Message:

Dear Member;
we have lived in Plainfield for 6 years now and the train trafic and commuter traffic has doubled. as a result this combination has increased our travel time on average of 20 minutes to travel less than three miles. not to mention the constant concern of the need of medical or emergeny treatment (which could result in death)brought on by the slow moving and on occasion stalled trains. we are averaging 18 trains a day and to increase it to 42 is community suicide. please rethink this transaction as it will only benefit the railroad and destroy the local community and local businesses.
