there are any errors in the notes or if we did not accurately capture what you said.

During the call, participants requested that we make use of the information that was presented by Conrad Fisher and others at the first Tongue River Section 106 consulting party meeting held in Rapid City, SD in January 2012. I have attached the link to those meeting minutes [here](#). I also agreed to provide you with the link to a letter and attached report that was submitted by the Northern Cheyenne Tribe as part of the EIS scoping process. To link to that document, click [here](#).

Based on information provided by those on the call, it appears the week of April 15th would work best for our first in-person consulting party meeting. Conrad Fisher has recommended that the meeting be held in Lame Deer, MT. During the meeting, we intend to provide transportation for all to view the project area.

We will be holding our **next Section 106 monthly conference call** for the TRRC Project **Monday, March 11th, at 1 PM EST**. We intend to discuss our proposed methodology for the project and planned schedule for field work this summer. Please let me know if there are any particular items that you would like us to include in our meeting agenda.

Please use the following call-in number and password for the call:

Toll-free number: 1-877-423-6338,
Participant Passcode: 364456

As before, I have attached our list of participating parties for the project. I made some changes to the list based on feedback that I received following the first call. Please advise me if you see any errors or needed changes or additions to the contact list.

Thank you!

-Cathy
