The increased traffic in Barrington area would have severe impact on emergency vehicles. Commercial railway traffic would block multiple roads in Barrington area delaying delivery of emergency patients. As a physician I know that minutes matter between life and death as well as between permanent disability. The additional traffic would likely result in injuries injured / ill patients arriving delayed for emergency services. In addition to this multiple school buses cross the tracks and as more trains come through the rate of collisions will increase with compounded by delayed emergency services.

This purchase should not be allowed otherwise it should be underground completely to leave roads open for emergency vehicles
