

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

STB Finance Docket No. 35087

Date: 9-15-2008

Comments must be submitted by September 30, 2008.

- * When we as American people are asked repeatedly to bear the weight of carrying the expense of paying for expenses that should be the problem of private enterprise it is a sad day.
- * I oppose this acquisition because it will create a massive problem with traffic flow
- * I oppose this acquisition because it will cause my already over bearing taxes to go up
- * I oppose this acquisition because it will destroy the quality of life, with dangerous and toxic railway cars going past my house.
- * I oppose this acquisition because the noise level in my subdivision will be greatly increased with fast, long trains going by every 40 minutes or so.
- * I oppose this acquisition because it will lower the value of my new home that I spent a lifetime of hard labor to be able to purchase.
- * The fact that my quality of life, my real estate taxes, my safety, my investment of a new home will all be compromised

I feel if this goes through when can we ever again have faith in our system that we the people have a voice
