Transcript:

We have lived here for 40 years and we are calling to make comments on the draft environmental impact statement. We thoroughly and absolutely support the Canadian Natioanl Railroad's purchase of the EJ&E Railroad. We have lived here for 40 years and have encountered trains everywhere, there are 22 trains that run everyday and they need to be rerouted to other communities and circumvented around Chicago and it would certainly help relieve the traffic, relieve the trains that we must sit and wait, many trains are very, very long, and many trains are sitting there waiting to be acknowledged so that they can actually run on the tracks,they're waiting and just wasting gas, so that they can go through Chicago. We have to close the windows at night because of the trains connecting on the tracks, you can hear that, and their horns and then waiting in traffic is incredible in this town, we have been very patient people, but the time is over and other communities need to cooperate with us and have trains as well as us. 22 trains is more than any community should have. Thank you so much for listening, we absolutely support this purchase of the EJ&E Railroad, the Canadian Railroad. Thank you for listening to our message and we hope this makes an impact on a positive decision to reroute the trains for Chicago, from South Holland area. Thank you for listening, bye bye
