Suggest EIS Study Include:

1. A thorough study of the potential application of Rail-Highway related Intelligent Transportation System (ITS) technologies to mitigate the impacts of increased rail movements to municipalities (i.e. EMS departments), and individual motorists.
2. A thorough review as to the reasonableness of the discussed purchase price of \$300M given in terms of the "arms length purchase price" of some 200 miles of existing RR ROW, RR operating rights, and in place infrastructure within a major urban area.
