Transcript:

My comment has to do with the fact that a very detailed analysis needs to be done and it needs to be done in terms of what will happen in this area within the next 15 to 20 years, not just 5 years. This is an area of heavy growth and we have concerns about emergency response times based on the trains that will be coming through here, we're concerned about the environmental impacts and the quality of air in this area, as well as transportation issues, related to busing of students, which are both south and north of the track lines that will now have increased lengths of trains, as well as increased frequency. I urge the Board to be very, very careful in their analysis of the impact. Now is the time to be careful, anything in the future will be basically a done deal. Thank you
