NS resent the shapes file yesterday. So they should have both the new and old ones.

I'll call you tomorrow on the other abandonment.

Yes, I am counsel for NS on all abandonments.

Subject: Re: Fw: Roanoke Cement Company Abandonment

Bill,

Andrea Kampinen at DHR is aware of this previous study. I brought it to her attention back at the beginning of the process and it is also noted in the EA. She explained that the Section 106 folks at DHR usually request a new analysis when the previous one is more than a year old. Based on the emails below, it seems that maybe they have decided that the previous study can be used after all.

I just received an email from Andrea suggesting that NSR hold off on submitting a new shapefile because she may be able to work with the maps I sent her along with the EA and the Final EA. If its already in the works to send the shapefile, then I wouldn't worry about it. I apologize for the conflicting messages on that subject.

Finally, are you also now representing NSR on STB Docket No. AB-290 Sub-No.(361X) in Prince Edward County, Virginia? If so, we should touch base at some point regarding that abandonment. Give me a call when you have a chance and I will get you up to speed with what's going on with the environmental and historic review.

Best regards,

Josh Wayland

See below emails. Clearly the VA Department of Historic Resources had previously examined this issue and had determined that there would be no adverse historic impacts. So hopefully now the other people in that office, the ones we have been dealing with, will get the message and get this moved along.

Russ,

I spoke with the VaDHR and got them the information they needed to find the work done in 2012. As you can see below they were unaware that this was a issue they had already reviewed. Hopefully this will mean things move along quickly, I will touch base with them at the end of the week if we don't hear anything before then.

Thanks for the info. The quarry expansion and rail abandonment were entered as separate projects in our database. Now we'll be able to reconcile the files and move our review forward. I'll let you know if we have questions.

Mr. Kirchen

Please find attached a letter from Jeanne Richardson of the U.S. Army Corps of Engineers, regarding the Cultural Resource Survey for our project site.

This letter state that none of the sites on the properties in question are

NRHP eligible. It is important that we are able to move forward with the rail line removal as soon as possible, so please let me know if there is anything else I need to provided you.

Please feel free to call me if you have any further question, or need the survey preformed by Circa.
