Transcript:

I believe the Canadian National should be allowed to purchase te EJ&E in order to alleviate freight traffic congestion in the Chicago area. Now the EJ&E was there a long time before they built all these highways and thngs in the northwest suburbs that's creating more congestion than I believe a few freight trains will. They can alleviate that will a couple underpasses, or overpass, orsomething like that. Bu along with the Canadian National adding freight trains, I think there should be a provision to allow commuter trains an maybe some Amtrack trains to go through there, that would do a lot more to allieve congestion in the Chicago area than not allowing this to happen. Thank you
