April 17, 2006

Dear Ms. Johnson-Ball,

I would like to register my strong objection to the Trash Transfer Proposal for the Olin site in Wilmington. The traffic, generated by the trucks loaded with municipal solid waste leaving for landfills, which would have to go through Woburn, is a monumental problem.

Health - we have endured many concerns due to environmental problems through the recent decades. I, personally, have tutored leukemia patients who suffered this disease due to water pollution in industrial areas. These were caused by chemical waste disposal. We have paid our

Does in Woburn and
now we hope to strive
to clean-up the environment
rather than endure more
environmental Hazards.

I thank you for the
time and consideration
you give my letter.

Sincerely,
Maie D. Leen
~~and~~
and

Edward M. Leen
