(a) Parent is a "reporting issuer" or the equivalent and not on the list of reporting issuers in default under applicable Canadian Securities Laws in each of the provinces and territories in Canada. Since December 31, 2018, (i) Parent has filed or furnished all forms, statements, certifications, documents and reports required to be filed or furnished by it with the SEC pursuant to the Exchange Act or the Securities Act since December 31, 2018 (the forms, statements, certifications, documents and reports so filed or furnished by Parent and those filed or furnished to the SEC subsequent to the date of this Agreement, including any amendments thereto, the "Parent SEC Documents") and (ii) Parent has filed or furnished all forms, documents and reports required to be filed or furnished by it with the Canadian Securities Administrators prior to the date of this Agreement (together with the Parent SEC Documents, the "Parent Public Documents"). Each of the Parent Public Documents, in each case as of its date, or, if amended, as finally amended prior to the date of this Agreement, complied, or if not yet filed or furnished, will comply in all material respects with the applicable requirements of the Securities Act, the Exchange Act, the Sarbanes-Oxley Act, the Canadian Securities Laws, as the case may be, and no Parent Public Document as of its date (or, if amended or superseded by a filing prior to the date of this Agreement, as of the date of such amended or superseding filing) contained, and no Parent Public Documents filed with or furnished to the SEC or the Canadian Securities Administrators subsequent to the date of this Agreement will contain, any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading. Parent has not filed any confidential material change report with any Canadian Securities Administrators that, as of the date of this Agreement, remains confidential.

(b) Parent is in compliance in all material respects with the applicable listing and corporate governance rules and regulations of the NYSE and the TSX. Except as permitted by the Exchange Act, including Sections 13(k)(2) and 13(k)(3) thereunder, or the rules and regulations promulgated by the SEC, since December 31, 2018, neither Parent nor any of its Affiliates has made, arranged or modified (in any material way) any extensions of credit in the form of a personal loan to any executive officer or director of Parent.

(c) The consolidated financial statements (including all related notes and schedules) of Parent included in the Parent SEC Documents (or, if any such Parent SEC Document is amended or superseded by a filing prior to the date of this Agreement, such amended or superseding Parent SEC Document) fairly presented in all material respects the consolidated financial position of Parent and its consolidated Subsidiaries, as at the respective dates thereof, and the consolidated results of their operations and their consolidated cash flows for the respective periods then ended (subject, in the case of the unaudited statements, to normal year-end audit adjustments and to any other adjustments described therein, including the notes thereto) and were prepared in all material respects in conformity with GAAP (except, in the case of the unaudited financial statements, as permitted by the SEC) applied on a consistent basis during the periods involved (except as may be indicated therein or in the notes thereto).

Section 4.5 Internal Controls and Procedures.

(a) Parent has established and maintains disclosure controls and procedures as required by Rule 13a-15 under the Exchange Act. Such disclosure controls and procedures are effective in providing reasonable assurance that information required to be disclosed by Parent is recorded and reported on a timely basis to the individuals responsible for the preparation of Parent's filings with the SEC and Canadian Securities Administrators and other public disclosure documents.

(b) Parent maintains a system of internal controls over financial reporting (as defined in Rule 13a-15 under the Exchange Act) that is effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP and includes policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of Parent in all material respects, (ii) provide

reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and to maintain accountability for assets, that access to assets is permitted only in accordance with authorizations of management and directors of Parent and that receipts and expenditures of Parent are being made only in accordance with authorizations of management and directors of Parent, and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Parent's assets that could have a material effect on its financial statements. The records, systems, controls, data and information of Parent and its Subsidiaries that are used in the systems of disclosure controls and procedures and of financial reporting controls and procedures described above are recorded, stored, maintained and operated under means that are under the exclusive ownership and direct control of Parent or a wholly owned Subsidiary of Parent or its accountants, except as would not reasonably be expected to adversely affect or disrupt, in any material respect, the Company's systems of disclosure controls and procedures and of financial reporting controls and procedures or the reports generated thereby.

(c) Parent's management has completed an assessment of the effectiveness of Parent's internal controls over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act for the year ended December 31, 2020, and such assessment concluded that such controls were effective. Parent has disclosed, based on its most recent evaluation of its internal controls prior to the date of this Agreement, to the Parent's auditors and the audit committee of the Parent Board, (i) any significant deficiencies and material weaknesses in the design or operation of internal controls over financial reporting that are reasonably likely to adversely affect the Parent's ability to record, process, summarize and report financial information and (ii) any fraud, whether or not material, that involves management or other employees who have a significant role in internal control over financial reporting. As of the date of its most recent audited financial statements, neither Parent nor its auditors had identified any significant deficiencies or material weaknesses in its internal controls over financial reporting and, as of the date of this Agreement, to the Knowledge of Parent, nothing has come to its attention that has caused it to believe that there are any material weaknesses or significant deficiencies in such internal controls. To the Knowledge of Parent, since December 31, 2018, no material complaints from any source regarding accounting, internal accounting controls or auditing matters, and no concerns from Parent employees regarding questionable accounting or auditing matters, have been received by Parent. To the Knowledge of Parent, since December 31, 2018, no attorney representing Parent or any of its Subsidiaries, whether or not employed by Parent or any of its Subsidiaries, has reported evidence of a violation of securities Laws, breach of fiduciary duty or similar violation by Parent or any of its officers, directors, employees or agents to the Parent's chief legal officer, audit committee (or other committee designated for the purpose) of the Parent Board pursuant to the rules adopted pursuant to Section 307 of the Sarbanes-Oxley Act or any Parent policy contemplating such reporting, including in instances not required by those rules.

Section 4.6 No Undisclosed Liabilities. Except (a) as disclosed, reflected or reserved against in the audited consolidated balance sheet of Parent and its Subsidiaries as of December 31, 2020, and the footnotes to such consolidated balance sheet, in each case set forth in Parent's report on Form 10-K for the fiscal year ended December 31, 2020, (b) as expressly permitted or contemplated by this Agreement, (c) for liabilities or obligations that have been discharged or paid in full, (d) for liabilities arising in connection with obligations under any existing Contract (except to the extent such liabilities arose or resulted from a breach or a default of such Contract), (e) for liabilities and obligations incurred in the Ordinary Course of Business since December 31, 2020 (the "Parent Balance Sheet Date"); or (f) as would not have, individually or in the aggregate, a Parent Material Adverse Effect, neither Parent nor any Subsidiary of Parent has any liabilities or obligations that would be required by GAAP to be reflected on a consolidated balance sheet of Parent and its Subsidiaries.

Section 4.7 Compliance with Law; Permits.

(a) Parent and its Subsidiaries have been since December 31, 2018 in compliance with and not in default under or in violation of any Law applicable to Parent and its Subsidiaries, except where such non-compliance, default or violation would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect.

(b) Parent and its Subsidiaries are in possession of all Permits necessary for Parent and Parent's Subsidiaries to own, lease and operate their properties and assets or to carry on their businesses as they are now being conducted (such Permits, the "Parent Permits"), except where the failure to have any of the Parent Permits would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect. All Parent Permits are in full force and effect and are not subject to any administrative or judicial proceeding that would reasonably be expected to result in modification, termination or revocation thereof, and Parent and each of its Subsidiaries is in compliance with the terms and requirements of such Parent Permit, except where the failure to be in full force and effect or in compliance or where such proceeding would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect.

(c) Neither Parent nor any of its Subsidiaries has received any written notice that Parent or its Subsidiaries is in violation of any Law applicable to Parent or any of its Subsidiaries or any Permit, except for such violations that would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect. There are no Actions pending, threatened in writing or, to the Knowledge of Parent, otherwise threatened that would reasonably be expected to result in the revocation, withdrawal, suspension, non-renewal, termination, revocation, or adverse modification or limitation of any such Permit, except as would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect.

Section 4.8 Anti-Corruption; Anti-Bribery; Anti-Money Laundering.

(a) Parent, its Subsidiaries and, to the Knowledge of Parent, each of their directors, officers and employees and each other Person acting on behalf of Parent or its Subsidiaries are in all material respects in compliance with and for the past five years, have in all material respects complied with (a) the FCPA, and (b) the provisions of all Anti-Corruption Laws. Parent and its Subsidiaries have since December 31, 2018 (i) instituted policies and procedures that are reasonably designed to ensure compliance in all material respects with the FCPA and other anti-bribery, anti-corruption and anti-money laundering Laws in each jurisdiction in which Parent or any of its Subsidiaries operate and (ii) maintained such policies and procedures in full force and effect in all material respects.

(b) None of Parent, its Subsidiaries or, to the Knowledge of Parent, any of their directors, officers and employees and each other Person acting on behalf of Parent or its Subsidiaries has, in the past five years, directly or indirectly, violated any, or been subject to actual or, to the Knowledge of Parent, pending or threatened Proceedings, settlements or enforcement actions alleging violations on the part of any of the foregoing Persons of the FCPA or Anti-Corruption Laws or any terrorism financing Law.

(c) None of Parent, its Subsidiaries or, to the Knowledge of Parent, any of their directors, officers and their employees or any other Person acting on behalf of Parent or its Subsidiaries has, in the past five years: (i) directly or indirectly, paid, offered or promised to pay, or authorized or ratified the payment of any monies or anything of value (A) which would violate any applicable Anti-Corruption Law, including the FCPA, applied for purposes hereof as it applies to domestic concerns, or (B) to any national, provincial, municipal or other Government Official or any political party or candidate for political office for the purpose of (x) influencing any act or decision of such official or of any Governmental Entity, (y) to obtain or retain business, or direct business to any Person or (z) to secure any other improper benefit or advantage; or (ii) aided, abetted, caused (directly or indirectly), participated in, or otherwise conspired with, any Person to violate the terms of any Order.

Section 4.9 Sanctions.

(a) For the past five years, Parent and each of its Subsidiaries has been, and currently is, in all material respects in compliance with relevant Export and Sanctions Regulations.

(b) None of Parent or any of its Subsidiaries, or, to the Knowledge of the Parent, any director, officer, agent, employee or other Person acting on behalf of any of Parent or its Subsidiaries, in their capacity as such, is

currently, or has been for the past five years: (i) a Sanctioned Person or (ii) engaging in any dealings or transactions with, or for the benefit of, any Sanctioned Person or in any Sanctioned Country, to the extent such activities would cause Parent to violate applicable Export and Sanctions Regulations.

(c) For the past five years, Parent and its Subsidiaries have (i) instituted policies and procedures that are reasonably designed to ensure compliance in all material respects with the Export and Sanctions Regulations in each jurisdiction in which Parent and its Subsidiaries operate or are otherwise subject to jurisdiction and (ii) maintained such policies and procedures in full force and effect in all material respects.

(d) For the past five years, neither Parent nor any of its Subsidiaries (w) has been found in violation of, charged with or convicted of, any Export and Sanctions Regulations, (x) to the Knowledge of Parent, is under investigation by any Governmental Entity for possible violations of any Export and Sanctions Regulation, (y) has been assessed civil penalties under any Export and Sanctions Regulations or (z) has filed any voluntary disclosures with any Governmental Entity regarding possible violations of any Export and Sanctions Regulations.

Section 4.10 Environmental Laws and Regulations.

(a) Except as would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect: (i) Parent and its Subsidiaries have for the past five years conducted their respective businesses in compliance with all applicable Environmental Laws; (ii) for the past five years, neither Parent nor any of its Subsidiaries has received any written notices, demand letters or written requests for information from any Governmental Entity alleging that Parent or any of its Subsidiaries is in violation of or has liability under any Environmental Law and there are no legal, administrative, arbitral or other proceedings, claims or actions pending, or to the Knowledge of Parent threatened, against Parent or any of its Subsidiaries alleging any violation of or liability relating to any Environmental Law, in each case other than with respect to matters that have been fully resolved; (iii) to the Knowledge of Parent, for the past five years, there has been no treatment, storage or release of any Hazardous Substance in violation of or as could reasonably be expected to result in liability under any applicable Environmental Law from any properties currently or formerly owned or leased or held under concession by Parent or any of its Subsidiaries or any predecessor; and (iv) neither Parent nor any Subsidiary is subject to any agreement, order, judgment, decree or agreement by or with any Governmental Entity or other third party imposing any liability or obligation relating to any Environmental Law.

(b) The generality of any other representations and warranties in this Agreement notwithstanding, the representations and warranties in this Section 4.10 shall be deemed to be Parent's sole and exclusive representations and warranties in this Agreement with respect to Environmental Laws, Hazardous Substances and any other environmental matters.

Section 4.11 Employee Benefit Plans; Labor Matters.

(a) Section 4.11(a) of the Parent Disclosure Schedules lists all material Parent Benefit Plans.

(b) Parent has made available to the Company, with respect to each material Parent Benefit Plan, each writing constituting a part of such Parent Benefit Plan, including all amendments thereto.

(c) Except as would not have, individually or in the aggregate, a Parent Material Adverse Effect: (i) each Parent Benefit Plan (including any related trusts) has been maintained and administered in compliance with its terms and with applicable Law, including ERISA and the Code to the extent applicable thereto; (ii) each Parent Benefit Plan intended to be "qualified" within the meaning of Section 401(a) of the Code has received a favorable determination letter from the Internal Revenue Service or is entitled to rely on a favorable opinion issued by the Internal Revenue Service, (iii) no Parent Benefit Plan is subject to Title IV of ERISA, (iv) no employee benefit plan of Parent or its Subsidiaries is a Multiemployer Plan or a plan subject to Title IV of ERISA that has two or more contributing sponsors, at least two of whom are not under common control, (v) all

contributions or other amounts payable by Parent or any of its Subsidiaries with respect to each Parent Benefit Plan in respect of current or prior plan years have been paid or accrued in accordance with GAAP and (vi) there are no pending, threatened or, to the Knowledge of Parent, anticipated claims (other than claims for benefits in accordance with the terms of the Parent Benefit Plans) by, on behalf of or against any of the Parent Benefit Plans or any trusts related thereto.

(d) With respect to any Multiemployer Plan contributed to by Parent or any ERISA Affiliate, neither Parent nor any ERISA Affiliate has incurred any withdrawal liability under Title IV of ERISA which remains unsatisfied as to an amount that would reasonably be expected to result in, individually or in the aggregate, material liability to Parent and its Subsidiaries, taken as a whole.

(e) Except as provided in this Agreement or required by applicable Law, the consummation of the transactions contemplated by this Agreement will not, either alone or in combination with another event, (i) entitle any current or former employee or director of Parent or any of its Subsidiaries to severance pay, or any other payment from Parent or its Subsidiaries, (ii) accelerate the time of payment or vesting, or increase the amount of, compensation due to any such employee or consultant, (iii) directly or indirectly cause Parent to transfer or set aside any assets to fund any material benefits under any Parent Benefit Plan or (iv) limit or restrict the right to merge, materially amend, terminate or transfer the assets of any Parent Benefit Plan on or following the First Effective Time.

(f) The execution and delivery of this Agreement, stockholder or other approval of this Agreement or the consummation of the transactions contemplated by this Agreement would not, either alone or in combination with another event, result in the payment of any "excess parachute payment" as defined Section 280G(b)(1) of the Code.

(g) Parent is not a party to nor does it have any obligation under any Parent Benefit Plan to compensate, indemnify or reimburse any person for excise Taxes payable pursuant to Section 4999 of the Code or for additional Taxes payable pursuant to Section 409A of the Code.

(h) Parent and its Subsidiaries are in compliance with their obligations pursuant to all notification and bargaining obligations arising under any Parent Labor Agreements, except as would not have, individually or in the aggregate, a Parent Material Adverse Effect.

(i) Except as would not reasonably be expected to result in, individually or in the aggregate, material liability to Parent and its Subsidiaries, taken as a whole as of the date of this Agreement, (A) there are no strikes or lockouts with respect to any employees of Parent or any of its Subsidiaries; (B) to the Knowledge of Parent, there is no union organizing effort pending or threatened against Parent or any of its Subsidiaries; (C) there is no labor dispute or labor arbitration proceeding pending or, to the Knowledge of Parent, threatened against Parent or any of its Subsidiaries (other than, in each case, routine grievances, including those brought by unions or other collectively represented employees, to be heard by the applicable Governmental Entity); and (D) there is no slowdown, or work stoppage in effect or, to the Knowledge of Parent, threatened with respect to employees of Parent or any of its Subsidiaries.

(j) Except as would not have, individually or in the aggregate, a Parent Material Adverse Effect, since December 31, 2018, Parent and its Subsidiaries have complied with all applicable Laws with respect to employment and employment practices (including all applicable Laws, rules and regulations regarding wage and hour requirements, employee and worker classification, immigration status, discrimination in employment, harassment, employee health and safety, and collective bargaining).

(k) The consent or consultation of, or the rendering of formal advice by, any labor or trade union, works council or similar organization is not required for Parent to enter into this Agreement or to consummate any of the transactions contemplated hereby other than any consent, consultation or formal advice, the failure of

which to obtain or, in the case of consultation, engage in, would not delay or prevent the consummation of the transactions contemplated by this Agreement or otherwise reasonably be expected to result in, individually or in the aggregate, material liability to Parent and its Subsidiaries, taken as a whole as of the date of this Agreement.

Section 4.12 Absence of Certain Changes or Events.

(a) Since the Parent Balance Sheet Date through the date of this Agreement, there has not been any event, change, occurrence or development that has had or would reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect.

(b) From the Parent Balance Sheet Date through the date of this Agreement, Parent and its Subsidiaries have conducted their respective businesses in all material respects in the Ordinary Course of Business.

Section 4.13 Investigations; Litigation. Except as would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect, as of the date of this Agreement, (a) to the Knowledge of Parent, there is no investigation or review pending or threatened by any Governmental Entity with respect to Parent or any of its Subsidiaries; and (b) there are no Actions pending (or, to the Knowledge of Parent, threatened) against or affecting Parent or any of Parent's Subsidiaries or any of their respective assets or properties at law or in equity before, and there are no Orders of any Governmental Entity against or affecting Parent or any of Parent's Subsidiaries or any of their respective assets or properties.

Section 4.14 Parent Information. The information supplied or to be supplied by Parent for inclusion in (i) the Proxy Statement/Prospectus, the Form F-4 or the Management Information Circular will not, at the time the Proxy Statement/Prospectus is first mailed to the Company's stockholders and at the time the Management Information Circular is first mailed to Parent's shareholders, at the time of the Company Stockholder Meeting and the Parent Shareholder Meeting or at the time the Form F-4 (and any amendment or supplement thereto) is declared effective, contain any untrue statement of a material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading; provided, that no representation or warranty is made by Parent with respect to statements made therein based on information supplied by the Company for inclusion or incorporation by reference therein.

Section 4.15 Tax Matters.

(a) Except as would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect: (i) Parent and each of its Subsidiaries have prepared and timely filed (taking into account any extension of time within which to file) all Tax Returns required to be filed by any of them under applicable Law with the appropriate Governmental Entity and all such filed Tax Returns are complete and accurate; (ii) Parent and each of its Subsidiaries have paid all Taxes required to be paid under applicable Law to the appropriate Governmental Entity and have withheld all Taxes required to be withheld by any of them (including in connection with amounts paid or owing to any employee, independent contractor, creditor, customer, stockholder or other third party), except, in the case of clauses (i) and (ii), with respect to matters contested in good faith or for which adequate reserves have been established in accordance with GAAP; (iii) as of the date of this Agreement, there are not pending or, to the Knowledge of Parent, threatened in writing, any audits, examinations, investigations or other proceedings in respect of Taxes of Parent or any of its Subsidiaries, and neither Parent nor any of its Subsidiaries has received written notice within the past six years of any claim made by a Governmental Entity, in a jurisdiction where Parent or any of its Subsidiaries, as applicable, does not file a Tax Return, that Parent or such Subsidiary is or may be subject to income taxation by, or have an obligation to file an income Tax Return in, that jurisdiction; (iv) there are no liens for Taxes on any property of Parent or any of its Subsidiaries, except for Permitted Liens; (v) neither Parent nor any of its Subsidiaries has been a "controlled corporation" or a "distributing corporation" in any distribution occurring during the two-year period

ending on the date of this Agreement that was purported or intended to be governed by Section 355 of the Code; (vi) neither Parent nor any of its Subsidiaries has participated in any "listed transaction" within the meaning of Treasury Regulations Section 1.6011-4(b)(2); (vii) neither Parent nor any of its Subsidiaries (A) is a party to or is bound by any Tax sharing, allocation or indemnification agreement or arrangement (other than such an agreement or arrangement (1) exclusively between or among Parent and/or its Subsidiaries or (2) not primarily related to Taxes and entered into in the Ordinary Course of Business), (B) has been a member of an affiliated, consolidated, unitary or combined group filing a consolidated federal income Tax Return (other than a group the common parent of which is or was Parent or any of its Subsidiaries), or (C) has any liability for the Taxes of any Person (other than Parent or any of its Subsidiaries) under Treasury Regulations Section 1.1502-6 (or any similar provision of federal, state, local or non-U.S. Law), as a transferee or successor; and (viii) neither Parent nor any of its Subsidiaries will be required to include any item of income in, or to exclude any item of deduction from, taxable income in any taxable period (or portion thereof) ending after the Closing Date as a result of (A) any closing agreement, installment sale, or open transaction disposition, (B) any accounting method change or agreement with any Governmental Entity, or (C) any election pursuant to Section 965(h) of the Code, in each case, made prior to the Closing.

(b) Neither Parent nor any of its Subsidiaries has taken or agreed to take any action or knows of any fact, agreement, plan or other circumstance that is reasonably likely to (i) prevent or impede the Mergers, taken together, from qualifying as a "reorganization" within the meaning of Section 368(a) of the Code, (ii) cause the stockholders (other than any Excepted Stockholder) of the Company to recognize gain pursuant to Section 367(a)(1) of the Code, (iii) cause Parent to be treated as a "domestic corporation" pursuant to Section 7874(b) of the Code as a result of the Mergers, or (iv) prevent or impede Parent from being able to deliver the executed Parent Tax Certificate at Closing. As of the date of this Agreement, Parent believes it will be able to provide the Parent Tax Certificate at the Closing.

(c) The generality of any other representations and warranties in this Agreement notwithstanding, the representations and warranties in this Section 4.15 and, to the extent applicable, Section 4.11 shall be deemed to be Parent's sole and exclusive representations and warranties in this Agreement with respect to Tax matters.

Section 4.16 Opinion of Financial Advisor. The Parent Board has received the separate oral opinion(s) of BMO Nesbitt Burns Inc., Evercore Group L.L.C. and Goldman Sachs Canada Inc., to be confirmed by delivery of their respective written opinions, that, as of the date of the respective opinion and based upon and subject to the assumptions, limitations, qualifications and other matters stated therein, the Merger Consideration to be paid to the holders of Company Common Stock in the First Merger pursuant to this Agreement is fair, from a financial point of view, to Parent.

Section 4.17 Financing.

(a) Parent has delivered to the Company true and complete copies as of the date of this Agreement of (i) fully executed debt commitment letters, dated as of the date of this Agreement (including all exhibits and schedules thereto, the "Debt Commitment Letters"), by and among inter alia Parent and the Financing Parties specified therein and (ii) the executed fee letter, dated the date of this Agreement, referenced therein, relating to fees and other terms with respect to the Debt Financing contemplated by such Debt Commitment Letters (with only fee amounts and customary "flex" terms redacted, none of which redacted provisions could affect the conditionality, enforceability, availability, or aggregate principal amount of the Debt Financing). Pursuant to the Debt Commitment Letters, and subject to the terms and conditions thereof, the Financing Parties party thereto have committed to provide Parent and/or its Subsidiary party thereto with the amounts set forth in the Debt Commitment Letters for the purposes set forth therein (the debt financing contemplated in the Debt Commitment Letters, together with any replacement debt financing, including any bank financing or debt securities issued in lieu thereof, the "Debt Financing").

(b) As of the date of this Agreement, the Debt Commitment Letters are in full force and effect and the respective commitments thereunder have not been withdrawn, rescinded, reduced or terminated, or otherwise amended or modified in any respect and, to the Knowledge of Parent, no termination, reduction, withdrawal, rescission, amendment or modification is contemplated (other than as set forth therein with respect to "flex" rights and/or to add additional lenders, arrangers, bookrunners, syndication agents and similar entities who had not executed the Debt Commitment Letters as of the date of this Agreement), and the Debt Commitment Letters, in the form so delivered, constitute the legal, valid and binding obligations of, and are enforceable against, Parent, its Subsidiary party thereto and, to the Knowledge of Parent, each of the other non-affiliated parties thereto, subject, in each case, to the Enforceability Exceptions.

(c) Parent has fully paid (or caused to be paid) any and all commitment fees or other fees required by the Debt Commitment Letters to be paid on or before the date of this Agreement, and will pay in full any such amounts as and when due and payable on or before the Closing Date. Except as expressly set forth in the Debt Commitment Letters, there are no conditions precedent to the obligations of the Financing Parties party thereto to provide the Debt Financing or any contingencies that would permit the Financing Parties party thereto to reduce the aggregate principal amount of the Debt Financing. Assuming the satisfaction of the conditions set forth in Section 6.3(a) and (b), Parent does not have any reason to believe that it will be unable to satisfy on a timely basis all terms and conditions to be satisfied by it in any of the Debt Commitment Letters on or prior to the Closing Date, nor does Parent have knowledge as of the date of this Agreement that any Financing Party party thereto will not perform its obligations thereunder. Except for customary bond engagement letters and for the redacted fee letter provided to the Company in accordance with clause (a) above, as of the date of this Agreement, there are no contracts, agreements, "side letters" or other arrangements to which Parent or any of its Subsidiaries is a party relating to the Debt Commitment Letters or the Debt Financing.

(d) As of the date of this Agreement, no event has occurred which, with or without notice, lapse of time or both, constitutes, or would reasonably be expected to constitute, a default or breach by Parent or its Subsidiaries or, to the Knowledge of Parent, any other party thereto, of any term of the Debt Commitment Letters. The Debt Financing, when funded in accordance with the Debt Commitment Letters and giving effect to any "flex" provision in or related to the Debt Commitment Letters (including with respect to fees and original issue discount), together with cash and the other sources of immediately funds available to Parent on the Closing Date, shall provide Parent with cash proceeds on the Closing Date sufficient for the satisfaction of all of Parent's obligations under this Agreement and the Debt Commitment Letters, including the payment of the Cash Consideration, the Preferred Merger Consideration and any fees and expenses of or payable by Parent or Merger Subs or Parent's other Affiliates, and for any repayment or refinancing of any outstanding indebtedness of the Company and/or its Subsidiaries contemplated by, or required in connection with the transactions described in, this Agreement or the Debt Commitment Letters (such amounts, collectively, the "Financing Amounts").

(e) Parent and Merger Subs expressly acknowledge and agree that their obligations under this Agreement to consummate the Mergers or any of the other transactions contemplated by this Agreement, are not subject to, or conditioned on, the receipt or availability of any funds or the Debt Financing.

Section 4.18 Capitalization of Merger Subs. The authorized capital stock of (i) Surviving Merger Sub consists of 100 shares of common stock, par value $0.01 per share, all of which are validly issued and outstanding, and (ii) First Merger Sub consists of 100 shares of common stock, par value $0.01 per share, all of which are validly issued and outstanding. All of the issued and outstanding capital stock of Surviving Merger Sub is as of the date of this Agreement, and at all times through the Second Effective Time will be, owned directly by Parent; and all of the issued and outstanding capital stock of First Merger Sub is as of the date of this Agreement, and at all times until immediately prior to the First Effective Time will be, owned directly by Surviving Merger Sub. There is no outstanding option, warrant, right or any other agreement pursuant to which any Person other than Parent may acquire any equity securities of Surviving Merger Sub or First Merger Sub. Neither Surviving Merger Sub nor First Merger Sub has conducted any business prior to the date of this Agreement, and prior to the First Effective Time (in the case of Surviving Merger Sub) or the Second Effective

Time (in the case of First Merger Sub) will have, no assets, liabilities or obligations of any nature other than those incident to its formation and pursuant to this Agreement and the Mergers and the other transactions contemplated by this Agreement.

Section 4.19 Required Vote of Parent Shareholders. The affirmative vote of a majority of the votes cast by the holders of outstanding Parent Common Shares represented in person or by proxy and entitled to vote on such matter in favor of the approval of the Parent Share Issuance at the Parent Shareholder Meeting, or any adjournment or postponement thereof, in accordance with the rules and policies of the TSX (the "Parent Shareholder Approval") is the only vote of holders of securities of Parent that is required to approve this Agreement and the transactions contemplated hereby, including the Mergers.

Section 4.20 Finders or Brokers. Except for BMO Nesbitt Burns Inc., Evercore Group L.L.C. and Goldman Sachs Canada Inc., neither Parent nor any Subsidiary of Parent (including each Merger Sub) has employed or engaged any investment banker, broker or finder in connection with the transactions contemplated by this Agreement who would be entitled to any fee or any commission in connection with or on consummation of the Mergers or the other transactions contemplated hereby.

Section 4.21 Certain Arrangements. Since December 31, 2018 through the date of this Agreement, there have been no contracts, undertakings, commitments, agreements, obligations or understandings, whether written or oral, or any material transactions, between Parent, either Merger Sub or any of their respective Affiliates, on the one hand, and any beneficial owner of five percent or more of the outstanding shares of Company Common Stock or any member of the Company's management or the Company Board, on the other hand, relating in any way to the Company, the transactions contemplated by this Agreement or to the operations of the Second Surviving Corporation after the Second Effective Time.

Section 4.22 Ownership of Common Stock. None of Parent, either Merger Sub or any of their respective Subsidiaries or Affiliates beneficially owns, directly or indirectly (including pursuant to a derivatives contract), any shares of Company Common Stock or other securities convertible into, exchangeable for or exercisable for shares of Company Common Stock or any securities of any Subsidiary of the Company, and none of Parent, either Merger Sub or any of their respective Subsidiaries or Affiliates has any rights to acquire, directly or indirectly, any shares of Company Common Stock, except pursuant to this Agreement. None of Parent, either Merger Sub or any of their "affiliates" or "associates" is, or at any time during the last three years has been, an "interested stockholder" of the Company, in each case as defined in Section 203 of the DGCL.

Section 4.23 Solvency. Immediately after giving effect to the consummation of the transactions contemplated by this Agreement (including any financings being entered into in connection therewith):

(a) the Fair Value of the assets of Parent and its Subsidiaries, taken as a whole, shall be greater than the total amount of Parent's and its Subsidiaries' liabilities (including all liabilities, whether or not reflected in a balance sheet prepared in accordance with GAAP, and whether direct or indirect, fixed or contingent, secured or unsecured, disputed or undisputed), taken as a whole;

(b) Parent and its Subsidiaries, taken as a whole, shall be able to pay their debts and obligations in the Ordinary Course of Business as they become due; and

(c) Parent and its Subsidiaries, taken as a whole, shall have adequate capital to carry on their businesses and all businesses in which they are about to engage.

(d) For the purposes of this Section 4.23, "Fair Value" means the amount at which the assets (both tangible and intangible), in their entirety, of Parent and its Subsidiaries would change hands between a willing buyer and a willing seller, within a commercially reasonable period of time, each having reasonable knowledge of the relevant facts, with neither being under any compulsion to act.

Section 4.24 No Other Representations or Warranties; No Reliance. Each of Parent and the Merger Subs acknowledges and agrees that, except for the representations and warranties contained in Article 3, none of the Company or any other Person acting on behalf of the Company has made or makes, and neither Parent nor either Merger Sub has relied on, any representation or warranty, whether express or implied, with respect to the Company, its Subsidiaries or their respective businesses, affairs, assets, liabilities, financial condition, results of operations, future operating or financial results, estimates, projections, forecasts, plans or prospects (including the reasonableness of the assumptions underlying such estimates, projections, forecasts, plans or prospects) or with respect to the accuracy or completeness of any other information provided or made available to Parent, either Merger Sub or any of their respective representatives by or on behalf of the Company. Each of Parent and the Merger Subs acknowledges and agrees that neither the Company nor any other Person acting on behalf of the Company has made or makes, and neither Parent nor either Merger Sub has relied on, any representation or warranty, whether express or implied, with respect to any projections, forecasts, estimates or budgets made available to Parent, either Merger Sub or any of their respective representatives of future revenues, future results of operations (or any component thereof), future cash flows or future financial condition (or any component thereof) of the Company or any of its Subsidiaries. Each of Parent and the Merger Subs acknowledges and agrees that neither the Company nor any other Person acting on behalf of the Company has made or makes, and neither Parent nor either Merger Sub has relied on, any representation or warranty, whether express or implied, with respect to the Company (except for the representations and warranties contained in Article 3).

ARTICLE 5

COVENANTS AND AGREEMENTS

Section 5.1 Conduct of Business by the Company.

(a) From and after the date of this Agreement and prior to earlier of the Control Date and the date, if any, on which this Agreement is earlier terminated pursuant to Section 7.1 (the "Termination Date"), except (i) as may be required by applicable Law, (ii) as may be agreed in writing by Parent (which consent shall not be unreasonably withheld, delayed or conditioned), (iii) as may be expressly contemplated, required or expressly permitted by this Agreement or (iv) as set forth in Section 5.1 of the Company Disclosure Schedules, the Company shall, and shall cause its Subsidiaries to, use its commercially reasonable efforts to (A) conduct its business in all material respects in the Ordinary Course of Business in accordance with the capital allocation policy set forth on Section 5.1(a) of the Company Disclosure Schedule (the "Company Capital Allocation Policy"), and (B) preserve intact in all material respects its business organization and maintain existing relationships and goodwill with Governmental Entities, customers, suppliers, licensors, licensees, creditors, lessors, distributors, employees, contractors and business associates; provided, that no action by the Company or its Subsidiaries with respect to matters specifically addressed by any provision of Section 5.1(b) shall be deemed a breach of this sentence unless such action would constitute a breach of such other provision.

(b) From and after the date of this Agreement and prior to the earlier of the First Effective Time and the Termination Date (other than with respect to the covenants set forth in Sections 5.1(b)(i), (ii), (iii), (iv), (v), (vi), (vii), (x), (xiii), (xv), (xvi), (xvii), (xviii) and (xxi), each of which shall apply from and after the date of this Agreement and prior to the earlier of the Control Date and the Termination Date), except (w) as may be required by applicable Law, (x) as may be agreed in writing by Parent (which consent shall not be unreasonably withheld, delayed or conditioned), (y) as may be expressly contemplated, required or expressly permitted by this Agreement or (z) as set forth in Section 5.1 of the Company Disclosure Schedules, the Company:

(i) shall not, and shall not permit any of its Subsidiaries that is not wholly owned to, authorize or pay any dividends on or make any distribution with respect to its outstanding shares of capital stock (whether in cash, assets, stock or other securities of the Company or its Subsidiaries), except (A) quarterly cash dividends paid by the Company on the outstanding shares of Company Common Stock consistent with

the Company Capital Allocation Policy, appropriately adjusted to reflect any stock dividends, subdivisions, splits, combinations or other similar events relating to the shares Company Common Stock, (B) dividends paid by the Company on the outstanding shares of Company Preferred Stock in accordance with the terms thereof and (C) dividends and distributions paid by Subsidiaries of the Company to the Company or to any of the Company's other wholly owned Subsidiaries;

(ii) shall not, and shall not permit any of its Subsidiaries to, split, combine or reclassify any of its capital stock or issue or authorize or propose the issuance of any other securities in respect of, in lieu of or in substitution for shares of its capital stock, except as may be permitted by Section 5.1(b)(vi), and except for any such transaction by a wholly owned Subsidiary of the Company that remains a wholly owned Subsidiary after consummation of such transaction;

(iii) shall not, and shall not permit any of its Subsidiaries to except in the Ordinary Course of Business, hire any employee or engage any independent contractor (who is a natural person) or terminate the employment of any employee of the Company or any of its Subsidiaries or increase the compensation or other benefits payable or provided to the Company's or any of its Subsidiaries' directors or employees, except that, notwithstanding the foregoing, except as required pursuant to the terms of any Company Benefit Plan in effect as of the date of this Agreement, the Company shall not, and shall not permit any of its Subsidiaries to (A) grant any transaction or retention bonuses, (B) grant any Company Equity Awards or other equity or long-term incentive compensation awards, or (C) enter into any employment, change of control, severance or retention agreement with any employee of the Company or any of its Subsidiaries (except (y) for severance agreements entered into with employees in the Ordinary Course of Business in connection with terminations of employment, providing for severance in accordance with the terms of the applicable Company Benefit Plan in effect as of the date of this Agreement or (z) for employment agreements terminable on no more than 90 days' notice without penalty);

(iv) shall not, and shall not permit any of its Subsidiaries to, materially change financial accounting policies or procedures or any of its methods of reporting income, deductions or other material items for financial accounting purposes, except as required by GAAP or SEC rule or policy;

(v) shall not adopt any amendments to the Organizational Documents of the Company or any of its Significant Subsidiaries, other than amendments solely to effect ministerial changes to such documents;

(vi) except for transactions among the Company and its wholly owned Subsidiaries or among the Company's wholly owned Subsidiaries, shall not, and shall not permit any of its Subsidiaries to, issue, sell, pledge, dispose of or encumber, or authorize the issuance, sale, pledge, disposition or encumbrance of, any shares of its capital stock or other ownership interests in the Company or any Subsidiaries of the Company or any securities convertible into, exercisable for or exchangeable for any such shares or ownership interests or take any action to cause to be vested any otherwise unvested Company Equity Award (except as otherwise provided by the terms of this Agreement or the express terms of any such Company Equity Award), other than (A) issuances of shares of Company Common Stock in respect of any exercise of or settlement of Company Equity Awards outstanding on the date of this Agreement or as may be granted after the date of this Agreement as permitted under this Section 5.1(b), (B) Permitted Liens and (C) pursuant to existing agreements in effect prior to the execution of this Agreement (or refinancings thereof permitted pursuant to Section 5.1(b)(viii)(B));

(vii) except for transactions among the Company and its Subsidiaries or among the Company's wholly owned Subsidiaries, shall not, and shall not permit any of its Subsidiaries to, purchase, redeem or otherwise acquire any shares of its capital stock or any rights, warrants or options to acquire any such shares, other than the acquisition of shares of Company Common Stock from a holder of Company Equity Awards in satisfaction of withholding obligations or in payment of the exercise price;

(viii) shall not, and shall not permit any of its Subsidiaries to, incur, assume, or guarantee, any indebtedness for borrowed money, other than in the Ordinary Course of Business, except for (A) any indebtedness among the Company and its wholly owned Subsidiaries or among the Company's wholly

owned Subsidiaries, (B) any indebtedness incurred to replace, renew, extend, refinance or refund any existing indebtedness of the Company or its Subsidiaries (including indebtedness incurred to repay or refinance related fees, expenses, premiums and accrued interest), (C) guarantees or credit support provided by the Company or any of its Subsidiaries for indebtedness of the Company or any of its wholly owned Subsidiaries, to the extent such indebtedness is (1) in existence on the date of this Agreement or (2) incurred in compliance with this Section 5.1(b)(viii), (D) indebtedness incurred pursuant to agreements in effect prior to the execution of this Agreement (or replacements, renewals, extensions, or refinancings thereof) and (E) other indebtedness in an aggregate principal amount outstanding at any time incurred by the Company or any of its Subsidiaries that is consistent with the Company Capital Allocation Policy;

(ix) shall not, and shall not permit any of its Subsidiaries to make any loans, advances, guarantees or capital contributions to or investments in any Person (other than between the Company or any of its wholly owned Subsidiaries, on the one hand, and any of the Company's wholly owned Subsidiaries, on the other hand) in excess of $35 million individually or $50 million in the aggregate;

(x) shall not, and shall not permit any of its Subsidiaries to, sell, lease, license, transfer, exchange or swap, or subject to any Lien (other than Permitted Liens), or otherwise dispose of, any material portion of its businesses, properties or assets, including the capital stock of its Subsidiaries but excluding Intellectual Property, other than in the Ordinary Course of Business, and except (A) pursuant to existing agreements in effect prior to the execution of this Agreement (or refinancings thereof permitted pursuant to Section 5.1(b)(viii)(B)), (B) transactions among the Company and its Subsidiaries or among the Company's Subsidiaries or (C) for consideration not in excess of $25 million individually or $50 million in the aggregate;

(xi) shall not, and shall not permit any of its Subsidiaries to enter into any Contract with a term greater than two years, that may not be terminated by the Company or any of its Subsidiaries without cause, and would have been a Company Material Contract had it been entered into prior to this Agreement, terminate or modify, amend or waive any material rights under any Company Material Contract in any material respect in a manner that is adverse to the Company, in each case, other than in the Ordinary Course of Business or as otherwise contemplated by this Section 5.1(b);

(xii) shall not, and shall not permit any of its Subsidiaries to, acquire assets (other than pursuant to any capital expenditures permitted by Section 5.1(b)(xiv)) from any other Person with a fair market value or purchase price in excess of $25 million individually or $50 million in the aggregate in any transaction or series of related transactions, in each case, including any amounts or value reasonably expected to be paid in connection with a future earn-out, purchase price adjustment, release of "holdback" or similar contingent payment obligation, or that could reasonably be expected to prevent, materially delay or materially impair the ability of the Company to consummate the Merger and the other transactions contemplated by this Agreement, other than acquisitions of inventory or other goods in the Ordinary Course of Business;

(xiii) shall not, and shall not permit any of its Subsidiaries to, settle, pay, discharge or satisfy any Action, other than any Action that involves only the payment of monetary damages not in excess of $15 million for any individual Action or $25 million in the aggregate over the amount reflected or reserved against in the balance sheet (or the notes thereto) included in the Company SEC Documents relating to such Actions and would not result in (x) the imposition of any Order that would restrict the future activity or conduct of the Company or any of its Subsidiaries (excluding, for the avoidance of doubt, releases of claims, confidentiality and other *de minimis* obligations customarily included in monetary settlements) or (y) a finding or admission of a violation of Law;

(xiv) shall not, and shall not permit any of its Subsidiaries to, make or authorize any capital expenditures other than (A) capital expenditures not in excess of $700 million in the aggregate in any 12-month period or (B) other capital expenditures to the extent necessary to restore service to Company railroads, repair improvements on Company real estate or guarantee safety in the event of railroad accidents or incidents (natural or otherwise) affecting railroad operations or real estate;

(xv) shall not, and shall not permit any of its Subsidiaries to, terminate or permit any material Company Permit to lapse, other than in accordance with the terms and regular expiration thereof, or fail to apply on a timely basis for any renewal of any renewable material Company Permit (excluding, in each case, any Company Permit that the Company, in its reasonable judgment, no longer believes to be material or necessary to the conduct of its businesses);

(xvi) shall not, and shall not permit any of its Subsidiaries to, adopt or enter into a plan of complete or partial liquidation, dissolution, merger, consolidation, restructuring, recapitalization or other reorganization of the Company or any of its Subsidiaries, except for any such transactions between or among the Company's Subsidiaries or between or among any of the Company's Subsidiaries and the Company;

(xvii) shall not, and shall not permit any of its Subsidiaries to, enter into any new line of business that is not reasonably related to the existing business lines of the Company and its Subsidiaries;

(xviii) shall not, and shall not permit any of its Subsidiaries to, reorganize, restructure or combine any railroads or railroad operations if any such action would result in the Company's Subsidiaries other than The Kansas City Southern Railway Company being classified as a Class I railroad by the STB;

(xix) other than consistent with past practice, shall not (A) make (other than in the Ordinary Course of Business), change or revoke any material Tax election, (B) change any material method of Tax accounting or Tax accounting period, (C) file any amended Tax Return with respect to any material Tax, (D) settle or compromise any material Tax proceeding for an amount in excess of $10 million individually or $25 million in the aggregate over the amount reflected or reserved against in the balance sheet (or the notes thereto) included in the Company SEC Documents relating thereto or enter into any closing agreement relating to any material Tax, (E) surrender any right to claim a material Tax refund, or (F) agree to an extension or waiver of the statute of limitations with respect to the assessment of any material Tax without notifying Parent in writing reasonably promptly after entering any such agreement;

(xx) shall not, and shall not permit any of its Subsidiaries to become a party to, establish, adopt, materially amend, commence participation in or terminate any collective bargaining agreement or other agreement with a labor union, works council or similar organization;

(xxi) shall not, and shall not permit any of its Subsidiaries to enter into any consent decree or similar agreement that, individually or in the aggregate, is material to the Company and its Subsidiaries, taken as a whole;

(xxii) shall not, and shall not permit any of its Subsidiaries to terminate or fail to exercise renewal rights with respect to any insurance policies of the Company and its Subsidiaries in a manner that would (after taking into account any replacement insurance policies) materially and adversely affect the overall insurance coverage of the Company and its Subsidiaries, taken as a whole;

(xxiii) shall not, and shall not permit any of its Subsidiaries to, sell, transfer, lease, license, mortgage, pledge, surrender, encumber, divest, or otherwise dispose of any Company Intellectual Property (other than Permitted Liens) material to the business of the Company or any of its Subsidiaries, except in for non-exclusive licenses of Company Intellectual Property granted in the Ordinary Course of Business;

(xxiv) shall not, and shall not permit any of its Subsidiaries to abandon or otherwise allow to lapse or expire any material Registered Company Intellectual Property, other than lapses or expirations of any Registered Company Intellectual Property that is at the end of its maximum statutory term (with renewals); and

(xxv) shall not, and shall not permit any of its Subsidiaries to, agree, in writing or otherwise, to take any of the foregoing actions.

(c) Nothing contained in this Agreement shall give Parent or either Merger Sub, directly or indirectly, the right to control or direct the Company's or its Subsidiaries' operations prior to the Control Date. Prior to the

Control Date, the Company shall exercise, consistent with the terms and conditions of this Agreement and the Voting Trust Agreement and subject to applicable Law, complete control and supervision over its and its Subsidiaries' operations.

Section 5.2 Conduct of Business by Parent.

(a) From and after the date of this Agreement and prior to earlier of the First Effective Time and the Termination Date, except (i) as may be required by applicable Law, (ii) as may be agreed in writing by the Company (which consent shall not be unreasonably withheld, delayed or conditioned), (iii) as may be expressly contemplated, required or expressly permitted by this Agreement or (iv) as set forth in Section 5.2 of the Parent Disclosure Schedules, Parent shall, and shall cause its Subsidiaries to, use its commercially reasonable efforts to (A) conduct its business in all material respects in the Ordinary Course of Business and (B) preserve intact in all material respects its business organization and maintain existing relationships and goodwill with Governmental Entities, customers, suppliers, licensors, licensees, creditors, lessors, distributors, employees, contractors and business associates; provided, that no action by Parent or its Subsidiaries with respect to matters specifically addressed by any provision of Section 5.2(b) shall be deemed a breach of this sentence unless such action would constitute a breach of such other provision.

(b) From and after the date of this Agreement and prior to the earlier of the First Effective Time and the Termination Date, except (w) as may be required by applicable Law, (x) as may be agreed in writing by the Company (which consent shall not be unreasonably withheld, delayed or conditioned), (y) as may be expressly contemplated, required or expressly permitted by this Agreement or (z) as set forth in Section 5.2 of the Parent Disclosure Schedules, Parent:

(i) shall not, and shall not permit any of its Subsidiaries that is not wholly owned to, authorize or pay any dividends on or make any distribution with respect to its outstanding shares of capital stock (whether in cash, assets, stock or other securities of Parent or its Subsidiaries), except (A) regular quarterly cash dividends paid by Parent on the Parent Common Shares consistent with past practice, appropriately adjusted to reflect any stock dividends, subdivisions, splits, combinations or other similar events relating to the Parent Common Shares, (B) dividends paid by Parent on the outstanding shares of Perpetual 4% Consolidated Debenture Stock of Parent in accordance with the terms thereof and (C) dividends and distributions paid by Subsidiaries of Parent to Parent or to any of Parent's other wholly owned Subsidiaries;

(ii) shall not, and shall not permit any of its Subsidiaries to, split, combine or reclassify any of its capital stock or issue or authorize or propose the issuance of any other securities in respect of, in lieu of or in substitution for shares of its capital stock, except for any such transaction by a wholly owned Subsidiary of Parent that remains a wholly owned Subsidiary after consummation of such transaction;

(iii) shall not, and shall not permit any of its Subsidiaries to, materially change financial accounting policies or procedures or any of its methods of reporting income, deductions or other material items for financial accounting purposes, except as required by GAAP or rule or policy of the SEC or the Canadian Securities Administrators;

(iv) shall not adopt any amendments to the Organizational Documents of Parent, other than amendments solely to effect ministerial changes to such documents;

(v) except for transactions among Parent and its wholly owned Subsidiaries or among Parent's wholly owned Subsidiaries, shall not, and shall not permit any of its Subsidiaries to, issue, sell, pledge, dispose of or encumber, or authorize the issuance, sale, pledge, disposition or encumbrance of, any shares of its capital stock or other ownership interests in any Subsidiaries of Parent or any securities convertible into, exercisable for or exchangeable for any such shares or ownership interests or take any action to cause to be vested any otherwise unvested Parent Equity Award (except as otherwise provided by the terms of this Agreement or the express terms of any such Parent Equity Award), other than (A) issuances of Parent Common Shares (x) in respect of any exercise of or settlement of Parent Equity Awards outstanding on the

date of this Agreement, (y) as permitted under the Debt Commitment Letters or (z) as may be granted after the date of this Agreement in the Ordinary Course of Business, (B) the grant of Parent Equity Awards or other equity compensation awards in the Ordinary Course of Business (and the issuance or transfer of any Parent Common Shares in connection therewith), (C) any Permitted Liens and (D) pursuant to existing agreements in effect prior to the execution of this Agreement;

(vi) shall not, and shall not permit any of its Subsidiaries to, sell, lease, license, transfer, exchange or swap, or subject to any Lien (other than Permitted Liens), or otherwise dispose of, any material portion of its businesses, properties or assets, including the capital stock of its Subsidiaries, other than in the Ordinary Course of Business, and except (A) pursuant to existing agreements in effect prior to the execution of this Agreement, (B) transactions among Parent and its Subsidiaries or among Parent's Subsidiaries or (C) for consideration not in excess of $50 million individually or $100 million in the aggregate;

(vii) shall not, and shall not permit any of its Subsidiaries to, adopt or enter into a plan of complete or partial liquidation, dissolution, merger, consolidation, restructuring, recapitalization or other reorganization of Parent or any of its Subsidiaries, except for any such transactions between or among Parent's Subsidiaries; and

(viii) shall not, and shall not permit any of its Subsidiaries to, agree, in writing or otherwise, to take any of the foregoing actions.

(c) Anything to the contrary set forth in this Agreement notwithstanding, between the date of this Agreement and the earlier of the First Effective Time and the Termination Date, Parent shall not, and shall cause its Affiliates not to, directly or indirectly (whether by plan of arrangement, amalgamation, business combination, merger, consolidation or otherwise), acquire, purchase, lease or license or otherwise enter into a transaction with (or agree to acquire, purchase, lease or license or otherwise enter into a transaction with) any business, corporation, partnership, association or other business organization or division or part thereof, or any securities or collection of assets, if doing so could reasonably be expected to: (i) impose any material delay in the obtaining of, or materially increase the risk of not obtaining, any Consent of any Governmental Entity necessary to consummate the Mergers or any of the other transactions contemplated hereby or the expiration or termination of any applicable waiting period; (ii) materially increase the risk of any Governmental Entity entering an Order prohibiting the consummation of the Mergers or any of the other transactions contemplated hereby; (iii) materially increase the risk of not being able to remove any such Order on appeal or otherwise; or (iv) otherwise prevent or materially delay the consummation of the Mergers or any of the other transactions contemplated hereby (including the Debt Financing).

Section 5.3 Access.

(a) Subject to compliance with applicable Laws, each of the Company and Parent shall (and each shall cause its Subsidiaries to): (i) afford to the other party and to its officers, employees, accountants, consultants, legal counsel, financial advisors and agents and other representatives (collectively, "Representatives") reasonable access, solely for purposes of furthering the Mergers and the other transactions contemplated hereby or integration planning relating thereto, during normal business hours, on reasonable advance notice of not less than two Business Days, throughout the period prior to the earlier of the First Effective Time and the Termination Date, to the other party's and its Subsidiaries' businesses, properties, personnel, agents, contracts, commitments, books and records, other than any such matters that relate to the negotiation and execution of this Agreement, including with respect to the consideration or valuation of the Mergers or any financial or strategic alternatives thereto, or any Company Alternative Proposal or Parent Alternative Proposal, as applicable, and (ii) promptly furnish the other party and its Representatives all other information concerning its business, properties and personnel as may reasonably be requested by the other party; provided, that the Company or Parent, as applicable, may provide such access by electronic means if physical access is not reasonably feasible or would not be permitted under applicable Law (including any COVID-19 Measures).

(b) Subject to compliance with applicable Laws, throughout the period from the First Effective Time until the Control Date (or, as may be applicable in accordance with Section 5.20, the completion of the Post-Closing Disposition), the Company shall (and shall cause its Subsidiaries to) (i) afford to Parent and its Representatives reasonable access, for purposes of furthering the transactions contemplated hereby or integration planning relating thereto, during normal business hours, on reasonable advance notice of not less than two Business Days, to the Company's and its Subsidiaries' businesses, properties, personnel, agents, contracts, commitments, books and records, and (ii) promptly furnish Parent and its Representatives (A) such financial and operating data and other information concerning the Company and its Subsidiaries as may be reasonably requested and is necessary or advisable in connection with any filings contemplated pursuant to Section 5.6 or any Post-Closing Disposition, (B) all reports or other information concerning the Company and its Subsidiaries provided to third parties pursuant to the terms of any outstanding indebtedness of the Company or any of its Subsidiaries and (C) all other information concerning the Company's business, properties and personnel as may reasonably be requested by the other party; provided, that the Company may provide such access by electronic means if physical access is not reasonably feasible or would not be permitted under applicable Law (including any COVID-19 Measures); provided, further, that to the extent access to any information of the Company or any of its Subsidiaries requires the entry of a protective order by the STB, the Company or its applicable Subsidiary shall be required to grant such access only if such order is obtained, subject to the terms of such order.

(c) The foregoing provisions of this Section 5.3 notwithstanding, neither the Company nor Parent shall be required to afford such access or furnish such information if it would unreasonably disrupt the operations of such party or any of its Subsidiaries, would cause a violation of any agreement to which such party or any of its Subsidiaries is a party, would result in a loss of privilege or trade secret protection to such party or any of its Subsidiaries, would result in the disclosure of any information in connection with any litigation or similar dispute between the parties hereto, would constitute a violation of any applicable Law or result in the disclosure of any personal information that would expose the such party to the risk of liability. In the event that Parent or the Company objects to any request submitted pursuant to and in accordance with this Section 5.3 and withholds information on the basis of the foregoing sentence, the Company or Parent, as applicable, shall inform the other party as to the general nature of what is being withheld and the Company and Parent shall use reasonable best efforts to make appropriate substitute arrangements to permit reasonable disclosure that does not suffer from any of the foregoing impediments, including through the use of reasonable best efforts to (i) obtain the required consent or waiver of any third party required to provide such information and (ii) implement appropriate and mutually agreeable measures to permit the disclosure of such information in a manner to remove the basis for the objection, including by arrangement of appropriate clean room procedures (including as set forth in the Clean Team Agreement), if the parties determine that doing so would reasonably permit the disclosure of such information without violating applicable Law or jeopardizing such privilege.

(d) Each of the Company and Parent hereby agrees that all information provided to it or any of its Representatives in connection with this Agreement and the consummation of the transactions contemplated hereby shall be deemed to be "Confidential Information," as such term is used in, and shall be treated in accordance with, the confidentiality agreement, dated as of December 9, 2020, between the Company and Parent (the "Confidentiality Agreement") and, as applicable, the Clean Team Confidentiality Agreement, dated as of March 10, 2021, between the Company and Parent (the "Clean Team Agreement").

Section 5.4 No Solicitation by the Company.

(a) Subject to the provisions of this Section 5.4, from the date of this Agreement until the earlier of the First Effective Time and the Termination Date, the Company agrees that it shall not, and shall cause its Subsidiaries and its and their respective directors and officers not to, and shall use its reasonable best efforts to cause its other Representatives not to, directly or indirectly, (i) solicit, initiate or knowingly encourage or knowingly facilitate any inquiry regarding, or the making or submission of any proposal, offer or indication of intent that constitutes, or would reasonably be expected to lead to, or result in, a Company Alternative Proposal, (ii) engage in, continue or otherwise participate in any discussions or negotiations with any Person regarding a

Company Alternative Proposal or any inquiry, proposal or offer that would reasonably be expected to lead to, or result in, a Company Alternative Proposal (except to notify such Person that the provisions of this Section 5.4 prohibit any such discussions or negotiations), (iii) furnish any nonpublic information relating to the Company or its Subsidiaries in connection with or for the purpose of facilitating a Company Alternative Proposal or any inquiry, proposal or offer that would reasonably be expected to lead to, or result in, a Company Alternative Proposal; (iv) recommend or enter into any other letter of intent, memorandum of understandings, agreement in principle, option agreement, acquisition agreement, merger agreement, joint venture agreement, partnership agreement or other similar agreement with respect to a Company Alternative Proposal (except for confidentiality agreements permitted under Section 5.4(b)); or (v) approve, authorize or agree to do any of the foregoing or otherwise knowingly facilitate any effort or attempt to make a Company Alternative Proposal.

(b) Notwithstanding anything in this Section 5.4 to the contrary, at any time prior to, but not after, obtaining the Company Stockholder Approval, if the Company receives a *bona fide*, unsolicited Company Alternative Proposal that did not result from the Company's violation of this Section 5.4, the Company and its Representatives may contact the third party making such Company Alternative Proposal to clarify the terms and conditions thereof. If (i) such Company Alternative Proposal constitutes a Company Superior Proposal or (ii) the Company Board determines in good faith after consultation with outside legal and financial advisors that such Company Alternative Proposal could reasonably be expected to lead to a Company Superior Proposal, the Company may take the following actions: (A) furnish nonpublic information to the third party making such Company Alternative Proposal (including its Representatives and prospective equity and debt financing sources) in response to a request therefor, if, and only if, prior to so furnishing such information, the third party has executed a confidentiality agreement with the Company having confidentiality and use provisions that, in each case, are not less restrictive in the aggregate to such third party than the provisions in the Confidentiality Agreement are to Parent (it being understood that such confidentiality agreement need not contain any "standstill" or similar provisions or otherwise prohibit the making or amendment of any Company Alternative Proposal), provided, however, that if the third party making such Company Alternative Proposal is a known competitor of the Company, the Company shall not provide any commercially sensitive non-public information to such third party in connection with any actions permitted by this Section 5.4(b) other than in accordance with customary "clean room" or other similar procedures designed to limit the disclosure of competitively sensitive information, and (B) engage in discussions or negotiations with the third party (including its Representatives) with respect to the Company Alternative Proposal. The Company shall promptly (and in any event within 48 hours) notify Parent in writing if: (i) any inquiries, proposals or offers with respect to a Company Alternative Proposal are received by the Company or any of its Representatives or (ii) any information is requested from the Company or any of its Representatives that, to the Knowledge of the Company, has been or is reasonably likely to have been made in connection with any Company Alternative Proposal, which notice shall identify the material terms and conditions thereof (including the name of the applicable third party and, if applicable, complete copies of any written requests, proposals or offers and any other material documents, including proposed agreements). It is understood and agreed that any contacts, disclosures, discussions or negotiations permitted under this Section 5.4(b), including any public announcement that the Company or the Company Board has made any determination contemplated under this Section 5.4(b) to take or engage in any such actions, shall not constitute a Company Change of Recommendation or otherwise constitute a basis for Parent to terminate this Agreement pursuant to Section 7.1(c)(ii). The Company shall keep Parent reasonably informed on a reasonably current basis of any material developments regarding any Company Alternative Proposals or any material change to the terms of any such Company Alternative Proposal and any material change to the status of any such discussions or negotiations with respect thereto.

(c) Except as set forth in this Section 5.4, the Company Board, including any committee thereof, shall not (i) withdraw, withhold, qualify or modify, or propose publicly to withdraw, withhold, qualify or modify, the Company Recommendation, (ii) fail to include the Company Recommendation in the Proxy Statement/Prospectus that is mailed by the Company to the stockholders of the Company; (iii) if any Company Alternative Proposal that is structured as a tender offer or exchange offer for the outstanding shares of Company Common Stock is commenced pursuant to Rule 14d-2 under the Exchange Act (other than by Parent or an Affiliate of

Parent), fail to recommend, within ten Business Days after such commencement, against acceptance of such tender offer or exchange offer by its stockholders; (iv) approve, adopt, recommend or declare advisable any Company Alternative Proposal or publicly propose to approve, adopt or recommend, or declare advisable any Company Alternative Proposal; or (v) approve, adopt or recommend, or declare advisable or enter into, any letter of intent, memorandum of understanding, agreement in principle, acquisition agreement, merger agreement, option agreement, joint venture agreement, partnership agreement or other agreement (other than a confidentiality agreement referred to in and entered into compliance with Section 5.4(b)) with respect to any Company Alternative Proposal (any such action set forth in the foregoing clauses (i) through (v), a "Company Change of Recommendation"). Anything to the contrary set forth in this Agreement notwithstanding, prior to obtaining the Company Stockholder Approval, the Company Board may, in response to a Company Superior Proposal, (x) make a Company Change of Recommendation and/or (y) cause the Company to terminate this Agreement pursuant to Section 7.1(c)(ii); provided, that the Company Board shall not be entitled to make such a Company Change of Recommendation or cause any termination of this Agreement pursuant to Section 7.1(c)(ii) (A) unless the Company shall have given Parent at least five Business Days' written notice (a "Company Superior Proposal Notice") advising Parent of its intention to make such a Company Change of Recommendation or terminate this Agreement, which Company Superior Proposal Notice shall include a description of the terms and conditions of the Company Superior Proposal that is the basis for the proposed action of the Company Board, the identity of the Person making the Company Superior Proposal and a copy of any proposed definitive agreement for such Company Superior Proposal, if any, and the Company shall have negotiated in good faith with Parent (to the extent Parent wishes to negotiate) to enable Parent to make such amendments to the terms of this Agreement as would permit the Company Board not to effect a Company Change of Recommendation or terminate this Agreement in connection with such Company Superior Proposal, and (B) unless, at the end of the five-Business Day period following the delivery of such Company Superior Proposal Notice (the "Company Superior Proposal Notice Period"), after taking into account any firm commitments made by Parent in writing to amend the terms of this Agreement and any other proposals or information offered by Parent during the Company Superior Proposal Notice Period, the Company Board concludes that the Company Superior Proposal giving rise to the Company Superior Proposal Notice continues to constitute a Company Superior Proposal if such amendments were to be given effect; provided, that any material modifications to the terms of the Company Superior Proposal (including any change in the amount or form of consideration) shall commence a new notice period pursuant clause (A) of three Business Days.

(d) Anything to the contrary set forth in this Agreement notwithstanding, prior to obtaining the Company Stockholder Approval, but not after, the Company Board may, in response to a Company Intervening Event, make a Company Change of Recommendation if the Company Board determines in good faith, after consultation with the Company's outside legal counsel, that the failure of the Company Board to take such action would be reasonably likely to be inconsistent with its fiduciary duties under applicable Law; provided, that the Company Board shall not be entitled to make such a Company Change of Recommendation unless (i) the Company shall have given Parent at least five Business Days' written notice (a "Company Intervening Event Notice") advising Parent of its intention to make such a Company Change of Recommendation, which Company Intervening Event Notice shall include a description of the applicable Company Intervening Event and (ii) unless, at the end of the five-Business Day period following the delivery of such Company Intervening Event Notice (the "Company Intervening Event Notice Period"), after taking into account any firm commitments made by Parent in writing to amend the terms of this Agreement and any other proposals or information offered by Parent during the Company Intervening Event Notice Period, the Company Board determines in good faith, after consultation with the Company's outside legal counsel, that the failure of the Company Board to make such Company Change of Recommendation would continue to be reasonably likely to be inconsistent with its fiduciary duties under applicable Law if such amendments were to be given effect.

(e) Nothing contained in this Agreement shall prohibit the Company or the Company Board or any committee thereof from (i) complying with its disclosure obligations under applicable Law or rules and policies of the NYSE, including taking and disclosing to its stockholders a position contemplated by Rule 14d-9 or Rule 14e-2(a) or Item 1012(a) of Regulation M-A under the Exchange Act (or any similar communication to

stockholders) or from issuing a "stop, look and listen" statement pending disclosure of its position thereunder or (ii) making any disclosure to its stockholders if the Company Board determines in good faith, after consultation with the Company's outside legal counsel, that the failure of the Company Board to make such disclosure would be reasonably likely to be inconsistent with its fiduciary duties to the Company's stockholders under applicable Law.

(f) Further to Section 5.4(a), the Company shall (and shall cause its Subsidiaries and its and their respective directors and officers to, and shall use its reasonable best efforts to cause its other Representatives to) promptly terminate any existing discussions and negotiations conducted heretofore with any Person (other than Parent, the Company or any of their respective Affiliates or Representatives) with respect to any Company Alternative Proposal, or proposal or transaction that could reasonably be expected to lead to or result in a Company Alternative Proposal. Further, the Company shall promptly terminate all physical and electronic data access previously granted to such Persons and request that any such Persons promptly return or destroy all confidential information concerning the Company and any of its Subsidiaries and provide prompt written confirmation thereof.

(g) "Company Alternative Proposal" means any proposal, offer or indication of intent made by any Person or group of Persons (other than Parent, either Merger Sub or their respective Affiliates) relating to or concerning (i) a merger, reorganization, share exchange, consolidation, business combination, recapitalization or similar transaction involving the Company, in each case, as a result of which the stockholders of the Company immediately prior to such transaction would cease to own at least 75% of the total voting power of the Company or the surviving entity (or any direct or indirect parent company thereof), as applicable, immediately following such transaction, (ii) the acquisition by any Person of more than 25% of the net revenues, net income or total assets of the Company and its Subsidiaries, on a consolidated basis, or (iii) the direct or indirect acquisition by any Person of more than 25% of the outstanding shares of Company Common Stock.

(h) "Company Superior Proposal" means an unsolicited, *bona fide* written Company Alternative Proposal, made after the date of this Agreement, substituting in the definition thereof "50%" for "25%" and for "75%" in each place each such phrase appears, made after the date of this Agreement, that the Company Board determines in good faith, after consultation with the Company's outside legal and financial advisors, and considering all legal, financial, financing and regulatory aspects of the proposal, the identity of the Person(s) making the proposal and the likelihood of the proposal being consummated in accordance with its terms, would, if consummated, result in a transaction (A) that is more favorable to the Company's stockholders from a financial point of view than the transactions contemplated by this Agreement and (B) that is reasonably likely to be completed, taking into account any regulatory, financing or approval requirements and any other aspects considered relevant by the Company Board.

(i) "Company Intervening Event" means any event, change, occurrence or development that is unknown and not reasonably foreseeable to the Company Board as of the date of this Agreement, or if known or reasonably foreseeable to the Company Board as of the date of this Agreement, the material consequences of which were not known or reasonably foreseeable to the Company Board as of the date of this Agreement; provided, that the receipt, existence or terms of a Company Alternative Proposal shall not be deemed to be a Company Intervening Event hereunder.

Section 5.5 No Solicitation by Parent.

(a) Subject to the provisions of this Section 5.5, from the date of this Agreement until the earlier of the First Effective Time and the Termination Date, Parent agrees that it shall not, and shall cause its Subsidiaries and its and their respective directors and officers not to, and shall use its reasonable best efforts to cause its other Representatives not to, directly or indirectly, (i) solicit, initiate or knowingly encourage or knowingly facilitate any inquiry regarding, or the making or submission of any proposal or offer that constitutes, or would reasonably be expected to lead to, or result in, a Parent Alternative Proposal, (ii) engage in, continue or otherwise participate

in any discussions or negotiations with any Person regarding Parent Alternative Proposal or any inquiry, proposal or offer that would reasonably be expected to lead to, or result in, a Parent Alternative Proposal (except to notify such Person that the provisions of this Section 5.5 prohibit any such discussions or negotiations), (iii) furnish any nonpublic information relating to Parent or its Subsidiaries in connection with or for the purpose of facilitating a Parent Alternative Proposal or any inquiry, proposal, offer or indication of interest that would reasonably be expected to lead to, or result in, a Parent Alternative Proposal; (iv) recommend or enter into any other letter of intent, memorandum of understandings, agreement in principle, option agreement, acquisition agreement, merger agreement, arrangement agreement, amalgamation agreement, joint venture agreement, partnership agreement or other similar agreement with respect to a Parent Alternative Proposal (except for confidentiality agreements permitted under Section 5.5(b)); or (v) approve, authorize or agree to do any of the foregoing or otherwise knowingly facilitate any effort or attempt to make a Parent Alternative Proposal.

(b) Notwithstanding anything in this Section 5.5 to the contrary, at any time prior to, but not after, obtaining the Parent Shareholder Approval, if Parent receives a bona fide, unsolicited Parent Alternative Proposal that did not result from the Parent's violation of this Section 5.5, Parent and its Representatives may contact the third party making such Parent Alternative Proposal to clarify the terms and conditions thereof. If (i) such Parent Alternative Proposal constitutes a Parent Superior Proposal or (ii) the Parent Board determines in good faith after consultation with outside legal and financial advisors that such Parent Alternative Proposal could reasonably be expected to lead to a Parent Superior Proposal, Parent may take the following actions: (A) furnish nonpublic information to the third party making such Parent Alternative Proposal (including its Representatives and prospective equity and debt financing sources) in response to a request therefor, if, and only if, prior to so furnishing such information, the third party has executed a confidentiality agreement with Parent having confidentiality and use provisions that, in each case, are not less restrictive in the aggregate to such third party than the provisions in the Confidentiality Agreement are to the Company (it being understood that such confidentiality agreement need not contain any "standstill" or similar provisions or otherwise prohibit the making or amendment of any Parent Alternative Proposal), provided, however, that if the third party making such Parent Alternative Proposal is a known competitor of Parent, Parent shall not provide any commercially sensitive non-public information to such third party in connection with any actions permitted by this Section 5.5(b) other than in accordance with customary "clean room" or other similar procedures designed to limit the disclosure of competitively sensitive information, and (B) engage in discussions or negotiations with the third party (including its Representatives) with respect to the Parent Alternative Proposal. Parent shall promptly (and in any event within 24 hours) notify the Company in writing if: (i) any inquiries, proposals or offers with respect to a Parent Alternative Proposal are received by Parent or any of its Representatives or (ii) any information is requested from Parent or any of its Representatives that, to the Knowledge of Parent, has been or is reasonably likely to have been made in connection with any Company Alternative Proposal, which notice shall identify the material terms and conditions thereof (including the name of the applicable third party and, if applicable, complete copies of any written requests, proposals or offers and any other material documents, including proposed agreements). It is understood and agreed that any contacts, disclosures, discussions or negotiations permitted under this Section 5.5(b), including any public announcement that Parent or the Parent Board has made any determination contemplated under this Section 5.5(b) to take or engage in any such actions, shall not constitute a Parent Change of Recommendation or otherwise constitute a basis for the Company to terminate this Agreement pursuant to Section 7.1. Parent shall keep the Company reasonably informed on a reasonably current basis of any material developments regarding any Parent Alternative Proposals or any material change to the terms of any such Parent Alternative Proposal and any material change to the status of any such discussions or negotiations with respect thereto.

(c) Except as set forth in this Section 5.5, the Parent Board, including any committee thereof, shall not (i) withdraw, withhold, qualify or modify, or propose publicly to withdraw, withhold, qualify or modify, the Parent Recommendation; (ii) fail to include the Parent Recommendation in the Management Information Circular that is mailed by the Parent to the shareholders of the Parent; (iii) if any Parent Alternative Proposal that is structured as a tender offer or exchange offer for the outstanding Parent Common Shares is commenced pursuant to Rule 14d-2 under the Exchange Act (other than by the Company or an Affiliate of the Company), fail

to recommend, within ten Business Days after such commencement, against acceptance of such tender offer or exchange offer by its shareholders; (iv) approve, adopt, recommend or declare advisable any Parent Alternative Proposal or publicly propose to approve, adopt or recommend, or declare advisable any Parent Alternative Proposal; or (v) approve, adopt or recommend, or declare advisable or enter into, any letter of intent, memorandum of understanding, agreement in principle, acquisition agreement, merger agreement, option agreement, joint venture agreement, partnership agreement or other agreement (other than a confidentiality agreement referred to in and entered into compliance with Section 5.5(b)) with respect to any Parent Alternative Proposal (any such action set forth in the foregoing clauses (i) through (v), a "Parent Change of Recommendation"). Anything to the contrary set forth in this Agreement notwithstanding, prior to obtaining the Parent Shareholder Approval, the Parent Board may, in response to a Parent Superior Proposal, make a Parent Change of Recommendation; provided, that the Parent Board shall not be entitled to make such a Parent Change of Recommendation (A) unless Parent shall have given the Company at least five Business Days' written notice (a "Parent Superior Proposal Notice") advising the Company of its intention to make such a Parent Change of Recommendation, which Parent Superior Proposal Notice shall include a description of the terms and conditions of the Parent Superior Proposal that is the basis for the proposed action of the Parent Board, the identity of the Person making the Parent Superior Proposal and a copy of any proposed definitive agreement for such Parent Superior Proposal, if any, and Parent shall have negotiated in good faith with the Company (to the extent the Company wishes to negotiate) to enable the Company to make such amendments to the terms of this Agreement as would permit the Parent Board not to effect a Parent Change of Recommendation or terminate this Agreement in connection with such Parent Superior Proposal, and (B) unless, at the end of the five-Business Day period following the delivery of such Parent Superior Proposal Notice (the "Parent Superior Proposal Notice Period"), after taking into account any firm commitments made by the Company in writing to amend the terms of this Agreement and any other proposals or information offered by the Company during the Parent Superior Proposal Notice Period, the Parent Board concludes that the Parent Superior Proposal giving rise to the Parent Superior Proposal Notice continues to constitute a Parent Superior Proposal if such amendments were to be given effect; provided, that any material modifications to the terms of the Parent Superior Proposal (including any change in the amount of consideration) shall commence a new notice period pursuant clause (A) of three Business Days.

(d) Anything to the contrary set forth in this Agreement notwithstanding, prior to obtaining the Parent Shareholder Approval, but not after, the Parent Board may, in response to a Parent Intervening Event, make a Parent Change of Recommendation if the Parent Board determines in good faith, after consultation with Parent's outside legal counsel, that the failure of the Parent Board to take such action would be reasonably likely be inconsistent with its fiduciary duties under applicable Law; provided, that the Parent Board shall not be entitled to make such a Parent Change of Recommendation unless (i) Parent shall have given the Company at least five Business Days' written notice (a "Parent Intervening Event Notice") advising the Company of its intention to make such a Parent Change of Recommendation, which Parent Intervening Event Notice shall include a description of the applicable Parent Intervening Event and (ii) unless, at the end of the five-Business Day period following the delivery of such Parent Intervening Event Notice (the "Parent Intervening Event Notice Period"), after taking into account any firm commitments made by the Company in writing to amend the terms of this Agreement and any other proposals or information offered by the Company during the Parent Intervening Event Notice Period, the Parent Board determines in good faith, after consultation with Parent's outside legal counsel, that the failure of the Parent Board to make such Parent Change of Recommendation would continue to be reasonably likely be inconsistent with its fiduciary duties under applicable Law if such amendments were to be given effect.

(e) Nothing contained in this Agreement shall prohibit Parent or the Parent Board or any committee thereof from (i) complying with its disclosure obligations under applicable Law or rules and policies of the NYSE or the TSX, including taking and disclosing to its shareholders a position contemplated by Rule 14d-9 or Rule 14e-2(a) or Item 1012(a) of Regulation M-A under the Exchange Act (or any similar communication to shareholders) or from issuing a "stop, look and listen" statement pending disclosure of its position thereunder, (ii) complying with Part 2 – Division 3 of National Instrument 62-104 – *Take-Over Bids and Issuer Bids* of the Canadian Securities Administrators and similar provisions under Canadian Securities Laws relating to the

provision of directors' circulars in respect of a Parent Alternative Proposal or (iii) making any disclosure to its shareholders if the Parent Board determines in good faith, after consultation with Parent's outside legal counsel, that the failure of the Parent Board to make such disclosure would be reasonably likely be inconsistent with its fiduciary duties to Parent's shareholders under applicable Law.

(f) Further to Section 5.5(a), Parent shall (and shall cause its Subsidiaries and its and their respective directors and officers to, and shall use its reasonable best efforts to cause its other Representatives to) promptly terminate any existing discussions and negotiations conducted heretofore with any Person (other than the Company, Parent or any of their respective Affiliates or Representatives) with respect to any Parent Alternative Proposal, or proposal or transaction that could reasonably be expected to lead to or result in a Parent Alternative Proposal. Further, Parent shall promptly terminate all physical and electronic data access previously granted to such Persons and request that any such Persons promptly return or destroy all confidential information concerning Parent and any of its Subsidiaries and provide prompt written confirmation thereof.

(g) "Parent Alternative Proposal" means any proposal, offer or indication of intent made by any Person or group of Persons (other than the Company or its Affiliates) relating to or concerning (i) a plan of arrangement, amalgamation, merger, reorganization, share exchange, consolidation, business combination, recapitalization or similar transaction involving Parent, in each case, as a result of which the shareholders of Parent immediately prior to such transaction would cease to own at least 75% of the total voting power of Parent or the surviving entity (or any direct or indirect parent company thereof), as applicable, immediately following such transaction, (ii) the acquisition by any Person of more than 25% of the net revenues, net income or total assets of Parent and its Subsidiaries, on a consolidated basis, or (iii) the direct or indirect acquisition by any Person of more than 25% of the outstanding Parent Common Shares.

(h) "Parent Superior Proposal" means an unsolicited, bona fide written Parent Alternative Proposal, made after the date of this Agreement, substituting in the definition thereof "50%" for "25%" and for "75%" in each place each such phrase appears, made after the date of this Agreement, that the Parent Board determines in good faith, after consultation with Parent's outside legal and financial advisors, and considering all legal, financial, financing and regulatory aspects of the proposal, the identity of the Person(s) making the proposal and the likelihood of the proposal being consummated in accordance with its terms, would, if consummated, result in a transaction (A) that is more favorable to Parent's shareholders from a financial point of view than the transactions contemplated by this Agreement and (B) that is reasonably likely to be completed, taking into account any regulatory, financing or approval requirements and any other aspects considered relevant by the Parent Board.

(i) "Parent Intervening Event" means any event, change, occurrence or development that is unknown and not reasonably foreseeable to the Parent Board as of the date of this Agreement, or if known or reasonably foreseeable to the Parent Board as of the date of this Agreement, the material consequences of which were not known or reasonably foreseeable to the Parent Board as of the date of this Agreement; provided, that the receipt, existence or terms of a Parent Alternative Proposal shall not be deemed to be a Parent Intervening Event hereunder.

Section 5.6 Filings; Other Actions.

(a) As promptly as reasonably practicable after the date of this Agreement, (i) the Company and Parent shall prepare and file with the SEC the preliminary Proxy Statement/Prospectus and (ii) Parent shall prepare and file with the SEC and the Canadian Securities Administrators the Form F-4 with respect to the Parent Common Shares to be issued in connection with the First Merger, which shall include the Proxy Statement/Prospectus; provided, that if the SEC determines that Parent is not eligible to file a registration statement on Form F-4, Parent shall instead prepare and file a registration statement on Form S-4 with respect to the Parent Common Shares to be issued in connection with the First Merger, which shall include the Proxy Statement/Prospectus, and all references herein to the Form F-4 shall be deemed instead to refer to such registration statement on Form S-4. Parent shall prepare concurrently with the Proxy Statement/Prospectus the Management

Information Circular. Each of the Company and Parent shall use its reasonable best efforts to (A) have the Form F-4 declared effective under the Securities Act as promptly as practicable after such filing and (B) keep the Form F-4 effective for so long as necessary to complete the Mergers. Each of the Company and Parent shall furnish all information concerning itself, its Affiliates and the holders of its shares to the other and provide such other assistance as may be reasonably requested in connection with the preparation, filing and distribution of the Proxy Statement/Prospectus, Management Information Circular and the Form F-4. Each of the Company and Parent shall provide the other party with a reasonable period of time to review the Proxy Statement/Prospectus and any amendments thereto prior to filing and shall reasonably consider any comments from the other party. Subject to applicable Law, the information contained in the Management Information Circular shall be consistent in all material respects with the substantive information contained in the Proxy Statement/Prospectus. Each of the Company and Parent shall respond promptly to any comments from the SEC or the staff of the SEC or the TSX, as applicable. Each of the Company and Parent shall notify the other party promptly of the receipt of any comments (whether written or oral) from the SEC or the staff of the SEC or the TSX and of any request by the SEC or the staff of the SEC or the TSX for amendments or supplements to the Proxy Statement/Prospectus, Management Information Circular or Form F-4 or for additional information and shall supply the other party with copies of all correspondence between it and any of its Representatives, on the one hand, and the SEC or the staff of the SEC or the TSX, on the other hand, with respect to the Proxy Statement/Prospectus, Management Information Circular or Form F-4 or the transactions contemplated by this Agreement within 24 hours of the receipt thereof. The Proxy Statement/Prospectus, Management Information Circular and Form F-4 shall comply as to form in all material respects with the applicable requirements of the Exchange Act, the Securities Act and applicable Canadian Securities Laws and, without limiting the foregoing, Parent shall ensure that the Management Information Circular shall provide shareholders of Parent with information in sufficient detail to permit them to form a reasoned judgment concerning the matters to be placed before them at the Parent Shareholder Meeting. The Management Information Circular shall comply in all material respects with applicable Laws and the rules of the TSX. If at any time prior to the Company Stockholder Meeting or the Parent Shareholder Meeting (or any adjournment or postponement of the Company Stockholder Meeting or the Parent Shareholder Meeting) any information relating to Parent or the Company, or any of their respective Affiliates, officers or directors, is discovered by Parent or the Company that should be set forth in an amendment or supplement to the Proxy Statement/Prospectus, Management Information Circular and/or Form F-4, so that the Proxy Statement/Prospectus, Management Information Circular and/or Form F-4 would not include a misstatement of a material fact or omit to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading, the party that discovers such information shall promptly notify the other parties hereto and an appropriate amendment or supplement describing such information shall be promptly filed by the Company and/or Parent with the SEC and/or the Canadian Securities Administrators, as applicable, and, to the extent required by applicable Law, disseminated to the stockholders of the Company and the shareholders of Parent. The Company shall cause the Proxy Statement/Prospectus and Form F-4 to be mailed to the Company's stockholders as promptly as reasonably practicable after the Form F-4 is declared effective under the Securities Act (such date, the "Clearance Date"). Promptly (and in any event within seven days of the mailing of the Proxy Statement/Prospectus to the stockholders of the Company), Parent shall file the Management Information Circular with the Canadian Securities Administrators and mail the Management Information Circular to the shareholders of Parent.

(b) Each of Parent and the Company shall provide the other party and its legal counsel with a reasonable opportunity to review and comment on drafts of the Proxy Statement/Prospectus, Management Information Circular, Form F-4 and other documents related to the Company Stockholder Meeting, the Parent Shareholder Meeting or the issuance of the Parent Common Shares (and any amendments thereto) in connection with the First Merger, prior to filing such documents with the applicable Governmental Entity and mailing such documents to the Company's stockholders or Parent's shareholders, as applicable. Each party hereto shall consider in good faith in the Proxy Statement/Prospectus, Management Information Circular, Form F-4 and such other documents related to the Company Stockholder Meeting, the Parent Shareholder Meeting or the issuance of Parent Common Shares in connection with the First Merger, all comments reasonably and promptly proposed by the other party or its legal counsel.

(c) Subject to Section 5.4 and Section 5.6(d), the Company shall take all action necessary in accordance with applicable Law and the certificate of incorporation and bylaws of the Company to set a record date for, duly give notice of, convene and hold a meeting of its stockholders following the mailing of the Proxy Statement/Prospectus for the purpose of obtaining the Company Stockholder Approval (the "Company Stockholder Meeting") as soon as reasonably practicable following the Clearance Date. Unless the Company shall have made a Company Change of Recommendation in compliance with Section 5.4, the Company shall include the Company Recommendation in the Proxy Statement/Prospectus and shall solicit, and use its reasonable best efforts to obtain, the Company Stockholder Approval at the Company Stockholder Meeting (including by soliciting proxies in favor of the adoption of this Agreement) as soon as reasonably practicable.

(d) The Company shall cooperate with and keep Parent informed on a reasonably current basis regarding its solicitation efforts and voting results following the dissemination of the Proxy Statement/Prospectus to its shareholders. The Company may adjourn or postpone the Company Stockholder Meeting (i) to allow time for the filing and dissemination of any supplemental or amended disclosure document that the Company Board has determined in good faith (after consultation with its outside legal counsel) is required to be filed and disseminated under applicable Law, (ii) if as of the time that the Company Stockholder Meeting is originally scheduled (as set forth in the Proxy Statement/Prospectus) there are insufficient shares of Company Common Stock represented (either in person or by proxy) to constitute a quorum necessary to conduct the business of the Company Stockholder Meeting, (iii) to allow reasonable additional time to solicit additional proxies necessary to obtain the Company Stockholder Approval, (iv) to comply with applicable Law or (v) with the prior written consent of Parent (which shall not be unreasonably withheld, conditioned or delayed). Without the prior written consent of Parent (which shall not be unreasonably withheld, conditioned or delayed), the adoption of this Agreement shall be the only matter (other than matters of procedure and matters required by applicable Law to be voted on by the Company's stockholders in connection with the adoption of this Agreement) that the Company shall propose to be acted on by the shareholders of the Company at the Company Stockholder Meeting.

(e) Subject to Section 5.5 and Section 5.6(f), Parent shall take all action necessary in accordance with applicable Law and the articles of incorporation and by-laws of Parent to set a record date for, duly give notice of, convene and hold a meeting of its shareholders following the mailing of the Management Information Circular for the purpose of obtaining the Parent Shareholder Approval (the "Parent Shareholder Meeting") as soon as reasonably practicable following the Clearance Date. Unless Parent shall have made a Parent Change of Recommendation in compliance with Section 5.5, Parent shall include the Parent Recommendation in the Management Information Circular and shall solicit, and use its reasonable best efforts to obtain, the Parent Shareholder Approval at the Parent Shareholder Meeting (including by soliciting proxies in favor of the approval of the Parent Share Issuance) as soon as reasonably practicable.

(f) Parent shall cooperate with and keep the Company informed on a reasonably current basis regarding its solicitation efforts and voting results following the dissemination of the Management Information Circular to its shareholders. Parent may adjourn or postpone the Parent Shareholder Meeting (i) to allow time for the filing and dissemination of any supplemental or amended disclosure document that the Parent Board has determined in good faith (after consultation with its outside legal counsel) is required to be filed and disseminated under applicable Law, (ii) if as of the time that the Parent Shareholder Meeting is originally scheduled (as set forth in the Management Information Circular) there are insufficient Parent Common Shares represented (either in person or by proxy) to constitute a quorum necessary to conduct the business of the Parent Shareholder Meeting, (iii) to allow reasonable additional time to solicit additional proxies necessary to obtain the Parent Shareholder Approval, (iv) to comply with applicable Law or (v) with the prior written consent of the Company (which shall not be unreasonably withheld, conditioned or delayed). Without the prior written consent of the Company (which shall not be unreasonably withheld, conditioned or delayed), the approval of the Parent Share Issuance shall be the only matter (other than matters of procedure and matters required by applicable Law to be voted on by Parent's shareholders in connection with the adoption of this Agreement) that Parent shall propose to be acted on by the shareholders of Parent at the Parent Shareholder Meeting.

(g) It is the intention of the parties hereto that, and each of the parties shall reasonably cooperate and use their commercially reasonable efforts to cause, the date and time of the Company Stockholder Meeting and the Parent Shareholder Meeting be coordinated such that they occur on the same calendar day (and in any event as close in time as possible).

(h) Without limiting the generality of the foregoing, the Company agrees that its obligations to hold the Company Stockholder Meeting pursuant to this Section 5.6 shall not be affected solely by the making of a Company Change of Recommendation, and Parent agrees that its obligations to hold the Parent Shareholder Meeting pursuant to this Section 5.6 shall not be affected solely by the making of a Parent Change of Recommendation. The Company agrees that its obligations pursuant to this Section 5.6 shall not be affected solely by the commencement of or announcement or disclosure of or communication to Parent of any Company Alternative Proposal, and further, that it shall not terminate this Agreement on the grounds that such Company Alternative Proposal is a Company Superior Proposal, unless the Company may terminate this Agreement pursuant to and in accordance with Section 7.1. Parent agrees that its obligations pursuant to this Section 5.6 shall not be affected solely by the commencement of or announcement or disclosure of or communication to the Company of any Parent Alternative Proposal, and further, that it shall not take action to terminate this Agreement on the grounds that such Parent Alternative Proposal is a Parent Superior Proposal.

Section 5.7 Employee Matters.

(a) From and after the First Effective Time, the Company shall, and to the extent within its control, Parent shall cause the Company to, honor all Company Benefit Plans in accordance with their terms as in effect immediately before the First Effective Time. For a period of one year following the Control Date, Parent shall provide, or shall cause to be provided, to each current employee of the Company and its Subsidiaries ("Company Employees") (i) base compensation and cash and equity target incentive opportunities that, in each case, are no less favorable than were provided to the Company Employee immediately before the First Effective Time (it being understood that in lieu of equity compensation awards, Parent may provide Company Employees who, as of immediately prior to the First Effective Time were eligible to receive Company equity compensation awards, long-term incentive awards that are settled in cash in an amount sufficient to replace the grant date value of the Company Employee's equity compensation opportunity immediately prior to the First Effective Time, provided, that, except as set forth in this Section 5.7(a), such long-term incentive awards shall have the same terms and conditions as those applicable to the equity awards granted by Parent to its similarly situated employees), and (ii) employee benefits that are no less favorable in the aggregate than the employee benefits provided to the Company Employee immediately before the First Effective Time. Without limiting the generality of the foregoing, (A) Parent shall or shall cause the Second Surviving Corporation to provide to each Company Employee whose employment terminates during the one-year period following the Control Date under circumstances that would give rise to severance benefits under the Company Benefit Plans set forth on Section 5.7(a) of the Company Disclosure Schedules (the "Company Severance Plans"), severance benefits in accordance with the terms of the applicable Company Severance Plan in which such Company Employee is eligible to participate immediately prior to the First Effective Time and (B) during such one-year period following the Control Date, severance benefits offered to each Company Employee shall be determined taking into account all service with the Company, its Subsidiaries (and including, on and after the First Effective Time, the Second Surviving Corporation and any of its Affiliates) and without taking into account any reduction after the First Effective Time in compensation paid or benefits provided to such Company Employee.

(b) If the Control Date occurs before February 1, 2022, then no later than March 15, 2022, Parent shall, or shall cause the Second Surviving Corporation to, pay to each Company Employee who participates in a Company annual bonus plan (or any successor plan of Parent and its Subsidiaries) an annual bonus payment in respect of calendar year 2021 in an amount that is based on the achievement of the applicable performance goals at the greater of (i) target performance and (ii) 130% of actual performance, but in no event greater than 200% of target. If the Control Date occurs on or after February 1, 2022 but before February 1, 2023, then no later than March 15, 2023, Parent shall, or shall cause the Second Surviving Corporation to, pay to each Company

Employee who participates in a Company annual bonus plan (or any successor plan of Parent and its Subsidiaries) an annual bonus payment in respect of calendar year 2022 in an amount that is based on the achievement of the applicable performance goals at the greater of (A) target performance and (B) 130% of actual performance, but in no event greater than 200% of target.

(c) For all purposes (including for purposes of vesting, eligibility to participate and level of benefits) under the employee benefit plans of Parent and its Subsidiaries providing benefits to any Company Employees after the Control Date (the "New Plans"), each Company Employee shall be credited with his or her years of service with the Company and its Subsidiaries and their respective predecessors before the Control Date, to the same extent as such Company Employee was entitled, before the Control Date, to credit for such service under any similar Company Benefit Plan in which such Company Employee participated or was eligible to participate immediately prior to the Control Date; provided that the foregoing shall not apply (x) for benefit accrual under defined benefit pension plans, (y) for purposes of qualifying for subsidized early retirement benefits or (z) to the extent that its application would result in a duplication of benefits. In addition, and without limiting the generality of the foregoing, (i) each Company Employee shall be immediately eligible to participate, without any waiting time, in any New Plans to the extent coverage under such New Plan is comparable to a Company Benefit Plan in which such Company Employee participated immediately before the Control Date (such plans, collectively, the "Old Plans"), and (ii) for purposes of each New Plan providing medical, dental, pharmaceutical, vision and any other insurance benefits to any Company Employee, Parent shall cause all preexisting condition exclusions and actively-at-work requirements of such New Plan to be waived for such employee and his or her covered dependents, unless such conditions would not have been waived under the comparable plans of the Company or its Subsidiaries in which such employee participated immediately prior to the Control Date, and Parent shall cause any eligible expenses incurred by such employee and his or her covered dependents during the portion of the plan year of the Old Plans ending on the date such employee's participation in the corresponding New Plan begins to be taken into account under such New Plan for purposes of satisfying all deductible, coinsurance and maximum out-of-pocket requirements applicable to such employee and his or her covered dependents for the applicable plan year as if such amounts had been paid in accordance with such New Plan.

(d) Parent hereby acknowledges that a "change in control" (or similar phrase) within the meaning of the Company Benefit Plans will occur at the First Effective Time, as applicable.

(e) Without limiting the generality of Section 8.10, the provisions of this Section 5.7 are solely for the benefit of the parties to this Agreement, and no current or former director, employee or consultant or any other person shall be a third-party beneficiary of this Agreement, and nothing herein shall be construed as an amendment to any Company Benefit Plan or other compensation or benefit plan or arrangement for any purpose or otherwise shall prevent Parent, the Second Surviving Corporation or any of their Affiliates from terminating the employment of any Company Employee.

Section 5.8 Efforts.

(a) Subject to the terms and conditions set forth in this Agreement, each of the parties hereto shall (and shall cause each of their respective Affiliates to) promptly take, or cause to be taken, all actions, and to promptly do, or cause to be done, and to assist and cooperate with the other parties in doing, all things necessary, proper or advisable under applicable Laws to cause the conditions to Closing set forth in Article 6 of this Agreement to be satisfied and to consummate and make effective the Mergers and the other transactions contemplated by this Agreement as promptly as practicable after the date of this Agreement and in any event prior to the End Date, including (i) the obtaining of all necessary actions or nonactions, authorizations, permits, waivers, consents, clearances, approvals and expirations or terminations of waiting periods (collectively, "Consents"), including the Company Approvals and the Parent Approvals, from Governmental Entities and the making of all necessary registrations, notices, notifications, petitions, applications, reports and other and filings and the taking of all steps as may be necessary, proper or advisable to obtain an approval, clearance or waiver from, or to avoid an action or proceeding by, any Governmental Entity, (ii) the obtaining of all necessary

Consents from third parties, (iii) the defending of any Actions, lawsuits or other legal proceedings, whether judicial or administrative, challenging this Agreement or the consummation of the Mergers and the other transactions contemplated by this Agreement (including the Voting Trust), or seeking to prohibit or delay the Closing and (iv) the execution and delivery of any additional instruments necessary, proper or advisable to consummate, and to fully carry out the purposes of the transactions contemplated by this Agreement; provided, that in no event shall either the Company or Parent or any of their respective Subsidiaries be required to pay prior to the First Effective Time any fee, penalty or other consideration to any third party for any Consent required for or triggered by the consummation of the transactions contemplated by this Agreement under any contract or agreement or otherwise.

(b) Subject to the terms and conditions herein provided and without limiting the foregoing, the Company, Parent and each Merger Sub shall (i) promptly, but in no event later than 30 Business Days after the date of this Agreement, file any and all notification and report forms to the COFECE and the IFT required under applicable Law with respect to the Mergers and the other transactions contemplated by this Agreement, and take all other actions necessary to cause the expiration or termination of any applicable waiting periods under applicable Law as soon as practicable after the date of this Agreement, (ii) take all actions with CFIUS as may be advisable under applicable Law to obtain Completion of the CFIUS Process with respect to the transactions contemplated by this Agreement, including (A) promptly, but in no event later than 10 Business Days after the date of this Agreement, jointly providing notification to CFIUS of the execution of this Agreement, (B) promptly, and in no event later than 10 Business Days after the Closing, submitting a draft CFIUS Joint Voluntary Notification to CFIUS, (C) submitting a final Joint Notice to CFIUS after promptly resolving all comments to the draft CFIUS Joint Voluntary Notification from CFIUS and (D) in the case of a CFIUS Declaration, submitting a CFIUS Joint Voluntary Notification if CFIUS so requests or informs the parties that it is not able to conclude action under Section 721 with respect to the Mergers and the other transactions contemplated by this Agreement on the basis of such CFIUS Declaration, (iii) cooperate with each other in (A) determining whether any other filings are required to be made with, or Consents are required to be obtained from, or with respect to, any third parties or Governmental Entities, including under other applicable Antitrust Laws and/or in connection with the Company Approvals and Parent Approvals, in connection with the execution and delivery of this Agreement and the consummation of the transactions contemplated hereby and (B) promptly making all such filings and timely obtaining all such Consents, (iv) supply to any Governmental Entity as promptly as practicable any additional information or documents that may be requested pursuant to any Law or by such Governmental Entity, including responding to any request for information from CFIUS in the applicable timeframe set forth in 31 C.F.R. Part 800, subject to any extensions of such time that may be granted by CFIUS staff upon request of a party to the Joint Notice, and (v) other than with respect to the STB Final Approval, which is discussed in Section 5.8(c), take, or cause to be taken, all other actions and do, or cause to be done, all other things necessary, proper or advisable to consummate and make effective the transactions contemplated hereby, including taking all such further action as may be necessary to resolve such objections, if any, as any state antitrust enforcement authorities, CFIUS, or any other Governmental Entity or other Person may assert under any Law (including in connection with the Company Approvals and Parent Approvals) with respect to the transactions contemplated hereby, and to avoid or eliminate each and every impediment under any Law that may be asserted by any Governmental Entity with respect to the Mergers so as to enable the Closing to occur as promptly as practicable after the date of this Agreement, including (A) proposing, negotiating, committing to and effecting, by consent decree, hold separate order or otherwise, the sale, divestiture, license, hold separate or disposition of any and all of the share capital or other equity interest, assets (whether tangible or intangible), products or businesses of Parent and its Subsidiaries or of the Company and its Subsidiaries, and (B) otherwise taking or committing to take any actions that after the Closing Date would limit Parent's or its Subsidiaries' (including the Second Surviving Corporation's) freedom of action with respect to, or their ability to retain, one or more of their Subsidiaries' (including the Second Surviving Corporation's) assets (whether tangible or intangible), products, or businesses, in each case as may be required in order to avoid the entry of, or to effect the dissolution of, any injunction, temporary restraining order or other order that would otherwise have the effect of preventing or delaying the Closing; provided, that neither the Company nor any of its Subsidiaries shall be required to become subject to, or consent or agree to or otherwise take any action with respect to, any

requirement, condition, understanding, agreement or order to sell, divest, license, hold separate or otherwise dispose of, or to conduct, restrict, operate, invest or otherwise change the assets, operations or business of the Company or any of its Subsidiaries, unless such requirement, condition, understanding, agreement or order is binding on or otherwise applicable to the Company or its Subsidiaries only from and after the First Effective Time in the event that the Closing occurs. Notwithstanding the foregoing, other than with respect to the STB Final Approval, which is discussed in Section 5.8(c), nothing in this Section 5.8 shall be deemed to require Parent or any of its Affiliates to take any action, or commit to take any action, or agree to any condition or restriction in connection with obtaining any Parent Approvals that would reasonably be expected to have a Parent Material Adverse Effect with respect to Parent and its Subsidiaries, taken as a whole, after giving effect to the Mergers (measured on a scale relative to the Company and its Subsidiaries, taken as a whole). Except as otherwise permitted under this Agreement (including pursuant to the authority granted to Parent under Section 5.8(e)), the Company, Parent and each Merger Sub shall not (and shall cause their Subsidiaries not to) take or agree to take any action that would be reasonably likely to prevent or materially delay the Closing. In the event that any information in the filings submitted pursuant to this Section 5.8(b) or any such supplemental information furnished in connection therewith is deemed confidential by either party, the parties shall maintain the confidentiality of the same, and the parties shall seek authorization from the applicable Governmental Entity to withhold such information from public view.

(c) In furtherance and not in limitation of the other covenants of the parties contained in this Section 5.8:

(i) each of Parent and the Company shall, as promptly as practicable, file the appropriate and necessary documentation for the approval of the Mergers and the transactions contemplated hereby (the "STB Approval Application") with the STB, and shall use its reasonable best efforts to (x) make such filing within thirty (30) days after the date of this Agreement and (y) obtain, as promptly as practicable, the final and non-appealable approval or exemption by the STB of the Mergers and the other transactions contemplated hereby pursuant to 49 U.S.C. § 11323 *et seq.* (the "STB Final Approval");

(ii) each of Parent and the Company shall use their reasonable best efforts to (A) prosecute all such filings and other presentations made, and promptly make any subsequent filings or presentations, with the STB with diligence, (B) diligently oppose any third party's objections to, appeals from or petitions to reconsider or reopen any approval, opinion, exemption or other authorization obtained from the STB, and (C) take all such further action as in the reasonable judgment of Parent and the Company may facilitate obtaining the STB Final Approval; and

(iii) each of Parent and Company shall promptly furnish any information requested by CFIUS prior to filing of the draft CFIUS Joint Voluntary Notification and/or Joint Notice with CFIUS, including information relating to the Voting Trust Transaction.

(d) The Company, Parent and each Merger Sub shall cooperate and consult with each other in connection with the making of all registrations, filings, notifications, communications, submissions and any other actions pursuant to this Section 5.8(d), and, subject to applicable legal limitations and the instructions of any Governmental Entity, the Company, on the one hand, and Parent and each Merger Sub, on the other hand, shall keep each other apprised of the status of matters relating to the completion of the transactions contemplated thereby, including promptly informing and furnishing the other with copies of notices or other communications received or given by the Company or Parent, as the case may be, or any of their respective Subsidiaries, from or to any third party and/or any Governmental Entity with respect to such transactions. Subject to applicable Law relating to the exchange of information, the Company, on the one hand, and Parent and each Merger Sub, on the other hand, shall permit counsel for the other party reasonable opportunity to review in advance, and consider in good faith the views of the other party in connection with, any proposed notifications or filings and any written communications or submissions, and with respect to any such notification, filing, written communication or submission, any documents submitted therewith to any Governmental Entity (except for any exhibits to such communications providing the personal identifying information required by 31 C.F.R. Section 800.502(c)(5)(vi)

or that otherwise is requested by any Governmental Entity to remain confidential from the other parties); provided, that materials may be redacted (i) to remove references concerning the valuation of the businesses of the Company and its Subsidiaries, or proposals from third parties with respect thereto, (ii) as necessary to comply with contractual agreements and (iii) as necessary to address reasonable privilege or confidentiality concerns. The parties shall take reasonable efforts to share information protected from disclosure under the attorney-client privilege, work product doctrine, joint defense privilege or any other privilege pursuant to this Section 5.8 in a manner so as to preserve the applicable privilege. Each of the Company, Parent and the Merger Subs agrees not to initiate or agree to participate in any meeting or discussion, either in person or by telephone or videoconference, with any Governmental Entity in connection with the proposed transactions unless it consults with the other party in advance and, to the extent not prohibited by such Governmental Entity, gives the other party the opportunity to attend and participate.

(e) Subject to the obligations of this Section 5.8, Parent shall, acting reasonably, devise and implement the strategy and timing for obtaining any Consents required under any applicable Law in connection with the transactions contemplated by this Agreement and Parent shall, for the avoidance of doubt, have the final authority over the development, presentation and conduct of the STB case. Parent shall take the lead in all meetings and communications with any Governmental Entity in connection with obtaining such Consents; provided, that Parent shall consult in advance with the Company and in good faith take the Company's views into account regarding the overall strategy and timing. The Company and its Subsidiaries shall not initiate any such discussions or proceedings with any Governmental Entity, or take or agree to take any actions, restrictions or conditions with respect to obtaining any Consents in connection with the Mergers and the other transactions contemplated by this Agreement without the prior written consent of Parent.

(f) Subject to Section 5.17(a), applicable Law and to the rules, regulations and practices of the STB, the Voting Trust Agreement may be modified or amended at any time by Parent in its sole discretion, including to reflect changes requested by the STB or CFIUS; provided, that (i) prior to the First Effective Time, the Voting Trust Agreement may not be modified or amended without the prior written consent of the Company unless such modification or amendment is not inconsistent with this Agreement and is not adverse to the Company or its stockholders and would not reasonably be expected to have a material and adverse effect on the STB Voting Trust Approval, and (ii) whether prior to or after the First Effective Time, the Voting Trust Agreement may not be modified or amended without the prior written consent of the Company if such modification or amendment would reasonably be expected to materially increase the liability exposure of the board of directors of the Second Surviving Corporation under applicable Law. No power of the Second Surviving Corporation, Parent or any of its Affiliates provided for in the Voting Trust Agreement may be exercised in a manner which violates this Agreement.

(g) In furtherance and not in limitation of the other covenants of the parties contained in this Section 5.8, if any administrative or judicial action or proceeding, including any proceeding by a private party, is instituted (or threatened to be instituted) challenging any transaction contemplated by this Agreement as violative of any Law, each of the Company, Parent and the Merger Subs shall cooperate in all respects with each other and shall contest and resist any such Action or proceeding and to have vacated, lifted, reversed or overturned any Action, decree, judgment, injunction or other Order, whether temporary, preliminary or permanent, that is in effect and that prohibits, prevents or restricts consummation of the Mergers and the other transactions contemplated by this Agreement.

Section 5.9 Takeover Statute. If any "fair price," "moratorium," "control share acquisition" or other form of anti-takeover statute or regulation shall become applicable to the transactions contemplated hereby, each of the Company, Parent and Merger Subs and the members of their respective boards of directors shall grant such approvals and take such actions as are reasonably necessary so that the transactions contemplated hereby may be consummated as promptly as practicable on the terms contemplated hereby and otherwise act to eliminate or minimize the effects of such statute or regulation on the transactions contemplated hereby.

Section 5.10 Public Announcements. The Company, on the one hand, and Parent and the Merger Subs, on the other hand, shall consult with and provide each other a reasonable opportunity to review and comment on, and consider in good faith any reasonable comments by the other party on, any press release or other public statement or comment prior to the issuance of such press release or other public statement or comment relating to this Agreement or the transactions contemplated hereby and shall not issue any such press release or other public statement or comment prior to such consultation, except as may be required by applicable Law or by obligations pursuant to any listing agreement with any national securities exchange or as may be requested by a Governmental Entity; provided, that the restrictions in this Section 5.10 shall not apply (a) to any Company communication regarding a Company Alternative Proposal or from and after a Company Change of Recommendation or the Company or Parent response thereto, (b) to any Parent communication regarding a Parent Alternative Proposal or the Company or Parent response thereto, (c) in connection with any dispute between the parties regarding this Agreement, the Mergers or the other transactions contemplated hereby or (d) to any statements made by the Company or Parent in response to questions by the press, analysts, investors or those participating in investor calls or industry conferences, so long as such statements are consistent with information previously disclosed in previous press releases, public disclosures or public statements made by the Company and/or Parent in compliance with this Section 5.10. Parent and the Company agree to issue a joint press release as the first public disclosure of this Agreement.

Section 5.11 Indemnification and Insurance.

(a) Parent, each Merger Sub and the Company agree that all rights to exculpation, indemnification and advancement of expenses now existing in favor of the current or former directors, officers or employees, as the case may be, of the Company or its Subsidiaries as provided in their respective certificates of incorporation or bylaws or other organizational documents or in any agreement shall survive the Mergers and shall continue at and after the First Effective Time in full force and effect. For a period of six years after the First Effective Time, Parent and the Second Surviving Corporation shall maintain in effect the exculpation, indemnification and advancement of expenses provisions of the Company's and any Company Subsidiary's certificates of incorporation and bylaws or similar organizational documents as in effect immediately prior to the First Effective Time or in any indemnification agreements of the Company or any of its Subsidiaries with any of their respective directors, officers or employees as in effect immediately prior to the First Effective Time, and shall not amend, repeal or otherwise modify any such provisions in any manner that would adversely affect the rights thereunder of any individuals who at the First Effective Time were current or former directors, officers or employees of the Company or any of its Subsidiaries; provided, that all rights to indemnification in respect of any Proceeding (as defined below) pending or asserted or any claim made within such period shall continue until the final disposition of such Proceeding or resolution of such claim, even if beyond such six-year period. From and after the Control Date, Parent shall assume, be jointly and severally liable for, and honor, guarantee and stand surety for, and shall cause the Second Surviving Corporation and its Subsidiaries to honor, in accordance with their respective terms, each of the covenants contained in this Section 5.11.

(b) Each of Parent and the Second Surviving Corporation shall, to the fullest extent permitted under applicable Law, indemnify and hold harmless (and advance funds in respect of each of the foregoing or any related expenses) each current and former director, officer or employee of the Company or any of its Subsidiaries and each Person who served as a director, officer, member, trustee or fiduciary of another corporation, partnership, joint venture, trust, pension or other employee benefit plan or enterprise at the request of or for the benefit of the Company or its Subsidiaries (each, together with such Person's heirs, executors or administrators, and successors and assigns, an "Indemnified Party") against any costs or expenses (including advancing attorneys' fees and expenses in advance of the final disposition of any Proceeding to each Indemnified Party to the fullest extent permitted by Law), judgments, fines, losses, claims, damages, obligations, costs, liabilities and amounts paid in settlement in connection with any actual or threatened claim, action, suit, proceeding or investigation, whether civil, criminal, administrative or investigative (a "Proceeding"), arising out of, relating to or in connection with any action or omission occurring or alleged to have occurred at or prior to the First Effective Time (including acts or omissions in connection with such Persons serving as an officer, director,

employee or other fiduciary of any entity if such service was at the request or for the benefit of the Company or its Subsidiaries), whether asserted or claimed prior to, at or after the First Effective Time. In the event of any such Proceeding, Parent and the Second Surviving Corporation shall cooperate with the Indemnified Party in the defense of any such Proceeding.

(c) For a period of six years from the First Effective Time, Parent and the Second Surviving Corporation shall cause to be maintained in effect the current policies of directors' and officers' liability insurance and fiduciary liability insurance maintained by the Company and its Subsidiaries with respect to matters arising on or before the First Effective Time; provided, that after the First Effective Time, Parent and the Second Surviving Corporation shall not be required to pay annual premiums in excess of 300% of the last aggregate annual premium paid by the Company prior to the date of this Agreement in respect of the coverage required to be obtained pursuant hereto, but in such case shall purchase as much coverage as reasonably practicable for such amount. The Company shall purchase, prior to the First Effective Time, a six-year prepaid "tail" policy on terms and conditions providing substantially equivalent benefits as the current policies of directors' and officers' liability insurance and fiduciary liability insurance maintained by the Company and its Subsidiaries with respect to matters arising on or before the First Effective Time, covering without limitation the transactions contemplated hereby, and the purchase of such "tail" policy shall be deemed to discharge and satisfy the obligations of Parent and the Second Surviving Corporation pursuant to the immediately preceding sentence; provided, that the Company shall not commit or spend on such "tail" policy, in the aggregate, more than 300% of the last aggregate annual premium paid by the Company prior to the date of this Agreement for the Company's current policies of directors' and officers' liability insurance and fiduciary liability insurance, and if the cost of such "tail" policy would otherwise exceed such limit, the Company shall be permitted to purchase as much coverage as reasonably practicable for up to such limit. Parent and the Second Surviving Corporation shall cause such policy to be maintained in full force and effect, for its full term, and cause all obligations thereunder to be honored by the Second Surviving Corporation, and no other party shall have any further obligation to purchase or pay for insurance hereunder.

(d) Parent shall pay all reasonable expenses, including reasonable attorneys' fees, that may be incurred by any Indemnified Party in enforcing the indemnity and other obligations provided in this Section 5.11.

(e) The rights of each Indemnified Party hereunder shall be in addition to, and not in limitation of, any other rights such Indemnified Party may have under the certificates of incorporation or bylaws or other organizational documents of the Company or any of its Subsidiaries or the Second Surviving Corporation, any other indemnification arrangement, the DGCL or otherwise. The provisions of this Section 5.11 shall survive the consummation of the Mergers and expressly are intended to benefit, and are enforceable by, each of the Indemnified Parties.

(f) In the event that Parent, the Second Surviving Corporation or any of their respective successors or assigns (i) consolidates with or merges into any other Person and shall not be the continuing or surviving corporation or entity in such consolidation or merger or (ii) transfers all or substantially all of its properties and assets to any Person, then, and in either such case, proper provision shall be made so that the successors and assigns of Parent or the Second Surviving Corporation, as the case may be, shall assume the obligations set forth in this Section 5.11.

Section 5.12 Financing Cooperation.

(a) The Company shall use its reasonable best efforts, and shall cause each of its Subsidiaries to use its reasonable best efforts, and each of them shall use their reasonable best efforts to cause their respective Representatives to use their reasonable best efforts, to provide customary cooperation, to the extent reasonably requested by Parent in writing, in connection with the offering, arrangement, syndication, consummation, issuance or sale of any Debt Financing or Alternative Financing obtained in accordance with Section 5.13

(provided, that such requested cooperation does not unreasonably interfere with the ongoing operations of the Company or any of its Affiliates), including, to the extent so requested, using reasonable best efforts to:

(i) furnish promptly to Parent the Financing Information, and such other financial information regarding the Company and its Subsidiaries as is reasonably requested by Parent in connection with the Debt Financing;

(ii) assist Parent in its preparation of the pro forma financial information identified in clause (c) of paragraph 2 of Annex B of the Debt Commitment Letters with respect to the Parent;

(iii) provide reasonable and customary assistance to Parent and the Financing Parties in the preparation of (A) customary offering documents, offering memoranda, offering circulars, private placement memoranda, registration statements, prospectuses, syndication documents and other syndication materials, including information memoranda, lender and investor presentations, bank books and other marketing documents, and similar documents for any portion of the Debt Financing and (B) materials for rating agency presentations;

(iv) make senior management of the Company available, at reasonable times and locations and upon reasonable prior notice, to participate in meetings (including one-on-one conference or virtual calls with Financing Parties and potential Financing Parties), drafting sessions, presentations, road shows, rating agency presentations and due diligence sessions and other customary syndication activities, provided, at the Company's option in consultation with Parent, any such meeting or communication may be conducted virtually by videoconference or other media;

(v) cause the Company's independent registered accounting firm to provide customary assistance, including by using reasonable best efforts to cause the Company's independent registered accounting firm to provide customary comfort letters (including "negative assurance" comfort, if customary and appropriate) in connection with any capital markets transaction comprising a part of the Debt Financing to the applicable Financing Parties and to participate in a reasonable number of due diligence sessions; provided, at the Company's option, any such session may be conducted virtually by videoconference or other media, and including by using reasonable best efforts to provide customary representation letters to the extent required by such independent registered accounting firm in connection with the foregoing;

(vi) provide customary authorization letters authorizing the distribution of Company information to prospective lenders in connection with a syndicated bank financing;

(vii) assist in obtaining or updating corporate and facility credit ratings;

(viii) assist in the negotiation and preparation of any credit agreement, indenture, note, purchase agreement, underwriting agreement, guarantees and customary closing certificates, as may be reasonably requested by Parent, in each case as contemplated in connection with the Debt Financing;

(ix) make introductions of Parent to the Company's existing lenders and facilitate relevant coordination between Parent and such lenders;

(x) cooperate with internal and external counsel of Parent in connection with providing customary back-up certificates and factual information regarding any legal opinion that such counsel may be required to deliver in connection with the Debt Financing;

(xi) deliver, at least three Business Days prior to Closing, to the extent reasonably requested in writing at least nine Business Days prior to Closing, all documentation and other information regarding the Company and its Subsidiaries that any Financing Party reasonably determines is required by regulatory authorities under applicable "know your customer" and anti-money laundering rules and regulations, including the USA Patriot Act of 2001, and, to the extent required by any Financing Party, a beneficial ownership certificate (substantially similar in form and substance to the form of Certification Regarding Beneficial Owners of Legal Entity Customers published jointly, in May 2018, by the Loan Syndications and Trading Association and Securities Industry and Financial Markets Association) in respect of any of the

Company or any of its Subsidiaries that qualifies as a "legal entity customer" under the Beneficial Ownership Regulation (31 C.F.R. § 1010.230);

(xii) at Parent's written request, cooperate with and use reasonable best efforts to provide all reasonable assistance to Parent in connection with any steps Parent may determine are necessary or desirable to take to (A) obtain consent for the Change of Control under and as defined in the Company Credit Agreement arising from consummation of the transactions contemplated by this Agreement, including facilitating and participating in communications with lenders under the Company Credit Agreement in relation to a Change of Control amendment request substantially in the form attached to the Debt Commitment Letters; provided that any such documentation prepared by the Company, its Subsidiaries and Representatives in connection with the foregoing shall be reasonably acceptable to Parent, and/or (B) prepay some or all amounts outstanding under the Company Credit Agreement, including (1) using reasonable best efforts to prepare and submit customary notices in respect of any such prepayment provided that such prepayment shall be contingent upon the occurrence of the Closing unless otherwise agreed in writing by the Company, and (2) using reasonable best efforts to obtain from the Company Credit Agreement agent a customary payoff letter in respect of the Company Credit Agreement;

(xiii) at Parent's written request, cooperate with and use reasonable best efforts to provide all reasonable assistance to Parent in connection with any amendments to (A) the Financing Agreement, dated as of February 21, 2012, between The Kansas City Southern Railway Company and the United States of America, represented by the Secretary of Transportation acting through the Administrator of the Federal Railroad Administration and (B) the Financing Agreement, dated as of June 28, 2005, between Texas Mexican Railway Company and the United States of America, represented by the Secretary of Transportation acting through Administrator of the Federal Railroad Administration;

(xiv) on the Closing Date but immediately following the Closing, at Parent's request (which may be prior to the Closing Date), execute such documentation as is reasonably requested so that the Company can assume the Debt Commitment Letter in respect of the Company Credit Agreement (to the extent the debt commitments thereunder have not been terminated at Closing in accordance with their terms); and

(xv) consent to the use of its and its Subsidiaries' logos in connection with the Debt Financing; provided that such logos are used solely in a manner that is not intended to, nor reasonably likely to, harm or disparage the Company or its Subsidiaries or the Company's or its Subsidiaries' reputation or goodwill.

(b) The foregoing notwithstanding, none of the Company nor any of its Affiliates shall be required to take or permit the taking of any action pursuant to this Section 5.12 that would: (i) require the Company or its Subsidiaries or any of their respective Affiliates or any persons who are officers or directors of such entities to pass resolutions or consents to approve or authorize the execution of the Debt Financing or enter into, execute or deliver any certificate, document, instrument or agreement or agree to any change or modification of any existing certificate, document, instrument or agreement (except for the authorization letters contemplated by Section 5.12(a)(vi)), (ii) cause any representation or warranty in this Agreement to be breached by the Company or any of its Affiliates, (iii) require the Company or any of its Affiliates to (x) pay any commitment or other similar fee or (y) incur any other expense, liability or obligation which expense, liability or obligation is not reimbursed or indemnified hereunder in connection with the Debt Financing prior to the Closing, or (z) have any obligation of the Company or any of its Affiliates under any agreement, certificate, document or instrument be effective until the Closing, (iv) cause any director, officer, employee or stockholder of the Company or any of its Affiliates to incur any personal liability, (v) conflict with the Organizational Documents of the Company or any of its Affiliates or any Laws, (vi) reasonably be expected to result in a material violation or material breach of, or a default (with or without notice, lapse of time, or both) under, any Contract to which the Company or any of its Affiliates is a party (other than the Change of Control under and as defined in the Company Credit Agreement resulting from the consummation of the Mergers), (vii) provide access to or disclose information that the Company or any of its Affiliates determines would jeopardize any attorney-client privilege or other applicable privilege or protection of the Company or any of its Affiliates, (viii) require the Company to prepare any

financial statements or information (other than the Financing Information) that are not available to it and prepared in the ordinary course of its financial reporting practice, or (ix) require the Company to prepare or deliver any Excluded Information. Nothing contained in this Section 5.12 or otherwise shall require the Company or any of its Affiliates, prior to the Closing, to be an issuer or other obligor with respect to the Debt Financing. Parent shall, promptly on request by the Company, reimburse the Company or any of its Affiliates for all reasonable out-of-pocket costs incurred by them or their respective representatives in connection with such cooperation and shall indemnify and hold harmless the Company and its Affiliates and their respective representatives from and against any and all losses suffered or incurred by them in connection with the arrangement of the Debt Financing, any action taken by them at the request of Parent or its representatives pursuant to this Section 5.12 and any information used in connection therewith.

(c) The parties hereto acknowledge and agree that the provisions contained in this Section 5.12 represent the sole obligation of the Company and its Subsidiaries with respect to cooperation in connection with the arrangement of any financing (including the Debt Financing) to be obtained by Parent with respect to the transactions contemplated by this Agreement, and no other provision of this Agreement (including the Exhibits and Schedules hereto) shall be deemed to expand or modify such obligations. In no event shall the receipt or availability of any funds or financing (including the Debt Financing) by Parent any of its Affiliates or any other financing or other transactions be a condition to any of Parent's obligations under this Agreement. Notwithstanding anything to the contrary in this Agreement, the Company's breach of any of the covenants required to be performed by it under this Section 5.12 shall not be considered in determining the satisfaction of the condition set forth in Section 6.3(b), unless such breach is the primary cause of Parent being unable to obtain the proceeds of the Debt Financing at the Closing.

(d) All non-public or otherwise confidential information regarding the Company or any of its Affiliates obtained by Parent or its representatives pursuant to this Section 5.12 shall be kept confidential in accordance with the Confidentiality Agreement; provided, that Parent shall be permitted to disclose such information to (i) the Financing Parties subject to their confidentiality obligations under the Debt Commitment Letters and the definitive documentation evidencing the Debt Financing and (ii) otherwise to the extent necessary and consistent with customary practices in connection with the Debt Financing subject to customary confidentiality arrangements reasonably satisfactory to the Company.

Section 5.13 Debt Financing.

(a) Parent shall use its reasonable best efforts, and shall cause each of its Subsidiaries to use its reasonable best efforts, to take, or cause to be taken, all actions, and do, or cause to be done, all things necessary, proper or advisable to obtain funds sufficient to fund the Financing Amounts, including using reasonable best efforts to take, or cause to be taken, all actions and do, or cause to be done, all things necessary, proper or advisable to obtain the proceeds of the Debt Financing on the terms and subject only to the conditions described in the Debt Commitment Letters, including by (i) maintaining in effect the Debt Commitment Letters, (ii) negotiating and entering into definitive agreements with respect to the Debt Financing (the "Definitive Agreements") consistent with the terms and conditions contained therein (including, as necessary, the "flex" provisions contained in any related fee letter) on or prior to the Closing Date, (iii) satisfying on a timely basis all conditions in the Debt Commitment Letters and the Definitive Agreements within Parent's control and complying with its obligations thereunder and (iv) enforcing its rights under the Debt Commitment Letters, in each case in a timely and diligent manner.

(b) In the event any portion of the Debt Financing contemplated by the Debt Commitment Letters becomes unavailable regardless of the reason therefor, (A) Parent shall promptly notify the Company in writing of such unavailability and the reason therefor and (B) Parent shall use its reasonable best efforts, and shall cause each of its Subsidiaries to use their reasonable best efforts, to obtain as promptly as practicable following the occurrence of such event, alternative debt financing for any such portion from alternative sources (the "Alternative Financing") in an amount sufficient, when taken together with cash and the other sources of

immediately funds available to Parent at the Closing to pay the Financing Amounts and that do not include any conditions to the consummation of such alternative debt financing that are more onerous than the conditions set forth in the Debt Financing. To the extent requested in writing by the Company from time to time, Parent shall keep the Company informed on a reasonably current basis of the status of its efforts to arrange and consummate the Debt Financing. Without limiting the generality of the foregoing, Parent shall promptly notify the Company in writing if there exists any actual or threatened material breach, default, repudiation, cancellation or termination by any party to the Debt Commitment Letters or any Definitive Agreement and a copy of any written notice or other written communication from any Financing Party with respect to any actual material breach, default, repudiation, cancellation or termination by any party to the Debt Commitment Letters or any Definitive Agreement of any provision thereof. The foregoing notwithstanding, compliance by the Parent with this Section 5.13 shall not relieve Parent of its obligations to consummate the transactions contemplated by this Agreement whether or not the Debt Financing is available.

(c) None of Parent nor any of its Subsidiaries shall (without the prior written consent of the Company, such consent not to be unreasonably withheld, delayed or conditioned) consent or agree to any amendment, replacement, supplement, termination or modification to, or any waiver of any provision under, the Debt Commitment Letters or the Definitive Agreements if such amendment, replacement, supplement, modification or waiver (1) decreases the aggregate amount of the Debt Financing to an amount that would be less than an amount that would be required, when taken together with cash or cash equivalents held by the Parent and the Company on the Closing Date and the other sources of funds available to Parent on the Closing Date, to pay the Cash Consideration, the Preferred Merger Consideration and all other cash amounts payable pursuant to this Agreement by Parent at the Closing, (2) could reasonably be expected to prevent, materially delay or materially impede the consummation of the transactions contemplated by this Agreement, (3) adversely impacts the ability of Parent to enforce its rights against the other parties to the Debt Commitment Letters or the Definitive Agreements as so amended, replaced, supplemented or otherwise modified, or (4) adds new (or adversely modifies any existing) conditions to the consummation of all or any portion of the Debt Financing; provided, that Parent may amend, replace, supplement and/or modify any of the Debt Commitment Letters to add lenders, lead arrangers, bookrunners, syndication agents or similar entities as parties thereto who had not executed such Debt Commitment Letters as of the date of this Agreement, provided that (i) the addition of such parties would not be reasonably expected to delay or prevent Closing and (ii) such amendments do not (A) reduce the aggregate amount of the Debt Financing (including by changing the amount of fees to be paid or any original issue discount of the Debt Financing (or payment of fees having similar effect)) or (B) impose new or additional conditions, or otherwise amend, modify or expand any conditions, to the receipt of the Debt Financing in a manner that would reasonably be expected to delay or prevent Closing; provided, that, for the avoidance of doubt, Parent may amend, replace, supplement and/or modify any of the Debt Commitment Letters to increase the amount of commitments under the Debt Commitment Letters. Upon any amendment, supplement or modification of the Debt Commitment Letters, Parent shall provide a copy thereof to the Company (with only fee amounts and other customary terms redacted, none of which redacted provisions would adversely affect the conditionality or enforceability of the debt financing contemplated by the Debt Commitment Letters as so amended, supplemented or modified to the knowledge of the Parent) and, to the extent such amendment, supplement or modification has been made in compliance with this Section 5.13(c), the term "Debt Commitment Letters" shall mean the applicable Debt Commitment Letters as so amended, replaced, supplemented or modified. Notwithstanding the foregoing, compliance by Parent with this Section 5.13(c) shall not relieve Parent of its obligation to consummate the transactions contemplated by this Agreement whether or not the Debt Financing is available. To the extent Parent obtains Alternative Financing pursuant to Section 5.13(b), or amends, replaces, supplements, modifies or waives any of the Debt Financing pursuant to this Section 5.13(c), references to the "Debt Financing," "Financing Parties" and "Debt Commitment Letters" (and other like terms in this Agreement) shall be deemed to refer to such Alternative Financing, the commitments thereunder and the agreements with respect thereto, or the Debt Financing as so amended, replaced, supplemented, modified or waived.

Section 5.14 Stock Exchange De-listing; 1934 Act Deregistration Stock Exchange Listing.

(a) The Company shall cooperate with Parent and use its reasonable best efforts to take, or cause to be taken, all actions reasonably necessary, proper or advisable on its part under applicable Laws and rules and policies of the NYSE and the SEC to enable the delisting by the Second Surviving Corporation of the Company Common Stock from the NYSE and the deregistration of the Company Common Stock under the Exchange Act as promptly as practicable after the First Effective Time.

(b) Parent shall use its reasonable best efforts to cause the Parent Common Shares to be issued in the First Merger to be approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing conditions prior to the First Effective Time.

Section 5.15 Rule 16b-3. Prior to the First Effective Time, the Company and Parent, and the Company Board and the Parent Board (or duly formed committees thereof consisting of non-employee directors (as such term is defined for the purposes of Rule 16b-3 promulgated under the Exchange Act)), shall take such actions as may be reasonably necessary or advisable to cause any dispositions of Company equity securities and any acquisition of Parent equity securities (in each case including derivative securities) pursuant to the transactions contemplated by this Agreement by each individual who is subject to the reporting requirements of Section 16(a) of the Exchange Act with respect to the Company or Parent to be exempt under Rule 16b-3 promulgated under the Exchange Act.

Section 5.16 Stockholder Litigation. Each of the Company and Parent shall keep the other reasonably informed of, and cooperate with such party in connection with, any stockholder litigation or claim against such party and/or its directors or officers relating to the Mergers or the other transactions contemplated by this Agreement. Without limiting the foregoing, the Company shall give Parent a reasonable opportunity to participate in the defense or settlement of any such litigation or claim and the Company shall not compromise or settle, or agree to compromise or settle, any stockholder litigation or claim arising or resulting from the transactions contemplated by this Agreement without the prior written consent of Parent (which shall not be unreasonably withheld, conditioned or delayed).

Section 5.17 Certain Tax Matters.

(a) Each of Parent and the Company (i) shall use its reasonable best efforts to cause the Mergers, taken together, to qualify (A) as a "reorganization" within the meaning of Section 368(a) of the Code and (B) for an exception to the general rule of Section 367(a)(1) of the Code and (ii) shall not take or knowingly fail to take (and shall cause its Affiliates not to take or knowingly fail to take) any action that could reasonably be expected to (A) prevent or impede the Mergers, taken together, from qualifying as a "reorganization" within the meaning of Section 368(a) of the Code, (B) cause stockholders of the Company (other than any Excepted Stockholder) to recognize gain pursuant to Section 367(a)(1) of the Code, (C) prevent or impede the Company from being able to deliver an executed Company Tax Certificate at Closing, or (D) prevent or impede Parent from being able to deliver an executed Parent Tax Certificate at Closing.

(b) Each of Parent and the Company shall use its reasonable best efforts and shall cooperate with one another to obtain the opinion of counsel referred to in Section 6.2(e) and any similar opinions required to be delivered in connection with the effectiveness of the Form F-4. In connection with the foregoing, Parent shall use its reasonable best efforts to deliver to Company Tax Counsel, a representation letter dated as of the Closing Date (and, if requested, dated as of the date the Form F-4 shall have been declared effective by the SEC or such other date(s) as determined necessary by counsel in connection with the filing of the Form F-4 or its exhibits) and signed by an officer of Parent, substantially in the form set forth in Section 5.17(b) of the Parent Disclosure Schedule (with such modifications as are reasonably required to address any changes in facts or Law after the date hereof) (the "Parent Tax Certificate"), and the Company shall use its reasonable best efforts to deliver to Company Tax Counsel a representation letter dated as of the Closing Date (and, if requested, dated as of the date the Form F-4 shall have been declared effective by the SEC or such other date(s) as determined necessary by counsel in connection with the filing of the Form F-4 or its exhibits) and signed by an officer of the Company,

substantially in the form set forth in Section 5.17(b) of the Company Disclosure Schedule (with such modifications as are reasonably required to address any changes in facts or Law after the date hereof) (the "Company Tax Certificate").

(c) Parent shall, and shall cause the Second Surviving Corporation to, (i) comply with the reporting requirements of Treasury Regulations Section 1.367(a)-3(c)(6), and (ii) reasonably cooperate with any "five-percent transferee shareholder" of Parent within the meaning of Treasury Regulations Section 1.367(a)-3(c)(5)(ii), who certifies to Parent in writing that it is such a shareholder and furnishes to Parent documentation reasonably satisfactory to Parent supporting such certification, to enable such Person to enter into a valid gain recognition agreement under Treasury Regulations Section 1.367(a)-8.

(d) From the date hereof until the First Effective Time, the Company shall reasonably cooperate with Parent to enable Parent to determine whether the Company is (or at any time during the five-year period ending on the Closing Date has been) a "United States real property holding corporation" within the meaning of Section 897(c)(2) of the Code, and the Company shall provide Parent with such information in the Company's possession as Parent may reasonably request for purposes of making such determination.

(e) Notwithstanding any other provision of this Agreement or any other agreement among the parties, Parent and its Affiliates shall be permitted to apply to the CRA for one or more "advance income tax rulings" and to engage with the CRA in the "pre-ruling consultation" process, both as described in CRA Information Circular IC70-6R10 Advance Income Tax Rulings and Technical Interpretations dated September 29, 2020 (or successor publication thereto), in respect of certain Canadian federal income Tax implications of the implementation of certain transactions, including the transactions contemplated by this Agreement; provided, that (i) except for information in the public domain or as disclosed in this Agreement (other than the Company Disclosure Schedules), neither Parent nor its Affiliates shall disclose any confidential information relating to the Company or any of its Subsidiaries to the CRA without the Company's prior written consent, and (ii) the receipt of any such advance income tax ruling or completion of pre-ruling consultation shall not be a condition to Closing.

Section 5.18 Dividends. The Company shall coordinate with Parent the declaration, setting of record dates and payment dates of dividends on shares of Company Common Stock, subject to applicable Law and the approval of the Company Board and the Parent Board, as applicable, so that holders of shares of Company Common Stock do not receive dividends both on shares of Company Common Stock and Parent Common Shares received in the Mergers in respect of any calendar quarter or fail to receive a dividend on one of either shares of Company Common Stock or Parent Common Shares received in the Mergers for any calendar quarter.

Section 5.19 Surviving Merger Sub and First Merger Sub Stockholder Approvals. Promptly following the execution of this Agreement, each of Parent (in its capacity as sole stockholder of Surviving Merger Sub) and Surviving Merger Sub (in its capacity as sole stockholder of First Merger Sub) shall execute and deliver, in accordance with applicable Law and its certificate of incorporation and by-laws a written consent approving and adopting this Agreement and the transactions contemplated thereby.

Section 5.20 Post-Closing Cooperation. Following the Closing, in the event of a STB Denial or failure to obtain Completion of the CFIUS Process, or as may be required in connection with obtaining STB Final Approval, Parent shall, consistently with the terms of the Voting Trust Agreement, devise and implement the process and strategy to sell or otherwise dispose of, whether directly or indirectly, the shares or assets of the Second Surviving Corporation (the "Post-Closing Disposition"), subject to any jurisdiction of the STB to oversee the Post-Closing Disposition. Following the Closing, the Company and its successors shall cooperate with Parent and shall (and shall cause each of its Subsidiaries to) use its reasonable best efforts to take all actions reasonably requested by Parent and do or cause to be done all things necessary, proper or advisable on its part to assist Parent in its process to effect the Post-Closing Disposition. Such reasonable best efforts following the Closing shall include the Company and its Subsidiaries using reasonable best efforts to (i) make senior management available at reasonable times and locations and upon reasonable prior notice, to participate in meetings, drafting

sessions, presentations, road shows, rating agency presentations and due diligence sessions; (ii) assist Parent in the preparation and filing of any offering documents, offering memoranda, offering circulars, private placement memoranda, registration statements, prospectuses, information memoranda, lender and investor presentations, bank books and other marketing documents, and similar documents, and any customary financial statements and other information required to be provided therein; (iii) cause the Company's independent registered accounting firm and internal and external counsel of the Company to provide assistance to Parent, including delivery of any required comfort letters and customary backup certificates; (iv) cooperate with any marketing efforts of Parent, including, to the extent applicable, obtaining representation and authorization letters and arranging for customary auditor consents for use of financial data in any marketing and offering documentation; (v) assist in the preparation and negotiation of, and executing and delivering, any credit agreement, indenture, note, purchase agreement, underwriting agreement, guarantees, hedging agreement, pay-off letters, customary closing certificates and any other certificates, exhibits, schedules, letters and documents as may be reasonably requested by Parent; and (vi) furnish all non-privileged information concerning the Company and its Subsidiaries that is required by applicable Law to be included in any filings with the SEC or the Canadian Securities Administrators; provided, that to the extent any of the foregoing requires the entry of a protective order by the STB, the Company and its successors shall be required to take such action only if such order is obtained, subject to the terms of such order.

Section 5.21 Governance and Other Matters.

(a) The parties shall take all actions necessary to designate and appoint four of the directors of the Company as of immediately prior to the First Effective Time to serve as directors on the Parent Board as of the Control Date, in each case until such director's successor is elected and qualified or such director's earlier death, resignation or removal, in each case in accordance with Parent's Organizational Documents. In the event that after the First Effective Time any of such four directors indicates that he or she plans to step down as a director of the Company and is willing to become a director of Parent, Parent shall seek the approval of the STB to allow such director to be appointed as a director of Parent as soon as practicable and prior to the Control Date.

(b) As promptly as practicable following the Control Date, in conjunction with its integration plan, Parent shall (i) change the name of Parent to "Canadian Pacific Kansas City" and (ii) recognize Kansas City, Missouri as the location of the headquarters of Parent's United States business and operations.

ARTICLE 6

CONDITIONS TO THE MERGERS

Section 6.1 Conditions to Obligation of Each Party to Effect the Mergers. The respective obligations of each party to effect the Mergers shall be subject to the satisfaction (or waiver by Parent and the Company to the extent permitted by applicable Law) at or prior to the Closing of the following conditions:

(a) The Company Stockholder Approval shall have been obtained.

(b) The Parent Shareholder Approval shall have been obtained.

(c) The Form F-4 shall have become effective in accordance with the provisions of the Securities Act and no stop order suspending the effectiveness of the Form F-4 shall have been issued by the SEC and remain in effect and no proceeding to that effect shall have been commenced.

(d) No injunction or similar Order by any court or other Governmental Entity of competent jurisdiction shall have been entered and shall continue to be in effect that prohibits or makes illegal the consummation of the Mergers or the Voting Trust Transaction.

(e) [Reserved.]

(f) The authorizations required to be obtained from the COFECE and the IFT with respect to the Mergers and the other transactions contemplated by this Agreement shall have been obtained.

(g) The Parent Common Shares to be issued in the First Merger shall have been approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing requirements.

Section 6.2 Conditions to Obligation of the Company to Effect the Mergers. The obligation of the Company to effect the Mergers is further subject to the satisfaction (or waiver by the Company to the extent permitted by applicable Law) of the following conditions:

(a) The representations and warranties of Parent and each Merger Sub set forth in Section 4.2(a), Section 4.12(a) and Section 4.18 shall be true and correct, at and as of the date of this Agreement and at and as of the Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date), in each case, except for de minimis inaccuracies; (ii) the representations and warranties of Parent and each Merger Sub set forth in the first sentence of Section 4.1(a), Section 4.2(b), Section 4.3(a), Section 4.3(b) and Section 4.20 shall be true and correct in all material respects, at and as of the date of this Agreement and at and as of Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date); (iii) the representations and warranties of Parent and each Merger Sub set forth in Article 4 that are qualified by a "Parent Material Adverse Effect" qualification shall be true and correct in all respects as so qualified at and as of the date of this Agreement and at and as of Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date); and (iv) the other representations and warranties of Parent and each Merger Sub set forth in Article 4 shall be true and correct at and as of the date of this Agreement and at and as of the Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date), except with respect to this clause (iv) where the failure of such representations and warranties to be so true and correct would not have or would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect.

(b) Parent and each Merger Sub shall have performed in all material respects all obligations and complied in all material respects with all covenants required by this Agreement to be performed or complied with by them prior to the Closing.

(c) Since the date of this Agreement, there shall not have occurred any event, change, occurrence, effect or development that has had, or is reasonably likely to have, a Parent Material Adverse Effect.

(d) Parent shall have delivered to the Company a certificate, dated as of the Closing Date and signed by its Chief Executive Officer or another senior officer, certifying to the effect that the conditions set forth in Section 6.2(a), Section 6.2(b) and Section 6.2(c) have been satisfied.

(e) The Company shall have received the opinion of Wachtell, Lipton, Rosen & Katz, or, if Wachtell, Lipton, Rosen & Katz is unable to provide such opinion, another nationally recognized Tax counsel reasonably satisfactory to the Company ("Company Tax Counsel"), dated as of the Closing Date, in form and substance reasonably satisfactory to the Company, to the effect that, on the basis of facts, representations and assumptions set forth or referred to in such opinion, (i) the Mergers, taken together, will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and (ii) the Mergers will not result in gain recognition pursuant to Section 367(a)(1) of the Code by Persons who are stockholders of the Company immediately prior to the First Effective Time (other than any such stockholder who would be a "five-percent transferee shareholder" (within the meaning of Treasury Regulations Section 1.367(a)-3(c)(5)(ii)) of Parent that does not enter into a five-year gain recognition agreement in the form provided in Treasury Regulations Section 1.367(a)-8(c) and comply with the requirements of that agreement and Treasury Regulations Section 1.367(a)-8 for avoiding the recognition of gain). In connection with rendering such opinion, Company Tax Counsel shall be entitled to receive and may rely on the Parent Tax Certificate and the Company Tax Certificate.

Section 6.3 Conditions to Obligations of Parent and Merger Subs to Effect the Mergers. The obligations of Parent and each Merger Sub to effect the Mergers are further subject to the satisfaction (or waiver by Parent to the extent permitted by applicable Law) of the following conditions:

(a) (i) The representations and warranties of the Company set forth in Section 3.2(a) (other than the last sentence thereof) and Section 3.12(a) shall be true and correct, at and as of the date of this Agreement and at and as of Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date), in each case, except for *de minimis* inaccuracies; (ii) the representations and warranties of the Company set forth in the first sentence of Section 3.1(a), Section 3.2(b), Section 3.3(a), Section 3.3(b) and Section 3.26 shall be true and correct in all material respects, at and as of the date of this Agreement and at and as of Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date); (iii) the representations and warranties of the Company set forth in Article 3 that are qualified by a "Company Material Adverse Effect" qualification shall be true and correct in all respects as so qualified at and as of the Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date); and (iv) the other representations and warranties of the Company set forth in Article 3 shall be true and correct at and as of the date of this Agreement and at and as of Closing, as if made at and as of such time (except to the extent expressly made as of an earlier date, in which case as of such date), except with respect to this clause (iv) where the failure of such representations and warranties to be so true and correct would not have or would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

(b) The Company shall have performed in all material respects all obligations and complied in all material respects with all covenants required by this Agreement to be performed or complied with by it prior to the Closing.

(c) Since the date of this Agreement, there shall not have occurred any event, change, occurrence, effect or development that has had, or is reasonably likely to have, a Company Material Adverse Effect.

(d) The Company shall have delivered to Parent a certificate, dated as of the Closing Date and signed by its Chief Executive Officer or another senior officer, certifying to the effect that the conditions set forth in Section 6.3(a), Section 6.3(b) and Section 6.3(c) have been satisfied.

Section 6.4 Frustration of Closing Conditions. No party hereto may rely, either as a basis for not consummating the Mergers or terminating this Agreement and abandoning the Mergers, on the failure of any condition set forth in Section 6.1, Section 6.2 or Section 6.3, as the case may be, to be satisfied if such failure was caused by such party's material breach of any covenant or agreement of this Agreement.

ARTICLE 7

TERMINATION

Section 7.1 Termination or Abandonment. This Agreement may be terminated and abandoned prior to the First Effective Time, whether before or after any approval by the stockholders of the Company or the shareholders of Parent of the matters presented in connection with the Mergers:

(a) by the mutual written consent of the Company and Parent;

(b) by either the Company or Parent, if:

(i) (A) the First Effective Time shall not have occurred on or before February 21, 2022 (the "End Date") and (B) the party seeking to terminate this Agreement pursuant to this Section 7.1(b)(i) shall

not have breached in any material respect its obligations under this Agreement in any manner that has been the primary cause of the failure to consummate the Mergers on or before such date; provided, that to the extent the condition to Closing set forth in Section 6.1(f) has not been satisfied or waived on or prior to February 21, 2022, but all other conditions to Closing set forth in Article 6 have been satisfied or waived (except for those conditions that by their nature are to be satisfied at the Closing), the End Date shall be automatically extended to May 21, 2022;

(ii) any court or other Governmental Entity of competent jurisdiction shall have issued or entered an injunction or similar Order that prohibits or makes illegal the consummation of the Mergers or the Voting Trust Transaction, and such injunction or Order shall have become final and non-appealable; provided, that the party seeking to terminate this Agreement pursuant to this Section 7.1(b)(ii) shall not have breached in any material respect its obligations under this Agreement in any manner that has been the primary cause of such injunction or Order;

(iii) if the Company Stockholder Meeting (including any adjournments or postponements thereof) shall have been held and been concluded and the Company Stockholder Approval shall not have been obtained; or

(iv) if the Parent Shareholder Meeting (including any adjournments or postponements thereof) shall have been held and been concluded and the Parent Shareholder Approval shall not have been obtained;

(c) by the Company:

(i) if Parent or either Merger Sub shall have breached or failed to perform in any material respect any of their representations, warranties, covenants or other agreements contained in this Agreement, which breach or failure to perform (A) would result in a failure of a condition set forth in Section 6.1 or Section 6.2 and (B) cannot be cured by the End Date or, if curable, is not cured within 45 Business Days following the Company's delivery of written notice to Parent stating the Company's intention to terminate this Agreement pursuant to this Section 7.1(c)(i) and the basis for such termination; provided, that the Company shall not have a right to terminate this Agreement pursuant to this Section 7.1(c)(i) if the Company is then in material breach of any representation, warranty, agreement or covenant contained in this Agreement;

(ii) prior to receipt of the Company Stockholder Approval, in order to enter into a definitive agreement providing for a Company Superior Proposal; or

(iii) prior to receipt of the Parent Shareholder Approval, if the Parent Board shall have effected a Parent Change of Recommendation.

(d) by Parent:

(i) if the Company shall have breached or failed to perform in any material respect any of its representations, warranties, covenants or other agreements contained in this Agreement, which breach or failure to perform (A) would result in a failure of a condition set forth in Section 6.1 or Section 6.3 and (B) cannot be cured by the End Date or, if curable, is not cured within 45 Business Days following Parent's delivery of written notice to the Company stating Parent's intention to terminate this Agreement pursuant to this Section 7.1(d)(i) and the basis for such termination; provided, that Parent shall not have a right to terminate this Agreement pursuant to this Section 7.1(d)(i) if Parent or either Merger Sub is then in material breach of any representation, warranty, agreement or covenant contained in this Agreement; or

(ii) prior to receipt of the Company Stockholder Approval, if the Company Board shall have effected a Company Change of Recommendation.

Section 7.2 Effect of Termination. In the event of a valid termination of this Agreement pursuant to Section 7.1, the terminating party shall forthwith give written notice thereof to the other party or parties and this Agreement shall terminate, and the transactions contemplated hereby shall be abandoned, without further action

by any of the parties hereto. In the event of a valid termination of this Agreement pursuant to Section 7.1, this Agreement shall forthwith become null and void and there shall be no liability or obligation on the part of the Company, Parent, either Merger Sub or their respective Subsidiaries or Affiliates, except that: (i) no such termination shall relieve any party of its obligation to pay the Company Termination Fee, the Parent Termination Fee or the Regulatory Termination Fee or the CN Termination Amount Refund, as applicable, if, as and when required pursuant to Section 7.3 or any of its other obligations under Section 7.3 expressly contemplated to survive the termination of this Agreement pursuant to Section 7.3; (ii) no such termination shall relieve any party for liability for such party's fraud or willful and material breach of any covenant or obligation contained in this Agreement prior to its termination; and (iii) the Confidentiality Agreement, the provisions of the last sentence of Section 5.12(b) and the provisions of Section 5.3(d), Section 5.12(d), this Section 7.2, Section 7.3 and Article 8 shall survive the termination hereof.

Section 7.3 Termination Fees.

(a) Company Termination Fee.

(i) If (A) this Agreement is terminated by the Company pursuant to Section 7.1(c)(ii), (B) this Agreement is terminated by Parent pursuant to Section 7.1(d)(ii), or (C) (x) after the date of this Agreement, a Company Alternative Proposal (substituting in the definition thereof "50%" for "25%" and for "75%" in each place each such phrase appears) is publicly proposed or publicly disclosed prior to, and not publicly withdrawn at least two Business Days prior to, the Company Stockholder Meeting (a "Company Qualifying Transaction"), (y) this Agreement is terminated by (1) the Company or Parent pursuant to Section 7.1(b)(i) prior to the receipt of the Company Stockholder Approval or pursuant to Section 7.1(b)(iii) or (2) Parent pursuant to Section 7.1(d)(i), and (z) concurrently with or within 12 months after such termination, the Company (1) consummates a Company Qualifying Transaction or (2) enters into a definitive agreement providing for a Company Qualifying Transaction and later consummates such Company Qualifying Transaction, then the Company shall pay to Parent in consideration of the Parent disposing of its rights hereunder (other than those rights set out in Section 7.2), by wire transfer of immediately available funds to an account designated in writing by Parent, a fee of $700,000,000 in cash (the "Company Termination Fee"), free and clear and without withholding or deduction for Taxes unless such withholding or deduction is required by Law, such payment to be made concurrently with such termination in the case of clause (A) above, within three Business Days after such termination in the case of clause (B) above, or within three Business Days after the consummation of such Company Qualifying Transaction in the case of clause (C) above; it being understood that in no event shall the Company be required to pay the Company Termination Fee on more than one occasion.

(ii) If the Company is required to withhold or deduct any amount for or on account of U.S. federal income Taxes under Section 1442 or 1445 of the Code from the Company Termination Fee, the Company shall remit the full amount so withheld and deducted to the applicable Governmental Entity and the Company shall pay additional amounts to Parent ("Parent Additional Amounts") (such additional amounts to constitute additional proceeds for the disposition by the Parent of its rights under this Agreement) as may be necessary so that the net amount received by Parent (including the Parent Additional Amounts) after such withholding or deduction is not less than the amount Parent would have received if the Taxes had not been so withheld or deducted; provided, that the Company's obligation to pay such Parent Additional Amounts shall not apply to the extent that the obligation to withhold or deduct any amount from the Company Termination Fee arises solely as the result of Parent's failure to deliver to the Company, prior to the payment of the Company Termination Fee, a properly completed and executed IRS Form W-8BEN-E establishing an exemption from withholding under the U.S.-Canada Income Tax Treaty or IRS Form W-8ECI. Furthermore, without duplication of the foregoing sentence, the Company shall indemnify and hold harmless Parent from the full amount of any Taxes imposed on Parent under Section 881(a) the Code (together with any interest and penalties and expenses paid or payable by Parent with respect thereto) with respect to the receipt of the Company Termination Fee other than Taxes in respect of which amounts have been fully deducted and remitted and Parent Additional Amounts have been paid. The parties shall

cooperate to minimize any Taxes required to be deducted or withheld in respect of the Company Termination Fee. At the Company's reasonable request and expense, Parent shall use commercially reasonable efforts to obtain a refund from the applicable U.S. Governmental Entity of any Taxes in respect of which the Company has paid a Parent Additional Amount or indemnified Parent (or, if such refund cannot be obtained, to claim a credit for such Taxes). Parent shall promptly pay the amount of any such refund or credit obtained to the Company, net of any costs, Taxes and expenses borne by Parent with respect to such refund or credit; provided that Parent shall not be obligated to make any payment otherwise required pursuant to this sentence to the extent making such payment would place Parent in a less favorable net after-Tax position than it would have been in if the Tax subject to indemnification or Parent Additional Amount and giving rise to such refund or credit had not been deducted, withheld or otherwise imposed and the indemnification payments or Parent Additional Amount with respect to such Tax had never been paid. Parent and the Company agree: (i) to treat, for U.S. federal income Tax purposes, payment of the Company Termination Fee and any Parent Additional Amounts as giving rise to gain or loss attributable to the cancellation, lapse, expiration or other termination of a right or obligation with respect to property which is (or on acquisition would be) a capital asset in the hands of Parent within the meaning of Section 1234A(1) of the Code, and (ii) not to take any position inconsistent with such treatment, in each case, except to the extent otherwise required by applicable Law. The obligations described in this paragraph shall survive any termination, defeasance or discharge of this Agreement. Except as otherwise set forth in Section 7.2 or this Section 7.3(a), on the payment by the Company of the Company Termination Fee, the CN Termination Amount Refund and the Parent Additional Amounts as and when required by this Section 7.3(a), neither the Company nor any of its former, current or future officers, directors, partners, stockholders, managers, members, Affiliates and Representatives shall have any further liability with respect to this Agreement or the transactions contemplated hereby to Parent or its Affiliates or Representatives.

(b) Parent Termination Fees.

(i) If this Agreement is terminated by the Company or Parent pursuant to (A) Section 7.1(b)(i), and at the time of such termination, (1) the conditions set forth in Section 6.1(d) (solely as a result of an injunction or Order entered or issued by a Governmental Entity pursuant to any Railroad Law or Section 721) has not been satisfied or waived and (2) all of the other conditions set forth in Section 6.1 and Section 6.3 have been satisfied or waived (except for those conditions that by their nature are to be satisfied at the Closing; provided, that such conditions were then capable of being satisfied if the Closing had taken place) and no breach by the Company of its obligations under Section 5.8 has contributed materially and substantially to the failure of the condition set forth in the preceding clause (1) to be satisfied or (B) Section 7.1(b)(ii) (solely as the result of a final and non-appealable Order entered or issued by a Governmental Entity pursuant to any Railroad Law or Section 721), then Parent shall pay or cause to be paid to the Company in consideration of the Company disposing of its rights hereunder (other than those rights set out in Section 7.2), by wire transfer of immediately available funds to an account designated in writing by the Company, a fee of $1,000,000,000 in cash (the "Regulatory Termination Fee"), free and clear and without withholding or deduction for Taxes unless such withholding or deduction is required by Law, with such payment to be made within three Business Days of such termination.

(ii) If (A) this Agreement is terminated by the Company pursuant to Section 7.1(c)(iii), or (B) (x) after the date of this Agreement, a Parent Alternative Proposal (substituting in the definition thereof "50%" for "25%" and for "75%" in each place each such phrase appears) is publicly proposed or publicly disclosed prior to, and not publicly withdrawn at least two Business Days prior to, the Parent Shareholder Meeting (a "Parent Qualifying Transaction"), (y) this Agreement is terminated by (1) the Company or Parent pursuant to Section 7.1(b)(i) prior to the receipt of the Parent Shareholder Approval or pursuant to Section 7.1(b)(iv) or (2) the Company pursuant to Section 7.1(c)(i) and (z) concurrently with or within 12 months after such termination Parent (1) consummates a Parent Qualifying Transaction or (2) enters into a definitive agreement providing for a Parent Qualifying Transaction and later consummates such Parent Qualifying Transaction, then Parent shall pay or cause to be paid to the Company in consideration of the Company disposing of its rights hereunder (other than those rights set out in Section 7.2), a fee of

$700,000,000 in cash (the "Parent Termination Fee"), free and clear and without withholding or deduction for Taxes unless such withholding or deduction is required by Law, such payment to be made within three Business Days after such termination in the case of clause (A) above, or within three Business Days after the consummation of such Parent Qualifying Transaction in the case of clause (B) above; it being understood that in no event shall Parent be required to pay both the Parent Termination Fee and the Regulatory Termination Fee or either of the Parent Termination Fee or the Regulatory Termination Fee on more than one occasion.

(iii) If Parent is required, pursuant to the provisions of Part XIII of the CITA, to withhold or deduct any amount for or on account of Taxes from the Regulatory Termination Fee or Parent Termination Fee, Parent shall remit the full amount so withheld and deducted to the applicable Governmental Entity and Parent shall pay additional amounts to the Company ("Company Additional Amounts") (such additional amounts to constitute additional proceeds for the disposition by the Company of its rights under this Agreement) as may be necessary so that the net amount received by the Company (including the Company Additional Amounts) after such withholding or deduction is not less than the amount the Company would have received if the Taxes had not been so withheld or deducted. Furthermore, without duplication of the foregoing sentence, Parent shall indemnify and hold harmless the Company from the full amount of any Taxes imposed on the Company under Part XIII of the CITA (together with any interest and penalties and expenses paid or payable by the Company with respect thereto) with respect to the receipt of the Regulatory Termination Fee or Parent Termination Fee, as applicable, and Company Additional Amounts, other than Taxes in respect of which amounts have been fully deducted and remitted. The parties shall cooperate to minimize any Taxes required to be deducted or withheld in respect of the Parent Termination Fee or Regulatory Termination Fee, including that the Company shall provide any information reasonably requested by Parent to determine whether the Company is a "resident of the United States" and a "qualifying person" and/or whether it carries on business in Canada through a "permanent establishment," in each case, for the purposes of the U.S. – Canada Income Tax Treaty and the CITA. At Parent's reasonable request and expense, the Company shall use commercially reasonable efforts to obtain a refund from the applicable Canadian Governmental Entity of any Taxes in respect of which Parent has paid a Company Additional Amount or indemnified the Company (or, if such refund cannot be obtained, to claim a credit from the applicable Canadian or U.S. Governmental Entity for such Taxes). The Company shall promptly pay the amount of any such refund or credit obtained to Parent, net of any costs, Taxes and expenses borne by the Company with respect to such refund or credit; provided that the Company shall not be obligated to make any payment otherwise required pursuant to this sentence to the extent making such payment would place the Company in a less favorable net after-Tax position than it would have been in if the Tax subject to indemnification or Company Additional Amount and giving rise to such refund or credit had not been deducted, withheld or otherwise imposed and the indemnification payments or Company Additional Amount with respect to such Tax had never been paid. Parent and the Company agree: (i) to treat, for Canadian federal income Tax purposes, the payment of the Regulatory Termination Fee and/or the Parent Termination Fee and any Company Additional Amounts as being proceeds of disposition for the disposition by the Company of property consisting of its rights under this Agreement, and (ii) not to take any position inconsistent with such treatment, in each case, except to the extent otherwise required by applicable Law. The obligations described in this paragraph will survive any termination, defeasance or discharge of this Agreement. Except as otherwise set forth in Section 7.2 or this Section 7.3(b), on the payment by Parent of the Regulatory Termination Fee or Parent Termination Fee, as applicable, and the Company Additional Amounts as and when required by this Section 7.3(b), none of Parent, either Merger Sub or any of their respective former, current or future officers, directors, partners, stockholders, managers, members, Affiliates and Representatives shall have any further liability with respect to this Agreement or the transactions contemplated hereby to the Company or its Affiliates or Representatives.

(c) Refund of CN Agreement Termination Amount. If this Agreement is terminated (i) by the Company pursuant to Section 7.1(c)(ii) or (ii) by Parent pursuant to Section 7.1(d)(i) or Section 7.1(d)(ii), then the Company shall pay to Parent, in return of $700,000,000 remitted to the Company by Parent in respect of the

Company's payment to CN of the "Company Termination Fee" (as defined in the CN Agreement) in connection with the termination of the CN Agreement and the execution of this Agreement pursuant to that certain offer letter, dated as of September 12, 2021, from Parent to the Company, by wire transfer of immediately available funds to an account designated in writing by Parent, an amount equal to $700,000,000 in cash (the "CN Termination Amount Refund"), free and clear and without withholding or deduction for Taxes, unless (A) Parent or the applicable Affiliate has failed to deliver to the Company a properly completed and duly executed IRS Form W-8BEN-E or other applicable form, in each case, establishing that the CN Termination Amount Refund is exempt from withholding or (B) such withholding or deduction is required by a change in Law after the date hereof (in which case the parties shall reasonably cooperate to minimize any such required withholding or deduction), with such payment to be made within three Business Days of such termination; it being understood that in no event shall the Company be required to pay the CN Termination Amount Refund on more than one occasion.

(d) Acknowledgements. Each party acknowledges that the agreements contained in this Section 7.3 are an integral part of this Agreement and that, without Section 7.3(a), Parent would not have entered into this Agreement and that, without Section 7.3(b), the Company would not have entered into this Agreement. Accordingly, if the Company or Parent fails to promptly pay any amount due pursuant to this Section 7.3, the Company or Parent, as applicable, shall pay to Parent or the Company, respectively, all fees, costs and expenses of enforcement (including attorneys' fees as well as expenses incurred in connection with any action initiated seeking such payment), together with interest on the amount of the Company Termination Fee, the Parent Termination Fee or the Regulatory Termination Fee, as applicable, at the prime lending rate as published in the *Wall Street Journal*, in effect on the date such payment is required to be made. Notwithstanding anything to the contrary in this Agreement, the parties hereby acknowledge that in the event that the Company Termination Fee, the CN Termination Amount Refund, the Parent Termination Fee or the Regulatory Termination Fee becomes payable by, and is paid by, the Company to Parent or Parent to the Company, as applicable, such Company Termination Fee and/or CN Termination Amount Refund, as applicable with respect to Parent, or such Parent Termination Fee or Regulatory Termination Fee, as applicable with respect to the Company, shall be the receiving party's sole and exclusive remedy pursuant to this Agreement. The parties further acknowledge that none of the Company Termination Fee, the Parent Termination Fee or the Regulatory Termination Fee shall constitute a penalty but is in consideration for a disposition of the rights of the recipient under this Agreement and represents liquidated damages, in a reasonable amount that will compensate Parent or the Company, as applicable, in the circumstances (which do not involve fraud or willful and material breach by the other party of this Agreement) in which the Company Termination Fee, the Parent Termination Fee or the Regulatory Termination Fee, as applicable, is payable for the efforts and resources expended and opportunities foregone while negotiating this Agreement and in reliance on this Agreement and on the expectation of the consummation of the Mergers, which amount would otherwise be impossible to calculate with precision. The parties further acknowledge that the CN Termination Amount Refund shall not constitute a penalty, but is a refund and return of amounts previously remitted or caused to be remitted by Parent to the Company, and is payable as a consequence of the disposition of the rights of the recipient under this Agreement. The parties further acknowledge that the right to receive the Company Termination Fee, the CN Termination Amount Refund, the Parent Termination Fee or the Regulatory Termination Fee, as applicable, shall not limit or otherwise affect any such party's right to specific performance as provided in Section 8.5.

ARTICLE 8

MISCELLANEOUS

Section 8.1 No Survival of Representations and Warranties. None of the representations, warranties, covenants and agreements in this Agreement or in any instrument delivered pursuant to this Agreement shall survive the consummation of the Mergers, except for covenants and agreements that contemplate performance after the First Effective Time or otherwise expressly by their terms survive the First Effective Time.

Section 8.2 Expenses. Except as set forth in Section 5.11, Section 5.12 or Section 7.3, whether or not the Mergers are consummated, all costs and expenses incurred in connection with the Mergers, this Agreement and the transactions contemplated hereby shall be paid by the party incurring or required to incur such expenses, except that all filing fees paid by any party in respect of any regulatory filing (including any and all filings under the Antitrust Laws and/or in respect of the Company Approvals or Parent Approvals) shall be borne by Parent. Except as otherwise provided in Section 2.2(b)(ii), all transfer, documentary, sales, use, stamp, registration and other similar Taxes and fees imposed with respect to, or as a result of, the Mergers shall be borne by Parent, the First Surviving Corporation or the Second Surviving Corporation, and expressly shall not be a liability of holders of Company Common Stock or Company Preferred Stock.

Section 8.3 Counterparts; Effectiveness. This Agreement may be executed in counterparts (including by facsimile, by electronic mail in "portable document format" (.pdf) form, or by any other electronic means intended to preserve the original graphic and pictorial appearance of a document), each of which shall be an original, with the same effect as if the signatures thereto and hereto were on the same instrument. This Agreement shall become effective when one or more counterparts have been signed by each of the parties and delivered (by telecopy, facsimile, electronic mail or otherwise as authorized by the prior sentence) to the other parties.

Section 8.4 Governing Law; Jurisdiction. This Agreement shall be deemed to be made in and in all respects shall be governed by, interpreted and construed in accordance with the laws of the State of Delaware, without giving effect to any choice or conflict of law provision or rule (whether of the State of Delaware or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than the State of Delaware. In addition, each of the parties hereto irrevocably agrees that any legal action or proceeding with respect to this Agreement and the rights and obligations arising hereunder, or for recognition and enforcement of any judgment in respect of this Agreement and the rights and obligations arising hereunder brought by the other party hereto or its successors or assigns, shall be brought and determined exclusively in the Delaware Court of Chancery or (and only if) such court finds it lacks subject matter jurisdiction, the Superior Court of the State of Delaware (Complex Commercial Division) provided that if the subject matter over the matter is the subject of the action or proceeding is vested exclusively in the United States federal courts, such action or proceeding shall be heard in the United States District Court for the District of Delaware (the "Chosen Courts"). Each of the parties hereto hereby irrevocably submits with regard to any such action or proceeding for itself and in respect of its property, generally and unconditionally, to the personal jurisdiction of the Chosen Courts and agrees that it shall not bring any action relating to this Agreement or any of the transactions contemplated by this Agreement in any court other than the Chosen Courts. Each of the parties hereto hereby irrevocably waives, and agrees not to assert as a defense, counterclaim or otherwise, in any action or proceeding with respect to this Agreement, (a) any claim that it is not personally subject to the jurisdiction of the Chosen Courts, (b) any claim that it or its property is exempt or immune from the jurisdiction of any such court or from any legal process commenced in such courts (whether through service of notice, attachment prior to judgment, attachment in aid of execution of judgment, execution of judgment or otherwise) and (c) to the fullest extent permitted by the applicable Law, any claim that (i) the Action in such court is brought in an inconvenient forum, (ii) the venue of such Action is improper or (iii) this Agreement, or the subject matter hereof, may not be enforced in or by such courts. Each party hereto irrevocably consents to service of process inside or outside the territorial jurisdiction of the courts referred to in this Section 8.4 in the manner provided for notices in Section 8.7. Nothing in this Agreement shall affect the right of any party hereto to serve process in any other manner permitted by applicable Law.

Section 8.5 Specific Enforcement.

(a) The parties agree that irreparable damage would occur in the event that any of the provisions of this Agreement were not performed in accordance with their specific terms or were otherwise breached. Each party agrees that, in the event of any breach or threatened breach by any other party of any covenant or obligation contained in this Agreement, the non-breaching party shall be entitled (in addition to any other remedy that may be available to it whether in law or equity, including monetary damages) to obtain (i) a decree or order of specific performance to enforce the observance and performance of such covenant or obligation and (ii) an injunction restraining such breach or threatened breach.

(b) In circumstances where Parent is obligated to consummate the Mergers and the Mergers have not been consummated, Parent and each Merger Sub expressly acknowledge and agree that the Company and its stockholders shall have suffered irreparable harm, that monetary damages will be inadequate to compensate the Company and its stockholders, and that the Company on behalf of itself and its stockholders shall be entitled (in addition to any other remedy that may be available to it whether in law or equity, including monetary damages) to enforce specifically Parent's and each Merger Sub's obligations to consummate the Mergers.

(c) Each party further agrees that no other party or any other Person shall be required to obtain, furnish or post any bond or similar instrument in connection with or as a condition to obtaining any remedy referred to in this Section 8.5, and each party irrevocably waives any right it may have to require the obtaining, furnishing or posting of any such bond or similar instrument.

Section 8.6 WAIVER OF JURY TRIAL. EACH OF THE PARTIES TO THIS AGREEMENT HEREBY IRREVOCABLY WAIVES ANY AND ALL RIGHT TO A TRIAL BY JURY IN ANY ACTION, PROCEEDING OR COUNTERCLAIM ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY MAKES THIS WAIVER VOLUNTARILY AND SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS CONTAINED IN THIS SECTION 8.6.

Section 8.7 Notices. Any notice required to be given hereunder shall be sufficient if in writing, and sent by email by reliable overnight delivery service (with proof of service), hand delivery or certified or registered mail (return receipt requested and first-class postage prepaid), addressed as follows:

To Parent, Surviving Merger Sub or First Merger Sub:

Canadian Pacific Railway Limited / Canadian Pacific Railway Company
7550 Ogden Dale Road S.E.
Calgary, Alberta, Canada, T2C 4X9

ETetelbaum@wlrk.com

or to such other address as a party shall specify by written notice so given, and such notice shall be deemed to have been delivered (a) when received when sent by email; provided, that the recipient confirms in writing its receipt thereof, (b) on proof of service when sent by reliable overnight delivery service, (c) on personal delivery in the case of hand delivery or (d) on receipt of the return receipt when sent by certified or registered mail. Any party to this Agreement may notify any other party of any changes to the address or any of the other details specified in this Section 8.7; provided, that such notification shall only be effective on the date specified in such notice or two Business Days after the notice is given, whichever is later. Rejection or other refusal to accept or the inability to deliver because of changed address of which no notice was given shall be deemed to be receipt of the notice as of the date of such rejection, refusal or inability to deliver.

Section 8.8 Assignment; Binding Effect. Neither this Agreement nor any of the rights, interests or obligations hereunder shall be assigned by any of the parties hereto (whether by operation of law or otherwise) without the prior written consent of the other parties. Subject to the preceding sentence, this Agreement shall be binding on and shall inure to the benefit of the parties hereto and their respective successors and assigns.

Section 8.9 Severability. Any term or provision of this Agreement that is invalid or unenforceable in any jurisdiction shall, as to that jurisdiction, be ineffective to the sole extent of such invalidity or unenforceability without rendering invalid or unenforceable the remainder of such term or provision or the remaining terms and provisions of this Agreement in any jurisdiction. If any provision of this Agreement is so broad as to be unenforceable, such provision shall be interpreted to be only so broad as is enforceable.

Section 8.10 Entire Agreement; No Third-Party Beneficiaries. This Agreement (including the exhibits and schedules hereto), the Confidentiality Agreement and the Clean Team Agreement constitute the entire agreement, and supersede all other prior agreements and understandings, both written and oral, between the parties, or any of them, with respect to the subject matter hereof and thereof Except for the provisions of Article 2 (which, from and after the First Effective Time, shall be for the benefit of holders of the Company Common Stock (including Company Equity Awards) as of immediately prior to the First Effective Time), Section 5.11 (which, from and after the First Effective Time, shall be for the benefit of the Indemnified Parties), and the provisions of the last sentence of Section 5.12(b) (which shall be for the benefit of the express beneficiaries thereof), this Agreement is for the sole benefit of the parties hereto and their permitted assigns and nothing herein is intended to and shall not confer on any Person other than the parties hereto any rights or remedies hereunder. The representations and warranties in this Agreement are the product of negotiations among the parties. Any inaccuracies in such representations and warranties are subject to waiver by the parties in accordance with Section 8.11 without notice or liability to any other Person. In some instances, the

representations and warranties in this Agreement may represent an allocation among the parties of risks associated with particular matters regardless of the knowledge of any of the parties. Consequently, Persons other than the parties may not rely upon the representations and warranties in this Agreement as characterizations of actual facts or circumstances as of the date of this Agreement or as of any other date.

Section 8.11 Amendments; Waivers. At any time prior to the First Effective Time, whether before or after receipt of the Company Stockholder Approval and the Parent Shareholder Approval, any provision of this Agreement may be amended or waived if, and only if, such amendment or waiver is in writing and signed, in the case of an amendment, by the Company, Parent and each Merger Sub, or in the case of a waiver, by the party against whom the waiver is to be effective; provided, that (a) after receipt of the Company Stockholder Approval, if any such amendment or waiver shall by applicable Law or in accordance with the rules and regulations of the NYSE require further approval of the stockholders of the Company, the effectiveness of such amendment or waiver shall be subject to the approval of the stockholders of the Company and (b) after receipt of the Parent Shareholder Approval, if any such amendment or waiver shall by applicable Law or in accordance with the rules and regulations of the NYSE or the TSX require further approval of the shareholders of Parent, the effectiveness of such amendment or waiver shall be subject to the approval of the shareholders of Parent. The foregoing notwithstanding, no failure or delay by any party in exercising any right hereunder shall operate as a waiver thereof nor shall any single or partial exercise thereof preclude any other or further exercise of any other right hereunder. The rights and remedies herein provided shall be cumulative and not exclusive of any rights or remedies provided by Law.

Section 8.12 Headings. Headings of the Articles and Sections of this Agreement are for convenience of the parties only and shall be given no substantive or interpretive effect whatsoever. The table of contents to this Agreement is for reference purposes only and shall not affect in any way the meaning or interpretation of this Agreement.

Section 8.13 Financing Provisions. Notwithstanding anything in this Agreement to the contrary (including any other provisions of this Article 8): the Company, on behalf of itself, its Subsidiaries and each of its controlled Affiliates, and each other party hereto, on behalf of itself, its Subsidiaries and each of its controlled Affiliates, hereby: (a) agrees that any legal action, whether in law or in equity, whether in contract or in tort or otherwise, involving the Financing Parties, arising out of or relating to, this Agreement, the Debt Financing or any of the agreements entered into in connection with the Debt Financing (including the Debt Commitment Letters) or any of the transactions contemplated hereby or thereby or the performance of any services thereunder, shall be subject to the exclusive jurisdiction of any federal or state court in the Borough of Manhattan, New York, New York, and any appellate court thereof and each party hereto irrevocably submits itself and its property with respect to any such legal action to the exclusive jurisdiction of such court, and agrees not to bring or support any such legal action against any Financing Party in any forum other than such courts, (b) agrees that any such legal action shall be governed by the laws of the State of New York (without giving effect to any conflicts of law principles that would result in the application of the laws of another state), except as otherwise provided in any agreement relating to the Debt Financing, (c) knowingly, intentionally and voluntarily waives to the fullest extent permitted by applicable law trial by jury in any such legal action brought against the Financing Parties in any way arising out of or relating to, this Agreement or the Debt Financing, (d) agrees that none of the Financing Parties shall have any liability to the Company or any of its subsidiaries or any of their respective controlled affiliates or representatives relating to or arising out of this Agreement, the Debt Commitment Letters or the Debt Financing, (e) agrees that only Parent (including its permitted successors and assigns under the Debt Commitment Letters) shall be permitted to bring any claim (including any claim for specific performance) against a Financing Party for failing to satisfy any obligation to fund the Debt Financing pursuant to the terms of the Debt Commitment Letter and that neither the Company nor any of its Subsidiaries or controlled Affiliates shall be entitled to seek the remedy of specific performance with respect to Parent's rights under the Debt Commitment Letter against the Financing Parties party thereto, (f) agrees in no event will any Financing Party be liable for consequential, special, exemplary, punitive or indirect damages (including any loss of profits, business, or anticipated savings), or damages of a tortious nature in connection with the Debt Financing, and (g) agrees that

the Financing Parties are express third party beneficiaries of, and may enforce, any of the provisions of this Section 8.13 and that this Section 8.13 may not be amended, modified or waived without the written consent of the Financing Entities; provided, that the foregoing shall not limit the Company's rights or recourse under the Debt Commitment Letter in respect of the Company Credit Agreement after the Company has assumed the same pursuant to the Commitment Assignment (as defined in such Debt Commitment Letter) on the Closing Date. Notwithstanding the foregoing, nothing in this Section 8.13 shall in any way limit or modify the rights and obligations of Parent under this Agreement or any Financing Party's obligations to Parent under the Debt Commitment Letters.

Section 8.14 Interpretation. When a reference is made in this Agreement to an Article or Section, such reference shall be to an Article or Section of this Agreement unless otherwise indicated. Whenever the words "include," "includes" or "including" are used in this Agreement, they shall be deemed to be followed by the words "without limitation." The words "hereof," "herein" and "hereunder" and words of similar import when used in this Agreement shall refer to this Agreement as a whole and not to any particular provision of this Agreement. Unless otherwise specified, all references herein to "$" or "dollars" shall be to U.S. dollars. Except as otherwise indicated, all references herein to the Subsidiaries of a Person shall be deemed to include all direct and indirect Subsidiaries of such Person unless otherwise indicated or the context otherwise requires. All terms defined in this Agreement shall have the defined meanings when used in any certificate or other document made or delivered pursuant thereto unless otherwise defined therein. The definitions contained in this Agreement are applicable to the singular as well as the plural forms of such terms and to the masculine as well as to the feminine and neuter genders of such terms. Any agreement defined or referred to herein or in any schedule that is referred to herein means such agreement as from time to time amended, modified or supplemented, including by waiver or consent, together with any addenda, schedules or exhibits to, any purchase orders or statements of work governed by, and any "terms of services" or similar conditions applicable to, such agreement. Any specific law defined or referred to herein or in any schedule that is referred to herein means such law as from time to time amended and to any rules or regulations promulgated thereunder. Each of the parties has participated in the drafting and negotiation of this Agreement. If an ambiguity or question of intent or interpretation arises, this Agreement must be construed as if it is drafted by all the parties, and no presumption or burden of proof shall arise favoring or disfavoring any party by virtue of authorship of any of the provisions of this Agreement.

Section 8.15 Obligations of Merger Subs and Subsidiaries. Whenever this Agreement requires either Merger Sub or any other Subsidiary of Parent to take any action, such requirement shall be deemed to include an undertaking on the part of Parent to cause such Merger Sub or such Subsidiary, as applicable, to take such action. Whenever this Agreement requires a Subsidiary of the Company to take any action, such requirement shall be deemed to include an undertaking on the part of the Company to cause such Subsidiary to take such action, and after the First Effective Time, on the part of the First Surviving Corporation or the Second Surviving Corporation, as applicable, to cause such Subsidiary to take such action.

Section 8.16 Definitions. For purposes of this Agreement, the following terms (as capitalized below) shall have the following meanings when used herein:

"Action" means a claim, action, suit, or proceeding, whether civil, criminal, or administrative.

"Affiliates" means, with respect to any Person, any other Person that, directly or indirectly, controls, or is controlled by, or is under common control with, such Person. As used in this definition, "control" (including, with its correlative meanings, "controlled by" and "under common control with") shall mean the possession, directly or indirectly, of the power to direct or cause the direction of management or policies of a Person, whether through the ownership of securities or partnership or other ownership interests, by contract or otherwise.

"Antitrust Laws" means the Sherman Antitrust Act of 1890, the Clayton Antitrust Act of 1914, the HSR Act, the Federal Trade Commission Act of 1914, and all other applicable supranational, national, federal, state, county, local or foreign antitrust, competition or trade statutes, rules, regulation, Orders, decrees,

administrative and judicial doctrines and other Laws that are designed or intended to prohibit, restrict or regulate actions having the purpose or effect of monopolization or restraint of trade or lessening competition through merger or acquisition, regulate foreign investments.

"ARTF" means the Mexican Agencia Reguladora del Transporte Ferroviario (the Regulatory Agency of Rail Transportation of Mexico).

"beneficial owner" means, with respect to any securities, any Person who, directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, has or shares (a) voting power, which includes the power to vote, or to direct the voting of, such security; and/or (b) investment power, which includes the power to dispose, or to direct the disposition, of such security; and shall otherwise be interpreted in accordance with the term "beneficial owner" as defined in Rule 13d-3 adopted by the SEC under the Exchange Act. The terms "beneficial ownership," "beneficially own" and "beneficially owned" shall have a correlative meaning.

"Book-Entry Shares" means, collectively, the Common Book-Entry Shares and the Preferred Book-Entry Shares.

"Business Day" means any day other than a Saturday, Sunday or a day on which the banks in New York, New York or Calgary, Canada, are authorized by law or executive order to be closed.

"Canadian Securities Administrators" means the Alberta Securities Commission and any other applicable securities commission or securities regulatory authority of a province or territory of Canada.

"Canadian Securities Laws" means the Securities Act (Alberta) and all other applicable securities Laws, rules and regulations and published policies thereunder or under the securities laws of any other province or territory of Canada, and the rules and policies of the TSX.

"Cause" means (a) for any individual with an agreement with the Company or any of the Company's Subsidiaries that defines "Cause," Cause as defined in such agreement and (b) for any other individual, the definition of "Cause" as set forth in the Company's 2017 Equity Incentive Plan.

"Certificates" means, collectively, the Common Certificates and the Preferred Certificates.

"CFIUS" means the Committee on Foreign Investment in the United States.

"CFIUS Declaration" means a declaration submitted to CFIUS pursuant to either 31 C.F.R. Section 800.401 or 31 C.F.R. 800.402.

"CFIUS Joint Voluntary Notification" means a voluntary notification submitted to CFIUS pursuant to 31 C.F.R. Section 800.501.

"CITA" means the *Income Tax Act* (Canada).

"COFECE" means the Comisión Federal de Competencia Económica (the Mexican Antitrust Commission).

"Company Benefit Plans" means all employee or director compensation and/or pension or other benefit plans, programs, policies, agreements or other arrangements, including any "employee welfare plan" within the meaning of Section 3(1) of ERISA, any "employee pension benefit plan" within the meaning of Section 3(2) of ERISA (whether or not such plan is subject to ERISA), and any bonus, incentive, deferred compensation, vacation, stock purchase, stock option, severance, employment, change of control or fringe benefit plan, program

or agreement (other than any Multiemployer Plan), in each case that are sponsored, maintained or contributed to by the Company or any of its Subsidiaries for the benefit of current or former employees or directors of the Company or its Subsidiaries and are not otherwise required to be sponsored, maintained or contributed to by applicable Law.

"Company Common Stock" means the common stock, par value $0.01 per share, of the Company.

"Company Credit Agreement" means that certain Credit Agreement, dated as of March 8, 2019, among the Company, as borrower, the guarantors from time to time party thereto, the lenders and issuing banks from time to time party thereto and Bank of America, N.A., as administrative agent.

"Company Equity Awards" means Company Options, Company Restricted Share Awards, Company Performance Share Awards and Director Deferred Shares.

"Company ESPP" means the Company's 2009 Employee Stock Purchase Plan.

"Company Intellectual Property" means all Intellectual Property owned or purported to be owned by the Company or any of its Subsidiaries.

"Company IT Assets" means all IT Assets owned or purported to be owned by the Company or any of its Subsidiaries.

"Company Labor Agreement" means any collective bargaining agreement or other agreement with a labor or trade union, works council or like organization that the Company or any of its Subsidiaries is a party to or otherwise bound by.

"Company Material Adverse Effect" means an event, change, occurrence, effect or development that has (x) a material adverse effect on the business, operations or financial condition of the Company and its Subsidiaries, taken as a whole, or (y) would prevent, materially delay or materially impair the ability of the Company to consummate the transactions contemplated by this Agreement (including the Mergers), but, solely in the case of clause (x), shall not include events, changes, occurrences, effects or developments relating to or resulting from (a) changes in general economic or political conditions or the securities, equity, credit or financial markets in general, or changes in or affecting domestic or foreign interest or exchange rates, (b) any decline in the market price or trading volume of the Company Common Stock or the Company Preferred Stock or any change in the credit rating of the Company or any of its securities (provided, that the facts and circumstances underlying any such decline or change may be taken into account in determining whether a Company Material Adverse Effect has occurred to the extent not otherwise excluded by the definition thereof), (c) changes or developments in the industries in which the Company or its Subsidiaries operate, (d) changes in Law or the interpretation or enforcement thereof after the date of this Agreement, (e) the execution, delivery or performance of this Agreement or the public announcement or pendency or consummation of the Mergers or other transactions contemplated hereby, including the impact thereof on the relationships, contractual or otherwise, of the Company or any of its Subsidiaries with employees, partnerships, customers or suppliers or Governmental Entities, (f) the identity of Parent or any of its Affiliates as the acquiror of the Company, (g) compliance with the terms of, or the taking or omission of any action required by, this Agreement or consented to (after disclosure to Parent of all material and relevant facts and information) or requested by Parent in writing, (h) any act of civil unrest, civil disobedience, war, terrorism, cyberterrorism, military activity, sabotage or cybercrime, including an outbreak or escalation of hostilities involving the United States or any other Governmental Entity or the declaration by the United States or any other Governmental Entity of a national emergency or war, or any worsening or escalation of any such conditions threatened or existing on the date of this Agreement, (i) any hurricane, tornado, flood, earthquake, natural disasters, acts of God or other comparable events, (j) any pandemic, epidemic or disease outbreak (including COVID-19) or other comparable events, (k) changes in generally accepted accounting principles or the interpretation or enforcement thereof after the date of this

Agreement, (1) any litigation relating to or resulting from this Agreement or the transactions contemplated hereby or (m) any failure to meet internal or published projections, forecasts, guidance or revenue or earning predictions (provided, that the facts and circumstances underlying any such failure may be taken into account in determining whether a Company Material Adverse Effect has occurred to the extent not otherwise excluded by the definition thereof); except, with respect to clauses (a), (c), (h), (i), (j) and (k), if the impact thereof is materially and disproportionately adverse to the Company and its Subsidiaries, taken as a whole, relative to the impact thereof on the operations in the railroad industry of other participants in such industry, the incremental material disproportionate impact may be taken into account in determining whether there has been a Company Material Adverse Effect.

"Company Voting Stock" means, collectively, the Company Common Stock and the Company Preferred Stock.

"Completion of the CFIUS Process" means that any of the following shall have occurred: (a) CFIUS shall have determined that there are no unresolved national security concerns with respect to the transactions contemplated by this Agreement, and the Company and Parent shall have received written notice from CFIUS that action under Section 721 has been concluded; (b) the Company and Parent shall have received written notice from CFIUS that the transactions contemplated by this Agreement are not "covered transactions" pursuant to Section 721; or (c) CFIUS shall have sent a report to the President of the United States requesting the decision of the President of the United States on the Joint Notice and (i) the period under Section 721 during which the President may announce his decision to take action to suspend, prohibit or place any limitations on the transactions contemplated by this Agreement shall have expired without any such action being threatened, announced or taken or (ii) the President of the United States shall have announced a decision not to, or otherwise declined to, take any action to suspend or prohibit the transactions contemplated by this Agreement.

"Contract" means any legally binding, written or oral contract, note, bond, mortgage, indenture, deed of trust, lease, commitment, agreement, concession, arrangement or other obligation; provided, that "Contracts" shall not include any Company Benefit Plan or Parent Benefit Plan.

"Control Date" means the date on which Parent is lawfully permitted to assume control over the Company's railroad operations pursuant to STB Final Approval and following Completion of the CFIUS Process.

"COVID-19" means SARS-CoV-2 or COVID-19, and any evolutions or variants thereof or related or associated epidemics, pandemic or disease outbreaks.

"COVID-19 Measures" means any quarantine, "shelter in place," "stay at home," workforce reduction, social distancing, shut down, closure, sequester or any other Law, decree, judgment, injunction or other Order, directive, guidelines or recommendations by any Governmental Entity or industry group in connection with or in response to COVID-19, including the Coronavirus Aid, Relief, and Economic Security Act (CARES Act).

"Environmental Law" means any Law relating to (a) the protection, preservation or restoration of the environment (including air, water vapor, surface water, groundwater, drinking water supply, surface land, subsurface land, plant and animal life or any other natural resource) or (b) the exposure to, or the use, storage, recycling, treatment, generation, transportation, processing, handling, labeling, production, release, discharge or disposal of Hazardous Substances, in each case as in effect at the date of this Agreement.

"CRA" means the Canada Revenue Agency, or any successor Canadian taxing authority thereto.

"ERISA" means the Employee Retirement Income Security Act of 1974.

"ERISA Affiliate" means all employers (whether or not incorporated) that would be treated together with the Company or Parent or any of their respective Subsidiaries, as applicable, as a "single employer" within the meaning of Section 414 of the Code.

"Excepted Stockholder" means any stockholder of the Company that would be a "five percent transferee shareholder" of Parent within the meaning of Treasury Regulations Section 1.367(a)-3(c)(5)(ii) following the Mergers that does not enter into a five-year gain recognition agreement in the form provided in Treasury Regulations Section 1.367(a)-8(c).

"Exchange Act" means the Securities Exchange Act of 1934.

"Exchange Ratio" means 2.884.

"Financing Information" shall mean: (a) audited consolidated balance sheets of the Company and its Subsidiaries and the related audited consolidated statements of income, cash flows and changes in equity of the Company and its Subsidiaries for the three most recent fiscal years ended at least 60 days prior to the Closing Date (which Parent hereby acknowledges receiving for the fiscal years ended December 31, 2018, December 31, 2019 and December 31, 2020) and the unqualified audit report of the Company's independent auditors related thereto (which Parent hereby acknowledges receiving for the three fiscal years ended December 31, 2020), (b) an unaudited consolidated balance sheet and related consolidated statements of income, cash flows and changes in equity of the Company and its Subsidiaries for any subsequent fiscal quarter (other than, in each case, the fourth quarter of any fiscal year) ended at least 40 days prior to the Closing Date and for the comparable period of the prior fiscal year, reviewed by the Company's independent auditor, in the case of each of clauses (a) and (b), prepared in accordance with GAAP and in compliance with Regulation S-X (subject to the limitations set forth in the definition of Excluded Information), (c) other information as otherwise reasonably necessary in order to assist in receiving customary "comfort" (including as to "negative assurance" and change period comfort) from the Company's independent accountants, and (d) all other historical financial information regarding the Company required by Parent to permit Parent to prepare pro forma financial statements required by clause (c) of paragraph 2 of Annex B of the Debt Commitment Letters; provided, that notwithstanding anything to the contrary in this definition or otherwise, nothing herein shall require the Company or its Affiliates to provide (or be deemed to require the Company or its Affiliates to prepare) any (i) description of all or any portion of the Debt Financing, including any "description of notes," "plan of distribution" and information customarily provided by investment banks or their counsel or advisors in the preparation of a prospectus for registered offerings or an offering memorandum for private placements of non-convertible bonds pursuant to Rule 144A, as the case may be, (ii) risk factors relating to, or any description of, all or any component of the financing contemplated thereby, (iii) any compensation discussion and analysis or other information required by Item 10, Item 402 and Item 601 of Regulation S-K; or any information regarding executive compensation or related persons related to SEC Release Nos. 33-8732A, 34-54302A and IC-27444A, (iv) consolidating financial statements, separate Subsidiary financial statements, related party disclosures, or any segment information, in each case which are prepared on a basis not consistent with the Company's reporting practices for the periods presented pursuant to clauses (a) and (b) above, (v) financial statements or other financial data (including selected financial data) for any period earlier than the year ended December 31, 2018, (vi) financial information that the Company or its Affiliates does not maintain in the ordinary course of business or (vii) information not reasonably available to the Company or its Affiliates under their respective current reporting systems, in the case of clauses (vi) and (vii), unless any such information would be required in order for the Financing Information provided to Parent by the Company in accordance with this definition to not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made in such Financing Information, in the light of the circumstances under which they were made, not misleading. In addition, for the avoidance of doubt, "Financing Information" shall not include (x) pro forma financial information or (y) projections. For purposes of this Agreement, the information described in clauses (i)-(vii) of this definition, and in clauses (x) and (y) of the penultimate sentence of this paragraph, is collectively be referred to as the "Excluded Information."

If the Company shall in good faith reasonably believe that the Financing Information has been delivered to Parent, the Company may deliver to Parent a written notice to that effect (stating when it believes the delivery of the Financing Information to Parent was completed), in which case the Company shall be deemed to have complied with such obligation to furnish the Financing Information and Parent shall be deemed to have

received the Financing Information, unless Parent in good faith reasonably believes that the Company has not completed delivery of the Financing Information and not later than 5:00 p.m. (New York City time) two Business Days after the delivery of such notice by the Company, delivers a written notice to the Company to that effect (stating with specificity which such Financing Information the Company has not delivered); provided, that notwithstanding the foregoing, the delivery of the Financing Information shall be satisfied at any time which (and so long as) Parent shall have actually received the Financing Information, regardless of whether or when any such notice is delivered by the Company.

The Company's or its Affiliates' filing with the SEC pursuant to the Securities Act of 1933, the Securities Exchange Act of 1934 and the rules and regulations of the SEC promulgated thereunder of any required audited financial statements with respect to it that is publicly available on Form 10-K or required unaudited financial statements with respect to it that is publicly available on Form 10-Q, in each case, will satisfy the requirements under clauses (a) or (b), as applicable, of this definition.

"Financing Parties" means each debt provider (including each agent and arranger) that commits to provide Debt Financing to Parent or any of its Subsidiaries (the "Financing Entities") pursuant to the Debt Commitment Letters, as may be amended, supplemented or replaced, and their respective Representatives and other Affiliates; provided, that neither Parent nor any Affiliate thereof shall be a Financing Party.

"GAAP" means United States generally accepted accounting principles.

"Good Reason" means, for an individual who is a party to an agreement with the Company that defines Good Reason, Good Reason as defined in such agreement, or, for any other individual, the occurrence of any of the following events without the individual's prior written consent: (a) a material reduction in base salary (other than a general reduction that affects all similarly situated executives in substantially the same proportion due to a material deterioration in the financial condition of the Company) or (b) a relocation of the individual's principal place of employment by more than 50 miles, if such change increases the individual's commute from the individual's principal residence by more than 50 miles. An individual may not terminate employment for Good Reason unless the individual has provided written notice to the Company of the existence of the circumstances providing grounds for termination for Good Reason within 90 days of the initial existence of such grounds and the Company has had at least 30 days from the date on which such notice is provided to cure such circumstances. If the individual does not terminate employment for Good Reason within 60 days of providing the Company written notice of the circumstances providing grounds for termination for Good Reasons, then the individual will be deemed to have waived the right to terminate for Good Reason with respect to such grounds.

"Government Official" means any official, officer, employee, or representative of, or any Person acting in an official capacity for or on behalf of, any Governmental Entity.

"Hazardous Substance" means any substance presently listed, defined, regulated, designated or classified as hazardous, toxic, radioactive or dangerous under any Environmental Law, including any substance to which exposure is regulated by any Governmental Entity or any Environmental Law, including any toxic waste, pollutant, contaminant, hazardous substance, toxic substance, hazardous waste, special waste, industrial substance or petroleum or any derivative or byproduct thereof, radon, radioactive material, asbestos or asbestos-containing material, urea formaldehyde, foam insulation or polychlorinated biphenyls.

"HSR Act" means the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

"IFT," means the Instituto Federal de Telecomunicaciones, the Mexican Federal Telecommunications Institute.

"Intellectual Property" means all intellectual property rights or other proprietary rights arising under the Laws of any jurisdiction or existing anywhere in the world associated with: (a) patents and patent

applications and industrial design registrations and applications, and all continuations, divisionals, continuations-in-part, reissues or reexaminations and patents issuing thereon; (b) trademarks, service marks, trade dress, logos, corporate names, trade names, symbols, Internet domain names, and other similar identifiers of origin, in each case, whether or not registered and any and all applications and registrations therefor and the good will associated therewith and symbolized thereby; (c) copyrights, copyright registrations and applications, published and unpublished works of authorship, whether or not copyrightable, copyrights in and to the foregoing, together with all common law rights and moral rights therein, and any applications and registrations therefor; (d) domain names, uniform resource locators, Internet Protocol addresses, social media accounts or user names (including handles), and other names, identifiers and locators associated with any of the foregoing or other Internet addresses, sites and services; and (e) trade secrets, know-how, industrial secrets, inventions (whether or not patentable), data and confidential or proprietary business or technical information ("Trade Secrets").

"IT Assets" means all of the technology devices, computers, computer systems, software and software platforms, databases, websites, servers, routers, hubs, switches, circuits, networks, data communications lines and all other information technology infrastructure and equipment used by the Company and its Subsidiaries in connection with the operation of the business of the Company and its Subsidiaries and all data stored therein or processed thereby and all associated documentation.

"Joint Notice" means a CFIUS Declaration or a CFIUS Joint Voluntary Notification.

"Knowledge" means (a) with respect to Parent, the actual knowledge of the individuals listed on Section 8.16(a) of the Parent Disclosure Schedule and (b) with respect to the Company, the actual knowledge of the individuals listed on Section 8.16(b) of the Company Disclosure Schedules, in each of case (a) and (b); provided, however, that each such individual charged with responsibility for the aspect of the business relevant or related to the matter at issue shall be deemed to have knowledge of a particular matter if, in the prudent exercise of his or her duties and responsibilities in the ordinary course of business, such individual should have known of such matter.

"Liabilities" means all debts, liabilities, guarantees, assurances, commitments and obligations of any kind, whether fixed, contingent or absolute, matured or unmatured, liquidated or unliquidated, accrued or not accrued, known or unknown, due or to become due, whenever or however arising (including whether arising out of any Contract or tort based on negligence or strict liability).

"Lien" means a lien, mortgage, pledge, security interest, charge, title defect, adverse claims and interests, option to purchase or other encumbrance of any kind or nature whatsoever, but excluding any license of Intellectual Property or any transfer restrictions of general applicability as may be provided under the Securities Act, the "blue sky" Laws of the various States of the United States or similar Law of other applicable jurisdictions.

"made available to Parent" means provided by the Company or its Representatives to Parent or its Representatives (A) in the virtual data room maintained by Donnelley Financial Solutions Venue prior to the date of this Agreement (including in any "clean room" or as otherwise provided on an "outside counsel" only basis), (B) via electronic mail or in person prior to the date of this Agreement (including materials provided to outside counsel), or (C) filed or furnished with the SEC prior to the date of this Agreement, except where reference is made to an item being made available to Parent prior to Closing in which case, the term means provided by the Company or its Representatives to Parent or its Representatives prior to Closing.

"Merger Consideration Value" means (a) the Cash Consideration plus (b) (i) the Parent Share Price *multiplied by* (ii) the Exchange Ratio.

"Multiemployer Plan" means any "multiemployer plan" within the meaning of Section 4001(a)(3) of ERISA.

"NYSE" means the New York Stock Exchange.

"Order" means any order, writ, decree, judgment, award, injunction, ruling, settlement, notice or stipulation issued, promulgated, made, rendered or entered into by or with any Governmental Entity.

"Ordinary Course of Business" means, with respect to an action taken by any Person, that such action is consistent with the ordinary course of business of such Person, acting in its own interest as an independent enterprise, taking into account any changes to such practices as may have occurred prior to the date of this Agreement as a result of the outbreak of COVID-19, including compliance with any COVID-19 Measures, and any actions reasonably taken or not taken in response to exigent circumstances.

"Organizational Documents" means (i) with respect to any Person that is a corporation, its articles or certificate of incorporation, memorandum and articles of association, as applicable, and bylaws, or comparable documents, (ii) with respect to any Person that is a partnership, its certificate of partnership and partnership agreement, or comparable documents, (iii) with respect to any Person that is a limited liability company, its certificate of formation and limited liability company or operating agreement, or comparable documents, (iv) with respect to any Person that is a trust or other entity, its declaration or agreement of trust or other constituent document or comparable documents and (v) with respect to any other Person that is not an individual, its comparable organizational documents.

"Parent Benefit Plans" means all employee or director compensation and/or pension or other benefit plans, programs, policies, agreements or other arrangements, including any "employee welfare plan" within the meaning of Section 3(1) of ERISA, any "employee pension benefit plan" within the meaning of Section 3(2) of ERISA (whether or not such plan is subject to ERISA), and any bonus, incentive, deferred compensation, vacation, stock purchase, stock option, severance, employment, change of control or fringe benefit plan, program or agreement (other than any Multiemployer Plan), in each case that are sponsored, maintained or contributed to by Parent or any of its Subsidiaries for the benefit of current or former employees or directors of Parent or its Subsidiaries and are not otherwise required to be sponsored, maintained or contributed to by applicable Law.

"Parent Common Shares" means the common shares of Parent.

"Parent DSU Award" means a deferred share unit award in respect of Parent Common Shares.

"Parent Equity Awards" means Parent Options, Parent DSU Awards and Parent PSU Awards.

"Parent Labor Agreement" means any collective bargaining agreement or other agreement with a labor or trade union, works council or like organization that Parent or any of its Subsidiaries is a party to or otherwise bound by.

"Parent Material Adverse Effect" means an event, change, occurrence, effect or development that (x) has a material adverse effect on the business, operations or financial condition of Parent and its Subsidiaries, taken as a whole, or (y) would prevent, materially delay or materially impair the ability of Parent or either Merger Sub to consummate the transactions contemplated by this Agreement (including the Mergers and the Parent Share Issuance) or to obtain the Debt Financing, but, solely in the case of clause (x), shall not include events, changes, occurrences, effects or developments relating to or resulting from (a) changes in general economic or political conditions or the securities, equity, credit or financial markets in general, or changes in or affecting domestic or foreign interest or exchange rates, (b) any decline in the market price or trading volume of the Parent Common Shares or any change in the credit rating of Parent or any of its securities (provided, that the facts and circumstances underlying any such decline or change may be taken into account in determining whether a Parent Material Adverse Effect has occurred to the extent not otherwise excluded by the definition thereof), (c) changes or developments in the industries in which Parent or its Subsidiaries operate, (d) changes in Law or the interpretation or enforcement thereof after the date of this Agreement, (e) the execution, delivery or performance

of this Agreement or the public announcement or pendency or consummation of the Mergers or other transactions contemplated hereby, including the impact thereof on the relationships, contractual or otherwise, of Parent or any of its Subsidiaries with employees, partnerships, customers or suppliers or Governmental Entities, (f) compliance with the terms of, or the taking or omission of any action required by, this Agreement or consented to (after disclosure to the Company of all material and relevant facts and information) or requested by the Company in writing, (h) any act of civil unrest, civil disobedience, war, terrorism, cyberterrorism, military activity, sabotage or cybercrime, including an outbreak or escalation of hostilities involving Canada or any other Governmental Entity or the declaration by Canada or any other Governmental Entity of a national emergency or war, or any worsening or escalation of any such conditions threatened or existing on the date of this Agreement, (i) any hurricane, tornado, flood, earthquake, natural disasters, acts of God or other comparable events, (j) any pandemic, epidemic or disease outbreak (including COVID-19) or other comparable events, (k) changes in generally accepted accounting principles or the interpretation or enforcement thereof after the date of this Agreement, (l) any litigation relating to or resulting from this Agreement or the transactions contemplated hereby or (m) any failure to meet internal or published projections, forecasts, guidance or revenue or earning predictions (provided, that the facts and circumstances underlying any such failure may be taken into account in determining whether a Parent Material Adverse Effect has occurred to the extent not otherwise excluded by the definition thereof); except, with respect to clauses (a), (c), (h), (i), (j) and (k), if the impact thereof is materially and disproportionately adverse to Parent and its Subsidiaries, taken as a whole, relative to the impact thereof on the operations in the railroad industry of other participants in such industry, the incremental material disproportionate impact may be taken into account in determining whether there has been a Parent Material Adverse Effect.

"Parent Option" means a compensatory option to purchase Parent Common Shares.

"Parent PSU Award" means a performance-based restricted share unit award in respect of Parent Common Shares.

"Parent RSU Award" means a restricted share unit award in respect of Parent Common Shares.

"Parent Share Plan" means any Parent Benefit Plan providing for equity or equity-based compensation.

"Parent Share Price" means the average of the volume weighted averages of the trading prices of Parent Common Shares on NYSE (as reported by Bloomberg L.P. or, if not reported therein, in another authoritative source mutually selected by Parent and the Company in good faith) on each of the 20 consecutive trading days ending on (and including) the trading day that is two trading days prior to the Closing Date.

"Permitted Lien" means (a) any Lien for Taxes or governmental assessments, charges or claims of payment not yet due or payable, being contested in good faith or for which adequate accruals or reserves have been established, (b) any Lien that is a carriers', warehousemen's, mechanics', materialmen's, repairmen's or other similar lien arising in the Ordinary Course of Business that do not materially detract from the value of or materially interfere with the use of any of the assets, (c) any Lien that is a zoning, entitlement or other land use or environmental regulation by any Governmental Entity, (d) any Lien that is disclosed on the most recent consolidated balance sheet of the Company or Parent, as applicable, or the notes thereto (or securing liabilities reflected on such balance sheet), (e) any Lien that secures indebtedness (i) in existence on the date of this Agreement or (ii) in the case of the Company, not prohibited by Section 5.1(b)(viii), (f) any Lien that is a statutory or common law Lien to secure landlords, lessors or renters under leases or rental agreements, including any purchase money Lien or other Lien securing rental payments under capital lease arrangements, (g) any Lien that is imposed on the underlying fee interest in real property subject to a real property lease, (h) any Lien that was incurred in the Ordinary Course of Business since the date of the most recent consolidated balance sheet of the Company or Parent, as applicable, (i) any Lien that will be released in connection with the Closing, (j) any Lien that is an easement, declaration, covenant, condition, reservation, restriction, other charge, instrument or encumbrance or any other rights-of-way affecting title to real estate (other than those constituting Liens for the

payment of indebtedness), (k) any Lien arising in the Ordinary Course of Business under worker's compensation, unemployment insurance, social security, retirement and similar legislation, (l) any condition that is a matter of public record or that would be disclosed by a current, accurate survey, a railroad valuation map or physical inspection of the assets to which such condition relates, (m) any Lien created under federal, state or foreign securities Laws, (n) any Lien that is deemed to be created by this Agreement or any other document executed in connection herewith or (o) any other Lien that does not materially impair the existing use of the assets or property of the Company or Parent, as applicable, or any of its Subsidiaries affected by such Lien.

"Person" means an individual, a corporation, a partnership, a limited liability company, an association, a trust or any other entity, group (as such term is used in Section 13 of the Exchange Act) or organization, including a Governmental Entity, and any permitted successors and assigns of such person.

"Privacy Laws" means all Laws concerning the privacy, security or processing of personal information or data, and all rules and regulations promulgated thereunder, including, the Federal Trade Commission Act, the Privacy Act of 1974, the CAN-SPAM Act, the Telephone Consumer Protection Act, the Telemarketing and Consumer Fraud and Abuse Prevention Act, data breach notification Laws, the California Consumer Privacy Act, and the European General Data Protection Regulation.

"Qualifying Termination" means (a) a termination by Parent, the Company or any of their respective Subsidiaries, without Cause, other than as a result of death or disability, or (b) a termination of employment for Good Reason, in each case during the period commencing on the date of the First Effective Time and ending on the second anniversary of the Control Date.

"Railroad Law" means the Interstate Commerce Commission Termination Act of 1995, the Surface Transportation Board Reauthorization Act of 2015 or any other Law relating to the regulation of the railroad industry.

"Registered" means, with respect to Intellectual Property, issued by, registered with or the subject of a pending application before any Governmental Entity or Internet domain name registrar.

"Sanctioned Country" means any country or region that is the target of a comprehensive embargo under Export and Sanctions Regulations (as of the date hereof, Cuba, Iran, North Korea, Syria, and the Crimea region of Ukraine).

"Sanctioned Person" means any Person that is the target of sanctions or restrictions under Export and Sanctions Regulations, including: (i) any Person listed on any applicable U.S. or non-U.S. sanctions- or export-related restricted party list, including OFAC's Specially Designated Nationals and Blocked Persons List or (ii) any Person that is, in the aggregate, 50 percent or greater owned, directly or indirectly, or otherwise controlled by, or acting for the benefit or on behalf of, a Person or Persons described in clause (i).

"Sarbanes-Oxley Act" means the Sarbanes-Oxley Act of 2002.

"SCT" means the Secretaría de Comunicaciones y Transportes (the Secretary of Communications and Transportation of Mexico).

"SEC" means the Securities and Exchange Commission.

"Section 721" means Section 721 of the United States Defense Production Act of 1950 (codified at 50 U.S.C. § 4565), and the regulations promulgated thereunder (31 C.F.R. Parts 800-802).

"Securities Act" means the Securities Act of 1933.

"Sensitive Data" means cardholder data and sensitive authentication data that must be protected in accordance with the requirements of the Payment Card Industry Data Security Standard.

"Significant Subsidiary" means, with respect to any Person, a Subsidiary of such Person that would constitute a "significant subsidiary" of such Person within the meaning of Rule 1-02(w) of Regulation S-X as promulgated by the SEC.

"STB Denial" means (i) STB Final Approval shall not have been obtained by December 31, 2023, or (ii) the STB shall have, by an Order which shall have become final and non-appealable, refused to provide STB Final Approval.

"Subsidiaries" means, with respect to any Person, any corporation, limited liability company, partnership or other organization, whether incorporated or unincorporated, of which (a) at least a majority of the outstanding shares of capital stock of, or other equity interests, having by their terms ordinary voting power to elect a majority of the board of directors or others performing similar functions with respect to such corporation, limited liability company, partnership or other organization is directly or indirectly owned or controlled by such Person or by any one or more of its Subsidiaries, or by such Person and one or more of its Subsidiaries, or (b) with respect to a partnership, such Person or any other Subsidiary of such Person is a general partner of such partnership.

"Tax Return" means any return, report or similar filing made or required to be made with respect to Taxes, including any information return, claim for refund, amended return or declaration of estimated Taxes.

"Taxes" means any and all federal, state, provincial or local (in each case, whether U.S. or non-U.S.) taxes of any kind (together with any and all interest, penalties, additions to tax, inflationary adjustment, and additional amounts imposed with respect thereto) imposed by any Governmental Entity, including income, branch, capital gains, franchise, windfall or other profits, gross receipts, property, sales, use, capital stock, payroll, employment, unemployment, social security, workers' compensation, net worth, excise, withholding, ad valorem, value added and goods and services taxes, whether imposed directly or through a collection or withholding mechanism.

"TSX" means the Toronto Stock Exchange.

EXHIBIT A

This VOTING TRUST AGREEMENT ("**Trust Agreement**"), dated as of [●], 2021, by and among Canadian Pacific Railway Limited, a Canadian corporation ("**Parent**"), Cygnus Holding Corp., a Delaware corporation and an indirect wholly owned subsidiary of Parent ("**Holdco**") and David L. Starling ("**Trustee**" and, together with the Parent and Holdco, the "**Parties**" and each, a "**Party**").

W I T N E S S E T H :

WHEREAS, it is intended that pursuant to, and upon the terms and conditions set forth in, the Agreement and Plan of Merger, dated as of [●], 2021 (the "**Merger Agreement**") (a copy of which is attached hereto as Exhibit A), by and among Parent, Cygnus Merger Sub 1 Corporation, a Delaware corporation and direct wholly owned subsidiary of Parent ("**Merger Sub 1**") , Cygnus Merger Sub 2 Corporation, a Delaware corporation and a direct wholly owned subsidiary of Merger Sub 1 ("**Merger Sub 2**") and Kansas City Southern, a Delaware corporation ("**KCS**"), (i) Merger Sub 2 will merge with and into KCS (the "**First Merger**"), (ii) immediately following the First Merger, KCS will merge with and into Merger Sub 1 (the "**Second Merger**"), with the entity surviving the Second Merger being referred to herein as the "**Company**" and (iii) immediately following the consummation of the Second Merger, Parent will cause the contribution of all of the outstanding common shares of the Company to Holdco in accordance with the steps set forth in Section 1.8 of the Merger Agreement (such contribution, the "**Contribution**", and, together with the First Merger and the Second Merger, the "**Merger**"), as a result of which the Company will be a direct wholly owned subsidiary of Holdco;

WHEREAS, it is intended that the consummation of the Merger will occur prior to any issuance by the Surface Transportation Board (the "**STB**") of any required approval for, or exemption of, Parent's control of the Company;

WHEREAS, Parent intends, contemporaneously with the consummation of the Merger, to cause the deposit of all of the outstanding common shares of the Company in an independent, irrevocable voting trust (the "**Trust**") pursuant to 49 C.F.R. Part 1013 and STB precedent, in order to avoid any allegation or assertion that Parent or any affiliate of Parent is controlling or has the power to control the Company prior to the receipt of any required STB approval or exemption;

WHEREAS, the deposit of all of the outstanding common shares of the Company with the Trust is for the purpose of providing assurance that each of Holdco and the Parent will satisfy its absolute or contingent obligation under ICCTA and STB rules and precedents to avoid premature control of the Company pending STB review and approval of such control;

WHEREAS, pursuant to Decision No. 5 (Docket No. FD 36500) of the STB, dated May 6, 2021, Parent has obtained the approval of the STB to deposit all outstanding shares of the Company into the Trust;

WHEREAS, neither the Trustee nor any of its affiliates has any officers or board members in common or any direct or indirect business arrangements or dealings (as described in Paragraph 10 hereof) with Parent, Holdco, the Company or any of their affiliates;

WHEREAS, the Trustee is willing to act as voting trustee pursuant to the terms of this Trust Agreement and the rules of the STB; and

WHEREAS, Parent, Holdco and the Trustee intend that the Trust formed herein be a trust described in subsection 248(25.2) of the *Income Tax Act* (Canada).

NOW, THEREFORE, the Parties hereto agree as follows:

1. **Appointment of Trustee**. Parent and Holdco hereby appoint David L. Starling as Trustee hereunder, and David L. Starling hereby accepts said appointment and agrees to act as Trustee under this Trust Agreement as provided herein.

2. **Deposit of Company Trust Stock**.

(a) Immediately upon the completion of the Merger, Parent and Holdco agree that Holdco will deposit with the Trustee the certificate or certificates for all outstanding common shares of the Company ("**Shares**"). All such certificates shall be duly endorsed or accompanied by proper instruments duly executed for transfer thereof to the Trustee, and shall be exchanged for one or more Voting Trust Certificates substantially in the form attached hereto as Attachment B (the "**Trust Certificates**"), with the blanks therein appropriately filled and showing Holdco as the registered holder of the Trust Certificates. All Shares at any time delivered to the Trustee hereunder are hereinafter called the "**Trust Stock**." The Trustee shall present to the Company all certificates representing Trust Stock for surrender and cancellation of such certificates and for the issuance and delivery to the Trustee of new certificates registered in the name of the Trustee or its nominee. Parent, Holdco and the Trustee agree that the deposit of the Trust Stock with the Trustee pursuant to this Section 2 shall not result in a change in the beneficial ownership of the Shares and shall not result in a sale, disposition, lease or exchange with the Trustee of the Trust Stock.

(b) The Parties agree (i) to treat, for U.S. federal income tax purposes, each beneficial owner of Trust Certificates as the beneficial owner of the underlying Trust Stock, (ii) not to take any position inconsistent with the treatment described in (i) on any tax return, in any tax proceeding or otherwise except to the extent required by a "determination" within the meaning of Section 1313(a) of the Internal Revenue Code of 1986, as amended; and (iii) to treat, for Canadian federal income tax purposes, the trust created by this Trust Agreement as a trust described in subsection 248(25.2) of the *Income Tax Act* (Canada) and to not take any position inconsistent with such treatment on any tax return, in any tax proceeding or otherwise.

3. **Acquisition of Additional Shares or Securities**. Parent agrees that immediately upon receipt, acquisition or purchase by it or any of its affiliates of any additional Shares, or any other voting securities of the Company, it will deposit or cause to be deposited to the Trustee the certificate or certificates representing such additional Shares or securities.

4. **The Trustee's Powers**.

(a) The Trustee shall be present, in person or represented by proxy, at all annual and special meetings of shareholders of the Company so that all Trust Stock may be counted for the purposes of determining the presence of a quorum at such meetings. The Trustee shall be entitled and it shall be its duty to exercise any and all voting rights in respect of the Trust Stock either in person or by proxy or consent, as hereinafter provided, unless otherwise directed by an order of the STB or a court of competent jurisdiction. Parent and Holdco agree, and the Trustee acknowledges, that the Trustee shall not participate in or interfere with the management of the Company and shall take no other actions with respect to the Company except in accordance with the terms hereof, the terms of the Merger Agreement, the certificate of incorporation and bylaws of the Company or any orders of the STB. The Trustee shall exercise all voting rights in respect of the Trust Stock in favor of any proposal or action necessary or desirable to effect, or consistent with the effectuation of, the acquisition of the Company by Parent pursuant to the Merger Agreement. In exercising the Trustee's voting rights with respect to the Trust Stock, the Trustee shall vote in accordance with, and to maintain in effect, the terms and intent of the Merger Agreement and the certificate of incorporation and bylaws of the Company, including, but not limited to, the following: the Trustee shall not sell, lease, assign, transfer, alienate, pledge, encumber or hypothecate the Trust Stock or any major assets of the Company or any right or interest therein, whether voluntarily or by operation of law or by gift or otherwise, nor shall the Trustee cause the Company to merge or consolidate with or

into any other entity, without the prior written authorization of Parent (other than in connection with a disposition pursuant to Paragraph 9). In addition, until the STB has issued a final order approving the merger and common control of the Company by Parent, the Trustee shall vote all shares of Trust Stock to cause any other proposed merger, business combination or similar transaction (including, without limitation, any consolidation, sale of all or substantially all the assets, reorganization, recapitalization, liquidation or winding up of or by the Company) involving the Company, but not involving Parent or one of its affiliates (other than in connection with a disposition pursuant to Paragraph 9), not to be effected. The Trustee shall vote all shares of Trust Stock in favor of any proposal or action necessary or desirable to dispose of Trust Stock in accordance with Paragraph 9 hereof.

(b) Except as otherwise expressly provided herein, the Trustee shall vote all shares of Trust Stock with respect to all matters, including, without limitation, the election or removal of directors, voted on by the stockholders of the Company (whether at a regular or special meeting or pursuant to a unanimous written consent) in the Trustee's sole discretion, having due regard for the interests of the holders of the Trust Certificates as investors in the Company, determined without reference to such holders' interests in railroads other than the Company or its subsidiaries; provided that the Trustee shall not vote the Trust Stock in favor of taking or doing any act which would violate any provision of the Merger Agreement (or impede the Company's performance thereunder) or violate any provision of the certificate of incorporation and by-laws of the Company, or which if taken or done prior to the consummation of the Merger would have been a violation of the Merger Agreement or the certificate of incorporation and by-laws of KCS. Notwithstanding the foregoing provisions of this Paragraph 4 or any other provision of this Agreement, the registered holder of a Trust Certificate may at any time — but only with the prior written approval of the STB — instruct the Trustee in writing to vote the Trust Stock represented by such Trust Certificate in any manner, in which case the Trustee shall vote such shares in accordance with such instructions. In exercising its voting rights in accordance with this Paragraph 4, the Trustee shall take such actions at all annual, special or other meetings of stockholders of the Company or in connection with any action by consent in lieu of a meeting.

5. **Irrevocable Trust**. This Agreement and the nomination of the Trustee during the term of the trust shall be irrevocable by Parent and its affiliates and shall terminate only in accordance with the provisions of Paragraphs 9 and 15 hereof.

6. Subject to Paragraphs 4(a) and 4(b), the Trustee shall not exercise the voting powers of the Trust Stock in any way so as to create any dependence or intercorporate relationship between (i) Parent and its affiliates, on the one hand, and (ii) the Company or its affiliates, on the other hand. The term "affiliate" or "affiliates" wherever used in this Trust Agreement shall have the meaning specified in Section 11323(c) of Title 49 of the United States Code, as amended. The Trustee shall not, without the prior approval of the STB, vote the Trust Stock to elect any officer, director, nominee or representative of Parent or any of its affiliates as an officer or director of the Company or of any affiliate of the Company. The Trustee shall be kept informed with respect to the business operations of the Company by means of the financial statements prepared by the Company and any reports and other information when and as the Company would be required to file with the SEC by Sections 13(a) or 15(d) under the Securities Exchange Act of 1934, as amended, if the Company were subject thereto, any other information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act of 1933, as amended and other public disclosure documents periodically filed by the Company and affiliates of the Company with the STB, copies of which shall be promptly furnished to the Trustee by the Company, and such other periodic reports as the Trustee may request from time to time, and the Trustee shall be fully protected in relying upon such information. The Trustee shall not be liable for any mistakes of fact or law or any error of judgment, or for any act or omission, except as a result of the Trustee's willful misconduct or gross negligence.

7. **Transfer of Trust Certificates**. All Trust Certificates shall be transferable on the books of the Trustee by the registered holder upon the surrender thereof properly assigned, in accordance with rules from time to time established for the purpose by the Trustee. Until so transferred, the Trustee may treat the registered holder as owner of the applicable Trust Certificates for all purposes. Each transferee of a Trust Certificate issued hereunder shall, by acceptance thereof, assent to and become a party to this Trust Agreement, and shall assume all attendant rights and obligations.

8. **Dividends and Distributions**. Pending the termination of this Trust as hereinafter provided, the Trustee shall, immediately following the receipt of each cash dividend or cash distribution as may be declared and paid upon the Trust Stock, pay the same over to or as directed the registered holder(s) of Trust Certificates hereunder as then known to the Trustee. The Trustee shall receive and hold dividends and distributions other than cash upon the same terms and conditions as the Trust Stock and shall issue Trust Certificates representing any new or additional securities that may be paid as dividends upon the Trust Stock or otherwise distributed upon the Trust Stock to the registered holder(s) of Trust Certificates in proportion to their respective interests.

9. **Disposition of Trust Stock; Termination of Trust**.

(a) This Trust is accepted by the Trustee subject to the right hereby reserved in Parent at any time to cause Holdco to sell or make any other disposition of the whole or any part of the Trust Stock, whether or not an event described in subparagraph (b) below has occurred. The Trustee shall take all actions reasonably requested by Holdco with respect to (including, without limitation, exercising all voting rights in respect of Trust Stock in favor of any proposal or action necessary or desirable to effect, or consistent with the effectuation of) any proposed direct or indirect sale or other disposition of the whole or any part of the Trust Stock by Holdco. The Trustee shall at any time upon the receipt of a direction from Parent signed by its President and Chief Executive Officer or one of its authorized officers designating the person or entity to whom Parent has directly or indirectly sold or otherwise disposed of the whole or any part of the Trust Stock and certifying that such person or entity is not an affiliate of Parent and has all necessary regulatory authority, if any be required, to purchase the Trust Stock (upon which certification the Trustee shall be entitled to rely), immediately transfer to the person or entity therein named all the Trustee's right, title and interest in such amount of the Trust Stock as may be set forth in said direction. If any regulatory authority or approval, including STB approval, is required for such transfer, Parent will not give any such direction unless and until such regulatory authority or approval is obtained. If the foregoing direction shall specify all of the Trust Stock, then following transfer of the Trustee's right, title and interest therein, and in the event of a sale thereof, upon delivery to or upon the order of the registered holder(s) of the Trust Certificates of the proceeds of such sale, this Trust shall cease and come to an end. If the foregoing direction is as to only a part of the Trust Stock, then this Trust shall cease as to said part upon such transfer, and distribution of the net proceeds therefrom in the event of sale, but shall remain in full force and effect as to the remaining part of the Trust Stock. In the event of a direct or indirect sale of Trust Stock by Parent, the Trustee shall, to the extent the consideration therefor is payable to or controllable by the Trustee, promptly pay, or cause to be paid upon the order of Parent the net proceeds of such sale on a pro rata basis to the registered holder(s) of the Trust Certificates. It is the intention of this paragraph that no violations of 49 U.S.C. Section 11323 will result from a termination of this Trust.

(b) In the event the STB Approval (as defined below) shall have been granted, then immediately upon the direction of Parent and the delivery of a certified copy of such order of the STB or other governmental authority with respect thereof, or, in the event that Subtitle IV of Title 49 of the United States Code, or other controlling law, is amended to allow Parent or its affiliates to acquire control of the Company without obtaining STB or other governmental approval, upon delivery of an opinion of independent counsel selected by the Trustee that no order of the STB or other governmental authority is required, the Trustee shall transfer to or upon the order of the registered holder(s) of Trust Certificates hereunder as then known to the Trustee, its right, title and interest in and to all of the Trust Stock then held by it in accordance with the terms, conditions and agreements of this Trust Agreement and not theretofore transferred by it as provided in subparagraph (a) hereof, and upon such transfer this Trust shall cease and come to an end.

(c) In the event that there shall have been an STB Denial (as defined below), Parent shall use its reasonable best efforts to, directly or indirectly, (i) sell the Trust Stock to one or more eligible purchasers, or (ii) otherwise dispose of the Trust Stock, during a period of two years after such STB Denial or such extension of that period as the STB shall approve. Any such disposition shall be subject to any jurisdiction of the STB to oversee Parent's direct or indirect divestiture of Trust Stock. At all times, the Trustee shall continue to perform its duties under this Trust Agreement and, should Parent be unsuccessful in its efforts to directly or indirectly sell

or distribute the Trust Stock during the period referred to, the Trustee shall as soon as practicable sell the Trust Stock for cash to one or more eligible purchasers in such manner and for such price as the Trustee in its discretion shall deem reasonable after consultation with the Parent. (An "**eligible purchaser**" hereunder shall be a person or entity that is not affiliated with the Parent and which has all necessary regulatory authority, if any be required, to purchase the Trust Stock.) Parent agrees to cooperate with the Trustee in effecting such disposition, and the Trustee agrees to act in accordance with any direction made by Parent as to any specific terms or method of disposition, to the extent not inconsistent with the requirements of the terms of any STB or court order. The proceeds of the sale shall be distributed on a pro rata basis to or upon the order of the registered holder(s) of the Trust Certificates hereunder as then known to the Trustee. The Trustee may, in its reasonable discretion, require the surrender to it of the Trust Certificates hereunder before paying to the holder its share of the proceeds. Upon disposition of the Trust Stock pursuant to this Paragraph 9(c), this Trust shall cease and come to an end.

(d) Unless sooner terminated pursuant to any other provision herein contained, this Trust Agreement shall terminate on December 31, 2025, and may be extended by the Parties hereto, so long as no violation of 49 U.S.C. Sections 11323 will result from such termination or extension. All Trust Stock and any other property held by the Trustee hereunder upon such termination shall be distributed on a pro rata basis to or upon the order of the registered holder(s) of Trust Certificates hereunder as then known to the Trustee. The Trustee may, in its reasonable discretion, require the surrender to it of the Trust Certificates hereunder before the release or transfer of the stock interests evidenced thereby.

(e) The Trustee shall promptly inform the STB of any transfer or disposition of Trust Stock pursuant to this Paragraph 9.

(f) Except as provided in this Paragraph 9, the Trustee shall not dispose of, or in any way encumber, the Trust Stock.

(g) Notwithstanding the foregoing, if the STB issues a declaratory order that the termination of the Trust will not cause Parent or its affiliates to have control of the Company, the Trustee shall transfer on a pro rata basis to or upon the order of the registered holder(s) of Trust Certificates hereunder as then known to the Trustee, its right, title and interest in and to all of the Trust Stock then held by it in accordance with the terms and conditions of this Trust Agreement and not theretofore transferred by it as provided in subparagraph (a) hereof, and this Trust shall cease and come to an end. The Trustee may, in its reasonable discretion, require the surrender to it of the Trust Certificates hereunder before the release or transfer of the Trust Stock evidenced thereby.

(h) As used in this Paragraph 9, the terms "STB Approval" and "STB Denial" shall have the following meanings:

(i) "STB Approval" means the issuance by the STB of a decision, which decision shall become effective and which decision shall not have been stayed or enjoined, that (A) constitutes a final agency action approving, exempting or otherwise authorizing the acquisition of control over the Company's railroad operations by Parent and its affiliates, without the imposition of conditions that Parent, by written notice to the Trustee, has deemed to be unacceptable, and (B) does not require any change in the consideration paid or to be paid pursuant to the Merger Agreement or other material provisions thereof, or any change to the certificate of incorporation or by-laws of the Company, unless Parent, by written notice to the Trustee, has determined any such change to be acceptable to Parent.

(ii) "STB Denial" means (A) STB Approval shall not have been obtained by December 31, 2023, or (B) the STB shall have, by an order which shall have become final and no longer subject to review by the courts, refused to approve the control referred to in clause (A) of the definition of STB Approval.

10. **Independence of Trustee**. Neither the Trustee nor any affiliate of the Trustee may have (a) any officers, or members of their respective boards or directors, in common with Parent or any of its affiliates, or (b) any direct or indirect business arrangements or dealings, financial or otherwise, with Parent or any of its affiliates, other than dealings pertaining to establishment and carrying out of this Trust. The Trustee hereby agrees that during the term of the Trust, the Trustee shall not own any stock or securities of Parent or any of its affiliates; provided, that, for the avoidance of doubt, the foregoing shall not prohibit the Trustee from owning any interest in any independently-managed diversified mutual fund that owns stock or securities of Parent and/or any of its affiliates. Neither Parent nor its affiliates shall purchase the stock or securities of the Trustee or any affiliate of the Trustee.

11. **Compensation for Trustee**. The Trustee shall be entitled to receive reasonable and customary compensation for all services rendered by it as Trustee under the terms hereof, and said compensation to the Trustee, together with all counsel fees, taxes, or other expenses reasonably incurred hereunder, shall be promptly paid by Parent.

12. **Trustee May Act Through Agents**. The Trustee may at any time or from time to time appoint an agent or agents and may delegate to such agent or agents the performance of any administrative duty of the Trustee and be entitled to reimbursement for the fees and expenses of such agents.

13. **Responsibilities and Indemnification of the Trustee**. The Trustee shall not be answerable for the default or misconduct of any agent or attorney appointed by it in pursuance hereof if such agent or attorney shall have been selected with reasonable care. The duties and responsibilities of the Trustee shall be limited to those expressly set forth in this Trust Agreement. The Trustee shall be fully protected by acting in reliance upon any notice, advice, direction or other document or signature reasonably believed by the Trustee to be genuine. The Trustee shall not be responsible for the sufficiency or accuracy of the form, execution, validity or genuineness of the Trust Stock, or of any other documents, or of any endorsement thereon, or for any lack of endorsement thereon, or for any description therein, nor shall the Trustee be responsible or liable in any respect on account of the identity, authority or rights of the persons executing or delivering or purporting to execute or deliver any such Trust Stock or other document or endorsement or this Trust Agreement, except for the execution and delivery of this Trust Agreement by this Trustee. Parent agrees that it will at all times protect, indemnify and save harmless the Trustee from any loss, damages, liability, cost or expense of any kind or character whatsoever in connection with this Trust, except those, if any, resulting from the gross negligence or willful misconduct of the Trustee, and will at all times undertake, assume full responsibility for, and pay on a current basis, but at least quarterly, all cost and expense of any suit or litigation of any character, whether or not involving a third party, including any proceedings before the STB, with respect to the Trust Stock or this Trust Agreement, and if the Trustee shall be made a party thereto, or be the subject of any investigation or proceeding (whether formal or informal), the Parent will pay all costs, damages and expenses, including reasonable counsel fees, to which the Trustee may be subject by reason thereof; provided, however, that Parent shall not be responsible for the cost and expense of any suit that the Trustee shall settle without first obtaining Parent's written consent. The indemnification obligations of Parent shall survive any termination of this Trust Agreement or the removal, resignation or other replacement of the Trustee. The Trustee may consult with counsel selected by it and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or omitted or suffered by the Trustee hereunder in good faith and in accordance with such opinion.

14. **Trustee to Give Account to Holders**. To the extent requested to do so by Parent, Holdco or any other registered holder of a Trust Certificate, the Trustee shall furnish to the Party making such request full information with respect to (a) all property theretofore delivered to it as Trustee, (b) all property then held by it as Trustee, and (c) all action theretofore taken by it as Trustee.

15. **Resignation, Succession, Disqualification of Trustee**. The Trustee, or any trustee hereafter appointed, may at any time resign by giving sixty days' written notice of resignation to Parent, Holdco and the STB. Parent shall at least fifteen days prior to the effective date of such notice appoint a successor trustee which

shall satisfy the requirements of Paragraph 10 hereof. If no successor trustee shall have been appointed and shall have accepted appointment at least fifteen days prior to the effective date of such notice of resignation, the resigning Trustee may petition any authority or court of competent jurisdiction for the appointment of a successor trustee. Upon written assumption by the successor trustee of the Trustee's powers and duties hereunder a copy of the assumption shall be delivered by the Trustee to Parent and to Holdco, and the STB and all registered holders of Trust Certificates shall be notified of such assumption, whereupon the Trustee shall be discharged of its powers and duties hereunder and the successor trustee shall become vested therewith. In the event of any material violation by the Trustee of the terms and conditions of this Trust Agreement, the Trustee shall become disqualified from acting as trustee hereunder as soon as a successor trustee shall have been selected in the manner provided by this paragraph.

16. **Amendment**. This Trust Agreement may from time to time be modified or amended by agreement executed by the Trustee, Parent, Holdco and any other registered holder(s) of the Trust Certificates (a) pursuant to an order of the STB, (b) with the prior approval of the STB, (c) in order to comply with any order of the STB, or (d) upon receipt of an opinion of counsel satisfactory to the Trustee and the registered holder(s) of Trust Certificates that an order of the STB approving such modification or amendment is not required and that the amendment is authorized under the Merger Agreement and is consistent with the regulations of the STB regarding voting trusts.

17. **Governing Law; Powers of the STB**.

(a) THIS AGREEMENT SHALL BE DEEMED TO BE MADE IN AND IN ALL RESPECTS SHALL BE INTERPRETED, CONSTRUED AND GOVERNED BY AND IN ACCORDANCE WITH THE LAW OF THE STATE OF DELAWARE WITHOUT REGARD TO THE CONFLICT OF LAW PRINCIPLES THEREOF (OR ANY OTHER JURISDICTION) TO THE EXTENT THAT SUCH PRINCIPLES WOULD DIRECT A MATTER TO ANOTHER JURISDICTION, except that, to the extent any provision hereof may be found inconsistent with the ICC Termination Act of 1995, as amended, (the "**Act**") or regulation or decisions promulgated thereunder by the STB, such Act, decisions, and regulations shall control and such provision hereof shall be given effect only to the extent permitted by such Act and regulations. In the event that the STB shall, at any time hereafter by final order, find that compliance with law requires any other or different action by the Trustee than is provided herein, the Trustee shall act in accordance with such final order instead of the provisions of this Trust Agreement.

(b) Unless provided otherwise in the Act, each of the Parties agrees that: (i) it shall bring any action or proceeding in respect of any action or proceeding in respect of any claim arising out of or otherwise relating to this Agreement or the transactions contemplated hereby (the "**Transactions**") exclusively in the Court of Chancery of the State of Delaware, or (and only if) such court finds it lacks subject matter jurisdiction, the Superior Court of the State of Delaware (Complex Commercial Division); provided that if the subject matter over the matter is the subject of the proceeding is vested exclusively in the United States federal courts, such proceeding shall be heard in the United States District Court for the District of Delaware (the "**Chosen Courts**") and (ii) solely in connection with such proceedings, such Party (A) irrevocably and unconditionally submits to the exclusive jurisdiction of the Chosen Courts, (B) waives any objection to the laying of venue in any such action or proceeding in the Chosen Courts, (C) waives any objection that the Chosen Courts are an inconvenient forum or do not have jurisdiction over any Party, (D) consents to mailing of process or other papers in connection with any such action or proceeding in the manner provided in Paragraph 22 or in such other manner as may be permitted by applicable law shall be valid and sufficient service thereof and (E) shall not assert as a defense, any matter or claim waived by the foregoing clauses (A) through (D) of this Section 17(b) or that any order issued by the Chosen Courts may not be enforced in or by the Chosen Courts.

(c) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY BE IN CONNECTION WITH, ARISE OUT OF OR OTHERWISE RELATE TO THIS AGREEMENT, ANY INSTRUMENT OR OTHER DOCUMENT DELIVERED PURSUANT TO THIS AGREEMENT OR

OTHER DOCUMENT DELIVERED PURSUANT TO THIS AGREEMENT OR THE TRANSACTIONS, IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES, AND THEREFORE EACH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY WITH RESPECT TO ANY PROCEEDING DIRECTLY OR INDIRECTLY, IN CONNECTION WITH, ARISING OUT OF OR OTHERWISE RELATING TO THIS AGREEMENT, ANY INSTRUMENT OR OTHER DOCUMENT DELIVERED PURSUANT TO THIS AGREEMENT OR THE TRANSACTIONS. EACH PARTY HEREBY ACKNOWLEDGES AND CERTIFIES (i) THAT NO REPRESENTATIVE OF THE OTHER PARTIES HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTIES WOULD NOT, IN THE EVENT OF ANY ACTION OR PROCEEDING, SEEK TO ENFORCE THE FOREGOING WAIVER, (ii) IT UNDERSTANDS AND HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (iii) IT MAKES THIS WAIVER VOLUNTARILY AND (iv) IT HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT AND THE TRANSACTIONS, BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS, ACKNOWLEDGMENTS AND CERTIFICATIONS CONTAINED IN THIS PARAGRAPH 17(c).

18. **Counterparts**. This Trust Agreement is executed in three counterparts, each of which shall constitute an original, and one of which shall be retained by Parent, one by Holdco, and the other by the Trustee.

19. **Filing with the STB**. A copy of this Agreement and any amendments or modifications thereto shall be filed with the STB by Parent.

20. **Successors and Assigns**. This Trust Agreement shall be binding upon the successors and assigns to the Parties hereto, including without limitation successors to Parent by merger, consolidation or otherwise.

21. **Successions of Functions**. For purposes of this Trust Agreement, the term "Surface Transportation Board" or "STB," includes any successor agency or governmental department that is authorized to carry out the responsibilities now carried out by the STB with respect to voting trusts and control of common carriers.

22. **Notices**. All notices, requests, instructions, consents, claims, demands, waivers, approvals and other communications to be given or made hereunder by one or more Parties to one or more of the other Parties shall be in writing and shall be deemed to have been duly given or made on the date of receipt by the recipient thereof if received prior to 5:00 p.m. in the place of receipt and such day is a Business Day, as defined in the Merger Agreement (or otherwise on the next succeeding Business Day) if (a) served by personal delivery or by a nationally recognized overnight courier service upon the Party or Parties for whom it is intended, (b) delivered by registered or certified mail, return receipt requested or (c) sent by email; provided that the email transmission is promptly confirmed by telephone or otherwise. Such communications shall be sent to the respective Parties at the following street addresses or email addresses or at such other street address, facsimile number or email address for a Party as shall be specified for such purpose in a notice given in accordance with this Paragraph 22:

If to Parent or Holdco:

23. **Specific Performance**. Each of the Parties acknowledges and agrees that the rights of each Party to consummate the Merger and the other Transactions are special, unique and of extraordinary character and that if for any reason any of the provisions of this Agreement are not performed in accordance with their specific terms or are otherwise breached, immediate and irreparable harm or damage would be caused for which money damages would not be an adequate remedy. Accordingly, each Party agrees that, in addition to any other available remedies a Party may have in equity or at law, each Party shall be entitled to enforce specifically the terms and provisions of this Agreement and to obtain an injunction restraining any breach or violation or threatened breach or violation of the provisions of this Agreement in the Court of Chancery of the State of Delaware without necessity of posting a bond or other form of security. In the event that any action or proceeding should be brought in equity to enforce the provisions of this Agreement, no Party shall allege, and each Party hereby waives the defense, that there is an adequate remedy at law.

EXHIBIT A

IN WITNESS WHEREOF, Canadian Pacific Railway Limited and Cygnus Holding Corp. have caused this Trust Agreement to be executed by their respective authorized officers, and their corporate seals to be affixed, attested by their respective Corporate Secretaries or Assistant Corporate Secretaries, and David L. Starling has caused this Trust Agreement to be executed by one of its duly authorized corporate officers and its corporate seal to be affixed, attested to by its Corporate Secretary or one of its Assistant Corporate Secretaries, all as of the day and year first above written.

KANSAS CITY SOUTHERN

INCORPORATED UNDER THE LAWS OF THE STATE OF DELAWARE

THIS IS TO CERTIFY that will be entitled to receive, on the surrender of this Certificate, on the termination of the Voting Trust Agreement hereinafter referred to, or otherwise as provided in Paragraph 9 of said Voting Trust Agreement, (i) a certificate or certificates, as the case may be, for [●] shares of the Common Stock, $[0.01] per share par value, of the Company (as defined in said Voting Trust Agreement). This Certificate is issued pursuant to, and the rights of the holder hereof are subject to and limited by, the terms of a Voting Trust Agreement, dated as of [●], 2021, executed by Canadian Pacific Railway Limited, a Canadian corporation, Cygnus Holding Corp., a Delaware corporation ("**Holdco**") and [Trustee], as trustee (the "**Voting Trustee**"), a copy of which Voting Trust Agreement is on file in the registered office of the Company at [●], and open to inspection of any stockholder of the Company and the holder hereof. The Voting Trust Agreement, unless earlier terminated (or extended) pursuant to the terms thereof, will terminate on December 31, 2025, so long as no violation of 49 U.S.C. Sections 11323 will result from such termination.

The holder of this Certificate shall be entitled to the benefits of said Voting Trust Agreement, including the right to receive payment equal to the cash dividends, if any, paid by the Company with respect to the [number of shares] represented by this Certificate.

This Certificate shall be transferable only on the books of the undersigned Voting Trustee or any successor, to be kept by it, on surrender hereof by the registered holder in person or by attorney duly authorized in accordance with the provisions of said Voting Trust Agreement, and until so transferred, the Voting Trustee may treat the registered holder as the owner of this Voting Trust Certificate for all purposes whatsoever, unaffected by any notice to the contrary.

By accepting this Certificate, the holder hereof assents to all the provisions of, and becomes a party to, said Voting Trust Agreement.

IN WITNESS WHEREOF, the Voting Trustee has caused this Certificate to be signed by its officer duly authorized.

ANNEX B

Morgan Stanley

September 15, 2021

Board of Directors
Kansas City Southern
427 West 12th Street
Kansas City, Missouri

Members of the Board:

We understand that Kansas City Southern ("KCS" or the "Company"), Canadian Pacific Railway Limited (the "Buyer"), Cygnus Merger Sub I Corporation, a wholly owned subsidiary of the Buyer ("Surviving Merger Sub"), Cygnus Merger Sub 2 Corporation, a wholly owned subsidiary of Surviving Merger Sub ("First Merger Sub", and together with Surviving Merger Sub, "Merger Subs") propose to enter into an Agreement and Plan of Merger, substantially in the form of the draft dated September 10, 2021 (the "Merger Agreement"), which provides, among other things, for the merger of First Merger Sub with and into the Company (the "First Merger"), with the Company surviving the First Merger as a wholly owned subsidiary of Surviving Merger Sub, and the subsequent merger of the Company with and into Surviving Merger Sub (the "Second Merger", and together with the First Merger, the "Transaction"), with Surviving Merger Sub surviving the Second Merger as a wholly owned subsidiary of the Buyer. Pursuant to the First Merger, each outstanding share of common stock, par value $0.01 per share, of the Company (the "Company Common Stock"), other than shares held in treasury or held by the Buyer, Merger Subs or the Company (in each case, other than shares held on behalf of third parties) or shares with respect to which the holders thereof have not voted in favor of the adoption of the Merger Agreement or consented thereto in writing and who have properly exercised appraisal rights with respect thereto in accordance with, and who have complied with, Section 262 of the Delaware General Corporation Law (collectively, "Excluded Shares"), will be converted into the right to receive (i) $90.00 per share in cash and (ii) 2.884 shares of common stock, without par value, of the Buyer (the "Buyer Common Stock") as set forth in the Merger Agreement (together, the "Consideration"). The terms and conditions of the Transaction are more fully set forth in the Merger Agreement.

You have asked for our opinion as to whether the Consideration to be received by the holders of shares of the Company Common Stock (other than Excluded Shares) pursuant to the Merger Agreement is fair from a financial point of view to such holders of shares of the Company Common Stock.

For purposes of the opinion set forth herein, we have:

1) Reviewed certain publicly available financial statements and other business and financial information of the Company and the Buyer, respectively;
2) Reviewed certain internal financial statements and other financial and operating data concerning the Company and the Buyer, respectively;
3) Reviewed certain financial projections with respect to the Company and the Buyer prepared by the management of the Company;
4) Reviewed information relating to certain strategic, financial and operational benefits anticipated from the Transaction, prepared by the managements of the Company and the Buyer, respectively;
5) Discussed the past and current operations and financial condition and the prospects of the Company, including information relating to certain strategic, financial and operational benefits anticipated from the Transaction, with senior executives of the Company;

Morgan Stanley

6) Discussed the past and current operations and financial condition and the prospects of the Buyer, including information relating to certain strategic, financial and operational benefits anticipated from the Transaction, with senior executives of the Buyer;
7) Reviewed the reported prices and trading activity for the Company Common Stock and the Buyer Common Stock;
8) Compared the financial performance of the Company and the Buyer and the prices and trading activity of the Company Common Stock and the Buyer Common Stock with that of certain other publicly-traded companies comparable with the Company and the Buyer, respectively, and their securities;
9) Reviewed the financial terms, to the extent publicly available, of certain comparable acquisition transactions;
I0) Participated in certain discussions and negotiations among representatives of the Company and the Buyer and certain parties and their financial and legal advisors;
11) Reviewed the Merger Agreement, the commitment letters from certain lenders, dated as of September 12, 2021 (collectively, the "Commitment Letters"), Decision No. 5 (Docket No. FD 36500) of the Surface Transportation Board (the "STB Voting Trust Approval"), the form of Voting Trust Agreement to be entered into among the Buyer, Cygnus Holding Corporation, a wholly owned subsidiary of the Buyer, and the Trustee (the "Voting Trust Agreement"), and certain related documents; and
12) Performed such other analyses, reviewed such other information and considered such other factors as we have deemed appropriate.

We have assumed and relied upon, without independent verification, the accuracy and completeness of the information that was publicly available or supplied or otherwise made available to us by the Company and the Buyer, respectively, and formed a substantial basis for this opinion. With respect to the financial projections of the Company, including information relating to certain strategic, financial and operational benefits anticipated from the Transaction, we have assumed that they have been reasonably prepared on bases reflecting the best currently available estimates and judgments of the management of the Company of the future financial performance of the Company. With respect to the financial projections of the Buyer, including information relating to certain strategic, financial and operational benefits anticipated from the Transaction, we have assumed that they have been reasonably prepared on bases reflecting the best currently available estimates and judgments of the management of the Company of the future financial performance of the Buyer, including following consummation of the Transaction. In addition, we have assumed that the Transaction will be consummated in accordance with the terms set forth in the Merger Agreement without any waiver, amendment or delay of any terms or conditions, including, among other things, (i) that the Transaction will be treated as a tax-free reorganization pursuant to the Internal Revenue Code of 1986, as amended, (ii) that the Buyer will obtain financing in accordance with the terms set forth in the Commitment Letters, (iii) that the Surface Transportation Board will permit the Transaction to close into a Voting Trust in accordance with the terms of the STB Voting Trust Approval and the Voting Trust Agreement and (iv) that the definitive Merger Agreement will not differ in any material respect from the draft thereof furnished to us. Morgan Stanley has assumed that in connection with the receipt of all the necessary governmental, regulatory or other approvals and consents required for the proposed Transaction, no delays, limitations, conditions or restrictions will be imposed that would have a material adverse effect on the contemplated benefits expected to be derived in the proposed Transaction. We have relied upon, without independent verification, the assessment by the managements of the Company and the Buyer of: (i) the strategic, financial and other benefits expected to result from the Transaction; (ii) the timing and risks associated with the integration of the Company and the Buyer; (iii) their ability to retain key employees of the Company and the Buyer, respectively, and (iv) the validity of, and risks associated with, the Company and the Buyer's existing and future technologies, intellectual property, products, services and business models. We

are not legal, tax, or regulatory advisors. We are financial advisors only and have relied upon, without independent verification, the assessment of the Buyer and the Company and their legal, tax or regulatory advisors with respect to legal, tax, or regulatory matters. We express no opinion with respect to the fairness of the amount or nature of the compensation to any of the Company's officers, directors or employees, or any class of such persons, relative to the Consideration to be received by the holders of shares of the Company Common Stock in the Transaction. This opinion does not address the relative merits of the transactions contemplated by the Merger Agreement as compared to other business or financial strategies that might be available to the Company, nor does it address the underlying business decision of the Company to enter into the Merger Agreement or proceed with any other transaction contemplated by the Merger Agreement. We express no opinion with respect to the treatment of the preferred stock, par value $25 per share, of the Company in the Transaction. We have not made any independent valuation or appraisal of the assets or liabilities of the Company or the Buyer, nor have we been furnished with any such valuations or appraisals. Our opinion is necessarily based on financial, economic, market and other conditions as in effect on, and the information made available to us as of, the date hereof. Events occurring after the date hereof may affect this opinion and the assumptions used in preparing it, and we do not assume any obligation to update, revise or reaffirm this opinion.

We have acted as financial advisor to the Board of Directors of the Company in connection with the Transaction and will receive a fee for our services, a portion of which was paid to us upon the execution and announcement of the previous merger agreement with the Buyer in March 2021, a portion of which was paid to us upon the rendering of a fairness opinion in connection with the alternate transaction involving Canadian National Railway Company announced in May 2021, a portion of which is contingent upon the rendering of this opinion and a significant portion of which is contingent upon the closing of the Transaction. In the two years prior to the date hereof, we have provided financial advisory and/or financing services to the Company, the Buyer and certain of their respective affiliates, and have received fees in connection with such services. In addition, Morgan Stanley or one of its affiliates is currently a lender to each of the Company and the Buyer under their respective revolving credit facilities, and is also currently engaged to provide financing services to the Buyer that are unrelated to the Transaction, for which Morgan Stanley expects to receive customary fees. Morgan Stanley may also seek to provide financial advisory and financing services to the Company, the Buyer and their respective affiliates in the future and would expect to receive fees for the rendering of these services.

Please note that Morgan Stanley is a global financial services firm engaged in the securities, investment management and individual wealth management businesses. Our securities business is engaged in securities underwriting, trading and brokerage activities, foreign exchange, commodities and derivatives trading, prime brokerage, as well as providing investment banking, financing and financial advisory services. Morgan Stanley, its affiliates, directors and officers may at any time invest on a principal basis or manage funds that invest, hold long or short positions, finance positions, and may trade or otherwise structure and effect transactions, for their own account or the accounts of its customers, in debt or equity securities or loans of the Buyer, the Company, their respective affiliates or any other company, or any currency or commodity, that may be involved in the Transaction, or any related derivative instrument.

This opinion has been approved by a committee of Morgan Stanley investment banking and other professionals in accordance with our customary practice. This opinion is for the information of the Board of Directors of the Company and may not be used for any other purpose or disclosed without our prior written consent, except that a copy of this opinion may be included in its entirety in any filing the Company is required to make with the Securities and Exchange Commission in connection with the Transaction if such inclusion is required by applicable law. In addition, this opinion does not in any manner address the prices at which the Buyer Common Stock will trade following consummation of the Transaction or at any time and Morgan Stanley expresses no opinion or recommendation as to how the shareholders of the Company or the Buyer should vote at the shareholder meetings to be held in connection with the Transaction.

Morgan Stanley

Based on and subject to the foregoing, we are of the opinion on the date hereof that the Consideration to be received by the holders of shares of the Company Common Stock (other than Excluded Shares) pursuant to the Merger Agreement is fair from a financial point of view to such holders of shares of the Company Common Stock.

Very truly yours,
MORGAN STANLEY & CO. LLC

ANNEX C

BofA SECURITIES
GLOBAL CORPORATE &
INVESTMENT BANKING

BofA Securities, Inc.

September 15, 2021

The Board of Directors
Kansas City Southern
427 West 12th Street
Kansas City, Missouri

Members of the Board of Directors:

We understand that Kansas City Southern ("KCS") proposes to enter into an Agreement and Plan of Merger (the "Merger Agreement"), among KCS, Canadian Pacific Railway Limited ("CP"), Cygnus Merger Sub 1 Corporation, a wholly owned subsidiary of CP ("Surviving Merger Sub") and Cygnus Merger Sub 2 Corporation, a wholly owned subsidiary of Surviving Merger Sub ("First Merger Sub", and together with Surviving Merger Sub, "Merger Subs"), pursuant to which, among other things, First Merger Sub will merge with and into KCS (the "First Merger"), with KCS surviving the First Merger as a wholly owned subsidiary of Surviving Merger Sub, and immediately thereafter KCS will merge with and into Surviving Merger Sub (the "Second Merger", and together with the First Merger, the "Transaction"), with Surviving Merger Sub surviving the Second Merger as a wholly owned subsidiary of CP. Pursuant to the First Merger, each outstanding share of common stock, par value $0.01 per share, of KCS (the "KCS Common Stock"), other than shares held in treasury or held by CP, Merger Subs or KCS (in each case, other than shares held on behalf of third parties) or shares with respect to which the holders thereof have not voted in favor of the adoption of the Merger Agreement or consented thereto in writing and who have properly exercised appraisal rights with respect thereto in accordance with, and who have complied with, Section 262 of the Delaware General Corporation Law (collectively, "Excluded Shares"), will be converted into the right to receive (i) $90.00 in cash (the "Cash Consideration") and (ii) 2.884 shares (the "Stock Consideration" and, together with the Cash Consideration, the "Consideration") of the common stock, without par value, of CP (the "CP Common Stock") as set forth in the Merger Agreement. The terms and conditions of the Transaction are more fully set forth in the Merger Agreement.

You have requested our opinion as to the fairness, from a financial point of view, to the holders of KCS Common Stock (other than Excluded Shares) of the Consideration to be received by such holders in the Transaction.

In connection with this opinion, we have, among other things:

(1) reviewed certain publicly available business and financial information relating to KCS and CP;
(2) reviewed certain internal financial and operating information with respect to the business, operations and prospects of KCS furnished to or discussed with us by the management of KCS, including certain financial forecasts relating to KCS prepared by the management of KCS (such forecasts, the "KCS Forecasts");

BofA Securities, Inc. member FINRA/SIPC, is a subsidiary of Bank of America Corporation

(3) reviewed certain internal financial and operating information with respect to the business, operations and prospects of CP furnished to or discussed with us by the management of KCS, including certain financial forecasts relating to CP prepared by the management of KCS (such forecasts, the "CP Forecasts");

(4) reviewed certain estimates as to the amount and timing of cost savings and revenue enhancements (collectively, the "Synergies") anticipated by the managements of KCS and CP to result from the Transaction;

(5) discussed the past and current business, operations, financial condition and prospects of KCS with members of senior managements of KCS and CP, and discussed the past and current business, operations, financial condition and prospects of CP with members of senior managements of KCS and CP;

(6) reviewed the trading histories for KCS Common Stock and CP Common Stock and a comparison of such trading histories with the trading histories of other companies we deemed relevant;

(7) compared certain financial and stock market information of KCS and CP with similar information of other companies we deemed relevant;

(8) compared certain financial terms of the Transaction to financial terms, to the extent publicly available, of other transactions we deemed relevant;

(9) reviewed a draft dated September 10, 2021 of the Merger Agreement (the "Draft Agreement"), commitment letters from certain lenders, dated as of September 12, 2021 (collectively, the "Commitment Letters"), Decision No. 5 (Docket No. FD 36500) of the Surface Transportation Board (the "STB Voting Trust Approval") and the form of Voting Trust Agreement to be entered into among CP, Cygnus Holding Corporation, a wholly owned subsidiary of CP, and the Trustee (the "Voting Trust Agreement"), and certain related documents; and

(10) performed such other analyses and studies and considered such other information and factors as we deemed appropriate.

In arriving at our opinion, we have assumed and relied upon, without independent verification, the accuracy and completeness of the financial and other information and data publicly available or provided to or otherwise reviewed by or discussed with us and have relied upon the assurances of the managements of KCS and CP that they are not aware of any facts or circumstances that would make such information or data inaccurate or misleading in any material respect. With respect to the KCS Forecasts, we have been advised by KCS, and have assumed, that they have been reasonably prepared on bases reflecting the best currently available estimates and good faith judgments of the management of KCS as to the future financial performance of KCS. With respect to the CP Forecasts and Synergies, we have been advised by KCS, and have assumed, with the consent of KCS, that they have been reasonably prepared on bases reflecting the best currently available estimates and good faith judgments of the management of KCS as to the future financial performance of CP and other matters covered thereby. We have relied, at the direction of KCS, on the assessments of the managements of KCS and CP, respectively, as to CP's ability to achieve the Synergies and have been advised by KCS and CP, and have assumed, with the consent of KCS, that the Synergies will be realized in the amounts and at the times projected.

The Board of Directors
Kansas City Southern
Page 3

We have not made or been provided with any independent evaluation or appraisal of the assets or liabilities (contingent or otherwise) of KCS or CP, nor have we made any physical inspection of the properties or assets of KCS or CP. We have not evaluated the solvency or fair value of KCS or CP under any state, federal or other laws relating to bankruptcy, insolvency or similar matters. We have assumed, at the direction of KCS, that the Transaction will be consummated in accordance with the terms set forth in the Merger Agreement, without waiver, modification or amendment of any material term, condition or other agreement contemplated therein or thereby and that, in the course of obtaining the necessary governmental, regulatory and other approvals, consents, releases and waivers for the Transaction, no delay, limitation, restriction or condition, including any divestiture requirements or amendments or modifications, will be imposed that would have an adverse effect on KCS, CP or the contemplated benefits of the Transaction. We have also assumed, at the direction of KCS, that (i) the Transaction will qualify for federal income tax purposes as a reorganization under the provisions of Section 368(a) of the Internal Revenue Code of 1986, as amended, (ii) CP will obtain financing in accordance with the terms set forth in the Commitment Letters, (iii) the Surface Transportation Board will permit the Transaction to close into a Voting Trust in accordance with the terms of the STB Voting Trust Approval and the Voting Trust Agreement and (iv) the final executed Merger Agreement will not differ in any material respect from the Draft Agreement reviewed by us.

We express no view or opinion as to any terms or other aspects of the Transaction (other than the Consideration to the extent expressly specified herein), including, without limitation, the form or structure of the Transaction. Our opinion is limited to the fairness, from a financial point of view, of the Consideration to be received by the holders of shares of KCS Common Stock (other than Excluded Shares) in the Transaction and no opinion or view is expressed with respect to any consideration to be received by the holders of the preferred stock, par value $25 per share, of KCS or any other class of securities, creditors or other constituencies of any party. In addition, no opinion or view is expressed with respect to the fairness (financial or otherwise) of the amount, nature or any other aspect of any compensation to any of the officers, directors or employees of any party to the Transaction, or class of such persons, relative to the Consideration. Furthermore, no opinion or view is expressed as to the relative merits of the Transaction in comparison to other strategies or transactions that might be available to KCS or in which KCS might engage or as to the underlying business decision of KCS to proceed with or effect the Transaction. We are not expressing any opinion as to what the value of CP Common Stock actually will be when issued or the prices at which KCS Common Stock or CP Common Stock will trade at any time, including following announcement or consummation of the Transaction. In addition, we express no opinion or recommendation as to how any stockholder should vote or act in connection with the Transaction or any related matter.

We have acted as financial advisor to KCS in connection with the Transaction and will receive a fee for our services, a portion of which was paid to us upon delivery of our opinion in connection with the previously proposed acquisition of KCS by CP announced in March 2021, a portion of which was paid upon delivery of our opinion in connection with the alternate proposed transaction involving Canadian National Railway Company announced in May 2021, a portion of which is payable upon the rendering of this opinion and a significant portion of which is contingent upon consummation of the Transaction. In addition, KCS has agreed to reimburse our expenses and indemnify us against certain liabilities arising out of our engagement.

We and our affiliates comprise a full service securities firm and commercial bank engaged in securities, commodities and derivatives trading, foreign exchange and other brokerage activities, and principal investing as well as providing investment, corporate and private banking, asset and investment management, financing and financial advisory services and other commercial services and products to a wide range of companies, governments and individuals. In the ordinary course of our businesses, we and our affiliates may invest on a principal basis or on behalf of customers or manage funds that invest, make or hold long or short positions, finance positions or trade or otherwise effect transactions in equity, debt or other securities or financial instruments (including derivatives, bank loans or other obligations) of KCS, CP and certain of their respective affiliates.

We and our affiliates in the past have provided, currently are providing, and in the future may provide, investment banking, commercial banking and other financial services to KCS and have received, or in the future may receive, compensation for the rendering of these services, including (i) having acted as a joint bookrunner on certain debt capital markets transactions for KCS, (ii) having acted as a dealer-manager on an accelerated share repurchase transaction for KCS and (iii) having acted or acting as administrative agent, co-lead arranger and joint bookrunner for, and as a lender (including a letter of credit lender) under, KCS's $600 million senior unsecured revolving credit facility due March 8, 2024.

In addition, we and our affiliates in the past have provided, currently are providing, and in the future may provide, investment banking, commercial banking and other financial services to CP and have received or in the future may receive compensation for the rendering of these services, including (i) having acted as a bookrunning manager and/or co-manager on certain debt capital markets transactions for CP, (ii) having acted or acting as a lender under CP's $1.3 billion revolving credit facility, which consists of a $1.0 billion tranche due September 27, 2024 and a $300 million tranche due September 27, 2021, and (iii) having provided or providing certain treasury services and products to CP.

It is understood that this letter is for the benefit and use of the Board of Directors of KCS (in its capacity as such) in connection with and for purposes of its evaluation of the Transaction.

Our opinion is necessarily based on financial, economic, monetary, market and other conditions and circumstances as in effect on, and the information made available to us as of, the date hereof. As you are aware, the credit, financial and stock markets have been experiencing unusual volatility and we express no opinion or view as to any potential effects of such volatility on KCS, CP or the Transaction. It should be understood that subsequent developments may affect this opinion, and we do not have any obligation to update, revise, or reaffirm this opinion. The issuance of this opinion was approved by a fairness opinion review committee of BofA Securities, Inc.

The Board of Directors
Kansas City Southern
Page 5
Based upon and subject to the foregoing, including the various assumptions and limitations set forth herein, we are of the opinion on the date hereof that the Consideration to be received in the Transaction by the holders of KCS Common Stock (other than Excluded Shares) is fair, from a financial point of view, to such holders.

Very truly yours,
/s/ BOFA SECURITIES, INC.

ANNEX D

Section 262 of the General Corporation Law of the State of Delaware

Section 262 Appraisal Rights

(a) Any stockholder of a corporation of this State who holds shares of stock on the date of the making of a demand pursuant to subsection (d) of this section with respect to such shares, who continuously holds such shares through the effective date of the merger or consolidation, who has otherwise complied with subsection (d) of this section and who has neither voted in favor of the merger or consolidation nor consented thereto in writing pursuant to § 228 of this title shall be entitled to an appraisal by the Court of Chancery of the fair value of the stockholder's shares of stock under the circumstances described in subsections (b) and (c) of this section. As used in this section, the word "stockholder" means a holder of record of stock in a corporation; the words "stock" and "share" mean and include what is ordinarily meant by those words; and the words "depository receipt" mean a receipt or other instrument issued by a depository representing an interest in 1 or more shares, or fractions thereof, solely of stock of a corporation, which stock is deposited with the depository.

(b) Appraisal rights shall be available for the shares of any class or series of stock of a constituent corporation in a merger or consolidation to be effected pursuant to § 251 (other than a merger effected pursuant to § 251(g) of this title), § 252, § 254, § 255, § 256, § 257, § 258, § 263 or § 264 of this title:

(1) Provided, however, that no appraisal rights under this section shall be available for the shares of any class or series of stock, which stock, or depository receipts in respect thereof, at the record date fixed to determine the stockholders entitled to receive notice of the meeting of stockholders to act upon the agreement of merger or consolidation (or, in the case of a merger pursuant to § 251(h), as of immediately prior to the execution of the agreement of merger), were either: (i) listed on a national securities exchange or (ii) held of record by more than 2,000 holders; and further provided that no appraisal rights shall be available for any shares of stock of the constituent corporation surviving a merger if the merger did not require for its approval the vote of the stockholders of the surviving corporation as provided in § 251(f) of this title.

(2) Notwithstanding paragraph (b)(1) of this section, appraisal rights under this section shall be available for the shares of any class or series of stock of a constituent corporation if the holders thereof are required by the terms of an agreement of merger or consolidation pursuant to §§ 251, 252, 254, 255, 256, 257, 258, 263 and 264 of this title to accept for such stock anything except:

a. Shares of stock of the corporation surviving or resulting from such merger or consolidation, or depository receipts in respect thereof;

b. Shares of stock of any other corporation, or depository receipts in respect thereof, which shares of stock (or depository receipts in respect thereof) or depository receipts at the effective date of the merger or consolidation will be either listed on a national securities exchange or held of record by more than 2,000 holders;

c. Cash in lieu of fractional shares or fractional depository receipts described in the foregoing paragraphs (b)(2)a. and b. of this section; or

d. Any combination of the shares of stock, depository receipts and cash in lieu of fractional shares or fractional depository receipts described in the foregoing paragraphs (b)(2)a., b. and c. of this section.

(3) In the event all of the stock of a subsidiary Delaware corporation party to a merger effected under § 253 or § 267 of this title is not owned by the parent immediately prior to the merger, appraisal rights shall be available for the shares of the subsidiary Delaware corporation.

(4) Repealed by 82 Laws 2020, ch. 256, § 15.

(c) Any corporation may provide in its certificate of incorporation that appraisal rights under this section shall be available for the shares of any class or series of its stock as a result of an amendment to its certificate of incorporation, any merger or consolidation in which the corporation is a constituent corporation or the sale of all or substantially all of the assets of the corporation. If the certificate of incorporation contains such a provision, the provisions of this section, including those set forth in subsections (d), (e), and (g) of this section, shall apply as nearly as is practicable.

(d) Appraisal rights shall be perfected as follows:

(1) If a proposed merger or consolidation for which appraisal rights are provided under this section is to be submitted for approval at a meeting of stockholders, the corporation, not less than 20 days prior to the meeting, shall notify each of its stockholders who was such on the record date for notice of such meeting (or such members who received notice in accordance with § 255(c) of this title) with respect to shares for which appraisal rights are available pursuant to subsection (b) or (c) of this section that appraisal rights are available for any or all of the shares of the constituent corporations, and shall include in such notice a copy of this section and, if 1 of the constituent corporations is a nonstock corporation, a copy of § 114 of this title. Each stockholder electing to demand the appraisal of such stockholder's shares shall deliver to the corporation, before the taking of the vote on the merger or consolidation, a written demand for appraisal of such stockholder's shares; provided that a demand may be delivered to the corporation by electronic transmission if directed to an information processing system (if any) expressly designated for that purpose in such notice. Such demand will be sufficient if it reasonably informs the corporation of the identity of the stockholder and that the stockholder intends thereby to demand the appraisal of such stockholder's shares. A proxy or vote against the merger or consolidation shall not constitute such a demand. A stockholder electing to take such action must do so by a separate written demand as herein provided. Within 10 days after the effective date of such merger or consolidation, the surviving or resulting corporation shall notify each stockholder of each constituent corporation who has complied with this subsection and has not voted in favor of or consented to the merger or consolidation of the date that the merger or consolidation has become effective; or

(2) If the merger or consolidation was approved pursuant to § 228, § 251(h), § 253, or § 267 of this title, then either a constituent corporation before the effective date of the merger or consolidation or the surviving or resulting corporation within 10 days thereafter shall notify each of the holders of any class or series of stock of such constituent corporation who are entitled to appraisal rights of the approval of the merger or consolidation and that appraisal rights are available for any or all shares of such class or series of stock of such constituent corporation, and shall include in such notice a copy of this section and, if 1 of the constituent corporations is a nonstock corporation, a copy of § 114 of this title. Such notice may, and, if given on or after the effective date of the merger or consolidation, shall, also notify such stockholders of the effective date of the merger or consolidation. Any stockholder entitled to appraisal rights may, within 20 days after the date of giving such notice or, in the case of a merger approved pursuant to § 251(h) of this title, within the later of the consummation of the offer contemplated by § 251(h) of this title and 20 days after the date of giving such notice, demand in writing from the surviving or resulting corporation the appraisal of such holder's shares; provided that a demand may be delivered to the corporation by electronic transmission if directed to an information processing system (if any) expressly designated for that purpose in such notice. Such demand will be sufficient if it reasonably informs the corporation of the identity of the stockholder and that the stockholder intends thereby to demand the appraisal of such holder's shares. If such notice did not notify stockholders of the effective date of the merger or consolidation, either (i) each such constituent corporation shall send a second notice before the effective date of the merger or consolidation notifying each of the holders of any class or series of stock of such constituent corporation that are entitled to appraisal rights of the effective date of the merger or consolidation or (ii) the surviving or resulting corporation shall send such a second notice to all such holders on or within 10 days after such effective date; provided, however, that if such second notice is sent more than 20 days following the sending of the first notice or, in the case of a merger approved pursuant to § 251(h) of this title, later than the later of the consummation of the offer contemplated by § 251(h) of this title and 20 days following the sending of the

first notice, such second notice need only be sent to each stockholder who is entitled to appraisal rights and who has demanded appraisal of such holder's shares in accordance with this subsection. An affidavit of the secretary or assistant secretary or of the transfer agent of the corporation that is required to give either notice that such notice has been given shall, in the absence of fraud, be prima facie evidence of the facts stated therein. For purposes of determining the stockholders entitled to receive either notice, each constituent corporation may fix, in advance, a record date that shall be not more than 10 days prior to the date the notice is given, provided, that if the notice is given on or after the effective date of the merger or consolidation, the record date shall be such effective date. If no record date is fixed and the notice is given prior to the effective date, the record date shall be the close of business on the day next preceding the day on which the notice is given.

(e) Within 120 days after the effective date of the merger or consolidation, the surviving or resulting corporation or any stockholder who has complied with subsections (a) and (d) of this section hereof and who is otherwise entitled to appraisal rights, may commence an appraisal proceeding by filing a petition in the Court of Chancery demanding a determination of the value of the stock of all such stockholders. Notwithstanding the foregoing, at any time within 60 days after the effective date of the merger or consolidation, any stockholder who has not commenced an appraisal proceeding or joined that proceeding as a named party shall have the right to withdraw such stockholder's demand for appraisal and to accept the terms offered upon the merger or consolidation. Within 120 days after the effective date of the merger or consolidation, any stockholder who has complied with the requirements of subsections (a) and (d) of this section hereof, upon request given in writing (or by electronic transmission directed to an information processing system (if any) expressly designated for that purpose in the notice of appraisal), shall be entitled to receive from the corporation surviving the merger or resulting from the consolidation a statement setting forth the aggregate number of shares not voted in favor of the merger or consolidation (or, in the case of a merger approved pursuant to § 251(h) of this title, the aggregate number of shares (other than any excluded stock (as defined in § 251(h)(6)d. of this title)) that were the subject of, and were not tendered into, and accepted for purchase or exchange in, the offer referred to in § 251(h)(2)), and, in either case, with respect to which demands for appraisal have been received and the aggregate number of holders of such shares. Such statement shall be given to the stockholder within 10 days after such stockholder's request for such a statement is received by the surviving or resulting corporation or within 10 days after expiration of the period for delivery of demands for appraisal under subsection (d) of this section hereof, whichever is later. Notwithstanding subsection (a) of this section, a person who is the beneficial owner of shares of such stock held either in a voting trust or by a nominee on behalf of such person may, in such person's own name, file a petition or request from the corporation the statement described in this subsection.

(f) Upon the filing of any such petition by a stockholder, service of a copy thereof shall be made upon the surviving or resulting corporation, which shall within 20 days after such service file in the office of the Register in Chancery in which the petition was filed a duly verified list containing the names and addresses of all stockholders who have demanded payment for their shares and with whom agreements as to the value of their shares have not been reached by the surviving or resulting corporation. If the petition shall be filed by the surviving or resulting corporation, the petition shall be accompanied by such a duly verified list. The Register in Chancery, if so ordered by the Court, shall give notice of the time and place fixed for the hearing of such petition by registered or certified mail to the surviving or resulting corporation and to the stockholders shown on the list at the addresses therein stated. Such notice shall also be given by 1 or more publications at least 1 week before the day of the hearing, in a newspaper of general circulation published in the City of Wilmington, Delaware or such publication as the Court deems advisable. The forms of the notices by mail and by publication shall be approved by the Court, and the costs thereof shall be borne by the surviving or resulting corporation.

(g) At the hearing on such petition, the Court shall determine the stockholders who have complied with this section and who have become entitled to appraisal rights. The Court may require the stockholders who have demanded an appraisal for their shares and who hold stock represented by certificates to submit their certificates of stock to the Register in Chancery for notation thereon of the pendency of the appraisal proceedings; and if any stockholder fails to comply with such direction, the Court may dismiss the proceedings as to such stockholder. If

immediately before the merger or consolidation the shares of the class or series of stock of the constituent corporation as to which appraisal rights are available were listed on a national securities exchange, the Court shall dismiss the proceedings as to all holders of such shares who are otherwise entitled to appraisal rights unless (1) the total number of shares entitled to appraisal exceeds 1% of the outstanding shares of the class or series eligible for appraisal, (2) the value of the consideration provided in the merger or consolidation for such total number of shares exceeds $1 million, or (3) the merger was approved pursuant to § 253 or § 267 of this title.

(h) After the Court determines the stockholders entitled to an appraisal, the appraisal proceeding shall be conducted in accordance with the rules of the Court of Chancery, including any rules specifically governing appraisal proceedings. Through such proceeding the Court shall determine the fair value of the shares exclusive of any element of value arising from the accomplishment or expectation of the merger or consolidation, together with interest, if any, to be paid upon the amount determined to be the fair value. In determining such fair value, the Court shall take into account all relevant factors. Unless the Court in its discretion determines otherwise for good cause shown, and except as provided in this subsection, interest from the effective date of the merger through the date of payment of the judgment shall be compounded quarterly and shall accrue at 5% over the Federal Reserve discount rate (including any surcharge) as established from time to time during the period between the effective date of the merger and the date of payment of the judgment. At any time before the entry of judgment in the proceedings, the surviving corporation may pay to each stockholder entitled to appraisal an amount in cash, in which case interest shall accrue thereafter as provided herein only upon the sum of (1) the difference, if any, between the amount so paid and the fair value of the shares as determined by the Court, and (2) interest theretofore accrued, unless paid at that time. Upon application by the surviving or resulting corporation or by any stockholder entitled to participate in the appraisal proceeding, the Court may, in its discretion, proceed to trial upon the appraisal prior to the final determination of the stockholders entitled to an appraisal. Any stockholder whose name appears on the list filed by the surviving or resulting corporation pursuant to subsection (f) of this section and who has submitted such stockholder's certificates of stock to the Register in Chancery, if such is required, may participate fully in all proceedings until it is finally determined that such stockholder is not entitled to appraisal rights under this section.

(i) The Court shall direct the payment of the fair value of the shares, together with interest, if any, by the surviving or resulting corporation to the stockholders entitled thereto. Payment shall be so made to each such stockholder, in the case of holders of uncertificated stock forthwith, and the case of holders of shares represented by certificates upon the surrender to the corporation of the certificates representing such stock. The Court's decree may be enforced as other decrees in the Court of Chancery may be enforced, whether such surviving or resulting corporation be a corporation of this State or of any state.

(j) The costs of the proceeding may be determined by the Court and taxed upon the parties as the Court deems equitable in the circumstances. Upon application of a stockholder, the Court may order all or a portion of the expenses incurred by any stockholder in connection with the appraisal proceeding, including, without limitation, reasonable attorney's fees and the fees and expenses of experts, to be charged pro rata against the value of all the shares entitled to an appraisal.

(k) From and after the effective date of the merger or consolidation, no stockholder who has demanded appraisal rights as provided in subsection (d) of this section shall be entitled to vote such stock for any purpose or to receive payment of dividends or other distributions on the stock (except dividends or other distributions payable to stockholders of record at a date which is prior to the effective date of the merger or consolidation); provided, however, that if no petition for an appraisal shall be filed within the time provided in subsection (e) of this section, or if such stockholder shall deliver to the surviving or resulting corporation a written withdrawal of such stockholder's demand for an appraisal and an acceptance of the merger or consolidation, either within 60 days after the effective date of the merger or consolidation as provided in subsection (e) of this section or thereafter with the written approval of the corporation, then the right of such stockholder to an appraisal shall cease. Notwithstanding the foregoing, no appraisal proceeding in the Court of Chancery shall be dismissed as to any stockholder without the approval of the Court, and such approval may be conditioned upon such terms as the

Court deems just; provided, however that this provision shall not affect the right of any stockholder who has not commenced an appraisal proceeding or joined that proceeding as a named party to withdraw such stockholder's demand for appraisal and to accept the terms offered upon the merger or consolidation within 60 days after the effective date of the merger or consolidation, as set forth in subsection (e) of this section.

(l) The shares of the surviving or resulting corporation to which the shares of such objecting stockholders would have been converted had they assented to the merger or consolidation shall have the status of authorized and unissued shares of the surviving or resulting corporation.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 20. Indemnification of Officers and Directors

Section 7.02 of By-law No. 1 of CPRL, as amended, provides, with regard to indemnity under the CBCA, as follows:

"The Corporation shall indemnify a director or officer of the Corporation, a former director or officer of the Corporation or a person who acts or acted at the Corporation's request as a director or officer of a body corporate of which the Corporation is or was a shareholder or creditor, and the heirs and legal representatives thereof, to the extent permitted by the [CBCA] or otherwise by law."

The CBCA provides that a corporation may indemnify a director or officer, a former director or officer, or another individual who acts or acted at the corporation's request as a director or officer, or an individual acting in a similar capacity, of another entity (which we refer to collectively as an Indemnified Person) against all costs, charges and expenses, including an amount paid to settle an action or satisfy a judgment, reasonably incurred by the Indemnified Person in respect of any civil, criminal, administrative, investigative or other proceeding (other than an action by or on behalf of CPRL to procure a judgment in its favor) in which the Indemnified Person is involved because of that association with CPRL or other entity, if the Indemnified Person:

a) acted honestly and in good faith with a view to the best interests of the corporation, or, as the case may be, to the best interests of the other entity for which the individual acted as director or officer or in a similar capacity at the corporation's request; and
b) in the case of a criminal or administrative action or proceeding that is enforced by a monetary penalty, the individual had reasonable grounds for believing that the individual's conduct was lawful.

In respect of an action by or on behalf of CPRL or other entity to procure a judgment in its favor, CPRL, with the approval of a court, may indemnify an Indemnified Person against all costs, charges and expenses reasonably incurred by an Indemnified Person in connection with such action, if the Indemnified Person satisfies the conditions set forth above in clauses (a) and (b) above. Notwithstanding the foregoing, an Indemnified Person is entitled to indemnification from CPRL in respect of all costs, charges and expenses reasonably incurred by such Indemnified Person in connection with the defense of any civil, criminal, administrative, investigative or other proceeding to which such Indemnified Person is made a party by reason of such Indemnified Person's association with CPRL or such other entity, if such Indemnified Person satisfies the conditions set forth above in clauses (a) and (b) above and was not judged by the court or other competent authority to have committed any fault or omitted to do anything that such Indemnified Person ought to have done.

Insofar as indemnification for liabilities arising under the U.S. Securities Act may be permitted to directors, officers or persons controlling the registrant pursuant to the foregoing provisions, the registrant has been informed that in the opinion of the U.S. Securities and Exchange Commission such indemnification is against public policy as expressed in the U.S. Securities Act and is therefore unenforceable.

Item 21. Exhibits and Financial Statement Schedules

A list of the exhibits included as part of this registration statement is set forth in the Exhibit Index that immediately precedes such exhibits and is incorporated herein by reference.

Item 22. Undertakings

(A) The undersigned registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) To include any prospectus required by section 10(a)(3) of the U.S. Securities Act;

(ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and

(iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

(2) That, for the purpose of determining any liability under the U.S. Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(4) To file a post-effective amendment to the registration statement to include any financial statements required by "Item 8.A. of Form 20-F" at the start of any delayed offering or throughout a continuous offering.

(5) That, for the purpose of determining liability under the US. Securities Act to any purchaser: if the registrant is subject to Rule 430C, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

(6) That, for the purpose of determining liability of the registrant under the U.S. Securities Act to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

(i) Any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;

(ii) Any free-writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;

(iii) The portion of any other free-writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and

(iv) Any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.

(B) The undersigned registrant hereby undertakes that, for purposes of determining any liability under the U.S. Securities Act, each filing of the registrant's annual report pursuant to section 13(a) or section 15(d) of the U.S. Securities Exchange Act of 1934, as amended, or the U.S. Exchange Act (and, where applicable, each filing of an employee benefit plan's annual report pursuant to section 15(d) of the U.S. Exchange Act) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.

(C) The undersigned registrant hereby undertakes as follows:

(1) That prior to any public reoffering of the securities registered hereunder through use of a prospectus which is a part of this registration statement, by any person or party who is deemed to be an underwriter within the meaning of Rule 145(c), the issuer undertakes that such reoffering prospectus will contain the information called for by the applicable registration form with respect to reofferings by persons who may be deemed underwriters, in addition to the information called for by the other Items of the applicable form.

(2) That every prospectus (i) that is filed pursuant to the immediately preceding paragraph, or (ii) that purports to meet the requirements of section 10(a)(3) of the Act and is used in connection with an offering of securities subject to Rule 415, will be filed as a part of an amendment to the registration statement and will not be used until such amendment is effective, and that, for purposes of determining any liability under the U.S. Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.

(D) Insofar as indemnification for liabilities arising under the U.S. Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the U.S. Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the U.S Securities Act and will be governed by the final adjudication of such issue.

(E) The undersigned registrant hereby undertakes: (i) to respond to requests for information that is incorporated by reference into the prospectus pursuant to Items 4, 10(b), 11 or 13 of this Form, within one business day of receipt of such request, and to send the incorporated documents by first class mail or other equally prompt means, and (ii) to arrange or provide for a facility in the U.S. for the purpose of responding to such requests. The undertaking in subparagraph (i) above includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request.

(F) The undersigned registrant hereby undertakes to supply by means of a post-effective amendment all information concerning a transaction and the company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.

EXHIBIT INDEX

Exhibit Number	Exhibit Description
2.1	Agreement and Plan of Merger, dated as of September 15, 2021, by and among Canadian Pacific Railway Limited, Kansas City Southern, Cygnus Merger Sub 1 Corporation and Cygnus Merger Sub 2 Corporation (attached as Annex A to the proxy statement/prospectus included in this Registration Statement) (schedules have been omitted pursuant to Item 601(a)(5) of Regulation S-K, but will be furnished supplementally to the Securities and Exchange Commission upon request)
4.1	Indenture dated as of May 8, 2007 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.1 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.2	First Supplemental Indenture dated as of May 8, 2007 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.2 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.3	Second Supplemental Indenture dated as of May 20, 2008 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.3 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.4	Third Supplemental Indenture dated as of May 15, 2009 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.4 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.5	Fourth Supplemental Indenture dated as of September 23, 2010 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.5 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.6	Fifth Supplemental Indenture dated as of December 1, 2011 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.6 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.7	Sixth Supplemental Indenture dated as of February 2, 2015 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.7 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.8	Seventh Supplemental Indenture dated as of August 3, 2015 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.8 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.9	Eighth Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.9 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.10	Indenture dated as of October 30, 2001 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.10 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.11	First Supplemental Indenture dated as of April 23, 2004 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.11 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.12	Second Supplemental Indenture dated as of October 12, 2011 between Canadian Pacific Railway Limited and The Bank of New York Mellon (incorporated by reference to Exhibit 4.12 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**

Exhibit Number	Exhibit Description
4.13	Third Supplemental Indenture dated as of October 13, 2011 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.13 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.14	Fourth Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.14 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.15	Indenture dated as of July 15, 1991 between Canadian Pacific Railway Company and Harris Trust and Savings Bank (incorporated by reference to Exhibit 4.15 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed on February 29, 2016)**
4.16	First Supplemental Indenture dated as of July 1, 1996 between Canadian Pacific Railway Company and Harris Trust and Savings Bank (incorporated by reference to Exhibit 4.16 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**
4.17	Second Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and The Bank of New York Mellon (as successor in interest to Harris Trust and Savings Bank) (incorporated by reference to Exhibit 4.17 to Canadian Pacific Railway Limited's Annual Report on Form 10-K filed February 29, 2016)**

Kansas City Southern ("KCS") is offering to exchange, upon the terms and subject to the conditions set forth in this prospectus and the accompanying letter of transmittal (the "Exchange Offers"): (i) up to $244,820,000 in aggregate principal amount of our new Floating Rate Senior Notes due 2016 (the "2016 Exchange Notes"), which have been registered under the Securities Act of 1933, as amended (the "Securities Act"), for any and all of our outstanding unregistered Floating Rate Senior Notes due 2016 (the "Outstanding 2016 Notes"), (ii) up to $257,346,000 in aggregate principal amount of our new 2.35% Senior Notes due 2020 (the "2020 Exchange Notes"), which have been registered under the Securities Act, for any and all of our outstanding unregistered 2.35% Senior Notes due 2020 (the "Outstanding 2020 Notes"), (iii) up to $439,123,000 in aggregate principal amount of our new 3.00% Senior Notes due 2023 (the "3.00% 2023 Exchange Notes"), which have been registered under the Securities Act, for any and all of our outstanding unregistered 3.00% Senior Notes due 2023 (the "Outstanding 3.00% 2023 Notes"), (iv) up to $199,224,000 in aggregate principal amount of our new 3.85% Senior Notes due 2023 (the "3.85% 2023 Exchange Notes"), which have been registered under the Securities Act, for any and all of our outstanding unregistered 3.85% Senior Notes due 2023 (the "Outstanding 3.85% 2023 Notes"), (v) up to $448,651,000 in aggregate principal amount of our new 4.30% Senior Notes due 2043 (the "2043 Exchange Notes"), which have been registered under the Securities Act, for any and all of our outstanding unregistered 4.30% Senior Notes due 2043 (the "Outstanding 2043 Notes") and (vi) up to $499,165,000 in aggregate principal amount of our new 4.95% Senior Notes due 2045 (the "2045 Exchange Notes" and, together with the 2016 Exchange Notes, the 2020 Exchange Notes, the 3.00% 2023 Exchange Notes, the 3.85% 2023 Exchange Notes and the 2043 Exchange Notes, the "Exchange Notes"), which have been registered under the Securities Act, for any and all of our outstanding unregistered 4.95% Senior Notes due 2045 (the "Outstanding 2045 Notes" and, together with the Outstanding 2016 Notes, the Outstanding 2020 Notes, the Outstanding 3.00% 2023 Notes, the Outstanding 3.85% 2023 Notes and the Outstanding 2043 Notes, the "Outstanding Notes"; and, the Outstanding Notes, together with the Exchange Notes, the "Notes").

Upon completion of the Exchange Offers, with respect to each series of Exchange Notes to be issued in the applicable Exchange Offer, KCS may redeem any related Outstanding Notes that are not exchanged in the applicable Exchange Offer in an amount up to 2% of the original aggregate principal amount of such Outstanding Notes at a redemption price of 100% of their principal amount plus accrued interest to but not including the redemption date.

The Exchange Offers

- We hereby offer to exchange all Outstanding Notes that are validly tendered and not validly withdrawn for an equal principal amount of applicable Exchange Notes which we have registered under the Securities Act.
- The Exchange Offers will expire at 11:59 p.m., New York City time, on , 2016 (the "Expiration Date"), unless extended by us.
- You may withdraw tenders of Outstanding Notes at any time prior to the Expiration Date of the applicable Exchange Offer.
- The terms of each series of Exchange Notes are identical in all material respects to the terms of the applicable series of Outstanding Notes, except that the Exchange Notes have been registered under the Securities Act and the transfer restrictions and registration rights relating to the Outstanding Notes do not apply to the Exchange Notes.
- The exchange of Outstanding Notes for Exchange Notes will not be a taxable transaction for U.S. federal income tax purposes. You should see the discussion in the section entitled "Material Federal Income Tax Considerations" for more information.
- Outstanding Notes that are not exchanged will remain outstanding, but will not have further registration rights.
- We will not receive any proceeds from the Exchange Offers.

Each broker-dealer that receives Exchange Notes for its own account in exchange for Outstanding Notes, where such Outstanding Notes were acquired by such broker-dealer as a result of market-making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of such Exchange Notes. See "Plan of Distribution."

See "Risk Factors" beginning on page 13 of this prospectus for a discussion of risks you should consider before participating in the Exchange Offers.

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved the notes to be distributed in the Exchange Offers, nor have any of these organizations determined that this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is , 2016.

ABOUT THIS PROSPECTUS

In this prospectus, unless the context requires otherwise, references to "KCS," "we" or the "Issuer" mean Kansas City Southern and its consolidated subsidiaries, and references to the "Exchange Note Guarantors" refer to each of KCS's current and future domestic subsidiaries that guarantee the Notes.

We have not authorized anyone to provide you with information other than that contained in this prospectus. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. We are making the Exchange Offers only in jurisdictions where such offers are permitted. You should not assume that the information contained in this prospectus is accurate as of any date other than the date on the front cover of this prospectus or the date of the document incorporated herein by reference.

This prospectus incorporates by reference important business and financial information about KCS from documents filed with the SEC that have not been included herein or delivered herewith. This information is available without charge at the public reference room maintained by the SEC, located at 100 F Street, NE, Washington, D.C. 20549, and copies of all or any part of the registration statement, of which this prospectus forms a part, may be obtained from the SEC on the payment of the fees prescribed by the SEC. Please call the SEC at 1-800-SEC-0330 for further information about the public reference room. This information is also available without charge at the website that the SEC maintains at www.sec.gov. In addition, you may request copies of the documents incorporated by reference in this prospectus from us, without charge, by written or oral request directed to Kansas City Southern, Attention: Corporate Secretary, 427 West 12th Street, Kansas City, Missouri 64105, telephone (888) 800-3690, or on our website at www.KCSouthern.com. The information contained on or that can be accessed through our website (other than the specified SEC filings incorporated by reference in this prospectus) is not incorporated in, and is not a part of, this prospectus, and you should not rely on any such information in connection with your decision to exchange your Outstanding Notes for Exchange Notes. **To obtain timely delivery of documents or information, we must receive your request no later than five business days before the Expiration Date of the Exchange Offers.**

Each broker-dealer that receives Exchange Notes for its own account pursuant to the Exchange Offers must acknowledge that it will deliver a prospectus in connection with any resale of such Exchange Notes. The letter of transmittal states that by so acknowledging and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an "underwriter" within the meaning of the Securities Act. This prospectus, as it may be amended or supplemented from time to time, may be used by a broker-dealer in connection with resales of Exchange Notes received in exchange for Outstanding Notes where such Outstanding Notes were acquired by such broker-dealer as a result of market-making activities or other trading activities. KCS has agreed that, starting on the Expiration Date and ending on the close of business 180 days after the Expiration Date, it will make this prospectus available to any broker-dealer for use in connection with any such resale. See "Plan of Distribution."

We have not provided guaranteed delivery provisions in connection with the Exchange Offers. You must tender your Outstanding Notes in accordance with the procedures set forth herein.

CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

This prospectus, including the documents incorporated by reference herein, contains forward-looking statements that are not based upon historical information and involve risks and uncertainties. You can identify these forward-looking statements by the use of such verbs as "expects," "anticipates," "believes" or similar verbs or conjugations of such verbs. Such forward-looking statements are based upon information currently available to KCS's management and KCS's management's perception thereof as of the date of this prospectus. However, such statements are dependent on and, therefore, can be influenced by, a number of external variables over which KCS's management has little or no control, including:

- the outcome of claims and litigation, including those related to environmental contamination, personal injuries, and property damage;
- changes in legislation and regulations or revisions of controlling authority;
- the adverse impact of any termination or revocation of Kansas City Southern de México, S.A. de C.V.'s ("KCSM") Concession by the Mexican government;
- natural events such as severe weather, fire, floods, hurricanes, earthquakes or other disruptions to KCS's operating systems, structures and equipment or the ability of customers to produce or deliver their products and the lack of adequate insurance for such catastrophic losses;
- United States, Mexican and global economic, political and social conditions;
- the effects of the North American Free Trade Agreement, or NAFTA, on the level of trade among the United States, Mexico and Canada;
- the level of trade between the United States and Asia or Mexico;
- the effects of fluctuations in the peso-dollar exchange rate;
- the effects of adverse general economic conditions affecting customer demand and the industries and geographic areas that produce and consume the commodities KCS carries;
- the dependence on the stability, availability and security of the information technology systems to operate its business;
- the effect of demand for KCS's services exceeding network capacity or traffic congestion on operating efficiencies and service reliability;
- uncertainties regarding the litigation KCS faces and any future claims and litigation;
- the impact of competition, including competition from other rail carriers, trucking companies and maritime shippers in the United States and Mexico;
- KCS's reliance on agreements with other railroads and third parties to successfully implement its business strategy, operations and growth and expansion plans, including the strategy to convert customers from using trucking services to rail transportation services;
- compliance with environmental regulations;
- disruption in fuel supplies, changes in fuel prices and KCS's ability to recapture its costs of fuel from customers;
- material adverse changes in economic and industry conditions, including the availability of short and long-term financing, both within the United States and Mexico and globally;
- market and regulatory responses to climate change;
- changes in labor costs and labor difficulties, including strikes and work stoppages affecting either operations or customers' abilities to deliver goods for shipment;

- KCS's reliance on certain key suppliers of core rail equipment;
- availability of qualified personnel;
- acts of terrorism, war or other acts of violence or crime or risk of such activities;
- fluctuations in the market price for KCS's common stock; and
- other factors described or incorporated by reference in this prospectus.

You are strongly encouraged to consider these factors when evaluating forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results and will not necessarily be accurate indications of the timing when, or by which, such performance or results will be achieved. As a result, actual outcomes or results could materially differ from those indicated in forward-looking statements. We are not under any obligation, and we expressly disclaim any obligation, to update or alter any forward-looking statements.

INCORPORATION BY REFERENCE

We are incorporating by reference specified documents that KCS files with the SEC, which means that we can disclose important information to you by referring you to those documents that are considered part of this prospectus. We incorporate by reference into this prospectus the documents listed below that have previously been filed, and any future filings KCS makes with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), prior to the Expiration Date. Notwithstanding the above, we are not incorporating any documents or information deemed to have been furnished rather than filed in accordance with SEC rules.

- KCS's Annual Report on Form 10-K for the fiscal year ended December 31, 2015;
- KCS's Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2016;
- KCS's Current Reports on Form 8-K filed on February 25, 2016, March 1, 2016, March 15, 2016, May 10, 2016 and May 17, 2016; and
- KCS's Definitive Proxy Statement filed on April 5, 2016.

Any statement contained in a document incorporated or deemed to be incorporated by reference into this prospectus will be deemed to be modified or superseded for purposes of this prospectus to the extent that a statement contained in this prospectus or any other subsequently filed document that is deemed to be incorporated by reference into this prospectus modifies or supersedes the statement. Any statement so modified or superseded will not be deemed, except as so modified or superseded, to constitute a part of this prospectus.

Any person, including any beneficial owner, to whom this prospectus is delivered may request copies of this prospectus and any of the documents incorporated by reference in this prospectus, without charge, by written or oral request directed to Kansas City Southern, Attention: Corporate Secretary, 427 West 12th Street, Kansas City, Missouri 64105, telephone (888) 800-3690, or on our website at www.KCSouthern.com, or from the SEC through the SEC's website at the web address provided in the section entitled "Where You Can Find More Information." Documents incorporated by reference are available without charge, excluding any exhibits to those documents unless the exhibit is specifically incorporated by reference into those documents.

SUMMARY

This summary highlights information about KCS and the Exchange Offers. Because it is a summary, it does not contain all the information that you should consider before tendering Outstanding Notes for exchange and KCS urges you to read this entire prospectus carefully, including the "Risk Factors" section and the information and documents incorporated by reference herein, including KCS's financial statements and notes thereto, before deciding to tender Outstanding Notes for exchange.

Our Company

KCS, a Delaware corporation, is a holding company with domestic and international rail operations in North America that are strategically focused on the growing north/south freight corridor connecting key commercial and industrial markets in the central United States with major industrial cities in Mexico. KCS had approximately 6,670 employees on December 31, 2015.

KCS controls and owns all of the stock of The Kansas City Southern Railway Company ("KCSR"), a U.S. Class I railroad founded in 1887. KCSR serves a ten-state region in the midwest and southeast regions of the United States and has the shortest north/south rail route between Kansas City, Missouri and several key ports along the Gulf of Mexico in Alabama, Louisiana, Mississippi, and Texas.

KCS controls and owns all of the stock of KCSM. Through its 50-year concession from the Mexican government (the "Concession"), which could expire in 2047 unless extended, KCSM operates a key commercial corridor of the Mexican railroad system and has as its core route the most strategic portion of the shortest, most direct rail passageway between Mexico City and Laredo, Texas. Laredo is a principal international gateway through which a substantial portion of rail and truck traffic between the United States and Mexico crosses the border. KCSM serves most of Mexico's principal industrial cities and three of its major seaports. KCSM's rail lines provide exclusive rail access to the United States and Mexico border crossing at Nuevo Laredo, Tamaulipas, the largest rail freight interchange point between the United States and Mexico. Under the Concession, KCSM has the right to control and operate the southern half of the rail bridge at Laredo, Texas, which spans the Rio Grande River between the United States and Mexico. KCS also controls and owns the northern half of this bridge through its ownership of Mexrail, Inc. ("Mexrail").

KCSM also provides exclusive rail access to the Port of Lazaro Cardenas on the Pacific Ocean. The Mexican government is developing the port at Lazaro Cardenas principally to serve Mexican markets and as an alternative to the U.S. west coast ports for Asian and South American traffic bound for North America.

KCS wholly owns Mexrail which, in turn, wholly owns The Texas Mexican Railway Company ("Tex-Mex"). Tex-Mex owns a 157-mile rail line extending from Laredo, Texas to the port city of Corpus Christi, Texas, which connects the operations of KCSR with KCSM.

The KCS coordinated rail network (KCSR, KCSM and Tex-Mex) comprises approximately 6,600 route miles extending from the midwest and southeast portions of the United States south into Mexico and connects with all other Class I railroads, providing shippers with an effective alternative to other railroad routes and giving direct access to Mexico and the southeast and southwest United States through alternate interchange hubs.

Panama Canal Railway Company, an unconsolidated joint venture company owned equally by KCS and Mi-Jack Products, Inc., was awarded a concession from the Republic of Panama to reconstruct and operate the Panama Canal Railway, a 47-mile railroad located adjacent to the Panama Canal that provides international container shipping companies with a railway transportation alternative to the Panama Canal. The concession was awarded in 1998 for an initial term of 25 years with an automatic renewal for an additional 25-year term. The Panama Canal Railway is a north-south railroad traversing the Isthmus of Panama between the Atlantic and Pacific Oceans.

Other subsidiaries and affiliates of KCS include the following:

- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate that owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway." Norfolk Southern Corporation, through its wholly-owned subsidiary, The Alabama Great Southern Railroad Company, owns the remaining thirty percent of MSLLC;
- KCSM Servicios, S.A. de C.V., a wholly-owned and consolidated affiliate that provides employee services to KCSM;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V., a twenty-five percent-owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and
- PTC-220, LLC, a fourteen percent-owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for the deployment of positive train control.

Recent Developments

On May 16, 2016, KCS issued $250.0 million in aggregate principal amount of 3.125% Senior Notes due 2026 pursuant to KCS's shelf registration statement filed with the SEC. KCS intends to use the proceeds from the offering for (i) the repayment at maturity of KCS's Floating Rate Senior Notes due 2016 ($244.8 million outstanding as of March 31, 2016) and KCSM's Floating Rate Senior Notes due 2016 ($5.2 million outstanding as of March 31, 2016) and (ii) general corporate purposes, including the repayment of outstanding commercial paper issued by KCS.

Our Corporate Information

Our principal executive offices are located at: 427 West 12th Street, Kansas City, Missouri 64105. Our telephone number is (816) 983-1303 and we have a website accessible at www.KCSouthern.com. The information posted on our website is not incorporated into this prospectus and is not part of this prospectus.

SUMMARY DESCRIPTION OF THE EXCHANGE OFFERS

The following summary is provided solely for your convenience. This summary is not intended to be complete. You should read the full text and more specific details contained elsewhere in this prospectus. For a more detailed description of the Exchange Notes, see "Description of Exchange Notes."

Exchange Offers	We are conducting the Exchange Offers in accordance with the registration rights agreement, dated as of December 9, 2015, among KCS, the Guarantors, and Citigroup Global Markets Inc., J.P. Morgan Securities LLC, Merrill Lynch, Pierce, Fenner & Smith Incorporated and Morgan Stanley & Co. LLC, as dealer managers and solicitations agents (the "Dealer Managers") (the "Registration Rights Agreement"), that was executed when the Outstanding Notes were issued in a transaction conducted in reliance upon the exemptions from registration provided by Rule 144A and Regulation S promulgated under the Securities Act. Accordingly, we are offering to issue: (i) up to $244,820,000 in aggregate principal amount of 2016 Exchange Notes in exchange for a like principal amount of the Outstanding 2016 Notes; (ii) up to $257,346,000 in aggregate principal amount of 2020 Exchange Notes in exchange for a like principal amount of the Outstanding 2020 Notes to satisfy our obligations under the Registration Rights Agreement; (iii) up to $439,123,000 in aggregate principal amount of 3.00% 2023 Exchange Notes in exchange for a like principal amount of the Outstanding 3.00% 2023 Notes to satisfy our obligations under the Registration Rights Agreement; (iv) up to $199,224,000 in aggregate principal amount of 3.85% 2023 Exchange Notes in exchange for a like principal amount of the Outstanding 3.85% 2023 Notes to satisfy our obligations under the Registration Rights Agreement; (v) up to $448,651,000 in aggregate principal amount of 2043 Exchange Notes in exchange for a like principal amount of the Outstanding 2043 Notes to satisfy our obligations under the Registration Rights Agreement; and (vi) up to $499,165,000 in aggregate principal amount of 2045 Exchange Notes in exchange for a like principal amount of the Outstanding 2045 Notes to satisfy our obligations under the Registration Rights Agreement.
Expiration Date	The Exchange Offers will expire on the Expiration Date, unless extended by us in our sole discretion. We may extend any of the Exchange Offers without extending any of the other Exchange Offers.
Withdrawal; Non-Acceptance	You may withdraw any Outstanding Notes tendered in the Exchange Offers at any time prior to the applicable Expiration Date. If we decide for any reason not to accept any Outstanding Notes tendered

	for exchange, the Outstanding Notes will be returned to the registered holder at our expense promptly after the applicable Expiration Date or termination of the applicable Exchange Offer. In the case of the Outstanding Notes tendered by book-entry transfer into the Exchange Agent's (as defined below) account at The Depository Trust Company ("DTC"), any withdrawn or unaccepted Outstanding Notes will be credited to the tendering holder's account at DTC. For further information regarding the withdrawal of tendered Outstanding Notes, see the sections entitled "The Exchange Offers—Terms of the Exchange Offers; Period for Tendering Outstanding Notes" and the "The Exchange Offers—Withdrawal Rights."
Conditions to the Exchange Offers	Each of the Exchange Offers is subject to customary conditions, including the following: • the Exchange Offer does not violate applicable law or any applicable interpretations of the staff of the SEC; • the Outstanding Notes are validly tendered in accordance with the applicable Exchange Offer; • no action or proceeding would impair our ability to proceed with the Exchange Offer; and • any governmental approval has been obtained that we believe, in our sole discretion, is necessary for the completion of the Exchange Offer as outlined in this prospectus.
Procedures for Tendering the Outstanding Notes	You must do one of the following on or prior to the Expiration Date to participate in the Exchange Offers: • tender your Outstanding Notes by sending the certificates for your Outstanding Notes, in proper form for transfer, a properly completed and duly executed letter of transmittal, with any required signature guarantees, and all other documents required by the letter of transmittal, to U.S. Bank National Association, as exchange agent (the "Exchange Agent"), at one of the addresses listed below in the section entitled "The Exchange Offers—Exchange Agent"; or • tender your Outstanding Notes by using the book-entry transfer procedures described below and transmitting a properly completed and duly executed letter of transmittal, with any required signature guarantees, or an Agent's Message (as defined below) instead of the letter of transmittal, to the Exchange Agent. In order for a book-entry transfer to constitute a valid tender of your Outstanding Notes in the applicable Exchange Offer, the Exchange Agent must receive a confirmation of book-entry transfer of your Outstanding Notes into its account at DTC prior to the Expiration Date. For more information regarding the use of book-entry transfer procedures, including a description of the required Agent's Message, see the discussion below in the section entitled "The Exchange Offers—Book-Entry Transfers."

	We have not provided guaranteed delivery provisions in connection with the Exchange Offers. You must tender your Outstanding Notes in accordance with the procedures set forth in the section entitled "The Exchange Offers—Procedures for Tendering Outstanding Notes."
Special Procedures for Beneficial Owners	If you are a beneficial owner whose Outstanding Notes are registered in the name of the broker, dealer, commercial bank, trust company or other nominee and you wish to tender your Outstanding Notes in the Exchange Offers, you should promptly contact the person in whose name the Outstanding Notes are registered and instruct that person to tender on your behalf. If you wish to tender in the Exchange Offers on your own behalf, prior to completing and executing the letter of transmittal (or any Agent's Message in lieu thereof) and delivering your Outstanding Notes, you must either make appropriate arrangements to register ownership of the Outstanding Notes in your name or obtain a properly completed bond power from the person in whose name the Outstanding Notes are registered.
Material Federal Income Tax Considerations	The exchange of the Outstanding Notes for Exchange Notes in the Exchange Offers will not be a taxable transaction for United States federal income tax purposes. See the discussion in the section entitled "Material Federal Income Tax Considerations" for more information regarding the tax consequences to you of the Exchange Offers.
Use of Proceeds	We will not receive any proceeds from the Exchange Offers.
Exchange Agent	U.S. Bank National Association is the Exchange Agent for the Exchange Offers. You can find the address and telephone number of the Exchange Agent below in the section entitled "The Exchange Offers—Exchange Agent."
Resales	Based on interpretations by the staff of the SEC, as set forth in no-action letters issued to third parties, we believe that the Exchange Notes you receive in the Exchange Offers may be offered for resale, resold or otherwise transferred without compliance with the registration and prospectus delivery provisions of the Securities Act. However, you will not be able to freely transfer the Exchange Notes if: • you are our "affiliate," as defined in Rule 405 under the Securities Act; • you are not acquiring the Exchange Notes in the applicable Exchange Offer in the ordinary course of your business; or • you are engaged in or intend to engage in, or have an arrangement or understanding with any person to participate in, the distribution, as defined in the Securities Act, of the Exchange Notes you will receive in the applicable Exchange Offer.

	If any of the statements above apply to you, you cannot rely on the position of the SEC staff described above and you must, therefore, comply with the registration and prospectus delivery requirements of the Securities Act in connection with any resale of the Exchange Notes, unless an exemption from these requirements is available to you. In that case, if you transfer any Exchange Notes without delivering a prospectus that meets the requirements of the Securities Act or without an exemption from registration of your Exchange Notes from those requirements, you may incur liability under the Securities Act. We will not assume or indemnify you against that liability. In addition, the SEC has not considered the Exchange Offers in the context of its interpretive letters and we cannot be sure that the staff of the SEC would make a similar determination with respect to the Exchange Offers as in such other circumstances.
Broker-Dealer	Each broker-dealer that receives Exchange Notes for its own account in exchange for Outstanding Notes, where such Outstanding Notes were acquired by such broker-dealer as a result of market-making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of such Exchange Notes. See "Plan of Distribution."
Consequences of Not Exchanging Outstanding Notes	If you do not exchange Outstanding Notes for Exchange Notes, you will not be able to offer, sell or otherwise transfer your Outstanding Notes except: • in compliance with the registration requirements of the Securities Act and any other applicable securities laws; • pursuant to an exemption from the securities laws; or • in a transaction not subject to the securities laws. Outstanding Notes that remain outstanding after completion of the Exchange Offers will continue to bear a legend reflecting these restrictions on transfer. In addition, upon completion of the Exchange Offers, you will not be entitled to any rights to have the resale of Outstanding Notes registered under the Securities Act, and we currently do not intend to register under the Securities Act the resale of any Outstanding Notes that remain outstanding after the completion of the Exchange Offers. The transfer restrictions and the availability of Exchange Notes that are freely tradable could adversely affect the trading market for your Outstanding Notes. Upon completion of the Exchange Offers, with respect to each series of Exchange Notes to be issued in the applicable Exchange Offer, KCS may redeem any related Outstanding Notes that are not exchanged in the applicable Exchange Offer in an amount up to 2% of the original aggregate principal amount of such Outstanding Notes at a redemption price of 100% of their principal amount plus accrued interest to but not including the redemption date.

SUMMARY DESCRIPTION OF THE EXCHANGE NOTES

The terms of the Exchange Notes and those of the Outstanding Notes are substantially identical, except that the transfer restrictions and registration rights relating to the Outstanding Notes do not apply to the Exchange Notes. For a more detailed description of the Exchange Notes, see the sections entitled "Description of Exchange Notes."

Issuer	Kansas City Southern
Securities Offered	• Up to $244,820,000 aggregate principal amount of Floating Rate Senior Notes due 2016; • Up to $257,346,000 aggregate principal amount of 2.35% Senior Notes due 2020; • Up to $439,123,000 aggregate principal amount of 3.00% Senior Notes due 2023; • Up to $199,224,000 aggregate principal amount of 3.85% Senior Notes due 2023; • Up to $448,651,000 aggregate principal amount of 4.30% Senior Notes due 2043; and • Up to $499,165,000 aggregate principal amount of 4.95% Senior Notes due 2045.
Maturity Dates	The 2016 Exchange Notes will mature on October 28, 2016. The 2020 Exchange Notes will mature on May 15, 2020. The 3.00% 2023 Exchange Notes will mature on May 15, 2023. The 3.85% 2023 Exchange Notes will mature on November 15, 2023. The 2043 Exchange Notes will mature on May 15, 2043. The 2045 Exchange Notes will mature on August 15, 2045.
Interest Rate and Payment Dates	The 2016 Exchange Notes will have a floating interest rate equal to the three-month U.S. dollar LIBOR plus 70 basis points per annum, payable in cash on July 28, 2016 and October 28, 2016. The 2020 Exchange Notes will have an interest rate of 2.35% per annum, payable in cash on May 15 and November 15 of each year, beginning on November 15, 2016. The 3.00% 2023 Exchange Notes will have an interest rate of 3.00% per annum, payable in cash on May 15 and November 15 of each year, beginning on November 15, 2016.

	The 3.85% 2023 Exchange Notes will have an interest rate of 3.85% per annum, payable in cash on May 15 and November 15 of each year, beginning on November 15, 2016. The 2043 Exchange Notes will have an interest rate of 4.30% per annum, payable in cash on May 15 and November 15 of each year, beginning on November 15, 2016. The 2045 Exchange Notes will have an interest rate of 4.95% per annum, payable in cash on February 15 and August 15 of each year, beginning on August 15, 2016. Interest on the Exchange Notes of a series will accrue from the most recent date on which interest has been paid on the corresponding series of Outstanding Notes or, if no interest has been paid, from and including the date of issuance of the corresponding series of Outstanding Notes.
Exchange Note Guarantees	The Exchange Notes will be unconditionally guaranteed, jointly and severally, on an unsecured senior basis (each, an "Exchange Note Guarantee"), by each of KCS's current and future domestic subsidiaries (collectively, the "Exchange Note Guarantors") that from time to time guarantee the $800.0 million revolving credit facility of KCS (the "KCS Revolving Credit Facility") or any other debt of KCS or any of KCS's significant subsidiaries that is an Exchange Note Guarantor. See "Description of Exchange Notes—Exchange Note Guarantees." The Exchange Notes will not be guaranteed by KCSM or any other current or future foreign subsidiary of KCS.
Ranking	The Exchange Notes (i) will be KCS's unsecured senior obligations, (ii) will rank *pari passu* in right of payment with all of KCS's existing and future senior indebtedness, (iii) will be senior in right of payment to all of KCS's future subordinated indebtedness, (iv) will be effectively subordinated to KCS's secured indebtedness, to the extent of the value of the assets securing such indebtedness and (v) will be structurally subordinated to all liabilities of KCS's subsidiaries that are not Exchange Note Guarantors. The Exchange Note Guarantees (i) will be unsecured senior indebtedness of the applicable Exchange Note Guarantor, (ii) will rank *pari passu* in right of payment with all existing and future senior indebtedness of such Exchange Note Guarantor, (iii) will be senior in right of payment to all future subordinated obligations of such Exchange Note Guarantor, (iv) will be effectively subordinated to the secured indebtedness of the applicable Exchange Note Guarantor, if any, to the extent of the value of the assets securing such secured indebtedness and (v) will be structurally subordinated to all liabilities of the applicable Exchange Note Guarantor's subsidiaries that are not Exchange Note Guarantors. See "Description of Exchange Notes—Ranking."

	As of March 31, 2016, KCS and its subsidiaries had (a) $746.0 million of availability under the KCS Revolving Credit Facility and (b) total indebtedness of $2,368.6 million, consisting of (i) $2,171.6 million of senior indebtedness of KCS and the Exchange Note Guarantors, of which $54.5 million was secured indebtedness and (ii) $197.0 million of senior indebtedness of subsidiaries of KCS that are not Exchange Note Guarantors. In addition, on May 16, 2016, KCS issued $250.0 million in aggregate principal amount of 3.125% Senior Notes due 2026.
Optional Redemption	KCS may redeem some or all of the Exchange Notes (other than the 2016 Exchange Notes) at any time and from time to time at the prices described under the heading "Description of Exchange Notes—Optional Redemption." In addition, upon completion of the Exchange Offers, with respect to each series of Exchange Notes to be issued in the applicable Exchange Offer, KCS may redeem any related Outstanding Notes that are not exchanged in the applicable Exchange Offer in an amount up to 2% of the original aggregate principal amount of such Outstanding Notes at a redemption price of 100% of their principal amount plus accrued interest to but not including the redemption date.
Change of Control Repurchase Event	Upon a Change of Control Repurchase Event (as defined under "Description of Exchange Notes—Certain Definitions"), KCS will be required to make an offer to repurchase each series of Exchange Notes at a price equal to 101% of their principal amount, plus accrued and unpaid interest, if any, to, but excluding the date of repurchase. See "Description of Exchange Notes—Covenants—Change of Control Repurchase Event."
Covenants	Each series of Exchange Notes will be issued as a separate series under a base indenture dated December 9, 2015, as supplemented by a separate supplemental indenture, which will contain covenants with respect to, among other things: • the creation of liens by KCS or any of KCS's significant subsidiaries that is an Exchange Note Guarantor; • the incurrence of indebtedness by subsidiaries of KCS that are not Exchange Note Guarantors; and • the merger, consolidation or sale of all or substantially all of KCS's or any Exchange Notes Guarantors' property and assets. These covenants are subject to a number of important qualifications and exceptions. See "Description of Exchange Notes—Covenants."
Denominations	The Exchange Notes will be issued in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof.
Governing Law	The base indenture and the supplemental indentures are, and the Exchange Notes will be, governed by New York law.

Taxation	For a summary of the U.S. federal income tax consequences of an investment in the Exchange Notes, see "Material Federal Income Tax Considerations."
No Public Trading Market	The Exchange Notes are a new issue of securities, and there is currently no established trading market for the Exchange Notes. We do not intend to list the Exchange Notes offered hereby on any national securities exchange or to arrange for quotation on any automated dealer quotation systems. We cannot assure you that an active trading market for the Exchange Notes will develop.
Risk Factors	Tendering your Outstanding Notes in the Exchange Offers involves risks. You should carefully consider the information in the section entitled "Risk Factors" in this prospectus.

SELECTED HISTORICAL CONSOLIDATED FINANCIAL DATA

The following table sets forth KCS's selected historical consolidated financial information. The selected historical consolidated financial information as of and for the three months ended March 31, 2016 and 2015 is unaudited and has been derived from KCS's unaudited historical consolidated financial statements and related notes included in KCS's Quarterly Report on Form 10-Q for the quarter ended March 31, 2016, which is incorporated by reference into this prospectus. The selected historical consolidated financial information as of December 31, 2015 and 2014 and for the years ended December 31, 2015, 2014 and 2013 has been derived from KCS's historical consolidated financial statements, which have been audited by KPMG LLP and are included in KCS's 2015 Annual Report on Form 10-K, which is incorporated by reference into this prospectus. The selected historical consolidated financial information as of December 31, 2013, 2012 and 2011 and for the years ended December 31, 2012 and 2011 has been derived from our audited financial statements that are not included or incorporated by reference into this prospectus.

This information is only a summary. You should read the data set forth in the table below in conjunction with the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations" in KCS's Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2016 and KCS's Annual Report on Form 10-K for the fiscal year ended December 31, 2015, which are incorporated by reference in this prospectus, and KCS's consolidated financial statements which are incorporated by reference in this prospectus.

(i) During 2015 and 2014, the Company recognized pre-tax lease termination costs of $9.6 million and $38.3 million, respectively, within operating expenses due to the early termination of certain operating leases and the related purchase of equipment. During the three months ended March 31, 2015, the Company recognized $9.6 million of pre-tax lease termination costs.

(ii) During 2012, the Company recognized a pre-tax gain of $43.0 million within operating expenses for the elimination of a deferred statutory profit sharing liability as a result of the organizational restructuring during the period.

(iii) During 2011, the Company recognized a pre-tax gain of $25.6 million within operating expenses for insurance recoveries related to 2010 hurricane damage.

(iv) During 2015, 2014, 2013, 2012 and 2011, the Company recognized pre-tax debt retirement and exchange costs of $7.6 million, $6.6 million, $119.2 million, $20.1 million and $38.7 million, respectively, related to debt restructuring activities that occurred during the periods.

(v) During the fourth quarter of 2015, the Company adopted new accounting guidance regarding the classification of debt issuance costs related to a recognized debt liability as a direct deduction from the carrying amount of that debt liability. For the years ended December 31, 2014, 2013, 2012 and 2011, the Company reclassified $14.5 million, $20.1 million, $19.1 million, and $20.5 million, respectively, from total assets to total long-term debt obligations. For the three months ended March 31, 2015, the Company reclassified $14.0 million from total assets to total long-term debt obligations.

(vi) During the fourth quarter of 2015, the Company adopted new accounting guidance regarding the presentation of deferred tax assets and liabilities as non-current in a classified balance sheet. For the years ended December 31, 2014, 2013, 2012 and 2011, the Company reclassified $100.1 million, $131.6 million, $92.1 million, and $191.4 million, respectively, from total assets to noncurrent liabilities. For the three months ended March 31, 2015, the Company reclassified $83.8 million from total assets to noncurrent liabilities.

RISK FACTORS

Before participating in the Exchange Offers, you should carefully consider the risk factors described below and in KCS's periodic reports filed with the SEC, together with all of the other information included in this prospectus and the other information that KCS has incorporated by reference. The risks described below and in the documents incorporated by reference herein are not the only ones KCS is facing. Additional risks not currently known to KCS or that KCS currently deems immaterial may also impair KCS's business. See "Cautionary Note Regarding Forward-Looking Statements." Any of the risks described below or in the documents incorporated by reference herein, as well as other risks and uncertainties, could harm KCS's business and financial results and cause the value of KCS's securities to decline, which in turn could cause you to lose all or a part of your investment.

Risks Related to the Exchange Offers and Holding the Exchange Notes

Failure to comply with restrictive covenants in KCS's Revolving Credit Facility and other contractual arrangements could accelerate KCS's repayment obligations under our debt.

The KCS Revolving Credit Facility contains a number of restrictive covenants, and any additional financing arrangements KCS enters into may contain additional restrictive covenants. These covenants restrict or prohibit many actions, including, but not limited to, the ability of KCS and certain of its subsidiaries to incur debt, create or suffer to exist liens, make investments, engage in transactions with affiliates, sell certain assets and engage in mergers and consolidations or in sale-leaseback transactions. Failure to maintain compliance with the covenants contained in these financial agreements could constitute a default which could result in the termination of the commitments and the acceleration of any amounts outstanding under such agreements.

KCS's credit ratings may not reflect all risks of your investment in the Exchange Notes.

The Exchange Notes are rated as investment grade by three nationally recognized statistical rating organizations. These credit ratings are limited in scope, and do not address all material risks relating to an investment in the Exchange Notes, but rather reflect only the view of each rating agency at the time the rating is issued. An explanation of the significance of such rating may be obtained from such rating agency. There can be no assurance that such credit ratings will remain in effect for any given period of time or that a rating will not be lowered, suspended or withdrawn entirely by the applicable rating agencies if, in such rating agency's judgment, circumstances so warrant. Agency credit ratings are not a recommendation to buy, sell or hold any security. Each agency's rating should be evaluated independently of any other agency's rating. Actual or anticipated changes or downgrades in KCS's credit ratings, including any announcement that its ratings are under further review for a downgrade, could affect the market value of the Exchange Notes and increase our corporate borrowing costs.

Holders who fail to exchange their Outstanding Notes will continue to be subject to restrictions on transfer and may have reduced liquidity after the Exchange Offers.

If you do not exchange your Outstanding Notes for Exchange Notes in the Exchange Offers, you will continue to be subject to the restrictions on transfer applicable to the Outstanding Notes. The restrictions on transfer of your Outstanding Notes arise because KCS issued the Outstanding Notes under exemptions from, or in transactions not subject to, the registration requirements of the Securities Act and applicable state securities laws. In general, you may only offer or sell the Outstanding Notes if they are registered under the Securities Act and applicable state securities laws or are offered and sold under an exemption from these requirements. After the completion of the Exchange Offers, KCS will not be under any obligation to, and does not plan to, register the Outstanding Notes under the Securities Act.

In addition, KCS has not conditioned the Exchange Offers on receipt of any minimum or maximum principal amount of Outstanding Notes. As Outstanding Notes are tendered and accepted in the Exchange Offers, the principal amount of remaining Outstanding Notes will decrease. This decrease could reduce the liquidity of

the trading market for the Outstanding Notes. Furthermore, upon completion of the applicable Exchange Offer with respect to a series of Notes as described herein, KCS may redeem Outstanding Notes of such series which are not exchanged in the applicable Exchange Offer in an amount up to 2% of the original aggregate principal amount of such series of Outstanding Notes issued at a redemption price of 100% of their principal amount plus accrued interest to but excluding the redemption date, which could further reduce the liquidity of the trading market for the Outstanding Notes. KCS cannot assure you of the liquidity, or even the continuation, of the trading market for the Outstanding Notes following the Exchange Offers.

You must comply with the Exchange Offer procedures to receive Exchange Notes.

Holders are responsible for complying with all the Exchange Offer procedures. The issuance of Exchange Notes in exchange for Outstanding Notes will only occur upon completion of the procedures described in this prospectus under "The Exchange Offers." Therefore, holders of Outstanding Notes who wish to exchange them for Exchange Notes should allow sufficient time for timely completion of the exchange procedures. Neither KCS nor the Exchange Agent is obligated to extend the Exchange Offers or notify you of any failure to follow the proper procedures or waive any defect if you fail to follow the proper procedures.

If you are a broker-dealer, your ability to transfer the Exchange Notes may be restricted.

A broker-dealer that purchased Outstanding Notes for its own account as part of market-making or trading activities must comply with the prospectus delivery requirements of the Securities Act when it resells the Exchange Notes. KCS's obligation to make this prospectus available to broker-dealers is limited, and, as a result, KCS cannot guarantee that a proper prospectus will be available to broker-dealers wishing to resell their Exchange Notes. See "Plan of Distribution."

There is no public market for the Exchange Notes, a market may not develop, and you may have to hold your Exchange Notes to maturity.

The Exchange Notes are a new issue of securities and there is no existing trading market for the Exchange Notes. Although the Dealer Managers in the offering of the Outstanding Notes have informed KCS that they intend to make a market in the Exchange Notes, they have no obligation to do so and may discontinue making a market at any time without notice. Accordingly, no assurance can be given that a liquid market will develop for the Exchange Notes, that you will be able to sell your Exchange Notes at a particular time or that the prices that you receive when you sell the Exchange Notes will be favorable.

There can be no assurance that an active trading market for the Exchange Notes will ever develop or be maintained. The liquidity of any market for the Exchange Notes and the prices at which the Exchange Notes will trade, if a trading market develops, will depend on a number of factors, including:

- the number of holders of Exchange Notes;
- KCS's operating performance and financial condition;
- KCS's ability to complete the offers to exchange the Outstanding Notes;
- the market for similar securities;
- the interest of securities dealers in making a market in the Exchange Notes; and
- prevailing interest rates.

KCS may not be able to purchase the Exchange Notes upon the occurrence of a Change of Control Repurchase Event.

Upon the occurrence of a Change of Control Repurchase Event (as defined below), KCS will be required to offer to purchase all of the Exchange Notes then outstanding at a purchase price equal to 101% of the principal amount thereof plus accrued and unpaid interest. If a Change of Control Repurchase Event were to occur, KCS

may not have sufficient funds to pay the purchase price for the outstanding Exchange Notes tendered, and expects that it would require third-party financing; however, KCS may not be able to obtain such financing on favorable terms, if at all. In addition, the occurrence of a Change of Control Repurchase Event may result in an event of default under, or require KCS to purchase, KCS's other existing or future senior indebtedness. Moreover, the exercise by the holders of their right to require KCS to purchase the Exchange Notes could cause a default under its existing or future senior indebtedness, even if the occurrence of a Change of Control Repurchase Event itself does not, due to the financial effect of such purchase on KCS and its subsidiaries. KCS's failure to purchase tendered Exchange Notes at a time when the purchase is required by the indentures would constitute an event of default under the indentures, which, in turn, may constitute an event of default under future debt. See "Description of Exchange Notes—Covenants—Change of Control Repurchase Event."

The provisions in the indentures that will govern the Exchange Notes relating to change of control transactions will not necessarily protect you in the event of a highly leveraged transaction.

The provisions in the indentures will not necessarily afford you protection in the event of a highly leveraged transaction that may adversely affect you, including a reorganization, restructuring, merger or other similar transaction involving KCS or its subsidiaries. These transactions may not involve a change in voting power or beneficial ownership or, even if they do, may not involve a change of the magnitude required under the definition of Change of Control Repurchase Event in the indentures to trigger these provisions. Except as described under "Description of Exchange Notes—Change of Control Repurchase Event," the indentures do not contain provisions that permit the holders of the Exchange Notes to require KCS to purchase the Exchange Notes in the event of a takeover, recapitalization or similar transaction. Finally, the provisions under the indentures relative to KCS's obligation to make an offer to purchase the Exchange Notes as a result of a Change of Control Repurchase Event may be waived or modified with the written consent of the holders of a majority in principal amount of the applicable series of Exchange Notes; accordingly, you may not be able to require the purchase of your Exchange Notes upon a Change of Control Repurchase Event even if you have not consented to the waiver of such obligation.

The Exchange Notes and the Exchange Note Guarantees will be effectively subordinated to the secured obligations of KCS and the Exchange Note Guarantors.

The Exchange Notes and the Exchange Note Guarantees will be KCS's and the Exchange Note Guarantors', respectively, unsecured obligations. KCS and the Exchange Note Guarantors may incur other debt, which may be substantial in amount, and which may in certain circumstances be secured. As of March 31, 2016, KCS and the Exchange Note Guarantors had $54.5 million of secured indebtedness and capital lease obligations. Because the Exchange Notes and the Exchange Note Guarantees will be unsecured obligations, your right of repayment may be compromised in the following situations:

- KCS or the Exchange Note Guarantors enter into bankruptcy, liquidation, reorganization, or other winding-up;
- there is a default in payment under any secured debt of KCS or an Exchange Note Guarantor; or
- there is an acceleration of any secured debt.

If any of these events occurs, the secured lenders could foreclose on assets of KCS or an Exchange Note Guarantor in which they have been granted a security interest, in each case to your exclusion, even if an event of default exists under the indentures relating to the Exchange Notes at such time. As a result, upon the occurrence of any of these events, there may not be sufficient funds to pay amounts due on the Exchange Notes.

Servicing KCS's indebtedness will require a significant amount of cash. KCS's ability to generate cash depends on a variety of factors, many of which are beyond its control.

KCS's ability to make payments on its indebtedness, including the Exchange Notes, will depend on KCS's ability to generate cash in the future. This, to a certain extent, is subject to general economic, financial,

competitive and other factors that are beyond KCS's control. KCS's business may not be able to generate sufficient cash flow from operations and future borrowings may not be available to it in an amount sufficient to enable KCS to pay its indebtedness, including the Exchange Notes, or to fund its other liquidity needs. KCS may need to refinance all or a portion of its indebtedness on or before maturity. However, KCS may not be able to complete such refinancing on commercially reasonable terms or at all.

KCS is a holding company, and its ability to make any required payment on the Exchange Notes is dependent on the operations of, and the distribution of funds from, its subsidiaries.

The issuer of the Exchange Notes, KCS, is a holding company, and its subsidiaries will conduct substantially all of its operations and own all of its operating assets. Therefore, KCS will depend on dividends and other distributions from its subsidiaries to generate the funds necessary to meet its obligations, including its required obligations under the Exchange Notes. Moreover, each of KCS's subsidiaries is a legally distinct entity and, other than those of its subsidiaries that are the Exchange Note Guarantors, have no obligation to pay amounts due pursuant to the Exchange Notes or to make any of their funds or other assets available for these payments.

Only some of KCS's subsidiaries will guarantee the Exchange Notes. Your right to receive payments on the Exchange Notes could be adversely affected if any of KCS's subsidiaries that are not Exchange Note Guarantors declare bankruptcy, liquidate or reorganize.

Not all of KCS's subsidiaries will guarantee the Exchange Notes, and those subsidiaries may incur debt and other liabilities to the extent permitted by the indentures governing the Exchange Notes. Accordingly, the Exchange Notes will be effectively subordinated to the prior payment of debts and other liabilities (including trade payables) of KCS's subsidiaries that are not Exchange Note Guarantors. In the event of a bankruptcy, liquidation or reorganization of any of KCS's subsidiaries that are not Exchange Note Guarantors, holders of their indebtedness and their trade creditors will generally be entitled to payment of their claims from the assets of those subsidiaries before any assets are made available for distribution to KCS. As of and for the three months ended March 31, 2016, the subsidiaries of KCS that are not Exchange Note Guarantors had approximately $525.9 million of total liabilities (including trade payables and excluding intercompany payables), and approximately 49% of KCS's consolidated assets (excluding intercompany receivables and investments in consolidated subsidiaries) and generated approximately 53% and 65%, respectively, of KCS's consolidated revenues and operating income (excluding intercompany revenue and expenses).

The amount of interest payable on the 2016 Exchange Notes will be set only once per period based on the three-month LIBOR on the interest determination date, which rate may fluctuate substantially.

In the past, the level of the three-month LIBOR has experienced significant fluctuations. Any historical upward or downward trend in the three-month LIBOR is not an indication that the three-month LIBOR is more or less likely to increase or decrease at any time during a floating rate interest period, and you should not take the historical levels of the three-month LIBOR as an indication of its future performance. In addition, although the actual three-month LIBOR on an interest payment date or at other times during an interest period may be higher than the three-month LIBOR on the applicable interest determination date, you will not benefit from the three-month LIBOR at any time other than on the interest determination date for such interest period. As a result, changes in the three-month LIBOR may not result in a comparable change in the market value of the 2016 Exchange Notes.

In addition, because the interest rate on the 2016 Exchange Notes will be a floating rate, you will be exposed to risks not associated with a conventional fixed-rate debt instrument. These risks include fluctuation of the three-month LIBOR (and hence, the interest rate) and the possibility that for any given interest payment period you may receive a lesser amount of interest than for one or more other interest payment periods. We have no control over the factors that may affect market interest rates, including geopolitical conditions and economic,

financial, political, regulatory, agricultural, judicial or other events that affect the markets generally and that are important in determining the existence, magnitude, and longevity of these risks and their results. Also, the floating interest rate for the 2016 Exchange Notes may be less than the floating rate payable on a similar debt instrument of the same maturity issued by an issuer of comparable creditworthiness.

Changes to LIBOR may adversely affect holders of the 2016 Exchange Notes.

Beginning in 2008, various concerns have been raised with respect to the calculation of LIBOR across a range of maturities and currencies. A number of the British Bankers Association (the "BBA") member banks have entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations were instigated by regulators and governmental authorities in various jurisdictions (including in the United States, United Kingdom, European Union, Japan and Canada). If manipulation of LIBOR or another inter-bank lending rate occurred, it may have resulted in that rate being artificially lower (or higher) than it otherwise would have been.

In September 2012, the U.K. government published the results of its review of LIBOR (commonly referred to as the "Wheatley Review"). The Wheatley Review made a number of recommendations for changes with respect to LIBOR including the introduction of statutory regulation of LIBOR, the transfer of responsibility for LIBOR from the BBA to an independent administrator, changes to the method of compilation of lending rates and new regulatory oversight and enforcement mechanisms for rate-setting. Based on the Wheatley Review, final rules for the regulation and supervision of LIBOR by the Financial Conduct Authority (the "FCA") were published and came into effect on April 2, 2013 (the "FCA Rules"). In particular, the FCA Rules include requirements that (1) an independent LIBOR administrator monitor and survey LIBOR submissions to identify breaches of practice standards and/or potentially manipulative behavior and (2) firms submitting data to LIBOR establish and maintain a clear conflicts of interest policy and appropriate systems and controls.

On September 18, 2013, the European Commission released proposals that could result in additional regulation of LIBOR and other benchmarks if adopted by the European Parliament and the member states.

It is not possible to predict the effect of the FCA Rules, any changes in the methods pursuant to which the LIBOR rates are determined and any other reforms to LIBOR that will be enacted in the U.K., the European Union and elsewhere, which may adversely affect the trading market for LIBOR-based securities. In addition, any changes announced by the FCA, the BBA or any other successor governance or oversight body, or future changes adopted by such body of the European Union, in the method pursuant to which the LIBOR rates are determined may result in a sudden or prolonged decrease or increase in the reported LIBOR rates. If that were to occur, the level of interest payments on and the trading value of the 2016 Exchange Notes may be adversely affected. Further, uncertainty as to the extent and manner in which the Wheatley Review recommendations will continue to be adopted and the European Commission proposals may be adopted and the timing of such changes may adversely affect the current trading market for LIBOR-based securities and the value of your 2016 Exchange Notes.

The indebtedness represented by the Exchange Notes and the Exchange Note Guarantees may be unenforceable due to voidable transfer statutes.

KCS believes that the indebtedness represented by the Exchange Notes and the Exchange Note Guarantees is being incurred for proper purposes, in good faith, and not to hinder, delay, or defraud any entity to which it is, or will become on or after the consummation of the Exchange Offers, indebted. Based on present forecasts, asset valuations and other financial information, KCS and the Exchange Note Guarantors are, and after the consummation of the Exchange Offers, will be, solvent and will have reasonably sufficient capital for carrying on the current and contemplated businesses of KCS and the Exchange Note Guarantors and will be able to pay debts of KCS and the Exchange Note Guarantors as they come due. Notwithstanding this belief, however, under federal or state voidable transfer laws, if a court of competent jurisdiction in a suit by an unpaid creditor or

representative of creditors (such as a trustee in bankruptcy or a debtor-in-possession) were to find that KCS or the Exchange Note Guarantors did not receive fair consideration (or reasonably equivalent value) for issuing the Exchange Notes or the Exchange Note Guarantees or for any indebtedness refinanced by the Exchange Notes and at the time of the issuance of that indebtedness or those Exchange Note Guarantees, KCS or the Exchange Note Guarantors were insolvent, were rendered insolvent by reason of that incurrence, were engaged in a business or transaction for which KCS's or the Exchange Note Guarantors' remaining assets constituted unreasonably small capital, intended to incur, or believed that KCS or the Exchange Note Guarantors would incur, debts beyond any of their ability to pay such debts as they became due, or that any of KCS or the Exchange Notes Guarantors intended to hinder, delay or defraud its creditors, then that court could, among other things, (i) void all or a portion of KCS's obligations to the holders of the Exchange Notes or the Exchange Note Guarantors' obligations under the Exchange Note Guarantees, (ii) subordinate all or a portion of the payments made to holders of the Exchange Notes (or the Exchange Note Guarantees) to KCS's (or the Exchange Note Guarantors') other existing and future indebtedness to a greater extent than would otherwise be the case, the effect of which would be to entitle those other creditors to be paid in full before any payment could be made on the Exchange Notes. The measure of insolvency for purposes of the foregoing will vary depending upon the law of the relevant jurisdiction. Generally, however, a company would be considered insolvent for purposes of the foregoing if the sum of that company's debts was greater than all of that company's assets at a fair valuation, or if the present fair saleable value of that company's assets was less than the amount that would be required to pay the probable liability on its existing debts as they become absolute and due. There can be no assurance as to what standards a court would apply to determine whether KCS or the Exchange Note Guarantors were solvent at the relevant time, or whether, whatever standard was applied, the Exchange Note Guarantees would not be voided on any of the grounds set forth above.

USE OF PROCEEDS

We will not receive any proceeds from the Exchange Offers. Any Outstanding Notes that are validly tendered and exchanged pursuant to the Exchange Offers will be retired and cancelled. Accordingly, issuance of the Exchange Notes will not result in any change in our capitalization.

RATIO OF EARNINGS TO FIXED CHARGES

The following table presents our ratio of earnings to fixed charges for the historical periods indicated.

	For the Three Months Ended March 31,	For the Year Ended December 31,				
	2016	2015	2014	2013	2012	2011
Ratio of earnings to fixed charges(1)	6.6	7.4	8.2	5.6	5.5	3.7

(1) For purposes of computing the ratio of earnings to fixed charges, "earnings" represent pretax income from continuing operations, excluding equity in earnings of affiliates, plus interest expense, portion of rents representative of an appropriate interest factor and distributed income of equity investments. "Fixed charges" consist of interest expense, capitalized interest and the portion of rents representative of an appropriate interest factor.

THE EXCHANGE OFFERS

Terms of the Exchange Offers; Period for Tendering Outstanding Notes

Subject to terms and conditions detailed in this prospectus, we will accept for exchange Outstanding Notes that are validly tendered on or prior to the Expiration Date with respect to the applicable Exchange Offer and not validly withdrawn as permitted below. The term "*Expiration Date*" means the latest time and date to which the applicable Exchange Offer is extended. This prospectus, together with the letter of transmittal, is first being sent on or about the date hereof, to all holders of Outstanding Notes known to us.

We expressly reserve the right, at any time, to extend the period of time during which any or all of the Exchange Offers are open, and delay acceptance for exchange of the applicable Outstanding Notes, by giving oral or written notice of such extension to the holders thereof as described below. During any such extension, all applicable Outstanding Notes previously tendered will remain subject to the applicable Exchange Offer and may be accepted for exchange by us. Any Outstanding Notes not accepted for exchange for any reason will be returned without expense to the tendering holder promptly after the Expiration Date or termination of the applicable Exchange Offer, as applicable.

Outstanding Notes tendered in the Exchange Offers must be in denominations of principal amount of $2,000 and integral multiples of $1,000 in excess thereof; *provided* that the untendered portion of an Outstanding Note or the portion thereof not accepted for exchange must be in a principal amount of $2,000 or an integral multiple of $1,000 in excess thereof.

We expressly reserve the right to amend or terminate any or all of the Exchange Offers, and not to accept for exchange any of the applicable Outstanding Notes, upon the occurrence of any of the conditions of the Exchange Offers specified in the section entitled "Summary Description of the Exchange Offers—Conditions to the Exchange Offers"; *provided*, *however*, that if we amend an Exchange Offer to make a material change, including the waiver of a material condition, we will extend the applicable Exchange Offer, if necessary, to keep such Exchange Offer open for at least five business days after such amendment or waiver is published, sent or given to the holders of the Outstanding Notes. We will give oral or written notice of any extension, amendment, non-acceptance or termination to the holders of the Outstanding Notes as promptly as practicable. Such notice, in the case of any extension, will be issued by means of a press release or other public announcement no later than 9:00 a.m., New York City time, on the next business day after the previously scheduled Expiration Date for such offer.

Procedures for Tendering Outstanding Notes

The tender to us of Outstanding Notes by you as set forth below and our acceptance of the Outstanding Notes will constitute a binding agreement between us and you upon the terms and subject to the conditions set forth in this prospectus and in the accompanying letter of transmittal. Except as set forth below, to tender Outstanding Notes for exchange pursuant to the Exchange Offers, you must transmit a properly completed and duly executed letter of transmittal, including all other documents required by such letter of transmittal or, in the case of a book-entry transfer, an Agent's Message in lieu of such letter of transmittal, to the Exchange Agent at the address set forth in the section entitled "—Exchange Agent" on or prior to the Expiration Date. In addition, either:

- certificates for such Outstanding Notes must be received by the Exchange Agent along with the letter of transmittal; or
- a timely confirmation of a book-entry transfer (a "Book-Entry Confirmation") of such Outstanding Notes, if such procedure is available, into the Exchange Agent's account at DTC pursuant to the procedure for book-entry transfer must be received by the Exchange Agent, prior to the Expiration Date, with the letter of transmittal or an Agent's Message in lieu of such letter of transmittal.

The term "Agent's Message" means a message, transmitted by DTC to and received by the Exchange Agent and forming a part of a Book-Entry Confirmation, which states that DTC has received an express acknowledgment from the tendering participant stating that such participant has received and agrees to be bound by the letter of transmittal and that we may enforce such letter of transmittal against such participant.

The method of delivery of Outstanding Notes, letters of transmittal and all other required documents is at your election and risk. If such delivery is by mail, it is recommended that you use registered mail, properly insured, with return receipt requested. In all cases, you should allow sufficient time to assure timely delivery. No letter of transmittal or Outstanding Notes should be sent to us.

Signatures on a letter of transmittal or a notice of withdrawal, as the case may be, must be guaranteed unless the Outstanding Notes surrendered for exchange are tendered:

- by a holder of the Outstanding Notes who has not completed the box entitled "Special Issuance Instructions" or "Special Delivery Instructions" on the letter of transmittal; or
- for the account of an Eligible Institution (as defined below).

In the event that signatures on a letter of transmittal or a notice of withdrawal are required to be guaranteed, such guarantees must be by a firm which is a member of the Securities Transfer Agent Medallion Program, the Stock Exchanges Medallion Program or the New York Stock Exchange Medallion Program (each such entity being hereinafter referred to as an "Eligible Institution"). If Outstanding Notes are registered in the name of a person other than the signer of the letter of transmittal, the Outstanding Notes surrendered for exchange must be endorsed by, or be accompanied by a written instrument or instruments of transfer or exchange, in satisfactory form as we determine in our sole discretion, duly executed by the registered holders with the signature thereon guaranteed by an Eligible Institution.

We, in our sole discretion, will make a final and binding determination on all questions as to the validity, form, eligibility (including time of receipt) and acceptance of Outstanding Notes tendered for exchange. We reserve the absolute right to reject any and all tenders of any particular Outstanding Note not validly tendered or to not accept any particular Outstanding Note which acceptance might, in our judgment or our counsel's, be unlawful. We also reserve the absolute right to waive any defects or irregularities or conditions of the Exchange Offers as to any particular Outstanding Note either before or after the Expiration Date (including the right to waive the ineligibility of any holder who seeks to tender Outstanding Notes in the Exchange Offers). Our interpretation of the term and conditions of the Exchange Offers as to any particular Outstanding Note either before or after the Expiration Date (including the letter of transmittal and the instructions thereto) will be final and binding on all parties. Unless waived, any defects or irregularities in connection with tenders of Outstanding Notes for exchange must be cured within such time as we shall determine. We are not, nor is the Exchange Agent or any other person, under any duty to notify you of any defect or irregularity with respect to your tender of Outstanding Notes for exchange, and no one will be liable for failing to provide such notification.

If the letter of transmittal is signed by a person or persons other than the registered holder or holders of Outstanding Notes, such Outstanding Notes must be endorsed or accompanied by powers of attorney signed exactly as the name(s) of the registered holder(s) that appear on the Outstanding Notes.

If the letter of transmittal or any Outstanding Notes or powers of attorney are signed by trustees, executors, administrators, guardians, attorneys-in-fact, officers of corporations or others acting in a fiduciary or representative capacity, such persons should so indicate when signing. Unless waived by us or the Exchange Agent, proper evidence satisfactory to us of their authority to so act must be submitted with the letter of transmittal.

By tendering Outstanding Notes, you represent to us that, among other things, the Exchange Notes acquired pursuant to the Exchange Offers are being obtained in the ordinary course of business of the person receiving such Exchange Notes, whether or not such person is the holder and that neither the holder nor such other person

has any arrangement or understanding with any person, to participate in the distribution of the Exchange Notes. In the case of a holder that is not a broker-dealer, that holder, by tendering, will also represent to us that the holder is not engaged in, and does not intend to engage in, a distribution of the Exchange Notes.

However, any purchaser of Outstanding Notes who is our affiliate, who intends to participate in the Exchange Offers for the purpose of distributing the Exchange Notes or a broker-dealer that acquired Outstanding Notes in a transaction other than as part of its trading or market-making activities and who has arranged or has an understanding with any person to participate in the distribution of the Outstanding Notes:

- cannot rely on the applicable interpretations of the staff of the SEC; and
- must comply with the registration and prospectus delivery requirements of the Securities Act in connection with any resale transaction.

Each broker-dealer that receives Exchange Notes for its own account in exchange for Outstanding Notes, where such Outstanding Notes were acquired by such broker-dealer as a result of market-making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of such Exchange Notes. See "Plan of Distribution." The letter of transmittal states that by so acknowledging and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an "underwriter" within the meaning of the Securities Act.

Acceptance of Outstanding Notes for Exchange; Delivery of Exchange Notes

Upon satisfaction or waiver of all of the conditions to the Exchange Offers, we will accept, promptly after the Expiration Date, all Outstanding Notes validly tendered and will issue the Exchange Notes promptly after the Expiration Date. See "Summary Description of the Exchange Offers—Conditions to the Exchange Offers." For purposes of the Exchange Offers, we will be deemed to have accepted validly tendered Outstanding Notes for exchange if and when we give oral (confirmed in writing) or written notice to the Exchange Agent.

The holder of each Outstanding Note accepted for exchange will receive an Exchange Note in the amount equal to the surrendered Outstanding Note. Holders of Exchange Notes will receive interest accruing from the most recent date to which interest has been paid on the Outstanding Notes, unless the record date for the first interest payment date after the consummation of the Exchange Offers preceded such date of consummation, in which case the interest payable on such interest payment date will be paid to the holders of the Outstanding Notes.

In all cases, issuance of Exchange Notes for Outstanding Notes that are accepted for exchange will be made only after timely receipt by the Exchange Agent of:

- certificates for Outstanding Notes or a timely Book-Entry Confirmation of such Outstanding Notes into the Exchange Agent's account at DTC;
- a properly completed and duly executed letter of transmittal or an Agent's Message in lieu thereof; and
- all other required documents.

If any tendered Outstanding Notes are not accepted for any reason set forth in the terms and conditions of the Exchange Offers or if Outstanding Notes are submitted for a greater principal amount than the holder desires to exchange, such unaccepted or non-exchanged Outstanding Notes will be returned without expense to the tendering holder (or, in the case of Outstanding Notes tendered by book-entry transfer into the Exchange Agent's account at DTC pursuant to the book-entry procedures described below, such non-exchanged Outstanding Notes will be credited to an account maintained with DTC promptly after the Expiration Date or termination of the applicable Exchange Offer) promptly after the Expiration Date or termination of the applicable Exchange Offer, as applicable.

Book-Entry Transfers

For purposes of the Exchange Offers, the Exchange Agent will request that an account be established with respect to the Outstanding Notes at DTC within two business days after the date of this prospectus, unless the Exchange Agent has already established an account with DTC suitable for the Exchange Offers. Any financial institution that is a participant in DTC may make book-entry delivery of Outstanding Notes by causing DTC to transfer such Outstanding Notes into the Exchange Agent's account at DTC in accordance with DTC's procedures for transfer. Although delivery of Outstanding Notes may be effected through book-entry transfer at DTC, the letter of transmittal or facsimile thereof or an Agent's Message in lieu thereof, with any required signature guarantees and any other required documents, must, in any case, be transmitted to and received by the Exchange Agent at the address set forth in the section entitled "—Exchange Agent" on or prior to the Expiration Date.

Withdrawal Rights

You may validly withdraw your tender of Outstanding Notes at any time prior to the Expiration Date. To be effective, a written notice of withdrawal must be received by the Exchange Agent at one of the addresses set forth in the section entitled "—Exchange Agent." This notice must specify:

- the name of the person having tendered the Outstanding Notes to be withdrawn;
- the Outstanding Notes to be withdrawn (including the principal amount of such Outstanding Notes); and
- where certificates for Outstanding Notes have been transmitted, the name in which such Outstanding Notes are registered, if different from that of the withdrawing holder.

If certificates for Outstanding Notes have been delivered or otherwise identified to the Exchange Agent, then, prior to the release of such certificates, the withdrawing holder must also submit the serial numbers of the particular certificates to be withdrawn and a signed notice of withdrawal with signatures guaranteed by an Eligible Institution, unless such holder is an Eligible Institution. If Outstanding Notes have been tendered pursuant to the procedure for book-entry transfer described above, any notice of withdrawal must specify the name and number of the account at DTC to be credited with the withdrawn Outstanding Notes and otherwise comply with the procedures of DTC.

We, in our sole discretion, will make a final and binding determination on all questions as to the validity, form and eligibility (including time of receipt) of such notices. Any Outstanding Notes so withdrawn will be deemed not to have been validly tendered for exchange for purposes of the Exchange Offers. Any Outstanding Notes tendered for exchange but not exchanged for any reason will be returned to the holder without cost to such holder promptly after the Expiration Date (or, in the case of Outstanding Notes tendered by book-entry transfer into the Exchange Agent's account at DTC pursuant to the book-entry transfer procedures described above, such Outstanding Notes will be credited to an account maintained with DTC for the Outstanding Notes as soon as practicable after withdrawal, rejection of tender or termination of the applicable Exchange Offer) or termination of the applicable Exchange Offer, as applicable. Properly withdrawn Outstanding Notes may be retendered by following one of the procedures described in the section entitled "—Procedures for Tendering Outstanding Notes" above at any time on or prior to the Expiration Date.

Exchange Agent

U.S. Bank National Association will be appointed Exchange Agent for the Exchange Offers. Questions and requests for assistance and requests for additional copies of this prospectus or the letter of transmittal should be addressed to the Exchange Agent as follows:

By Hand Delivery, Registered Mail or Overnight Carrier
U.S. Bank National Association
Attn: Specialized Finance
111 Fillmore Avenue
St. Paul, MN 55107-1402

Facsimile Transmission:
(651) 466-7367
Confirm by Telephone:
(800) 934-6802

For Information With Respect to the Exchange Offers, Call:

the Exchange Agent at (800) 934-6802 or go to
www.usbank.com/corp_trust/bondholder_contact.html

DELIVERY OF THE LETTER OF TRANSMITTAL TO AN ADDRESS OTHER THAN AS SET FORTH ABOVE OR TRANSMISSION OF SUCH LETTER OF TRANSMITTAL VIA FACSIMILE OTHER THAN AS SET FORTH ABOVE DOES NOT CONSTITUTE A VALID DELIVERY OF THE LETTER OF TRANSMITTAL.

Fees and Expenses

We will pay the Exchange Agent customary fees for its services, reimburse the Exchange Agent for its reasonable out-of-pocket expenses incurred in connection with the provision of these services and pay other registration expenses, including fees and expenses of the trustee under the indenture relating to the Exchange Notes, filing fees, blue sky fees and printing and distribution expenses. We will not make any payment to brokers, dealers or others soliciting acceptances of the Exchange Offers.

Additional solicitation may be made by telephone, facsimile or in person by our and our affiliates' officers and regular employees.

Accounting Treatment

We will record the Exchange Notes at the same carrying value as the Outstanding Notes, as reflected in our accounting records on the date of the exchange. Accordingly, we will not recognize any gain or loss for accounting purposes. The expenses of the Exchange Offers will be expensed as incurred.

Consequences of Exchanging or Failing to Exchange Outstanding Notes

Upon completion of the Exchange Offers, with respect to each series of Exchange Notes to be issued in the applicable Exchange Offer, KCS may redeem any related Outstanding Notes that are not exchanged in the applicable Exchange Offer in an amount up to 2% of the original aggregate principal amount of such Outstanding Notes at a redemption price of 100% of their principal amount plus accrued interest to but not including the redemption date. If you do not exchange your Outstanding Notes for Exchange Notes in the Exchange Offers, and your Outstanding Notes are not redeemed by us as described in the preceding sentence, your Outstanding

Notes will continue to be subject to the provisions of the indentures relating to the Exchange Notes regarding transfer and exchange of the Outstanding Notes. These transfer restrictions are required because the Outstanding Notes were issued under an exemption from, or in transactions not subject to, the registration requirements of the Securities Act and applicable state securities laws. In general, the Outstanding Notes may not be offered or sold unless registered under the Securities Act, except under an exemption from, or in a transaction not subject to, the Securities Act and applicable state securities laws. We do not plan to register the Outstanding Notes under the Securities Act. Based on interpretations by the staff of the SEC, as set forth in no-action letters issued to third parties, we believe that the Exchange Notes you receive in the Exchange Offers may be offered for resale, resold or otherwise transferred without compliance with the registration and prospectus delivery provisions of the Securities Act. However, you will not be able to freely transfer the Exchange Notes if:

- you are our "affiliate," as defined in Rule 405 under the Securities Act;
- you are not acquiring the Exchange Notes in the Exchange Offers in the ordinary course of your business; or
- you have an arrangement or understanding with any person to participate in the "distribution," as defined in the Securities Act, of the Exchange Notes you will receive in the Exchange Offers.

We do not intend to request the SEC to consider, and the SEC has not considered, the Exchange Offers in the context of a similar no-action letter. As a result, we cannot guarantee that the staff of the SEC would make a similar determination with respect to the Exchange Offers as in the circumstances described in the no-action letters discussed above. Each holder, other than a broker-dealer, must acknowledge that it is not engaged in, and does not intend to engage in, a distribution of Exchange Notes and has no arrangement or understanding to participate in a distribution of Exchange Notes. If you are our affiliate, are engaged in or intend to engage in a distribution of the Exchange Notes or have any arrangement or understanding with respect to the distribution of the Exchange Notes you will receive in the Exchange Offers, you may not rely on the applicable interpretations of the staff of the SEC and you must comply with the registration and prospectus delivery requirements of the Securities Act in connection with any resale transaction involving the Exchange Notes. If you are a participating broker-dealer, you must acknowledge that you will deliver a prospectus in connection with any resale of the Exchange Notes. In addition, to comply with state securities laws, you may not offer or sell the Exchange Notes in any state unless they have been registered or qualified for sale in that state or an exemption from registration or qualification is available and is complied with. The offer and sale of the Exchange Notes to "qualified institutional buyers" (as defined in Rule 144A of the Securities Act) is generally exempt from registration or qualification under state securities laws. We do not plan to register or qualify the sale of the Exchange Notes in any state where an exemption from registration or qualification is required and not available.

DESCRIPTION OF EXCHANGE NOTES

We issued the Outstanding Notes and will issue the Exchange Notes (collectively, the "Notes") under a base indenture, dated as of December 9, 2015 (the "Base Indenture") among KCS, as issuer, KCSR and certain of its subsidiaries, as guarantors, and U.S. Bank National Association, as trustee, as supplemented by a separate supplemental indenture with respect to each series of Notes (each, a "Supplemental Indenture"). In this description, unless otherwise specified, the word "Indenture" shall be deemed to refer to the Base Indenture, as supplemented by the applicable Supplemental Indenture.

The following description is a summary of certain provisions of the Indenture, does not purport to be complete and is subject to, and is qualified in its entirety by reference to, all the provisions of the Indenture, including those provisions made a part of the Indenture by reference to the Trust Indenture Act of 1939, as amended. KCS and the Note Guarantors urge you to read the Indenture because it, and not this description, defines your rights as a holder of the applicable Exchange Notes.

You can find the definitions of certain capitalized terms used in the following description under the subheading "—Certain Definitions." Defined terms used but not defined in this description under the subheading "—Certain Definitions" have the meanings assigned to them in the Indenture. In this description, references to "KCS" refer only to Kansas City Southern and not any of its subsidiaries.

The registered holder of a Note will be treated as the owner of it for all purposes. Only registered holders will have rights under the Indenture.

The terms of the Exchange Notes are substantially identical to the terms of the Outstanding Notes, except with respect to transfer restrictions, registration rights and additional interest.

Principal, Maturity and Interest

In this offering, KCS will issue:

(1) up to $244,820,000 in aggregate principal amount of Floating Rate Senior Notes due 2016 (the "2016 Exchange Notes"). The 2016 Exchange Notes will bear interest at a floating rate per annum equal to the three-month U.S. dollar London Interbank Offered Rate ("LIBOR"), determined as described below, plus 70 basis points (0.70%) (the "Spread"), and will mature on October 28, 2016. Interest on the 2016 Exchange Notes will be payable on July 28, 2016 and October 28, 2016 (each a "2016 Notes Interest Payment Date"). Interest will be payable to the holders of record of the 2016 Exchange Notes at the close of business on the fifteenth calendar day prior to each 2016 Notes Interest Payment Date, whether or not such day is a Business Day;

(2) up to $257,346,000 in aggregate principal amount of 2.35% Senior Notes due 2020 (the "2020 Exchange Notes"). The 2020 Exchange Notes will bear interest at 2.35% per annum, and will mature on May 15, 2020. Interest on the 2020 Exchange Notes will be payable semiannually on May 15 and November 15 of each year, commencing on November 15, 2016, to the holders of record at the close of business on the immediately preceding May 1 and November 1;

(3) up to $439,123,000 in aggregate principal amount of 3.00% Senior Notes due 2023 (the "3.00% 2023 Exchange Notes"). The 3.00% 2023 Exchange Notes will bear interest at 3.00% per annum, and will mature on May 15, 2023. Interest on the 3.00% 2023 Exchange Notes will be payable semiannually on May 15 and November 15 of each year, commencing on November 15, 2016, to the holders of record at the close of business on the immediately preceding May 1 and November 1;

(4) up to $199,224,000 in aggregate principal amount of 3.85% Senior Notes due 2023 (the "3.85% 2023 Exchange Notes"). The 3.85% 2023 Exchange Notes will bear interest at 3.85% per annum, and will mature on November 15, 2023. Interest on the 3.85% 2023 Exchange Notes will be payable

semiannually on May 15 and November 15 of each year, commencing on November 15, 2016, to the holders of record at the close of business on the immediately preceding May 1 and November 1;

(5) up to $448,651,000 in aggregate principal amount of 4.30% Senior Notes due 2043 (the "2043 Exchange Notes"). The 2043 Exchange Notes will bear interest at 4.30% per annum, and will mature on May 15, 2043. Interest on the 2043 Exchange Notes will be payable semiannually on May 15 and November 15 of each year, commencing on November 15, 2016, to the holders of record at the close of business on the immediately preceding May 1 and November 1; and

(6) up to $499,165,000 in aggregate principal amount of 4.95% Senior Notes due 2045 (the "2045 Exchange Notes"). The 2045 Exchange Notes will bear interest at 4.95% per annum, and will mature on August 15, 2045. Interest on the 2045 Exchange Notes will be payable semiannually on February 15 and August 15 of each year, commencing on August 15, 2016, to the holders of record at the close of business on the immediately preceding February 1 and August 1.

Interest on the Exchange Notes, other than the 2016 Exchange Notes, will be computed on the basis of a 360-day year comprising twelve 30-day months. Interest on the 2016 Exchange Notes will be computed on the basis of actual number of calendar days in the calculation period divided by 360. Interest on the Exchange Notes of a series will accrue from the most recent date on which interest has been paid on the corresponding series of Outstanding Notes or, if no interest has been paid, from and including the date of issuance of the corresponding series of Outstanding Notes.

KCS may, without the consent of the holders, issue additional Notes of any series ("Additional Notes") having the same terms as the Notes of such series, except for the public offering price and the issue date and, if applicable, the initial interest accrual date and the initial interest payment date. Any Additional Notes, together with the Notes of the same series, will constitute a single series of Notes and will vote together as one class on all matters with respect to such Notes; *provided*, *however*, that any Additional Notes that are not fungible with existing Notes of the same series for U.S. federal income tax purposes will have a separate CUSIP, ISIN and other identifying number from such existing Notes. Unless the context otherwise requires, for all purposes of the Indenture and this "Description of Exchange Notes," references to the Notes of a series include any Additional Notes of the same series actually issued.

Interest Rate for the 2016 Exchange Notes

The interest rate for the first 2016 Notes Interest Period (which ends on July 28, 2016) will be 1.33435%, which is the interest rate on the Outstanding 2016 Notes for the interest period ending on such date. The interest rate for the 2016 Notes Interest Period after the first 2016 Notes Interest Period will be the three-month U.S. dollar LIBOR, as determined on the applicable 2016 Notes Interest Determination Date, plus the Spread. The interest rate for the 2016 Exchange Notes will be reset quarterly on the 2016 Notes Interest Reset Date.

The calculation agent will determine the three-month U.S. dollar LIBOR in accordance with the following provisions: with respect to any 2016 Notes Interest Determination Date, the three-month U.S. dollar LIBOR will be the rate (expressed as a percentage per annum) for deposits in U.S. dollars having a maturity of three months that appears on the designated LIBOR page (as described below) as of 11:00 a.m., London time, on such 2016 Notes Interest Determination Date. If the three-month U.S. dollar LIBOR does not appear on the designated LIBOR page, the three-month U.S. dollar LIBOR, in respect of such 2016 Notes Interest Determination Date, will be determined as follows: the calculation agent will request the principal London offices of each of four major reference banks in the London interbank market, as selected by the calculation agent (after consultation with KCS), to provide the calculation agent with its offered quotation for deposits in U.S. dollars for the period of three months commencing on the applicable 2016 Notes Interest Reset Date, to prime banks in the London interbank market at approximately 11:00 a.m., London time, on that 2016 Notes Interest Determination Date and in a principal amount of not less than $1,000,000 for a single transaction in U.S. dollars in such market at such time. If at least two quotations are provided, then the three-month U.S. dollar LIBOR on such 2016 Notes

Interest Determination Date will be the arithmetic mean of such quotations. If fewer than two such quotations are provided, then the three-month U.S. dollar LIBOR on such 2016 Notes Interest Determination Date will be the arithmetic mean of the rates quoted at approximately 11:00 a.m., New York City time, on such 2016 Notes Interest Determination Date by three major banks in New York City selected by the calculation agent (after consultation with KCS) for loans in U.S. dollars to leading European banks, having a three-month maturity and in a principal amount of not less than $1,000,000 for a single transaction in U.S. dollars in such market at such time; *provided*, *however*, that if the banks selected by the calculation agent are not providing quotations in the manner described by this sentence, the three-month U.S. dollar LIBOR determined as of such 2016 Notes Interest Determination Date will be the three-month U.S. dollar LIBOR in effect with respect to the 2016 Exchange Notes prior to such 2016 Notes Interest Determination Date.

The designated LIBOR page shall be: (1) the Reuters screen "LIBOR01" or such other page as may replace the Reuters screen "LIBOR01" on that service or (2) if, on any 2016 Notes Interest Determination Date, the three-month U.S. dollar LIBOR does not appear or is not available on such date on the designated Reuters screen described in clause (1) above, the designated LIBOR page shall be Bloomberg L.P. page "BBAM" or such other page as may replace Bloomberg L.P. page "BBAM" on that service. All percentages resulting from any calculation of any interest rate for the 2016 Exchange Notes will be rounded, if necessary, to the nearest one hundred thousandth of a percentage point, with five one-millionths of a percentage point rounded upward (e.g., 3.876545% (or .03876545) would be rounded to 3.87655% (or .0387655)), and all U.S. dollar amounts will be rounded to the nearest cent, with one-half cent being rounded upward. Each calculation of the interest rate on the 2016 Exchange Notes by the calculation agent will (in the absence of manifest error) be final and binding on the holders of the 2016 Exchange Notes and KCS.

U.S. Bank National Association will act as calculation agent for the 2016 Exchange Notes.

Note Guarantees

The Exchange Notes will be unconditionally Guaranteed, jointly and severally, on an unsecured senior basis, by each of KCS's current and future Domestic Subsidiaries that from time to time Guarantees the Credit Agreement or any other Debt of KCS or any of KCS's Significant Subsidiaries that is a Guarantor. The obligations of each Guarantor under its Note Guarantee will be limited as necessary to prevent that Note Guarantee from constituting a fraudulent conveyance under applicable law. See "Risk Factors—Risks Related to the Exchange Offers and Holding the Exchange Notes—The indebtedness represented by the Exchange Notes and the Note Guarantees may be unenforceable due to voidable transfer statutes." For the avoidance of doubt, KCSM and any other foreign Subsidiaries of KCS will not Guarantee the Exchange Notes.

The Note Guarantee of a Guarantor will be released:

(1) in connection with any sale, disposition or transfer of all or substantially all of the assets of that Guarantor (including by way of merger or consolidation) to a Person that is not (either before or after giving effect to such transaction) KCS or a Guarantor;

(2) in connection with any sale, disposition or transfer of all of the Capital Stock of that Guarantor to a Person that is not (either before or after giving effect to such transaction) KCS or a Guarantor;

(3) upon the release or discharge of such Guarantors' Guarantee of the Credit Agreement or under the Debt that triggered such Guarantor's Note Guarantee;

(4) upon the liquidation or dissolution of such Guarantor; *provided* that no Default or Event of Default shall occur as a result thereof or has occurred and is continuing; or

(5) upon defeasance or satisfaction and discharge of the Indenture as provided below under the captions "—Legal Defeasance and Covenant Defeasance" and "—Satisfaction and Discharge."

Ranking

The Exchange Notes will be KCS's general unsecured senior obligations and will rank equally in right of payment with all existing and future senior indebtedness of KCS and senior in right of payment to all of KCS's future subordinated indebtedness. The Exchange Notes will be effectively subordinated to KCS's secured indebtedness, if any, to the extent of the value of the assets securing such indebtedness and will be structurally subordinated to all liabilities of any of KCS's subsidiaries that are not Guarantors.

Each Note Guarantee will be a general unsecured senior obligation of that Guarantor, will rank equally in right of payment with all existing and future senior indebtedness of that Guarantor and senior in right of payment to any future subordinated indebtedness of that Guarantor. Each Note Guarantee will be effectively subordinated to any existing and future secured indebtedness of that Guarantor to the extent of the value of any collateral securing such indebtedness.

As of March 31, 2016, KCS and its subsidiaries had (a) $746.0 million of availability under the KCS Revolving Credit Facility and (b) total indebtedness of $2,368.6 million, consisting of (i) $2,171.6 million of senior indebtedness of KCS and the Guarantors, of which $54.5 million was secured indebtedness and (ii) $197.0 million of senior indebtedness of subsidiaries of KCS that are not Guarantors, and such subsidiaries had approximately 49% of KCS's consolidated assets (excluding intercompany receivables and investments in consolidated subsidiaries). Moreover, such subsidiaries represented approximately 53% of KCS's consolidated revenues for each of the fiscal year ended December 31, 2015 and the three months ended March 31, 2016. In addition, on May 16, 2016, KCS issued $250.0 million in aggregate principal amount of 3.125% Senior Notes due 2026.

Payments on the Exchange Notes

Principal of, premium, if any, and interest on the Exchange Notes will be payable, and the Exchange Notes may be exchanged or transferred, at the office of the applicable paying agent in The City of New York; provided that, at KCS's option, payment of interest may be made by check mailed to the holders at their addresses as they appear in the applicable Exchange Notes register.

Optional Redemption

General

2016 Exchange Notes

Other than as provided under the caption "—Following the Exchange Offers," KCS may not redeem the 2016 Exchange Notes prior to maturity.

2020 Exchange Notes

Prior to April 15, 2020 (the date that is one month prior to the maturity date), the 2020 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to the greater of (i) 100% of the principal amount of the 2020 Exchange Notes to be redeemed and (ii) the sum of the present values of the remaining scheduled payments of principal and interest on the 2020 Exchange Notes to be redeemed (exclusive of interest accrued to the date of redemption) discounted to the date of redemption on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the then-current Treasury Rate, plus 20 basis points, plus accrued interest to but excluding the redemption date.

On or after April 15, 2020 (the date that is one month prior to the maturity date), the 2020 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price

equal to 100% of the principal amount of the 2020 Exchange Notes to be redeemed plus accrued interest to but excluding the redemption date.

3.00% 2023 Exchange Notes

Prior to February 15, 2023 (the date that is three months prior to the maturity date), the 3.00% 2023 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to the greater of (i) 100% of the principal amount of the 3.00% 2023 Exchange Notes to be redeemed and (ii) the sum of the present values of the remaining scheduled payments of principal and interest on the 3.00% 2023 Exchange Notes to be redeemed (exclusive of interest accrued to the date of redemption) discounted to the date of redemption on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the then-current Treasury Rate, plus 20 basis points, plus accrued interest to but excluding the redemption date.

On or after February 15, 2023 (the date that is three months prior to the maturity date), the 3.00% 2023 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to 100% of the principal amount of the 3.00% 2023 Exchange Notes to be redeemed plus accrued interest to but excluding the redemption date.

3.85% 2023 Exchange Notes

Prior to August 15, 2023 (the date that is three months prior to the maturity date), the 3.85% 2023 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to the greater of (i) 100% of the principal amount of the 3.85% 2023 Exchange Notes to be redeemed and (ii) the sum of the present values of the remaining scheduled payments of principal and interest on the 3.85% 2023 Exchange Notes to be redeemed (exclusive of interest accrued to the date of redemption) discounted to the date of redemption on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the then-current Treasury Rate, plus 20 basis points, plus accrued interest to but excluding the redemption date.

On or after August 15, 2023 (the date that is three months prior to the maturity date), the 3.85% 2023 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to 100% of the principal amount of 3.85% 2023 Exchange Notes to be redeemed plus accrued interest to but excluding the redemption date.

2043 Exchange Notes

Prior to November 15, 2042 (the date that is six months prior to the maturity date), the 2043 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to the greater of (i) 100% of the principal amount of the 2043 Exchange Notes to be redeemed and (ii) the sum of the present values of the remaining scheduled payments of principal and interest on the 2043 Exchange Notes to be redeemed (exclusive of interest accrued to the date of redemption) discounted to the date of redemption on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at then-current Treasury Rate, plus 25 basis points, plus accrued interest to but excluding the redemption date.

On or after November 15, 2042 (the date that is six months prior to the maturity date), the 2043 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to 100% of the principal amount of the 2043 Exchange Notes to be redeemed plus accrued interest to but excluding the redemption date.

2045 Exchange Notes

Prior to February 15, 2045 (the date that is six months prior to the maturity date), the 2045 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price

equal to the greater of (i) 100% of the principal amount of the 2045 Exchange Notes to be redeemed and (ii) the sum of the present values of the remaining scheduled payments of principal and interest on the 2045 Exchange Notes to be redeemed (exclusive of interest accrued to the date of redemption) discounted to the date of redemption on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the then-current Treasury Rate, plus 30 basis points, plus accrued interest to but excluding the redemption date.

On or after February 15, 2045 (the date that is six months prior to the maturity date), the 2045 Exchange Notes will be redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to 100% of the principal amount of the 2045 Exchange Notes to be redeemed plus accrued interest to but excluding the redemption date.

Following the Exchange Offers

Upon completion of the Exchange Offers, with respect to each series of Exchange Notes to be issued in the applicable Exchange Offer, KCS may redeem any related Outstanding Notes that are not exchanged in the applicable Exchange Offer in an amount up to 2% of the original aggregate principal amount of such Outstanding Notes at a redemption price of 100% of their principal amount plus accrued interest to but not including the redemption date.

Selection and Notice

In the case of any partial redemption, selection of the Exchange Notes of a particular series for redemption will be made by the trustee in compliance with the requirements of the principal national securities exchange, if any, on which such Exchange Notes are listed or, if such Exchange Notes are not listed on a national securities exchange, pro rata, by lot or by such other method as the trustee in its sole discretion shall deem to be fair and appropriate; provided that no Note of $2,000 in principal amount or less shall be redeemed in part.

Notice of the redemption will be mailed to holders of the Exchange Notes to be redeemed by first-class mail at least 30 and not more than 60 days prior to the redemption date, except that redemption notices may be mailed more than 60 days prior to a redemption date if the notice is issued in connection with a defeasance of Exchange Notes or a satisfaction and discharge of an Indenture and redemption notices may be mailed not less than three days prior to a redemption date if the notice is issued with respect to Outstanding Notes to be redeemed as set forth under "—Optional Redemption—Following the Exchange Offers." Notices of redemption may not be conditional.

If any Exchange Note is to be redeemed in part only, the notice of redemption relating to such Exchange Note shall state the portion of the principal amount at maturity thereof to be redeemed. An Exchange Note in principal amount equal to the unredeemed portion thereof will be issued in the name of the holder thereof upon cancellation of the original Exchange Note. On and after the redemption date, interest will cease to accrue on the Exchange Notes to be redeemed if KCS has deposited with the applicable paying agent funds in satisfaction of the redemption price.

Covenants

Limitation on Secured Indebtedness and Indebtedness of Non-Guarantor Subsidiaries

If KCS or any of KCS's Significant Subsidiaries that is a Guarantor creates or permits any lien of any kind upon (1) any stock, whether owned on the Closing Date or thereafter acquired, of any of KCS's Significant Subsidiaries that is a Guarantor or (2) any indebtedness, whether owned on the Closing Date or thereafter acquired, of KCS or any of KCS's Significant Subsidiaries that is a Guarantor, in each case, to secure any Debt (other than, with respect to a series of Notes, the Notes of such series) of KCS, any of KCS's Subsidiaries or any other person, KCS will cause the outstanding Notes of such series to be secured equally and ratably with that

Debt, unless the aggregate principal amount of all such secured Debt then outstanding (together with any Debt outstanding under clauses (1), (3), (4) and (5) of the following paragraph) would not exceed 10.0% of KCS's Consolidated Net Assets. This provision does not restrict any other property of KCS or its Subsidiaries. Subject to the following paragraph, the Indenture will not prohibit the sale by KCS or any of its Subsidiaries of any stock or indebtedness of any Subsidiary, including any Significant Subsidiary.

In addition, KCS shall not permit any Subsidiary of KCS that is not a Guarantor to incur any Debt, except (1) Debt with a final maturity of not more than 365 days, (2) intercompany Debt owed to KCS or any of its Subsidiaries, (3) Debt of any joint venture to which KCS or any of its Subsidiaries is a party, (4) any Existing KCSM Notes and any Secured Debt of any Subsidiary of KCS that is not a Guarantor, in each case, outstanding on the Closing Date and (5) Debt not otherwise permitted by this paragraph in an aggregate principal amount, at any one time outstanding, not to exceed $150.0 million less the aggregate principal amount of any Existing KCSM Notes outstanding at the time of such incurrence (but not less than $0); provided that the limitations set forth in this paragraph shall not apply to Meridian Speedway, LLC.

Change of Control Repurchase Event

If a Change of Control Repurchase Event occurs with respect to a series of Notes, KCS will be required to make an offer to each holder of such Notes to repurchase all or any part (equal to $2,000 or an integral multiple of $1,000 in excess thereof) of that holder's Notes of such series at a repurchase price in cash equal to 101% of the aggregate principal amount of such Notes repurchased plus accrued interest, if any, to, but excluding, the date of repurchase. Within 30 days following a Change of Control Repurchase Event with respect to a series of Notes or, at KCS's option, prior to a Change of Control, but after the public announcement of the Change of Control, KCS will mail a notice to each holder of the Notes of such series, with a copy to the trustee, describing the transaction or transactions that constitute or may constitute the Change of Control Repurchase Event and offering to repurchase such Notes on the payment date specified in the notice, which date will be no earlier than 30 days and no later than 60 days from the date such notice is mailed. The notice shall, if mailed prior to the date of consummation of the Change of Control, state that the offer to purchase is conditioned on a Change of Control Repurchase Event occurring with respect to that series of Notes on or prior to the payment date specified in the notice. KCS will comply with the requirements of Rule 14e-1 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and any other securities laws and regulations thereunder to the extent those laws and regulations are applicable in connection with the repurchase of such Notes as a result of a Change of Control Repurchase Event. To the extent that the provisions of any securities laws or regulations conflict with the Change of Control Repurchase Event provisions of a series of Notes, KCS will comply with the applicable securities laws and regulations and will not be deemed to have breached KCS's obligations under the Change of Control Repurchase Event provisions of such Notes by virtue of such conflict.

On the repurchase date following a Change of Control Repurchase Event with respect to a series of Notes, KCS will, to the extent lawful:

(1) accept for payment all Notes or portions of Notes of such series properly tendered pursuant to KCS's offer;

(2) deposit with the applicable paying agent an amount equal to the aggregate purchase price in respect of all Notes or portions of Notes of such series properly tendered; and

(3) deliver or cause to be delivered to the trustee the Notes of such series properly accepted, together with an officers' certificate stating the aggregate principal amount of such Notes being purchased by KCS.

The applicable paying agent will promptly mail to each holder of such Notes that are properly tendered the purchase price for such Notes, and the trustee will promptly authenticate and mail (or cause to be transferred by book-entry) to each holder a new Note of the same series equal in principal amount to any unpurchased portion of any such Notes surrendered; *provided* that each new Note will be in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof.

KCS will not be required to make an offer to repurchase the Notes of a series upon a Change of Control Repurchase Event with respect to such series if (1) a third party makes such an offer in the manner, at the times and otherwise in compliance with the requirements for an offer made by KCS and such third party purchases all Notes of such series properly tendered and not withdrawn under its offer or (2) notice of redemption for all outstanding Notes of such series has been given pursuant to the applicable Indenture as described above under the caption "—Optional Redemption."

The Change of Control Repurchase Event feature of the Notes may in certain circumstances make more difficult or discourage a sale or takeover of KCS and, thus, the removal of incumbent management. KCS could, in the future, enter into certain transactions, including asset sales, acquisitions, refinancings or other recapitalizations, that would not constitute a Change of Control Repurchase Event under the Notes, but that could increase the amount of indebtedness outstanding at such time or otherwise affect KCS's capital structure or credit ratings on the Notes.

Additional Guarantors

KCS shall cause each Domestic Subsidiary that Guarantees the Credit Agreement or any other Debt of KCS or any of KCS's Significant Subsidiaries that is a Guarantor to become a Guarantor and execute a supplemental indenture and deliver an opinion of counsel satisfactory to the trustee within 30 days of becoming a guarantor of such Debt; *provided* that, for avoidance of doubt, none of KCSM or any other foreign Subsidiary of KCS shall be required to become a Guarantor.

Reports

Whether or not KCS is required to file reports with the SEC, KCS shall file with the SEC all such reports and other information when and as KCS would be required to file with the SEC by Sections 13(a) or 15(d) under the Exchange Act if KCS were subject thereto, unless the SEC does not permit such filings, in which case KCS shall provide such reports and other information to the trustee (within the same time periods that would be applicable if KCS were required and permitted to file reports with the SEC) and instruct the trustee to mail such reports and other information to holders of the Notes at their addresses set forth on the applicable Notes register. KCS shall supply the trustee and each holder of Notes of a series or shall supply to the trustee for forwarding to each such holder, without cost to such holder, copies of such reports and other information. Notwithstanding the foregoing sentence, the trustee and each holder of Notes of a series shall be deemed to have been supplied the foregoing reports and other information at the time the trustee or such holder may electronically access such reports and other information by means of the SEC's homepage on the internet or at KCS's homepage on the internet.

Furthermore, KCS agrees that, for so long as any Notes remain outstanding, it will furnish to the holders of Notes, beneficial owners of the Notes, *bona fide* prospective investors, securities analysts and market makers, upon their request, the reports described above and any other information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act.

Merger, Consolidation and Sale of Assets

Neither KCS nor any Guarantor will consolidate with, merge with or into, or sell, assign, convey, transfer, lease or otherwise dispose of all or substantially all of its property and assets (as an entirety or substantially as an entirety in one transaction or a series of related transactions) to, any Person or permit any Person to merge with or into KCS or such Guarantor unless:

(1) KCS or such Guarantor shall be the continuing Person, or the Person (if other than KCS or such Guarantor) formed by such consolidation or into which KCS or such Guarantor is merged or that acquired or leased such property and its assets shall be a corporation organized and validly existing under the laws of the United States of America, any state thereof or the District of Columbia (or in the

case of a Guarantor, a corporation, partnership, limited liability company or similar entity organized and validly existing under the laws of the jurisdiction under which such Guarantor was organized) and shall expressly assume, by a supplemental indenture, executed and delivered to the trustee, in form reasonably satisfactory to the trustee, all of the obligations of KCS or such Guarantor under the applicable Notes, the applicable Note Guarantee, the applicable Indenture and the registration rights agreement, as applicable; *provided* that this clause (1) shall not apply with respect to a Guarantor whose Note Guarantee is released as described in the second paragraph under the caption "—Note Guarantees";

(2) immediately after giving effect to such transaction, no Default or Event of Default shall have occurred and be continuing; and

(3) KCS delivers to the trustee an officers' certificate and opinion of counsel, in each case stating that such consolidation, merger, sale, assignment, conveyance, transfer, lease or other deposition and such supplemental indenture complies with this covenant.

Events of Default

Each of the following is an "Event of Default" with respect to a series of Notes:

(1) default in the payment of principal of (or premium, if any, on) any Note of such series when the same becomes due at maturity, upon acceleration, redemption or otherwise;

(2) default in the payment of interest on any Note of such series when due and such default continues for a period of 30 days;

(3) default in the performance of any covenant of KCS or a Guarantor in the Indenture (other than a default specified in clause (1) or (2) above), and such default continues for a period of 90 days after written notice by the trustee with respect to such series or the holders of 25% or more in aggregate principal amount of the Notes of such series;

(4) a court having jurisdiction in the premises enters a decree or order for:

(A) relief in respect of KCS or a Guarantor in an involuntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect,

(B) appointment of a receiver, liquidator, assignee, custodian, trustee, sequestrator or similar official for KCS or a Guarantor or for all or substantially all of the property and assets of KCS or a Guarantor, or

(C) the winding-up or liquidation of the affairs of KCS or a Guarantor;

and, in each case, such decree or order shall remain unstayed and in effect for a period of 30 consecutive days;

(5) KCS or a Guarantor:

(A) commences a voluntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect, or consents to the entry of an order for relief in an involuntary case under any such law,

(B) consents to the appointment of or taking possession by a receiver, liquidator, assignee, custodian, trustee, sequestrator or similar official for KCS or a Guarantor or for all or substantially all of the property and assets of KCS or a Guarantor, or

(C) effects any general assignment for the benefit of creditors;

(6) any Note Guarantee of such series ceases to be in full force and effect (except as contemplated by the terms of the applicable Indenture) or any Guarantor or Person acting on behalf of such Guarantor

denies or disaffirms such Guarantor's obligations under such Indenture or any such Note Guarantee and such default continues for a period of 10 days after written notice by the trustee or the holders of 25% or more in aggregate principal amount of the Notes of such series; and

(7) (A) the Concession Title shall cease to grant to KCSM the rights provided therein as of the Closing Date and such cessation has had a material adverse effect on KCS and its Subsidiaries taken as a whole,

(B) (x) the Concession Title shall for any reason be terminated and not reinstated within 30 days or (y) rights provided therein which were originally exclusive to KCSM shall become nonexclusive and the cessation of such exclusivity has had a material adverse effect on KCS and its Subsidiaries taken as a whole, or

(C) the operations of the Northeast Rail Lines shall be commandeered or repossessed (*a requisa*) for a period of 90 days or more.

If an Event of Default described above shall have occurred and is continuing with respect to a series of Notes, either the trustee or the holders of at least 25% in aggregate principal amount of the Notes of such series then outstanding may declare all outstanding Notes of such series to be due and payable immediately. The holders of a majority in aggregate principal amount of a series of Notes then outstanding may, by notice to the trustee, on behalf of the holders of all of Notes of such series, rescind an acceleration or waive any existing Default or Event of Default and its consequences under the applicable Indenture, except a continuing Default or Event of Default in the payment of interest or premium, if any, on, or the principal of, such Notes. For information as to the waiver of Defaults, see "—Amendment, Supplement and Waiver."

The holders of a majority in aggregate principal amount of a series of Notes then outstanding may direct the time, method and place of conducting any proceeding for any remedy available to the trustee or exercising any trust or power conferred on the trustee with respect to such series of Notes. However, the trustee may refuse to follow any direction that conflicts with law or the applicable Indenture, that may involve the trustee in personal liability, or that the trustee determines in good faith may be unduly prejudicial to the rights of holders of Notes of such series not joining in the giving of such direction and may take any other action it deems proper that is not inconsistent with any such direction received from holders of Notes of such series. A holder may not pursue any remedy with respect to an Indenture or the Notes of a series unless:

- the holder gives the trustee written notice of a continuing Event of Default;
- the holders of at least 25% in aggregate principal amount of outstanding Notes of such series make a written request to the trustee to pursue the remedy;
- such holder or holders offer the trustee indemnity satisfactory to the trustee against any costs, liability or expense;
- the trustee does not comply with the request within 60 days after receipt of the request and the offer of indemnity; and
- during such 60-day period, the holders of a majority in aggregate principal amount of the outstanding Notes of such series do not give the trustee a direction that is inconsistent with the request.

However, such limitations do not apply to the right of any holder of Notes of such series to receive payment of the principal of, premium, if any, or interest on, such Notes or to bring suit for the enforcement of any such payment, on or after the due date expressed in such Notes, which right shall not be impaired or affected without the consent of the holder.

The Indenture requires certain of the KCS's officers to certify, on or before a date not more than 90 days after the end of each fiscal year, that a review has been conducted of KCS's activities and those of the Guarantors and of KCS's and the Guarantors' performance under the Indenture and that, to the best of such person's

knowledge, KCS and the Guarantors have fulfilled all obligations thereunder, or, if there has been a Default in the fulfillment of any such obligation, specifying each such Default and the nature and status thereof. KCS is also obligated to notify the trustee of any Default or Defaults in the performance of any covenants or agreements under the Indenture.

Legal Defeasance and Covenant Defeasance

KCS may at any time, at the option of its Board of Directors evidenced by a resolution set forth in an officers' certificate, elect to have all of its obligations with respect to the outstanding Notes of a series and all obligations of the Guarantors with respect to the Note Guarantees thereof discharged ("Legal Defeasance") except for:

(1) the rights of holders of outstanding Notes of such series to receive payments in respect of the principal of, or interest, or premium, if any, on, such Notes when such payments are due from the trust referred to below;

(2) KCS's obligations with respect to such Notes concerning issuing temporary Notes, registration of Notes, mutilated, destroyed, lost or stolen Notes and the maintenance of an office or agency for payment and money for security payments held in trust;

(3) the rights, powers, trusts, duties and immunities of the trustee, and the obligations of KCS and the Guarantors in connection therewith; and

(4) the Legal Defeasance and Covenant Defeasance provisions of the Indenture.

In addition, KCS may, at its option and at any time, elect to have the obligations of KCS and the Guarantors with respect to a series of Notes released with respect to certain covenants that are described in the Indenture ("Covenant Defeasance") and thereafter any omission to comply with those covenants will not constitute a Default or Event of Default with respect to such Notes. In the event Covenant Defeasance occurs, certain events (not including non-payment, bankruptcy, receivership, rehabilitation and insolvency events) described under "—Events of Default" will no longer constitute an Event of Default with respect to such Notes.

In order to exercise either Legal Defeasance or Covenant Defeasance:

(1) KCS must irrevocably deposit with the trustee, in trust, for the benefit of the holders of the Notes of such series, cash in U.S. dollars, non-callable Government Securities, or a combination of cash in U.S. dollars and non-callable Government Securities, in amounts as will be sufficient, in the opinion of a nationally recognized investment bank, appraisal firm or firm of independent public accountants, to pay the principal of, or interest, and premium, if any, on, the outstanding Notes of such series on the Stated Maturity thereof or on the applicable redemption date, as the case may be, and KCS must specify whether such Notes are being defeased to such Stated Maturity or to a particular redemption date;

(2) in the case of Legal Defeasance, KCS must deliver to the trustee an opinion of counsel (or opinions of counsel) confirming that (x) KCS has received from, or there has been published by, the Internal Revenue Service a ruling or (y) since the date of the Indenture, there has been a change in the applicable U.S. federal income tax law, in either case to the effect that, and based thereon such opinion of counsel will confirm that, the holders of the outstanding Notes of such series will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such Legal Defeasance and will be subject to federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Legal Defeasance had not occurred;

(3) in the case of Covenant Defeasance, KCS must deliver to the trustee an opinion of counsel (or opinions of counsel) confirming that the holders of the outstanding Notes of such series will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such Covenant Defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Covenant Defeasance had not occurred;

(4) no Default or Event of Default with respect to such Notes has occurred and is continuing on the date of such deposit (other than a Default or Event of Default resulting from the borrowing of funds to be applied to such deposit or liens securing such borrowing) and the deposit will not result in a breach or violation of, or constitute a Default under, any other instrument to which KCS is a party or by which KCS is bound;

(5) such Legal Defeasance or Covenant Defeasance will not result in a breach or violation of, or constitute a Default under, any material agreement or instrument (other than the Indenture) to which KCS or any of its Subsidiaries is a party or by which KCS or any of its Subsidiaries is bound;

(6) KCS must deliver to the trustee an officers' certificate stating that the deposit was not made by KCS with the intent of preferring the holders of Notes of such series over the other creditors of KCS with the intent of defeating, hindering, delaying or defrauding any creditors of KCS or others; and

(7) KCS must deliver to the trustee an officers' certificate and an opinion of counsel, each stating that all conditions precedent relating to the Legal Defeasance or the Covenant Defeasance have been complied with.

Satisfaction and Discharge

The Indenture will be discharged and will cease to be of further effect as to all Notes of a series issued thereunder when:

(1) either:

(A) all Notes that have been authenticated thereunder, except lost, stolen or destroyed Notes that have been replaced or paid and Notes for whose payment money has been deposited in trust and thereafter repaid to KCS, have been delivered to the trustee for cancellation; or

(B) all Notes issued thereunder that have not been delivered to the trustee for cancellation have become due and payable by reason of the mailing of a notice of redemption or otherwise or will become due and payable within one year and KCS has irrevocably deposited or caused to be deposited with the trustee as trust funds in trust solely for the benefit of the holders of such Notes, cash in U.S. dollars, non-callable Government Securities, or a combination of cash in U.S. dollars and non-callable Government Securities, in amounts as will be sufficient, without consideration of any reinvestment of interest, to pay and discharge the entire indebtedness on such Notes not delivered to the trustee for cancellation for principal, premium, if any, and accrued interest to the Stated Maturity or redemption, as the case may be;

(2) no Default or Event of Default has occurred and is continuing on the date of the deposit (other than a Default or Event of Default resulting from the borrowing of funds to be applied to such deposit or liens securing such borrowing) and the deposit will not result in a breach or violation of, or constitute a default under, any other instrument to which KCS is a party or by which KCS is bound;

(3) KCS has paid or caused to be paid all sums payable by it under the Indenture with respect to such Notes; and

(4) KCS has delivered irrevocable instructions to the trustee under the Indenture with respect to such Notes to apply the deposited money toward the payment of such Notes issued thereunder at Stated Maturity or on the redemption date, as the case may be.

In addition, KCS must deliver an officers' certificate and an opinion of counsel to the trustee stating that all conditions precedent to satisfaction and discharge have been satisfied.

Amendment, Supplement and Waiver

Except as provided in the next two succeeding paragraphs, the Indenture, the Notes of a series and the Note Guarantees thereof may be amended or supplemented with the consent of the holders of a majority in aggregate

principal amount of Notes of such series then outstanding (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, such Notes), and any existing Default or Event of Default or compliance with any provision of the Indenture, the Notes of a series or Note Guarantee thereof may be waived with the consent of the holders of a majority in aggregate principal amount of then outstanding Notes of such series (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, such Notes).

Without the consent of each holder of Notes affected, an amendment, supplement or waiver may not:

- change the Stated Maturity of the principal of, or any installment of interest on, any Note;
- reduce the principal amount of, or premium, if any, or interest on, any Note;
- change the place or currency of payment of principal of, or premium, if any, or interest on, any Note;
- impair the right to institute suit for the enforcement of any payment on or with respect to any Note;
- reduce the percentage or principal amount of outstanding Notes, the consent of whose holders is necessary to modify or amend the applicable Indenture or waive compliance with certain provisions of the applicable Indenture or waive certain Defaults;
- waive a Default in the payment of principal of, premium, if any, or interest on, the Notes; or
- release any Guarantor from any of its obligations under its Note Guarantee or the applicable Indenture, except as set forth under the caption "—Note Guarantees."

Notwithstanding the preceding, without the consent of any holder of Notes, KCS, the Guarantors and the trustee may amend or supplement an Indenture, the Notes and the Note Guarantees:

- to cure any ambiguity, omission, mistake, defect or inconsistency;
- to provide for uncertificated Notes in addition to or in place of certificated Notes;
- to provide for the assumption of the obligations of KCS or a Guarantor to holders of the Notes and the Note Guarantees in the case of a merger or consolidation or a sale, assignment, transfer, conveyance, lease or other disposition of all or substantially all of the assets of KCS or such Guarantor, as applicable, in accordance with the terms of the Indenture;
- to make any change that would provide any additional rights or benefits to the holders of any Notes or that does not adversely affect the legal rights under the Indenture of any such holder;
- to comply with requirements of the SEC in order to effect or maintain the qualification of an Indenture under the Trust Indenture Act;
- to conform the text of an Indenture, the Note Guarantees and the Notes to any provision of the Description of KCS Notes section of the Confidential Offering Memorandum and Consent Solicitation Statement dated November 9, 2015, to the extent that such provision in such Description of KCS Notes was intended to be a verbatim recitation of a provision thereof;
- to add a Guarantor or release any Guarantor from its Note Guarantee if such release is in accordance with the terms of an Indenture; or
- to provide for the issuance of Additional Notes in accordance with the limitations set forth in the applicable Indenture.

No Personal Liability of Incorporators, Stockholders, Officers, Directors, or Employees

Each Indenture provides that no recourse for the payment of the principal of, premium, if any, or interest on any of the Notes issued thereunder or for any claim based thereon or otherwise in respect thereof, and no recourse under or upon any obligation, covenant or agreement of KCS or any Guarantor in the Indenture, or in

any of the Notes or the Note Guarantees or because of the creation of any indebtedness represented thereby, shall be had against any incorporator, stockholder, officer, director, employee or controlling person of KCS, any Guarantor or of any successor Person thereof. Each holder, by accepting the Notes, waives and releases all such liability.

Notices

All notices shall be deemed to have been given upon the mailing by first class mail, postage prepaid, of such notices to holders at their registered addresses as recorded in the applicable Notes register, not later than the latest date, and not earlier than the earliest date, prescribed in the Indenture for the giving of such notice.

Neither the failure to give any notice to a particular holder, nor any defect in a notice given to a particular holder, will affect the sufficiency of any notice given to another holder.

Book-entry and other indirect holders should consult their banks or brokers for information on how they will receive notices.

Governing Law

The Notes, the Note Guarantees and the Indenture are governed by the laws of the State of New York.

Form and Denomination

Initially, each series of Exchange Notes will be represented by one or more registered notes in global form without interest coupons (collectively, the "Global Securities"). The Global Securities will be issued in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof. The Global Securities will be deposited with the trustee as custodian for DTC and registered in the name of a nominee of DTC for credit to the respective accounts of the purchaser at DTC.

Except in the limited circumstances described below under "—Certificated Notes," owners of beneficial interests in the Global Securities will not be entitled to receive physical delivery of Certificated Notes (as defined below). The Exchange Notes are not issuable in bearer form. The Global Securities may be transferred, in whole or in part, only to another nominee of DTC.

The Global Securities

Ownership of beneficial interests in a Global Security will be limited to persons who have accounts with DTC ("participants") or persons who hold interests through participants. Ownership of beneficial interests in a Global Security will be shown on, and the transfer of that ownership will be effected only through, records maintained by DTC or its nominee (with respect to interests of participants) and the records of participants (with respect to interests of persons other than participants). Investors may hold their interests in the Global Securities directly through DTC if they are participants in such system, or indirectly through organizations that are participants in such system.

So long as DTC, or its nominee, is the registered owner or holder of the Global Securities, DTC or such nominee, as the case may be, will be considered the sole owner or holder of the Notes represented by the Global Securities for all purposes under the Indenture and the Notes. No beneficial owner of an interest in a Global Security will be able to transfer that interest except in accordance with the applicable procedures of DTC, in addition to those provided for under the Indenture and, if applicable, those of Euroclear and Clearstream Banking. Payments of the principal of, premium, if any, and interest on, the Global Securities will be made to DTC or its nominee, as the case may be, as the registered owner thereof. Neither KCS, the Guarantors, the trustee nor any paying agent will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in the Global Securities or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

KCS expects that DTC or its nominee, upon receipt of any payment of principal, premium, if any, or interest in respect of a Global Security, will credit participants' accounts with payments in amounts proportionate to their respective beneficial interests in the principal amount at maturity of such Global Security as shown on the records of DTC or its nominee. KCS also expects that payments by participants to owners of beneficial interests in a Global Security held through such participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers registered in the names of nominees for such customers. Such payments will be the responsibility of such participants.

Transfers between participants in DTC will be effected in the ordinary way in accordance with DTC rules and will be settled in same-day funds. Transfers between participants in Euroclear and Clearstream Banking will be effected in the ordinary way in accordance with their respective rules and operating procedures. KCS expects that DTC will take any action permitted to be taken by a holder of the Exchange Notes (including the presentation of Exchange Notes for exchange as described below) only at the direction of one or more participants to whose account the DTC interests in a Global Security is credited and only in respect of such portion of the aggregate principal amount at maturity of Exchange Notes as to which such participant or participants have given such direction. However, if there is an Event of Default, DTC will exchange the Global Securities for Certificated Notes, which it will distribute to its participants.

KCS understands that DTC is a limited purpose trust company organized under the laws of the State of New York, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the Uniform Commercial Code and a "Clearing Agency" registered pursuant to the provisions of Section 17A under the Exchange Act. DTC was created to hold securities for its participants and facilitate the clearance and settlement of securities transactions between participants through electronic book-entry changes in accounts of its participants, thereby eliminating the need for physical movement of certificates and certain other organizations. Indirect access to the DTC system is available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a participant, either directly or indirectly ("indirect participants").

Although DTC, Euroclear and Clearstream Banking are expected to follow the foregoing procedures in order to facilitate transfers of interests in the Global Securities among participants of DTC, Euroclear and Clearstream Banking, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued at any time. Neither KCS or the Guarantors nor the trustee will have any responsibility for the performance by DTC, Euroclear or Clearstream Banking or their respective participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

Certificated Notes

If DTC is at any time unwilling or unable to continue as a depositary for the Global Securities and a successor depositary is not appointed by KCS within 90 days, KCS will issue certificated notes ("Certificated Notes") in exchange for the Global Securities. Holders of an interest in the Global Securities may receive Certificated Notes in accordance with DTC's rules and procedures in addition to those provided for under the Indenture.

Certain Definitions

Set forth below is a summary of certain of the defined terms used in the covenants and other provisions of the Indenture. Reference is made to the Indenture for the full definitions of all terms as well as any other capitalized term used herein for which no definition is provided.

"2016 Notes Interest Determination Date" means, for each 2016 Notes Interest Reset Date, the second London Business Day preceding such 2016 Notes Interest Reset Date.

"2016 Notes Interest Period" means the period beginning on, and including, a 2016 Notes Interest Payment Date and ending on, but not including, the following 2016 Notes Interest Payment Date.

"2016 Notes Interest Reset Date" means for each 2016 Notes Interest Period, other than the first 2016 Notes Interest Period, the first day of such 2016 Notes Interest Period.

"Below Investment Grade Ratings Event" means, on any day within the 60-day period (which period shall be extended so long as the rating of the applicable Notes is under publicly announced consideration for a possible downgrade by any of the Rating Agencies) after the earlier of (1) the occurrence of a Change of Control or (2) public notice by KCS of the occurrence of a Change of Control or KCS's intention to effect a Change of Control, the applicable Notes are rated below Investment Grade by two of the three Rating Agencies. Notwithstanding the foregoing, a Below Investment Grade Ratings Event otherwise arising by virtue of a particular reduction in rating shall not be deemed to have occurred in respect of a particular Change of Control (and thus shall not be deemed a Below Investment Grade Ratings Event for purposes of the definition of Change of Control Repurchase Event hereunder) if the Rating Agencies making the reduction in rating to which this definition would otherwise apply do not announce or publicly confirm or inform the trustee in writing at KCS's request that the reduction was the result, in whole or in part, of any event or circumstance comprised of or arising as a result of, or in respect of, the applicable Change of Control (whether or not the applicable Change of Control shall have occurred at the time of the ratings event).

"Business Day" means any calendar day that is not a Saturday, Sunday or legal holiday in New York, New York and on which banking institutions and trust companies are open for business in New York, New York.

"Business Day Convention" means if any 2016 Notes Interest Payment Date in respect of any Outstanding 2016 Note or any 2016 Exchange Note (other than the maturity date) is not a Business Day, then such 2016 Notes Interest Payment Date will be postponed to the next succeeding Business Day unless that Business Day is in the next succeeding calendar month, in which case the 2016 Notes Interest Payment Date will be the immediately preceding Business Day. If any such 2016 Notes Interest Payment Date (other than the maturity date) is postponed or brought forward as described above, the interest amount will be adjusted accordingly and the holder will be entitled to more or less interest, respectively. If the maturity date in respect of the Outstanding 2016 Note or the 2016 Exchange Notes or any date fixed for redemption of the Outstanding 2016 Note or the 2016 Exchange Notes is not a Business Day, the payment of principal and interest will not be made until the next following Business Day, and no further interest will be paid in respect of the delay in such payment.

"Capital Stock" means, with respect to any Person, any and all shares, interests, participations or other equivalents (however designated, whether voting or non-voting) in the equity of such Person, whether now outstanding or issued after the Closing Date.

"Change of Control" means the consummation of any transaction (including, without limitation, any merger or consolidation) the result of which is that any "person" or "group" (as those terms are used in Section 13(d)(3) of the Exchange Act), other than KCS and its Subsidiaries, becomes the beneficial owner (as defined in Rules 13d-3 and 13d-5 under the Exchange Act), directly or indirectly, of more than 50% of the combined voting power of the total Voting Stock of KCS or other Voting Stock into which KCS's Voting Stock is reclassified, consolidated, exchanged or changed, measured by voting power rather than number of shares.

"Change of Control Repurchase Event" means the occurrence of both a Change of Control and a Below Investment Grade Ratings Event.

"Closing Date" means the date on which the Outstanding Notes were originally issued under the Indenture.

"Comparable Treasury Issue" means the United States Treasury security selected by an Independent Investment Banker as having a maturity comparable to the remaining term (as measured from the date of

redemption) ("Remaining Life") of the Notes to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of the applicable Notes.

"Comparable Treasury Price" means, with respect to any redemption date, the average of the Reference Treasury Dealer Quotations for such redemption date.

"Concession Title" means KCSM's right for a period of 30 years to be the exclusive provider (subject to certain trackage rights) of freight transportation services over the Northeast Rail Lines and for an additional 20 years to be a non-exclusive provider of such services granted by the Mexican government pursuant to the Concession Title, subject in all cases to the terms and conditions of the Concession Title, as in effect on June 23, 1997.

"Consolidated Net Assets" means total assets after deducting therefrom all current liabilities as set forth on the most recent publicly filed balance sheet of KCS and its consolidated subsidiaries and computed in accordance with generally accepted accounting principles.

"Credit Agreement" means the Credit Agreement, dated as of the Closing Date, among KCS, the guarantors described therein, lenders thereunder and the other parties thereto, as amended or supplemented from time to time.

"Debt" means indebtedness for money borrowed or indebtedness evidenced by a bond, note, debenture or other evidence of indebtedness.

"Default" means any event that is, or after notice or passage of time or both would be, an Event of Default.

"Domestic Subsidiary" means a Subsidiary of KCS that was formed under the laws of the United States or any state of the United States or the District of Columbia.

"Existing KCSM Notes" means any Floating Rate Senior Notes due 2016, 2.35% Senior Notes due 2020 and 3.00% Senior Notes due 2023, each issued by KCSM.

"Fitch" means Fitch Ratings, Inc.

"Government Securities" means direct obligations of, obligations fully and unconditionally guaranteed by, or participation in pools consisting solely of (or repurchase transactions relating to) obligations of or obligations fully and unconditionally guaranteed by the United States of America for the payment of which guarantee or obligations the full faith and credit of the United States of America is pledged and which are not callable or redeemable at the option of KCS thereof.

"Guarantee" means any obligation, contingent or otherwise, of any Person directly or indirectly guaranteeing any Debt of any other Person. The term "Guarantee" used as a verb has a corresponding meaning.

"Guarantor" means each subsidiary of KCS that executes a Note Guarantee, and its successors and assigns, in each case, until the Note Guarantee of such Person has been released in accordance with the provisions of the Indenture.

"Independent Investment Banker" means one of the Reference Treasury Dealers appointed by KCS.

"Investment Grade" means a rating of Baa3 or better by Moody's (or its equivalent under any successor rating categories of Moody's), a rating of BBB- or better by S&P (or its equivalent under any successor rating categories of S&P), a rating of BBB- or better by Fitch (or its equivalent under any successor rating categories of Fitch) and the equivalent investment grade credit rating from any additional Rating Agency or Rating Agencies selected by KCS.

"KCSM" means Kansas City Southern de México, S.A. de C.V., a *sociedad anónima de capital variable* organized under the laws of the United Mexican States.

"London Business Day" means any day which is not a Saturday, Sunday, or a day on which commercial banking institutions are authorized or obligated by law, regulation or executive order to be closed in London.

"Moody's" means Moody's Investors Service, Inc.

"Northeast Rail Lines" means that portion of the Mexican railroad system that is the subject of the Concession Title.

"Note Guarantee" means each Guarantee of the obligations with respect to the Notes issued by a Person pursuant to the terms of the Indenture.

"Person" means any individual, corporation, partnership, limited liability company, joint venture, association, joint stock company, trust, unincorporated organization, government or agency or political subdivision thereof or any other entity.

"Rating Agency" means (1) each of Moody's, S&P and Fitch; and (2) if any of Moody's, S&P or Fitch ceases to rate the applicable Notes or fails to make a rating of the applicable Notes publicly available for reasons outside of KCS's control, a "nationally recognized statistical rating organization" within the meaning of Rule 15c3-1(c)(2)(vi)(F) under the Exchange Act, selected by KCS (as certified by a resolution of KCS's board of directors) as a replacement agency for Moody's, S&P or Fitch, or all of them, as the case may be, with respect to such Notes.

"Reference Treasury Dealer" means each of Citigroup Global Markets Inc., J.P. Morgan Securities LLC, Merrill Lynch, Pierce, Fenner & Smith Incorporated and Morgan Stanley & Co. LLC (or their respective affiliates that are primary Government Securities dealers) and their respective successors; *provided*, *however*, that if any Reference Treasury Dealer is not at the applicable time a primary Government Securities dealer (a "Primary Treasury Dealer"), KCS shall substitute therefor another Primary Treasury Dealer selected by it.

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue for the Notes (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by such Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding such redemption date.

"S&P" means Standard & Poor's Ratings Services, a division of Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc.

"Secured Debt" means Debt secured by a lien, mortgage, pledge, charge, security interest or encumbrance of any kind on any property or assets.

"Significant Subsidiary" means, at any date of determination, any of KCS's Subsidiaries that, together with its Subsidiaries, (i) for KCS's most recent fiscal year, accounted for more than 10.0% of the consolidated revenues of KCS and its Subsidiaries or (ii) as of the end of such fiscal year, was the owner of more than 10.0% of the consolidated assets of KCS and its Subsidiaries, in each case as set forth on KCS's most recently available consolidated financial statements for such fiscal year.

"Stated Maturity" means, with respect to any installment of interest or principal on any series of indebtedness, the date on which the payment of interest or principal is scheduled to be paid in the documentation governing such indebtedness, and will not include any contingent obligations to repay, redeem or repurchase any such interest or principal prior to the date originally scheduled for the payment thereof.

"Subsidiary" means, with respect to any Person, any corporation, association or other business entity of which more than 50.0% of the voting power of the outstanding Voting Stock is owned, directly or indirectly, by such Person and one or more other Subsidiaries of such Person.

"Treasury Rate" means, on any redemption date, (i) the yield, under the heading which represents the average for the immediately preceding week, appearing in the most recently published statistical release designated "H.15(519)" or any successor publication which is published weekly by the Board of Governors of the Federal Reserve System and which establishes yields on actively traded United States Treasury securities adjusted to constant maturity under the caption "Treasury Constant Maturities," for the maturity corresponding to the applicable Comparable Treasury Issue (if no maturity is within three months before or after the Remaining Life, yields for the two published maturities most closely corresponding to such Comparable Treasury Issue shall be determined and the Treasury Rate shall be interpolated or extrapolated from such yields on a straight line basis, rounding to the nearest month) or (ii) if such release (or any successor release) is not published during the week preceding the calculation date or does not contain such yields, the rate per annum equal to the semiannual equivalent yield to maturity of the related Comparable Treasury Issue, calculated using a price for that Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such redemption date. The Treasury Rate shall be calculated on the third Business Day preceding the redemption date.

"Voting Stock" means, with respect to any Person, all classes of Capital Stock of such Person then outstanding and entitled (without regard to the occurrence of any contingency) to vote in the election of directors, managers or trustees thereof.

MATERIAL FEDERAL INCOME TAX CONSIDERATIONS

The exchange of Outstanding Notes for Exchange Notes in the Exchange Offers will not result in a taxable event for U.S. federal income tax purposes. Accordingly, you will not recognize any income, gain or loss as a result of exchanging your Outstanding Notes for Exchange Notes in the Exchange Offers. Your holding period for an Exchange Note will include the holding period of the Outstanding Note exchanged therefor, and your tax basis in the Exchange Note will be the same as your tax basis in the Outstanding Note immediately before the exchange.

Persons considering the exchange of Outstanding Notes for Exchange Notes should consult their own tax advisors concerning the United States federal income tax consequences in light of their particular situations as well as any consequences arising under the laws of any other taxing jurisdiction.

PLAN OF DISTRIBUTION

Each broker-dealer that receives Exchange Notes for its own account pursuant to the Exchange Offers must acknowledge that it will deliver a prospectus in connection with any resale of such Exchange Notes. This prospectus, as it may be amended or supplemented from time to time, may be used by a broker-dealer in connection with resales of Exchange Notes received in exchange for Outstanding Notes where such Outstanding Notes were acquired as a result of market-making activities or other trading activities. KCS has agreed that, starting on the Expiration Date and ending on the close of business 180 days after the Expiration Date, it will make this prospectus, as amended or supplemented, available to any broker-dealer for use in connection with any such resale.

KCS will not receive any proceeds from any sale of Exchange Notes by brokers-dealers. Exchange Notes received by broker-dealers for their own account pursuant to the Exchange Offers may be sold from time to time in one or more transactions in the over-the counter market, in negotiated transactions, through the writing of options on the Exchange Notes or a combination of such methods of resale, at market prices prevailing at the time of resale, at prices related to such prevailing market prices or negotiated prices. Any such resale may be made directly to purchasers or to or through brokers or dealers who may receive compensation in the form of commissions or concessions from any such broker-dealer and/or the purchasers of any such Exchange Notes. Any broker-dealer that resells Exchange Notes that were received by it for its own account pursuant to the Exchange Offers and any broker or dealer that participates in a distribution of such Exchange Notes may be deemed to be an “underwriter” within the meaning of the Securities Act and any profit of any such resale of Exchange Notes and any commissions or concessions received by any such persons may be deemed to be underwriting compensation under the Securities Act. The letter of transmittal states that by acknowledging that it will deliver and by delivering a prospectus, such broker-dealer will not be deemed to admit that it is an “underwriter” within the meaning of the Securities Act.

For a period of 180 days after the Expiration Date, KCS will promptly send additional copies of this prospectus and any amendment or supplement to this prospectus to any broker-dealer that requests such documents in the letter of transmittal. KCS has agreed to pay all expenses incident to the Exchange Offers (including the expenses of one counsel for such broker-dealers) other than commissions or concessions of any brokers or dealers and will indemnify the holders of the Outstanding Notes (including any broker-dealers) against certain liabilities, including liabilities under the Securities Act.

LEGAL MATTERS

The validity of the Exchange Notes and the Exchange Note Guarantees will be passed upon for us by White & Case LLP, New York, New York, as to New York law. The validity of the Exchange Notes and the Exchange Note Guarantees will be passed upon for us by Husch Blackwell LLP, Kansas City, Missouri, as to certain matters of Illinois and Missouri law.

EXPERTS

The consolidated financial statements of Kansas City Southern as of December 31, 2015 and 2014, and for each of the years in the three-year period ended December 31, 2015, and management's assessment of the effectiveness of internal control over financial reporting as of December 31, 2015 have been incorporated by reference herein and in the registration statement in reliance upon the reports of KPMG LLP, independent registered public accounting firm, incorporated by reference herein, and upon the authority of said firm as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We and the Exchange Note Guarantors have filed a registration statement on Form S-4 under the Securities Act with the SEC with respect to the Exchange Notes. This prospectus, which constitutes a part of the registration statement, does not contain all of the information set forth in the registration statement or the exhibits and schedules thereto. For further information about us and the Exchange Notes, reference is made to the registration statement and the exhibits and any schedules filed therewith and the documents incorporated by reference herein. Statements contained in this prospectus regarding the contents of any contract or any other document that is filed as an exhibit to the registration statement are not necessarily complete, and each such statement is qualified in all respects by reference to the full text of such contract or other document filed as an exhibit to the registration statement.

KCS files annual, quarterly and current reports, proxy and registration statements and other information with the SEC. You may read and copy any reports, statements, or other information that we file, including the registration statement, of which this prospectus forms a part, the exhibits and schedules filed with it, and the information incorporated by reference herein, without charge at the public reference room maintained by the SEC, located at 100 F Street, NE, Washington, D.C. 20549, and copies of all or any part of the registration statement may be obtained from the SEC on the payment of the fees prescribed by the SEC. Please call the SEC at 1-800-SEC-0330 for further information about the public reference room. The SEC also maintains an internet website that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC. The address of the website is www.sec.gov.

If for any reason we are not required to comply with the rules and regulations of the SEC we are still required under the indentures governing the Exchange Notes to furnish the holders of the Exchange Notes with the information, documents and other reports specified in Sections 13 and 15(d) of the Exchange Act to the extent provided in the indentures. See “Description of the Exchange Notes—Certain Covenants—Reports.” In addition, we have agreed that, for so long as any Notes remain outstanding, we will furnish to the holders of the Notes and to securities analysts and prospective investors, upon their request, the information required to be delivered by Rule 144A(d)(4) under the Securities Act.

Until , 2016, all dealers effecting transactions in the Exchange Notes, whether or not participating in the Exchange Offers, may be required to deliver a prospectus. This is in addition to the obligation of dealers to deliver a prospectus when selling Exchange Notes received in exchange for Outstanding Notes held for their own account.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 20. Indemnification of Directors and Officers.

Delaware Corporations

Delaware General Corporation Law. Section 145(a) of the Delaware General Corporation Law (the "DGCL") provides that a Delaware corporation may indemnify any persons who were, are or are threatened to be made, parties to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of such corporation), by reason of the fact that such person is or was an officer, director, employee or agent of such corporation, or is or was serving at the request of such corporation as a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding, provided such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the corporation's best interests and, with respect to any criminal action or proceeding, had no reasonable cause to believe that such person's conduct was illegal. Section 145(b) of the DGCL provides that a Delaware corporation may indemnify officers, directors, employees and agents in an action by or in the right of the corporation under the same conditions, except that no indemnification is permitted without judicial approval if the officer, director, employee or agent is adjudged to be liable to the corporation. Under Section 145(c) of the DGCL, where an officer, director, employee or agent is successful on the merits or otherwise in the defense of any action referred to above, the corporation must indemnify such person against the expenses (including attorney's fees) which he or she actually and reasonably incurred.

Section 145(g) of the DGCL provides that a corporation shall have the power to purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation against any liability asserted against such person in any such capacity, or arising out of such person's status as such, whether or not the corporation would have the power to indemnify such person against such liability under the provisions of the DGCL.

Kansas City Southern

Certificate of Incorporation and Bylaws. Article 16 of the restated certificate of incorporation of KCS provides that, to the fullest extent permitted by the DGCL, no director of KCS shall be liable to KCS or its stockholders for money damages for breach of fiduciary duty as a director.

Article X of the bylaws of KCS, as amended and restated (the "KCS Bylaws"), provides that each person who at any time is, or shall have been, a director, officer or employee of KCS, and is threatened to be or is made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he is, or was, a director, officer or employee of KCS, or served at the request of KCS as a director, officer, employee or trustee of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified against expense (including attorneys' fees), judgment, fines and amounts paid in settlement actually and reasonably incurred by him in connection with any such action, suit or proceeding to the full extent provided under Section 145 of the DGCL. Article X of the KCS Bylaws further provides that the right to indemnification conferred on directors and officers thereunder shall include the right to have KCS pay the expenses incurred in defending any such proceeding in advance of its final disposition; *provided, however*, that if the DGCL so requires, the payment of such expenses incurred shall be made only upon delivery to KCS of an undertaking by or on behalf of such director or officer to repay all amounts so advanced if it shall ultimately be determined by final judicial decision from which there is no further right to appeal that such director or officer is not entitled to be indemnified under the KCS Bylaws.

The Kansas City Northern Railway Company

Certificate of Incorporation and Bylaws. Article VIII of the certificate of incorporation of the Kansas City Northern Railway Company ("KCNRC") provides that directors and officers of KCNRC shall be indemnified to the maximum extent permitted by law. Article IX of the certificate of incorporation the KCNRC further provides that directors shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty, except to the extent such exception from liability or limitation thereof is not permitted under the DGCL.

Article VII of the amended and restated bylaws of KCNRC provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCNRC or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCNRC to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCNRC in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCNRC; *provided*, that in connection with a proceeding initiated by such person, KCNRC shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCNRC after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCNRC to recover the unpaid amount of the claim or the advancement of expenses.

Trans-Serve, Inc.

Certificate of Incorporation and Bylaws. Article Thirteen of the amended certificate of incorporation of Trans-Serve, Inc. ("TSI") provides that each person who at any time is, or shall have been, a director or officer of TSI, and who was or is a party, or is threatened to be made a party, to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was a director or officer of TSI, or served at the request of TSI as a director, officer, employee, trustee or agent of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified by TSI against all expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such officer or director in connection with any such action, suit or proceeding to the full extent permitted by Delaware law. Article Fourteen of the amended certificate of incorporation of TSI further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of TSI provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of TSI or the legal representative of any of the foregoing, shall be indemnified and held harmless by TSI to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by TSI in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by TSI; *provided*, that in connection with a proceeding initiated by such person, TSI shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by TSI after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against TSI to recover the unpaid amount of the claim or the advancement of expenses.

KCS Holdings I, Inc.

Certificate of Incorporation and Bylaws. Article Seven of the certificate of incorporation of KCS Holdings I, Inc. ("KCSH") provides that each person who was or is made a party or is threatened to be made a party to or is involved in any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of KCSH or is or was serving at the request of KCSH as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise shall be indemnified and held harmless by KCSH to the fullest extent authorized by the DGCL. Article Seven of the amended certificate of incorporation of KCSH further provides a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of KCSH provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCSH or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCSH to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCSH in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCSH; *provided*, that in connection with a proceeding initiated by such person, KCSH shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCSH after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCSH to recover the unpaid amount of the claim or the advancement of expenses.

KCS Ventures I, Inc.

Certificate of Incorporation and Bylaws. Article Seven of the certificate of incorporation of KCS Ventures I, Inc. ("KCSV") provides that each person who was or is made a party or is threatened to be made a party to or is involved in any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of KCSV or is or was serving at the request of KCSV as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise shall be indemnified and held harmless by KCSV to the fullest extent authorized by the DGCL. Article Seven of the amended certificate of incorporation of KCSV further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of KCSV provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCSV or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCSV to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCSV in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCSV; *provided*, that in connection with a proceeding initiated by

such person, KCSV shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCSV after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCSV to recover the unpaid amount of the claim or the advancement of expenses.

Southern Industrial Services, Inc.

Certificate of Incorporation and Bylaws. Article Eleven of the amended certificate of incorporation of Southern Industrial Services, Inc. ("SIS") provides that each person who at any time is, or shall have been, a director or officer of SIS, and who was or is a party, or is threatened to be made a party, to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was a director or officer of SIS, or served at the request of SIS as a director, officer, employee, trustee or agent of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified by SIS against all expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such officer or director in connection with any such action, suit or proceeding to the full extent permitted by Delaware law. Article Twelve of the amended certificate of incorporation of SIS further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of SIS provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of SIS or the legal representative of any of the foregoing, shall be indemnified and held harmless by SIS to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by SIS in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by SIS; *provided*, that in connection with a proceeding initiated by such person, SIS shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by SIS after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against SIS to recover the unpaid amount of the claim or the advancement of expenses.

Veals, Inc.

Bylaws. Article VII of the amended and restated bylaws of Veals, Inc. ("Veals") provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of Veals or the legal representative of any of the foregoing, shall be indemnified and held harmless by Veals to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by Veals in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by Veals; *provided*, that in connection with a proceeding initiated by such person, Veals shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by Veals after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against Veals to recover the unpaid amount of the claim or the advancement of expenses.

Pabtex, Inc.

Certificate of Incorporation and Bylaws. Article 9(a) of the certificate of incorporation of Pabtex, Inc. ("Pabtex") provides that a director of Pabtex shall not be personally liable to Pabtex or its stockholders for monetary damages for breach of fiduciary duty as a director, except for such liability as is expressly not subject to limitation under the DGCL. Article 9(b) of the certificate of incorporation of Pabtex further provides that Pabtex shall, to the fullest extent permitted by law, indemnify any and all officers and directors of Pabtex, and may, to the fullest extent permitted by law or to such lesser extent as is determined in the discretion of the board of directors, indemnify and advance expenses to any and all other persons whom it shall have power to indemnify, from and against all expenses, liabilities or other matters arising out of their status as such or their acts, omissions or services rendered in such capacities.

Article VII of the amended and restated bylaws of Pabtex provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of Pabtex or the legal representative of any of the foregoing, shall be indemnified and held harmless by Pabtex to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by Pabtex in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by Pabtex; *provided*, that in connection with a proceeding initiated by such person, Pabtex shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by Pabtex after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against Pabtex to recover the unpaid amount of the claim or the advancement of expenses.

Illinois Corporations

Illinois Business Corporation Act. Under Section 8.75(a) of the Illinois Business Corporation Act of 1983 ("ILBCA"), a corporation may indemnify any person who was or is a party, or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the corporation) by reason of the fact that he or she is or was a director, officer, employee or agent of the corporation, or who is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner he or she reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. Under Section 8.75(b) of the ILBCA, in actions brought by or in the right of the corporation, a corporation may indemnify such person against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner that he or she reasonably believed to be in or not opposed to the best interests of the corporation, *provided* that no indemnification may be made in respect of any claim, issue or matter as to which such person has been adjudged to be liable to the corporation, unless, and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability, but in view of all circumstances of the case, such person is fairly and reasonably entitled to indemnification for such expenses which the court shall deem proper. To the extent that such person has been successful on the merits or otherwise in defending any such action, suit or proceeding referred to above or any claim, issue or matter therein, he or she is entitled to indemnification for expenses (including attorneys' fees) actually and reasonably incurred by such person in connection therewith, if such person acted in good faith and in a manner that person reasonably believed to be in or not opposed to the best interests of the corporation under Section 8.75(c).

Under Section 8.75(g) of the ILBCA, a corporation may purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation, or who is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against any liability asserted against such person and incurred by such person in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify such person against such liability under the provisions Section 8.75 of the ILBCA.

Gateway Eastern Railway Company

Bylaws. Article VI of the amended and restated bylaws of Gateway Eastern Railway Company ("***Gateway***") provides that Gateway shall indemnify each director, officer, employee or agent who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of Gateway) by reason of the fact that he or she is or was a director, officer, employee or agent of Gateway, or is or was serving at the request of Gateway as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of Gateway, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of Gateway, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his or her conduct was unlawful. Gateway shall indemnify each director, officer, employee and agent who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of Gateway to procure a judgment in its favor by reason of the fact that such person is or was a director, officer, employee or agent of Gateway, or is or was serving at the request of Gateway as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of Gateway and except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his or her duty to Gateway unless and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite that adjudication of liability but in view of all the circumstances of the case, such director, officer, employee or agent is fairly and reasonably entitled to indemnity for such expenses which such court shall deem proper. Article VI of the amended and restated bylaws further provides that the determination of whether to indemnify such director, officer, employee or agent shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable but a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders. Expenses incurred in defending a civil or criminal action, suit or proceeding may be paid by Gateway in advance of the final disposition of such action, suit or proceeding, as authorized by the board of directors in the specific case, upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount. If Gateway has paid indemnity or has advanced expenses to a director, officer, employee or agent, Gateway shall report the indemnification or advance in writing to the shareholders with or before the notice of the next shareholders' meeting.

Missouri Corporations

General and Business Corporation Law of Missouri. Under Section 351.355(1) of the General and Business Corporation Law of Missouri (the "Missouri GBCL"), a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding,

whether civil, criminal, administrative or investigative, other than an action by or in the right of the corporation, by reason of the fact that he or she is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit, or proceeding if he or she acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit, or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his or her conduct was unlawful. Under Section 351.355(2) of the Missouri GBCL, in the case of an action or suit by or in the right of the corporation, no person shall be indemnified as to any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his or her duty to the corporation unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability and in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for expenses which the court shall deem proper. Under Section 351.355(3) of the Missouri GBCL, except as otherwise provided in the articles of incorporation or the bylaws, to the extent that a director, officer, employee or agent of the corporation has been successful on the merits or otherwise in defense of any action, suit, or proceeding referred to in subsections 1 and 2 of this section, or in defense of any claim, issue or matter therein, he or she shall be indemnified against expenses, including attorneys' fees, actually and reasonably incurred by him in connection with the action, suit, or proceeding.

Under Section 351.355(8) of the Missouri GBCL, a corporation may purchase and maintain insurance or another arrangement on behalf of any person who is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against any liability asserted against him or her and incurred by him or her in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify him against such liability under Section 351.355 of the Missouri GBCL.

The Kansas City Southern Railway Company

Certificate of Incorporation and Bylaws. Article Ten of the amended certificate of incorporation provides that KCSR shall indemnify directors and officers to the full extent permitted by Section 351.355 of the Missouri GBCL.

Article VII of the amended and restated bylaws of KCSR provide that KCSR shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of KCSR) by reason of the fact that he is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation partnership joint venture, trust or other enterprise, against expenses, losses, costs and damages (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of KCSR, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of KCSR, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his conduct was unlawful. KCSR shall indemnify and hold harmless any person

who was or is a party to or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of KCSR to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including attorneys' fees, and amounts paid in settlement actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of KCSR; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his duty to KCSR unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper.

Article VII of the amended and restated bylaws of KCSR provides that the determination whether to provide indemnification because the applicable standard of conduct set forth in the amended and restated bylaws of KCSR has been met shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders of KCSR, and in the case of an employee who is not a director or officer, such determination may be made by the general counsel of KCSR (or such officer serving in similar capacity). Article VII of the amended and restated bylaws of KCSR further provides that expenses may be paid by KCSR in advance of the final disposition of the action, suit or proceeding as authorized by the board of directors in the specific case upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount unless it shall ultimately be determined that he is entitled to be indemnified by KCSR. KCSR may provide such further indemnity to any person who is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, *provided* that no such indemnity shall indemnify any person from or on account of such person's conduct which was finally adjudged to have been knowingly fraudulent, deliberately dishonest, or willful misconduct. However, KCSR's indemnity shall be reduced by any amounts such person may collect as indemnification (i) under any policy of insurance purchased and maintained by KCSR, or (ii) from such other corporation, partnership, joint venture, trust or other enterprise, or from insurance purchased by any of them.

Southern Development Company

Bylaws. Article VII of the amended and restated bylaws of the Southern Development Company ("SDC") provides that SDC shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of SDC) by reason of the fact that he is or was a director, officer, employee or agent of SDC, or is or was serving at the request of SDC as a director, officer, employee or agent of another corporation partnership joint venture, trust or other enterprise, against expenses, losses, costs and damages (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of SDC, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of SDC, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his conduct was unlawful. SDC shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of SDC to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of SDC, or is or was serving at the

request of SDC as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including attorneys' fees, and amounts paid in settlement actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of SDC; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his duty to SDC unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper.

Article VII of the amended and restated bylaws of SDC provides that the determination whether to provide indemnification because the applicable standard of conduct set forth in the amended and restated bylaws of SDC has been met shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders of SDC, and in the case of an employee who is not a director or officer, such determination may be made by the general counsel of SDC (or such officer serving in similar capacity). Article VII of the amended and restated bylaws of SDC further provides that expenses may be paid by SDC in advance of the final disposition of the action, suit or proceeding as authorized by the board of directors in the specific case upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount unless it shall ultimately be determined that he is entitled to be indemnified by SDC. SDC may provide such further indemnity to any person who is or was a director, officer, employee or agent of SDC, or is or was serving at the request of SDC as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, *provided* that no such indemnity shall indemnify any person from or on account of such person's conduct which was finally adjudged to have been knowingly fraudulent, deliberately dishonest, or willful misconduct. However, SDC's indemnity shall be reduced by any amounts such person may collect as indemnification (i) under any policy of insurance purchased and maintained by SDC, or (ii) from such other corporation, partnership, joint venture, trust or other enterprise, or from insurance purchased by any of them.

24.1	Powers of Attorney (included on signature pages).
25.1*	Statement of Eligibility of Trustee on Form T-1.
99.1*	Form of Letter of Transmittal.

* Filed herewith.

Item 22. Undertakings.

Each undersigned registrant hereby undertakes:

1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

   (a) To include any prospectus required by section 10(a)(3) of the Securities Act of 1933;

   (b) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the "***Calculation of Registration Fee***" table in the effective registration statement;

   (c) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

4) That, for the purpose of determining liability under the Securities Act of 1933 to any purchaser, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness; *provided, however*, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

5) That, for the purpose of determining liability of the registrant under the Securities Act of 1933 to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

   (a) Any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;

   (b) Any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;

   (c) The portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and

   (d) Any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.

6) That, for purposes of determining any liability under the Securities Act of 1933, each filing of KCS's annual report pursuant to section 13(a) or section 15(d) of the Exchange Act (and, where applicable, each filing of an employee benefit plan's annual report pursuant to section 15(d) of the Exchange Act) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

7) The undersigned registrant hereby undertakes to deliver or cause to be delivered with the prospectus, to each person to whom the prospectus is sent or given, the latest annual report to security holders that is incorporated by reference in the prospectus and furnished pursuant to and meeting the requirements of Rule 14a-3 or Rule 14c-3 under the Exchange Act; and, where interim financial information required to be presented by Article 3 of Regulation S-X are not set forth in the prospectus, to deliver, or cause to be delivered to each person to whom the prospectus is sent or given, the latest quarterly report that is specifically incorporated by reference in the prospectus to provide such interim financial information.

8) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrants pursuant to the foregoing provisions, or otherwise, the registrants have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrants of expenses incurred or paid by a director, officer or controlling person of the registrants in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrants will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.

9) To respond to requests for information that is incorporated by reference into the prospectus pursuant to Items 4, 10(b), 11, or 13 of this Form, within one business day of receipt of such request, and to send the incorporated documents by first class mail or other equally prompt means. This includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request.

10) To supply by means of a post-effective amendment all information concerning a transaction, and the company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, as amended, the registrant has duly caused this Registration Statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Kansas City, State of Missouri, on May 17, 2016.

EXPLANATORY NOTE

This Amendment No. 1 to the Registration Statement on Form S-4 (File No. 333-211427) is being filed solely for the purpose of filing certain exhibits, as indicated on the exhibit index contained in Item 21 of Part II below. This Amendment No. 1 does not modify the prospectus that forms a part of the Registration Statement. Accordingly, a preliminary prospectus has been omitted.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 20. Indemnification of Directors and Officers.

Delaware Corporations

Delaware General Corporation Law. Section 145(a) of the Delaware General Corporation Law (the "DGCL") provides that a Delaware corporation may indemnify any persons who were, are or are threatened to be made, parties to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of such corporation), by reason of the fact that such person is or was an officer, director, employee or agent of such corporation, or is or was serving at the request of such corporation as a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding, provided such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the corporation's best interests and, with respect to any criminal action or proceeding, had no reasonable cause to believe that such person's conduct was illegal. Section 145(b) of the DGCL provides that a Delaware corporation may indemnify officers, directors, employees and agents in an action by or in the right of the corporation under the same conditions, except that no indemnification is permitted without judicial approval if the officer, director, employee or agent is adjudged to be liable to the corporation. Under Section 145(c) of the DGCL, where an officer, director, employee or agent is successful on the merits or otherwise in the defense of any action referred to above, the corporation must indemnify such person against the expenses (including attorney's fees) which he or she actually and reasonably incurred.

Section 145(g) of the DGCL provides that a corporation shall have the power to purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation against any liability asserted against such person in any such capacity, or arising out of such person's status as such, whether or not the corporation would have the power to indemnify such person against such liability under the provisions of the DGCL.

Kansas City Southern

Certificate of Incorporation and Bylaws. Article 16 of the restated certificate of incorporation of KCS provides that, to the fullest extent permitted by the DGCL, no director of KCS shall be liable to KCS or its stockholders for money damages for breach of fiduciary duty as a director.

Article X of the bylaws of KCS, as amended and restated (the "KCS Bylaws"), provides that each person who at any time is, or shall have been, a director, officer or employee of KCS, and is threatened to be or is made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he is, or was, a director, officer or employee of KCS, or served at the request of KCS as a director, officer, employee or trustee of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified against expense (including attorneys' fees), judgment, fines and amounts paid in settlement actually and reasonably incurred by him in connection with any such action, suit or proceeding to the full extent provided under Section 145 of the DGCL. Article X of the KCS Bylaws further provides that the right to indemnification conferred on directors and officers thereunder shall include the right to have KCS pay the expenses incurred in defending any such proceeding in advance of its final disposition; *provided, however*, that if the DGCL so requires, the payment of such expenses incurred shall be made only upon delivery to KCS of an undertaking by or on behalf of such director or officer to repay all amounts so advanced if it shall ultimately be determined by final judicial decision from which there is no further right to appeal that such director or officer is not entitled to be indemnified under the KCS Bylaws.

The Kansas City Northern Railway Company

Certificate of Incorporation and Bylaws. Article VIII of the certificate of incorporation of the Kansas City Northern Railway Company ("KCNRC") provides that directors and officers of KCNRC shall be indemnified to the maximum extent permitted by law. Article IX of the certificate of incorporation the KCNRC further provides that directors shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty, except to the extent such exception from liability or limitation thereof is not permitted under the DGCL.

Article VII of the amended and restated bylaws of KCNRC provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCNRC or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCNRC to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCNRC in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCNRC; *provided*, that in connection with a proceeding initiated by such person, KCNRC shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCNRC after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCNRC to recover the unpaid amount of the claim or the advancement of expenses.

Trans-Serve, Inc.

Certificate of Incorporation and Bylaws. Article Thirteen of the amended certificate of incorporation of Trans-Serve, Inc. ("TSI") provides that each person who at any time is, or shall have been, a director or officer of TSI, and who was or is a party, or is threatened to be made a party, to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was a director or officer of TSI, or served at the request of TSI as a director, officer, employee, trustee or agent of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified by TSI against all expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such officer or director in connection with any such action, suit or proceeding to the full extent permitted by Delaware law. Article Fourteen of the amended certificate of incorporation of TSI further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of TSI provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of TSI or the legal representative of any of the foregoing, shall be indemnified and held harmless by TSI to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by TSI in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by TSI; *provided*, that in connection with a proceeding initiated by such person, TSI shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by TSI after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against TSI to recover the unpaid amount of the claim or the advancement of expenses.

KCS Holdings I, Inc.

Certificate of Incorporation and Bylaws. Article Seven of the certificate of incorporation of KCS Holdings I, Inc. ("KCSH") provides that each person who was or is made a party or is threatened to be made a party to or is involved in any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of KCSH or is or was serving at the request of KCSH as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise shall be indemnified and held harmless by KCSH to the fullest extent authorized by the DGCL. Article Seven of the amended certificate of incorporation of KCSH further provides a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of KCSH provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCSH or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCSH to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCSH in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCSH; *provided*, that in connection with a proceeding initiated by such person, KCSH shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCSH after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCSH to recover the unpaid amount of the claim or the advancement of expenses.

KCS Ventures I, Inc.

Certificate of Incorporation and Bylaws. Article Seven of the certificate of incorporation of KCS Ventures I, Inc. ("KCSV") provides that each person who was or is made a party or is threatened to be made a party to or is involved in any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of KCSV or is or was serving at the request of KCSV as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise shall be indemnified and held harmless by KCSV to the fullest extent authorized by the DGCL. Article Seven of the amended certificate of incorporation of KCSV further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of KCSV provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCSV or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCSV to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCSV in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCSV; *provided*, that in connection with a proceeding initiated by

such person, KCSV shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCSV after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCSV to recover the unpaid amount of the claim or the advancement of expenses.

Southern Industrial Services, Inc.

Certificate of Incorporation and Bylaws. Article Eleven of the amended certificate of incorporation of Southern Industrial Services, Inc. ("SIS") provides that each person who at any time is, or shall have been, a director or officer of SIS, and who was or is a party, or is threatened to be made a party, to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was a director or officer of SIS, or served at the request of SIS as a director, officer, employee, trustee or agent of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified by SIS against all expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such officer or director in connection with any such action, suit or proceeding to the full extent permitted by Delaware law. Article Twelve of the amended certificate of incorporation of SIS further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of SIS provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of SIS or the legal representative of any of the foregoing, shall be indemnified and held harmless by SIS to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by SIS in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by SIS; *provided*, that in connection with a proceeding initiated by such person, SIS shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by SIS after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against SIS to recover the unpaid amount of the claim or the advancement of expenses.

Veals, Inc.

Bylaws. Article VII of the amended and restated bylaws of Veals, Inc. ("Veals") provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of Veals or the legal representative of any of the foregoing, shall be indemnified and held harmless by Veals to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by Veals in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by Veals; *provided*, that in connection with a proceeding initiated by such person, Veals shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by Veals after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against Veals to recover the unpaid amount of the claim or the advancement of expenses.

Pabtex, Inc.

Certificate of Incorporation and Bylaws. Article 9(a) of the certificate of incorporation of Pabtex, Inc. ("Pabtex") provides that a director of Pabtex shall not be personally liable to Pabtex or its stockholders for monetary damages for breach of fiduciary duty as a director, except for such liability as is expressly not subject to limitation under the DGCL. Article 9(b) of the certificate of incorporation of Pabtex further provides that Pabtex shall, to the fullest extent permitted by law, indemnify any and all officers and directors of Pabtex, and may, to the fullest extent permitted by law or to such lesser extent as is determined in the discretion of the board of directors, indemnify and advance expenses to any and all other persons whom it shall have power to indemnify, from and against all expenses, liabilities or other matters arising out of their status as such or their acts, omissions or services rendered in such capacities.

Article VII of the amended and restated bylaws of Pabtex provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of Pabtex or the legal representative of any of the foregoing, shall be indemnified and held harmless by Pabtex to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by Pabtex in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by Pabtex; *provided*, that in connection with a proceeding initiated by such person, Pabtex shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by Pabtex after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against Pabtex to recover the unpaid amount of the claim or the advancement of expenses.

Illinois Corporations

Illinois Business Corporation Act. Under Section 8.75(a) of the Illinois Business Corporation Act of 1983 ("ILBCA"), a corporation may indemnify any person who was or is a party, or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the corporation) by reason of the fact that he or she is or was a director, officer, employee or agent of the corporation, or who is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner he or she reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. Under Section 8.75(b) of the ILBCA, in actions brought by or in the right of the corporation, a corporation may indemnify such person against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner that he or she reasonably believed to be in or not opposed to the best interests of the corporation, *provided* that no indemnification may be made in respect of any claim, issue or matter as to which such person has been adjudged to be liable to the corporation, unless, and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability, but in view of all circumstances of the case, such person is fairly and reasonably entitled to indemnification for such expenses which the court shall deem proper. To the extent that such person has been successful on the merits or otherwise in defending any such action, suit or proceeding referred to above or any claim, issue or matter therein, he or she is entitled to indemnification for expenses (including attorneys' fees) actually and reasonably incurred by such person in connection therewith, if such person acted in good faith and in a manner that person reasonably believed to be in or not opposed to the best interests of the corporation under Section 8.75(c).

Under Section 8.75(g) of the ILBCA, a corporation may purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation, or who is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against any liability asserted against such person and incurred by such person in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify such person against such liability under the provisions Section 8.75 of the ILBCA.

Gateway Eastern Railway Company

Bylaws. Article VI of the amended and restated bylaws of Gateway Eastern Railway Company ("***Gateway***") provides that Gateway shall indemnify each director, officer, employee or agent who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of Gateway) by reason of the fact that he or she is or was a director, officer, employee or agent of Gateway, or is or was serving at the request of Gateway as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of Gateway, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of Gateway, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his or her conduct was unlawful. Gateway shall indemnify each director, officer, employee and agent who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of Gateway to procure a judgment in its favor by reason of the fact that such person is or was a director, officer, employee or agent of Gateway, or is or was serving at the request of Gateway as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of Gateway and except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his or her duty to Gateway unless and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite that adjudication of liability but in view of all the circumstances of the case, such director, officer, employee or agent is fairly and reasonably entitled to indemnity for such expenses which such court shall deem proper. Article VI of the amended and restated bylaws further provides that the determination of whether to indemnify such director, officer, employee or agent shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable but a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders. Expenses incurred in defending a civil or criminal action, suit or proceeding may be paid by Gateway in advance of the final disposition of such action, suit or proceeding, as authorized by the board of directors in the specific case, upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount. If Gateway has paid indemnity or has advanced expenses to a director, officer, employee or agent, Gateway shall report the indemnification or advance in writing to the shareholders with or before the notice of the next shareholders' meeting.

Missouri Corporations

General and Business Corporation Law of Missouri. Under Section 351.355(1) of the General and Business Corporation Law of Missouri (the "Missouri GBCL"), a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding,

whether civil, criminal, administrative or investigative, other than an action by or in the right of the corporation, by reason of the fact that he or she is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit, or proceeding if he or she acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit, or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his or her conduct was unlawful. Under Section 351.355(2) of the Missouri GBCL, in the case of an action or suit by or in the right of the corporation, no person shall be indemnified as to any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his or her duty to the corporation unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability and in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for expenses which the court shall deem proper. Under Section 351.355(3) of the Missouri GBCL, except as otherwise provided in the articles of incorporation or the bylaws, to the extent that a director, officer, employee or agent of the corporation has been successful on the merits or otherwise in defense of any action, suit, or proceeding referred to in subsections 1 and 2 of this section, or in defense of any claim, issue or matter therein, he or she shall be indemnified against expenses, including attorneys' fees, actually and reasonably incurred by him in connection with the action, suit, or proceeding.

Under Section 351.355(8) of the Missouri GBCL, a corporation may purchase and maintain insurance or another arrangement on behalf of any person who is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against any liability asserted against him or her and incurred by him or her in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify him against such liability under Section 351.355 of the Missouri GBCL.

The Kansas City Southern Railway Company

Certificate of Incorporation and Bylaws. Article Ten of the amended certificate of incorporation provides that KCSR shall indemnify directors and officers to the full extent permitted by Section 351.355 of the Missouri GBCL.

Article VII of the amended and restated bylaws of KCSR provide that KCSR shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of KCSR) by reason of the fact that he is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation partnership joint venture, trust or other enterprise, against expenses, losses, costs and damages (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of KCSR, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of KCSR, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his conduct was unlawful. KCSR shall indemnify and hold harmless any person

who was or is a party to or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of KCSR to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including attorneys' fees, and amounts paid in settlement actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of KCSR; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his duty to KCSR unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper.

Article VII of the amended and restated bylaws of KCSR provides that the determination whether to provide indemnification because the applicable standard of conduct set forth in the amended and restated bylaws of KCSR has been met shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders of KCSR, and in the case of an employee who is not a director or officer, such determination may be made by the general counsel of KCSR (or such officer serving in similar capacity). Article VII of the amended and restated bylaws of KCSR further provides that expenses may be paid by KCSR in advance of the final disposition of the action, suit or proceeding as authorized by the board of directors in the specific case upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount unless it shall ultimately be determined that he is entitled to be indemnified by KCSR. KCSR may provide such further indemnity to any person who is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, *provided* that no such indemnity shall indemnify any person from or on account of such person's conduct which was finally adjudged to have been knowingly fraudulent, deliberately dishonest, or willful misconduct. However, KCSR's indemnity shall be reduced by any amounts such person may collect as indemnification (i) under any policy of insurance purchased and maintained by KCSR, or (ii) from such other corporation, partnership, joint venture, trust or other enterprise, or from insurance purchased by any of them.

Southern Development Company

Bylaws. Article VII of the amended and restated bylaws of the Southern Development Company ("SDC") provides that SDC shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of SDC) by reason of the fact that he is or was a director, officer, employee or agent of SDC, or is or was serving at the request of SDC as a director, officer, employee or agent of another corporation partnership joint venture, trust or other enterprise, against expenses, losses, costs and damages (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of SDC, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of SDC, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his conduct was unlawful. SDC shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of SDC to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of SDC, or is or was serving at the

request of SDC as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including attorneys' fees, and amounts paid in settlement actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of SDC; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his duty to SDC unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper.

Article VII of the amended and restated bylaws of SDC provides that the determination whether to provide indemnification because the applicable standard of conduct set forth in the amended and restated bylaws of SDC has been met shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders of SDC, and in the case of an employee who is not a director or officer, such determination may be made by the general counsel of SDC (or such officer serving in similar capacity). Article VII of the amended and restated bylaws of SDC further provides that expenses may be paid by SDC in advance of the final disposition of the action, suit or proceeding as authorized by the board of directors in the specific case upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount unless it shall ultimately be determined that he is entitled to be indemnified by SDC. SDC may provide such further indemnity to any person who is or was a director, officer, employee or agent of SDC, or is or was serving at the request of SDC as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, *provided* that no such indemnity shall indemnify any person from or on account of such person's conduct which was finally adjudged to have been knowingly fraudulent, deliberately dishonest, or willful misconduct. However, SDC's indemnity shall be reduced by any amounts such person may collect as indemnification (i) under any policy of insurance purchased and maintained by SDC, or (ii) from such other corporation, partnership, joint venture, trust or other enterprise, or from insurance purchased by any of them.

Item 21. Exhibits and Financial Statement Schedules.

Exhibits

Item 22. Undertakings.

Each undersigned registrant hereby undertakes:

1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

   (a) To include any prospectus required by section 10(a)(3) of the Securities Act of 1933;

   (b) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the "***Calculation of Registration Fee***" table in the effective registration statement;

   (c) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

4) That, for the purpose of determining liability under the Securities Act of 1933 to any purchaser, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness; *provided, however*, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

5) That, for the purpose of determining liability of the registrant under the Securities Act of 1933 to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

   (a) Any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;

   (b) Any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;

   (c) The portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and

   (d) Any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.

6) That, for purposes of determining any liability under the Securities Act of 1933, each filing of KCS's annual report pursuant to section 13(a) or section 15(d) of the Exchange Act (and, where applicable, each filing of an employee benefit plan's annual report pursuant to section 15(d) of the Exchange Act) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

7) The undersigned registrant hereby undertakes to deliver or cause to be delivered with the prospectus, to each person to whom the prospectus is sent or given, the latest annual report to security holders that is incorporated by reference in the prospectus and furnished pursuant to and meeting the requirements of Rule 14a-3 or Rule 14c-3 under the Exchange Act; and, where interim financial information required to be presented by Article 3 of Regulation S-X are not set forth in the prospectus, to deliver, or cause to be delivered to each person to whom the prospectus is sent or given, the latest quarterly report that is specifically incorporated by reference in the prospectus to provide such interim financial information.

8) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrants pursuant to the foregoing provisions, or otherwise, the registrants have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrants of expenses incurred or paid by a director, officer or controlling person of the registrants in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrants will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.

9) To respond to requests for information that is incorporated by reference into the prospectus pursuant to Items 4, 10(b), 11, or 13 of this Form, within one business day of receipt of such request, and to send the incorporated documents by first class mail or other equally prompt means. This includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request.

10) To supply by means of a post-effective amendment all information concerning a transaction, and the company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, as amended, the registrant has duly caused this Amendment No. 1 to the Registration Statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Kansas City, State of Missouri, on June 17, 2016.

EXPLANATORY NOTE

This Amendment No. 2 to the Registration Statement on Form S-4 (File No. 333-211427) is being filed solely for the purpose of filing an exhibit, as indicated on the exhibit index contained in Item 21 of Part II below. This Amendment No. 2 does not modify the prospectus that forms a part of the Registration Statement. Accordingly, a preliminary prospectus has been omitted.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 20. Indemnification of Directors and Officers.

Delaware Corporations

Delaware General Corporation Law. Section 145(a) of the Delaware General Corporation Law (the "DGCL") provides that a Delaware corporation may indemnify any persons who were, are or are threatened to be made, parties to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of such corporation), by reason of the fact that such person is or was an officer, director, employee or agent of such corporation, or is or was serving at the request of such corporation as a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding, provided such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the corporation's best interests and, with respect to any criminal action or proceeding, had no reasonable cause to believe that such person's conduct was illegal. Section 145(b) of the DGCL provides that a Delaware corporation may indemnify officers, directors, employees and agents in an action by or in the right of the corporation under the same conditions, except that no indemnification is permitted without judicial approval if the officer, director, employee or agent is adjudged to be liable to the corporation. Under Section 145(c) of the DGCL, where an officer, director, employee or agent is successful on the merits or otherwise in the defense of any action referred to above, the corporation must indemnify such person against the expenses (including attorney's fees) which he or she actually and reasonably incurred.

Section 145(g) of the DGCL provides that a corporation shall have the power to purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation against any liability asserted against such person in any such capacity, or arising out of such person's status as such, whether or not the corporation would have the power to indemnify such person against such liability under the provisions of the DGCL.

Kansas City Southern

Certificate of Incorporation and Bylaws. Article 16 of the restated certificate of incorporation of KCS provides that, to the fullest extent permitted by the DGCL, no director of KCS shall be liable to KCS or its stockholders for money damages for breach of fiduciary duty as a director.

Article X of the bylaws of KCS, as amended and restated (the "KCS Bylaws"), provides that each person who at any time is, or shall have been, a director, officer or employee of KCS, and is threatened to be or is made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he is, or was, a director, officer or employee of KCS, or served at the request of KCS as a director, officer, employee or trustee of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified against expense (including attorneys' fees), judgment, fines and amounts paid in settlement actually and reasonably incurred by him in connection with any such action, suit or proceeding to the full extent provided under Section 145 of the DGCL. Article X of the KCS Bylaws further provides that the right to indemnification conferred on directors and officers thereunder shall include the right to have KCS pay the expenses incurred in defending any such proceeding in advance of its final disposition; *provided, however*, that if the DGCL so requires, the payment of such expenses incurred shall be made only upon delivery to KCS of an undertaking by or on behalf of such director or officer to repay all amounts so advanced if it shall ultimately be determined by final judicial decision from which there is no further right to appeal that such director or officer is not entitled to be indemnified under the KCS Bylaws.

The Kansas City Northern Railway Company

Certificate of Incorporation and Bylaws. Article VIII of the certificate of incorporation of the Kansas City Northern Railway Company ("KCNRC") provides that directors and officers of KCNRC shall be indemnified to the maximum extent permitted by law. Article IX of the certificate of incorporation the KCNRC further provides that directors shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty, except to the extent such exception from liability or limitation thereof is not permitted under the DGCL.

Article VII of the amended and restated bylaws of KCNRC provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCNRC or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCNRC to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCNRC in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCNRC; *provided*, that in connection with a proceeding initiated by such person, KCNRC shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCNRC after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCNRC to recover the unpaid amount of the claim or the advancement of expenses.

Trans-Serve, Inc.

Certificate of Incorporation and Bylaws. Article Thirteen of the amended certificate of incorporation of Trans-Serve, Inc. ("TSI") provides that each person who at any time is, or shall have been, a director or officer of TSI, and who was or is a party, or is threatened to be made a party, to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was a director or officer of TSI, or served at the request of TSI as a director, officer, employee, trustee or agent of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified by TSI against all expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such officer or director in connection with any such action, suit or proceeding to the full extent permitted by Delaware law. Article Fourteen of the amended certificate of incorporation of TSI further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of TSI provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of TSI or the legal representative of any of the foregoing, shall be indemnified and held harmless by TSI to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by TSI in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by TSI; *provided*, that in connection with a proceeding initiated by such person, TSI shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by TSI after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against TSI to recover the unpaid amount of the claim or the advancement of expenses.

KCS Holdings I, Inc.

Certificate of Incorporation and Bylaws. Article Seven of the certificate of incorporation of KCS Holdings I, Inc. ("KCSH") provides that each person who was or is made a party or is threatened to be made a party to or is involved in any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of KCSH or is or was serving at the request of KCSH as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise shall be indemnified and held harmless by KCSH to the fullest extent authorized by the DGCL. Article Seven of the amended certificate of incorporation of KCSH further provides a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of KCSH provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCSH or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCSH to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCSH in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCSH; *provided*, that in connection with a proceeding initiated by such person, KCSH shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCSH after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCSH to recover the unpaid amount of the claim or the advancement of expenses.

KCS Ventures I, Inc.

Certificate of Incorporation and Bylaws. Article Seven of the certificate of incorporation of KCS Ventures I, Inc. ("KCSV") provides that each person who was or is made a party or is threatened to be made a party to or is involved in any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of KCSV or is or was serving at the request of KCSV as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise shall be indemnified and held harmless by KCSV to the fullest extent authorized by the DGCL. Article Seven of the amended certificate of incorporation of KCSV further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of KCSV provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of KCSV or the legal representative of any of the foregoing, shall be indemnified and held harmless by KCSV to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by KCSV in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by KCSV; *provided*, that in connection with a proceeding initiated by

such person, KCSV shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by KCSV after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against KCSV to recover the unpaid amount of the claim or the advancement of expenses.

Southern Industrial Services, Inc.

Certificate of Incorporation and Bylaws. Article Eleven of the amended certificate of incorporation of Southern Industrial Services, Inc. ("SIS") provides that each person who at any time is, or shall have been, a director or officer of SIS, and who was or is a party, or is threatened to be made a party, to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that such person is or was a director or officer of SIS, or served at the request of SIS as a director, officer, employee, trustee or agent of another corporation, partnership, joint venture, trust or other enterprise, shall be indemnified by SIS against all expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such officer or director in connection with any such action, suit or proceeding to the full extent permitted by Delaware law. Article Twelve of the amended certificate of incorporation of SIS further provides that a director shall not be personally liable to the corporation or its stockholders for money damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the corporation or its stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law, (3) under Section 174 of the DGCL, or (4) for any transaction from which the director derived an improper personal benefit.

Article VII of the amended and restated bylaws of SIS provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of SIS or the legal representative of any of the foregoing, shall be indemnified and held harmless by SIS to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by SIS in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by SIS; *provided*, that in connection with a proceeding initiated by such person, SIS shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by SIS after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against SIS to recover the unpaid amount of the claim or the advancement of expenses.

Veals, Inc.

Bylaws. Article VII of the amended and restated bylaws of Veals, Inc. ("Veals") provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of Veals or the legal representative of any of the foregoing, shall be indemnified and held harmless by Veals to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by Veals in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by Veals; *provided*, that in connection with a proceeding initiated by such person, Veals shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by Veals after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against Veals to recover the unpaid amount of the claim or the advancement of expenses.

Pabtex, Inc.

Certificate of Incorporation and Bylaws. Article 9(a) of the certificate of incorporation of Pabtex, Inc. ("Pabtex") provides that a director of Pabtex shall not be personally liable to Pabtex or its stockholders for monetary damages for breach of fiduciary duty as a director, except for such liability as is expressly not subject to limitation under the DGCL. Article 9(b) of the certificate of incorporation of Pabtex further provides that Pabtex shall, to the fullest extent permitted by law, indemnify any and all officers and directors of Pabtex, and may, to the fullest extent permitted by law or to such lesser extent as is determined in the discretion of the board of directors, indemnify and advance expenses to any and all other persons whom it shall have power to indemnify, from and against all expenses, liabilities or other matters arising out of their status as such or their acts, omissions or services rendered in such capacities.

Article VII of the amended and restated bylaws of Pabtex provides that each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any proceeding because he or she is a person who is, was, or had agreed to become a director, officer, employee, agent or a delegate of Pabtex or the legal representative of any of the foregoing, shall be indemnified and held harmless by Pabtex to the fullest extent permitted under the DGCL. Article VII of the amended and restated bylaws further provides that expenses (including attorneys' fees) incurred shall be paid by Pabtex in advance of the final disposition of such proceeding upon receipt of an undertaking to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by Pabtex; *provided*, that in connection with a proceeding initiated by such person, Pabtex shall pay said expenses in advance of final disposition only if such proceeding was authorized by the board of directors. If a claim or advancement of expenses, as the case may be, are not promptly paid in full by Pabtex after a written claim or request, as applicable, has been received, the claimant may at any time thereafter bring suit against Pabtex to recover the unpaid amount of the claim or the advancement of expenses.

Illinois Corporations

Illinois Business Corporation Act. Under Section 8.75(a) of the Illinois Business Corporation Act of 1983 ("ILBCA"), a corporation may indemnify any person who was or is a party, or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the corporation) by reason of the fact that he or she is or was a director, officer, employee or agent of the corporation, or who is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner he or she reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. Under Section 8.75(b) of the ILBCA, in actions brought by or in the right of the corporation, a corporation may indemnify such person against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner that he or she reasonably believed to be in or not opposed to the best interests of the corporation, *provided* that no indemnification may be made in respect of any claim, issue or matter as to which such person has been adjudged to be liable to the corporation, unless, and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability, but in view of all circumstances of the case, such person is fairly and reasonably entitled to indemnification for such expenses which the court shall deem proper. To the extent that such person has been successful on the merits or otherwise in defending any such action, suit or proceeding referred to above or any claim, issue or matter therein, he or she is entitled to indemnification for expenses (including attorneys' fees) actually and reasonably incurred by such person in connection therewith, if such person acted in good faith and in a manner that person reasonably believed to be in or not opposed to the best interests of the corporation under Section 8.75(c).

Under Section 8.75(g) of the ILBCA, a corporation may purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation, or who is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against any liability asserted against such person and incurred by such person in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify such person against such liability under the provisions Section 8.75 of the ILBCA.

Gateway Eastern Railway Company

Bylaws. Article VI of the amended and restated bylaws of Gateway Eastern Railway Company ("***Gateway***") provides that Gateway shall indemnify each director, officer, employee or agent who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of Gateway) by reason of the fact that he or she is or was a director, officer, employee or agent of Gateway, or is or was serving at the request of Gateway as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of Gateway, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of Gateway, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his or her conduct was unlawful. Gateway shall indemnify each director, officer, employee and agent who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of Gateway to procure a judgment in its favor by reason of the fact that such person is or was a director, officer, employee or agent of Gateway, or is or was serving at the request of Gateway as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of Gateway and except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his or her duty to Gateway unless and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite that adjudication of liability but in view of all the circumstances of the case, such director, officer, employee or agent is fairly and reasonably entitled to indemnity for such expenses which such court shall deem proper. Article VI of the amended and restated bylaws further provides that the determination of whether to indemnify such director, officer, employee or agent shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable but a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders. Expenses incurred in defending a civil or criminal action, suit or proceeding may be paid by Gateway in advance of the final disposition of such action, suit or proceeding, as authorized by the board of directors in the specific case, upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount. If Gateway has paid indemnity or has advanced expenses to a director, officer, employee or agent, Gateway shall report the indemnification or advance in writing to the shareholders with or before the notice of the next shareholders' meeting.

Missouri Corporations

General and Business Corporation Law of Missouri. Under Section 351.355(1) of the General and Business Corporation Law of Missouri (the "Missouri GBCL"), a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding,

whether civil, criminal, administrative or investigative, other than an action by or in the right of the corporation, by reason of the fact that he or she is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit, or proceeding if he or she acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit, or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his or her conduct was unlawful. Under Section 351.355(2) of the Missouri GBCL, in the case of an action or suit by or in the right of the corporation, no person shall be indemnified as to any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his or her duty to the corporation unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability and in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for expenses which the court shall deem proper. Under Section 351.355(3) of the Missouri GBCL, except as otherwise provided in the articles of incorporation or the bylaws, to the extent that a director, officer, employee or agent of the corporation has been successful on the merits or otherwise in defense of any action, suit, or proceeding referred to in subsections 1 and 2 of this section, or in defense of any claim, issue or matter therein, he or she shall be indemnified against expenses, including attorneys' fees, actually and reasonably incurred by him in connection with the action, suit, or proceeding.

Under Section 351.355(8) of the Missouri GBCL, a corporation may purchase and maintain insurance or another arrangement on behalf of any person who is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against any liability asserted against him or her and incurred by him or her in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify him against such liability under Section 351.355 of the Missouri GBCL.

The Kansas City Southern Railway Company

Certificate of Incorporation and Bylaws. Article Ten of the amended certificate of incorporation provides that KCSR shall indemnify directors and officers to the full extent permitted by Section 351.355 of the Missouri GBCL.

Article VII of the amended and restated bylaws of KCSR provide that KCSR shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of KCSR) by reason of the fact that he is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation partnership joint venture, trust or other enterprise, against expenses, losses, costs and damages (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of KCSR, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of KCSR, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his conduct was unlawful. KCSR shall indemnify and hold harmless any person

who was or is a party to or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of KCSR to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including attorneys' fees, and amounts paid in settlement actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of KCSR; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his duty to KCSR unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper.

Article VII of the amended and restated bylaws of KCSR provides that the determination whether to provide indemnification because the applicable standard of conduct set forth in the amended and restated bylaws of KCSR has been met shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders of KCSR, and in the case of an employee who is not a director or officer, such determination may be made by the general counsel of KCSR (or such officer serving in similar capacity). Article VII of the amended and restated bylaws of KCSR further provides that expenses may be paid by KCSR in advance of the final disposition of the action, suit or proceeding as authorized by the board of directors in the specific case upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount unless it shall ultimately be determined that he is entitled to be indemnified by KCSR. KCSR may provide such further indemnity to any person who is or was a director, officer, employee or agent of KCSR, or is or was serving at the request of KCSR as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, *provided* that no such indemnity shall indemnify any person from or on account of such person's conduct which was finally adjudged to have been knowingly fraudulent, deliberately dishonest, or willful misconduct. However, KCSR's indemnity shall be reduced by any amounts such person may collect as indemnification (i) under any policy of insurance purchased and maintained by KCSR, or (ii) from such other corporation, partnership, joint venture, trust or other enterprise, or from insurance purchased by any of them.

Southern Development Company

Bylaws. Article VII of the amended and restated bylaws of the Southern Development Company ("SDC") provides that SDC shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of SDC) by reason of the fact that he is or was a director, officer, employee or agent of SDC, or is or was serving at the request of SDC as a director, officer, employee or agent of another corporation partnership joint venture, trust or other enterprise, against expenses, losses, costs and damages (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of SDC, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of SDC, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his conduct was unlawful. SDC shall indemnify and hold harmless any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of SDC to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of SDC, or is or was serving at the

request of SDC as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including attorneys' fees, and amounts paid in settlement actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of SDC; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his duty to SDC unless and only to the extent that the court in which the action or suit was brought determines upon application that, despite the adjudication of liability but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper.

Article VII of the amended and restated bylaws of SDC provides that the determination whether to provide indemnification because the applicable standard of conduct set forth in the amended and restated bylaws of SDC has been met shall be made (1) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (2) if such a quorum is not obtainable, or, even if obtainable a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (3) by the shareholders of SDC, and in the case of an employee who is not a director or officer, such determination may be made by the general counsel of SDC (or such officer serving in similar capacity). Article VII of the amended and restated bylaws of SDC further provides that expenses may be paid by SDC in advance of the final disposition of the action, suit or proceeding as authorized by the board of directors in the specific case upon receipt of an undertaking by or on behalf of the director, officer, employee or agent to repay such amount unless it shall ultimately be determined that he is entitled to be indemnified by SDC. SDC may provide such further indemnity to any person who is or was a director, officer, employee or agent of SDC, or is or was serving at the request of SDC as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, *provided* that no such indemnity shall indemnify any person from or on account of such person's conduct which was finally adjudged to have been knowingly fraudulent, deliberately dishonest, or willful misconduct. However, SDC's indemnity shall be reduced by any amounts such person may collect as indemnification (i) under any policy of insurance purchased and maintained by SDC, or (ii) from such other corporation, partnership, joint venture, trust or other enterprise, or from insurance purchased by any of them.

Item 21. Exhibits and Financial Statement Schedules.

Exhibits

Exhibit No.	Description
1.1	Underwriting Agreement, dated July 22, 2015, among The Kansas City Southern Railway Company ("***KCSR***"), the Note Guarantors and Citigroup Global Markets Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated ("***Merrill Lynch***") and Morgan Stanley & Co. LLC ("***Morgan Stanley***"), as representatives of the underwriters listed therein, filed as Exhibit 1.1 to the Company's Current Report on Form 8-K, filed on July 28, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 1.1.
1.2	Underwriting Agreement, dated May 11, 2016, among Kansas City Southern (the "***Company***"), the Note Guarantors and J.P. Morgan Securities LLC ("***JPM***"), Merrill Lynch and Morgan Stanley, as representatives of the underwriters listed therein, filed as Exhibit 1.1 to the Company's Current Report on Form 8-K, filed on May 17, 2016 (File No. 1-4717), is incorporated herein by reference as Exhibit 1.2.
3.1	Amended and Restated Certificate of Incorporation of the Company, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K, filed on May 7, 2012 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.1.
3.1.1	Amendments to the Kansas City Southern Amended and Restated Certificate of Incorporation, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K filed on May 5, 2014 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.1.1.

Exhibit No.	Description
3.2	Amended and Restated Bylaws of the Company, as amended and restated on May 6, 2016, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K, filed on May 10, 2016 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.2.
3.3	Amended Certificate of Incorporation of KCSR, filed as Exhibit 3.3 to the Company's Registration Statement on Form S-4 filed on April 21, 2014 (File No. 333-195413), is incorporated herein by reference as Exhibit 3.3.
3.4	Amended and Restated Bylaws of KCSR, as adopted on May 18, 2009, filed as Exhibit 3.4 to the Company's Registration Statement on Form S-4 filed on April 21, 2014 (File No. 333-195413), is incorporated herein by reference as Exhibit 3.4.
3.5	Articles of Incorporation of Gateway Eastern Railway Company, filed as Exhibit 3.5 to the Company's Registration Statement on Form S-4 filed on April 21, 2014 (File No. 333-195413), is incorporated herein by reference as Exhibit 3.5.
3.6	Amended and Restated Bylaws of Gateway Eastern Railway Company, as adopted on July 1, 2008, filed as Exhibit 3.6 to the Company's Registration Statement on Form S-4 filed on April 21, 2014 (File No. 333-195413), is incorporated herein by reference as Exhibit 3.6.
3.7	Certificate of Incorporation of The Kansas City Northern Railway Company, filed as Exhibit 3.7 to the Company's Registration Statement on Form S-4 filed on April 21, 2014 (File No. 333-195413), is incorporated herein by reference as Exhibit 3.7.

99.1**	Form of Letter of Transmittal.

* Filed herewith.
** Previously filed.

Item 22. Undertakings.

Each undersigned registrant hereby undertakes:

1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

   (a) To include any prospectus required by section 10(a)(3) of the Securities Act of 1933;

   (b) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the "***Calculation of Registration Fee***" table in the effective registration statement;

   (c) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

4) That, for the purpose of determining liability under the Securities Act of 1933 to any purchaser, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness; *provided, however*, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

5) That, for the purpose of determining liability of the registrant under the Securities Act of 1933 to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

   (a) Any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;

   (b) Any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;

   (c) The portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and

   (d) Any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.

6) That, for purposes of determining any liability under the Securities Act of 1933, each filing of KCS's annual report pursuant to section 13(a) or section 15(d) of the Exchange Act (and, where applicable, each filing of an employee benefit plan's annual report pursuant to section 15(d) of the Exchange Act) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

7) The undersigned registrant hereby undertakes to deliver or cause to be delivered with the prospectus, to each person to whom the prospectus is sent or given, the latest annual report to security holders that is incorporated by reference in the prospectus and furnished pursuant to and meeting the requirements of Rule 14a-3 or Rule 14c-3 under the Exchange Act; and, where interim financial information required to be presented by Article 3 of Regulation S-X are not set forth in the prospectus, to deliver, or cause to be delivered to each person to whom the prospectus is sent or given, the latest quarterly report that is specifically incorporated by reference in the prospectus to provide such interim financial information.

8) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrants pursuant to the foregoing provisions, or otherwise, the registrants have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrants of expenses incurred or paid by a director, officer or controlling person of the registrants in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrants will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.

9) To respond to requests for information that is incorporated by reference into the prospectus pursuant to Items 4, 10(b), 11, or 13 of this Form, within one business day of receipt of such request, and to send the incorporated documents by first class mail or other equally prompt means. This includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request.

10) To supply by means of a post-effective amendment all information concerning a transaction, and the company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, as amended, the registrant has duly caused this Amendment No. 2 to the Registration Statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Kansas City, State of Missouri, on June 27, 2016.

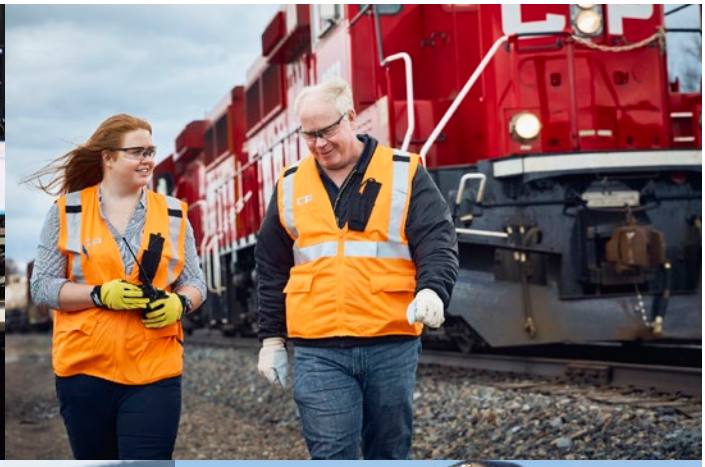
STATISTICAL HIGHLIGHTS[3]					
Revenue ton-miles ("RTMs") (millions)	135,952	142,540	154,207	154,378	151,891
Carloads (thousands)	2,525	2,634	2,740	2,766	2,708
Gross ton-miles ("GTMs") (millions)	242,694	252,195	275,362	280,724	272,360
Locomotive productivity (GTMs / operating horsepower)	204	201	198	202	207
Fuel efficiency (U.S. gallons of locomotive fuel consumed /1,000 GTMs)	0.980	0.980	0.953	0.955	0.942
Average train weight - excluding local traffic (tons)	8,614	8,806	9,100	9,129	9,707
Average train length - excluding local traffic (feet)	7,217	7,214	7,313	7,388	7,929
Average terminal dwell (hours)	6.7	6.6	6.8	6.4	6.5
Average train speed (miles per hour, or "mph")	23.5	22.6	21.5	22.2	22.0
Total employees (end of period)	11,693	12,215	12,840	12,694	11,890
Workforce (end of period)	11,738	12,294	12,866	12,732	11,904
SAFETY INDICATORS[3]					
FRA personal injuries per 200,000 employee-hours	1.67	1.65	1.47	1.42	1.11
FRA train accidents per million train-miles	1.12	0.99	1.10	1.06	0.96

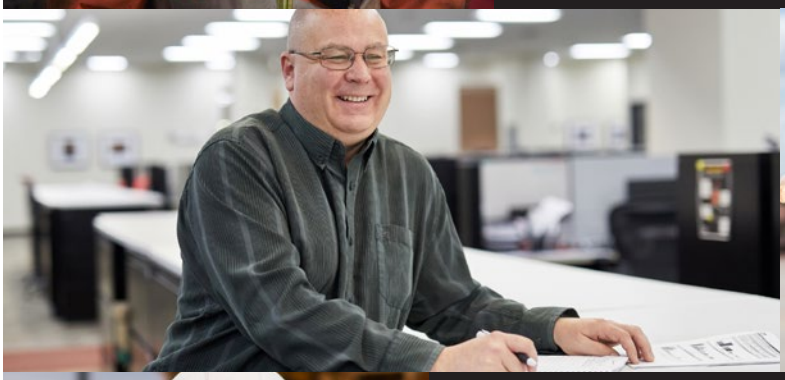


(1) These measures have no standardized meanings prescribed by accounting principles generally accepted in the United States of America ("GAAP") and, therefore, may not be comparable to similar measures presented by other companies. These measures are defined and reconciled in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K.

(2) These measures are defined in Item 6. Selected Financial Data in our Annual Report on Form 10-K.

(3) Certain statistical highlights and safety indicators have been updated to reflect new information or have been restated to conform with current presentation. The restatements of safety indicators reflect new information available within specified periods stipulated by the Federal Railroad Administration ("FRA") but that exceed the Company's financial reporting timeline.

One purpose.
One culture.
12,000 strong.



NOTE: Some photos were taken previous to COVID-19 mandated health and safety guidelines.

“It’s more than just a job.

“It’s not just what I do every day, it’s what I love to do.

“I’m honoured to be a part of this CP family.

“I’m very proud to be a railroader.

"Pride means to me doing the best you can all the time.

"I love this job.

CP PROUD

In a time of adversity, our CP family didn't just meet the needs of the North American economy. We became stronger.

In the past year, we made our railroad safer and more efficient, increased capacity, created service solutions and further developed our greatest asset – our people.

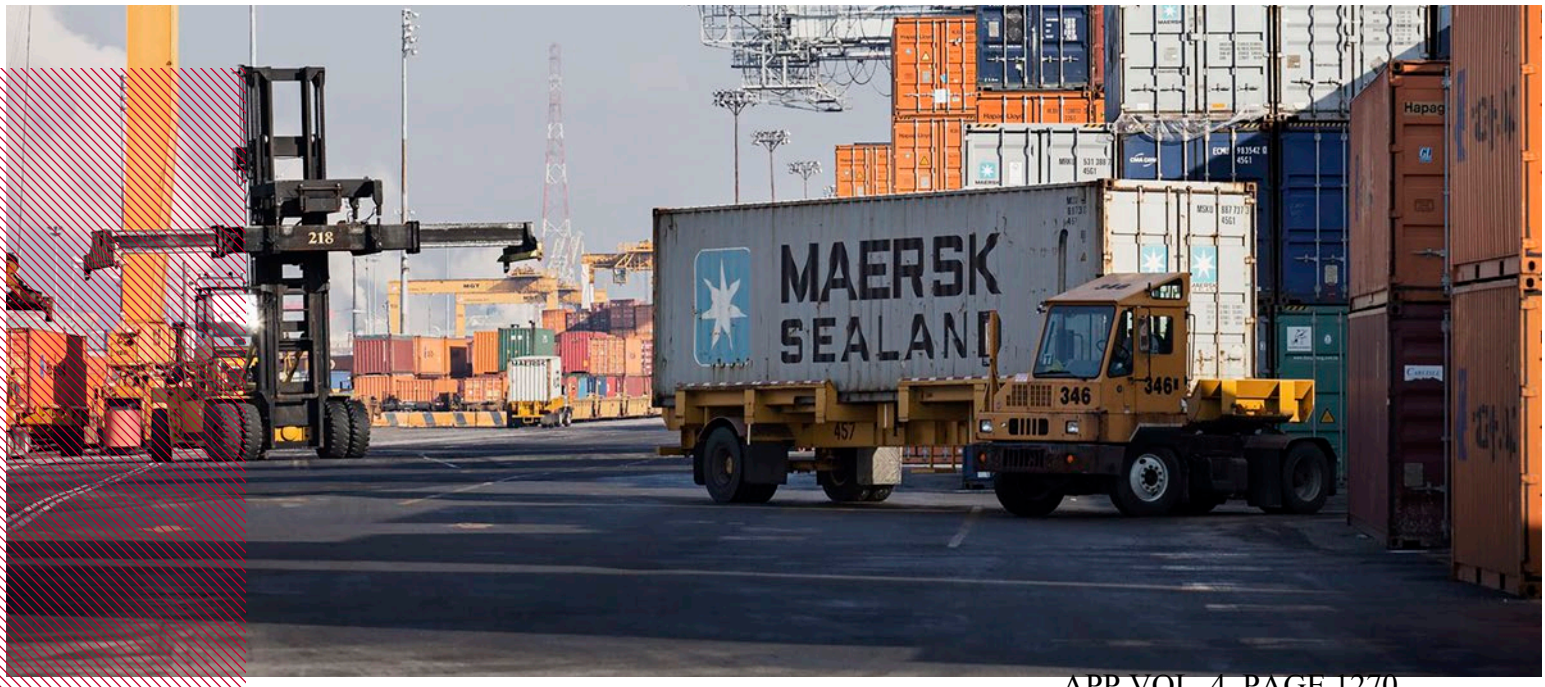
CP's performance in a challenging environment is the result of a family of railroaders united by a single purpose and culture. A 12,000-strong team executing our precision scheduled railroading (PSR) operating model. A culture focused on service, performance and the pursuit of continued excellence, rooted in the values of accountability, diversity and pride.

When the COVID-19 pandemic began, our CP family embraced our role as essential workers with pride and fortitude. We continued to work on the ground across the network, to support the supply chain and provide goods and services for North Americans when they needed them most. Our CP family served from locomotives, shops, yards, offices and home offices to deliver as promised.

This year is a testament to the strength of PSR and our people. That is why we moved ahead with training and leadership development throughout the crisis so that our railroaders can continue to grow, whether they lead people, lead by example or both.

CP's strong results demonstrate our team's skill and ability to deliver for customers and shareholders alike, in any environment.

We have only just started to unlock our true potential.



CREATING NEW CAPACITY AND SERVICE SOLUTIONS

Our growth strategy is both simple and compelling: leverage our land holdings and franchise strengths and convert them into new service offerings that are meaningful for our customers.

We want to create relationships that are mutually beneficial: our customers strengthen their market presence and we grow with them. We provide customers with a service offering that's unique to CP and creates customer loyalty. This drives profitable, sustainable growth.

This past year, CP and A.P. Moller-Maersk announced that we will build and operate a world-class transload and distribution facility together in Vancouver, expanding supply chain options for customers of both companies. CP's unique landholdings in Vancouver enable us to bring to market a transload facility that creates tremendous opportunity for sustainable growth. Together with Maersk, a global shipping leader, we will strengthen intermodal service in North America.

The opportunity matches CP's strategic land with a new customer looking to control their end-to-end supply chain, reduce third-party truck involvement and remove thousands of round trips from Vancouver roads. The new transload service will be an expansion of CP's existing Vancouver Intermodal Facility and will benefit from turnkey rail infrastructure. The import transload facility is planned to be operational in 2021.

RECORD GRAIN VOLUME

CP moved 31.32 million metric tonnes of Canadian grain and grain products in 2020, more than any prior calendar year in our history. This performance is a testament to the efficiency of CP's 8,500-foot High Efficiency Product train model, which more grain customers are converting to use, and strong collaboration with farmers and supply chain enablers.

NEW TRANSLOAD FACILITY

CP opened its new multi-commodity transload facility in Montréal. The new facility offers transloading services and supplementary intermodal transportation and distribution services from CP's Côte Saint-Luc yard, with 50 acres for future development to provide customers with access to new markets.

AUTOMOTIVE GEARING UP

We are growing with our customers and extending our reach in the automotive space, expanding auto compounds in Vancouver, Calgary and Cottage Grove, MN. Combined with a new auto compound in Chicago and a new NBSR compound in Saint John, we are well positioned to continue ramping up in this sector.

STRENGTHENING OUR NETWORK

Our strong position has allowed us to transform a significant portion of our network.

CP's purchase of the Central Maine & Quebec Railway (CMQ) and acquisition of the full ownership of the Detroit River Tunnel Partnership (DRTP) strengthens our eastern network and marks CP's return as a truly coast-to-coast railroad.

Together with increased efficiencies, extended sidings, surplus land and innovation, we continue to create new service offerings and highly desired capacity on our network.

CP has the most compelling value proposition for customers. We have the shortest and fastest routes in key lanes across Canada and the U.S. Our flagship transcontinental service provides the fastest and most consistent service between Eastern Canada, Calgary and Vancouver.

We leverage strategic relationships to extend our reach past the mainline. CP has connections with other railways; a network of more than 100 transload facilities across Canada and the U.S. to further our reach to markets not directly served by rail; and, links with ports on both the west and east coasts.

We are also bringing our customers closer to our network. Through ongoing input and insight from our Customer Advisory Council, we are leveraging innovative technology to create a more seamless customer experience. We are providing our customers with increased visibility to manage their inventory or fleet and improved access to information that integrates with their own business systems. CP is providing effective real-time communication that gives customers the information they need, when they need it. Our network strategy is straightforward: meet customer needs and keep the supply chain moving safely and efficiently.

Service excellence wins business. Capacity allows it to grow.

The opportunities created by our return to the Atlantic region are generational.

EASTERN REACH EXPANDED

In June 2020, CP completed the acquisition of the CMQ and its rail lines primarily in Québec and Maine, stretching approximately 481 miles. CP is now a 13,000-mile rail network connecting the Atlantic coast to the Pacific coast across six Canadian provinces and 11 U.S. states.

The opportunities created by our return to the Atlantic region are generational.

After a 25-year absence, CP and its customers now have seamless, safe and efficient access to deep-water, congestion-free Atlantic Ocean ports at Searsport, Maine, and Saint John, N.B., via Eastern Maine Railway Company and New Brunswick Southern Railway.

The Port of Saint John can move products in every line of our business, including containers, automotive and bulk commodities. The Port of Searsport provides materials handling in many areas, including bulk, break-bulk, heavy lift and liquid transfer.

This expansion of CP's network directly and efficiently connects Atlantic Canada to Montréal, Toronto and the U.S. Midwest. We also have access to 10 additional transload facilities that serve a variety of commodities. Importantly, we now have a lane that is approximately 200 miles shorter than the competition, getting CP customers from the East Coast into Montréal, Toronto and Chicago faster. That's just the starting point as we continuously work to do better.

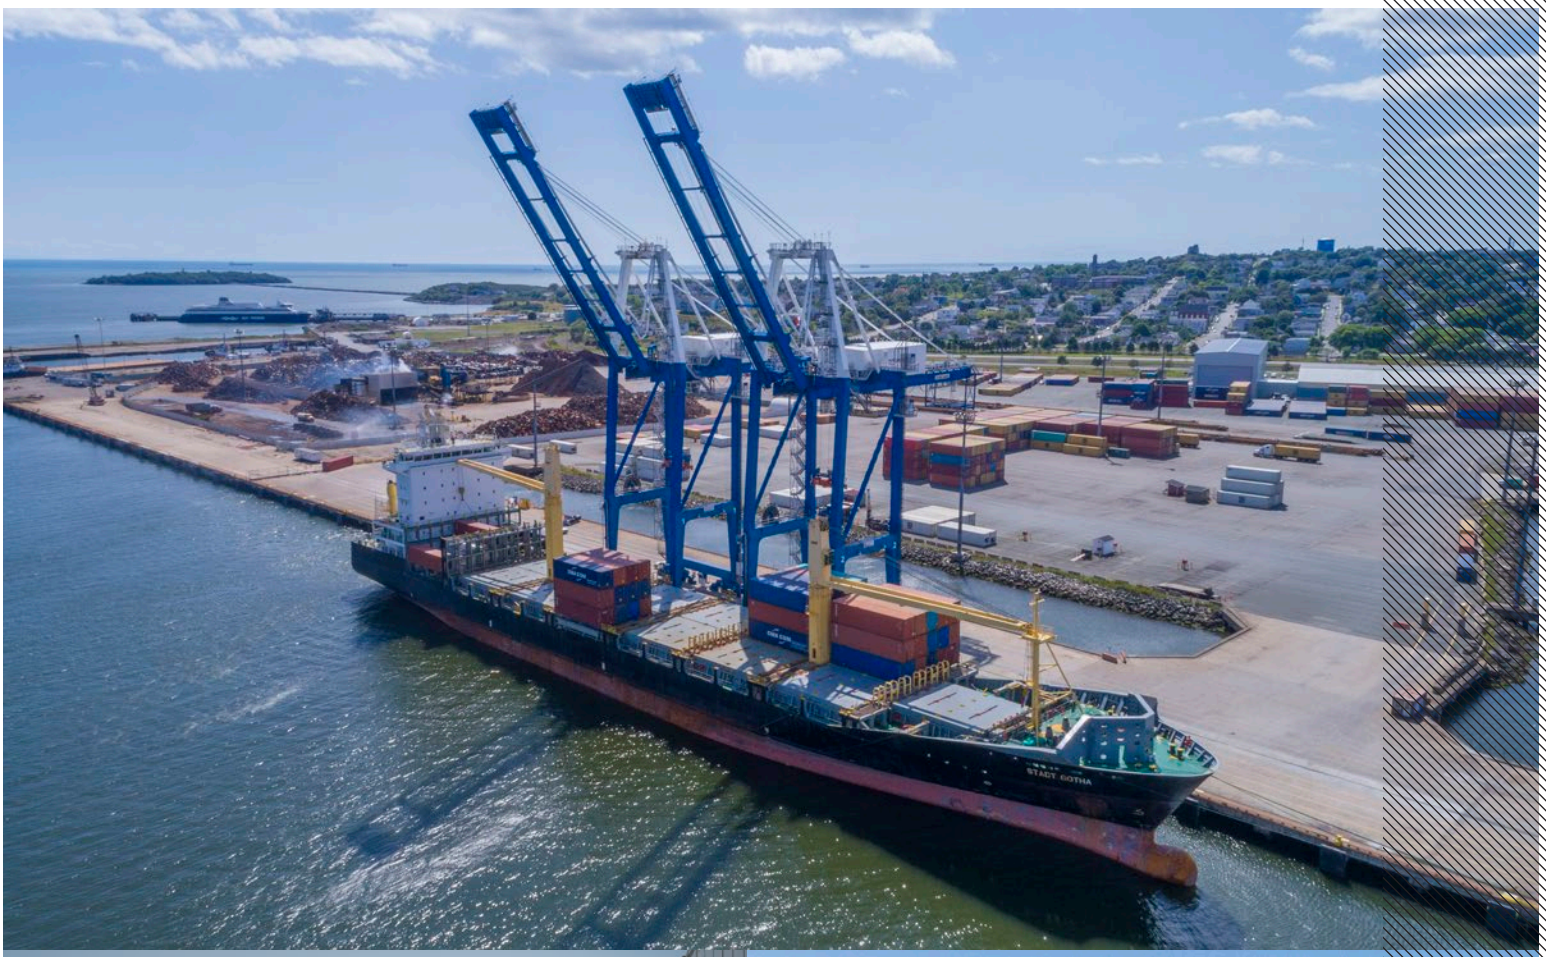
Our customers are aligned. After the successful calls to Port of Saint John in 2020, Hapag-Lloyd will begin regular service via CP to this key port starting in 2021.

CP has committed to investing up to $90 million over three years into the CMQ property to enhance safety and efficiency over the corridor.

Complementing that investment is the Port of Saint John's $205 million West Side Modernization project, which includes a new wharf, a terminal upgrade and a deeper shipping channel. These strategic investments, along with anticipated future investments, will make it possible for the Port of Saint John to increase capacity four-fold to 800,000 TEUs (20-foot-equivalent units) in the future.

With a world-class terminal operator in DP World and CP's investment in the CMQ, we are giving customers and shareholders exposure to a new world-class gateway in the years to come.

CONSOLIDATING A KEY CORRIDOR



To further strengthen our eastern network, CP moved from minority owner to acquiring full control of the DRTP. By taking 100 percent ownership of the 1.6-mile tunnel linking Windsor, Ont., and Detroit, MI, CP can better operate the asset to the benefit of our customers and the North American supply chain. The accretive acquisition immediately reduces CP's operating costs and increases margins related to movements through the tunnel. Control of this strategic asset, combined with our purchase of CMQ, will further integrate the eastern part of our network and give us leverage to move more traffic from Atlantic Canada through to the Midwest.

15th STRAIGHT YEAR
INDUSTRY LEADER IN SAFETY
0.96: FEDERAL RAILROAD ADMINISTRATION REPORTABLE TRAIN ACCIDENT FREQUENCY (PER MILLION TRAIN-MILES)

TRAIN INSPECTION PORTAL

Our high-speed camera-based train inspection system is capable of producing full body high-resolution images of trains at track speed.

BETTER, SAFER, MORE EFFICIENT

We innovate today for safer and more efficient rail operations tomorrow. We are focused on developing and implementing technology that provides practical solutions to enhance our best-in-class safety and efficiency.

Our technology enables us to optimize assets and proactively manage repairs across the network to minimize potentially costly failures and enhance network efficiency. Our technology innovations are aimed at reducing dwell, improving speed, running longer and heavier trains and ensuring that we continue to operate North America's safest railway. All of these innovations will help CP operate safely and control costs.

SAFETY THROUGH AUTOMATION

TRAIN INSPECTION PORTAL

Located on our Maple Creek subdivision, our high-speed camera-based train inspection system is capable of producing full body high-resolution images of trains at track speed. The system uses multiple algorithms to help identify defective car components and detects 87 percent more required repairs than visual inspections. CP's portal stands apart from other similar portals through the use of infrared imaging which better detects issues and reduces the likelihood for images to be distorted. The portal produces 72 high-resolution images per car. CP received a Transport Canada exemption for visual inspections for outbound loaded potash trains. When used in conjunction with the cold wheel brake test alternative, loaded potash trains do not require any manual or brake inspections and are free to depart, which reduces dwell by up to four hours for every train. In addition, undercarriage imaging inspects the underside of all passing railcars and locomotives to identify missing bolts, bent or broken rigging, open bottom gates, broken coupling systems and draft arrangements. Combining all of these systems, we are able to reduce dwell, improve employee productivity, inspect trains 360 degrees and increase safety.

AUTONOMOUS TRACK GEOMETRY MEASUREMENT SYSTEM (ATGMS)

ATGMS is a system that uses a non-contact, laser-based optical measuring system attached beneath a boxcar that operates in revenue train service. We are able to detect, in real-time, defects that predict track deterioration. Our technology allows us to improve service, better prevent derailments and reduce service failures.

VEHICLE TRACK INSPECTION

Technology mounted on our locomotives can identify possible track deviations by measuring vertical and horizontal accelerations. Algorithms are then used to determine the type and severity of deviation and notifications are automatically sent to field personnel for remediation. Our vehicle track interaction systems now analyze more than 600,000 miles of data annually on our network.

CP INNOVATION

BROKEN RAIL DETECTION IN DARK TERRITORY

In our non-signaled territories, or dark territories, we are leveraging cost-effective technologies to automatically detect broken rails by running circuits through the rail. This provides the same benefit of identifying broken rail as Centralized Traffic Control at a tenth of the cost.

COLD WHEEL TECHNOLOGY

Our cold wheel technology can evaluate air brakes on descending grades using wheel temperatures. A wheel with no heat when descending a grade signifies that the brakes may not be applying effectively. We are able to leverage this technology to optimize assets by efficiently completing repairs. This test,

which was developed by CP, has a 32 percent higher detection rate than traditional inspections. CP proactively worked with Transport Canada to obtain an exemption from visual inspection requirements, which reduces terminal dwell. The exemption allows us to remove 2,400 hours of annual inspection time for each of the coal, potash, and sulphur fleets. We have received an exemption for grain, and are seeking an additional exemption for intermodal.

CRACKED WHEEL DETECTION

We have invented a method to detect and proactively remove wheels that have potential to break. The award-winning detection system identifies metallurgical defects in the surface of the wheels that could be missed via traditional visual inspection. This technology enables CP to detect defects and conduct proactive maintenance before a wheel failure occurs.

ENHANCED RAIL FLAW DETECTION

Leveraging our cracked wheel technology, we have applied this innovation to identify rolling contact fatigue electromagnetically on the surface of the rail. The technology uses an algorithm to identify the depth of cracks in the rail, compared to the rest of the analyzed rail, and if deemed an outlier, the rail is flagged for repair. We are then able to proactively manage rail repairs through either rail grinding or replacement. With this rail technology, we are able to better prevent derailments and avoid service failures.

LEVERAGING BIG DATA

WHEEL LIFE FORECASTING

Leveraging data analytics, CP can predict within a month when wheel failures may occur, which improves safety, reduces online failures and decreases the need to set off cars in transit, which impacts network speed. We are able to use this data to proactively conduct maintenance on the affected wheels and reduce mechanical failures. Our wheel analytics have reduced wheel-related service interruptions by 30 percent. In addition, private car owners can subscribe to our reports to conduct their own proactive maintenance, which will continue to drive down service interruptions.

PREDICTIVE BEARING FAILURE

Our acoustic detector system predicts when a bearing is going to fail up to three months in advance. The microphones located next to the track are able to detect bearing defects before failure by inferring acoustic signals from train noises. Our patented detection process has reduced online bearing-related failures by 95 percent by enabling proactive detection and replacement. In 2018, our predictive analytics innovation was recognized with a safety award by the Railway Association of Canada.

OPTIMIZING OPERATIONS*

30% ↓ WHEEL-RELATED SERVICE INTERRUPTIONS

95% ↓ ONLINE BEARING-RELATED FAILURES

2,400 HOURS ↓ DWELL TIME FOR CERTAIN FLEETS

87% ↑ IMPROVED FLAW DETECTION

*Compared to previous technology and methods.

SUSTAINABLY DRIVEN

Sustainability is ingrained in CP's precision scheduled railroading culture.

Do better. Do more with less. Create long-term, win-win relationships with customers. Be mindful of our people, shareholders and the communities we operate in – and be safe. Our focus on long-term sustainable growth is aligned with environmental, social and governance performance.

CP's leadership in sustainability was recognized by several organizations in 2020.

We were added to the 2020 Dow Jones Sustainability Index North America, which measures corporate sustainability leaders' performance through a comprehensive assessment of economic, environmental and social criteria, in a year that saw a record number of participants in the Corporate Sustainability Assessment. CDP (formerly the Carbon Disclosure Project) awarded CP a leadership level score of A- for our 2020 climate change disclosure. CP has been a contributing participant to CDP for more than a decade, consistently disclosing progress on improving the management of greenhouse gas emissions and ongoing energy efficiency initiatives. World Finance's Sustainability Awards 2020 recognized us as a sustainability leader in the transportation industry for our efforts in transitioning to a low-carbon economy. Corporate Knights Magazine included CP on its Best 50 Corporate Citizens list, and we were named one of Canada's Best Diversity Employers for 2020.

Year-in, year-out, we are committed to operating in an ethical and responsible manner that considers our obligations to employees, customers, communities and shareholders – and we are seeking to understand how we can leverage our people, processes and technology to become even better.

Rendering of solar installation at our Calgary headquarters, to be completed in early 2021.

ENVIRONMENTAL

GOVERNANCE

54.5% OF DIRECTORS ARE MEMBERS OF DESIGNATED GROUPS

ENVIRONMENTAL

At CP, we believe moving freight by rail will continue to play a crucial role in the low carbon economy in North America. In 2020, we released our first public statement on climate change, demonstrating our commitment to take action and meet the challenge of climate change. Our statement supports the goals of the Paris Agreement and the Pan-Canadian Framework on Clean Growth and Climate Change, which seek to limit global temperature rise to well below 2°C above pre-industrial levels. CP committed to establishing a science-based emissions reduction target to guide its climate action. In 2020, we completed a comprehensive scenario analysis to understand the full range of possible climate change impacts to our business and align with the recommendations of the Task Force on Climate-Related Financial Disclosure. Through this work, we plan to formalize the integration of climate-related risks into our enterprise risk-management mechanisms and develop strategies for mitigation of risk and pursuit of opportunity.

This past year, we broke ground on one of the largest private solar operations in Alberta at our headquarters in Calgary. The installation will be completed in 2021 and is expected to generate more power than consumed annually at this location. It will also help avoid an estimated 2,600 tonnes of carbon emissions a year.

SOCIAL

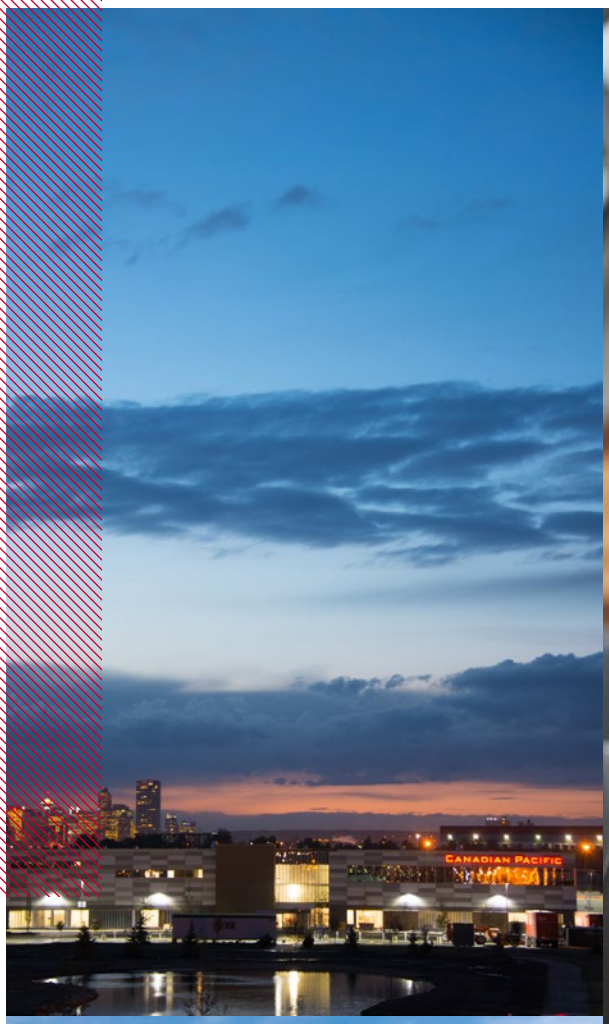
CP believes that we must focus on not only our economic impact, but also on the ways in which we contribute to society. Whether it's establishing a culture of integrity, inclusion, diversity and respect within our workforce; integrating workplace, operational and public safety into everything we do; supporting communities along our network through job creation, business partnerships or educational programs; or supporting healthy lifestyle initiatives, we recognize that our success is directly linked to building positive relationships with all of our stakeholders.

In 2020, we retained our status as the industry's leader with the lowest FRA-reportable train accident rate in North America for the 15th consecutive year, demonstrating the effectiveness of our efforts to protect public safety and the environment.

Our culture is focused on people. We believe that different backgrounds, experiences and perspectives enhance creativity and innovation and encourage diversity of thought in the workplace. In 2020, CP provided respectful and inclusive workplace training to 1,885 employees. Additionally,

approximately 800 management employees completed diversity and inclusion education sessions. Since 2019, more than 1,500 executives, engineering, mechanical, operations, network services and head office management employees received Indigenous cultural awareness training as part of CP's support for diversity and inclusion in our workplace.

In response to ongoing social unrest and social injustice across the U.S., CP donated US$1 million to three organizations to support the people of Minneapolis (home to the headquarters of our U.S. operations) and meaningful positive social change nationally. CP also continued to support the development and advancement of women within our operations; increased our veteran recruitment and hiring efforts; and, progressed our relationships with associations and organizations that attract, recruit and support skilled immigrants, persons with disabilities and women.



GOVERNANCE

Our commitment to sustainability and resulting performance is guided by our Board of Directors, comprising of a diverse group of individuals with expertise in rail, strategic planning, risk management, crisis response, finance and accounting, executive compensation and human resources. Led by Isabelle Courville, the first female chair of any Class 1 railroad in North America, CP's board has 45 percent female representation and nine percent visible minority representation. Accordingly, 54.5 percent of CP's Board are members of designated groups.

The Board works with our executive leaders to establish and regularly review short and long-term strategic objectives for CP. The Board also oversees these efforts through several committees, including the Risk and Sustainability Committee, formed in 2019, which monitors oversight of CP's key risks, strategies and sustainability topics.

CP remains committed to increasing diversity throughout all levels of the organization and implemented an employee diversity and inclusion policy. In addition, CP's Board of Directors adopted a Board diversity policy, which outlines that recommendation of directors for election or appointment to the Board will be made based on balance of skills, background, experience and knowledge, and will take into account diversity considerations, such as gender, age, ethnicity and different abilities.

LETTER TO SHAREHOLDERS FROM THE PRESIDENT AND CEO

OUR CP FAMILY IS RESILIENT, TOUGH AND COMMITTED

This past year demonstrated the full strength of our conviction and pride in being CP railroaders.

In a time of great challenge and need during a global pandemic, the CP family delivered. North Americans now recognize, more than ever before, that the railroaders who deliver supplies they count on are essential workers.

More capacity, new service solutions, innovations in safety, environmental leadership and extended network reach – all the result of our 12,000-strong family of railroaders united by the shared purpose and values of precision scheduled railroading (PSR). As 2020 has clearly shown, there are no limits to what we can achieve together.

The playbook for our ongoing success is straightforward: deliver excellent service that provides value to customers and rewards to shareholders; do it safely and with the lowest possible environmental impact; provide a rewarding workplace that invests in its people; and grow in lockstep with our operating model, not at its expense.

I am extremely proud of our operational performance during a volatile year. The people who power our railroad did an extraordinary job effectively managing service, train weights, train lengths and crews as volumes came back. As a true PSR railroad, we know a low operating ratio is an outcome of running the business the right way. In 2019, our operating ratio was sub-60 percent, a company record. Despite the extraordinary challenges thrown at us in 2020, we produced a new record-low operating ratio of 57.1 percent. This year-over-year improvement truly demonstrates the resiliency of our PSR operating model and the power of our culture of accountability, particularly while operating in a tough environment. In 2020, facing economic headwinds, we grew reported diluted earnings per share 3 percent to 17.97 and adjusted diluted earnings per share 7 percent to $17.67[1] and our share price appreciated by 33 percent.

We also continue to create value that cannot be easily replicated – unique, exceptional service offerings and cost structures that are second to none. CP has the shortest lengths of haul in key domestic markets and we have built upon that competitive advantage with faster and more reliable service. CP also possesses significant land holdings at key locations across our network, giving us optionality to create unique market solutions for customers.

There are no shortcuts to long-term, sustainable success. If we are going to win in this marketplace, we've got to consistently provide meaningful, sustainable customer-focused solutions.

SUSTAINABLE GROWTH

If we're investing in growth, it has to make sense for the long term and fit with our franchise. Sustainable means sticking to our model.

Our agreement with Maersk is a textbook example. In Vancouver, approximately 25 percent of what comes off tidewater gets transloaded, as opposed to 75 percent at other West Coast ports. Most goods are trucked off the port in a very congested area. We're solving that. Our proposal to Maersk: let's build a facility inside our existing land footprint, provide you with rail service from the port and reduce the need for trucking.

[1] This measure has no standardized meaning prescribed by GAAP and, therefore, may not be comparable to similar measures presented by other companies. This measure is defined and reconciled in Non-GAAP Measures in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K.

There are no shortcuts to long-term, sustainable success. If we are going to win in this marketplace, we've got to consistently provide meaningful, sustainable customer-focused solutions.

Together, we are constructing a new, world-class transload and distribution facility in Vancouver to expand CP's and Maersk's supply chain options for customers. It's a win-win for CP, for Maersk and for the environment.

In lockstep with the grain supply chain, we are also moving record volumes of grain as a result of the 8,500-foot High Efficiency Product train model. Our new high efficiency railcars carry 15 percent more grain by volume. Working in close collaboration with grain shippers, we continue to set records for Canadian grain across all metrics and have yet to reach our full potential as more customers adopt our model. We continue to invest in our grain fleet with additional hopper cars coming into service each week. Since announcing a half-billion-dollar plan in 2018, CP has added more than 3,800 new hopper cars to its fleet via purchase or lease.

Our recent acquisition of Central Maine & Quebec Railway has extended our reach and gives us deep-water, congestion-free access to two Atlantic Ocean ports – and a transformational opportunity to create new capacity, service and growth. Hapag-Lloyd will begin regular service with CP and Port of Saint John starting in 2021. CP's 200-mile route advantage to key centers like Montreal, Toronto and Chicago provides unmatched service and the opportunity to grow the Port of Saint John into the key Atlantic Canada trade gateway. CP, along with the Port of Saint John, is investing in improvements and new capacity to bring more long-term customers online.

These are just some of the many new service offerings and opportunities across all of our lines of business that point to strong growth potential in 2021 and beyond.

SAFETY INNOVATION

Operating safely is a foundational principle at CP. I am proud to state that this past year, CP achieved a new record low for Federal Railroad Administration (FRA)-reportable injuries and held our position as the safest Class 1 railroad in North America for the 15th straight year, based on FRA-reportable train accident frequency. We continued to strengthen our Home Safe program to help ensure our railroaders go home safely, and made milestone achievements not only in improving safety but also in strengthening network efficiency. For example, our train inspection portal technology and cold wheel brake test innovation can detect significantly more defects than traditional inspections. Both innovations have made our operations safer and earned exemptions from Transport Canada, reducing dwell times for certain fleets.

ENVIRONMENTAL ACTION

Profitable, sustainable growth means having a modern long-term vision for this historic railroad. Our focus remains on delivering value for shareholders and customers as we transition to a low-carbon economy in North America. Times of change or disruption provide opportunities for leadership through both example and action. Across the supply chain, we are taking action when it comes to making a positive impact on the environment.

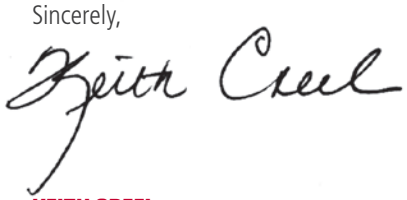
This past year, we released our first public statement on climate change, supporting the goals of the Paris Agreement and the Pan-Canadian Framework on Clean Growth and Climate Change, which seek to limit global temperature rise to well below 2°C above pre-industrial levels. We are backing that statement up with innovative initiatives such as building a solar panel farm at our headquarters in Calgary. This will be one of the largest private solar operations in the province and is expected to generate more power than consumed annually at our headquarters by early 2021. We are also developing North America's first line-haul hydrogen-powered locomotive. CP's Hydrogen Locomotive Program will retrofit a line-haul locomotive with hydrogen fuel cells and battery technology to drive the locomotive's electric traction motors.

As our volumes and market presence grow, more truck traffic is removed from the roads. Estimates show that our new transload facility with Maersk will remove up to 100,000 trucks from Metro Vancouver's congested roads and reduce greenhouse gas emissions by over 4,000 tons per year. This is good for our business and for the environment. Rail produces 75 percent less greenhouse gas emissions than trucks and is four times more fuel efficient. CP's fuel efficiency exceeds the North American Class 1

railway average – since 1990, we've improved our fuel use by more than 40 percent.

Our world-class railroaders will continue to develop and implement solutions that drive safety, sustainability, reliability and efficiency.

DEVELOPING PEOPLE



The challenges presented by the pandemic emphasized the fact that our people are our greatest asset. That is why, instead of pulling back, we ramped up training and leadership development throughout the year so that our railroaders can continue to grow. The past year came with unexpected and extraordinary opportunities for the CP family at all levels and in all areas of the business to step up and become even stronger.

We also embraced the opportunity to review and improve our diversity initiatives, and took further steps to help ensure we are attracting, hiring, retaining and nurturing a workforce where all employees have equal opportunities to succeed and advance. Three new diversity councils – racial, Indigenous and gender – were established to help ensure we consider diversity and inclusion when we make decisions, provide feedback on corporate direction and promote initiatives that relate to each council's area of focus.

I am deeply grateful to our CP family for their resilience and effort throughout a historically challenging year, and remain optimistic about what lies ahead. We know that our PSR operating model works in good times; this year has further demonstrated how well it works when times get tough.

Individually and collectively, we are CP Proud!

Sincerely,

KEITH CREEL
President and CEO

LETTER FROM THE CHAIR

This past year was extraordinary in so many ways. As essential workers, the CP team continued to deliver safely and efficiently in the face of COVID-19. 2020 highlighted CP's collective commitment and the depth and breadth of the team, led by President and CEO Keith Creel. It was also a year where CP focused intensely on sustainability and its commitment to environmental, social and governance stewardship.

ENVIRONMENTAL

Despite the ongoing challenges of 2020, CP grew stronger and continued to operate safely and sustainably. In July, CP released its first public statement on climate change. The statement acknowledges the effects of rising global temperatures and lays out CP's commitment to ongoing efforts to mitigate the impacts. In 2021, CP will establish a science-based emissions reduction target to guide its climate action.

Railroads have a powerful role to play as we transition to a less carbon-intensive economy. This past year, CP forged new relationships with other transportation industry sustainability leaders like Maersk. The relationship with Maersk will see thousands of trucks come off publicly funded highways across the Lower Mainland of British Columbia. This type of forward-thinking collaboration is a win for CP, the supply chain and the environment.

Because of its ongoing collaborative efforts and commitment, CP saw improvements in its scoring by major sustainability ratings firms. In November, CP was named to the Dow Jones Sustainability Index North America, and in December, the CDP recognized CP for leadership on climate action with an A- score on its 2020 climate change disclosure. This past year CP was also named to Corporate Knights' 2020 list of Canada's best corporate citizens and the World Finance Sustainability Awards 2020 named the company a sustainability leader in the transportation industry.

SAFETY AND SOCIAL

In 2020, CP did not depart from its commitment to safety, leading the North American industry for a 15th straight year with the lowest Federal Railroad Administration (FRA)-reportable train accident frequency. CP continues to focus on safety, which is an ongoing journey, not a destination.

CP also continued to invest in its communities, despite the pandemic. These investments included a US$1 million donation to one national and two Minneapolis-based organizations. In 2020, CP Has Heart helped raise nearly $2.5 million for cardiac causes across the CP network, bringing the total since 2014 to $23 million, and CP ran a virtual Holiday Train, donating $1.24 million to 201 food banks in communities that ordinarily host in-person events. Since 1999, the Holiday Train has helped raise $19 million and collected 4.8 million pounds for food banks in the communities in which CP operates.

GOVERNANCE

In January 2020, the Board enacted a diversity policy and we continue to focus on diversity, especially as we look at Board renewal. Our Board is currently made up of 45 percent women with one member who is a visible minority. Women chair two of our four standing committees, and one of those committees is chaired by our visible minority Board member. We believe this diversity makes us stronger and better equipped to serve CP shareholders.

In 2020, CP ranked second in the Globe and Mail's annual comprehensive ranking of Canada's corporate boards, known as "Board Games", in part due to our strong focus on governance.

2020 was also the first time in our nearly 140-year history we hosted a virtual Annual General Meeting. To put it simply, it was a year like no other. Thanks to the CP family, customers and shareholders, the company persevered and prospered.

While it was not the first time this management team has faced challenges, it served as another reminder of the resilience of their leadership and of the sustainable nature of this historic, proud company.

Sincerely,

ISABELLE COURVILLE
Chair of the Board

PART I

ITEM 1. BUSINESS

Company Overview

Canadian Pacific Railway Limited ("CPRL"), together with its subsidiaries ("CP" or the "Company"), owns and operates a transcontinental freight railway in Canada and the United States ("U.S."). CP provides rail and intermodal transportation services over a network of approximately 13,000 miles, directly serving the principal business centres of Canada from Montréal, Québec, to Vancouver, British Columbia ("B.C."), and the U.S. Northeast and Midwest regions. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company's market reach in Canada, through the U.S. and into Mexico. CP transports bulk commodities, merchandise freight and intermodal traffic. For additional information regarding CP's network and geographical locations, refer to Item 2. Properties.

CPRL was incorporated on June 22, 2001, under the *Canada Business Corporations Act* and controls and owns all of the Common Shares of Canadian Pacific Railway Company ("CPRC"), which was incorporated in 1881 by Letters Patent pursuant to an Act of the Parliament of Canada. CPRL's registered, executive and corporate head office is located at 7550 Ogden Dale Road S.E., Calgary, Alberta T2C 4X9. CPRL's Common Shares (the "Common Shares") are listed on the Toronto Stock Exchange ("TSX") and the New York Stock Exchange ("NYSE") under the symbol "CP".

For purposes of this annual report, all references herein to "CP", "the Company", "we", "our" and "us" refer to CPRL, CPRL and its subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL's subsidiaries, as the context may require. All references to currency amounts included in this annual report, including the Consolidated Financial Statements, are in Canadian dollars unless specifically noted otherwise.

Strategy

CP is continuing the journey to become the best railway in North America, with a culture of responsibility and accountability focused on five key foundations:

- **Provide Service:** Providing efficient and consistent transportation solutions for the Company's customers. "Doing what we say we are going to do" is what drives CP in providing a reliable product with a lower cost operating model. Centralized planning aligned with local execution is bringing the Company closer to the customer and accelerating decision-making.
- **Control Costs:** Controlling and removing unnecessary costs from the organization, eliminating bureaucracy and continuing to identify productivity enhancements are the keys to success.
- **Optimize Assets:** Through longer and heavier trains, and improved asset utilization, the Company is moving increased volumes with fewer locomotives and cars while unlocking capacity for future growth potential.
- **Operate Safely:** Each year, CP safely moves millions of carloads of freight across North America while ensuring the safety of our people and the communities through which we operate. Safety is never to be compromised. CP strives for continuous implementation of state-of-the-art safety technology, safety management systems, and safety culture with our employees to ensure safe, efficient operations across our network.
- **Develop People:** CP recognizes that none of the other foundations can be achieved without its people. Every CP employee is a railroader and the Company has established a culture focused on our values of accountability, diversity and pride, in everything we do. Coaching and mentoring all employees into becoming leaders will continue to drive CP forward.

Starting in 2012, CP transformed its operations by investing in the network and executing a precision scheduled railroading model that lowers costs, optimizes assets, and provides better, more competitive service.

Today, we continue to apply our long-term strategy: leverage our lower cost base, network strengths and improved service to drive sustainable, profitable growth. While the accomplishments during the turnaround were tremendous, CP's journey to become North America's best-performing rail carrier is far from over. As a Company, we will remain focused on our next level of service, productivity, and innovation to continue to generate sustainable value for our customers and results for our shareholders.

Business Developments

COVID-19 pandemic

The effects of the COVID-19 pandemic on consumer demand resulted in lower volumes in the following lines of business: Energy, chemicals and plastics, Metals, minerals and consumer products, and Automotive.

As COVID-19 continued to spread throughout Canada and the United States during 2020, CP conducted business as usual, to the greatest extent possible in the circumstances, while continuing to apply the principles of precision scheduled railroading to respond to changes in demand. The Company is continuing to take a variety of measures to ensure the availability of its transportation services throughout our network, promote the safety and security of our

employees, and support the communities in which we operate. Certain modifications the Company has made in response to the COVID-19 pandemic include but are not limited to: implementing periods of working at home for certain office employees; restricting employee business travel; implementing post-travel employee screening; strengthening clean workplace practices; reinforcing socially responsible sick leave recommendations; limiting visitor and third-party access to Company facilities; launching internal COVID-19 resources for employees; creating a pandemic response team comprised of employees and members of senior management; and encouraging telephonic and video conference-based meetings along with other hygiene and social distancing practices recommended by health authorities including Health Canada, the U.S. Centers for Disease Control and Prevention, and the World Health Organization. CP supported employees by working with labour unions to shorten recall times to be prepared for demand increases while supplementing employment insurance payments and maintaining health benefit coverage for employees during that period. CP also awarded a bonus for our frontline employees who worked or were laid off in 2020 due to the COVID-19 pandemic. CP is responding to this crisis through measures designed to protect our workforce and prevent disruptions to the central role the Company's operations provide to the North American economy. CP's service is deemed essential as part of the transportation industry. We believe that we remain well positioned to adjust to market conditions to assist our customers as they work to manage their supply chain and inventories.

Preventative measures that serve to minimize the risk of exposure to COVID-19 remain in effect, including modifying our workspace to implement physical distancing measures, and continuously reevaluating our efforts with safety as a top priority.

In addition to the above, we have also observed many other companies, including companies in our industry, taking precautionary and preemptive actions to address the COVID-19 pandemic, and companies may take further actions that alter their normal business operations. We will continue to actively monitor the situation and may take further actions that could materially alter our business operations as may be required or recommended by federal, provincial, state or local authorities, or that we determine are in the best interests of our employees, customers, shareholders, partners, suppliers, and other stakeholders.

Additional information concerning the impact COVID-19 may have to our future business and results of operations is provided in Part I, Item 1A. Risk Factors.

Other current business developments

On January 27, 2021, CP announced its Board of Directors will seek shareholder and regulatory approval for the implementation of a five-for-one share split of CP's issued and outstanding common shares. The share split is subject to the approval of shareholders at the Annual and Special Meeting of Shareholders scheduled to be held on April 21, 2021 and to the requirements of the Toronto Stock Exchange ("TSX") and New York Stock Exchange ("NYSE"). CP also announced a normal course issuer bid ("NCIB") commencing January 29, 2021, to purchase up to 3.33 million Common Shares in the open market for cancellation before January 28, 2022.

On December 22, 2020, CP acquired full ownership of the Detroit River Tunnel Partnership ("DRTP"), which owns a 1.6-mile rail tunnel linking Windsor, Ontario, and Detroit, Michigan. The purchase price for the transaction was approximately $398 million, net of cash acquired. CP previously owned a 16.5 percent interest in the partnership and was its designated operator. The acquisition will reduce CP’s operating costs related to movements through the tunnel while further integrating the eastern part of our network. For additional information regarding this acquisition, refer to Item 8. Financial Statements and Supplementary Data, Note 10 Business combination.

In the fourth quarter of 2020, CP announced its plan to develop North America's first line-haul hydrogen-powered locomotive. CP's Hydrogen Locomotive Program will retrofit a line-haul locomotive with hydrogen fuel cells and battery technology to drive the locomotive's electric traction motors. Once operational, CP will conduct rail service trials and qualification testing to evaluate the technology's readiness for the freight-rail sector. The work builds on CP's prior experience with testing low-emitting locomotive technologies, including biofuels, compressed natural gas and battery-powered solutions. This project aligns with CP's focus on finding innovative solutions to support a sustainable future.

In the fourth quarter of 2020, CP received a leadership level score of A- from CDP for its 2020 climate change disclosure. This accomplishment represented a significant milestone in CP's journey to integrate climate-related risks and opportunities into the company's sustainability programs and reporting practices. CDP is an internationally recognized non-profit organization that runs a global environmental disclosure platform assessing companies on their climate-related performance and transparency.

In the fourth quarter of 2020, CP was added to the 2020 Dow Jones Sustainability Index North America. The index measures corporate sustainability leaders' performance through a comprehensive assessment of economic, environmental and social criteria. The top companies were selected from a record number of participants.

In the third quarter of 2020, CP released its first public statement on climate change, acknowledging the effects of rising global temperatures and our commitment to ongoing efforts to mitigate the impacts. The statement supports the goals of the Paris Agreement and the Pan-Canadian Framework on Clean Growth and Climate Change, which seek to limit global temperature rise to well below 2°C above pre-industrial levels. In support of this initiative, we plan to establish a science-based emissions reduction target to guide our climate action.

On July 21, 2020, CP increased its quarterly dividend to $0.95 per share on the outstanding Common Shares, from $0.83 per share from the prior quarter.

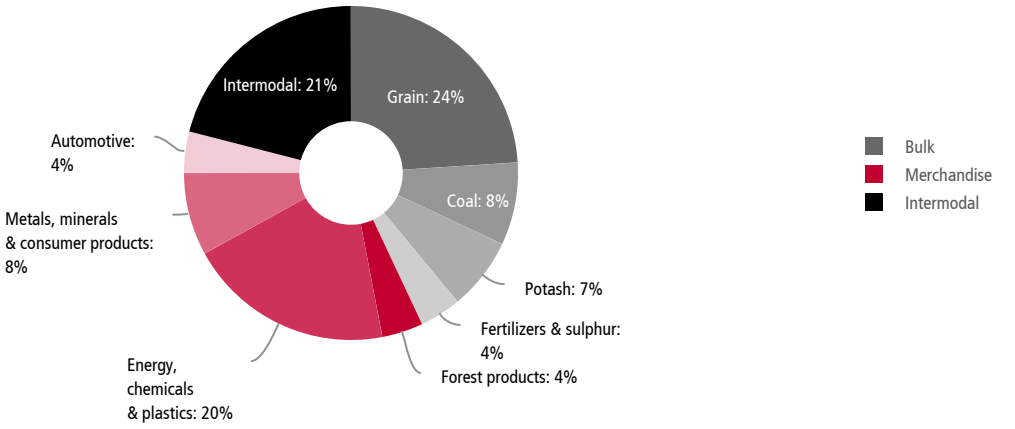
In the second quarter of 2020, CP completed its previously announced acquisition of Central Maine and Québec Railway U.S. Inc. ("CMQ U.S."). Together with the December 30, 2019 completion of the acquisition of Central Maine & Québec Railway Canada Inc. ("CMQ Canada"), the acquisition of CMQ U.S. completed CP's purchase of the entire Central Maine & Québec Railway ("CMQ") network originally announced on November 20, 2019, for approximately $174 million (U.S. $133 million). CMQ U.S. and CMQ Canada will continue to operate in the U.S. and in Canada respectively as subsidiaries of CP. CMQ owns rail lines primarily in Québec and Maine, stretching approximately 481 miles, and primarily moving forest products, refined petroleum products, chemicals and plastics. This acquisition provides CP with strategic access into the U.S. Northeast and Atlantic Canada. The transaction provides CP customers with seamless, safe and efficient access to ports at Searsport, Maine, and to Saint John, New Brunswick, via Eastern Maine Railway Company and New Brunswick Southern Railway. With the CMQ acquisition, CP is now a 13,000-mile rail network connecting the Atlantic coast to the Pacific coast across six Canadian provinces and 11 U.S. states. For additional information regarding this acquisition, refer to Item 8. Financial Statements and Supplementary Data, Note 10 Business combination.

On April 21, 2020, the Company held its annual meeting of shareholders, which was conducted via a virtual only format by live webcast online for the first time. All 11 director nominees were elected.

Prior Developments

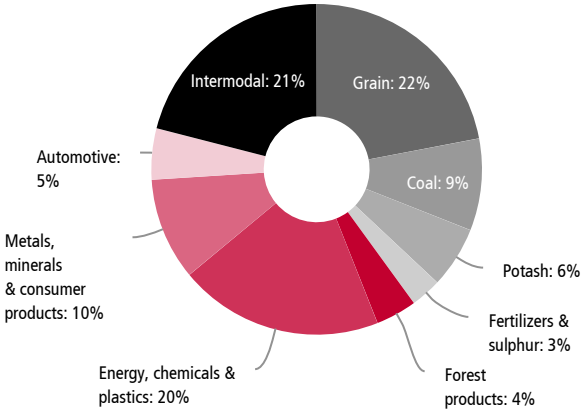
On December 17, 2019, the Company announced an NCIB, commencing December 20, 2019, to purchase up to 4.80 million Common Shares in the open market for cancellation before December 19, 2020.

During the first quarter of 2019, the Company experienced severe winter operating conditions and an increase in the frequency and severity of casualty incidents and derailments. As a result, the Company incurred significant costs to manage severe weather conditions, as well as direct casualty costs, and higher operating costs. During this period and the subsequent network recovery the Company also experienced losses and deferrals of potential revenues.



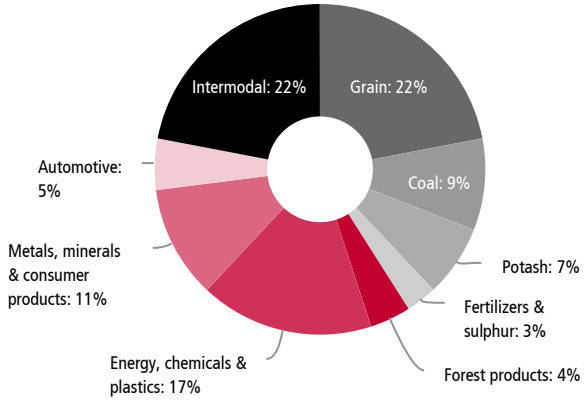
Operations

The Company operates in only one operating segment: rail transportation. Although the Company provides a breakdown of revenue by business line, the overall financial and operational performance of the Company is analyzed as one segment due to the integrated nature of the rail network. Additional information regarding the Company's business and operations, including revenue and financial information, and information by geographic location is presented in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 8. Financial Statements and Supplementary Data, Note 27 Segmented and geographic information.



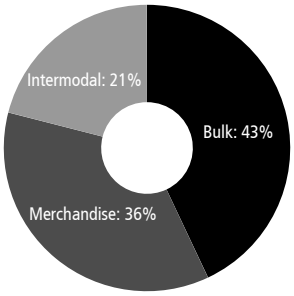
Lines of Business

The Company transports bulk commodities, merchandise freight, and intermodal traffic. Bulk commodities, which typically move in large volumes across long distances, include Grain, Coal, Potash, and Fertilizers and sulphur. Merchandise freight consists of industrial and consumer products, such as Energy, chemicals and plastics, Metals, minerals and consumer products, Forest products, and Automotive. Intermodal traffic consists largely of retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

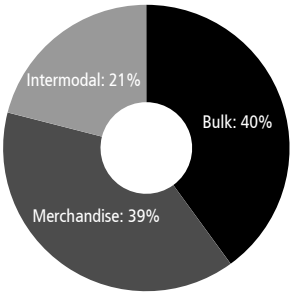


The Company's revenues are primarily derived from transporting freight. The following chart shows the Company's Freight revenue by each line of business in 2020, 2019 and 2018:

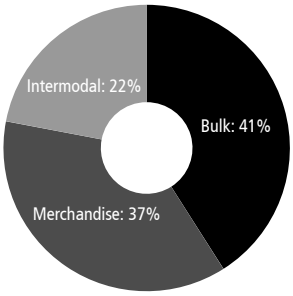
2020 Freight Revenues



2019 Freight Revenues



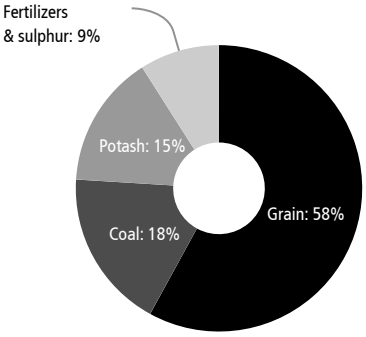
2018 Freight Revenues



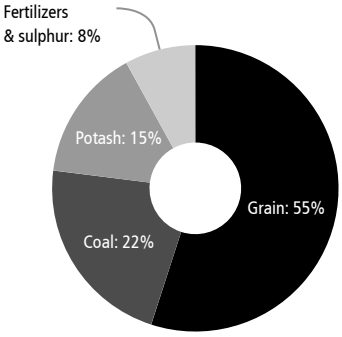
In 2020, the Company generated Freight revenues totalling $7,541 million ($7,613 million in 2019 and $7,152 million in 2018). The following charts compare the percentage of the Company's total Freight revenues derived from each of the three major business lines in 2020, 2019 and 2018:

2020 Freight Revenues

2019 Freight Revenues

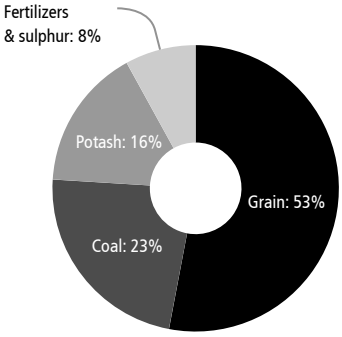


2018 Freight Revenues



BULK

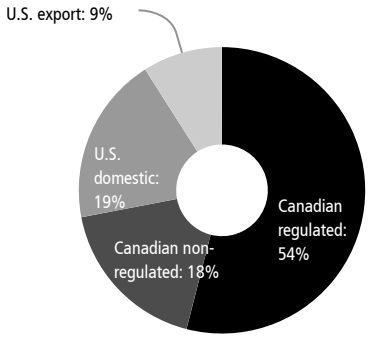
The Company's Bulk business represented approximately 43% of total Freight revenues in 2020.



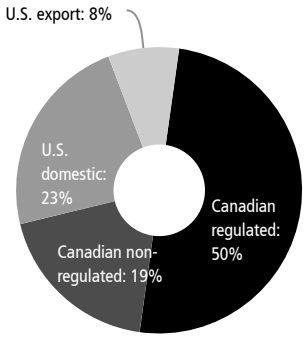
The following charts compare the percentage of the Company's Bulk freight revenues by commodity business in 2020, 2019 and 2018:

2020 Bulk Revenues
(43% of Freight Revenues)

2019 Bulk Revenues
(40% of Freight Revenues)

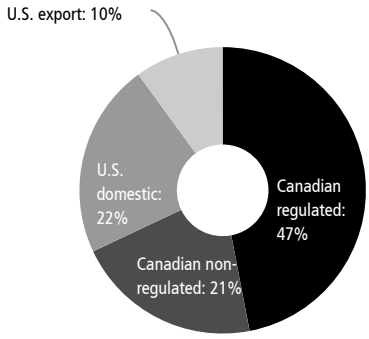


2018 Bulk Revenues
(41% of Freight Revenues)



Grain

The Company's Grain business represented approximately 58% of Bulk revenues, and was 24% of total Freight revenues in 2020.



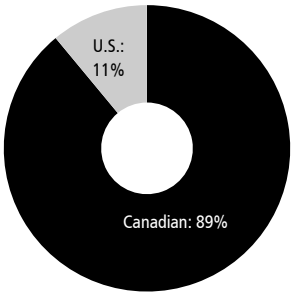
The following charts compare the percentage of the Company's Grain freight revenues generated from Canadian and U.S. shipments in 2020, 2019 and 2018:

2020 Grain Revenues
(58% of Bulk Revenues; 24% of Freight Revenues)

2019 Grain Revenues
(55% of Bulk Revenues; 22% of Freight Revenues)

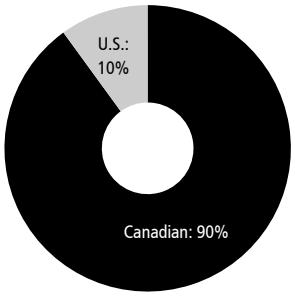
2018 Grain Revenues
(53% of Bulk Revenues; 22% of Freight Revenues)

CP's Grain network is unique among railways in North America as it is strategically positioned in the heart of grain-producing regions of western Canada and the Northern Plains of the U.S. Canadian grain transported by CP consists of both whole grains, such as wheat, canola, durum, pulses, and barley, and processed products such as oils, meals, and malt. This business is centred in the Canadian Prairies (Saskatchewan, Alberta, and Manitoba), with grain shipped primarily west to the Port of Vancouver, and east to the Port of Thunder Bay for export. Grain is also shipped to the U.S., to eastern Canada, and to Mexico for domestic consumption.



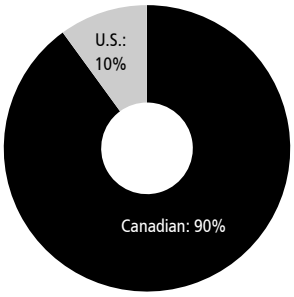
Canadian grain includes a division of business that is regulated by the Canadian government through the *Canada Transportation Act* ("CTA"). This regulated business is subject to a maximum revenue entitlement ("MRE"). Under the CTA, railways can set their own rates for individual movements. However, the MRE governs aggregate revenue earned by the railway based on a formula that factors in the total volumes, length of haul, average revenue per ton, and inflationary adjustments. The regulation applies to western Canadian export grain shipments to the ports of Vancouver and Thunder Bay.

U.S. grain transported by CP consists of both whole grains, such as wheat, soybeans, corn and durum, and processed products such as feed, meals and flour. This business is centred in the states of Minnesota, North Dakota, and Iowa. Grain destined for domestic consumption moves east via Chicago, to the U.S. Northeast or is interchanged with other carriers to the U.S. Pacific Northwest and U.S. Southeast. In partnership with other railways, CP also moves grain to export terminals in the U.S. Pacific Northwest and the Gulf of Mexico. Export grain traffic is also shipped to ports at Superior and Duluth.



Coal

The Company's Coal business represented approximately 18% of Bulk revenues, and was 8% of total Freight revenues in 2020.

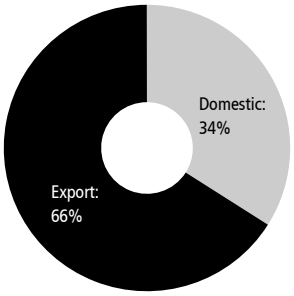


The following charts compare the percentage of the Company's Coal freight revenues generated from Canadian and U.S. shipments in 2020, 2019 and 2018:

2020 Coal Revenues
(18% of Bulk Revenues; 8% of Freight Revenues)

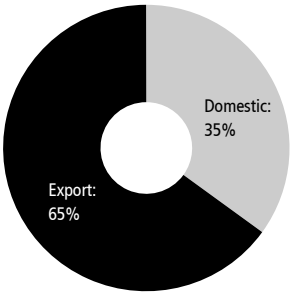
2019 Coal Revenues
(22% of Bulk Revenues; 9% of Freight Revenues)

2018 Coal Revenues
(23% of Bulk Revenues; 9% of Freight Revenues)



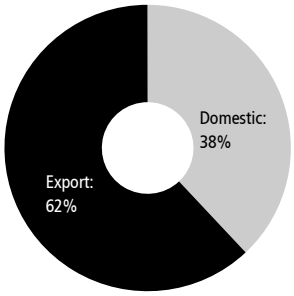
In Canada, CP handles mostly metallurgical coal destined for export for use in the steelmaking process. CP's Canadian coal traffic originates mainly from Teck Resources Limited's mines in southeastern B.C. CP moves coal west from these mines to port terminals for export to world markets (Pacific Rim, Europe and South America), and east for the U.S. Midwest markets.

In the U.S., CP moves primarily thermal coal from connecting railways, serving the thermal coal fields in the Powder River Basin in Montana and Wyoming, which is delivered to power-generating facilities in the U.S. Midwest.



Potash

The Company's Potash business represented approximately 15% of Bulk revenues, and was 7% of total Freight revenues in 2020.

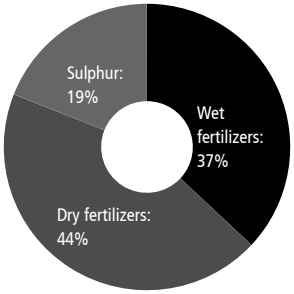


The following charts compare the percentage of the Company's Potash freight revenues generated from export and domestic potash shipments in 2020, 2019 and 2018:

2020 Potash Revenues
(15% of Bulk Revenues; 7% of Freight Revenues)

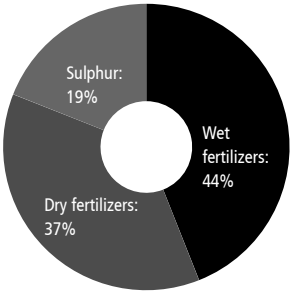
2019 Potash Revenues
(15% of Bulk Revenues; 6% of Freight Revenues)

2018 Potash Revenues
(16% of Bulk Revenues; 7% of Freight Revenues)



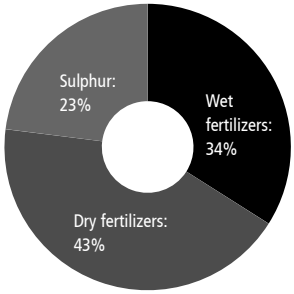
The Company's Potash traffic moves mainly from Saskatchewan to offshore markets through the ports of Vancouver, Portland, and Thunder Bay, and to markets in the U.S. All potash shipments for export beyond Canada and the U.S. are marketed by Canpotex Limited and K+S Potash Canada. Canpotex is an

export company owned in equal shares by Nutrien Ltd. and The Mosaic Company. Independently, these producers move domestic potash with CP primarily to the U.S. Midwest for local application.



Fertilizers and Sulphur

The Company's Fertilizers and sulphur business represented approximately 9% of Bulk revenues, and was 4% of total Freight revenues in 2020.

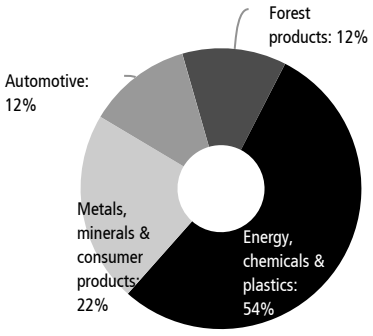


The following charts compare the percentage of the Company's Fertilizers and sulphur freight revenues generated from dry fertilizers, wet fertilizers and sulphur transportation in 2020, 2019 and 2018:

2020 Fertilizers & Sulphur Revenues
(9% of Bulk Revenues; 4% of Freight Revenues)

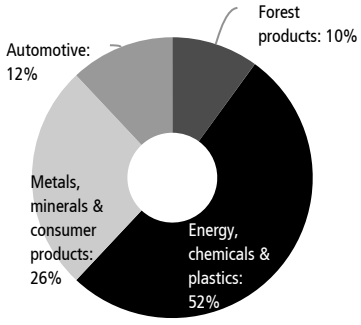
2019 Fertilizers & Sulphur Revenues
(8% of Bulk Revenues; 3% of Freight Revenues)

2018 Fertilizers & Sulphur Revenues
(8% of Bulk Revenues; 3% of Freight Revenues)



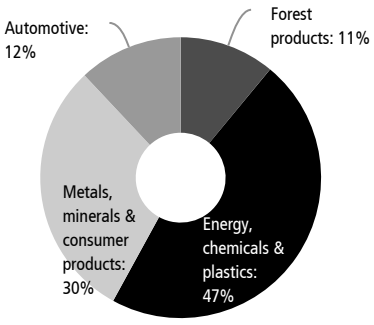
Dry fertilizers include: phosphate, urea, ammonium sulphate, and nitrate. Wet fertilizers are primarily anhydrous ammonia. More than half of CP's fertilizer shipments originate from production facilities in Alberta, where abundant sources of natural gas and other chemicals provide feedstock for fertilizer production.

Most sulphur is produced in Alberta as a byproduct of processing sour natural gas, refining crude oil, and upgrading bitumen produced in the Alberta oil sands. Sulphur is a raw material used primarily in the manufacturing of sulphuric acid, which is used most extensively in the production of phosphate fertilizers.



MERCHANDISE

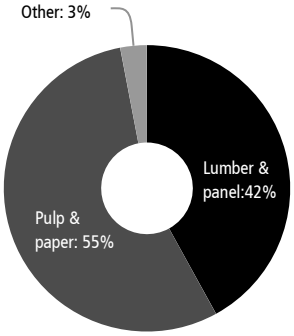
The Company's Merchandise business represented approximately 36% of total Freight revenues in 2020.



The following charts compare the percentage of the Company's Merchandise freight revenue by commodity business in 2020, 2019 and 2018:

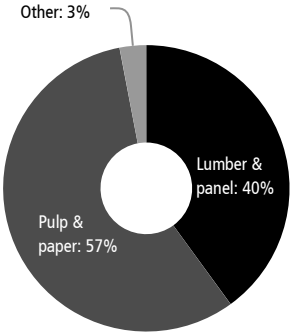
2020 Merchandise Revenues
(36% of Freight Revenues)

2019 Merchandise Revenues
(39% of Freight Revenues)



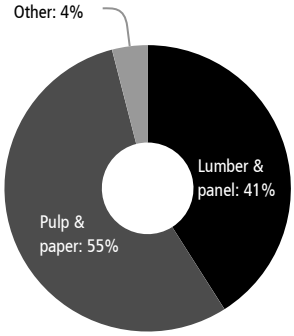
2018 Merchandise Revenues
(37% of Freight Revenues)

Merchandise products move in both mixed freight and unit trains, in a variety of car types. Service involves delivering products to many different customers and destinations. In addition to traditional rail service, CP moves merchandise traffic through a network of truck-rail transload facilities, expanding the reach of CP's network to non-rail served facilities.



Forest Products

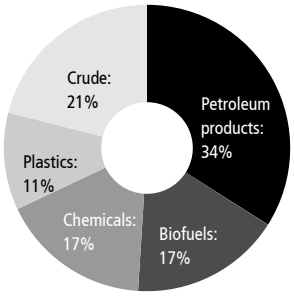
The Company's Forest products business represented approximately 12% of Merchandise revenues, and was 4% of total Freight revenues in 2020.



The following charts compare the percentage of the Company's Forest products freight revenues generated from pulp and paper (wood pulp, paperboard, newsprint, and paper), lumber and panel, and other shipments in 2020, 2019 and 2018:

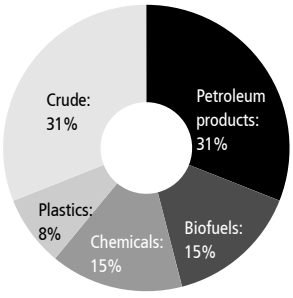
2020 Forest Products Revenues
(12% of Merchandise Revenues;
4% of Freight Revenues)

2019 Forest Products Revenues
(10% of Merchandise Revenues;
4% of Freight Revenues)



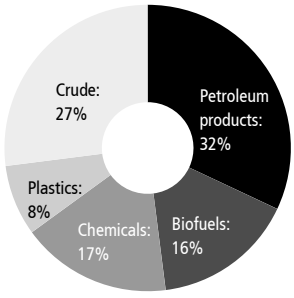
2018 Forest Products Revenues
(11% of Merchandise Revenues;
4% of Freight Revenues)

Forest products traffic includes pulp and paper, and lumber and panel shipped from key producing areas in B.C., Ontario, Québec, Alberta, and New Brunswick, to destinations throughout North America, including Vancouver and Montreal to export markets.



Energy, Chemicals and Plastics

The Company's Energy, chemicals and plastics business represented approximately 54% of Merchandise revenues, and was 20% of total Freight revenues in 2020.



The following charts compare the percentage of the Company's Energy, chemicals and plastics freight revenues generated from petroleum products, crude, chemicals, biofuels, and plastics shipments in 2020, 2019 and 2018:

2020 Energy, Chemicals & Plastics Revenues
(54% of Merchandise Revenues;
20% of Freight Revenues)

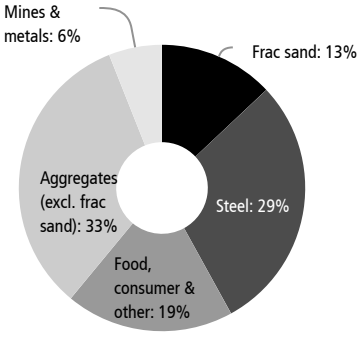
2019 Energy, Chemicals & Plastics Revenues
(52% of Merchandise Revenues;
20% of Freight Revenues)

2018 Energy, Chemicals & Plastics Revenues
(47% of Merchandise Revenues;
17% of Freight Revenues)

Petroleum products consist of commodities such as liquefied petroleum gas ("LPG"), fuel oil, asphalt, gasoline, condensate (diluent), and lubricant oils. The majority of the Company's western Canadian energy traffic originates in the Alberta Industrial Heartland, Canada's largest hydrocarbon processing region, and Saskatchewan. The Bakken formation region in Saskatchewan and North Dakota is another source of condensate, LPG, and other refined petroleum. Interchanges with several rail interline partners give the Company access to destination and export markets in the U.S. West Coast, the U.S. Midwest, and Mexico, as well as the Texas and Louisiana petrochemical corridor and port connections.

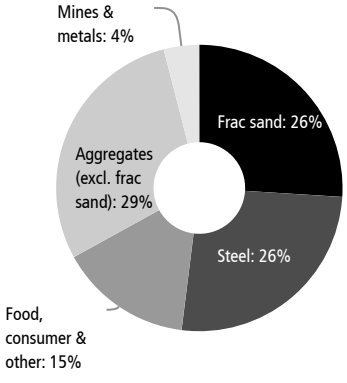
Crude moves from production facilities throughout Alberta, North Dakota, and Saskatchewan. CP provides efficient routes to refining markets in the Gulf Coast, the U.S. Northeast, and the West Coast through connections with our railway partners.

The Company's chemical traffic includes products such as ethylene glycol, caustic soda, sulphuric acid, methanol, styrene, and soda ash. These shipments originate from western Canada, the Gulf of Mexico, the U.S. Midwest, and eastern Canada, and move to end markets in Canada, the U.S. and overseas.



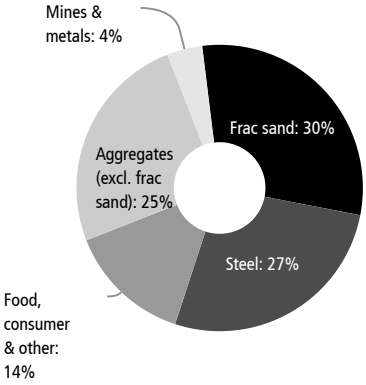
CP's biofuels traffic originates mainly from facilities in the U.S. Midwest, shipping primarily to destinations in the U.S. Northeast.

The most commonly shipped plastics products are polyethylene and polypropylene. Approximately half of the Company's plastics traffic originates in central and northern Alberta and moves to various North American destinations.



Metals, Minerals and Consumer Products

The Company's Metals, minerals and consumer products business represented approximately 22% of Merchandise revenues, and was 8% of total Freight revenues in 2020.



The following charts compare the percentage of the Company's Metals, minerals and consumer products freight revenues generated from aggregates (excluding frac sand), steel, frac sand, food and consumer products, and non-ferrous metals transportation in 2020, 2019 and 2018:

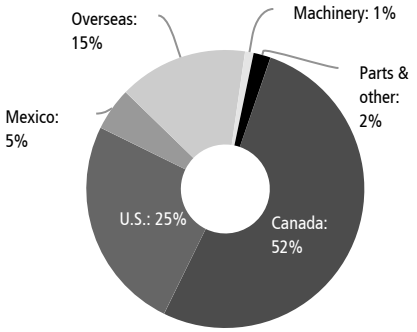
2020 Metals, Minerals & Consumer Products Revenues
(22% of Merchandise Revenues; 8% of Freight Revenues)

2019 Metals, Minerals & Consumer Products Revenues
(26% of Merchandise Revenues; 10% of Freight Revenues)

2018 Metals, Minerals & Consumer Products Revenues
(30% of Merchandise Revenues; 11% of Freight Revenues)

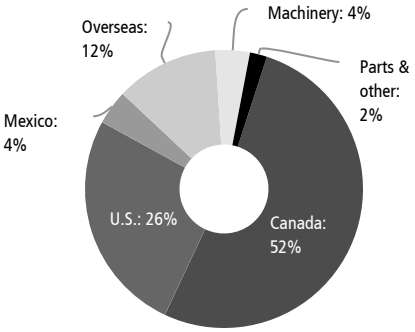
Aggregate products include coarse particulate and composite materials such as cement, limestone, clay, and gypsum. Cement is the leading commodity within aggregates, and is shipped directly from production facilities in Alberta, Québec, and Ontario to energy and construction projects in the U.S. Midwest, Canadian Prairies, and the U.S. Pacific Northwest.

The majority of frac sand originates at mines located along the Company's network in Wisconsin and moves to the Bakken, Marcellus Shale, Permian Basin, and other shale formations across North America.



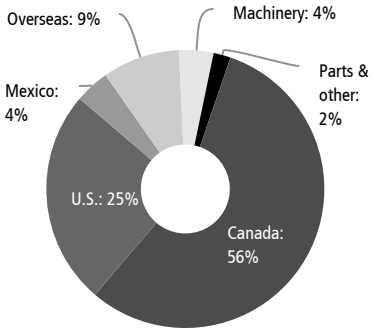
CP transports steel in various forms from mills in the U.S. Midwest, Ontario, and Saskatchewan to a variety of industrial users. The Company carries base metals such as aluminum, zinc, and lead. CP also moves ores from mines to smelters and refineries for processing, and the processed metal to automobile and consumer products manufacturers.

Food, consumer, and other products traffic consists of a diverse mix of goods, including food products, railway equipment, building materials, and waste products.



Automotive

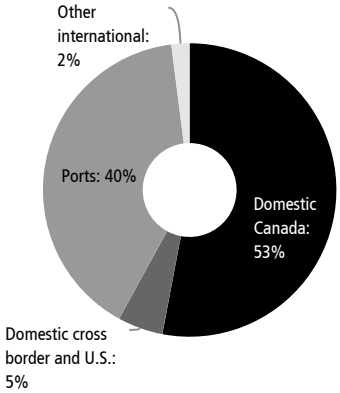
The Company's Automotive business represented approximately 12% of Merchandise revenues, and was 4% of total Freight revenues in 2020.



The following charts compare the percentage of the Company's Automotive freight revenues generated by movements of finished vehicles from Canadian, U.S., overseas, and Mexican origins, machinery, and parts and other in 2020, 2019 and 2018:

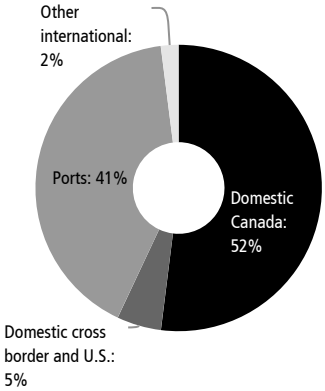
2020 Automotive Revenues
(12% of Merchandise Revenues; 4% of Freight Revenues)

2019 Automotive Revenues
(12% of Merchandise Revenues; 5% of Freight Revenues)



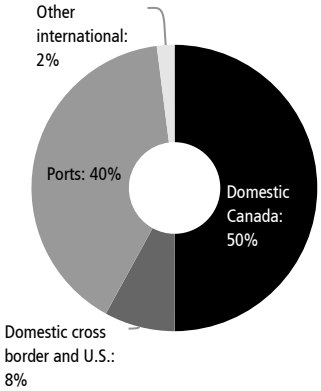
2018 Automotive Revenues
(12% of Merchandise Revenues; 5% of Freight Revenues)

CP's Automotive portfolio consists of four finished vehicle traffic components: Canadian-produced vehicles that ship to the U.S. from Ontario production facilities; U.S.-produced vehicles that ship within the U.S. as well as cross border shipments to Canadian markets; vehicles from overseas that move through the Port of Vancouver to eastern Canadian markets; and Mexican-produced vehicles that ship to the U.S. and Canada. In addition to finished vehicles, CP ships machinery, pre-owned vehicles, and automotive parts. A comprehensive network of automotive compounds is utilized to facilitate final delivery of vehicles to dealers throughout Canada and in the U.S.



INTERMODAL

The Company's Intermodal business represented approximately 21% of total Freight revenues in 2020.



The following charts compare the percentage of the Company's Intermodal freight revenues generated from Canada, ports, cross border transportation, other international, and U.S. in 2020, 2019 and 2018:

2020 Intermodal Revenues
(21% of Freight Revenues)

2019 Intermodal Revenues
(21% of Freight Revenues)

2018 Intermodal Revenues
(22% of Freight Revenues)

Domestic intermodal freight consists primarily of manufactured consumer products that are predominantly moved in 53-foot containers within North America. International intermodal freight moves in marine containers to and from ports and North American inland markets.

CP's domestic intermodal business moves goods from a broad spectrum of industries including wholesale, retail, food, forest products, and various other commodities. Key service factors in domestic intermodal include consistent on-time delivery, the ability to provide door-to-door service, and the availability of value-added services. The majority of the Company's domestic intermodal business originates in Canada, where CP markets its services directly to retailers and manufacturers, providing complete door-to-door service and maintaining direct relationships with its customers. In the U.S., the Company's service is delivered mainly through intermodal marketing companies.

CP's international intermodal business consists primarily of containerized traffic moving between the ports of Vancouver, Montréal, Saint John, and inland points across Canada and the U.S. Import traffic from the Port of Vancouver is mainly long-haul business destined for eastern Canada and the U.S. Midwest and Northeast. CP works closely with the Port of Montréal, a major year-round East Coast gateway to Europe, to serve markets primarily in the U.S. Midwest and Canada. CP's access to the Port of Saint John provides the fastest rail service from the east coast to the Canadian and U.S. Midwest markets for import and export cargo from Europe, South America, and Asia.

Fuel Cost Adjustment Program

The short-term volatility in fuel prices may adversely or positively impact revenues. CP employs a fuel cost adjustment program designed to respond to fluctuations in fuel prices and help reduce volatility to changing fuel prices. Fuel surcharge revenues are earned on individual shipments and are based primarily on the price of On-Highway Diesel. As such, fuel surcharge revenues are a function of freight volumes and fuel prices. Fuel surcharge revenues accounted for approximately 4% of the Company's Freight revenues in 2020. The Company is also subject to carbon taxation systems and levies in some jurisdictions in which it operates, the costs of which are passed on to the shipper. As such, fuel surcharge revenue includes carbon taxes and levy recoveries.

Freight revenues included fuel surcharge revenues of $297 million in 2020, a decrease of $167 million, or 36%, from $464 million in the same period of 2019. This decrease was primarily due to lower fuel prices. This decrease was partially offset by the timing of recoveries from CP's fuel cost adjustment program and increased carbon tax recoveries.

Non-freight Revenues

Non-freight revenues accounted for approximately 2% of the Company's Total revenues in 2020. Non-freight revenues are generated from leasing certain assets; other arrangements, including logistical services and contracts with passenger service operators; and switching fees.

Significant Customers

For each of the years ended December 31, 2020, 2019 and 2018, the company's revenues and operations were not dependent on any major customers.

Competition

The Company is in the ground transportation and logistics business. The Company sees competition in this segment from other railways, motor carriers, ship and barge operators, and pipelines. Depending on the specific market, competing railways, motor carriers, and other competitors may exert pressure on price and service levels. The Company continually evaluates the market needs and the competition. The Company responds as it deems appropriate to provide competitive services to the market. This includes developing new offerings such as transload facilities, new train services, and other logistics services.

Seasonality

Volumes and revenues from certain goods are stronger during different periods of the year. First-quarter revenues are typically lower mainly due to winter weather conditions, closure of the Port of Thunder Bay, and reduced transportation of retail goods. Second and third quarter revenues generally improve compared to the first quarter, as fertilizer volumes are typically highest during the second quarter and demand for construction-related goods is generally highest in the third quarter. Revenues are typically strongest in the fourth quarter, primarily as a result of the transportation of grain after the harvest, fall fertilizer programs, and increased demand for retail goods moved by rail. Operating income is also affected by seasonal fluctuations. Operating income is typically lowest in the first quarter, due to lower freight revenue and higher operating costs associated with winter conditions.

Government Regulation

The Company's railway operations are subject to extensive federal laws, regulations, and rules in both Canada and the U.S., which directly affect how operations and business activities are managed.

Economic Regulation - Canada

The Company's rail operations in Canada are subject to economic regulation by the Canadian Transportation Agency (the "Agency") as delegated by the *Canada Transportation Act*. The *Canada Transportation Act* indirectly regulates rates by providing remedies for freight rates, including ancillary charges, remedies for level of service, long-haul interswitching rates, and regulated interswitching rates in Canada. The CTA regulates the MRE for the movement of export grain, construction and abandonment of railways, commuter and passenger access, and noise and vibration-related disputes.

In 2018, the *Transportation Modernization Act* became law. The legislation amended the *Canada Transportation Act* and the *Railway Safety Act* ("RSA"), among other Acts, to (1) replace the previous 160 kilometre extended interswitching limit and the competitive line rate provisions with a new long-haul interswitching regime; (2) modify the existing Level of Service remedy for shippers by instructing the Agency to determine, upon receipt of a complaint, if a railway company is fulfilling its common carrier obligation to the "highest level of service that is reasonable in the circumstances"; (3) allow the existing Service Level Agreement arbitration remedy to include the consideration of reciprocal financial penalties; (4) increase the threshold for summary Final Offer Arbitration from $750,000 to $2 million; (5) bifurcate the Volume-Related Composite Price Index component of the annual MRE determination for transportation of regulated grain, to encourage hopper car investment by CP and Canadian National Railway ("CN"); (6) mandate the installation of locomotive voice and video recorders ("LVVRs"), with statutory permission for random access by railway companies and Transport Canada ("TC") to the LVVR data in order to proactively strengthen railway safety in Canada; and (7) compel railways to provide additional data to the federal government.

Economic Regulation - U.S.

The Company's U.S. rail operations are subject to economic regulation by the Surface Transportation Board (the "STB"). The STB provides economic regulatory oversight and administers *Title 49 of the United States Code* and related *Code of Federal Regulations*. The STB has jurisdiction over railroad rate and service issues and proposed railroad mergers and other transactions.

The *STB Reauthorization Act of 2015* resulted in numerous changes to the structure and composition of the STB, removing it from under the Department of Transport and establishing the STB as an independent U.S. agency, as well as increasing STB Board membership from three to five members. Notably, the law vests in the STB certain limited enforcement powers, by authorizing it to investigate rail carrier violations on the STB Board's own initiative. The law also requires the STB to establish a voluntary binding arbitration process to resolve rail rate and practice disputes.

Safety Regulation - Canada

The Company's operations in Canada are subject to safety regulatory oversight by TC pursuant to the RSA. The RSA regulates safety-related aspects of railway operations in Canada, including the delegation of inspection, investigation and enforcement powers to TC. TC is also responsible for overseeing the transportation of dangerous goods as set out under the *Transportation of Dangerous Goods Act* ("TDGA").

After the tragic accident in Lac-Mégantic, Québec, in July 2013 involving a non-related short-line railway company, the Government of Canada implemented several measures pursuant to the RSA and the TDGA. These modifications implemented changes with respect to rules associated with securing unattended trains; the classification of crude being imported, handled, offered for transport, or transported; and the provision of information to municipalities through which dangerous goods are transported by rail. The U.S. federal government has taken similar actions. These changes did not have a material impact on CP's operating practices.

In 2015, *An Act to amend the Canada Transportation Act and the Railway Safety Act* became law. The legislation sets out minimum insurance requirements for federally regulated railways based on amounts of crude and toxic inhalation hazards ("TIH") or poisonous inhalation hazards moved. It also imposes strict liability; limits railway liability to the minimum insurance level; mandates the creation of a fund paid for by levies on crude shipments, to be utilized for damages beyond a railway's liability; allows railways and insurers to maintain rights to pursue other parties (subrogation); and prevents shifting liability to shippers from railways except through written agreement.

The Company is allocating resources, including working with public and private rail crossing owners, to meet the *Grade Crossings Regulations*, under the RSA, which came into force in 2014. The regulations require existing crossings to meet specified safety standards by November 2021.

On November 25, 2020, the Minister of Transport announced updated *Duty and Rest Period Rules for Railway Operating Employees*. The new rules, founded on modern-day fatigue management principles, reduce the length of a duty period and increase the length of the minimum rest period between shifts. The rules establish limits on the total number of duty hours, 60 hours in a seven-day period and 192 hours in a 28-day period. These requirements will be phased in 30 months from the date of the announcement. The new rules also require federally regulated railways, including the Company, to complete a Fatigue Management Plan by November 25, 2021, and implement the Fitness for Duty provisions by November 25, 2022.

Safety Regulation - U.S.

The Company's U.S. operations are subject to safety regulations enforced by the Federal Railroad Administration ("FRA"), and the Pipelines and Hazardous Materials Safety Administration ("PHMSA"). The FRA regulates safety-related aspects of the Company's railway operations in the U.S. under the Federal Railroad Safety Act, as well as rail portions of other safety statutes. The PHMSA regulates the safe transportation of all hazardous materials by rail.

On October 29, 2015, the *Surface Transportation Extension Act of 2015* ("STEA") was signed into law. The law extends, by three years, the deadline for the U.S. rail industry to implement Positive Train Control ("PTC"), a set of highly advanced technologies designed to prevent train-to-train collisions, speed-related derailments, and other accidents caused by human error by determining the precise location, direction and speed of trains, warning train operators of potential problems, and taking immediate action if an operator does not respond. Legislation passed by the U.S. Congress in 2008 mandated that PTC systems be operable by the end of 2015 on rail lines used to transport passengers or toxic-by-inhalation materials. The STEA extended the deadline to install and activate PTC to December 31, 2018, with an optional two-year extension (December 31, 2020) under certain circumstances. The Company received the two-year extension to ensure safe and effective implementation of PTC on its rail network. CP successfully implemented PTC and was PTC compliant as of December 1, 2020.

For further details on the capital expenditures associated with compliance with the PTC regulatory mandate, refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity and Capital Resources.

Various other regulators directly and indirectly affect the Company's operations in areas such as health, safety, security, environmental, and other matters.

Environmental Laws and Regulations

The Company's operations and real estate assets are subject to extensive federal, provincial, state, and local environmental laws and regulations governing emissions to the air, management and remediation of historical contaminant sites, discharges to waters and the handling, storage, transportation, and disposal of waste and other materials. If the Company is found to have violated such laws or regulations, it could have a material adverse effect on the Company's business, financial condition, or operating results. In addition, in operating a railway, it is possible that releases of hazardous materials during derailments or other accidents may occur that could cause harm to human health or to the environment. Costs of remediation, damages and changes in regulations could materially affect the Company's operating results, financial condition, and reputation.

The Company has implemented an Environmental Management System to facilitate the reduction of environmental risk. Specific environmental programs are in place to address areas such as air emissions, wastewater, management of vegetation, chemicals and waste, storage tanks, and fueling facilities. CP has also undertaken environmental impact assessments and risk assessments to identify, prevent, and mitigate environmental risks. There is continued focus on preventing spills and other incidents that have a negative impact on the environment. There is an established strategic emergency response contractor network, and spill equipment kits are located across Canada and the U.S. to ensure a rapid and efficient response in the event of an environmental incident. In addition, emergency preparedness and response plans are regularly updated and tested. In 2020, updates to CP's comprehensive oil spill response plan were made in accordance with the changes in the PHMSA regulations.

The Company has developed an environmental audit program that comprehensively, systematically, and regularly assesses the Company's facilities for compliance with legal requirements and the Company's policies for conformance to accepted industry standards. Included in this is a corrective action follow-up process and semi-annual review by senior management.

CP focuses on key strategies, identifying tactics and actions to support and operationalize our environmental commitments. The Company's strategies include:

- Implementing measures to minimize or prevent environmental impacts from our operations and facilities, and to ensure compliance with applicable environmental laws and regulations;
- Maintaining an Environmental Management System to provide consistent, effective guidance and resources to CP employees in regard to the management of air emissions, dangerous goods and waste materials, emergency preparedness and response, petroleum products management, and water and wastewater systems;
- Reducing environmental and safety risk through business processes to identify and mitigate potential environmental impacts related to all CP operations and activities;
- Ensuring that new or altered operations and other business activities are evaluated, planned, permitted in accordance with applicable regulations, and executed to mitigate environmental risk;
- Engaging with relevant stakeholders to consider and discuss CP's environmental management practices and environmental issues and concerns associated with our operations;
- Employing best practices, proven technologies, and safe operating standards for activities involving elevated environmental risk; and
- Planning and preparing for emergency responses to ensure all appropriate steps are taken in the event of a derailment, spill, or other incident involving a release to the environment.

Security

CP is subject to statutory and regulatory directives in Canada and the U.S. that address security concerns. CP plays a critical role in the North American transportation system. Rail lines, facilities and equipment, including railcars carrying hazardous materials, could be direct targets or indirect casualties of terrorist attacks, actions by criminal and non-criminal organizations, and activities by individuals. Regulations by the U.S. Department of Transportation and the Department of Homeland Security in the U.S. include speed restrictions, chain of custody and security measures, which can impact service and increase costs for the transportation of hazardous materials, especially TIH materials. New regulations published by TC under the TDGA have added requirements for railway companies to take actions to mitigate security risks of transporting dangerous goods by rail. In addition, insurance premiums for some or all of the Company's current coverage could increase significantly, or certain coverage may not be available to the Company in the future. While CP will continue to work closely with Canadian and U.S. government agencies, future decisions by these agencies on security matters or decisions by the industry in response to security threats to the North American rail network could have a material adverse effect on the Company's business, financial condition, or operating results.

CP takes the following security measures:

- CP employs its own police service that works closely with communities and other law enforcement and government agencies to promote railway safety and infrastructure security. As a railway law enforcement agency, CP Police Services is headquartered in Calgary, with police officers assigned to over 25 field offices responsible for railway police operations in six Canadian provinces and 14 U.S. states. CP Police Services operates on the CP rail network as well as in areas where CP has non-railway operations;
- CP's Police Communication Centre ("PCC") operates 24 hours a day. PCC receives reports of emergencies, dangerous or potentially dangerous conditions, and other safety and security issues from our employees, the public, and law enforcement and other government officials. PCC ensures that proper emergency responders are notified as well as governing bodies;
- CP's Security Management Plan is a comprehensive, risk-based plan modelled on and developed in conjunction with the security plan prepared by the Association of American Railroads post-September 11, 2001. Under this plan, CP routinely examines and prioritizes railway assets, physical and cyber vulnerabilities, and threats, as well as tests and revises measures to provide essential railway security. To address cyber security risks, CP implements mitigation programs that evolve with the changing technology threat environment. The Company has also worked diligently to establish backup sites to ensure a seamless transition in the event that the Company's operating systems are the target of a cyber-attack. By doing so, CP is able to maintain network fluidity; and
- CP security efforts consist of a wide variety of measures including employee training, periodic security assessments, engagement with our customers, and training of emergency responders.

Human Capital Management

CP is focused on attracting, developing, and retaining a resilient, high performing workforce that delivers on providing service for our customers. CP's culture is guided by three core values: Accountability, Diversity, and Pride. These values drive our actions. Everything we do is grounded in precision scheduled railroading and our five foundations of Provide Service, Control Costs, Optimize Assets, Operate Safely, and Develop People.

At CP, our approximately 12,000-strong team of railroaders across North America underpin CP's success and bring value to our customers and shareholders. Accordingly, Develop People is one foundation of how we do business, illustrating our focus and energy towards empowering our people, providing an engaging culture and cultivating an industry leading team.

Total Employees and Workforce

An employee is defined by the Company as an individual currently engaged in full-time, part-time, or seasonal employment with CP. The total number of employees as of December 31, 2020, was 11,890, a decrease of 804, or 6%, compared to 12,694 as at December 31, 2019, due to reduced workload as measured in GTMs and more efficient resource planning.

Workforce is defined as total employees plus contractors and consultants. The total workforce as at December 31, 2020 was 11,904, a decrease of 828, or 7%, compared to 12,732 as at December 31, 2019, due to more efficient resource planning. .

Unionized Workforce

Class I railways are party to collective bargaining agreements with various labour unions. The majority of CP's employees belong to labour unions and are subject to these agreements. CP manages collaborative relationships with union members in both Canada and the U.S.

CP employs approximately 12,000 active employees across North America with three-quarters based in Canada and the remainder in the United States. Unionized employees represent nearly 72% of our workforce and are represented by 36 active bargaining units.

Canada

Within Canada there are eight bargaining units representing approximately 6,600 Canadian unionized active employees. From time to time, we negotiate to renew collective agreements with various unionized groups of employees. In such cases, the collective agreements remain in effect until the bargaining process has been exhausted (pursuant to the *Canada Labour Code*). One agreement is pending ratification and one other remains open for renewal and is

under negotiation as of December 31, 2020. Agreements are in place with the other six bargaining units in Canada, two are effective until December 31, 2021, and four are effective until 2022.

U.S.

In the U.S., there are currently 28 active bargaining units on three subsidiary railroads representing nearly 1,900 unionized active employees. Nine agreements are open for amendment and are under negotiation at this time. 15 agreements will become amendable in 2021 and one in 2022. Negotiations have been concluded with respect to the remaining three agreements which will expire beyond 2022.

Health and Safety

CP is an industry leader in rail safety and we are committed to protecting our employees, our communities, our environment, and our customers' goods. This is CP's 15th consecutive year as industry leader in train accident statistics. Operate Safely is one of our five foundations of successful railroading and it starts with knowing and following the rules. Aside from running trains, many of our employees work in yards, terminals, and shops across our network with machinery and heavy equipment, or in extreme weather conditions. Their safety and security is of utmost importance to CP and is foundational to the way we view employee safety education and training. CP HomeSafe™ is an initiative designed to improve our safety culture by tapping into the human side of safety and promoting both safety engagement and feedback. HomeSafe™ puts everyone on the same level and empowers all employees to begin a safety conversation, no matter the rank or position. Safety performance is disclosed publicly on a quarterly basis using standardized metrics set out by the FRA. Additional information on FRA safety measures is included in Performance Indicators in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Talent Management

CP's approach for talent management begins with our Human Resources department, which oversees recruitment, hiring, development, engagement, and retention with the current and future workforce and leadership of CP.

The Management Resources and Compensation Committee of the Board of Directors reviews and informs CP's compensation plan and programming, and makes recommendations to the Board on succession planning for senior management and processes to identify, develop, and retain executive talent. Additionally, as part of CP's succession planning program, senior leaders are actively engaged in building the pool of future leaders, and present their development plans to the Board.

CP maintains a number of internal policies related to recruitment, relocation, compensation, employment equity, and diversity and inclusion. The effective implementation of these policies alongside our ongoing workforce initiatives ensures CP's attraction and recruitment, employee development, succession, engagement, and diversity and inclusion practices are consistent and aligned with CP's commitments, foundations and values.

Attraction and Recruitment

With a rail network spanning Canada and the U.S., we employ a number of recruitment and retention tactics to attract the best and diverse talent across North America. CP offers many rewarding career opportunities in a variety of roles within the organization in both operating and support functions. We base our recruitment strategy on workforce planning needs, and our focus is on ensuring that we have a diverse candidate pool to fill our open positions.

CP recognizes the valuable skills and experience that veterans have gained from serving their country. Our veteran program was recognized as part of Canada's Best Diversity Employers® of 2020 and we were named part of the top 10 Military Friendly® employers in the U.S. for 2021.

CP tracks recruitment performance and success rates to better understand which tactics, benefits, and strategic partnerships are most successful in bringing in and retaining new talent.

Talent Development & Succession

As part of our core foundation and commitment to Develop People, we encourage all employees to take an active role in their career planning and development. We believe that investing in our employees leads to improved workplace morale and fosters a supportive working environment.

Training and Development

CP offers a variety of training courses through our Learning Management System that provides online and technical training, including mandatory, role-specific and voluntary courses. This enables our employees to succeed in their current roles and prepares them for career advancement opportunities.

Non-union employees also complete annual performance management and development action plans with their supervisors to set individual goals and track progress against Company expectations as well as long-term career goals.

CP offers key development programs for current and emerging leaders. For our Operations groups, CP's Leadership Management Trainee program provides internal and external candidates with comprehensive training on the critical skills necessary for railway operations and people leadership. Upon successful completion of the six to seven month program, participants qualify for a variety of operations frontline leader roles.

Leadership skills are long considered a core trait of CP employees. We encourage staff to develop leadership expertise as part of ongoing training and development through regular performance reviews and CP-specific skill development programs. Our Consequence Leadership training program focuses on creating a high-performance culture and feedback-rich environment at CP. The online learning module and interactive workshops introduce a practical set of tools and thought processes for instilling communications skills and management capabilities in our leaders and our employees. The goal is to create a constructive environment that improves bottom-line results and enables employees to perform at their best. To complement the Consequence Leadership training program, CP has developed in-house training to enhance leadership capabilities among leaders across the organization to ensure a long-term focus on our foundation to Develop People. For employees interested in further developing their leadership skills, CP also offers on-demand learning through Harvard ManageMentor.

Succession Management

CP undergoes extensive succession planning for both executive and management level positions. We measure the retention of our most critical positions and develop potential successors to be ready to fill critical roles as soon as positions become available. Looking ahead, CP is developing succession and development goals for the many high-potential successors for all critical positions, and will begin to measure the success rate of placing emerging leaders in those key positions.

Retention & Engagement

CP's career development programs and diverse and inclusive workplace culture help drive employee retention and engagement. In addition, we have adopted a performance-based culture, and reward employees for dedication and hard work. CP's competitive compensation and benefits packages are benchmarked yearly to ensure they reflect changes in the market. CP offers employees a wellness and fitness subsidy program. Along with our community investment programs, CP's employee programs and resources illustrate our dedication to our employees' well-being and satisfaction with their careers at CP.

CP periodically administers non-union surveys to measure employee perspectives and engagement. In 2019, we administered a new Employee Perspective survey to continue gathering actionable data regarding employee satisfaction and engagement, and to gain insight into what motivates and inspires our employees. These surveys help CP to better tailor our development and retention efforts.

Employee recognition programs are in place to celebrate wins and highlight the great work of our employees. CP's CEO on the Spot awards, Annual Safety Awards and Broken Wheel Awards recognize good performance, heroic acts, milestones, and safety excellence with cash rewards. In addition, CP's annual CEO Awards of Excellence and gala recognizes employees who have gone above and beyond the call of duty to exemplify CP's five foundations and support our focus on providing superior service to our customers and driving value for our shareholders.

Diversity and Inclusion

Diversity is one of our core values at CP. We believe that different backgrounds, experiences, and perspectives enhance creativity and innovation and encourage diversity of thought in the workplace. Fostering an inclusive environment where all employees feel empowered to strive for and achieve success supports our high-performance culture and is integral to our growth and success as an organization.

CP recognizes the importance of Board member diversity as a critical component of objective oversight and continuous improvement. As of December 31, 2020, women represented 46% of CP's 2020 Board Membership.

CP has regulatory requirements to report on workforce diversity representation in Canada (Employment Equity Act) and the U.S. (Equal Employment Opportunity Commission). CP currently collects diversity data on the following categories: women, persons with disabilities, minorities (visible minorities), and Indigenous peoples (Canada) from employees through voluntary self-disclosure. CP continues to focus our efforts on attracting, recruiting, and developing a diverse workforce. This data is shared in various disclosures and government reporting, internally with employees and leaders as well as our Board of Directors.

Year over Year Diversity Representation

Canada and U.S. Diversity Percentages[1]	2020	2019	2018
Women	**10%**	10%	10%
Persons with disabilities	**3%**	3%	2%
Minorities (visible minorities)[2]	**13%**	13%	13%
Indigenous peoples (Canada only)	**3%**	4%	3%

[1] Percentages are based on total workforce (total number of active employees) at year-end.

[2] Minority is a term used in the U.S., Visible Minority is a term used in Canada.

CP continues to work collaboratively with our employees, communities along our network, and partner organizations in Canada and the U.S. to progress and support CP's commitment toward a more representative and inclusive workplace. Some of our initiatives include:

- Establishing three diversity councils (Indigenous, Gender and Racial). Each council is chaired by a CP executive and represents a diverse group of employees. The councils work to ensure we consider diversity and inclusion when we make decisions, provide feedback on corporate directions and promote initiatives that relate to each council's area of focus;
- Continuing our existing partnerships with associations and organizations that attract, recruit, and support skilled immigrants, transitioning veterans, persons with disabilities, and women;
- Working with Indigenous groups to develop relationships that are more meaningful, create targeted outreach programs and employment opportunities, and better understand their history, culture, and opportunities for collaboration.
- Supporting the development and advancement of women at CP; and
- Increasing employee awareness regarding CP's workplace diversity and inclusion practices through communications, education, and training.

Further, CP recently published a Diversity Commitment. This commitment re-enforces the efforts we have made, and will continue to make, in our journey to becoming a more diverse and inclusive company, one that we and those we do business with are proud to be a part.

We pride ourselves on offering a diverse workplace with a variety of careers in both our corporate and field locations. We recruit and hire talent based on relevant skills and experience, and seek to attract the highest quality candidates regardless of gender, age, cultural heritage, or ethnic origin. One of our primary objectives is attracting, recruiting, retaining, and developing a workforce representative of the communities in which we operate.

Available Information

CP makes available on or through its website www.cpr.ca free of charge, its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such reports are filed with or furnished to the U.S. Securities and Exchange Commission ("SEC"). Our website also contains charters for each of the committees of our Board of Directors, our corporate governance guidelines and our Code of Business Ethics. This Form 10-K and other SEC filings made by CP are also accessible through the SEC's website at www.sec.gov.

The Company has included the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") certifications regarding the Company's public disclosure required by Section 302 of the *Sarbanes-Oxley Act of 2002* and applicable securities laws in Canada as Exhibits to this annual report.

All references to our websites contained herein do not constitute incorporation by reference of information contained on such websites and such information should not be considered part of this document.

ITEM 1A. RISK FACTORS

The risks set forth in the following risk factors could have a materially adverse effect on the Company's business, financial condition, results of operations, and liquidity, and could cause those results to differ materially from those expressed or implied in the Company's forward-looking statements and forward-looking information (collectively, "forward-looking statements").

The information set forth in this Item 1A. Risk Factors should be read in conjunction with the rest of the information included in this annual report, including Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8. Financial Statements and Supplementary Data.

Business Risks

The COVID-19 pandemic has negatively affected and may continue to negatively affect the Company's business and operating results. The effects of the COVID-19 pandemic on consumer demand resulted in lower volumes in several of the Company's lines of business, including Energy, chemicals and plastics, Metals, minerals and consumer products, and Automotive. The future impacts of COVID-19 on the Company's business or operating and financial results are unpredictable and cannot be identified or assessed with certainty at this time. The COVID-19 pandemic has adversely affected the global economy and resulted in a widespread economic downturn which has adversely impacted and could continue to adversely impact demand for our services and otherwise cause interruptions, including fluctuations to commodity prices, disruptions or restrictions on the ability to transport freight in the ordinary course, temporary closures of facilities and ports, or the facilities and ports of our customers, partners, suppliers or other third-party service providers, and/or changes to export/import restrictions. The pandemic caused by COVID-19 has impacted and may continue to impact the seasonal trends that typically characterize our revenues and operating income. There is no assurance that the outbreak will not continue to have a material and adverse impact on our business or results of operations. Additionally, our operations could be further negatively affected if a significant number of our employees are unable to perform their normal duties, including because of contracting COVID-19 or based on further direction from governments, public health authorities or regulatory agencies. The extent of the impact, if any, will depend on developments, many of which are beyond our control, including actions taken by governments, financial institutions, monetary policy authorities, and public health authorities to contain and respond to public health concerns and general economic conditions as a result of the pandemic. The COVID-19 pandemic may also result in continued substantial market volatility and declines, which could adversely impact future net periodic benefit costs and funding requirements of CP's pension plans. Furthermore, certain impacts of the COVID-19 pandemic, including demand for our services and to economic conditions generally, could continue following the pandemic or the expiration or termination of government actions in respect of the pandemic.

We will continue to actively monitor the situation and may take further actions that alter our business operations as may be required or recommended by federal, provincial, state or local authorities, or that we determine are in the best interests of our employees, customers, partners, suppliers, shareholders and other stakeholders. We cannot be certain of potential effects that any such alterations or modifications may have on our business or operating and financial results in future fiscal periods.

To the extent COVID-19 adversely affects our business or operating and financial results, it may also have the effect of heightening many of the other risks described above and below.

As a common carrier, the Company is required by law to transport dangerous goods and hazardous materials, which could expose the Company to significant costs and claims. Railways, including CP, are legally required to transport dangerous goods and hazardous materials as part of their common carrier obligations regardless of risk or potential exposure to loss. CP transports dangerous goods and hazardous materials, including but not limited to crude oil, ethanol and TIH materials such as chlorine gas and anhydrous ammonia. A train accident involving hazardous materials could result in significant claims against CP arising from personal injury, property or natural resource damage, environmental penalties and remediation obligations. Such claims, if insured, could exceed the existing insurance coverage commercially available to CP, which could have a material adverse effect on CP's financial condition, operating results, and liquidity. CP is also required to comply with rules and regulations regarding the handling of dangerous goods and hazardous materials in Canada and the U.S. Noncompliance with these rules and regulations can subject the Company to significant penalties and could factor in litigation arising out of a train accident. Changes to these rules and regulations could also increase operating costs, reduce operating efficiencies and impact service delivery.

The Company is subject to significant governmental legislation and regulation over commercial, operating and environmental matters. The Company's railway operations are subject to extensive federal laws, regulations and rules in both Canada and the U.S. Operations are subject to economic and safety regulations in Canada primarily by the Agency and TC. The Company's U.S. operations are subject to economic and safety regulation by the STB and the FRA. Various other regulators directly and indirectly affect the Company's operations in areas such as health, safety, security, environmental and other matters. Additional economic regulation of the rail industry by these regulators or the Canadian and U.S. federal and state or provincial legislative bodies, whether under new or existing laws, could have a significant negative impact on the Company's ability to determine prices for rail services and result in a material adverse effect in the future on the Company's business, financial position, results of operations, and liquidity in a particular year or quarter. This potential material adverse effect could also result in reduced capital spending on the Company's rail network or in abandonment of lines.

The Company's compliance with safety and security regulations may result in increased capital expenditures and operating costs. For example, compliance with the *Rail Safety Improvement Act of 2008* has resulted in additional capital expenditures associated with the statutorily mandated implementation of PTC. In addition to increased capital expenditures, implementation of such regulations may result in reduced operational efficiency and service levels, as well as increased operating expenses.

The Company's operations are subject to extensive federal, state, provincial and local environmental laws concerning, among other matters, emissions to the air, land and water and the handling of hazardous materials and wastes. Violation of these laws and regulations can result in significant fines and penalties, as well as other potential impacts on CP's operations. These laws can impose strict, and in some circumstances, joint and several liability on both current and former owners, and on operators of facilities. Such environmental liabilities may also be raised by adjacent landowners or third parties. In addition, in operating a railway, it is possible that releases of hazardous materials during derailments or other accidents may occur that could cause harm to human health or to the environment. Costs of remediation, damages and changes in regulations could materially affect the Company's operating results and reputation. The Company has been, and may in the future be, subject to allegations or findings to the effect that it has violated, or is strictly liable under, environmental laws or regulations. The Company currently has obligations at existing sites for investigation, remediation and monitoring, and will likely have obligations at other sites in the future. The actual costs associated with both current and long-term liabilities may vary from the Company's estimates due to a number of factors including, but not limited to changes in: the content or interpretation of environmental laws and regulations; required remedial actions; technology associated with site investigation or remediation; and the involvement and financial viability of other parties that may be responsible for portions of those liabilities.

The Company faces competition from other transportation providers and failure to compete effectively could adversely affect financial results. The Company faces significant competition for freight transportation in Canada and the U.S., including competition from other railways, motor carriers, ship and barge operators, and pipelines. Competition is based mainly on quality of service, freight rates and access to markets. Other transportation modes generally use public rights-of-way that are built and maintained by government entities, while CP and other railways must use internal resources to build and maintain their rail networks. Competition with the trucking industry is generally based on freight rates, flexibility of service and transit time performance. Any future improvements or expenditures materially increasing the quality or reducing the cost of alternative modes of transportation, or legislation that eliminates or significantly reduces the burden of the size or weight limitations currently applicable to trucking carriers, could have a material adverse effect on CP's financial results.

The operations of carriers with which the Company interchanges may adversely affect operations. The Company's ability to provide rail services to customers in Canada and the U.S. also depends upon its ability to maintain cooperative relationships with connecting carriers with respect to, among other matters, revenue division, car supply and locomotive availability, data exchange and communications, reciprocal switching, interchange, and trackage rights. Deterioration in the operations or services provided by connecting carriers, or in the Company's relationship with those connecting carriers, could result in CP's inability to meet customers' demands or require the Company to use alternate train routes, which could result in significant additional costs and network inefficiencies and adversely affect our business, operating results, and financial condition.

The Company may be subject to litigation and other claims that could result in significant expenditures. By nature of its operations, the Company is exposed to potential for litigation and other claims, including personal injury claims, labour and employment disputes, commercial and contract disputes, environmental liability, freight claims and property damage claims. Accruals are made in accordance with applicable accounting standards and based on an ongoing assessment of the likelihood of success of the claim together with an evaluation of the damages or other monetary relief sought. Material changes to litigation trends, a catastrophic rail incident or series of incidents involving freight loss, property damage, personal injury, environmental liability, or other claims, and other significant matters could have a material adverse impact to the Company's results of operations, financial position and liquidity, in each case, to the extent not covered by insurance.

The Company may be affected by acts of terrorism, war, or risk of war. CP plays a critical role in the North American transportation system and therefore could become the target for acts of terrorism or war. CP is also involved in the transportation of hazardous materials, which could result in CP's equipment or infrastructure being direct targets or indirect casualties of terrorist attacks. Acts of terrorism, or other similar events, any government response thereto, and war or risk of war could cause significant business interruption to CP and may adversely affect the Company's results of operations, financial condition and liquidity.

Severe weather or natural disasters could result in significant business interruptions and costs to the Company. CP is exposed to severe weather conditions and natural disasters including earthquakes, hurricanes, floods, fires, avalanches, mudslides, extreme temperatures and significant precipitation that may cause business interruptions that can adversely affect the Company's entire rail network. This could result in increased costs, increased liabilities and decreased revenues, which could have a material adverse effect on the Company's results of operations, financial condition, and liquidity. Insurance maintained by the Company to protect against loss of business and other related consequences resulting from these natural occurrences is subject to coverage limitations, depending on the nature of the risk insured. This insurance may not be sufficient to cover all of the Company's damages or damages to others, and may not continue to be available at commercially reasonable rates. Even with insurance, if any natural occurrence leads to a catastrophic interruption of services, the Company may not be able to restore services without a significant interruption in operations.

Human Capital Risks

The availability of qualified personnel could adversely affect the Company's operations. Changes in employee demographics, training requirements and the availability of qualified personnel, particularly locomotive engineers and trainpersons, could negatively impact the Company's ability to meet demand for rail services. Unpredictable increases in the demand for rail services may increase the risk of having insufficient numbers of trained personnel, which could have a material adverse effect on the Company's results of operations, financial condition and liquidity. In addition, changes in operations and other technology improvements may significantly impact the number of employees required to meet the demand for rail services.

Strikes or work stoppages could adversely affect the Company's operations. Class I railways are party to collective bargaining agreements with various labour unions. The majority of CP's employees belong to labour unions and are subject to these agreements. Disputes with regard to the terms of these agreements or the Company's potential inability to negotiate acceptable contracts with these unions could result in, among other things, strikes, work stoppages, slowdowns or lockouts, which could cause a significant disruption of the Company's operations and have a material adverse effect on the Company's results of operations, financial condition and liquidity. Additionally, future national labour agreements, or provisions of labour agreements related to health care, could significantly increase the Company's costs for health and welfare benefits, which could have a material adverse impact on its financial condition and liquidity.

Volatility Risks

The Company may be affected by fluctuating fuel prices. Fuel expense constitutes a significant portion of the Company's operating costs. Fuel prices can be subject to dramatic fluctuations, and significant price increases could have a material adverse effect on the Company's results of operations. The Company currently employs a fuel cost adjustment program to help reduce volatility in changing fuel prices, but the Company cannot be certain that it will always be able to fully mitigate rising or elevated fuel costs through this program. Factors affecting fuel prices include worldwide oil demand, international politics, weather, refinery capacity, supplier and upstream outages, unplanned infrastructure failures, environmental and sustainability policies, and labour and political instability.

Technology Risks

The Company relies on technology and technological improvements to operate its business. Information technology is critical to all aspects of CP's business. If the Company were to experience a significant disruption or failure of one or more of its information technology or communications systems (either as a result of an intentional cyber or malicious act, or an unintentional error) it could result in service interruptions or other failures, misappropriation of confidential information and deficiencies, which could have a material adverse effect on the Company's results of operations, financial condition, and liquidity. If CP is unable to acquire or implement new technology, the Company may suffer a competitive disadvantage, which could also have an adverse effect on its results of operations, financial condition, and liquidity.

Supply Chain Risks

Disruptions within the supply chain could negatively affect the Company's operational efficiencies and increase costs. The North American transportation system is integrated. CP's operations and service may be negatively impacted by service disruptions of other transportation links, such as ports, handling facilities, customer facilities and other railways. A prolonged service disruption at one of these entities could have a material adverse effect on the Company's results of operations, financial condition, and liquidity.

The Company is dependent on certain key suppliers of core railway equipment and materials that could result in increased price volatility or significant shortages of materials, which could adversely affect results of operations, financial condition, and liquidity. Due to the complexity and specialized nature of core railway equipment and infrastructure (including rolling stock equipment, locomotives, rail and ties), there can be a limited number of suppliers of rail equipment and materials available. Should these specialized suppliers cease production or experience capacity or supply shortages, this concentration of suppliers could result in CP experiencing cost increases or difficulty in obtaining rail equipment and materials, which could have a material adverse effect on the Company's results of operations, financial condition and liquidity. Additionally, CP's operations are dependent on the availability of diesel fuel. A significant fuel supply shortage arising from production decreases, increased demand in existing or emerging foreign markets, disruption of oil imports, disruption of domestic refinery production, damage to refinery or pipeline infrastructure, political unrest, war or other factors could have a material adverse effect on the Company's results of operations, financial position and liquidity in a particular year or quarter.

General Risk Factors

Global Risks

Global economic conditions could negatively affect demand for commodities and other freight transported by the Company. A decline or disruption in domestic, cross border or global economic conditions that affect the supply or demand for the commodities that CP transports may decrease CP's freight volumes and may result in a material adverse effect on CP's financial or operating results and liquidity. Economic conditions resulting in bankruptcies of one or more large customers could have a significant impact on CP's financial position, results of operations, and liquidity in a particular year or quarter.

The Company may be directly and indirectly affected by the impacts of global climate change. There is potential for significant impacts to CP's business and rail infrastructure due to changes in global climate conditions. Increasing frequency, intensity and duration of extreme weather events such as

flooding, storms and forest fires may result in substantial costs to respond during the event, to recover from the event and possibly to modify existing or implementing new infrastructure to prevent recurrence. The Company is currently subject to emerging regulatory programs that place a price on carbon emissions associated with railway operations in Canada. Government bodies at the provincial and federal level are imposing carbon taxation systems and cap and trade market mechanisms in the Canadian jurisdictions in which CP operates. As a significant consumer of diesel fuel, an escalating price on carbon emissions will lead to a corresponding increase of the Company's business costs. Programs that place a price on carbon emissions or other government restrictions on certain market sectors may further impact current and potential customers including thermal coal, petroleum crude oil and renewable fuel sectors. Introduction of, or changes to, regulations by government bodies in response to these anticipated impacts could result in a significant increase in expenses and could adversely affect our business performance, results of operations, financial position, and liquidity.

Liquidity Risks

The state of capital markets could adversely affect the Company's liquidity. Weakness in the capital and credit markets could negatively impact the Company's access to capital. From time to time, the Company relies on the capital markets to provide some of its capital requirements, including the issuance of long-term debt instruments and commercial paper. Significant instability or disruptions of the capital markets and the credit markets, or deterioration of the Company's financial condition due to internal or external factors could restrict or eliminate the Company's access to, and/or significantly increase the cost of, various financing sources, including bank credit facilities and issuance of corporate bonds. Instability or disruptions of the capital markets and deterioration of the Company's financial condition, alone or in combination, could also result in a reduction in the Company's credit rating to below investment grade, which could also further prohibit or restrict the Company from accessing external sources of short-term and long-term debt financing, and/or significantly increase the associated costs.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Network Geography

The Company's network in Canada extends from the Port of Vancouver on Canada's Pacific Coast to the Port of Montréal and eastern Québec up into the Port of Saint John, New Brunswick via haulage, and to the U.S. industrial centres of Chicago, Illinois; Detroit, Michigan; Buffalo and Albany, New York; Kansas City, Missouri; and Minneapolis, Minnesota.

The Company's network is composed of three primary corridors: Western, Central and Eastern.

The Western Corridor: Vancouver to Thunder Bay

Overview – The Western Corridor links Vancouver with Thunder Bay, which is the Western Canadian terminus of the Company's Eastern Corridor. With service through Calgary, the Western Corridor is an important part of the Company's routes between Vancouver and the U.S. Midwest, and between Vancouver and eastern Canada. The Western Corridor provides access to the Port of Thunder Bay, Canada's primary Great Lakes bulk terminal.

Products – The Western Corridor is the Company's primary route for bulk and resource products traffic from western Canada to the Port of Vancouver for export. CP also handles significant volumes of international intermodal containers and domestic general merchandise traffic.

Feeder Lines – CP supports its Western Corridor with four significant feeder lines: the "Coal Route", which links southeastern B.C. coal deposits to the Western Corridor and to coal terminals at the Port of Vancouver; the "Edmonton-Calgary Route", which provides rail access to Alberta's Industrial Heartland (north of Edmonton, Alberta) in addition to the petrochemical facilities in central Alberta; the "Pacific CanAm Route", which connects Calgary and Medicine Hat in Alberta with Pacific Northwest rail routes at Kingsgate, B.C. via the Crowsnest Pass in Alberta; and the "North Main Line Route" that provides rail service to customers between Portage la Prairie, Manitoba, and Wetaskiwin, Alberta, including intermediate stations at Yorkton and Saskatoon in Saskatchewan. This line is an important collector of Canadian grain and fertilizer, serving the potash mines located east and west of Saskatoon and many high-throughput grain elevators and processing facilities. In addition, this line provides direct access to refining and upgrading facilities at Lloydminster, Alberta, and western Canada's largest pipeline terminal at Hardisty, Alberta.

Connections – The Company's Western Corridor connects with the Union Pacific Railroad ("UP") at Kingsgate and with Burlington Northern Santa Fe Railway ("BNSF") at Coutts, Alberta, and at New Westminster and Huntingdon in B.C. This corridor also connects with CN at many locations including Thunder Bay, Winnipeg, Manitoba, Regina and Saskatoon in Saskatchewan, Red Deer, Camrose, Calgary and Edmonton in Alberta, Kamloops and several locations in the Greater Vancouver area in B.C.

Yards and Repair Facilities – CP supports rail operations on the Western Corridor with main rail yards at Vancouver, Calgary, Edmonton, Moose Jaw in Saskatchewan, Winnipeg and Thunder Bay. The Company has locomotive and railcar repair facilities at Golden in B.C., Vancouver, Calgary, Moose Jaw and Winnipeg. CP also has major intermodal terminals at Vancouver, Calgary, Edmonton, Regina and Winnipeg.

The Central Corridor: Moose Jaw and Winnipeg to Chicago and Kansas City

Overview – The Central Corridor connects with the Western Corridor at Moose Jaw and Winnipeg. By running south to Chicago and Kansas City, through the Twin Cities of Minneapolis and St. Paul, Minnesota, and through Milwaukee, Wisconsin, CP provides a direct, single-carrier route between western Canada and the U.S. Midwest, providing access to Great Lakes and Mississippi River ports. From La Crosse, Wisconsin, the Central Corridor continues south towards Kansas City via the Quad Cities (Davenport and Bettendorf in Iowa, and Rock Island and Moline in Illinois), providing an efficient route for traffic destined for southern U.S. and Mexican markets. CP's Kansas City line also has a direct connection into Chicago and by extension to points east on CP's network such as Toronto, Ontario and the Port of Montréal in Québec.

Products – Traffic transported on the Central Corridor includes intermodal containers from the Port of Vancouver, fertilizers, chemicals, crude, frac sand, Automotive, and Grain and other agricultural products.

Feeder Lines – The Company has operating rights over BNSF tracks between Minneapolis and St. Paul along with connectivity to the twin ports of Duluth, Minnesota and Superior, Wisconsin. CP maintains its own yard facilities that provide an outlet for grain from the U.S. Midwest to the grain terminals at these ports. This is a strategic entry point for large dimensional shipments that can be routed via CP's network to locations such as Alberta's Industrial Heartland to serve the needs of the oil sands and energy industry. CP's route from Winona, Minnesota, to Tracy, Minnesota, provides access to key agricultural and industrial commodities. CP's feeder line between Drake and New Town in North Dakota is geographically situated in a highly strategic region for Bakken oil production. CP also owns two significant feeder lines in North Dakota and western Minnesota operated by the Dakota Missouri Valley and Western Railroad and the Northern Plains Railroad, respectively. Both of these short lines are also active in providing service to agricultural and Bakken-oil-related customers.

Connections – The Company's Central Corridor connects with all major railways at Chicago. Outside of Chicago, CP has major connections with BNSF at Minneapolis, Minot, North Dakota, and the Duluth-Superior Terminal and with UP at St. Paul and Mankato, Minnesota. CP connects with CN at Milwaukee and Chicago. At Kansas City, CP connects with Kansas City Southern ("KCS"), BNSF, Norfolk Southern Railway ("NS") and UP. CP's Central Corridor also links to several short-line railways that primarily serve grain and coal producing areas in the U.S., and extend CP's market reach in the rich agricultural areas of the U.S. Midwest. A haulage arrangement with Genesee & Wyoming Inc., provides Intermodal service to Jeffersonville, Ohio.

Yards and Repair Facilities – The Company supports rail operations on the Central Corridor with main rail yards in Chicago, Milwaukee, St. Paul and Glenwood in Minnesota, and Mason City and Davenport in Iowa. In addition, CP has a major locomotive repair facility at St. Paul and car repair facilities at St. Paul and Chicago. CP shares a yard with KCS in Kansas City. CP owns 49% of the Indiana Harbor Belt Railroad, a switching railway serving Greater Chicago and northwest Indiana. CP is also part owner of the Belt Railway Company of Chicago, which is the largest intermediate switching terminal railroad in the U.S. CP has major intermodal terminals in Minneapolis and Chicago as well as a dried distillers' grains transload facility that complements the service offering in Chicago.

The Eastern Corridor: Thunder Bay to Eastern Québec, Detroit and Albany

Overview – The Eastern Corridor extends from Thunder Bay through to the Port of Montréal, Searsport, Maine and the Port of Saint John, via haulage agreement, and from Toronto to Chicago via Detroit or Buffalo. The Company's Eastern Corridor provides shippers direct rail service from Toronto, Montréal, and Saint John to Calgary and Vancouver via the Company's Western Corridor and to the U.S. via the Central Corridor. This is a key element of the Company's transcontinental intermodal service. The corridor also supports the Company's market position at the Port of Montréal by providing one of the shortest rail routes for European cargo destined to the U.S. Midwest, using the CP-owned route between Montréal and Detroit, coupled with a trackage rights arrangement on NS tracks between Detroit and Chicago or the CP-owned route between Montréal and Buffalo coupled with a haulage arrangement on CSX Corporation ("CSX") tracks between Buffalo and Chicago. CP's 2019 acquisition of CMQ Canada and the 2020 acquisition of CMQ U.S. extends access through southern and eastern Québec to Saint John, New Brunswick and the U.S. Northeast including Searsport, Maine. In 2020, CP acquired full ownership of the DRTP. The 1.6-mile tunnel linking Windsor and Detroit will continue to be operated by CP.

Products – Major traffic categories transported in the Eastern Corridor include Forest products, chemicals and plastics, crude, ethanol, Metals, minerals and consumer products, Intermodal, automotive products and general merchandise.

Feeder Lines – A major feeder line serves the steel industry at Hamilton, Ontario and provides connections with both CSX and NS at Buffalo. The Delaware & Hudson Railway Company, Inc. ("D&H") feeder line extends from Montréal to Albany.

Connections – The Eastern Corridor connects with a number of short-line railways including routes from Montréal to Québec City, Québec and Brownsville Junction, Maine to Saint John, New Brunswick. Connections are also made with PanAm Southern at Mechanicville, New York, for service to the Boston and New England areas, the Vermont Railway at Whitehall, New York, and at Northern Main Junction. Through haulage arrangements, CP has service to Fresh Pond, New York, to connect with New York & Atlantic Railway as well as direct access to the Bronx and Queens, New York. CP can also access Philadelphia as well as a number of short-lines in Pennsylvania. Connections are also made with CN at a number of locations, including Sudbury, North Bay, Windsor, London, Hamilton and Toronto in Ontario, and Montréal in Québec. CP also connects in New York with the two eastern Class I railways; NS and CSX at Buffalo, NS at Schenectady and CSX at Albany.

Yards and Repair Facilities – CP supports its rail operations in the Eastern Corridor with major rail yards at Sudbury, Toronto, London and Montréal. The Company has locomotive repair facilities at Montréal and Toronto and car repair facilities at Thunder Bay, Toronto and Montréal. The Company's largest intermodal facility is located in the northern Toronto suburb of Vaughan and serves the Greater Toronto and southwestern Ontario areas. CP also operates intermodal terminals at Montréal and Detroit. CP also has transload facilities in Agincourt, Milton, and Hamilton, Ontario and in Montréal, Québec to meet a variety of commodity needs in these areas.

Right-of-Way

The Company's rail network is standard gauge, which is used by all major railways in Canada, the U.S. and Mexico. Continuous welded rail is used on the core main line rail network.

CP uses different train control systems on portions of the Company's owned track, depending on the volume of rail traffic. Remotely controlled centralized traffic control signals are used in various corridors to authorize the movement of trains. CP has implemented PTC on 2,117 miles of its U.S. network.

In other corridors, train movements are directed by written instructions transmitted electronically and by radio from rail traffic controllers to train crews. In some specific areas of intermediate traffic density, CP uses an automatic block signalling system in conjunction with written instructions from rail traffic controllers.

Network Investment

The Company continually assesses its network to ensure appropriate capacity to meet market demand. As part of CP's annual capital program, the Company has made substantial investments to support current and future volumes, including upgrading the network to handle longer and heavier trains, such as extending sidings to accommodate new train lengths. The Company's operating metrics, such as average train speed, length, and weight, demonstrate efficient utilization of network capacity, discussed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Performance Indicators.

Track and Infrastructure

CP operates on a network of approximately 13,000 miles of track, of which 2,300 miles CP accesses under trackage rights. The Company's owned track miles include leases with wholly owned subsidiaries where the term of the lease exceeds 99 years. CP's track network represents the size of the Company's operations that connects markets, customers and other railways. Of the total mileage operated, approximately 5,400 miles are located in western Canada, 2,500 miles in eastern Canada (including CMQ Canada), 4,500 miles in the U.S. Midwest and 700 miles in the U.S. Northeast. CP's network accesses the U.S. markets directly through four wholly owned subsidiaries: Soo Line Railroad Company ("Soo Line"), a Class I railway operating in the U.S. Midwest; the Dakota, Minnesota & Eastern Railroad ("DM&E"), which operates in the U.S. Midwest; the D&H, which operates between eastern Canada and the U.S. Northeast; and the CMQ U.S., which operates in the U.S. Northeast.

At December 31, 2020, the breakdown of CP operated track miles is as follows:

	Total
First main track	13,046
Second and other main track	1,051
Passing sidings and yard track	4,261
Industrial and way track	878
Total track miles	**19,236**

Rail Facilities

CP operates numerous facilities including: terminals for intermodal, transload, automotive and other freight; classification rail yards for train-building and switching, storage-in-transit and other activities; offices to administer and manage operations; dispatch centres to direct traffic on the rail network; crew quarters to house train crews along the rail line; shops and other facilities for fuelling; maintenance and repairs of locomotives; and facilities for maintenance of freight cars and other equipment. The Company continues to invest in terminal upgrades and new facilities to accommodate incremental growth in volumes, such as creating additional capacity with the redesign of the classification yard at Alyth in Calgary. The Company's average terminal dwell is an indicator of efficient utilization of yard capacity, discussed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Performance Indicators. Typically in all of our major yards, CP Police Services has offices to ensure the safety and security of the yards and operations.

The following table includes the major yards, terminals and transload facilities on CP's network:

Classification Yards	Intermodal Terminals	Transload Facilities
Vancouver, British Columbia	Vancouver, British Columbia	Vancouver, British Columbia
Calgary, Alberta	Calgary, Alberta	Toronto, Ontario
Edmonton, Alberta	Edmonton, Alberta	Hamilton, Ontario
Moose Jaw, Saskatchewan	Regina, Saskatchewan	Côte Saint-Luc, Québec
Winnipeg, Manitoba	Winnipeg, Manitoba	
Toronto, Ontario	Vaughan, Ontario	
Montréal, Québec	Lachine, Québec	
Chicago, Illinois	Chicago, Illinois	
St. Paul, Minnesota	Minneapolis, Minnesota	

Equipment

CP's equipment includes: owned and leased locomotives and railcars; heavy maintenance equipment and machinery; other equipment and tools in our shops, offices and facilities; and vehicles for maintenance, transportation of crews, and other activities. In this section, owned equipment includes units acquired by CP, equipment leased to third parties, and units held under finance leases, and leased equipment includes units under a short-term or long-term operating lease.

The Company's locomotive fleet is composed of largely high-adhesion alternating current locomotives that are more fuel efficient and reliable and have superior hauling capacity as compared with standard direct current locomotives. The Company is continuing a modernization program on several of the oldest locomotives in the fleet in order to improve reliability and availability, as well as to introduce new technology to the fleet. CP's locomotive productivity, defined as the daily average GTMs divided by daily average operating horsepower, for the years ended December 31, 2020, 2019, and 2018, was 207, 202, and 198 GTMs per Operating horsepower, respectively. Operating horsepower excludes units offline, tied up or in storage, or in use on other railways, and includes foreign units online. As of December 31, 2020, the Company had 310 locomotives in storage. As of December 31, 2020, CP owned or leased the following locomotive units:

Locomotives	Owned	Leased	Total	Average Age (in years)
Line haul	770	62	832	14
Road switcher	566	14	580	30
Total locomotives	**1,336**	**76**	**1,412**	**20**

CP's average in-service utilization percentage for freight cars, for the years ended December 31, 2020, 2019, and 2018, was 81%, 81%, and 84%, respectively. Average in-service utilization is defined as average active fleet for the year divided by total cars, excluding company service cars and tank cars as these are utilized only as required for non-revenue movements. As of December 31, 2020, CP owned and leased the following units of freight cars:

Freight cars	Owned	Leased	Total	Average Age (in years)
Box car	2,502	545	3,047	31
Covered hopper	8,623	7,693	16,316	21
Flat car	1,436	998	2,434	26
Gondola	3,623	1,595	5,218	22
Intermodal	1,315	150	1,465	16
Multi-level autorack	2,800	1,017	3,817	26
Company service car	2,413	176	2,589	45
Open top hopper	113	—	113	34
Tank car	33	32	65	14
Total freight cars	**22,858**	**12,206**	**35,064**	**24**

As of December 31, 2020, CP owned and leased the following units of intermodal equipment:

Intermodal equipment	Owned	Leased	Total	Average Age (in years)
Containers	8,150	—	8,150	7
Chassis	6,374	109	6,483	12
Total intermodal equipment	**14,524**	**109**	**14,633**	**9**

Headquarters Office Building

CP owns and operates a multi-building campus in Calgary encompassing the head office building, a data centre, training facility and other office and operational buildings.

The Company's main dispatch centre is located in Calgary, and is the primary dispatching facility in Canada. Rail traffic controllers coordinate and dispatch crews, and manage the day-to-day locomotive management along the network, 24 hours a day, and seven days a week. The operations centre has a complete backup system in the event of any power disruption.

In addition to fully operational redundant systems, CP has a fully integrated Business Continuity Centre, should CP's operations centre be affected by any natural disaster, fire, cyber-attack or hostile threat.

CP also maintains a secondary dispatch centre located in Minneapolis, where a facility similar to the one in Calgary exists. It services the dispatching needs of locomotives and train crews working in the U.S.

Capital Expenditures

The Company incurs expenditures to expand and enhance its rail network, rolling stock and other infrastructure. These expenditures are aimed at improving efficiency and safety of our operations. Such investments are also an integral part of the Company's multi-year capital program and support growth initiatives. For further details, refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity and Capital Resources.

Encumbrances

Refer to Item 8. Financial Statements and Supplementary Data, Note 16 Debt, for information on the Company's finance lease obligations and assets held as collateral under these agreements.

ITEM 3. LEGAL PROCEEDINGS

For further details, refer to Item 8. Financial Statements and Supplementary Data, Note 25 Commitments and contingencies.

SEC regulations require the disclosure of any proceeding under environmental laws to which a government authority is a party unless the registrant reasonably believes it will not result in sanctions over a certain threshold. The Company uses a threshold of U.S. $1 million for the purposes of determining proceedings requiring disclosure.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

Our executive officers are appointed by the Board of Directors and they hold office until their successors are appointed, subject to resignation, retirement or removal by the Board of Directors. There are no family relationships among our officers, nor any arrangement or understanding between any officer and any other person pursuant to which the officer was selected. As of the date of this filing, the executive officers' names, ages and business experience are:

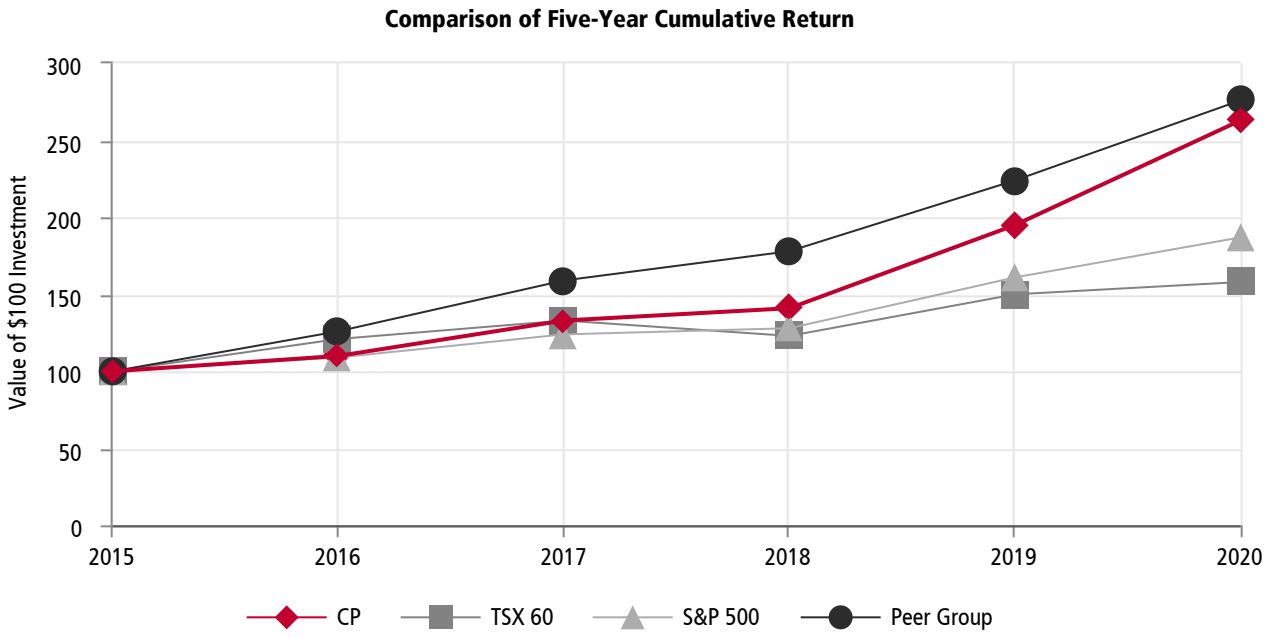
Name, Age and Position	Business Experience
Keith Creel, 52 President and Chief Executive Officer	Mr. Creel became President and CEO of CP on January 31, 2017. Previously, he was President and Chief Operating Officer ("COO") from February 5, 2013, to January 30, 2017. Prior to joining CP, Mr. Creel was Executive Vice-President and COO at CN from January 2010 to February 2013. During his time at CN, Mr. Creel held various positions including Executive Vice-President, Operations, Senior Vice-President Eastern Region, Senior Vice-President Western Region, and Vice-President of the Prairie Division. Mr. Creel began his railroad career at Burlington Northern Railway in 1992 as an intermodal ramp manager in Birmingham, Alabama. He also spent part of his career at Grand Trunk Western Railroad as a superintendent and general manager, and at Illinois Central Railroad as a trainmaster and director of corridor operations, prior to its merger with CN in 1999.
Mark Redd, 50 Executive Vice-President, Operations	Mr. Redd has been Executive Vice-President Operations since September 1, 2019. Before this appointment, he was Senior Vice-President Operations Western Region from February 2, 2017, to August 31, 2019, and Vice-President Operations Western Region from April 20, 2016, to February 1, 2017. Previous to these roles, he was General Manager Operations U.S. West and General Manager Operations Central Division. He was named CP's 2016 Railroader of the Year. Prior to joining CP in October 2013, Mr. Redd worked for over 20 years at Kansas City Southern Railway where he held a variety of leadership positions in network and field operations. Mr. Redd holds bachelor and Master of Business Administration ("MBA") degrees from the University of Missouri – Kansas City.
Nadeem Velani, 48 Executive Vice-President and Chief Financial Officer	Mr. Velani has been Executive Vice-President and CFO of CP since October 17, 2017. Previous to this appointment, he was the Vice-President and CFO of CP from October 19, 2016, to October 16, 2017, Vice-President, Investor Relations from October 28, 2015, and Assistant Vice-President, Investor Relations from March 11, 2013. Prior to joining CP, Mr. Velani spent 15 years at CN where he worked in a variety of positions in Strategic and Financial Planning, Investor Relations, Sales and Marketing, and the Office of the President and CEO. Mr. Velani holds a Bachelor of Economics degree from Western University and an MBA in Finance/ International Business from McGill University.
John Brooks, 50 Executive Vice-President and Chief Marketing Officer	Mr. Brooks has been Executive Vice-President and Chief Marketing Officer ("CMO") of CP since February 14, 2019. Previous to this appointment, he was the Senior Vice-President and CMO of CP from February 14, 2017, to February 13, 2019. He has worked in senior marketing roles at CP since he joined the Company in 2007, most recently as Vice-President, Marketing – Bulk and Intermodal. Mr. Brooks began his railroading career with UP and later helped start I&M Rail Link, LLC, which was purchased by DM&E in 2002. Mr. Brooks was Vice-President, Marketing at DM&E prior to it being acquired by CP in 2007. With more than 20 years in the railroading business, Mr. Brooks brings a breadth of experience to the CMO role that is pivotal to CP's continued and future success.

Laird Pitz, 76 Senior Vice-President and Chief Risk Officer	Mr. Pitz has been Senior Vice-President and Chief Risk Officer ("CRO") of CP since October 17, 2017. Previously, he was the Vice-President and CRO of CP from October 29, 2014, to October 16, 2017, and the Vice-President, Security and Risk Management of CP from April 2014 to October 2014. Prior to joining CP, Mr. Pitz was retired from March 2012 to April 2014, and Vice-President, Risk Mitigation of CN from September 2003 to March 2012. Mr. Pitz, a Vietnam War veteran and former Federal Bureau of Investigation special agent, is a 40-year career professional who has directed strategic and operational risk mitigation, security and crisis management functions for companies operating in a wide range of fields, including defence, logistics and transportation.
James Clements, 51 Senior Vice-President, Strategic Planning and Technology Transformation	Mr. Clements has been Senior Vice-President, Strategic Planning and Technology Transformation since September 1, 2019. Before this appointment, he was the Vice-President, Strategic Planning and Transportation Services of CP from 2014. Mr. Clements has responsibilities that include strategic network issues, Network Service Centre operations and Information Services. In addition, he has responsibility for all of CP's facilities and real estate across North America. Mr. Clements has been at CP for 26 years and his previous experience covers a wide range of areas of CP's business, including car management, finance, joint facilities agreements, logistics, grain marketing and sales in both Canada and the U.S., as well as marketing and sales responsibility for various other lines of business at CP. He has an MBA in Finance/International Business from McGill University and a Bachelor of Science in Computer Science and Mathematics from McMaster University.
Jeffrey Ellis, 53 Chief Legal Officer and Corporate Secretary	Mr. Ellis has been Chief Legal Officer and Corporate Secretary of CP since November 23, 2015. Mr. Ellis is accountable for the overall strategic leadership, oversight and performance of the legal, corporate secretarial, government relations and public affairs functions of CP in Canada and the U.S. Prior to joining CP in 2015, Mr. Ellis was the U.S. General Counsel at BMO Financial Group ("BMO"). Before joining BMO in 2006, Mr. Ellis was with the law firm of Borden Ladner Gervais LLP in Toronto, Ontario. Mr. Ellis has Bachelor of Arts and Master of Arts degrees from the University of Toronto, Juris Doctor and Master of Laws degrees from Osgoode Hall Law School, and an MBA from the Richard Ivey School of Business, Western University. Mr. Ellis is a member of the bars of New York, Illinois, Ontario and Alberta.
Mike Foran, 47 Vice-President, Market Strategy and Asset Management	Mr. Foran has been Vice-President, Market Strategy and Asset Management of CP since February 14, 2017. His prior roles with CP include Vice-President Network Transportation from 2014 to 2017, Assistant Vice-President Network Transportation from 2013 to 2014, and General Manager – Asset Management from 2012 to 2013. In over 20 years at CP, Mr. Foran has worked in operations, business development, marketing and general management. Mr. Foran holds an Executive MBA from the Ivey School of Business at Western University and a Bachelor of Commerce from the University of Calgary.
Michael Redeker, 60 Vice-President and Chief Information Officer	Mr. Redeker has been Vice-President and Chief Information Officer ("CIO") of CP since October 15, 2012. Prior to joining CP, Mr. Redeker was Vice-President and CIO of Alberta Treasury Branch from May 2007 to September 2012. He also spent 11 years at IBM Canada, where he focused on delivering quality information technology services within the financial services industry.
Chad Rolstad, 44 Vice-President, Human Resources and Chief Culture Officer	Mr. Rolstad has been Vice-President, Human Resources since February 14, 2019, and the Chief Culture Officer since September 1, 2019. Previous to this appointment, he was Assistant Vice-President, Human Resources of CP from August 1, 2018, to February 13, 2019, and Assistant Vice-President, Strategic Procurement of CP from April 10, 2017, to July 31, 2018. Prior to joining CP, Mr. Rolstad held various leadership positions at BNSF Railway in marketing and operations. Mr. Rolstad has a Bachelor of Science from the Colorado School of Mines and an MBA from Duke University.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Share Information



The Common Shares are listed on the TSX and on the NYSE under the symbol "CP".

Share Capital

At February 17, 2021, the latest practicable date prior to the date of this Annual Report on Form 10-K, there were 133,297,236 Common Shares and no preferred shares issued and outstanding, which consists of 13,779 holders of record of the Common Shares. In addition, CP has a Management Stock Option Incentive Plan ("MSOIP"), under which key officers and employees are granted options to purchase the Common Shares. Each option granted can be exercised for one Common Share. At February 17, 2021, 1,521,584 options were outstanding under the MSOIP and stand-alone option agreements entered into with Mr. Keith Creel. There are 733,836 options available to be issued by the Company's MSOIP in the future. CP has a Director's Stock Option Plan ("DSOP"), under which directors are granted options to purchase Common Shares. There are no outstanding options under the DSOP, which has 340,000 options available to be issued in the future.

Stock Performance Graph

The following graph provides an indicator of cumulative total shareholder return on the Common Shares, of an assumed investment of $100, as compared to the TSX 60 Index ("TSX 60"), the Standard & Poor's 500 Stock Index ("S&P 500"), and the peer group index (comprising CN, KCS, UP, NS and CSX) on December 31 for each of the years indicated. The values for the assumed investments depicted on the graph and in the table have been calculated assuming that any dividends are reinvested.

Issuer Purchase of Equity Securities

CP has established a share repurchase program which is further described in Item 8. Financial Statements and Supplementary Data, Note 20 Shareholders' equity. The following table presents the number of Common Shares repurchased during each month of the fourth quarter of 2020 and the average price paid by CP for the repurchase of such Common Shares.

2020	Total number of shares purchased[1]	Average price paid per share[2]	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
October 1 to October 31	230,195	$ 407.28	230,195	1,620,676
November 1 to November 30	451,299	425.89	451,299	1,169,377
December 1 to December 31	640,000	429.23	640,000	nil[3]
Ending Balance	**1,321,494**	**$ 424.26**	**1,321,494**	**N/A**

[1] Includes shares repurchased but not yet cancelled at quarter end.
[2] Includes brokerage fees.
[3] The Company's NCIB expired on December 19, 2020. At the time of expiration, 529,377 Common Shares authorized for repurchase had not yet been purchased by the Company.

ITEM 6. SELECTED FINANCIAL DATA

The following table presents as of, and for the years ended, December 31, selected financial data related to the Company's financial results for the last five fiscal years. The selected financial data should be read in conjunction with Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8. Financial Statements and Supplementary Data.

For information regarding historical exchange rates, please see Impact of Foreign Exchange on Earnings in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[1] These measures have no standardized meanings prescribed by accounting principles generally accepted in the United States of America ("GAAP") and, therefore, may not be comparable to similar measures presented by other companies. These measures are defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[2] Operating ratio is defined as operating expenses divided by revenues, further discussed in Results of Operations of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[3] Return on average shareholders' equity is defined as Net income divided by average shareholders' equity, averaged between the beginning and ending balance over a rolling 12-month period, further discussed in Results of Operations of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[4] Dividend payout ratio is defined as dividends declared per share divided by Diluted EPS, further discussed in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[5] Long-term debt to Net income ratio is defined as long-term debt, including long-term debt maturing within one year, divided by Net income, further discussed in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with the Company's Consolidated Financial Statements and the related notes in Item 8. Financial Statements and Supplementary Data, and other information in this annual report. Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars.

Executive Summary

2020 Results

- **Financial performance** – In 2020, CP reported Diluted earnings per share ("EPS") of $17.97, a 3% increase from $17.52 in 2019. Adjusted diluted EPS increased to $17.67, a 7% increase compared to $16.44 in 2019. CP's commitment to service and operational efficiency produced an Operating ratio of 57.1%. Adjusted diluted EPS is defined and reconciled in Non-GAAP Measures and discussed further in Results of Operations of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

- **Total revenues** – CP's Total revenues decreased by 1% to $7,710 million in 2020 from $7,792 million in 2019, driven primarily by the unfavourable impact of lower fuel surcharge revenue as a result of lower fuel prices, and lower volumes as measured by revenue ton-miles ("RTMs") primarily due to the impacts of COVID-19. This decrease was partially offset by higher liquidated damages, including customer volume commitments, and higher freight rates.

- **Operating performance** – Average train weight increased by 6% to 9,707 tons and average train length increased by 7% to 7,929 feet due to improvements in operating plan efficiency, in each case compared to 2019. These metrics are discussed further in Performance Indicators of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following table compares 2020 outlook to actual results:

	RTM growth	Adjusted diluted EPS[(1)]	Capital expenditures
Outlook	Mid-single-digit growth Revised quarterly and updated at the end of the third quarter to low single-digit decrease	High single-digit to low double-digit growth Revised quarterly and updated at the end of the third quarter to at least mid-single-digit Adjusted diluted EPS growth from full-year 2019 Adjusted diluted EPS of $16.44.	Approximately $1.60 billion
Actual outcomes	RTMs decreased by 2,487 million, or 2%	Adjusted diluted EPS growth of 7% to $17.67	$1.67 billion

[(1)] Adjusted diluted EPS is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. As described in the 2021 Outlook section below, CP had not calculated an outlook for Diluted EPS in 2020.

The updates in RTM growth and Adjusted diluted EPS expectations were based on the impacts of the COVID-19 pandemic on consumer demand in the following lines of business: Energy, chemicals and plastics, Metals, minerals and consumer products, and Automotive. CP revised its outlook quarterly given the evolving nature of impacts from the COVID-19 pandemic.

2021 Outlook

With a 2021 plan that encompasses profitable sustainable growth, CP expects high single-digit RTM growth and double-digit Adjusted diluted EPS growth. CP's expectations for Adjusted diluted EPS growth in 2021 are based on Adjusted diluted EPS of $17.67 in 2020. For the purposes of this outlook, CP assumes an effective tax rate of 24.6 percent. CP estimates other components of net periodic benefit recovery to increase by approximately $40 million versus 2020. As CP continues to invest in service, productivity and safety, the Company plans to invest approximately $1.55 billion in capital programs in 2021. Capital programs are defined and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Adjusted diluted EPS is defined and discussed further in Non-GAAP Measures and in Forward-Looking Statements of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Although CP has provided a forward-looking Non-GAAP measure (Adjusted diluted EPS), management is unable to reconcile, without unreasonable efforts, the forward-looking Adjusted diluted EPS to the most comparable GAAP measure, due to unknown variables and uncertainty related to future results. These unknown variables may include unpredictable transactions of significant value. In recent years, CP has recognized changes in income tax rates and a change to an uncertain tax item. These or other similar, large unforeseen transactions affect diluted EPS but may be excluded from CP's Adjusted diluted EPS. Additionally, the Canadian dollar-to-U.S. exchange rate is unpredictable and can have a significant impact on CP's reported results but may be excluded from CP's Adjusted diluted EPS. In particular, CP excludes the foreign exchange ("FX")

impact of translating the Company's debt and lease liabilities from Adjusted diluted EPS. Please see Forward-Looking Statements of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

Performance Indicators

The following table lists the key measures of the Company's operating performance:

For the year ended December 31	2020	2019	2018	% Change 2020 vs. 2019	% Change 2019 vs. 2018
Operations Performance					
Gross ton-miles ("GTMs") (millions)	**272,360**	280,724	275,362	(3)	2
Train miles (thousands)	**30,324**	32,924	32,312	(8)	2
Average train weight – excluding local traffic (tons)	**9,707**	9,129	9,100	6	—
Average train length – excluding local traffic (feet)	**7,929**	7,388	7,313	7	1
Average terminal dwell (hours)	**6.5**	6.4	6.8	2	(6)
Average train speed (miles per hour, or "mph")	**22.0**	22.2	21.5	(1)	3
Locomotive productivity (GTMs / operating horsepower, or "GTMs/OHP")	**207**	202	198	2	2
Fuel efficiency (U.S. gallons of locomotive fuel consumed /1,000 GTMs)	**0.942**	0.955	0.953	(1)	—
Total Employees and Workforce					
Total employees (average)	**12,168**	13,103	12,756	(7)	3
Total employees (end of period)	**11,890**	12,694	12,840	(6)	(1)
Workforce (end of period)	**11,904**	12,732	12,866	(7)	(1)
Safety Indicators[1]					
FRA personal injuries per 200,000 employee-hours	**1.11**	1.42	1.47	(22)	(3)
FRA train accidents per million train-miles	**0.96**	1.06	1.10	(9)	(4)

[1] FRA personal injuries per 200,000 employee-hours for the year ended December 31, 2018, previously reported as 1.48, was restated to 1.47 in this report. This restatement reflects new information available within specified periods stipulated by the FRA but that exceed the Company's financial reporting timeline.

Operations Performance

These key measures are used by management as comparisons to historical operating results and in the planning process to facilitate decisions that continue to drive further productivity improvements in the Company's operations. Results of these key measures reflect how effective CP's management is at controlling costs and executing the Company's operating plan and strategy. Continued monitoring of these key measures ensures that the Company can take appropriate actions to ensure the delivery of superior service and be able to grow its business at low incremental cost.

A **GTM** is defined as the movement of one ton of train weight over one mile. GTMs are calculated by multiplying total train weight by the distance the train moved. Total train weight comprises the weight of the freight cars, their contents, and any inactive locomotives. An increase in GTMs indicates additional workload. GTMs for 2020 were 272,360 million, a 3% decrease compared with 280,724 million in 2019. This decrease was primarily driven by decreased volumes of crude, Coal, and frac sand. This decrease was partially offset by increased volumes of Grain, Potash, and Fertilizers and sulphur.

GTMs in 2019 were 280,724 million, a 2% increase compared with 275,362 million in 2018. This increase was primarily driven by increased volumes of Energy, chemicals and plastics and Intermodal. This increase was partially offset by decreased volumes of Potash, frac sand, and Coal.

Train miles are defined as the sum of the distance moved by all trains operated on the network. Train miles provide a measure of the productive utilization of our network. A smaller increase in train miles relative to increases in volumes, as measured by RTMs, and/or workload, as measured by GTMs, indicates improved train productivity. Train miles for 2020 were 30,324 thousands, a decrease of 8% compared with 32,924 thousands in 2019. This decrease reflects the impact of a 3% decrease in workload (GTMs), as well as a 6% increase in average train weights.

Train miles in 2019 were 32,924, an increase of 2% compared with 32,312 thousands in 2018. This reflects the impact of higher GTMs in 2019.

Average train weight is defined as the average gross weight of CP trains, both loaded and empty. This excludes trains in short-haul service, work trains used to move CP's track equipment and materials, and the haulage of other railways' trains on CP's network. An increase in average train weight indicates improved asset utilization and may also be the result of moving heavier commodities. Average train weight of 9,707 tons in 2020 increased by 578 tons, or 6% compared with 9,129 tons in 2019. This increase was a result of improvements in operating plan efficiency, continued improvements in operational efficiency due to moving longer and heavier export potash and Grain trains, and improved winter operating conditions in the first quarter of 2020. This increase was partially offset by moving lower volumes of heavier commodities such as Canadian coal and crude. Improvements for Grain trains were driven by the High Efficiency Product ("HEP") train model, which is an 8,500-foot train model that features the new high-capacity grain hopper cars and increased grain carrying capacity.

Average train weight of 9,129 tons in 2019 increased by 29 tons from 9,100 tons in 2018. This slight increase was a result of improvements in operating plan efficiency. This increase was partially offset by the implementation of CP's winter contingency plan in the first quarter of 2019 resulting in shorter and lighter trains within the operating plan.

Average train length is defined as the average total length of CP trains, both loaded and empty. This includes all cars and locomotives on the train and is calculated as the sum of each car or locomotive's length multiplied by the distance travelled, divided by train miles. This excludes trains in short-haul service, work trains used to move CP's track equipment and materials, and the haulage of other railroads' trains on CP's network. An increase in average train length indicates improved asset utilization. Average train length of 7,929 feet in 2020 increased by 541 feet, or 7%, compared with 7,388 feet in 2019. This increase was a result of improvements in operating plan efficiency and continued improvements in operational efficiency due to moving longer Grain and export potash trains. This increase was partially offset by moving lower volumes of commodities such as Canadian coal, which move in longer trains. Improvements for Grain trains were driven by the 8,500-foot HEP train model.

Average train length of 7,388 feet in 2019 increased by 75 feet, or 1%, from 7,313 feet in 2018. This was a result of improvements in operating plan efficiency and increased Intermodal volumes which move on longer trains. This increase was partially offset by the implementation of CP's winter contingency plan in the first quarter of 2019 resulting in shorter and lighter trains within the operating plan.

Average terminal dwell is defined as the average time a freight car resides within terminal boundaries expressed in hours. The timing starts with a train arriving at the terminal, a customer releasing the car to the Company, or a car arriving at interchange from another railroad. The timing ends when the train leaves, a customer receives the car from CP, or the freight car is transferred to another railroad. Freight cars are excluded if they are being stored at the terminal or used in track repairs. A decrease in average terminal dwell indicates improved terminal performance resulting in faster cycle times and improved railcar utilization. Average terminal dwell of 6.5 hours in 2020 increased by 2% from 6.4 hours in 2019. This unfavourable increase was a result of aligning the operating plan to demand in order to maintain network efficiencies in the last three quarters of 2020. Aligning the operating plan to demand resulted in increased average train weight, average train length, and increased locomotive productivity.

Average terminal dwell of 6.4 hours in 2019 favourably decreased by 6% from 6.8 hours in 2018. This favourable decrease was due to improved network fluidity.

Average train speed is defined as a measure of the line-haul movement from origin to destination including terminal dwell hours. It is calculated by dividing the total train miles travelled by the total train hours operated. This calculation does not include delay time related to customers or foreign railways and excludes the time and distance travelled by: i) trains used in or around CP's yards; ii) passenger trains; and iii) trains used for repairing track. An increase in average train speed indicates improved on-time performance resulting in improved asset utilization. Average train speed was 22.0 mph in 2020, a decrease of 1%, from 22.2 mph in 2019. This decrease in speed was a result of aligning the operating plan to demand in order to maintain network efficiencies in the last three quarters of 2020, partially offset by improved winter operating conditions in the first quarter of 2020. Aligning the operating plan to demand resulted in increased average train weight, average train length, and increased locomotive productivity.

Average train speed in 2019 was 22.2 mph, an increase of 3%, from 21.5 mph in 2018. This increase in speed was due to the completion of network infrastructure projects, partially offset by the impact of harsh winter operating conditions and network disruptions in the first quarter of 2019.

Locomotive productivity is defined as the daily average GTMs divided by daily average operating horsepower. Operating horsepower excludes units offline, tied up or in storage, or in use on other railways, and includes foreign units online. An increase in locomotive productivity indicates more efficient locomotive utilization and may also be the result of moving heavier commodities. Locomotive productivity was 207 GTMs/OHP in 2020, an increase of 5 GTMs/OHP, or 2%, compared to 202 GTMs/OHP in 2019. This increase was primarily due to improvements in operating plan efficiency as a result of aligning the operating plan to demand.

Locomotive productivity was 202 GTMs/OHP in 2019, an increase of 4 GTMs/OHP, or 2%, compared to 198 GTMs/OHP in 2018. This increase was primarily due to improvements in operating plan efficiency as a result of aligning the operating plan to demand.

Fuel efficiency is defined as U.S. gallons of locomotive fuel consumed per 1,000 GTMs. Fuel consumed includes gallons from freight, yard and commuter service but excludes fuel used in capital projects and other non-freight activities. An improvement in fuel efficiency indicates operational cost savings and

CP's commitment to corporate sustainability through a reduction of greenhouse gas emissions intensity. Fuel efficiency for 2020 was 0.942 U.S. gallons/1,000 GTMs, an improvement of 1% compared to 2019. This improvement was primarily due to improved winter operating conditions in the first quarter of 2020. Fuel efficiency for 2019 of 0.955 U.S. gallons/1,000 GTMs was flat compared to 2018.

Total Employees and Workforce

An **employee** is defined as an individual currently engaged in full-time, part-time, or seasonal employment with CP while **workforce** is defined as total employees plus contractors and consultants. The Company monitors employment and workforce levels in order to efficiently meet service and strategic requirements. The number of employees is a key driver to total compensation and benefits costs.

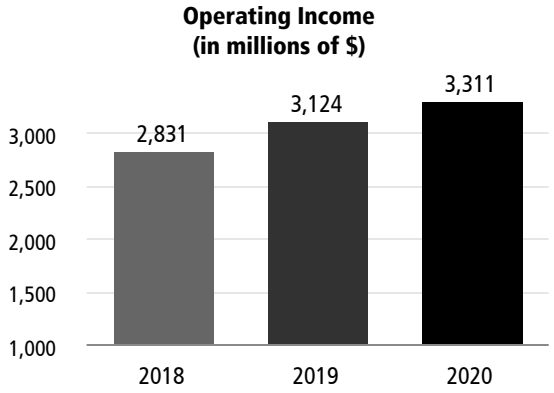
The average number of total employees for 2020 decreased by 935, or 7%, compared with 2019. This decrease was primarily due to more efficient resource planning, including furloughs associated with the economic downturn caused by COVID-19, partially offset by the addition of CMQ employees. The total number of employees as at December 31, 2020 was 11,890, a decrease of 804, or 6%, compared to 12,694 as at December 31, 2019, due to reduced workload as measured in GTMs and more efficient resource planning.

The average number of total employees for 2019 increased by 347, or 3%, compared to 2018. This increase was primarily due to growth in workload as measured in GTMs. The total number of employees as at December 31, 2019 was 12,694, a decrease of 146, or 1%, compared to 12,840 as at December 31, 2018, due to more efficient resource planning and reduced workload in the fourth quarter, partially offset by the addition of CMQ Canada employees.

The total workforce as at December 31, 2020 was 11,904, a decrease of 828, or 7%, compared to 12,732 as at December 31, 2019, due to more efficient resource planning.

The total workforce as at December 31, 2019 was 12,732, a decrease of 134, or 1%, compared to 12,866 as at December 31, 2018, due to more efficient resource planning.

Safety Indicators



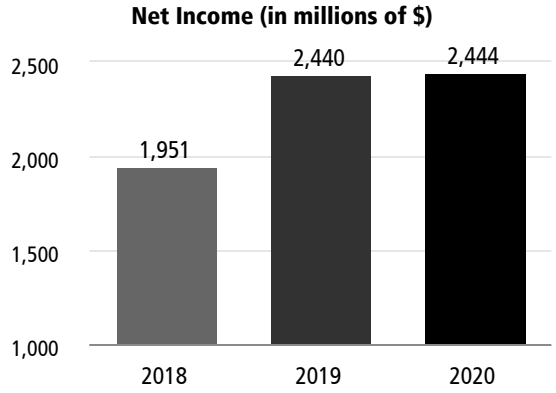
Safety is a key priority and core strategy for CP's management, employees, and Board of Directors. Personal injuries and train accidents are indicators of the effectiveness of the Company's safety systems, and are used by management to evaluate and, as necessary, alter the Company's safety systems, procedures, and protocols. Each measure follows U.S Federal Railroad Administration ("FRA") reporting guidelines, which can result in restatement after initial publication to reflect new information available within specified periods stipulated by the FRA but that exceed the Company's financial reporting timeline.

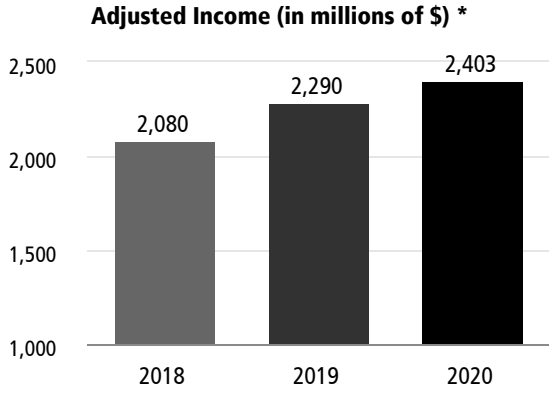
The **FRA personal injuries per 200,000 employee-hours** frequency is the number of personal injuries, multiplied by 200,000 and divided by total employee hours. Personal injuries are defined as injuries that require employees to lose time away from work, modify their normal duties or obtain medical treatment beyond minor first aid. FRA employee-hours are the total hours worked, excluding vacation and sick time, by all employees, excluding contractors. The FRA personal injuries per 200,000 employee-hours frequency for CP was 1.11 in 2020, compared with 1.42 in 2019 and 1.47 in 2018.

The **FRA train accidents per million train-miles** frequency is the number of train accidents, multiplied by 1,000,000 and divided by total train miles. Train accidents included in this metric meet or exceed the FRA reporting threshold of U.S. $10,700 in damage. The FRA train accidents per million train-miles frequency for CP was 0.96 in 2020 , compared with 1.06 in 2019 and 1.10 in 2018.

Results of Operations

Income





Operating income was $3,311 million in 2020, an increase of $187 million, or 6%, from $3,124 million in 2019. This increase was primarily due to:
- liquidated damages, including customer volume commitments, and higher freight rates;
- the efficiencies generated from improved operating performance and asset utilization;
- a gain of $68 million as a result of the remeasurement to fair value of the previously held equity investment in the Detroit River Tunnel Partnership ("DRTP");
- the impact of harsher winter operating conditions in 2019; and
- decreased operating expense associated with lower casualty costs incurred in 2020.

This increase was partially offset by:
- lower volumes as measured by RTMs;
- higher depreciation and amortization of $71 million (excluding FX);
- cost inflation; and
- higher stock-based compensation of $37 million primarily driven by an increase in stock price.

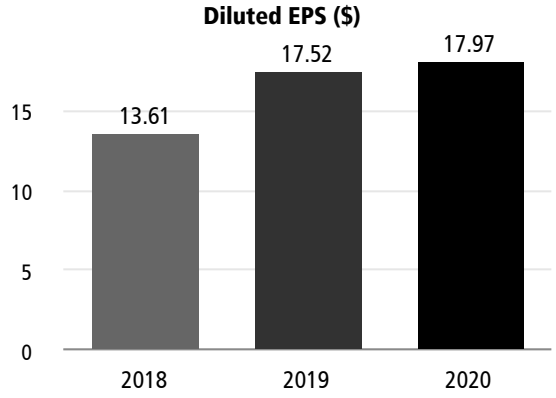
Operating income was $3,124 million in 2019, an increase of $293 million, or 10%, from $2,831 million in 2018. This increase was primarily due to:
- higher freight rates;
- the efficiencies generated from improved operating performance and asset utilization;
- the favourable impact of change in FX of $39 million; and
- the favourable impact from changes in fuel prices of $38 million.

This increase was partially offset by:
- increased operating expense associated with higher casualty costs in 2019 of $76 million (excluding FX);
- higher stock-based compensation of $58 million;
- cost inflation; and
- increased weather related costs as a result of harsh winter operating conditions in the first quarter of 2019.

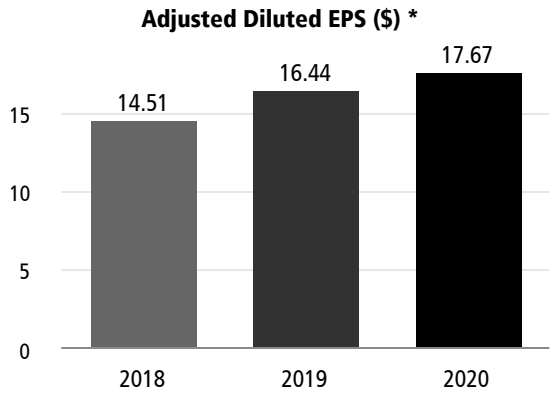
*Adjusted income is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Net income was $2,444 million in 2020, an increase of $4 million, from $2,440 million in 2019. This increase was primarily due to:
- higher Operating income;
- a deferred tax recovery relating to a tax return filing election for the state of North Dakota; and
- a provision for an uncertain tax item of a prior period in 2019.

This increase was partially offset by:
- an income tax recovery associated with changes in tax rates in 2019;
- lower FX translation gain on U.S. dollar-denominated debt and lease liabilities compared to 2019; and
- lower other components of net periodic benefit recovery.



Net income was $2,440 million in 2019, an increase of $489 million, or 25%, from $1,951 million in 2018. This increase was primarily due to:
- higher Operating income;
- FX translation gains on debt and lease liabilities in 2019 compared to FX translation losses on debt in 2018; and
- a higher income tax recovery associated with changes in tax rates.

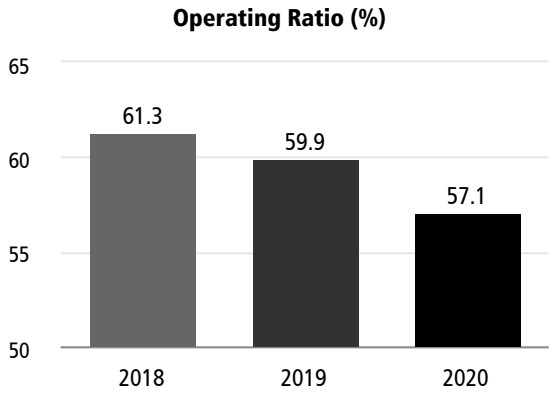


This increase was partially offset by higher income taxes due to higher taxable income and a provision for an uncertain tax item of a prior period.

Adjusted income, defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, was $2,403 million in 2020, an increase of $113 million, or 5%, from $2,290 million in 2019. This increase was primarily due to higher Operating income, partially offset by lower other components of net periodic benefit recovery.

Adjusted income was $2,290 million in 2019, an increase of $210 million, or 10%, from $2,080 million in 2018. This increase was due to the same factors discussed above for the increase in Net income, except that Adjusted income excludes FX translation gains and losses on debt and lease liabilities, income tax recoveries associated with changes in tax rates, and a provision for an uncertain tax item of a prior period.

Diluted Earnings per Share



*Adjusted diluted EPS is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Diluted EPS was $17.97 in 2020, an increase of $0.45, or 3%, from $17.52 in 2019. This increase was due to a lower average number of outstanding Common Shares due to the Company's share repurchase program, and higher Net income.

Diluted EPS was $17.52 in 2019, an increase of $3.91, or 29%, from $13.61 in 2018. This increase was due to higher Net income and lower average number of outstanding Common Shares due to the Company's share repurchase program.

Adjusted diluted EPS, defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, was $17.67 in 2020, an increase of $1.23, or 7%, from $16.44 in 2019. Adjusted diluted EPS was $16.44 in 2019, an increase of $1.93, or 13%, from $14.51 in 2018. These increases were due to higher Adjusted income and lower average number of outstanding Common Shares due to the Company's share repurchase program.

Operating Ratio

The Operating ratio provides the percentage of revenues used to operate the railway. A lower percentage normally indicates higher efficiency in the operation of the railway. The Company's Operating ratio was 57.1% in 2020, a 280 basis point improvement from 59.9% in 2019. This improvement was primarily due to:

- liquidated damages, including customer volume commitments, and higher freight rates;
- the favourable impact of changes in fuel prices;

- the efficiencies generated from improved operating performance and asset utilization; and
- a gain as a result of the remeasurement to fair value of the previously held equity investment in DRTP.

This improvement was partially offset by:
- higher depreciation and amortization;
- cost inflation; and
- higher stock-based compensation.

The Company's Operating ratio was 59.9% in 2019, a 140 basis point improvement from 61.3% in 2018. This improvement was primarily due to:
- higher freight rates;
- the favourable impact of changes in fuel prices; and
- the efficiencies generated from improved operating performance and asset utilization.

This improvement was partially offset by:
- increased operating expense associated with higher casualty costs in 2019;
- higher stock-based compensation; and
- cost inflation.

Return on Average Shareholders' Equity and Adjusted Return on Invested Capital

Return on average shareholders' equity and Adjusted return on invested capital ("Adjusted ROIC") are measures used by management to determine how productively the Company uses its long-term capital investments, representing critical indicators of good operating and investment decisions. Adjusted ROIC is also an important performance criteria in determining certain elements of the Company's long-term incentive plan.

Return on average shareholders' equity was 34.0% in 2020, a 160 basis point decrease compared to 35.6% in 2019. This decrease was due to higher average shareholders' equity due to accumulated Net income, partially offset by the impact of the Company's share repurchase program.

Return on average shareholders' equity was 35.6% in 2019, a 580 basis point increase compared to 29.8% in 2018. This increase was due to higher Net income. This increase was partially offset by higher average shareholders' equity due to accumulated Net income, partially offset by the impact of the Company's share repurchase program.

Adjusted ROIC was 16.7% in 2020, a 20 basis point decrease compared to 16.9% in 2019. This decrease was primarily due to higher average long-term debt, partially offset by higher Operating income.

Adjusted ROIC was 16.9% in 2019, a 70 basis point increase compared to 16.2% in 2018. This increase was primarily due to higher Operating income. This increase was partially offset by the increase in adjusted average invested capital primarily due to higher Adjusted income, partially offset by lower Common Shares due to the Company's share repurchase program.

Adjusted ROIC is a Non-GAAP measure, which is defined and reconciled from Return on average shareholders' equity, the most comparable measure calculated in accordance with GAAP, in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Impact of Foreign Exchange on Earnings

Fluctuations in FX affect the Company's results because U.S. dollar-denominated revenues and expenses are translated into Canadian dollars. U.S. dollar-denominated revenues and expenses increase (decrease) when the Canadian dollar weakens (strengthens) in relation to the U.S. dollar.

On February 12, 2021, the noon buying rate certified for customs purposes by the U.S. Federal Reserve Bank of New York was U.S. $1.00 = $1.27 Canadian dollars.

The following tables set forth, for the periods indicated, the average exchange rate between the Canadian dollar and the U.S. dollar expressed in the Canadian dollar equivalent of one U.S. dollar, the period end exchange rates, and the high and low exchange rates for the periods indicated. Average exchange rates are calculated by using the exchange rates on the last day of each full month during the relevant period. These rates are based on the noon buying rate certified for customs purposes by the U.S. Federal Reserve Bank of New York set forth in the H.10 statistical release of the Federal Reserve Board.

Average exchange rates (Canadian/U.S. dollar)		**2020**	2019	2018	2017	2016
For the year ended – December 31	**$**	**1.34** $	1.33 $	1.30 $	1.30 $	1.33
For the three months ended – December 31	**$**	**1.30** $	1.32 $	1.32 $	1.27 $	1.33

Exchange rates (Canadian/U.S. dollar)		2020	2019	2018	2017	2016
Beginning of year – January 1	$	**1.30**	$ 1.36	$ 1.25	$ 1.34	$ 1.38
Beginning of quarter – April 1	$	**1.41**	$ 1.33	$ 1.29	$ 1.33	$ 1.30
Beginning of quarter – July 1	$	**1.36**	$ 1.31	$ 1.32	$ 1.30	$ 1.29
Beginning of quarter – October 1	$	**1.33**	$ 1.32	$ 1.29	$ 1.25	$ 1.31
End of year – December 31	$	**1.28**	$ 1.30	$ 1.36	$ 1.25	$ 1.34

High/Low exchange rates (Canadian/U.S. dollar)		2020	2019	2018	2017	2016
High	$	**1.45**	$ 1.36	$ 1.37	$ 1.37	$ 1.46
Low	$	**1.27**	$ 1.30	$ 1.23	$ 1.21	$ 1.25

In 2020, the impact of a stronger U.S. dollar resulted in an increase in total revenues of $33 million, an increase in total operating expenses of $23 million and an increase in net interest expense of $4 million. In 2019, the impact of a stronger U.S. dollar resulted in an increase in total revenues of $87 million, an increase in total operating expenses of $48 million and an increase in net interest expense of $10 million.

The impact of fluctuations in the exchange rate between the Canadian dollar and the U.S. dollar on the Company's results is discussed further in Item 7A. Quantitative and Qualitative Disclosures About Market Risk, Foreign Exchange Risk.

Impact of Fuel Price on Earnings

Fluctuations in fuel prices affect the Company's results because fuel expense constitutes a significant portion of CP's operating costs. As fuel prices fluctuate, there will be a timing impact on earnings, as discussed further in Item 1. Business, Operations, Fuel Cost Adjustment Program and Item 1A. Risk Factors, Volatility Risks.

Average Fuel Price (U.S. dollars per U.S. gallon)		2020	2019	2018
For the year ended – December 31	$	**1.90**	$ 2.49	$ 2.72
For the three months ended – December 31	$	**1.91**	$ 2.53	$ 2.71

The impact of fuel price on earnings includes the impacts of provincial and federal carbon taxes and levies recovered and paid, on revenues and expenses, respectively.

In 2020, the favourable impact of fuel prices on Operating income was $25 million. Lower fuel prices resulted in a decrease in total operating expenses of $195 million. Lower fuel prices, partially offset by the timing of recoveries from CP's fuel cost adjustment program and increased carbon tax recoveries, resulted in a decrease in total revenues of $170 million from 2019. In 2019, the impact of lower fuel prices resulted in a decrease in Total revenues of $39 million and a decrease in Total operating expenses of $77 million.

Impact of Share Price on Earnings

Fluctuations in the Common Share price affect the Company's operating expenses because share-based liabilities are measured at fair value. The Company's Common Shares are listed on the Toronto Stock Exchange ("TSX") and the New York Stock Exchange ("NYSE") with ticker symbol "CP". The following tables indicate the opening and closing Common Share price on the TSX and the NYSE for each quarter and the change in the price of the Common Shares on the TSX and the NYSE for the years ended December 31, 2020, 2019 and 2018:

Toronto Stock Exchange (in Canadian dollars)		2020	2019	2018
Opening Common Share price, as at January 1	$	**331.03**	$ 242.24	$ 229.66
Ending Common Share price, as at March 31	$	**310.55**	$ 275.34	$ 227.20
Ending Common Share price, as at June 30	$	**345.32**	$ 308.43	$ 240.92
Ending Common Share price, as at September 30	$	**405.05**	$ 294.42	$ 273.23
Ending Common Share price, as at December 31	$	**441.53**	$ 331.03	$ 242.24
Change in Common Share price for the year ended December 31	$	**110.50**	$ 88.79	$ 12.58

New York Stock Exchange (in U.S. dollars)		2020		2019		2018
Opening Common Share price, as at January 1	**$**	**254.95**	$	177.62	$	182.76
Ending Common Share price, as at March 31	**$**	**219.59**	$	206.03	$	176.50
Ending Common Share price, as at June 30	**$**	**255.34**	$	235.24	$	183.02
Ending Common Share price, as at September 30	**$**	**304.43**	$	222.46	$	211.94
Ending Common Share price, as at December 31	**$**	**346.69**	$	254.95	$	177.62
Change in Common Share price for the year ended December 31	**$**	**91.74**	$	77.33	$	(5.14)

In 2020, the impact of the change in Common Share prices resulted in an increase in stock-based compensation expense of $58 million compared to $42 million in 2019, and $2 million in 2018.

The impact of share price on stock-based compensation is discussed further in Item 7A. Quantitative and Qualitative Disclosures About Market Risk, Share Price Impact on Stock-Based Compensation.

Operating Revenues

				2020 vs. 2019			2019 vs. 2018		
For the year ended December 31	**2020**	2019	2018	Total Change	% Change	FX Adjusted % Change[2]	Total Change	% Change	FX Adjusted % Change[2]
Freight revenues (in millions)[1]	**$ 7,541**	$ 7,613	$ 7,152	$ (72)	(1)	(1)	$ 461	6	5
Non-freight revenues (in millions)	**169**	179	164	(10)	(6)	(6)	15	9	8
Total revenues (in millions)	**$ 7,710**	$ 7,792	$ 7,316	$ (82)	(1)	(1)	$ 476	7	5
Carloads (in thousands)	**2,708.4**	2,766.4	2,739.8	(58.0)	(2)	N/A	26.6	1	N/A
Revenue ton-miles (in millions)	**151,891**	154,378	154,207	(2,487)	(2)	N/A	171	—	N/A
Freight revenue per carload (in dollars)	**$ 2,784**	$ 2,752	$ 2,611	$ 32	1	1	$ 141	5	4
Freight revenue per revenue ton-mile (in cents)	**4.96**	4.93	4.64	0.03	1	—	0.29	6	5

[1] Freight revenues include fuel surcharge revenues of $297 million in 2020, $464 million in 2019 and $492 million in 2018. Fuel surcharge revenues include recoveries of carbon taxes, levies, and obligations under cap-and-trade programs.

[2] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Company's revenues are primarily derived from transporting freight. Changes in freight volumes generally contribute to corresponding changes in freight revenues and certain variable expenses, such as fuel, crew costs, and equipment rents. Non-freight revenue is generated from other arrangements, including contracts with passenger service operators and logistical services; leasing of certain assets; and switching fees.

Freight Revenues

Freight revenues were $7,541 million in 2020, a decrease of $72 million, or 1%, from $7,613 million in 2019. This decrease was primarily due to lower volumes as measured by RTMs. This decrease was partially offset by higher freight revenue per revenue ton-mile.

Freight revenues were $7,613 million in 2019, an increase of $461 million, or 6%, from $7,152 million in 2018. This increase was primarily due to higher freight revenue per revenue ton-mile.

RTMs

RTMs are defined as the movement of one revenue-producing ton of freight over a distance of one mile. RTMs measure the relative weight and distance of rail freight moved by the Company. RTMs for 2020 were 151,891 million, a decrease of 2,487 million, compared with 154,378 million in 2019. This decrease was mainly attributable to lower volumes of crude, Coal and frac sand. This decrease was partially offset by higher volumes of Grain, Potash and Fertilizers and sulphur.

RTMs for 2019 were 154,378 million, an increase of 171 million compared with 154,207 million in 2018. This increase was mainly attributable to increased shipments of Energy, chemicals and plastics and Intermodal, partially offset by decreased shipments of Potash, frac sand and Coal.

Freight revenue per revenue ton-mile

Freight revenue per revenue ton-mile is defined as freight revenue per revenue-producing ton of freight over a distance of one mile. This is an indicator of yield. Freight revenue per revenue ton-mile was 4.96 cents in 2020, an increase of 0.03 cents, or 1%, from 4.93 cents in 2019. This increase was primarily due to higher liquidated damages, including customer volume commitments, higher freight rates, and the favourable impact of the change in FX of $33 million. This increase was partially offset by the unfavourable impact of lower fuel surcharge revenue, as a result of lower fuel prices of $170 million and moving lower volumes of Automotive, which has a higher freight revenue per revenue ton-mile compared to the corporate average.

Freight revenue per revenue ton-mile was 4.93 cents in 2019, an increase of 0.29 cents, or 6%, from 4.64 cents in 2018. This increase was primarily due to higher liquidated damages, including customer volume commitments, higher freight rates, and the favourable impact of the change in FX of $86 million. This increase was partially offset by the unfavourable impact of lower fuel surcharge revenue, as a result of lower fuel prices of $39 million.

Carloads

Carloads are defined as revenue-generating shipments of containers and freight cars. Carloads were 2,708.4 thousand in 2020, a decrease of 58.0 thousand, or 2%, from 2,766.4 thousand in 2019. This decrease was primarily due to lower volumes of crude, Coal, and frac sand. This decrease was partially offset by higher volumes of Grain and Potash.

Carloads were 2,766.4 thousand in 2019, an increase of 26.6 thousand, or 1%, from 2,739.8 thousand in 2018. This increase was mainly attributable to increased shipments of Energy, chemicals and plastics and Intermodal, partially offset by decreased shipments of frac sand and Potash.

Freight revenue per carload

Freight revenue per carload is defined as freight revenue per revenue-generating shipment of containers or freight cars. This is an indicator of yield. Freight revenue per carload was $2,784 in 2020, an increase of $32, or 1%, from $2,752 in 2019. This increase was primarily due to higher liquidated damages, including customer volume commitments, higher freight rates, and the favourable impact of the change in FX of $33 million. This increase was partially offset by the unfavourable impact of lower fuel surcharge revenue, as a result of lower fuel prices of $170 million.

Freight revenue per carload was $2,752 in 2019, an increase of $141, or 5%, from $2,611 in 2018. This increase was primarily due to liquidated damages, including customer volume commitments, higher freight rates, and the favourable impact of the change in FX of $86 million. This increase was partially offset by the unfavourable impact of lower fuel surcharge revenue, as a result of lower fuel prices of $39 million.

Non-freight Revenues

Non-freight revenues were $169 million in 2020, a decrease of $10 million, or 6%, from $179 million in 2019. This decrease was primarily due to lower revenue from passenger service operators.

Non-freight revenues were $179 million in 2019, an increase of $15 million, or 9%, from $164 million in 2018. This increase was primarily due to higher switching fees and logistical services revenue.

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Grain revenue was $1,829 million in 2020, an increase of $145 million, or 9%, from $1,684 million in 2019. This increase was primarily due to moving record volumes of Canadian grain, primarily to Vancouver and Thunder Bay, higher volumes of U.S. soybeans and corn to the U.S. Pacific Northwest, higher freight rates, and the favourable impact of the change in FX. This increase was partially offset by decreased freight revenue per ton-mile. Freight revenue per

revenue ton-mile decreased due to moving proportionately higher volumes of long haul soybeans and corn to U.S. Pacific Northwest, which also caused RTMs to increase more than carloads, and lower fuel surcharge revenue as a result of lower fuel prices.

Grain revenue was $1,684 million in 2019, an increase of $118 million, or 8%, from $1,566 million in 2018. This increase was primarily due to increased freight revenue per revenue ton-mile, higher volumes of regulated Canadian grain, and the favourable impact of the change in FX. This increase was partially offset by lower volumes of U.S. grain, primarily corn, to the U.S. Pacific Northwest. Freight revenue per revenue ton-mile increased due to higher freight rates, primarily for regulated Canadian grain.

Coal

				2020 vs. 2019			2019 vs. 2018		
For the year ended December 31	**2020**	2019	2018	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 566**	$ 682	$ 673	$ (116)	(17)	(17)	$ 9	1	1
Carloads (in thousands)	**260.4**	304.3	304.3	(43.9)	(14)	N/A	—	—	N/A

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Coal revenue was $566 million in 2020, a decrease of $116 million, or 17%, from $682 million in 2019. This decrease was primarily due to lower volumes of Canadian coal primarily to Vancouver, driven by supply chain challenges at both the mines and the ports, lower volumes of U.S. coal to Wisconsin, and decreased freight revenue per revenue ton-mile. Freight revenue per revenue ton-mile decreased due to the unfavourable impact of lower fuel surcharge revenue as a result of lower fuel prices.

Coal revenue was $682 million in 2019, an increase of $9 million, or 1%, from $673 million in 2018. This increase was primarily due to higher freight revenue per revenue ton-mile. This increase was partially offset by lower volumes of Canadian coal, driven by supply chain challenges at both the mines and the ports. Freight revenue per revenue ton-mile increased due to higher freight rates. RTMs decreased while carloads remained flat due to moving proportionately higher volumes of short haul U.S. coal.

Potash

				2020 vs. 2019			2019 vs. 2018		
For the year ended December 31	**2020**	2019	2018	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 493**	$ 462	$ 486	$ 31	7	6	$ (24)	(5)	(6)

Freight revenue per revenue ton-mile (in cents)	**2.62**	2.67	2.65	(0.05)	(2)	(2)	0.02	1	—

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Potash revenue was $493 million in 2020, an increase of $31 million, or 7%, from $462 million in 2019. This increase was primarily due to higher volumes of export potash following resolved international contract negotiations, higher freight rates, and the favourable impact of the change in FX. This increase was partially offset by decreased freight revenue per revenue ton-mile due to lower fuel surcharge revenue as a result of lower fuel prices.

Potash revenue was $462 million in 2019, a decrease of $24 million, or 5%, from $486 million in 2018. This decrease was primarily due to lower volumes of domestic potash driven by poor weather affecting the application seasons, and lower volumes of export potash driven by unresolved international contract negotiations. This decrease was partially offset by the favourable impact of the change in FX.

Fertilizers and Sulphur

				2020 vs. 2019			2019 vs. 2018		
For the year ended December 31	**2020**	2019	2018	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 290**	$ 250	$ 243	$ 40	16	15	$ 7	3	1
Carloads (in thousands)	**61.6**	57.0	58.1	4.6	8	N/A	(1.1)	(2)	N/A
Revenue ton-miles (in millions)	**4,683**	3,846	4,051	837	22	N/A	(205)	(5)	N/A
Freight revenue per carload (in dollars)	**$ 4,708**	$ 4,386	$ 4,186	$ 322	7	6	$ 200	5	3
Freight revenue per revenue ton-mile (in cents)	**6.19**	6.50	6.00	(0.31)	(5)	(5)	0.50	8	7

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Fertilizers and sulphur revenue was $290 million in 2020, an increase of $40 million, or 16%, from $250 million in 2019. This increase was primarily due to higher volumes of dry fertilizers, sulphur, and wet fertilizers, as well as the favourable impact of the change in FX. This increase was partially offset by decreased freight revenue per revenue ton-mile due to lower fuel surcharge revenue as a result of lower fuel prices. RTMs increased more than carloads due to moving lower volumes of wet and dry fertilizers within Alberta, which has a shorter length of haul.

Fertilizers and sulphur revenue was $250 million in 2019, an increase of $7 million, or 3%, from $243 million in 2018. This increase was primarily due to higher freight revenue per revenue ton-mile, the favourable impact of the change in FX, and higher volumes of wet fertilizer. This increase was partially offset by lower volumes of sulphur and dry fertilizer. Freight revenue per revenue ton-mile increased due to higher freight rates. RTMs decreased more than carloads due to moving proportionately less wet fertilizer to the U.S. Midwest, which has a longer length of haul.

Forest Products

				2020 vs. 2019			2019 vs. 2018		
For the year ended December 31	**2020**	2019	2018	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 328**	$ 304	$ 284	$ 24	8	7	$ 20	7	5
Carloads (in thousands)	**71.6**	71.5	68.6	0.1	—	N/A	2.9	4	N/A

Freight revenue per carload (in dollars)	**$ 4,581**	$ 4,252	$ 4,139	$ 329	8	7	$ 113	3	1
Freight revenue per revenue ton-mile (in cents)	**5.97**	6.11	5.96	(0.14)	(2)	(3)	0.15	3	1

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forest products revenue was $328 million in 2020, an increase of $24 million, or 8%, from $304 million in 2019. This increase was primarily due to higher volumes of lumber and wood pulp, higher freight rates, and the favourable impact of the change in FX. This increase was partially offset by decreased freight revenue per revenue ton-mile due to lower fuel surcharge revenue as a result of lower fuel prices. RTMs increased more than carloads due to moving higher volumes of panel products and wood pulp from Canada to the U.S., which has a longer length of haul.

Forest products revenue was $304 million in 2019, an increase of $20 million, or 7%, from $284 million in 2018. This increase was primarily due to higher volumes of wood pulp, newsprint, and lumber, increased freight revenue per revenue ton-mile, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates.

Energy, Chemicals and Plastics

				2020 vs. 2019			2019 vs. 2018		
For the year ended December 31	**2020**	2019	2018	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 1,519**	$ 1,534	$ 1,243	$ (15)	(1)	(1)	$ 291	23	22
Carloads (in thousands)	**308.8**	358.1	334.6	(49.3)	(14)	N/A	23.5	7	N/A
Revenue ton-miles (in millions)	**24,172**	29,356	27,830	(5,184)	(18)	N/A	1,526	5	N/A

Freight revenue per revenue ton-mile (in cents)	**6.28**	5.23	4.47	1.05	20	20	0.76	17	15

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Energy, chemicals and plastics revenue was $1,519 million in 2020, a decrease of $15 million, or 1%, from $1,534 million in 2019. This decrease was primarily due to lower volumes of crude, liquefied petroleum gas ("LPG"), and biofuels as a result of the COVID-19 pandemic and lower fuel surcharge revenue as a result of lower fuel prices. The decrease was partially offset by increased freight revenue per revenue ton-mile and higher volumes of plastics. Freight revenue per revenue ton-mile increased primarily due to higher liquidated damages, including customer volume commitments, and higher freight rates. RTMs decreased more than carloads due to moving lower volumes of crude, which has a longer length of haul.

Energy, chemicals and plastics revenue was $1,534 million in 2019, an increase of $291 million, or 23%, from $1,243 million in 2018. This increase was primarily due to increased freight revenue per revenue ton-mile, higher volumes of crude, LPG, fuel oil, and other refined products, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased primarily due to liquidated damages, including customer volume commitments, and higher freight rates. Carloads increased more than RTMs due to moving proportionately less long haul crude to Kansas City, Missouri, and proportionately more short haul crude to Chicago, Illinois and Noyes, Minnesota.

Metals, Minerals and Consumer Products

				2020 vs. 2019			2019 vs. 2018		
For the year ended December 31	**2020**	2019	2018	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 629**	$ 752	$ 797	$ (123)	(16)	(17)	$ (45)	(6)	(8)

Freight revenue per revenue ton-mile (in cents)	**6.75**	7.04	6.72	(0.29)	(4)	(5)	0.32	5	3

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Metals, minerals and consumer products revenue was $629 million in 2020, a decrease of $123 million, or 16%, from $752 million in 2019. This decrease was primarily due to moving lower volumes of frac sand as a result of the COVID-19 pandemic and decreased freight revenue per revenue ton-mile. This decrease was partially offset by the favourable impact of the change in FX. Freight revenue per revenue ton-mile decreased due to lower fuel surcharge revenue as a result of lower fuel prices.

Metals, minerals and consumer products revenue was $752 million in 2019, a decrease of $45 million, or 6%, from $797 million in 2018. This decrease was primarily due to lower volumes of frac sand and steel. This decrease was partially offset by increased freight revenue per revenue ton-mile, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates. Carloads decreased less than RTMs due to increased volumes of short haul metallic ore.

Automotive

For the year ended December 31	2020	2019	2018	2020 vs. 2019 Total Change	2020 vs. 2019 % Change	2020 vs. 2019 FX Adjusted % Change[1]	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]

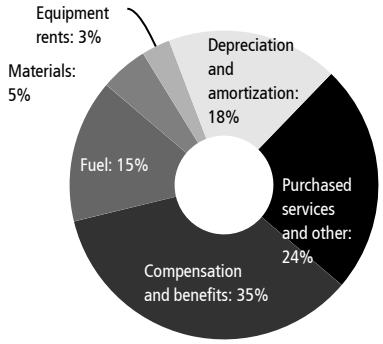
[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Automotive revenue was $324 million in 2020, a decrease of $28 million, or 8%, from $352 million in 2019. This decrease was primarily due to lower volumes caused by manufacturing plant shutdowns in the second quarter of 2020 across North America as a result of the COVID-19 pandemic, and decreased freight revenue per revenue-ton mile. Freight revenue per revenue ton-mile decreased due to lower fuel surcharge revenue as a result of lower fuel prices. This decrease was partially offset by the onboarding of customers moving to and from Vancouver, higher freight rates, and the favourable impact of the change in FX.

Automotive revenue was $352 million in 2019, an increase of $30 million, or 9% from $322 million in 2018. This increase was primarily due to higher volumes from Vancouver to eastern Canada, higher volumes from the U.S. to CP's new Vancouver Automotive Compound, increased freight revenue per revenue ton-mile, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates.

Intermodal



For the year ended December 31	2020	2019	2018	2020 vs. 2019 Total Change	2020 vs. 2019 % Change	2020 vs. 2019 FX Adjusted % Change[1]	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 1,563**	$ 1,593	$ 1,538	$ (30)	(2)	(2)	$ 55	4	3
Carloads (in thousands)	**1,049.6**	1,046.1	1,025.9	3.5	—	N/A	20.2	2	N/A
Revenue ton-miles (in millions)	**27,858**	28,033	26,688	(175)	(1)	N/A	1,345	5	N/A

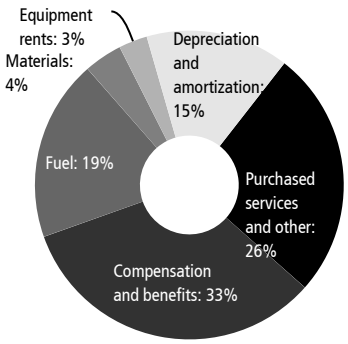
Freight revenue per revenue ton-mile (in cents)	**5.61**	5.68	5.76	(0.07)	(1)	(2)	(0.08)	(1)	(2)

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.



Intermodal revenue was $1,563 million in 2020, a decrease of $30 million, or 2%, from $1,593 million in 2019. This decrease was primarily due to decreased freight revenue per revenue ton-mile and lower volumes of international intermodal driven by the completion of a customer contract. This decrease was partially offset by the onboarding of a new international intermodal customer, higher freight rates, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile decreased due to lower fuel surcharge revenues as a result of lower fuel prices.

Intermodal revenue was $1,593 million in 2019, an increase of $55 million, or 4%, from $1,538 million in 2018. This increase was primarily due to higher international volumes through the Port of Vancouver, the onboarding of a new domestic retail customer, and the favourable impact of the change in FX. This increase was partially offset by a decrease in freight revenue per revenue ton-mile. RTMs increased more than carloads due to discontinuing expressway service in the second quarter of 2018, which had a shorter length of haul. Freight revenue per revenue ton-mile decreased due to lower fuel surcharge revenue as a result of lower fuel prices.

2019 Operating Expenses

2018 Operating Expenses

For the year ended December 31 (in millions of Canadian dollars)	2020	2019	2018	2020 vs. 2019 Total Change	2020 vs. 2019 % Change	2020 vs. 2019 FX Adjusted % Change[1]	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]
Compensation and benefits	**$ 1,560**	$ 1,540	$ 1,468	$ 20	1	1	$ 72	5	4
Fuel	**652**	882	918	(230)	(26)	(27)	(36)	(4)	(6)
Materials	**216**	210	201	6	3	3	9	4	4
Equipment rents	**142**	137	130	5	4	2	7	5	3
Depreciation and amortization	**779**	706	696	73	10	10	10	1	1
Purchased services and other	**1,050**	1,193	1,072	(143)	(12)	(12)	121	11	10
Total operating expenses	**$ 4,399**	$ 4,668	$ 4,485	$ (269)	(6)	(6)	$ 183	4	3

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Operating expenses were $4,399 million in 2020, a decrease of $269 million, or 6%, from $4,668 million in 2019. This decrease was primarily due to:

- the favourable impact of $195 million from lower fuel prices;
- efficiencies generated from improved operating performance and asset utilization;
- a gain of $68 million as a result of the remeasurement to fair value of the previously held equity investment in DRTP;
- reduced variable expenses from lower volumes;
- the impact of harsher winter operating conditions in 2019; and
- lower casualty costs incurred in 2020.

This decrease was partially offset by:

- higher depreciation and amortization of $71 million (excluding FX);
- cost inflation;
- higher stock-based compensation of $37 million primarily driven by an increase in stock price; and
- the unfavourable impact of the change in FX of $23 million.

Operating expenses were $4,668 million in 2019, an increase of $183 million, or 4%, from $4,485 million in 2018. This increase was primarily due to:

- increased operating expense associated with higher casualty costs incurred in 2019 of $76 million (excluding FX);
- higher stock-based compensation of $58 million primarily driven by an increase in stock price;
- cost inflation;
- the unfavourable impact of the change in FX of $48 million;
- increased weather related costs as a result of harsh winter operating conditions in the first quarter of 2019; and
- increased variable expenses from higher volumes.

This increase was partially offset by the favourable impact from changes in fuel prices of $77 million and the efficiencies generated from improved operating performance and asset utilization.

Compensation and Benefits

Compensation and benefits expense includes employee wages, salaries, fringe benefits, and stock-based compensation. Compensation and benefits expense was $1,560 million in 2020, an increase of $20 million, or 1%, from $1,540 million in 2019. This increase was primarily due to:

- the impact of wage and benefit inflation;
- increased stock-based compensation of $37 million primarily driven by the impact of changes in share price;
- higher defined benefit ("DB") pension and post-retirement benefits current service cost of $33 million;
- a bonus paid to frontline employees of $17 million; and
- unfavourable impact of the change in FX of $5 million.

This increase was partially offset by:

- labour efficiencies generated from improved operating performance and asset utilization;
- reduced training costs;
- lower volume variable expense as a result of decreased workload as measured by GTMs; and
- the impact of weather related costs as a result of harsh winter operating conditions in the first quarter of 2019.

Compensation and benefits expense was $1,540 million in 2019, an increase of $72 million, or 5% from $1,468 million in 2018. This increase was primarily due to:

- higher stock-based compensation of $58 million primarily driven by an increase in stock price;
- the impact of wage and benefit inflation;
- the impact of harsher winter operating conditions driven by operational inefficiencies and increased track labour and overtime;
- the unfavourable impact of the change in FX of $11 million; and
- higher volume variable expenses as a result of an increase in workload as measured by GTMs.

This increase was partially offset by:

- lower incentive compensation;
- lower DB pension and post-retirement benefits current service costs of $14 million; and
- labour efficiencies.

Fuel

Fuel expense consists mainly of fuel used by locomotives and includes provincial, state, and federal fuel taxes. Fuel expense was $652 million in 2020, a decrease of $230 million, or 26%, from $882 million in 2019. This decrease was primarily due to:

- the favourable impact of lower fuel prices of $195 million;
- a decrease in workload, as measured by GTMs; and
- an improvement in fuel efficiency of 1% from improved winter operating conditions in the first quarter of 2020.

This decrease was partially offset by the unfavourable impact of the change in FX of $8 million.

Fuel expense was $882 million in 2019, a decrease of $36 million, or 4%, from $918 million in 2018. This decrease was primarily due to the favourable impact from lower fuel prices of $77 million.

This decrease was partially offset by an increase in workload, as measured by GTMs, and the unfavourable impact of the change in FX of $18 million.

Materials

Materials expense includes the cost of material used for maintenance of track, locomotives, freight cars, and buildings as well as software sustainment. Materials expense was $216 million in 2020, an increase of $6 million, or 3%, from $210 million in 2019. This increase was primarily due to higher spending on locomotive maintenance and overhauls, and track maintenance.

Materials expense was $210 million in 2019, an increase of $9 million, or 4%, from $201 million in 2018. This increase was primarily due to higher locomotive maintenance and higher non-locomotive fuel costs.

Equipment Rents

Equipment rents expense includes the cost associated with using other companies' freight cars, intermodal equipment, and locomotives, net of rental income received from other railways for the use of CP's equipment. Equipment rents expense was $142 million in 2020, an increase of $5 million, or 4%, from $137 million in 2019. This increase was primarily due to lower receipts for CP freight cars used by other railways and the unfavourable impact of the change in FX of $2 million, partially offset by lower usage of pooled freight cars as a result of lower volumes.

Equipment rents expense was $137 million in 2019, an increase of $7 million, or 5%, from $130 million in 2018. This increase was primarily due to greater usage of pooled freight cars and the unfavourable impact of the change in FX of $3 million.

Depreciation and Amortization

Depreciation and amortization expense represents the charge associated with the use of track and roadway, buildings, rolling stock, information systems, and other depreciable assets. Depreciation and amortization expense was $779 million for 2020, an increase of $73 million, or 10%, from $706 million in 2019. This increase was primarily due to:

- a higher asset base, as a result of the capital program spending in 2020;
- the impact of depreciation studies and other adjustments made in 2019; and
- the unfavourable impact of the change in FX of $2 million.

Depreciation and amortization expense was $706 million for 2019, an increase of $10 million, or 1%, from $696 million in 2018. This increase was primarily due to a higher asset base, as a result of the capital program spending in 2019, and the unfavourable impact of the change in FX of $4 million, partially offset by the impact of depreciation studies and other adjustments.

Purchased Services and Other

For the year ended December 31 (in millions of Canadian dollars)	2020	2019	2018	2020 vs. 2019 Total Change	2020 vs. 2019 % Change	2019 vs. 2018 Total Change	2019 vs. 2018 % Change
Support and facilities	**$ 271**	$ 278	$ 264	$ (7)	(3)	$ 14	5
Track and operations	**282**	278	268	4	1	10	4
Intermodal	**209**	222	221	(13)	(6)	1	—
Equipment	**113**	125	143	(12)	(10)	(18)	(13)
Casualty	**116**	149	73	(33)	(22)	76	104
Property taxes	**126**	133	124	(7)	(5)	9	7
Other	**(57)**	29	20	(86)	(297)	9	45
Land sales	**(10)**	(21)	(41)	11	(52)	20	(49)
Total Purchased services and other	**$ 1,050**	$ 1,193	$ 1,072	$ (143)	(12)	$ 121	11

Purchased services and other expense encompasses a wide range of third-party costs, including contractor and consulting fees, locomotive and freight car repairs performed by third parties, property and other taxes, intermodal pickup and delivery services, casualty expense, expenses for joint facilities, and gains on land sales. Purchased services and other expense was $1,050 million in 2020, a decrease of $143 million, or 12%, from $1,193 million in 2019. This decrease was primarily due to:

- a gain of $68 million as a result of the remeasurement to fair value of the previously held equity investment in DRTP, reported in Other.
- lower expenses primarily due to reduced number and severity of casualty incidents, reported in Casualty;
- reduced business travel and event cost due to COVID-19, reported in primarily Support and facilities and Track and operations;
- a decrease in charges associated with contingencies of $10 million, reported in Other; and
- reduced variable expenses from lower volumes, reported in Intermodal and Equipment.

This decrease was partially offset by lower gains on land sales of $11 million in 2020, reported in Land sales and the unfavourable impact of the change in FX of $6 million.

Purchased services and other expense was $1,193 million in 2019, an increase of $121 million, or 11%, from $1,072 million in 2018. This increase was primarily due to:

- an increase in number and severity of casualty incidents of $73 million (excluding FX), which were the result of difficult operating conditions due to weather in the first half of 2019, reported in Casualty;
- lower gains on land sales of $20 million mainly as a result of the sale of the Bass Lake railway line in 2018;
- the unfavourable impact of the change in FX of $11 million;
- an increase in legal fees, reported in Support and facilities;

- higher snow removal and other weather related costs; and
- higher property taxes due to higher tax rates.

This increase was partially offset by:
- a decrease in charges associated with contingencies of $10 million, reported in Other;
- a decrease in costs for locomotive warranty service agreements due to the insourcing of maintenance of certain locomotives in the company's fleet, reported in Equipment; and
- costs related to labour disruptions in the second quarter of 2018, reported in Track and operations.

Other Income Statement Items

Other (Income) Expense

Other (income) expense consists of gains and losses from the change in FX on debt and lease liabilities and working capital, costs related to financing, shareholder costs, equity income, and other non-operating expenditures. Other income was $7 million in 2020, a decrease of $82 million, or 92%, from $89 million in the same period of 2019. This decrease was primarily due to a lower FX translation gain on U.S. dollar-denominated debt and lease liabilities of $80 million.

Other income was $89 million in 2019, a change of $263 million, or 151%, compared to an expense of $174 million in 2018. This change was primarily due to an FX translation gain on U.S. dollar-denominated debt and lease liabilities of $94 million, compared to an FX translation loss on U.S. dollar-denominated debt of $168 million in 2018.

FX translation gains and losses on debt and lease liabilities are discussed further in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Other Components of Net Periodic Benefit Recovery

Other components of net periodic benefit recovery were $342 million in 2020, a decrease of $39 million, or 10%, from $381 million in 2019. This decrease was primarily due to an increase in the recognized net actuarial loss resulting from a reduction in discount rate.

Other components of net periodic benefit recovery were $381 million in 2019, a decrease of $3 million or 1%, from $384 million in 2018. This decrease was primarily due to higher interest cost on the benefit obligation.

Net Interest Expense

Net interest expense includes interest on long-term debt and finance leases. Net interest expense was $458 million in 2020, an increase of $10 million, or 2%, from $448 million in 2019. This increase was primarily due to the unfavourable impacts of an increase in debt levels of $34 million and the change in FX of $4 million. This increase was partially offset by a reduction in interest related to long-term debt of $29 million as the result of a lower effective interest rate following the Company's debt refinancing completed in 2019 and 2020.

Net interest expense was $448 million in 2019, a decrease of $5 million, or 1%, from $453 million in 2018. This was primarily due to a net reduction in interest related to long-term debt of $21 million as the result of a lower effective interest rate following the Company's debt refinancing completed in 2018 and 2019, partially offset by the unfavourable impact of the change in FX of $10 million and an increase in commercial paper interest of $6 million.

Income Tax Expense

Income tax expense was $758 million in 2020, an increase of $52 million, or 7%, from $706 million in 2019. The increase was primarily due to higher taxable earnings and lower net income tax recoveries in 2020. In 2020, a tax filing election lowered the North Dakota rate resulting in net income tax recoveries of $29 million compared to 2019 when net income tax recoveries were $88 million as a result of an Alberta corporate tax rate decrease, partially offset by a 2019 tax expense for an unrecognized tax benefit of $24 million.

Income tax expense was $706 million in 2019, an increase of $69 million, or 11%, from $637 million in 2018. The increase was due to:
- higher taxable earnings;
- an increase in unrecognized tax benefits of $24 million; and
- net income tax recoveries in 2018 of $21 million as a result of the Iowa and Missouri corporate tax rate decreases.

This increase was partially offset by net income tax recoveries in 2019 of $88 million as a result of an Alberta corporate tax rate decrease.

The effective income tax rate for 2020 was 23.66% on reported income and 24.61% on Adjusted income. The effective income tax rate for 2019 was 22.43% on reported income and 24.96% on Adjusted income. The effective income tax rate for 2018 was 24.64% on reported income and 24.55% on

Adjusted income. Adjusted income is a Non-GAAP measure, which is discussed further in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Company expects a 2021 effective tax rate of 24.60%. The Company's 2021 outlook for its effective tax rate is based on certain assumptions about events and developments that may or may not materialize, or that may be offset entirely or partially by new events and developments. These assumptions are discussed further in Item 1A. Risk Factors.

Liquidity and Capital Resources

The Company believes adequate amounts of Cash and cash equivalents are available in the normal course of business to provide for ongoing operations, including the obligations identified in the tables in Contractual Commitments of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. The Company is not aware of any trends or expected fluctuations in the Company's liquidity that would create any deficiencies. The Company's primary sources of liquidity include its Cash and cash equivalents, its commercial paper program, its bilateral letter of credit facilities, and its revolving credit facility.

As at December 31, 2020, the Company had $147 million of Cash and cash equivalents compared to $133 million at December 31, 2019.

As at December 31, 2020, the Company's revolving credit facility was undrawn (December 31, 2019 – undrawn), from a total available amount of U.S. $1.3 billion. The agreement requires the Company to maintain a financial covenant in conjunction with the facility. As at December 31, 2020, the Company was in compliance with all terms and conditions of the credit facility arrangements and satisfied the financial covenant.

The Company has a commercial paper program that enables it to issue commercial paper up to a maximum aggregate principal amount of U.S. $1.0 billion in the form of unsecured promissory notes. This commercial paper program is backed by the revolving credit facility. As at December 31, 2020, total commercial paper borrowings were U.S. $644 million (December 31, 2019 – $397 million).

As at December 31, 2020, under its bilateral letter of credit facilities, the Company had letters of credit drawn of $59 million from a total available amount of $300 million (December 31, 2019 - $80 million). Under the bilateral letter of credit facilities, the Company has the option to post collateral in the form of Cash or cash equivalents, equal at least to the face value of the letter of credit issued. As at December 31, 2020, the Company did not have any collateral posted on its bilateral letter of credit facilities (December 31, 2019 – $nil).

The following discussion of operating, investing, and financing activities describes the Company's indicators of liquidity and capital resources.

Operating Activities

Cash provided by operating activities was $2,802 million in 2020, a decrease of $188 million, or 6%, compared to $2,990 million in 2019. This decrease was primarily due to lower receipts from customers in advance of performing services, compared to 2019.

Cash provided by operating activities was $2,990 million in 2019, an increase of $278 million, or 10%, compared to $2,712 million in 2018. This increase was primarily due to advance receipts of consideration for service under freight contracts as well as higher cash generating income, compared to 2018.

Investing Activities

Cash used in investing activities was $2,030 million in 2020, an increase of $227 million, or 13%, from $1,803 million in 2019. This increase was primarily due to the acquisition of DRTP in 2020, compared to the acquisition of CMQ in 2019.

Cash used in investing activities was $1,803 million in 2019, an increase of $345 million, or 24%, from $1,458 million in 2018. This increase was primarily due to:

- the acquisition of CMQ;
- higher additions to properties; and
- lower proceeds from the sale of properties and other assets.

Capital Programs

For the year ended December 31 (in millions of Canadian dollars, except for track miles and crossties)	2020	2019	2018
Additions to capital			
Track and roadway	**$ 1,161**	$ 1,004	$ 965
Rolling stock [1]	**253**	393	318
Information systems software [2]	**45**	55	53
Buildings [3]	**103**	58	54
Other [3]	**126**	154	184
Total – accrued additions to capital	**1,688**	1,664	1,574
Less:			
Non-cash transactions	**17**	17	23
Cash invested in additions to properties (per Consolidated Statements of Cash Flows)	**$ 1,671**	$ 1,647	$ 1,551
Track installation capital programs			
Track miles of rail laid (miles)	**301**	246	281
Track miles of rail capacity expansion (miles)	**28**	11	4
Crossties installed (thousands)	**1,417**	1,122	1,015

[1] Previously reported as Rolling Stock and containers. Containers of approximately $3 million in 2020 (2019 - $33 million; 2018 - $83 million) included in Other.
[2] Previously reported as Information Systems including hardware and software. Hardware of approximately $17 million in 2020 (2019 - $15 million; 2018 - $33 million) included in Other.
[3] Previously reported as Buildings and other, now separated.

Track and roadway expenditures include the replacement and enhancement of the Company's track infrastructure. Of the $1,161 million additions in 2020 (2019 – $1,004 million), approximately $1,008 million (2019 – $918 million) was invested in the renewal of depleted assets, namely rail, ties, ballast, signals, and bridges. Approximately $25 million (2019 – $27 million) was spent on PTC compliance requirements and $128 million (2019 – $59 million) was invested in network improvements and growth initiatives.

Rolling stock investments encompass locomotives and railcars. In 2020, expenditures on locomotives were approximately $126 million (2019 – $174 million) and were focused on the continued re-investment in CP's existing locomotive fleet. Railcar investment of approximately $127 million (2019 – $219 million) was largely focused on renewal of depleted assets, including the acquisition of covered hoppers for grain transportation.

In 2020, CP invested approximately $45 million (2019 – $55 million) in information systems software primarily focused on rationalizing and enhancing business systems and providing real-time data. Investments in buildings were approximately $103 million (2019 - $58 million) included items such as facility upgrades, renovations and shop equipment. Other items were $126 million (2019 – $154 million) and included investments in modernizing core information systems hardware, containers, and vehicles.

For 2021, CP expects to invest approximately $1.55 billion in its capital programs, which will be financed with cash generated from operations. Approximately 60% to 65% of the planned capital programs is for track and roadway. Approximately 20% is expected to be allocated to rolling stock, including railcars and locomotive improvements. Approximately 5% is expected to be allocated to information services, and 10% to 15% is expected to be allocated to buildings and other.

Free Cash

CP generated positive Free cash of $1,157 million in 2020, a decrease of $200 million, or 15%, from $1,357 million in 2019. This decrease was primarily due to a decrease in cash provided by operating activities.

CP generated positive Free cash of $1,357 million in 2019, an increase of $68 million, or 5%, from $1,289 million in 2018. This increase was primarily due to an increase in cash provided by operating activities, partially offset by higher additions to properties and lower proceeds from the sale of properties and other assets during 2019.

Free cash is affected by seasonal fluctuations and by other factors including the size of the Company's capital programs. The 2020 capital programs are discussed above. Free cash is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Financing Activities

Cash used in financing activities was $764 million in 2020, a decrease of $347 million, or 31%, from $1,111 million in 2019. This decrease was primarily due to the issuances of U.S. $500 million 2.050% notes due March 5, 2030 and $300 million 3.050% notes due March 9, 2050 in 2020, compared to the issuance of $400 million 3.150% notes due March 13, 2029 in 2019, as well as the principal repayment of U.S. $350 million of the Company's 7.250% notes at maturity in May 2019. This was partially offset by higher payments to buy back shares under the Company's share repurchase program, lower net issuances of commercial paper during 2020, and higher dividends paid during 2020.

Cash used in financing activities was $1,111 million in 2019, a decrease of $431 million, or 28%, from $1,542 million in 2018. This decrease was primarily due to the net issuance of commercial paper in 2019 and a lower principal repayment of U.S. $350 million of the Company's 7.250% notes maturing May 2019, compared to the principal repayments in 2018 of U.S. $275 million of the Company's 6.500% notes maturing May 2018 and $375 million of the Company's 6.250% medium term notes maturing June 2018. This was partially offset by the issuance of $400 million 3.150% notes due March 13, 2029 in 2019 compared to the issuance of U.S. $500 million 4.000% notes due June 1, 2028 in 2018, and higher dividends paid during 2019.

Credit Measures

Credit ratings provide information relating to the Company's operations and liquidity, and affect the Company's ability to obtain short-term and long-term financing and/or the cost of such financing.

A mid-investment grade credit rating is an important measure in assessing the Company's ability to maintain access to public financing and to minimize the cost of capital. It also affects the ability of the Company to engage in certain collateralized business activities on a cost-effective basis.

Credit ratings and outlooks are based on the rating agencies' methodologies and can change from time to time to reflect their views of CP. Their views are affected by numerous factors including, but not limited to, the Company's financial position and liquidity along with external factors beyond the Company's control.

As at December 31, 2020, CP's credit ratings from Standard & Poor's Rating Services ("Standard & Poor's") and Moody's Investor Service ("Moody's") remain unchanged from December 31, 2019.

Credit ratings as at December 31, 2020[1]

Long-term debt			Outlook
Standard & Poor's			
	Long-term corporate credit	**BBB+**	stable
	Senior secured debt	**A**	stable
	Senior unsecured debt	**BBB+**	stable
Moody's			
	Senior unsecured debt	**Baa1**	stable
Commercial paper program			
Standard & Poor's		**A-2**	N/A
Moody's		**P-2**	N/A

[1] Credit ratings are not recommendations to purchase, hold, or sell securities and do not address the market price or suitability of a specific security for a particular investor. Credit ratings are based on the rating agencies' methodologies and may be subject to revision or withdrawal at any time by the rating agencies.

Financial Ratios

The Long-term debt to Net income ratio was 4.0 in 2020, compared with 3.6 in 2019 and 4.5 in 2018. The increase in the ratio from 2019 to 2020 was primarily due to higher debt. The decrease in the ratio from 2018 to 2019 was due to higher Net income, partially offset by higher debt.

The Adjusted net debt to Adjusted earnings before interest, tax, depreciation, and amortization ("EBITDA") ratio was 2.5 in 2020, compared with 2.4 in 2019 and 2.6 in 2018. The increase in the ratio from 2019 to 2020 was primarily due to a higher debt balance, partially offset by an increase in Adjusted EBITDA. The decrease from 2018 to 2019 was primarily due to an increase in Adjusted EBITDA. Adjusted net debt to Adjusted EBITDA ratio is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Over the long term, CP targets an Adjusted net debt to Adjusted EBITDA ratio of 2.0 to 2.5.

Although CP has provided a target Non-GAAP measure (Adjusted net debt to Adjusted EBITDA ratio), management is unable to reconcile, without unreasonable efforts, the target Adjusted net debt to Adjusted EBITDA ratio to the most comparable GAAP measure (Long-term debt to Net income ratio), due to unknown variables and uncertainty related to future results. These unknown variables may include unpredictable transactions of significant value. In recent years, CP has recognized changes in income tax rates and a change to an uncertain tax item. These or other similar, large unforeseen transactions affect Net income but may be excluded from CP's Adjusted EBITDA. Additionally, the U.S.-to-Canada dollar exchange rate is unpredictable and can have a significant impact on CP's reported results but may be excluded from CP's Adjusted EBITDA. In particular, CP excludes the FX impact of translating the Company's debt and lease liabilities, interest and taxes from Adjusted EBITDA. Please see Forward-Looking Statements in this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

Dividend Payout Ratio

The dividend payout ratio was 19.8% in 2020, compared with 17.9% in 2019 and 18.5% in 2018. The increase in the ratio from 2019 to 2020 was due to higher dividends declared per share, partially offset by higher diluted EPS. The decrease in the ratio from 2018 to 2019 was due to higher diluted EPS, partially offset by higher dividends declared per share.

The Adjusted dividend payout ratio was 20.1% in 2020, compared with 19.1% in 2019 and 17.3% in 2018. These increases were due to higher dividends declared per share, partially offset by higher Adjusted diluted EPS. Adjusted dividend payout ratio is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Over the long term, CP targets an Adjusted dividend payout ratio of 25.0% to 30.0%.

Although CP has provided a target Non-GAAP measure (Adjusted dividend payout ratio), management is unable to reconcile, without unreasonable efforts, the target Adjusted dividend payout ratio to the most comparable GAAP measure (Dividend payout ratio), due to unknown variables and uncertainty related to future results. These unknown variables may include unpredictable transactions of significant value. In recent years, CP has recognized changes in income tax rates and a change to an uncertain tax item. These or other similar, large unforeseen transactions affect Diluted EPS but may be excluded from CP's Adjusted diluted EPS. Additionally, the U.S.-to-Canada dollar exchange rate is unpredictable and can have a significant impact on CP's reported results but may be excluded from CP's Adjusted diluted EPS. In particular, CP excludes the FX impact of translating the Company's debt and lease liabilities from Adjusted diluted EPS. Please see Forward-Looking Statements in this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

Supplemental Guarantor Financial Information

Canadian Pacific Railway Company ("CPRC"), a 100%-owned subsidiary of Canadian Pacific Railway Limited ("CPRL"), is the issuer of certain securities which are fully and unconditionally guaranteed by CPRL on an unsecured basis. The other subsidiaries of CPRC do not guarantee the securities and are referred to below as the "Non-Guarantor Subsidiaries". The following is a description of the terms and conditions of the guarantees with respect to securities for which CPRC is the issuer and CPRL provides a full and unconditional guarantee.

As of December 31, 2020, CPRC has $7,448 million principal amount of debt securities outstanding due through 2115, and $45 million in perpetual 4% consolidated debenture stock, for all of which CPRL is the guarantor.

CPRL fully and unconditionally guarantees the payment of the principal (and premium, if any) and interest on the debt securities and consolidated debenture stock issued by CPRC, any sinking fund or analogous payments payable with respect to such securities, and any additional amounts payable when they become due, whether at maturity or otherwise. The guarantee is CPRL's unsubordinated and unsecured obligation and ranks equally with all of CPRL's other unsecured, unsubordinated obligations.

CPRL will be released and relieved of its obligations under the guarantees after obligations to the holders are satisfied in accordance with the terms of the respective instruments.

Pursuant to Rule 13-01 of the SEC's Regulation S-X, the Company provides summarized financial and non-financial information of CPRC in lieu of providing separate financial statements of CPRC.

More information on the securities under this guarantee structure can be found in Exhibit 22.1 List of Issuers and Guarantor Subsidiaries of this annual report.

Summarized Financial Information

The following tables present summarized financial information for CPRC (Subsidiary Issuer) and CPRL (Parent Guarantor) on a combined basis after elimination of (i) intercompany transactions and balances among CPRC and CPRL; (ii) equity in earnings from and investments in the Non-Guarantor Subsidiaries; and (iii) intercompany dividend income.

Statements of Income

	CPRC (Subsidiary Issuer) and CPRL (Parent Guarantor)	
(in millions of Canadian dollars)	**For the year ended December 31, 2020**	For the year ended December 31, 2019
Total revenues	**$ 5,797**	$ 5,662
Total operating expenses	**3,263**	3,446
Operating Income [1]	**2,534**	2,216
Less: Other [2]	**127**	(13)
Income before income tax expense	**2,407**	2,229
Net Income	**$ 1,792**	$ 1,704

[1] Includes net lease costs incurred from non-guarantor subsidiaries for the year ended December 31, 2020 and 2019 of $435 million and $320 million, respectively.
[2] Includes Other income, Other components of net periodic benefit recovery, and Net interest expense.

Balance Sheets

	CPRC (Subsidiary Issuer) and CPRL (Parent Guarantor)	
(in millions of Canadian dollars)	**As at December 31, 2020**	As at December 31, 2019
Assets		
Current Assets	**$ 907**	$ 842

Share Capital

At February 17, 2021, the latest practicable date prior to the date of this Annual Report on Form 10-K, there were 133,297,236 Common Shares and no preferred shares issued and outstanding, which consists of 13,779 holders of record of the Common Shares. In addition, CP has a Management Stock Option Incentive Plan ("MSOIP"), under which key officers and employees are granted options to purchase the Common Shares. Each option granted can be exercised for one Common Share. At February 17, 2021, 1,521,584 options were outstanding under the MSOIP and stand-alone option agreements entered into with Mr. Keith Creel. There are 733,836 options available to be issued by the Company's MSOIP in the future. CP has a Director's Stock Option Plan ("DSOP"), under which directors are granted options to purchase Common Shares. There are no outstanding options under the DSOP, which has 340,000 options available to be issued in the future.

Non-GAAP Measures

The Company presents Non-GAAP measures to provide a basis for evaluating underlying earnings and liquidity trends in the Company's business that can be compared with the results of operations in prior periods. In addition, these Non-GAAP measures facilitate a multi-period assessment of long-term profitability, allowing management and other external users of the Company's consolidated financial information to compare profitability on a long-term basis, including assessing future profitability, with that of the Company's peers.

These Non-GAAP measures have no standardized meaning and are not defined by GAAP and, therefore, may not be comparable to similar measures presented by other companies. The presentation of these Non-GAAP measures is not intended to be considered in isolation from, as a substitute for, or as superior to the financial information presented in accordance with GAAP.

Non-GAAP Performance Measures

The Company uses adjusted earnings results including Adjusted income, Adjusted diluted earnings per share, Adjusted operating income, and Adjusted operating ratio to evaluate the Company's operating performance and for planning and forecasting future business operations and future profitability. These Non-GAAP measures are presented in Item 6. Selected Financial Data and discussed further in other sections of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. These Non-GAAP measures provide meaningful supplemental information regarding operating results because they exclude certain significant items that are not considered indicative of future financial trends either by nature or amount. As a result, these items are excluded for management assessment of operational performance, allocation of resources, and preparation of annual budgets. These significant items may include, but are not limited to, restructuring and asset impairment charges, individually significant gains and losses from sales of assets, the FX impact of translating the Company's debt and lease liabilities (including borrowings under the credit facility), discrete tax items, changes in income tax rates, changes to an uncertain tax item, and certain items outside the control of management. These items may not be non-recurring. However, excluding these significant items from GAAP results allows for a consistent understanding of the Company's consolidated financial performance when performing a multi-period assessment including assessing the likelihood of future results. Accordingly, these Non-GAAP financial measures may provide insight to investors and other external users of the Company's consolidated financial information.

In 2020, there were two significant items included in Net income as follows:

- in the fourth quarter, a deferred tax recovery of $29 million due to a change relating to a tax return filing election for the state of North Dakota that favourably impacted Diluted EPS by 22 cents; and
- during the course of the year, a net non-cash gain of $14 million ($12 million after deferred tax) due to FX translation of debt and lease liabilities that favourably impacted Diluted EPS by 9 cents as follows:
  - in the fourth quarter, a $103 million gain ($90 million after deferred tax) that favourably impacted Diluted EPS by 67 cents;

  - in the third quarter, a $40 million gain ($38 million after deferred tax) that favourably impacted Diluted EPS by 29 cents;
  - in the second quarter, an $86 million gain ($82 million after deferred tax) that favourably impacted Diluted EPS by 59 cents; and
  - in the first quarter, a $215 million loss ($198 million after deferred tax) that unfavourably impacted Diluted EPS by $1.44.

In 2019, there were three significant items included in Net income as follows:

- in the fourth quarter, a deferred tax expense of $24 million as a result of a provision for an uncertain tax item of a prior period that unfavourably impacted Diluted EPS by 17 cents;
- in the second quarter, a deferred tax recovery of $88 million due to the change in the Alberta provincial corporate income tax rate that favourably impacted Diluted EPS by 63 cents; and
- during the course of the year, a net non-cash gain of $94 million ($86 million after deferred tax) due to FX translation of debt and lease liabilities that favourably impacted Diluted EPS by 62 cents as follows:
  - in the fourth quarter, a $37 million gain ($32 million after deferred tax) that favourably impacted Diluted EPS by 22 cents;
  - in the third quarter, a $25 million loss ($22 million after deferred tax) that unfavourably impacted Diluted EPS by 15 cents;
  - in the second quarter, a $37 million gain ($34 million after deferred tax) that favourably impacted Diluted EPS by 24 cents; and
  - in the first quarter, a $45 million gain ($42 million after deferred tax) that favourably impacted Diluted EPS by 30 cents.

In 2018, there were two significant items included in Net income as follows:

- in the second quarter, a deferred tax recovery of $21 million due to reductions in the Missouri and Iowa state tax rates that favourably impacted Diluted EPS by 15 cents; and
- during the course of the year, a net non-cash loss of $168 million ($150 million after deferred tax) due to FX translation of debt that unfavourably impacted Diluted EPS by $1.05 as follows:
  - in the fourth quarter, a $113 million loss ($103 million after deferred tax) that unfavourably impacted Diluted EPS by 72 cents;
  - in the third quarter, a $38 million gain ($33 million after deferred tax) that favourably impacted Diluted EPS by 23 cents;
  - in the second quarter, a $44 million loss ($38 million after deferred tax) that unfavourably impacted Diluted EPS by 27 cents; and
  - in the first quarter, a $49 million loss ($42 million after deferred tax) that unfavourably impacted Diluted EPS by 29 cents.

In 2017, there were five significant items included in Net income as follows:

- in the second quarter, a charge on hedge roll and de-designation of $13 million ($10 million after deferred tax) that unfavourably impacted Diluted EPS by 7 cents;
- in the second quarter, an insurance recovery of a legal settlement of $10 million ($7 million after current tax) that favourably impacted Diluted EPS by 5 cents;
- in the first quarter, a management transition recovery of $51 million related to the retirement of Mr. E. Hunter Harrison as CEO of CP ($39 million after deferred tax) that favourably impacted Diluted EPS by 27 cents;
- during the course of the year, a net deferred tax recovery of $541 million as a result of changes in income tax rates as follows:
  - in the fourth quarter, a deferred tax recovery of $527 million, primarily due to the U.S. tax reform, that favourably impacted Diluted EPS by $3.63;
  - in the third quarter, a deferred tax expense of $3 million as a result of the change in the Illinois state corporate income tax rate change that unfavourably impacted Diluted EPS by 2 cents;
  - in the second quarter, a deferred tax recovery of $17 million as a result of the change in the Saskatchewan provincial corporate income tax rate that favourably impacted Diluted EPS by 12 cents; and
- during the course of the year, a net non-cash gain of $186 million ($162 million after deferred tax) due to FX translation of debt that favourably impacted Diluted EPS by $1.10 as follows:
  - in the fourth quarter, a $14 million loss ($12 million after deferred tax) that unfavourably impacted Diluted EPS by 8 cents;
  - in the third quarter, a $105 million gain ($91 million after deferred tax) that favourably impacted Diluted EPS by 62 cents;
  - in the second quarter, a $67 million gain ($59 million after deferred tax) that favourably impacted Diluted EPS by 40 cents; and
  - in the first quarter, a $28 million gain ($24 million after deferred tax) that favourably impacted Diluted EPS by 16 cents.

In 2016, there were two significant items included in Net income as follows:

- in the third quarter, a $25 million expense ($18 million after current tax) related to a legal settlement that unfavourably impacted Diluted EPS by 12 cents; and
- during the course of the year, a net non-cash gain of $79 million ($68 million after deferred tax) due to FX translation of debt that favourably impacted Diluted EPS by 46 cents as follows:
  - in the fourth quarter, a $74 million loss ($64 million after deferred tax) that unfavourably impacted Diluted EPS by 43 cents;
  - in the third quarter, a $46 million loss ($40 million after deferred tax) that unfavourably impacted Diluted EPS by 27 cents;
  - in the second quarter, an $18 million gain ($16 million after deferred tax) that favourably impacted Diluted EPS by 10 cents; and
  - in the first quarter, a $181 million gain ($156 million after deferred tax) that favourably impacted Diluted EPS by $1.01.

Reconciliation of GAAP Performance Measures to Non-GAAP Performance Measures

The following tables reconcile the most directly comparable measures presented in accordance with GAAP to the Non-GAAP measures presented in Item 6. Selected Financial Data and discussed further in other sections of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations:

Adjusted income is calculated as Net income reported on a GAAP basis adjusted for significant items.

	For the year ended December 31				
(in millions of Canadian dollars)	**2020**	2019	2018	2017	2016
Net income as reported	**$ 2,444**	$ 2,440	$ 1,951	$ 2,405	$ 1,599
Less significant items (pre-tax):					
Legal settlement charge	**—**	—	—	—	(25)
Insurance recovery of legal settlement	**—**	—	—	10	—
Charge on hedge roll and de-designation	**—**	—	—	(13)	—
Management transition recovery	**—**	—	—	51	—
Impact of FX translation gain (loss) on debt and lease liabilities	**14**	94	(168)	186	79
Add:					
Tax effect of adjustments[1]	**2**	8	(18)	36	4
Income tax rate changes	**(29)**	(88)	(21)	(541)	—
Provision for uncertain tax item	**—**	24	—	—	—
Adjusted income	**$ 2,403**	$ 2,290	$ 2,080	$ 1,666	$ 1,549

[1] The tax effect of adjustments was calculated as the pre-tax effect of the adjustments multiplied by the applicable tax rate for the above items of 13.58%, 8.55%, 10.64%, 15.27% and 7.17% for the years presented, respectively. The applicable tax rates reflect the taxable jurisdictions and nature, being on account of capital or income, of the significant items.

Adjusted diluted earnings per share is calculated using Adjusted income, as defined above, divided by the weighted-average diluted number of Common Shares outstanding during the period as determined in accordance with GAAP.

	For the year ended December 31				
	2020	2019	2018	2017	2016
Diluted earnings per share as reported	**$ 17.97**	$ 17.52	$ 13.61	$ 16.44	$ 10.63
Less significant items (pre-tax):					
Legal settlement charge	**—**	—	—	—	(0.17)
Insurance recovery of legal settlement	**—**	—	—	0.07	—
Charge on hedge roll and de-designation	**—**	—	—	(0.09)	—
Management transition recovery	**—**	—	—	0.35	—
Impact of FX translation gain (loss) on debt and lease liabilities	**0.10**	0.67	(1.17)	1.27	0.53
Add:					
Tax effect of adjustments[1]	**0.01**	0.05	(0.12)	0.25	0.02
Income tax rate changes	**(0.21)**	(0.63)	(0.15)	(3.70)	—
Provision for uncertain tax item	**—**	0.17	—	—	—
Adjusted diluted earnings per share	**$ 17.67**	$ 16.44	$ 14.51	$ 11.39	$ 10.29

[1] The tax effect of adjustments was calculated as the pre-tax effect of the adjustments multiplied by the applicable tax rate for the above items of 13.58%, 8.55%, 10.64%, 15.27% and 7.17% for the years presented, respectively. The applicable tax rates reflect the taxable jurisdictions and nature, being on account of capital or income, of the significant items.

Adjusted operating income is calculated as Operating income reported on a GAAP basis less significant items.

	For the year ended December 31				
(in millions of Canadian dollars)	**2020**	2019	2018	2017	2016
Operating income as reported	**$ 3,311**	$ 3,124	$ 2,831	$ 2,519	$ 2,411
Less significant item:					
Management transition recovery	**—**	—	—	51	—
Adjusted operating income	**$ 3,311**	$ 3,124	$ 2,831	$ 2,468	$ 2,411

Adjusted operating ratio excludes those significant items that are reported within Operating income.

	For the year ended December 31				
	2020	2019	2018	2017	2016
Operating ratio as reported	**57.1 %**	59.9 %	61.3 %	61.6 %	61.3 %
Less significant item:					
Management transition recovery	**—**	—	—	(0.8)	—
Adjusted operating ratio	**57.1 %**	59.9 %	61.3 %	62.4 %	61.3 %

Adjusted ROIC

Adjusted ROIC is calculated as Adjusted return divided by Adjusted average invested capital. Adjusted return is defined as Net income adjusted for interest expense, tax effected at the Company's adjusted annualized effective tax rate, and significant items in the Company's Consolidated Financial Statements, tax effected at the applicable tax rate. Adjusted average invested capital is defined as the sum of total Shareholders' equity, Long-term debt, and Long-term debt maturing within one year, as presented in the Company's Consolidated Financial Statements, each averaged between the beginning and ending balance over a rolling 12-month period, adjusted for the impact of significant items, tax effected at the applicable tax rate, on closing balances as part of this average. Adjusted ROIC excludes significant items reported in the Company's Consolidated Financial Statements, as these significant items are not considered indicative of future financial trends either by nature or amount, and excludes interest expense, net of tax, to incorporate returns on the Company's overall capitalization. Adjusted ROIC is a performance measure that measures how productively the Company uses its long-term capital investments, representing critical indicators of good operating and investment decisions made by management, and is an important performance criteria in determining certain elements of the Company's long-term incentive plan. Adjusted ROIC, which is reconciled below from Return on average shareholders' equity, the most comparable measure calculated in accordance with GAAP, is also presented in Item 6. Selected Financial Data and discussed further in Results of Operations of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Beginning in the first quarter of 2020, CP aligned the reconciliation sequence for Adjusted ROIC to start with Net income, with no change to the calculated Adjusted return.

Calculation of Return on average shareholders' equity

	For the year ended December 31				
(in millions of Canadian dollars, except for percentages)	**2020**	2019	2018	2017	2016
Net income as reported	**$ 2,444**	$ 2,440	$ 1,951	$ 2,405	$ 1,599
Average shareholders' equity	**$ 7,194**	$ 6,853	$ 6,537	$ 5,539	$ 4,711
Return on average shareholders' equity	**34.0%**	35.6%	29.8%	43.4%	33.9%

Reconciliation of Net Income to Adjusted Return

	For the year ended December 31				
(in millions of Canadian dollars)	**2020**	2019	2018	2017	2016
Net income as reported	**$ 2,444**	$ 2,440	$ 1,951	$ 2,405	$ 1,599
Add:					
Net interest expense	**458**	448	453	473	471
Tax on interest[1]	**(113)**	(112)	(112)	(126)	(124)
Significant items (pre-tax):					
Legal settlement charge	**—**	—	—	—	25
Insurance recovery of legal settlement	**—**	—	—	(10)	—
Charge on hedge roll and de-designation	**—**	—	—	13	—
Management transition recovery	**—**	—	—	(51)	—
Impact of FX translation (gain) loss on debt and lease liabilities	**(14)**	(94)	168	(186)	(79)
Tax on significant items[2]	**2**	8	(18)	36	4
Income tax rate changes	**(29)**	(88)	(21)	(541)	—
Provision for uncertain tax item	**—**	24	—	—	—
Adjusted return	**$ 2,748**	$ 2,626	$ 2,421	$ 2,013	$ 1,896

[1] Tax was calculated at the adjusted annualized effective tax rate of 24.61%, 24.96%, 24.55%, 26.42%, and 26.20% for each of the above items for the years presented, respectively.
[2] Tax was calculated as the pre-tax effect of the adjustments multiplied by the applicable tax rate of 13.58%, 8.55%, 10.64%, 15.27%, and 7.17% for each of the above items for the years presented, respectively. The applicable tax rates reflect the taxable jurisdictions and nature, being on account of capital or income, of the significant items.

Reconciliation of Average shareholders' equity to Adjusted average invested capital

	For the year ended December 31				
(in millions of Canadian dollars)	**2020**	2019	2018	2017	2016
Average shareholders' equity	**$ 7,194**	$ 6,853	$ 6,537	$ 5,539	$ 4,711
Average Long-term debt, including long-term debt maturing within one year	**9,264**	8,726	8,427	8,422	8,821
	$ 16,458	$ 15,579	$ 14,964	$ 13,961	$ 13,532
Less:					
Significant items (pre-tax):					
Legal settlement charge	**—**	—	—	—	(13)
Insurance recovery of legal settlement	**—**	—	—	5	—
Charge on hedge roll and de-designation	**—**	—	—	(7)	—
Management transition recovery	**—**	—	—	26	—
Tax on significant items[1]	**—**	—	—	(5)	4
Income tax rate changes	**15**	44	11	270	—
Provision for uncertain tax item	**—**	(12)	—	—	—
Adjusted average invested capital	**$ 16,443**	$ 15,547	$ 14,953	$ 13,672	$ 13,541

[1] Tax was calculated as the pre-tax effect of the adjustments multiplied by the applicable tax rate of 15.27% and 7.17% for 2017 and 2016, respectively. The applicable tax rates reflect the taxable jurisdictions and nature, being on account of capital or income, of the significant items.

Calculation of Adjusted ROIC

	For the year ended December 31				
(in millions of Canadian dollars, except for percentages)	**2020**	2019	2018	2017	2016
Adjusted return	**$ 2,748**	$ 2,626	$ 2,421	$ 2,013	$ 1,896
Adjusted average invested capital	**$ 16,443**	$ 15,547	$ 14,953	$ 13,672	$ 13,541
Adjusted ROIC	**16.7%**	16.9%	16.2%	14.7%	14.0%

Free Cash

Free cash is calculated as Cash provided by operating activities, less Cash used in investing activities, adjusted for changes in cash and cash equivalents balances resulting from FX fluctuations, and the acquisitions of CMQ and DRTP. Free cash is a measure that management considers to be a valuable indicator of liquidity. Free cash is useful to investors and other external users of the Company's Consolidated Financial Statements as it assists with the evaluation of the Company's ability to generate cash to satisfy debt obligations and discretionary activities such as dividends, share repurchase programs, and other strategic opportunities. The acquisitions of CMQ and DRTP are not indicative of investment trends and have also been excluded from Free cash. Free cash should be considered in addition to, rather than as a substitute for, Cash provided by operating activities. Free cash is presented in Item 6. Selected Financial Data and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Reconciliation of Cash Provided by Operating Activities to Free Cash

	For the year ended December 31				
(in millions of Canadian dollars)	**2020**	2019	2018	2017	2016
Cash provided by operating activities	**$ 2,802**	$ 2,990	$ 2,712	$ 2,182	$ 2,089
Cash used in investing activities	**(2,030)**	(1,803)	(1,458)	(1,295)	(1,069)
Effect of foreign currency fluctuations on U.S. dollar-denominated cash and cash equivalents	**6**	(4)	11	(13)	(13)
Less:					
Settlement of forward starting swaps on debt issuance	**—**	—	(24)	—	—
Investment in Central Maine & Québec Railway	**19**	(174)	—	—	—
Investment in Detroit River Tunnel Partnership	**(398)**	—	—	—	—
Free cash	**$ 1,157**	$ 1,357	$ 1,289	$ 874	$ 1,007

Foreign Exchange Adjusted % Change

FX adjusted % change allows certain financial results to be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons in the analysis of trends in business performance. Financial result variances at constant currency are obtained by translating the comparable period of the prior year results denominated in U.S. dollars at the foreign exchange rates of the current period.

FX adjusted % changes in revenues are further used in calculating FX adjusted % change in freight revenue per carload and RTM. These items are presented in Operating Revenues of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(in millions of Canadian dollars)	Reported 2020	Reported 2019	Reported 2018	2020 vs. 2019 Variance due to FX	2020 vs. 2019 FX Adjusted 2019	2020 vs. 2019 FX Adj. % Change	2019 vs. 2018 Variance due to FX	2019 vs. 2018 FX Adjusted 2018	2019 vs. 2018 FX Adj. % Change
Freight revenues by line of business

Dividend Payout Ratio and Adjusted Dividend Payout Ratio

Dividend payout ratio is calculated as dividends declared per share divided by Diluted EPS. Adjusted dividend payout ratio is calculated as dividends declared per share divided by Adjusted diluted EPS, as defined above. These ratios are measures of shareholder return and provide information on the Company's ability to declare dividends on an ongoing basis. Dividend payout ratio and Adjusted dividend payout ratio are presented in Item 6. Selected Financial Data and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Calculation of Dividend Payout Ratio

(in dollars, except for percentages)	For the year ended December 31 2020	2019	2018	2017	2016
Dividends declared per share	**$ 3.5600**	$ 3.1400	$ 2.5125	$ 2.1875	$ 1.8500
Diluted EPS	**17.97**	17.52	13.61	16.44	10.63
Dividend payout ratio	**19.8%**	17.9%	18.5%	13.3%	17.4%

Calculation of Adjusted Dividend Payout Ratio

	For the year ended December 31				
(in dollars, except for percentages)	**2020**	2019	2018	2017	2016
Dividends declared per share	**$ 3.5600**	$ 3.1400	$ 2.5125	$ 2.1875	$ 1.8500
Adjusted diluted EPS	**17.67**	16.44	14.51	11.39	10.29
Adjusted dividend payout ratio	**20.1%**	19.1%	17.3%	19.2%	18.0%

Adjusted Net Debt to Adjusted EBITDA Ratio

Adjusted net debt to Adjusted earnings before interest, tax, depreciation and amortization ("EBITDA") ratio is calculated as Adjusted net debt divided by Adjusted EBITDA. The Adjusted net debt to Adjusted EBITDA ratio is a key credit measure used to assess the Company's financial capacity. The ratio provides information on the Company's ability to service its debt and other long-term obligations. The Adjusted net debt to Adjusted EBITDA ratio, which is reconciled below from the Long-term debt to Net income ratio, the most comparable measure calculated in accordance with GAAP, is also presented in Item 6. Selected Financial Data and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Calculation of Long-term Debt to Net Income Ratio

(in millions of Canadian dollars, except for ratios)	**2020**	2019	2018	2017	2016
Long-term debt including long-term debt maturing within one year as at December 31	**$ 9,771**	$ 8,757	$ 8,696	$ 8,159	$ 8,684
Net income for the year ended December 31	**2,444**	2,440	1,951	2,405	1,599
Long-term debt to Net income ratio	**4.0**	3.6	4.5	3.4	5.4

Reconciliation of Long-term Debt to Adjusted Net Debt

Adjusted net debt is defined as Long-term debt, Long-term debt maturing within one year and Short-term borrowing as reported on the Company's Consolidated Balance Sheets adjusted for pension plans deficit, operating lease liabilities recognized on the Company's Consolidated Balance Sheets, and Cash and cash equivalents.

(in millions of Canadian dollars)	**2020**	2019	2018	2017	2016
Long-term debt including long-term debt maturing within one year as at December 31	**$ 9,771**	$ 8,757	$ 8,696	$ 8,159	$ 8,684
Add:					
Pension plans deficit[(1)]	**328**	294	266	278	273
Operating lease liabilities	**311**	354	387	281	361
Less:					
Cash and cash equivalents	**147**	133	61	338	164
Adjusted net debt as at December 31	**$ 10,263**	$ 9,272	$ 9,288	$ 8,380	$ 9,154

[(1)] Pension plans deficit is the total funded status of the Pension plans in deficit only.

Reconciliation of Net Income to EBIT, Adjusted EBIT and Adjusted EBITDA

Earnings before interest and tax ("EBIT") is calculated as Net income before Net interest expense and Income tax expense. Adjusted EBIT excludes significant items reported in both Operating income and Other (income) expense. Adjusted EBITDA is calculated as Adjusted EBIT plus operating lease expense and Depreciation and amortization, less Other components of net periodic benefit recovery.

	For the year ended December 31				
(in millions of Canadian dollars)	**2020**	2019	2018	2017	2016
Net income as reported	**$ 2,444**	$ 2,440	$ 1,951	$ 2,405	$ 1,599
Add:					
Net interest expense	**458**	448	453	473	471
Income tax expense	**758**	706	637	93	553
EBIT	**3,660**	3,594	3,041	2,971	2,623
Less significant items (pre-tax):					
Legal settlement charge	**—**	—	—	—	(25)
Insurance recovery of legal settlement	**—**	—	—	10	—
Charge on hedge roll and de-designation	**—**	—	—	(13)	—
Management transition recovery	**—**	—	—	51	—
Impact of FX translation gain (loss) on debt and lease liabilities	**14**	94	(168)	186	79
Adjusted EBIT	**3,646**	3,500	3,209	2,737	2,569
Add:					
Operating lease expense	**78**	83	97	104	111
Depreciation and amortization	**779**	706	696	661	640
Less:					
Other components of net periodic benefit recovery	**342**	381	384	274	167
Adjusted EBITDA	**$ 4,161**	$ 3,908	$ 3,618	$ 3,228	$ 3,153

Calculation of Adjusted Net Debt to Adjusted EBITDA Ratio

(in millions of Canadian dollars, except for ratios)	**2020**	2019	2018	2017	2016
Adjusted net debt as at December 31	**$ 10,263**	$ 9,272	$ 9,288	$ 8,380	$ 9,154
Adjusted EBITDA for the year ended December 31	**4,161**	3,908	3,618	3,228	3,153
Adjusted net debt to Adjusted EBITDA ratio	**2.5**	2.4	2.6	2.6	2.9

Off-Balance Sheet Arrangements

Guarantees

Refer to Item 8. Financial Statements and Supplementary Data, Note 26 Guarantees for details.

Contractual Commitments

The accompanying table indicates the Company's obligations and commitments to make future payments for contracts such as debt, leases, and commercial arrangements as at December 31, 2020.

Payments due by period (in millions of Canadian dollars)	Total	2021	2022 & 2023	2024 & 2025	Thereafter
Interest on long-term debt and finance leases	$ 10,883	$ 441	$ 762	$ 693	$ 8,987
Long-term debt	9,717	1,178	946	974	6,619
Finance leases	143	8	111	14	10
Operating leases[1]	347	71	112	76	88
Supplier purchase	1,743	528	930	97	188
Other long-term liabilities[2]	494	54	102	98	240
Total contractual commitments	**$ 23,327**	$ 2,280	$ 2,963	$ 1,952	$ 16,132

[1] Residual value guarantees on certain leased equipment with a maximum exposure of $1 million are not included in the minimum payments shown above, as management believes that CP will not be required to make payments under these residual guarantees.

[2] Includes expected cash payments for environmental remediation, post-retirement benefits, workers' compensation benefits, long-term disability benefits, pension benefit payments for the Company's non-registered supplemental pension plan, and certain other long-term liabilities. Projected payments for post-retirement benefits, workers' compensation benefits, and long-term disability benefits include the anticipated payments for years 2021 to 2030. Pension contributions for the Company's registered pension plans are not included due to the volatility in calculating them. Pension payments are discussed further in Critical Accounting Estimates of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Certain Other Financial Commitments

In addition to the financial commitments mentioned above, the Company is party to certain other financial commitments discussed below.

Letters of Credit

Letters of credit are obtained mainly to provide security to third parties under the terms of various agreements, including the supplemental pension plan. CP is liable for these contractual amounts in the case of non-performance under these agreements. Letters of credit are accommodated through a revolving credit facility and the Company's bilateral letter of credit facilities.

Capital Commitments

The Company remains committed to maintaining the current high level of quality of our capital assets in pursuing sustainable growth. As part of this commitment, CP has entered into contracts with suppliers to make various capital purchases related to track and rolling stock programs. Payments for these commitments are due in 2021 through 2032. These expenditures are expected to be financed by cash generated from operations or by issuing new debt.

The accompanying table indicates the Company's commitments to make future payments for letters of credit and capital expenditures as at December 31, 2020.

Payments due by period (in millions of Canadian dollars)	Total	2021	2022 & 2023	2024 & 2025	Thereafter
Letters of credit	$ 59	$ 59	$ —	$ —	$ —
Capital commitments	547	369	79	41	58
Total certain other financial commitments	**$ 606**	$ 428	$ 79	$ 41	$ 58

Critical Accounting Estimates

To prepare the Consolidated Financial Statements that conform with GAAP, the Company is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reported periods. Using the most current information available, the Company reviews estimates on an ongoing basis, including those related to environmental liabilities, pensions and other benefits, property, plant and equipment, deferred income taxes, and personal injury and other claims liabilities.

The development, selection and disclosure of these estimates, and this Management's Discussion and Analysis of Financial Condition and Results of Operations, have been reviewed by the Board of Directors' Audit and Finance Committee, which is composed entirely of independent directors.

Environmental Liabilities

Environmental remediation accruals cover site-specific remediation programs. CP estimates of the probable costs to be incurred in the remediation of properties contaminated by past railway activities reflect the nature of contamination at individual sites according to typical activities and scale of operations conducted. The Company screens and classifies sites according to typical activities and scale of operations conducted. CP has developed remediation strategies for each property based on the nature and extent of the contamination, as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants. CP also considers available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and groundwater. The details of the estimates reflect the environmental liability at each property. The Company is committed to fully meeting regulatory and legal obligations with respect to environmental matters.

Some sites include remediation activities that are projected beyond the 10-year period, which CP is unable to reasonably estimate and determine. Therefore, CP's accruals of the environmental liabilities is based on an estimate of costs for a rolling 10-year period covered by the environmental program. Payments are expected to be made over 10 years to 2030. A limited portion of the environmental accruals, the stable Perpetual Care for the environmental program, are fixed and reliably determined. This portion of the environmental liabilities is discounted using a risk-free rate, adjusted by inflation and productivity improvements.

Provisions for environmental remediation costs are recorded in "Other long-term liabilities" (refer to Item 8. Financial Statements and Supplementary Data, Note 18 Other long-term liabilities), except for the current portion which is recorded in "Accounts payable and accrued liabilities" (refer to Item 8. Financial Statements and Supplementary Data, Note 15 Accounts payable and accrued liabilities). The accruals for environmental remediation represent CP's best estimate of its probable future obligations and include both asserted and unasserted claims, without reduction for anticipated recoveries from third parties. Although the recorded accruals include CP's best estimate of all probable costs, CP's total environmental remediation costs cannot be predicted with certainty. Accruals for environmental remediation may change from time to time as new information about previously untested sites becomes known, environmental laws and regulations evolve and advances are made in environmental remediation technology. The accruals may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, are not expected to be material to the Company's financial position, but may materially affect income in the period in which a charge is recognized.

The environmental liabilities are also sensitive to the increase in cost of materials which would be reflected as increases to "Other long-term liabilities" and "Accounts payable and accrued liabilities" on the Company's Consolidated Balance Sheets and to "Purchased services and other" within Operating expenses on the Company's Consolidated Statements of Income. CP's cash payments for environmental initiatives are estimated to be approximately $9 million in 2021, $10 million in 2022, $9 million in 2023 and a total of approximately $53 million over the remaining years through 2030. All payments will be funded from general operations.

Pensions and Other Benefits

CP has defined benefit and defined contribution pension plans. Other benefits include post-retirement medical and life insurance for pensioners, and some post-employment workers' compensation and long-term disability benefits in Canada. Workers' compensation and long-term disability benefits are discussed in the Personal Injury and Other Claims Liabilities section below. Pension and post-retirement benefits liabilities are subject to various external influences and uncertainties.

Information concerning the measurement of costs for pensions and other benefits is discussed in Item 8. Financial Statements and Supplementary Data, Note 1 Summary of significant accounting policies and Note 22 Pensions and other benefits.

Net Periodic Benefit Costs

The Company reports the current service cost component of net periodic benefit cost in "Compensation and benefits" for pensions and post-retirement benefits and in "Purchased services and other" for self-insured workers' compensation and long-term disability benefits on the Company's Consolidated Statements of Income. The Other components of net periodic benefit recovery are reported as a separate line item outside of Operating income on the Company's Consolidated Statements of Income. Components of the net periodic benefit costs (credits) are as follows:

(in millions of Canadian dollars)	2020 Current service cost	2020 Other components	2020 Total	2019 Current service cost	2019 Other components	2019 Total
Defined benefit pensions	**$ 140**	**$ (363)**	**$ (223)**	$ 107	$ (414)	$ (307)
Defined contribution pensions	**12**	**—**	**12**	11	—	11
Post-retirement benefits	**4**	**17**	**21**	4	16	20
Self-insured workers' compensation and long-term disability benefits	**8**	**4**	**12**	7	17	24
All plans	**$ 164**	**$ (342)**	**$ (178)**	$ 129	$ (381)	$ (252)

CP estimates net periodic benefit credits for defined benefit pensions to be approximately $230 million in 2021 ($171 million in current service cost and $401 million in other components of net periodic recovery), and net periodic benefit costs for defined contribution pensions to be approximately $12 million in 2021. Net periodic benefit costs for post-retirement benefits in 2021 are not expected to differ materially from the 2020 costs. Total net periodic benefit credits for all plans are estimated to be approximately $185 million in 2021 (2020 – $178 million), comprising $196 million (2020 – $164 million) in current service cost and $381 million (2020 – $342 million) in other components of net periodic recovery. The expected rate of return on the market-related asset value used to compute the net periodic benefit credit was 7.50% in 2019 and 7.25% in 2020. For computing the net periodic benefit credit in 2021, the Company is reducing this rate to 6.90% to reflect CP's current view of future long-term investment returns. Net periodic benefit costs and credits are discussed further in Item 8. Financial Statements and Supplementary Data, Note 22 Pensions and other benefits.

Pension Plan Contributions

The Company made contributions of $27 million to the defined benefit pension plans in 2020, compared with $53 million in 2019. The Company's main Canadian defined benefit pension plan accounts for nearly all of CP's pension obligation and can produce significant volatility in pension funding requirements, given the pension fund's size, the many factors that drive the pension plan's funded status, and Canadian statutory pension funding requirements. The Company made voluntary prepayments of $600 million in 2011, $650 million in 2010, and $500 million in 2009 to the Company's main Canadian defined benefit pension plan. CP has applied $1,324 million of these voluntary prepayments to reduce its pension funding requirements in 2012–2020, leaving $426 million of the voluntary prepayments still available at December 31, 2020 to reduce CP's pension funding requirements in 2021 and future years. CP continues to have significant flexibility with respect to the rate at which the remaining voluntary prepayments are applied to reduce future years' pension contribution requirements, which allows CP to manage the volatility of future pension funding requirements. At this time, CP estimates it will not apply any of the remaining voluntary prepayments against its 2021 pension funding requirements.

CP estimates its aggregate pension contributions, including its defined benefit and defined contribution plans, to be in the range of $30 million to $40 million in 2021, and in the range of $30 million to $50 million per year from 2022 to 2024. These estimates reflect the Company's current intentions with respect to the rate at which CP will apply the remaining voluntary prepayments against contribution requirements in the next few years.

Future pension contributions will be highly dependent on the Company's actual experience with such variables as investment returns, interest rate fluctuations, and demographic changes, on the rate at which previous years' voluntary prepayments are applied against pension contribution requirements, and on any changes in the regulatory environment. CP will continue to make contributions to the pension plans that, at a minimum, meet pension legislative requirements.

Pension Plan Risks

Fluctuations in the liability and net periodic benefit costs for pensions result from favourable or unfavourable investment returns and changes in long-term interest rates. The impact of favourable or unfavourable investment returns is moderated by the use of a market-related asset value for the main Canadian defined benefit pension plan's public equity securities and absolute return strategies. The impact of changes in long-term interest rates on pension obligations is partially offset by their impact on the pension funds' investments in fixed income assets.

The plans' investment policy provides a target allocation of approximately 45% of the plans' assets to be invested in public equity securities. As a result, stock market performance is a key driver in determining the pension funds' asset performance. If the rate of investment return on the plans' public equity securities in 2020 had been 10% higher (or lower) than the actual 2020 rate of investment return on such securities, 2021 net periodic benefit costs for pensions would be lower (or higher) by approximately $24 million.

Changes in bond yields can result in changes to discount rates and to changes in the value of fixed income assets. If the discount rate as at December 31, 2020 had been higher (or lower) by 0.1% with no related changes in the value of the pension funds' investment in fixed income assets, 2021 net periodic benefit costs for pensions would be lower (or higher) by approximately $15 million and 2021 current service costs for pensions would be lower (or higher) by approximately $6 million. However, a change in bond yields would also lead to a change in the value of the pension funds' investment in fixed income assets, and this change would partially offset the impact on net periodic benefit costs noted above.

The Company estimates that an increase in the discount rate of 0.1% would decrease the defined benefit pension plans' projected benefit obligations by approximately $203 million, and that a decrease in the discount rate of 0.1% would increase the defined benefit pension plans' projected benefit obligations by approximately $212 million. Similarly, for every 0.1% the actual return on assets varies above (or below) the estimated return for the year, the value of the defined benefit pension plans' assets would increase (or decrease) by approximately $14 million.

Adverse experience with respect to these factors could eventually increase funding and pension expense significantly, while favourable experience with respect to these factors could eventually decrease funding and pension expense significantly.

Fluctuations in the post-retirement benefit obligation also can result from changes in the discount rate used. A 0.1% increase (decrease) in the discount rate would decrease (increase) the obligation by approximately $6 million.

CP reviews its pensioner mortality experience to ensure that the mortality assumption continues to be appropriate, or to determine what changes to the assumption are needed.

Property, Plant and Equipment

The Company follows the group depreciation method under which a single depreciation rate is applied to the total cost in a particular class of property, despite differences in the service life or salvage value of individual properties within the same class. CP performs depreciation studies of each property asset class approximately every three years to update depreciation rates. The studies are conducted with assistance from third-party specialists and analyzed and reviewed by the Company's management. Depreciation studies for U.S. assets are reviewed and approved by the Surface Transportation Board ("STB"). Depreciation studies for Canadian assets are provided to the Canadian Transportation Agency (the "Agency"), but the Agency does not approve depreciation rates. In determining appropriate depreciation rates, management is required to make judgments and assumptions about a variety of key factors that are subject to future variability due to inherent uncertainties. These include the following:

Key Assumptions	Assessments
• Whole and remaining asset lives	• Statistical analysis of historical retirement patterns; • Evaluation of management strategy and its impact on operations and the future use of specific property assets; • Assessment of technological advances; • Engineering estimates of changes in current operations and analysis of historic, current and projected future usage; • Additional factors considered for track assets: density of traffic and whether rail is new or has been re-laid in a subsequent position; • Assessment of policies and practices for the management of assets including maintenance; and • Comparison with industry data.
• Salvage values	• Analysis of historical, current and estimated future salvage values.

CP depreciates the cost of properties, net of salvage, on a straight-line basis over the estimated useful life of the class of property. The estimates of economic lives are uncertain and can vary due to changes in any of the assessed factors noted in the table above for whole and remaining asset lives. Additionally, the depreciation rates are updated to reflect the change in residual values of the assets in the class.

It is anticipated that there will be changes in the estimates of weighted-average useful lives and net salvage for each property asset class as assets are acquired, used and retired. Substantial changes in either the useful lives of properties or the salvage assumptions could result in significant changes to depreciation expense. For example, if the estimated average life of track assets, including rail, ties, ballast and other track material, increased (or decreased) by one year, annual depreciation expense would decrease (or increase) by approximately $18 million.

Due to the capital intensive nature of the railway industry, depreciation represents a significant part of operating expenses. The estimated useful lives of properties have a direct impact on the amount of depreciation recorded as a component of "Properties" on the Company's Consolidated Balance Sheets. At December 31, 2020 and 2019, accumulated depreciation was $8,629 million and $8,099 million, respectively.

Deferred Income Taxes

CP accounts for deferred income taxes based on the liability method. This method focuses on the Company's balance sheet and the temporary differences otherwise calculated from the comparison of book versus tax values. The provision for deferred income taxes arises from temporary differences in the carrying values of assets and liabilities for financial statement and income tax purposes and the effect of loss carry forwards. It is assumed that such temporary differences will be settled in the deferred income tax assets and liabilities at the balance sheet date.

In determining deferred income taxes, the Company makes estimates and assumptions regarding deferred tax matters, including estimating the timing of the realization and settlement of deferred income tax assets (including the benefit of tax losses) and liabilities, and estimating unrecognized tax benefits for uncertain tax positions. Deferred income taxes are calculated using enacted federal, provincial, and state future income tax rates, which may differ in future periods.

Deferred income tax expense is included in "Income tax expense" on the Company's Consolidated Statements of Income. Additional disclosures are provided in Item 8. Financial Statements and Supplementary Data, Note 6 Income taxes.

Personal Injury and Other Claims Liabilities

CP estimates the potential liability arising from incidents, claims and pending litigations relating to personal injury claims by employees, third-party claims, certain occupation-related claims and property damage claims.

Personal Injury

In Canada, employee occupational injuries are governed by provincial workers' compensation legislation. Occupational injury claims in the provinces of Québec, Ontario, Manitoba and B.C. are self-insured and administered through each Worker's Compensation Board ("WCB"). The future costs related to occupation-related injuries are actuarially determined based on past experience and assumptions associated with the injury, compensation, income replacement, health care and administrative costs. In the four provinces where the Company is self-insured, a discount rate is applied to the future estimated costs based on market rates for investment grade corporate bonds to determine the liability. An actuarial study is performed on an annual basis. In the provinces of Saskatchewan and Alberta, the Company is assessed an annual WCB contribution on a premium basis and this amount is not subject to estimation by management. At December 31, 2020 and 2019, respectively, the WCB liability was $84 million and $85 million in "Pension and other benefit liabilities"; $11 million and $11 million in "Accounts payable and accrued liabilities", offset by deposits paid to WCB of $1 million and $1 million in "Other assets" on the Company's Consolidated Balance Sheets.

U.S. railway employees are covered by federal law under the Federal Employers' Liability Act ("FELA") rather than workers' compensation programs. Accruals are set for individual cases based on facts, legal opinion and statistical analysis. U.S. accruals are also set and include alleged occupational exposure or injury.

Other Claims

A provision for litigation matters, equipment damages or other claims will be accrued according to applicable accounting standards and any such accrual will be based on an ongoing assessment of the strengths and weaknesses of the litigation or claim and its likelihood of success, together with an evaluation of the damages or other monetary relief sought. CP accrues for probable claims when the facts of an incident become known and investigation results provide a reasonable basis for estimating the liability. The lower end of the range is accrued if the facts and circumstances permit only a range of reasonable estimates and no single amount in that range is a better estimate than any other. Facts and circumstances related to asserted claims can change, and a process is in place to monitor accruals for changes in accounting estimates.

Forward-Looking Statements

This Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K contains certain forward-looking statements within the meaning of the *United States Private Securities Litigation Reform Act of 1995* and forward-looking information within the meaning of other relevant securities legislation, including applicable securities laws in Canada (collectively referred to herein as "forward-looking statements"). Forward-looking statements typically include words such as “financial expectations”, “key assumptions”, “anticipate”, “believe”, “expect”, “plan”, “will”, “outlook”, “should” or similar words suggesting future outcomes. To the extent that CP has provided forecasts or targets using Non-GAAP financial measures, the Company may not be able to provide a reconciliation to a GAAP measure without unreasonable efforts, due to unknown variables and uncertainty related to future results.

This Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K includes forward-looking statements relating, but not limited to statements concerning the Company’s defined benefit pension expectations for 2021 and through 2024, our expectations for 2021 financial and operational performance, including our full-year guidance for expected RTM and adjusted diluted EPS growth, planned capital expenditures (including how such capital expenditures are expected to be financed), expected impacts resulting from changes in the U.S.-to-Canadian dollar exchange rate, and the effective tax rate, as well as statements concerning the Company’s operations, anticipated financial performance, business prospects and strategies, including statements concerning the anticipation that cash flow from operations and various sources of financing will be sufficient to meet debt repayments and obligations in the foreseeable future and concerning anticipated capital programs, and statements regarding future payments including income taxes and pension contributions. The purpose of the 2021 Adjusted diluted EPS growth projection is to assist readers in understanding our expected and targeted financial results, and this information may not be appropriate for other purposes.

The forward-looking statements contained in this Management’s Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K are based on current expectations, estimates, projections and assumptions, having regard to the Company's experience and its perception of historical trends, and includes, but is not limited to, expectations, estimates, projections and assumptions relating to: North American and

global economic growth; commodity demand growth; sustainable industrial and agricultural production; commodity prices and interest rates; foreign exchange rates (as specified herein); effective tax rates (as specified herein); performance of our assets and equipment; sufficiency of our budgeted capital expenditures in carrying out our business plan; geopolitical conditions; applicable laws, regulations and government policies; the availability and cost of labour, services and infrastructure; the satisfaction by third parties of their obligations to the Company; and the anticipated impacts of the COVID-19 pandemic on the Company's business, operating results, cash flows and/or financial condition. Although the Company believes the expectations, estimates, projections and assumptions reflected in the forward-looking statements presented herein are reasonable as of the date hereof, there can be no assurance that they will prove to be correct. Current conditions, economic and otherwise, render assumptions, although reasonable when made, subject to greater uncertainty.

Undue reliance should not be placed on forward-looking statements as actual results may differ materially from those expressed or implied by forward-looking statements. By their nature, forward-looking statements involve numerous inherent risks and uncertainties that could cause actual results to differ materially from the forward-looking statements, including but not limited to the following factors: changes in business strategies; general North American and global economic, credit and business conditions; risks associated with agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demand; changes in commodity prices; uncertainty surrounding timing and volumes of commodities being shipped via CP; inflation; geopolitical instability; changes in laws, regulations and government policies, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; changes in fuel prices; uncertainties of investigations, proceedings or other types of claims and litigation; labour disputes; risks and liabilities arising from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions and discount rates on the financial position of pension plans and investments; trade restrictions or other changes to international trade arrangements; climate change; various events that could disrupt operations, including severe weather, such as droughts, floods, avalanches and earthquakes, and cybersecurity attacks, as well as security threats and governmental response to them, and technological changes; and the pandemic created by the outbreak of COVID-19 and resulting effects on economic conditions, the demand environment for logistics requirements and energy prices, restrictions imposed by public health authorities or governments, fiscal and monetary policy responses by governments and financial institutions, and disruptions to global supply chains. The foregoing list of factors is not exhaustive.

There are more specific factors that could cause actual results to differ materially from those described in the forward-looking statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K. These more specific factors are identified and discussed in Item 1A. Risk Factors. Other risks are detailed from time to time in reports filed by CP with securities regulators in Canada and the United States.

The forward-looking statements contained in this Management’s Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K are made as of the date hereof. Except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking statements, or the foregoing assumptions and risks affecting such forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Exchange Risk

Although CP conducts business primarily in Canada, a significant portion of its revenues, expenses, assets and liabilities including debt are denominated in U.S. dollars. The value of the Canadian dollar is affected by a number of domestic and international factors, including, without limitation, economic performance, and Canadian, U.S. and international monetary policies. Consequently, the Company's results are affected by fluctuations in the exchange rate between these currencies. In 2021, CP expects that every $0.01 weakening (or strengthening) of the Canadian dollar relative to the U.S. dollar, positively (or negatively) impacts Total revenues by approximately $27 million (2019 – approximately $30 million), negatively (or positively) impacts Operating expenses by approximately $14 million (2019 – approximately $15 million), and negatively (or positively) impacts Net interest expense by approximately $3 million (2019 – approximately $3 million) on an annualized basis.

CP uses U.S. dollar-denominated debt to hedge its net investment in U.S. operations. As at December 31, 2020, the net investment in U.S. operations is less than the total U.S. denominated debt. Consequently, FX translation on the Company's undesignated debt and lease liabilities causes additional impacts on earnings in Other income.

To manage its exposure to fluctuations in exchange rates between Canadian and U.S. dollars, CP may sell or purchase U.S. dollar forwards at fixed rates in future periods. In addition, changes in the exchange rate between the Canadian dollar and other currencies (including the U.S. dollar) make the goods transported by the Company more or less competitive in the world marketplace and may in turn positively or negatively affect revenues.

Share Price Impact on Stock-Based Compensation

Based on information available at December 31, 2020 and expectations for 2021 grants, for every $1.00 change in share price, stock-based compensation expense has a corresponding change of approximately $0.4 million to $0.6 million (2019 – approximately $0.4 million to $0.6 million). This excludes the impact of changes in share price relative to the S&P/TSX 60 Index, the S&P/TSX Capped Industrial Index, the S&P 1500 Road and Rail Index, and to Class I railways, which may trigger different performance share unit payouts. Stock-based compensation may also be impacted by non-market performance conditions.

Additional information concerning stock-based compensation is included in Item 8. Financial Statements and Supplementary Data, Note 23 Stock-based compensation.

Interest Rate Risk

Debt financing forms part of the Company's capital structure. The debt agreements entered into expose CP to increased interest costs on future fixed debt instruments and existing variable rate debt instruments, should market rates increase. In addition, the present value of the Company's assets and liabilities will also vary with interest rate changes. To manage interest rate exposure, CP may enter into forward rate agreements such as treasury rate locks or bond forwards that lock in rates for a future date, thereby protecting against interest rate increases. CP may also enter into swap agreements whereby one party agrees to pay a fixed rate of interest while the other party pays a floating rate. Contingent on the direction of interest rates, the Company may incur higher costs depending on the contracted rate.

As at December 31, 2020, CP did not have any floating rate debt obligations outstanding, and therefore fluctuations in interest rates would not have an impact on the Company's financial condition, results of operations, or liquidity.

The fair value of the Company's fixed rate debt may fluctuate with changes in market interest rates. A hypothetical one percent decrease in interest rates as of December 31, 2020 would result in an increase of approximately $1.5 billion to the fair value of our debt as at December 31, 2020 (December 31, 2019 - approximately $1.2 billion). Fair values of CP's fixed rate debt are estimated by considering the impact of the hypothetical interest rates on quoted market prices and current borrowing rates, but do not consider other factors that could impact actual results.

Information concerning market risks is supplemented in Item 8. Financial Statements and Supplementary Data, Note 17 Financial instruments.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Canadian Pacific Railway Limited

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Canadian Pacific Railway Limited and subsidiaries (the "Company") as of December 31, 2020 and 2019, the related consolidated statements of income, comprehensive income, cash flows, and changes in shareholders' equity, for each of the three years in the period ended December 31, 2020, and the related notes and the financial statement schedule listed in the Index at Item 8 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020, in conformity with accounting principles generally accepted in the United States of America ("US GAAP").

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 18, 2021, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Properties – Direct Costs that are Capitalized to Self-constructed Assets – Refer to Notes 1, 12 and 19 to the Financial Statements

Critical Audit Matter Description

The Company recognizes direct costs as capitalized additions to self-constructed assets, within properties, based on expenditures necessary to make an asset ready for its intended use. The capitalization of self-constructed assets requires management to make significant estimates and assumptions related to the capitalization of direct cost additions to self-constructed assets based on whether the expenditures meet capitalization criteria under US GAAP.

We identified the capitalization of direct cost additions to self-constructed assets as a critical audit matter because the judgments and assumptions management makes could have a significant impact on the capitalization of direct cost additions. As such auditing the capitalization of direct cost additions involves a high degree of auditor judgment.

How the Critical Audit Matter was Addressed in the Audit

Our audit procedures related to the capitalization of direct cost additions to self-constructed assets included the following, among others:

- Evaluated the effectiveness of controls over self-constructed assets, including those over the capitalization of direct cost additions to self-constructed assets.
- Selected a sample of direct costs and obtained evidence to support the capitalized additions to self-constructed assets and assessed whether these expenditures met the capitalization criteria under US GAAP.

Defined Benefit Pension – Refer to Notes 1 and 22 to the Financial Statements

Critical Audit Matter Description

The Company's accounting of its defined benefit pension plans involves the measurement of the projected benefit obligation and fair value of fund assets. The measurement of the projected-benefit obligation requires management to make significant estimates and assumptions in the determination of the discount rate, which is based on blended market interest rates of high-quality corporate debt instruments with matching cash flows. The measurement of the fair value of fund assets requires management to make significant estimates and assumptions in the determination of the expected return on fund assets, which is calculated using the market-related value of assets.

We identified the determination of the discount rate (for the projected benefit obligation), and the determination of the expected return on fund assets (for the determination of the net period benefit cost) as the critical audit matters because of the significant estimates and assumptions management makes could have a significant impact on the projected benefit obligation and the fair value of fund assets. As such auditing the determination of the discount rate and the expected return on fund assets involves a high degree of auditor judgment as the estimates and assumptions made by management contains significant measurement uncertainty and resulted in an increased extent of effort, which included the need to involve an actuarial specialist.

How the Critical Audit Matter was Addressed in the Audit

Our audit procedures related to the determination of the discount rate (for the projected benefit obligation), and the expected return on fund assets (for the determination of the fair value of fund assets) included the following, among others:

- Evaluated the effectiveness of controls over defined benefit pension plans, including those over the determination of the discount rate and the expected return on fund assets.
- With the assistance of an actuarial specialist, we evaluated the reasonableness of the discount rate by:
  - Assessing the methodology used in management's determination of the discount rate,
  - Testing the underlying source information, and
  - Developing a range of independent estimates and comparing those to the discount rate selected by management.
- With the assistance of an actuarial specialist, we evaluated the reasonableness of the expected return on fund assets by:
  - Assessing the methodology used in management's determination of the expected return on fund assets,
  - Testing the underlying source information, and
  - Comparing management's assumptions to historical data and available market trends.
- Evaluated management's ability to accurately forecast the discount rate and expected return on fund assets by comparing actual results to management's historical forecasts.

CANADIAN PACIFIC RAILWAY LIMITED
Notes to Consolidated Financial Statements
December 31, 2020

Canadian Pacific Railway Limited ("CPRL"), through its subsidiaries (collectively referred to as "CP" or "the Company"), operates a transcontinental railway in Canada and the United States ("U.S."). CP provides rail and intermodal transportation services over a network of approximately 13,000 miles, serving the principal business centres of Canada from Montréal, Québec, to Vancouver, British Columbia, and the U.S. Northeast and Midwest regions. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company's market reach in Canada, throughout the U.S. and into Mexico. CP transports bulk commodities, merchandise freight and intermodal traffic. Bulk commodities include grain, coal, fertilizers and sulphur. Merchandise freight consists of finished vehicles and automotive parts, as well as forest, industrial and consumer products. Intermodal traffic consists largely of retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

1. Summary of significant accounting policies

Accounting principles generally accepted in the United States of America ("GAAP")

These Consolidated Financial Statements are expressed in Canadian dollars and have been prepared in accordance with GAAP.

Principles of consolidation

These Consolidated Financial Statements include the accounts of CP and all its subsidiaries. The Company's investments in which it has significant influence are accounted for using the equity method. Distributions received from equity method investees are classified using the nature of the distribution approach for cash flow presentation purposes, whereby distributions received are classified based on the nature of the activity or activities of the investee that generated the distribution as either a return on investment (classified as a cash inflow from operating activities) or a return of investment (classified as a cash inflow from investing activities). All intercompany accounts and transactions have been eliminated.

Use of estimates

The preparation of these Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the year, the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements. Management regularly reviews its estimates, including those related to environmental liabilities, pensions and other benefits, depreciable lives of properties, deferred income tax assets and liabilities, as well as legal and personal injury liabilities based upon currently available information. Actual results could differ from these estimates.

Revenue recognition

Revenue is recognized when obligations under the terms of a contract with a customer are satisfied. Revenue is measured as the amount of consideration the Company expects to receive in exchange for providing services. Government imposed taxes that the Company collects concurrent with revenue generating activities are excluded from revenue. In the normal course of business, the Company does not generate any material revenue through acting as an agent for other entities.

The Company provides rail freight transportation services to a wide variety of customers and transports bulk commodities, merchandise freight and intermodal traffic. The Company signs master service agreements with customers that dictate future services the Company is to perform for a customer at the time a bill of lading or service request is received. Each bill of lading or service request represents a separate distinct performance obligation that the Company is obligated to satisfy. The transaction price is generally in the form of a fixed fee determined at the inception of the bill of lading or service request. The Company allocates the transaction price to each distinct performance obligation based on the estimated standalone selling price for each performance obligation. As each bill of lading or service request represents a separate distinct performance obligation, the estimated standalone selling price is assessed at an observable price which is fair market value. Certain customer agreements include variable consideration in the form of rebates, discounts, or incentives. The expected value method is used to estimate variable consideration and is allocated to the applicable performance obligation and is recognized when the related performance obligation is satisfied. Additionally, the Company offers published rates for services through public tariff agreements in which a customer can request service, triggering a performance obligation the Company must satisfy. Railway freight revenues are recognized over time as services are provided based on the percentage of completed service method. Volume rebates to customers are accrued as a reduction of freight revenues based on estimated volumes and contract terms as freight service is provided. Freight revenues also include certain ancillary and other services provided in association with the performance of rail freight movements. Revenues from these activities are not material and therefore have been aggregated with the freight revenues from customer contracts with which they are associated.

Non-freight revenues, including revenues earned from passenger service operators, switching fees, and revenues from logistics services, are recognized at the point in time the services are provided or when the performance obligations are satisfied. Non-freight revenues also include leasing revenues.

Payment by customers is due upon satisfaction of performance obligations. Payment terms are such that amounts outstanding at the period end are expected to be collected within one reporting period. The Company invoices customers at the time the bill of lading or service request is processed and therefore the Company has no material unbilled receivables and no contract assets. All performance obligations not fully satisfied at period end are expected to be satisfied within the reporting period immediately following. Contracted customer incentives are amortized to income over the term of the related revenue contract.

Income taxes

The Company follows the liability method of accounting for income taxes. Deferred income tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates and laws that will be in effect when the differences are expected to reverse.

The effect of a change in income tax rates on deferred income tax assets and liabilities is recognized in income in the period during which the change occurs.

When appropriate, the Company records a valuation allowance against deferred tax assets to reflect that these tax assets may not be realized. In determining whether a valuation allowance is appropriate, CP considers whether it is more likely than not that all or some portion of CP's deferred tax assets will not be realized, based on management's judgment using available evidence about future events.

At times, tax benefit claims may be challenged by a tax authority. Tax benefits are recognized only for tax positions that are more likely than not sustainable upon examination by tax authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely to be realized upon settlement. A liability for "unrecognized tax benefits" is recorded for any tax benefits claimed in CP's tax returns that do not meet these recognition and measurement standards.

Investment and other similar tax credits are deferred on the Company's Consolidated Balance Sheets and amortized to "Income tax expense" as the related asset is recognized in income. Income tax recovery or expense on items in "Accumulated other comprehensive loss" are recognized in "Income tax expense" as the related item is recognized in income.

Earnings per share

Basic earnings per share are calculated using the weighted-average number of the Company's Common Shares ("Common Shares") outstanding during the year. Diluted earnings per share are calculated using the treasury stock method for determining the dilutive effect of options.

Foreign currency translation

Assets and liabilities denominated in foreign currencies, other than those held through foreign subsidiaries, are translated into Canadian dollars at the year-end exchange rate for monetary items and at the historical exchange rates for non-monetary items. Foreign currency revenues and expenses are translated at the exchange rates in effect on the dates of the related transactions. Foreign exchange ("FX") gains and losses, other than those arising from the translation of the Company's net investment in foreign subsidiaries, are included in income.

The accounts of the Company's foreign subsidiaries are translated into Canadian dollars using the year-end exchange rate for assets and liabilities and the average exchange rates during the year for revenues, expenses, gains, and losses. FX gains and losses arising from the translation of the foreign subsidiaries' assets and liabilities are included in "Other comprehensive loss". A portion of U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. As a result, unrealized FX gains and losses on U.S. dollar-denominated long-term debt, designated as a hedge, are offset against FX gains and losses arising from the translation of foreign subsidiaries' accounts in "Other comprehensive loss".

Cash and cash equivalents

Cash and cash equivalents include highly liquid short-term investments that are readily convertible to cash with original maturities of three months or less, but excludes cash and cash equivalents subject to restrictions.

Accounts receivable

Accounts receivable from customers are recognized initially at fair value and subsequently measured at amortized cost less allowance for expected credit losses. Losses on accounts receivable are estimated based on historical credit loss experience of receivables with similar risk characteristics. Historical loss experience is adjusted to reflect any management expectations that current or future conditions will differ from conditions that existed for the period over which historical information is evaluated.

To determine expected credit losses, receivables are disaggregated by credit characteristics, type of customer service, customer line of business, and receivable aging. Receivables are considered to be in default and are written off against the allowance for credit losses when it is probable that all remaining contractual payments due will not be collected in accordance with the terms of the customer contracts. Subsequent recoveries of amounts previously written off are credited to earnings in the period recovered.

Materials and supplies

Materials and supplies are carried at the lower of average cost or market value and consist primarily of fuel and parts used in the repair and maintenance of track structures, equipment, locomotives and freight cars.

Properties

Fixed asset additions and major renewals are recorded at cost, including direct costs, attributable indirect costs and carrying costs, less accumulated depreciation and any impairment. When there is a legal obligation associated with the retirement of property, a liability, when reliably estimable, is initially recognized at its fair value and a corresponding asset retirement cost is added to the gross book value of the related asset and amortized to expense over the estimated term to retirement. The Company reviews the carrying amounts of its properties whenever changes in circumstances indicate that such carrying amounts may not be recoverable based on future undiscounted cash flows. When such properties are determined to be impaired, recorded asset values are revised to their fair value and an impairment loss is recognized.

The Company recognizes expenditures as additions to properties or operating expenses based on whether the expenditures increase the output or service capacity, lower the associated operating costs or extend the useful life of the properties and whether the expenditures exceed minimum physical and financial thresholds.

Much of the additions to properties, both new and replacement properties, are self-constructed. These are initially recorded at cost, including direct costs and attributable indirect costs, overheads and carrying costs. Direct costs include, among other things, labour costs, purchased services, equipment costs and material costs. Attributable indirect costs and overheads include incremental long-term variable costs resulting from the execution of capital projects. Indirect costs mainly include work trains, material distribution, highway vehicles and work equipment. Overheads primarily include a portion of the engineering department's costs, which plans, designs and administers these capital projects. These costs are allocated to projects by applying a measure consistent with the nature of the cost, based on cost studies. For replacement properties, the project costs are allocated to dismantling and installation based on cost studies. Dismantling work, which is expensed, is performed concurrently with the installation.

Ballast programs including undercutting, shoulder ballasting and renewal programs that form part of the annual track program are capitalized as this work, and the related added ballast material, significantly improves drainage, which in turn extends the life of ties and other track materials. These costs are tracked separately from the underlying assets and depreciated over the period to the next estimated similar ballast program. Spot replacement of ballast is considered a repair which is expensed as incurred.

The costs of large refurbishments are capitalized and locomotive overhauls are expensed as incurred, except where overhauls represent a betterment of the locomotive in which case costs are capitalized.

The Company capitalizes development costs for major new computer systems.

The Company follows group depreciation, which groups assets which are similar in nature and have similar economic lives. The property groups are depreciated on a straight-line basis reflecting their expected economic lives determined by depreciation studies. Depreciation studies are regular reviews of asset service lives, salvage values, accumulated depreciation and other related factors. Depreciation rates are established through these studies. Actual use and retirement of assets may vary from current estimates, and would be identified in the next study. These changes in expected economic lives would impact the amount of depreciation expense recognized in future periods. All track assets are depreciated using a straight-line method which recognizes the value of the asset consumed as a percentage of the whole life of the asset.

When depreciable property is retired or otherwise disposed of in the normal course of business, the book value, less net salvage proceeds, is charged to accumulated depreciation and if different than the assumptions under the depreciation study could potentially result in adjusted depreciation expense over a period of years. However, when removal costs exceed the salvage value on assets and the Company has no legal obligation to remove the assets, the removal costs incurred are charged to income in the period in which the assets are removed and are not charged to accumulated depreciation.

For certain asset classes, the historical cost of the asset is separately recorded in the Company's property records. This amount is retired from the property records upon retirement of the asset. For assets for which the historical cost cannot be separately identified the amount of the gross book value to be retired is estimated using either an indexation methodology, whereby the current replacement cost of the asset is indexed to the estimated year of installation for the asset, or a first-in, first-out approach, or statistical analysis is used to determine the age of the retired asset. CP uses indices that closely correlate to the principal costs of the assets.

There are a number of estimates inherent in the depreciation and retirement processes and as it is not possible to precisely estimate each of these variables until a group of property is completely retired, CP regularly monitors the estimated service lives of assets and the associated accumulated depreciation for each asset class to ensure depreciation rates are appropriate. If the recorded amounts of accumulated depreciation are greater or less than the amounts indicated by the depreciation studies, then the excess or deficit is amortized as a component of depreciation expense over the remaining service lives of the applicable asset classes.

For the sale or retirement of larger groups of depreciable assets that are unusual and were not considered in the Company's depreciation studies, CP records a gain or loss for the difference between net proceeds and net book value of the assets sold or retired. The accumulated depreciation to be retired includes asset-specific accumulated depreciation, when known, and an appropriate portion of the accumulated depreciation recorded for the relevant asset class as a whole, calculated using a cost-based allocation.

Revisions to the estimated useful lives and net salvage projections constitute a change in accounting estimate and are addressed prospectively by amending depreciation rates.

Equipment under finance lease is included in Properties and depreciated over the period of expected use.

Leases

The Company has leases for rolling stock, buildings, vehicles, railway equipment, roadway machines, and information systems hardware. CP has entered into rolling stock and roadway machine leases that are fully variable or contain both fixed and variable components. Variable components are dependent on the hours and miles that the underlying equipment has been used. Fixed term, short-term, and variable operating lease costs are recorded in "Equipment rents" and "Purchased services and other" on the Company's Consolidated Statements of Income. Components of finance lease costs are recorded in "Depreciation and amortization" and "Net interest expense" on the Company's Consolidated Statements of Income.

The Company determines lease existence and classification at the lease inception date. Leases are identified when an agreement conveys the right to control identified property for a period of time in exchange for consideration. The Company recognizes both an operating lease liability and right-of-use ("ROU") asset for operating leases with fixed terms and in-substance fixed terms. ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating and finance lease ROU assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. Lease payments include fixed and variable payments that are based on an index or a rate. If the Company's leases do not provide a readily determinable implicit interest rate, the Company uses internal incremental secured borrowing rates for comparable tenor in the same currency at the commencement date in determining the present value of lease payments. Operating and finance lease ROU assets also include lease prepayments and initial direct costs, but are reduced by lease incentives. The lease term may include periods associated with options to extend or exclude periods associated with options to terminate the lease when it is reasonably certain that the Company will exercise these options.

The Company has short-term operating leases with terms of 12 months or less, some of which include options to purchase that the Company is not reasonably certain to exercise. The Company has elected to apply the recognition exemption and, as such, accounts for leases with a term of 12 months or less off-balance sheet. Therefore, lease payments on these short-term operating leases are not included in operating lease ROU assets and liabilities, but are recognized as an expense in the Company's Consolidated Statements of Income on a straight-line basis over the term of the lease. Further, the Company has elected to combine lease and non-lease components for all leases, except for leases of roadway machines and information systems hardware.

Assets held for sale

Assets to be disposed that meet the held for sale criteria are reported in "Other assets" at the lower of their carrying amount and fair value, less costs to sell, and are no longer depreciated.

Goodwill and intangible assets

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets upon acquisition of a business. Goodwill is assigned to the reporting units that are expected to benefit from the business acquisition which, after integration of operations with the railway network, may be different than the acquired business.

The carrying value of goodwill, which is not amortized, is assessed for impairment annually in the fourth quarter of each year as at October 1st, or more frequently as economic events dictate. The Company has the option of performing an assessment of certain qualitative factors to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying value or proceeding directly to a quantitative impairment test. Qualitative factors include but are not limited to, economic, market and industry conditions, cost factors and overall financial performance of the reporting unit. If the assessment of qualitative factors indicates that the carrying value is less than the fair value, then performing the quantitative goodwill impairment test is unnecessary. The quantitative assessment compares the fair value of the reporting unit to its carrying value, including goodwill. If the fair value of the reporting unit is less than its carrying value, goodwill is impaired. The impairment charge that would be recognized is the excess of the carrying value over the fair value of the reporting unit, limited to the total amount of goodwill allocated to the reporting unit.

Intangible assets with finite lives are amortized on a straight-line basis over the estimated useful lives of the respective assets. Favourable leases, customer relationships and interline contracts have amortization periods ranging from 15 to 20 years. When there is a change in the estimated useful life of an intangible asset with a finite life, amortization is adjusted prospectively.

Pensions and other benefits

Pension costs are actuarially determined using the projected-benefit method pro-rated over the credited service periods of employees. This method incorporates management's best estimates of expected plan investment performance, salary escalation and retirement ages of employees. The expected return on fund assets is calculated using market-related asset values developed from a five-year average of market values for the fund's public equity securities and absolute return strategies (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the fund's fixed income, real estate, infrastructure and private debt securities, subject to the market-related asset value not being greater than 120% of the market value nor being less than 80% of the market value. The discount rate used to determine the projected-benefit obligation is based on blended market interest rates on high-quality debt instruments with matching cash flows. Unrecognized actuarial gains and losses in excess of 10% of the greater of the benefit obligation and the market-related value of plan assets are amortized over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 12 years). Prior service costs arising from collectively bargained amendments to pension plan benefit provisions are amortized over the term of the applicable union agreement. Prior service costs arising from all other sources are amortized over the expected average remaining service period of active employees who are expected to receive benefits under the plan at the date of amendment.

Costs for post-retirement and post-employment benefits other than pensions, including post-retirement health care and life insurance and some workers' compensation and long-term disability benefits in Canada, are actuarially determined on a basis similar to pension costs.

The over or under funded status of defined benefit pension and other post-retirement benefit plans are measured as the difference between the fair value of the plan assets and the benefit obligation, and are recognized on the balance sheets. In addition, any unrecognized actuarial gains and losses and prior service costs and credits that arise during the period are recognized as a component of "Other comprehensive loss", net of tax.

Gains and losses on post-employment benefits that do not vest or accumulate, including some workers' compensation and long-term disability benefits in Canada, are included immediately on the Company's Consolidated Statements of Income as "Other components of net periodic benefit cost or recovery".

The current service cost component of net periodic benefit cost is reported in "Compensation and benefits" for pensions and post-retirement benefits, and in "Purchased services and other" for self-insured workers' compensation and long-term disability benefits on the Company's Consolidated Statements of Income. Other components of net periodic benefit cost or recovery are reported in "Other components of net periodic benefit cost or recovery" outside of Operating income on the Company's Consolidated Statements of Income.

Capitalization of pension costs, when applicable, is restricted to the current service cost component of net periodic benefit cost.

Financial instruments

Financial instruments are contracts that give rise to a financial asset of one party and a financial liability or equity instrument of another party. Financial instruments are recognized initially at fair value, which is the amount of consideration that would be agreed upon in an arm's-length transaction between willing parties.

Subsequent measurement depends on how the financial instruments have been classified. Accounts receivable and other investments, classified as loans and receivables, are measured at amortized cost, using the effective interest method. Cash and cash equivalents and derivatives are classified as held for trading and are measured at fair value. Accounts payable, accrued liabilities, short-term borrowings, other long-term liabilities, and long-term debt are also measured at amortized cost.

Derivative financial instruments

Derivative financial and commodity instruments may be used from time to time by the Company to manage its exposure to risks relating to foreign currency exchange rates, stock-based compensation, interest rates, and fuel prices. When CP utilizes derivative instruments in hedging relationships, CP identifies, designates, and documents those hedging transactions and regularly tests the transactions to demonstrate effectiveness in order to continue hedge accounting.

All derivative instruments are classified as held for trading and recorded at fair value. Any change in the fair value of derivatives that are not designated as hedges is recognized in the period in which the change occurs in the Company's Consolidated Statements of Income in the line item to which the derivative instrument is related.

For fair value hedges, the periodic changes in value are recognized in income, on the same line as the changes in value of the hedged items are also recorded. For an effective cash flow hedge, the entire change in value of the hedging instrument is recognized in "Other comprehensive loss". The change in value of the effective cash flow hedge remains in "Accumulated other comprehensive loss" until the related hedged item settles, at which time amounts recognized in "Accumulated other comprehensive loss" are reclassified to the same income or balance sheet account that records the hedged item.

Cash flows relating to derivative instruments designated as hedges are included in the same line as the related hedged items on the Company's Consolidated Statements of Cash Flows.

Environmental remediation

Environmental remediation accruals, recorded on an undiscounted basis unless a reliably determinable estimate as to amount and timing of costs can be established, cover site-specific remediation programs. The accruals are recorded when the costs to remediate are probable and reasonably estimable. Certain future costs to monitor sites are discounted at an adjusted risk-free rate. Provisions for environmental remediation costs are recorded in "Other long-term liabilities", except for the current portion, which is recorded in "Accounts payable and accrued liabilities".

Stock-based compensation

CP follows the fair value based approach to account for stock options. Compensation expense and an increase in "Additional paid-in capital" are recognized for stock options over their vesting period or over the period from the grant date to the date employees become eligible to retire, when this is shorter than the vesting period, based on their fair values on the grant date as determined using the Black-Scholes option-pricing model. Forfeitures are estimated at issuance and monitored on a periodic basis. Any consideration paid by employees on exercise of stock options is credited to "Share capital" when the option is exercised and the recorded fair value of the option is removed from "Additional paid-in capital" and credited to "Share capital".

Compensation expense is also recognized for performance share units ("PSUs"), performance deferred share units ("PDSUs"), deferred share units ("DSUs"), and restricted share units ("RSUs") that settle in cash using the fair value method. Compensation expense is recognized over the vesting period or over the period from the grant date to the date employees become eligible to retire, when this is shorter than the vesting period where applicable. Forfeitures are estimated at issuance and monitored on a periodic basis.

The employee share purchase plan gives rise to compensation expense that is recognized using the issue price by amortizing the cost over the vesting period.

2. Accounting changes

Implemented in 2020

Financial Instruments - Credit Losses

On January 1, 2020, the Company adopted the new Accounting Standards Update ("ASU") 2016-13, issued by the Financial Accounting Standards Board ("FASB"), and all related amendments under FASB Accounting Standards Codification ("ASC") Topic 326, Financial Instruments - Credit Losses. Using a modified retrospective approach, the Company recognized a cumulative-effect adjustment to its opening retained earnings balance in the period of adoption. Accordingly, comparative financial information has not been restated and continues to be reported under the accounting standards in effect for those periods.

The impact of the adoption of ASC 326 as at January 1, 2020 was an increase in the allowance for credit losses of $1 million, with the offsets to "Deferred income taxes" and "Retained earnings" on the Company's Consolidated Balance Sheet. See Note 9 for further discussion of the current period credit loss.

Simplification of Financial Disclosures about Guarantors

During the second quarter of 2020, the Company early adopted the Securities and Exchange Commission amendments to the financial disclosure requirements for guarantors and issuers of guaranteed securities, as specified in Rule 3-10 of Regulation S-X. The amendments simplify disclosure requirements by replacing condensed consolidating financial information ("CCFI") with summarized financial information and expanded qualitative non-financial disclosures about the guarantees, issuers, and guarantors. This disclosure can be found in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity and Capital Resources.

3. Revenues

The following table disaggregates the Company's revenues from contracts with customers by major source:

(in millions of Canadian dollars)	2020	2019	2018
Freight			
Grain	**$ 1,829**	$ 1,684	$ 1,566
Coal	**566**	682	673
Potash	**493**	462	486
Fertilizers and sulphur	**290**	250	243
Forest products	**328**	304	284
Energy, chemicals and plastics	**1,519**	1,534	1,243
Metals, minerals and consumer products	**629**	752	797
Automotive	**324**	352	322
Intermodal	**1,563**	1,593	1,538
Total freight revenues	**7,541**	7,613	7,152
Non-freight excluding leasing revenues	**107**	116	102
Revenues from contracts with customers	**7,648**	7,729	7,254
Leasing revenues	**62**	63	62
Total revenues	**$ 7,710**	$ 7,792	$ 7,316

Contract liabilities

Contract liabilities represent payments received for performance obligations not yet satisfied and relate to deferred revenue and are presented as components of "Accounts payable and accrued liabilities" and "Other long-term liabilities" on the Company's Consolidated Balance Sheets.

The following table summarizes the changes in contract liabilities for the years ended December 31, 2020 and 2019:

(in millions of Canadian dollars)	2020	2019
Opening balance	**$ 146**	$ 2
Revenue recognized that was included in the contract liability balance at the beginning of the period	**(100)**	(2)
Increase due to consideration received, net of revenue recognized during the period	**15**	146
Closing balance	**$ 61**	$ 146

4. Other (income) expense

(in millions of Canadian dollars)	2020	2019	2018
Foreign exchange (gain) loss on debt and lease liabilities	**$ (14)**	$ (94)	$ 168
Other foreign exchange (gains) losses	**(1)**	(4)	3
Other	**8**	9	3
Other (income) expense	**$ (7)**	$ (89)	$ 174

5. Net interest expense

(in millions of Canadian dollars)	2020	2019	2018
Interest cost	**$ 478**	$ 471	$ 475
Interest capitalized to Properties	**(16)**	(17)	(20)
Interest expense	**462**	454	455
Interest income	**(4)**	(6)	(2)
Net interest expense	**$ 458**	$ 448	$ 453

Interest expense includes interest on finance leases of $11 million for the year ended December 31, 2020 (2019 – $11 million; 2018 – $11 million).

6. Income taxes

The following is a summary of the major components of the Company's income tax expense:

(in millions of Canadian dollars)	2020	2019	2018
Current income tax expense	**$ 537**	$ 525	$ 381
Deferred income tax expense			
Origination and reversal of temporary differences	**277**	316	214
Effect of tax rate decrease	**(32)**	(95)	(21)
Effect of hedge of net investment in foreign subsidiaries	**(18)**	(38)	64
Other	**(6)**	(2)	(1)
Total deferred income tax expense	**221**	181	256
Total income taxes	**$ 758**	$ 706	$ 637
Income before income tax expense			
Canada	**$ 2,518**	$ 2,392	$ 1,788
Foreign	**684**	754	800
Total income before income tax expense	**$ 3,202**	$ 3,146	$ 2,588
Income tax expense			
Current			
Canada	**$ 412**	$ 410	$ 336
Foreign	**125**	115	45
Total current income tax expense	**537**	525	381
Deferred			
Canada	**231**	141	174
Foreign	**(10)**	40	82
Total deferred income tax expense	**221**	181	256
Total income taxes	**$ 758**	$ 706	$ 637

The provision for deferred income taxes arises from temporary differences in the carrying values of assets and liabilities for financial statement and income tax purposes and the effect of loss carry forwards. The items comprising the deferred income tax assets and liabilities are as follows:

(in millions of Canadian dollars)		**2020**		2019
Deferred income tax assets				
Amount related to tax losses carried forward	**$**	**17**	$	6
Liabilities carrying value in excess of tax basis		**131**		139
Unrealized foreign exchange losses		**4**		26
Environmental remediation costs		**22**		22
Other		**4**		4
Total net deferred income tax assets		**178**		197
Deferred income tax liabilities				
Properties carrying value in excess of tax basis		**3,708**		3,524
Pensions carrying value in excess of tax basis		**43**		83
Other		**93**		91
Total deferred income tax liabilities		**3,844**		3,698
Total net deferred income tax liabilities	**$**	**3,666**	$	3,501

The Company's consolidated effective income tax rate differs from the expected Canadian statutory tax rates. Expected income tax expense at statutory rates is reconciled to income tax expense as follows:

(in millions of Canadian dollars, except percentage)		**2020**		2019		2018
Statutory federal and provincial income tax rate (Canada)		**26.31 %**		26.77 %		26.86 %
Expected income tax expense at Canadian enacted statutory tax rates	**$**	**842**	$	842	$	695
(Decrease) increase in taxes resulting from:						
(Gains) losses not subject to tax		**(23)**		(19)		8
Canadian tax rate differentials		**(3)**		—		—
Foreign tax rate differentials		**(32)**		(33)		(55)
Effect of tax rate decrease		**(32)**		(95)		(21)
Valuation allowance		**—**		(5)		5
Unrecognized tax benefits		**(7)**		33		—
Other		**13**		(17)		5
Income tax expense	**$**	**758**	$	706	$	637

In 2020, the Company revalued its deferred income tax balances as a result of a tax filing election for the state of North Dakota resulting in a lower corporate income tax rate and a net recovery of $29 million.

In 2019, the Company revalued its deferred income tax balances as a result of a corporate income tax rate decrease in the province of Alberta, resulting in a net recovery of $88 million.

In 2018, the Company revalued its deferred income tax balances as a result of corporate income tax rate decreases in the states of Iowa and Missouri, resulting in a net recovery of $21 million.

The Company has not provided a deferred liability for the income taxes, if any, which might become payable on any temporary difference associated with its foreign investments because the Company intends to indefinitely reinvest in its foreign investments and has no intention to realize this difference by a sale of its interest in foreign investments. It is not practical to calculate the amount of the deferred tax liability.

It is more likely than not that the Company will realize the majority of its deferred income tax assets from the generation of future taxable income, as the payments for provisions, reserves and accruals are made and losses and tax credits carried forward are utilized.

At December 31, 2020, the Company had tax effected operating losses carried forward of $15 million (2019 – $4 million), which have been recognized as a deferred tax asset. The losses carried forward will begin to expire in 2031. The Company expects to fully utilize these tax effected operating losses before their expiry. The Company did not have any minimum tax credits or investment tax credits carried forward.

At December 31, 2020, the Company had $2 million (2019 – $2 million) in tax effected capital losses carried forward recognized as a deferred tax asset. The Company has no unrecognized tax benefits from capital losses at December 31, 2020 and 2019.

The following table provides a reconciliation of uncertain tax positions in relation to unrecognized tax benefits for Canada and the U.S. for the year ended December 31:

(in millions of Canadian dollars)		**2020**	2019	2018
Unrecognized tax benefits at January 1	**$**	**52**	$ 13	$ 13
Increase in unrecognized:				
Tax benefits related to the current year		**—**	9	1
Tax benefits related to prior years		**10**	34	—
Dispositions:				
Gross uncertain tax benefits related to prior years		**(9)**	—	(1)
Settlements with taxing authorities		**2**	(4)	—
Unrecognized tax benefits at December 31	**$**	**55**	$ 52	$ 13

If these uncertain tax positions were recognized, all of the amount of unrecognized tax positions as at December 31, 2020 would impact the Company's effective tax rate.

During the fourth quarter of 2019, a tax authority proposed an adjustment for a prior tax year without assessing taxes. Although the Company had commenced action to have the proposal removed, an increase in uncertain tax position was recorded on deferred income tax liability and expense in the amount of $24 million. While the proposed adjustment was withdrawn during 2020, the ultimate resolution of this matter may give rise to further favourable or unfavourable adjustments to deferred tax, the timing and amount of which are not determinable at this time.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of "Income tax expense" in the Company's Consolidated Statements of Income. The net amount of accrued interest and penalties in 2020 was a $1 million recovery (2019 – $1 million recovery; 2018 – $nil). The total amount of accrued interest and penalties associated with unrecognized tax benefits at December 31, 2020 was $9 million (2019 – $10 million; 2018 – $11 million).

The Company and its subsidiaries are subject to either Canadian federal and provincial income tax, U.S. federal, state and local income tax, or the relevant income tax in other international jurisdictions. The Company has substantially concluded all Canadian federal and provincial income tax matters for the years through 2014. The federal and provincial income tax returns filed for 2015 and subsequent years remain subject to examination by the Canadian taxation authorities. The Internal Revenue Service ("IRS") audit for 2012 and 2013 has been settled. The income tax returns for 2016 and subsequent years continue to remain subject to examination by the IRS and U.S. state tax jurisdictions. The Company believes that it has recorded sufficient income tax reserves at December 31, 2020 with respect to these income tax examinations.

7. Earnings per share

Basic earnings per share has been calculated using Net income for the year divided by the weighted-average number of shares outstanding during the year.

Diluted earnings per share has been calculated using the treasury stock method which assumes that any proceeds received from the exercise of in-the-money options would be used to purchase CP Common Shares at the average market price for the period. For purposes of this calculation, at December 31, 2020, there were 1.4 million dilutive options outstanding (2019 – 1.6 million; 2018 – 1.3 million).

The number of shares used in the earnings per share calculations are reconciled as follows:

(in millions of Canadian dollars, except per share data)		**2020**		2019		2018
Net income	**$**	**2,444**	$	2,440	$	1,951
Weighted-average basic shares outstanding (millions)		**135.5**		138.8		142.9
Dilutive effect of stock options (millions)		**0.5**		0.5		0.4
Weighted-average diluted shares outstanding (millions)		**136.0**		139.3		143.3
Earnings per share – basic	**$**	**18.05**	$	17.58	$	13.65
Earnings per share – diluted	**$**	**17.97**	$	17.52	$	13.61

In 2020, there were no options excluded from the computation of diluted earnings per share (2019 – nil; 2018 – 0.2 million).

8. Other comprehensive loss and accumulated other comprehensive loss

The components of Other comprehensive loss and the related tax effects are as follows:

(in millions of Canadian dollars)	Before tax amount	Income tax (expense) recovery	Net of tax amount
For the year ended December 31, 2020			
Unrealized foreign exchange (loss) gain on:			
Translation of the net investment in U.S. subsidiaries	**$ (118)**	**$ —**	**$ (118)**
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 17)	**136**	**(18)**	**118**
Realized loss on derivatives designated as cash flow hedges recognized in income	**9**	**(3)**	**6**
Change in pension and other benefits actuarial gains and losses	**(403)**	**108**	**(295)**
Change in prior service pension and other benefit costs	**(4)**	**1**	**(3)**
Other comprehensive loss	**$ (380)**	**$ 88**	**$ (292)**
For the year ended December 31, 2019			
Unrealized foreign exchange (loss) gain on:			
Translation of the net investment in U.S. subsidiaries	$ (251)	$ —	$ (251)
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 17)	288	(38)	250
Realized loss on derivatives designated as cash flow hedges recognized in income	10	(2)	8
Change in pension and other benefits actuarial gains and losses	(661)	175	(486)
Other comprehensive loss	$ (614)	$ 135	$ (479)
For the year ended December 31, 2018			
Unrealized foreign exchange gain (loss) on:			
Translation of the net investment in U.S. subsidiaries	$ 419	$ —	$ 419
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 17)	(479)	64	(415)
Change in derivatives designated as cash flow hedges:			
Realized loss on cash flow hedges recognized in income	10	(3)	7
Unrealized gain on cash flow hedges and other	28	(8)	20
Change in pension and other benefits actuarial gains and losses	(447)	115	(332)
Change in prior service pension and other benefit costs	(2)	1	(1)
Other comprehensive loss	$ (471)	$ 169	$ (302)

The components of Accumulated other comprehensive loss, net of tax, are as follows:

(in millions of Canadian dollars)	**2020**	2019
Unrealized foreign exchange gain on translation of the net investment in U.S. subsidiaries	**$ 493**	$ 611
Unrealized foreign exchange loss on translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries	**(381)**	(499)
Net deferred losses on derivatives and other	**(48)**	(54)
Amounts for defined benefit pension and other post-retirement plans not recognized in income (Note 22)	**(2,878)**	(2,580)
Accumulated other comprehensive loss	**$ (2,814)**	$ (2,522)

Changes in Accumulated other comprehensive loss by component are as follows:

(in millions of Canadian dollars)	Foreign currency net of hedging activities[1]	Derivatives and other[1]	Pension and post-retirement defined benefit plans[1]	Total[1]
Opening balance, January 1, 2020	**$ 112**	**$ (54)**	**$ (2,580)**	**$ (2,522)**
Other comprehensive loss before reclassifications	**—**	**(2)**	**(430)**	**(432)**
Amounts reclassified from accumulated other comprehensive loss	**—**	**8**	**132**	**140**
Net other comprehensive income (loss)	**—**	**6**	**(298)**	**(292)**
Closing balance, December 31, 2020	**$ 112**	**$ (48)**	**$ (2,878)**	**$ (2,814)**
Opening balance, January 1, 2019	$ 113	$ (62)	$ (2,094)	$ (2,043)
Other comprehensive loss before reclassifications	(1)	—	(550)	(551)
Amounts reclassified from accumulated other comprehensive loss	—	8	64	72
Net other comprehensive (loss) income	(1)	8	(486)	(479)
Closing balance, December 31, 2019	$ 112	$ (54)	$ (2,580)	$ (2,522)

[1] Amounts are presented net of tax.

Amounts in Pension and post-retirement defined benefit plans reclassified from Accumulated other comprehensive loss are as follows:

(in millions of Canadian dollars)	2020	2019
Amortization of prior service costs[1]	**$ (1)**	$ —
Recognition of net actuarial loss[1]	**180**	84
Total before income tax	**179**	84
Income tax recovery	**(47)**	(20)
Total net of income tax	**$ 132**	$ 64

[1] Impacts "Other components of net periodic benefit recovery" on the Consolidated Statements of Income.

9. Accounts receivable, net

	As at December 31, 2020			As at December 31, 2019[1]		
(in millions of Canadian dollars)	**Freight**	**Non-Freight**	**Total**	Freight	Non-Freight	Total
Total accounts receivable	**$ 662**	**$ 203**	**$ 865**	$ 637	$ 210	$ 847
Allowance for credit losses	**(25)**	**(15)**	**(40)**	(26)	(16)	(42)
Total accounts receivable, net	**$ 637**	**$ 188**	**$ 825**	$ 611	$ 194	$ 805

[1] Prior year amounts have not been adjusted under the modified retrospective method (Note 2).

	For the twelve months ended December 31, 2020		
(in millions of Canadian dollars)	**Freight**	**Non-Freight**	**Total**
Allowance for credit losses, opening balance[1]	$ (27)	$ (16)	$ (43)
Current period credit loss provision, net	2	1	3
Allowance for credit losses, closing balance	$ (25)	$ (15)	$ (40)

[1] Opening balance at January 1, 2020 was restated as described in Note 2.

10. Business combinations

DRTP

On December 22, 2020, CP completed its acquisition of the 83.5% ownership of the Detroit River Tunnel Partnership ("DRTP") held by OMERS Infrastructure Management Inc. ("OMERS") for cash, net of cash acquired, of $398 million. The purchase price is subject to customary closing adjustments, including any final adjustment for closing working capital and certain closing costs. With this acquisition CP obtained 100% ownership of DRTP. The acquisition of DRTP will reduce CP's operating costs related to movements through the tunnel which amounted to approximately $34 million in 2020, and better integrate the eastern part of the network. DRTP owns a 1.6-mile rail tunnel linking Windsor, Ontario, and Detroit, Michigan and additional, separate lands in both cities. The acquisition was funded with cash from operations and CP's commercial paper program.

The acquisition of DRTP has been accounted for as a business combination under the acquisition method of accounting. The acquired assets and assumed liabilities are recorded at their estimated fair values at the date of acquisition. The fair values were estimated by applying an income approach using the discounted cash flow method of future cash flows, appraised land values reflecting a corridor enhancement factor where appropriate, and depreciated replacement cost for depreciable assets including the tunnel, track, signaling systems, and other railway related infrastructure assets.

Prior to the close of the transaction, CP owned a 16.5% interest in DRTP, which was accounted for as an equity method investment. The previously held equity investment was remeasured to fair value which was determined from the negotiated purchase price that reflected a market value established in a competitive bid process. As a result of the acquisition, the Company recognized a before-tax gain of $68 million on the remeasurement to fair value of its equity interest within "Purchased services and other", calculated as the difference between the fair value of CP's 16.5% interest in DRTP of $81 million and the book value of the interest of $13 million.

The purchase price allocation was prepared on a preliminary basis and is subject to change as additional information becomes available concerning the fair value and tax bases of the net assets acquired. Any adjustments to the purchase price allocation will be made as soon as practicable but no later than one year from the date of acquisition.

The following summarizes the estimated fair values of the acquired assets and liabilities of DRTP:

(in millions of Canadian dollars)		December 22, 2020
Fair value of net assets acquired:		
Accounts receivable, net	$	5
Properties		436
Intangible assets (Note 13)		4
Accounts payable and accrued liabilities		(1)
Deferred taxes		(55)
Total identifiable assets and liabilities	$	389
Goodwill (Note 13)		90
	$	**479**
Consideration:		
Cash, net of cash acquired	$	398
Fair value of previously held equity method investment		81
Total consideration	**$**	**479**

The goodwill of $90 million relates primarily to the contract that DRTP has for CP's use of the tunnel and deferred taxes recognized as a result of the purchase price allocation. The goodwill recognized is not deductible for tax purposes.

Prior to the acquisition of DRTP, CP had pre-existing agreements to use the tunnel and to operate and manage the tunnel on behalf of DRTP. On acquisition, no gain or loss was recognized in respect of the effective settlement of these pre-existing relationships as they were determined to be at fair market value based on an assessment of current market conditions and market participants.

Acquired cash and cash equivalents of $6 million is presented as a reduction of cash used in investing activities in the Company's Consolidated Statements of Cash Flows.

CP has not provided pro forma information relating to the pre-acquisition period as it is not material.

CMQ

On December 30, 2019, CP purchased 100% of Central Maine & Québec Railway Canada Inc. ("CMQ Canada") and Central Maine & Québec Railway U.S. Inc. ("CMQ U.S.") (together "CMQ") for cash consideration of $174 million. CMQ owns 237 miles of rail lines in Québec and 244 miles of rail lines in Maine and Vermont.

CMQ U.S.

The acquisition of CMQ U.S. was subject to approval from the United States Surface Transportation Board ("STB"). From the December 30, 2019 date of purchase, all purchased shares of CMQ U.S. were held in an independent voting trust (the "Trust") pending the STB's approval of CP's application for control of CMQ U.S. Approval was granted with an effective date of June 3, 2020. Between December 30, 2019 and June 3, 2020, CP accounted for its acquisition of CMQ U.S. as an equity method investment. During this time, CP paid additional consideration for CMQ of $3 million, representing changes from the finalization of previously estimated closing date working capital.

On June 3, 2020 the Trust was dissolved and CP assumed control of CMQ U.S. At this time, CP accounted for its acquisition in CMQ U.S. as a business combination using the acquisition method of accounting. Accordingly, the acquired tangible and intangible assets and assumed liabilities were recorded at their estimated fair values as at June 3, 2020 and results from operations and cash flows were consolidated prospectively. There was no material change in the acquisition-date fair value of the equity interest held by the Company in CMQ U.S. immediately before the acquisition date. Fair values were determined primarily through the use of an income approach.

After a measurement period adjustment of $1 million to increase Other long-term liabilities and goodwill resulting from the finalization of acquisition date deferred tax, the final allocation of total consideration to the fair values of the acquired assets and liabilities of CMQ U.S. is summarized as follows:

(in millions of Canadian dollars)		**June 3, 2020**
Fair value of net assets acquired:		
Cash and cash equivalents	$	22
Accounts receivable, net		2
Properties		54
Intangible assets (Note 13)		27
Accounts payable and accrued liabilities		(13)
Other long-term liabilities		(6)
Total identifiable assets and liabilities	$	86
Goodwill (Note 13)		52
	$	**138**
Consideration:		
Fair value of previously held equity method investment	**$**	**138**

Goodwill of $52 million relates primarily to expected operating business synergies between the Company and CMQ U.S. The factors that contribute to the goodwill are revenue growth from customers which are currently not served by CP, access to new routes, and an assembled workforce. Goodwill recognized is not deductible for tax purposes.

Intangible assets of $27 million reflect customer lists acquired in the purchase of CMQ U.S., and have amortization periods of 20 years.

Acquired cash and cash equivalents of $22 million is presented as a reduction of cash used in investing activities on the Company's Consolidated Statement of Cash Flows, and is presented net of finalized closing working capital adjustments for CMQ of $3 million as described above.

CP has not provided pro forma information relating to the pre-acquisition period as it is not material.

CMQ Canada

The acquisition of CMQ Canada was accounted for as a business combination under the acquisition method of accounting. The acquired tangible and intangible assets and assumed liabilities are recorded at their estimated fair values at the date of acquisition.

There have been no adjustments to the preliminary purchase price allocation. The final purchase price and allocation of the total consideration to the fair values of assets and liabilities acquired for CMQ Canada is summarized as follows:

(in millions of Canadian dollars)	December 30, 2019
Fair value of net assets acquired:	
Accounts receivable, net	$ 7
Properties	42
Intangible assets (Note 13)	5
Accounts payable and accrued liabilities	(2)
Long-term debt maturing within one year (Note 16)	(11)
Other long-term liabilities	(4)
Total identifiable assets and liabilities	37
Goodwill (Note 13)	10
	$ 47
Consideration:	
Cash, net of cash acquired	$ 47

The goodwill of $10 million relates primarily to expected operating business synergies. The factors that contribute to the goodwill are revenue growth from customers which are currently not served by CP, access to new routes and an assembled workforce. The goodwill recognized is not deductible for tax purposes.

CP has not provided pro forma information relating to the pre-acquisition period as it is not material.

11. Investments

(in millions of Canadian dollars)	2020	2019
Investment in CMQ U.S. accounted for on an equity basis (Note 10)	**$ —**	$ 127

					9,771	8,757
Less: Long-term debt maturing within one year					**1,186**	599
				$	**8,585**	$ 8,158

At December 31, 2020, the gross amount of long-term debt denominated in U.S. dollars was U.S. $6,713 million (2019 – U.S. $6,016 million).

Annual maturities and principal repayment requirements, excluding those pertaining to finance leases, for each of the five years following 2020 are (in millions): 2021 – $1,178; 2022 – $471; 2023 – $475; 2024 – $83; 2025 – $891.

Fees on long-term debt are amortized to income over the term of the related debt.

A. These debentures and notes are presented net of unamortized discounts, pay interest semi-annually, and are unsecured but carry a negative pledge.

In 2020, the Company issued U.S $500 million 2.050% 10-year Notes due March 5, 2030 for net proceeds of U.S. $495 million ($662 million) and $300 million 3.050% 30-year Notes due March 9, 2050 for net proceeds of $296 million.

In 2019, the Company repaid U.S. $350 million 7.250% 10-year Notes at maturity for a total of U.S. $350 million ($471 million). The Company also issued $400 million 3.150% 10-year Notes due March 13, 2029 for net proceeds of $397 million.

B. On December 30, 2019, through its business combination with CMQ Canada, the Company assumed CMQ Canada's obligations under the 8.00% 5-year Promissory Notes totalling U.S. $8 million ($11 million) owing to CMQ U.S (see Note 10). In 2020, these notes were settled.

C. The 5.41% Senior Secured Notes are collateralized by specific locomotive units with a carrying value of $97 million at December 31, 2020. The Company pays equal blended semi-annual payments of principal and interest. Final repayment of the remaining principal of U.S. $44 million is due in March 2024.

D. The 6.91% Secured Equipment Notes are full recourse obligations of the Company collateralized by a first charge on specific locomotive units with a carrying value of $54 million at December 31, 2020. The Company pays equal blended semi-annual payments of principal and interest. Final repayment of the remaining principal of $11 million is due in October 2024.

E. The 7.49% Equipment Trust Certificates are secured by specific locomotive units with a carrying value of $91 million at December 31, 2020. The Company makes semi-annual payments that vary in amount and are interest-only payments or blended principal and interest payments. Final repayment of the remaining principal of U.S. $11 million is due in January 2021.

F. The carrying value of the assets collateralizing finance lease obligations was $171 million at December 31, 2020.

G. The Consolidated Debenture Stock, authorized by an *Act of Parliament of 1889*, constitutes a first charge upon and over the whole of the undertaking, railways, works, rolling stock, plant, property and effects of the Company, with certain exceptions.

Credit facility

CP has a revolving credit facility (the "facility") agreement with 14 highly rated financial institutions for a commitment amount of U.S. $1.3 billion, which consists of a U.S. $1.0 billion tranche maturing September 27, 2024 and a U.S. $300 million tranche maturing September 27, 2021. The facility can accommodate draws of cash and/or letters of credit at market competitive pricing. The agreement requires the Company to maintain a financial covenant in conjunction with the facility. As at December 31, 2020 and 2019, the Company was in compliance with all terms and conditions of the credit facility arrangements and satisfied the financial covenant. During the year ended December 31, 2020, the Company drew and fully repaid U.S. $100 million from the U.S. $300 million tranche of its revolving credit facility. As at December 31, 2020 and 2019, the facility was undrawn.

The Company also has a commercial paper program which enables it to issue commercial paper up to a maximum aggregate principal amount of U.S. $1.0 billion in the form of unsecured promissory notes. This commercial paper program is backed by the revolving credit facility. As at December 31, 2020, the Company had total commercial paper borrowings of U.S. $644 million ($820 million), included in "Long-term debt maturing within one year" on the Company's Consolidated Balance Sheets (December 31, 2019 – $516 million). The weighted-average interest rate on these borrowings was 0.27% (December 31, 2019 - 2.03%). The Company presents issuances and repayments of commercial paper, all of which have a maturity of less than 90 days, in the Company's Consolidated Statements of Cash Flows on a net basis.

CP has bilateral letter of credit facilities with six highly rated financial institutions to support its requirement to post letters of credit in the ordinary course of business. Under these agreements, the Company has the option to post collateral in the form of cash or cash equivalents, equal at least to the face value of the letter of credit issued. These agreements permit CP to withdraw amounts posted as collateral at any time; therefore, the amounts posted as collateral are presented as "Cash and cash equivalents" on the Company's Consolidated Balance Sheets. As at December 31, 2020 and 2019, the Company did not have any collateral posted on its bilateral letter of credit facilities but had letters of credit drawn of $59 million (December 31, 2019 – $80 million) from a total available amount of $300 million (December 31, 2019 – $300 million).

17. Financial instruments

A. Fair values of financial instruments

The Company categorizes its financial assets and liabilities measured at fair value into a three-level hierarchy established by GAAP that prioritizes those inputs to valuation techniques used to measure fair value based on the degree to which they are observable. The three levels of the fair value hierarchy are as follows: Level 1 inputs are quoted prices in active markets for identical assets and liabilities; Level 2 inputs, other than quoted prices included within Level 1, are observable for the asset or liability either directly or indirectly; and Level 3 inputs are not observable in the market.

The Company's short-term financial instruments include cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, and short-term borrowings including commercial paper. The carrying value of short-term financial instruments approximate their fair values.

The carrying value of the Company's long-term debt does not approximate its fair value. The estimated fair value has been determined based on market information where available, or by discounting future payments of principal and interest at estimated interest rates expected to be available to the Company at period end. All measurements are classified as Level 2. The Company's long-term debt, including current maturities, with a carrying value of $8,951 million at December 31, 2020 (December 31, 2019 - $8,241 million), had a fair value of $11,597 million (December 31, 2019 - $10,149 million).

B. Financial risk management

Derivative financial instruments

Derivative financial instruments may be used to selectively reduce volatility associated with fluctuations in interest rates, FX rates, the price of fuel, and stock-based compensation expense. Where derivatives are designated as hedging instruments, the relationship between the hedging instruments and their associated hedged items is documented, as well as the risk management objective and strategy for the use of the hedging instruments. This documentation includes linking the derivatives that are designated as fair value or cash flow hedges to specific assets or liabilities on the Company's Consolidated Balance Sheets, commitments, or forecasted transactions. At the time a derivative contract is entered into and at least quarterly thereafter, an assessment is made as to whether the derivative item is effective in offsetting the changes in fair value or cash flows of the hedged items. The derivative qualifies for hedge accounting treatment if it is effective in substantially mitigating the risk it was designed to address.

It is not the Company's intent to use financial derivatives or commodity instruments for trading or speculative purposes.

Credit risk management

Credit risk refers to the possibility that a customer or counterparty will fail to fulfill its obligations under a contract and as a result create a financial loss for the Company.

The railway industry predominantly serves financially established customers, and the Company has experienced limited financial losses with respect to credit risk. The credit worthiness of customers is assessed using credit scores supplied by a third party and through direct monitoring of their financial well-being on a continual basis. The Company establishes guidelines for customer credit limits and should thresholds in these areas be reached, appropriate precautions are taken to improve collectability.

Counterparties to financial instruments expose the Company to credit losses in the event of non-performance. Counterparties for derivative and cash transactions are limited to high credit quality financial institutions, which are monitored on an ongoing basis. Counterparty credit assessments are based on the financial health of the institutions and their credit ratings from external agencies. The Company does not anticipate non-performance that would materially impact the Company's financial statements. In addition, the Company believes there are no significant concentrations of credit risk.

FX management

The Company conducts business transactions and owns assets in both Canada and the United States. As a result, the Company is exposed to fluctuations in the value of financial commitments, assets, liabilities, income, or cash flows due to changes in FX rates. The Company may enter into FX risk management transactions primarily to manage fluctuations in the exchange rate between Canadian and U.S. currencies. FX exposure is primarily mitigated through natural offsets created by revenues, expenditures, and balance sheet positions incurred in the same currency. Where appropriate, the Company may negotiate with customers and suppliers to reduce the net exposure.

Net investment hedge

The FX gains and losses on long-term debt are mainly unrealized and can only be realized when U.S. dollar-denominated long-term debt matures or is settled. The Company also has long-term FX exposure on its investment in foreign subsidiaries with a U.S. dollar functional currency. The majority of the Company's U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in these foreign subsidiaries. This designation has the effect of mitigating volatility on Net income by offsetting long-term FX gains and losses on U.S. dollar-denominated long-term debt and gains and losses on its net investment. The effect of the net investment hedge recognized in "Other comprehensive loss" in 2020 was an FX gain of $136 million, the majority of which was unrealized (2019 – unrealized gain of $288 million; 2018 – unrealized loss of $479 million) (see Note 8).

Interest rate management

The Company is exposed to interest rate risk, which is the risk that the fair value or future cash flows of a financial instrument will vary as a result of changes in market interest rates. In order to manage funding needs or capital structure goals, the Company enters into debt or finance lease agreements that are subject to either fixed market interest rates set at the time of issue or floating rates determined by ongoing market conditions. Debt subject to variable interest rates exposes the Company to variability in interest expense, while debt subject to fixed interest rates exposes the Company to variability in the fair value of debt.

To manage interest rate exposure, the Company accesses diverse sources of financing and manages borrowings in line with a targeted range of capital structure, debt ratings, liquidity needs, maturity schedule, and currency and interest rate profiles. In anticipation of future debt issuances, the Company may enter into forward rate agreements, that are designated as cash flow hedges, to substantially lock in all or a portion of the effective future interest expense. The Company may also enter into swap agreements, designated as fair value hedges, to manage the mix of fixed and floating rate debt.

Forward starting swaps

During the second quarter of 2018, the Company settled a notional amount of U.S. $500 million of forward starting swaps related to the U.S. $500 million 4.000% 10-year Notes issued in the same period. The fair value of these derivative instruments at the time of settlement was a loss of U.S. $19 million ($24 million). The Company no longer has any active forward starting swaps.

For the year ended December 31, 2020, a net loss of $9 million related to previously settled forward starting swap hedges has been amortized to "Net interest expense" (2019 – loss of $9 million; 2018 – loss of $10 million). The Company expects that during the next 12 months, $9 million of net losses will be amortized to "Net interest expense".

Treasury rate locks

At December 31, 2020, the Company had net unamortized losses related to interest rate locks, which are accounted for as cash flow hedges, settled in previous years totalling $17 million (December 31, 2019 – $18 million). This amount is composed of various unamortized gains and losses related to specific debts which are reflected in "Accumulated other comprehensive loss" and are amortized to "Net interest expense" in the period that interest on the related debt is charged. The amortization of these gains and losses resulted in a $1 million increase to "Net interest expense" and "Other comprehensive loss" in 2020 (2019 – $1 million; 2018 – $1 million). The Company expects that during the next 12 months, a net loss of $1 million related to these previously settled derivatives will be reclassified to "Net interest expense".

18. Other long-term liabilities

(in millions of Canadian dollars)		2020		2019
Operating lease liabilities, net of current portion (Note 19)	$	**248**	$	285
Stock-based compensation liabilities, net of current portion		**146**		111
Provision for environmental remediation, net of current portion[1]		**71**		70
Deferred revenue, net of current portion (Note 3)[2]		**34**		4
Deferred real estate lease and license revenue, net of current portion[3]		**18**		20
Deferred gains on sale leaseback transactions[3]		**5**		6
Other, net of current portion [2]		**63**		66
Total other long-term liabilities	$	**585**	$	562

[1] As at December 31, 2020, the aggregate provision for environmental remediation, including the current portion was $80 million (2019 – $77 million).
[2] 2019 comparative figures have been reclassified to conform with current presentation.
[3] The deferred real estate lease and license revenue and deferred gains on sale leaseback transactions are being amortized to income on a straight-line basis over the related lease terms.

Environmental remediation accruals

Environmental remediation accruals cover site-specific remediation programs. The estimate of the probable costs to be incurred in the remediation of properties contaminated by past railway activities reflects the nature of contamination at individual sites according to typical activities and scale of operations conducted. CP has developed remediation strategies for each property based on the nature and extent of the contamination, as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants, considering available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and groundwater. The details of the estimates reflect the environmental liability at each property. Provisions for environmental remediation costs are recorded in "Other long-term liabilities", except for the current portion which is recorded in "Accounts payable and accrued liabilities" (see Note 15). Payments are expected to be made over 10 years to 2030.

The accruals for environmental remediation represent CP's best estimate of its probable future obligation and include both asserted and unasserted claims, without reduction for anticipated recoveries from third parties. Although the recorded accruals include CP's best estimate of all probable costs, CP's total environmental remediation costs cannot be predicted with certainty. Accruals for environmental remediation may change from time to time as new information about previously untested sites becomes known, environmental laws and regulations evolve and advances are made in environmental remediation technology. The accruals may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, may materially affect income in the particular period in which a charge is recognized. Costs related to existing, but as yet unknown, or future contamination will be accrued in the period in which they become probable and reasonably estimable. Changes to costs are reflected as changes to "Other long-term liabilities" or "Accounts payable and accrued liabilities" on the Company's Consolidated Balance Sheets and to "Purchased services and other" within operating expenses on the Company's Consolidated Statements of Income. The amount charged to income in 2020 was $10 million (2019 – $6 million; 2018 – $6 million).

19. Leases

The Company's leases have remaining terms of less than one year to 14 years, some include options to extend up to an additional 10 years, and some include options to terminate within one year.

Residual value guarantees are provided on certain vehicle operating leases. Cumulatively, these guarantees are limited to $1 million and are not included in lease liabilities as it is not currently probable that any amounts will be owed.

Components of lease expense for the year ended December 31 are as follows:

(in millions of Canadian dollars)	2020	2019
Operating lease cost	$ 83	$ 89
Short-term lease cost	10	10
Variable lease cost	13	13
Sublease income	(3)	(3)
Finance Lease Cost		
Amortization of right-of-use assets	9	9
Interest on lease liabilities	11	11
Total lease costs	**$ 123**	**$ 129**

Supplemental balance sheet information related to leases is as follows:

(in millions of Canadian dollars)	**Classification**	2020	2019
Assets			
Operating	Other assets	$ 316	$ 358
Finance	Properties, net book value	171	177
Liabilities			
Current			
Operating	Accounts payable and accrued liabilities	63	69
Finance	Long-term debt maturing within one year	8	7
Long-term			
Operating	Other long-term liabilities	248	285
Finance	Long-term debt	135	144

The following table provides the Company's weighted-average remaining lease terms and discount rates:

	2020	2019
Weighted-Average Remaining Lease Term		
Operating leases	7 years	7 years
Finance leases	3 years	4 years
Weighted-Average Discount Rate		
Operating leases	3.32 %	3.45 %
Finance leases	7.06 %	7.07 %

Supplemental information related to leases is as follows:

(in millions of Canadian dollars)	2020	2019
Cash paid for amounts included in measurement of lease liabilities		
Operating cash outflows from operating leases	$ 74	$ 82
Operating cash outflows from finance leases	10	10
Financing cash outflows from finance leases	8	6
Right-of-use assets obtained in exchange for lease liabilities		
Operating leases	34	38
Finance leases	4	4

The following table provides the maturities of lease liabilities for the next five years and thereafter as at December 31, 2020:

(in millions of Canadian dollars)	Finance Leases	Operating Leases
2021	$ 11	$ 71
2022	107	59
2023	9	53
2024	8	42
2025	8	34
Thereafter	12	88
Total lease payments	**155**	**347**
Imputed interest	(12)	(36)
Present value of lease payments	**$ 143**	**$ 311**

20. Shareholders' equity

Authorized and issued share capital

The Company is authorized to issue an unlimited number of Common Shares, an unlimited number of First Preferred Shares, and an unlimited number of Second Preferred Shares. At December 31, 2020, no First or Second Preferred Shares had been issued.

The following table summarizes information related to Common Share balances as at December 31:

(number of shares in millions)	**2020**	2019	2018
Share capital, January 1	**137.0**	140.5	144.9
CP Common Shares repurchased	**(4.0)**	(3.8)	(4.6)
Shares issued under stock option plan	**0.3**	0.3	0.2
Share capital, December 31	**133.3**	137.0	140.5

The change in the "Share capital" balance includes $10 million of stock-based compensation transferred from "Additional paid-in capital" (2019 – $7 million; 2018 – $12 million).

Share repurchases

On December 17, 2019, the Company announced a normal course issuer bid ("NCIB"), commencing December 20, 2019, to purchase up to 4.80 million Common Shares in the open market for cancellation on or before December 19, 2020. Upon expiry of this NCIB, the Company had purchased 4.27 million Common Shares for $1,577 million.

On October 19, 2018, the Company announced a NCIB, commencing October 24, 2018, to purchase up to 5.68 million Common Shares for cancellation on or before October 23, 2019. The Company completed this NCIB on October 23, 2019.

On May 10, 2017, the Company announced a NCIB, commencing May 15, 2017, to purchase up to 4.38 million Common Shares in the open market for cancellation on or before May 14, 2018. The Company completed this NCIB on May 10, 2018.

All purchases were made in accordance with the respective NCIB at prevailing market prices plus brokerage fees, or such other prices that were permitted by the Toronto Stock Exchange ("TSX"), with consideration allocated to "Share capital" up to the average carrying amount of the shares and any excess allocated to "Retained earnings".

The following table provides activities under the share repurchase programs for each of the years ended December 31:

	2020	2019	2018
Number of Common Shares repurchased[1]	**3,973,076**	3,794,149	4,683,162
Weighted-average price per share[2]	**$ 371.74**	$ 300.65	$ 240.68
Amount of repurchase (in millions)[2]	**$ 1,477**	$ 1,141	$ 1,127

[1] Includes shares repurchased but not yet cancelled at year end.
[2] Includes brokerage fees.

On January 27, 2021, the Company announced that the TSX has accepted its notice to implement a new NCIB, commencing January 29, 2021, to purchase up to approximately 3.33 million Common Shares for cancellation on or before January 28, 2022.

21. Change in non-cash working capital balances related to operations

(in millions of Canadian dollars)	**2020**	2019	2018
(Use) source of cash:			
Accounts receivable, net	**$ (61)**	$ 27	$ (107)
Materials and supplies	**(15)**	(8)	(11)
Other current assets	**(5)**	(24)	30
Accounts payable and accrued liabilities	**(308)**	(21)	153
Change in non-cash working capital	**$ (389)**	$ (26)	$ 65

22. Pensions and other benefits

The Company has both defined benefit ("DB") and defined contribution ("DC") pension plans. At December 31, 2020, the Canadian pension plans represent nearly all of total combined pension plan assets and nearly all of total combined pension plan obligations.

The DB plans provide for pensions based principally on years of service and compensation rates near retirement. Pensions for Canadian pensioners are partially indexed to inflation. Annual employer contributions to the DB plans, which are actuarially determined, are made on the basis of being not less than the minimum amounts required by federal pension supervisory authorities.

The Company has other benefit plans including post-retirement health and life insurance for pensioners, and post-employment long-term disability and workers' compensation benefits, which are based on Company-specific claims. At December 31, 2020, the Canadian other benefits plans represent nearly all of total combined other plan obligations.

The Audit and Finance Committee of the Board of Directors has approved an investment policy that establishes long-term asset mix targets which take into account the Company's expected risk tolerances. Pension plan assets are managed by a suite of independent investment managers, with the allocation by manager reflecting these asset mix targets. Most of the assets are actively managed with the objective of outperforming applicable benchmarks. In accordance with the investment policy, derivative instruments may be used by investment managers to hedge or adjust existing or anticipated exposures.

To develop the expected long-term rate of return assumption used in the calculation of net periodic benefit cost applicable to the market-related value of plan assets, the Company considers the expected composition of the plans' assets, past experience, and future estimates of long-term investment returns. Future estimates of investment returns reflect the long-term return expectation for fixed income, public equity, real estate, infrastructure, private debt, and absolute return investments, and the expected added value (relative to applicable benchmark indices) from active management of pension fund assets.

The Company has elected to use a market-related value of assets for the purpose of calculating net periodic benefit cost, developed from a five year average of market values for the plans' public equity and absolute return investments (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the plans' fixed income, real estate, infrastructure, and private debt securities.

The benefit obligation is discounted using a discount rate that is a blended yield to maturity for a hypothetical portfolio of high-quality debt instruments with cash flows matching projected benefit payments. The discount rate is determined by management.

Net periodic benefit cost

The elements of net periodic benefit cost for DB pension plans and other benefits recognized in the year include the following components:

	Pensions			Other benefits		
(in millions of Canadian dollars)	**2020**	2019	2018	**2020**	2019	2018
Current service cost (benefits earned by employees)	**$ 140**	$ 107	$ 120	**$ 12**	$ 11	$ 12
Other components of net periodic benefit cost (recovery):						
Interest cost on benefit obligation	**406**	450	438	**17**	20	19
Expected return on fund assets	**(945)**	(947)	(955)	**—**	—	—
Recognized net actuarial loss	**177**	84	114	**4**	12	2
Amortization of prior service costs	**(1)**	(1)	(2)	**—**	1	—
Total other components of net periodic benefit (recovery) cost	**(363)**	(414)	(405)	**21**	33	21
Net periodic benefit (recovery) cost	**$ (223)**	$ (307)	$ (285)	**$ 33**	$ 44	$ 33

Projected benefit obligation, fund assets, and funded status

Information about the Company's DB pension plans and other benefits, in aggregate, is as follows:

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2020**	2019	**2020**	2019
Change in projected benefit obligation:				
Benefit obligation at January 1	**$ 12,610**	$ 11,372	**$ 541**	$ 501
Current service cost	**140**	107	**12**	11
Interest cost	**406**	450	**17**	20
Employee contributions	**42**	41	**—**	—
Benefits paid	**(653)**	(646)	**(34)**	(34)
Foreign currency changes	**(5)**	(10)	**—**	—
Plan amendments and other	**3**	—	**—**	—
Actuarial loss	**1,256**	1,296	**17**	43
Projected benefit obligation at December 31	**$ 13,799**	$ 12,610	**$ 553**	$ 541

The net actuarial losses for Pensions and Other benefits in 2020 were primarily due to the decrease in discount rate from 3.25% to 2.58%. The net actuarial losses for Pensions and Other benefits in 2019 were primarily due to the decrease in discount rate from 4.01% to 3.25%.

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2020**	2019	**2020**	2019
Change in fund assets:				
Fair value of fund assets at January 1	**$ 13,319**	$ 12,349	**$ 5**	$ 4
Actual return on fund assets	**1,634**	1,528	**—**	1
Employer contributions	**27**	53	**34**	34
Employee contributions	**42**	41	**—**	—
Benefits paid	**(653)**	(646)	**(34)**	(34)
Foreign currency changes	**(4)**	(6)	**—**	—
Fair value of fund assets at December 31	**$ 14,365**	$ 13,319	**$ 5**	$ 5
Funded status – plan surplus (deficit)	**$ 566**	$ 709	**$ (548)**	$ (536)

The table below shows the aggregate pension projected benefit obligation and aggregate fair value of plan assets for pension plans with fair value of plan assets in excess of projected benefit obligations (i.e. surplus), and for pension plans with projected benefit obligations in excess of fair value of plan assets (i.e. deficit):

	2020		2019	
(in millions of Canadian dollars)	**Pension plans in surplus**	**Pension plans in deficit**	Pension plans in surplus	Pension plans in deficit
Projected benefit obligation at December 31	**$ (13,220)**	**$ (579)**	$ (12,076)	$ (534)
Fair value of fund assets at December 31	**14,114**	**251**	13,079	240
Funded Status	**$ 894**	**$ (328)**	$ 1,003	$ (294)

The DB pension plans' accumulated benefit obligation as at December 31, 2020 was $13,528 million (2019 – $12,201 million). The accumulated benefit obligation is calculated on a basis similar to the projected benefit obligation, except no future salary increases are assumed in the projection of future benefits. For pension plans with accumulated benefit obligations in excess of fair value of plan assets (i.e. deficit), the aggregate pension accumulated benefit obligation as at December 31, 2020 was $443 million (2019 – $419 million) and the aggregate fair value of plan assets as at December 31, 2020 was $187 million (2019 –$186 million).

All Other benefits plans were in a deficit position at December 31, 2020 and 2019.

Pension asset and liabilities in the Company's Consolidated Balance Sheets

Amounts recognized in the Company's Consolidated Balance Sheets are as follows:

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2020**	2019	**2020**	2019
Pension asset	**$ 894**	$ 1,003	**$ —**	$ —
Accounts payable and accrued liabilities	**(11)**	(11)	**(33)**	(34)
Pension and other benefit liabilities	**(317)**	(283)	**(515)**	(502)
Total amount recognized	**$ 566**	$ 709	**$ (548)**	$ (536)

The measurement date used to determine the plan assets and the accrued benefit obligation is December 31. The most recent actuarial valuation for pension funding purposes for the Company's main Canadian pension plan was performed as at January 1, 2020. During 2021, the Company expects to file with the pension regulator a new valuation performed as at January 1, 2021.

Accumulated other comprehensive loss

Amounts recognized in accumulated other comprehensive loss are as follows:

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2020**	2019	**2020**	2019
Net actuarial loss:				
Other than deferred investment gains	**$ 3,960**	$ 3,434	**$ 104**	$ 91
Deferred investment gains	**(95)**	41	**—**	—
Prior service cost	**5**	1	**1**	1
Deferred income tax	**(1,070)**	(964)	**(27)**	(24)
Total (Note 8)	**$ 2,800**	$ 2,512	**$ 78**	$ 68

Actuarial assumptions

Weighted-average actuarial assumptions used were approximately:

(percentages)	**2020**	2019	2018
Benefit obligation at December 31:			
Discount rate	**2.58**	3.25	4.01
Projected future salary increases	**2.75**	2.75	2.75
Health care cost trend rate	**5.00** [1]	5.50 [1]	6.00 [1]
Benefit cost for year ended December 31:			
Discount rate	**3.25**	4.01	3.80
Expected rate of return on fund assets [3]	**7.25**	7.50	7.75
Projected future salary increases	**2.75**	2.75	2.75
Health care cost trend rate	**5.50** [1]	6.00 [1]	7.00 [2]

[1] The health care cost trend rate was assumed to be 6.00% in 2019 and 5.50% in 2020 and is assumed to be 5.00% per year in 2021 and thereafter.
[2] The health care cost trend rate was previously assumed to be 7.00% in 2018, and then decreasing by 0.50% per year to an ultimate rate of 5.00% per year in 2022 and thereafter.
[3] The expected rate of return on fund assets that will be used to compute the 2021 net periodic benefit credit is 6.90%.

Plan assets

Plan assets are recorded at fair value. The major asset categories are public equity securities, fixed income securities, real estate, infrastructure, absolute return investments, and private debt. The fair values of the public equity and fixed income securities are primarily based on quoted market prices. Real estate and infrastructure values are based on the value of each fund's assets as calculated by the fund manager, generally using third party appraisals or discounted cash flow analysis and taking into account current market conditions and recent sales transactions where practical and appropriate. Private debt values are

based on the value of each fund's assets as calculated by the fund manager taking into account current market conditions and reviewed annually by external parties. Absolute return investments are a portfolio of units of externally managed hedge funds and are valued by the fund administrators.

The Company's pension plan asset allocation, the weighted-average asset allocation targets, and the weighted average policy range for each major asset class at year end were as follows:

			Percentage of plan assets at December 31	
Asset allocation (percentage)	Asset allocation target	Policy range	**2020**	2019
Cash and cash equivalents	**1.2**	**0 – 10**	**2.0**	0.9
Fixed income	**24.1**	**20 – 40**	**28.1**	24.6
Public equity	**45.1**	**35 – 55**	**49.3**	54.5
Real estate and infrastructure	**9.8**	**4 – 13**	**6.3**	6.8
Private debt	**9.8**	**4 – 13**	**3.3**	2.4
Absolute return	**10.0**	**4 – 13**	**11.0**	10.8
Total	**100.0**		**100.0**	100.0

Summary of the assets of the Company's DB pension plans

The following is a summary of the assets of the Company's DB pension plans at December 31, 2020 and 2019. As of December 31, 2020 and 2019, there were no plan assets classified as Level 3 valued investments.

	Assets Measured at Fair Value			
(in millions of Canadian dollars)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Investments measured at NAV[1]	Total Plan Assets

	$ 8,011	$ 2,644	$ 2,664	$ 13,319

(1) Investments measured at net asset value ("NAV"):

Amounts are comprised of certain investments measured using NAV (or its equivalent) as a practical expedient. These investments have not been classified in the fair value hierarchy.

(2) Government & Corporate Bonds:

Fair values for bonds are based on market prices supplied by independent sources as of the last trading day.

(3) Mortgages:

The fair values of mortgages are based on current market yields of financial instruments of similar maturity, coupon and risk factors.

(4) Real estate:

Real estate fund values are based on the NAV of the funds that invest directly in real estate investments. The values of the investments have been estimated using the capital accounts representing the plan's ownership interest in the funds. Of the total, $580 million is subject to redemption frequencies ranging from monthly to annually and a redemption notice period of 90 days (2019 – $606 million). The remaining $124 million is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying real estate investments (2019 – $118 million). As at December 31, 2020, there are $32 million of unfunded commitments for real estate investments (December 31, 2019 – $35 million).

(5) Infrastructure:

Infrastructure fund values are based on the NAV of the funds that invest directly in infrastructure investments. The values of the investments have been estimated using the capital accounts representing the plans' ownership interest in the funds. Of the total, $112 million is subject to redemption frequencies ranging from monthly to annually and a redemption notice period of 90 days (2019 – $119 million). The remaining $87 million is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying infrastructure investments (2019 – $68 million). As at December 31, 2020, there are $491 million of unfunded commitments for infrastructure investments (December 31, 2019 – $286 million).

(6) Private debt:

Private debt fund values are based on the NAV of the funds that invest directly in private debt investments. The values of the investments have been estimated using the capital accounts representing the plans' ownership interest in the funds. Of the total, $154 million is subject to redemption frequencies ranging from monthly to annually and a redemption notice period of 90 days (2019 – $154 million). The remaining $311 million is not subject to redemption and is normally returned through distributions as a result of the repayment of the underlying loans (2019 - $159 million). As at December 31, 2020, there are $533 million of unfunded commitments for private debt investments (December 31, 2019 – $392 million).

(7) Derivatives:

The investment managers may utilize the following derivative instruments: equity futures to replicate equity index returns (Level 2); currency forwards to partially hedge foreign currency exposures (Level 2); bond forwards to reduce asset/liability interest rate risk exposures (Level 2); interest rate swaps to manage duration and interest rate risk (Level 2); credit default swaps to manage credit risk (Level 2); and options to manage interest rate risk and volatility (Level 2). The Company may utilize derivatives directly, but only for the purpose of hedging foreign currency exposures. As at December 31, 2020, there are currency forwards with a notional value of $1,041 million (December 31, 2019 – $334 million) and a fair value of $73 million (December 31, 2019 – $13 million). The fixed income investment manager utilizes a portfolio of bond forwards for the purpose of reducing asset/liability interest rate exposure. As at December 31, 2020, there are bond forwards with a notional value of $3,540 million (December 31, 2019 – $3,269 million) and a negative fair value of $2 million (December 31, 2019 – $(72) million).

(8) Absolute return:

The value of absolute return fund investments is based on the NAV reported by the fund administrators. The funds have different redemption policies with redemption notice periods varying from 60 to 95 days and frequencies ranging from monthly to triennially.

Additional plan assets information

The Company's primary investment objective for pension plan assets is to achieve a long–term return, net of all fees and expenses, that is sufficient for the plan's assets to satisfy the current and future obligations to plan beneficiaries, while minimizing the financial impact on the Company. In identifying the asset allocation ranges, consideration was given to the long-term nature of the underlying plan liabilities, the solvency and going-concern financial position of the plan, long-term return expectations, and the risks associated with key asset classes as well as the relationships of returns on key asset classes with each other, inflation, and interest rates. When advantageous and with due consideration, derivative instruments may be utilized by investment managers, provided the total value of the underlying assets represented by financial derivatives (excluding currency forwards, liability hedging derivatives in fixed income portfolios, and derivatives held by absolute return funds) is limited to 30% of the market value of the fund.

The funded status of the plans is exposed to fluctuations in interest rates, which affects the relative values of the plans' liabilities and assets. In order to mitigate interest rate risk, the Company's main Canadian defined benefit pension plan utilizes a liability driven investment strategy in its fixed income portfolio, which uses a combination of long duration bonds and derivatives to hedge interest rate risk, managed by the investment manager. At December 31, 2020, the plan's solvency funded position was 47% hedged against interest rate risk (2019 – 45%).

When investing in foreign securities, the plans are exposed to foreign currency risk; the effect of which is included in the valuation of the foreign securities. At December 31, 2020, the plans were 33% exposed to the U.S. dollar net of currency forwards (40% excluding the currency forwards), 6% exposed to the Euro, and 14% exposed to various other currencies. At December 31, 2019, the plans were 39% exposed to the U.S. dollar net of currency forwards (41% excluding the currency forwards), 6% exposed to the Euro, and 14% exposed to various other currencies.

At December 31, 2020, fund assets included 109,008 of the Common Shares of the Company (2019 – 119,758) at a market value of $48 million (2019 – $40 million).

Estimated future benefit payments

The estimated future DB pension and other benefit payments to be paid by the plans for each of the next five years and the subsequent five-year period are as follows:

(in millions of Canadian dollars)	Pensions	Other benefits
2021	$ 632	$ 33
2022	629	31
2023	631	31
2024	633	30
2025	635	30
2026-2030	3,203	142

The benefit payments from the Canadian registered and U.S. qualified DB pension plans are payable from their respective pension funds. Benefit payments from the supplemental pension plan and from the other benefits plans are payable directly from the Company.

Defined contribution plan

Canadian non-unionized employees hired prior to July 1, 2010 had the option to participate in the Canadian DC plan. All Canadian non-unionized employees hired after such date must participate in this plan. Employee contributions are based on a percentage of salary. The Company matches employee contributions to a maximum percentage each year.

Effective July 1, 2010, a new U.S. DC plan was established. All U.S. non-unionized employees hired after such date must participate in this plan. Employees do not contribute to the plan. The Company annually contributes a percentage of salary.

The DC plans provide a pension based on total employee, where appropriate, and employer contributions plus investment income earned on those contributions.

In 2020, the net cost of the DC plans, which generally equals the employer's required contribution, was $12 million (2019 – $11 million; 2018 – $10 million).

Contributions to multi-employer plans

Some of the Company's unionized employees in the U.S. are members of a U.S. national multi-employer benefit plan. Contributions made by the Company to this plan in 2020 in respect of post-retirement medical benefits were $3 million (2019 – $3 million; 2018 – $3 million).

23. Stock-based compensation

At December 31, 2020, the Company had several stock-based compensation plans including stock option plans, various cash-settled liability plans, and an employee share purchase plan. These plans resulted in an expense of $170 million in 2020 (2019 – $133 million; 2018 – $75 million).

A. Stock option plan

The following table summarizes the Company's stock option plan as at December 31, 2020:

	Options outstanding		Non-vested options	
	Number of options	Weighted-average exercise price	Number of options	Weighted-average grant date fair value
Outstanding, January 1, 2020	1,416,346	$ 199.12	761,784	$ 53.54
Granted	217,240	$ 344.04	217,240	$ 69.00
Exercised	(232,034)	$ 162.87	N/A	N/A
Vested	N/A	N/A	(188,108)	$ 50.91
Forfeited	(13,839)	$ 271.75	(13,839)	$ 58.29
Expired	(347)	$ 168.84	N/A	N/A
Outstanding, December 31, 2020	1,387,366	$ 225.20	777,077	$ 58.40
Vested or expected to vest at December 31, 2020[1]	1,366,649	$ 223.98	N/A	N/A
Exercisable, December 31, 2020	610,289	$ 177.65	N/A	N/A

[1] As at December 31, 2020, the weighted-average remaining term of vested or expected to vest options was 4.5 years with an aggregate intrinsic value of $297 million.

The following table provides the number of stock options outstanding and exercisable as at December 31, 2020 by range of exercise price and their related intrinsic aggregate value, and for options outstanding, the weighted-average years to expiration. The table also provides the aggregate intrinsic value for in-the-money stock options, which represents the amount that would have been received by option holders had they exercised their options on December 31, 2020 at the Company's closing stock price of $441.53.

	Options outstanding				Options exercisable		
Range of exercise prices	Number of options	Weighted-average years to expiration	Weighted-average exercise price	Aggregate intrinsic value (millions)	Number of options	Weighted-average exercise price	Aggregate intrinsic value (millions)
$65.06 - $188.78	342,773	3.4	$ 141.26	$ 103	342,773	$ 141.26	$ 103
$188.79 - $214.58	327,811	3.1	$ 196.82	$ 80	109,375	$ 203.83	$ 26
$214.59 - $261.88	394,953	4.4	$ 244.17	$ 78	134,845	$ 232.54	$ 28
$261.89 - $411.37	321,829	5.8	$ 320.21	$ 39	23,296	$ 272.56	$ 4
Total[1]	1,387,366	4.2	$ 225.20	$ 300	610,289	$ 177.65	$ 161

[1] As at December 31, 2020, the total number of in-the-money stock options outstanding was 1,387,366 with a weighted-average exercise price of $225.20. The weighted-average years to expiration of exercisable stock options is 3.6 years.

Pursuant to the employee plan, options may be exercised upon vesting, which is between 12 months and 48 months after the grant date, and will expire after seven years. Certain stock options granted in 2019 and 2018 vest upon the achievement of specific performance criteria. Under the fair value method, the fair value of the stock options at grant date was approximately $15 million for options issued in 2020 (2019 – $14 million; 2018 – $16 million). The weighted-average fair value assumptions were approximately:

	2020	2019	2018
Expected option life (years)[1]	**4.75**	5.00	5.00
Risk-free interest rate[2]	**1.28%**	2.22%	2.22%
Expected stock price volatility[3]	**23.14%**	25.04%	24.81%
Expected annual dividends per share[4]	**$ 3.3200**	$ 2.6191	$ 2.3854
Expected forfeiture rate[5]	**4.41%**	6.05%	4.70%
Weighted-average grant date fair value of options granted during the year	**$ 69.00**	$ 63.69	$ 55.63

[1] Represents the period of time that awards are expected to be outstanding. Historical data on exercise behaviour or, when available, specific expectations regarding future exercise behaviour were used to estimate the expected life of the option.

[2] Based on the implied yield available on zero-coupon government issues with an equivalent term commensurate with the expected term of the option.
[3] Based on the historical volatility of the Company's stock price over a period commensurate with the expected term of the option.
[4] Determined by the current annual dividend at the time of grant. The Company does not employ different dividend yields throughout the contractual term of the option. On July 21, 2020, the Company announced an increase in its quarterly dividend to $0.9500 per share, representing $3.8000 on an annual basis.
[5] The Company estimates forfeitures based on past experience. The rate is monitored on a periodic basis.

In 2020, the expense for stock options (regular and performance) was $16 million (2019 – $14 million; 2018 – $10 million). At December 31, 2020, there was $12 million of total unrecognized compensation related to stock options which is expected to be recognized over a weighted-average period of approximately 1.1 years.

The total fair value of shares vested for the stock option plan during 2020 was $10 million (2019 – $8 million; 2018 – $11 million).

The following table provides information related to all options exercised in the stock option plan during the years ended December 31:

(in millions of Canadian dollars)	2020	2019	2018
Total intrinsic value	**$ 52**	$ 63	$ 17
Cash received by the Company upon exercise of options	**52**	26	24

B. Other share-based plans

Performance share unit plans

During 2020, the Company issued 97,998 PSUs with a grant date fair value of approximately $34 million and 10,029 PDSUs with a grant date fair value, including value of expected future matching units, of approximately $4 million. PSUs and PDSUs attract dividend equivalents in the form of additional units, based on dividends paid on the Company's Common Shares, and vest approximately three years after the grant date contingent upon CP's performance ("performance factor"). The fair value of these PSUs and PDSUs is measured periodically until settlement using closing share price on the date of measurement. The fair value of units that are probable of vesting based on forecasted performance factors over the three-year performance period is recognized as expense in the Consolidated Statements of Income. Vested PSUs are settled in cash. Vested PDSUs are settled in cash pursuant to the DSU plan and are eligible for a 25% match if the holder has not exceeded their share ownership requirements, and are paid out only when the holder ceases their employment with CP.

The performance period for PSUs and PDSUs issued in 2020 is January 1, 2020 to December 31, 2022, and the performance factors are Return on Invested Capital ("ROIC"), Total Shareholder Return ("TSR") compared to the S&P/TSX 60 Index, and TSR compared to Class I railways.

The performance period for 133,681 PSUs issued in 2019 is January 1, 2019 to December 31, 2021, and the performance factors for these PSUs are ROIC, TSR compared to the S&P/TSX 60 Index, and TSR compared to Class I railways. The performance factors for the remaining 579 PSUs are annual revenue for the fiscal year 2020, diluted earnings per share for the fiscal year 2020, and share price appreciation.

The performance period for 125,280 PSUs issued in 2018 is January 1, 2018 to December 31, 2020, and the performance factors for these PSUs were ROIC, TSR compared to the S&P/TSX Capped Industrial Index, and TSR compared to the S&P 1500 Road and Rail Index. The resulting estimated payout on these awards was 200% on 113,769 total outstanding awards representing a total fair value of $98 million at December 31, 2020, calculated using the Company's average share price of the last 30 trading days preceding December 31, 2020. The performance factors for the remaining 36,975 PSUs were annual revenue for the fiscal year 2020, diluted earnings per share for the fiscal year 2020, and share price appreciation.

The performance period for PSUs issued in 2017 was January 1, 2017 to December 31, 2019, and the performance factors for these PSUs were ROIC, TSR compared to the S&P/TSX Capped Industrial Index, and TSR compared to the S&P 1500 Road and Rail Index. The resulting payout was 193% of the outstanding units multiplied by the Company's average share price calculated using the last 30 trading days preceding December 31, 2019. In the first quarter of 2020, payouts occurred on the total outstanding awards, including dividends reinvested, totalling $76 million on 121,225 outstanding awards.

The following table summarizes information related to the Company's PSUs and PDSUs as at December 31:

	2020	2019
Outstanding, January 1	**403,136**	395,048
Granted	**108,027**	134,260
Units, in lieu of dividends	**3,843**	4,032
Settled	**(121,225)**	(117,228)
Forfeited	**(11,912)**	(12,976)
Outstanding, December 31	**381,869**	403,136

In 2020, the expense for PSUs and PDSUs was $121 million (2019 – $89 million; 2018 – $54 million). At December 31, 2020, there was $51 million of total unrecognized compensation related to these awards which is expected to be recognized over a weighted-average period of approximately 1.4 years.

Deferred share unit plan

The Company established the DSU plan as a means to compensate and assist in attaining share ownership targets set for certain key employees and Directors. A DSU entitles the holder to receive, upon redemption, a cash payment equivalent to the Company's average share price using the 10 trading days prior to redemption. DSUs vest over various periods of up to 36 months and are only redeemable for a specified period after employment is terminated.

Senior managers may elect to receive DSUs in lieu of annual bonus cash payments in the bonus deferral program. In addition, senior managers will be granted a 25% company match of DSUs when deferring cash to DSUs to meet ownership targets. The election to receive eligible payments in DSUs is no longer available to a participant when the value of the participant's DSUs is sufficient to meet the Company's stock ownership guidelines. Senior managers have five years to meet their ownership targets.

The expense for DSUs is recognized over the vesting period for both the initial subscription price and the change in value between reporting periods.

The following table summarizes information related to the DSUs as at December 31:

	2020	2019
Outstanding, January 1	**161,219**	152,760
Granted	**19,041**	19,912
Units, in lieu of dividends	**1,511**	1,608
Settled	**(26,788)**	(12,110)
Forfeited	**(172)**	(951)
Outstanding, December 31	**154,811**	161,219

During 2020, the Company granted 19,041 DSUs with a grant date fair value of approximately $7 million. In 2020, the expense for DSUs was $21 million (2019 – $20 million expense; 2018 – $4 million expense). At December 31, 2020, there was $1 million of total unrecognized compensation related to DSUs which is expected to be recognized over a weighted-average period of approximately 1.3 years.

Summary of share-based liabilities paid

The following table summarizes the total share-based liabilities paid for each of the years ended December 31:

(in millions of Canadian dollars)	2020	2019	2018
Plan			
PSUs	**$ 76**	$ 54	$ 30
DSUs	**9**	4	6
Other	**1**	—	1
Total	**$ 86**	$ 58	$ 37

C. Employee share purchase plan

The Company has an employee share purchase plan whereby both employee and the Company contributions are used to purchase shares on the open market for employees. The Company's contributions are expensed over the one year vesting period. Under the plan, the Company matches $1 for every $3 contributed by employees up to a maximum employee contribution of 6% of annual salary.

The total number of shares purchased in 2020 on behalf of participants, including the Company's contributions, was 115,344 (2019 – 137,942; 2018 – 118,865). In 2020, the Company's contributions totalled $9 million (2019 – $8 million; 2018 – $6 million) and the related expense was $7 million (2019 – $6 million; 2018 – $5 million).

24. Variable interest entities

The Company leases equipment from certain trusts, which have been determined to be variable interest entities financed by a combination of debt and equity provided by unrelated third parties. The lease agreements, which are classified as operating leases, have fixed price purchase options which create the Company's variable interests and result in the trusts being considered variable interest entities.

Maintaining and operating the leased assets according to specific contractual obligations outlined in the terms of the lease agreements and industry standards is the Company's responsibility. The rigour of the contractual terms of the lease agreements and industry standards are such that the Company has limited discretion over the maintenance activities associated with these assets. As such, the Company concluded these terms do not provide the Company with the power to direct the activities of the variable interest entities in a way that has a significant impact on the entities' economic performance.

The financial exposure to the Company as a result of its involvement with the variable interest entities is equal to the fixed lease payments due to the trusts. In 2020, lease payments after tax were $14 million. Future minimum lease payments, before tax, of $126 million will be payable over the next 10 years. The Company does not guarantee the residual value of the assets to the lessor; however, it must deliver to the lessor the assets in good operating condition, subject to normal wear and tear, at the end of the lease term.

As the Company's actions and decisions do not significantly affect the variable interest entities' performance, and the Company's fixed price purchase option is not considered to be potentially significant to the variable interest entities, the Company is not considered to be the primary beneficiary, and does not consolidate these variable interest entities.

25. Commitments and contingencies

In the normal course of its operations, the Company becomes involved in various legal actions, including claims relating to injuries and damage to property. The Company maintains provisions it considers to be adequate for such actions. While the final outcome with respect to actions outstanding or pending at December 31, 2020 cannot be predicted with certainty, it is the opinion of management that their resolution will not have a material adverse effect on the Company's business, financial position, or results of operations. However, an unexpected adverse resolution of one or more of these legal actions could have a material adverse effect on the Company's business, financial position, results of operations, or liquidity in a particular quarter or fiscal year.

Commitments

At December 31, 2020, the Company had committed to total future capital expenditures amounting to $547 million and operating expenditures relating to supplier purchase obligations, such as bulk fuel purchase agreements, locomotive maintenance and overhaul agreements, as well as agreements to purchase other goods and services amounting to approximately $1.7 billion for the years 2021–2032, of which CP estimates approximately $1.6 billion will be incurred in the next five years.

Commitments related to leases, including minimum annual payments for the next five years and thereafter, are included in Note 19.

Legal proceedings related to Lac-Mégantic rail accident

On July 6, 2013, a train carrying petroleum crude oil operated by Montréal Maine and Atlantic Railway ("MMAR") or a subsidiary, Montréal Maine & Atlantic Canada Co. ("MMAC" and collectively the "MMA Group"), derailed in Lac-Mégantic, Québec. The derailment occurred on a section of railway owned and operated by the MMA Group and while the MMA Group exclusively controlled the train.

Following the derailment, MMAC sought court protection in Canada under the *Companies' Creditors Arrangement Act* and MMAR filed for bankruptcy in the U.S. Plans of arrangement were approved in both Canada and the U.S. (the "Plans"), providing for the distribution of approximately $440 million amongst those claiming derailment damages.

A number of legal proceedings, set out below, were commenced in Canada and the U.S. against CP and others:

(1) Québec's Minister of Sustainable Development, Environment, Wildlife and Parks ordered various parties, including CP, to remediate the derailment site (the "Cleanup Order") and served CP with a Notice of Claim for $95 million for those costs. CP appealed the Cleanup Order and contested the Notice

of Claim with the Administrative Tribunal of Québec. These proceedings are stayed pending determination of the Attorney General of Québec ("AGQ") action (paragraph 2 below).

(2) The AGQ sued CP in the Québec Superior Court claiming $409 million in damages, which was amended and reduced to $315 million (the "AGQ Action"). The AGQ Action alleges that: (i) CP was responsible for the petroleum crude oil from its point of origin until its delivery to Irving Oil Ltd.; and (ii) CP is vicariously liable for the acts and omissions of the MMA Group.

(3) A class action in the Québec Superior Court on behalf of persons and entities residing in, owning or leasing property in, operating a business in, or physically present in Lac-Mégantic at the time of the derailment was certified against CP on May 8, 2015 (the "Class Action"). Other defendants including MMAC and Mr. Thomas Harding ("Harding") were added to the Class Action on January 25, 2017. The Class Action seeks unquantified damages, including for wrongful death, personal injury, property damage, and economic loss.

(4) Eight subrogated insurers sued CP in the Québec Superior Court claiming approximately $16 million in damages, which was amended and reduced to approximately $15 million (the "Promutuel Action"), and two additional subrogated insurers sued CP claiming approximately $3 million in damages (the "Royal Action"). Both actions contain similar allegations as the AGQ Action. The actions do not identify the subrogated parties. As such, the extent of any overlap between the damages claimed in these actions and under the Plans is unclear. The Royal Action is stayed pending determination of the consolidated proceedings described below.

On December 11, 2017, the AGQ Action, the Class Action and the Promutuel Action were consolidated. These consolidated claims are currently scheduled for a joint liability trial commencing on or around September 13, 2021, followed by a damages trial, if necessary.

(5) Forty-eight plaintiffs (all individual claims joined in one action) sued CP, MMAC, and Harding in the Québec Superior Court claiming approximately $5 million in damages for economic loss and pain and suffering, and asserting similar allegations as in the Class Action and the AGQ Action. The majority of the plaintiffs opted-out of the Class Action and all but two are also plaintiffs in litigation against CP, described in paragraph 7 below. This action is stayed pending determination of the consolidated claims described above.

(6) The MMAR U.S. bankruptcy estate representative commenced an action against CP in November 2014 in the Maine Bankruptcy Court claiming that CP failed to abide by certain regulations and seeking approximately U.S. $30 million in damages for MMAR's loss in business value according to a recent report. This action asserts that CP knew or ought to have known that the shipper misclassified the petroleum crude oil and therefore should have refused to transport it.

(7) The class and mass tort action commenced against CP in June 2015 in Texas (on behalf of Lac-Mégantic residents and wrongful death representatives) and the wrongful death and personal injury actions commenced against CP in June 2015 in Illinois and Maine, were all transferred and consolidated in Federal District Court in Maine (the "Maine Actions"). The Maine Actions allege that CP negligently misclassified and improperly packaged the petroleum crude oil. On CP's motion, the Maine Actions were dismissed. The plaintiffs are appealing the dismissal decision, which is pending.

(8) The trustee for the wrongful death trust commenced Carmack Amendment claims against CP in North Dakota Federal Court, seeking to recover approximately U.S. $6 million for damaged rail cars and lost crude and reimbursement for the settlement paid by the consignor and the consignee under the Plans (alleged to be U.S. $110 million and U.S. $60 million, respectively). The Court issued an Order on August 6, 2020 granting and denying in parts the parties' summary judgment motions which has been reviewed and confirmed following motions by the parties for clarification and reconsideration. This action is scheduled for trial on September 21, 2021.

At this stage of the proceedings, any potential responsibility and the quantum of potential losses cannot be determined. Nevertheless, CP denies liability and is vigorously defending these proceedings.

26. Guarantees

In the normal course of operating the railway, the Company enters into contractual arrangements that involve providing certain guarantees, which extend over the term of the contracts. These guarantees include, but are not limited to:

- guarantees to pay other parties in the event of the occurrence of specified events, including damage to equipment, in relation to assets used in the operation of the railway through operating leases, rental agreements, easements, trackage, and interline agreements; and
- indemnifications of certain tax-related payments incurred by lessors and lenders.

The maximum amount that could be payable under these guarantees, excluding residual value guarantees, cannot be reasonably estimated due to the nature of certain of these guarantees. All or a portion of amounts paid under guarantees to other parties in the event of the occurrence of specified events could be recoverable from other parties or through insurance. The Company has accrued for all guarantees that it expects to pay. At December 31, 2020, these accruals amounted to $18 million (2019 – $10 million), and are recorded in "Accounts payable and accrued liabilities".

Indemnifications

Pursuant to a trust and custodial services agreement with the trustee of the Canadian Pacific Railway Company Pension Plan, the Company has undertaken to indemnify and save harmless the trustee, to the extent not paid by the fund, from any and all taxes, claims, liabilities, damages, costs, and expenses arising out of the performance of the trustee's obligations under the agreement, except as a result of misconduct by the trustee. The indemnity includes liabilities, costs, or expenses relating to any legal reporting or notification obligations of the trustee with respect to the defined benefit and defined contribution options of the pension plans, or otherwise with respect to the assets of the pension plans that are not part of the fund. The indemnity survives the termination or expiry of the agreement with respect to claims and liabilities arising prior to the termination or expiry. At December 31, 2020, the Company had not recorded a liability associated with this indemnification as it does not expect to make any payments pertaining to it.

27. Segmented and geographic information

Operating segment

The Company operates in only one operating segment: rail transportation. Operating results by geographic areas, railway corridors, or other lower-level components or units of operation are not reviewed by the Company's chief operating decision-maker to make decisions about the allocation of resources to, or the assessment of performance of, such geographic areas, corridors, components, or units of operation.

In the years ended December 31, 2020, 2019, and 2018, no one customer comprised more than 10% of total revenues and accounts receivable.

Geographic information

All of the company's revenue and long-lived assets excluding financial instruments are held within Canada and the United States.

(in millions of Canadian dollars)	Canada	United States	Total
2020			
Revenues	**$ 5,829**	**$ 1,881**	**$ 7,710**
Long-term assets excluding financial instruments and pension assets	**14,258**	**7,165**	**21,423**

[1] Earnings per share for the four quarters combined may not equal earnings per share for the year due to rounding.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of December 31, 2020, an evaluation was carried out under the supervision of and with the participation of CP's management, including CEO and CFO, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the *Exchange Act*. Based on that evaluation, the CEO and CFO concluded that these disclosure controls and procedures were effective as of December 31, 2020, to ensure that information required to be disclosed by the Company in reports that they file or submit under the *Exchange Act* is (i) recorded, processed, summarized and reported within the time periods specified by the SEC rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Management is responsible for the financial statements and for establishing and maintaining adequate internal control over financial reporting for the Company as defined in Rules 13a-15(f) and 15d-15(f) of the *Exchange Act*. The Corporation's internal control system was designed to provide reasonable assurance to the Corporation's management and Board of Directors regarding the preparation and fair presentation of published financial statements. Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of the Company's internal control over financial reporting in accordance with the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control – Integrated Framework (2013)*. Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2020. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to the reliability of financial reporting and preparation of financial statements in accordance with generally accepted accounting principles.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2020 has been audited by Deloitte LLP, the Company's independent registered public accounting firm who audited the Company's Consolidated Financial Statements included in this Form 10-K, as stated in their report, which is included herein.

Changes in Internal Control over Financial Reporting

During the three months ended December 31, 2020, the Company has not identified any changes in internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Canadian Pacific Railway Limited

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Canadian Pacific Railway Limited and subsidiaries (the "Company") as of December 31, 2020, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in Internal Control — Integrated Framework (2013) issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2020, of the Company and our report dated February 18, 2021, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors of Registrant

The information required by this Item will be contained in the Company's Form 10-K/A, which will be filed no later than 120 days after December 31, 2020. This information will also be contained in the management proxy circular that we prepare in accordance with applicable Canadian corporate and securities law requirements.

Executive Officers of Registrant

The information regarding executive officers is included in Part I of this annual report under Information about our Executive Officers, following Item 4. Mine Safety Disclosures.

Compliance with Section 16(a) of the Exchange Act

The information required by this Item will be contained in the Company's Form 10-K/A, which will be filed no later than 120 days after December 31, 2020.

Code of Ethics for Chief Executive Officer and Senior Financial Officers

The information required by this Item will be contained in the Company's Form 10-K/A, which will be filed no later than 120 days after December 31, 2020.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item will be contained in the Company's Form 10-K/A, which will be filed no later than 120 days after December 31, 2020. This information will also be contained in the management proxy circular that we prepare in accordance with applicable Canadian corporate and securities law requirements.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this Item will be contained in the Company's Form 10-K/A, which will be filed no later than 120 days after December 31, 2020.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item will be contained in the Company's Form 10-K/A, which will be filed no later than 120 days after December 31, 2020. This information will also be contained in the management proxy circular that we prepare in accordance with applicable Canadian corporate and securities law requirements.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item will be contained in the Company's Form 10-K/A, which will be filed no later than 120 days after December 31, 2020. This information will also be contained in the management proxy circular that we prepare in accordance with applicable Canadian corporate and securities law requirements.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULE

The following documents are filed as part of this annual report:

(a) Financial Statements

The financial statements filed as part of this filing are listed on the Index to Consolidated Financial Statements in Item 8. Financial Statements and Supplementary Data.

(b) Financial Statement Schedule

Schedule II – Valuation and Qualifying Accounts

(in millions of Canadian dollars)	Beginning balance at January 1	Additions charged to expenses	Payments and other reductions	Impact of FX	Ending balance at December 31
Accruals for personal injury and other claims provision[1]					
2018	$ 118	$ 93	$ (60)	$ 1	$ 152
2019	$ 152	$ 142	$ (152)	$ (1)	$ 141
2020	**$ 141**	**$ 105**	**$ (119)**	**$ (1)**	**$ 126**
Environmental liabilities					
2018	$ 78	$ 6	$ (7)	$ 5	$ 82

2020	**$ 77**	**$ 10**	**$ (6)**	**$ (1)**	**$ 80**

[1] Includes WCB, FELA, occupational, damage, and other.

(c) Exhibits

Exhibits are listed in the exhibit index below. The exhibits include management contracts, compensatory plans and arrangements required to be filed as exhibits to the Form 10-K by Item 601 (10) (iii) of Regulation S-K.

Exhibit	Description
3	***Articles of Incorporation and Bylaws:***
3.1	Restated Certificate and Articles of Incorporation of Canadian Pacific Railway Limited (incorporated by reference to Exhibit 99.2 to Canadian Pacific Railway Limited's Form 6-K filed with the Securities and Exchange Commission on October 22, 2015, File No. 001-01342).
3.2	By-law No. 1, as amended, of Canadian Pacific Railway Limited (incorporated by reference to Exhibit 1 to Canadian Pacific Railway Limited's Form 6-K filed with the Securities and Exchange Commission on May 22, 2009, File No. 001-01342).
3.3	By-law No. 2 of Canadian Pacific Railway Limited (incorporated by reference to Exhibit 99.1 to Canadian Pacific Railway Limited's Form 6-K filed with the Securities and Exchange Commission on March 13, 2015, File No. 001-01342).
3.4	General By-law, as amended, of Canadian Pacific Railway Company, a wholly owned subsidiary of Canadian Pacific Railway Limited (incorporated by reference to Exhibit 2 to Canadian Pacific Railway Limited's Form 6-K filed with the Securities and Exchange Commission on May 22, 2009, File No. 001-01342).
4	***Instruments Defining the Rights of Security Holders, Including Indentures:***
4.1	Indenture dated as of May 8, 2007 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.1 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.2	First Supplemental Indenture dated as of May 8, 2007 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.2 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.3	Second Supplemental Indenture dated as of May 20, 2008 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.3 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).

4.4	Third Supplemental Indenture dated as of May 15, 2009 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.4 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.5	Fourth Supplemental Indenture dated as of September 23, 2010 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.5 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.6	Fifth Supplemental Indenture dated as of December 1, 2011 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.6 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.7	Sixth Supplemental Indenture dated as of February 2, 2015 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.7 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.8	Seventh Supplemental Indenture dated as of August 3, 2015 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.8 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.9	Eighth Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.9 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.10	Indenture dated as of October 30, 2001 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.10 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.11	First Supplemental Indenture dated as of April 23, 2004 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.11 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.12	Second Supplemental Indenture dated as of October 12, 2011 between Canadian Pacific Railway Limited and The Bank of New York Mellon (incorporated by reference to Exhibit 4.12 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.13	Third Supplemental Indenture dated as of October 13, 2011 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.13 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.14	Fourth Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.14 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.15	Indenture dated as of July 15, 1991 between Canadian Pacific Railway Company and Harris Trust and Savings Bank (incorporated by reference to Exhibit 4.15 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.16	First Supplemental Indenture dated as of July 1, 1996 between Canadian Pacific Railway Company and Harris Trust and Savings Bank (incorporated by reference to Exhibit 4.16 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.17	Second Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and The Bank of New York Mellon (as successor in interest to Harris Trust and Savings Bank) (incorporated by reference to Exhibit 4.17 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.18	Indenture dated as of May 23, 2008 between Canadian Pacific Railway Company and Computershare Trust Company of Canada (incorporated by reference to Exhibit 4.18 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.19	First Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and Computershare Trust Company of Canada (incorporated by reference to Exhibit 4.19 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.20	Indenture dated as of September 11, 2015, from Canadian Pacific Railway Company to Wells Fargo Bank, National Association, as Trustee (incorporated by reference to Exhibit 99.1 to Canadian Pacific Railway Limited's Registration Statement on Form 6-K filed with the Securities and Exchange Commission on September 14, 2015, File No. 001-01342).
4.21	First Supplemental Indenture dated as of September 11, 2015 between Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.21 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.22	Second Supplemental Indenture dated as of November 24, 2015 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and The Bank of New York Mellon (incorporated by reference to Exhibit 4.22 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).

4.23	Guarantee of Canadian Pacific Railway Company's Perpetual 4% Consolidated Debenture Stock dated as of December 18, 2015, between Canadian Pacific Railway Limited and Canadian Pacific Railway Company (incorporated by reference to Exhibit 4.23 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 29, 2016, File No. 001-01342).
4.24	Third Supplemental Indenture dated as of May 16, 2018 among Canadian Pacific Railway Limited, Canadian Pacific Railway Company and Wells Fargo Bank (incorporated by reference to Exhibit 4.2 to Canadian Pacific Railway Limited's Current Report on Form 8-K filed with the Securities and Exchange Commission on May 16, 2018, File No. 001-01342).
4.25	Officers' Certificate of Canadian Pacific Railway Company dated March 13, 2019 (incorporated by reference to Exhibit 4.1 to Canadian Pacific Railway Limited's Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission on April 24, 2019, File No. 001-01342).
4.26	Description of Securities – Equity Securities (incorporated by reference to Exhibit 4.26 to Canadian Pacific Railway Limited's Form 10-K filed with the Securities and Exchange Commission on February 20, 2020, File No. 001-01342).
4.27	Form of 2.050% Note due 2030 (incorporated by reference to Exhibit 4.1 to Canadian Pacific Railway Limited's Current Report on Form 8-K filed with the Securities and Exchange Commission on March 6, 2020, File No. 001-01342).
4.28	Fourth Supplemental Indenture, dated as of March 5, 2020, by and among Canadian Pacific Railway Company, as issuer, Canadian Pacific Railway Limited, as guarantor, and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.2 to Canadian Pacific Railway Limited's Current Report on Form 8-K filed with the Securities and Exchange Commission on March 6, 2020, File No. 001-01342).

SERVICE EXCELLENCE

Service to us is not a job description. It is a duty – and one our 13,000-strong CP family of railroaders is passionate about.

We are committed to serving the North American economy and global community. When we meet this commitment, our stakeholders benefit including our customers, shareholders and each other.

Since 2012, we've redefined what best service and operational excellence mean. No matter what the challenge, we have performed. In 2019 alone, we overcame challenges posed by both markets and Mother Nature.

Precision scheduled railroading is the engine for our success. Our CP family is united by a single purpose and culture. A railroading mindset founded on providing service, controlling costs, optimizing assets, operating safely and developing people – all rooted in our values of accountability, diversity and pride.

Our iconic company was founded on uniting a country. Today, we are creating service solutions and capacity to allow our customers to compete and grow sustainably – for the benefit of everyone.

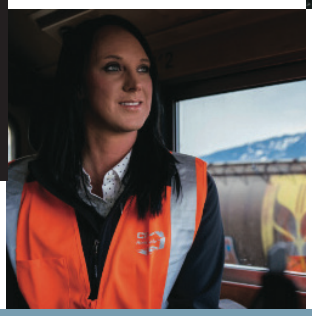
[1] This measure has no standardized meaning prescribed by accounting principles generally accepted in the United States ("GAAP") and, therefore, may not be comparable to similar measures presented by other companies. This measure is defined and reconciled in Non-GAAP Measures in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K.

59.9% OPERATING RATIO COMPANY RECORD

BUSINESS MIX % of 2019 Freight Revenue

14th STRAIGHT YEAR INDUSTRY LEADER IN SAFETY

1.06: FEDERAL RAILROAD ADMINISTRATION REPORTABLE TRAIN ACCIDENT FREQUENCY (PER MILLION TRAIN-MILES)

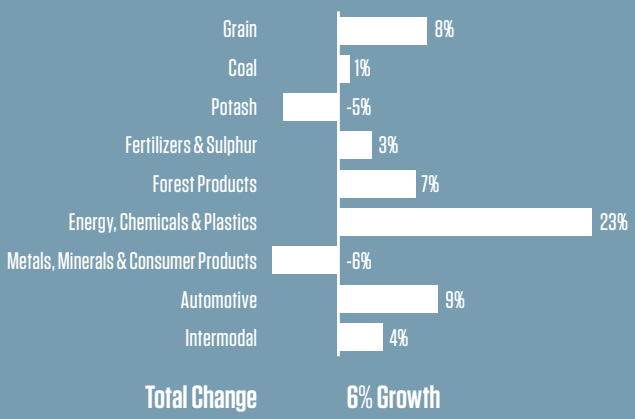


BUILT TO DRIVE GROWTH

RECORD REVENUE OF $7.8B

We continue to work with customers to leverage our network strengths and service.

We are hardwired for ongoing improvement so that customers can grow their business and we can grow ours. Our team is unlocking capacity, creating new opportunities for customers, growing volumes, improving margins and winning new business.



Quicker cycle times and reduced dwell times have created better asset utilization. Longer, heavier trains have increased network throughput capacity. Combined, our operating model significantly reduces costs for CP and our customers while providing reliable service.

The strong performance across our franchise this past year is a reflection of the resiliency of our model, the talent of our operating team and the discipline in our marketing strategy. Precision scheduled railroading is fully embedded in our DNA.

We have a compelling value proposition – one that's not easily replicated in our industry and uniquely positions us for profitable, sustainable growth.

MORE GRAIN PER TRAIN

HIGH CAPACITY

A CP HEP train services Paterson's grain elevator in Bowden, Alta.

THE FUTURE OF GRAIN TRANSPORTATION

TODAY:

LOW-CAPACITY HOPPERS
7,000-FOOT TRAIN
10,400 TONNES OF
WHEAT PER TRAIN

15% MORE GRAIN PER TRAIN

NEW HOPPERS:

HIGH-CAPACITY HOPPERS
7,000-FOOT TRAIN
12,000 TONNES OF
WHEAT PER TRAIN

25% MORE GRAIN PER TRAIN

FUTURE:

HIGH-CAPACITY HOPPERS
8,500-FOOT TRAIN
15,000 TONNES OF
WHEAT PER TRAIN

>40%
MORE GRAIN PER TRAIN

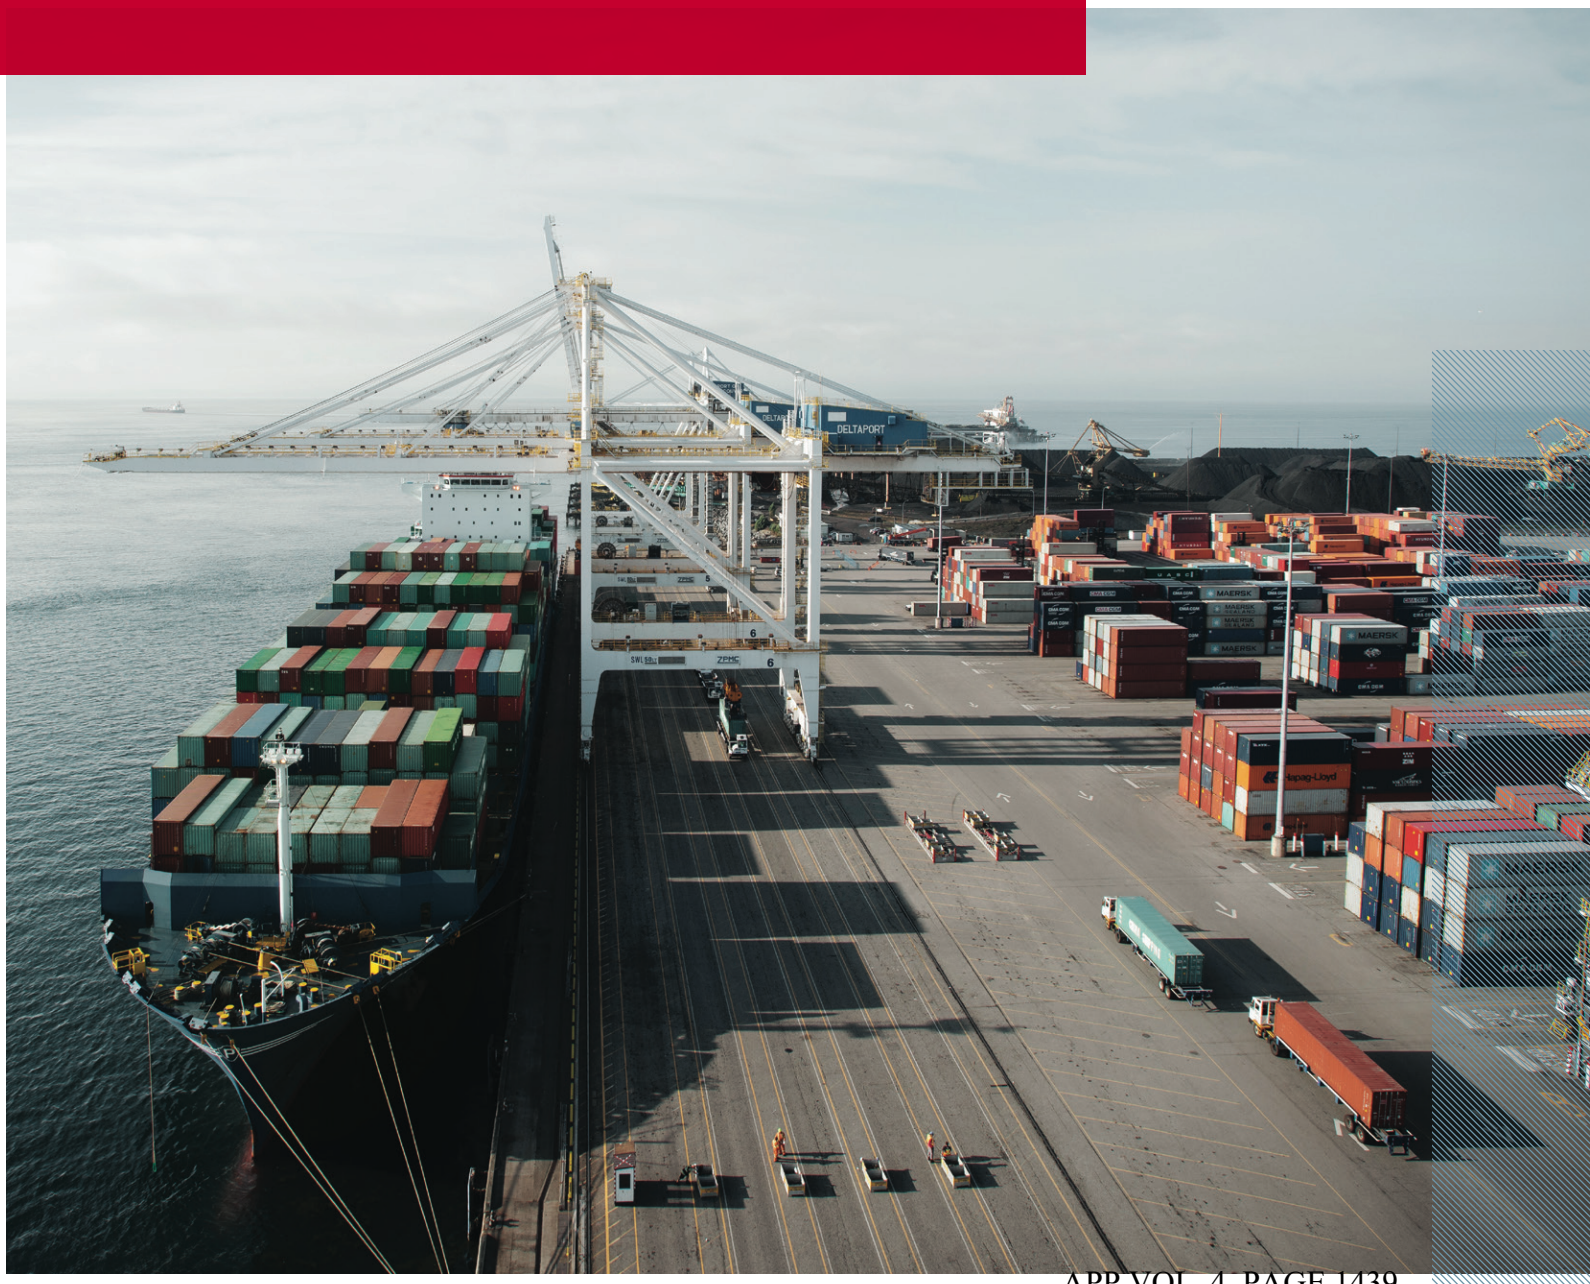
CP is driving unparalleled efficiencies in our grain supply chain.

Investments into our 8,500-foot-long train model and high-capacity covered hopper cars provide our customers with a superior grain service offering.

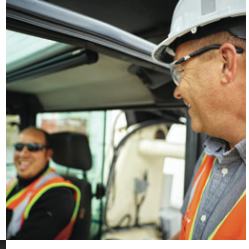
By working with grain companies and port operators, our specialized train model allows for the entire supply chain – from harvest to vessel loading – to be optimized.

The 8,500-foot High Efficiency Product (HEP) model loads grain trains within 16 hours clear of CP main track and can carry >40 percent more grain per train at maximum capacity. With a minimum 134 cars per train, the new model delivers at least 20 percent more grain than traditional 112-car grain trains. CP's power-on model keeps the entire train intact for faster loading and departure. The combination of loading time and power-on provides efficiencies for both our asset utilization and grain shippers.

In 2018, we announced a $500 million investment in new high-capacity hopper cars. The covered hoppers replace aging assets in the grain fleet. The new hoppers carry more volume, are faster at loading and unloading and are more reliable. There will be 5,900 new covered hoppers online in the coming years, driving substantial benefits for CP, customers, farmers and other supply chain members.



By combining the new high-capacity covered hoppers with our 8,500-foot HEP model, CP will be able to move >40 percent more grain per train and drive total train weight up to 15,000 tonnes.



CP launched its first 8,500-foot HEP train, comprised of new high capacity hoppers cars, at the G3 Pasqua facility in Saskatchewan in December 2018. Customers are building new high-throughput elevators and expanding existing ones to accommodate the 8,500-foot model. During the 2018-2019 crop year, we moved more Canadian grain and grain products than any year in our history. CP will continue to work with stakeholders to build the most efficient and reliable grain supply chains in North America.

LEVERAGING CAPACITY FOR CUSTOMERS

CP is providing premium service solutions at low incremental cost.

As a result of operating improvements made with precision scheduled railroading, we have not only freed up rail capacity, but also land. Our land holdings in Vancouver, Toronto and Montréal have provided CP with a unique opportunity to bring on additional long-term, sustainable business.

CP embraces each and every opportunity and thrives on building long-term relationships with customers who are looking for sustainable mutual benefits. The alignment of our operations, finance and network teams allows us to identify key routes and land capacity to create service solutions.

Our Vancouver transload facility in Port Coquitlam is generating growth opportunities for our international intermodal customers by providing multi-commodity transloading services. Our rail-served transload facility quickly delivers product to the terminal. With its close proximity to our Vancouver intermodal facility, we can deliver containers to the port by rail. This creates a more cost-effective supply chain solution and reduces highway congestion by replacing hundreds of trucks typically destined for city streets.

We are building a transload facility in Montréal to bring additional cargo traffic to the railway in a market that is underserved. Strategically located, this new multi-commodity transload terminal will offer transportation and distribution services from CP's Montréal yard. The transload terminal will offer reliable multi-commodity transload services and logistics solutions to customers in key urban centres along the East Coast, further extending CP's reach to markets not directly served by rail. The first phase of construction – a 118,000 square foot rail-served facility – is scheduled to be completed in June 2020.

Annacis Island near Vancouver – one of the automotive industry's key North American hubs – receives inbound import vehicles from Asian markets and is also the main destination terminal for cars made in North America. This past year, CP converted 19 acres of land we owned in Vancouver to create a new automotive compound in close proximity to Annacis Island and signed on a new long-term anchor customer. Our new automotive compound provides a point of relief to a deeply congested automotive market in Vancouver.

CP has also deployed a new yard logistics system that automates yard processes and supports real-time inventory reporting to give customers better visibility of their shipments. It also strengthens our damage prevention processes by enabling immediate uploading of inspection images. This new system was introduced in Vancouver and is being rolled out to all CP automotive compounds.

As a result of our service, CP recently won awards from Toyota USA, Toyota Canada and American Honda. We have been recognized in the categories of logistics quality, on-time performance, damage-free service and overall customer service.

Port expansions at GCT Deltaport and Centerm have provided CP with additional room to grow and added incremental long-term volumes to the intermodal book of business. 2019 is the first full year of operations at our new Shoreham container facility. Located adjacent to CP's Minneapolis intermodal yard, the facility handles the loading of agriculture products into export containers destined for overseas markets. Our key positioning as a unique intermodal service provider equips our customers with cutting-edge solutions.

Our service extends across continents and we continue to earn traction with international customers. As of January 1, 2020, CP began serving all of Yang Ming's Vancouver volume on our railroad. In January 2019, we announced the renewal of our contract with Hapag-Lloyd, another validation of our quality service, reliability and trust with this customer.

CP was named Best Logistics Service Provider – Rail at the Asian Freight Logistics and Supply Chain Awards this past year. The customer-nominated award recognizes CP's leadership in service quality, innovation, customer-relationship management and reliability. CP was the only North American railroad nominated.

Our combination of service excellence, unique terminal capacity and land available for low-cost expansion gives CP an extremely powerful value proposition in the marketplace.

Our focus is to the right of the decimal point.

Precision scheduled railroading demands measurement and a commitment to continuous improvement. It is an operating model that embraces technology as a tool to strengthen service, safety and performance.

Data and connectivity are as powerful as a locomotive. Our information technology team has built a new integrated platform that has exponentially increased the volume of data available to us. We are informed in real-time and act as needed – even before issues arise.

PREDICTIVE ANALYTICS

In our industry, we are at the forefront of predictive analytics – anticipating issues with locomotives, railcars and track infrastructure and taking preventative measures before an incident occurs. Through a wide variety of wayside and rolling stock sensors, strategically located on our network, we process a massive amount of data into in-memory data management technology with unparalleled analytical capabilities. For example, the temperature of wheel bearings can sometimes exceed heat tolerances, causing the bearing to fail. Previously, CP could expect to suffer around 60 service failures per month as a result of hot bearings. CP's acoustic detector system now predicts, up to three months in advance, when a bearing is going to fail. Our patented detection process has resulted in a 95 percent reduction in bearing failures during scheduled service, keeping our trains moving safely across our network.

WHEEL TECHNOLOGIES

Our wheel impact load detectors, located on the rails, more precisely measure and produce alerts for overweight or severely imbalanced railcars. Tariffs are administered back to customers who overload cars to incentivize safe practices. There has been a significant reduction in the number of tariffs since our improved reporting, underlying how technology can educate customers and improve safety. CP can now also forecast individual freight car wheel life and be more proactive to avoid service interruptions. We are also expanding our cold wheel technology to evaluate air brakes on descending grades using wheel temperatures. This test, developed by CP, goes beyond current regulated testing procedures.

AUTONOMOUS TRACK GEOMETRY MEASUREMENT SYSTEM (ATGMS)

ATGMS vehicles ensure our track meets geometry design standards. This is critical to the safe movement of trains as deviations in track geometry from standards can result in derailments and other safety critical incidents. In 2019, CP added a second ATGMS, enabling increased inspection frequency in an effort to improve overall safety and decrease risk. This increase in inspection frequency also enables CP to inspect track above regulatory standards and provides additional data that feeds into predictive analytics for forecasting track health.

TRACK INSPECTION

We have technology mounted on locomotives to identify possible track defects by measuring vertical and horizontal acceleration and identifying unusual movements. Vehicle track interaction units now analyze more than 600,000 miles of data annually on our network. All of our track data from new or existing inspection applications is fed into our Track Asset Management platform to provide a consolidated view of track health, allowing CP to leverage big data.

TRAIN VISION SYSTEM

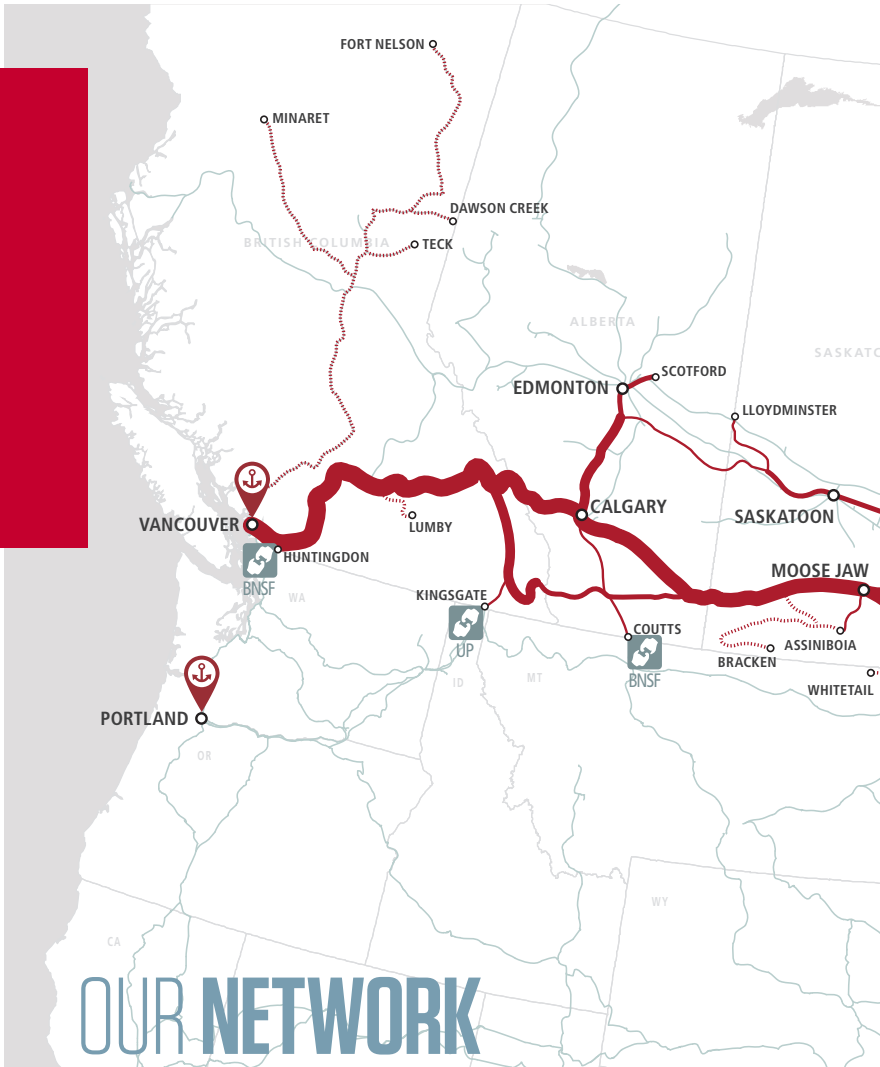
We have a high-speed, camera-based train inspection system capable of producing full body high-resolution images of trains at mainline track speed. The system uses multiple algorithms to assist in identifying defective car components.

Undercarriage imaging is a system that uses cameras to inspect the underside of all passing railcars and locomotives enabling CP to identify missing bolts, bent or broken brake rigging, open bottom gates, broken coupler systems and draft arrangements.

STRENGTHENING SAFETY, IMPROVING PERFORMANCE

TRAIN VISION SYSTEM

Our technology includes cameras that provide full-body high-resolution images of passing trains. Cameras capture images from above (1) and at sides (2), and with undercarriage imaging (3) and truckview wayside automated inspection (4).



BIGGER FOOTPRINT

Service wins business, capacity allows it to grow.

Increased efficiencies, extended sidings, surplus land and innovation have together created new service offerings and highly desired capacity. In 2019, we further strengthened our network with the acquisition of Central Maine and Québec Railway (CMQ). CMQ owns rail lines primarily in Québec and Maine, stretching approximately 481 miles. This acquisition provides CP with strategic access into Northeastern U.S. and Atlantic Canada. CP customers now have seamless, safe and efficient access to ports at Searsport, Maine, and to Saint John, N.B., via Eastern Maine Railway Company and New Brunswick Southern Railway.

CP has the shortest and fastest routes in key lanes across Canada and the U.S. Our flagship transcontinental service provides the fastest and most consistent service between Eastern Canada, Calgary and Vancouver.

Our reach extends past the mainline. We have connections with other railways; a network of more than 100 transload facilities across Canada and the U.S. to extend our reach to markets not directly served by rail; and links with ports on both the west and east coasts. All of these components are enabling us to drive sustainable, profitable growth.

OUR NETWORK

(1) CP's acquisition of CMQ U.S. is subject to review and approval by the U.S. Surface Transportation Board ("STB"). Shares of CMQ U.S. are presently held in an independent voting trust for the benefit of CP.

(2) GTMs averaged between specific route locations.

ABOVE AND BEYOND

Our strength is shown not only in our financial statements, but where the ballast meets the rail.

Service excellence takes resolve. We have a responsibility to ensure the safety and continued operation of our railway for the benefit of our customers and the broader economy.

Our high-performance railroading culture has proven resilient when faced with extraordinary challenges to provide service to our customers.

When the levees failed and the Mississippi River flooded southeastern Iowa and northwestern Illinois last spring, our team of railroaders crossed water and moved earth to maintain service.

A bridge that would typically take a year and a half to replace was re-opened by our team in less than two weeks.

When the waters rose, we lifted our rail.

The failure of a levee in Davenport, Iowa, left much of its downtown flooded. Our network shadows the Mississippi for 360 miles from St. Paul, Minn., to Muscatine, Iowa. The flat plain that unfolds from the river's west bank provides a low-grade route for operating trains, but it also imposes the risk of floods.

Our operating team laboured in challenging conditions and for long hours to keep CP's routes in operation for customers. They replaced a major rail bridge in record time, lifted and tamped track that was already under water and poured rock to protect the right-of-way from rushing water.

Our rail corridor remained open on days when, in the past, it would have closed. When closure could not be avoided, trains were rerouted to keep our promise to customers.

Our resiliency is a testament to the strength of our CP family of railroaders and commitment to service.

HONOURING THOSE WHO PROVIDE THE GREATEST SERVICE

CP continues to be an employer of choice for transitioning veterans by working closely with the Canadian and U.S. militaries to provide meaningful employment opportunities for veterans upon their completion of service.

We remain dedicated in our outreach programs and to our internal programs focused on career development initiatives for our veterans. CP aims to support the veterans of today and tomorrow.

Within CP, we have created numerous programs to support our veterans. Our five targeted military management trainee programs are designed for individuals who are interested in transitioning from the military into front-line management positions within various operations teams. CP recognizes veterans as having highly transferable skills due to their diverse training, leadership skills and experience working in adverse weather environments.

In October 2019, CP joined Homes for Heroes Foundation and other stakeholders for the grand opening of the ATCO Veterans Village in Calgary, a community of small homes aimed at getting homeless veterans off the street. Through our annual Spin for a Veteran event, CP has helped raise more than $800,000 for the cause since 2017.

On Remembrance Day in Canada and Veterans Day in the U.S., CP unveiled five specially painted locomotives honouring the service and history of the armed forces.

For our continued efforts into the development and recruitment of veterans, CP was awarded a Gold Top 10 Military Friendly Employer designation by VIQTORY Media in 2019.

INDIGENOUS COMMUNITIES

CP respects the history and diversity of Indigenous peoples in Canada and the U.S. More than 1,400 employees have participated in classroom-based Indigenous awareness training since the program began in mid-2018. CP is a Patron Member of the Canadian Council for Aboriginal Business and a Committed Member of the Council's Progressive Aboriginal Relations program.

CP HAS HEART

CP Has Heart funds programs that support heart health initiatives. As of 2019, we've raised more than $20.5 million to help improve the heart health of men, women and children across North America.

BOARD DIVERSITY

In May 2019, Isabelle Courville became the first woman to chair the Board of Directors at CP or any Class 1 railroad in North America. Women currently represent 45 percent of our board's membership.

CP HOLIDAY TRAIN

In 2019, more than $1.5 million was raised and 247,000 pounds of food were collected for local food banks and food shelves, supporting more than 170 communities along CP routes. Since its inaugural journey in 1999, the Holiday Train has raised more than $17.6 million and collected 4.8 million pounds of food.

CP FAMILY VALUES

Our culture is strong because it is founded on a simple and shared purpose.

We are an operating company with a team of dedicated, professional, community-minded railroaders, providing superior service for our customers by doing what we say we are going to do.

The values that underpin this service excellence are also clearly spelled out. Three words that shape our CP family; three words that are on the wall of every building in our franchise.

ACCOUNTABILITY. DIVERSITY. PRIDE.

These values drive our actions, foster respect and inspire our journey towards excellence.

- **Accountability:** Service means doing what we said we would do. We challenge the status quo, strive for excellence and take responsibility for our actions. We are results oriented, but will never sacrifice safety.
- **Diversity:** Our different backgrounds, experiences and perspectives lead to innovation and creativity. We encourage inclusive collaboration and open-mindedness.
- **Pride:** Celebrating our iconic history, we are grateful for our CP family past, present and future. We are passionate and tenacious railroaders delivering world-class service.

These living values are not only demonstrated in our financial and operating results, but in our respect for one another and the environment, including our commitment to sustainability.

In 2019, we released *Sustainably Driven*, our new corporate sustainability report and framework for sustainability reporting, highlighting CP's successes and achievements in the areas of safety, operational excellence and social impact.

Developed based on a comprehensive stakeholder materiality assessment conducted by CP in 2018, *Sustainably Driven* articulates our commitment to aligning all aspects of our business with clear sustainability goals and objectives.

As part of this transformational journey, we will continue to actively manage the carbon footprint associated with our operations and govern our business in a transparent, ethical and accountable manner, to the benefit of all our stakeholders.

Read more about our sustainability commitments and performance at **sustainability.cpr.ca**

DRIVING SERVICE EXCELLENCE FOR SHAREHOLDERS, CUSTOMERS AND EACH OTHER

Year in, year out, we are proving there is no limit to what our 13,000-strong CP family can achieve.

Since 2012, we have invested heavily in developing people passionate about railroading, driven to achieve and proud of delivering as promised. There is no app for excellence in our industry. To move the needle in this business it takes hard work, intestinal fortitude and people hardwired to believe the status quo is never good enough.

As outlined in our purpose statement, "We are an operating company with a team of dedicated, professional, community-minded railroaders, providing superior service for our customers by doing what we say we are going to do." In doing this, we are led by our values of accountability, diversity and pride.

With a culture of accountability and a drive for excellence, CP is an industry leader with a challenger mindset.

CP's potential is human potential. What's truly exciting is that our CP family has only scratched the surface of what's possible.

We have the best railroaders in the industry and remain focused on achieving even more in 2020.

SERVING EACH OTHER

Our people drive CP's growth and performance.

Through our collective efforts in 2019, we delivered record revenues of $7.8 billion while producing an all-time CP record-low operating ratio of 59.9 percent. We generated 29 percent earnings per share growth and 13 percent adjusted earnings per share[(1)] growth – the third consecutive year we've achieved double-digit adjusted earnings improvement.

This year's strong results are proof of our team's skill and ability, and demonstrate our commitment to find further efficiency opportunities in the future. In 2019, we achieved a number of year-over-year improvements as well as record performance in terminal dwell time, car miles per day and locomotive productivity.

Our record low operating ratio is the outcome of running the business the right way: ensuring safety while tightly managing resources and practicing discipline on pricing, regardless of market demand. Our marketing, sales, operating and financial teams work closely together to adjust resources in real-time to adapt to changing volume environments. We do not ramp up or down unnecessarily. This is not just about operating margins and safety. It is also about our people. When we welcome new employees, we want them to build lasting careers here and create legacies for their own families.

There is no greater example of our CP family working together to achieve operational strength than when our team of railroaders came together for a series of months to protect our railway, as well as our customers' freight, from historic flooding along the Mississippi River. These flooding events required around-the-clock resourcing of both our people and equipment in order to ensure the safety of our tracks and overall operations, while delivering for our customers. Our response was nothing short of remarkable. It is the grit and tenacity of our people that enables our success in the face of adversity.

Safety is a foundational principle of precision scheduled railroading and core to our CP family. We cannot have success if we do not operate safely. This year, we continued to make improvements in lowering personal injury rates to record levels at CP. For the 14th straight year, we remained the safest Class 1 railroad in North America, based on Federal Railroad Administration-reportable train accident frequency. However, we must continue to drive improvements and learn from past events.

On February 4, 2019, we lost railroaders Dylan Paradis, Daniel Waldenberger-Bulmer and Andrew Dockrell in a tragic incident near Field, B.C. The sense of loss is still palpable across the company and not a day goes by that these men are not on our minds. In December, we also lost Kirk McLean, who was fatally injured at our Port Coquitlam, B.C. railyard. We remain

(1) These measures have no standardized meanings prescribed by accounting principles generally accepted in the United States (GAAP) and, therefore, may not be comparable to similar measures presented by other companies. These measures are defined and reconciled in Non-GAAP Measures in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K.

steadfast in our ongoing commitment to strengthen safety to honor their memory and ensure every member of our team gets home safely, every day.

Profitable, sustainable growth remains our focus.

To be truly sustainable, our culture has to be bigger than any one person – this is the true legacy of our transformation. Developing our people remains a priority and we are investing in people and growing the leaders of tomorrow from within. We continue to offer our employees workshops and programs to grow their skills as leaders, and are seeing the benefits. Our company culture must be one where we value feedback from all levels, in turn establishing an even deeper bench of leaders. As we grow the skills and the abilities of our CP family, we unlock potential in this company we cannot even see today.

As well, I continue to focus on employee outreach and engagement, participating in town halls across our network. The pride people have in working for this company is beyond measure, and unlike anything I have seen in my career. To collectively create this ongoing success is something I am truly honored to be a part of.

SERVING OUR CUSTOMERS

We are leveraging our strengths to grow with our existing customers and bring on new business. We remain disciplined in planning and execution. Profitable, sustainable growth is not a catchphrase. These are words we live by, every day, that determine all decisions.

In 2019, we saw varying levels of year-over-year strength in our lines of business. In particular, we realized gains in intermodal, automotive, forest products, and energy, chemicals and plastics.

CP is driving unparalleled efficiencies in our grain supply chain that delivers incremental margin improvements for our franchise. Investments into our 8,500-foot-long train model and high-capacity covered hopper cars provide our customers with a superior grain service offering. By combining the new hoppers with our 8,500-foot High-Efficiency Product (HEP) model, CP is able to move more than 40 percent more grain per train. Currently, 15 percent of the high-throughput elevators that CP services are handling these longer, high-efficiency trains. By the end of 2020, it is expected that more than a quarter of CP-served train-loading facilities will be HEP-qualified.

Faster cycle times, extended sidings, closed hump yards and repurposed land and infrastructure have all created significant capacity for growth on our existing network. However, we have a much larger playing field to compete on. We have nearly 2,000 acres of opportunity to expand our services and create new solutions for our customers to win in the marketplace.

We have also grown our mainline footprint. In 2019, we announced the acquisition of Central Maine and Québec Railway (CMQ). The acquisition gives us strategic access to East Coast ports at Searsport, Maine, and to Saint John, N.B., via Eastern Maine Railway Company and New Brunswick Southern Railway. CMQ creates opportunities for us to grow, including in forest products, chemicals and automotive. As a result, we now have access to a lane that is approximately 200 miles shorter than the competition, getting CP customers from the East Coast into Montréal and Toronto faster.

SERVING OUR SHAREHOLDERS

Our industry-leading financial performance has been driven by stronger margins and top-line growth. This has provided us with an enviable free cash[(1)] position, supporting prudent capital investment and return of capital to shareholders through a growing dividend and substantial share buybacks. Sustainable, profitable growth takes discipline – not only through the operating model but in managing our balance sheet.

Throughout our transformation, sound capital decisions have built a strong, safe and efficient network that will support our growth and provide value for our investors for years to come. We continue to make capital investments to run the business more productively, reliably, and safely, while also enabling future growth. As in 2018, this past year we invested a record-matching $1.65 billion and as our business continues to grow in 2020, we plan to continue investing at similar levels.

Strong free cash[(1)], combined with our disciplined approach to capital deployment, has enabled us to continue to return cash to shareholders. In 2019, we increased our dividend by 28 percent and repurchased over 3.8 million shares. Over the last six years, we have increased the dividend by

CP EXECUTIVE TEAM
May 2019

137 percent and repurchased approximately 30 percent of our public float, equating to nearly $10.5 billion in cash returned to shareholders.

Importantly, I would like to congratulate Isabelle Courville on becoming Chair of the Board this year and making history as the first woman to hold that position, not only for CP but across all Class 1 railroads in North America. As an organization whose values hinge on pride and diversity, I am extremely proud to serve on this diverse board with these distinguished business leaders. I also want to thank Andrew Reardon for his tireless service, dedication and outstanding leadership over the last four years as Chair of the Board.

THE FUTURE

Profitable, sustainable growth remains our focus. Our 13,000-strong team has only just started to unlock their true potential. At the start of our journey in 2012, many downplayed the stronger margins we created from precision scheduled railroading as "growing by shrinking." When we right-sized our assets and made strategic investments to improve our service and safety and pivoted to topline growth, some questioned our discipline. When faced with tougher economic challenges and competition for customers, some questioned our model. This past year, we proved them wrong. Again.

Our peers are taking note. Precision scheduled railroading is now becoming the standard operating model for North American Class 1 railroads. This will strengthen fluidity and create capacity to do more.

We're building this railroad for the long term. As detailed in our most recent sustainability report, transportation of freight by rail is a key component of the transition to a low-carbon economy in North America. Rail has an inherent emissions advantage over other forms of transportation, specifically, trucks. Transportation by rail is four times more fuel-efficient and produces 75 percent less greenhouse gas emissions than transportation by trucks. Notably, a single unit train keeps more than 300 trucks off public roads. We will continue to leverage these characteristic strengths, look for opportunities to improve our own carbon intensity, and remain a leader when it comes to safety, workforce management and corporate governance practices.

Our franchise has its own unique strengths. We are blessed with capacity and the best operating team in the industry. As we head into 2020 and beyond, we will continue to work with customers to leverage our network and service strengths and grow sustainably, together.

I am proud and honored to continue to lead this iconic company on its journey.

Sincerely,

KEITH CREEL
President and Chief Executive Officer

(1) These measures have no standardized meanings prescribed by accounting principles generally accepted in the United States (GAAP) and, therefore, may not be comparable to similar measures presented by other companies. These measures are defined and reconciled in Non-GAAP Measures in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K.

LETTER FROM THE CHAIR

In 2019, CP continued to execute the precision scheduled railroading model, producing record results in the process.

CP also continued to focus on sustainable growth with emphasis on the environment, creating a positive social impact and on good governance.

ENVIRONMENTAL

For over a century, CP has been delivering safe and efficient solutions for its customers. With increasing demand for consumer goods, rail can move these products more efficiently, and with 75 percent less greenhouse gas emissions, than trucks.

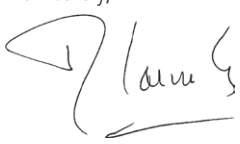
In the last five years, we've cut our locomotive greenhouse gas emissions intensity by nearly 5 percent and since 1990, locomotive fuel efficiency has improved by more than 40 percent. But there is still more to do. We continue to support investment in new equipment and new technologies that not only make us safer and more efficient, but also reduce our carbon footprint.

SOCIAL

In January 2019, CP introduced its values: accountability, diversity and pride. The significance that the team places on accountability manifested itself across the network this year as terminals and yards achieved new records for safety in the workplace. CP was the safest Class 1 railway for the 14th consecutive year, based on Federal Railroad Administration-reportable train accident frequency – an extraordinary accomplishment.

CP's enhanced military recruitment initiatives, professional association partnerships for the advancement of women in railroading, and Indigenous education and engagement programs for employees are only a few of the many ways CP demonstrated its commitment to diversity. The Board of Directors recently adopted a diversity policy, while the company has adopted its own diversity and inclusion policy.

Pride was on display this past year with the 21st edition of the CP Holiday Train. Since 1999, the train has helped raise $17.6 million and collected 4.8 million pounds for food banks in the communities in which CP operates.



GOVERNANCE

On behalf of the board, I want to once again thank Andy Reardon for his tremendous leadership. As part of my transition to Chair in May 2019, the board made significant updates to its committee structure. These changes resulted in the reorganization of the audit-finance committee and creation of a new risk and sustainability committee.

Board renewal is integral to our ongoing success. In 2019, we welcomed Ed Hamberger and Andrea Robertson as new members. Ed brings a rich understanding of the railroad industry after serving more than two decades as the CEO of the Association of American Railroads. As President and CEO of STARS Air Ambulance, a highly safety-sensitive business, Andrea brings a wealth of experience in both health care and transportation.

CP recently released *Sustainably Driven*, its most substantive sustainability report to date. For a company founded in 1881 to be in operation today, sustainability and a focus on the future is essential. While much has changed since the late 1800s, and more work needs to be done, this team, led by Keith Creel, is resolutely committed to long-term sustainable, profitable growth.

Sincerely,

ISABELLE COURVILLE
Chair of the Board

PART I

ITEM 1. BUSINESS

Company Overview

Canadian Pacific Railway Limited ("CPRL"), together with its subsidiaries ("CP" or the "Company"), owns and operates a transcontinental freight railway in Canada and the United States ("U.S."). CP provides rail and intermodal transportation services over a network of approximately 12,700 miles, serving the principal business centres of Canada from Montréal, Québec, to Vancouver, British Columbia ("B.C."), and the U.S. Northeast and Midwest regions. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company's market reach in Canada, through the U.S. and into Mexico. CP transports bulk commodities, merchandise freight and intermodal traffic. For additional information regarding CP's network and geographical locations, refer to Item 2. Properties.

CPRL was incorporated on June 22, 2001, under the *Canada Business Corporations Act* and controls and owns all of the Common Shares of Canadian Pacific Railway Company ("CPRC"), which was incorporated in 1881 by Letters Patent pursuant to an Act of the Parliament of Canada. CPRL's registered, executive and corporate head office is located at 7550 Ogden Dale Road S.E., Calgary, Alberta T2C 4X9. CPRL's Common Shares (the "Common Shares") are listed on the Toronto Stock Exchange ("TSX") and the New York Stock Exchange ("NYSE") under the symbol "CP".

For purposes of this annual report, all references herein to "CP", "the Company", "we", "our" and "us" refer to CPRL, CPRL and its subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL's subsidiaries, as the context may require. All references to currency amounts included in this annual report, including the Consolidated Financial Statements, are in Canadian dollars unless specifically noted otherwise.

Strategy

CP is continuing the journey to become the best railway in North America, with a culture of responsibility and accountability focused on five key foundations:

- **Provide Service:** Providing efficient and consistent transportation solutions for the Company's customers. "Doing what we say we are going to do" is what drives CP in providing a reliable product with a lower cost operating model. Centralized planning aligned with local execution is bringing the Company closer to the customer and accelerating decision-making.
- **Control Costs:** Controlling and removing unnecessary costs from the organization, eliminating bureaucracy and continuing to identify productivity enhancements are the keys to success.
- **Optimize Assets:** Through longer and heavier trains, and improved asset utilization, the Company is moving increased volumes with fewer locomotives and cars while unlocking capacity for future growth potential.
- **Operate Safely:** Each year, CP safely moves millions of carloads of freight across North America while ensuring the safety of our people and the communities through which we operate. Safety is never to be compromised. CP strives for continuous implementation of state-of-the-art safety technology, safety management systems, and safety culture with our employees to ensure safe, efficient operations across our network.
- **Develop People:** CP recognizes that none of the other foundations can be achieved without its people. Every CP employee is a railroader and the Company has established a culture focused on our values of accountability, diversity and pride, in everything we do. Coaching and mentoring all employees into becoming leaders will continue to drive CP forward.

Starting in 2012, CP transformed its operations by investing in the network and executing a precision scheduled railroading model that lowers costs, optimizes assets, and provides better, more competitive service.

Today, we continue to apply our long-term strategy: leverage our lower cost base, network strengths and improved service to drive sustainable, profitable growth. While the accomplishments during the turnaround were tremendous, CP's journey to become North America's best-performing rail carrier is far from over. As a Company, we will remain focused on our next level of service, productivity, and innovation to continue to generate value for our customers and results for our shareholders.

Business Developments

On December 30, 2019, CP acquired Central Maine & Québec Railway ("CMQ") for approximately $174 million (U.S. $133 million). CMQ owns rail lines primarily in Québec and Maine, stretching approximately 481 miles, and primarily moving forest products, refined petroleum products, chemicals and plastics. This acquisition provides CP with strategic access into the U.S. Northeast and Atlantic Canada. The transaction provides CP customers with seamless, safe and efficient access to ports at Searsport, Maine, and to Saint John, New Brunswick, via Eastern Maine Railway Company and New Brunswick Southern Railway. Of the total consideration paid, approximately 70% represents the issued and outstanding shares of Central Maine & Québec Railway U.S. Inc. ("CMQ U.S."), while the remaining approximately 30% represents the issued and outstanding shares of Central Maine & Québec Railway Canada Inc. ("CMQ Canada") (together CMQ). The acquisition of the shares of CMQ U.S. is subject to review and approval by the U.S. Surface Transportation Board

("STB") and as such, the shares of CMQ U.S. have been placed in an independent voting trust. For additional information regarding this acquisition, refer to Item 8. Financial Statements and Supplementary Data, Note 11 Business combination.

On December 17, 2019, the Company announced a new normal course issuer bid ("NCIB"), commencing December 20, 2019, to purchase up to 4.80 million Common Shares for cancellation before December 19, 2020.

During the first quarter of 2019, the Company experienced severe winter operating conditions and an increase in the frequency and severity of casualty incidents and derailments. As a result, the Company incurred significant costs to manage severe weather conditions, as well as direct casualty costs, and higher operating costs. During this period and the subsequent network recovery the Company also experienced losses and deferrals of potential revenues.

Change in Executive Officers

At the end of September 2019, Mr. Robert Johnson retired from his position as Executive Vice-President, Operations. Effective September 1, 2019, CP's new Executive Vice-President, Operations, is Mr. Mark Redd.

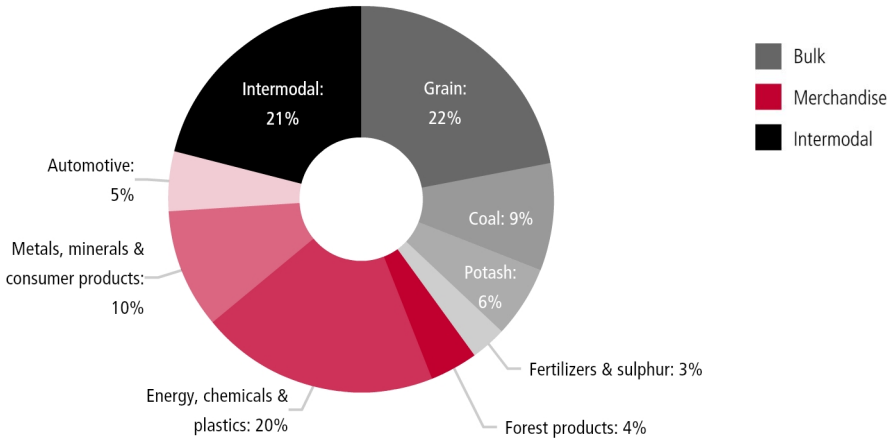
Change in Board of Directors

On July 15, 2019, the Company announced the appointment of Ms. Andrea Robertson and Mr. Edward R. Hamberger to CP's Board of Directors, effective July 15, 2019.

On May 7, 2019, CP announced the election of all nine director nominees and, upon her re-election as a director, Ms. Isabelle Courville was confirmed as Chair of CP's Board of Directors. Ms. Courville replaced Mr. Andrew F. Reardon, the prior Chair of CP's Board of Directors, who did not stand for re-election at the May 7, 2019 shareholder meeting.

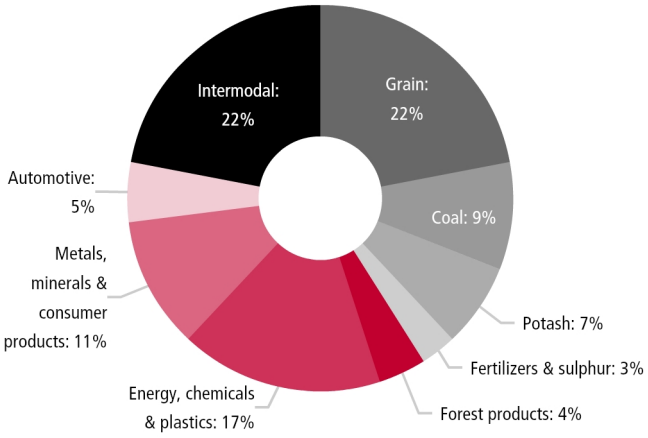
Prior Developments

During the second quarter of 2018, the Company received multiple strike notices from the Teamsters Canada Rail Conference – Train & Engine ("TCRC"), representing approximately 3,000 conductors and locomotive engineers, and the International Brotherhood of Electrical Workers ("IBEW"), representing approximately 360 signal maintainers. CP reached a three-year agreement with IBEW, ratified by IBEW membership on June 29, 2018, and a four-year agreement with TCRC, ratified by TCRC membership on July 20, 2018. The wind-down of operations and return to full service levels following the strike notices caused disruption to the network, losses in potential revenue and costs related to labour disruptions.



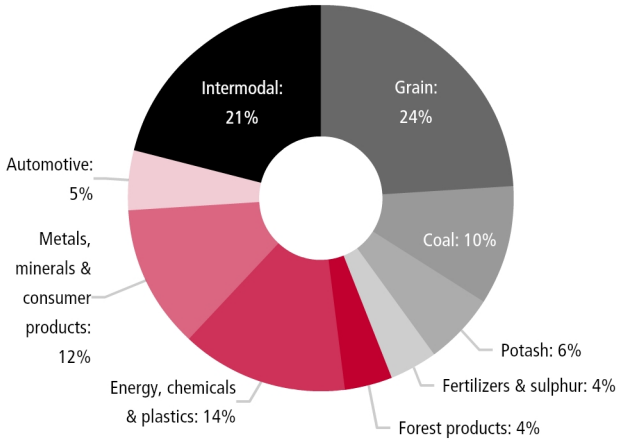
Operations

The Company operates in only one operating segment: rail transportation. Although the Company provides a breakdown of revenue by business line, the overall financial and operational performance of the Company is analyzed as one segment due to the integrated nature of the rail network. Additional information regarding the Company's business and operations, including revenue and financial information, and information by geographic location is presented in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 8. Financial Statements and Supplementary Data, Note 28 Segmented and geographic information.



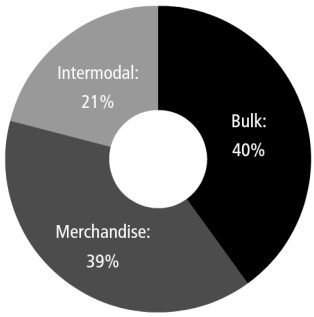
Lines of Business

The Company transports bulk commodities, merchandise freight and intermodal traffic. Bulk commodities, which typically move in large volumes across long distances, include Grain, Coal, Potash, and Fertilizers and sulphur. Merchandise freight consists of industrial and consumer products, such as Energy, chemicals and plastics, Metals, minerals and consumer products, Automotive and Forest products. Intermodal traffic consists largely of retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

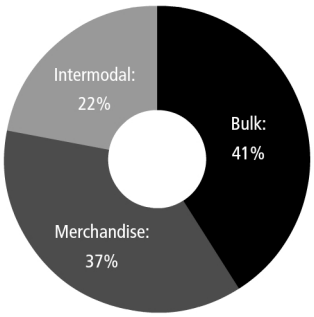


The Company's revenues are primarily derived from transporting freight. The following chart shows the Company's Freight revenue by each line of business in 2019, 2018 and 2017:

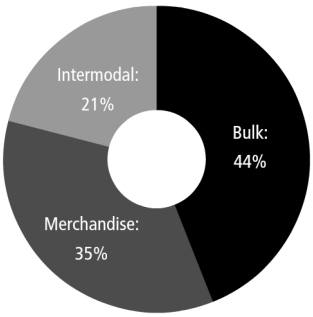
2019 Freight Revenues



2018 Freight Revenues



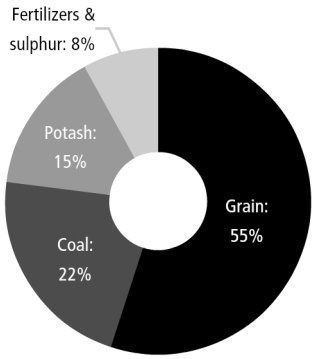
2017 Freight Revenues



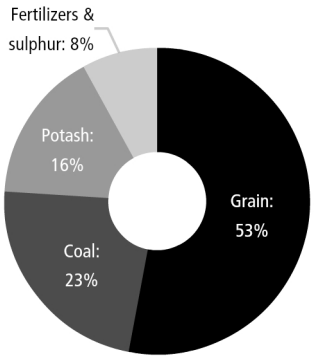
In 2019, the Company generated Freight revenues totalling $7,613 million ($7,152 million in 2018 and $6,375 million in 2017). The following charts compare the percentage of the Company's total Freight revenues derived from each of the three major business lines in 2019, 2018 and 2017:

2019 Freight Revenues

2018 Freight Revenues

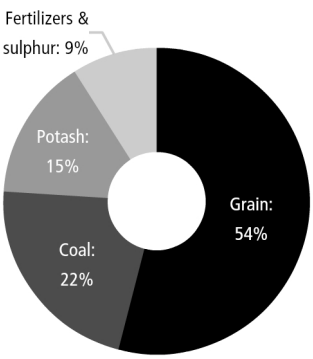


2017 Freight Revenues



BULK

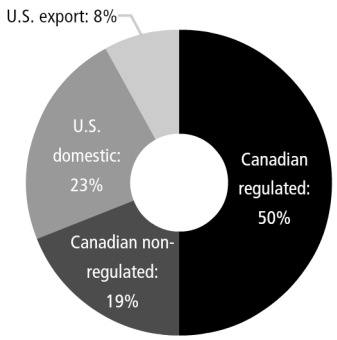
The Company's Bulk business represented approximately 40% of total Freight revenues in 2019.



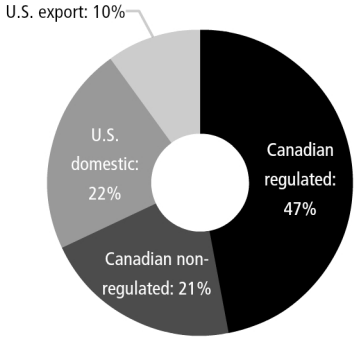
The following charts compare the percentage of the Company's Bulk freight revenues by commodity business in 2019, 2018 and 2017:

2019 Bulk Revenues
(40% of Freight Revenues)

2018 Bulk Revenues
(41% of Freight Revenues)

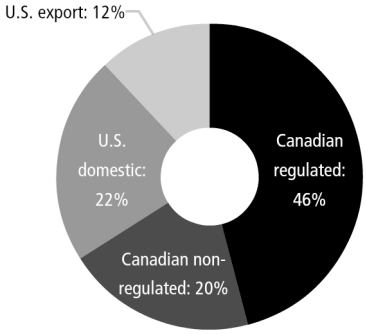


2017 Bulk Revenues
(44% of Freight Revenues)



Grain

The Company's Grain business represented approximately 55% of Bulk revenues, which was 22% of total Freight revenues in 2019.



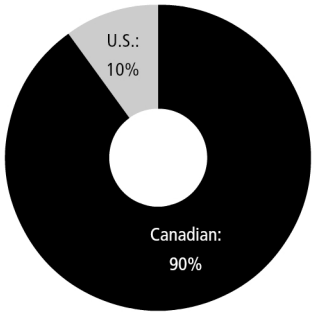
The following charts compare the percentage of the Company's Grain freight revenues generated from Canadian and U.S. shipments in 2019, 2018 and 2017:

2019 Grain Revenues
(55% of Bulk Revenues; 22% of Freight Revenues)

2018 Grain Revenues
(53% of Bulk Revenues; 22% of Freight Revenues)

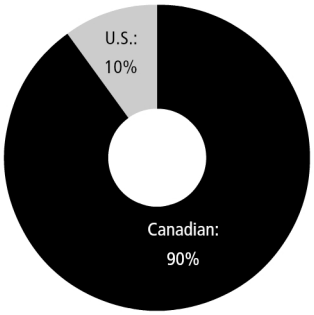
2017 Grain Revenues
(54% of Bulk Revenues; 24% of Freight Revenues)

CP's Grain network is unique among railways in North America as it is strategically positioned in the heart of grain-producing regions of Western Canada and the Northern Plains of the U.S. Canadian grain transported by CP consists of both whole grains, such as wheat, durum, canola, pulses and soybeans, and processed products such as oils, meals and malt. This business is centred in the Canadian Prairies (Saskatchewan, Manitoba, and Alberta), with grain shipped primarily west to the Port of Vancouver, and east to the Port of Thunder Bay for export. Grain is also shipped to the U.S., to eastern Canada, and to Mexico for domestic consumption.



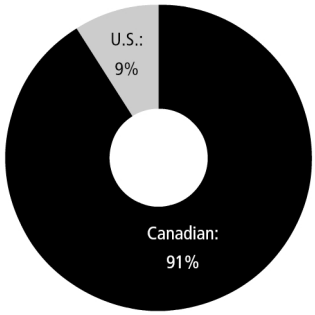
Canadian grain includes a division of business that is regulated by the Canadian government through the *Canada Transportation Act* ("CTA"). This regulated business is subject to a maximum revenue entitlement ("MRE"). Under the CTA, railways can set their own rates for individual movements. However, the MRE governs aggregate revenue earned by the railway based on a formula that factors in the total volumes, length of haul, average revenue per ton and inflationary adjustments. The regulation applies to western Canadian export grain shipments to the ports of Vancouver and Thunder Bay.

U.S. grain transported by CP consists of both whole grains, such as wheat, soybeans, corn and durum, and processed products such as meals, oils and flour. This business is centred in the states of Minnesota, North Dakota, South Dakota and Iowa. Grain destined for domestic consumption moves east via Chicago, to the U.S. Northeast or is interchanged with other carriers to the U.S. Pacific Northwest and U.S. Southeast. In partnership with other railways, CP also moves grain to export terminals in the U.S. Pacific Northwest and the Gulf of Mexico. Export grain traffic is also shipped to ports at Superior and Duluth.



Coal

The Company's Coal business represented approximately 22% of Bulk revenues, which was 9% of total Freight revenues in 2019.

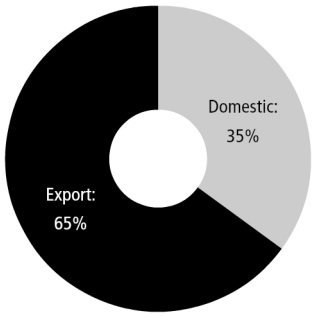


The following charts compare the percentage of the Company's Coal freight revenues generated from Canadian and U.S. shipments in 2019, 2018 and 2017:

2019 Coal Revenues
(22% of Bulk Revenues; 9% of Freight Revenues)

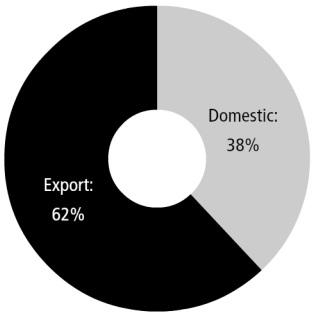
2018 Coal Revenues
(23% of Bulk Revenues; 9% of Freight Revenues)

2017 Coal Revenues
(22% of Bulk Revenues; 10% of Freight Revenues)



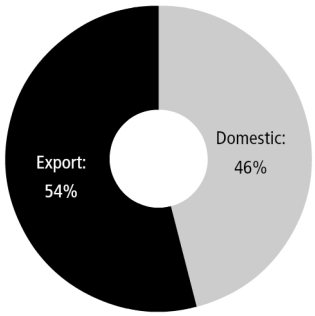
In Canada, CP handles mostly metallurgical coal destined for export for use in the steelmaking process. CP's Canadian coal traffic originates mainly from Teck Resources Limited's mines in southeastern B.C. CP moves coal west from these mines to port terminals for export to world markets (Pacific Rim, Europe and South America), and east for the U.S. Midwest markets.

In the U.S., CP moves primarily thermal coal from connecting railways, serving the thermal coal fields in the Powder River Basin in Montana and Wyoming, which is delivered to power-generating facilities in the U.S. Midwest.



Potash

The Company's Potash business represented approximately 15% of Bulk revenues, which was 6% of total Freight revenues in 2019.

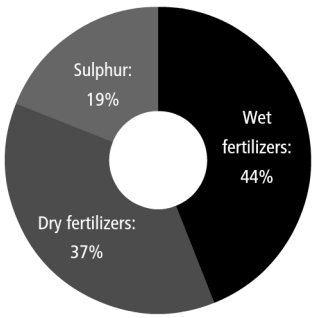


The following charts compare the percentage of the Company's Potash freight revenues generated from export and domestic potash shipments in 2019, 2018 and 2017:

2019 Potash Revenues
(15% of Bulk Revenues; 6% of Freight Revenues)

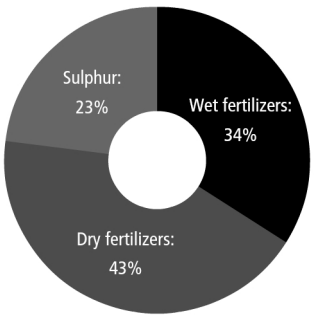
2018 Potash Revenues
(16% of Bulk Revenues; 7% of Freight Revenues)

2017 Potash Revenues
(15% of Bulk Revenues; 6% of Freight Revenues)



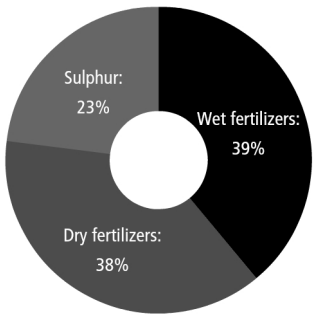
The Company's Potash traffic moves mainly from Saskatchewan to offshore markets through the ports of Vancouver, Portland and Thunder Bay, and to markets in the U.S. All potash shipments for export beyond Canada and the U.S. are marketed by Canpotex Limited and K+S Potash Canada. Canpotex is an export

company owned in equal shares by Nutrien Ltd. and The Mosaic Company. Independently, these producers move domestic potash with CP primarily to the U.S. Midwest for local application.



Fertilizers and Sulphur

The Company's Fertilizers and sulphur business represented approximately 8% of Bulk revenues, which was 3% of total Freight revenues in 2019.

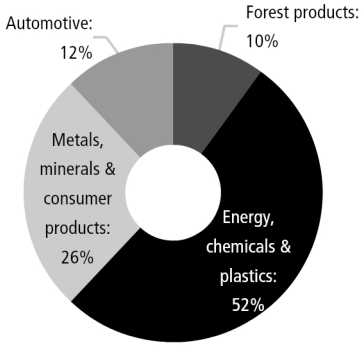


The following charts compare the percentage of the Company's Fertilizers and sulphur freight revenues generated from dry fertilizers, wet fertilizers and sulphur transportation in 2019, 2018 and 2017:

2019 Fertilizers & Sulphur Revenues
(8% of Bulk Revenues; 3% of Freight Revenues)

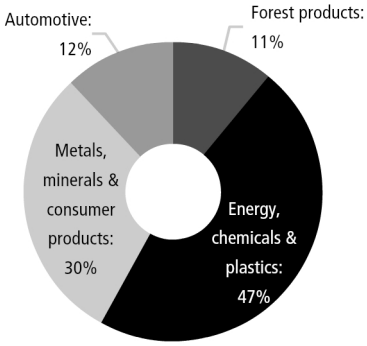
2018 Fertilizers & Sulphur Revenues
(8% of Bulk Revenues; 3% of Freight Revenues)

2017 Fertilizers & Sulphur Revenues
(9% of Bulk Revenues; 4% of Freight Revenues)



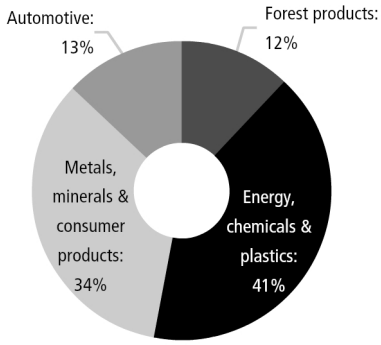
Dry fertilizers include: phosphate, urea, ammonium sulphate and nitrate. Wet fertilizers are primarily anhydrous ammonia. Approximately half of CP's fertilizer shipments originate from production facilities in Alberta, where abundant sources of natural gas and other chemicals provide feedstock for fertilizer production.

Most sulphur is produced in Alberta as a byproduct of processing sour natural gas, refining crude oil and upgrading bitumen produced in the Alberta oil sands. Sulphur is a raw material used primarily in the manufacturing of sulphuric acid, which is used most extensively in the production of phosphate fertilizers. Sulphuric acid is also a key ingredient in industrial processes ranging from smelting and nickel leaching to paper production.



MERCHANDISE

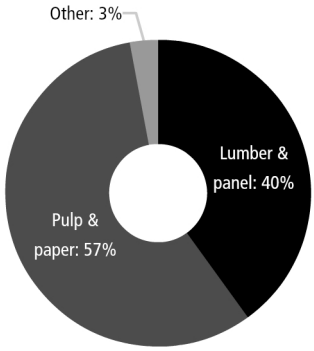
The Company's Merchandise business represented approximately 39% of total Freight revenues in 2019.



The following charts compare the percentage of the Company's Merchandise freight revenue by commodity business in 2019, 2018 and 2017:

2019 Merchandise Revenues
(39% of Freight Revenues)

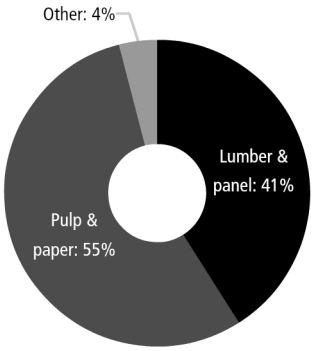
2018 Merchandise Revenues
(37% of Freight Revenues)



2017 Merchandise Revenues
(35% of Freight Revenues)

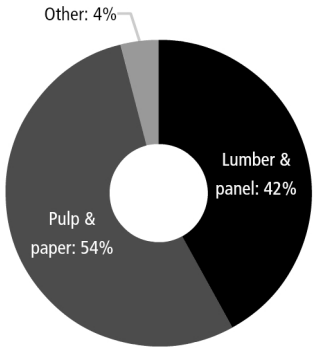
Merchandise products move in both mixed freight and unit trains, in a variety of car types. Service involves delivering products to many different customers and destinations. In addition to traditional rail service, CP moves merchandise traffic through a network of truck-rail transload facilities, expanding the reach of CP's network to non-rail served facilities.

Forest Products



The Company's Forest products business represented approximately 10% of Merchandise revenues, which was 4% of total Freight revenues in 2019.

The following charts compare the percentage of the Company's Forest products freight revenues generated from pulp and paper (wood pulp, paperboard, newsprint and paper), lumber and panel, and other shipments in 2019, 2018 and 2017:



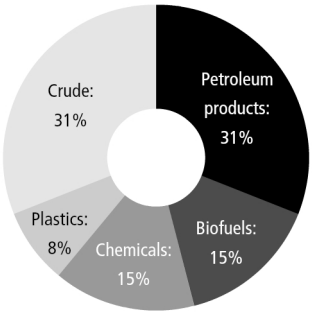
2019 Forest Products Revenues

(10% of Merchandise Revenues; 4% of Freight Revenues)

2018 Forest Products Revenues

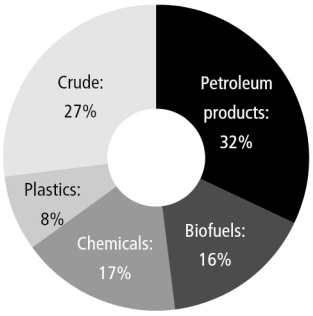
(11% of Merchandise Revenues; 4% of Freight Revenues)

2017 Forest Products Revenues



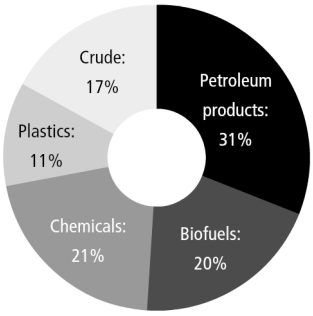
(12% of Merchandise Revenues; 4% of Freight Revenues)

Forest products traffic includes pulp and paper, and lumber and panel shipped from key producing areas in B.C., Ontario, Québec, and northern Alberta to destinations throughout North America, including Vancouver to export markets.



Energy, Chemicals and Plastics

The Company's Energy, chemicals and plastics business represented approximately 52% of Merchandise revenues, which was 20% of total Freight revenues in 2019.



The following charts compare the percentage of the Company's Energy, chemicals and plastics freight revenues generated from petroleum products, crude, chemicals, biofuels and plastics shipments in 2019, 2018 and 2017:

2019 Energy, Chemicals & Plastics Revenues
(52% of Merchandise Revenues; 20% of Freight Revenues)

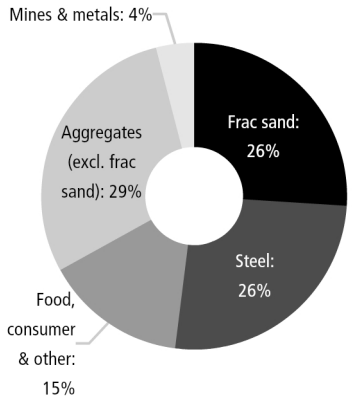
2018 Energy, Chemicals & Plastics Revenues
(47% of Merchandise Revenues; 17% of Freight Revenues)

2017 Energy, Chemicals & Plastics Revenues
(41% of Merchandise Revenues; 14% of Freight Revenues)

Petroleum products consist of commodities such as liquefied petroleum gas ("LPG"), fuel oil, asphalt, gasoline, condensate (diluent) and lubricant oils. The majority of the Company's western Canadian energy traffic originates in the Alberta Industrial Heartland, Canada's largest hydrocarbon processing region, and Saskatchewan. The Bakken formation region in Saskatchewan and North Dakota is another source of condensate, LPG and other refined petroleum. Interchanges with several rail interline partners gives the Company access to destination and export markets in Mexico, the U.S. Midwest, and the U.S. West Coast, as well as the Texas and Louisiana petrochemical corridor and port connections.

Crude moves from production facilities throughout Alberta, North Dakota, and Saskatchewan. CP provides efficient routes to refining markets in the Gulf Coast, the U.S. Northeast, and the West Coast through connections with our railway partners.

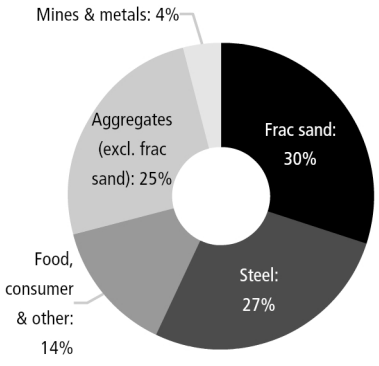
The Company's chemical traffic includes products such as ethylene glycol, caustic soda, methanol, sulphuric acid, styrene and soda ash. These shipments originate from western Canada, the Gulf of Mexico, the U.S. Midwest, and eastern Canada, and move to end markets in Canada, the U.S. and overseas.



CP's biofuels traffic originates mainly from facilities in the U.S. Midwest, shipping primarily to destinations in the U.S. Northeast.

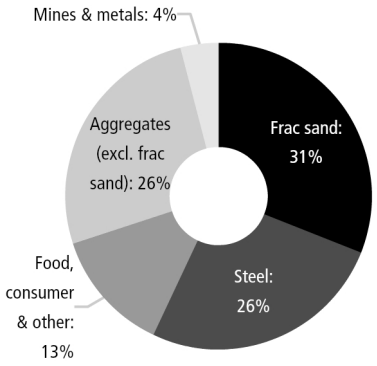
The most commonly shipped plastics products are polyethylene and polypropylene. Approximately half of the Company's plastics traffic originates in central and northern Alberta and moves to various North American destinations.

Metals, Minerals and Consumer Products



The Company's Metals, minerals and consumer products business represented approximately 26% of Merchandise revenues, which was 10% of total Freight revenues in 2019.

The following charts compare the percentage of the Company's Metals, minerals and consumer products freight revenues generated from aggregates (excluding frac sand), steel, frac sand, food and consumer products, and non-ferrous metals transportation in 2019, 2018 and 2017:



2019 Metals, Minerals & Consumer Products Revenues

(26% of Merchandise Revenues; 10% of Freight Revenues)

2018 Metals, Minerals & Consumer Products Revenues

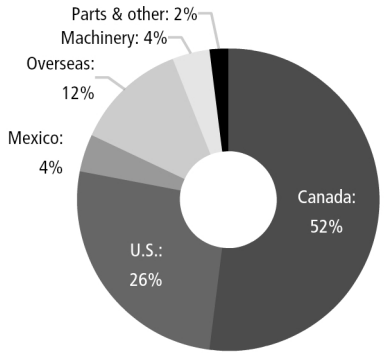
(30% of Merchandise Revenues; 11% of Freight Revenues)

2017 Metals, Minerals & Consumer Products Revenues

(34% of Merchandise Revenues; 12% of Freight Revenues)

Aggregate products include coarse particulate and composite materials such as cement, limestone, dolomite, gravel, clay and gypsum. Cement is the leading commodity within aggregates, and is shipped directly from production facilities in Alberta, Québec, and Ontario to energy and construction projects in the U.S. Midwest, Alberta,and the U.S. Pacific Northwest.

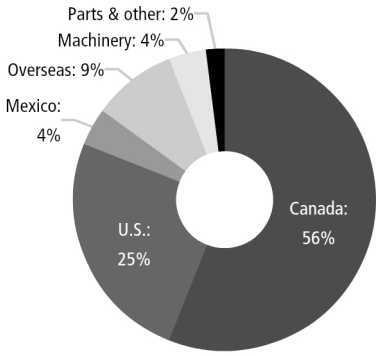
The majority of frac sand originates at mines located along the Company's network in Wisconsin and moves to the Bakken, Marcellus Shale, Permian Basin, and other shale formations across North America.



CP transports steel in various forms from mills in Iowa, Ontario and Saskatchewan to a variety of industrial users. The Company carries base metals such as zinc, aluminum, and lead. CP also moves ores from mines to smelters and refineries for processing, and the processed metal to automobile and consumer products manufacturers.

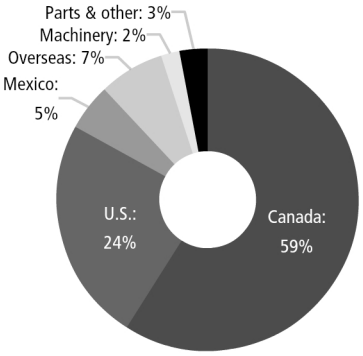
Food, consumer, and other products traffic consists of a diverse mix of goods, including food products, railway equipment, building materials and waste products.

Automotive



The Company's Automotive business represented approximately 12% of Merchandise revenues, which was 5% of total Freight revenues in 2019.

The following charts compare the percentage of the Company's Automotive freight revenues generated by movements of finished vehicles from Canadian, U.S., overseas, and Mexican origins, machinery, and parts and other in 2019, 2018 and 2017:



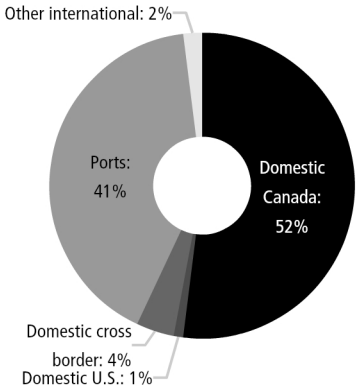
2019 Automotive Revenues

(12% of Merchandise Revenues; 5% of Freight Revenues)

2018 Automotive Revenues

(12% of Merchandise Revenues; 5% of Freight Revenues)

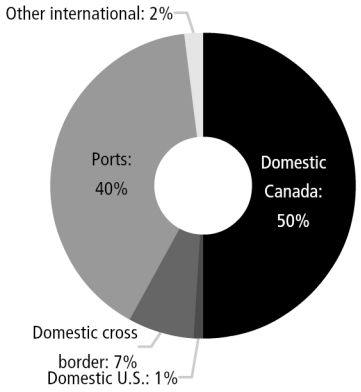
2017 Automotive Revenues



(13% of Merchandise Revenues; 5% of Freight Revenues)

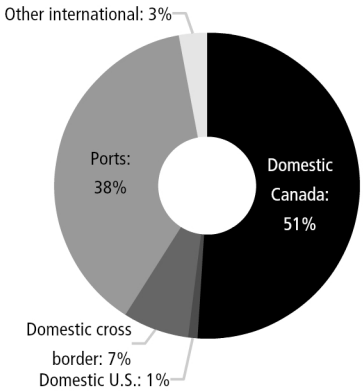
CP's Automotive portfolio consists of four finished vehicle traffic components: Canadian-produced vehicles that ship to the U.S. from Ontario production facilities; U.S.-produced vehicles that ship within the U.S. as well as cross border shipments to Canadian markets; vehicles from overseas that move through the Port of Vancouver to eastern Canadian markets; and Mexican-produced vehicles that ship to the U.S. and Canada. In addition to finished vehicles, CP ships machinery, pre-owned vehicles, and automotive parts. A comprehensive network of automotive compounds is utilized to facilitate final delivery of vehicles to dealers throughout Canada and in the U.S.

INTERMODAL



The Company's Intermodal business represented approximately 21% of total Freight revenues in 2019.

The following charts compare the percentage of the Company's Intermodal freight revenues generated from Canada, ports, cross border transportation, other international, and U.S. in 2019, 2018 and 2017:



2019 Intermodal Revenues

(21% of Freight Revenues)

2018 Intermodal Revenues

(22% of Freight Revenues)

2017 Intermodal Revenues

(21% of Freight Revenues)

Domestic intermodal freight consists primarily of manufactured consumer products that are predominantly moved in 53-foot containers within North America. International intermodal freight moves in marine containers to and from ports and North American inland markets.

CP's domestic intermodal business moves goods from a broad spectrum of industries including wholesale, retail, food, forest products and various other commodities. Key service factors in domestic intermodal include consistent on-time delivery, the ability to provide door-to-door service and the availability of value-added services. The majority of the Company's domestic intermodal business originates in Canada, where CP markets its services directly to retailers and manufacturers, providing complete door-to-door service and maintaining direct relationships with its customers. In the U.S., the Company's service is delivered mainly through intermodal marketing companies ("IMC").

CP's international intermodal business consists primarily of containerized traffic moving between the ports of Vancouver and Montréal and inland points across Canada and the U.S. Import traffic from the Port of Vancouver is mainly long-haul business destined for eastern Canada and the U.S. Midwest and Northeast. CP works closely with the Port of Montréal, a major year-round East Coast gateway to Europe, to serve markets primarily in the U.S. Midwest and Canada. The Company's U.S. Northeast service connects eastern Canada with the Port of New York, offering a competitive alternative to trucks.

Fuel Cost Adjustment Program

The short-term volatility in fuel prices may adversely or positively impact revenues. CP employs a fuel cost adjustment program designed to respond to fluctuations in fuel prices and help reduce volatility to changing fuel prices. Fuel surcharge revenues are earned on individual shipments and are based primarily on the price of On-Highway Diesel. As such, fuel surcharge revenue is a function of freight volumes and fuel prices. Fuel surcharge revenues accounted for approximately 6% of the Company's Freight revenues in 2019. The Company is also subject to carbon taxation systems and levies in some jurisdictions in which it operates, the costs of which are passed on to the shipper. As such, fuel surcharge revenue includes carbon taxes and levy recoveries.

Non-freight Revenues

Non-freight revenues accounted for approximately 2% of the Company's Total revenues in 2019. Non-freight revenues are generated from leasing certain assets; other arrangements, including logistical services and contracts with passenger service operators; and switching fees.

Significant Customers

For each of the years ended December 31, 2019, 2018 and 2017, no customer comprised more than 10% of Total revenues or accounts receivable.

Competition

The Company is subject to competition from other railways, motor carriers, ship and barge operators, and pipelines. Price is only one factor of importance as shippers and receivers choose a transportation service provider. Service is another factor and requirement, both in terms of transit time and reliability, which vary by shipper and commodity. As a result, the Company's primary competition varies by commodity, geographic location, access to markets and mode of available transportation. CP's primary rail competitors are Canadian National Railway Company ("CN"), which operates throughout much of the Company's territory in Canada, and Burlington Northern Santa Fe, LLC, including its primary subsidiary BNSF Railway Company ("BNSF"), which operates throughout much of the Company's territory in the U.S. Midwest. Other railways also operate in parts of the Company's territory. Depending on the specific market, competing railways, motor carriers, and other competitors may exert pressure on price and service levels.

Seasonality

Volumes and revenues from certain goods are stronger during different periods of the year. First-quarter revenues are typically lower mainly due to winter weather conditions, closure of the Great Lakes ports and reduced transportation of retail goods. Second and third quarter revenues generally improve compared to the first quarter, as fertilizer volumes are typically highest during the second quarter and demand for construction-related goods is generally highest in the third quarter. Revenues are typically strongest in the fourth quarter, primarily as a result of the transportation of grain after the harvest, fall fertilizer programs and increased demand for retail goods moved by rail. Operating income is also affected by seasonal fluctuations. Operating income is typically lowest in the first quarter, due to lower freight revenue and higher operating costs associated with winter conditions.

Government Regulation

The Company's railway operations are subject to extensive federal laws, regulations and rules in both Canada and the U.S., which directly affect how operations and business activities are managed.

The Company's Canadian operations are subject to economic and safety regulations. Economic regulatory oversight is provided by the Canadian Transportation Agency (the "Agency") as delegated by the CTA, while safety regulatory oversight is primarily provided by Transport Canada ("TC") pursuant to the *Railway Safety Act* ("RSA"). The CTA indirectly regulates rates by providing remedies for freight rates, including ancillary charges, remedies for level of service, long-haul interswitching rates and regulated interswitching rates in Canada. The CTA also regulates the MRE for the movement of export grain, construction and abandonment of railways, commuter and passenger access, and noise and vibration-related disputes. The RSA regulates safety-related aspects of railway

operations in Canada, including the delegation of inspection, investigation and enforcement powers to TC. TC is also responsible for overseeing the transportation of dangerous goods as set out under the *Transportation of Dangerous Goods Act* (Canada) ("TDGA").

The Company's U.S. operations are similarly subject to economic and safety regulations. Economic regulatory oversight is provided by the STB which administers Title 49 of the United States Code and related Code of Federal Regulations. Safety regulatory oversight is exercised by the Federal Railroad Administration ("FRA"), and the Pipelines and Hazardous Materials Safety Administration ("PHMSA"). The STB is an economic regulatory body with jurisdiction over railroad rate and service issues and proposed railroad mergers and other transactions. The FRA regulates safety-related aspects of the Company's railway operations in the U.S. under the *Federal Railroad Safety Act*, as well as rail portions of other safety statutes. The PHMSA regulates the safe transportation of all hazardous materials by rail.

Various other regulators directly and indirectly affect the Company's operations in areas such as health, safety, security, environmental and other matters.

Regulatory Changes

After the tragic accident in Lac-Mégantic, Québec, in July 2013 involving a non-related short-line railway company, the Government of Canada implemented several measures pursuant to the RSA and the TDGA. These modifications implemented changes with respect to rules associated with securing unattended trains; the classification of crude being imported, handled, offered for transport or transported; and the provision of information to municipalities through which dangerous goods are transported by rail. The U.S. federal government has taken similar actions. These changes did not have a material impact on CP's operating practices.

On June 18, 2015, "An Act to amend the *Canada Transportation Act* and the *Railway Safety Act*" received Royal Assent and is now in force. The legislation set out new minimum insurance requirements for federally regulated railways based on amounts of crude and toxic inhalation hazards ("TIH") or poisonous inhalation hazards moved. It also imposes strict liability; limits railway liability to the minimum insurance level; mandates the creation of a fund paid for by levies on crude shipments, to be utilized for damages beyond a railway's liability; allows railways and insurers to maintain rights to pursue other parties (subrogation); and prevents shifting liability to shippers from railways except through written agreement.

On May 1, 2015, the U.S. Transportation Secretary announced the final rule for a new rail tank car standard for flammable liquids and the phase-out schedule for older tank cars used to transport flammable liquids. The development of the new tank car standard was done in coordination between TC, PHMSA and the FRA. This announcement was followed by publishing the new tank car standard and phase-out schedule in Canada on May 20, 2015. Canada has since issued two protective directions to advance phase-out dates. The first, Protective Direction 38, eliminated the ability to ship crude oil in legacy U.S. Department of Transportation ("DOT") 111 tank cars after November 1, 2016 (the phase-out date in the United States for these cars remained January 1, 2018). Protective Direction 39 was issued on September 19, 2018 and eliminated the ability to ship crude oil in unjacketed CPC 1232 tank cars after November 1, 2018, as well as certain condensates after January 1, 2019. The phase-out deadline for this car in the United States remains April 1, 2020. CP does not own any tank cars used for commercial transportation of hazardous commodities.

On October 29, 2015, the *Surface Transportation Extension Act of 2015* ("STEA") was signed into law. The law extends, by three years, the deadline for the U.S. rail industry to implement Positive Train Control ("PTC"), a set of highly advanced technologies designed to prevent train-to-train collisions, speed-related derailments and other accidents caused by human error by determining the precise location, direction and speed of trains, warning train operators of potential problems, and taking immediate action if an operator does not respond. Legislation passed by the U.S. Congress in 2008 mandated that PTC systems be put into service by the end of 2015 on rail lines used to transport passengers or toxic-by-inhalation materials. The STEA extended the deadline to install and activate PTC to December 31, 2018, with an optional two-year extension (December 31, 2020) under certain circumstances. The Company received the two-year extension to ensure safe and effective implementation of PTC on its rail network.

For further details on the capital expenditures associated with compliance with the PTC regulatory mandate, refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity and Capital Resources.

On December 4, 2015, the *Fixing America's Surface Transportation Act* ("FAST Act") was signed into law, representing the first long-term transportation legislation enacted in the U.S. in over a decade. The FAST Act contains key provisions on safety enhancements for tank cars moving flammable liquids in the U.S. and electronically controlled pneumatic ("ECP") train braking. Among those key provisions, the FAST Act requires new tank cars to be equipped with thermal blankets, requires all legacy DOT-111 tank cars moving flammable liquids to be upgraded to new retrofit standards (regardless of how many cars may be in a train) and sets minimum requirements for protection of certain valves. The FAST Act called for the U.S. Secretary of Transportation to re-evaluate its ECP final rule within one year using the results of this evaluation to determine whether ECP braking system requirements are justified. On December 4, 2017, the DOT found the ECP brake rule costs outweigh the benefits. On September 24, 2018, PHMSA officially repealed the ECP brake rule.

The *STB Reauthorization Act of 2015* was signed into law on December 18, 2015. The law requires numerous changes to the structure and composition of the STB, removing it from under the DOT and establishing the STB as an independent U.S. agency, as well as increasing STB Board membership from three to five members. Notably, the law vests in the STB certain limited enforcement powers, by authorizing it to investigate rail carrier violations on the STB Board's own initiative. The law also requires the STB to establish a voluntary binding arbitration process to resolve rail rate and practice disputes.

Finally, on May 23, 2018, the *Transportation Modernization Act* received Royal Assent. The legislation amended the CTA and the RSA, among other Acts, to (1) replace the previous 160 kilometre extended interswitching limit and the competitive line rate provisions with a new long-haul interswitching regime; (2) modify the existing Level of Service remedy for shippers by instructing the Agency to determine, upon receipt of a complaint, if a railway company is fulfilling its common carrier obligation to the "highest level of service that is reasonable in the circumstances"; (3) allow the existing Service Level Agreement arbitration remedy to include the consideration of reciprocal financial penalties; (4) increase the threshold for summary Final Offer Arbitrations from $750,000 to $2 million; (5) bifurcate the Volume-Related Composite Price Index ("VRCPI") component of the annual MRE determination for transportation of regulated grain, to encourage hopper car investment by CP and CN; (6) mandate the installation of locomotive voice and video recorders ("LVVRs"), with statutory permission for random access by railway companies and TC to the LVVR data in order to proactively strengthen railway safety in Canada; and (7) compel railways to provide additional data to the federal government.

Environmental Laws and Regulations

The Company's operations and real estate assets are subject to extensive federal, provincial, state and local environmental laws and regulations governing emissions to the air, discharges to waters and the handling, storage, transportation and disposal of waste and other materials. If the Company is found to have violated such laws or regulations, it could have a material adverse effect on the Company's business, financial condition, or operating results. In addition, in operating a railway, it is possible that releases of hazardous materials during derailments or other accidents may occur that could cause harm to human health or to the environment. Costs of remediation, damages and changes in regulations could materially affect the Company's operating results, financial condition, and reputation.

The Company has implemented an Environmental Management System to facilitate the reduction of environmental risk. Specific environmental programs are in place to address areas such as air emissions, wastewater, management of vegetation, chemicals and waste, storage tanks and fueling facilities. CP has also undertaken environmental impact assessments and risk assessments to identify, prevent and mitigate environmental risks. There is continued focus on preventing spills and other incidents that have a negative impact on the environment. There is an established strategic emergency response contractor network, and spill equipment kits are located across Canada and the U.S. to ensure a rapid and efficient response in the event of an environmental incident. In addition, emergency preparedness and response plans are regularly updated and tested.

The Company has developed an environmental audit program that comprehensively, systematically and regularly assesses the Company's facilities for compliance with legal requirements and the Company's policies for conformance to accepted industry standards. Included in this is a corrective action follow-up process and semi-annual review by senior management.

CP focuses on key strategies, identifying tactics and actions to support commitments to the community. The Company's strategies include:

- protecting the environment;
- ensuring compliance with applicable environmental laws and regulations;
- promoting awareness and training;
- managing emergencies through preparedness; and
- encouraging involvement, consultation and dialogue with communities along the Company's rail lines.

Security

CP is subject to statutory and regulatory directives in Canada and the U.S. that address security concerns. CP plays a critical role in the North American transportation system. Rail lines, facilities and equipment, including railcars carrying hazardous materials, could be direct targets or indirect casualties of terrorist attacks. Regulations by the DOT and the Department of Homeland Security in the U.S. include speed restrictions, chain of custody and security measures, which can impact service and increase costs for the transportation of hazardous materials, especially TIH materials. New regulations published by TC under the TDGA have added requirements for railway companies to take actions to mitigate security risks of transporting dangerous goods by rail. In addition, insurance premiums for some or all of the Company's current coverage could increase significantly, or certain coverage may not be available to the Company in the future. While CP will continue to work closely with Canadian and U.S. government agencies, future decisions by these agencies on security matters or decisions by the industry in response to security threats to the North American rail network could have a material adverse effect on the Company's business, financial condition, or operating results.

CP takes the following security measures:

- CP employs its own police service that works closely with communities and other law enforcement and government agencies to promote railway safety and infrastructure security. As a railway law enforcement agency, CP Police Services is headquartered in Calgary, with police officers assigned to over 25 field offices responsible for railway police operations in six Canadian provinces and 14 U.S. states. CP Police Services operates on the CP rail network as well as in areas where CP has non-railway operations.
- CP's Police Communication Centre ("PCC") operates 24 hours a day. PCC receives reports of emergencies, dangerous or potentially dangerous conditions, and other safety and security issues from our employees, the public, and law enforcement and other government officials. PCC ensures that proper emergency responders are notified as well as governing bodies.

- CP's Security Management Plan is a comprehensive, risk-based plan modelled on and developed in conjunction with the security plan prepared by the Association of American Railroads post-September 11, 2001. Under this plan, CP routinely examines and prioritizes railway assets, physical and cyber vulnerabilities, and threats, as well as tests and revises measures to provide essential railway security. To address cyber security risks, CP implements mitigation programs that evolve with the changing technology threat environment. The Company has also worked diligently to establish backup sites to ensure a seamless transition in the event that the Company's operating systems are the target of a cyber-attack. By doing so, CP is able to maintain network fluidity.
- CP security efforts consist of a wide variety of measures including employee training, engagement with our customers and training of emergency responders.

Labour Relations

CP employs approximately 13,000 active employees across North America with three-quarters based in Canada and the remainder in the U.S. Unionized employees represent nearly 75% of our workforce and are represented by 34 active bargaining units.

Canada

Within Canada there are eight bargaining units representing approximately 7,100 Canadian unionized active employees. From time to time, we negotiate to renew collective agreements with various unionized groups of employees. In such cases, the collective agreements remain in effect until the bargaining process has been exhausted (pursuant to the *Canada Labour Code*). Agreements are in place with all eight bargaining units in Canada, effective until December 31, 2020, 2021 and 2022.

United States

In the U.S., there are currently 26 active bargaining units on three subsidiary railroads representing nearly 2,300 unionized active employees. Nine agreements are open for amendment and are under negotiation at this time. All other agreements have been negotiated and concluded, or will become amendable in 2020, 2021, and 2022.

Available Information

CP makes available on or through its website www.cpr.ca free of charge, its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such reports are filed with or furnished to the U.S. Securities and Exchange Commission ("SEC"). Our website also contains charters for each of the committees of our Board of Directors, our corporate governance guidelines and our Code of Business Ethics. This Form 10-K and other SEC filings made by CP are also accessible through the SEC's website at www.sec.gov.

The Company has included the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") certifications regarding the Company's public disclosure required by Section 302 of the *Sarbanes-Oxley Act of 2002* and applicable securities laws in Canada as Exhibits to this annual report.

All references to our websites contained herein do not constitute incorporation by reference of information contained on such websites and such information should not be considered part of this document.

ITEM 1A. RISK FACTORS

The risks set forth in the following risk factors could have a materially adverse effect on the Company's business, financial condition, results of operations, and liquidity, and could cause those results to differ materially from those expressed or implied in the Company's forward-looking statements and forward-looking information (collectively, "forward-looking statements").

The information set forth in this Item 1A. Risk Factors should be read in conjunction with the rest of the information included in this annual report, including Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8. Financial Statements and Supplementary Data.

As a common carrier, the Company is required by law to transport dangerous goods and hazardous materials, which could expose the Company to significant costs and claims. Railways, including CP, are legally required to transport dangerous goods and hazardous materials as part of their common carrier obligations regardless of risk or potential exposure to loss. CP transports dangerous goods and hazardous materials, including but not limited to crude oil, ethanol and TIH materials such as chlorine gas and anhydrous ammonia. A train accident involving hazardous materials could result in significant claims against CP arising from personal injury, property or natural resource damage, environmental penalties and remediation obligations. Such claims, if insured, could exceed the existing insurance coverage commercially available to CP, which could have a material adverse effect on CP's financial condition, operating results, and liquidity. CP is also required to comply with rules and regulations regarding the handling of dangerous goods and hazardous materials in Canada and the U.S. Noncompliance with these rules and regulations can subject the Company to significant penalties and could factor in litigation arising out of a train accident. Changes to these rules and regulations could also increase operating costs, reduce operating efficiencies and impact service delivery.

The Company is subject to significant governmental legislation and regulation over commercial, operating and environmental matters. The Company's railway operations are subject to extensive federal laws, regulations and rules in both Canada and the U.S. Operations are subject to economic and safety regulations in Canada primarily by the Agency and TC. The Company's U.S. operations are subject to economic and safety regulation by the STB and the FRA. Various other regulators directly and indirectly affect the Company's operations in areas such as health, safety, security, environmental and other matters. Additional economic regulation of the rail industry by these regulators or the Canadian and U.S. federal and state or provincial legislative bodies, whether under new or existing laws, could have a significant negative impact on the Company's ability to determine prices for rail services and result in a material adverse effect in the future on the Company's business, financial position, results of operations, and liquidity in a particular year or quarter. This potential material adverse effect could also result in reduced capital spending on the Company's rail network or in abandonment of lines.

The Company's compliance with safety and security regulations may result in increased capital expenditures and operating costs. For example, compliance with the *Rail Safety Improvement Act of 2008* has resulted in additional capital expenditures associated with the statutorily mandated implementation of PTC. In addition to increased capital expenditures, implementation of such regulations may result in reduced operational efficiency and service levels, as well as increased operating expenses.

The Company's operations are subject to extensive federal, state, provincial and local environmental laws concerning, among other matters, emissions to the air, land and water and the handling of hazardous materials and wastes. Violation of these laws and regulations can result in significant fines and penalties, as well as other potential impacts on CP's operations. These laws can impose strict, and in some circumstances, joint and several liability on both current and former owners, and on operators of facilities. Such environmental liabilities may also be raised by adjacent landowners or third parties. In addition, in operating a railway, it is possible that releases of hazardous materials during derailments or other accidents may occur that could cause harm to human health or to the environment. Costs of remediation, damages and changes in regulations could materially affect the Company's operating results and reputation. The Company has been, and may in the future be, subject to allegations or findings to the effect that it has violated, or is strictly liable under, environmental laws or regulations. The Company currently has obligations at existing sites for investigation, remediation and monitoring, and will likely have obligations at other sites in the future. The actual costs associated with both current and long-term liabilities may vary from the Company's estimates due to a number of factors including, but not limited to changes in: the content or interpretation of environmental laws and regulations; required remedial actions; technology associated with site investigation or remediation; and the involvement and financial viability of other parties that may be responsible for portions of those liabilities.

Global economic conditions could negatively affect demand for commodities and other freight transported by the Company. A decline or disruption in domestic, cross border or global economic conditions that affect the supply or demand for the commodities that CP transports may decrease CP's freight volumes and may result in a material adverse effect on CP's financial or operating results and liquidity. Economic conditions resulting in bankruptcies of one or more large customers could have a significant impact on CP's financial position, results of operations, and liquidity in a particular year or quarter.

The Company faces competition from other transportation providers and failure to compete effectively could adversely affect financial results. The Company faces significant competition for freight transportation in Canada and the U.S., including competition from other railways, motor carriers, ship and barge operators, and pipelines. Competition is based mainly on quality of service, freight rates and access to markets. Other transportation modes generally use public rights-of-way that are built and maintained by government entities, while CP and other railways must use internal resources to build and maintain their rail networks. Competition with the trucking industry is generally based on freight rates, flexibility of service and transit time performance. Any future improvements or expenditures materially increasing the quality or reducing the cost of alternative modes of transportation, or legislation that eliminates

or significantly reduces the burden of the size or weight limitations currently applicable to trucking carriers, could have a material adverse effect on CP's financial results.

The operations of carriers with which the Company interchanges may adversely affect operations. The Company's ability to provide rail services to customers in Canada and the U.S. also depends upon its ability to maintain cooperative relationships with connecting carriers with respect to, among other matters, revenue division, car supply and locomotive availability, data exchange and communications, reciprocal switching, interchange, and trackage rights. Deterioration in the operations or services provided by connecting carriers, or in the Company's relationship with those connecting carriers, could result in CP's inability to meet customers' demands or require the Company to use alternate train routes, which could result in significant additional costs and network inefficiencies and adversely affect our business, operating results, and financial condition.

The availability of qualified personnel could adversely affect the Company's operations. Changes in employee demographics, training requirements and the availability of qualified personnel, particularly locomotive engineers and trainpersons, could negatively impact the Company's ability to meet demand for rail services. Unpredictable increases in the demand for rail services may increase the risk of having insufficient numbers of trained personnel, which could have a material adverse effect on the Company's results of operations, financial condition and liquidity. In addition, changes in operations and other technology improvements may significantly impact the number of employees required to meet the demand for rail services.

Strikes or work stoppages could adversely affect the Company's operations. Class I railways are party to collective bargaining agreements with various labour unions. The majority of CP's employees belong to labour unions and are subject to these agreements. Disputes with regard to the terms of these agreements or the Company's potential inability to negotiate acceptable contracts with these unions could result in, among other things, strikes, work stoppages, slowdowns or lockouts, which could cause a significant disruption of the Company's operations and have a material adverse effect on the Company's results of operations, financial condition and liquidity. Additionally, future national labour agreements, or provisions of labour agreements related to health care, could significantly increase the Company's costs for health and welfare benefits, which could have a material adverse impact on its financial condition and liquidity.

The Company may be subject to litigation and other claims that could result in significant expenditures. By nature of its operations, the Company is exposed to potential for litigation and other claims, including personal injury claims, labour and employment disputes, commercial and contract disputes, environmental liability, freight claims and property damage claims. Accruals are made in accordance with applicable accounting standards and based on an ongoing assessment of the likelihood of success of the claim together with an evaluation of the damages or other monetary relief sought. Material changes to litigation trends, a catastrophic rail incident or series of incidents involving freight loss, property damage, personal injury, environmental liability, or other claims, and other significant matters could have a material adverse impact to the Company's results of operations, financial position and liquidity, in each case, to the extent not covered by insurance.

The Company may be affected by acts of terrorism, war, or risk of war. CP plays a critical role in the North American transportation system and therefore could become the target for acts of terrorism or war. CP is also involved in the transportation of hazardous materials, which could result in CP's equipment or infrastructure being direct targets or indirect casualties of terrorist attacks. Acts of terrorism, or other similar events, any government response thereto, and war or risk of war could cause significant business interruption to CP and may adversely affect the Company's results of operations, financial condition and liquidity.

Severe weather or natural disasters could result in significant business interruptions and costs to the Company. CP is exposed to severe weather conditions and natural disasters including earthquakes, floods, fires, avalanches, mudslides, extreme temperatures and significant precipitation that may cause business interruptions that can adversely affect the Company's entire rail network. This could result in increased costs, increased liabilities and decreased revenues, which could have a material adverse effect on the Company's results of operations, financial condition, and liquidity. Insurance maintained by the Company to protect against loss of business and other related consequences resulting from these natural occurrences is subject to coverage limitations, depending on the nature of the risk insured. This insurance may not be sufficient to cover all of the Company's damages or damages to others, and may not continue to be available at commercially reasonable rates. Even with insurance, if any natural occurrence leads to a catastrophic interruption of services, the Company may not be able to restore services without a significant interruption in operations.

The Company relies on technology and technological improvements to operate its business. Information technology is critical to all aspects of CP's business. If the Company were to experience a significant disruption or failure of one or more of its information technology or communications systems (either as a result of an intentional cyber or malicious act, or an unintentional error) it could result in service interruptions or other failures, misappropriation of confidential information and deficiencies, which could have a material adverse effect on the Company's results of operations, financial condition, and liquidity. If CP is unable to acquire or implement new technology, the Company may suffer a competitive disadvantage, which could also have an adverse effect on its results of operations, financial condition, and liquidity.

The state of capital markets could adversely affect the Company's liquidity. Weakness in the capital and credit markets could negatively impact the Company's access to capital. From time to time, the Company relies on the capital markets to provide some of its capital requirements, including the issuance of long-term debt instruments and commercial paper. Significant instability or disruptions of the capital markets and the credit markets, or deterioration of the Company's financial condition due to internal or external factors could restrict or eliminate the Company's access to, and/or significantly increase the cost of, various financing sources, including bank credit facilities and issuance of corporate bonds. Instability or disruptions of the capital markets and deterioration of

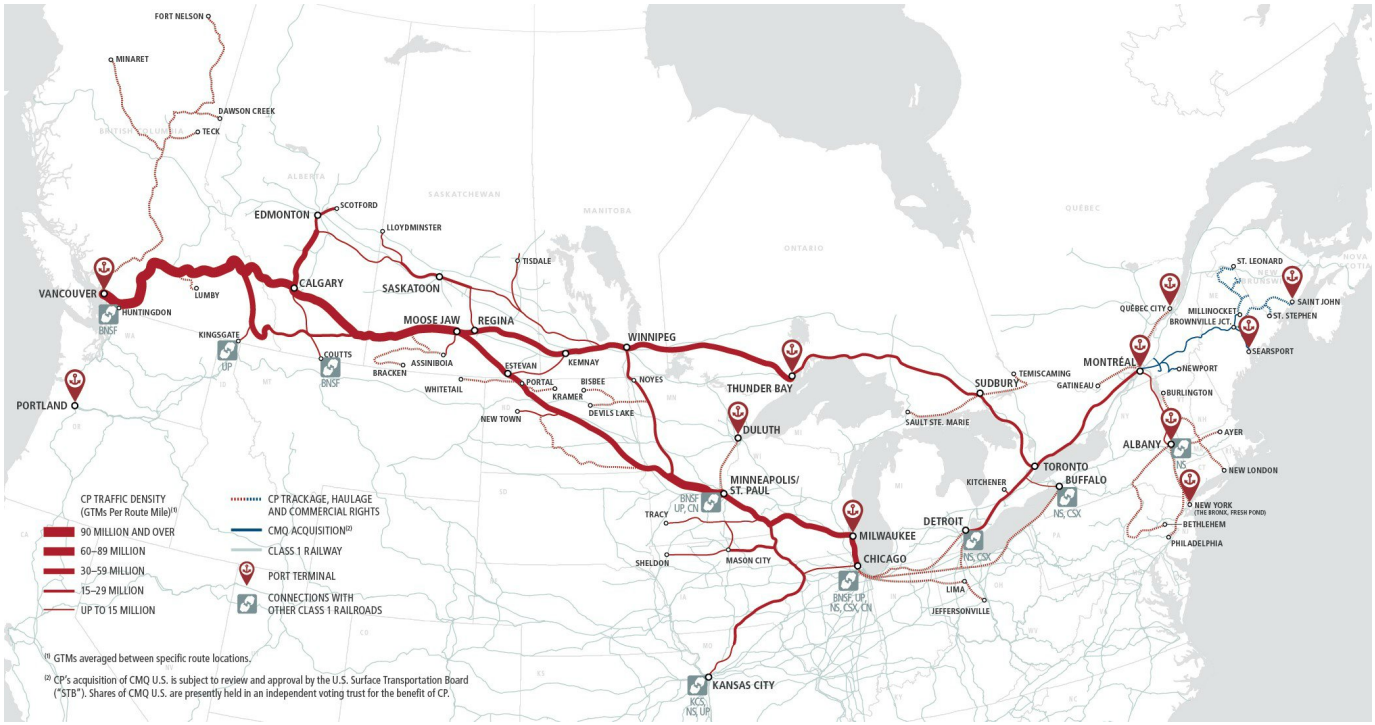
the Company's financial condition, alone or in combination, could also result in a reduction in the Company's credit rating to below investment grade, which could also further prohibit or restrict the Company from accessing external sources of short-term and long-term debt financing, and/or significantly increase the associated costs.

Disruptions within the supply chain could negatively affect the Company's operational efficiencies and increase costs. The North American transportation system is integrated. CP's operations and service may be negatively impacted by service disruptions of other transportation links, such as ports, handling facilities, customer facilities and other railways. A prolonged service disruption at one of these entities could have a material adverse effect on the Company's results of operations, financial condition, and liquidity.

The Company may be affected by fluctuating fuel prices. Fuel expense constitutes a significant portion of the Company's operating costs. Fuel prices can be subject to dramatic fluctuations, and significant price increases could have a material adverse effect on the Company's results of operations. The Company currently employs a fuel cost adjustment program to help reduce volatility in changing fuel prices, but the Company cannot be certain that it will always be able to fully mitigate rising or elevated fuel costs through this program. Factors affecting fuel prices include worldwide oil demand, international politics, weather, refinery capacity, supplier and upstream outages, unplanned infrastructure failures, and labour and political instability.

The Company is dependent on certain key suppliers of core railway equipment and materials that could result in increased price volatility or significant shortages of materials, which could adversely affect results of operations, financial condition, and liquidity. Due to the complexity and specialized nature of core railway equipment and infrastructure (including rolling stock equipment, locomotives, rail and ties), there can be a limited number of suppliers of rail equipment and materials available. Should these specialized suppliers cease production or experience capacity or supply shortages, this concentration of suppliers could result in CP experiencing cost increases or difficulty in obtaining rail equipment and materials, which could have a material adverse effect on the Company's results of operations, financial condition and liquidity. Additionally, CP's operations are dependent on the availability of diesel fuel. A significant fuel supply shortage arising from production decreases, increased demand in existing or emerging foreign markets, disruption of oil imports, disruption of domestic refinery production, damage to refinery or pipeline infrastructure, political unrest, war or other factors could have a material adverse effect on the Company's results of operations, financial position and liquidity in a particular year or quarter.

The Company may be directly and indirectly affected by the impacts of global climate change. There is potential for significant impacts to CP's infrastructure due to changes in global weather patterns. Increasing frequency, intensity and duration of extreme weather events such as flooding, storms and forest fires may result in substantial costs to respond during the event, to recover from the event and possibly to modify existing or future infrastructure requirements to prevent recurrence. The Company is currently subject to emerging regulatory programs that place a price on carbon emissions associated with railway operations in Canada. Government bodies at the provincial and federal level are imposing carbon taxation systems and cap and trade market mechanisms in the Canadian jurisdictions in which CP operates. As a significant consumer of diesel fuel, an escalating price on carbon emissions will lead to a corresponding increase of the Company's business costs. Programs that place a price on carbon emissions or other government restrictions on certain market sectors may further impact current and potential customers including thermal coal and petroleum crude oil sectors. Introduction of, or changes to, regulations by government bodies in response to these anticipated impacts could result in a significant increase in expenses and could adversely affect our business performance, results of operations, financial position, and liquidity.



ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Network Geography

The Company's network extends from the Port of Vancouver on Canada's Pacific Coast to the Port of Montréal and eastern Québec in Canada, and to the U.S. industrial centres of Chicago, Illinois; Detroit, Michigan; Buffalo and Albany, New York; Kansas City, Missouri; and Minneapolis, Minnesota.

The Company's network is composed of three primary corridors: Western, Central and Eastern.

The Western Corridor: Vancouver to Thunder Bay

Overview – The Western Corridor links Vancouver with Thunder Bay, which is the Western Canadian terminus of the Company's Eastern Corridor. With service through Calgary, the Western Corridor is an important part of the Company's routes between Vancouver and the U.S. Midwest, and between Vancouver and eastern Canada. The Western Corridor provides access to the Port of Thunder Bay, Canada's primary Great Lakes bulk terminal.

Products – The Western Corridor is the Company's primary route for bulk and resource products traffic from western Canada to the Port of Vancouver for export. CP also handles significant volumes of international intermodal containers and domestic general merchandise traffic.

Feeder Lines – CP supports its Western Corridor with four significant feeder lines: the "Coal Route", which links southeastern B.C. coal deposits to the Western Corridor and to coal terminals at the Port of Vancouver; the "Edmonton-Calgary Route", which provides rail access to Alberta's Industrial Heartland (north of Edmonton, Alberta) in addition to the petrochemical facilities in central Alberta; the "Pacific CanAm Route", which connects Calgary and Medicine Hat in Alberta with Pacific Northwest rail routes at Kingsgate, B.C. via the Crowsnest Pass in Alberta; and the "North Main Line Route" that provides rail service to customers between Portage la Prairie, Manitoba, and Wetaskiwin, Alberta, including intermediate stations Yorkton and Saskatoon in Saskatchewan. This line is an important collector of Canadian grain and fertilizer, serving the potash mines located east and west of Saskatoon and many high-throughput grain elevators and processing facilities. In addition, this line provides direct access to refining and upgrading facilities at Lloydminster, Alberta, and western Canada's largest pipeline terminal at Hardisty, Alberta.

Connections – The Company's Western Corridor connects with the Union Pacific Railroad ("UP") at Kingsgate and with BNSF at Coutts, Alberta, and at New Westminster and Huntingdon in B.C. This corridor also connects with CN at many locations including Thunder Bay, Winnipeg, Manitoba, Regina and Saskatoon in Saskatchewan, Red Deer, Camrose, Calgary and Edmonton in Alberta, Kamloops and several locations in the Greater Vancouver area in B.C.

Yards and Repair Facilities – CP supports rail operations on the Western Corridor with main rail yards at Vancouver, Calgary, Edmonton, Moose Jaw in Saskatchewan, Winnipeg and Thunder Bay. The Company has locomotive and railcar repair facilities at Golden in B.C., Vancouver, Calgary, Moose Jaw and Winnipeg. CP also has major intermodal terminals at Vancouver, Calgary, Edmonton, Regina and Winnipeg.

The Central Corridor: Moose Jaw and Winnipeg to Chicago and Kansas City

Overview – The Central Corridor connects with the Western Corridor at Moose Jaw and Winnipeg. By running south to Chicago and Kansas City, through the Twin Cities of Minneapolis and St. Paul, Minnesota, and through Milwaukee, Wisconsin, CP provides a direct, single-carrier route between western Canada and the U.S. Midwest, providing access to Great Lakes and Mississippi River ports. From La Crosse, Wisconsin, the Central Corridor continues south towards Kansas City via the Quad Cities (Davenport and Bettendorf in Iowa, and Rock Island and Moline in Illinois), providing an efficient route for traffic destined for southern U.S. and Mexican markets. CP's Kansas City line also has a direct connection into Chicago and by extension to points east on CP's network such as Toronto, Ontario and the Port of Montréal in Québec.

Products – Traffic transported on the Central Corridor includes intermodal containers from the Port of Vancouver, fertilizers, chemicals, crude, frac sand, Automotive, and Grain and other agricultural products.

Feeder Lines – The Company has operating rights over BNSF tracks between Minneapolis and St. Paul along with connectivity to the twin ports of Duluth, Minnesota and Superior, Wisconsin. CP maintains its own yard facilities that provide an outlet for grain from the U.S. Midwest to the grain terminals at these ports. This is a strategic entry point for large dimensional shipments that can be routed via CP's network to locations such as Alberta's Industrial Heartland to serve the needs of the oil sands and energy industry. CP's route from Winona, Minnesota, to Tracy, Minnesota, provides access to key agricultural and industrial commodities. CP's feeder line between Drake and New Town in North Dakota is geographically situated in a highly strategic region for Bakken oil production. CP also owns two significant feeder lines in North Dakota and western Minnesota operated by the Dakota Missouri Valley and Western Railroad and the Northern Plains Railroad, respectively. Both of these short lines are also active in providing service to agricultural and Bakken-oil-related customers.

Connections – The Company's Central Corridor connects with all major railways at Chicago. Outside of Chicago, CP has major connections with BNSF at Minneapolis, Minot, North Dakota, and the Duluth-Superior Terminal and with UP at St. Paul and Mankato, Minnesota. CP connects with CN at Milwaukee and Chicago. At Kansas City, CP connects with Kansas City Southern ("KCS"), BNSF, Norfolk Southern Railway ("NS") and UP. CP's Central Corridor also links to several short-line railways that primarily serve grain and coal producing areas in the U.S., and extend CP's market reach in the rich agricultural areas of the U.S. Midwest. A haulage arrangement with Genesee & Wyoming Inc., provides Intermodal service to Jeffersonville, Ohio.

Yards and Repair Facilities – The Company supports rail operations on the Central Corridor with main rail yards in Chicago, Milwaukee, St. Paul and Glenwood in Minnesota, and Mason City and Davenport in Iowa. In addition, CP has a major locomotive repair facility at St. Paul and car repair facilities at St. Paul and Chicago. CP shares a yard with KCS in Kansas City. CP owns 49% of the Indiana Harbor Belt Railroad, a switching railway serving Greater Chicago and northwest Indiana. CP is also part owner of the Belt Railway Company of Chicago, which is the largest intermediate switching terminal railroad in the U.S. CP has major intermodal terminals in Minneapolis and Chicago as well as a dried distillers' grains transload facility that complements the service offering in Chicago.

The Eastern Corridor: Thunder Bay to Eastern Québec, Detroit and Albany

Overview – The Eastern Corridor extends from Thunder Bay through to the Port of Montréal and eastern Québec, and from Toronto to Chicago via Windsor, Ontario and Detroit or Buffalo. The Company's Eastern Corridor provides shippers direct rail service from Toronto, Montréal, and eastern Québec to Calgary and Vancouver via the Company's Western Corridor and to the U.S. via the Central Corridor. This is a key element of the Company's transcontinental intermodal service. The corridor also supports the Company's market position at the Port of Montréal by providing one of the shortest rail routes for European cargo destined to the U.S. Midwest, using the CP-owned route between Montréal and Detroit, coupled with a trackage rights arrangement on NS tracks between Detroit and Chicago. CP's acquisition of CMQ Canada provides access through southern and eastern Québec into the U.S. Northeast and Atlantic Canada.

Products – Major traffic categories transported in the Eastern Corridor include Forest products, chemicals and plastics, crude, ethanol, Metals, minerals and consumer products, intermodal containers, automotive products and general merchandise.

Feeder Lines – A major feeder line serves the steel industry at Hamilton, Ontario and provides connections with both CSX Corporation ("CSX") and NS at Buffalo. The Delaware & Hudson Railway Company, Inc. ("D&H") feeder line extends from Montréal to Albany.

Connections – The Eastern Corridor connects with a number of short-line railways including routes from Montréal to Québec City, Québec and Montréal to Saint John, New Brunswick, and Searsport, Maine. Connections are also made with PanAm Southern at Mechanicville, New York, for service to the Boston and New England areas, and the Vermont Railway at Whitehall, New York. Through haulage arrangements, CP has service to Fresh Pond, New York, to connect with New York & Atlantic Railway as well as direct access to the Bronx and Queens. CP can also access Philadelphia as well as a number of short-lines in Pennsylvania. Connections are also made with CN at a number of locations, including Sudbury, North Bay, Windsor, London, Hamilton and Toronto in Ontario, and Montréal in Québec. CP also connects in New York with the two eastern Class I railways; NS and CSX at Buffalo, NS at Schenectady and CSX at Albany.

Yards and Repair Facilities – CP supports its rail operations in the Eastern Corridor with major rail yards at Sudbury, Toronto, London and Montréal. The Company has locomotive repair facilities at Montréal and Toronto and car repair facilities at Thunder Bay, Toronto and Montréal. The Company's largest intermodal facility is located in the northern Toronto suburb of Vaughan and serves the Greater Toronto and southwestern Ontario areas. CP also operates intermodal terminals at Montréal and Detroit. CP also has transload facilities in Agincourt and Hamilton, Ontario to meet a variety of commodity needs in the area.

Right-of-Way

The Company's rail network is standard gauge, which is used by all major railways in Canada, the U.S. and Mexico. Continuous welded rail is used on the core main line rail network.

CP uses different train control systems on portions of the Company's owned track, depending on the volume of rail traffic. Remotely controlled centralized traffic control signals are used in various corridors to authorize the movement of trains. CP has implemented PTC on 2,117 miles of its U.S. network.

In other corridors, train movements are directed by written instructions transmitted electronically and by radio from rail traffic controllers to train crews. In some specific areas of intermediate traffic density, CP uses an automatic block signalling system in conjunction with written instructions from rail traffic controllers.

Network Investment

The Company continually assesses its network to ensure appropriate capacity to meet market demand. As part of CP's annual capital program, the Company has made substantial investments to support current and future volumes, including upgrading the network to handle longer and heavier trains, such as extending sidings to accommodate new train lengths. The Company's operating metrics, such as average train speed, length and weight, demonstrate efficient utilization of network capacity, discussed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Performance Indicators.

Track and Infrastructure

CP operates on a network of approximately 12,700 miles of track, not including 244 miles of tracks owned and operated by CMQ U.S. 237 miles of first main track and 81 miles of sidings and yard tracks have been acquired through the CMQ Canada transaction and is included below. CP has access to 2,200 miles under trackage rights. The Company's owned track miles includes leases with wholly owned subsidiaries where the term of the lease exceeds 99 years. CP's track network represents the size of the Company's operations that connects markets, customers and other railways. Of the total mileage operated, approximately 5,400 miles are located in western Canada, 2,500 miles in eastern Canada, 4,400 miles in the U.S. Midwest and 400 miles in the U.S. Northeast. CP's network accesses the U.S. markets directly through three wholly owned subsidiaries: Soo Line Railroad Company ("Soo Line"), a Class I railway operating in the U.S. Midwest; the Dakota, Minnesota and Eastern Railroad ("DM&E"), a wholly owned subsidiary of the Soo Line, which operates in the U.S. Midwest; and the D&H, which operates between eastern Canada and the U.S. Northeast.

At December 31, 2019, the breakdown of CP operated track miles is as follows:

	Total
First main track	12,683
Second and other main track	1,088
Passing sidings and yard track	4,353
Industrial and way track	779
Total track miles	**18,903**

Rail Facilities

CP operates numerous facilities including: terminals for intermodal, transload, automotive and other freight; classification rail yards for train-building and switching, storage-in-transit and other activities; offices to administer and manage operations; dispatch centres to direct traffic on the rail network; crew quarters to house train crews along the rail line; shops and other facilities for fuelling; maintenance and repairs of locomotives; and facilities for maintenance of freight cars and other equipment. The Company continues to invest in terminal upgrades and new facilities to accommodate incremental growth in volumes, such as creating additional capacity with the redesign of the classification yard at Alyth in Calgary. The Company's average terminal dwell is an indicator of efficient utilization of yard capacity, discussed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Performance Indicators. Typically in all of our major yards, CP Police Services has offices to ensure the safety and security of the yards and operations.

The following table includes the major yards, terminals and transload facilities on CP's network:

Major Classification Yards	Major Intermodal Terminals	Transload Facilities
Vancouver, British Columbia	Vancouver, British Columbia	Vancouver, British Columbia
Calgary, Alberta	Calgary, Alberta	Toronto, Ontario
Edmonton, Alberta	Edmonton, Alberta	Hamilton, Ontario
Moose Jaw, Saskatchewan	Regina, Saskatchewan	Lachine, Québec
Winnipeg, Manitoba	Winnipeg, Manitoba	
Toronto, Ontario	Vaughan, Ontario	
Montréal, Québec	Montréal, Québec	
Chicago, Illinois	Chicago, Illinois	
St. Paul, Minnesota	Minneapolis, Minnesota	

Equipment

CP's equipment includes: owned and leased locomotives and railcars; heavy maintenance equipment and machinery; other equipment and tools in our shops, offices and facilities; and vehicles for maintenance, transportation of crews, and other activities. In this section, owned equipment includes units acquired by CP, equipment leased to third parties, and units held under finance leases, and leased equipment includes units under a short-term or long-term operating lease.

The Company's locomotive fleet is composed of largely high-adhesion alternating current locomotives that are more fuel efficient and reliable and have superior hauling capacity as compared with standard direct current locomotives. The Company is continuing a modernization program on several of the oldest locomotives in the fleet in order to improve reliability and availability, as well as to introduce new technology to the fleet. CP's locomotive productivity, defined as the daily average gross ton-miles ("GTMs") divided by daily average operating horsepower, for the years ended December 31, 2019, 2018, and 2017, was 202, 198, and 201 GTMs per Operating horsepower, respectively. Operating horsepower excludes units offline, tied up or in storage, or in use on other railways, and includes foreign units online. As of December 31, 2019, the Company had 314 locomotives in storage. As a result, the Company does not foresee the need to acquire new locomotives for the next several years. As of December 31, 2019, CP owned or leased the following locomotive units:

Locomotives	Owned	Leased	Total	Average Age (in years)
Line haul	731	88	819	13
Road switcher	560	—	560	28
Total locomotives	**1,291**	**88**	**1,379**	**19**

CP's average in-service utilization percentage for freight cars, for the years ended December 31, 2019, 2018, and 2017, was 81%, 84%, and 84%, respectively. Average in-service utilization is defined as average active fleet for the year divided by total cars, excluding company service cars and tank cars as these are utilized only as required for non-revenue movements. As of December 31, 2019, CP owned and leased the following units of freight cars:

Freight cars	Owned	Leased	Total	Average Age (in years)
Box car	2,594	250	2,844	30
Covered hopper	7,607	9,699	17,306	24
Flat car	1,461	770	2,231	26
Gondola	3,648	1,440	5,088	21
Intermodal	1,319	150	1,469	15
Multi-level autorack	2,894	719	3,613	26
Company service car	2,396	174	2,570	45
Open top hopper	105	—	105	32
Tank car	33	9	42	12
Total freight cars	**22,057**	**13,211**	**35,268**	**25**

As of December 31, 2019, CP owned and leased the following units of intermodal equipment:

Intermodal equipment	Owned	Leased	Total	Average Age (in years)
Containers	8,804	—	8,804	7
Chassis	6,290	601	6,891	11
Total intermodal equipment	**15,094**	**601**	**15,695**	**9**

Headquarters Office Building

CP owns and operates a multi-building campus in Calgary encompassing the head office building, a data centre, training facility and other office and operational buildings.

The Company's main dispatch centre is located in Calgary, and is the primary dispatching facility in Canada. Rail traffic controllers coordinate and dispatch crews, and manage the day-to-day locomotive management along the network, 24 hours a day, and seven days a week. The operations centre has a complete backup system in the event of any power disruption.

In addition to fully operational redundant systems, CP has a fully integrated Business Continuity Centre, should CP's operations centre be affected by any natural disaster, fire, cyber-attack or hostile threat.

CP also maintains a secondary dispatch centre located in Minneapolis, where a facility similar to the one in Calgary exists. It services the dispatching needs of locomotives and train crews working in the U.S.

Capital Expenditures

The Company incurs expenditures to expand and enhance its rail network, rolling stock and other infrastructure. These expenditures are aimed at improving efficiency and safety of our operations. Such investments are also an integral part of the Company's multi-year capital program and support growth initiatives. For further details, refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity and Capital Resources.

Encumbrances

Refer to Item 8. Financial Statements and Supplementary Data, Note 18 Debt, for information on the Company's finance lease obligations and assets held as collateral under these agreements.

ITEM 3. LEGAL PROCEEDINGS

For further details, refer to Item 8. Financial Statements and Supplementary Data, Note 26 Commitments and contingencies.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

Our executive officers are appointed by the Board of Directors and they hold office until their successors are appointed, subject to resignation, retirement or removal by the Board of Directors. There are no family relationships among our officers, nor any arrangement or understanding between any officer and any other person pursuant to which the officer was selected. As of the date of this filing, the executive officers' names, ages and business experience are:

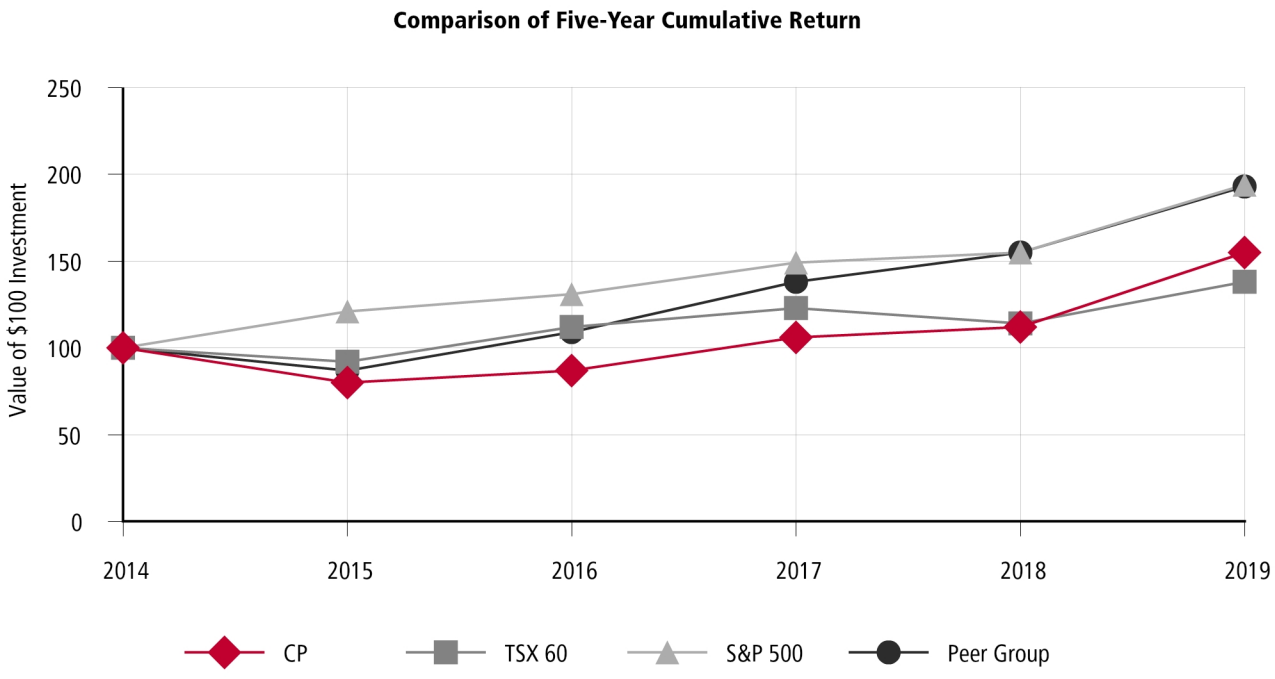
Name, Age and Position	Business Experience
Keith Creel, 51 President and Chief Executive Officer	Mr. Creel became President and CEO of CP on January 31, 2017. Previously, he was President and Chief Operating Officer ("COO") from February 5, 2013, to January 30, 2017. Prior to joining CP, Mr. Creel was Executive Vice-President and COO at CN from January 2010 to February 2013. During his time at CN, Mr. Creel held various positions including Executive Vice-President, Operations, Senior Vice-President Eastern Region, Senior Vice-President Western Region, and Vice-President of the Prairie Division. Mr. Creel began his railroad career at Burlington Northern Railway in 1992 as an intermodal ramp manager in Birmingham, Alabama. He also spent part of his career at Grand Trunk Western Railroad as a superintendent and general manager, and at Illinois Central Railroad as a trainmaster and director of corridor operations, prior to its merger with CN in 1999.
Mark Redd, 49 Executive Vice-President, Operations	Mr. Redd has been Executive Vice-President Operations since September 1, 2019. Before this appointment, he was Senior Vice-President Operations Western Region from February 2, 2017 to August 31, 2019 and Vice-President Operations Western Region from April 20, 2016 to February 1, 2017. Previous to these roles, he was General Manager Operations U.S. West and General Manager Operations Central Division. He was named CP's 2016 Railroader of the Year. Prior to joining CP in October 2013, Mr. Redd worked for over 20 years at Kansas City Southern Railway where he held a variety of leadership positions in network and field operations. Mr. Redd holds bachelor and Master of Business Administration ("MBA") degrees from the University of Missouri – Kansas City.
Nadeem Velani, 47 Executive Vice-President and Chief Financial Officer	Mr. Velani has been Executive Vice-President and CFO of CP since October 17, 2017. Previous to this appointment, he was the Vice-President and CFO of CP from October 19, 2016 to October 16, 2017, Vice-President, Investor Relations from October 28, 2015 and Assistant Vice-President, Investor Relations from March 11, 2013. Prior to joining CP, Mr. Velani spent 15 years at CN where he worked in a variety of positions in Strategic and Financial Planning, Investor Relations, Sales and Marketing, and the Office of the President and CEO. Mr. Velani holds a Bachelor of Economics degree from Western University and an MBA in Finance/International Business from McGill University.
John Brooks, 49 Executive Vice-President and Chief Marketing Officer	Mr. Brooks has been Executive Vice-President and Chief Marketing Officer ("CMO") of CP since February 14, 2019. Previous to this appointment, he was the Senior Vice-President and CMO of CP from February 14, 2017 to February 13, 2019. He has worked in senior marketing roles at CP since he joined the Company in 2007, most recently as Vice-President, Marketing – Bulk and Intermodal. Mr. Brooks began his railroading career with UP and later helped start I&M Rail Link, LLC, which was purchased by DM&E in 2002. Mr. Brooks was Vice-President, Marketing at DM&E prior to it being acquired by CP in 2007. With more than 20 years in the railroading business, Mr. Brooks brings a breadth of experience to the CMO role that is pivotal to CP's continued and future success.
James Clements, 50 Senior Vice-President, Strategic Planning and Technology Transformation	Mr. Clements has been Senior Vice-President, Strategic Planning and Technology Transformation since September 1, 2019. Before this appointment, he was the Vice-President, Strategic Planning and Transportation Services of CP since 2014. Mr. Clements has responsibilities that include strategic network issues, Network Service Centre operations and Information Services. In addition, he has responsibility for all of CP's facilities and real estate across North America. Mr. Clements has been at CP for 25 years and his previous experience covers a wide range of areas of CP's business, including car management, finance, joint facilities agreements, logistics, grain marketing and sales in both Canada and the U.S., as well as marketing and sales responsibility for various other lines of business at CP. He has an MBA in Finance/International Business from McGill University and a Bachelor of Science in Computer Science and Mathematics from McMaster University.

Jeffrey Ellis, 52 Chief Legal Officer and Corporate Secretary	Mr. Ellis has been Chief Legal Officer and Corporate Secretary of CP since November 23, 2015. Mr. Ellis is accountable for the overall strategic leadership, oversight and performance of the legal, corporate secretarial, government relations and public affairs functions of CP in Canada and the U.S. Prior to joining CP in 2015, Mr. Ellis was the U.S. General Counsel at BMO Financial Group. Before joining BMO in 2006, Mr. Ellis was with the law firm of Borden Ladner Gervais LLP in Toronto, Ontario. Mr. Ellis has Bachelor of Arts and Master of Arts degrees from the University of Toronto, Juris Doctor and Master of Laws degrees from Osgoode Hall Law School, and an MBA from the Richard Ivey School of Business, Western University. Mr. Ellis is a member of the bars of New York, Illinois, Ontario and Alberta.
Mike Foran, 46 Vice-President, Market Strategy and Asset Management	Mr. Foran has been Vice-President, Market Strategy and Asset Management of CP since February 14, 2017. His prior roles with CP include Vice-President Network Transportation from 2014 to 2017, Assistant Vice-President Network Transportation from 2013 to 2014, and General Manager – Asset Management from 2012 to 2013. In over 20 years at CP, Mr. Foran has worked in operations, business development, marketing and general management. Mr. Foran holds an Executive MBA from the Ivey School of Business at Western University and a Bachelor of Commerce from the University of Calgary.
Michael Redeker, 59 Vice-President and Chief Information Officer	Mr. Redeker has been Vice-President and Chief Information Officer ("CIO") of CP since October 15, 2012. Prior to joining CP, Mr. Redeker was Vice-President and CIO of Alberta Treasury Branch from May 2007 to September 2012. He also spent 11 years at IBM Canada, where he focused on delivering quality information technology services within the financial services industry.
Laird Pitz, 75 Senior Vice-President and Chief Risk Officer	Mr. Pitz has been Senior Vice-President and Chief Risk Officer ("CRO") of CP since October 17, 2017. Previously, he was the Vice-President and CRO of CP from October 29, 2014 to October 16, 2017 and the Vice-President, Security and Risk Management of CP from April 2014 to October 2014. Prior to joining CP, Mr. Pitz was retired from March 2012 to April 2014, and Vice-President, Risk Mitigation of CN from September 2003 to March 2012. Mr. Pitz, a Vietnam War veteran and former Federal Bureau of Investigation special agent, is a 40-year career professional who has directed strategic and operational risk mitigation, security and crisis management functions for companies operating in a wide range of fields, including defence, logistics and transportation.
Chad Rolstad, 43 Vice-President, Human Resources and Chief Culture Officer	Mr. Rolstad has been Vice-President, Human Resources since February 14, 2019 and the Chief Culture Officer since September 1, 2019. Previous to this appointment, he was Assistant Vice-President, Human Resources of CP from August 1, 2018 to February 13, 2019 and Assistant Vice-President, Strategic Procurement of CP from April 10, 2017 to July 31, 2018. Prior to joining CP, Mr. Rolstad held various leadership positions at BNSF Railway in marketing and operations. Mr. Rolstad has a Bachelor of Science from the Colorado School of Mines and an MBA from Duke University.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Share Information



The Common Shares are listed on the TSX and on the NYSE under the symbol "CP".

Share Capital

At February 18, 2020, the latest practicable date prior to the date of this Annual Report on Form 10-K, there were 136,748,767 Common Shares and no preferred shares issued and outstanding, which consists of 13,928 holders of record of the Common Shares. In addition, CP has a Management Stock Option Incentive Plan ("MSOIP"), under which key officers and employees are granted options to purchase the Common Shares. Each option granted can be exercised for one Common Share. At February 18, 2020, 1,569,063 options were outstanding under the MSOIP and stand-alone option agreements entered into with Mr. Keith Creel. There are 895,948 options available to be issued by the Company's MSOIP in the future. CP has a Director's Stock Option Plan ("DSOP"), under which directors are granted options to purchase Common Shares. There are no outstanding options under the DSOP, which has 340,000 options available to be issued in the future.

Stock Performance Graph

The following graph provides an indicator of cumulative total shareholder return on the Common Shares, of an assumed investment of $100, as compared to the TSX 60 Index ("TSX 60"), the Standard & Poor's 500 Stock Index ("S&P 500"), and the peer group index (comprising CN, KCS, UP, NS and CSX) on December 31 for each of the years indicated. The values for the assumed investments depicted on the graph and in the table have been calculated assuming that any dividends are reinvested.

Issuer Purchase of Equity Securities

CP has established a share repurchase program which is further described in Item 8. Financial Statements and Supplementary Data, Note 22 Shareholders' equity. During 2019, CP repurchased 3.8 million Common Shares for $1,141 million at a weighted average price of $300.65. The following table presents the number of Common Shares repurchased during each month for the fourth quarter of 2019 and the average price paid by CP for the repurchase of such Common Shares.

2019	Total number of shares purchased[1]	Average price paid per share[2]	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares (or units) that may yet be purchased under the plans or programs
October 1 to October 31	312,279	$ 284.65	312,279	—
November 1 to November 30	—	—	—	—
December 1 to December 31	298,409	333.96	298,409	4,502,453
Ending Balance	**610,688**	**$ 308.74**	**610,688**	**N/A**

[1] Includes shares repurchased but not yet cancelled at quarter end.

[2] Includes brokerage fees.

ITEM 6. SELECTED FINANCIAL DATA

The following table presents as of, and for the years ended, December 31, selected financial data related to the Company's financial results for the last five fiscal years. The selected financial data should be read in conjunction with Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8. Financial Statements and Supplementary Data.

For information regarding historical exchange rates, please see Impact of Foreign Exchange on Earnings in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(1) These measures have no standardized meanings prescribed by accounting principles generally accepted in the United States of America ("GAAP") and, therefore, may not be comparable to similar measures presented by other companies. These measures are defined and reconciled in Non-GAAP Measures in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(2) Current period amount is as reported in compliance with GAAP following the adoption of Accounting Standards Update ("ASU") 2016-02 under the cumulative effect adjustment transition approach, discussed further in Item 8. Financial Statements and Supplementary Data, Note 2 Accounting changes. The comparative periods' amounts have not been restated and continue to be reported under the accounting standards in effect for those periods.

(3) Operating ratio is defined as operating expenses divided by revenues.

(4) Dividend payout ratio is defined as dividends declared per share divided by Diluted EPS.

(5) Long-term debt to Net income ratio is defined as long-term debt, including long-term debt maturing within one year, divided by Net income.

The following discussion and analysis should be read in conjunction with the Company's Consolidated Financial Statements and the related notes in Item 8. Financial Statements and Supplementary Data, and other information in this annual report. Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars.

Executive Summary

2019 Results

- **Financial performance** – In 2019, CP reported Diluted earnings per share ("EPS") of $17.52, a 29% increase from $13.61 in 2018. Adjusted diluted EPS increased to $16.44, a 13% improvement compared to $14.51 in 2018. CP's commitment to service and operational efficiency produced an Operating ratio of 59.9%. Adjusted diluted EPS is defined and reconciled in Non-GAAP Measures and discussed further in Results of Operations of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

- **Total revenues** – CP's Total revenues increased by 7% to $7,792 million in 2019 from $7,316 million in 2018, driven primarily by higher freight rates.

- **Operating performance** – CP's average train speed increased by 3% to 22.2 miles per hour and average dwell time decreased by 6% to 6.4 hours in 2019 primarily due to the completion of network infrastructure projects which improved network fluidity. Average train weight remained relatively unchanged at 9,129 tons and average train length increased by 1% to 7,388 feet due to improvements in operating plan efficiency, in each case compared to 2018. These metrics are discussed further in Performance Indicators of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following table compares 2019 outlook to actual results:

	RTM growth	Adjusted diluted EPS[1]	Capital expenditures
Outlook	Mid-single digits Revised at the end of the third quarter to low-single digits	Double-digit Adjusted diluted EPS growth from full-year 2018 Adjusted diluted EPS of $14.51	Approximately $1.60 billion
Actual outcomes	Revenue ton-miles ("RTMs") increased by 171 million, or 0.1%	Adjusted diluted EPS growth of 13% to $16.44	$1.65 billion

[1] Adjusted diluted EPS is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. As described in the 2020 Outlook section below, CP had not calculated an outlook for Diluted EPS in 2019.

The update in RTM volume expectations was due to delays in the Canadian grain harvest and export potash volumes, as well as general macroeconomic softness. During the fourth quarter of 2019, CP's volumes were lower primarily due to decreased shipments of export potash, Coal and Metals, minerals and consumer products. This decrease was partially offset by increased volumes of crude, and Intermodal.

2020 Outlook

With a 2020 plan that encompasses profitable sustainable growth, CP expects RTM growth to be in the mid-single digit and Adjusted diluted EPS growth to be in the high single-digit to low double-digits. CP's expectations for Adjusted diluted EPS growth in 2020 are based on Adjusted diluted EPS of $16.44 in 2019. For the purposes of this outlook, CP assumes an effective tax rate of 25 percent. CP estimates other components of net periodic benefit recovery to decrease by approximately $40 million versus 2019. As CP continues to invest in service, productivity and safety, the Company plans to invest approximately $1.6 billion in capital programs in 2020. Capital programs are defined and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Adjusted diluted EPS is defined and discussed further in Non-GAAP Measures and in Forward-Looking Statements of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Although CP has provided a forward-looking Non-GAAP measure (Adjusted diluted EPS), management is unable to reconcile, without unreasonable efforts, the forward-looking Adjusted diluted EPS to the most comparable GAAP measure, due to unknown variables and uncertainty related to future results. These unknown variables may include unpredictable transactions of significant value. In past years, CP has recognized significant asset impairment charges, management transition costs related to senior executives and discrete tax items. These or other similar, large unforeseen transactions affect diluted EPS but may be excluded from CP's Adjusted diluted EPS. Additionally, the U.S.-to-Canadian dollar exchange rate is unpredictable and can have a significant impact on CP's reported results but may be excluded from CP's Adjusted diluted EPS. In particular, CP excludes the foreign exchange ("FX") impact of translating the Company's debt and lease liabilities, the impact from changes in income tax rates and a provision for uncertain tax item from Adjusted diluted EPS. Please see Forward-Looking Statements of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

Performance Indicators

The following table lists the key measures of the Company's operating performance:

For the year ended December 31	2019	2018[1]	2017[1]	% Change 2019 vs. 2018	% Change 2018 vs. 2017
Operations Performance					
Gross ton-miles ("GTMs") (millions)	**280,724**	275,362	252,195	2	9
Train miles (thousands)	**32,924**	32,312	30,632	2	5
Average train weight – excluding local traffic (tons)	**9,129**	9,100	8,806	—	3
Average train length – excluding local traffic (feet)	**7,388**	7,313	7,214	1	1
Average terminal dwell (hours)	**6.4**	6.8	6.6	(6)	3
Average train speed (miles per hour, or "mph")	**22.2**	21.5	22.6	3	(5)
Fuel efficiency (U.S. gallons of locomotive fuel consumed /1,000 GTMs)	**0.955**	0.953	0.980	—	(3)
Total employees (average)	**13,103**	12,756	12,083	3	6
Total employees (end of period)	**12,694**	12,840	12,215	(1)	5
Workforce (end of period)	**12,732**	12,866	12,294	(1)	5
Safety Indicators					
FRA personal injuries per 200,000 employee-hours	**1.42**	1.48	1.65	(4)	(10)
FRA train accidents per million train-miles	**1.06**	1.10	0.99	(4)	11

[1] Certain figures have been updated to reflect new information or have been revised to conform with current presentation.

Operations Performance

These key measures of operating performance reflect how effective CP's management is at controlling costs and executing the Company's operating plan and strategy. CP continues to drive further productivity improvements in its operations, allowing the Company to deliver superior service and grow its business at low incremental cost.

A **GTM** is defined as the movement of one ton of train weight over one mile. GTMs are calculated by multiplying total train weight by the distance the train moved. Total train weight comprises the weight of the freight cars, their contents, and any inactive locomotives. An increase in GTMs indicates additional workload. GTMs for 2019 were 280,724 million, a 2% increase compared with 275,362 million in 2018. This increase was primarily driven by increased volumes of Energy, chemicals and plastics and Intermodal. This increase was partially offset by decreased volumes of Potash, frac sand and Coal.

GTMs in 2018 were 275,362 million, a 9% increase compared with 252,195 million in 2017. This increase was primarily driven by increased volumes of Energy, chemicals and plastics, Potash, and Intermodal, partially offset by decreased shipments of U.S. grain.

Train miles are defined as the sum of the distance moved by all trains operated on the network. Train miles for 2019 were 32,924 thousands, an increase of 2% compared with 32,312 thousands in 2018. This reflects the impact of higher GTMs in 2019.

Train miles in 2018 were 32,312, an increase of 5% compared with 30,632 thousands in 2017. This reflects the impact of higher volumes partially offset by continuous improvements in train weights as evident in the relative comparison to GTMs, which grew by 9% in 2018.

Average train weight is defined as the average gross weight of CP trains, both loaded and empty. This excludes trains in short-haul service, work trains used to move CP's track equipment and materials, and the haulage of other railways' trains on CP's network. Average train weight of 9,129 tons in 2019 increased by 29 tons compared with 9,100 tons in 2018. This slight increase was a result of improvements in operating plan efficiency. This increase was partially offset by the implementation of CP's winter contingency plan in the first quarter of 2019 resulting in shorter and lighter trains within the operating plan.

Average train weight of 9,100 tons in 2018 increased by 294 tons, or 3%, from 8,806 tons in 2017. This increase was due to continuous improvements in operating plan efficiency, as well as higher volumes of heavier commodities, such as crude and Potash, compared to the same period in 2017.

Average train length is defined as the average total length of CP trains, both loaded and empty. This includes all cars and locomotives on the train and is calculated as the sum of each car or locomotive's length multiplied by the distance travelled, divided by train miles. Local trains are excluded from this measure.

Average train length of 7,388 feet in 2019 increased by 75 feet, or 1%, compared with 7,313 feet in 2018. This was a result of improvements in operating plan efficiency and increased Intermodal volumes which move on longer trains. This increase was partially offset by the implementation of CP's winter contingency plan in the first quarter of 2019 resulting in shorter and lighter trains within the operating plan.

Average train length of 7,313 feet in 2018 increased by 99 feet, or 1%, from 7,214 feet in 2017. This was a result of improvements in operating plan efficiency and increased Intermodal and Potash volumes, which move in longer trains.

Average terminal dwell is defined as the average time a freight car resides within terminal boundaries expressed in hours. The timing starts with a train arriving at the terminal, a customer releasing the car to the Company, or a car arriving at interchange from another railway. The timing ends when the train leaves, a customer receives the car from CP, or the freight car is transferred to another railway. Freight cars are excluded if they are being stored at the terminal or used in track repairs. Average terminal dwell of 6.4 hours in 2019 decreased by 6% from 6.8 hours in 2018. This favourable decrease was due to improved network fluidity.

Average terminal dwell of 6.8 hours in 2018 increased by 3% from 6.6 hours in 2017. This unfavourable increase was primarily due to:
- network disruptions from labour negotiations in the second quarter of 2018;
- harsher weather conditions and increased network disruptions in the first quarter of 2018; and
- higher volumes in the second half of the year and increased delays from accelerated track and roadway capital programs in the third quarter of 2018.

Average train speed is defined as a measure of the line-haul movement from origin to destination including terminal dwell hours. It is calculated by dividing the total train miles travelled by the total train hours operated. This calculation does not include delay time related to customers or foreign railways and excludes the time and distance travelled by: i) trains used in or around CP's yards; ii) passenger trains; and iii) trains used for repairing track. Average train speed was 22.2 mph in 2019, an increase of 3%, from 21.5 mph in 2018. This increase in speed was due to the completion of network infrastructure projects, partially offset by the impact of harsh winter operating conditions and network disruptions in the first quarter of 2019.

Average train speed in 2018 was 21.5 mph, a decrease of 5%, from 22.6 mph in 2017. This decrease was primarily due to:
- network disruptions from labour negotiations in the second quarter of 2018;
- harsher weather conditions and increased network disruptions in the first quarter of 2018; and
- higher volumes and increased delays from accelerated track and roadway capital programs in the third quarter of 2018.

This decrease was partially offset by the completion of roadway capital programs, resulting in improved network fluidity in the fourth quarter of 2018.

Fuel efficiency is defined as U.S. gallons of locomotive fuel consumed per 1,000 GTMs. Fuel consumed includes gallons used in freight, yard and commuter service but excludes fuel used in capital projects and other non-freight activities. Fuel efficiency for 2019 of 0.955 U.S. gallons/1,000 GTMs was flat compared to 2018, and improved by 3% in 2018 compared to 2017. The improvement in fuel efficiency in 2018 compared to 2017 was primarily due to improved productivity from running longer trains.

Total Employees and Workforce

An **employee** is defined by the Company as an individual currently engaged in full-time, part-time or seasonal employment with CP. The average number of total employees for 2019 increased by 347 compared with 2018. This increase was primarily due to growth in workload as measured in GTMs. The total number of employees as at December 31, 2019 was 12,694, a decrease of 146, or 1%, compared to 12,840 as at December 31, 2018, due to more efficient resource planning and reduced workload in the fourth quarter, partially offset by the addition of CMQ Canada employees.

The average number of total employees for 2018 increased by 673, compared to 2017. This increase was primarily due to growth in volumes. The total number of employees as at December 31, 2018 was 12,840, an increase of 625, or 5%, compared to 12,215 as at December 31, 2017, which was in line with volume growth and volume growth expectations.

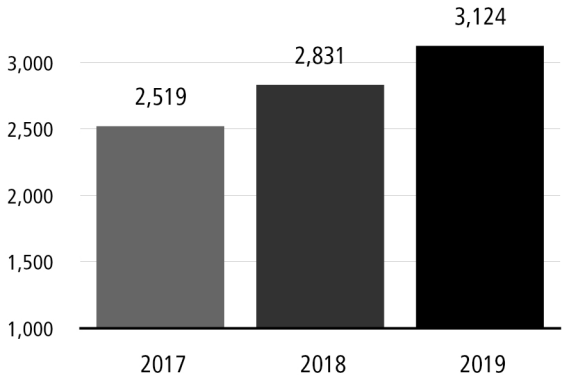
Workforce is defined as total employees plus contractors and consultants. The total workforce as at December 31, 2019 was 12,732, a decrease of 134, or 1%, compared to 12,866 as at December 31, 2018, due to more efficient resource planning.

The workforce as at December 31, 2018 was 12,866, an increase of 572, or 5%, compared to 12,294 as at December 31, 2017, which was in line with volume growth and volume growth expectations.

Safety Indicators

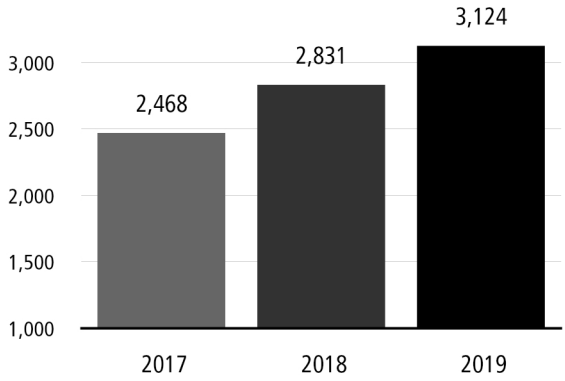
Safety is a key priority and core strategy for CP's management, employees and Board of Directors. The Company's two main safety indicators – personal injuries and train accidents – follow strict U.S. Federal Railroad Administration ("FRA") reporting guidelines.

The **FRA personal injuries per 200,000 employee-hours** frequency is the number of personal injuries, multiplied by 200,000 and divided by total employee hours. Personal injuries are defined as injuries that require employees to lose time away from work, modify their normal duties or obtain medical treatment



beyond minor first aid. FRA employee-hours are the total hours worked, excluding vacation and sick time, by all employees, excluding contractors. The FRA personal injuries per 200,000 employee-hours frequency for CP was 1.42 in 2019, compared with 1.48 in 2018 and 1.65 in 2017.

The **FRA train accidents per million train-miles** frequency is the number of train accidents, multiplied by 1,000,000 and divided by total train miles. Train accidents included in this metric meet or exceed the FRA reporting threshold of U.S. $10,700 in damage. The FRA train accidents per million train-miles frequency for CP was 1.06 in 2019 , compared with 1.10 in 2018 and 0.99 in 2017.



Results of Operations

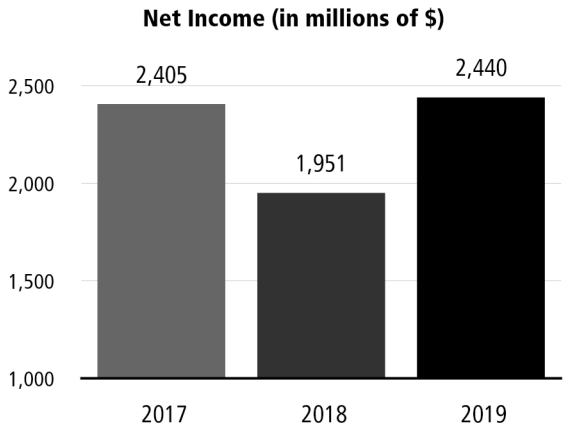
Income

Operating Income (in millions of $)

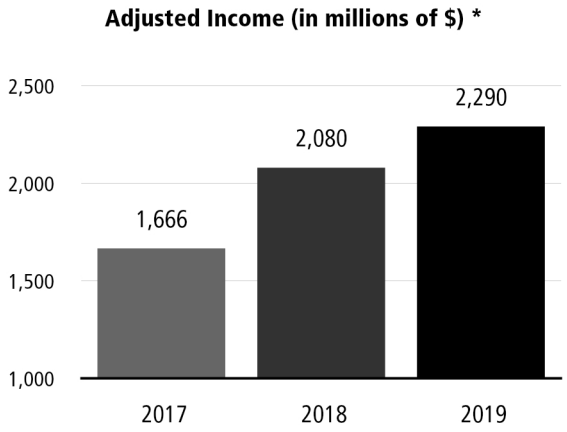
Adjusted Operating Income (in millions of $) *

* Adjusted operating income is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Operating income was $3,124 million in 2019, an increase of $293 million, or 10%, from $2,831 million in 2018. This increase was primarily due to:
- higher freight rates;
- the efficiencies generated from improved operating performance and asset utilization;
- the favourable impact of change in FX of $39 million; and
- the favourable impact from changes in fuel prices of $38 million.



This increase was partially offset by:
- increased operating expense associated with higher casualty costs in 2019 of $76 million (excluding FX);
- higher stock-based compensation of $58 million;
- cost inflation; and
- increased weather related costs as a result of harsh winter operating conditions in the first quarter of 2019.



There were no adjustments to operating income in 2019 and 2018.

Operating income was $2,831 million in 2018, an increase of $312 million, or 12%, from $2,519 million in 2017. This increase was primarily due to higher volumes and the efficiencies generated from improved operating performance and asset utilization.

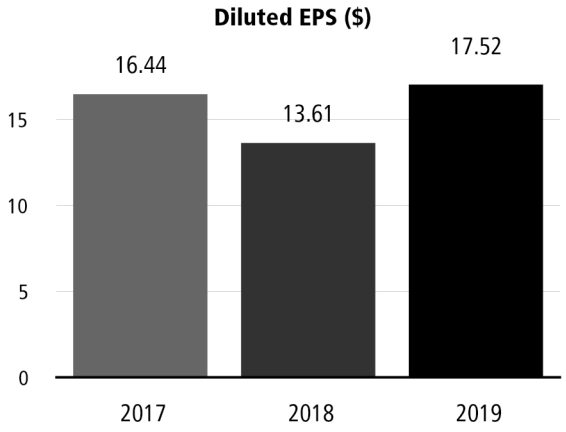
This increase was partially offset by:
- cost inflation;
- management transition recoveries of $51 million associated with Mr. E. Hunter Harrison's retirement as CEO of CP in 2017; and
- higher depreciation and amortization driven primarily from a higher asset base as a result of capital program spending in 2018.

Adjusted operating income, defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, was $2,831 million in 2018, an increase of $363 million, or 15%, from $2,468 million in 2017. This increase was primarily due to the same factors discussed above for the increase in Operating income, except that Adjusted operating income in 2017 excludes the management transition recovery of $51 million.

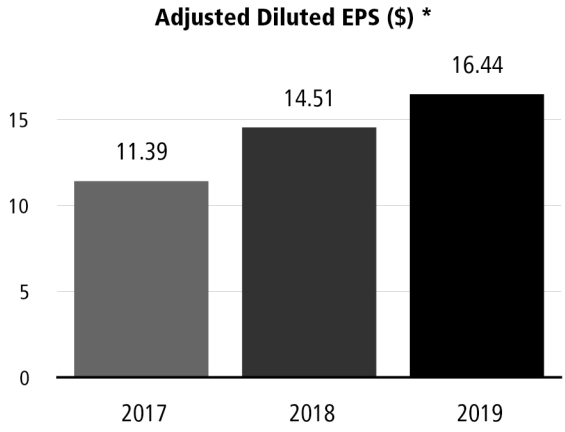
*Adjusted income is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Net income was $2,440 million in 2019, an increase of $489 million, or 25%, from $1,951 million in 2018. This increase was primarily due to:

- higher Operating income;
- FX translation gains on debt and lease liabilities in 2019 compared to FX translation losses on debt in 2018; and
- a higher income tax recovery associated with changes in tax rates.



This increase was partially offset by higher income taxes due to higher taxable income and a provision for an uncertain tax item of a prior period.

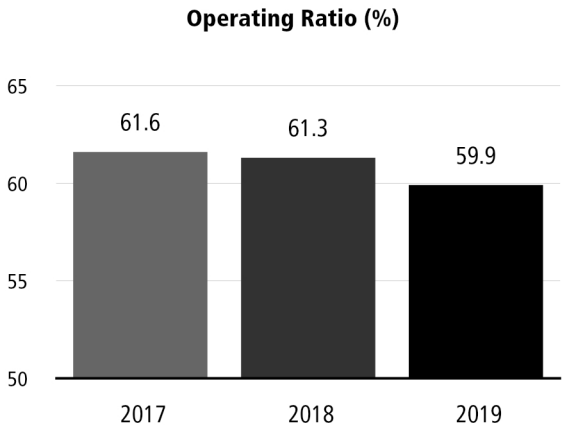


Net income was $1,951 million in 2018, a decrease of $454 million, or 19%, from $2,405 million in 2017. This decrease was primarily due to a lower income tax recovery associated with changes in tax rates and FX translation losses on debt in 2018 compared to gains in 2017. This decrease was partially offset by higher Operating income and higher Other components of net periodic benefit recovery.

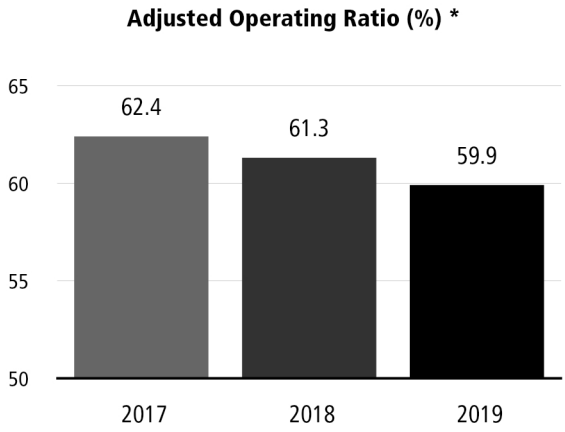
Adjusted income, defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, was $2,290 million in 2019, an increase of $210 million, or 10%, from $2,080 million in 2018. This increase was due to the same factors discussed above for the increase in Net income, except that Adjusted income excludes FX translation gains and losses on debt and lease liabilities, income tax recoveries associated with changes in tax rates, and a provision for an uncertain tax item of a prior period.

Adjusted income was $2,080 million in 2018, an increase of $414 million, or 25%, from $1,666 million in 2017. This increase was primarily due to higher Adjusted operating income and higher Other components of net periodic benefit recovery. This increase was partially offset by higher income taxes due to higher taxable income.

Diluted Earnings per Share



*Adjusted diluted EPS is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.



Diluted EPS was $17.52 in 2019, an increase of $3.91, or 29%, from $13.61 in 2018. This increase was due to higher Net income and lower average number of outstanding Common Shares due to the Company's share repurchase program.

Diluted EPS was $13.61 in 2018, a decrease of $2.83, or 17%, from $16.44 in 2017. This decrease was due to lower Net income, partially offset by lower average number of outstanding Common Shares due to the Company's share repurchase program.

Adjusted diluted EPS, defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, was $16.44 in 2019, an increase of $1.93, or 13%, from $14.51 in 2018. Adjusted diluted EPS was $14.51 in 2018, an increase of $3.12, or 27%, from $11.39 in 2017. These increases were due to higher Adjusted income and lower average number of outstanding Common Shares due to the Company's share repurchase program.

Operating Ratio

* Adjusted operating ratio is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Operating ratio provides the percentage of revenues used to operate the railway. A lower percentage normally indicates higher efficiency in the operation of the railway. The Company's Operating ratio was 59.9% in 2019, a 140 basis point improvement from 61.3% in 2018. This improvement was primarily due to:

- higher freight rates;
- the favourable impact of changes in fuel prices; and
- the efficiencies generated from improved operating performance and asset utilization.

This improvement was partially offset by:

- increased operating expense associated with higher casualty costs in 2019;
- higher stock-based compensation; and
- cost inflation.

There were no adjustments to the operating ratio in 2019 and 2018.

The Company's Operating ratio was 61.3% in 2018, a 30 basis point improvement from 61.6% in 2017. This improvement was primarily due to higher volumes and the efficiencies generated from improved operating performance and asset utilization.

This improvement was partially offset by:

- the unfavourable impact of changes in fuel prices;
- cost inflation; and
- management transition recoveries of $51 million associated with Mr. E. Hunter Harrison's retirement as CEO of CP in 2017.

Adjusted operating ratio was 61.3% in 2018, a 110 basis point improvement from 62.4% in 2017. This improvement reflects the same factors discussed above for the improvement in Operating ratio, except that Adjusted operating ratio in 2017 excludes the $51 million management transition recovery.

Return on Invested Capital

Return on invested capital ("ROIC") is a measure of how productively the Company uses its long-term capital investments, representing critical indicators of good operating and investment decisions made by management, and is an important performance criteria in determining certain elements of the Company's long-term incentive plan.

ROIC was 17.9% in 2019, a 260 basis point increase compared to 15.3% in 2018, primarily due to higher Operating income and FX translation gains on debt and lease liabilities in 2019 compared to FX translation losses on debt in 2018.

This increase was partially offset by a higher average invested capital base due to higher Retained earnings from Net income, partially offset by lower Common Shares due to the Company's share repurchase program.

ROIC was 15.3% in 2018, a 520 basis point decrease compared to 20.5% in 2017 primarily due to:

- a higher average invested capital base due to higher Retained earnings from Net income;
- higher Income tax expense due to a lower income tax recovery associated with changes in tax rates; and
- the unfavourable impact of FX translation losses on debt in 2018 compared to FX translation gains in 2017.

This decrease was partially offset by higher Operating income and higher Other components of net periodic benefit recoveries.

Adjusted ROIC was 16.9% in 2019, a 70 basis point increase compared to 16.2% in 2018, primarily due to higher Operating income. This increase was partially offset by the increase in adjusted average invested capital primarily due to higher Adjusted income, partially offset by by lower Common Shares due to the Company's share repurchase program.

Adjusted ROIC was 16.2% in 2018, a 150 basis point increase compared to 14.7% in 2017 due to higher Adjusted operating income and higher Other components of net periodic benefit recoveries. This increase was partially offset by the increase in adjusted average invested capital primarily due to higher Adjusted income, partially offset by by lower Common Shares due to the Company's share repurchase program.

ROIC and Adjusted ROIC are defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Impact of Foreign Exchange on Earnings

Fluctuations in FX affect the Company's results because U.S. dollar-denominated revenues and expenses are translated into Canadian dollars. U.S. dollar-denominated revenues and expenses increase (decrease) when the Canadian dollar weakens (strengthens) in relation to the U.S. dollar. In 2019, the impact of a stronger U.S. dollar resulted in an increase in total revenues of $87 million, an increase in total operating expenses of $48 million and an increase in interest

expense of $10 million. In 2018, the impact of a weaker U.S. dollar resulted in a decrease in total revenues of $8 million, a decrease in total operating expenses of $4 million and no change to interest expense.

On February 14, 2020, noon buying rate certified for customs purposes by the U.S. Federal Reserve Bank of New York was U.S. $1.00 = $1.33 Canadian dollars.

The following tables set forth, for the periods indicated, the average exchange rate between the Canadian dollar and the U.S. dollar expressed in the Canadian dollar equivalent of one U.S. dollar, the high and low exchange rates and period end exchange rates for the periods indicated. Averages for year-end periods are calculated by using the exchange rates on the last day of each full month during the relevant period. These rates are based on the noon buying rate certified for customs purposes by the U.S. Federal Reserve Bank of New York set forth in the H.10 statistical release of the Federal Reserve Board.

Average exchange rates (Canadian/U.S. dollar)	**2019**	2018	2017	2016	2015
For the year ended – December 31	**$ 1.33**	$ 1.30	$ 1.30	$ 1.33	$ 1.28
For the three months ended – December 31	**$ 1.32**	$ 1.32	$ 1.27	$ 1.33	$ 1.34

Exchange rates (Canadian/U.S. dollar)	**2019**	2018	2017	2016	2015
Beginning of year – January 1	**$ 1.36**	$ 1.25	$ 1.34	$ 1.38	$ 1.16
Beginning of quarter – April 1	**$ 1.33**	$ 1.29	$ 1.33	$ 1.30	$ 1.27
Beginning of quarter – July 1	**$ 1.31**	$ 1.32	$ 1.30	$ 1.29	$ 1.25
Beginning of quarter – October 1	**$ 1.32**	$ 1.29	$ 1.25	$ 1.31	$ 1.33
End of year – December 31	**$ 1.30**	$ 1.36	$ 1.25	$ 1.34	$ 1.38

High/Low exchange rates (Canadian/U.S. dollar)	**2019**	2018	2017	2016	2015
High	**$ 1.36**	$ 1.37	$ 1.37	$ 1.46	$ 1.40
Low	**$ 1.30**	$ 1.23	$ 1.21	$ 1.25	$ 1.17

In 2020, CP expects that for every $0.01 the U.S. dollar appreciates (depreciates) relative to the Canadian dollar, it will increase (decrease) revenues by $30 million, operating expenses by $15 million and net interest expense by $3 million on an annualized basis.

Impact of Fuel Price on Earnings

Fluctuations in fuel prices affect the Company's results because fuel expense constitutes a significant portion of CP's operating costs. As fuel prices fluctuate, there will be a timing impact on earnings, as discussed further in Item 1. Business, Operations, Fuel Cost Adjustment Program and Item 1A. Risk Factors, Fuel Cost Volatility.

Average Fuel Price (U.S. dollars per U.S. gallon)	**2019**	2018	2017[1]
For the year ended – December 31	**$ 2.49**	$ 2.72	$ 2.16
For the three months ended – December 31	**$ 2.53**	$ 2.71	$ 2.43

[1] Average fuel prices for 2017 exclude the effects of an $8 million fuel tax recovery related to prior periods.

The impact of fuel price on earnings includes the impacts of provincial and federal carbon taxes and levies recovered and paid, on revenues and expenses, respectively.

In 2019, the favourable impact of fuel prices on Operating income was $38 million. Lower fuel prices resulted in a decrease in total operating expenses of $77 million. Lower fuel prices, partially offset by the timing of recoveries from CP's fuel cost adjustment program and increased carbon tax recoveries, resulted in a decrease in total revenues of $39 million from 2018. In 2018, the impact of higher fuel prices resulted in an increase in total revenues of $212 million and an increase in total operating expenses of $197 million.

Impact of Share Price on Earnings

Fluctuations in the Common Share price affect the Company's operating expenses because share-based liabilities are measured at fair value. The following tables indicate the opening and closing Common Share price on the TSX and the NYSE for each quarter and the change in the price of the Common Shares on the TSX and the NYSE for the years ended December 31, 2019, 2018 and 2017:

Toronto Stock Exchange (in Canadian dollars)	2019	2018	2017
Opening Common Share price, as at January 1	**$ 242.24**	$ 229.66	$ 191.56
Ending Common Share price, as at March 31	**$ 275.34**	$ 227.20	$ 195.35
Ending Common Share price, as at June 30	**$ 308.43**	$ 240.92	$ 208.65
Ending Common Share price, as at September 30	**$ 294.42**	$ 273.23	$ 209.58
Ending Common Share price, as at December 31	**$ 331.03**	$ 242.24	$ 229.66
Change in Common Share price for the year ended December 31	**$ 88.79**	$ 12.58	$ 38.10

New York Stock Exchange (in U.S. dollars)	2019	2018	2017
Opening Common Share price, as at January 1	**$ 177.62**	$ 182.76	$ 142.77
Ending Common Share price, as at March 31	**$ 206.03**	$ 176.50	$ 146.92
Ending Common Share price, as at June 30	**$ 235.24**	$ 183.02	$ 160.81
Ending Common Share price, as at September 30	**$ 222.46**	$ 211.94	$ 168.03
Ending Common Share price, as at December 31	**$ 254.95**	$ 177.62	$ 182.76
Change in Common Share price for the year ended December 31	**$ 77.33**	$ (5.14)	$ 39.99

In 2019, the impact of the change in Common Share prices resulted in an increase in stock-based compensation expense of $42 million compared to $2 million in 2018, and $18 million in 2017.

The impact of share price on stock-based compensation is discussed further in Item 7A. Quantitative and Qualitative Disclosures About Market Risk, Share Price Impact on Stock-Based Compensation.

Operating Revenues

				2019 vs. 2018			2018 vs. 2017		
For the year ended December 31	2019	2018	2017	Total Change	% Change	FX Adjusted % Change[2]	Total Change	% Change	FX Adjusted % Change[2]
Freight revenues (in millions)[1]	**$ 7,613**	$ 7,152	$ 6,375	$ 461	6	5	$ 777	12	12
Non-freight revenues (in millions)	**179**	164	179	15	9	8	(15)	(8)	(8)
Total revenues (in millions)	**$ 7,792**	$ 7,316	$ 6,554	$ 476	7	5	$ 762	12	12
Carloads (in thousands)	**2,766.4**	2,739.8	2,634.2	26.6	1	N/A	105.6	4	N/A

Freight revenue per carload (in dollars)	**$ 2,752**	$ 2,611	$ 2,420	$ 141	5	4	$ 191	8	8
Freight revenue per revenue ton-mile (in cents)	**4.93**	4.64	4.47	0.29	6	5	0.17	4	4

[1] Freight revenues include fuel surcharge revenues of $464 million in 2019, $492 million in 2018 and $242 million in 2017. Fuel surcharge revenues include recoveries of carbon taxes, levies, and obligations under cap-and-trade programs.

[2] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Company's revenues are primarily derived from transporting freight. Changes in freight volumes generally contribute to corresponding changes in freight revenues and certain variable expenses, such as fuel, crew costs, and equipment rents. Non-freight revenue is generated from leasing of certain assets; other arrangements, including logistical services and contracts with passenger service operators; and switching fees.

Freight Revenues

Freight revenues were $7,613 million in 2019, an increase of $461 million, or 6%, from $7,152 million in 2018. This increase was primarily due to higher freight revenue per revenue ton-mile and the favourable impact of the change in FX of $86 million. This increase was partially offset by the unfavourable impact of lower fuel surcharge revenue, as a result of lower fuel prices of $39 million.

Freight revenues were $7,152 million in 2018, an increase of $777 million, or 12%, from $6,375 million in 2017. This increase was primarily due to higher volumes, as measured by RTMs, and the favourable impact of higher fuel surcharge revenue, as a result of higher fuel prices of $212 million. This increase was partially offset by lower volumes of U.S. grain, and the unfavourable impact of the change in FX of $8 million.

RTMs

RTMs are defined as the movement of one revenue-producing ton of freight over a distance of one mile. RTMs measure the relative weight and distance of rail freight moved by the Company. RTMs for 2019 were 154,378 million, an increase of 171 million, compared with 154,207 million in 2018. This increase was mainly attributable to increased shipments of Energy, chemicals and plastics and Intermodal, partially offset by decreased shipments of Potash, frac sand and Coal.

RTMs for 2018 were 154,207 million, an increase of 8% compared with 142,540 million in 2017. This increase was mainly attributable to increased shipments of Energy, chemicals and plastics, Potash, and Intermodal, partially offset by decreased shipments of U.S. grain.

Non-freight Revenues

Non-freight revenues were $179 million in 2019, an increase of $15 million, or 9%, from $164 million in 2018. This increase was primarily due to higher switching fees and logistical services revenue.

Non-freight revenues were $164 million in 2018, a decrease of $15 million, or 8%, from $179 million in 2017. This decrease was primarily due to the recovery of prior costs following the expiration of a passenger service contract in 2017 and lower passenger revenues in 2018.

Lines of Business

Grain

				2019 vs. 2018			2018 vs. 2017		
For the year ended December 31	**2019**	2018	2017	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]

Carloads (in thousands)	**431.4**	429.4	440.7	2.0	—	N/A	(11.3)	(3)	N/A
Revenue ton-miles (in millions)	**36,941**	36,856	37,377	85	—	N/A	(521)	(1)	N/A
Freight revenue per carload (in dollars)	**$ 3,904**	$ 3,645	$ 3,477	$ 259	7	6	$ 168	5	5
Freight revenue per revenue ton-mile (in cents)	**4.56**	4.25	4.10	0.31	7	6	0.15	4	4

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Grain revenue was $1,684 million in 2019, an increase of $118 million, or 8%, from $1,566 million in 2018. This increase was primarily due to increased freight revenue per revenue ton-mile, higher volumes of regulated Canadian grain, and the favourable impact of the change in FX. This increase was partially offset by lower volumes of U.S. grain, primarily corn, to the U.S. Pacific Northwest. Freight revenue per revenue ton-mile increased due to higher freight rates, primarily for regulated Canadian grain.

Grain revenue was $1,566 million in 2018, an increase of $34 million, or 2%, from $1,532 million in 2017. This increase was primarily due to higher freight revenue per revenue ton-mile, higher fuel surcharge as a result of higher fuel prices, and higher volumes of Canadian grain. This increase was partially offset by decreased volumes of U.S. grain, primarily wheat, and soybeans to the Pacific Northwest, and the unfavourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates, primarily for regulated Canadian grain. RTMs decreased less than carloads due to moving proportionately more Canadian grain, which has a longer length of haul compared to U.S. grain.

Coal

For the year ended December 31	2019	2018	2017	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]	2018 vs. 2017 Total Change	2018 vs. 2017 % Change	2018 vs. 2017 FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 682**	$ 673	$ 631	$ 9	1	1	$ 42	7	7
Carloads (in thousands)	**304.3**	304.3	306.0	—	—	N/A	(1.7)	(1)	N/A

Freight revenue per revenue ton-mile (in cents)	**3.13**	3.00	2.78	0.13	4	4	0.22	8	8

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Coal revenue was $682 million in 2019, an increase of $9 million, or 1%, from $673 million in 2018. This increase was primarily due to higher freight revenue per revenue ton-mile. This increase was partially offset by lower volumes of Canadian coal, driven by supply chain challenges at both the mines and the ports. Freight revenue per revenue ton-mile increased due to higher freight rates. RTMs decreased while carloads remained flat due to moving proportionately higher volumes of short haul U.S. coal.

Coal revenue was $673 million in 2018, an increase of $42 million, or 7%, from $631 million in 2017. This increase was primarily due to higher fuel surcharge revenue as a result of higher fuel prices, and higher freight revenue per revenue ton-mile, partially offset by lower volumes of Canadian coal, and the unfavourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates.

Potash

For the year ended December 31	2019	2018	2017	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]	2018 vs. 2017 Total Change	2018 vs. 2017 % Change	2018 vs. 2017 FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 462**	$ 486	$ 411	$ (24)	(5)	(6)	$ 75	18	19
Carloads (in thousands)	**149.3**	158.4	137.4	(9.1)	(6)	N/A	21.0	15	N/A

Freight revenue per revenue ton-mile (in cents)	**2.67**	2.65	2.61	0.02	1	—	0.04	2	2

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Potash revenue was $462 million in 2019, a decrease of $24 million, or 5%, from $486 million in 2018. This decrease was primarily due to lower volumes of domestic potash driven by poor weather affecting the application seasons, and lower volumes of export potash driven by unresolved international contract negotiations. This decrease was partially offset by the favourable impact of the change in FX.

Potash revenue was $486 million in 2018, an increase of $75 million, or 18%, from $411 million in 2017. This increase was primarily due to higher volumes of export potash, as well as higher fuel surcharge revenue as a result of higher fuel prices, partially offset by the unfavourable impact of the change in FX. RTMs increased more than carloads due to moving proportionately more export potash to Vancouver, which has a longer length of haul.

Fertilizers and Sulphur

				2019 vs. 2018			2018 vs. 2017		
For the year ended December 31	**2019**	2018	2017	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 250**	$ 243	$ 241	$ 7	3	1	$ 2	1	1
Carloads (in thousands)	**57.0**	58.1	57.7	(1.1)	(2)	N/A	0.4	1	N/A
Revenue ton-miles (in millions)	**3,846**	4,051	3,849	(205)	(5)	N/A	202	5	N/A
Freight revenue per carload (in dollars)	**$ 4,386**	$ 4,186	$ 4,178	$ 200	5	3	$ 8	—	1
Freight revenue per revenue ton-mile (in cents)	**6.50**	6.00	6.27	0.50	8	7	(0.27)	(4)	(4)

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Fertilizers and sulphur revenue was $250 million in 2019, an increase of $7 million, or 3%, from $243 million in 2018. This increase was primarily due to higher freight revenue per revenue ton-mile, the favourable impact of the change in FX, and higher volumes of wet fertilizer. This increase was partially offset by lower volumes of sulphur and dry fertilizer. Freight revenue per revenue ton-mile increased due to higher freight rates. RTMs decreased more than carloads due to moving proportionately less wet fertilizer to the U.S. Midwest, which has a longer length of haul.

Fertilizers and sulphur revenue was $243 million in 2018, an increase of $2 million, or 1%, from $241 million in 2017. This increase was primarily due to increased volumes of dry fertilizer and sulphur, and higher fuel surcharge revenue as a result of higher fuel prices, partially offset by lower freight revenue per revenue ton-mile, and the unfavourable impact of the change in FX. Freight revenue per revenue ton-mile decreased due to moving proportionately less wet fertilizer, which has higher freight rates, and increased volumes of longer haul sulphur from Canada to the U.S.

Forest Products

				2019 vs. 2018			2018 vs. 2017		
For the year ended December 31	**2019**	2018	2017	Total Change	% Change	FX Adjusted % Change[1]	Total Change	% Change	FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 304**	$ 284	$ 265	$ 20	7	5	$ 19	7	8
Carloads (in thousands)	**71.5**	68.6	65.8	2.9	4	N/A	2.8	4	N/A

Freight revenue per carload (in dollars)	**$ 4,252**	$ 4,139	$ 4,036	$ 113	3	1	$ 103	3	3
Freight revenue per revenue ton-mile (in cents)	**6.11**	5.96	5.92	0.15	3	1	0.04	1	1

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forest products revenue was $304 million in 2019, an increase of $20 million, or 7%, from $284 million in 2018. This increase was primarily due to higher volumes of wood pulp, newsprint, and lumber, increased freight revenue per revenue ton-mile, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates.

Forest products revenue was $284 million in 2018, an increase of $19 million, or 7%, from $265 million in 2017. This increase was primarily due to increased volumes of wood pulp and paper products, and higher fuel surcharge revenue as a result of higher fuel prices, partially offset by the unfavourable impact of the change in FX. RTMs increased more than carloads due to increased volumes of longer haul wood pulp from eastern Canada to the U.S.

Energy, Chemicals and Plastics

For the year ended December 31	2019	2018	2017	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]	2018 vs. 2017 Total Change	2018 vs. 2017 % Change	2018 vs. 2017 FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 1,534**	$ 1,243	$ 898	$ 291	23	22	$ 345	38	39
Carloads (in thousands)	**358.1**	334.6	269.5	23.5	7	N/A	65.1	24	N/A

Freight revenue per revenue ton-mile (in cents)	**5.23**	4.47	4.21	0.76	17	15	0.26	6	6

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Energy, chemicals and plastics revenue was $1,534 million in 2019, an increase of $291 million, or 23%, from $1,243 million in 2018. This increase was primarily due to increased freight revenue per revenue ton-mile, higher volumes of crude, liquefied petroleum gas ("LPG"), fuel oil, and other refined products, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased primarily due to liquidated damages, including customer volume commitments, and higher freight rates. Carloads increased more than RTMs due to moving proportionately less long haul crude to Kansas City, Missouri, and proportionately more short haul crude to Chicago, Illinois and Noyes, Minnesota.

Energy, chemicals and plastics revenue was $1,243 million in 2018, an increase of $345 million, or 38%, from $898 million in 2017. This increase was primarily due to increased volumes of crude and LPG, and higher fuel surcharge revenue as a result of higher fuel prices, partially offset by the unfavourable impact of the change in FX. RTMs increased more than carloads due to moving proportionately more crude, which has a longer length of haul.

Metals, Minerals and Consumer Products

For the year ended December 31	2019	2018	2017	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]	2018 vs. 2017 Total Change	2018 vs. 2017 % Change	2018 vs. 2017 FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 752**	$ 797	$ 739	$ (45)	(6)	(8)	$ 58	8	8
Carloads (in thousands)	**234.3**	252.2	255.3	(17.9)	(7)	N/A	(3.1)	(1)	N/A

Freight revenue per revenue ton-mile (in cents)	**7.04**	6.72	6.44	0.32	5	3	0.28	4	4

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Metals, minerals and consumer products revenue was $752 million in 2019, a decrease of $45 million, or 6%, from $797 million in 2018. This decrease was primarily due to lower volumes of frac sand and steel. This decrease was partially offset by increased freight revenue per revenue ton-mile, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates. Carloads decreased less than RTMs due to increased volumes of short haul metallic ore.

Metals, minerals and consumer products revenue was $797 million in 2018, an increase of $58 million, or 8%, from $739 million in 2017. This increase was primarily due to higher freight revenue per revenue ton-mile, higher fuel surcharge revenue as a result of higher fuel prices, and increased volumes of steel and aggregate products. The increase was partially offset by the unfavourable impact of the change in FX. RTMs increased while carloads decreased due to a decrease in volumes of short haul metallic ore traffic. Freight revenue per revenue ton-mile increased due to higher freight rates.

Automotive

For the year ended December 31	2019	2018	2017	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]	2018 vs. 2017 Total Change	2018 vs. 2017 % Change	2018 vs. 2017 FX Adjusted % Change[1]

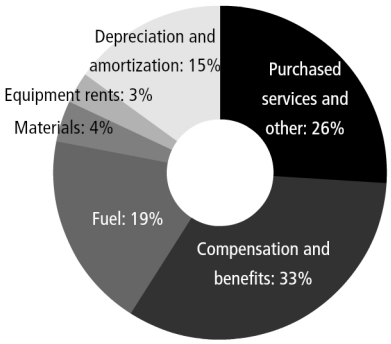
Freight revenue per revenue ton-mile (in cents)	**24.67**	23.92	22.15	0.75	3	1	1.77	8	8

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Automotive revenue was $352 million in 2019, an increase of $30 million, or 9%, from $322 million in 2018. This increase was primarily due to higher volumes from Vancouver to eastern Canada, higher volumes from the U.S. to CP's new Vancouver Automotive Compound, increased freight revenue per revenue ton-mile, and the favourable impact of the change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates.

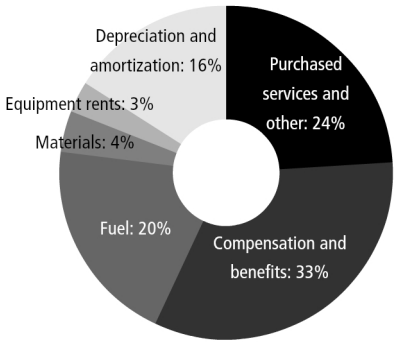
Automotive revenue was $322 million in 2018, an increase of $29 million, or 10% from $293 million in 2017. This increase was primarily due to higher freight revenue per revenue ton-mile, higher fuel surcharge revenue as a result of higher fuel prices, and higher volumes of machinery. This increase was partially offset by the unfavourable change in FX. Freight revenue per revenue ton-mile increased due to higher freight rates.

Intermodal



For the year ended December 31	2019	2018	2017	2019 vs. 2018 Total Change	2019 vs. 2018 % Change	2019 vs. 2018 FX Adjusted % Change[1]	2018 vs. 2017 Total Change	2018 vs. 2017 % Change	2018 vs. 2017 FX Adjusted % Change[1]
Freight revenues (in millions)	**$ 1,593**	$ 1,538	$ 1,365	$ 55	4	3	$ 173	13	13
Carloads (in thousands)	**1,046.1**	1,025.9	996.7	20.2	2	N/A	29.2	3	N/A
Revenue ton-miles (in millions)	**28,033**	26,688	24,303	1,345	5	N/A	2,385	10	N/A
Freight revenue per carload (in dollars)	**$ 1,523**	$ 1,499	$ 1,370	$ 24	2	1	$ 129	9	9
Freight revenue per revenue ton-mile (in cents)	**5.68**	5.76	5.62	(0.08)	(1)	(2)	0.14	2	2

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.



Intermodal revenue was $1,593 million in 2019, an increase of $55 million, or 4%, from $1,538 million in 2018. This increase was primarily due to higher international volumes through the Port of Vancouver, the onboarding of a new domestic retail customer, and the favourable impact of the change in FX. This increase was partially offset by a decrease in freight revenue per revenue ton-mile. RTMs increased more than carloads due to discontinuing expressway service in the second quarter of 2018, which had a shorter length of haul. Freight revenue per revenue ton-mile decreased due to lower fuel surcharge revenue as a result of lower fuel prices.

Intermodal revenue was $1,538 million in 2018, an increase of $173 million, or 13%, from $1,365 million in 2017. This increase was primarily due to higher international volumes through the Port of Vancouver, higher domestic wholesale volumes, as well as higher fuel surcharge revenue as a result of higher fuel prices. This was partially offset by the unfavourable impact of the change in FX. RTMs increased more than carloads due to discontinuing expressway service, and an increased length of haul for international intermodal volume moving through the Port of Vancouver.

Total operating expenses	**$ 4,668**	$ 4,485	$ 4,035	$ 183	4	3	$ 450	11	11

[1] FX adjusted % change does not have any standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies. FX adjusted % change is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Operating expenses were $4,668 million in 2019, an increase of $183 million, or 4%, from $4,485 million in 2018. This increase was primarily due to:

- increased operating expense associated with higher casualty costs incurred in 2019 of $76 million (excluding FX);
- higher stock-based compensation primarily driven by an increase in stock price of $58 million;
- cost inflation;
- the unfavourable impact of the change in FX of $48 million;
- increased weather related costs as a result of harsh winter operating conditions in the first quarter of 2019; and
- higher volume variable expenses.

This increase was partially offset by the favourable impact from changes in fuel prices of $77 million and the efficiencies generated from improved operating performance and asset utilization.

Operating expenses were $4,485 million in 2018, an increase of $450 million, or 11%, from $4,035 million in 2017. This increase was primarily due to:

- the unfavourable impact from changes in fuel prices of $197 million;
- higher volume variable expenses;
- cost inflation;
- management transition recoveries of $51 million associated with Mr. E. Hunter Harrison's retirement as CEO of CP in 2017;
- higher depreciation and amortization due to a higher asset base as a result of the capital program spending in 2018;
- a charge associated with a loss contingency of $20 million;
- increased weather related costs as a result of harsh winter operating conditions in the first quarter of 2018;
- higher stock-based compensation of primarily driven by stronger performance against targets, partially offset by the changes in share price; and
- higher incentive compensation.

This increase was partially offset by the efficiencies generated from improved operating performance and asset utilization and higher gains on land sales of $26 million mainly from the sale of Bass Lake railway line in the fourth quarter of 2018.

Compensation and Benefits

Compensation and benefits expense includes employee wages, salaries, fringe benefits and stock-based compensation. Compensation and benefits expense was $1,540 million in 2019, an increase of $72 million, or 5%, from $1,468 million in 2018. This increase was primarily due to:

- higher stock-based compensation primarily driven by an increase in stock price of $58 million;
- the impact of wage and benefit inflation;
- the impact of harsher winter operating conditions driven by operational inefficiencies and increased track labour and overtime;
- the unfavourable impact of the change in FX of $11 million; and
- higher volume variable expenses as a result of an increase in workload as measured by GTMs.

This increase was partially offset by:

- lower incentive compensation;
- lower pension current service cost of $14 million; and
- labour efficiencies.

Compensation and benefits expense was $1,468 million in 2018, an increase of $159 million, or 12% from $1,309 million in 2017. This increase was primarily due to:

- higher volume variable expenses as a result of an increase in workload as measured by GTMs;
- management transition recoveries of $51 million associated with Mr. E. Hunter Harrison's retirement as CEO of CP;
- the impact of wage and benefit inflation;
- higher stock-based compensation of primarily driven by stronger performance against targets, partially offset by the changes in share price;
- higher incentive compensation;
- an increase in training programs; and
- harsher winter operating conditions.

This increase was partially offset by lower labour expenses due to operational efficiencies.

Fuel

Fuel expense consists mainly of fuel used by locomotives and includes provincial, state and federal fuel taxes. Fuel expense was $882 million in 2019, a decrease of $36 million, or 4%, from $918 million in 2018. This decrease was primarily due to the favourable impact of lower fuel prices of $77 million.

This decrease was partially offset by an increase in workload, as measured by GTMs, and the unfavourable impact of the change in FX of $18 million.

Fuel expense was $918 million in 2018, an increase of $241 million, or 36%, from $677 million in 2017. This increase was primarily due to:

- the unfavourable impact from higher fuel prices of $197 million;
- an increase in workload, as measured by GTMs; and
- a fuel tax recovery received in 2017 that related to prior periods of $8 million.

This increase was partially offset by improvements in fuel efficiency of approximately 3%.

Materials

Materials expense includes the cost of material used for maintenance of track, locomotives, freight cars and buildings as well as software sustainment. Materials expense was $210 million in 2019, an increase of $9 million, or 4%, from $201 million in 2018. This increase was primarily due to:

- higher spending on locomotive maintenance and overhauls;
- weather related materials;
- cost inflation; and
- the unfavourable impact of the change in FX of $1 million.

This increase was partially offset by higher recoveries from foreign freight car maintenance.

Materials expense was $201 million in 2018, an increase of $11 million, or 6%, from $190 million in 2017. This increase was primarily due to higher locomotive maintenance and higher non-locomotive fuel costs.

Equipment Rents

Equipment rents expense includes the cost associated with using other companies' freight cars, intermodal equipment and locomotives, net of rental income received from other railways for the use of CP's equipment. Equipment rents expense was $137 million in 2019, an increase of $7 million, or 5%, from $130 million in 2018. This increase was primarily due to greater usage of pooled freight cars and the unfavourable impact of the change in FX of $3 million.

Equipment rents expense was $130 million in 2018, a decrease of $12 million, or 8%, from $142 million in 2017. This decrease was primarily due to the purchase or return of leased freight cars and lower usage of pooled intermodal containers reducing rental expenses by $7 million, and a $4 million increase in receipts from other railways' use of CP equipment.

Depreciation and Amortization

Depreciation and amortization expense represents the charge associated with the use of track and roadway, buildings, rolling stock, information systems and other depreciable assets. Depreciation and amortization expense was $706 million for 2019, an increase of $10 million, or 1%, from $696 million in 2018. This increase was primarily due to a higher asset base, as a result of the capital program spending in 2019, and the unfavourable impact of the change in FX of $4 million, partially offset by the impact of depreciation studies and other adjustments.

Depreciation and amortization expense was $696 million for 2018, an increase of $35 million, or 5%, from $661 million in 2017. This increase was primarily due to higher asset base as a result of higher capital program spending in 2018.

Purchased Services and Other

				2019 vs. 2018		2018 vs. 2017	
For the year ended December 31 (in millions)	**2019**	2018	2017	Total Change	% Change	Total Change	% Change
Support and facilities	**$ 278**	$ 264	$ 266	$ 14	5	$ (2)	(1)
Track and operations	**278**	268	251	10	4	17	7
Intermodal	**222**	221	197	1	—	24	12
Equipment	**125**	143	157	(18)	(13)	(14)	(9)
Casualty	**149**	73	72	76	104	1	1
Property taxes	**133**	124	121	9	7	3	2
Other	**29**	20	7	9	45	13	186
Land sales	**(21)**	(41)	(15)	20	(49)	(26)	173
Total Purchased services and other	**$ 1,193**	$ 1,072	$ 1,056	$ 121	11	$ 16	2

Purchased services and other expense encompasses a wide range of third-party costs, including contractor and consulting fees, locomotive and freight car repairs performed by third parties, property and other taxes, intermodal pickup and delivery services, casualty expense, expenses for joint facilities and gains on land sales. Purchased services and other expense was $1,193 million in 2019, an increase of $121 million, or 11%, from $1,072 million in 2018. This increase was primarily due to:

- an increase in number and severity of casualty incidents of $73 million (excluding FX), which were the result of difficult operating conditions due to weather in the first half of 2019, reported in Casualty;
- lower gains on land sales of $20 million mainly as a result of the sale of the Bass Lake railway line in 2018;
- the unfavourable impact of the change in FX of $11 million;
- an increase in legal fees, reported in Support and facilities;
- higher snow removal and other weather related costs; and
- higher property taxes due to higher tax rates.

This increase was partially offset by:

- a decrease in charges associated with contingencies of $10 million, reported in Other;
- a decrease in costs for locomotive warranty service agreements due to the insourcing of maintenance of certain locomotives in the company's fleet, reported in Equipment; and
- costs related to labour disruptions in the second quarter of 2018, reported in Track and operations.

Purchased services and other expense was $1,072 million in 2018, an increase of $16 million, or 2%, from $1,056 million in 2017. This increase was primarily due to:

- a charge associated with a loss contingency of $20 million, reported in Other;
- higher intermodal expenses related to pickup and delivery, reported in Intermodal; and
- higher costs due to winter weather related impacts and costs related to labour disruptions, reported primarily in Track and operations.

This increase was partially offset by higher gains on land sales of $26 million mainly from the sale of Bass Lake railway line, in the fourth quarter of 2018, and lower locomotive engine overhaul expenses as a greater proportion of this work was capital in nature in 2018, reported in Equipment.

Other Income Statement Items

Other (Income) Expense

Other (income) expense consists of gains and losses from the change in FX on long-term debt and lease liabilities, working capital, costs related to financing, shareholder costs, equity income, and other non-operating expenditures. Other income was $89 million in 2019, a change of $263 million, or 151%, compared to an expense of $174 million in 2018. This change was primarily due to an FX translation gain on U.S. dollar-denominated debt and lease liabilities of $94 million, compared to an FX translation loss on U.S. dollar-denominated debt of $168 million in 2018.

Other expense was $174 million in 2018, a change of $352 million, or 198%, compared to an income of $178 million in 2017. This change was primarily due to an FX translation loss on U.S. dollar-denominated debt of $168 million, compared to a gain of $186 million, and a $10 million insurance recovery of legal costs in 2017. These unfavourable changes were partially offset by a $13 million charge on the settlement and roll of forward starting swaps in 2017 and higher equity income in 2018.

FX translation gains and losses on debt and lease liabilities are discussed further in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Other Components of Net Periodic Benefit Recovery

Other components of net periodic benefit recovery were $381 million in 2019, a decrease of $3 million, or 1%, from $384 million in 2018. This decrease was primarily due to higher interest cost on the benefit obligation. Other components of net periodic benefit recovery were $384 million in 2018, an increase of $110 million or 40%, from $274 million in 2017. This increase was primarily due to the 7.75% expected rate of return in each of 2017 and 2018 being applied to a greater asset value, and a decrease in the recognized net actuarial loss.

Net Interest Expense

Net interest expense includes interest on long-term debt and finance leases. Net interest expense was $448 million in 2019, a decrease of $5 million, or 1%, from $453 million in 2018. This was primarily due to a net reduction in interest charges of $21 million as a result of a lower effective interest rate following the Company's refinancing of debt in 2018 and 2019, partially offset by the unfavourable impact from the change in FX of $10 million and an increase in commercial paper interest of $6 million.

Net interest expense was $453 million in 2018, a decrease of $20 million, or 4%, from $473 million in 2017. This decrease was primarily due to a favourable impact of $15 million as a result of a lower effective interest rate and lower debt levels following the Company's refinancing of debt in 2018, as well as higher capitalized interest.

Income Tax Expense

Income tax expense was $706 million in 2019, an increase of $69 million, or 11%, from $637 million in 2018. The increase was due to:

- higher taxable earnings;
- an increase in unrecognized tax benefits of $24 million; and
- net income tax recoveries in 2018 of $21 million as a result of the Iowa and Missouri corporate tax rate decreases.

This increase was partially offset by net income tax recoveries in 2019 of $88 million as a result of an Alberta corporate tax rate decrease.

Income tax expense was $637 million in 2018, an increase of $544 million, or 585%, from $93 million in 2017. The increase is due to net income tax recoveries in 2017 of $541 million, primarily as a result of U.S. tax reform, and higher 2018 taxable earnings, partially offset by other tax rate changes discussed above in 2018.

The effective income tax rate for 2019 was 22.43% on reported income and 24.96% on Adjusted income. The effective income tax rate for 2018 was 24.64% on reported income and 24.55% on Adjusted income. Adjusted income is a Non-GAAP measure, which is discussed further in Non-GAAP Measures of this Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The Company expects a 2020 effective tax rate of 25.00% . The Company’s 2020 outlook for its effective tax rate is based on certain assumptions about events and developments that may or may not materialize, or that may be offset entirely or partially by new events and developments. These assumptions are discussed further in Item 1A. Risk Factors.

Liquidity and Capital Resources

The Company believes adequate amounts of Cash and cash equivalents are available in the normal course of business to provide for ongoing operations, including the obligations identified in the tables in Contractual Commitments of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. The Company is not aware of any trends or expected fluctuations in the Company's liquidity that would create any deficiencies. The Company's primary sources of liquidity include its Cash and cash equivalents, its commercial paper program, its bilateral letter of credit facilities, and its revolving credit facility.

As at December 31, 2019, the Company had $133 million of Cash and cash equivalents, U.S. $1.3 billion available under its revolving credit facility, and up to $220 million available under its letter of credit facilities. As at December 31, 2018, the Company had $61 million of Cash and cash equivalents, U.S. $1.0 billion available under its revolving credit facility, and up to $540 million available under its letter of credit facilities.

Effective September 27, 2019, the Company amended and restated its revolving credit facility agreement in order to extend the maturity date of the five year facility from June 28, 2023 to September 27, 2024, and to establish a new U.S. $300 million facility maturing September 27, 2021, increasing the total amount available to U.S. $1.3 billion (2018 – U.S. $1.0 billion). As at December 31, 2019, the Company's revolving credit facility was undrawn (December 31, 2018 – undrawn) and the Company did not draw from its revolving credit facility during the year ended December 31, 2019. The agreement requires the Company to maintain a financial covenant in conjunction with the facility. As at December 31, 2019, the Company was in compliance with all terms and conditions of the credit facility arrangements and satisfied the financial covenant.

The Company has a commercial paper program that enables it to issue commercial paper up to a maximum aggregate principal amount of U.S. $1.0 billion in the form of unsecured promissory notes. This commercial paper program is backed by the revolving credit facility. As at December 31, 2019, total commercial paper borrowings were U.S. $397 million (December 31, 2018 – $nil).

Effective September 27, 2019, the Company also reduced its bilateral letter of credit facilities to $300 million. As at December 31, 2019, under its bilateral letter of credit facilities, the Company had letters of credit drawn of $80 million. This compares to letters of credit drawn of $60 million from a total available amount of $600 million as at December 31, 2018. Under the bilateral letter of credit facilities, the Company has the option to post collateral in the form of Cash or cash equivalents, equal at least to the face value of the letter of credit issued. As at December 31, 2019, the Company did not have any collateral posted on its bilateral letter of credit facilities (December 31, 2018 – $nil).

The following discussion of operating, investing, and financing activities describes the Company's indicators of liquidity and capital resources.

Operating Activities

Cash provided by operating activities was $2,990 million in 2019, an increase of $278 million compared to $2,712 million in 2018. This increase was primarily due to advance receipts of consideration for service under freight contracts as well as higher cash generating income, compared to 2018.

Cash provided by operating activities was $2,712 million in 2018, an increase of $530 million compared to $2,182 million in 2017. This increase was primarily due to higher cash generating income and a favourable change in working capital mainly due to decreased income taxes payable in 2017.

Investing Activities

Cash used in investing activities was $1,803 million in 2019, an increase of $345 million from $1,458 million in 2018. This increase was primarily due to the acquisition of Central Maine & Québec Railway ("CMQ"), higher additions to properties as discussed further below in Capital Programs, and lower proceeds from the sale of properties and other assets during 2019.

Cash used in investing activities was $1,458 million in 2018, an increase of $163 million from $1,295 million in 2017. This increase was primarily due to higher additions to properties during 2018.

Capital Programs

For the year ended December 31 (in millions, except for track miles and crossties)	2019	2018	2017
Additions to capital			
Track and roadway	**$ 1,004**	$ 965	$ 958
Rolling stock and containers	**426**	401	198
Information systems[1]	**70**	86	78
Buildings and other	**164**	122	132
Total – accrued additions to capital	**1,664**	1,574	1,366
Less:			
Non-cash transactions	**17**	23	26
Cash invested in additions to properties (per Consolidated Statements of Cash Flows)	**$ 1,647**	$ 1,551	$ 1,340
Track installation capital programs			
Track miles of rail laid (miles)	**246**	281	313
Track miles of rail capacity expansion (miles)	**11**	4	4
Crossties installed (thousands)	**1,122**	1,015	1,138

[1] Information systems include hardware and software.

Track and roadway expenditures include the replacement and enhancement of the Company's track infrastructure. Of the $1,004 million additions in 2019 (2018 – $965 million), approximately $918 million (2018 – $847 million) was invested in the renewal of depleted assets, namely rail, ties, ballast, signals and bridges. Approximately $27 million (2018 – $47 million) was spent on PTC compliance requirements and $59 million (2018 – $71 million) was invested in network improvements and growth initiatives.

Rolling stock investments encompass locomotives, railcars and containers. In 2019, expenditures on locomotives were approximately $174 million (2018 – $218 million) and were focused on the continued re-investment in CP's existing locomotive fleet. Railcar and container investments of approximately $252 million (2018 – $183 million) were largely focused on renewal of depleted assets, including the acquisition of covered hoppers for grain transportation, and the acquisition of existing units previously held under operating leases.

In 2019, CP invested approximately $70 million (2018 – $86 million) in information systems primarily focused on rationalizing and enhancing business systems, providing real-time data, and modernizing core hardware and applications. Investments in buildings and other items were $164 million (2018 – $122 million), and included items such as facility upgrades and renovations, vehicles and shop equipment.

For 2020, CP expects to invest approximately $1.6 billion in its capital program, which will be financed with cash generated from operations. Approximately 60% to 70% of the planned capital program is for track and roadway, including PTC. Approximately 15% to 20% is expected to be allocated to rolling stock, including railcars and locomotive improvements. Approximately 5% is expected to be allocated to information services, and 10% to 15% is expected to be allocated to buildings and other.

Free Cash

CP generated positive Free cash of $1,357 million in 2019, an increase of $68 million from $1,289 million in 2018. This increase was primarily due to an increase in cash provided by operating activities, partially offset by higher additions to properties and lower proceeds from the sale of properties and other assets during 2019.

CP generated positive Free cash of $1,289 million in 2018, an increase of $415 million from $874 million in 2017. This increase was primarily due to an increase in cash provided by operating activities, partially offset by higher additions to properties during 2018.

Free cash is affected by seasonal fluctuations and by other factors including the size of the Company's capital programs. The 2019 capital programs are discussed above. Free cash is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Financing Activities

Cash used in financing activities was $1,111 million in 2019, a decrease of $431 million from $1,542 million in 2018. This decrease was primarily due to the net issuance of commercial paper in 2019 and a lower principal repayment of U.S. $350 million of the Company's 7.250% notes maturing May 2019, compared

to the principal repayments in 2018 of U.S. $275 million of the Company's 6.500% notes maturing May 2018 and $375 million of the Company's 6.250% medium term notes maturing June 2018. This was partially offset by the issuance of $400 million 3.150% notes due March 13, 2029 in 2019 compared to the issuance of U.S. $500 million 4.000% notes due June 1, 2028 in 2018, and higher dividends paid during 2019.

Cash used in financing activities was $1,542 million in 2018, an increase of $842 million from $700 million in 2017. This increase was primarily due to the principal repayments of U.S. $275 million of the Company's 6.500% notes maturing May 2018 and $375 million of the Company's 6.250% medium term notes maturing June 2018, and an increase in payments to buy back shares under the Company's share repurchase program, partially offset by the issuance of U.S. $500 million 4.000% notes due June 1, 2028 in 2018.

Credit Measures

Credit ratings provide information relating to the Company's operations and liquidity, and affect the Company's ability to obtain short-term and long-term financing and/or the cost of such financing.

A mid-investment grade credit rating is an important measure in assessing the Company's ability to maintain access to public financing and to minimize the cost of capital. It also affects the ability of the Company to engage in certain collateralized business activities on a cost-effective basis.

Credit ratings and outlooks are based on the rating agencies' methodologies and can change from time to time to reflect their views of CP. Their views are affected by numerous factors including, but not limited to, the Company's financial position and liquidity along with external factors beyond the Company's control.

As at December 31, 2019, CP's credit ratings from Standard & Poor's Rating Services ("Standard & Poor's") and Moody's Investor Service ("Moody's") remain unchanged from December 31, 2018.

Credit ratings as at December 31, 2019[(1)]

Long-term debt			Outlook
Standard & Poor's			
	Long-term corporate credit	**BBB+**	stable
	Senior secured debt	**A**	stable
	Senior unsecured debt	**BBB+**	stable
Moody's			
	Senior unsecured debt	**Baa1**	stable
Commercial paper program			
Standard & Poor's		**A-2**	N/A
Moody's		**P-2**	N/A

(1) Credit ratings are not recommendations to purchase, hold, or sell securities and do not address the market price or suitability of a specific security for a particular investor. Credit ratings are based on the rating agencies' methodologies and may be subject to revision or withdrawal at any time by the rating agencies.

The Long-term debt to Net income ratio was 3.6 in 2019, compared with 4.5 in 2018 and 3.4 in 2017. The decrease in the ratio from 2018 to 2019 was primarily due to higher Net income, partially offset by higher debt. The increase in the ratio from 2017 to 2018 was due to lower Net income and higher debt.

The Adjusted net debt to Adjusted earnings before interest, tax, depreciation, and amortization ("EBITDA") ratio was 2.4 in 2019, compared with 2.6 in 2018 and 2.6 in 2017. The decrease in ratio from 2018 to 2019 was primarily due to an increase in Adjusted EBITDA. The ratio remained unchanged between 2017 and 2018 as higher Adjusted EBITDA was offset by a higher debt balance as a result of the weakening of the Canadian dollar. Adjusted net debt to Adjusted EBITDA ratio is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Over the long term, CP targets an Adjusted net debt to Adjusted EBITDA ratio of 2.0 to 2.5.

Although CP has provided a target Non-GAAP measure (Adjusted net debt to Adjusted EBITDA ratio), management is unable to reconcile, without unreasonable efforts, the target Adjusted net debt to Adjusted EBITDA ratio to the most comparable GAAP measure (Long-term debt to Net income ratio), due to unknown variables and uncertainty related to future results. These unknown variables may include unpredictable transactions of significant value. In past years, CP has recognized significant asset impairment charges, management transition costs related to senior executives and discrete tax items. These or other similar, large unforeseen transactions affect Net income but may be excluded from CP's Adjusted EBITDA. Additionally, the U.S.-to-Canada dollar exchange rate is unpredictable

and can have a significant impact on CP's reported results but may be excluded from CP's Adjusted EBITDA. In particular, CP excludes the FX impact of translating the Company's debt and lease liabilities, interest and taxes from Adjusted EBITDA. Please see Forward-Looking Statements in this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

Dividend Payout Ratio

The dividend payout ratio was 17.9% in 2019, compared with 18.5% in 2018 and 13.3% in 2017. The decrease in the ratio from 2018 to 2019 was due to higher diluted EPS, partially offset by higher dividends declared per share. The increase in the ratio from 2017 to 2018 was primarily due to lower diluted EPS.

The Adjusted dividend payout ratio was 19.1% in 2019, compared with 17.3% in 2018 and 19.2% in 2017. The increase in the ratio from 2018 to 2019 was due to higher dividends declared per share, partially offset by higher Adjusted diluted EPS. The decrease in the ratio from 2017 to 2018 was primarily due to higher Adjusted diluted EPS. Adjusted dividend payout ratio is defined and reconciled in Non-GAAP Measures of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Over the long term, CP targets an Adjusted dividend payout ratio of 25.0% to 30.0%.

Although CP has provided a target Non-GAAP measure (Adjusted dividend payout ratio), management is unable to reconcile, without unreasonable efforts, the target Adjusted dividend payout ratio to the most comparable GAAP measure (Dividend payout ratio), due to unknown variables and uncertainty related to future results. These unknown variables may include unpredictable transactions of significant value. In past years, CP has recognized significant asset impairment charges, management transition costs related to senior executives and discrete tax items. These or other similar, large unforeseen transactions affect Diluted EPS but may be excluded from CP's Adjusted diluted EPS. Additionally, the U.S.-to-Canada dollar exchange rate is unpredictable and can have a significant impact on CP's reported results but may be excluded from CP's Adjusted diluted EPS. In particular, CP excludes the FX impact of translating the Company's debt and lease liabilities, the impact from changes in income tax rates and a provision for uncertain tax item from Adjusted diluted EPS. Please see Forward-Looking Statements in this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

Share Capital

At February 18, 2020, the latest practicable date prior to the date of this Annual Report on Form 10-K, there were 136,748,767 Common Shares and no preferred shares issued and outstanding, which consists of 13,928 holders of record of the Common Shares. In addition, CP has a Management Stock Option Incentive Plan ("MSOIP"), under which key officers and employees are granted options to purchase the Common Shares. Each option granted can be exercised for one Common Share. At February 18, 2020, 1,569,063 options were outstanding under the MSOIP and stand-alone option agreements entered into with Mr. Keith Creel. There are 895,948 options available to be issued by the Company's MSOIP in the future. CP has a Director's Stock Option Plan ("DSOP"), under which directors are granted options to purchase Common Shares. There are no outstanding options under the DSOP, which has 340,000 options available to be issued in the future.

Non-GAAP Measures

The Company presents Non-GAAP measures to provide a basis for evaluating underlying earnings and liquidity trends in the Company's business that can be compared with the results of operations in prior periods. In addition, these Non-GAAP measures facilitate a multi-period assessment of long-term profitability, allowing management and other external users of the Company's consolidated financial information to compare profitability on a long-term basis, including assessing future profitability, with that of the Company's peers.

These Non-GAAP measures have no standardized meaning and are not defined by GAAP and, therefore, may not be comparable to similar measures presented by other companies. The presentation of these Non-GAAP measures is not intended to be considered in isolation from, as a substitute for, or as superior to the financial information presented in accordance with GAAP.

Non-GAAP Performance Measures

The Company uses Adjusted income, Adjusted diluted earnings per share, Adjusted operating income and Adjusted operating ratio to evaluate the Company's operating performance and for planning and forecasting future business operations and future profitability. These Non-GAAP measures are presented in Item 6. Selected Financial Data and discussed further in other sections of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. These Non-GAAP measures provide meaningful supplemental information regarding operating results because they exclude certain significant items that are not considered indicative of future financial trends either by nature or amount. As a result, these items are excluded for management assessment of operational performance, allocation of resources and preparation of annual budgets. These significant items may include, but are not limited to, restructuring and asset impairment charges, individually significant gains and losses from sales of assets, the FX impact of translating the Company's debt and lease liabilities, discrete tax items, and certain items outside the control of management. These items may not be non-recurring. However, excluding these significant items from GAAP results allows for a consistent understanding of the Company's consolidated financial performance when performing a multi-period assessment including assessing the likelihood of future results. Accordingly, these Non-GAAP financial measures may provide insight to investors and other external users of the Company's consolidated financial information.

In 2019, there were three significant items included in Net income as follows:

- in the fourth quarter, a deferred tax expense of $24 million as a result of a provision for an uncertain tax item of a prior period that unfavourably impacted Diluted EPS by 17 cents;

- in the second quarter, a deferred tax recovery of $88 million due to the change in the Alberta provincial corporate income tax rate that favourably impacted Diluted EPS by 63 cents; and
- during the course of the year, a net non-cash gain of $94 million ($86 million after deferred tax) due to FX translation of debt and lease liabilities as follows:
  - in the fourth quarter, a $37 million gain ($32 million after deferred tax) that favourably impacted Diluted EPS by 22 cents;
  - in the third quarter, a $25 million loss ($22 million after deferred tax) that unfavourably impacted Diluted EPS by 15 cents;
  - in the second quarter, a $37 million gain ($34 million after deferred tax) that favourably impacted Diluted EPS by 24 cents; and
  - in the first quarter, a $45 million gain ($42 million after deferred tax) that favourably impacted Diluted EPS by 30 cents.

In 2018, there were two significant items included in Net income as follows:
- in the second quarter, a deferred tax recovery of $21 million due to reductions in the Missouri and Iowa state tax rates that favourably impacted Diluted EPS by 15 cents; and
- during the course of the year, a net non-cash loss of $168 million ($150 million after deferred tax) due to FX translation of debt as follows:
  - in the fourth quarter, a $113 million loss ($103 million after deferred tax) that unfavourably impacted Diluted EPS by 72 cents;
  - in the third quarter, a $38 million gain ($33 million after deferred tax) that favourably impacted Diluted EPS by 23 cents;
  - in the second quarter, a $44 million loss ($38 million after deferred tax) that unfavourably impacted Diluted EPS by 27 cents; and
  - in the first quarter, a $49 million loss ($42 million after deferred tax) that unfavourably impacted Diluted EPS by 29 cents.

In 2017, there were five significant items included in Net income as follows:
- in the second quarter, a charge on hedge roll and de-designation of $13 million ($10 million after deferred tax) that unfavourably impacted Diluted EPS by 7 cents;
- in the second quarter, an insurance recovery of a legal settlement of $10 million ($7 million after current tax) that favourably impacted Diluted EPS by 5 cents;
- in the first quarter, a management transition recovery of $51 million related to the retirement of Mr. E. Hunter Harrison as CEO of CP ($39 million after deferred tax) that favourably impacted Diluted EPS by 27 cents;
- during the course of the year, a net deferred tax recovery of $541 million as a result of changes in income tax rates as follows:
  - in the fourth quarter, a deferred tax recovery of $527 million, primarily due to the U.S. tax reform, that favourably impacted Diluted EPS by $3.63;
  - in the third quarter, a deferred tax expense of $3 million as a result of the change in the Illinois state corporate income tax rate change that unfavourably impacted Diluted EPS by 2 cents;
  - in the second quarter, a deferred tax recovery of $17 million as a result of the change in the Saskatchewan provincial corporate income tax rate that favourably impacted Diluted EPS by 12 cents; and
- during the course of the year, a net non-cash gain of $186 million ($162 million after deferred tax) due to FX translation of debt as follows:
  - in the fourth quarter, a $14 million loss ($12 million after deferred tax) that unfavourably impacted Diluted EPS by 8 cents;
  - in the third quarter, a $105 million gain ($91 million after deferred tax) that favourably impacted Diluted EPS by 62 cents;
  - in the second quarter, a $67 million gain ($59 million after deferred tax) that favourably impacted Diluted EPS by 40 cents; and
  - in the first quarter, a $28 million gain ($24 million after deferred tax) that favourably impacted Diluted EPS by 16 cents.

In 2016, there were two significant items included in Net income as follows:
- in the third quarter, a $25 million expense ($18 million after current tax) related to a legal settlement that unfavourably impacted Diluted EPS by 12 cents; and
- during the course of the year, a net non-cash gain of $79 million ($68 million after deferred tax) due to FX translation of debt as follows:
  - in the fourth quarter, a $74 million loss ($64 million after deferred tax) that unfavourably impacted Diluted EPS by 43 cents;
  - in the third quarter, a $46 million loss ($40 million after deferred tax) that unfavourably impacted Diluted EPS by 27 cents;
  - in the second quarter, an $18 million gain ($16 million after deferred tax) that favourably impacted Diluted EPS by 10 cents; and
  - in the first quarter, a $181 million gain ($156 million after deferred tax) that favourably impacted Diluted EPS by $1.01.

In 2015, there were four significant items included in Net income as follows:
- in the third quarter, a $68 million gain ($42 million after current tax) related to the sale of Delaware & Hudson Railway Company, Inc. ("D&H") South that favourably impacted Diluted EPS by 26 cents;
- in the third quarter, a $47 million charge ($35 million after deferred tax) related to the early redemption premium on notes that unfavourably impacted Diluted EPS by 22 cents;
- in the second quarter, a deferred income tax expense of $23 million as a result of the change in the Alberta provincial corporate income tax rate that unfavourably impacted Diluted EPS by 14 cents; and
- during the course of the year, a net non-cash loss of $297 million ($257 million after deferred tax) due to FX translation of debt as follows:
  - in the fourth quarter, a $115 million loss ($100 million after deferred tax) that unfavourably impacted Diluted EPS by 64 cents;
  - in the third quarter, a $128 million loss ($111 million after deferred tax) that unfavourably impacted Diluted EPS by 69 cents;
  - in the second quarter, a $10 million gain ($9 million after deferred tax) that favourably impacted Diluted EPS by 5 cents; and
  - in the first quarter, a $64 million loss ($55 million after deferred tax) that unfavourably impacted Diluted EPS by 34 cents.

Reconciliation of GAAP Performance Measures to Non-GAAP Performance Measures

The following tables reconcile the most directly comparable measures presented in accordance with GAAP to the Non-GAAP measures presented in Item 6. Selected Financial Data and discussed further in other sections of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations:

Adjusted income is calculated as Net income reported on a GAAP basis adjusted for significant items.

	For the year ended December 31				
(in millions)	**2019**	2018	2017	2016	2015
Net income as reported	**$ 2,440**	$ 1,951	$ 2,405	$ 1,599	$ 1,352
Less significant items (pre-tax):					
Legal settlement charge	**—**	—	—	(25)	—
Insurance recovery of legal settlement	**—**	—	10	—	—
Charge on hedge roll and de-designation	**—**	—	(13)	—	—
Gain on sale of D&H South	**—**	—	—	—	68
Management transition recovery	**—**	—	51	—	—
Impact of FX translation gain (loss) on debt and lease liabilities	**94**	(168)	186	79	(297)
Early redemption premium on notes	**—**	—	—	—	(47)
Add:					
Tax effect of adjustments[(1)]	**8**	(18)	36	4	(26)
Income tax rate changes	**(88)**	(21)	(541)	—	23
Provision for uncertain tax item	**24**	—	—	—	—
Adjusted income	**$ 2,290**	$ 2,080	$ 1,666	$ 1,549	$ 1,625

[(1)] The tax effect of adjustments was calculated as the pre-tax effect of the adjustments multiplied by the applicable tax rate for the above items of 8.55%, 10.64%, 15.27%, 7.17% and 9.29% for the years presented, respectively. The applicable tax rates reflect the taxable jurisdictions and nature, being on account of capital or income, of the significant items.

Adjusted diluted earnings per share is calculated using Adjusted income, as defined above, divided by the weighted-average diluted number of Common Shares outstanding during the period as determined in accordance with GAAP.

	For the year ended December 31				
	2019	2018	2017	2016	2015
Diluted earnings per share as reported	**$ 17.52**	$ 13.61	$ 16.44	$ 10.63	$ 8.40
Less significant items (pre-tax):					
Legal settlement charge	**—**	—	—	(0.17)	—
Insurance recovery of legal settlement	**—**	—	0.07	—	—
Charge on hedge roll and de-designation	**—**	—	(0.09)	—	—
Gain on sale of D&H South	**—**	—	—	—	0.42
Management transition recovery	**—**	—	0.35	—	—
Impact of FX translation gain (loss) on debt and lease liabilities	**0.67**	(1.17)	1.27	0.53	(1.84)
Early redemption premium on notes	**—**	—	—	—	(0.30)
Add:					
Tax effect of adjustments[(1)]	**0.05**	(0.12)	0.25	0.02	(0.16)
Income tax rate changes	**(0.63)**	(0.15)	(3.70)	—	0.14
Provision for uncertain tax item	**0.17**	—	—	—	—
Adjusted diluted earnings per share	**$ 16.44**	$ 14.51	$ 11.39	$ 10.29	$ 10.10

[(1)] The tax effect of adjustments was calculated as the pre-tax effect of the adjustments multiplied by the applicable tax rate for the above items of 8.55%, 10.64%, 15.27%, 7.17% and 9.29% for the years presented, respectively. The applicable tax rates reflect the taxable jurisdictions and nature, being on account of capital or income, of the significant items.

Adjusted operating income is calculated as Operating income reported on a GAAP basis less significant items.

	For the year ended December 31				
(in millions)	**2019**	2018	2017	2016	2015
Operating income as reported	**$ 3,124**	$ 2,831	$ 2,519	$ 2,411	$ 2,618
Less significant items:					
Gain on sale of D&H South	**—**	—	—	—	68
Management transition recovery	**—**	—	51	—	—
Adjusted operating income	**$ 3,124**	$ 2,831	$ 2,468	$ 2,411	$ 2,550

Adjusted operating ratio excludes those significant items that are reported within Operating income.

	For the year ended December 31				
	2019	2018	2017	2016	2015
Operating ratio as reported	**59.9%**	61.3%	61.6%	61.3%	61.0%
Less significant items:					
Gain on sale of D&H South	**—**	—	—	—	(1.0)
Management transition recovery	**—**	—	(0.8)	—	—
Adjusted operating ratio	**59.9%**	61.3%	62.4%	61.3%	62.0%

ROIC and Adjusted ROIC

ROIC is calculated as Operating income less Other (income) expense and Other components of net periodic benefit recovery, tax effected at the Company's annualized effective tax rate, divided by Average invested capital. Average invested capital is defined as the sum of total Shareholders' equity, Long-term debt, Long-term debt maturing within one year and Short-term borrowing, as presented in the Company's Consolidated Financial Statements, averaged between the beginning and ending balance over a rolling 12-month period. Adjusted ROIC excludes significant items reported in Operating income, Other (income) expense, and Other components of net periodic benefit recovery in the Company's Consolidated Financial Statements, as these significant items are not considered indicative of future financial trends either by nature or amount. Adjusted average invested capital is similarly adjusted for the impact of these significant items, net of tax, on closing balances as part of this average. ROIC and Adjusted ROIC are performance measures that measure how productively the Company uses its long-term capital investments, representing critical indicators of good operating and investment decisions made by management and are important performance criteria in determining certain elements of the Company's long-term incentive plan. ROIC and Adjusted ROIC are presented in Item 6. Selected Financial Data and discussed further in Results of Operations of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Calculation of ROIC

	For the year ended December 31				
(in millions, except for percentages)	**2019**	2018	2017	2016	2015
Operating income	**$ 3,124**	$ 2,831	$ 2,519	$ 2,411	$ 2,618
Less:					
Other (income) expense	**(89)**	174	(178)	(45)	335
Other components of net periodic benefit recovery	**(381)**	(384)	(274)	(167)	(70)
Tax[(1)]	**806**	749	111	675	728
	$ 2,788	$ 2,292	$ 2,860	$ 1,948	$ 1,625
Average invested capital	**$ 15,579**	$ 14,964	$ 13,961	$ 13,532	$ 12,561
ROIC	**17.9%**	15.3%	20.5%	14.4%	12.9%

(1) Tax was calculated at the annualized effective tax rate of 22.43%, 24.64%, 3.74%, 25.72%, and 30.95% for each of the above items for the years presented, respectively.

Calculation of Adjusted ROIC

	For the year ended December 31				
(in millions, except for percentages)	**2019**	2018	2017	2016	2015
Adjusted operating income	**$ 3,124**	$ 2,831	$ 2,468	$ 2,411	$ 2,550
Less:					
Other (income) expense	**(89)**	174	(178)	(45)	335
Other components of net periodic benefit recovery	**(381)**	(384)	(274)	(167)	(70)
Significant items (pre-tax):					
Legal settlement charge	**—**	—	—	(25)	—
Insurance recovery of legal settlement	**—**	—	10	—	—
Charge on hedge roll and de-designation	**—**	—	(13)	—	—
Impact of FX translation gain (loss) on debt and lease liabilities	**94**	(168)	186	79	(297)
Early redemption premium on notes	**—**	—	—	—	(47)
Tax[1]	**874**	788	724	673	716
	$ 2,626	$ 2,421	$ 2,013	$ 1,896	$ 1,913
Average invested capital	**$ 15,579**	$ 14,964	$ 13,961	$ 13,532	$ 12,561
Less impact of periodic significant items net of tax on the above average:					
Income tax recovery from income tax rate changes	44	11	270	—	(11)
Provision for uncertain tax item	(12)	—	—	—	—
Legal settlement charge	—	—	—	(9)	—
Insurance recovery of legal settlement	—	—	4	—	—
Charge on hedge roll and de-designation	—	—	(5)	—	—
Gain on sale of D&H South	—	—	—	—	21
Early redemption premium on notes	—	—	—	—	(18)
Management transition recovery	—	—	20	—	—
Adjusted average for the 12 months of total shareholders' equity, long-term debt, long-term debt maturing within one year and short-term borrowing	**$ 15,547**	$ 14,953	$ 13,672	$ 13,541	$ 12,569
Adjusted ROIC	**16.9%**	16.2%	14.7%	14.0%	15.2%

[1] Tax was calculated at the adjusted annualized effective tax rate of 24.96%, 24.55% 26.42% 26.20% and 27.25% for each of the above items for the years presented, respectively.

Free Cash

Free cash is calculated as Cash provided by operating activities, less Cash used in investing activities, adjusted for changes in cash and cash equivalents balances resulting from FX fluctuations, the cash settlement of hedges settled upon issuance of debt, and the acquisition of CMQ. Free cash is a measure that management considers to be an indicator of liquidity. Free cash is useful to investors and other external users of the Company's Consolidated Financial Statements as it assists with the evaluation of the Company's ability to generate cash from its operations without incurring additional external financing. The cash settlement of forward starting swaps that occurred in the second quarter of 2018 in conjunction with the issuance of long-term debt is not an indicator of CP's ongoing cash generating ability and therefore has been excluded from Free cash. Similarly, the acquisition of CMQ that occurred in the fourth quarter of 2019 is not indicative of investment trends and has also been excluded from Free cash. Positive Free cash indicates the amount of cash available for reinvestment in the business, or cash that can be returned to investors through dividends, stock repurchase programs, debt retirements or a combination of these. Conversely, negative Free cash indicates the amount of cash that must be raised from investors through new debt or equity issues, reduction in available cash balances or a combination of these. Free cash should be considered in addition to, rather than as a substitute for, Cash provided by operating activities. Free cash is presented in Item 6. Selected Financial Data and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Reconciliation of Cash Provided by Operating Activities to Free Cash

	For the year ended December 31				
(in millions)	**2019**	2018	2017	2016	2015
Cash provided by operating activities	**$ 2,990**	$ 2,712	$ 2,182	$ 2,089	$ 2,459
Cash used in investing activities	**(1,803)**	(1,458)	(1,295)	(1,069)	(1,123)
Effect of foreign currency fluctuations on U.S. dollar-denominated cash and cash equivalents	**(4)**	11	(13)	(13)	45
Less:					
Settlement of forward starting swaps on debt issuance	**—**	(24)	—	—	—
Investment in Central Maine & Québec Railway	**(174)**	—	—	—	—
Free cash	**$ 1,357**	$ 1,289	$ 874	$ 1,007	$ 1,381

Foreign Exchange Adjusted % Change

FX adjusted % change allows certain financial results to be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons in the analysis of trends in business performance. Financial result variances at constant currency are obtained by translating the comparable period of the prior year results denominated in U.S. dollars at the foreign exchange rates of the current period.

FX adjusted % changes in revenues are further used in calculating FX adjusted % change in freight revenue per carload and RTM. These items are presented in Operating Revenues of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

				2019 vs. 2018			2018 vs. 2017		
(in millions)	**Reported 2019**	Reported 2018	Reported 2017	Variance due to FX	FX Adjusted 2018	FX Adj. % Change	Variance due to FX	FX Adjusted 2017	FX Adj. % Change
Freight revenues by line of business									
Grain	**$ 1,684**	$ 1,566	$ 1,532	$ 19	$ 1,585	6	$ —	$ 1,532	2
Coal	**682**	673	631	2	675	1	—	631	7
Potash	**462**	486	411	6	492	(6)	(1)	410	19

Dividend Payout Ratio and Adjusted Dividend Payout Ratio

Dividend payout ratio is calculated as dividends declared per share divided by Diluted EPS. Adjusted dividend payout ratio is calculated as dividends declared per share divided by Adjusted diluted EPS, as defined above. These ratios are measures of shareholder return and provide information on the Company's ability to declare dividends on an ongoing basis. Dividend payout ratio and Adjusted dividend payout ratio are presented in Item 6. Selected Financial Data and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Calculation of Dividend Payout Ratio

	For the year ended December 31				
(in dollars, except for percentages)	**2019**	2018	2017	2016	2015
Dividends declared per share	**$ 3.1400**	$ 2.5125	$ 2.1875	$ 1.8500	$ 1.4000
Diluted EPS	**17.52**	13.61	16.44	10.63	8.40
Dividend payout ratio	**17.9%**	18.5%	13.3%	17.4%	16.7%

Calculation of Adjusted Dividend Payout Ratio

	For the year ended December 31				
(in dollars, except for percentages)	**2019**	2018	2017	2016	2015
Dividends declared per share	**$ 3.1400**	$ 2.5125	$ 2.1875	$ 1.8500	$ 1.4000
Adjusted diluted EPS	**16.44**	14.51	11.39	10.29	10.10
Adjusted dividend payout ratio	**19.1%**	17.3%	19.2%	18.0%	13.9%

Long-term Debt to Net Income and Adjusted Net Debt to Adjusted EBITDA Ratios

Long-term debt to Net income ratio is defined as Long-term debt, including Long-term debt maturing within one year, divided by Net income. Adjusted net debt to Adjusted EBITDA ratio is calculated as Adjusted net debt divided by Adjusted EBITDA. The Adjusted net debt to Adjusted EBITDA ratio is a key credit measure used to assess the Company's financial capacity. The ratio provides information on the Company's ability to service its debt and other long-term obligations. Long-term debt to Net income and Adjusted net debt to Adjusted EBITDA ratio are presented in Item 6. Selected Financial Data and discussed further in Liquidity and Capital Resources of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Calculation of Long-term Debt to Net Income Ratio

(in millions, except for ratios)	2019	2018	2017	2016	2015
Long-term debt including long-term debt maturing within one year as at December 31	**$ 8,757**	$ 8,696	$ 8,159	$ 8,684	$ 8,957
Net income for the year ended December 31	**2,440**	1,951	2,405	1,599	1,352
Long-term debt to Net income ratio	**3.6**	4.5	3.4	5.4	6.6

Reconciliation of Long-term Debt to Adjusted Net Debt

Adjusted net debt is defined as Long-term debt, Long-term debt maturing within one year and Short-term borrowing as reported on the Company's Consolidated Balance Sheets adjusted for pension plans deficit, operating lease liabilities recognized on the Company's Consolidated Balance Sheets, and Cash and cash equivalents.

(in millions)	2019	2018	2017	2016	2015
Long-term debt including long-term debt maturing within one year as at December 31	**$ 8,757**	$ 8,696	$ 8,159	$ 8,684	$ 8,957
Add:					
Pension plans deficit[1]	**294**	266	278	273	295
Operating lease liabilities[2]	**354**	387	281	361	439
Less:					
Cash and cash equivalents	**133**	61	338	164	650
Adjusted net debt as at December 31	**$ 9,272**	$ 9,288	$ 8,380	$ 9,154	$ 9,041

[1] Pension plans deficit is the total funded status of the Pension plans in deficit only.

[2] Current period amount is as reported in compliance with GAAP following the adoption of Accounting Standards Update ("ASU") 2016-02 under the cumulative-effect adjustment transition approach, discussed further in Item 8. Financial Statements and Supplementary Data, Note 2 Accounting changes. The comparative periods' amounts have not been restated and were calculated as the net present value of operating leases discounted by the Company's effective interest rate for the period presented.

Reconciliation of Net Income to EBIT, Adjusted EBIT and Adjusted EBITDA

Earnings before interest and tax ("EBIT") is calculated as Net income before Net interest expense and Income tax expense. Adjusted EBIT excludes significant items reported in both Operating income and Other (income) expense. Adjusted EBITDA is calculated as Adjusted EBIT plus operating lease expense and Depreciation and amortization, less Other components of net periodic benefit recovery.

	For the year ended December 31				
(in millions)	**2019**	2018	2017	2016	2015
Net income as reported	**$ 2,440**	$ 1,951	$ 2,405	$ 1,599	$ 1,352
Add:					
Net interest expense	**448**	453	473	471	394
Income tax expense	**706**	637	93	553	607
EBIT	**3,594**	3,041	2,971	2,623	2,353
Less significant items (pre-tax):					
Legal settlement charge	**—**	—	—	(25)	—
Insurance recovery of legal settlement	**—**	—	10	—	—
Charge on hedge roll and de-designation	**—**	—	(13)	—	—

Management transition recovery	**—**	—	51	—	—
Impact of FX translation gain (loss) on debt and lease liabilities	**94**	(168)	186	79	(297)
Early redemption premium on notes	**—**	—	—	—	(47)
Adjusted EBIT	**3,500**	3,209	2,737	2,569	2,629
Add:					
Operating lease expense	**83**	97	104	111	127
Depreciation and amortization	**706**	696	661	640	595
Less:					
Other components of net periodic benefit recovery	**381**	384	274	167	70
Adjusted EBITDA	**$ 3,908**	$ 3,618	$ 3,228	$ 3,153	$ 3,281

Calculation of Adjusted Net Debt to Adjusted EBITDA Ratio

(in millions, except for ratios)	**2019**	2018	2017	2016	2015
Adjusted net debt as at December 31	**$ 9,272**	$ 9,288	$ 8,380	$ 9,154	$ 9,041
Adjusted EBITDA for the year ended December 31	**3,908**	3,618	3,228	3,153	3,281
Adjusted net debt to Adjusted EBITDA ratio	**2.4**	2.6	2.6	2.9	2.8

Off-Balance Sheet Arrangements

Guarantees

Refer to Item 8. Financial Statements and Supplementary Data, Note 27 Guarantees for details.

Contractual Commitments

The accompanying table indicates the Company's obligations and commitments to make future payments for contracts, such as debt, leases, and commercial arrangements as at December 31, 2019.

Payments due by period (in millions)	Total	2020	2021 & 2022	2023 & 2024	Thereafter
Contractual commitments					
Interest on long-term debt and finance leases	**$ 11,117**	$ 431	$ 804	$ 690	$ 9,192
Long-term debt	**8,692**	592	842	568	6,690
Finance leases	**151**	7	113	13	18
Operating leases[1]	**395**	80	106	79	130
Supplier purchase	**3,090**	699	1,295	727	369
Other long-term liabilities[2]	**495**	53	102	99	241
Total contractual commitments	**$ 23,940**	$ 1,862	$ 3,262	$ 2,176	$ 16,640

[1] Residual value guarantees on certain leased equipment with a maximum exposure of $2 million are not included in the minimum payments shown above, as management believes that CP will not be required to make payments under these residual guarantees.

[2] Includes expected cash payments for environmental remediation, post-retirement benefits, workers' compensation benefits, long-term disability benefits, pension benefit payments for the Company's non-registered supplemental pension plan, and certain other long-term liabilities. Projected payments for post-retirement benefits, workers' compensation benefits, and long-term disability benefits include the anticipated payments for years 2020 to 2029. Pension contributions for the Company's registered pension plans are not included due to the volatility in calculating them. Pension payments are discussed further in Critical Accounting Estimates of this Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Certain Other Financial Commitments

In addition to the financial commitments mentioned above, the Company is party to certain other financial commitments discussed below.

Letters of Credit

Letters of credit are obtained mainly to provide security to third parties under the terms of various agreements, including the supplemental pension plan. CP is liable for these contractual amounts in the case of non-performance under these agreements. Letters of credit are accommodated through a revolving credit facility and the Company's bilateral letter of credit facilities.

Capital Commitments

The Company remains committed to maintaining the current high level of quality of our capital assets in pursuing sustainable growth. As part of this commitment, CP has entered into contracts with suppliers to make various capital purchases related to track and rolling stock programs. Payments for these commitments are due in 2020 through 2032. These expenditures are expected to be financed by cash generated from operations or by issuing new debt.

The accompanying table indicates the Company's commitments to make future payments for letters of credit and capital expenditures as at December 31, 2019.

Payments due by period (in millions)	Total	2020	2021 & 2022	2023 & 2024	Thereafter
Certain other financial commitments					
Letters of credit	**$ 80**	$ 80	$ —	$ —	$ —
Capital commitments	**664**	332	200	61	71
Total certain other financial commitments	**$ 744**	$ 412	$ 200	$ 61	$ 71

Critical Accounting Estimates

To prepare the Consolidated Financial Statements that conform with GAAP, the Company is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reported periods. Using the most current information available, the Company reviews estimates on an ongoing basis, including those related to environmental liabilities, pensions and other benefits, property, plant and equipment, deferred income taxes, and personal injury and other claims liabilities.

The development, selection and disclosure of these estimates, and this Management's Discussion and Analysis of Financial Condition and Results of Operations, have been reviewed by the Board of Directors' Audit and Finance Committee, which is composed entirely of independent directors.

Environmental Liabilities

Environmental remediation accruals cover site-specific remediation programs. CP estimates of the probable costs to be incurred in the remediation of properties contaminated by past railway use reflect the nature of contamination at individual sites according to typical activities and scale of operations conducted. The Company screens and classifies sites according to typical activities and scale of operations conducted. CP has developed remediation strategies for each property based on the nature and extent of the contamination, as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants. CP also considers available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and groundwater. The details of the estimates reflect the environmental liability at each property. The Company is committed to fully meeting regulatory and legal obligations with respect to environmental matters.

Some sites include remediation activities that are projected beyond the 10-year period, which CP is unable to reasonably estimate and determine. Therefore, CP's accruals of the environmental liabilities is based on an estimate of costs for a rolling 10-year period covered by the environmental program. Payments are expected to be made over 10 years to 2029. A limited portion of the environmental accruals, the stable Perpetual Care for the environmental program, are fixed and reliably determined. This portion of the environmental liabilities is discounted using a risk-free rate, adjusted by inflation and productivity improvements.

Provisions for environmental remediation costs are recorded in "Other long-term liabilities" (refer to Item 8. Financial Statements and Supplementary Data, Note 20 Other long-term liabilities), except for the current portion which is recorded in "Accounts payable and accrued liabilities" (refer to Item 8. Financial Statements and Supplementary Data, Note 17 Accounts payable and accrued liabilities). The accruals for environmental remediation represent CP's best estimate of its probable future obligations and include both asserted and unasserted claims, without reduction for anticipated recoveries from third parties. Although the recorded accruals include CP's best estimate of all probable costs, CP's total environmental remediation costs cannot be predicted with certainty. Accruals for environmental remediation may change from time to time as new information about previously untested sites becomes known, environmental laws and regulations evolve and advances are made in environmental remediation technology. The accruals may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, are not expected to be material to the Company's financial position, but may materially affect income in the period in which a charge is recognized.

The environmental liabilities are also sensitive to the increase in cost of materials which would be reflected as increases to "Other long-term liabilities" and "Accounts payable and accrued liabilities" on the Company's Consolidated Balance Sheets and to "Purchased services and other" within Operating expenses on the Company's Consolidated Statements of Income. CP's cash payments for environmental initiatives are estimated to be approximately $7 million in 2020, $8 million in 2021, $9 million in 2022 and a total of approximately $55 million over the remaining years through 2029. All payments will be funded from general operations.

Pensions and Other Benefits

CP has defined benefit and defined contribution pension plans. Other benefits include post-retirement medical and life insurance for pensioners, and some post-employment workers' compensation and long-term disability benefits in Canada. Workers' compensation and long-term disability benefits are discussed in the Personal Injury and Other Claims Liabilities section below. Pension and post-retirement benefits liabilities are subject to various external influences and uncertainties.

Information concerning the measurement of costs for pensions and other benefits is discussed in Item 8. Financial Statements and Supplementary Data, Note 1 Summary of significant accounting policies.

Net Periodic Benefit Costs

The Company reports the current service cost component of net periodic benefit cost in "Compensation and benefits" for pensions and post-retirement benefits and in "Purchased services and other" for self-insured workers' compensation and long-term disability benefits on the Company's Consolidated Statements of Income. The Other components of net periodic benefit recovery are reported as a separate line item outside of Operating income on the Company's Consolidated Statements of Income. Components of the net periodic benefit costs (credits) are as follows:

	2019			2018		
(in millions of Canadian dollars)	**Current service cost**	**Other components**	**Total**	Current service cost	Other components	Total
Defined benefit pensions	**$ 107**	**$ (414)**	**$ (307)**	$ 120	$ (405)	$ (285)
Defined contribution pensions	**11**	**—**	**11**	10	—	10
Post-retirement benefits	**4**	**16**	**20**	5	18	23
Self-insured workers' compensation and long-term disability benefits	**7**	**17**	**24**	7	3	10
All plans	**$ 129**	**$ (381)**	**$ (252)**	$ 142	$ (384)	$ (242)

CP estimates net periodic benefit credits for defined benefit pensions to be approximately $224 million in 2020 ($140 million in current service cost and $364 million in other components of net periodic recovery), and net periodic benefit costs for defined contribution pensions to be approximately $12 million in 2020. Net periodic benefit costs for post-retirement benefits in 2020 are not expected to differ materially from the 2019 costs. Total net periodic benefit credits for all plans are estimated to be approximately $178 million in 2020 (2019 – $252 million), comprising $165 million (2019 – $129 million) in current service cost and $343 million (2019 – $381 million) in other components of net periodic recovery. The expected rate of return on the market-related asset value used to compute the net periodic benefit credit was 7.75% in 2018 and 7.50% in 2019. For computing the net periodic benefit credit in 2020, the Company is reducing this rate to 7.25% to reflect CP's current view of future long-term investment returns. Net periodic benefit costs and credits are discussed further in Item 8. Financial Statements and Supplementary Data, Note 23 Pensions and other benefits.

Pension Plan Contributions

The Company made contributions of $53 million to the defined benefit pension plans in 2019, compared with $36 million, which is net of a $10 million refund of plan surplus in 2018. The Company's main Canadian defined benefit pension plan accounts for nearly all of CP's pension obligation and can produce significant volatility in pension funding requirements, given the pension fund's size, the many factors that drive the pension plan's funded status and Canadian statutory pension funding requirements. The Company made voluntary prepayments of $600 million in 2011, $650 million in 2010 and $500 million in 2009 to the Company's main Canadian defined benefit pension plan. CP has applied $1,324 million of these voluntary prepayments to reduce its pension funding requirements in 2012–2019, leaving $426 million of the voluntary prepayments still available at December 31, 2019 to reduce CP's pension funding requirements in 2020 and future years. CP continues to have significant flexibility with respect to the rate at which the remaining voluntary prepayments are applied to reduce future years' pension contribution requirements, which allows CP to manage the volatility of future pension funding requirements. At this time, CP estimates it will not apply any of the remaining voluntary prepayments against its 2020 pension funding requirements.

CP estimates its aggregate pension contributions, including its defined benefit and defined contribution plans, to be in the range of $65 million to $75 million in 2020, and in the range of $50 million to $100 million per year from 2021 to 2023. These estimates reflect the Company's current intentions with respect to the rate at which CP will apply the remaining voluntary prepayments against contribution requirements in the next few years.

Future pension contributions will be highly dependent on the Company's actual experience with such variables as investment returns, interest rate fluctuations and demographic changes, on the rate at which previous years' voluntary prepayments are applied against pension contribution requirements, and on any changes in the regulatory environment. CP will continue to make contributions to the pension plans that, at a minimum, meet pension legislative requirements.

Pension Plan Risks

Fluctuations in the liability and net periodic benefit costs for pensions result from favourable or unfavourable investment returns and changes in long-term interest rates. The impact of favourable or unfavourable investment returns is moderated by the use of a market-related asset value for the main Canadian defined benefit pension plan's public equity securities and absolute return strategies. The impact of changes in long-term interest rates on pension obligations is partially offset by their impact on the pension funds' investments in fixed income assets.

The plans' investment policy provides a target allocation of approximately 45% of the plans' assets to be invested in public equity securities. As a result, stock market performance is a key driver in determining the pension funds' asset performance. If the rate of investment return on the plans' public equity securities in 2019 had been 10% higher (or lower) than the actual 2019 rate of investment return on such securities, 2020 net periodic benefit costs for pensions would be lower (or higher) by approximately $25 million.

Changes in bond yields can result in changes to discount rates and to changes in the value of fixed income assets. If the discount rate as at December 31, 2019 had been higher (or lower) by 0.1% with no related changes in the value of the pension funds' investment in fixed income assets, 2020 net periodic benefit costs for pensions would be lower (or higher) by approximately $13 million and 2020 current service costs for pensions would be lower (or higher) by approximately $5 million. However, a change in bond yields would also lead to a change in the value of the pension funds' investment in fixed income assets, and this change would partially offset the impact on net periodic benefit costs noted above.

The Company estimates that an increase in the discount rate of 0.1% would decrease the defined benefit pension plans' projected benefit obligations by approximately $176 million, and that a decrease in the discount rate of 0.1% would increase the defined benefit pension plans' projected benefit obligations by approximately $178 million. Similarly, for every 0.1% the actual return on assets varies above (or below) the estimated return for the year, the value of the defined benefit pension plans' assets would increase (or decrease) by approximately $13 million.

Adverse experience with respect to these factors could eventually increase funding and pension expense significantly, while favourable experience with respect to these factors could eventually decrease funding and pension expense significantly.

Fluctuations in the post-retirement benefit obligation also can result from changes in the discount rate used. A 0.1% increase (decrease) in the discount rate would decrease (increase) the obligation by approximately $6 million.

CP reviews its pensioner mortality experience to ensure that the mortality assumption continues to be appropriate, or to determine what changes to the assumption are needed.

Property, Plant and Equipment

The Company follows the group depreciation method under which a single depreciation rate is applied to the total cost in a particular class of property, despite differences in the service life or salvage value of individual properties within the same class. CP performs depreciation studies of each property asset class approximately every three years to update depreciation rates. The studies are conducted with assistance from third-party specialists and analyzed and reviewed by the Company's management. Depreciation studies for U.S. assets are reviewed and approved by the Surface Transportation Board ("STB"). Depreciation studies for Canadian assets are provided to the Canadian Transportation Agency (the "Agency"), but the Agency does not approve depreciation rates. In determining appropriate depreciation rates, management is required to make judgments and assumptions about a variety of key factors that are subject to future variability due to inherent uncertainties. These include the following:

Key Assumptions	Assessments
• Whole and remaining asset lives	• Statistical analysis of historical retirement patterns; • Evaluation of management strategy and its impact on operations and the future use of specific property assets; • Assessment of technological advances; • Engineering estimates of changes in current operations and analysis of historic, current and projected future usage; • Additional factors considered for track assets: density of traffic and whether rail is new or has been re-laid in a subsequent position; • Assessment of policies and practices for the management of assets including maintenance; and • Comparison with industry data.
• Salvage values	• Analysis of historical, current and estimated future salvage values.

CP depreciates the cost of properties, net of salvage, on a straight-line basis over the estimated useful life of the class of property. The estimates of economic lives are uncertain and can vary due to changes in any of the assessed factors noted in the table above for whole and remaining asset lives. Additionally, the depreciation rates are updated to reflect the change in residual values of the assets in the class.

It is anticipated that there will be changes in the estimates of weighted-average useful lives and net salvage for each property asset class as assets are acquired, used and retired. Substantial changes in either the useful lives of properties or the salvage assumptions could result in significant changes to depreciation expense. For example, if the estimated average life of track assets, including rail, ties, ballast and other track material, increased (or decreased) by one year, annual depreciation expense would decrease (or increase) by approximately $17 million.

Due to the capital intensive nature of the railway industry, depreciation represents a significant part of operating expenses. The estimated useful lives of properties have a direct impact on the amount of depreciation recorded as a component of "Properties" on the Company's Consolidated Balance Sheets. At December 31, 2019 and 2018, accumulated depreciation was $8,099 million and $7,964 million, respectively.

Deferred Income Taxes

CP accounts for deferred income taxes based on the liability method. This method focuses on the Company's balance sheet and the temporary differences otherwise calculated from the comparison of book versus tax values. The provision for deferred income taxes arises from temporary differences in the carrying values of assets and liabilities for financial statement and income tax purposes and the effect of loss carry forwards. It is assumed that such temporary differences will be settled in the deferred income tax assets and liabilities at the balance sheet date.

In determining deferred income taxes, the Company makes estimates and assumptions regarding deferred tax matters, including estimating the timing of the realization and settlement of deferred income tax assets (including the benefit of tax losses) and liabilities, and estimating unrecognized tax benefits for uncertain tax positions. Deferred income taxes are calculated using enacted federal, provincial, and state future income tax rates, which may differ in future periods.

Deferred income tax expense is included in "Income tax expense" on the Company's Consolidated Statements of Income. Additional disclosures are provided in Item 8. Financial Statements and Supplementary Data, Note 6 Income taxes.

Personal Injury and Other Claims Liabilities

CP estimates the potential liability arising from incidents, claims and pending litigations relating to personal injury claims by employees, third-party claims, certain occupation-related claims and property damage claims.

Personal Injury

In Canada, employee occupational injuries are governed by provincial workers' compensation legislation. Occupational injury claims in the provinces of Québec, Ontario, Manitoba and B.C. are self-insured and administered through each Worker's Compensation Board ("WCB"). The future costs related to occupation-related injuries are actuarially determined based on past experience and assumptions associated with the injury, compensation, income replacement, health care and administrative costs. In the four provinces where the Company is self-insured, a discount rate is applied to the future estimated costs based on market

rates for investment grade corporate bonds to determine the liability. An actuarial study is performed on an annual basis. In the provinces of Saskatchewan and Alberta, the Company is assessed an annual WCB contribution on a premium basis and this amount is not subject to estimation by management. At December 31, 2019 and 2018, respectively, the WCB liability was $85 million and $81 million in "Pension and other benefit liabilities"; $11 million and $12 million in "Accounts payable and accrued liabilities", offset by deposits paid to WCB of $1 million and $1 million in "Other assets" on the Company's Consolidated Balance Sheets.

U.S. railway employees are covered by federal law under the Federal Employers' Liability Act ("FELA") rather than workers' compensation programs. Accruals are set for individual cases based on facts, legal opinion and statistical analysis. U.S. accruals are also set and include alleged occupational exposure or injury.

Other Claims

A provision for litigation matters, equipment damages or other claims will be accrued according to applicable accounting standards and any such accrual will be based on an ongoing assessment of the strengths and weaknesses of the litigation or claim and its likelihood of success, together with an evaluation of the damages or other monetary relief sought. CP accrues for probable claims when the facts of an incident become known and investigation results provide a reasonable basis for estimating the liability. The lower end of the range is accrued if the facts and circumstances permit only a range of reasonable estimates and no single amount in that range is a better estimate than any other. Facts and circumstances related to asserted claims can change, and a process is in place to monitor accruals for changes in accounting estimates.

Forward-Looking Statements

This Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K contains certain forward-looking statements within the meaning of the *United States Private Securities Litigation Reform Act of 1995* and other relevant securities legislation, including applicable securities laws in Canada. Forward-looking statements typically include words such as "financial expectations", "key assumptions", "anticipate", "believe", "expect", "plan", "will", "outlook", "should" or similar words suggesting future outcomes. To the extent that CP has provided guidance using Non-GAAP financial measures, the Company may not be able to provide a reconciliation to a GAAP measure without unreasonable efforts, due to unknown variables and uncertainty related to future results.

This Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K includes forward-looking statements relating, but not limited to statements concerning the Company's defined benefit pension expectations for 2020 and through 2023, our expectations for 2020 financial and operational performance, including our full-year guidance for expected RTM and adjusted diluted EPS growth, planned capital expenditures (including how such capital expenditures are expected to be financed), expected impacts resulting from changes in the U.S.-to-Canadian dollar exchange rate, and the effective tax rate, as well as statements concerning the Company's operations, anticipated financial performance, business prospects and strategies, including statements concerning the anticipation that cash flow from operations and various sources of financing will be sufficient to meet debt repayments and obligations in the foreseeable future and concerning anticipated capital programs, and statements regarding future payments including income taxes and pension contributions. The purpose of the 2020 Adjusted diluted EPS growth projection is to assist readers in understanding our expected and targeted financial results, and this information may not be appropriate for other purposes.

The forward-looking statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K are based on current expectations, estimates, projections and assumptions, having regarding to the Company's experience and its perception of historical trends, and includes, but is not limited to, expectations, estimates, projections and assumptions relating to: North American and global economic growth; commodity demand growth; sustainable industrial and agricultural production; commodity prices and interest rates; foreign exchange rates (as specified herein); effective tax rates (as specified herein); performance of our assets and equipment; sufficiency of our budgeted capital expenditures in carrying out our business plan; applicable laws, regulations and government policies; the availability and cost of labour, services and infrastructure; and the satisfaction by third parties of their obligations to the Company. Although the Company believes the expectations, estimates, projections and assumptions reflected in the forward-looking statements presented herein are reasonable as of the date hereof, there can be no assurance that they will prove to be correct. Current economic conditions render assumptions, although reasonable when made, subject to greater uncertainty.

Undue reliance should not be placed on forward-looking statements as actual results may differ materially from those expressed or implied by forward-looking statements. By their nature, forward-looking statements involve numerous inherent risks and uncertainties that could cause actual results to differ materially from the forward-looking statements, including but not limited to the following factors: changes in business strategies; general North American and global economic, credit and business conditions; risks associated with agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demand; changes in commodity prices; uncertainty surrounding timing and volumes of commodities being shipped via CP; inflation; changes in laws, regulations and government policies, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; changes in fuel prices; uncertainties of investigations, proceedings or other types of claims and litigation; labour disputes; risks and liabilities arising from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions and discount rates on the financial position of pension plans and investments; trade restrictions or other changes to international trade arrangements; climate change; and various events that could disrupt operations, including severe weather, such as droughts, floods, avalanches and earthquakes, and cybersecurity attacks, as well as security threats and governmental response to them, and technological changes. The foregoing list of factors is not exhaustive.

There are more specific factors that could cause actual results to differ materially from those described in the forward-looking statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K. These more specific factors are identified and discussed in Item 1A. Risk Factors. Other risks are detailed from time to time in reports filed by CP with securities regulators in Canada and the United States.

The forward-looking statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations and Annual Report on Form 10-K are made as of the date hereof. Except as required by applicable law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking statements, or the foregoing assumptions and risks affecting such forward-looking information, whether as a result of new information, future events or otherwise.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Exchange Risk

Although CP conducts business primarily in Canada, a significant portion of its revenues, expenses, assets and liabilities including debt are denominated in U.S. dollars. The value of the Canadian dollar is affected by a number of domestic and international factors, including, without limitation, economic performance, and Canadian, U.S. and international monetary policies. Consequently, the Company's results are affected by fluctuations in the exchange rate between these currencies. On an annualized basis, a $0.01 weakening (or strengthening) of the Canadian dollar relative to the U.S. dollar positively (or negatively) impacts Total revenues by approximately $30 million (2018 – approximately $28 million), negatively (or positively) impacts Operating expenses by approximately $15 million (2018 – approximately $15 million), and negatively (or positively) impacts Net interest expense by approximately $3 million (2018 – approximately $3 million).

CP uses U.S. dollar-denominated debt to hedge its net investment in U.S. operations. As at December 31, 2019, the net investment in U.S. operations is less than the total U.S. dollar-denominated debt. Consequently, FX translation on the Company's undesignated debt and lease liabilities causes additional impacts on earnings in Other (income) expense.

To manage its exposure to fluctuations in exchange rates between Canadian and U.S. dollars, CP may sell or purchase U.S. dollar forwards at fixed rates in future periods. In addition, changes in the exchange rate between the Canadian dollar and other currencies (including the U.S. dollar) make the goods transported by the Company more or less competitive in the world marketplace and may in turn positively or negatively affect revenues.

Share Price Impact on Stock-Based Compensation

Based on information available at December 31, 2019, and expectations for 2020 grants, for every $1.00 change in share price, stock-based compensation expense has a corresponding change of approximately $0.4 million to $0.6 million (2018 – approximately $0.4 million to $0.6 million). This excludes the impact of changes in share price relative to the S&P/TSX 60 Index, Class I railways, S&P/TSX Capped Industrial Index, and S&P 1500 Road and Rail index, which may trigger different performance share unit payouts. Stock-based compensation may also be impacted by non-market performance conditions.

Additional information concerning stock-based compensation is included in Item 8. Financial Statements and Supplementary Data, Note 24 Stock-based compensation.

Interest Rate Risk

Debt financing forms part of the Company's capital structure. The debt agreements entered into expose CP to increased interest costs on future fixed debt instruments and existing variable rate debt instruments, should market rates increase. In addition, the present value of the Company's assets and liabilities will also vary with interest rate changes. To manage interest rate exposure, CP may enter into forward rate agreements such as treasury rate locks or bond forwards that lock in rates for a future date, thereby protecting against interest rate increases. CP may also enter into swap agreements whereby one party agrees to pay a fixed rate of interest while the other party pays a floating rate. Contingent on the direction of interest rates, the Company may incur higher costs depending on the contracted rate.

Information concerning market risks is supplemented in Item 8. Financial Statements and Supplementary Data, Note 19 Financial instruments.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Canadian Pacific Railway Limited

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Canadian Pacific Railway Limited and subsidiaries (the "Company") as of December 31, 2019 and 2018, the related consolidated statements of income, comprehensive income, cash flows, and changes in shareholders' equity, for each of the three years in the period ended December 31, 2019, and the related notes and the financial statement schedule listed in the Index at Item 15 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2019, in conformity with accounting principles generally accepted in the United States of America ("US GAAP").

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 20, 2020, expressed an unqualified opinion on the Company's internal control over financial reporting.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company has changed its method of accounting for leases as of January 1, 2019, due to the adoption of Accounting Standards Update 2016-02, Leases (Topic 842) and related amendments.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Properties – Direct Costs that are Capitalized to Self-constructed Assets – Refer to Notes 1 and 14 to the Financial Statements

Critical Audit Matter Description

The Company recognizes direct costs as capitalized additions to self-constructed assets, within properties, based on expenditures necessary to make an asset ready for its intended use. The capitalization of self-constructed assets requires management to make significant estimates and assumptions related to the capitalization of direct cost additions to self-constructed assets based on whether the expenditures meet capitalization criteria under US GAAP.

We identified the capitalization of direct cost additions to self-constructed assets as a critical audit matter because the judgments and assumptions management makes could have a significant impact on the capitalization of direct cost additions. As such auditing the capitalization of direct cost additions involves a high degree of auditor judgment.

How the Critical Audit Matter was Addressed in the Audit

Our audit procedures related to the capitalization of direct cost additions to self-constructed assets included the following, among others:

- Evaluated the effectiveness of controls over self-constructed assets, including those over the capitalization of direct cost additions to self-constructed assets.

- Selected a sample of direct costs, and obtained evidence to support the capitalized additions to self-constructed assets and assessed whether these expenditures met the capitalization criteria under US GAAP.

Defined Benefit Pension – Refer to Notes 1 and 23 to the Financial Statements

Critical Audit Matter Description

The Company's accounting of its defined benefit pension plans involves the measurement of the projected benefit obligation and fair value of fund assets. The measurement of the projected-benefit obligation requires management to make significant estimates and assumptions in the determination of the discount rate, which is based on blended market interest rates of high-quality corporate debt instruments with matching cash flows. The measurement of the fair value of fund assets requires management to make significant estimates and assumptions in the determination of the expected return on fund assets, which is calculated using the market-related value of assets.

We identified the determination of the discount rate (for the projected benefit obligation), and the determination of the expected return on fund assets (for the determination of the net period benefit cost) as the critical audit matters because of the significant estimates and assumptions management makes could have a significant impact on the projected benefit obligation and the fair value of fund assets. As such auditing the determination of the discount rate and the expected return on fund assets involves a high degree of auditor judgment as the estimates and assumptions made by management contains significant measurement uncertainty and resulted in an increased extent of effort, which included the need to involve an actuarial specialist.

How the Critical Audit Matter was Addressed in the Audit

Our audit procedures related to the determination of the discount rate (for the projected benefit obligation), and the expected return on fund assets (for the determination of the fair value of fund assets) included the following, among others:

- Evaluated the effectiveness of controls over defined benefit pension plans, including those over the determination of the discount rate and the expected return on fund assets.
- With the assistance of an actuarial specialist, we evaluated the reasonableness of the discount rate by:
  - Assessing the methodology used in management's determination of the discount rate,
  - Testing the underlying source information, and
  - Developing a range of independent estimates and comparing those to the discount rate selected by management.
- With the assistance of an actuarial specialist, we evaluated the reasonableness of the expected return on fund assets by:
  - Assessing the methodology used in management's determination of the expected return on fund assets,
  - Testing the underlying source information, and
  - Comparing management's assumptions to historical data and available market trends.
- Evaluated management's ability to accurately forecast the discount rate and expected return on fund assets by comparing actual results to management's historical forecasts.

CANADIAN PACIFIC RAILWAY LIMITED
Notes to Consolidated Financial Statements
December 31, 2019

Canadian Pacific Railway Limited ("CPRL"), through its subsidiaries (collectively referred to as "CP" or "the Company"), operates a transcontinental railway in Canada and the United States ("U.S."). CP provides rail and intermodal transportation services over a network of approximately 12,700 miles, serving the principal business centres of Canada from Montréal, Québec, to Vancouver, British Columbia, and the U.S. Northeast and Midwest regions. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company's market reach in Canada, throughout the U.S. and into Mexico. CP transports bulk commodities, merchandise freight and intermodal traffic. Bulk commodities include grain, coal, fertilizers and sulphur. Merchandise freight consists of finished vehicles and automotive parts, as well as forest, industrial and consumer products. Intermodal traffic consists largely of retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

1. Summary of significant accounting policies

Accounting principles generally accepted in the United States of America ("GAAP")

These Consolidated Financial Statements are expressed in Canadian dollars and have been prepared in accordance with GAAP.

Principles of consolidation

These Consolidated Financial Statements include the accounts of CP and all its subsidiaries. The Company's investments in which it has significant influence are accounted for using the equity method. Distributions received from equity method investees are classified using the nature of the distribution approach for cash flow presentation purposes, whereby distributions received are classified based on the nature of the activity or activities of the investee that generated the distribution as either a return on investment (classified as a cash inflow from operating activities) or a return of investment (classified as a cash inflow from investing activities). All intercompany accounts and transactions have been eliminated.

Use of estimates

The preparation of these Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the year, the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements. Management regularly reviews its estimates, including those related to environmental liabilities, pensions and other benefits, depreciable lives of properties, deferred income tax assets and liabilities, as well as legal and personal injury liabilities based upon currently available information. Actual results could differ from these estimates.

Principal subsidiaries

The following list sets out CPRL's principal railway operating subsidiaries, including the jurisdiction of incorporation. All of these subsidiaries are wholly owned, directly or indirectly, by CPRL as at December 31, 2019.

Principal subsidiary	Incorporated under the laws of
Canadian Pacific Railway Company	Canada
Soo Line Railroad Company ("Soo Line")	Minnesota
Delaware and Hudson Railway Company, Inc. ("D&H")	Delaware
Dakota, Minnesota & Eastern Railroad Corporation ("DM&E")	Delaware
Mount Stephen Properties Inc. ("MSP")	Canada

Revenue recognition

Revenue is recognized when obligations under the terms of a contract with a customer are satisfied. Revenue is measured as the amount of consideration the Company expects to receive in exchange for providing services. Government imposed taxes that the Company collects concurrent with revenue generating activities are excluded from revenue. In the normal course of business, the Company does not generate any material revenue through acting as an agent for other entities.

The Company provides rail freight transportation services to a wide variety of customers and transports bulk commodities, merchandise freight and intermodal traffic. The Company signs master service agreements with customers that dictate future services the Company is to perform for a customer at the time a bill of lading or service request is received. Each bill of lading or service request represents a separate distinct performance obligation that the Company is obligated to satisfy. The transaction price is generally in the form of a fixed fee determined at the inception of the bill of lading or service request. The Company allocates the transaction price to each distinct performance obligation based on the estimated standalone selling price for each performance obligation. As each bill of lading or service request represents a separate distinct performance obligation, the estimated standalone selling price is assessed at an observable price which

is fair market value. Certain customer agreements include variable consideration in the form of rebates, discounts, or incentives. The expected value method is used to estimate variable consideration and is allocated to the applicable performance obligation and is recognized when the related performance obligation is satisfied. Additionally, the Company offers published rates for services through public tariff agreements in which a customer can request service, triggering a performance obligation the Company must satisfy. Railway freight revenues are recognized over time as services are provided based on the percentage of completed service method. Volume rebates to customers are accrued as a reduction of freight revenues based on estimated volumes and contract terms as freight service is provided. Freight revenues also include certain ancillary and other services provided in association with the performance of rail freight movements. Revenues from these activities are not material and therefore have been aggregated with the freight revenues from customer contracts with which they are associated.

Non-freight revenues, including passenger revenues, switching fees, and revenues from logistics services, are recognized at the point in time the services are provided or when the performance obligations are satisfied. Non-freight revenues also include leasing revenues.

Payment by customers is due upon satisfaction of performance obligations. Payment terms are such that amounts outstanding at the period end are expected to be collected within one reporting period. The Company invoices customers at the time the bill of lading or service request is processed and therefore the Company has no material unbilled receivables and no contract assets. All performance obligations not fully satisfied at period end are expected to be satisfied within the reporting period immediately following. Contracted customer incentives are amortized to income over the term of the related revenue contract.

Cash and cash equivalents

Cash and cash equivalents include highly liquid short-term investments that are readily convertible to cash with original maturities of three months or less, but exclude cash and cash equivalents subject to restrictions.

Restricted cash and cash equivalents

Cash and cash equivalents that are restricted as to withdrawal or usage, in accordance with specific agreements, are presented as restricted cash and cash equivalents on the balance sheets when applicable. In the Company's Consolidated Statements of Cash Flows, these balances, if any, are included with cash and cash equivalents.

Foreign currency translation

Assets and liabilities denominated in foreign currencies, other than those held through foreign subsidiaries, are translated into Canadian dollars at the year-end exchange rate for monetary items and at the historical exchange rates for non-monetary items. Foreign currency revenues and expenses are translated at the exchange rates in effect on the dates of the related transactions. Foreign exchange ("FX") gains and losses, other than those arising from the translation of the Company's net investment in foreign subsidiaries, are included in income.

The accounts of the Company's foreign subsidiaries are translated into Canadian dollars using the year-end exchange rate for assets and liabilities and the average exchange rates during the year for revenues, expenses, gains and losses. FX gains and losses arising from the translation of the foreign subsidiaries' assets and liabilities are included in "Other comprehensive (loss) income". A portion of U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. As a result, unrealized FX gains and losses on U.S. dollar-denominated long-term debt, designated as a hedge, are offset against FX gains and losses arising from the translation of foreign subsidiaries' accounts in "Other comprehensive (loss) income".

Pensions and other benefits

Pension costs are actuarially determined using the projected-benefit method pro-rated over the credited service periods of employees. This method incorporates management's best estimates of expected plan investment performance, salary escalation and retirement ages of employees. The expected return on fund assets is calculated using market-related asset values developed from a five-year average of market values for the fund's public equity securities and absolute return strategies (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the fund's fixed income, real estate, infrastructure and private debt securities, subject to the market-related asset value not being greater than 120% of the market value nor being less than 80% of the market value. The discount rate used to determine the projected-benefit obligation is based on blended market interest rates on high-quality corporate debt instruments with matching cash flows. Unrecognized actuarial gains and losses in excess of 10% of the greater of the benefit obligation and the market-related value of plan assets are amortized over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 12 years). Prior service costs arising from collectively bargained amendments to pension plan benefit provisions are amortized over the term of the applicable union agreement. Prior service costs arising from all other sources are amortized over the expected average remaining service period of active employees who are expected to receive benefits under the plan at the date of amendment.

Costs for post-retirement and post-employment benefits other than pensions, including post-retirement health care and life insurance and some workers' compensation and long-term disability benefits in Canada, are actuarially determined on a basis similar to pension costs.

The over or under funded status of defined benefit pension and other post-retirement benefit plans are measured as the difference between the fair value of the plan assets and the benefit obligation, and are recognized on the balance sheets. In addition, any unrecognized actuarial gains and losses and prior service costs and credits that arise during the period are recognized as a component of "Other comprehensive (loss) income", net of tax.

Gains and losses on post-employment benefits that do not vest or accumulate, including some workers' compensation and long-term disability benefits in Canada, are included immediately on the Company's Consolidated Statements of Income as "Other components of net periodic benefit cost or recovery".

The current service cost component of net periodic benefit cost is reported in "Compensation and benefits" for pensions and post-retirement benefits, and in "Purchased services and other" for self-insured workers' compensation and long-term disability benefits on the Company's Consolidated Statements of Income. Other components of net periodic benefit cost or recovery are reported in "Other components of net periodic benefit cost or recovery" outside of Operating income on the Company's Consolidated Statements of Income.

Capitalization of pension costs, when applicable, is restricted to the current service cost component of net periodic benefit cost.

Materials and supplies

Materials and supplies are carried at the lower of average cost or market value and consist primarily of fuel and parts used in the repair and maintenance of track structures, equipment, locomotives and freight cars.

Properties

Fixed asset additions and major renewals are recorded at cost, including direct costs, attributable indirect costs and carrying costs, less accumulated depreciation and any impairment. When there is a legal obligation associated with the retirement of property, a liability is initially recognized at its fair value and a corresponding asset retirement cost is added to the gross book value of the related asset and amortized to expense over the estimated term to retirement. The Company reviews the carrying amounts of its properties whenever changes in circumstances indicate that such carrying amounts may not be recoverable based on future undiscounted cash flows. When such properties are determined to be impaired, recorded asset values are revised to their fair value and an impairment loss is recognized.

The Company recognizes expenditures as additions to properties or operating expenses based on whether the expenditures increase the output or service capacity, lower the associated operating costs or extend the useful life of the properties and whether the expenditures exceed minimum physical and financial thresholds.

Much of the additions to properties, both new and replacement properties, are self-constructed. These are initially recorded at cost, including direct costs and attributable indirect costs, overheads and carrying costs. Direct costs include, among other things, labour costs, purchased services, equipment costs and material costs. Attributable indirect costs and overheads include incremental long-term variable costs resulting from the execution of capital projects. Indirect costs mainly include work trains, material distribution, highway vehicles and work equipment. Overheads primarily include a portion of the engineering department's costs, which plans, designs and administers these capital projects. These costs are allocated to projects by applying a measure consistent with the nature of the cost, based on cost studies. For replacement properties, the project costs are allocated to dismantling and installation based on cost studies. Dismantling work, which is expensed, is performed concurrently with the installation.

Ballast programs including undercutting, shoulder ballasting and renewal programs that form part of the annual track program are capitalized as this work, and the related added ballast material, significantly improves drainage, which in turn extends the life of ties and other track materials. These costs are tracked separately from the underlying assets and depreciated over the period to the next estimated similar ballast program. Spot replacement of ballast is considered a repair which is expensed as incurred.

The costs of large refurbishments are capitalized and locomotive overhauls are expensed as incurred, except where overhauls represent a betterment of the locomotive in which case costs are capitalized.

The Company capitalizes development costs for major new computer systems.

The Company follows group depreciation, which groups assets which are similar in nature and have similar economic lives. The property groups are depreciated on a straight-line basis reflecting their expected economic lives determined by depreciation studies. Depreciation studies are regular reviews of asset service lives, salvage values, accumulated depreciation and other related factors. Depreciation rates are established through these studies. Actual use and retirement of assets may vary from current estimates, and would be identified in the next study. These changes in expected economic lives would impact the amount of depreciation expense recognized in future periods. All track assets are depreciated using a straight-line method which recognizes the value of the asset consumed as a percentage of the whole life of the asset.

When depreciable property is retired or otherwise disposed of in the normal course of business, the book value, less net salvage proceeds, is charged to accumulated depreciation and if different than the assumptions under the depreciation study could potentially result in adjusted depreciation expense over a period of years. However, when removal costs exceed the salvage value on assets and the Company has no legal obligation to remove the assets, the removal costs incurred are charged to income in the period in which the assets are removed and are not charged to accumulated depreciation.

For certain asset classes, the historical cost of the asset is separately recorded in the Company's property records. This amount is retired from the property records upon retirement of the asset. For assets for which the historical cost cannot be separately identified the amount of the gross book value to be retired is estimated

using either an indexation methodology, whereby the current replacement cost of the asset is indexed to the estimated year of installation for the asset, or a first-in, first-out approach, or statistical analysis is used to determine the age of the retired asset. CP uses indices that closely correlate to the principal costs of the assets.

There are a number of estimates inherent in the depreciation and retirement processes and as it is not possible to precisely estimate each of these variables until a group of property is completely retired, CP regularly monitors the estimated service lives of assets and the associated accumulated depreciation for each asset class to ensure depreciation rates are appropriate. If the recorded amounts of accumulated depreciation are greater or less than the amounts indicated by the depreciation studies, then the excess or deficit is amortized as a component of depreciation expense over the remaining service lives of the applicable asset classes.

For the sale or retirement of larger groups of depreciable assets that are unusual and were not considered in the Company's depreciation studies, CP records a gain or loss for the difference between net proceeds and net book value of the assets sold or retired. The accumulated depreciation to be retired includes asset-specific accumulated depreciation, when known, and an appropriate portion of the accumulated depreciation recorded for the relevant asset class as a whole, calculated using a cost-based allocation.

Revisions to the estimated useful lives and net salvage projections constitute a change in accounting estimate and are addressed prospectively by amending depreciation rates.

Equipment under finance lease is included in Properties and depreciated over the period of expected use.

Leases

The Company has leases for rolling stock, buildings, vehicles, railway equipment, and roadway machines. CP has entered into rolling stock leases that are fully variable or contain both fixed and variable components. Variable components are dependent on the hours and miles that the underlying equipment has been used. Fixed term, short-term, and variable operating lease costs are recorded in "Equipment rents" and "Purchased services and other" on the Company's Consolidated Statements of Income. Components of finance lease costs are recorded in "Depreciation and amortization" and "Net interest expense" on the Company's Consolidated Statements of Income.

The Company determines lease existence and classification at the lease inception date. Leases are identified when an agreement conveys the right to control identified property for a period of time in exchange for consideration. The Company recognizes both an operating lease liability and right-of-use ("ROU") asset for operating leases with fixed terms and in-substance fixed terms. ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating and finance lease ROU assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. Lease payments include fixed and variable payments that are based on an index or a rate. If the Company's leases do not provide a readily determinable implicit interest rate, the Company uses internal incremental secured borrowing rates for comparable tenor in the same currency at the commencement date in determining the present value of lease payments. Operating and finance lease ROU assets also include lease prepayments and initial direct costs, but are reduced by lease incentives. The lease term may include periods associated with options to extend or exclude periods associated with options to terminate the lease when it is reasonably certain that the Company will exercise these options.

The Company has short-term operating leases with terms of 12 months or less, some of which include options to purchase that the Company is not reasonably certain to exercise. The Company has elected to apply the recognition exemption and, as such, accounts for leases with a term of 12 months or less off-balance sheet. Therefore, lease payments on these short-term operating leases are not included in operating lease ROU assets and liabilities, but are recognized as an expense in the Company's Consolidated Statements of Income on a straight-line basis over the term of the lease. Further, the Company has elected to combine lease and non-lease components for all leases, except for leases of roadway machines and information systems hardware.

Assets held for sale

Assets to be disposed that meet the held for sale criteria are reported at the lower of their carrying amount and fair value, less costs to sell, and are no longer depreciated.

Goodwill and intangible assets

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets upon acquisition of a business. Goodwill is assigned to the reporting units that are expected to benefit from the business acquisition which, after integration of operations with the railway network, may be different than the acquired business.

The carrying value of goodwill, which is not amortized, is assessed for impairment annually in the fourth quarter of each year as at October 1st, or more frequently as economic events dictate. The Company has the option of performing an assessment of certain qualitative factors ("Step 0") to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying value or proceeding directly to a quantitative impairment test ("Step 1"). Qualitative factors include but are not limited to, economic, market and industry conditions, cost factors and overall financial performance of the reporting unit. If Step 0 indicates that the carrying value is less than the fair value, then performing the two-step impairment test is unnecessary. Under Step 1, the fair value of the

reporting unit is compared to its carrying value, including goodwill. If the fair value of the reporting unit is less than its carrying value, goodwill is potentially impaired. The impairment charge that would be recognized is the excess of the carrying value of the goodwill over the fair value of the goodwill, determined in the same manner as in a business combination.

Intangible assets with finite lives are amortized on a straight-line basis over the estimated useful lives of the respective assets. Favourable leases, customer relationships and interline contracts have amortization periods ranging from 15 to 20 years. When there is a change in the estimated useful life of an intangible asset with a finite life, amortization is adjusted prospectively.

Financial instruments

Financial instruments are contracts that give rise to a financial asset of one party and a financial liability or equity instrument of another party.

Financial instruments are recognized initially at fair value, which is the amount of consideration that would be agreed upon in an arm's-length transaction between willing parties.

Subsequent measurement depends on how the financial instruments have been classified. Accounts receivable and other investments, classified as loans and receivables, are measured at amortized cost, using the effective interest method. Cash and cash equivalents and derivatives are classified as held for trading and are measured at fair value. Accounts payable, accrued liabilities, short-term borrowings, other long-term liabilities and long-term debt are also measured at amortized cost.

Derivative financial instruments

Derivative financial and commodity instruments may be used from time to time by the Company to manage its exposure to risks relating to foreign currency exchange rates, stock-based compensation, interest rates and fuel prices. When CP utilizes derivative instruments in hedging relationships, CP identifies, designates and documents those hedging transactions and regularly tests the transactions to demonstrate effectiveness in order to continue hedge accounting.

All derivative instruments are classified as held for trading and recorded at fair value. Any change in the fair value of derivatives not designated as hedges is recognized in the period in which the change occurs in the Company's Consolidated Statements of Income in the line item to which the derivative instrument is related.

For fair value hedges, the periodic changes in values are recognized in income, on the same line as the changes in values of the hedged items are also recorded. For an effective cash flow hedge, the entire change in value of the hedging instrument is recognized in "Other comprehensive (loss) income". The change in value of the effective cash flow hedge remains in "Accumulated other comprehensive loss" until the related hedged item settles, at which time amounts recognized in "Accumulated other comprehensive loss" are reclassified to the same income or balance sheet account that records the hedged item.

Cash flows relating to derivative instruments designated as hedges are included in the same line as the related hedged items on the Company's Consolidated Statements of Cash Flows.

Environmental remediation

Environmental remediation accruals, recorded on an undiscounted basis unless a reliably determinable estimate as to amount and timing of costs can be established, cover site-specific remediation programs. The accruals are recorded when the costs to remediate are probable and reasonably estimable. Certain future costs to monitor sites are discounted at an adjusted risk-free rate. Provisions for environmental remediation costs are recorded in "Other long-term liabilities", except for the current portion, which is recorded in "Accounts payable and accrued liabilities".

Income taxes

The Company follows the liability method of accounting for income taxes. Deferred income tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates and laws that will be in effect when the differences are expected to reverse.

The effect of a change in income tax rates on deferred income tax assets and liabilities is recognized in income in the period during which the change occurs.

When appropriate, the Company records a valuation allowance against deferred tax assets to reflect that these tax assets may not be realized. In determining whether a valuation allowance is appropriate, CP considers whether it is more likely than not that all or some portion of CP's deferred tax assets will not be realized, based on management's judgment using available evidence about future events.

At times, tax benefit claims may be challenged by a tax authority. Tax benefits are recognized only for tax positions that are more likely than not sustainable upon examination by tax authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely to be realized upon settlement. A liability for "unrecognized tax benefits" is recorded for any tax benefits claimed in CP's tax returns that do not meet these recognition and measurement standards.

Investment and other similar tax credits are deferred on the Company's Consolidated Balance Sheets and amortized to "Income tax expense" as the related asset is recognized in income. Income tax recovery or expense on items in "Accumulated other comprehensive loss" are recognized in "Income tax expense" as the related item is recognized in income.

Earnings per share

Basic earnings per share are calculated using the weighted-average number of the Company's Common Shares (the "Common Shares') outstanding during the year. Diluted earnings per share are calculated using the treasury stock method for determining the dilutive effect of options.

Stock-based compensation

CP follows the fair value based approach to account for stock options. Compensation expense and an increase in "Additional paid-in capital" are recognized for stock options over their vesting period, or over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period, based on their estimated fair values on the grant date, as determined using the Black-Scholes option-pricing model.

Any consideration paid by employees on exercise of stock options is credited to "Share capital" when the option is exercised and the recorded fair value of the option is removed from "Additional paid-in capital" and credited to "Share capital".

Compensation expense is also recognized for deferred share units ("DSUs"), performance share units ("PSUs") and restricted share units ("RSUs") that settle in cash using the fair value method. Compensation expense is recognized over the vesting period, or for PSUs and DSUs only, over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period. Forfeitures of DSUs, PSUs, and RSUs are estimated at issuance and subsequently at the balance sheet date.

The employee share purchase plan gives rise to compensation expense that is recognized using the issue price by amortizing the cost over the vesting period or over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period.

2. Accounting changes

Implemented in 2019

Leases

On January 1, 2019, the Company adopted the new Accounting Standards Update ("ASU") 2016-02, issued by the Financial Accounting Standards Board ("FASB"), and all related amendments under FASB Accounting Standards Codification ("ASC") Topic 842, Leases. Using the cumulative-effect adjustment transition approach, the Company recognized a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. Accordingly, comparative financial information has not been restated and continues to be reported under the accounting standards in effect for those periods.

In January 2019, the Company implemented a lease management system to assist in delivering the required accounting changes. To facilitate the transition, the Company made policy choices to utilize available practical expedients provided by the new standard, including the:

- Acceptance of the package of practical expedients, permitting the Company not to reassess lease existence, classification, and capitalization of initial direct costs previously determined for all leases under Topic 840, Leases;
- Acceptance of the previous accounting treatment for land easements where Topic 840 was not applied; and
- Use of hindsight at transition to determine lease term length.

Operating leases with fixed terms and in-substance fixed terms were transitioned by recognizing both an operating lease liability and ROU asset. Operating lease liabilities and ROU assets were calculated at the present value of remaining lease payments using the Company's incremental borrowing interest rate as at January 1, 2019. ROU assets were further modified to include previously accrued balances for prepayments and initial direct costs, but reduced for accrued lease incentives. The Company did not recognize operating lease liabilities or ROU assets for leases requiring variable payment not dependent on an index or rate, or short term leases with a term of 12 months or less.

On adoption, the standard had a material impact on the Company's consolidated balance sheet, but did not have a significant impact on its consolidated statement of income. The most significant impact was the recognition of operating lease ROU assets and operating lease liabilities, while the Company's accounting for finance leases remained substantially unchanged.

The impact of the adoption of ASC 842 as at January 1, 2019 was as follows:

(in millions of Canadian dollars)	As reported December 31, 2018	New lease standard cumulative-effect	As restated January 1, 2019
Assets			
Properties	$ 18,418	$ (12)	$ 18,406
Other assets	71	399	470
Liabilities			
Accounts payable and accrued liabilities	1,449	58	1,507
Other long-term liabilities	237	337	574
Deferred income taxes	3,518	(3)	3,515
Shareholders' equity			
Retained earnings	$ 6,635	$ (5)	$ 6,630

There was no significant impact to lessor accounting upon the adoption of ASC 842.

Future Changes

Financial Instruments – Credit Losses

In June 2016, the FASB issued ASU 2016-13, Measurement of Credit Losses on Financial Instruments under FASB ASC Topic 326. This will replace the current incurred loss methodology used for establishing a provision against financial assets, including accounts receivable, with a forward-looking expected loss methodology for accounts receivable, loans and other financial instruments. The standard is effective as of January 1, 2020. Entities are required to apply the amendments in this update using a modified retrospective approach, through a cumulative-effect adjustment to retained earnings as of the effective date. The Company expects that the adoption of this new accounting standard will not result in any material change to accounts receivable or retained earnings. The Company will estimate its expected credit loss by applying an appropriate expected loss methodology to individual portfolios of the Company's financial assets with portfolios representing assets with similar risk characteristics.

3. Revenues

The following table disaggregates the Company's revenues from contracts with customers by major source:

(in millions of Canadian dollars)	2019	2018	2017
Freight			
Grain	**$ 1,684**	$ 1,566	$ 1,532
Coal	**682**	673	631
Potash	**462**	486	411
Fertilizers and sulphur	**250**	243	241
Forest products	**304**	284	265
Energy, chemicals and plastics	**1,534**	1,243	898
Metals, minerals and consumer products	**752**	797	739
Automotive	**352**	322	293
Intermodal	**1,593**	1,538	1,365
Total freight revenues	**7,613**	7,152	6,375
Non-freight excluding leasing revenues	**116**	102	117
Revenues from contracts with customers	**7,729**	7,254	6,492
Leasing revenues	**63**	62	62
Total revenues	**$ 7,792**	$ 7,316	$ 6,554

Contract liabilities

Contract liabilities represent payments received for performance obligations not yet satisfied and relate to deferred revenue and are presented as components of "Accounts payable and accrued liabilities" and "Other long-term liabilities" on the Company's Consolidated Balance Sheets.

The following table summarizes the changes in contract liabilities for the years ended December 31, 2019 and 2018:

(in millions of Canadian dollars)		2019		2018
Opening balance	$	**2**	$	2
Revenue recognized that was included in the contract liability balance at the beginning of the period		**(2)**		(2)
Increases due to consideration received, net of revenue recognized during the period		**146**		2
Closing balance	$	**146**	$	2

4. Other (income) expense

(in millions of Canadian dollars)		2019		2018		2017
Foreign exchange (gain) loss on debt and lease liabilities	$	**(94)**	$	168	$	(186)
Other foreign exchange (gains) losses		**(4)**		3		(7)
Insurance recovery of legal settlement		**—**		—		(10)
Charge on hedge roll and de-designation		**—**		—		13
Other		**9**		3		12
Other (income) expense	$	**(89)**	$	174	$	(178)

5. Net interest expense

(in millions of Canadian dollars)		2019		2018		2017
Interest cost	$	**471**	$	475	$	491
Interest capitalized to Properties		**(17)**		(20)		(16)
Interest expense		**454**		455		475
Interest income		**(6)**		(2)		(2)
Net interest expense	$	**448**	$	453	$	473

Interest expense includes interest on finance leases of $11 million for the year ended December 31, 2019 (2018 – $11 million; 2017 – $11 million).

6. Income taxes

The following is a summary of the major components of the Company's income tax expense:

(in millions of Canadian dollars)	2019	2018	2017
Current income tax expense	$ **525**	$ 381	$ 303
Deferred income tax expense			
Origination and reversal of temporary differences	**316**	214	371
Effect of tax rate decrease	**(95)**	(21)	(541)
Effect of hedge of net investment in foreign subsidiaries	**(38)**	64	(42)
Other	**(2)**	(1)	2
Total deferred income tax expense (recovery)	**181**	256	(210)
Total income taxes	$ **706**	$ 637	$ 93
Income before income tax expense			
Canada	$ **2,392**	$ 1,788	$ 1,829
Foreign	**754**	800	669
Total income before income tax expense	$ **3,146**	$ 2,588	$ 2,498
Income tax expense			
Current			
Canada	$ **410**	$ 336	$ 257
Foreign	**115**	45	46
Total current income tax expense	**525**	381	303
Deferred			
Canada	**141**	174	256
Foreign	**40**	82	(466)
Total deferred income tax expense (recovery)	**181**	256	(210)
Total income taxes	$ **706**	$ 637	$ 93

The provision for deferred income taxes arises from temporary differences in the carrying values of assets and liabilities for financial statement and income tax purposes and the effect of loss carry forwards. The items comprising the deferred income tax assets and liabilities are as follows:

(in millions of Canadian dollars)	2019	2018
Deferred income tax assets		
Amount related to tax losses carried forward	$ **6**	$ 11
Liabilities carrying value in excess of tax basis	**139**	97
Unrealized foreign exchange losses	**26**	85
Environmental remediation costs	**22**	23
Other	**4**	2
Total deferred income tax assets	**197**	218
Valuation allowance	**—**	(5)
Total net deferred income tax assets	**197**	213
Deferred income tax liabilities		
Properties carrying value in excess of tax basis	**3,524**	3,496
Pensions carrying value in excess of tax basis	**83**	164
Other	**91**	71
Total deferred income tax liabilities	**3,698**	3,731
Total net deferred income tax liabilities	$ **3,501**	$ 3,518

The Company's consolidated effective income tax rate differs from the expected Canadian statutory tax rates. Expected income tax expense at statutory rates is reconciled to income tax expense as follows:

(in millions of Canadian dollars, except percentage)		**2019**		2018		2017
Statutory federal and provincial income tax rate (Canada)		**26.77%**		26.86%		26.56%
Expected income tax expense at Canadian enacted statutory tax rates	**$**	**842**	$	695	$	663
(Decrease) increase in taxes resulting from:						
(Gains) losses not subject to tax		**(19)**		8		(27)
Canadian tax rate differentials		**—**		—		1
Foreign tax rate differentials		**(33)**		(55)		(9)
Effect of tax rate decrease		**(95)**		(21)		(541)
Valuation allowance		**(5)**		5		—
Unrecognized tax benefits[1]		**33**		—		1
Other[1]		**(17)**		5		5
Income tax expense	**$**	**706**	$	637	$	93

[1] 2017 comparative period figures have been reclassified to conform with current presentation.

In 2019, the Company revalued its deferred income tax balances as a result of a corporate income tax rate decrease in the province of Alberta, resulting in a net recovery of $88 million.

In 2018, the Company revalued its deferred income tax balances as a result of corporate income tax rate decreases in the states of Iowa and Missouri, resulting in a net recovery of $21 million.

On December 22, 2017, the U.S. enacted the "*Tax Cuts and Jobs Act*" which has been commonly referred to as U.S. tax reform. A significant change under this reform was the reduction of the U.S. federal statutory corporate income tax rate from 35% to 21% beginning in 2018. As a result of this and other tax rate increases in the province of British Columbia and the state of Illinois, the Company revalued its deferred income tax balances accordingly. For the full year 2017, revaluations of deferred tax balances associated with changes in tax rates totaled a net recovery of $541 million.

The Company has not provided a deferred liability for the income taxes, if any, which might become payable on any temporary difference associated with its foreign investments because the Company intends to indefinitely reinvest in its foreign investments and has no intention to realize this difference by a sale of its interest in foreign investments. It is not practical to calculate the amount of the deferred tax liability.

It is more likely than not that the Company will realize the majority of its deferred income tax assets from the generation of future taxable income, as the payments for provisions, reserves and accruals are made and losses and tax credits carried forward are utilized.

At December 31, 2019, the Company had tax effected operating losses carried forward of $4 million (2018 – $8 million), which have been recognized as a deferred tax asset. The majority of these losses carried forward will begin to expire in 2031, with the remaining expiring between 2034 and 2036. The Company expects to fully utilize these tax effected operating losses before their expiry. The Company did not have any minimum tax credits or investment tax credits carried forward.

At December 31, 2019, the Company had $2 million (2018 – $3 million) in tax effected capital losses carried forward recognized as a deferred tax asset. The Company has no unrecognized tax benefits from capital losses at December 31, 2019 and 2018.

The following table provides a reconciliation of uncertain tax positions in relation to unrecognized tax benefits for Canada and the U.S. for the year ended December 31:

(in millions of Canadian dollars)	2019	2018	2017
Unrecognized tax benefits at January 1	**$ 13**	$ 13	$ 13
Increase in unrecognized:			
Tax benefits related to the current year	**9**	1	—
Tax benefits related to prior years	**34**	—	—
Dispositions:			
Gross uncertain tax benefits related to prior years	**—**	(1)	—
Settlements with taxing authorities	**(4)**	—	—
Unrecognized tax benefits at December 31	**$ 52**	$ 13	$ 13

If these uncertain tax positions were recognized, all of the amount of unrecognized tax positions as at December 31, 2019 would impact the Company's effective tax rate.

During the fourth quarter of 2019, a tax authority proposed an adjustment for a prior tax year without assessing taxes. Although the Company has commenced action to have the proposal removed, an increase in uncertain tax position has been recorded on deferred income tax liability and expense in the amount of $24 million. The ultimate resolution of this matter may give rise to further favourable or unfavourable adjustments to deferred tax, the timing and amount of which are not determinable at this time.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of "Income tax expense" in the Company's Consolidated Statements of Income. The net amount of accrued interest and penalties in 2019 was a $1 million recovery (2018 – $nil; 2017 – $1 million expense). The total amount of accrued interest and penalties associated with the unrecognized tax benefit at December 31, 2019 was $10 million (2018 – $11 million; 2017 – $11 million).

The Company and its subsidiaries are subject to either Canadian federal and provincial income tax, U.S. federal, state and local income tax, or the relevant income tax in other international jurisdictions. The Company has substantially concluded all Canadian federal and provincial income tax matters for the years through 2013. The federal and provincial income tax returns filed for 2014 and subsequent years remain subject to examination by the Canadian taxation authorities. The Internal Revenue Service ("IRS") audit for 2012 and 2013 has been settled. The income tax returns for 2016 and subsequent years continue to remain subject to examination by the IRS and U.S. state tax jurisdictions. The Company believes that it has recorded sufficient income tax reserves at December 31, 2019 with respect to these income tax examinations.

7. Earnings per share

Basic earnings per share has been calculated using Net income for the year divided by the weighted-average number of shares outstanding during the year.

Diluted earnings per share has been calculated using the treasury stock method which assumes that any proceeds received from the exercise of in-the-money options would be used to purchase CP Common Shares at the average market price for the period. For purposes of this calculation, at December 31, 2019, there were 1.6 million dilutive options outstanding (2018 – 1.3 million; 2017 – 1.4 million).

The number of shares used and the earnings per share calculations are reconciled as follows:

(in millions of Canadian dollars, except per share data)	2019	2018	2017
Net income	**$ 2,440**	$ 1,951	$ 2,405
Weighted-average basic shares outstanding (millions)	**138.8**	142.9	145.9
Dilutive effect of stock options (millions)	**0.5**	0.4	0.4
Weighted-average diluted shares outstanding (millions)	**139.3**	143.3	146.3
Earnings per share – basic	**$ 17.58**	$ 13.65	$ 16.49
Earnings per share – diluted	**$ 17.52**	$ 13.61	$ 16.44

In 2019, there were no options excluded from the computation of diluted earnings per share (2018 – 0.2 million; 2017 – 0.3 million).

8. Other comprehensive (loss) income and accumulated other comprehensive loss

The components of Other comprehensive (loss) income and the related tax effects are as follows:

(in millions of Canadian dollars)	Before tax amount	Income tax (expense) recovery	Net of tax amount
For the year ended December 31, 2019			
Unrealized foreign exchange (loss) gain on:			
Translation of the net investment in U.S. subsidiaries	**$ (251)**	**$ —**	**$ (251)**
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 19)	**288**	**(38)**	**250**
Realized loss on derivatives designated as cash flow hedges recognized in income	**10**	**(2)**	**8**
Change in pension and other benefits actuarial gains and losses	**(661)**	**175**	**(486)**
Other comprehensive loss	**$ (614)**	**$ 135**	**$ (479)**
For the year ended December 31, 2018			
Unrealized foreign exchange gain (loss) on:			
Translation of the net investment in U.S. subsidiaries	$ 419	$ —	$ 419
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 19)	(479)	64	(415)
Change in derivatives designated as cash flow hedges:			
Realized loss on cash flow hedges recognized in income	10	(3)	7
Unrealized gain on cash flow hedges and other	28	(8)	20
Change in pension and other benefits actuarial gains and losses	(447)	115	(332)
Change in prior service pension and other benefit costs	(2)	1	(1)
Other comprehensive loss	$ (471)	$ 169	$ (302)
For the year ended December 31, 2017			
Unrealized foreign exchange (loss) gain on:			
Translation of the net investment in U.S. subsidiaries	$ (295)	$ —	$ (295)
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 19)	319	(42)	277
Change in derivatives designated as cash flow hedges:			
Realized loss on cash flow hedges recognized in income	25	(6)	19
Unrealized loss on cash flow hedges and other	(6)	2	(4)
Change in pension and other benefits actuarial gains and losses	84	(20)	64
Change in prior service pension and other benefit costs	(4)	1	(3)
Other comprehensive income	$ 123	$ (65)	$ 58

The components of Accumulated other comprehensive loss, net of tax, are as follows:

(in millions of Canadian dollars)	**2019**	2018
Unrealized foreign exchange gain on translation of the net investment in U.S. subsidiaries	**$ 611**	$ 862
Unrealized foreign exchange loss on translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries	**(499)**	(749)
Net deferred losses on derivatives and other	**(54)**	(62)
Amounts for defined benefit pension and other post-retirement plans not recognized in income (Note 23)	**(2,580)**	(2,094)
Accumulated other comprehensive loss	**$ (2,522)**	$ (2,043)

Changes in Accumulated other comprehensive loss by component are as follows:

(in millions of Canadian dollars)	Foreign currency net of hedging activities[1]	Derivatives and other[1]	Pension and post-retirement defined benefit plans[1]	Total[1]
Opening balance, January 1, 2019	**$ 113**	**$ (62)**	**$ (2,094)**	**$ (2,043)**

9. Change in non-cash working capital balances related to operations

(in millions of Canadian dollars)	2019	2018	2017
Source (use) of cash:			
Accounts receivable, net	**$ 27**	$ (107)	$ (91)
Materials and supplies	**(8)**	(11)	9
Other current assets	**(24)**	30	(26)
Accounts payable and accrued liabilities	**(21)**	153	(30)
Change in non-cash working capital	**$ (26)**	$ 65	$ (138)

10. Accounts receivable, net

(in millions of Canadian dollars)	2019	2018
Freight	**$ 637**	$ 677
Non-freight	**210**	168
	847	845
Allowance for doubtful accounts	**(42)**	(30)
Total accounts receivable, net	**$ 805**	$ 815

The Company maintains an allowance for doubtful accounts based on expected collectability of accounts receivable. The Allowance for doubtful accounts is based on specific identification of uncollectable accounts, the application of historical percentages by aging category, and an assessment of the current economic environment.

11. Business combination

On December 30, 2019, CP acquired 100% of Central Maine & Québec Railway Canada Inc. ("CMQ Canada") and Central Maine & Québec Railway U.S. Inc. ("CMQ U.S.") (together "CMQ") for cash consideration of $174 million. CMQ owns 237 miles of rail lines in Québec and 244 miles of rail lines in Maine and Vermont.

CMQ Canada

The acquisition of CMQ Canada has been accounted for as a business combination under the acquisition method of accounting. The acquired tangible and intangible assets and assumed liabilities are recorded at their estimated fair values at the date of acquisition.

The purchase price allocation was prepared on a preliminary basis and is subject to change as additional information becomes available concerning the fair value and tax bases of the net assets acquired. Any adjustments to the purchase price allocation will be made as soon as practicable but no later than one year from the date of acquisition.

The following summarizes the estimated fair values of the acquired assets and liabilities of CMQ Canada:

(in millions of Canadian dollars)		**2019**
Fair value of net assets acquired:		
Accounts receivable, net	$	7
Properties		42
Intangible assets (Note 15)		5
Accounts payable and accrued liabilities		(2)
Long-term debt maturing within one year (Note 18)		(11)
Other long-term liabilities		(4)
Total identifiable assets and liabilities	$	37
Goodwill (Note 15)		10
	$	**47**
Consideration:		
Cash, net of cash acquired	**$**	**47**

The goodwill of $10 million relates primarily to expected operating business synergies. The factors that contribute to the goodwill are revenue growth from customers which are currently not served by CP, access to new routes and an assembled workforce. The goodwill recognized is not deductible for tax purposes.

CP has not provided pro forma information relating to the pre-acquisition period as it is not material.

CMQ U.S.

CP currently accounts for its $127 million cost of acquisition of CMQ U.S. using the equity method of accounting as the shares of CMQ U.S. are held in an independent voting trust while the United States Surface Transportation Board ("STB") considers the Company's control application (see Note 13). Subject to final approval of the transaction by the STB, the acquisition of CMQ U.S. will be accounted for as a business combination using the acquisition method of accounting.

12. Dispositions of properties

During the fourth quarter of 2018, the Company completed the sale of the Bass Lake railway line for gross proceeds of $37 million (U.S. $27 million). The company recorded a gain on sale of $35 million ($26 million after tax) within "Purchased services and other" from the transaction.

13. Investments

(in millions of Canadian dollars)	2019	2018
Investment in CMQ U.S. accounted for on an equity basis (Note 11)	**$ 127**	$ —
Other rail investments accounted for on an equity basis	**166**	160
Other investments	**48**	43
Total investments	**$ 341**	$ 203

14. Properties

(in millions of Canadian dollars except percentages)	2019	2019			2018		
	Weighted-average annual depreciation rate	**Cost**	**Accumulated depreciation**	**Net book value**	Cost	Accumulated depreciation	Net book value
Track and roadway	2.8%	**$ 19,299**	**$ 5,522**	**$ 13,777**	$ 18,599	$ 5,236	$ 13,363
Buildings	2.9%	**833**	**237**	**596**	781	218	563
Rolling stock	2.8%	**4,529**	**1,445**	**3,084**	4,467	1,613	2,854
Information systems software[1]	10.0%	**527**	**215**	**312**	551	252	299
Other	5.2%	**2,067**	**680**	**1,387**	1,984	645	1,339
Total		**$ 27,255**	**$ 8,099**	**$ 19,156**	$ 26,382	$ 7,964	$ 18,418

[1] During 2019, CP capitalized costs attributable to the design and development of internal-use software in the amount of $55 million (2018 – $53 million; 2017 – $49 million). Current year depreciation expense related to internal use software was $44 million (2018 – $49 million; 2017 – $55 million).

Finance leases included in properties

					8,757	8,696
Less: Long-term debt maturing within one year					**599**	506
					$ 8,158	$ 8,190

At December 31, 2019, the gross amount of long-term debt denominated in U.S. dollars was U.S. $6,016 million (2018 – U.S. $5,970 million).

Annual maturities and principal repayment requirements, excluding those pertaining to finance leases, for each of the five years following 2019 are (in millions): 2020 – $592; 2021 – $365; 2022 – $477; 2023 – $484; 2024 – $84.

Fees on long-term debt are amortized to income over the term of the related debt.

A. These debentures and notes are presented net of unamortized discounts, pay interest semi-annually, and are unsecured but carry a negative pledge.

In 2019, the Company repaid U.S. $350 million 7.250% 10-year Notes at maturity for a total of U.S. $350 million ($471 million). The Company also issued $400 million 3.150% 10-year Notes due March 13, 2029 for net proceeds of $397 million.

In 2018, the Company repaid U.S. $275 million 6.500% 10-year Notes at maturity for a total of U.S. $275 million ($352 million) and $375 million 6.250% 10-year Medium Term Notes at maturity for a total of $375 million. The Company also issued U.S. $500 million 4.000% 10-year Notes due June 1, 2028 for net proceeds of U.S. $495 million ($638 million). In conjunction with the issuance, the Company settled a notional U.S. $500 million of forward starting floating-to-fixed interest rate swap agreements ("forward starting swaps") for a payment of U.S. $19 million ($24 million) (see Note 19). This payment was included in cash provided by operating activities consistent with the location of the related hedged item on the Company's Consolidated Statements of Cash Flows.

B. On December 30, 2019, through its business combination with CMQ Canada, the Company assumed CMQ Canada's obligations under the 8.00% 5-year Promissory Notes totalling U.S. $8 million ($11 million) owing to CMQ U.S. (see Note 11).

C. The 5.41% Senior Secured Notes are collateralized by specific locomotive units with a carrying value of $102 million at December 31, 2019. The Company pays equal blended semi-annual payments of principal and interest. Final repayment of the remaining principal of U.S. $44 million is due in March 2024.

D. The 6.91% Secured Equipment Notes are full recourse obligations of the Company collateralized by a first charge on specific locomotive units with a carrying value of $59 million at December 31, 2019. The Company pays equal blended semi-annual payments of principal and interest. Final repayment of the remaining principal of $11 million is due in October 2024.

E. The 7.49% Equipment Trust Certificates are secured by specific locomotive units with a carrying value of $97 million at December 31, 2019. The Company makes semi-annual payments that vary in amount and are interest-only payments or blended principal and interest payments. Final repayment of the remaining principal of U.S. $11 million is due in January 2021.

F. The carrying value of the assets collateralizing finance lease obligations was $177 million at December 31, 2019.

G. The Consolidated Debenture Stock, authorized by an *Act of Parliament of 1889*, constitutes a first charge upon and over the whole of the undertaking, railways, works, rolling stock, plant, property and effects of the Company, with certain exceptions.

Credit facility

CP has a revolving credit facility (the "facility") agreement with 14 highly rated financial institutions for a commitment amount of U.S. $1.3 billion. The facility can accommodate draws of cash and/or letters of credit at market competitive pricing. The agreement requires the Company to maintain a financial covenant in conjunction with the facility. As at December 31, 2019 and 2018, the Company was in compliance with all terms and conditions of the credit facility arrangements and satisfied the financial covenant.

Effective September 27, 2019, the Company amended and restated its revolving credit facility agreement to, among other things, increase the total amount available to U.S. $1.3 billion (December 31, 2018 – U.S. $1.0 billion). The amended and restated revolving credit facility consists of a U.S. $1.0 billion tranche maturing September 27, 2024 (extended from June 28, 2023, previously) and a U.S. $300 million tranche maturing September 27, 2021.

As at December 31, 2019 and 2018, the facility was undrawn. The amount available under the terms of the credit facility was U.S. $1.3 billion at December 31, 2019 (December 31, 2018 – U.S. $1.0 billion).

The Company also has a commercial paper program which enables it to issue commercial paper up to a maximum aggregate principal amount of U.S. $1.0 billion in the form of unsecured promissory notes. This commercial paper program is backed by the revolving credit facility. As at December 31, 2019, the Company had total commercial paper borrowings of U.S. $397 million ($516 million), included in "Long-term debt maturing within one year" on the Company's Consolidated Balance Sheets (December 31, 2018 – $nil). The weighted-average interest rate on these borrowings was 2.03%. The Company presents issuances and repayments of commercial paper, all of which have a maturity of less than 90 days, in the Company's Consolidated Statements of Cash Flows on a net basis.

CP has bilateral letter of credit facilities with six highly rated financial institutions to support its requirement to post letters of credit in the ordinary course of business. Effective September 27, 2019, the Company reduced its bilateral letter of credit facilities to $300 million (December 31, 2018 – $600 million). Under these agreements, the Company has the option to post collateral in the form of cash or cash equivalents, equal at least to the face value of the letter of credit issued. These agreements permit CP to withdraw amounts posted as collateral at any time; therefore, the amounts posted as collateral are presented as "Cash and cash equivalents" on the Company's Consolidated Balance Sheets. As at December 31, 2019, under its bilateral letter of credit facilities, the Company had no collateral posted (December 31, 2018 – $nil) and letters of credit drawn of $80 million (December 31, 2018 – $60 million) from a total available amount of $300 million (December 31, 2018 – $600 million).

19. Financial instruments

A. Fair values of financial instruments

The Company categorizes its financial assets and liabilities measured at fair value into a three-level hierarchy established by GAAP that prioritizes those inputs to valuation techniques used to measure fair value based on the degree to which they are observable. The three levels of the fair value hierarchy are as follows: Level 1 inputs are quoted prices in active markets for identical assets and liabilities; Level 2 inputs, other than quoted prices included within Level 1, are observable for the asset or liability either directly or indirectly; and Level 3 inputs are not observable in the market.

The carrying values of financial instruments equal or approximate their fair values with the exception of long-term debt:

(in millions of Canadian dollars)		**December 31, 2019**		December 31, 2018
Long-term debt (including current maturities):				
Fair value	**$**	**10,149**	$	9,639
Carrying value		**8,757**		8,696

All long-term debt is classified as Level 2. The estimated fair value of current and long-term borrowings has been determined based on market information where available, or by discounting future payments of principal and interest at estimated interest rates expected to be available to the Company at period end.

B. Financial risk management

Derivative financial instruments

Derivative financial instruments may be used to selectively reduce volatility associated with fluctuations in interest rates, FX rates, the price of fuel, and stock-based compensation expense. Where derivatives are designated as hedging instruments, the relationship between the hedging instruments and their associated hedged items is documented, as well as the risk management objective and strategy for the use of the hedging instruments. This documentation includes linking the derivatives that are designated as fair value or cash flow hedges to specific assets or liabilities on the Company's Consolidated Balance Sheets, commitments, or forecasted transactions. At the time a derivative contract is entered into and at least quarterly thereafter, an assessment is made as to whether the derivative item is effective in offsetting the changes in fair value or cash flows of the hedged items. The derivative qualifies for hedge accounting treatment if it is effective in substantially mitigating the risk it was designed to address.

It is not the Company's intent to use financial derivatives or commodity instruments for trading or speculative purposes.

Credit risk management

Credit risk refers to the possibility that a customer or counterparty will fail to fulfill its obligations under a contract and as a result create a financial loss for the Company.

The railway industry predominantly serves financially established customers, and the Company has experienced limited financial losses with respect to credit risk. The credit worthiness of customers is assessed using credit scores supplied by a third party and through direct monitoring of their financial well-being on a continual basis. The Company establishes guidelines for customer credit limits and should thresholds in these areas be reached, appropriate precautions are taken to improve collectability.

Counterparties to financial instruments expose the Company to credit losses in the event of non-performance. Counterparties for derivative and cash transactions are limited to high credit quality financial institutions, which are monitored on an ongoing basis. Counterparty credit assessments are based on the financial health of the institutions and their credit ratings from external agencies. The Company does not anticipate non-performance that would materially impact the Company's financial statements. In addition, the Company believes there are no significant concentrations of credit risk.

FX management

The Company conducts business transactions and owns assets in both Canada and the United States. As a result, the Company is exposed to fluctuations in the value of financial commitments, assets, liabilities, income, or cash flows due to changes in FX rates. The Company may enter into FX risk management transactions primarily to manage fluctuations in the exchange rate between Canadian and U.S. currencies. FX exposure is primarily mitigated through natural offsets created by revenues, expenditures, and balance sheet positions incurred in the same currency. Where appropriate, the Company may negotiate with customers and suppliers to reduce the net exposure.

Net investment hedge

The FX gains and losses on long-term debt are mainly unrealized and can only be realized when U.S. dollar-denominated long-term debt matures or is settled. The Company also has long-term FX exposure on its investment in foreign subsidiaries with a U.S. dollar functional currency. The majority of the Company's U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in these foreign subsidiaries. This designation has the effect of mitigating volatility on Net income by offsetting long-term FX gains and losses on U.S. dollar-denominated long-term debt and gains and losses on its net investment. The effect of the net investment hedge recognized in "Other comprehensive (loss) income" in 2019 was an FX gain of $288 million, the majority of which was unrealized (2018 – unrealized loss of $479 million; 2017 – unrealized gain of $319 million) (see Note 8).

Interest rate management

The Company is exposed to interest rate risk, which is the risk that the fair value or future cash flows of a financial instrument will vary as a result of changes in market interest rates. In order to manage funding needs or capital structure goals, the Company enters into debt or finance lease agreements that are subject to either fixed market interest rates set at the time of issue or floating rates determined by ongoing market conditions. Debt subject to variable interest rates exposes the Company to variability in interest expense, while debt subject to fixed interest rates exposes the Company to variability in the fair value of debt.

To manage interest rate exposure, the Company accesses diverse sources of financing and manages borrowings in line with a targeted range of capital structure, debt ratings, liquidity needs, maturity schedule, and currency and interest rate profiles. In anticipation of future debt issuances, the Company may enter into forward rate agreements, that are designated as cash flow hedges, to substantially lock in all or a portion of the effective future interest expense. The Company may also enter into swap agreements, designated as fair value hedges, to manage the mix of fixed and floating rate debt.

Forward starting swaps

During the second quarter of 2018, the Company settled a notional amount of U.S. $500 million of forward starting swaps related to the U.S. $500 million 4.000% 10-year Notes issued in the same period. The fair value of these derivative instruments at the time of settlement was a loss of U.S. $19 million ($24 million). The Company no longer has any active forward starting swaps.

During the second quarter of 2017, the Company de-designated the hedging relationship for U.S. $700 million of forward starting swaps. The Company settled a notional amount of U.S. $200 million of forward starting swaps for a cash payment of U.S. $16 million ($22 million). The Company rolled the remaining notional amount of U.S. $500 million of forward starting swaps and did not cash settle these swaps. The impact of the U.S. $200 million settlement and U.S. $500 million roll of the forward starting swaps was a charge of $13 million to "Other (income) expense" on the Company's Consolidated Statements of Income. Concurrently, the Company re-designated the forward starting swaps totalling U.S. $500 million to fix the benchmark rate on cash flows associated with highly probable forecasted issuances of long-term notes.

The changes in fair value of the forward starting swaps for the year ended December 31, 2019 was $nil (2018 – gain of $31 million). This was recorded in "Accumulated other comprehensive loss", net of tax, and is being reclassified to "Net interest expense" on the Company's Consolidated Statements of Income until the underlying hedged notes are repaid.

For the year ended December 31, 2019, a net loss of $9 million related to previous forward starting swap hedges has been amortized to "Net interest expense" (2018 – loss of $10 million; 2017 – loss of $11 million). The Company expects that during the next 12 months, $9 million of net losses will be amortized to "Net interest expense".

Treasury rate locks

At December 31, 2019, the Company had net unamortized losses related to interest rate locks, which are accounted for as cash flow hedges, settled in previous years totalling $18 million (December 31, 2018 – $19 million). This amount is composed of various unamortized gains and losses related to specific debts which are reflected in "Accumulated other comprehensive loss" and are amortized to "Net interest expense" in the period that interest on the related debt is charged. The amortization of these gains and losses resulted in a $1 million increase to "Net interest expense" and "Other comprehensive (loss) income" in 2019 (2018 – $1 million; 2017 – $1 million). The Company expects that during the next 12 months, a net loss of $1 million related to these previously settled derivatives will be reclassified to "Net interest expense".

20. Other long-term liabilities

(in millions of Canadian dollars)		2019		2018
Operating lease liabilities, net of current portion (Note 2, 21)	$	285	$	—
Stock-based compensation liabilities, net of current portion		111		81
Provision for environmental remediation, net of current portion[1]		70		74
Deferred revenue on rights-of-way license agreements, net of current portion[2]		20		24
Deferred gains on sale leaseback transactions[2]		6		13
Other, net of current portion		70		45
Total other long-term liabilities	$	562	$	237

[1] As at December 31, 2019, the aggregate provision for environmental remediation, including the current portion was $77 million (2018 – $82 million).

[2] The deferred revenue on rights-of-way license agreements and deferred gains on sale leaseback transactions are being amortized to income on a straight-line basis over the related lease terms.

Environmental remediation accruals

Environmental remediation accruals cover site-specific remediation programs. The estimate of the probable costs to be incurred in the remediation of properties contaminated by past railway use reflects the nature of contamination at individual sites according to typical activities and scale of operations conducted. CP has developed remediation strategies for each property based on the nature and extent of the contamination, as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants, considering available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and groundwater. The details of the estimates reflect the environmental liability at each property. Provisions for environmental remediation costs are recorded in "Other long-term liabilities", except for the current portion which is recorded in "Accounts payable and accrued liabilities" (see Note 17). Payments are expected to be made over 10 years to 2029.

The accruals for environmental remediation represent CP's best estimate of its probable future obligation and include both asserted and unasserted claims, without reduction for anticipated recoveries from third parties. Although the recorded accruals include CP's best estimate of all probable costs, CP's total environmental remediation costs cannot be predicted with certainty. Accruals for environmental remediation may change from time to time as new information about previously untested sites becomes known, environmental laws and regulations evolve and advances are made in environmental remediation technology. The accruals may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, may materially affect income in the particular period in which a charge is recognized. Costs related to existing, but as yet unknown, or future contamination will be accrued in the period in which they become probable and reasonably estimable. Changes to costs are reflected as changes to "Other long-term liabilities" or "Accounts payable and accrued liabilities" on the Company's Consolidated Balance Sheets and to "Purchased services and other" within operating expenses on the Company's Consolidated Statements of Income. The amount charged to income in 2019 was $6 million (2018 – $6 million; 2017 – $5 million).

21. Leases

The Company's leases have remaining terms of less than one year to 15 years, some include options to extend up to an additional 10 years, and some include options to terminate within one year.

Residual value guarantees are provided on certain rolling stock and vehicle operating leases. Cumulatively, these guarantees are limited to $2 million and are not included in lease liabilities as it is not currently probable that any amounts will be owed under these residual value guarantees.

The components of lease expense for the year ended December 31 are as follows:

(in millions of Canadian dollars)		**2019**
Operating lease cost	$	89
Short-term lease cost		10
Variable lease cost		13
Sublease income		(3)
Finance Lease Cost		
Amortization of right-of use-assets		9
Interest on lease liabilities		11
Total lease costs	**$**	**129**

Supplemental balance sheet information related to leases is as follows:

(in millions of Canadian dollars)	**Classification**		**2019**
Assets			
Operating	Other assets	$	358
Finance	Properties, net book value		177
Liabilities			
Current			
Operating	Accounts payable and accrued liabilities		69
Finance	Long-term debt maturing within one year		7
Long-term			
Operating	Other long-term liabilities		285
Finance	Long-term debt		144

The following table provides the Company's weighted-average remaining lease terms and discount rates:

	2019
Weighted-Average Remaining Lease Term	
Operating leases	7 years
Finance leases	4 years
Weighted-Average Discount Rate	
Operating leases	3.45%
Finance leases	7.07%

Supplemental information related to leases is as follows:

(in millions of Canadian dollars)	2019
Cash paid for amounts included in measurement of lease liabilities	
Operating cash outflows from operating leases	$ 82
Operating cash outflows from finance leases	10
Financing cash outflows from finance leases	6
Right-of-use assets obtained in exchange for lease liabilities	
Operating leases	38
Finance leases	4

The following table provides the maturities of lease liabilities for the next five years and thereafter as at December 31, 2019:

(in millions of Canadian dollars)	Finance Leases	Operating Leases
2020	$ 11	$ 80
2021	10	55
2022	108	51
2023	8	39
2024	9	40
Thereafter	21	130
Total lease payments	**167**	**395**
Imputed interest	(16)	(41)
Present value of lease payments	**$ 151**	**$ 354**

22. Shareholders' equity

Authorized and issued share capital

The Company is authorized to issue an unlimited number of Common Shares, an unlimited number of First Preferred Shares, and an unlimited number of Second Preferred Shares. At December 31, 2019, no First or Second Preferred Shares had been issued.

The following table summarizes information related to Common Share balances as at December 31:

(number of shares in millions)	2019	2018	2017
Share capital, January 1	**140.5**	144.9	146.3
CP Common Shares repurchased	**(3.8)**	(4.6)	(1.9)
Shares issued under stock option plan	**0.3**	0.2	0.5
Share capital, December 31	**137.0**	140.5	144.9

The change in the "Share capital" balance includes $7 million of stock-based compensation transferred from "Additional paid-in capital" (2018 – $12 million; 2017 – $12 million).

Share repurchases

On May 10, 2017, the Company announced a normal course issuer bid ("NCIB"), commencing May 15, 2017, to purchase up to 4.38 million Common Shares in the open market for cancellation on or before May 14, 2018. The Company completed this NCIB on May 10, 2018.

On October 19, 2018, the Company announced a NCIB, commencing October 24, 2018, to purchase up to 5.68 million Common Shares for cancellation on or before October 23, 2019. The Company completed this NCIB on October 23, 2019.

On December 17, 2019, the Company announced a new NCIB, commencing December 20, 2019, to purchase up to 4.80 million Common Shares for cancellation on or before December 19, 2020. As at December 31, 2019, the Company had purchased 0.30 million Common Shares for $100 million under this NCIB program.

All purchases were made in accordance with the respective NCIB at prevalent market prices plus brokerage fees, or such other prices that were permitted by the Toronto Stock Exchange, with consideration allocated to share capital up to the average carrying amount of the shares and any excess allocated to "Retained earnings".

The following table provides the activities under the share repurchase programs for each of the years ended December 31:

		2019		2018		2017
Number of Common Shares repurchased[1]		**3,794,149**		4,683,162		1,888,100
Weighted-average price per share[2]	**$**	**300.65**	$	240.68	$	201.53
Amount of repurchase (in millions)[2]	**$**	**1,141**	$	1,127	$	381

[1] Includes shares repurchased but not yet cancelled at year end.

[2] Includes brokerage fees.

23. Pensions and other benefits

The Company has both defined benefit ("DB") and defined contribution ("DC") pension plans. At December 31, 2019, the Canadian pension plans represent nearly all of total combined pension plan assets and nearly all of total combined pension plan obligations.

The DB plans provide for pensions based principally on years of service and compensation rates near retirement. Pensions for Canadian pensioners are partially indexed to inflation. Annual employer contributions to the DB plans, which are actuarially determined, are made on the basis of being not less than the minimum amounts required by federal pension supervisory authorities.

The Company has other benefit plans including post-retirement health and life insurance for pensioners, and post-employment long-term disability and workers' compensation benefits, which are based on Company-specific claims. At December 31, 2019, the Canadian other benefits plans represent nearly all of total combined other plan obligations.

The Audit and Finance Committee of the Board of Directors has approved an investment policy that establishes long-term asset mix targets which take into account the Company's expected risk tolerances. Pension plan assets are managed by a suite of independent investment managers, with the allocation by manager reflecting these asset mix targets. Most of the assets are actively managed with the objective of outperforming applicable benchmarks. In accordance with the investment policy, derivative instruments may be used by investment managers to hedge or adjust existing or anticipated exposures.

To develop the expected long-term rate of return assumption used in the calculation of net periodic benefit cost applicable to the market-related value of plan assets, the Company considers the expected composition of the plans' assets, past experience and future estimates of long-term investment returns. Future estimates of investment returns reflect the long-term return expectation for fixed income, public equity, real estate, infrastructure, private debt and absolute return investments and the expected added value (relative to applicable benchmark indices) from active management of pension fund assets.

The Company has elected to use a market-related value of assets for the purpose of calculating net periodic benefit cost, developed from a five years average of market values for the plans' public equity and absolute return investments (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the plans' fixed income, real estate, infrastructure and private debt securities.

The benefit obligation is discounted using a discount rate that is a blended yield to maturity for a hypothetical portfolio of high-quality corporate debt instruments with cash flows matching projected benefit payments. The discount rate is determined by management.

Net periodic benefit cost

The elements of net periodic benefit cost for DB pension plans and other benefits recognized in the year include the following components:

	Pensions			Other benefits		
(in millions of Canadian dollars)	**2019**	2018	2017	**2019**	2018	2017
Current service cost (benefits earned by employees)	**$ 107**	$ 120	$ 103	**$ 11**	$ 12	$ 12
Other components of net periodic benefit cost (recovery):						
Interest cost on benefit obligation	**450**	438	451	**20**	19	20
Expected return on fund assets	**(947)**	(955)	(893)	**—**	—	—
Recognized net actuarial loss	**84**	114	153	**12**	2	(1)
Amortization of prior service costs	**(1)**	(2)	(5)	**1**	—	1
Total other components of net periodic benefit (recovery) cost	**(414)**	(405)	(294)	**33**	21	20
Net periodic benefit (recovery) cost	**$ (307)**	$ (285)	$ (191)	**$ 44**	$ 33	$ 32

Projected benefit obligation, fund assets, and funded status

Information about the Company's DB pension plans and other benefits, in aggregate, is as follows:

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2019**	2018	**2019**	2018
Change in projected benefit obligation:				
Benefit obligation at January 1	**$ 11,372**	$ 11,679	**$ 501**	$ 518
Current service cost	**107**	120	**11**	12
Interest cost	**450**	438	**20**	19
Employee contributions	**41**	47	**—**	1
Benefits paid	**(646)**	(640)	**(34)**	(33)
Foreign currency changes	**(10)**	20	**—**	2
Actuarial loss (gain)	**1,296**	(292)	**43**	(18)
Projected benefit obligation at December 31	**$ 12,610**	$ 11,372	**$ 541**	$ 501

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2019**	2018	**2019**	2018
Change in fund assets:				
Fair value of fund assets at January 1	**$ 12,349**	$ 12,808	**$ 4**	$ 4
Actual return on fund assets	**1,528**	82	**1**	—
Employer contributions	**53**	36	**34**	32
Employee contributions	**41**	47	**—**	1
Benefits paid	**(646)**	(640)	**(34)**	(33)
Foreign currency changes	**(6)**	16	**—**	—
Fair value of fund assets at December 31	**$ 13,319**	$ 12,349	**$ 5**	$ 4
Funded status – plan surplus (deficit)	**$ 709**	$ 977	**$ (536)**	$ (497)

The table below shows the aggregate pension projected benefit obligation and aggregate fair value of plan assets for pension plans with fair value of plan assets in excess of projected benefit obligations (i.e. surplus), and for pension plans with projected benefit obligations in excess of fair value of plan assets (i.e. deficit):

	2019		2018	
(in millions of Canadian dollars)	**Pension plans in surplus**	**Pension plans in deficit**	Pension plans in surplus	Pension plans in deficit
Projected benefit obligation at December 31	**$ (12,076)**	**$ (534)**	$ (10,884)	$ (488)
Fair value of fund assets at December 31	**13,079**	**240**	12,127	222
Funded Status	**$ 1,003**	**$ (294)**	$ 1,243	$ (266)

The DB pension plans' accumulated benefit obligation as at December 31, 2019 was $12,201 million (2018 – $10,981 million). The accumulated benefit obligation is calculated on a basis similar to the projected benefit obligation, except no future salary increases are assumed in the projection of future benefits. For pension plans with accumulated benefit obligations in excess of fair value of plan assets (i.e. deficit), the aggregate pension accumulated benefit obligation as at December 31, 2019 was $419 million (2018 – $395 million) and the aggregate fair value of plan assets as at December 31, 2019 was $186 million (2018 – $180 million).

All Other benefits plans were in a deficit position at December 31, 2019 and 2018.

Pension asset and liabilities in the Company's Consolidated Balance Sheets

Amounts recognized in the Company's Consolidated Balance Sheets are as follows:

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2019**	2018	**2019**	2018
Pension asset	**$ 1,003**	$ 1,243	**$ —**	$ —
Accounts payable and accrued liabilities	**(11)**	(11)	**(34)**	(34)
Pension and other benefit liabilities	**(283)**	(255)	**(502)**	(463)
Total amount recognized	**$ 709**	$ 977	**$ (536)**	$ (497)

The measurement date used to determine the plan assets and the accrued benefit obligation is December 31. The most recent actuarial valuation for pension funding purposes for the Company's main Canadian pension plan was performed as at January 1, 2019. During 2020, the Company expects to file with the pension regulator a new valuation performed as at January 1, 2020.

Accumulated other comprehensive loss

Amounts recognized in accumulated other comprehensive loss are as follows:

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2019**	2018	**2019**	2018
Net actuarial loss:				
Other than deferred investment gains	**$ 3,434**	$ 2,233	**$ 91**	$ 61
Deferred investment gains	**41**	611	**—**	—
Prior service cost	**1**	—	**1**	2
Deferred income tax	**(964)**	(797)	**(24)**	(16)
Total (Note 8)	**$ 2,512**	$ 2,047	**$ 68**	$ 47

The unamortized actuarial loss and the unamortized prior service cost included in "Accumulated other comprehensive loss" that are expected to be recognized in net periodic benefit cost during 2020 are a cost of $176 million and a recovery of $1 million, respectively, for pensions and costs of $3 million and $nil, respectively, for other post-retirement benefits.

Actuarial assumptions

Weighted-average actuarial assumptions used were approximately:

(percentages)	2019	2018	2017
Benefit obligation at December 31:			
Discount rate	**3.25**	4.01	3.80
Projected future salary increases	**2.75**	2.75	2.75
Health care cost trend rate	**5.50** [1]	6.00 [1]	7.00 [2]
Benefit cost for year ended December 31:			
Discount rate	**4.01**	3.80	4.02
Expected rate of return on fund assets [3]	**7.50**	7.75	7.75
Projected future salary increases	**2.75**	2.75	2.75
Health care cost trend rate	**6.00** [1]	7.00 [2]	7.00 [2]

[1] The health care cost trend rate was assumed to be 6.00% in 2019, is assumed to be 5.50% in 2020 and 5.00% per year in 2021 and thereafter.

[2] The health care cost trend rate was previously assumed to be 7.00% in 2017 and 2018, and then decreasing by 0.50% per year to an ultimate rate of 5.00% per year in 2022 and thereafter.

[3] The expected rate of return on fund assets that will be used to compute the 2020 net periodic benefit credit is 7.25%.

Assumed health care cost trend rates affect the amounts reported for the health care plans. A one-percentage-point increase in the assumed health care cost trend rate would increase the post-retirement benefit obligation by $5 million, and a one-percentage-point decrease in the assumed health care cost trend rate would decrease the post-retirement benefit obligation by $5 million. A one-percentage-point increase or decrease in the assumed health care cost trend rate would have no material effect on the total of service and interest costs.

Plan assets

Plan assets are recorded at fair value. The major asset categories are public equity securities, fixed income securities, real estate, infrastructure, absolute return investments and private debt. The fair values of the public equity and fixed income securities are primarily based on quoted market prices. Real estate and infrastructure values are based on the value of each fund's assets as calculated by the fund manager, generally using third party appraisals or discounted cash flow analysis and taking into account current market conditions and recent sales transactions where practical and appropriate. Private debt values are based on the value of each fund's assets as calculated by the fund manager taking into account current market conditions and reviewed annually by external parties. Absolute return investments are a portfolio of units of externally managed hedge funds and are valued by the fund administrators.

The Company's pension plan asset allocation, the weighted average asset allocation targets and the weighted average policy range for each major asset class at year end, were as follows:

			Percentage of plan assets at December 31	
Asset allocation (percentage)	Asset allocation target	Policy range	**2019**	2018
Cash and cash equivalents	**1.2**	**0 – 10**	**0.9**	1.1
Fixed income	**24.1**	**20 – 40**	**24.6**	25.6
Public equity	**45.1**	**35 – 55**	**54.5**	50.2
Real estate and infrastructure	**9.8**	**4 – 13**	**6.8**	7.7
Private debt	**9.8**	**4 – 13**	**2.4**	1.3
Absolute return	**10.0**	**4 – 13**	**10.8**	14.1
Total	**100.0**		**100.0**	100.0

Summary of the assets of the Company's DB pension plans

The following is a summary of the assets of the Company's DB pension plans at December 31, 2019 and 2018. As of December 31, 2019 and 2018, there were no plan assets classified as Level 3 valued investments.

	Assets Measured at Fair Value			
(in millions of Canadian dollars)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Investments measured at NAV[1]	Total Plan Assets
December 31, 2019

	$ 6,576	$ 2,916	$ 2,857	$ 12,349

(1) Investments measured at net asset value ("NAV"):

Amounts are comprised of certain investments measured using NAV (or its equivalent) as a practical expedient. These investments have not been classified in the fair value hierarchy.

(2) Government & Corporate Bonds:

Fair values for bonds are based on market prices supplied by independent sources as of the last trading day.

(3) Mortgages:

The fair values of mortgages are based on current market yields of financial instruments of similar maturity, coupon and risk factors.

(4) Real estate:

Real estate fund values are based on the NAV of the funds that invest directly in real estate investments. The values of the investments have been estimated using the capital accounts representing the plan's ownership interest in the funds. Of the total, $606 million is subject to redemption frequencies ranging from monthly to annually and a redemption notice period of 90 days (2018 – $583 million). The remaining $118 million is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying real estate investments (2018 – $114 million). As at December 31, 2019, there are $35 million of unfunded commitments for real estate investments (December 31, 2018 – $38 million).

(5) Infrastructure:

Infrastructure fund values are based on the NAV of the funds that invest directly in infrastructure investments. The values of the investments have been estimated using the capital accounts representing the plans' ownership interest in the funds. Of the total, $119 million is subject to redemption frequencies ranging from monthly to annually and a redemption notice period of 90 days (2018 – $130 million). The remaining $68 million is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying infrastructure investments (2018 – $129 million).

(6) Private debt:

Private debt fund values are based on the NAV of the funds that invest directly in private debt investments. The values of the investments have been estimated using the capital accounts representing the plans' ownership interest in the funds. Of the total, $154 million is subject to redemption frequencies ranging from monthly to annually and a redemption notice period of 90 days (2018 – $162 million). The remaining $159 million is not subject to redemption and is normally returned through distributions as a result of the repayment of the underlying loans (2018 – $nil). As at December 31, 2019, there are $392 million of unfunded commitments for private debt investments (December 31, 2018 – $608 million).

(7) Derivatives:

The investment managers may utilize the following derivative instruments: equity futures to replicate equity index returns (Level 2); currency forwards to partially hedge foreign currency exposures (Level 2); bond forwards to reduce asset/liability interest rate risk exposures (Level 2); interest rate swaps to manage duration and interest rate risk (Level 2); credit default swaps to manage credit risk (Level 2); and options to manage interest rate risk and volatility (Level 2). The Company may utilize derivatives directly, but only for the purpose of hedging foreign currency exposures. As at December 31, 2019, there are currency forwards with a notional value of $334 million (December 31, 2018 – $1,226 million) and a fair value of $13 million (December 31, 2018 – $(7) million). The fixed income investment manager utilizes a portfolio of bond forwards for the purpose of reducing asset/liability interest rate exposure. As at December 31, 2019, there are bond forwards with a notional value of $3,269 million and a negative fair value of $72 million (December 31, 2018 – $nil).

(8) Absolute return:

The value of absolute return fund investments is based on the NAV reported by the fund administrators. The funds have different redemption policies with redemption notice periods varying from 60 to 95 days and frequencies ranging from monthly to triennially.

Additional plan assets information

The Company's primary investment objective for pension plan assets is to achieve a long–term return, net of all fees and expenses, that is sufficient for the plan's assets to satisfy the current and future obligations to plan beneficiaries, while minimizing the financial impact on the Company. In identifying the asset allocation ranges, consideration was given to the long-term nature of the underlying plan liabilities, the solvency and going-concern financial position of the plan, long-term return expectations and the risks associated with key asset classes as well as the relationships of returns on key asset classes with each other, inflation and interest rates. When advantageous and with due consideration, derivative instruments may be utilized by investment managers, provided the total value of the underlying assets represented by financial derivatives (excluding currency forwards, liability hedging derivatives in fixed income portfolios and derivatives held by absolute return funds) is limited to 30% of the market value of the fund.

The funded status of the plans is exposed to fluctuations in interest rates, which affects the relative values of the plans' liabilities and assets. In order to mitigate interest rate risk, the Company's main Canadian defined benefit pension plan utilizes a liability driven investment strategy in its fixed income portfolio, which uses a combination of long duration bonds and derivatives to hedge interest rate risk, managed by the investment manager. At December 31, 2019, the plan's solvency funded position was 45% hedged against interest rate risk (2018 – 11%).

When investing in foreign securities, the plans are exposed to foreign currency risk; the effect of which is included in the valuation of the foreign securities. At December 31, 2019, the plans were 39% exposed to the U.S. dollar net of currency forwards (41% excluding the currency forwards), 6% exposed to the Euro, and 14% exposed to various other currencies. At December 31, 2018, the plans were 33% exposed to the U.S. dollar net of currency forwards (43% excluding the currency forwards), 4% exposed to the Euro, and 13% exposed to various other currencies.

At December 31, 2019, fund assets consisted primarily of listed stocks and bonds, including 119,758 of the Common Shares (2018 – 86,084) at a market value of $40 million (2018 – $21 million) and Unsecured Notes issued by the Company at a par value of $nil (2018 – $1 million) and a market value of $nil (2018 – $1 million).

Estimated future benefit payments

The estimated future DB pension and other benefit payments to be paid by the plans for each of the next five years and the subsequent five-year period are as follows:

(in millions of Canadian dollars)	Pensions	Other benefits
2020	$ 620	$ 34
2021	623	32
2022	627	31
2023	630	30
2024	633	30
2025 – 2029	3,203	144

The benefit payments from the Canadian registered and U.S. qualified DB pension plans are payable from their respective pension funds. Benefit payments from the supplemental pension plan and from the other benefits plans are payable directly from the Company.

Defined contribution plan

Canadian non-unionized employees hired prior to July 1, 2010 had the option to participate in the Canadian DC plan. All Canadian non-unionized employees hired after such date must participate in this plan. Employee contributions are based on a percentage of salary. The Company matches employee contributions to a maximum percentage each year.

Effective July 1, 2010, a new U.S. DC plan was established. All U.S. non-unionized employees hired after such date must participate in this plan. Employees do not contribute to the plan. The Company annually contributes a percentage of salary.

The DC plans provide a pension based on total employee, where appropriate, and employer contributions plus investment income earned on those contributions.

In 2019, the net cost of the DC plans, which generally equals the employer's required contribution, was $11 million (2018 – $10 million; 2017 – $9 million).

Contributions to multi-employer plans

Some of the Company's unionized employees in the U.S. are members of a U.S. national multi-employer benefit plan. Contributions made by the Company to this plan in 2019 in respect of post-retirement medical benefits were $3 million (2018 – $3 million; 2017 – $5 million).

24. Stock-based compensation

At December 31, 2019, the Company had several stock-based compensation plans including stock option plans, various cash-settled liability plans, and an employee share purchase plan. These plans resulted in an expense of $133 million in 2019 (2018 – $75 million; 2017 – $35 million).

Effective January 31, 2017, Mr. E. Hunter Harrison resigned from all positions held by him at the Company, including as the Company's Chief Executive Officer and as a member of the Board of Directors of the Company. In connection with Mr. Harrison's resignation, the Company entered into a separation agreement with Mr. Harrison. Under the terms of the separation agreement, the Company agreed to a limited waiver of Mr. Harrison's non-competition and non-solicitation obligations.

Effective January 31, 2017, pursuant to the separation agreement, Mr. Harrison forfeited certain pension and post-retirement benefits and agreed to the surrender for cancellation of 22,514 PSUs, 68,612 DSUs, and 752,145 stock options. As a result of this agreement, the Company recognized a recovery of $51 million in "Compensation and benefits" in the first quarter of 2017. Of this amount, $27 million related to a recovery from cancellation of certain pension benefits.

A. Stock option plan

The following table summarizes the Company's stock option plan as at December 31, 2019:

	Options outstanding		Non-vested options	
	Number of options	Weighted-average exercise price	Number of options	Weighted-average grant date fair value
Outstanding, January 1, 2019	1,533,598	$ 176.02	714,102	$ 48.94
Granted	224,730	$ 269.99	224,730	$ 63.69
Exercised	(334,127)	$ 125.12	N/A	N/A
Vested	N/A	N/A	(169,193)	$ 47.59
Forfeited	(7,855)	$ 234.59	(7,855)	$ 54.75
Outstanding, December 31, 2019	1,416,346	$ 199.12	761,784	$ 53.54
Vested or expected to vest at December 31, 2019[1]	1,385,626	$ 197.89	N/A	N/A
Exercisable, December 31, 2019	654,562	$ 162.59	N/A	N/A

[1] As at December 31, 2019, the weighted-average remaining term of vested or expected to vest options was 4.9 years with an aggregate intrinsic value of $184 million.

The following table provides the number of stock options outstanding and exercisable as at December 31, 2019 by range of exercise price and their related intrinsic aggregate value, and for options outstanding, the weighted-average years to expiration. The table also provides the aggregate intrinsic value for in-the-money stock options, which represents the amount that would have been received by option holders had they exercised their options on December 31, 2019 at the Company's closing stock price of $331.03.

	Options outstanding				Options exercisable		
Range of exercise prices	Number of options	Weighted-average years to expiration	Weighted-average exercise price	Aggregate intrinsic value (millions)	Number of options	Weighted-average exercise price	Aggregate intrinsic value (millions)
$51.17 – $167.50	354,357	4.1	$ 123.00	$ 74	303,455	$ 116.84	$ 65
$167.51 – $197.05	355,040	4.1	$ 188.53	$ 51	135,532	$ 175.30	$ 21
$197.06– $247.87	376,654	4.8	$ 222.75	$ 41	215,465	$ 218.98	$ 24
$247.88 – $313.16	330,295	5.9	$ 265.23	$ 22	110	$ 260.52	$ —
Total[1]	1,416,346	4.7	$ 199.12	$ 187	654,562	$ 162.59	$ 110

[1] As at December 31, 2019, the total number of in-the-money stock options outstanding was 1,416,346 with a weighted-average exercise price of $199.12. The weighted-average years to expiration of exercisable stock options is 4.2 years.

Pursuant to the employee plan, options may be exercised upon vesting, which is between 12 months and 48 months after the grant date, and will expire after seven years. Certain stock options granted in 2019 and 2018 vest upon the achievement of specific performance criteria. Under the fair value method, the fair value of the stock options at grant date was approximately $14 million for options issued in 2019 (2018 – $16 million; 2017 – $17 million). The weighted-average fair value assumptions were approximately:

	2019	2018	2017
Expected option life (years)[1]	**5.00**	5.00	5.48
Risk-free interest rate[2]	**2.22%**	2.22%	1.85%
Expected stock price volatility[3]	**25.04%**	24.81%	26.94%
Expected annual dividends per share[4]	**$ 2.6191**	$ 2.3854	$ 2.0010
Expected forfeiture rate[5]	**6.05%**	4.70%	2.80%
Weighted-average grant date fair value of options granted during the year	**$ 63.69**	$ 55.63	$ 45.78

[1] Represents the period of time that awards are expected to be outstanding. Historical data on exercise behaviour or, when available, specific expectations regarding future exercise behaviour were used to estimate the expected life of the option.

[2] Based on the implied yield available on zero-coupon government issues with an equivalent term commensurate with the expected term of the option.

[3] Based on the historical volatility of the Company's stock price over a period commensurate with the expected term of the option.

[4] Determined by the current annual dividend at the time of grant. The Company does not employ different dividend yields throughout the contractual term of the option. On May 6, 2019, the Company announced an increase in its quarterly dividend to $0.8300 per share, representing $3.3200 on an annual basis.

[5] The Company estimates forfeitures based on past experience. The rate is monitored on a periodic basis.

In 2019, the expense for stock options (regular and performance) was $14 million (2018 – $10 million; 2017 – $3 million). At December 31, 2019, there was $14 million of total unrecognized compensation related to stock options which is expected to be recognized over a weighted-average period of approximately 1.3 years.

The total fair value of shares vested for the stock option plan during 2019 was $8 million (2018 – $11 million; 2017 – $14 million).

The following table provides information related to all options exercised in the stock option plan during the years ended December 31:

(in millions of Canadian dollars)	**2019**	2018	2017
Total intrinsic value	**$ 63**	$ 17	$ 36
Cash received by the Company upon exercise of options	**26**	24	45

B. Other share-based plans

Performance share unit plan

During 2019, the Company issued 134,260 PSUs with a grant date fair value of approximately $36 million. These units attract dividend equivalents in the form of additional units based on the dividends paid on the Company's Common Shares. PSUs vest and are settled in cash or in CP Common Shares, approximately three years after the grant date, contingent upon CP's performance ("performance factor"). The fair value of these PSUs is measured periodically until settlement, using either a lattice-based valuation model or a Monte Carlo simulation model.

The performance period for 133,681 PSUs issued in 2019 is January 1, 2019 to December 31, 2021, and the performance factors for these PSUs are Return on Invested Capital ("ROIC"), Total Shareholder Return ("TSR") compared to the S&P/TSX 60 Index, and TSR compared to Class I railways. The performance factors for the remaining 579 PSUs are annual revenue for the fiscal year 2020, diluted earnings per share for the fiscal year 2020, and share price appreciation.

The performance period for 125,280 PSUs issued in 2018 is January 1, 2018 to December 31, 2020, and the performance factors for these PSUs are ROIC, TSR compared to the S&P/TSX Capped Industrial Index, and TSR compared to S&P 1500 Road and Rail Index. The performance factors for the remaining 36,975 PSUs are annual revenue for the fiscal year 2020, diluted earnings per share for the fiscal year 2020, and share price appreciation.

The performance period for PSUs issued in 2017 was January 1, 2017 to December 31, 2019, and the performance factors for these PSUs were ROIC, TSR compared to the S&P/TSX Capped Industrial Index, and TSR compared to S&P 1500 Road and Rail Index. The resulting estimated payout was 193% on 121,098 total outstanding awards representing a total fair value of $75 million at December 31, 2019, calculated using the Company's average share price using the last 30 trading days preceding December 31, 2019.

The performance period for PSUs issued in 2016 was January 1, 2016 to December 31, 2018, and the performance factors for these PSUs were Operating ratio, ROIC, TSR compared to the S&P/TSX 60 Index, and TSR compared to Class I railways. The resulting payout was 177% of the outstanding units multiplied by the Company's average share price that was calculated using the last 30 trading days preceding December 31, 2018. In the first quarter of 2019, payouts occurred on the total outstanding awards, including dividends reinvested, totalling $54 million on 117,228 outstanding awards.

The following table summarizes information related to the Company's PSUs as at December 31:

	2019	2018
Outstanding, January 1	**395,048**	334,028
Granted	**134,260**	162,255
Units, in lieu of dividends	**4,032**	3,643
Settled	**(117,228)**	(66,243)
Forfeited	**(12,976)**	(38,635)
Outstanding, December 31	**403,136**	395,048

In 2019, the expense for PSUs was $89 million (2018 – $54 million; 2017 – $30 million). At December 31, 2019, there was $42 million of total unrecognized compensation related to PSUs which is expected to be recognized over a weighted-average period of approximately 1.5 years.

Deferred share unit plan

The Company established the DSU plan as a means to compensate and assist in attaining share ownership targets set for certain key employees and Directors. A DSU entitles the holder to receive, upon redemption, a cash payment equivalent to the Company's average share price using the 10 trading days prior to redemption. DSUs vest over various periods of up to 48 months and are only redeemable for a specified period after employment is terminated.

Senior managers may elect to receive DSUs in lieu of annual bonus cash payments in the bonus deferral program. In addition, senior managers will be granted a 25% company match of DSUs when deferring cash to DSUs to meet ownership targets. The election to receive eligible payments in DSUs is no longer available to a participant when the value of the participant's DSUs is sufficient to meet the Company's stock ownership guidelines. Senior managers have five years to meet their ownership targets.

The expense for DSUs is recognized over the vesting period for both the initial subscription price and the change in value between reporting periods.

The following table summarizes information related to the DSUs as at December 31:

	2019	2018
Outstanding, January 1	**152,760**	156,547
Granted	**19,912**	16,481
Units, in lieu of dividends	**1,608**	1,551
Settled	**(12,110)**	(20,072)
Forfeited	**(951)**	(1,747)
Outstanding, December 31	**161,219**	152,760

During 2019, the Company granted 19,912 DSUs with a grant date fair value of approximately $5 million. In 2019, the expense for DSUs was $20 million (2018 – $4 million expense; 2017 – $3 million recovery). At December 31, 2019, there was $0.7 million of total unrecognized compensation related to DSUs which is expected to be recognized over a weighted-average period of approximately 1.2 years.

Summary of share-based liabilities paid

The following table summarizes the total share-based liabilities paid for each of the years ended December 31:

(in millions of Canadian dollars)	**2019**	2018	2017
Plan			
PSUs	**$ 54**	$ 30	$ 31
DSUs	**4**	6	6
Other	**—**	1	2
Total	**$ 58**	$ 37	$ 39

C. Employee share purchase plan

The Company has an employee share purchase plan whereby both employee and the Company contributions are used to purchase shares on the open market for employees. The Company's contributions are expensed over the one year vesting period. Under the plan, the Company matches $1 for every $3 contributed by employees up to a maximum employee contribution of 6% of annual salary.

The total number of shares purchased in 2019 on behalf of participants, including the Company's contributions, was 137,942 (2018 – 118,865; 2017 – 130,041). In 2019, the Company's contributions totalled $8 million (2018 – $6 million; 2017 – $5 million) and the related expense was $6 million (2018 – $5 million; 2017 – $4 million).

25. Variable interest entities

The Company leases equipment from certain trusts, which have been determined to be variable interest entities financed by a combination of debt and equity provided by unrelated third parties. The lease agreements, which are classified as operating leases, have fixed price purchase options which create the Company's variable interests and result in the trusts being considered variable interest entities.

Maintaining and operating the leased assets according to specific contractual obligations outlined in the terms of the lease agreements and industry standards is the Company's responsibility. The rigour of the contractual terms of the lease agreements and industry standards are such that the Company has limited

discretion over the maintenance activities associated with these assets. As such, the Company concluded these terms do not provide the Company with the power to direct the activities of the variable interest entities in a way that has a significant impact on the entities' economic performance.

The financial exposure to the Company as a result of its involvement with the variable interest entities is equal to the fixed lease payments due to the trusts. In 2019, lease payments after tax were $15 million. Future minimum lease payments, before tax, of $138 million will be payable over the next 11 years.

The Company does not guarantee the residual value of the assets to the lessor; however, it must deliver to the lessor the assets in good operating condition, subject to normal wear and tear, at the end of the lease term.

As the Company's actions and decisions do not significantly affect the variable interest entities' performance, and the Company's fixed price purchase option is not considered to be potentially significant to the variable interest entities, the Company is not considered to be the primary beneficiary, and does not consolidate these variable interest entities.

Additionally, the Company is the sole beneficiary of an independent voting trust that holds 100% of the equity interest in CMQ U.S. The trust is governed by a single trustee who is responsible for all day-to-day decisions of CMQ U.S. The Company has no substantive participating or kick-out rights and therefore lacks the power to direct the activities of CMQ U.S. As a result, CMQ U.S. is considered to be a variable interest entity, however, the Company is not considered to be the primary beneficiary and, therefore, does not consolidate this variable interest entity.

26. Commitments and contingencies

In the normal course of its operations, the Company becomes involved in various legal actions, including claims relating to injuries and damage to property. The Company maintains provisions it considers to be adequate for such actions. While the final outcome with respect to actions outstanding or pending at December 31, 2019 cannot be predicted with certainty, it is the opinion of management that their resolution will not have a material adverse effect on the Company's business, financial position or results of operations. However, an unexpected adverse resolution of one or more of these legal actions could have a material adverse effect on the Company's business, financial position, results of operations or liquidity in a particular quarter or fiscal year.

Commitments

At December 31, 2019, the Company had committed to total future capital expenditures amounting to $664 million and operating expenditures relating to supplier purchase obligations, such as locomotive maintenance and overhaul agreements, as well as agreements to purchase other goods and services amounting to approximately $3.1 billion for the years 2020–2032, of which CP estimates approximately $2.7 billion will be incurred in the next five years.

Commitments related to leases, including minimum annual payments for the next five years and thereafter, are included in Note 21.

Legal proceedings related to Lac-Mégantic rail accident

On July 6, 2013, a train carrying petroleum crude oil operated by Montréal Maine and Atlantic Railway ("MMAR") or a subsidiary, Montréal Maine & Atlantic Canada Co. ("MMAC" and collectively the "MMA Group"), derailed in Lac-Mégantic, Québec. The derailment occurred on a section of railway owned and operated by the MMA Group and while the MMA Group had custody and control of the train.

Following the derailment, MMAC sought court protection in Canada under the *Companies' Creditors Arrangement Act* and MMAR filed for bankruptcy in the U.S. Plans of arrangement were approved in both Canada and the U.S. (the "Plans"), providing for the distribution of approximately $440 million amongst those claiming derailment damages.

A number of legal proceedings, set out below, were commenced in Canada and the U.S. against CP and others:

(1) Québec's Minister of Sustainable Development, Environment, Wildlife and Parks ordered various parties, including CP, to clean up the derailment site and served CP with a Notice of Claim for $95 million for those cleanup costs. CP appealed the cleanup order and contested the Notice of Claim with the Administrative Tribunal of Québec. These proceedings are stayed pending determination of the Attorney General of Québec ("AGQ") action (paragraph 2 below).

(2) The AGQ sued CP in the Québec Superior Court claiming $409 million in damages, which was amended and reduced to $315 million (the "AGQ Action"). The AGQ Action alleges that: (i) CP exercised custody or control over the petroleum crude oil until its delivery to Irving Oil and was negligent in that custody and control; and (ii) CP is vicariously liable for the acts and omissions of the MMA Group.

(3) A class action in the Québec Superior Court on behalf of persons and entities residing in, owning or leasing property in, operating a business in, or physically present in Lac-Mégantic at the time of the derailment was certified against CP on May 8, 2015 (the "Class Action"). Other defendants including MMAC and, Mr. Thomas Harding ("Harding") were added to the Class Action on January 25, 2017. The Class Action seeks unquantified damages, including for wrongful death, personal injury, and property damage.

(4) Eight subrogated insurers sued CP in the Québec Superior Court claiming approximately $16 million in damages, which was amended and reduced to $14 million (the "Promutuel Action"), and two additional subrogated insurers sued CP claiming approximately $3 million in damages (the "Royal Action"). Both actions contain similar allegations as the AGQ Action. The actions do not identify the subrogated parties, and therefore overlap with the claims process under the Plans is unclear. The Royal Action is stayed pending determination of the consolidated proceedings described below.

On December 11, 2017, the AGQ Action, the Class Action and the Promutuel Action were consolidated. These consolidated claims are currently scheduled for a joint liability trial commencing September 28, 2020, followed by a damages trial, if necessary.

(5) Forty-eight plaintiffs (all individual claims joined in one action) sued CP, MMAC and Harding in the Québec Superior Court claiming approximately U.S. $5 million in damages for economic loss and pain and suffering, and asserting similar allegations as in the Class Action and the AGQ Action. The plaintiffs opted-out of the Class Action and all but two are also plaintiffs in litigation against CP, described in paragraph 7 below. This action is stayed pending determination of the consolidated claims described above.

(6) The MMAR U.S. estate representative commenced an action against CP in November 2014 in the Maine Bankruptcy Court claiming that CP failed to abide by certain regulations and seeking damages for MMAR's loss in business value (as yet unquantified). This action asserts that CP knew or ought to have known that the shipper misclassified the petroleum crude oil and therefore should have refused to transport it.

(7) The class and mass tort action commenced against CP in June 2015 in Texas (on behalf of Lac-Mégantic residents and wrongful death representatives) and the wrongful death and personal injury actions commenced against CP in June 2015 in Illinois and Maine, were all transferred and consolidated in Federal District Court in Maine (the "Maine Actions"). The Maine Actions allege that CP negligently misclassified and improperly packaged the petroleum crude oil. On CP's motion, the Maine Actions were dismissed. The plaintiffs are appealing the dismissal decision, which may be heard in April 2020.

(8) The trustee for the wrongful death trust commenced Carmack Amendment claims against CP in North Dakota Federal Court, seeking to recover approximately U.S. $6 million for damaged rail cars and lost crude and reimbursement for the settlement paid by the consignor and the consignee under the Plans (alleged to be U.S. $110 million and U.S. $60 million, respectively). This action is scheduled for trial in August 2020.

At this stage of the proceedings, any potential responsibility and the quantum of potential losses cannot be determined. Nevertheless, CP denies liability and is vigorously defending these proceedings.

27. Guarantees

In the normal course of operating the railway, the Company enters into contractual arrangements that involve providing certain guarantees, which extend over the term of the contracts. These guarantees include, but are not limited to:

- a guarantee to uphold an equity investee's credit facility of $19 million at December 31, 2019;
- guarantees to pay other parties in the event of the occurrence of specified events, including damage to equipment, in relation to assets used in the operation of the railway through operating leases, rental agreements, easements, trackage, and interline agreements; and
- indemnifications of certain tax-related payments incurred by lessors and lenders.

The maximum amount that could be payable under these guarantees, excluding residual value guarantees, cannot be reasonably estimated due to the nature of certain of these guarantees. All or a portion of amounts paid under guarantees to other parties in the event of the occurrence of specified events could be recoverable from other parties or through insurance. The Company has accrued for all guarantees that it expects to pay. At December 31, 2019, these accruals amounted to $10 million (2018 – $10 million), and are recorded in "Accounts payable and accrued liabilities".

Indemnifications

Pursuant to a trust and custodial services agreement with the trustee of the Canadian Pacific Railway Company Pension Plan, the Company has undertaken to indemnify and save harmless the trustee, to the extent not paid by the fund, from any and all taxes, claims, liabilities, damages, costs, and expenses arising out of the performance of the trustee's obligations under the agreement, except as a result of misconduct by the trustee. The indemnity includes liabilities, costs, or expenses relating to any legal reporting or notification obligations of the trustee with respect to the defined benefit and defined contribution options of the pension plans, or otherwise with respect to the assets of the pension plans that are not part of the fund. The indemnity survives the termination or expiry of the agreement with respect to claims and liabilities arising prior to the termination or expiry.

Pursuant to the voting trust agreement executed as part of the CMQ U.S. acquisition, the Company has undertaken to indemnify and save harmless the trustee from any loss, cost, or expense in connection with the independent voting trust and any suit or litigation, except as a result of willful misconduct or gross negligence by the trustee.

At December 31, 2019, the Company had not recorded any liabilities associated with the above indemnifications, as it does not expect to make any payments pertaining to them.

28. Segmented and geographic information

Operating segment

The Company operates in only one operating segment: rail transportation. Operating results by geographic areas, railway corridors, or other lower-level components or units of operation are not reviewed by the Company's chief operating decision-maker to make decisions about the allocation of resources to, or the assessment of performance of, such geographic areas, corridors, components, or units of operation.

In the years ended December 31, 2019, 2018, and 2017, no one customer comprised more than 10% of total revenues and accounts receivable.

Geographic information

(in millions of Canadian dollars)	Canada	United States	Total

30. Condensed consolidating financial information

Canadian Pacific Railway Company, a 100%-owned subsidiary of CPRL, is the issuer of certain debt securities, which are fully and unconditionally guaranteed by CPRL. The following tables present condensed consolidating financial information ("CCFI") in accordance with Rule 3-10(c) of Regulation S-X.

Investments in subsidiaries are accounted for under the equity method when presenting the CCFI.

The tables include all adjustments necessary to reconcile the CCFI on a consolidated basis to CPRL's Consolidated Financial Statements for the years presented.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of December 31, 2019, an evaluation was carried out under the supervision of and with the participation of CP's management, including CEO and CFO, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the *Exchange Act*. Based on that evaluation, the CEO and CFO concluded that these disclosure controls and procedures were effective as of December 31, 2019, to ensure that information required to be disclosed by the Company in reports that they file or submit under the *Exchange Act* is (i) recorded, processed, summarized and reported within the time periods specified by the SEC rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Management is responsible for the financial statements and for establishing and maintaining adequate internal control over financial reporting for the Company as defined in Rules 13a-15(f) and 15d-15(f) of the *Exchange Act*. The Corporation's internal control system was designed to provide reasonable assurance to the Corporation's management and Board of Directors regarding the preparation and fair presentation of published financial statements. Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of the Company's internal control over financial reporting in accordance with the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control – Integrated Framework (2013)*. Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2019. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to the reliability of financial reporting and preparation of financial statements in accordance with generally accepted accounting principles.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2019 has been audited by Deloitte LLP, the Company's independent registered public accounting firm who audited the Company's Consolidated Financial Statements included in this Form 10-K, as stated in their report, which is included herein.

Changes in Internal Control over Financial Reporting

During the three months ended December 31, 2019, the Company has not identified any changes in internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Canadian Pacific Railway Limited

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Canadian Pacific Railway Limited and subsidiaries (the "Company") as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2019, of the Company and our report dated February 20, 2020, expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the Company's adoption of Accounting Standards Update 2016-02, Leases (Topic 842) and related amendments.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

EXHIBIT 9.3

KANSAS CITY SOUTHERN
2020 ANNUAL REPORT
(FILED WITH THE SEC ON JANUARY 29, 2021)

2020 Annual Report

KANSAS CITY SOUTHERN

Kansas City Southern is a transportation holding company with two primary subsidiaries. The Kansas City Southern Railway Company is one of seven Class I railroads operating in the United States. Kansas City Southern de México, S.A. de C.V. is one of two large regional railroads in Mexico. KCS also owns 50% of the Panama Canal Railway Company in Panama. The combined North American rail network comprises approximately 7,100 route miles, including trackage rights, that link commercial and industrial markets in the United States and Mexico.

2020 FINANCIAL HIGHLIGHTS

LETTER TO OUR STOCKHOLDERS

Patrick J. Ottensmeyer
President & Chief Executive Officer
Kansas City Southern

The COVID-19 pandemic, and resulting economic downturn, impacted all aspects of Kansas City Southern's (KCS or the Company) operations, resulting in an exceptionally challenging year. Despite these challenges, KCS continued to aggressively implement principles of Precision Schedule Railroading (PSR), and delivered solid financial results.

Full year revenue was $2.6 billion, down 8% from 2019. Despite the decline in revenue, KCS posted a record adjusted operating ratio* of 60.7%, a 2.5 point improvement over prior year. KCS's adjusted diluted earnings per share* was $6.96, up 1%, despite a 6% volume decline. The Company also reported record free cash flow* of $554 million, up a remarkable 29% over the prior year.

The pandemic impacted KCS's financial results, along with its operations and workforce. Our preparedness and resiliency were tested in 2020, and our workforce rose to the challenge. *Kansas City Southern will emerge from these challenging times a stronger, more resilient company, prepared to support its superior growth profile and facilitate North American trade.*

COVID-19 & KCS's Operational Performance

When the World Health Organization declared the novel Coronavirus (COVID-19) a pandemic on March 11, 2020, we truly had no clear roadmap for the path ahead. KCS's volumes were still robust, and we were preparing to close a record first quarter that surpassed even our own high expectations for revenue growth and margin improvement.

By the time KCS reported earnings in April, most of the United States and Mexico were under stay-at-home orders to slow the spread of the virus. The rail industry, however, was deemed essential in both countries, and KCS continued operating with two overarching objectives in mind ***– striving to remain focused on protecting the health, safety, and well-being of its employees and the communities in which it operates while working to maintain the continuity of its business operations.*** These were challenging tasks, as there was no playbook for a pandemic.

Economic activity quickly stalled across North America and most of KCS's customers modified production to both mitigate the impact of COVID-19 on their own employees and adjust to the rapid reduction in consumer demand. Stay-at-home orders kept traffic off the highways, and demand for refined fuels fell sharply. Shipments of several commodities, including finished vehicles and auto parts, ground to a halt. KCS's weekly volumes declined 30% from early March to early May – the swiftest drop in the Company's 134-year history.

The pandemic and resulting volume decline presented an unprecedented operational challenge. The Company had to adjust to changes in customer demand by rapidly reducing train starts and storing unused equipment. Crew availability added to the challenge, as a subset of KCS's workforce was unavailable due to COVID-19 quarantine protocol. A Mexican decree issued on March 31st further complicated operations by allowing all employees over the age of 60 or with certain preexisting conditions to shelter at home. At its peak, approximately 15% of our crew base was unavailable in Mexico, and crew availability challenges persisted into the first part of 2021.

KCS relied on its strong PSR foundation to address these challenges. As volumes declined, the Company responded rapidly, combining trains and reducing service where possible, while working closely with customers to ensure that essential freight continued to move. These actions resulted in fewer train starts, and longer, heavier and more efficient trains.

From March to May, we reduced our average daily train count by 39%. Longer and heavier trains drove a 4% improvement in fuel efficiency during this same period. KCS also was able to reduce costs that vary with volume, such as transportation, mechanical, engineering and overhead. As operational changes were implemented, KCS focused on incorporating these new efficiencies and savings into its permanent operating model.

When stay-at-home orders were lifted in May, volume rebounded and the surge in demand presented new operational challenges. The Company had to again scale resources rapidly, this time to handle the volume growth. But because many of the efficiencies and savings created during the downturn were maintained, KCS's network was able to absorb the new carloads at low incremental costs, permanently improving its cost structure.

We mourn the lives lost to COVID-19 over the past year. Despite significant adversity, the tenacity and resiliency of our essential workers kept essential freight moving. ***We thank our essential workers for their critical contributions to the Company's success. More than 6,500 men and women of KCS showed extraordinary courage and dedication throughout this very challenging period.***

Commercial Performance & North American Trade

The COVID-19 downturn impacted all areas of our business, some more significantly than others. When stay-at-home orders were announced, non-essential industrial production across North America paused. This pause in production impacted KCS's automotive volumes most significantly, along with the related auto supply chain including parts, metals and plastics. Consumer demand also slowed, negatively impacting our intermodal business. On the opposite end of the spectrum, our agriculture and minerals business was relatively unaffected, as demand for food products remained stable and most of our customers in this business unit were deemed essential.

Over the course of the year, changes to consumer behavior emerged. E-commerce skyrocketed as home deliveries shifted from a convenience to a critical tool in mitigating the spread of COVID-19. Trucking capacity tightened. Inventories were drawn down, requiring quick replenishment to keep up with consumer demand. Auto production resumed after stay-at-home orders were lifted in May, and then quickly rebounded in response to low dealership inventory and accelerating demand. Industrial production also rebounded. As a result, by the end of September, KCS's weekly volumes had increased by approximately 60% from the lowest levels in the second quarter of 2020.

KCS's volume performance in 2020 was led by refined products exports from the U.S. gulf coast to Mexico, with 48% growth over 2019. Growth in this important business was driven by Mexico's increased reliance on imported gasoline and diesel given insufficient domestic production. This gap between supply and demand persists into 2021 and we expect it to provide a catalyst for KCS to continue delivering strong growth in this business.

KCS's franchise cross-border business as a whole also performed well, despite the COVID-19-driven economic slowdown. Volume across this strategic corridor grew 5%, compared to a 6% decline in overall consolidated volumes. This outperformance during an exceptionally challenging year speaks to the importance and resiliency of North American supply chains.

We are pleased that the U.S. – Mexico – Canada Agreement took effect on July 1, 2020. Looking forward, the resulting clarity in North American trade rules, along with a move to de-risk global supply chains and move them closer to consumer markets are laying the groundwork for accelerated nearshoring. Mexico offers competitive wages, a vibrant and educated workforce and compressed supply chains. ***KCS and its partners appreciate the benefits of doing business in Mexico, and we stand ready and able to support accelerated growth in North American trade.***

Financial Performance & Stockholder Returns

Given the uncertainty presented by the pandemic, KCS elected to withdraw most financial guidance when first quarter 2020 earnings were reported in April. The impact that COVID-19 would have on the economy and operations was unclear, and KCS could no longer reasonably guide to revenue, operating ratio or earnings per share.

Despite this uncertainty, our track record of strong operational execution gave us confidence to provide a free cash flow target of at least $500 million in 2020. By October, business had improved and we were able to increase that target to at least $550 million, implying free cash flow growth of 29% over 2019. This was a remarkable achievement in a challenging year.

KCS also took advantage of favorable credit markets in April to issue $550 million of 3.50% Senior Unsecured Notes due in 2050. KCS initially used the offering proceeds to bolster the Company's cash reserves during the COVID-19-related downturn. In October, KCS announced that the proceeds would be used primarily to fund two new accelerated share repurchase (ASR) agreements for the repurchase of $550 million worth of shares.

KCS followed the announcement of the ASR with an update to its capital allocation policy. Under the updated policy, KCS intends to continue deploying approximately 40-50% of its available cash to capital projects and strategic investments, and approximately 50-60% of its available cash to share repurchases and dividends. KCS also intends to increase its leverage ratio to the mid-2x range, from the low-2x range, providing greater flexibility to use debt as a means of increasing available cash.

In connection with the updated policy, KCS implemented a quarterly dividend approach that targets a payout ratio in the low-20% range. The Company also communicated a new $3.0 billion share repurchase program, expiring December 31, 2023.

KCS's returns to stockholders in 2020 were up 23% over 2019, primarily driven by increased share repurchases. This result reflects the confidence that KCS's Board of Directors has in the durability and growth potential of the business and the Company's commitment to continue delivering strong stockholder returns.

Reducing Greenhouse Gas Emissions & Improving Fuel Efficiency

KCS is committed to mitigating the impact of climate change by reducing greenhouse gas (GHG) emissions and improving fuel efficiency. To this end, the Company is modernizing its operations through initiatives such as creating longer and heavier trains, managing horsepower-per-trailing-ton compliance and investing in fuel saving technologies. ***As a result of these fuel conservation and efficiency efforts, KCS avoided the use of 21.2 million gallons of diesel fuel in 2020, reducing our fuel consumption by 15.3%.***

Reinforcing its commitment to reducing GHG emissions, in 2020 the Company disclosed its first publicly reported multi-year emissions reduction target. Specifically, KCS intends to reduce its GHG emissions intensity 12% by the year 2025, from a 2018 base year. Additionally, in 2021, KCS has committed to setting a more aggressive science-based greenhouse gas emissions reduction target, consistent with what climate scientists say is needed to meet a goal of limiting global warming to well below 2° C above pre-industrial levels.

KCS recognizes that the rail industry plays a critical role in lowering overall transportation emissions; moving freight by rail instead of truck reduces GHG emissions by up to 75%. The Company is building on steps already taken to improve its fuel efficiency in an effort to support more sustainable North American supply chains.

Commitment to Safety & Workplace Inclusion

The safety and well-being of our workforce is KCS's highest priority. Despite an incredibly challenging year, ***KCS advanced its safety performance with a 27% improvement over 2019 in its consolidated frequency rate of reportable workplace injuries and illnesses.***

The past year also highlighted the topics of diversity, equity, and inclusion. KCS has a long-standing commitment to these principles, as embodied in the Company's Vision and Values: ***we will support Diversity and Civility by embracing our cross-cultural heritage and promoting a work environment that is inclusive of everyone. We will honor the rights of all individuals to be treated with respect and dignity.***

These are not just words. Diversity and civility are critical to KCS's culture and all employees are expected to abide by these principles. To ensure that these values permeate KCS's culture, in 2020 the executive team initiated and participated in dialogues covering the topics of inequality and diversity. These dialogues primarily took the form of small cross-cultural groups of employees, representing all areas of the business, meeting to openly discuss these matters and learn from each other. These conversations will continue as we seek to further promote diversity and inclusion across our workforce.

Looking Forward

Despite the COVID-19-driven volatility in our business last year, KCS persevered and is a stronger, more resilient and more efficient company as a result. We enter 2021 highly optimistic about our long-term growth potential, continued prospects for operational improvement through PSR, the opportunities afforded us by our financial strength and the ability of our talented and dedicated employees to provide outstanding service to our customers. We will look to leverage these factors to deliver on our commitment ***to drive continued strong stockholder returns and provide value to all of KCS's stakeholders.***

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol(s)	Name of Each Exchange on Which Registered
Preferred Stock, Par Value $25 Per Share, 4%, Noncumulative	**KSU**	**New York Stock Exchange**
Common Stock, $.01 Per Share Par Value	**KSU**	**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically, every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer", "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

The aggregate market value of common stock held by non-affiliates of the registrant was $14.01 billion as of June 30, 2020. There were 90,847,847 shares of $.01 par common stock outstanding as of January 22, 2021.

DOCUMENTS INCORPORATED BY REFERENCE

Kansas City Southern's Definitive Proxy Statement for the 2021 Annual Meeting of Stockholders which will be filed no later than 120 days after December 31, 2020, is incorporated by reference in Part III.

Item 1. ***Business***

COMPANY OVERVIEW

Kansas City Southern, a Delaware corporation, is a holding company with domestic and international rail operations in North America that are strategically focused on the growing north/south freight corridor connecting key commercial and industrial markets in the central United States ("U.S.") with major industrial cities in Mexico. As used herein, "KCS" or the "Company" may refer to Kansas City Southern or, as the context requires, to one or more subsidiaries of Kansas City Southern.

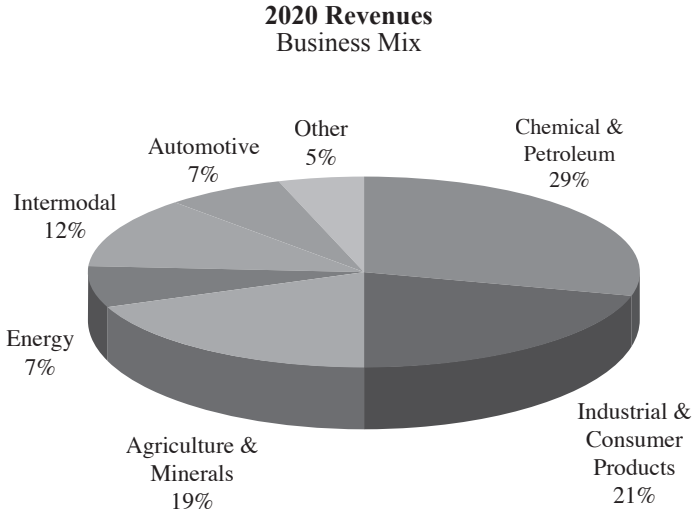
KCS controls and owns all of the stock of The Kansas City Southern Railway Company ("KCSR"), a U.S. Class I railroad founded in 1887. KCSR serves a ten-state region in the midwest and southeast regions of the United States and has the shortest north/south rail route between Kansas City, Missouri and several key ports along the Gulf of Mexico in Alabama, Louisiana, Mississippi and Texas.

KCS controls and owns all of the stock of Kansas City Southern de México, S.A. de C.V. ("KCSM"). Through its 50-year concession from the Mexican government (the "Concession"), which could expire in 2047 unless extended, KCSM operates a key commercial corridor of the Mexican railroad system and has as its core route the most strategic portion of the shortest, most direct rail passageway between Mexico City and Laredo, Texas. Laredo is a principal international gateway through which a substantial portion of rail and truck traffic between the United States and Mexico crosses the border. KCSM serves most of Mexico's principal industrial cities and three of its major seaports. KCSM's rail lines provide exclusive rail access to the United States and Mexico border crossing at Nuevo Laredo, Tamaulipas. Under the Concession, KCSM has the right to use and operate the southern half of the rail bridge at Laredo, Texas, which spans the Rio Grande River between the United States and Mexico. The Company owns the northern half of this bridge through its ownership of Mexrail, Inc. ("Mexrail").

KCSM also provides exclusive rail access to the port of Lazaro Cardenas on the Pacific Ocean. The Mexican government developed the port at Lazaro Cardenas principally to serve Mexican markets and as an alternative to the U.S. west coast ports for Asian and South American traffic bound for North America.

The Company wholly owns Mexrail which, in turn, wholly owns The Texas Mexican Railway Company ("Tex-Mex"). Tex-Mex owns a 160-mile rail line extending from Laredo, Texas to the port city of Corpus Christi, Texas, which connects the operations of KCSR with KCSM.

The KCS coordinated rail network (KCSR, KCSM and Tex-Mex, including trackage rights) comprises approximately 7,100 route miles extending from the midwest and southeast portions of the United States south into Mexico and connects with all other Class I railroads, providing shippers with an effective alternative to other railroad routes and giving direct access to Mexico and the southeast and southwest United States through alternate interchange hubs.



Panama Canal Railway Company ("PCRC"), an unconsolidated joint venture company owned equally by KCS and Mi-Jack Products, Inc. ("Mi-Jack"), was awarded a concession from the Republic of Panama to reconstruct and operate the Panama Canal Railway, a 47-mile railroad located adjacent to the Panama Canal that provides international container shipping companies with a railway transportation alternative to the Panama Canal. The concession was awarded in 1998 for an initial term of 25 years with an automatic renewal for an additional 25-year term. The Panama Canal Railway is a north-south railroad traversing the isthmus of Panama between the Atlantic and Pacific oceans.

Other subsidiaries and affiliates of KCS include the following:

- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned and consolidated subsidiary that provides employee services to KCSM;
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate that owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway." Norfolk Southern Corporation, through its wholly-owned subsidiary, The Alabama Great Southern Railroad Company, owns the remaining thirty percent of MSLLC;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and

- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for Positive Train Control ("PTC"). See Government Regulation section for further information regarding PTC.

MARKETS SERVED

Chemical and petroleum. This commodity group includes products such as chemicals, plastics, petroleum, liquefied petroleum gas, and petroleum refined products, such as gasoline and diesel. KCS transports these products across its network and through interchanges with other rail carriers. Refined fuels and liquefied petroleum gas groups of commodities supply Mexican demand. The chemical and plastic products are used in the automotive, housing and packaging industries as well as in general manufacturing. KCS hauls petroleum products across its network and as U.S. petroleum refineries have continued to increase their refining capacity, they have coordinated with KCS to develop additional long-term storage opportunities that complement a fluid freight railroad operation.

Industrial and consumer products. This commodity group includes forest products as well as metals and scrap. Forest products consist of shipments to and from paper and lumber mills in the southeast United States timber-producing region that KCS serves directly and indirectly through its various short-line connections. The United States is an important source of pulp paper and scrap paper for Mexico that ships by rail through KCS's network. Metals and scrap consist of shipments of flat steel and long product as well as other minor moves of ores such as iron, zinc and copper. The majority of steel produced and metallic ore mined in Mexico are consumed within Mexico. Steel slab is used to make steel coils and plate-products that usually ship via rail. Higher-end finished products such as steel coils are used by Mexican manufacturers in automobiles, household appliances, the oil and gas industry, and other consumer goods that are imported from the United States through land borders and the seaports served by KCS's rail network. KCS also transports steel coils, plates and pipe from U.S. and Mexican-based mini-mills to locations in the U.S. and Mexico for oil drilling, appliance and automotive applications. This commodity group also includes U.S. military transports, Mexico and U.S. domestic cement shipments and appliances manufactured in Mexico that are imported into the United States.

Agriculture and minerals. The agriculture and minerals commodity group consists primarily of grain and food products. Shipper demand for agriculture products is affected by competition among sources of grain and grain products, as well as price fluctuations in international markets for key commodities. In the United States, KCS's rail lines receive and originate shipments of grain and grain products for delivery to feed mills and food and industrial consumers in the U.S. and Mexico. United States export grain shipments and Mexico import grain shipments include primarily corn, wheat, and soybeans. Food products consist mainly of soybean meal, grain meal, oils, distillers dried grains, corn syrup and sugar. Other shipments consist of a variety of products including ores, minerals, clay and glass used across North America.

Energy. The energy commodity group includes coal, frac sand, petroleum coke and crude oil. KCS hauls unit trains (trains transporting a single commodity from one source to one destination) of coal for electric generating plants in the central United States. The coal originates from the Powder River Basin in Wyoming and is interchanged to KCS at Kansas City, Missouri. Coal mined in the midwest United States is transported in non-unit trains to industrial consumers such as paper mills, steel mills, and cement companies. Frac sand originating primarily in Wisconsin, Illinois or Iowa is delivered to transloads located in northeast Texas, northern Louisiana and south Texas for distribution to gas and oil wells in the region. Frac sand business in Mexico is primarily for industrial purposes such as auto glass and bottle manufacturing. KCS's shipments of frac sand to support the drilling industry have diminished over time as the use of in-basin frac sand has largely replaced frac sand originating in the upper Midwest. KCS transports petroleum coke from refineries in the United States to various industries in

the U.S. and Mexico including export through the Pabtex terminal located in Port Arthur, TX. The majority of crude by rail business originates in Canada, with spot shipments coming from west Texas, and is delivered to U.S. Gulf Coast refineries and tank farms in Texas, Louisiana, and Alabama.

Intermodal. The intermodal freight sector consists primarily of hauling freight containers or truck trailers on behalf of steamship lines, motor carriers, and intermodal marketing companies with rail carriers serving as long-distance haulers. KCS serves and supports the U.S. and Mexican markets, as well as cross-border traffic between the U.S. and Mexico. In light of the importance of trade between Asia and North America, the Company believes the Port of Lazaro Cardenas continues to be a strategically beneficial location for ocean carriers, manufacturers and retailers. Equally important, foreign direct investment in Mexico has caused the KCS Mexico/U.S. cross border corridor to emerge as an increasingly important tool for freight flow. The Company also provides premium service to customers over its line from Dallas through the Meridian Speedway— a critical link in creating the most direct route between the southwest and southeast/northeast U.S.

Automotive. KCS provides rail transportation to every facet of the automotive industry supply chain, including automotive manufacturers, assembly plants and distribution centers throughout North America. In addition, KCS transports finished vehicles imported and exported to and from various countries through a distribution facility at the Port of Lazaro Cardenas.

GOVERNMENT REGULATION

The Company's United States operations are subject to federal, state and local laws and regulations generally applicable to all businesses, subject to federal preemption under certain circumstances. Rail operations are also subject to the regulatory jurisdiction of the Surface Transportation Board ("STB"), the Federal Railroad Administration ("FRA") and the Pipeline and Hazardous Materials Safety Administration ("PHMSA") of the U.S. Department of Transportation ("DOT"), the Occupational Safety and Health Administration ("OSHA"), as well as other federal and state regulatory agencies. The STB has jurisdiction over disputes and complaints involving certain rates and charges, routes and services, the sale or abandonment of rail lines, applications for line extensions and construction, and consolidation or merger with, or acquisition of control of, rail common carriers. DOT and OSHA each has jurisdiction under several federal statutes over a number of safety and health aspects of rail operations, including the transportation of hazardous materials. In 2008, the President of the United States signed the Rail Safety Improvement Act of 2008 into law, which, among other things, revised hours of service for train and certain other employees and mandated implementation of PTC at certain locations by the end of 2015. PTC is a technology designed to help prevent train-to-train collisions, overspeed derailments, incursions into rail work zones, and entry into main line track if a switch is misaligned at certain locations, including main line track where toxic inhalation hazard or poison inhalation hazard movements occur or where passenger operations occur. The Surface Transportation Extension Act of 2015 amended the PTC deadline set by the Rail Safety Improvement Act of 2008 to require implementation of PTC by the end of 2018, and then further extended to December 31, 2020. By the end of 2018, the Company implemented PTC on all required sections of its rail network, locomotives and wayside assets. The Company completed interoperability with the required Class I freight railroads and Amtrak in June 2020 in compliance with the December 31, 2020 deadline. The implementation of PTC increased operating costs, and the number of employees the Company employs, and has required significant investments in new safety technology. The Company will continue to make investments in new safety technology.

KCS's U.S. subsidiaries are subject to extensive federal, state and local environmental regulations. These laws cover discharges to water, air emissions, toxic substances, and the generation, handling, storage, transportation and disposal of waste and hazardous materials. These regulations have the effect of increasing the costs, risks and liabilities associated with rail operations. Environmental risks are also inherent in rail operations, which frequently involve transporting chemicals and other hazardous materials.

Primary regulatory oversight of the Company's Mexican operations is provided by the Mexican Agencia Reguladora del Transporte Ferroviario ("Regulatory Agency of Rail Transportation" or "ARTF"). The ARTF establishes regulations concerning railway safety and operations, and is responsible for resolving disputes between railways and customers. KCSM must register its maximum rates with the ARTF and make regular reports to the ARTF and the Secretaría de Comunicaciones y Transportes ("Secretary of Communications and Transportation" or "SCT"). KCSM must provide reports on investments, traffic volumes, theft and vandalism on the general right of way, customer complaints, fuel consumption, number of locomotives, railcars and employees, and activities around maintenance of way, sidings and spurs, among other financial information and reports. The Company may freely set rates on a non-discriminatory basis up to the maximum rates registered with the ARTF. At any time, the ARTF may request additional information regarding the determination of such rates and may

issue recommendations with respect to proposed rate increases. If the ARTF or another party considers there to be no effective competition, they may request an opinion from the Comisión Federal de Competencia Económica ("Mexican Antitrust Commission" or "COFECE") regarding market conditions. If the COFECE determines that there is no effective competition for particular movements, the ARTF could set rates for those movements or grant limited trackage rights to another railroad while the condition of no effective competition remains.

KCSM holds a Concession from the Mexican government until June 2047 (exclusively through 2027, subject to certain trackage and haulage rights granted to other concessionaires), which is renewable under certain conditions for additional periods of up to 50 years. The Concession authorizes KCSM to provide freight transportation services over north-east rail lines, which are a primary commercial corridor of the Mexican railroad system. KCSM is required to provide freight railroad services to all users on a fair and non-discriminatory basis and in accordance with efficiency and safety standards approved periodically by the Mexican government. KCSM has the right to use, but does not own, all track and buildings that are necessary for the rail lines' operation. KCSM is obligated to maintain the right of way, track structure, buildings and related maintenance facilities to the operational standards specified in the Concession agreement and to return the assets in that condition at the end of the Concession period. During the remainder of the Concession period, KCSM is required to pay the Mexican government an annual concession duty equal to 1.25% of gross revenues. The ARTF may request information to verify KCSM´s compliance with the Concession and any applicable regulatory framework.

The Company's Mexican operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment through the establishment of standards for water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. The Mexican government may bring administrative and criminal proceedings and impose economic sanctions against companies that violate environmental laws, and temporarily or even permanently close non-complying facilities.

Noncompliance with applicable legal provisions may result in the imposition of fines, temporary or permanent shutdown of operations or other injunctive relief, criminal prosecution or, with respect to KCSM, the termination of the Concession. KCS maintains environmental provisions that are believed by management to be appropriate with respect to known and existing environmental contamination of its properties that KCS may be responsible to remedy.

Government regulations are further discussed within Item 7, Management's Discussion and Analysis of Financial Information and Results of Operations — Mexico Regulatory and Legal Updates.

COMPETITION

The Company competes against other railroads, many of which are much larger and have significantly greater financial and other resources. The railroad industry in North America is dominated by a few very large carriers. The larger U.S. western railroads (BNSF Railway Company and Union Pacific Railroad Company), in particular, are significant competitors of KCS because of their substantial resources and competitive routes.

In Mexico, KCSM's operations are subject to competition from other railroads, particularly Ferrocarril Mexicano, S.A. de C.V. ("Ferromex") and Ferrosur, S.A. de C.V. ("Ferrosur"), both controlled by Grupo Mexico S.A.B. de C.V. Ferromex and Ferrosur together are much larger and have significantly greater financial and other resources than KCSM, serving most of the major ports and cities in Mexico and together owning fifty percent of FTVM, which serves industries located in the Mexico City area.

The ongoing impact of past and future rail consolidation is uncertain. However, KCS believes that its investments and strategic alliances continue to competitively position the Company to attract additional rail traffic throughout its rail network.

The Company is subject to competition from motor carriers, barge lines and other maritime shipping, which compete across certain routes in KCS's operating areas. In the past, truck carriers have generally eroded the railroad industry's share of total transportation revenues. Intermodal traffic and certain other traffic face highly price sensitive competition, particularly from motor carriers. However, rail carriers, including KCS, have placed an emphasis on competing in the intermodal marketplace and working with motor carriers to provide end-to-end transportation of products.

While deregulation of U.S. freight rates has enhanced the ability of railroads to compete with each other and with alternative modes of transportation, this increased competition has generally resulted in downward pressure on freight rates

since deregulation. Competition with other railroads and other modes of transportation is generally based on the rates charged, the quality and reliability of the service provided and the quality of the carrier's equipment for certain commodities.

RAIL SECURITY

The Company and its rail subsidiaries have continued to research, develop and implement multidisciplinary approaches to secure the Company's assets and personnel against transnational criminal organizations that actively target transportation networks. In addition, the Company has developed a variety of vertically integrated strategies to mitigate the risk terrorist attacks could pose to the Company, its personnel and assets. Many of the specific measures the Company utilizes for these efforts are required to be kept confidential through arrangements with government agencies, such as the Department of Homeland Security ("DHS"), or through jointly-developed and implemented strategies and plans with connecting carriers.

KCSR and KCSM developed a proprietary security plan based on an industry-wide plan developed by the Association of American Railroads ("AAR") members which focuses on comprehensive risk assessments in five areas — hazardous materials; train operations; critical physical assets; military traffic; and information technology and communications. The security plan is kept confidential, with access to the plan tightly limited to members of management with direct security and anti-terrorism implementation responsibilities. The Company participates with other AAR members in periodic drills under the industry plan to test and refine its various provisions.

The Company also uses information technology in various ways in its operations. The risks associated with this technology from cyber attacks has increased in recent years. The Company continues to monitor these threats and attempted cyber attacks, and has put in place various safeguards to protect the Company's operations as well as its assets and digital information from cyber attacks.

To protect the confidentiality and sensitivity of both the AAR plans and the proprietary strategies the Company has developed to safeguard against criminal enterprises, terrorism, and other security and safety threats, the following paragraphs will provide only a general overview of some of these efforts.

The Company's security activities range from periodically providing security awareness updates to KCS employees and including safety and security information on the Company's internet website (which can be found under the "Corporate Responsibility" tab at www.kcsouthern.com) to its ongoing implementation of security plans for rail facilities in areas labeled by the DHS as High Threat Urban Areas ("HTUAs"). The Company's other activities to bolster security against terrorism include, but are not limited to, the following:

- Conferring regularly with other railroads' security personnel and with industry experts on security issues;
- Routing shipments of certain chemicals, which might be toxic if inhaled, pursuant to federal regulations;
- Initiating a series of over 20 voluntary action items agreed to between AAR and DHS as enhancing security in the rail industry;
- Conducting constant and targeted security training as part of the scheduled training for operating employees and managers;
- Developing smartphone applications to ensure immediate information, live video and pictures from security supervisors and protection assets pertaining to potential operational risks;
- Developing a multi-layered security model using high-speed digital imaging, system velocity and covert and overt security filters to mitigate the risk of illicit activity;
- Measuring key security metrics to ensure positive risk mitigation and product integrity trends;
- Performing constant due diligence with the existing security model and by benchmarking rail security, including cyber security, on a world-wide basis to monitor threat streams related to rail incidents;
- Implementing a Tactical Intelligence Center by KCSM, which provides constant training with core members in new technology helping to prevent, detect, deter, deny and respond to potentially illicit activities; and
- Deploying an array of non-intrusive technologies including, but not limited to, digital video surveillance and analytics as part of an intelligent video security solution, including a closed circuit television platform with geo-fencing for intrusion detection, to allow for remote viewing access to monitor ports of entry, intermodal and rail yards.

In addition, the Company utilizes dedicated security personnel with extensive special operations forces, intelligence, and law enforcement backgrounds to oversee the ongoing and increasingly complex security efforts of the Company in both the United States and Mexico. While the risk of theft and vandalism is higher in Mexico, KCSM remains among the safest methods of transportation for freight shipments in Mexico. KCSM's record in rail safety is due in large part to the implementation of a multi-layered safety and security process throughout the KCSM network. In addition to having its own internal system, the process is connected to, and supported by a high level of federal, state and local law enforcement. A primary focus of this effort involves maintaining constant diligence, intelligence and counterintelligence operations, technology-reporting applications and active vigilance while enhancing overall system velocity, which reduces the residual risk for incidents to occur.

RAILWAY LABOR ACT

Labor relations in the U.S. railroad industry are subject to extensive governmental regulation under the Railway Labor Act ("RLA"). Under the RLA, national labor agreements are renegotiated on an industry-wide scale when they become open for modification, but their terms remain in effect until new agreements are reached or the RLA's procedures (which include mediation, cooling-off periods, and the possibility of presidential intervention) are exhausted. Contract negotiations with the various unions generally take place over an extended period of time and the Company rarely experiences work stoppages during negotiations. Wages, health and welfare benefits, work rules and other issues have traditionally been addressed during these negotiations.

COLLECTIVE BARGAINING

Approximately 70% of KCSR employees are covered by collective bargaining agreements. These agreements do not have expiration dates, but rather remain in place until modified by subsequent agreements. KCSR participates in industry-wide multi-employer bargaining as a member of the National Carriers' Conference Committee (the "NCCC"), as well as local bargaining for agreements that are limited to KCSR's property. Multi-employer agreements are subject to a procedure that allows requests for changes to be served every five years. Long-term agreements were reached voluntarily or through the arbitration process during 2017 and 2018 covering all of the participating unions. The terms of these agreements will remain in effect until new agreements are reached in the next bargaining round. In November 2019, KCSR and its unions commenced negotiations in connection with the 2020 bargaining round.

KCSM Servicios union employees are covered by one labor agreement, which was signed on April 16, 2012, between KCSM Servicios and the Sindicato de Trabajadores Ferrocarrileros de la República Mexicana ("Mexican Railroad Union"), and which remains in effect during the period of the Concession, for the purpose of regulating the relationship between the parties. Approximately 79% of KCSM Servicios employees are covered by this labor agreement. The compensation terms under this labor agreement are subject to renegotiation on an annual basis and all other benefits are subject to negotiation every two years. The parties finalized negotiations over compensation terms and benefits that will apply until June 30, 2021, along with other terms.

Union labor negotiations have not historically resulted in any strike, boycott or other disruption in the Company's business operations.

INFORMATION ABOUT EXECUTIVE OFFICERS

All executive officers are elected annually and serve at the discretion of the Board of Directors. All of the executive officers have employment agreements with KCS and/or its subsidiaries.

Patrick J. Ottensmeyer — President and Chief Executive Officer— 63 — Served in this capacity since July 1, 2016. Mr. Ottensmeyer has been a director of KCS since July 1, 2016 and served as President of KCS since March 1, 2015. He served as Executive Vice President Sales and Marketing of KCS from October 16, 2008 through March 1, 2015. Mr. Ottensmeyer joined KCS in May 2006 as Executive Vice President and Chief Financial Officer.

Warren K. Erdman — Executive Vice President — Administration and Corporate Affairs — 62 — Served in this capacity since April 2010. Mr. Erdman served as Executive Vice President — Corporate Affairs from October 2007 until April 2010. He served as Senior Vice President — Corporate Affairs of KCS and KCSR from January 2006 to September 2007. Mr. Erdman served as Vice President — Corporate Affairs of KCS from April 15, 1997 to December 31, 2005 and as Vice President — Corporate Affairs of KCSR from May 1997 to December 31, 2005. Prior to joining KCS, Mr. Erdman served as Chief of Staff to United States Senator Kit Bond of Missouri from 1987 to 1997.

Brian D. Hancock — Executive Vice President and Chief Innovation Officer — 55 — Served in this capacity since October 1, 2018. Mr. Hancock served as Executive Vice President and Chief Marketing Officer from August 2015 until September 2018. Prior to joining KCS, Mr. Hancock served as Senior Vice President of Supply Chain for Family Dollar Stores, Inc., a variety store chain, from 2013 to July 2015. From 2011 to 2013, Mr. Hancock served as President – North America for The Martin – Brower Company, L.L.C. From 2005 to 2011, he served as Vice President – Global Supply Chain for Whirlpool Corporation.

Jeffrey M. Songer — Executive Vice President and Chief Operating Officer — 51 — Served in this capacity since March 2016. Mr. Songer served as Senior Vice President Engineering and Chief Transportation Officer of the Company from August 2014 to February 2016 and as Vice President and Chief Engineer for KCSR from June 2012 to July 2014. Prior to serving as KCSR's Vice President and Chief Engineer, Mr. Songer served as Assistant Vice President — Engineering and Planning from March 2011 to June 2012, and as its General Director — Planning, Scheduling & Administration from January 2007 to March 2011.

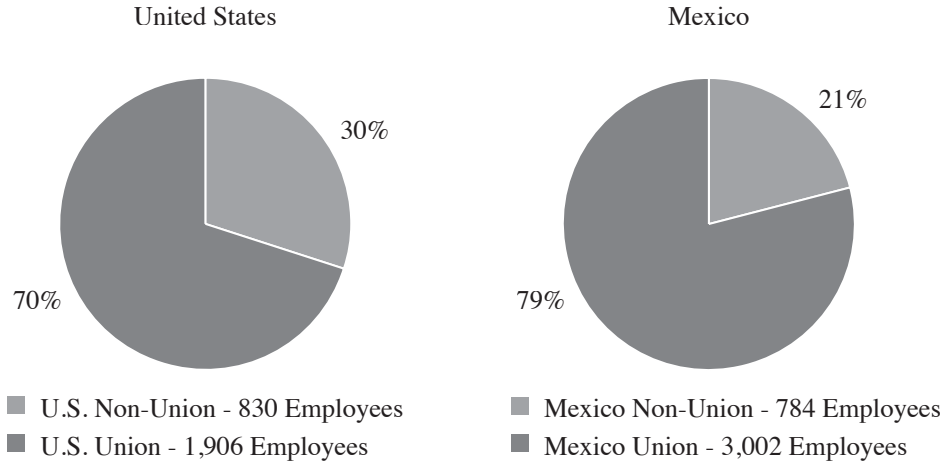
Michael W. Upchurch — Executive Vice President and Chief Financial Officer — 60 — Served in this capacity since October 16, 2008. Mr. Upchurch joined KCS in March 2008 as Senior Vice President Purchasing and Financial Management. From 1990 through September 2006, Mr. Upchurch served in various senior financial leadership positions at Sprint Corporation, a telecommunications company, including Senior Vice President Financial Operations, Senior Vice President Finance Sprint Business Solutions and Senior Vice President Finance Long Distance Division.

Oscar Augusto Del Cueto Cuevas — President, General Manager and Executive Representative — KCSM — 54 — Served in this capacity since August 1, 2020. Mr. Del Cueto previously served as KCSM Servicios Vice President and General Director from November 2018 to July 2020 and as KCSM Servicios Vice President-Operations from January 2013 to October 2018. Mr. Del Cueto joined KCSM in 2006 and held various leadership positions prior to 2013. He has nearly 30 years of railway industry experience, working in institutional relations, communication, operations, planning and logistics.

Lora S. Cheatum — Senior Vice President — Human Resources — 64 — Served in this capacity since joining KCS in October 2014. Ms. Cheatum previously served as Senior Vice President Global Human Resources of Layne Christensen Company, a global water management, construction, and drilling company, from 2012 to October 2014. From 2010 to 2012, she served as Director — Field Operations at Fitness Together Holdings, Inc. Ms. Cheatum spent nine years with Kansas City Power & Light, from 2001 to 2010, where she was Vice President of Procurement and previously as Vice President Human Resources.

Michael J. Naatz — Executive Vice President and Chief Marketing Officer — 55 — Served in this capacity since October 1, 2018. Mr. Naatz served as Senior Vice President Operations Support and Chief Information Officer from August 2014 until September 2018 and as Senior Vice President and Chief Information Officer of the Company from May 2012 to July 2014. Prior to joining KCS, Mr. Naatz served as President of USF Holland, a YRC Worldwide, Inc. ("YRCW") company, a leading provider of transportation and global logistics services, from 2011 to May 2012. From 2010 to 2011, Mr. Naatz served as President and Chief Customer Officer - Customer Care Division at YRCW. From 2008 to 2010, he served as Executive Vice President and Chief Information & Service Officer at YRCW. From 2005 to 2007, he served as President — Enterprise Services Division at YRCW. From 1994 to 2005, he held various leadership positions with USF Corporation.

Suzanne M. Grafton — Vice President and Chief Accounting Officer — 45 — Served in this capacity since July 24, 2017. Ms. Grafton served as Vice President of Audit and Enterprise Risk Management of the Company from April 2016 to July 2017 and as Vice President of Accounting from May 2014 to March 2016. From September 2006 to May 2014, Ms. Grafton served in various accounting leadership positions at KCS.



Adam J. Godderz — Senior Vice President — Chief Legal Officer and Corporate Secretary — 46 — Served in this capacity since February 1, 2020. Mr. Godderz served as General Counsel and Corporate Secretary from January 2019 to January 2020 and as Associate General Counsel and Corporate Secretary of the Company from June 2018 to December 2018. From November 2015 to May 2018, he served as Vice President of Labor Relations and Corporate Secretary. From January 2013 to November 2015, Mr. Godderz served as Associate General Counsel and Corporate Secretary. From September 2007 to January 2013, Mr. Godderz served as Associate General Counsel at KCS.

DESCRIPTION OF HUMAN CAPITAL RESOURCES

The employees of KCS are the Company's greatest asset. KCS employees are the foundation of the Company's success and keep the railroad moving every day, even during a global pandemic. The employees of KCS have a shared vision – to strive to be the fastest-growing, best-performing, most customer-focused transportation provider in North America.

A majority of the KCS workforce plays a critical role in the daily train operations and customer support. This portion of the workforce, including train crews, dispatchers, mechanical and engineering crews, field managers, and many others, cannot work from home. During the pandemic, these employees and freight rail transportation are part of what is deemed "critical infrastructure," essential to the economy and the communities KCS serves.

As of December 31, 2020, the Company had approximately 6,522 employees, with 58% based in Mexico and 42% based in the U.S. In 2020, approximately 75% of KCS employees were represented by a collective bargaining agreement.

In managing the Company's business, management focuses on a number of human capital measures and objectives rooted in the KCS Vision, Values and Culture (described further below, and as noted on the Company's website at https://www.kcsouthern.com/en-us/about-us/overview/vision-values, which is not incorporated into this Form 10-K) and include the following:

- ***Employee Health & Safety*** - KCS is committed to operating in a safe, secure and responsible manner for the benefit of its employees, customers and the communities KCS serves in the U.S. and Mexico. See below for further discussion of employee health and safety as well as noted in the Company's sustainability report at https://www.kcsouthern.com/corporate-responsibility/our-commitment/KCS-2019-Sustainability-Report.pdf (the sustainability report is not incorporated into this Form 10-K).
- ***Compensation and Benefits*** - KCS strives to offer competitive compensation, benefits and services that meets the needs of its employees including, short and long-term incentive packages, employee stock purchase plan, defined contribution plan, healthcare benefits, and wellness and employee assistance programs. Management monitors market compensation and benefits to be able to attract, retain, and promote employees and reduce turnover and its associated costs. In addition, KCS's short and long-term incentive programs are aligned with the Company's vision and key business objectives and are intended to motivate strong performance. KCS engages a nationally recognized outside consulting firm to objectively evaluate its compensation and benefits and benchmark them against industry peers and other similarly situated organizations.

For the year ended December 31, 2020, compensation and benefits expense totaled $476.5 million. See Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations* for further discussion of compensation and benefits expense.

- ***Productivity Measures*** – KCS measures productivity of its workforce by analyzing its headcount compared to total gross ton miles, which is the number of miles moved by a train multiplied by the total weight of the freight cars.

	Years Ended December 31,	
	2020	2019
Gross Ton Miles (GTM) (in millions) [(a)]	94,434	101,819
Average Employees - Total	6,655	7,069
Average Employees - Union	4,983	5,353
GTM's per Average Employee (in millions)	14.19	14.40

(a) Excludes Locomotive Gross Ton Miles

- ***KCS's Vision, Values and Culture ("KCS Culture")*** - The KCS Culture is critically important to KCS's success and is a set of guidelines, beliefs and behaviors that help define KCS and create a foundation for growth and success. KCS's strong culture and core values should allow KCS to fulfill its vision and continue to endure in times of stress. The KCS Culture helps guide how employees make decisions, treat each other and serve customers. All employees are responsible for upholding the KCS Culture and conformance with the KCS Culture statement is 25% of the annual performance appraisal process for all management employees. Management uses performance evaluations as a tool to help strengthen relationships with employees and KCS's Culture.

Employee Health and Safety Overview

Management seeks to instill a culture valuing employee health and safety at KCS via training, education, initiatives, equipment and a strict adherence to applicable safety rules as further described below.

Operational safety

KCS is subject to federal, state, and local government regulations in the U.S. and Mexico with regard to safety. These regulations direct safety practices in the placement of rail cars carrying certain commodities in the train, routes, inspection of equipment and track, security procedures, equipment design and construction, speed restrictions, and work rules.

Management strives to instill a culture of safety, providing on-the-job training and classroom instruction to employees. Many positions, such as locomotive engineers and conductors, have extensive requirements for certification and licensing, as required by federal regulation. Certification-eligibility is based on a variety of factors, including prior safety conduct of the applicant, compliance with applicable regulations, knowledge of operating rules and performance testing. The Company offers certification and training programs to operations groups as business needs require. These training programs focus on operating rules, safety rules, and procedures required for specific tasks.

KCS's operational testing program provides processes for ongoing validation and understanding of, and adherence to operating rules and procedures by employees, and allows management to identify, monitor and manage potential safety risks in the business. This training is designed to gauge employees' knowledge of and compliance with KCS rules and procedures and determine the need for remedial training or guidance. Testing plans are developed based upon, among other things, a particular location's risks, recent trends, injuries or accidents and prior operational test performance.

Safety technology

KCS uses advanced technologies to help employees enhance operational safety including the following:

- Advanced Inspection Equipment — KCS uses technology to monitor, in real-time, the approximately 7,100 route miles of track, bridges, and tunnels that KCS uses in its operations. KCS employees and contractors inspect railroad tracks using specialized equipment such as track geometry cars, ground-penetrating radar, and laser technology. Additionally, different types of wayside detectors are positioned along the rail network to monitor the condition of the wheels on passing trains. These specialized technologies alert railroads to potential defects and help enable KCS to schedule maintenance in a timely manner.

- PTC — Since 2008, KCSR has worked to implement PTC, the largest and most complex safety system in the history of the railroad industry. PTC is an advanced technology system designed to automatically stop a train before certain incidents occur and protect KCS's employees, customers and communities along the network. The Company has invested $257.4 million in PTC since 2008. PTC aims to prevent the following:
    - Train-to-train collisions;
    - Derailments caused by excessive train speed;
    - Train movements through misaligned track switches;
    - Unauthorized train entry into work zones.
- Asset Health Strategic Initiative ("AHSI") — AHSI is a multi-year rail industry program that applies information technology processes to help improve the safety and performance of freight cars and locomotives across North America. The program aims to help reduce mechanical service interruptions, improve the quality of railcar inspections, and increase rail yard and repair shop efficiencies by consolidating equipment information, including ownership information, repair and inspection history, and company recalls, among other things.

Health and Safety during COVID-19 pandemic

During the outbreak in March 2020 of the novel Coronavirus ("COVID-19"), which has been declared a pandemic, the U.S. and Mexico governments deemed rail transportation as "critical infrastructure" providing essential services during the global emergency. As a provider of critical infrastructure, Kansas City Southern has an obligation to keep employees working and freight operations moving. During this period, the Company strives to remain focused on protecting the health, safety, and well-being of its employees and the communities in which it operates while working to maintain the continuity of its business operations.

In response to the COVID-19 pandemic, KCS created a dedicated crisis team that implemented business continuity plans to help ensure the ongoing availability of its transportation services. KCS took a variety of health and safety measures, including separating dispatching and crew operations, implementing enhanced cleaning and hygiene protocols in its facilities and locomotives, implementing remote work policies where possible, performing temperature checks and requiring facial coverings. As a result, the Company did not experience significant COVID-19 related disruptions in its railroad operations during 2020. For the year ended December 31, 2020, the Company recognized approximately $10.0 million of expense related to COVID-19 for the protection of its employees and the continuity of business operations.

AVAILABLE INFORMATION

KCS's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, and amendments to those reports, are available for download at no cost on KCS's website (www.investors.kcsouthern.com) as soon as reasonably practicable after the electronic filing of these reports is made with the Securities and Exchange Commission. In addition, KCS's corporate governance guidelines, ethics and legal compliance policy, and the charters of the Audit Committee, the Finance and Strategic Investments Committee, the Nominating and Corporate Governance Committee and the Compensation and Organization Committee of the Board of Directors are available on KCS's website.

See Item 8, Financial Statements and Supplementary Data — Note 1, Description of the Business and Note 19, Geographic Information for more information on the description and general development of the Company's business and financial information about geographic areas.

Item 1A. Risk Factors

Risks Related to KCS's Operations and Business

Public health threats or outbreaks of communicable diseases could have a material adverse effect on the Company's operations and financial results.

The Company may face risks related to public health threats or outbreaks of communicable diseases. A widespread healthcare crisis, such as an outbreak of a communicable disease could adversely affect the global economy and the Company's and its business partners' ability to conduct business in the U.S. and Mexico for an indefinite period of time. COVID-19 has spread to multiple global regions, including the U.S. and Mexico, and has negatively impacted the global economy, disrupted

financial markets and international trade, resulted in increased unemployment levels and significantly impacted global supply chains, all of which negatively impacted the rail transportation industry and the Company's business. In an effort to halt the outbreak of COVID-19, both in the U.S. and Mexico, local, state, and federal governments have implemented various measures, including but not limited to, voluntary and mandatory quarantines, stay-at-home orders, travel restrictions, border closings, limitations on gatherings of people, and extended closures of nonessential businesses. The implementation of these measures resulted in a decline in demand that had a material impact on the Company's results of operations and financial condition during the year ended December 31, 2020. The Company's revenues decreased by approximately 8% during 2020, as compared to the prior year, and approximately $10.0 million in additional expenses were incurred due to COVID-19 as part of the Company providing a safe and healthy work environment for KCS employees.

Although the Company has taken numerous measures to overcome the adverse impact derived from the COVID-19 outbreak and continued with the Company's normal business activities, this pandemic could continue to materially impact revenues and profit. In addition, COVID-19 could:

- continue to impact customer demand of the Company's transportation services;
- continue to cause the Company to experience an increase in costs as a result of the Company's emergency measures, and delayed payments from customers;
- continue to cause delays and disruptions in the supply chain resulting in disruptions in the commercial operation dates of certain projects;
- continue to impact availability of qualified personnel; and
- cause other unpredictable events.

The situation surrounding COVID-19 remains fluid and for this reason, KCS cannot reasonably estimate with any degree of certainty the future impact COVID-19 may have on the Company's results of operations, financial position, and liquidity. The extent to which the COVID-19 pandemic may impact the Company's business, operating results, financial condition, or liquidity will depend on future developments, including the duration of the outbreak, travel restrictions, business and workforce disruptions, and the effectiveness of actions taken to contain and treat the disease.

Capacity constraints could materially adversely affect service and operating efficiency.

KCS may experience capacity constraints due to increased demand for rail services, unavailability of equipment, crew shortages, or extreme weather. Also, due to the interconnectivity between all railroads, especially in the U.S., congestion on other railroads could result in operational inefficiencies for KCS. Traffic congestion experienced in the U.S. or Mexican railroad system may result in overall traffic congestion which would impact the ability to move traffic to and from Mexico, which could result in operational inefficiencies for KCS and could have a material adverse effect on KCS's operations.

Significant expansions in the capacity of the Company's network can require a substantial amount of time and investment. Although KCS constantly monitors its network in an effort to optimize its rail services, there can be no assurance that such measures will adequately address capacity constraints on a timely basis.

KCS competes against other railroads and other transportation providers.

The Company's domestic and international operations are subject to competition from other railroads, as well as from truck carriers, barge lines, and other maritime shippers. Many of KCS's rail competitors are much larger and have significantly greater financial and other resources than KCS, which may enable rail competitors to reduce rates and make KCS's freight services less competitive. KCS's ability to respond to competitive pressures by matching rate reductions and decreasing rates without adversely affecting gross margins and operating results will depend on, among other things, the ability to reduce operating costs. KCS's failure to respond to competitive pressures, and particularly rate competition, in a timely manner could have a material adverse effect on the Company's consolidated financial statements.

The railroad industry is dominated by a few large carriers. These larger railroads could attempt to use their size and pricing power to block other railroads' access to gateways and routing options that are currently and have historically been available. In addition, if there is future consolidation in the railroad industry in the United States or Mexico, there can be no assurance that it will not have a material adverse effect on the Company's consolidated financial statements.

Trucking, maritime, and barge competitors provide rate and service competition to the railroad industry. These competitors are able to use public rights-of-way, require substantially smaller capital investment and maintenance expenditures than railroads and allow for more frequent and flexible scheduling. Continuing competitive pressures, any reduction in margins due to competitive pressures, developments that increase the quality or decrease the cost of alternative modes of transportation in the locations in which the Company operates, or legislation or regulations that provide motor carriers with additional advantages, such as increased size of vehicles and reduced weight restrictions, could result in downward pressure on freight rates, which in turn could have a material adverse effect on the Company's consolidated financial statements. KCS may also experience operational or service difficulties related to network capacity, fluctuations in customers' demand for rail service, or other events that could have a material adverse effect on KCS's consolidated financial statements.

A key part of KCS's growth strategy is based upon the conversion of truck traffic to rail. There can be no assurance the Company will succeed in its efforts to convert traffic from truck to rail transport or that the customers already converted will be retained. If the railroad industry in general is unable to preserve its competitive advantages vis-à-vis the trucking industry, revenue growth could be adversely affected. Additionally, revenue growth could be affected by, among other factors, an expansion in the availability, or an improvement in the quality, of the trucking services offered by carriers resulting from regulatory and administrative interpretations and implementation of certain provisions of current or future multinational trade agreements that are favorable to the trucking industry or unfavorable to the rail industry or KCS. Such actions may negatively impact KCS's ability to grow its existing customer base and capture additional cargo transport market share because of competition from the shipping industry and other railroads.

KCS's business strategy, operations and growth rely significantly on agreements with other railroads and third parties.

Operation of KCS's rail network and its plans for growth and expansion rely significantly on agreements with other railroads and third parties, including joint ventures and other strategic alliances, as well as interchange, trackage rights, haulage rights and marketing agreements with other railroads and third parties that enable KCS to exchange traffic and utilize trackage the Company does not own. KCS's ability to provide comprehensive rail service to its customers depends in large part upon its ability to maintain these agreements with other railroads and third parties, and upon the performance of the obligations under the agreements by the other railroads and third parties. The termination of, or the failure to renew, these agreements could have a material adverse effect on KCS's consolidated financial statements. KCS is also dependent in part upon the financial strength and efficient performance of other railroads. There can be no assurance that KCS would not be materially adversely affected by operational or financial difficulties of other railroads.

KCS depends on the stability, availability and security of its information technology systems to operate its business. Disruptions in KCS's information technology ("IT") systems could materially adversely affect the Company's business and operating results.

KCS relies on information technology in all aspects of its business. A significant disruption or failure of its IT systems, including its computer hardware, software, communications equipment, wayside equipment or locomotive onboard equipment could result in service interruptions, safety failures, security failures, regulatory compliance failures or other operational difficulties. Moreover, if KCS is not able to acquire new technology or to develop or implement new technology, KCS may suffer a competitive disadvantage, which could have a material adverse effect on KCS's consolidated financial statements.

The security risks associated with IT systems have increased in recent years because of the increased sophistication, activities and evolving techniques of perpetrators of cyber attacks. A failure in, or breach of, KCS's IT security systems, or those of its third party service providers, as a result of cyber attacks or unauthorized access to its network could disrupt KCS's business, result in the disclosure or misuse of confidential or proprietary information, increase its costs and/or cause losses and reputational damage. KCS also confronts the risk that a terrorist or nation-state sponsored group may seek to use its property, including KCS's information technology systems, to inflict major harm.

Although KCS has a comprehensive cyber security program designed to protect and preserve the integrity of its information technology systems, KCS has experienced and expects to continue to experience cyber attacks of its IT systems or networks. However, none of these cyber attacks to date had a material impact on KCS's operations or financial condition. While KCS devotes significant resources to network security, data encryption and other security measures to protect its systems and data, including its own proprietary information and the confidential and personally identifiable information of its customers, employees, and business partners, these measures cannot provide absolute security. The costs to eliminate or alleviate network security problems, bugs, viruses, ransomware, worms, malicious software programs and security

vulnerabilities could be significant, and KCS's efforts to address these problems may not be successful, resulting potentially in the theft, loss, destruction or corruption of information that KCS stores electronically, as well as unexpected interruptions, delays or cessation of service, any of which could cause harm to KCS's business operations. Moreover, if a computer security breach or cyber attack affects KCS's systems or results in the unauthorized release of proprietary or personally identifiable information, the Company's reputation could be materially damaged, customer confidence could be diminished, and KCS's operations could be impaired.

A significant disruption, failure or unauthorized access of KCS's information technology system could expose the Company to a risk of legal proceedings and potential liability and have a material adverse effect on KCS's consolidated financial statements. Further, legislative or regulatory action in these areas is evolving, and KCS may be unable to adapt its IT systems or to manage the IT systems of third parties to accommodate these changes.

Severe weather or other natural disasters could result in significant business interruptions that impact KCS's railroad operations and expenditures, and KCS's insurance coverage may not be sufficient to cover damages to KCS or all of KCS's liabilities.

The Company's railroad operations may be affected by severe weather or other natural disasters. The Company operates in and along the Gulf of Mexico, and its facilities, equipment, and railroad infrastructure may be materially adversely affected by hurricanes, floods, fires, earthquakes and other extreme weather conditions in the regions where the Company operates, and this could also adversely affect the Company's shipping, agricultural, chemical and other customers. Severe weather or other natural disasters could result in significant business interruption due to an increase in events such as train derailments or wash outs of track structure that could have a material adverse effect on KCS's consolidated financial statements. Insurance to protect against loss of business and other related consequences resulting from these natural occurrences is subject to coverage limitations and may not be sufficient to cover all of KCS's damages or damages to others. This insurance may not continue to be available at commercially reasonable rates. Even with insurance, if any natural occurrence leads to a catastrophic interruption of services, this could have a material adverse effect on KCS's consolidated financial statements.

KCS's business may be adversely affected by changes in general economic or other conditions.

KCS's operations may be materially adversely affected by changes in the economic conditions of the industries and geographic areas that produce and consume the freight that KCS transports. The relative strength or weakness of the United States and Mexican economies affects the businesses served by KCS. A significant and sustained decrease in crude oil prices could adversely affect the transport of crude oil by rail to the U.S. Gulf region as well as negatively impact railroad volumes related to equipment and other materials that support crude oil production. For example, energy revenues have historically decreased when oil prices decline due to lower frac sand and crude oil volumes. Prolonged negative changes in domestic and global economic conditions may affect KCS, as well as the producers and consumers of the commodities that KCS transports and may have a material adverse effect on KCS's consolidated financial statements.

The transportation industry is highly cyclical, generally tracking the cycles of the world economy. Although transportation markets are affected by general economic conditions, there are numerous specific factors within each particular market that may influence operating results. Some of KCS's customers do business in industries that are highly cyclical, including the energy, automotive, housing and agriculture industries. Any downturn or change in government policy in these industries could have a material adverse effect on operating results. Also, some of the products transported have had a historical pattern of price cyclicality which has typically been influenced by the general economic environment and by industry capacity and demand. KCS cannot assure that prices and demand for these products will not decline in the future, adversely affecting those industries and, in turn, this could have a material adverse effect on the Company's consolidated financial statements.

KCS may be subject to various claims and litigation that could have a material adverse effect on KCS's consolidated financial statements.

The Company is exposed to the potential of various claims and litigation related to labor and employment, personal injury, commercial disputes, freight loss and other property damage, and other matters that arise in the normal course of business. The Company may experience material judgments or incur significant costs to defend existing and future lawsuits. Although the Company maintains insurance to cover some of these types of claims and establishes reserves when appropriate, final amounts determined to be due on any outstanding matters may exceed the Company's insurance coverage or differ materially from the recorded reserves. Additionally, the Company could be impacted by adverse developments not currently reflected in the Company's reserve estimates. The Company is also subject to job-related personal injury and occupational

claims associated with the Federal Employer's Liability Act ("FELA"), which is applicable only to railroads. FELA's fault-based tort system produces results that are unpredictable and inconsistent as compared with a no-fault worker's compensation system. The variability inherent in this system could result in actual costs being different from the liability recorded. Any material changes to litigation trends or a catastrophic rail accident or series of accidents involving any or all of property damage, personal injury, and environmental liability could have a material adverse effect on KCS's consolidated financial statements.

A majority of KCS's employees belong to labor unions. Strikes or work stoppages could adversely affect operations.

The Company is a party to collective bargaining agreements with various labor unions in the United States and Mexico. As of December 31, 2020, approximately 70% and 79% of KCSR and KCSM Servicios employees, respectively, were covered by labor contracts subject to collective bargaining. The Company may be subject to, among other things, strikes, work stoppages or work slowdowns as a result of disputes under these collective bargaining agreements and labor contracts or KCS's potential inability to negotiate acceptable contracts with these unions. In the United States, because such agreements are generally negotiated on an industry-wide basis, determination of the terms and conditions of labor agreements have been and could continue to be beyond KCS's control. KCS is, therefore, subject to terms and conditions in industry-wide labor agreements that could have a material adverse effect on its consolidated financial statements. In the United States and Mexico, KCS is seeking to modernize its collective bargaining agreements and benefit from technological advancements in the industry. If the unionized workers in the United States or Mexico were to engage in a strike, work stoppage or other slowdown; if other employees were to become unionized or if KCS and its unions were unable to agree on the terms and conditions in future labor agreements, KCS could experience a significant disruption of its operations and higher ongoing labor costs. Although the U.S. Railway Labor Act imposes restrictions on the right of United States railway workers to strike, there is no law in Mexico imposing similar restrictions on the right of railway workers in that country to strike. Additionally, labor law reform adopted by Mexico introduces uncertainty into the existing union structure in Mexico, which may affect the risk of disruption in KCSM's operations.

KCS is dependent on certain key suppliers of core rail equipment.

KCS relies on a limited number of suppliers of core rail equipment (including locomotives, rolling stock equipment, rail and ties). The capital intensive nature and complexity of such equipment creates high barriers of entry for any potential new suppliers. If any of KCS's suppliers discontinue production or experience capacity or supply shortages, this could result in increased costs or difficulty in obtaining rail equipment and materials, which could have a material adverse effect on KCS's consolidated financial statements.

KCS's business is vulnerable to fluctuations in fuel costs and disruptions in fuel supplies.

KCS incurs substantial fuel costs in its railroad operations and these costs represent a significant portion of its transportation expenses. Significant price increases for fuel may have a material adverse effect on operating results. If KCS is unable to recapture its costs of fuel from its customers, operating results could be materially adversely affected. In addition, a severe disruption of fuel supplies resulting from supply shortages, political unrest, a disruption of oil imports, weather events, war, or otherwise, and the resulting impact on fuel prices could have a material adverse effect on KCS's consolidated financial statements.

KCS's business may be affected by future acts of terrorism, war or other acts of violence or crime.

Terrorist attacks and any government response thereto, and war or risk of war could have a material adverse effect on KCS's consolidated financial statements. KCS is involved in the transport of hazardous materials, which could result in KCS's rail lines, facilities, or equipment being direct targets or indirect casualties of acts of terror, which could cause significant business interruption and damage to KCS's property. As a result, acts of terrorism or war or acts of crime or violence could result in increased costs and liabilities and decreased revenues for KCS. In addition, insurance premiums charged for some or all of the applicable coverage currently maintained by KCS could increase dramatically or certain coverage may not be adequate to cover losses or may not be available in the future.

Risks Related to Laws and Regulations

KCS U.S. and Mexico rail common carrier subsidiaries are required by United States and Mexican laws, respectively, to transport hazardous materials, which could expose KCS to significant costs and claims.

Under United States federal statutes and applicable Mexican laws, KCS's common carrier responsibility requires it to transport hazardous materials. Any rail accident or other incident or accident on KCS's network, facilities, or at the facilities of KCS's customers involving the release of hazardous materials, including toxic inhalation hazard materials, could involve significant costs and claims for personal injury, property or natural resource damage, and environmental penalties and remediation in excess of the Company's insurance coverage for these risks, which could have a material adverse effect on KCS's consolidated financial statements. KCS is also required to comply with rules and regulations regarding the handling of hazardous materials. Noncompliance with these rules and regulations could subject KCS to significant penalties or other costs and exposure to litigation. Changes to these rules and regulations could also increase operating costs and negatively impact KCS's consolidated financial statements.

KCS's business is subject to regulation by federal, state and local legislatures and agencies that could impose significant costs on the Company's business operations.

KCS rail subsidiaries are subject to legislation and regulation enacted by federal, state and local legislatures and agencies in the U.S. and Mexico with respect to commercial terms with its customers and railroad operations, including with respect to health, safety, labor, environmental and other areas. Government regulation of the railroad industry is a significant determinant of the competitiveness and profitability of railroads. Changes in legislation or regulation could have a negative impact on KCS's ability to negotiate prices for rail services, could negatively affect competition among rail carriers, or could negatively impact operating practices, resulting in reduced efficiency, increased operating costs or increased capital investment, all of which could result in a material adverse effect on KCS's consolidated financial statements.

New economic regulation in the U.S. or Mexico in current or future proceedings could change the regulatory framework within which the Company operates which could materially change the Company's business and have a material adverse effect on the Company's consolidated financial statements.

KCS's failure or inability to comply with applicable laws and regulations could have a material adverse effect on the Company's consolidated financial statements and operations, including fines, penalties, or limitations on operating activities until compliance with applicable requirements is achieved. Congress and government agencies may change the legislative or regulatory framework within which the Company operates without providing any recourse for any adverse effects on the Company's business that occur as a result of such change. Additionally, some of the regulations require KCS to obtain and maintain various licenses, permits and other authorizations. Any failure to obtain or maintain these licenses, permits, and other authorizations could have a material adverse effect on KCS's business operations.

KCS is subject to environmental regulations, which may impose significant costs on the Company's business operations.

KCS subsidiaries' operations are subject to environmental regulation enacted by federal, state and local legislatures in the U.S. and Mexico. Environmental liability under federal and state law in the United States can also extend to previously owned or operated properties, leased properties and properties owned by third parties, as well as to properties currently owned and used by the Company. Environmental liabilities may also arise from claims asserted by adjacent landowners or other third parties. Given the nature of its business, the Company incurs, and expects to continue to incur, environmental compliance costs, including, in particular, costs necessary to maintain compliance with requirements governing chemical and hazardous material shipping operations, refueling operations and repair facilities. KCS presently has environmental investigation and remediation obligations at certain sites, and will likely incur such obligations at additional sites in the future.

The Company's Mexican subsidiaries' operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment, including standards for, among other things, water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. Under applicable Mexican law and regulations, administrative and criminal proceedings may be brought and economic sanctions imposed against companies that violate environmental laws, and non-complying facilities may be temporarily or permanently closed. KCSM is also subject to the laws of various jurisdictions with respect to the discharge of materials into the environment and to environmental laws and regulations issued by the governments of each of the Mexican states in which KCSM's facilities are located. The terms of KCSM's Concession from the Mexican government also impose environmental compliance obligations on KCSM. Failure to

comply with any environmental laws or regulations may result in the termination of KCSM's Concession or in fines or penalties that may affect profitability.

Liabilities accrued for environmental costs represent the Company's best estimate of the probable future obligation for the remediation and settlement of matters related to these sites. However, remediation costs may exceed such estimates, due to various factors such as evolving environmental laws and regulations, changes in technology, the extent of other parties' participation, discovery of unidentified environmental conditions and matters, developments in environmental surveys and studies, and the extent of corrective action that may ultimately be required. The Company cannot predict the effect, if any, that unidentified environmental matters or the adoption of unknown additional or more stringent environmental laws and regulations would have on KCS's consolidated financial statements.

KCS's failure or inability to comply with applicable environmental laws and regulations could have a material adverse effect on the Company's consolidated financial statements and operations, including fines, penalties, or limitations on operating activities until compliance with applicable requirements is achieved. Government entities may change the legislative or regulatory framework within which the Company operates that could result in adverse effects on the Company's business that occur as a result of such change. Additionally, some of the regulations require KCS to obtain and maintain various licenses, permits and other authorizations. Any failure to obtain or maintain these licenses, permits, and other authorizations could have a material adverse effect on KCS's business operations.

KCS's business may be affected by climate change and the market and regulatory responses to climate change.

Climate change could have a material adverse effect on KCS's operations and KCS's consolidated financial statements. Restrictions, caps, taxes, or other controls on emissions of greenhouse gases, including diesel exhaust, could significantly impact operations and increase operating costs. Restrictions on emissions could also affect KCS's customers that use commodities that KCS transports to produce energy, use significant amounts of energy in producing or delivering the commodities KCS transports, or manufacture or produce goods that consume significant amounts of energy or burn fossil fuels, including coal-fired power plants, chemical producers, farmers and food producers, and automakers and other manufacturers. Significant cost increases, government regulation, or changes of consumer preferences for goods or services relating to alternative sources of energy or emissions reductions could materially affect the markets for the commodities KCS transports, which in turn could have a material adverse effect on KCS's consolidated financial statements. Government incentives encouraging the use of alternative sources of energy could also affect certain customers and their respective markets for certain commodities KCS transports in an unpredictable manner that could alter traffic patterns, including, for example, the impacts of ethanol incentives on farming and ethanol producers. Moreover, increasing frequency, intensity and duration of extreme weather events such as flooding, storms and fires may result in substantial costs, including costs associated with KCS's response during the event, KCS's recovery from the event and preventive measures. Any of these factors, individually or in conjunction with one or more of the other aforementioned factors, or other unforeseen impacts of climate change could have a material adverse effect on KCS's consolidated financial statements.

Risks Related to KCS's Foreign Operations

KCSM's Mexican Concession is subject to revocation or termination in certain circumstances, which would prevent KCSM from conducting rail operations under the Concession and would have a material adverse effect on the Company's consolidated financial statements.

KCSM operates under the Concession granted by the Mexican government until June 2047, which is renewable for an additional period of up to 50 years, subject to certain conditions. The Concession gives KCSM exclusive rights to provide freight transportation services over its rail lines through 2027 (the first 30 years of the 50-year Concession), subject to certain trackage and haulage rights granted to other concessionaires. The SCT and ARTF, which are principally responsible for regulating railroad services in Mexico, have broad powers to monitor KCSM's compliance with the Concession, and they can require KCSM to supply them with any technical, administrative and financial information they request. Among other obligations, KCSM must comply with the investment commitments established in its business plan, which forms an integral part of the Concession, and must update the plan every three years. The SCT treats KCSM's business plans confidentially. The SCT and ARTF also monitor KCSM's compliance with efficiency and safety standards established in the Concession. The SCT and ARTF review, and may amend, these standards from time to time.

Under the Concession, KCSM has the right to operate its rail lines, but it does not own the land, roadway or associated structures. If the Mexican government legally terminates the Concession, it would own, control, and manage such public domain assets used in the operation of KCSM's rail lines. All other property not covered by the Concession, including all locomotives and railcars otherwise acquired, would remain KCSM's property. In the event of early termination, or total or partial revocation of the Concession, the Mexican government would have the right to cause the Company to lease all service-related assets to it for a term of at least one year, automatically renewable for additional one-year terms for up to five years. The amount of rent would be determined by experts appointed by KCSM and the Mexican government. The Mexican government must exercise this right within four months after early termination or revocation of the Concession. In addition, the Mexican government would also have a right of first refusal with respect to certain transfers by KCSM of railroad equipment within 90 days after revocation of the Concession.

The Mexican government may also temporarily seize control of KCSM's rail lines and its assets in the event of a natural disaster, war, significant public disturbance or imminent danger to the domestic peace or economy. In such a case, the SCT may restrict KCSM's ability to operate under the Concession in such manner as the SCT deems necessary under the circumstances, but only for the duration of any of the foregoing events. Mexican law requires that the Mexican government pay compensation if it effects a statutory appropriation for reasons of the public interest. With respect to a temporary seizure due to any cause other than international war, the Mexican Regulatory Railroad Service Law and regulations provide that the Mexican government will indemnify an affected concessionaire for an amount equal to damages caused and losses suffered. However, these payments may not be sufficient to compensate KCSM for its losses and may not be made timely.

The SCT may revoke the Concession if KCSM is sanctioned for the same cause at least three times within a period of five years for any of the following: unjustly interrupting the operation of its rail lines or for charging rates higher than those it has registered with the ARTF; unlawfully restricting the ability of other Mexican rail operators to use its rail lines; failing to make payments for damages caused during the performance of services; failing to comply with any term or condition of the Mexican Regulatory Railroad Service Law and regulations or the Concession; failing to make the capital investments required under its three-year business plan filed with the SCT; or failing to maintain an obligations compliance bond and insurance coverage as specified in the Mexican Regulatory Railroad Service Law and regulations. In addition, the Concession would terminate automatically if KCSM changes its nationality or assigns or creates any lien on the Concession, or if there is a change in control of KCSM without the SCT's approval. The SCT may also terminate the Concession as a result of KCSM's surrender of its rights under the Concession, or for reasons of public interest or upon KCSM's liquidation or bankruptcy. If the Concession is terminated or revoked by the SCT for any reason, KCSM would receive no compensation and its interest in its rail lines, and all other fixtures covered by the Concession, as well as all improvements made by it, would revert to the Mexican government. Revocation or termination of the Concession could have a material adverse effect on the Company's consolidated financial statements.

KCS's ownership of KCSM and operations in Mexico subject it to Mexican economic and political risks.

The Mexican government has exercised, and continues to exercise, significant influence over the Mexican economy. Accordingly, Mexican governmental actions concerning the economy and state-owned enterprises could have a significant impact on Mexican private sector entities in general and on KCSM's operations in particular. For example, KCSM operations could be impacted with the introduction of new legislation or policies to regulate the railway industry, the energy market, or labor conditions. KCS cannot predict the impact that the political landscape, including multiparty rule, social unrest and civil disobedience, will have on the Mexican economy or KCSM's operations. For example, from time to time, social unrest in Mexico has resulted in service interruptions on KCSM's right of ways due to blockages from teachers' protests. Furthermore, KCS's consolidated financial statements and prospects may be adversely affected by currency fluctuations, inflation, interest rates, regulation, taxation and other political, social and economic developments in or affecting Mexico.

The social and political situation in Mexico could adversely affect the Mexican economy and KCSM's operations, and changes in laws, public policies and government programs could be enacted, each of which could also have a material adverse effect on KCS's consolidated financial statements.

The Mexican economy in the past has suffered balance of payment deficits and shortages in foreign exchange reserves. Although Mexico has imposed foreign exchange controls in the past, there are currently no exchange controls in Mexico. Any restrictive exchange control policy could adversely affect KCS's ability to obtain U.S. dollars or to convert Mexican pesos into dollars for purposes of making payments. This could have a material adverse effect on KCS's consolidated financial statements.

Downturns in the United States economy or in trade between the United States and Asia or Mexico and fluctuations in the peso-dollar exchange rates could have material adverse effects on KCS's consolidated financial statements.

The level and timing of KCS's Mexican business activity is heavily dependent upon the level of United States-Mexican trade and the effects of current or future multinational trade agreements on such trade. The Mexican operations depend on the United States and Mexican markets for the products KCSM transports, the relative position of Mexico and the United States in these markets at any given time, and tariffs or other barriers to trade. Failure to preserve trade provisions conducive to trade, or any other action imposing import duties or border taxes, could negatively impact KCS customers and the volume of rail shipments, and could have a material adverse effect on KCS's consolidated financial statements.

Downturns in the United States or Mexican economies or in trade between the United States and Mexico could have material adverse effects on KCS's consolidated financial statements and the Company's ability to meet debt service obligations. In addition, KCS has invested significant amounts in developing its intermodal operations, including the Port of Lazaro Cardenas, in part to provide Asian importers with an alternative to the west coast ports of the United States, and the level of intermodal traffic depends, to an extent, on the volume of Asian shipments routed through Lazaro Cardenas. Reductions in trading volumes, which may be caused by factors beyond KCS's control, including increased government regulations regarding the safety and quality of Asian-manufactured products, could have a material adverse effect on KCS's consolidated financial statements.

Additionally, fluctuations in the peso-dollar exchange rates could lead to shifts in the types and volumes of Mexican imports and exports. Although a decrease in the level of exports of some of the commodities that KCSM transports to the United States may be offset by a subsequent increase in imports of other commodities KCSM hauls into Mexico and vice versa, any offsetting increase might not occur on a timely basis, if at all. Future developments in United States-Mexican trade beyond the Company's control may result in a reduction of freight volumes or in an unfavorable shift in the mix of products and commodities KCSM carries.

Extreme volatility in the peso-dollar exchange rate may result in disruption of the international foreign exchange markets and may limit the ability to transfer or convert Mexican pesos into U.S. dollars. Although the Mexican government currently does not restrict, and for many years has not restricted, the right or ability of Mexican or foreign persons or entities to convert pesos into U.S. dollars or to transfer foreign currencies out of Mexico, the Mexican government could, as in the past, institute restrictive exchange rate policies that could limit the ability to transfer or convert pesos into U.S. dollars or other currencies for the purpose of making timely payments and meeting contractual commitments. Devaluation or depreciation of the peso against the U.S. dollar may also adversely affect U.S. dollar prices for KCS's securities.

Fluctuations in the peso-dollar exchange rates also have an effect on KCS's consolidated financial statements. A weakening of the peso against the U.S. dollar would cause reported peso-denominated revenues and expenses to decrease, and could increase reported foreign exchange loss due to the Company's net monetary assets that are peso-denominated. Exchange rate variations also affect the calculation of taxes under Mexican income tax law, and a strengthening of the peso against the U.S. dollar could cause an increase in the Company's cash tax obligation and effective income tax rate.

General Risk Factors

The unavailability of qualified personnel could adversely affect KCS's operations.

Changes in demographics, training requirements and the unavailability of qualified personnel could negatively affect KCS's ability to meet demand for rail service. Unforeseen increases in demand for rail services may exacerbate such risks, which could have a negative impact on KCS's operational efficiency and otherwise have a material adverse effect on KCS's consolidated financial statements.

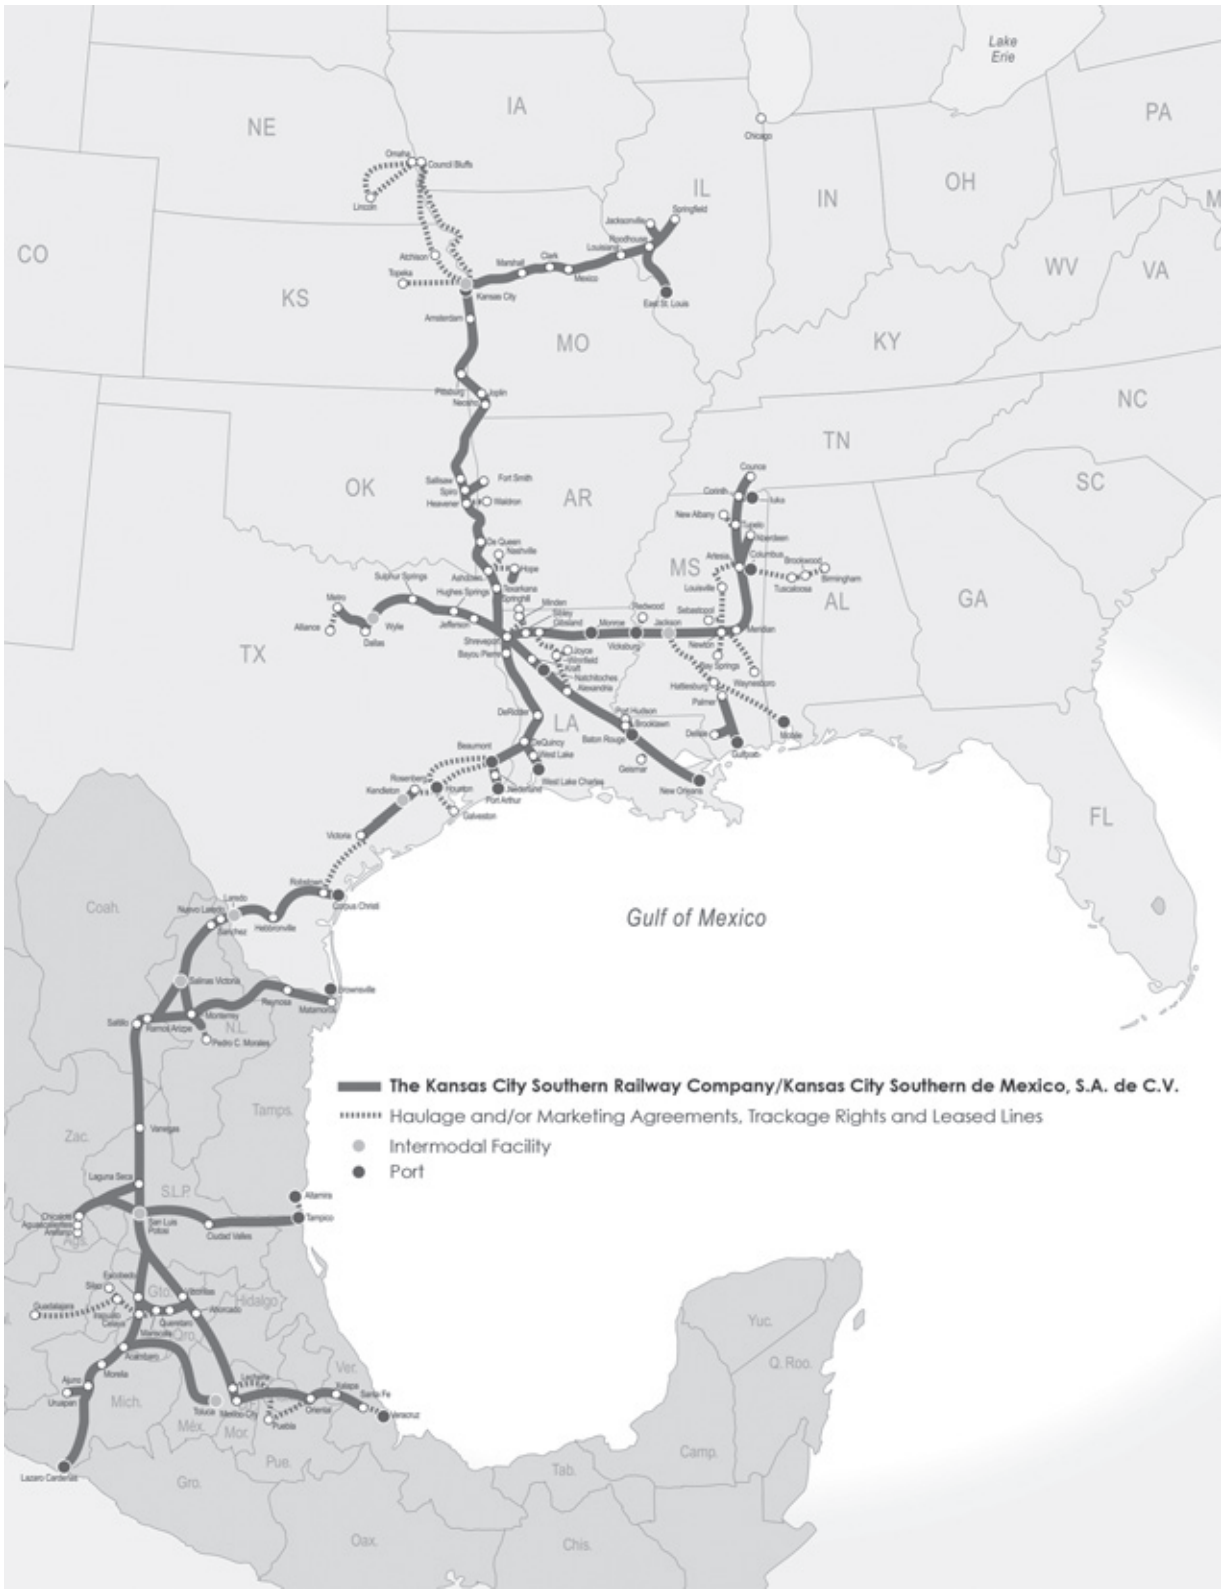
Weaknesses in the short and long-term debt markets could negatively impact the Company's access to capital.

Due to the significant capital expenditures required to operate and maintain a safe and efficient railroad, the Company regularly obtains financing through the issuance of long-term debt instruments and commercial paper from time-to-time, as well as credit facilities provided by financial institutions. Significant, sustained instability or disruptions of the capital markets, including credit markets, or the deterioration of the Company's financial condition due to internal or external factors, could restrict or prohibit access and could increase the cost of financing sources. A significant deterioration of the Company's financial condition could also reduce credit ratings to below investment grade, limiting its access to external sources of capital,

and increasing the costs of short and long-term debt financing, and could have a material adverse effect on KCS's consolidated financial statements.

Item 1B. ***Unresolved Staff Comments***

None.



Item 2. ***Properties***

Track Configuration

The Kansas City Southern Railway Company ("KCSR") operates over a railroad system consisting of approximately 3,300 route miles in ten states from the midwest and southeast portions of the United States south to the Mexican border, which includes approximately 640 miles of trackage rights that permit KCSR to operate its trains with its crews over other railroads' tracks.

Kansas City Southern de México, S.A. de C.V. ("KCSM") operates over a railroad system consisting of approximately 3,800 route miles. This includes approximately 3,300 route miles operated under its concession from the Mexican government (the "Concession"), and approximately 550 miles of trackage rights. Under the concession, KCSM does not own the land, roadway, or associated structures, but is provided the exclusive right to operate across these routes, while also requiring KCSM to make investments as described in a business plan filed every three years with the Mexican government. See Item 1A, Risk Factors — "KCSM's Mexican Concession is subject to revocation or termination in certain circumstances which would prevent KCSM from operating its railroad and would have a material adverse effect on the Company's consolidated financial statements."

Kansas City Southern Rail Network

Equipment Configuration

As of December 31, 2020 and 2019, KCS owned and leased the following units of equipment:

	2020			2019		
	Owned	Leased	Total	Owned	Leased	Total (i)
Freight Cars:						
Box cars	2,093	712	2,805	2,106	716	2,822
Hoppers (covered and open top)	4,883	865	5,748	4,998	1,073	6,071
Gondolas	2,423	1,180	3,603	2,424	1,179	3,603
Automotive	3,310	356	3,666	3,316	535	3,851
Flat cars (intermodal and other)	818	54	872	869	54	923
Tank cars	—	416	416	—	477	477
Total	13,527	3,583	17,110	13,713	4,034	17,747
Locomotives:						
Freight	759	—	759	662	88	750
Switching	198	—	198	199	—	199
Total	957	—	957	861	88	949

(i) KCS has reclassified 1,273 cars from Flat cars (intermodal and other) to Gondolas, which consists of 252 owned and 1,021 leased cars.

Average Age (in Years) of Owned and Leased Locomotives:	2020	2019
Freight	16.5	15.5
Switching	46.9	45.8
All locomotives	22.9	21.9

Property and Facilities

KCS operates numerous facilities, including terminals for intermodal and other freight, rail yards for train-building, switching, storage-in-transit (the temporary storage of customer goods in rail cars prior to shipment) and other activities; offices to administer and manage operations; dispatch centers to direct traffic on the rail network; crew quarters to house train crews along the rail line; and shops and other facilities for fueling and maintenance and repair of locomotives, freight cars and other equipment.

Capital Expenditures

The Company's cash capital expenditures for the two years ended December 31, 2020 and 2019, and planned 2021 capital expenditures are included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Capital Expenditures. See also Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Critical Accounting Policies and Estimates — Capitalization, Depreciation and Amortization of Property and Equipment (including Concession Assets) regarding the Company's policies and guidelines related to capital expenditures.

Item 3. ***Legal Proceedings***

The Company is subject to various legal proceedings and claims that arise in the ordinary course of business. For more information on legal proceedings, see Item 1A, Risk Factors — "KCS may be subject to various claims and litigation that could have a material adverse effect on KCS's consolidated financial statements," Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Other Matters — Litigation, and Item 8, Financial Statements and Supplementary Data — Note 17, Commitments and Contingencies.

Item 4. ***Mine Safety Disclosures***

Not applicable.

Part II

Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Market Information

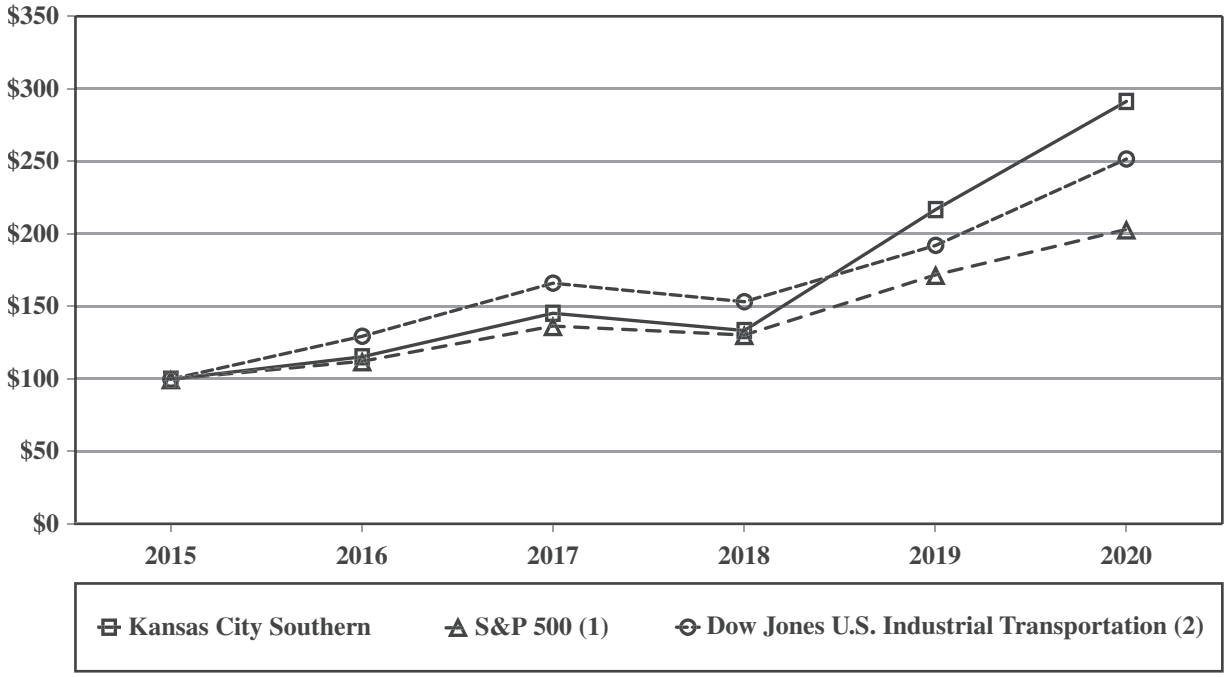
The Company's common stock is traded on the New York Stock Exchange under the ticker symbol "KSU".

Dividend Policy

Common Stock. Any declarations and payments of dividends to holders of the Company's common stock are at the discretion of the Board of Directors, and are based on many factors, including the Company's financial condition, earnings, capital requirements and other factors that the Board of Directors deems relevant. Subject to these qualifications, the Company expects to continue to pay dividends on an ongoing basis.

Holders

There were 2,037 record holders of KCS common stock on January 22, 2021; however, the number of actual holders of KCS common stock is greater due to the practice of brokerage firms registering many shares for clients in the brokerage firm's name.



Securities Authorized for Issuance Under Equity Compensation Plans

See Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters for information about securities authorized for issuance under KCS's equity compensation plans.

Performance Graph

The following graph shows the changes in value over the five years ended December 31, 2020, of an assumed investment of $100 in: (i) KCS's common stock; (ii) the stocks that comprise the Dow Jones U.S. Industrial Transportation Index; and (iii) the stocks that comprise the S&P 500 Index. The table following the graph shows the value of those investments on December 31 for each of the years indicated. The values for the assumed investments depicted on the graph and in the table have been calculated assuming that any cash dividends are reinvested.

COMPARISON OF FIVE YEAR CUMULATIVE TOTAL RETURN
Among Kansas City Southern, the S&P 500 Index
and the Dow Jones U.S. Industrial Transportation Index

	2015	2016	2017	2018	2019	2020
Kansas City Southern	$ 100.00	$ 115.34	$ 145.04	$ 133.34	$ 216.47	$ 291.27
S&P 500 [(1)]	100.00	111.96	136.40	130.42	171.49	203.04
Dow Jones U.S. Industrial Transportation [(2)]	100.00	129.51	166.08	153.07	191.82	251.63

(1) The S&P 500 is a registered trademark of Standard & Poor's, a division of S&P Global, Inc. The S&P 500 Index reflects the weighted average market value for 500 companies whose shares are traded on the New York Stock Exchange, American Stock Exchange and the Nasdaq Stock Market.

(2) The Dow Jones U.S. Industrial Transportation Index is a registered trademark of S&P Dow Jones Indices LLC, a division of S&P Global, Inc.

Purchases of Equity Securities

On November 10, 2020, the Company announced that the Board of Directors approved a new common share repurchase program, pursuant to which up to $3.0 billion in shares of common stock could be repurchased through December 31, 2023 (the "2020 Program"). The 2020 Program replaced KCS's $2.0 billion common share repurchase program announced on November 12, 2019 (the "2019 Program"), and eliminated the $588.3 million of remaining authorization under the 2019 Program.

During 2020, the Company entered into two accelerated share repurchase ("ASR") agreements under the 2019 Program, and paid $500.0 million. The agreements were settled during January 2021. During 2020, KCS repurchased 143,343 shares of common stock for $27.0 million under the 2020 Program, and 5,207,633 shares of common stock for $869.2 million under the 2019 Program. Refer to Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional detail on the Company's common share repurchase program and ASR agreements.

During 2020, KCS repurchased 7,426 shares of $25 par preferred stock for $0.2 million at an average price of $29.58 per share. See Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional information.

The following table presents stock repurchases during each month for the fourth quarter of 2020:

Period	(a) Total Number of Shares (or Units) Purchased [1]	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that may yet be purchased under the Plans or Programs
Common stock				
October 1-31, 2020 [2]	2,554,424	$ 179.30	2,554,424	$ 588,271,423
November 1-30, 2020	143,343	$ 188.24	143,343	$ 2,973,017,537
December 1-31, 2020	—	—	—	$ 2,973,017,537
Total	2,697,767		2,697,767	
$25 Par preferred stock				
October 1-31, 2020	—	—	—	—
November 1-30, 2020	2,970	$ 30.72	—	—
December 1-31, 2020	—	—	—	—
Total	2,970		—	

(1) All $25 par preferred stock repurchases were made other than through a publicly disclosed plan or program. Repurchases of $25 par preferred stock were made through open market purchases and/or privately negotiated transactions.

(2) On October 20, 2020, the Company paid $500.0 million under two ASR agreements and received an aggregate initial delivery of 2,374,168 shares. In January 2021, the ASR agreements were settled with the Company receiving 233,402 additional shares and a value of $75.0 million, which is not included in the number of shares or the average price paid per share in the table above. The average price paid per share upon completion of the ASR agreements was $191.75. See Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional information.

Item 6. ***Selected Financial Data***

The selected financial data below *(in millions, except per share amounts)* should be read in conjunction with Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations as well as the consolidated financial statements and the related notes.

	2020	2019	2018	2017	2016
Earnings From Continuing Operations					
Revenues	$ 2,632.6	$ 2,866.0	$ 2,714.0	$ 2,582.9	$ 2,334.2
Operating expenses (i) (ii) (iii) (iv)	1,629.6	1,979.7	1,727.7	1,661.3	1,515.7
Operating income	$ 1,003.0	$ 886.3	$ 986.3	$ 921.6	$ 818.5
Net income (v) (vi) (vii) (viii)	$ 619.1	$ 540.8	$ 629.4	$ 963.9	$ 479.9
Earnings per common share:					
Basic	$ 6.57	$ 5.42	$ 6.16	$ 9.18	$ 4.44
Diluted	6.54	5.40	6.13	9.16	4.43
Financial Position					
Total assets (ix)	$ 9,964.0	$ 9,786.8	$ 9,469.8	$ 9,198.7	$ 8,817.5
Total long-term debt obligations, including current portion and short-term borrowings	3,770.8	3,246.0	2,689.4	2,619.4	2,478.2
Total stockholders' equity	4,057.2	4,422.5	4,813.0	4,548.9	4,089.9
Total equity	4,383.6	4,745.9	5,132.7	4,865.4	4,404.5
Other Data Per Common Share					
Cash dividends declared per common share	$ 1.64	$ 1.48	$ 1.44	$ 1.38	$ 1.32

(i) During 2020, the Company recognized pre-tax expense of $13.6 million within operating expenses related to the write-off of software development costs.

(ii) During 2020 and 2019, the Company recognized pre-tax restructuring charges of $17.0 million and $168.8 million, respectively, within operating expenses related to the implementation of Precision Scheduled Railroading ("PSR") initiatives as well as the voluntary separation program.

(iii) During 2018, the Company recognized a pre-tax gain of $17.9 million within operating expenses for insurance recoveries related to damage from Hurricane Harvey in 2017.

(iv) During 2018, 2017 and 2016, the Company recognized a pre-tax benefit of $37.7 million, $44.1 million and $62.8 million, respectively, within operating expenses related to a credit that was available for the excise tax included in the price of fuel that was purchased and consumed in locomotives and certain work equipment in Mexico. Effective January 1, 2019, the Company began recognizing the benefit as a reduction of income tax expense due to changes in Mexican tax law; and beginning April 30, 2019, railroads in Mexico are no longer eligible for the tax credit due to changes in Mexican tax regulations.

(v) During 2020, the Company recognized a $14.5 million tax benefit for the reversal of 2018 and 2019 global intangible low-taxed income ("GILTI") tax expense recognized in prior years' consolidated financial statements, as the result of final regulations issued by the Treasury Department that provide for a high-tax exception to the GILTI tax retroactive to 2018.

(vi) During 2019 and 2018, the Company recognized pre-tax debt retirement costs of $1.1 million and $2.2 million, respectively, related to debt retirement and restructuring activities that occurred during the periods.

(vii) During 2019, the Company recognized a $12.8 million net tax benefit related to the Mexican fuel excise tax credit generated through April 29, 2019, noted in (iv) above.

(viii) During 2017, the Company recognized a provisional $413.0 million net tax benefit, as a result of the Tax Cuts and Jobs Act (the "Tax Reform Act"), which was signed into law December 22, 2017. During 2018, the Company recognized a $20.9 million net tax benefit for adjustments to the provisional tax impacts of the Tax Reform Act recognized in 2017.

(ix) During the first quarter of 2019, the Company adopted ASU No. 2016-02, Leases, also known as Accounting Standard Codification ("ASC") Topic 842. Prior to 2019, the Company accounted for leases under ASC Topic 840, Leases.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations***

The following is a discussion of Kansas City Southern's results of operations, certain changes in its financial position, liquidity, capital structure and business developments for the years ended December 31, 2020 and 2019. This discussion should be read in conjunction with the included consolidated financial statements, the related notes, and other information included in this report.

CAUTIONARY INFORMATION

The discussions set forth in this Annual Report on Form 10-K may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, may be forward-looking statements. In addition, management may make forward-looking statements orally or in other writings, including, but not limited to, in press releases, quarterly earnings calls, executive presentations, in the annual report to stockholders and in other filings with the Securities and Exchange Commission. Readers can usually identify these forward-looking statements by the use of such verbs as "may," "will," "should," "likely," "plans," "projects," "expects," "anticipates," "believes" or similar verbs or conjugations of such verbs. These statements involve a number of risks and uncertainties. Actual results could materially differ from those anticipated by such forward-looking statements. Such differences could be caused by a number of factors or combination of factors including, but not limited to, the factors identified below and those discussed under Item 1A, Risk Factors, of this Form 10-K. Readers are strongly encouraged to consider these factors and the following factors when evaluating any forward-looking statements concerning the Company:

- public health threats or outbreaks of communicable diseases, such as the ongoing COVID-19 pandemic and its impact on KCS's business, suppliers, consumers, customers, employees and supply chains;
- transportation of hazardous materials;
- United States, Mexican and global economic, political and social conditions;
- the adverse impact of any termination or revocation by the Mexican government of Kansas City Southern de México, S.A. de C.V.'s ("KCSM") Concession;
- changes in legislation and regulations or revisions of controlling authority;
- the effects of adverse general economic conditions affecting customer demand and the industries and geographic areas that produce and consume the commodities KCS carries;
- the effect of demand for KCS's services exceeding network capacity or traffic congestion on operating efficiencies and service reliability;
- KCS's reliance on agreements with other railroads and third parties to successfully implement its business strategy, operations and growth and expansion plans, including the strategy to convert customers from using trucking services to rail transportation services;
- the dependence on the stability, availability and security of the information technology systems to operate its business;
- acts of terrorism, war or other acts of violence or crime or risk of such activities;
- uncertainties regarding the litigation KCS faces and any future claims and litigation;
- the outcome of claims and litigation, including those related to environmental contamination, personal injuries and property damage;
- compliance with environmental regulations;
- natural events such as severe weather, fire, floods, hurricanes, earthquakes or other disruptions to the Company's operating systems, structures and equipment or the ability of customers to produce or deliver their products;
- insurance coverage limitations;
- climate change and the market and regulatory responses to climate change;
- the impact of competition, including competition from other rail carriers, trucking companies and maritime shippers in the United States and Mexico;

- the effects of fluctuations in the peso-dollar exchange rate;
- changes in labor costs and labor difficulties, including strikes and work stoppages affecting either operations or customers' abilities to deliver goods for shipment;
- the effects of current and future multinational trade agreements on the level of trade among the United States, Mexico and Canada;
- the level of trade between the United States and Asia or Mexico;
- unavailability of qualified personnel;
- disruption in fuel supplies, changes in fuel prices and the Company's ability to recapture its costs of fuel from customers;
- KCS's reliance on certain key suppliers of core rail equipment; and
- material adverse changes in economic and industry conditions, including the availability of short and long-term financing, both within the United States and Mexico and globally.

Forward-looking statements reflect the information only as of the date on which they are made. The Company does not undertake any obligation to update any forward-looking statements to reflect future events, developments, or other information. If KCS does update one or more forward-looking statements, no inference should be drawn that additional updates will be made regarding that statement or any other forward-looking statements.

CORPORATE OVERVIEW

Kansas City Southern, a Delaware corporation, is a transportation holding company that has railroad investments in the U.S., Mexico and Panama. In the U.S., the Company serves the midwest and southeast regions of the U.S. Its international holdings serve northeastern and central Mexico and the port cities of Lazaro Cardenas, Tampico and Veracruz, and a fifty percent interest in Panama Canal Railway Company provides ocean-to-ocean freight and passenger service along the Panama Canal. KCS's North American rail holdings and strategic alliances are primary components of a railway system, linking the commercial and industrial centers of the U.S., Canada and Mexico. KCS's principal subsidiaries and affiliates include the following:

- The Kansas City Southern Railway Company ("KCSR"), a wholly-owned subsidiary;
- KCSM, a wholly-owned subsidiary;
- Mexrail, Inc. ("Mexrail"), a wholly-owned consolidated subsidiary which, in turn, wholly owns The Texas Mexican Railway Company ("Tex-Mex");
- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned subsidiary;
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate;
- Panama Canal Railway Company ("PCRC"), a fifty percent-owned unconsolidated affiliate;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate; and
- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate.

EXECUTIVE SUMMARY

COVID-19 Update

With the global outbreak of the Coronavirus Disease 2019 ("COVID-19") and the declaration of a pandemic by the World Health Organization on March 11, 2020, the U.S. and Mexico governments have deemed rail transportation as "critical infrastructure" providing essential services during this global emergency. As a provider of critical infrastructure, Kansas City Southern has an obligation to keep employees working and freight moving. KCS remains focused on protecting the health and well-being of its employees and the communities in which it operates while assuring the continuity of its business operations.

KCS created a dedicated crisis team that proactively implemented its business continuity plans to ensure the ongoing availability of its transportation services, while taking a variety of health and safety measures, including separating dispatching

and crew operations, implementing enhanced cleaning and hygiene protocols in its facilities and locomotives, implementing remote work policies, where possible, performing temperature checks and requiring facial coverings. As a result, to date, the Company has not experienced significant COVID-19 related disruptions in its railroad operations.

The Company began to experience the impacts of COVID-19 on customer demand in late March of 2020. Volumes significantly declined in the second quarter of 2020; however, by early June volumes began to rapidly rebound. By the end of the third quarter, weekly volumes were higher than pre-COVID-19 levels and had increased by approximately 60% from the lowest levels in the second quarter of 2020. Volumes remained relatively steady from the third quarter into the fourth quarter of 2020. For the year ended December 31, 2020, revenue decreased by 8% compared to the same period in 2019, primarily due to lower volumes as a result of COVID-19 and service interruptions at Lazaro Cardenas due to KCSM right-of-way blockages resulting from teachers' protests ("Teachers' Protests"), the weakening of the Mexican peso against the U.S dollar, and lower fuel surcharge due to lower fuel prices.

As revenues declined in the second quarter of 2020, the Company responded quickly and implemented a variety of cost-saving measures and accelerated Precision Scheduled Railroading ("PSR") initiatives by further consolidating trains, which increased train length and reduced crew costs. For the year ended December 31, 2020, operating expenses decreased by 18% compared to 2019, due to decreased restructuring charges, lower fuel prices, COVID-19 related volume declines, increased savings from PSR initiatives and the weakening of the Mexican peso against the U.S. dollar. See Strategic Initiatives for further discussion of PSR savings.

In the second quarter of 2020, the Company offered a voluntary separation program ("VSP") to its management employees, which resulted in a restructuring charge of $9.7 million for the year ended December 31, 2020, consisting of severance and benefit costs that will be paid out in either lump-sum payments or incrementally over a six to twelve-month period. Approximately 6% of management employees were irrevocably accepted into the voluntary separation program. Management expects the voluntary separation program reductions to result in annualized savings of approximately $11.0 million.

COVID-19 costs increased total expense for the year ended December 31, 2020 by approximately $10.0 million, primarily due to wages paid to certain high-risk employees who were allowed to stay home pursuant to a Mexican presidential decree, were symptomatic, or in quarantine, as well as expenses related to cleaning and decontamination of locomotives and other workspaces, and costs of protective gear for KCS employees.

KCS believes it has a strong liquidity position to continue business operations and service its debt obligations. As disclosed in the Liquidity and Capital Resources section, the Company has total available liquidity of $788.2 million as of December 31, 2020, consisting of cash on hand and a revolving credit facility, compared to available liquidity at December 31, 2019 of $748.8 million. Furthermore, the Company does not have any debt maturities until 2023. During the year ended December 31, 2020, KCS did not significantly alter the terms of its freight agreements with customers. Cash flows from operations remain strong; however, planned capital expenditures were reduced by $75.0 million, resulting in annual capital expenditures of $410.2 million in 2020. If the Company experienced another significant reduction in revenues, the Company would have additional alternatives to maintain liquidity, including decreases in capital expenditures and cost reductions as well as adjustments to its capital allocation policy. To date, the Company has not reduced or suspended its share repurchase program or dividend payments. See Liquidity and Capital Resources section for additional information.

KCS continues to monitor the rapidly evolving COVID-19 situation and guidance from international and domestic authorities, including federal, state, and local public health authorities and may take additional actions based on their recommendations. In these circumstances, there may be developments outside KCS' control requiring adjustments to operating plans. As such, given the dynamic nature of this situation, KCS cannot reasonably estimate with any degree of certainty the future impact COVID-19 may have on the Company's results of operations, financial position, and liquidity. See Part II, Item 1A - "Risk Factors" - "Public health threats or outbreaks of communicable diseases, including the ongoing COVID-19 pandemic, could have a material adverse effect on the Company's operations and financial results."

Strategic Initiatives

During 2019, KCS began implementing principles of PSR, focusing on operational excellence and driving the following improvements:

- Customer service — improve and sustain consistency and reliability of service and create a more resilient and dependable network;
- Facilitating growth — additional capacity for new opportunities;
- Improving asset utilization — meet growing or changing demand with the same or fewer assets; and,
- Improving the cost profile of the Company — increased profitability driven by volume and revenue growth and improved productivity and asset utilization.

As a result of the PSR initiatives in 2019, management approved four separate restructuring plans that totaled $168.8 million. The PSR plans included asset impairments, workforce reductions, and contract restructuring, which resulted in 2019 operating expense savings of approximately $58.0 million.

The Company established the following key metrics to measure PSR progress and performance:

	Years ended December 31,		Improvement/ (Deterioration)
	2020	2019	
Gross velocity (mph) (i)	15.1	13.5	12%
Terminal dwell (hours) (ii)	22.1	20.8	(6)%
Train length (feet) (iii)	6,671	5,981	12%
Car miles per day (iv)	110.6	110.9	—
Fuel efficiency (gallons per 1,000 GTM's) (v)	1.24	1.31	5%

(i) Gross velocity is the average train speed between origin and destination in miles per hour calculated as the sum of the miles traveled divided by the sum of total transit hours. Transit hours are measured as the difference between a train's origin departure and destination arrival date and times broken down by segment across the train route (includes all time spent including crew changes, terminal dwell, delays, and incidents).

(ii) Terminal dwell is the average amount of time in hours between car arrival to and departure from the yard (excludes cars that move through a terminal on a run-through train, stored, bad ordered, and maintenance-of-way cars). Calculated by dividing the total number of hours cars spent in terminals by the total count of car dwell events.

(iii) Train length is the average length of a train across its reporting stations, including the origin and intermediate stations. Length of a train is the sum of car and locomotive lengths measured in feet.

(iv) Car miles per day is the miles a car travels divided by total transit days. Transit days are measured from opening event to closing event (includes all time spent in terminals and on trains).

(v) Fuel efficiency is calculated by taking locomotive fuel consumed in gallons divided by thousand gross ton miles ("GTM's") net of detours with no associated fuel gallons. GTM's are the movement of one ton of train weight over one mile calculated by multiplying total train weight by distance the train moved. GTM's exclude locomotive gross ton miles.

As revenues declined rapidly in the second quarter of 2020 due to COVID-19, management accelerated PSR initiatives by rightsizing resources to volumes and further reduced costs. Train service plans were quickly adjusted as volumes began to decline and trains were consolidated, resulting in longer, more efficient trains. Record average train length reduced the number of train starts and crew costs, leading to operating efficiencies across the organization and record fuel efficiency. As volumes began to rebound rapidly in June and through the remainder of 2020, the Company remained focused on PSR initiatives and maintained cost reductions from consolidating trains and reducing crew costs. However, during the second half of 2020, the Company experienced four hurricanes and Teachers' Protests that negatively impacted the operating metrics for 2020.

At the beginning of 2020, the Company estimated incremental annual operating savings of approximately $61.0 million. Due to acceleration of PSR initiatives in the second quarter of 2020, the Company realized incremental annual operating savings of approximately $96.0 million. The Company estimates incremental annual savings of approximately $50.0 million in 2021 due to PSR initiatives. The Company remains focused on executing these strategic initiatives, which will deliver improved customer service, facilitate growth, and drive better asset utilization while improving the cost profile of the Company.

2020 Financial Overview

Revenues decreased 8% for the year ended December 31, 2020, as compared to 2019, due to a 6% decrease in carload/unit volumes and a 3% decrease in revenue per carload/unit. Revenues decreased primarily due to lower volumes as a result of COVID-19 and Teachers' Protests, the weakening of the Mexican peso against the U.S dollar, and lower fuel surcharge due to lower fuel prices.

Operating expenses decreased 18% compared to 2019, primarily due to decreased restructuring charges, lower fuel prices, COVID-19 related volume declines, increased savings from PSR initiatives and the weakening of the Mexican peso against the U.S. dollar. Operating expenses as a percentage of revenues ("operating ratio") decreased to 61.9% in 2020 from 69.1% in 2019.

The Company reported 2020 earnings per diluted share of $6.54, compared to 2019 earnings per diluted share of $5.40. The increase in earnings per diluted share was due to higher operating income, reduced income tax expense as a result of lower effective tax rate, and an increase in share repurchases. These increases were partially offset by a foreign exchange loss in 2020, compared to a gain in 2019, and an increase in interest expense due to the issuance of senior notes in the fourth quarter of 2019 and the second quarter of 2020.

RESULTS OF OPERATIONS

Year Ended December 31, 2020, compared with the Year Ended December 31, 2019

The following summarizes KCS's consolidated income statement components *(in millions):*

	2020	2019	Change
Revenues	$ 2,632.6	$ 2,866.0	$ (233.4)
Operating expenses	1,629.6	1,979.7	(350.1)
Operating income	1,003.0	886.3	116.7
Equity in net earnings (losses) of affiliates	(1.4)	1.0	(2.4)
Interest expense	(150.9)	(115.9)	(35.0)
Debt retirement costs	—	(1.1)	1.1
Foreign exchange gain (loss)	(29.6)	17.1	(46.7)
Other income, net	2.1	1.0	1.1
Income before income taxes	823.2	788.4	34.8
Income tax expense	204.1	247.6	(43.5)
Net income	619.1	540.8	78.3
Less: Net income attributable to noncontrolling interest	2.1	1.9	0.2
Net income attributable to Kansas City Southern and subsidiaries	$ 617.0	$ 538.9	$ 78.1

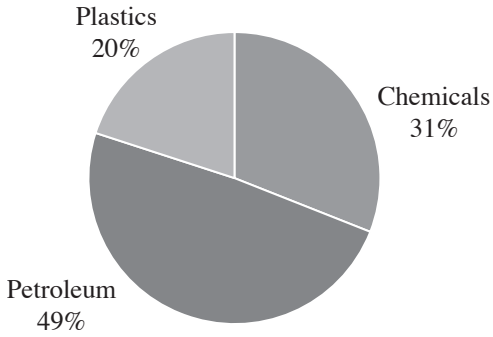
Revenues

The following summarizes revenues *(in millions),* carload/unit statistics *(in thousands)* and revenue per carload/unit:

	Revenues			Carloads and Units			Revenue per Carload/Unit		
	2020	2019	% Change	2020	2019	% Change	2020	2019	% Change
Chemical and petroleum	$ 763.8	$ 737.2	4%	356.7	337.4	6%	$ 2,141	$ 2,185	(2%)
Industrial and consumer products	537.7	610.4	(12%)	300.5	320.9	(6%)	1,789	1,902	(6%)
Agriculture and minerals	505.4	506.3	—	251.0	253.3	(1%)	2,014	1,999	1%
Energy	195.0	246.2	(21%)	210.0	244.7	(14%)	929	1,006	(8%)
Intermodal	319.1	370.2	(14%)	924.5	979.8	(6%)	345	378	(9%)
Automotive	172.7	255.6	(32%)	110.7	154.9	(29%)	1,560	1,650	(5%)
Carload revenues, carloads and units	2,493.7	2,725.9	(9%)	2,153.4	2,291.0	(6%)	$ 1,158	$ 1,190	(3%)
Other revenue	138.9	140.1	(1%)						
Total revenues (i)	$ 2,632.6	$ 2,866.0	(8%)						
(i) Included in revenues:									
Fuel surcharge	$ 208.7	$ 298.1							

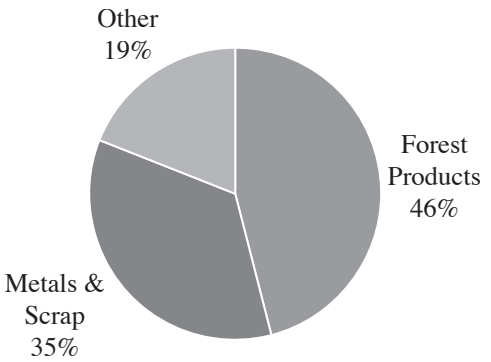
Revenues include revenue for transportation services and fuel surcharges. For the year ended December 31, 2020, revenues and carload/unit volumes decreased 8% and 6%, respectively, compared to 2019. Revenues decreased primarily due to lower volumes as a result of COVID-19 and Teachers' Protests, the weakening of the Mexican peso against the U.S dollar, and lower fuel surcharge due to lower fuel prices.

The volume declines in the intermodal and automotive business units were due to auto plant shutdowns and lower overall automotive production in Mexico as a result of COVID-19. In addition, intermodal volumes decreased as a result of Teachers' Protests. Frac sand and crude oil volumes within the Energy business unit decreased due to the decline in oil prices and industrial and consumer business unit was impacted by lower market demand as a result of COVID-19. These decreases were partially offset by increased volumes in the chemical and petroleum business unit primarily due to refined fuel product shipments to Mexico.



For the year ended December 31, 2020, revenue per carload/unit decreased by 3%, compared to the prior year, due to the weakening of the Mexican peso against the U.S. dollar, shorter average length of haul, and lower fuel surcharge, partially offset by positive pricing impacts and mix. The average exchange rate of Mexican pesos per U.S. dollar was Ps.21.5 for 2020, compared to Ps.19.3 for 2019, which resulted in a decrease to revenues of approximately $43.0 million.

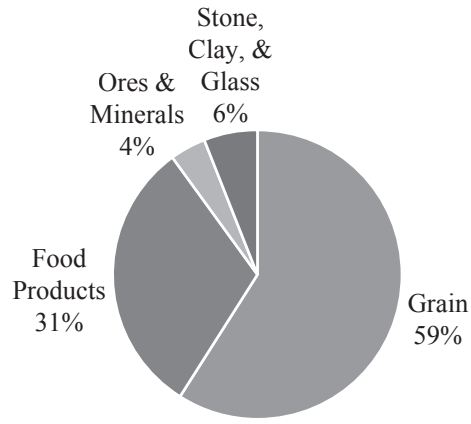
KCS's fuel surcharges are a mechanism to adjust revenue based upon changes in fuel prices above fuel price thresholds set in KCS's tariffs or contracts. Fuel surcharge revenue is calculated using a fuel price from a prior time period that can be up to 60 days earlier. In a period of volatile fuel prices or changing customer business mix, changes in fuel expense and fuel surcharge revenue may differ.



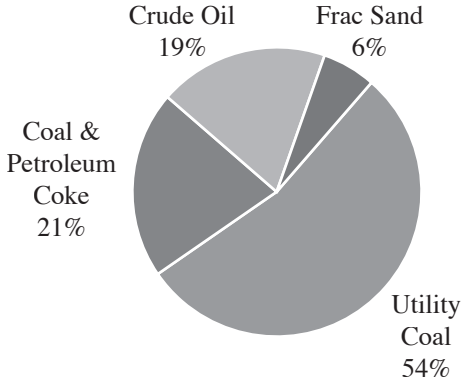
Fuel surcharge revenue decreased $89.4 million for the year ended December 31, 2020, compared to the prior year, primarily due to lower fuel prices and volumes.

The following discussion provides an analysis of revenues by commodity group:

Revenues by commodity group for 2020



Chemical and petroleum. Revenues increased $26.6 million for the year ended December 31, 2020, compared to 2019, due to a 6% increase in carload/unit volumes, partially offset by a 2% decrease in revenue per carload/unit. Volumes increased due to refined fuel product shipments to Mexico. Revenue per carload/unit decreased due to shorter average length of haul, the weakening of the Mexican peso against the U.S. dollar, and lower fuel surcharge, partially offset by mix and positive pricing impacts.



Industrial and consumer products. Revenues decreased $72.7 million for the year ended December 31, 2020, compared to 2019, due to a 6% decrease in both carload/unit volumes and revenue per carload/unit. Volumes decreased primarily due to lower market demand as a result of the ongoing COVID-19 pandemic and weakness in the energy sector. Revenue per carload/unit decreased due to mix, the weakening of the Mexican peso against the U.S. dollar, lower fuel surcharge, and shorter average length of haul, partially offset by positive pricing impacts.

Revenues by commodity group for 2020

Agriculture and minerals. Revenues remained flat for year ended December 31, 2020, compared to 2019, as a 1% decrease in carload/unit volumes was offset by a 1% increase in revenue per carload/unit. Volumes decreased due to a decline in ores and minerals shipments due to lower demand as a result of weather delays impacting road infrastructure projects. Revenue per carload/unit increased due to mix, longer average length of haul, and positive pricing impacts, partially offset by lower fuel surcharge and the weakening of the Mexican peso against the U.S. dollar.

Energy. Revenues decreased $51.2 million for the year ended December 31, 2020, compared to 2019, due to a 14% decrease in carload/unit volumes and a 8% decrease in revenue per carload/unit. Utility coal volumes decreased as a result of low natural gas prices and warm weather. Frac sand and crude oil volumes decreased due to the declines in oil prices. In addition, frac sand volumes decreased as a result of in-basin sand competition. Revenue per carload/unit decreased due to mix, lower fuel surcharge, shorter average length of haul, and the weakening of the Mexican peso against the U.S. dollar, partially offset by positive pricing impacts.

Intermodal. Revenues decreased $51.1 million for the year ended December 31, 2020, compared to 2019, due to an 9% decrease in revenue per carload/unit and a 6% decrease in carload/unit volumes. Revenue per carload/unit decreased due to mix, shorter average length of haul, lower fuel surcharge, and the weakening of the Mexican peso against the U.S. dollar, partially offset by positive pricing impacts. Volumes decreased primarily due to COVID-19, auto plant shutdowns impacting cross-border traffic, and Teachers' Protests.

Automotive. Revenues decreased $82.9 million for the year ended December 31, 2020, compared to 2019, due to a 29% decrease in carload/unit volumes due to auto plant shutdowns and lower overall automotive production in Mexico as a result of COVID-19. In addition, revenue per carload/unit decreased 5% due to the weakening of the Mexican peso against the U.S. dollar, mix, and lower fuel surcharge, partially offset by positive pricing impacts.

Operating Expenses

Operating expenses, as shown below (*in millions*), decreased $350.1 million for the year ended December 31, 2020, compared to 2019, primarily due to decreased restructuring charges, lower fuel prices, COVID-19 related volume declines, increased savings from PSR initiatives and the weakening of the Mexican peso against the U.S. dollar.

The weakening of the Mexican peso against the U.S. dollar resulted in an expense reduction of approximately $36.0 million for expense transactions denominated in Mexican pesos. The average exchange rate of Mexican pesos per U.S. dollar was Ps.21.5 for 2020 compared to Ps.19.3 for 2019.

			Change	
	2020	2019	Dollars	Percent
Compensation and benefits	$ 476.5	$ 529.1	$ (52.6)	(10%)
Purchased services	198.1	219.2	(21.1)	(10%)
Fuel	219.8	340.4	(120.6)	(35%)
Equipment costs	85.8	108.6	(22.8)	(21%)
Depreciation and amortization	357.9	350.7	7.2	2%
Materials and other	260.9	262.9	(2.0)	(1%)
Write-off of software development costs	13.6	—	13.6	100%
Restructuring charges	17.0	168.8	(151.8)	(90%)
Total operating expenses	$ 1,629.6	$ 1,979.7	$ (350.1)	(18%)

Compensation and benefits. Compensation and benefits decreased $52.6 million for the year ended December 31, 2020, compared to 2019, due to a decrease in headcount and work hours of approximately $54.0 million caused by volume declines as a result of COVID-19 and the continued application of PSR initiatives, the weakening of the Mexican peso against the U.S dollar of approximately $14.0 million and a decrease in incentive compensation of approximately $6.0 million, partially offset by wage inflation of approximately $17.0 million and approximately $5.0 million of wages related to COVID-19. Wages related to COVID-19 were paid to employees that were symptomatic, quarantined, or under a stay-at-home order per Mexican presidential decree for COVID-19.

Purchased services. Purchased services expense decreased $21.1 million for the year ended December 31, 2020, compared to 2019, due to decreases in repairs and maintenance and detour expense caused by COVID-19 related volume declines and the continued application of PSR initiatives of approximately $14.0 million, the weakening of the Mexican peso against the U.S. dollar of approximately $5.0 million, and savings from in-sourcing activities in 2019 related to PSR of approximately $2.0 million.

Fuel. Fuel expense decreased $120.6 million for the year ended December 31, 2020, compared to 2019, due to lower diesel fuel prices of approximately $37.0 million and $28.0 million in the U.S. and Mexico, respectively, lower consumption of approximately $17.0 million and $10.0 million in Mexico and the U.S., respectively, caused by volume declines as a result of the ongoing COVID-19 pandemic, increased efficiency of approximately $17.0 million and the weakening of the Mexican peso against the U.S. dollar of approximately $11.0 million. The average price per gallon was $1.90 in 2020, compared to $2.57 in 2019.

Equipment costs. Equipment costs decreased $22.8 million for the year ended December 31, 2020, compared to 2019, due to lower lease expense of approximately $17.0 million primarily due to the termination of locomotive leases during the second quarter of 2019 and the first quarter of 2020, and lower car hire expense of approximately $6.0 million primarily as a result of reduced cycle times due to PSR initiatives.

Depreciation and amortization. Depreciation and amortization expense increased $7.2 million for the year ended December 31, 2020, compared to 2019, due to a larger asset base, partially offset by lower depreciation as a result of PSR initiatives implemented during 2019.

Materials and other. Materials and other expense decreased $2.0 million for the year ended December 31, 2020, compared to 2019, due to lower employee expenses of approximately $13.0 million, the weakening of the Mexican peso against the U.S. dollar of approximately $6.0 million and lower materials and supplies expense of approximately $5.0 million. These decreases were partially offset by an increase in personal injury expense of approximately $10.0 million, a one-time, vendor settlement of approximately $5.0 million during 2019, higher derailments and casualty expense of approximately $4.0 million, and approximately $2.0 million of costs for decontamination services and enhanced facilities cleaning related to COVID-19.

Write-off of software development costs. For the year ended December 31, 2020, the Company recognized $13.6 million of expense related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use.

Restructuring charges. For the year ended December 31, 2020, the Company recognized $17.0 million of restructuring charges primarily related to the VSP of $9.7 million and the purchase of impaired, leased locomotives of $6.0 million. For the year ended December 31, 2019, the Company recognized $168.8 million of restructuring charges related to the implementation of PSR initiatives, which included the impairment of certain locomotives and rail cars, workforce reduction, and contract restructuring activities. Refer to Item 8, Financial Statements and Supplementary Data — Note 3, Restructuring Charges for more information.

Non-Operating Expenses

Equity in net earnings (losses) of affiliates. Equity in net earnings (losses) of affiliates decreased $2.4 million for the year ended December 31, 2020, compared to 2019, due to a decrease in net earnings from the operations of Panama Canal Railway Company as a result of lower container volumes due to a bridge strike in late June 2020 that shut down the railroad for approximately three months. In addition, equity in net earnings from the operations of TCM decreased due to increased tax expense and foreign exchange losses. These decreases were partially offset by an increase in equity in net earnings from the operations of FTVM as a result of losses recognized in 2019 related to the cancellation of Mexico City's new international airport.

Interest expense. Interest expense increased $35.0 million for the year ended December 31, 2020, compared to 2019, due to higher average debt balances. For the year ended December 31, 2020, the average debt balance (including commercial paper) was $3,679.4 million, compared to $2,826.6 million in 2019. The average interest rate for the years ended December 31, 2020 and 2019 was 4.1% for both periods.

Debt retirement costs. The Company did not incur debt retirement costs during 2020. For the year ended December 31, 2019, debt retirement costs were $1.1 million related to the write-off of previously capitalized debt issuance costs associated with the establishment of the new revolving credit facility in the first quarter of 2019 and the call premiums and write-off of unamortized debt issuance costs and original issue discounts associated with the redemption of the KCS and KCSM 2.35% senior notes in the fourth quarter of 2019.

Foreign exchange gain (loss). For the year ended December 31, 2020, foreign exchange loss was $29.6 million, compared to a gain of $17.1 million in 2019. Foreign exchange gain (loss) includes the re-measurement and settlement of net monetary assets denominated in Mexican pesos and the gain (loss) on foreign currency derivative contracts. The significant fluctuation in foreign exchange gain (loss) is a result of weakening of the Mexican peso against the U.S. dollar partially resulting from the increased market volatility driven by the global COVID-19 pandemic.

For the years ended December 31, 2020 and 2019, the re-measurement and settlement of net monetary assets and liabilities denominated in Mexican pesos resulted in a foreign exchange loss of $7.1 million and a gain of $3.0 million, respectively.

The Company enters into foreign currency derivative contracts to hedge its net exposure to fluctuations in the Mexican cash tax obligation due to changes in the value of the Mexican peso against the U.S. dollar. For the year ended December 31, 2020, foreign exchange loss on foreign currency derivative contracts was $22.5 million, compared to a gain of $14.1 million in 2019.

Other income, net. Other income, net, increased $1.1 million for the year ended December 31, 2020, compared to 2019 primarily due to an increase in miscellaneous income.

Income tax expense. Income tax expense decreased $43.5 million for the year ended December 31, 2020, compared to 2019, due to a lower effective tax rate. The decrease in the effective tax rate was primarily due to fluctuations in the foreign exchange rate and the issuance of final global intangible low-taxed income ("GILTI") regulations that provide for a high-tax exception to the GILTI tax retroactive to 2018. See the tax rates reconciliation below.

The Treasury Department issued final regulations in July 2020 that provide for a high-tax exception to the GILTI tax. Specifically, if foreign earnings are subject to a foreign tax rate of at least 90% of the U.S. tax rate, an election can be made to not treat the high-taxed earnings as GILTI income. The final regulations can apply retroactive to tax years beginning after December 31, 2017, and render the GILTI tax immaterial to the consolidated financial statements. The Company recognized a $14.5 million tax benefit in 2020 for the reversal of 2018 and 2019 GILTI tax expense recognized in prior years' consolidated financial statements.

The fluctuations of the Mexican peso during 2020 decreased the Company's Mexican cash tax obligation by $13.0 million for the year ended December 31, 2020. The fluctuations of the Mexican peso during 2019 increased the Company's Mexican cash tax obligation by $8.9 million for the year ended December 31, 2019.

Differences between the Company's effective income tax rate and the U.S. federal statutory income tax rate of 21% for 2020 and 2019 follow *(in millions):*

	2020		2019		Change	
	Dollars	Percent	Dollars	Percent	Dollars	Percent
Income tax expense using the statutory rate in effect	$ 172.9	21.0%	$ 165.6	21.0%	$ 7.3	—
Tax effect of:

State and local income tax provision, net	12.5	1.5%	11.5	1.5%	1.0	—
Withholding tax	9.9	1.2%	9.5	1.2%	0.4	—
Foreign exchange (i)	(3.4)	(0.4%)	35.9	4.6%	(39.3)	(5.0%)
Mexican fuel excise tax credit, net (ii)	—	—	(12.8)	(1.6%)	12.8	1.6%
Other, net	(3.6)	(0.4%)	4.4	0.5%	(8.0)	(0.9%)
Income tax expense	$ 204.1	24.8%	$ 247.6	31.4%	$ (43.5)	(6.6%)

(i) Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. The foreign exchange impact on income taxes includes the gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos which is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate. To hedge its exposure to this cash tax risk, the Company enters into foreign currency derivative contracts, which are measured at fair value each period and any change in fair value is recognized in foreign exchange gain (loss) within the consolidated statements of income. Refer to Note 11, Derivative Instruments for further information.

(ii) Not eligible for Mexican fuel excise tax credit for 2020. See discussion in the Mexico Tax Reform section below.

Mexico Regulatory and Legal Updates

Mexico Tax Reform. In December 2019, the Mexican government enacted changes in the tax law effective January 1, 2020 ("Mexico 2020 Tax Reform"). Mexico 2020 Tax Reform excluded railroads from eligibility for the Mexican fuel excise tax credit. Mexico 2020 Tax Reform also included permanent changes to the Value Added Tax ("VAT") Law, Income Tax Law and Federal Fiscal Code which, among other things, requires certain VAT withholding, limits the deduction of interest expense and certain payments to related parties in preferential tax regimes, adopts a general anti-avoidance rule, requires mandatory disclosure of reportable transactions beginning in 2021, and permanently eliminates universal compensation, which allowed Mexican taxpayers to offset recoverable tax balances against balances due for other federal taxes. As a result of the elimination of universal compensation, the refundable VAT balance increased to $103.1 million as of December 31, 2020. KCSM has a legal opinion supporting its right under Mexican law to recover the refundable VAT balance from the Mexican government and believes the VAT to be fully collectible.

See additional discussion on universal compensation in Liquidity and Capital Resources section below.

Proposed Changes to Law. KCSM currently insources its management and union employees, other than the President and Executive Representative of KCSM, from its affiliate, KCSM Servicios, a wholly-owned and consolidated subsidiary of the Company. On November 12, 2020, the President of Mexico filed an initiative before the Mexican Congress to amend several laws in order to prohibit outsourcing employees to third parties and insourcing employees from related, affiliate services companies. Under the proposed legislation, KCSM Servicios could be prohibited from providing certain outsourced employees to KCSM, resulting in some, if not all KCSM Servicios employees becoming employees of KCSM in order to be in compliance with the legislation. Failure to comply with the new law could result in a loss of tax deductions and VAT credits on third party and related party service payments and penalties. In December 2020, discussions and approval of this legislation were postponed until February 2021. The initiative will have preferential treatment when the Mexican Congress resumes its activities, which requires that action on the proposed legislation must be taken within 30 days. If approved, it is currently expected the changes will be effective immediately upon adoption, however the private sector is lobbying for a longer transition period.

Mexican employees are currently entitled under Mexican law to receive statutory profit sharing (Participacion a los Trabajadores de las Utilidades or "PTU") payments. The required cash payment to employees is equal to 10% of their employer's profit subject to PTU as prescribed by Mexican law, which differs from profit determined under U.S. GAAP.

KCSM Servicios's employees are eligible for PTU and receive PTU payments. KCSM does not have employees eligible for PTU under current law, and this proposed legislation does not change the Mexico PTU requirements. If the proposed legislation were to become law, some or possibly all of KCSM Servicios's employees may need to become employees of KCSM and thus, would be eligible to receive PTU from KCSM. Payment of PTU by KCSM to these employees, as calculated under current law, could have a material adverse effect on the consolidated financial results of the Company. However, the Mexican government may consider, as part of its negotiations with the private sector, limitations on the PTU distribution amount to employees in order to reduce the financial impact. As such, any incremental PTU expense cannot be determined as of the date of this filing due to the uncertainties surrounding this potential legislation.

For a comparison of the Company's results of operations for the fiscal years ended December 31, 2019 to the year ended December 31, 2018, see *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* in the Company's Annual Report on Form 10-K for the year ended December 31, 2019, which was filed with the U.S. Securities and Exchange Commission on January 24, 2020.

LIQUIDITY AND CAPITAL RESOURCES

Overview

On November 10, 2020, the Company announced that its Board of Directors (the "Board") approved updates to its capital allocation policy (the "Policy"). Pursuant to the updated Policy, the Company intends to continue deploying available cash in the following manner:

- Approximately 40-50% to capital projects and strategic investments; and
- Approximately 50-60% to share repurchases and dividends.

In addition, from time to time, the Company also plans to prudently use additional debt to support the revised policy and intends to increase its Debt-to-EBITDA ratio to the mid-2x range, consistent with its current ratings from Standard & Poor's, Fitch and Moody's Ratings.

In connection with this updated Policy, the Board also approved the following actions:

- An increase in the quarterly dividend on KCS's common stock from $0.40 to $0.44 per share. The Board declared a cash dividend on its outstanding common stock for this increased amount payable on January 20, 2021, to stockholders of record at the close of business on December 31, 2020. In April 2021, the Company will implement a quarterly dividend approach that targets a low 20% range payout; and
- A new $3.0 billion share repurchase program (the "2020 Program"), expiring December 31, 2023. This new program replaces the $2.0 billion stock repurchase authorization announced in 2019 (the "2019 Program") under which the Company purchased approximately $1.4 billion of Company stock.

During the fourth quarter of 2020, the Company entered into two accelerated share repurchase ("ASR") agreements under the 2019 Program, and paid $500.0 million. The agreements were settled during January 2021. During 2020, KCS repurchased 143,343 shares of common stock for $27.0 million under the 2020 Program, and 5,207,633 shares of common stock for $869.2 million under the 2019 Program. Refer to Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional detail on the Company's common share repurchase program and ASR agreements.

During 2020, the Company repurchased 7,426 shares of its $25 par preferred stock for $0.2 million at an average price of $29.58 per share.

During 2020, the Company invested $410.2 million in capital expenditures. See Capital Expenditures section for further details.

On April 22, 2020, the Company issued $550.0 million principal amount of senior unsecured notes due May 1, 2050, which bear interest semiannually at a fixed annual rate of 3.50% (the "3.50% Notes"). The net proceeds from the offering were used for general corporate purposes, including the repurchase of shares of the Company's common stock in the fourth quarter of 2020.

During 2020, the Company made remaining principal payments of approximately $12.0 million in repayment of its 9.311% locomotive financing agreements, which matured in December 2020.

At December 31, 2020, the Company had $444.7 million principal amount outstanding of 3.00% senior notes that mature May 15, 2023 (the "3.00% Notes") and $200.0 million principal amount outstanding of 3.85% senior notes that mature November 15, 2023 (the "3.85% Notes). The Company has the intention and ability to refinance the 3.00% Notes and the 3.85% Notes into a new long-term debt instruments prior to maturity. The Company has executed treasury lock agreements with an aggregate notional value of $650.0 million and a weighted-average interest rate of 1.58% to hedge the U.S. Treasury benchmark interest rate associated with any future interest payments related to the anticipated refinancing of the 3.00% Notes and the 3.85% Notes. See Note 11, Derivative Instruments for further discussion of the treasury lock agreements.

The Company's financing instruments contain restrictive covenants that limit or preclude certain actions; however, the covenants are structured such that the Company expects to have sufficient flexibility to conduct its operations. The Company has been, and expects to continue to be, in compliance with all of its debt covenants.

For discussion regarding the agreements representing the indebtedness of KCS, refer to Note 12, Short-Term Borrowings and Note 13, Long-Term Debt of the consolidated financial statements.

During the first three quarters of 2020, the Company's Board of Directors declared quarterly cash dividends of $0.40 per share or $113.6 million on its common stock. During the last quarter of 2020, the Company's Board of Directors declared a cash dividend of $0.44 per share or $40.1 million on its common stock. Subject to the discretion of the Board of Directors, capital availability and a determination that cash dividends continue to be in the best interest of its stockholders, the Company intends to pay a quarterly dividend on an ongoing basis.

On December 31, 2020, total available liquidity (the cash balance plus revolving credit facility availability) was $788.2 million, compared to available liquidity at December 31, 2019 of $748.8 million.

As of December 31, 2020, the total cash and cash equivalents held outside of the U.S. in foreign subsidiaries was $72.8 million, after repatriating $196.3 million during 2020. The Company expects that this cash will be available to fund company operations without incurring significant additional income taxes.

Beginning January 2019, Mexico tax reform for 2019 eliminated universal compensation that allowed Mexican taxpayers the ability to offset other tax obligations with refundable VAT. Mexico 2020 Tax Reform permanently eliminated universal compensation. This negatively impacted KCSM's cash flow by approximately $43.0 million and $60.0 million in 2020 and 2019, respectively, while awaiting refunds of the value added tax from the Mexican government. As of December 31, 2020, the refundable VAT balance was $103.1 million. KCSM has a legal opinion supporting its right under Mexican law to recover the refundable VAT balance from the Mexican government and believes the VAT to be fully collectible.

Cash Flow Information and Contractual Obligations

Summary cash flow data follows *(in millions):*

	2020	2019
Cash flows provided by (used for):		
Operating activities	$ 1,080.0	$ 1,104.0
Investing activities	(526.0)	(676.3)
Financing activities	(510.3)	(378.9)
Effect of exchange rate changes on cash	(4.3)	(0.5)
Net increase in cash and cash equivalents	39.4	48.3
Cash and cash equivalents beginning of year	148.8	100.5
Cash and cash equivalents end of year	$ 188.2	$ 148.8

During 2020, cash and cash equivalents increased $39.4 million as a result of the impacts discussed below.

Operating Cash Flows. Net cash provided by operating activities decreased $24.0 million for 2020, as compared to 2019, primarily due to increased cash paid to settle foreign currency derivative instruments and an increase in advance Mexican income tax payments, partially offset by payments made for settlement of a treasury lock in 2019.

Investing Cash Flows. Net cash used for investing activities decreased $150.3 million for 2020, as compared to 2019, due to a $175.3 million decrease in capital expenditures and a $29.3 million decrease in investments in and advances to affiliates, partially offset by a $39.2 million increase in expenditures for the purchase or replacement of assets under existing operating leases and a $9.2 million decrease in proceeds from disposal of property. Additional information is included within the Capital Expenditure section of Liquidity and Capital Resources.

Financing Cash Flows. Net cash used for financing activities increased $131.4 million for 2020, as compared to 2019, due to a decrease in proceeds from issuance long-term debt of $301.9 million and an increase in shares repurchased, including under ASR agreements, of $96.4 million, partially offset by a decrease in repayment of long-term debt of $267.0 million.

For a comparison of liquidity and capital resources and the Company's cash flow activities for the fiscal year ended December 31, 2019 and 2018, see *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* in the Company's Annual Report on Form 10-K for the year ended December 31, 2019, which was filed with the U.S. Securities and Exchange Commission on January 24, 2020.

Contractual Obligations. The following table outlines the material obligations and commitments as of December 31, 2020 *(in millions):*

	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More than 5 years
Long-term debt and short-term borrowings (including interest and finance lease obligations) (i)	$ 7,188.3	$ 155.1	$ 947.9	$ 262.9	$ 5,822.4
Operating leases	74.5	26.6	31.1	13.7	3.1
Obligations due to uncertainty in income taxes	2.2	0.6	—	1.6	—
Capital expenditure obligations (ii)	401.1	142.7	258.4	—	—
Other contractual obligations (iii)	444.3	93.4	123.5	103.2	124.2
Total	$ 8,110.4	$ 418.4	$1,360.9	$ 381.4	$ 5,949.7

(i) For variable rate obligations, interest payments were calculated using the December 31, 2020 rate. For fixed rate obligations, interest payments were calculated based on the applicable rates and payment dates.

(ii) Capital expenditure obligations include minimum capital expenditures under the KCSM Concession agreement and other regulatory requirements.

(iii) Other contractual obligations include purchase commitments and certain maintenance agreements.

In the normal course of business, the Company enters into long-term contractual commitments for future goods and services needed for the operations of the business. Such commitments are not in excess of expected requirements and are not reasonably likely to result in performance penalties or payments that would have a material adverse effect on the Company's liquidity. Such commitments are not included in the above table.

The SCT requires KCSM to submit a three-year capital expenditures plan every three years. The most recent three-year plan was submitted in 2020 for the years 2021 — 2023. KCSM expects to continue capital spending at current levels in future years and will continue to have capital expenditure obligations past 2023, which are not included in the table above.

Capital Expenditures

KCS has funded, and expects to continue to fund, capital expenditures with operating cash flows and short and long-term debt.

The following table summarizes capital expenditures by type for the years ended December 31, 2020 and 2019, respectively *(in millions):*

	2020	2019
Roadway capital program	$ 239.8	$ 264.9
Locomotives and freight cars	45.2	182.8
Capacity	65.4	84.8
Information technology	40.6	29.8
Positive train control	15.9	15.5
Other	3.3	6.5
Total capital expenditures (accrual basis)	410.2	584.3
Change in capital accruals	1.7	2.9
Total cash capital expenditures	$ 411.9	$ 587.2
Total cash purchase or replacement of assets under operating leases	$ 78.2	$ 39.0

Generally, the Company's capital program consists of capital replacement and equipment. For 2021, internally generated cash flows are expected to fund cash capital expenditures, which are currently estimated to be approximately 17% of revenue in 2021, assuming constant currency and fuel price. In addition, the Company periodically reviews its equipment and property under operating leases. Any additional purchase or replacement of equipment and property under operating leases during 2021 is expected to be funded with internally generated cash flows and/or debt.

Property Statistics

The following table summarizes certain property statistics as of December 31:

	2020	2019
Track miles of rail installed	89	122
Cross ties installed (thousands)	538	627

SUPPLEMENTAL GUARANTOR FINANCIAL INFORMATION

The following is a description of the terms and conditions of the guarantees with respect to senior notes for which KCS is an issuer or provides full and unconditional guarantee.

Note Guarantees

As of December 31, 2020, KCS had outstanding $3,736.2 million principal amount of senior notes due through 2069. The Kansas City Southern Railway Company ("KCSR") had outstanding $2.7 million principal amount of senior notes due through 2045 (together, the "Senior Notes"). The senior notes for which KCS is the issuer are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by each of KCS's current and future domestic consolidated subsidiaries that from time to time guarantees certain of KCS's credit agreements, or any other debt of KCS, or any of KCS's significant subsidiaries that is a guarantor (each, a "Guarantor Subsidiary," and collectively, the "Guarantor Subsidiaries"). In addition, the senior notes for which KCSR is the issuer are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by KCS and each of its current and future domestic consolidated subsidiaries that from time to time guarantees KCSR's credit agreement, or any other debt of KCSR or any of KCSR's significant subsidiaries that is a Guarantor Subsidiary. The obligations of each Guarantor Subsidiary under its note guarantee are limited as necessary to prevent such note guarantee from constituting a fraudulent conveyance under applicable law. A guarantee of the Senior Notes by KCS or a Guarantor Subsidiary is subject to release in the following circumstances: (i) the sale, disposition, exchange or other transfer (including through merger, consolidation, amalgamation or otherwise) of the capital stock of the Guarantor Subsidiary made in a manner not in violation of the indenture; (ii) the designation of the subsidiary as an "Unrestricted Subsidiary" under the indenture; (iii) the legal defeasance or covenant defeasance of the Senior Notes in accordance with the terms of the indenture; or (iv) the Guarantor Subsidiary ceasing to be KCS's subsidiary as a result of any foreclosure of any pledge or security interest securing KCS's Revolving Credit Facility or other exercise of remedies in respect thereof.

KCSM and any other foreign subsidiaries of KCS do not, and will not, guarantee the Senior Notes ("Non-Guarantor Subsidiaries").

The following tables present summarized financial information for KCS and the Guarantor Subsidiaries on a combined basis after intercompany transactions have been eliminated, including adjustments to remove the receivable and payable balances, investment in, and equity in earnings from the Non-Guarantor Subsidiaries.

Summarized Financial Information

Income Statements	**KCS and Guarantor Subsidiaries**	
	Years ended December 31,	
	2020	**2019**
Revenues	$ 1,368.7	$ 1,472.0
Operating expenses	846.9	1,068.5
Operating income	521.8	403.5
Income before income taxes	375.4	291.7
Net income	329.8	235.0

Balance Sheets	**KCS and Guarantor Subsidiaries**	
	December 31, 2020	**December 31, 2019**
Assets:		
Current assets	$ 298.8	$ 332.9
Property and equipment (including concession assets), net	4,751.3	4,596.3
Other non-current assets	110.8	156.9
Liabilities and equity:		
Current liabilities	$ 318.2	$ 313.5
Non-current liabilities	4,841.2	4,267.7
Noncontrolling interest	326.4	323.4

Excluded from current assets in the table above are $183.7 million and $95.2 million of current intercompany receivables due to KCS and the Guarantor Subsidiaries from the Non-Guarantor Subsidiaries as of December 31, 2020 and December 31, 2019, respectively. Excluded from current liabilities in the table above are $235.8 million and $55.0 million of current intercompany payables due to the Non-Guarantor Subsidiaries from KCS and the Guarantor Subsidiaries as of December 31, 2020 and December 31, 2019, respectively.

The Senior Notes are structurally subordinated to the indebtedness and other liabilities of the Non-Guarantor Subsidiaries. The Non-Guarantor Subsidiaries are separate and distinct legal entities and have no obligation, contingent or otherwise, to pay any amounts due pursuant to the Senior Notes or the indentures, or to make any funds available therefor, whether by dividends, loans, distributions or other payments. Any right that KCS or the Guarantor Subsidiaries have to receive any assets of any of the Non-Guarantor Subsidiaries upon the liquidation or reorganization of any Non-Guarantor Subsidiary, and the consequent rights of holders of Senior Notes to realize proceeds from the sale of any of a Non-Guarantor Subsidiary's assets, would be effectively subordinated to the claims of such Non-Guarantor Subsidiary's creditors, including trade creditors and holders of preferred equity interests, if any, of such Non-Guarantor Subsidiary. Accordingly, in the event of a bankruptcy, liquidation or reorganization of any of the Non-Guarantor Subsidiaries, the Non-Guarantor Subsidiaries will pay the holders of their debts, holders of preferred equity interests, if any, and their trade creditors before they will be able to distribute any of their assets to KCS or any Guarantor Subsidiary.

If a Guarantor Subsidiary were to become a debtor in a case under the U.S. Bankruptcy Code or encounter other financial difficulty, under federal or state fraudulent transfer or conveyance law, a court may avoid, subordinate or otherwise decline to enforce its guarantee of the Senior Notes. A court might do so if it is found that when such Guarantor Subsidiary entered into its guarantee of the Senior Notes, or in some states when payments became due under the Senior Notes, such Guarantor Subsidiary received less than reasonably equivalent value or fair consideration and either:

- was insolvent or rendered insolvent by reason of such incurrence;
- was left with unreasonably small or otherwise inadequate capital to conduct its business; or

• believed or reasonably should have believed that it would incur debts beyond its ability to pay.

The court might also avoid the guarantee of the Senior Notes without regard to the above factors, if the court found that a Guarantor Subsidiary entered into its guarantee with actual intent to hinder, delay or defraud its creditors.

A court would likely find that a Guarantor Subsidiary did not receive reasonably equivalent value or fair consideration for its guarantee of the Senior Notes, if such Guarantor Subsidiary did not substantially benefit directly or indirectly from the funding made available by the issuance of the Senior Notes. If a court were to avoid a guarantee of the Senior Notes provided by a Guarantor Subsidiary, holders of the Senior Notes would no longer have any claim against such Guarantor Subsidiary. The measures of insolvency for purposes of these fraudulent transfer or conveyance laws will vary depending upon the law applied in any proceeding to determine whether a fraudulent transfer or conveyance has occurred, such that the Company cannot predict what standards a court would use to determine whether or not a Guarantor Subsidiary was solvent at the relevant time or, regardless of the standard that a court uses, that the guarantee of a Guarantor Subsidiary would not be subordinated to such Guarantor Subsidiary's other debt. As noted above, each guarantee provided by a Guarantor Subsidiary includes a provision intended to limit the Guarantor Subsidiary's liability to the maximum amount that it could incur without causing the incurrence of obligations under its guarantee to be a fraudulent transfer or conveyance. This provision may not be effective to protect those guarantees from being avoided under fraudulent transfer or conveyance law, or it may reduce that Guarantor Subsidiary's obligation to an amount that effectively makes its guarantee worthless, and the Company cannot predict whether a court will ultimately find it to be effective.

On the basis of historical financial information, operating history and other factors, the Company believes that each of the Guarantor Subsidiaries, after giving effect to the issuance of its guarantee of the Senior Notes when such guarantee was issued, was not insolvent, did not have unreasonably small capital for the business in which it engaged and did not and has not incurred debts beyond its ability to pay such debts as they mature. The Company cannot predict, however, as to what standard a court would apply in making these determinations or that a court would agree with the Company's conclusions in this regard.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

KCS's accounting and financial reporting policies are in conformity with U.S. generally accepted accounting principles ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Management believes that the following accounting policies and estimates are critical to an understanding of KCS's historical and future performance. Management has discussed the development and selection of the following critical accounting estimates with the Audit Committee of KCS's Board of Directors and the Audit Committee has reviewed the selection, application and disclosure of the Company's critical accounting policies and estimates.

Capitalization, Depreciation and Amortization of Property and Equipment (including Concession Assets)

Due to the highly capital intensive nature of the railroad industry, capitalization and depreciation of property and equipment are a substantial portion of the Company's consolidated financial statements. Net property and equipment, including concession assets, comprised approximately 90% of the Company's total assets as of December 31, 2020, and related depreciation and amortization comprised approximately 22% of total operating expenses for the year ended December 31, 2020.

KCS capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. The Company has a process in place to determine which costs qualify for capitalization, which requires judgment. Direct costs are charged to capital projects based on the work performed and the material used. Indirect costs are allocated to capital projects as a standard percentage, which is evaluated annually, and applied to direct labor and material costs. Asset removal activities are performed in conjunction with replacement activities; therefore, removal costs are estimated based on a standard percentage of direct labor and indirect costs related to capital replacement projects. For purchased assets, all costs necessary to make the asset ready for its intended use are capitalized. Expenditures that significantly increase asset values, productive capacity, efficiency, safety or extend useful lives are capitalized. Repair and maintenance costs are expensed as incurred.

KCS capitalizes certain costs incurred in connection with developing or obtaining internal-use software. Capitalized software costs are included in "Property and Equipment" on the consolidated balance sheets. Costs incurred during the preliminary project and post-implementation stage, as well as maintenance and training costs, are expensed as incurred.

Property and equipment are carried at cost and are depreciated primarily on the group method of depreciation, which the Company believes closely approximates a straight line basis over the estimated useful lives of the assets measured in years. The group method of depreciation applies a composite rate to classes of similar assets rather than to individual assets. Composite depreciation rates are based upon the Company's estimates of the expected average useful lives of assets as well as expected net salvage value at the end of their useful lives. In developing these estimates, the Company utilizes periodic depreciation studies performed by an independent engineering firm. Depreciation rate studies are performed at least every three years for equipment and at least every six years for road property (rail, ties, ballast, etc.). The depreciation studies take into account factors such as:

- Statistical analysis of historical patterns of use and retirements of each asset class;
- Evaluation of any expected changes in current operations and the outlook for the continued use of the assets;
- Evaluation of technological advances and changes to maintenance practices;
- Historical and expected salvage to be received upon retirement;
- Review of accounting policies and assumptions; and
- Industry precedents and trends.

The depreciation studies may also indicate that the recorded amount of accumulated depreciation is deficient or in excess of the amount indicated by the study. Any such deficiency or excess is amortized as a component of depreciation expense over the remaining useful lives of the affected asset class, as determined by the study. The Company also monitors these factors in non-study years to determine if adjustments should be made to depreciation rates. The Company completed depreciation studies for KCSM in 2020 and KCSR in 2019. The impacts of the studies were immaterial to the consolidated financial results for all periods.

Also under the group method of depreciation, the cost of railroad property and equipment (net of salvage or sales proceeds) retired or replaced in the normal course of business is charged to accumulated depreciation with no gain or loss recognized. Actual historical costs are retired when available, such as with equipment costs. The use of estimates in recognizing the retirement of roadway assets is necessary as it is impractical to track individual, homogeneous network-type assets. Certain types of roadway assets are retired using statistical curves derived from the depreciation studies that indicate the relative distribution of the age of the assets retired. For other roadway assets, historical costs are estimated by deflating current costs using inflation indices and the estimated useful life of the assets as determined by the depreciation studies. The indices applied to the replacement value are selected because they closely correlate with the major costs of the items comprising the roadway assets. Because of the number of estimates inherent in the depreciation and retirement processes and because it is impossible to precisely estimate each of these variables until a group of assets is completely retired, the Company continually monitors the estimated useful lives of its assets and the accumulated depreciation associated with each asset group to ensure the depreciation rates are appropriate.

Estimation of the average useful lives of assets and net salvage values requires management judgment. Estimated average useful lives may vary over time due to changes in physical use, technology, asset strategies and other factors that could have an impact on the retirement experience of the asset classes. Accordingly, changes in the assets' estimated useful lives could significantly impact future periods' depreciation expense. Depreciation and amortization expense for the year ended December 31, 2020 was $357.9 million. If the weighted average useful lives of assets were changed by one year, annual depreciation and amortization expense would change approximately $11.0 million.

Gains or losses on dispositions of land or non-group property and abnormal retirements of railroad property are recognized through income. A retirement of railroad property would be considered abnormal if the retirement meets each of the following conditions: (i) is unusual in nature, (ii) is significant in amount, and (iii) varies significantly from the retirement profile identified through the depreciation studies. KCS recognized $1.3 million and $134.2 million as of December 31, 2020, and 2019, respectively, from asset impairments of certain locomotives and railcars as a result of the implementation of PSR. There were no other significant gains or losses from abnormal retirements of property or equipment for the year ended December 31, 2018. Refer to Note 3, Restructuring Charges of the consolidated financial statements for more information.

Costs incurred by the Company to acquire the Concession rights and related assets, as well as subsequent improvements to the Concession assets, are capitalized and amortized using the group method of depreciation over the lesser of the current expected Concession term, including probable renewal of an additional 50-year term, or the estimated useful lives of the assets and rights. The Company's ongoing evaluation of the useful lives of Concession assets and rights considers the aggregation of the following facts and circumstances:

- The Company's executive management is dedicated to ensuring compliance with the various provisions of the Concession and to maintaining positive relationships with the SCT and other Mexican federal, state, and municipal governmental authorities;
- During the time since the Concession was granted, the relationships between KCSM and the various Mexican governmental authorities have matured and the guidelines for operating under the Concession have become more defined with experience;
- There are no known supportable sanctions or compliance issues that would cause the SCT to revoke the Concession or prevent KCSM from renewing the Concession; and
- KCSM operations are an integral part of the KCS operations strategy, and related investment analyses and operational decisions assume that the Company's cross border rail business operates into perpetuity, and do not assume that Mexico operations terminate at the end of the current Concession term.

Based on the above factors, as of December 31, 2020, the Company continues to believe that it is probable that the Concession will be renewed for an additional 50-year term beyond the current term.

Impairment of long-lived assets

Long-lived assets, including property, plant and equipment, operating lease right-of-use assets and intangible assets with finite lives are reviewed for impairment and written down to fair value when events or circumstances indicate that the carrying amount of a long-lived asset or asset group may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the long-lived assets, the carrying value would be reduced to

the estimated fair value. Future cash flow estimates for an impairment review would be based on the lowest level of identifiable cash flows, which are the Company's U.S. and Mexican operations. During the year ended December 31, 2020, $13.6 million of expense was recognized related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use. Other than the abnormal impairments related to the implementation of Precision Scheduled Railroading ("PSR"), management did not identify any indicators of impairment for the years ended December 31, 2020 and 2019.

Income Taxes

Deferred income taxes represent a net asset or liability of the Company. For financial reporting purposes, management determines the current tax liability, as well as deferred tax assets and liabilities, in accordance with the asset and liability method of accounting for income taxes. The provision for income taxes is the sum of income taxes both currently payable and deferred into the future. Currently payable income taxes represent the liability related to the Company's U.S., state and foreign income tax returns for the current year and anticipated tax payments resulting from income tax audits, while the net deferred tax expense or benefit represents the change in the balance of net deferred tax assets or liabilities as reported on the balance sheet. The changes in deferred tax assets and liabilities are determined based upon the estimated timing of reversal of differences between the carrying amount of assets and liabilities for financial reporting purposes and the basis of assets and liabilities for tax purposes as measured using the currently enacted tax rates that will be in effect at the time these differences are expected to reverse. Additionally, management estimates whether taxable operating income in future periods will be sufficient to fully recognize any deferred tax assets. Valuation allowances are recorded as appropriate to reduce deferred tax assets to the amount considered likely to be realized.

Income tax expense related to Mexican operations has additional complexities such as the impact of exchange rate variations, which can have a significant impact on the effective income tax rate.

Management believes that the assumptions and estimates related to the provision for income taxes are critical to the Company's results of operations. For the year ended December 31, 2020, income tax expense totaled $204.1 million. For every 1% change in the 2020 effective rate, income tax expense would have changed by approximately $8.2 million. For further information on the impact of foreign exchange fluctuation on income taxes, refer to Item 7A, Quantitative and Qualitative Disclosures About Market Risk — Foreign Exchange Sensitivity.

OTHER MATTERS

Litigation. Occasionally, the Company is a party to various legal proceedings, regulatory examinations, investigations, administrative actions, and other legal matters, arising for the most part in the ordinary course of business, incidental to its operations. Included in these proceedings are various tort claims brought by current and former employees for job-related injuries and by third parties for injuries related to railroad operations. KCS aggressively defends these matters and has established liability provisions that management believes are adequate to cover expected costs. The outcome of litigation and other legal matters is always uncertain. KCS believes it has valid defenses to the legal matters currently pending against it, is defending itself vigorously, and has recorded accruals determined in accordance with U.S. GAAP, where appropriate. In making a determination regarding accruals, using available information, KCS evaluates the likelihood of an unfavorable outcome in legal or regulatory proceedings to which it is a party to and records a loss contingency when it is probable a liability has been incurred and the amount of the loss can be reasonably estimated. These subjective determinations are based on the status of such legal or regulatory proceedings, the merits of KCS's defenses and consultation with legal counsel. Actual outcomes of these legal and regulatory proceedings may materially differ from the current estimates. It is possible that resolution of one or more of the legal matters currently pending or threatened could result in losses material to KCS's consolidated results of operations, liquidity or financial condition.

Although it is not possible to predict the outcome of any legal proceeding, in the opinion of the Company's management, other than as described in Note 17, Commitments and Contingencies of the consolidated financial statements, such proceedings and actions should not, individually or in the aggregate, have a material adverse effect on the Company's consolidated financial statements.

Inflation. U.S. GAAP require the use of historical cost, which does not reflect the effects of inflation on the replacement cost of property. Due to the capital intensive nature of KCS's business, the replacement cost of these assets would be significantly higher than the amounts reported under the historical cost basis.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk***

KCS is exposed to certain market risks including interest rate, commodity, and foreign exchange risks and utilizes various financial instruments that have certain inherent market risks. These instruments have been entered into for hedging rather than trading purposes. The following information, together with information included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 8, Financial Statements and Supplementary Data — Note 11, Derivative Instruments, describe the key aspects of certain financial instruments that have market risk to KCS.

The analysis presented below for each of the Company's market risks uses a sensitivity model based on hypothetical changes (increases or decreases) to market risks using defined parameters and assumptions to quantify the potential impacts to the consolidated statements of income. The hypothetical changes to market risks do not represent KCS's view of future market changes. The effect of a change in a particular assumption was calculated without adjusting any other assumptions. These market risks and the potential impacts to the consolidated statements of income for the current year, have not materially fluctuated, individually or in the aggregate from the preceding year; thus only current year information is presented below.

Interest Rate Sensitivity. The Company is subject to interest rate risk associated with its debt. Changes in interest rates impact the fair value of outstanding fixed-rate debt, but there is no impact to current earnings or cash flow. Based upon the borrowing rates available to KCS and its subsidiaries for indebtedness with similar terms and average maturities, the fair value of long-term debt was approximately $4,368.6 million and $3,535.7 million at December 31, 2020 and 2019, respectively, compared with a carrying value of $3,770.8 million and $3,246.0 million at December 31, 2020 and 2019, respectively.

Changes in interest rates may impact the cost of future long-term debt issued by the Company, and as a result, represent interest rate risk to the Company. During 2020, the Company executed six 30-year treasury lock agreements with an aggregate notional value of $650.0 million and a weighted-average interest rate of 1.58%. The purpose of the treasury locks is to hedge the U.S. Treasury benchmark interest rate associated with future interest payments related to the anticipated refinancing of the $444.7 million principal amount of 3.00% senior notes due May 15, 2023 and the $200.0 million principal amount of 3.85% senior notes due November 15, 2023. The Company has designated the treasury locks as cash flow hedges, and for the year ended December 31, 2020, recognized an unrealized gain of $28.1 million, net of tax, in the consolidated statements of comprehensive income. A hypothetical 100 basis points change in the 30-year U.S. Treasury Rate would result in a change in unrealized gain or loss of approximately $147.0 million. Upon settlement in 2023, the unrealized gain or loss in accumulated other comprehensive income will be amortized to interest expense over the life of the future underlying debt issuances.

Alternatively, changes in interest rates do not affect the fair value of variable rate debt, but affect future earnings and cash flows. The Company's floating-rate indebtedness includes commercial paper borrowings, and any outstanding borrowings under revolving credit facilities. At December 31, 2020 and 2019, KCS had no commercial paper or revolving credit facility borrowings outstanding.

Commodity Price Sensitivity. KCS periodically participates in diesel fuel purchase commitments and derivative financial instruments. At December 31, 2020 and 2019, KCS did not have any outstanding fuel derivative financial instruments. The Company also holds fuel inventories for use in operations. These inventories are not material to KCS's overall financial position. Fuel costs are expected to reflect market conditions in 2021; however, fuel costs are unpredictable and subject to a variety of factors outside the Company's control. Assuming annual consumption of 117 million gallons, a hypothetical 10 cent change in the price per gallon of fuel would cause an $11.7 million change in operating expenses. KCS mitigates the impact of increased fuel costs through fuel surcharge revenues from customers; however, in a period of volatile fuel prices or changing customer business mix, changes in fuel expense and fuel surcharge revenue may differ.

Foreign Exchange Sensitivity. KCS's foreign subsidiaries use the U.S. dollar as their functional currency; however, a portion of the foreign subsidiaries' revenues and expenses is denominated in Mexican pesos. Based on the volume of revenue and expense transactions denominated in Mexican pesos, revenue and expense fluctuations have historically offset.

The Company has exposure to fluctuations in the value of the Mexican peso against the U.S. dollar due to its monetary assets and liabilities that are denominated in Mexican pesos. Monetary assets and liabilities include cash, accounts receivable and payable and other items that will convert to cash in the future and are remeasured into dollars using the current exchange rate. The remeasurement and settlement of monetary assets and liabilities is recognized in the consolidated statements of income as foreign exchange gains and losses. At December 31, 2020, the Company had Ps.2,688.8 million of net monetary assets denominated in Mexican pesos, as monetary assets exceeded monetary liabilities.

The following table presents the potential impacts to the consolidated statements of income that would result from a hypothetical change in the exchange rate of one Mexican peso per U.S. dollar at December 31, 2020:

	Hypothetical Change in Exchange Rate	Amount of Gain (Loss)	Affected Line Item in the Consolidated Statements of Income
Net monetary assets denominated in Mexican pesos at December 31, 2020:			
Ps.2,688.8 million	From Ps.19.9 to Ps.20.9	($6.4 million)	Foreign exchange gain (loss)
Ps.2,688.8 million	From Ps.19.9 to Ps.18.9	$7.1 million	Foreign exchange gain (loss)

Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. Most significantly, any gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate.

The following table presents the potential impacts to the effective income tax rate and income tax expense that would result from a hypothetical change in the exchange rate of one Mexican peso at December 31, 2020:

Hypothetical Change in Exchange Rate	Increase (Decrease) in Effective Income Tax Rate	Amount of Expense (Benefit)	Affected Line Item in the Consolidated Statements of Income
From Ps.19.9 to Ps.20.9	(1.3%)	($11.1 million)	Income tax expense (benefit)
From Ps.19.9 to Ps.18.9	1.5%	$12.2 million	Income tax expense (benefit)

The Company has executed derivative instruments to hedge its exposure to fluctuations in the Mexican cash tax obligation due to changes in the value of the Mexican peso against the U.S. dollar. These derivative instruments have historically offset the effects of foreign currency changes on income tax expense (benefit) resulting in minimal impact to net income. There were no outstanding foreign currency forward contracts as of December 31, 2020.

During January 2021, the Company entered into several foreign currency forward contracts with an aggregate notional amount of $100.0 million, maturing in January and February of 2021. These contracts obligated the Company to purchase a total of Ps.1,993.5 million at a weighted-average exchange rate of Ps.19.9 to each U.S. dollar. During January 2021, the Company entered into offsetting contracts with an aggregate notional amount of $58.9 million, which matured during January 2021 and obligated the Company to sell a total of Ps.1,195.3 million at a weighted-average exchange rate of Ps.20.3 to each U.S. dollar, resulting in cash paid of $1.1 million. Given the settlement of these contracts during January 2021, the Company believes there was minimal market risk associated with these contracts at December 31, 2020. As of the date of this filing, there were $40.0 million aggregate notional amount of contracts outstanding, which obligate the Company to purchase a total of Ps.798.2 million at a weighted average exchange rate of Ps.20.0 to each U.S. dollar.

The following table presents the potential impacts to the consolidated statements of income that would result from a hypothetical change in the exchange rate of one Mexican peso at maturity date for the foreign currency forward contracts entered into during January 2021 and outstanding as of the date of this filing:

Aggregate notional amount:	Hypothetical Change in Exchange Rate	Amount of Gain (Loss)	Affected Line Item in the Consolidated Statements of Income
$40.0 million	From Ps.20.0 to Ps.21.0	($1.9 million)	Foreign exchange gain (loss)
$40.0 million	From Ps.20.0 to Ps.19.0	$2.1 million	Foreign exchange gain (loss)

The Company has not designated these foreign currency derivative instruments as hedging instruments for accounting purposes. The foreign currency derivative instruments will be measured at fair value each period and any change in fair value will be recognized in foreign exchange gain (loss) within the consolidated statements of income.

Management's Report on Internal Control over Financial Reporting

The management of Kansas City Southern is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. KCS's internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect material misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, management conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2020, based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control — Integrated Framework (2013)* (commonly referred to as the COSO Framework). Based on its evaluation, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2020, based on the criteria outlined in the COSO Framework.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2020, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which immediately follows this report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Kansas City Southern

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Kansas City Southern and its subsidiaries (the "Company") as of December 31, 2020 and 2019, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2020, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for leases in 2019.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Direct Costs that are Capitalized to Self-Constructed Property and Equipment (including Concession Assets)

As described in Note 2 to the consolidated financial statements, the Company capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. Expenditures that significantly increase asset values, productive capacity, efficiency, safety, or extend useful lives are capitalized. As disclosed by management, direct costs are charged to capital projects based on the work performed and the material used. Management has a process in place to determine which costs qualify for capitalization, which requires judgment. For the year-ended December 31, 2020, the Company capitalized costs of $410.2 million.

The principal considerations for our determination that performing procedures relating to direct costs that are capitalized to self-constructed property and equipment (including concession assets) is a critical audit matter are (i) the significance of direct costs and complexities in self-constructed property and equipment (including concession assets); (ii) the significant judgment by management in determining whether direct costs qualify for capitalization; and (iii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating evidence related to the capitalization of direct costs.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the capitalization of direct costs to self-constructed property and equipment (including concession assets). These procedures also included, among others, selecting a sample of direct costs and (i) obtaining evidence to support the accuracy of capitalized additions to self-constructed properties based on the work performed and the material used and (ii) evaluating whether these costs qualify for capitalization.

Note 1. Description of the Business

Kansas City Southern ("KCS" or the "Company"), a Delaware corporation, is a holding company with principal operations in rail transportation.

The Company is engaged in the freight rail transportation business operating through a single coordinated rail network under one reportable business segment. The Company generates revenues and cash flows by providing its customers with freight delivery services both within its regions, and throughout North America through connections with other Class I rail carriers. KCS's customers conduct business in a number of different industries, including electric-generating utilities, chemical and petroleum products, paper and forest products, agriculture and mineral products, automotive products, and intermodal transportation.

The primary subsidiaries of the Company consist of the following:

- The Kansas City Southern Railway Company ("KCSR"), a wholly-owned consolidated subsidiary. KCSR is a U.S. Class I railroad that services the midwest and southeast regions of the United States;
- Kansas City Southern de México, S.A. de C.V. ("KCSM"), a wholly-owned consolidated subsidiary which operates under the rights granted by the concession acquired from the Mexican government in 1997 (the "Concession") as described below;
- Mexrail, Inc. ("Mexrail"), a wholly-owned consolidated subsidiary; which wholly owns The Texas Mexican Railway Company ("Tex-Mex");
- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned consolidated subsidiary which provides employee services to KCSM; and
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate. MSLLC owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway".

Including equity investments in:

- Panama Canal Railway Company ("PCRC"), a fifty percent-owned unconsolidated affiliate which provides ocean to ocean freight and passenger services along the Panama Canal;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and
- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for positive train control.

The KCSM Concession. KCSM holds a concession (the "Concession") from the Mexican government until June 2047 (exclusive service through 2027, subject to certain trackage and haulage rights granted to other concessionaires), which is renewable under certain conditions for additional periods of up to 50 years under the Concession. The Concession is to provide freight transportation services over north-east rail lines which are a primary commercial corridor of the Mexican railroad system. KCSM has the right to use, but does not own, all track and buildings that are necessary for the rail lines' operation. KCSM is required to pay the Mexican government an annual concession duty equal to 1.25% of gross revenues during the Concession period.

Employees and Labor Relations. KCSR participates in industry-wide multi-employer bargaining as a member of the National Carriers' Conference Committee, as well as local bargaining for agreements that are limited to KCSR's property. Approximately 70% of KCSR employees are covered by collective bargaining agreements.

KCSM Servicios union employees are covered by one labor agreement, which was signed on April 16, 2012, between KCSM Servicios and the Sindicato de Trabajadores Ferrocarrileros de la República Mexicana ("Mexican Railroad Union"), and which remains in effect during the period of the Concession, for the purpose of regulating the relationship between the parties. Approximately 79% of KCSM Servicios employees are covered by this labor agreement.

Union labor negotiations have not historically resulted in any strike, boycott, or other disruption in the Company's business operations.

Note 2. Significant Accounting Policies

Principles of Consolidation. The accompanying consolidated financial statements are presented using the accrual basis of accounting and include the Company and its majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Certain prior year amounts have been reclassified to conform to the current year presentation.

The equity method of accounting is used for all entities in which the Company or its subsidiaries have significant influence, but not a controlling interest. The Company evaluates less-than-majority-owned investments for consolidation pursuant to consolidation and variable interest entity guidance. The Company does not have any less-than-majority-owned investments requiring consolidation.

During the first quarter of 2020, the Company adopted Accounting Standards Update ("ASU") 2016-13, "*Financial Instruments - Credit Losses*," which required the Company to measure all expected credit losses for financial instruments held at the reporting date based on historical experience, current conditions, and reasonable supportable forecasts. This replaced the existing incurred loss model and is applicable to the measurement of credit losses on financial assets, including trade receivables. Adoption of the new standard did not have a material impact on the Company's consolidated financial statements.

During the first quarter of 2020, the Company early adopted the SEC's, *Financial Disclosures About Guarantors and Issuers of Guaranteed Securities and Affiliates Whose Securities Collateralize a Registrant's Securities* rules, which simplify the disclosure requirements related to the Company's registered securities under Rule 3-10 of Regulation S-X. The final rule also allows for the simplified disclosure to be included within Management's Discussion and Analysis of Financial Condition and Results of Operations.

Use of Estimates. The accounting and financial reporting policies of the Company conform to accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant items subject to such estimates and assumptions include those related to the recoverability and useful lives of assets and income taxes. Changes in facts and circumstances may result in revised estimates and actual results could differ from those estimates.

Revenue Recognition. The primary performance obligation for the Company is to move customers' freight from an origin to a destination. A performance obligation is created when a customer under a transportation contract or public tariff submits a bill of lading for the transport of goods. The Company recognizes revenue proportionally as a shipment moves from origin to destination, using the distance shipped to measure progress, as the customer simultaneously receives and consumes the benefit over time. Related expenses are recognized as incurred. Revenue associated with in-transit shipments at period end is recognized based on the distance shipped as of the balance sheet date. Payment is received at the time or shortly after the performance obligation is satisfied.

The transaction price is generally in the form of a fixed fee determined at the inception of the transportation contract or the inception of the bill of lading. Certain customer agreements have variable consideration that are based on milestone achievements in the form of rebates, discounts or incentives. The Company makes judgments to determine whether the variable consideration is probable of occurring and should be included in the estimated transaction price at the beginning of the period to apply a more consistent rate throughout the year based on an analysis of historical experience with the customer, forecasted shipments and other economic indicators. The Company adjusts the estimate on a quarterly basis.

Other revenues, including switching, storage, and demurrage are distinct services and are recognized as services are performed or as contractual obligations are fulfilled. The consideration for other revenue is allocated between the separate services based upon the stand-alone transaction price.

Foreign Exchange Gain (Loss). For financial reporting purposes, foreign subsidiaries maintain records in U.S. dollars, which is the functional currency. The dollar is the currency that reflects the economic substance of the underlying events and circumstances relevant to the entity. Monetary assets and liabilities denominated in Mexican pesos ("pesos" or "Ps.") are remeasured into U.S. dollars ("dollars") using current exchange rates. The difference between the exchange rate on the date of the transaction and the exchange rate on the settlement date, or balance sheet date if not settled, is included in the income statement as foreign exchange gain or loss.

Cash Equivalents. Short-term liquid investments with an initial maturity of three months or less are classified as cash and cash equivalents.

Accounts Receivable, net. Accounts receivable are net of an allowance for uncollectible accounts as determined by historical experience and adjusted for economic uncertainties, known trends, and reasonable supportable forecasts. Accounts are charged to the allowance when a customer enters bankruptcy, when an account has been transferred to a collection agent or submitted for legal action, or when a customer is significantly past due and all available means of collection have been exhausted. At December 31, 2020 and 2019, the allowance for estimated credit losses was $7.8 million and $7.0 million, respectively. For the years ended December 31, 2020, 2019 and 2018, bad debt expense was $1.5 million, $0.4 million and $0.3 million, respectively.

Materials and Supplies. Materials and supplies consisting of diesel fuel, items to be used in the maintenance of rolling stock and items to be used in the maintenance or construction of road property are valued at the lower of average cost or net realizable value.

Derivative Instruments. Derivatives are measured at fair value and recorded on the balance sheet as either assets or liabilities. Changes in the fair value of derivatives are recorded either through current earnings or as other comprehensive income, depending on hedge designation. Gains and losses on derivative instruments classified as cash flow hedges are reported in other comprehensive income and are reclassified into earnings in the periods in which earnings are impacted by the variability of the cash flow of the hedged item.

Property and Equipment (including Concession Assets). KCS capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. For purchased assets, all costs necessary to make the asset ready for its intended use are capitalized. Expenditures that significantly increase asset values, productive capacity, efficiency, safety or extend useful lives are capitalized. Repair and maintenance costs are expensed as incurred. The Company has a process in place to determine which costs qualify for capitalization, which requires judgment.

KCS capitalizes certain costs incurred with developing or obtaining internal-use software. Costs incurred during the preliminary project and post-implementation stage, as well as maintenance and training costs are expensed as incurred.

Property and equipment are carried at cost and are depreciated primarily on the group method of depreciation, which the Company believes closely approximates a straight line basis over the estimated useful lives of the assets measured in years. The group method of depreciation applies a composite rate to classes of similar assets rather than to individual assets. Composite depreciation rates are based upon the Company's estimates of the expected average useful lives of assets as well as expected net salvage value at the end of their useful lives. In developing these estimates, the Company utilizes periodic depreciation studies performed by an independent engineering firm. Depreciation rate studies are performed at least every three years for equipment and at least every six years for road property (rail, ties, ballast, etc.). The Company completed depreciation studies for KCSM in 2020 and KCSR in 2019. The impacts of the studies were immaterial to the consolidated financial results for all periods.

Under the group method of depreciation, the cost of railroad property and equipment (net of salvage or sales proceeds) retired or replaced in the normal course of business is charged to accumulated depreciation with no gain or loss recognized.

Gains or losses on dispositions of land or non-group property and abnormal retirements of railroad property are recognized through income. A retirement of railroad property would be considered abnormal if the cause of the retirement is unusual in nature, is significant in amount, and varies significantly from the retirement profile identified through the depreciation studies.

Costs incurred by the Company to acquire the Concession rights and related assets, as well as subsequent improvements to the Concession assets, are capitalized and amortized using the group method of depreciation over the lesser of the current expected Concession term, including probable renewal of an additional 50-year term, or the estimated useful lives of the assets and rights.

Impairment of Long-Lived Assets. Long-lived assets, including property and equipment, operating lease right-of-use assets and intangible assets with finite lives are reviewed for impairment and written down to fair value when events or circumstances indicate that the carrying amount of a long-lived asset or asset group may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the long-lived assets, the carrying value would be reduced to the estimated fair value. Future cash flow estimates for an impairment review would be based on the lowest level of identifiable cash flows, which are the Company's U.S. and Mexican operations. During the year ended December 31, 2020, $13.6 million of expense was recognized related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use. Other than the abnormal impairments related to the implementation of Precision Scheduled Railroading ("PSR"), management did not identify any indicators of impairment for the years ended December 31, 2020 and 2019.

Leases. During the first quarter of 2019, the Company adopted ASU No. 2016-02, Leases, also known as Accounting Standard Codification ("ASC") Topic 842. Prior to 2019, the Company accounted for leases under ASC Topic 840, Leases and for the year ended December 31, 2018, had $49.3 million of rental expense under operating leases. The Company leases transportation equipment, as well as office and other operating facilities, under various finance and operating leases. Operating lease right-of-use assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As the implicit rate is not readily determinable in most of the Company's lease agreements, the Company uses its estimated secured incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments. Lease expense is recognized on a straight-line basis over the lease term.

The Company determines if an arrangement is a lease or contains a lease at inception. The Company's leases have remaining lease terms of approximately 1 year to 9 years, which may include the option to extend the lease when it is reasonably certain the Company will exercise that option. The Company does not separately identify lease and nonlease components (i.e. maintenance costs) except for fleet vehicles and real estate. The Company does not have lease agreements with residual value guarantees, sale leaseback terms or material restrictive covenants. Additionally, short-term leases and leases with variable lease costs are immaterial, and the Company does not have any sublease arrangements.

Goodwill. Goodwill represents the excess of the purchase price over the fair value of the net identifiable assets acquired in business combinations. As of December 31, 2020 and 2019, the goodwill balance was $13.2 million, which is included in other assets in the consolidated balance sheets. Goodwill is not amortized, but is reviewed at least annually, or more frequently as indicators warrant, for impairment. An impairment loss would be recognized to the extent that the carrying amount exceeds the reporting units' fair values. The Company performed its annual impairment review for goodwill during the fourth quarter of 2020 and 2019, and concluded there was no impairment.

Investments and Impairment. The Company reviews equity method investments for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may not be recoverable in accordance with generally accepted accounting principles. This determination requires significant judgment. In making this judgment, the Company considers available quantitative and qualitative evidence in evaluating potential impairment of these investments. If it is determined that an indicator of impairment exists, the Company assesses whether the carrying value exceeds the fair value of the asset. If the carrying value of the investment exceeds its fair value, the Company will evaluate, among other factors, general market conditions, the duration and extent to which the carrying value is greater than the fair value, and KCS's intent and ability to hold, or plans to sell, the investment. The Company also considers specific adverse conditions related to the financial health of and business outlook for the investee, including industry and sector performance, changes in technology, and operational and financing cash flow factors. Once a decline in fair value is determined to be other-than-temporary, an

impairment charge will be recorded and a new carrying basis in the investment will be established. No impairment charges were recognized during the years ended December 31, 2020 and 2019.

Fair Value of Financial Instruments. Non-financial assets and liabilities are recognized at fair value on a nonrecurring basis. These assets and liabilities are measured at fair value on an ongoing basis but are subject to recognition in the financial statements only in certain circumstances. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company determines the fair values of its financial instruments based on the fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy is broken down into three levels based upon the observability of inputs. Fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value in its entirety requires judgment and considers factors specific to the asset or liability.

Environmental Liabilities. The Company recognizes liabilities for remediation and restoration costs when the Company's obligation is probable and the costs can be reasonably estimated. Costs of future expenditures for environmental remediation and restoration are not discounted to their present value. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable. Costs of ongoing compliance activities related to current operations are expensed as incurred.

Personal Injury Claims. Personal injury claims in excess of self-insurance levels are insured up to certain coverage amounts, depending on the type of claim and year of occurrence. The Company's personal injury liability is based on actuarial studies performed on an undiscounted basis by an independent third party actuarial firm and reviewed by management. The liability is based on claims filed and an estimate of claims incurred but not yet reported. Adjustments to the liability are reflected as operating expenses in the period in which the adjustments are known. Legal fees related to personal injury claims are recognized in operating expense in the period incurred.

Health and Welfare and Postemployment Benefits. The Company provides certain medical, life and other postemployment benefits to certain active employees and retirees. The Company uses actuaries to assist management in measuring the benefit obligation and cost based on the current plan provisions, employee demographics, and assumptions about financial and demographic factors affecting the probability, timing and amount of expected future benefit payments. Significant assumptions include the discount rate, rate of increase in compensation levels, and the health care cost trend rate. Actuarial gains and losses determined at the measurement date (December 31) are recognized immediately in the consolidated statements of income.

Share-Based Compensation. The Company accounts for all share-based compensation in accordance with fair value recognition provisions. Under this method, compensation expense is measured at grant date fair value and is recognized over the requisite service period in which the award is earned. Forfeitures are recognized as they occur. The Company issues treasury stock to settle share-based awards.

Income Taxes. Deferred income tax effects of transactions reported in different periods for financial reporting and income tax return purposes are recognized under the asset and liability method of accounting for income taxes. This method gives consideration to the future tax consequences of the deferred income tax items and immediately recognizes changes in income tax laws in the year of enactment.

The Company has recognized a deferred tax asset, net of a valuation allowance, for net operating loss and tax credit carryovers. The Company projects sufficient future taxable income to realize the deferred tax asset recorded less the valuation

allowance. These projections take into consideration assumptions about future income, future capital expenditures and inflation rates. If assumptions or actual conditions change, the deferred tax asset, net of the valuation allowance, will be adjusted to properly reflect the expected tax benefit.

Treasury Stock. The excess of repurchase price over par value of shares held in treasury is allocated between additional paid-in capital and retained earnings.

Note 3. Restructuring Charges

COVID-19. In March 2020, the World Health Organization categorized Coronavirus Disease 2019 ("COVID-19") as a pandemic, and the President of the United States declared the COVID-19 outbreak a national emergency. The U.S. and Mexico governments have deemed rail transportation as "critical infrastructure" providing essential services during this global emergency. As a provider of critical infrastructure, Kansas City Southern has an obligation to keep employees working and freight moving. KCS remains focused on protecting the health and well-being of its employees and the communities in which it operates while assuring the continuity of its business operations.

On March 27, 2020, the U.S. government enacted the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") which includes modifications to the limitation on business interest expense and net operating loss provisions, and provides a payment delay of employer payroll taxes during 2020 after the date of enactment. Payments of approximately $11.0 million of employer payroll taxes otherwise due in 2020, were delayed with 50% due by December 31, 2021 and the remaining 50% by December 31, 2022. The CARES Act did not have a material impact on the Company's consolidated financial statements.

The Company began to experience the impacts of COVID-19 on customer demand in late March 2020. Volumes significantly declined in the second quarter of 2020; however, by early June volumes began to rapidly rebound. For the year ended December 31, 2020, revenues declined 8%, as compared to the same period in 2019, primarily due to lower volumes as a result of COVID-19 and service interruptions at Lazaro Cardenas due to KCSM right-of-way blockages from teachers' protests, lower fuel surcharge due to lower fuel prices and the weakening of the Mexican peso against the U.S dollar.

As revenues declined in the second quarter of 2020, the Company responded quickly and implemented a variety of cost-saving measures and accelerated PSR initiatives by further consolidating trains, which increased train length and reduced crew costs. In June of 2020, the Company offered a voluntary separation program, which resulted in a restructuring charge of $9.7 million for the year ended December 31, 2020, consisting of severance and benefit costs that will be paid out in either lump-sum payments or incrementally over a six to twelve-month period. Approximately 6% of management employees were irrevocably accepted into the voluntary separation program.

PSR. During 2019, the Company began implementing principles of PSR, which focus on providing reliable customer service, facilitating growth, improving asset utilization, and improving the cost profile of the Company. As a result of the PSR initiatives in 2019, management approved four separate restructuring plans that totaled $168.8 million. The restructuring plans were substantially completed in 2019.

During 2020, the Company recognized approximately $7.3 million in additional restructuring charges related to PSR. During the first quarter of 2020, the Company purchased 91 locomotives for $78.2 million that were part of two existing leases. Of the 91 locomotives, 13 were impaired during the fourth quarter of 2019. The purchase of the impaired lease locomotives resulted in $6.0 million of make-whole payments recognized as incremental restructuring charges in the first quarter of 2020. During the second quarter of 2020, the Company recognized approximately $1.3 million of restructuring charges from the disposal of held for sale equipment.

Expenses related to PSR initiatives and the voluntary separation program are shown in the following table (*in millions*):

	Years ended	
	2020	2019
Restructuring charges:		
Asset impairments	$ 7.3	$ 157.8
Workforce reduction	9.7	7.0
Contract restructuring	—	4.0
Total restructuring charges	$ 17.0	$ 168.8

Asset Impairments. During 2019, the Company committed to plans to dispose of certain locomotives and freight cars to increase operational fluidity, reduce maintenance expense, and improve labor and fuel efficiency. Accordingly, the Company performed an impairment analysis to adjust the carrying amount of each asset to the lower of its depreciated book value or its estimated fair value, less costs to dispose, and stopped recognizing depreciation expense. Additionally, the Company wrote-off parts inventory associated with the locomotive and freight car models that were disposed. During 2020, the purchase of impaired lease locomotives resulted in make-whole payments recognized as incremental restructuring charges.

Workforce Reduction. The Company recognized severance costs associated with the voluntary separation program and PSR initiatives which focused on improving the cost profile of the Company.

Contract Restructuring. The Company terminated certain third-party vendor contracts in order to drive operational efficiencies, which resulted in contract termination penalties.

Note 4. Leases

Leases	Classification	December 31, 2020	December 31, 2019
Assets		*(in millions)*	
Operating	Operating lease right-of-use assets	$ 70.9	$ 158.4
Finance	Property and equipment (including Concession assets), net	5.7	8.7
Total leased assets		$ 76.6	$ 167.1

2025	3.4	—
Thereafter	3.1	—
Total lease payments	74.5	8.7
Less imputed interest	4.5	1.2
Total	$ 70.0	$ 7.5

As of December 31, 2020, the Company did not have any additional operating or financing leases that had not yet commenced.

Note 5. Revenue

Disaggregation of Revenue

The following table presents revenues disaggregated by the major commodity groups as well as the product types included within the major commodity groups *(in millions)*. The Company believes disaggregation by product type best depicts how cash flows are affected by economic factors. See Note 19, Geographic Information in the consolidated financial statements for revenues by geographical area.

Total Revenues	$ 2,632.6	$ 2,866.0	$ 2,714.0

Major customers

No individual customer makes up greater than 10% of total consolidated revenues.

Contract Balances

The amount of revenue recognized in 2020 from performance obligations partially satisfied in the previous year was $17.7 million. The performance obligations that were unsatisfied or partially satisfied as of December 31, 2020, were $28.0 million, which represents in-transit shipments that are fully satisfied the following month.

A receivable is any unconditional right to consideration, and is recognized as shipments have been completed and the relating performance obligation has been fully satisfied. At December 31, 2020 and 2019, the accounts receivable, net balance

was $247.1 million and $274.2 million, respectively. Contract assets represent a conditional right to consideration in exchange for goods or services. The Company did not have any contract assets at December 31, 2020 and 2019.

Contract liabilities represent consideration received in advance from customers, and are recognized as revenue over time as the relating performance obligation is satisfied. The amount of revenue recognized in 2020 that was included in the opening contract liability balance was $30.2 million. The Company has recognized contract liabilities within the accounts payable and accrued liabilities financial statement caption on the balance sheet. These are considered current liabilities as they will be settled in less than 12 months.

The following tables summarize the changes in contract liabilities *(in millions)*:

Contract liabilities	Years ended December 31,	
	2020	**2019**
Beginning balance	$ 30.5	$ 32.4
Revenue recognized that was included in the contract liability balance at the beginning of the period	(30.2)	(32.4)
Increases due to consideration received, excluding amounts recognized as revenue during the period	29.6	30.5
Ending balance	$ 29.9	$ 30.5

Note 6. Hurricane Harvey

In late August 2017, Hurricane Harvey made landfall on the Texas coast and caused flood damage to the Company's track infrastructure and significantly disrupted the Company's rail service. The Company filed a claim in the fourth quarter of 2017 under its insurance program for property damage, incremental expenses, and lost profits caused by Hurricane Harvey. In the third quarter of 2017, the Company recognized a receivable for probable insurance recovery offsetting the impact of incremental expenses recognized in the quarter. During 2018, the Company partially settled its insurance claim for $35.5 million. As a result of the nonrefundable partial settlement, the Company recognized gain on insurance recoveries of $17.9 million, net of the self-insured retention and insurance receivable. The Company received the nonrefundable cash proceeds of $25.5 million from the partial settlement in the fourth quarter of 2018. Final settlement of the insurance claim is dependent upon costs incurred with an ongoing bridge construction project expected to be completed in 2021 and will be immaterial to the consolidated financial statements.

Note 7. Earnings Per Share

Basic earnings per common share is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share adjusts basic earnings per common share for the effects of potentially dilutive common shares, if the effect is not anti-dilutive. Potentially dilutive common shares include the dilutive effects of shares issuable under the 2008 and 2017 Equity Incentive Plans and shares issuable upon the conversion of preferred stock to common stock.

The following table reconciles the basic earnings per share computation to the diluted earnings per share computation *(in millions, except share and per share amounts)*:

	2020	2019	2018
Net income available to common stockholders for purposes of computing basic and diluted earnings per share	$ 616.8	$ 538.7	$ 627.2
Weighted-average number of shares outstanding *(in thousands)*:			
Basic shares	93,826	99,316	101,852
Effect of dilution	489	431	418
Diluted shares	94,315	99,747	102,270
Earnings per share:			
Basic earnings per share	$ 6.57	$ 5.42	$ 6.16
Diluted earnings per share	$ 6.54	$ 5.40	$ 6.13

Potentially dilutive shares excluded from the calculation (*in thousands*):	2020	2019	2018
Stock options excluded as their inclusion would be anti-dilutive	75	121	117

Note 8. Property and Equipment (including Concession Assets)

The following tables list the major categories of property and equipment, including Concession assets, as well as the weighted-average composite depreciation rate for each category (*in millions*):

As of December 31, 2020	Cost	Accumulated Depreciation	Net Book Value	Depreciation Rates for 2020
Land	$ 227.5	$ —	$ 227.5	N/A
Concession land rights	141.1	(30.8)	110.3	1.0 %
Rail and other track material	2,147.5	(389.8)	1,757.7	1.8-3.2%
Ties	1,753.5	(420.2)	1,333.3	1.4-5.0%
Grading	998.5	(190.0)	808.5	1.0 %
Bridges and tunnels	858.5	(171.3)	687.2	1.3 %
Ballast	867.4	(245.3)	622.1	2.2-4.7%
Other (a)	1,549.0	(477.6)	1,071.4	2.7 %
Total road property	8,174.4	(1,894.2)	6,280.2	2.6 %
Locomotives	1,713.6	(478.7)	1,234.9	4.8 %
Freight cars	970.4	(210.6)	759.8	2.2 %
Other equipment	80.6	(36.6)	44.0	4.5 %
Total equipment	2,764.6	(725.9)	2,038.7	3.9 %
Technology and other	372.6	(253.4)	119.2	18.7 %
Construction in progress	221.9	—	221.9	N/A
Total property and equipment (including Concession assets)	$ 11,902.1	$ (2,904.3)	$ 8,997.8	N/A

(a) Other includes signals, buildings and other road assets.

As of December 31, 2019	Cost	Accumulated Depreciation	Net Book Value	Depreciation Rates for 2019
Land	$ 224.9	$ —	$ 224.9	N/A
Concession land rights	141.1	(29.4)	111.7	1.0 %
Rail and other track material	2,122.9	(373.3)	1,749.6	1.8-3.2%
Ties	1,738.4	(405.7)	1,332.7	1.4-5.0%
Grading	991.5	(179.4)	812.1	1.1 %
Bridges and tunnels	823.8	(163.0)	660.8	1.2 %
Ballast	835.6	(236.4)	599.2	2.2-4.7%
Other (a)	1,449.9	(438.5)	1,011.4	3.0 %
Total road property	7,962.1	(1,796.3)	6,165.8	2.8 %
Locomotives	1,593.9	(429.7)	1,164.2	5.2 %
Freight cars	980.8	(196.6)	784.2	2.4 %
Other equipment	77.9	(30.4)	47.5	4.5 %
Total equipment	2,652.6	(656.7)	1,995.9	4.1 %
Technology and other	345.1	(207.3)	137.8	16.3 %
Construction in progress	170.2	—	170.2	N/A
Total property and equipment (including Concession assets)	$ 11,496.0	$ (2,689.7)	$ 8,806.3	N/A

(a) Other includes signals, buildings and other road assets.

Concession assets, net of accumulated amortization of $709.7 million and $678.1 million, totaled $2,383.5 million and $2,335.5 million at December 31, 2020 and 2019, respectively.

Depreciation and amortization of property and equipment (including Concession assets) totaled $357.9 million, $350.7 million and $346.7 million, for 2020, 2019, and 2018, respectively.

In the fourth quarter of 2020, $13.6 million of expense was recognized related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use. The expense was recognized in write-off of software development costs in the consolidated statements of income.

Note 9. Other Balance Sheet Captions

Other Current Assets. Other current assets included the following items at December 31 *(in millions):*

	2020	2019
Refundable Mexican value added tax	$ —	$ 60.2
Prepaid income taxes	15.8	0.3
Advances to affiliates	9.2	47.3
Prepaid expenses	23.3	21.0
Property held for sale	3.6	11.3
Other	11.4	14.9
Other current assets	$ 63.3	$ 155.0

Accounts Payable and Accrued Liabilities. Accounts payable and accrued liabilities included the following items at December 31 *(in millions):*

	2020	2019
Accounts payable	$ 174.6	$ 157.1
Income and other taxes	27.3	34.4
Accrued wages and vacation	82.4	79.0
Short-term operating lease liability	24.6	45.4
Derailments, personal injury and other claim provisions	39.0	38.5
Dividends payable	40.2	38.7
Contract liabilities	29.9	30.5
Interest payable	26.2	23.1
Other	25.8	26.6
Accounts payable and accrued liabilities	$ 470.0	$ 473.3

Note 10. Fair Value Measurements

The Company's assets and liabilities recognized at fair value have been categorized based upon a fair value hierarchy as described in Note 2, Significant Accounting Policies. As of December 31, 2020, the Company's derivative financial instruments are measured at fair value on a recurring basis and consist of foreign currency forward and option contracts and treasury lock agreements, which are classified as Level 2 valuations. The Company determines the fair value of its derivative financial instrument positions based upon pricing models using inputs observed from actively quoted markets and also takes into consideration the contract terms as well as other inputs, including market currency exchange rates and in the case of option contracts, volatility, the risk-free interest rate and the time to expiration.

The Company's short-term financial instruments include cash and cash equivalents, accounts receivable, accounts payable and short-term borrowings. The carrying value of the short-term financial instruments approximates their fair value.

The fair value of the Company's debt is estimated using quoted market prices when available. When quoted market prices are not available, fair value is estimated based on current market interest rates for debt with similar maturities and credit quality. The carrying value of the Company's debt was $3,770.8 million and $3,246.0 million at December 31, 2020 and 2019, respectively. If the Company's debt were measured at fair value, the fair value measurements of the individual debt instruments would have been classified as Level 2 in the fair value hierarchy.

The fair value of the Company's financial instruments is presented in the following table *(in millions)*:

	December 31, 2020	December 31, 2019
	Level 2	Level 2
Assets		
Foreign currency derivative instruments	$ —	$ 2.5
Treasury lock agreements	35.6	—
Liabilities		
Debt instruments	4,368.6	3,535.7

Note 11. Derivative Instruments

The Company enters into derivative transactions in certain situations based on management's assessment of current market conditions and perceived risks. Management intends to respond to evolving business and market conditions and in doing so, may enter into such transactions as deemed appropriate.

Credit Risk. As a result of the use of derivative instruments, the Company is exposed to counterparty credit risk. The Company manages this risk by limiting its counterparties to large financial institutions which meet the Company's credit rating standards and have an established banking relationship with the Company. As of December 31, 2020, the Company did not expect any losses as a result of default of its counterparties.

Interest Rate Derivative Instruments. During 2020, the Company executed six 30-year treasury lock agreements with an aggregate notional value of $650.0 million and a weighted-average interest rate of 1.58%. The purpose of the treasury locks is to hedge the U.S. Treasury benchmark interest rate associated with future interest payments related to the anticipated refinancing of the $444.7 million principal amount of 3.00% senior notes due May 15, 2023 (the "3.00% Senior Notes") and the $200.0 million principal amount of 3.85% senior notes due November 15, 2023 (the "3.85% Senior Notes"). The Company has designated the treasury locks as cash flow hedges and recorded unrealized gains and losses in accumulated other comprehensive income (loss). Upon settlement, the unrealized gain or loss in accumulated other comprehensive income (loss) will be amortized to interest expense over the life of the future underlying debt issuances.

In May 2017, the Company executed four treasury lock agreements with an aggregate notional value of $275.0 million and a weighted-average interest rate of 2.85%. The purpose of the treasury locks was to hedge the U.S. Treasury benchmark interest rate associated with future interest payments related to the anticipated refinancing of the $275.0 million, 2.35% senior notes due May 15, 2020 (the "2.35% Senior Notes"). The Company designated the treasury locks as cash flow hedges and recorded unrealized gains and losses in accumulated other comprehensive income (loss). During the fourth quarter of 2019, KCS issued $425.0 million principal amount of 2.875% senior notes due November 15, 2029 (the "2.875% Senior Notes"), effectively completing the refinancing of the 2.35% Senior Notes, and settled the treasury lock agreements, resulting in cash paid of $25.8 million. This amount was included in accumulated other comprehensive income (loss) and is being amortized to interest expense over the life of the new 2.875% Senior Notes, increasing the effective interest rate on the notes to 3.60%. The settlement and amortization associated with treasury lock agreements are classified as operating activities within the consolidated statements of cash flows.

Foreign Currency Derivative Instruments. The Company's Mexican subsidiaries have net U.S. dollar-denominated monetary liabilities which, for Mexican income tax purposes, are subject to periodic revaluation based on changes in the value of the Mexican peso against the U.S. dollar. This revaluation creates fluctuations in the Company's Mexican income tax expense and the amount of income taxes paid in Mexico. The Company hedges its exposure to this cash tax risk by entering into foreign currency forward contracts and foreign currency option contracts known as zero-cost collars.

The foreign currency forward contracts involve the Company's purchase of Mexican pesos and/or U.S. dollars at an agreed-upon weighted-average exchange rate to each U.S dollar or Mexican Peso. The zero-cost collars involve the Company's purchase of a Mexican peso call option and a simultaneous sale of a Mexican peso put option, with equivalent U.S. dollar notional amounts for each option and no net cash premium paid by the Company.

Below is a summary of the Company's 2020, 2019 and 2018 foreign currency derivative contracts *(amounts in millions, except Ps./USD)*:

Foreign currency forward contracts

	Contracts to sell Ps./receive USD			Offsetting contracts to purchase Ps./pay USD			
	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Cash received/ (paid) on settlement
Contracts executed in 2020 and settled in 2020	$ 75.0	Ps. 1,555.5	Ps. 20.7	$ 78.0	Ps. 1,555.5	Ps. 20.0	$ (2.9)

	Contracts to purchase Ps./pay USD			Offsetting contracts to sell Ps./receive USD			
	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Cash received/ (paid) on settlement
Contracts executed in 2020 and settled in 2020	$ 555.0	Ps. 11,254.3	Ps. 20.3	$ 534.3	Ps. 11,254.3	Ps. 21.1	$ (20.7)
Contracts executed in 2019 and settled in 2020	$ 105.0	Ps. 2,041.2	Ps. 19.4	$ 108.6	Ps. 2,041.2	Ps. 18.8	$ 3.6
Contracts executed in 2019 and settled in 2019	$ 400.0	Ps. 7,892.5	Ps. 19.7	$ 410.7	Ps. 7,892.5	Ps. 19.2	$ 10.7
Contracts executed in 2018 and settled in 2019	$ 20.0	Ps. 410.9	Ps. 20.5	$ 20.9	Ps. 410.9	Ps. 19.6	$ 0.9

Foreign currency zero-cost collar contracts

	Notional amount	Cash received/ (paid) on settlement
Contracts executed in 2018 and settled in 2019	$ 120.0	$ 0.3
Contracts executed in 2018 and settled in 2018	$ 220.0	$ 3.9
Contracts executed in 2017 and settled in 2018	$ 80.0	$ 10.0

The Company has not designated any of the foreign currency derivative contracts as hedging instruments for accounting purposes. The Company measures the foreign currency derivative contracts at fair value each period and recognizes any change in fair value in foreign exchange gain (loss) within the consolidated statements of income. The cash flows associated with these instruments is classified as an operating activity within the consolidated statements of cash flows.

Offsetting. The Company's treasury lock agreements and foreign currency forward and zero-cost collar contracts are executed with counterparties in the U.S. and are governed by an International Swaps and Derivatives Association agreement that includes standard netting arrangements. Asset and liability positions from contracts with the same counterparty are net settled upon maturity/expiration and presented on a net basis in the consolidated balance sheets prior to settlement. There was no offsetting of derivative assets or liabilities in the consolidated balance sheets as of December 31, 2020 and 2019.

The following table presents the fair value of derivative instruments included in the consolidated balance sheets at December 31 *(in millions)*:

		Derivative Assets	
	Balance Sheet Location	2020	2019
Derivatives designated as hedging instruments:			
Treasury lock agreements	Other assets	$ 35.6	$ —
Total derivatives designated as hedging instruments		35.6	—
Derivatives not designated as hedging instruments:			
Foreign currency forward contracts	Other current assets	—	2.5
Total derivatives not designated as hedging instruments		—	2.5
Total derivative assets		$ 35.6	$ 2.5

The following tables present the effects of derivative instruments on the consolidated statements of income and consolidated statements of comprehensive income for the years ended December 31 *(in millions)*:

Derivatives in Cash Flow Hedging Relationships	Amount of Gain/(Loss) Recognized in OCI on Derivative			Location of Gain/(Loss) Reclassified from AOCI into Income	Amount of Gain/(Loss) Reclassified from AOCI into Income		
	2020	2019	2018		2020	2019	2018
Treasury lock agreements	$ 35.6	$ (23.8)	$ 3.6	Interest expense	$ (2.4)	$ (0.2)	$ —
Total	$ 35.6	$ (23.8)	$ 3.6		$ (2.4)	$ (0.2)	$ —

Derivatives Not Designated as Hedging Instruments	Location of Gain/(Loss) Recognized in Income on Derivative	Amount of Gain/(Loss) Recognized in Income on Derivative		
		2020	2019	2018
Foreign currency forward contracts	Foreign exchange gain (loss)	$ (22.5)	$ 14.1	$ —
Foreign currency zero-cost collar contracts	Foreign exchange gain (loss)	—	—	6.3
Total		$ (22.5)	$ 14.1	$ 6.3

See Note 10, Fair Value Measurements, for the determination of the fair values of derivatives.

Note 12. Short-Term Borrowings

Commercial Paper. The Company's commercial paper program generally serves as the primary means of short-term funding. As of December 31, 2020, and 2019, KCS had no commercial paper outstanding. For the years ended December 31, 2020, 2019 and 2018, commercial paper borrowings were outstanding for less than 90 days and the related activity is presented on a net basis in the consolidated statements of cash flows.

Note 13. Long-Term Debt

Long-term debt at December 31 *(in millions):*

Revolving Credit Facility

KCS, with certain of its domestic subsidiaries named therein as guarantors, has a $600.0 million senior unsecured revolving credit facility (the "Revolving Credit Facility"), with a $25.0 million standby letter of credit facility which, if utilized, constitutes usage under the Revolving Credit Facility. The Revolving Credit Facility serves as a backstop for KCS's commercial paper program (the "Commercial Paper Program") which generally serves as the Company's primary means of short-term funding.

Borrowings under the Revolving Credit Facility bear interest at floating rates. Depending on the Company's credit rating, the margin that KCS would pay above the London Interbank Offered Rate ("LIBOR") at any point is between 1.000% and 1.750%. As of December 31, 2020, the margin was 1.25% based on KCS's current credit rating.

The Revolving Credit Facility is guaranteed by KCSR, together with certain domestic subsidiaries named therein as guarantors and matures on March 8, 2024. The Revolving Credit Facility agreement contains representations, warranties, covenants and events of default that are customary for credit agreements of this type. The occurrence of an event of default could result in the termination of the commitments and the acceleration of the repayment of any outstanding principal balance on the Revolving Credit Facility and the Commercial Paper Program.

As of December 31, 2020 and 2019, KCS had no outstanding borrowings under the revolving credit facility.

Senior Notes

The Company's senior notes include certain covenants that are customary for these types of debt instruments issued by borrowers with similar credit ratings.

The KCS notes are KCS's general unsecured senior obligations and are unconditionally guaranteed, jointly and severally, on an unsecured senior basis by each current and future domestic subsidiary of KCS that from time to time guarantees the Revolving Credit Facility or any other debt of KCS or any of KCS's significant subsidiaries that is a guarantor (collectively, the "Note Guarantors").

KCSR's senior notes are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by KCS and each current and future domestic subsidiary of KCS that guarantees the Revolving Credit Facility or certain other debt of KCS or a note guarantor. KCSR's senior notes and the note guarantees rank pari passu in right of payment with KCSR's, KCS's and the Note Guarantors' existing and future unsecured, unsubordinated obligations.

KCSM's senior notes are denominated in U.S. dollars; are unsecured, unsubordinated obligations; rank pari passu in right of payment with KCSM's existing and future unsecured, unsubordinated obligations and are senior in right of payment to KCSM's future subordinated indebtedness.

Senior notes are redeemable at the issuer's option, in whole or in part, at any time, by paying the greater of either 100% of the principal amount to be redeemed and a formula price based on interest rates prevailing at the time of redemption and time remaining to maturity, plus, in each case, accrued interest thereon to, but excluding the redemption date. In addition, KCSM senior notes are redeemable, in whole but not in part, at KCSM's option at any time at a redemption price of 100% of their principal amount, plus any accrued unpaid interest in the event of certain changes in the Mexican withholding tax rate.

On April 22, 2020, KCS issued $550.0 million principal amount of senior unsecured notes due May 1, 2050 (the "3.50% Senior Notes"), which bear interest semiannually at a fixed annual rate of 3.50%. The 3.50% Senior Notes were issued at a discount to par value, resulting in a $4.4 million discount and a yield to maturity of 3.543%. The net proceeds from the offering were used for general corporate purposes, including to repurchase shares of KCS's common stock.

RRIF Loan Agreements

The following loans were made under the Railroad Rehabilitation and Improvement Financing ("RRIF") Program administered by the Federal Railroad Administration ("FRA"):

KCSR RRIF Loan Agreement. On February 21, 2012, KCSR entered into an agreement with the FRA to borrow $54.6 million to be used to reimburse KCSR for a portion of the purchase price of thirty new locomotives (the "Locomotives") acquired by KCSR in the fourth quarter of 2011. The loan bears interest at 2.96% annually and the principal balance amortizes quarterly with a final maturity of February 24, 2037. The obligations under the financing agreement are secured by a first priority security interest in the Locomotives and certain related rights. In addition, the Company has agreed to guarantee repayment of the amounts due under the financing agreement and certain related agreements. The occurrence of an event of default could result in the acceleration of the repayment of any outstanding principal balance of the loan.

Tex-Mex RRIF Loan Agreement. On June 28, 2005, Tex-Mex entered into an agreement with the FRA to borrow $50.0 million to be used for infrastructure improvements in order to accommodate growing freight rail traffic related to the NAFTA corridor. The loan bears interest at 4.29% annually and the principal balance amortizes quarterly with a final maturity of July 13, 2030. The loan is guaranteed by Mexrail, which has issued a pledge agreement in favor of the lender equal to the gross revenues earned by Mexrail on per-car fees on traffic crossing the International Rail Bridge in Laredo, Texas. In addition, the Company has agreed to guarantee the scheduled principal payment installments due to the FRA from Tex-Mex under the loan agreement on a rolling five-year basis.

Locomotive Financing Agreements

During 2011, KCSM entered into financing agreements totaling $91.0 million to purchase locomotives. The agreements matured and final payment was made during December 2020. Prior to repayment, the financing agreements were payable on a quarterly basis and contained annual interest rates of 9.311%.

Debt Covenants Compliance

The Company was in compliance with all of its debt covenants as of December 31, 2020.

Other Debt Provisions

Certain loan agreements and debt instruments entered into or guaranteed by the Company and its subsidiaries provide for default in the event of a specified change in control of the Company or particular subsidiaries of the Company.

Debt Maturities

Minimum annual payments for debt maturities are as follows *(in millions)*:

Years	Long-Term Debt	Net Present Value Finance Leases	Total
2021	$ 4.1	$ 2.3	$ 6.4
2022	4.3	2.5	6.8
2023	649.2	2.4	651.6
2024	4.7	0.3	5.0
2025	5.1	—	5.1
Thereafter	3,143.5	—	3,143.5
Total	$ 3,810.9	$ 7.5	$ 3,818.4

Note 14. Income Taxes

Current income tax expense represents the amounts expected to be reported on the Company's income tax returns, and deferred tax expense or benefit represents the change in net deferred tax assets and liabilities. Deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities as measured by the enacted tax rates that will be in effect when these differences reverse. Valuation allowances are recorded as appropriate to reduce deferred tax assets to the amount considered likely to be realized.

Mexican Fuel Excise Tax Credit. Fuel purchases in Mexico are subject to an excise tax that is included in the price of fuel. Through April 29, 2019, the Company was eligible for a credit for the excise tax included in the price of fuel that is purchased and consumed in locomotives and certain work equipment in Mexico. For year 2018, the Mexican fuel excise tax credit ("IEPS credit") was utilized and realized through the offset of the total annual Mexico income tax liability and income tax withholding payment obligations of KCSM, with no carryforward to future periods and recognized as a benefit in operating expenses on the consolidated statements of income.

In December 2018, the Mexican government enacted changes in the tax law effective January 1, 2019 ("Mexico 2019 Tax Reform"), which, among other things, for 2019 eliminated the option to monetize the IEPS credit by offsetting income tax withholding payment obligations. As a result, the Company was allowed to offset the 2019 IEPS credit only against its Mexico corporate income tax liability on the 2019 annual income tax return. The elimination of the option to apply the IEPS credit to income tax withholding payment obligations required the Company to recognize the IEPS credit as a reduction of income tax expense rather than a reduction of operating expenses for 2019.

On April 29, 2019, the Servicio de Administración Tributaria (the "SAT"), the Mexican equivalent of the IRS, published the Miscellaneous Fiscal Resolution for 2019 ("2019 Resolution"), which eliminated the Company's eligibility for the IEPS credit effective beginning April 30, 2019. During the period of eligibility in 2019, the Company generated IEPS credits resulting in a $12.8 million net tax benefit, which was recognized as a reduction to income tax expense within the consolidated statements of income for the year ended December 31, 2019.

Tax Cuts and Jobs Act. On December 22, 2017, the President of the United States signed into law the Tax Cuts and Jobs Act (the "Tax Reform Act"). The legislation significantly changed U.S. tax law by, among other things, lowering corporate income tax rates, implementing a modified territorial tax system and imposing a repatriation tax on deemed repatriated earnings

of foreign subsidiaries. The Tax Reform Act permanently reduced the U.S. corporate income tax rate from a maximum of 35% to a 21% rate, effective January 1, 2018.

Included in the Tax Reform Act were the global intangible low-taxed income ("GILTI") provisions. The Company elected to account for GILTI tax in the period in which it is incurred. The GILTI provisions require the Company to include in its U.S. income tax return foreign subsidiary earnings in excess of an allowable return on the foreign subsidiary's tangible assets. The Treasury Department issued final regulations in July 2020 that provide for a high-tax exception to the GILTI tax that were retroactive to tax years beginning after December 31, 2017. The Company recognized a $14.5 million tax benefit in 2020 for the reversal of 2018 and 2019 GILTI tax expense recognized in prior years' consolidated financial statements.

Tax Expense. Income tax expense consists of the following components *(in millions):*

	2020	2019	2018
Current:			
Federal	$ (1.9)	$ 22.3	$ (10.5)
State and local	1.6	1.8	0.7
Foreign	155.0	170.4	175.6
Total current	154.7	194.5	165.8
Deferred:			
Federal	49.4	27.5	77.6
State and local	13.8	14.8	9.1
Foreign	(13.8)	10.8	5.0
Total deferred	49.4	53.1	91.7
Total income tax expense	$ 204.1	$ 247.6	$ 257.5

Income before income taxes consists of the following *(in millions)*:

	2020	2019	2018
Income before income taxes:			
U.S.	$ 329.0	$ 250.3	$ 366.2
Foreign	494.2	538.1	520.7
Total income before income taxes	$ 823.2	$ 788.4	$ 886.9

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31 follow *(in millions):*

	2020	2019
Assets:		
Reserves not currently deductible for tax	$ 44.6	$ 36.8
Tax credit and loss carryovers	25.4	21.5
Compensation and benefits	24.7	23.1
Lease liability	19.7	35.1
Other	12.6	22.4
Gross deferred tax assets before valuation allowance	127.0	138.9
Valuation allowance	(3.5)	(4.4)
Net deferred tax assets	123.5	134.5
Liabilities:		
Property	(1,233.8)	(1,181.3)
Investments	(54.9)	(52.4)
Other	(20.2)	(28.8)
Gross deferred tax liabilities	(1,308.9)	(1,262.5)
Net deferred tax liability	$ (1,185.4)	$ (1,128.0)

Tax Rates. Differences between the Company's effective income tax rate and the U.S. federal statutory income tax rate of 21% follow *(in millions):*

	2020		2019		2018	
	Dollars	Percent	Dollars	Percent	Dollars	Percent
Income tax expense using the statutory rate in effect	$ 172.9	21.0%	$ 165.6	21.0%	$ 186.2	21.0%
Tax effect of:						
Difference between U.S. and foreign tax rate	44.1	5.4%	47.6	6.0%	46.1	5.2%
GILTI tax, net	(14.5)	(1.8%)	2.7	0.3%	11.8	1.3%
Tax credits	(13.8)	(1.7%)	(16.8)	(2.1%)	(14.2)	(1.6%)
State and local income tax provision, net	12.5	1.5%	11.5	1.5%	7.5	0.8%
Withholding tax	9.9	1.2%	9.5	1.2%	11.2	1.3%
Foreign exchange (i)	(3.4)	(0.4%)	35.9	4.6%	21.8	2.5%
Mexican fuel excise tax credit, net (ii)	—	—	(12.8)	(1.6%)	—	—
Change in U.S. tax rate	—	—	—	—	(2.2)	(0.3%)
Deemed mandatory repatriation	—	—	—	—	(18.7)	(2.1%)
Other, net	(3.6)	(0.4%)	4.4	0.5%	8.0	0.9%
Income tax expense	$ 204.1	24.8%	$ 247.6	31.4%	$ 257.5	29.0%

(i) Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. The foreign exchange impact on income taxes includes the gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos

which is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate. To hedge its exposure to this cash tax risk, the Company enters into foreign currency derivative contracts, which are measured at fair value each period and any change in fair value is recognized in foreign exchange gain (loss) within the consolidated statements of income. Refer to Note 11, Derivative Instruments in the consolidated financial statements for further information.

(ii) Not eligible for Mexican fuel excise tax credit subsequent to April 30, 2019. See previous discussion within footnote.

Difference Attributable to Foreign Investments. The Company asserts that all foreign earnings will be indefinitely reinvested to the extent of local needs and earnings that would be distributed in a taxable manner. The Company therefore intends to limit distributions to earnings previously taxed in the U.S., or earnings that would qualify for the 100 percent dividends received deduction provided for in the Tax Reform Act, and earnings that would not result in any significant foreign taxes. Therefore, the Company has not recognized a deferred tax liability on its investment in foreign subsidiaries.

Tax Carryovers. The Company has U.S. state net operating losses which are carried forward from 10 to 20 years and are analyzed each year to determine the likelihood of realization. The state loss carryovers arise from both combined and separate tax filings from as early as 1999 and may expire as early as December 31, 2021 and as late as December 31, 2040. The state loss carryover at December 31, 2020 was $367.7 million resulting in a state deferred tax asset of $22.0 million.

The Mexico federal loss carryovers at December 31, 2020, were $9.3 million and, if not used, will begin to expire in 2026. A deferred tax asset was recognized in prior periods for the expected future tax benefit of these losses which will be carried forward to reduce only Mexican income tax payable in future years.

The valuation allowance for deferred tax assets as of December 31, 2020 and 2019, was $3.5 million and $4.4 million, respectively, primarily attributable to state net operating loss carryovers. The Company believes it is more likely than not that reversals of existing temporary differences that will produce future taxable income and the results of future operations will generate sufficient taxable income to realize the deferred tax assets, net of valuation allowances, related to loss carryovers.

Uncertain Tax Positions. The accounting guidance for uncertainty in income taxes prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The guidance requires the Company to recognize in the consolidated financial statements the benefit of a tax position only if the impact is more likely than not of being sustained on audit based on the technical merits of the position. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (*in millions*):

	2020	2019
Balance at January 1,	$ 2.2	$ 2.2
Additions for tax positions of prior years	—	—
Balance at December 31,	$ 2.2	$ 2.2

The unrecognized tax benefit would affect the effective income tax rate if recognized, and is reasonably possible to be resolved over the next twelve months as part of an Internal Revenue Service (“IRS”) examination.

Interest and penalties related to uncertain tax positions are included in income before taxes on the consolidated statements of income. Accrued interest and penalties on unrecognized tax benefits and interest and penalty expense was immaterial to the consolidated financial statements for all periods presented.

Tax Contingencies. Tax returns filed in the U.S. for periods after 2015 and in Mexico for periods after 2012 remain open to examination by the taxing authorities. During the second quarter of 2020, the IRS initiated an examination of the 2017 deemed mandatory repatriation tax included in the 2017 U.S. federal tax return. In 2018, the IRS initiated an examination of the 2016 U.S. federal tax return. During the fourth quarter of 2020, the SAT initiated an audit of the KCSM 2015 Mexico tax

return. In 2019, the SAT initiated an audit of the KCSM 2013 and 2014 Mexico tax returns. The Company does not expect that these examinations will have a material impact on the consolidated financial statements. During the first quarter of 2017, the Company received audit assessments from the SAT for the KCSM 2009 and 2010 Mexico tax returns. In 2017, the Company commenced administrative actions with the SAT. During the first quarter of 2018, the audit assessments were nullified by the SAT. In the third quarter of 2018, the SAT issued new assessments and the Company filed administrative appeals with the SAT. The Company believes that it has strong legal arguments in its favor and it is more likely than not that it will prevail in any challenge of the assessments.

KCSM has not historically assessed value added tax ("VAT") on international import transportation services provided to its customers based on a written ruling that KCSM obtained from the SAT in 2008 stating that such services were not subject to VAT (the "2008 Ruling"). Notwithstanding the 2008 Ruling, in December 2013, the SAT unofficially informed KCSM of an intended implementation of new criteria effective as of January 1, 2014, pursuant to which VAT would be assessed on all international import transportation services on the portion of the services provided within Mexico. Additionally, in November 2013, the SAT filed an action to nullify the 2008 Ruling, potentially exposing the application of the new criteria to open tax years. In February 2014, KCSM filed an action opposing the SAT's nullification action. In December 2016, KCSM was notified of a resolution issued by the Mexican tax court confirming the 2008 Ruling. The SAT appealed this resolution. In October 2017, the circuit court resolved to not render a decision on the case but rather to send the SAT's appeal to the Supreme Court. In February 2018, the Supreme Court decided not to hear the case and remanded the SAT's appeal back to the circuit court for a decision. In July 2018, the circuit court ordered the tax court to consider certain arguments made by the SAT in the original court proceeding that were not addressed in the tax court's December 2016 resolution. In October 2018, the tax court issued a decision confirming the 2008 Ruling. The SAT appealed this decision. In September 2020, the Appeals Court dismissed the appeal filed by the SAT and confirmed the ruling issued by the tax court. The decision of the Appeals Court is final.

Refundable Mexican Value Added Tax. KCSM is not required to charge its customers VAT on international import or export transportation services, resulting in KCSM paying more VAT on its expenses than it collects from customers. These excess VAT payments are refundable under Mexican law. Prior to 2019, Mexican companies could offset its monthly refundable VAT balance with other tax obligations. In January 2019, Mexico tax reform eliminated the ability to offset other tax obligations with refundable VAT. From January 2019, KCSM has generated a refundable VAT balance of $103.1 million as of December 31, 2020, and filed refund claims with the SAT that are still under review. KCSM has a legal opinion supporting its right under Mexican law to recover the refundable VAT balance from the Mexican government and believes the VAT to be fully collectible. As of December 31, 2019, the KCSM refundable VAT balance was $60.2 million and was classified as a short-term asset. In the third quarter of 2020, the refundable VAT balance was reclassified from a short-term to long-term asset as result of the prolonged refund claim process.

Note 15. Stockholders' Equity

Information regarding the Company's capital stock at December 31 follows:

	Shares Authorized		Shares Issued	
	2020	2019	2020	2019
$25 par, 4% noncumulative, preferred stock	840,000	840,000	649,736	649,736
$1 par, preferred stock	2,000,000	2,000,000	—	—
$0.01 par, common stock	400,000,000	400,000,000	123,352,185	123,352,185

Shares outstanding at December 31:

	2020	2019
$25 par, 4% noncumulative, preferred stock	215,199	222,625
$0.01 par, common stock	91,047,107	96,115,669

Share Repurchases. In November 2020, the Company announced a new common share repurchase program authorizing the Company to purchase up to $3.0 billion of its outstanding shares of common stock through December 31, 2023 (the "2020 Program"). Share repurchases may be made in the open market, through privately negotiated transactions, or through Accelerated Share Repurchase ("ASR") transactions. The 2020 Program replaced KCS's $2.0 billion common share repurchase program announced on November 12, 2019 (the "2019 Program"), and eliminated the $588.3 million of remaining authorization under the 2019 Program.

Under an ASR agreement, the Company pays a specified amount to a financial institution and receives an initial delivery of shares. The final number and total cost of shares repurchased is then based on the volume-weighted average price of the Company's common stock during the term of the agreements. The transactions are accounted for as equity transactions with any excess of repurchase price over par value allocated between additional paid-in capital and retained earnings. At the time the shares are received, there is an immediate reduction in the weighted-average number of shares outstanding for purposes of the basic and diluted earnings per share computation.

During 2019 and 2020, the Company entered into ASR agreements under the 2019 Program. The terms of the agreements, structured as outlined above, were as follows:

Third Party Institution	Agreement Date	Settlement Date	Total Amount of Agreement *(in millions)*	Initial Shares Delivered	Fair Market Value of Initial Shares *(in millions)*	Additional Shares Delivered	Fair Market Value of Additional Shares *(in millions)*	Total Shares Delivered	Weighted-Average Price Per Share
ASR Agreement #1	November 2019	March 2020	$ 275.0	1,511,380	$ 233.75	224,244	$ 41.25	1,735,624	$ 158.44
ASR Agreement #2	November 2019	March 2020	$ 275.0	1,511,380	$ 233.75	221,692	$ 41.25	1,733,072	$ 158.68
Total			$ 550.0	3,022,760	$ 467.5	445,936	$ 82.5	3,468,696	$ 154.66
ASR Agreement #3	October 2020	January 2021	$ 250.0	1,187,084	$ 212.50	116,314	$ 37.50	1,303,398	$ 191.81
ASR Agreement #4	October 2020	January 2021	$ 250.0	1,187,084	$ 212.50	117,088	$ 37.50	1,304,172	$ 191.69
Total			$ 500.0	2,374,168	$ 425.0	233,402	$ 75.0	2,607,570	$ 191.75

As of December 31, 2020, the remaining $75.0 million was recognized as a forward contract indexed to the Company's own common stock and included in capital surplus within additional paid-in capital in the accompanying consolidated balance sheets.

During 2020, KCS repurchased 143,343 shares of common stock for $27.0 million under the 2020 Program, and 5,207,633 shares of common stock for $869.2 million under the 2019 Program. In total under the 2019 Program, including shares received in January 2021 to settle the October 2020 ASR agreements, the Company has repurchased 8,463,795 shares of common stock for $1,411.7 million at an average price of $166.80 per share.

During 2020, the Company repurchased 7,426 shares of its $25 par preferred stock for $0.2 million at an average price of $29.58 per share.

Treasury Stock. Shares of common stock in treasury and related activity follow:

	2020	2019	2018
Balance at beginning of year	27,236,516	22,455,507	20,315,380
Shares repurchased	5,350,976	5,076,530	2,272,213
Shares issued to fund stock option exercises	(133,951)	(109,560)	(24,024)
Employee stock purchase plan shares issued	(51,658)	(72,707)	(62,866)
Nonvested shares issued	(111,003)	(124,031)	(51,191)
Nonvested shares forfeited	14,198	10,777	5,995
Balance at end of year	32,305,078	27,236,516	22,455,507

Cash Dividends on Common Stock. The following table presents the amount of cash dividends declared per common share by the Company's Board of Directors:

	2020	2019	2018
Cash dividends declared per common share	$ 1.64	$ 1.48	$ 1.44

Note 16. Share-Based Compensation

On May 4, 2017, the Company' stockholders approved the Kansas City Southern 2017 Equity Incentive Plan (the "2017 Plan"). Upon approval, the Company ceased issuing awards under the Kansas City Southern 2008 Stock Option and Performance Award Plan (the "2008 Plan"). The Board of Directors and its Compensation and Organization Committee had previously adopted the 2017 Plan, subject to stockholder approval, on January 26, 2017, and February 17, 2017, respectively. The 2017 Plan provides for the granting of up to 3,750,000 shares of the Company's common stock to eligible persons as defined in the 2017 Plan. Outstanding equity awards granted under the 2008 Plan and the 2017 Plan (the "Plans") are to be governed by the terms and conditions of each individual plan and the related award agreements.

Stock Options. The exercise price for options granted under the Plans equals the closing market price of the Company's stock on the date of grant. Options generally have a 3-year vesting period and are exercisable over the 10-year contractual term, except that options outstanding become immediately exercisable upon certain defined circumstances constituting a change in control of the Company. The grant date fair value is recorded to expense on a straight-line basis over the vesting period.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. The weighted-average assumptions used were as follows:

	2020	2019	2018
Expected dividend yield	1.04 %	1.33 %	1.36 %
Expected volatility	26.07 %	26.38 %	27.09 %
Risk-free interest rate	1.27 %	2.64 %	2.80 %
Expected term *(years)*	5.7	5.7	6.0
Weighted-average grant date fair value of stock options granted	$ 37.79	$ 27.70	$ 28.52

The expected dividend yield is calculated as the ratio of dividends paid per share of common stock to the stock price on the date of grant. The expected volatility is based on the historical volatility of the Company's stock price over a term equal to the estimated life of the options. The risk-free interest rate is determined based on U.S. Treasury rates for instruments with terms approximating the expected term of the options granted, which represents the period of time the awards are expected to be outstanding and is based on the historical experience of similar awards.

A summary of stock option activity is as follows:

	Number of Shares	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value
			In years	In millions
Options outstanding at December 31, 2019	596,514	$ 92.73		
Granted	115,205	154.38		
Exercised	(133,951)	73.58		
Forfeited or expired	(5,820)	109.84		
Options outstanding at December 31, 2020	571,948	$ 109.46	6.6	$ 54.1
Exercisable at December 31, 2020	389,987	$ 97.81	5.6	$ 41.5

The aggregate intrinsic value in the table above, which is the amount by which the market value of the underlying stock exceeded the exercise price of outstanding options, represents the amount optionees would have realized if all in-the-money options had been exercised on the last business day of the period indicated.

Compensation cost of $4.0 million, $3.6 million, and $2.5 million was recognized for stock option awards for the years ended December 31, 2020, 2019, and 2018, respectively. The total income tax benefit recognized in the consolidated statements of income was $1.0 million, $0.9 million, and $0.6 million for the years ended December 31, 2020, 2019 and 2018, respectively.

Additional information regarding stock option exercises appears in the table below *(in millions)*:

	2020	2019	2018
Aggregate grant-date fair value of stock options vested	$ 3.7	$ 3.0	$ 1.9
Intrinsic value of stock options exercised	13.9	7.2	1.0
Cash received from option exercises	9.9	7.0	1.8
Tax benefit from options exercised during the annual period	3.5	1.8	0.2

As of December 31, 2020, $1.9 million of unrecognized compensation cost relating to nonvested stock options is expected to be recognized over a weighted-average period of eleven months. At December 31, 2020, there were 2,959,191 shares available for future grants under the 2017 Plan.

Nonvested Stock. The Plans provide for the granting of nonvested stock awards to officers and other designated employees. The grant date fair value is based on the closing market price on the date of the grant. These awards are subject to forfeiture if employment terminates during the vesting period, which is generally 3 years or 5 years of vesting for employees. Awards granted to the Company's directors vest immediately on date of grant. The grant date fair value of nonvested shares is recorded to compensation expense on a straight-line basis over the vesting period.

A summary of nonvested stock activity is as follows:

	Number of Shares	Weighted-Average Grant Date Fair Value	Aggregate Intrinsic Value
			In millions
Nonvested stock at December 31, 2019	220,195	$ 101.40	
Granted	85,199	147.82	
Vested	(97,165)	104.86	
Forfeited	(14,198)	110.94	
Nonvested stock at December 31, 2020	194,031	$ 119.35	$ 39.6

The fair value (at vest date) of shares vested during the years ended December 31, 2020, 2019, and 2018 was $15.3 million, $15.2 million, and $10.4 million, respectively.

The weighted-average grant date fair value of nonvested stock granted during 2020, 2019, and 2018 was $147.82, $114.69 and $106.52, respectively. Compensation cost for nonvested stock was $10.5 million, $10.7 million, and $10.8 million for the years ended December 31, 2020, 2019, and 2018, respectively. The total income tax benefit recognized in the consolidated statements of income was $2.6 million for each of the three years ended December 31, 2020, 2019, and 2018.

As of December 31, 2020, $11.9 million of unrecognized compensation costs related to nonvested stock is expected to be recognized over a weighted-average period of 1.2 years.

Performance Based Awards. The Company granted performance based nonvested stock awards during 2020 (the "2020 Awards"), 2019 (the "2019 Awards") and 2018 (the "2018 Awards"). The awards granted provide a target number of shares that generally vest at the end of a 3-year requisite service period following the grant date. In addition to the service condition, the number of nonvested shares to be received depends on the attainment of defined Company-wide performance goals based on operating ratio ("OR") and return on invested capital ("ROIC") over a 3-year performance period. The awards are also subject to a revenue growth multiplier based on a 3-year performance period calculated as defined in the related award agreement that can range from 80% to 125% of the award earned based on the OR and ROIC achieved. The number of nonvested shares ultimately earned will range between zero to 200% of the target award.

A summary of performance based nonvested stock activity at target is as follows:

	Target Number of Shares *	Weighted-Average Grant Date Fair Value
Nonvested stock, at December 31, 2019	148,185	$ 100.76
Granted	49,068	157.75
Vested	(51,299)	87.10
Forfeited	(5,394)	117.94
Nonvested stock, at December 31, 2020	140,560	$ 124.98

* For the 2020 Awards and the 2019 Awards, participants in the aggregate can earn up to a maximum of 88,122 and 92,582 shares, respectively. For the 2018 Awards, the performance shares earned were 71,074.

The weighted-average grant date fair value of performance based nonvested stock granted during 2020, 2019 and 2018 was $157.75, $110.13 and $105.83, respectively. The Company expenses the grant date fair value of the awards which are probable of being earned over the performance periods. Compensation cost on performance based awards was $8.6 million, $8.2 million and $5.8 million for the years ended December 31, 2020, 2019 and 2018, respectively. Total income tax benefit

recognized in the consolidated statements of income for performance based awards was $2.1 million, $2.0 million and $1.5 million for the years ended December 31, 2020, 2019 and 2018, respectively.

As of December 31, 2020, $5.3 million of unrecognized compensation cost related to performance based awards is expected to be recognized over a weighted-average period of eleven months. The fair value (at vest date) of shares vested for the years ended December 31, 2020, 2019 and 2018 was $7.8 million, $5.7 million, and $3.5 million, respectively.

Employee Stock Purchase Plan. The employee stock purchase plan ("ESPP") provides substantially all U.S. full-time employees of the Company, certain subsidiaries and certain other affiliated entities, with the right to subscribe to an aggregate of 4.0 million shares of common stock of the Company. Under the ESPP, eligible employees may contribute, through payroll deductions, up to 10% of their regular base compensation during six-month purchase periods at a purchase price equal to 85% of the closing market price on either the exercise date or the offering date, whichever is lower.

At the end of each purchase period, the accumulated deductions are applied toward the purchase of the Company's common stock. Both the discount in grant price and the share option purchase price are valued to derive the award's fair value. The awards vest and the expense is recognized ratably over the offering period.

The following table summarizes activity related to the various ESPP offerings:

	Exercise Date			Received from Employees(i) In millions
	Date Issued	Purchase Price	Shares Issued	
July 2020 offering	January 5, 2021	$ 122.91	23,292	$ 2.9
January 2020 offering	July 2, 2020	126.90	23,709	3.0
July 2019 offering	January 3, 2020	104.83	27,949	2.9
January 2019 offering	July 2, 2019	81.83	36,735	3.0
July 2018 offering	January 3, 2019	81.13	35,972	2.9
January 2018 offering	July 2, 2018	90.07	32,271	2.9

(i) Represents amounts received from employees through payroll deductions for share purchases under applicable offering.

The fair value of the ESPP stock purchase rights is estimated on the date of grant using the Black-Scholes option pricing model. The weighted-average assumptions used for each of the respective periods were as follows:

	Years Ended December 31,		
	2020	2019	2018
Expected dividend yield	1.07 %	1.36 %	1.22 %
Expected volatility	30.55 %	17.43 %	13.29 %
Risk-free interest rate	1.01 %	2.31 %	1.73 %
Expected term *(years)*	0.5	0.5	0.5
Weighted-average grant date fair value	$ 35.14	$ 21.56	$ 18.66

Compensation expense of $1.7 million, $1.4 million, and $1.3 million was recognized for ESPP option awards for the years ended December 31, 2020, 2019, and 2018, respectively. At December 31, 2020, there were 3.4 million remaining shares available for future ESPP offerings under the plan.

Note 17. Commitments and Contingencies

Concession Duty. Under KCSM's 50-year Concession, which could expire in 2047 unless extended, KCSM pays annual concession duty expense of 1.25% of gross revenues. For the year ended December 31, 2020, the concession duty expense, which is recorded within materials and other in operating expenses, was $17.4 million, compared to $18.9 million and $17.8 million for the same periods in 2019 and 2018, respectively.

Litigation. Occasionally, the Company is a party to various legal proceedings, regulatory examinations, investigations, administrative actions, and other legal matters, arising for the most part in the ordinary course of business, incidental to its operations. Included in these proceedings are various tort claims brought by current and former employees for job-related injuries and by third parties for injuries related to railroad operations. KCS aggressively defends these matters and has established liability provisions that management believes are adequate to cover expected costs. The outcome of litigation and other legal matters is always uncertain. KCS believes it has valid defenses to the legal matters currently pending against it, is defending itself vigorously, and has recorded accruals determined in accordance with U.S. GAAP, where appropriate. In making a determination regarding accruals, using available information, KCS evaluates the likelihood of an unfavorable outcome in legal or regulatory proceedings to which it is a party to and records a loss contingency when it is probable a liability has been incurred and the amount of the loss can be reasonably estimated. These subjective determinations are based on the status of such legal or regulatory proceedings, the merits of KCS's defenses and consultation with legal counsel. Actual outcomes of these legal and regulatory proceedings may materially differ from the current estimates. It is possible that resolution of one or more of the legal matters currently pending or threatened could result in losses material to KCS's consolidated results of operations, liquidity or financial condition.

Environmental Liabilities. The Company's U.S. operations are subject to extensive federal, state and local environmental laws and regulations. The major U.S. environmental laws to which the Company is subject include, among others, the federal Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA," also known as the Superfund law), the Toxic Substances Control Act, the Clean Water Act, and the Hazardous Materials Transportation Act. CERCLA can impose joint and several liabilities for cleanup and investigation costs, without regard to fault or legality of the original conduct, on current and predecessor owners and operators of a site, as well as those who generate, or arrange for the disposal of, hazardous substances. The Company does not believe that compliance with the requirements imposed by the environmental legislation will impair its competitive capability or result in any material additional capital expenditures, operating or maintenance costs. The Company is, however, subject to environmental remediation costs as described in the following paragraphs.

The Company's Mexico operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment through the establishment of standards for water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. The Mexican government may bring administrative and criminal proceedings, impose economic sanctions against companies that violate environmental laws, and temporarily or even permanently close non-complying facilities.

The risk of incurring environmental liability is inherent in the railroad industry. As part of serving the petroleum and chemicals industry, the Company transports hazardous materials and has a professional team available to respond to and handle environmental issues that might occur in the transport of such materials.

The Company performs ongoing reviews and evaluations of the various environmental programs and issues within the Company's operations, and, as necessary, takes actions intended to limit the Company's exposure to potential liability. Although these costs cannot be predicted with certainty, management believes that the ultimate outcome of identified matters will not have a material adverse effect on the Company's consolidated financial statements.

Personal Injury. The Company's personal injury liability is based on semi-annual actuarial studies performed on an undiscounted basis by an independent third party actuarial firm and reviewed by management. This liability is based on personal injury claims filed and an estimate of claims incurred but not yet reported. Actual results may vary from estimates due to the number, type and severity of the injury, costs of medical treatments and uncertainties in litigation. Adjustments to the liability are reflected within operating expenses in the period in which changes to estimates are known. Personal injury claims in excess of self-insurance levels are insured up to certain coverage amounts, depending on the type of claim and year of

occurrence. The personal injury liability as of December 31, 2020, is based on an updated actuarial study of personal injury claims through October 31, 2020, and review of the last two months' experience. For the years ended December 31, 2020 and 2019, the Company recognized increases of $9.4 million and $0.2 million, respectively, in personal injury liability, due to changes in estimates as a result of the Company's claims development and settlement experience.

The personal injury liability activity was as follows *(in millions):*

	2020	2019
Balance at beginning of year	$ 20.9	$ 19.6
Accruals	6.3	6.3
Changes in estimate	9.4	0.2
Payments	(5.3)	(5.2)
Balance at end of year	$ 31.3	$ 20.9

Tax Contingencies. Information regarding tax contingencies is included in Note 14, Income Taxes — Tax Contingencies.

Contractual Agreements. In the normal course of business, the Company enters into various contractual agreements related to commercial arrangements and the use of other railroads' or governmental entities' infrastructure needed for the operations of the business. The Company is involved or may become involved in certain disputes involving transportation rates, product loss or damage, charges, and interpretations related to these agreements. While the outcome of these matters cannot be predicted with certainty, the Company believes that, when resolved, these disputes will not have a material effect on its consolidated financial statements.

Credit Risk. The Company continually monitors risks related to economic changes and certain customer receivables concentrations. Significant changes in customer concentration or payment terms, deterioration of customer creditworthiness, bankruptcy, insolvency or liquidation of a customer, or weakening in economic trends could have a significant impact on the collectability of the Company's receivables and its operating results. If the financial condition of the Company's customers were to deteriorate and result in an impairment of their ability to make payments, additional allowances may be required. The Company has recorded provisions for uncollectability based on its best estimate as of December 31, 2020.

Panama Canal Railway Company ("PCRC") Guarantees and Indemnities. At December 31, 2020, the Company had issued and outstanding $5.6 million under a standby letter of credit to fulfill its obligation to fund fifty percent of the debt service reserve and liquidity reserve established by PCRC in connection with the issuance of the 7.0% Senior Secured Notes due November 1, 2026 (the "PCRC Notes"). Additionally, KCS has pledged its shares of PCRC as security for the PCRC Notes.

Note 18. Quarterly Financial Data (Unaudited)

	Fourth	Third	Second	First
	(In millions, except per share amounts)			
2020				
Revenues	$ 693.4	$ 659.6	$ 547.9	$ 731.7
Operating income (i)(ii)	262.3	271.5	180.4	288.8
Net income (iii)	166.3	190.2	110.3	152.3
Net income attributable to Kansas City Southern and subsidiaries	165.7	189.8	109.7	151.8
Per share data:				
Basic earnings per common share	$ 1.81	$ 2.02	$ 1.16	$ 1.59
Diluted earnings per common share	1.80	2.01	1.16	1.58
2019				
Revenues	$ 729.5	$ 747.7	$ 714.0	$ 674.8
Operating income (iv)	236.0	282.0	208.0	160.3
Net income (v)	127.9	180.6	129.1	103.2
Net income attributable to Kansas City Southern and subsidiaries	127.2	180.2	128.7	102.8
Per share data:				
Basic earnings per common share	$ 1.31	$ 1.81	$ 1.29	$ 1.02
Diluted earnings per common share	1.30	1.81	1.28	1.02

(i) During the first, second and third quarters of 2020, the Company recognized pre-tax restructuring charges of $6.0 million, $10.5 million and $0.5 million, respectively, within operating expenses related to the Company's VSP program and the purchase of impaired, leased locomotives.

(ii) During the fourth quarter of 2020, the Company recognized $13.6 million of pre-tax expense within operating expenses related to the write-off of software development costs.

(iii) During the first, second and third quarters of 2020, the Company recognized tax expense of $2.2 million and $2.0 million, and a benefit of $4.2 million, respectively, for GILTI tax expense recognized in the first and second quarters of 2020, and subsequently reversed in the third quarter of 2020 when GILTI regulations were finalized. Additionally, during the third quarter of 2020, the Company recognized a $14.5 million tax benefit for the reversal of 2018 and 2019 GILTI tax expense recognized in prior years' consolidated financial statements.

(iv) During the first, second, third and fourth quarters of 2019, the Company recognized pre-tax restructuring charges of $67.5 million, $51.0 million, $12.0 million and $38.3 million, respectively, within operating expenses related to the implementation of PSR initiatives.

(v) During the first, second, third, and fourth quarters of 2019, the Company recognized, net, a tax benefit of $6.8 million, expense of $1.9 million, and benefits of $3.7 million, and $4.2 million, respectively, related to the Mexican fuel excise tax credit generated through April 29, 2019. Prior to 2019, the Company recognized a pre-tax benefit within operating expenses related to a credit that was available for the excise tax included in the price of fuel that was purchased and consumed in locomotives and certain work equipment in Mexico. Effective January 1, 2019, the Company began recognizing the benefit as a reduction of income tax expense due to changes in Mexican tax law; and beginning April 30, 2019, railroads in Mexico are no longer eligible for the tax credit due to changes in Mexican tax regulations.

Note 19. Geographic Information

The Company strategically manages its rail operations as one reportable business segment over a single coordinated rail network that extends from the midwest and southeast portions of the United States south into Mexico and connects with other Class I railroads. Financial information reported at this level, such as revenues, operating income and cash flows from operations, is used by corporate management, including the Company's chief operating decision-maker, in evaluating overall financial and operational performance, market strategies, as well as the decisions to allocate capital resources. The Company's chief operating decision-maker is the chief executive officer.

The following tables provide information by geographic area *(in millions)*:

	Years ended December 31,		
	2020	2019	2018
Revenues			
U.S.	$ 1,388.5	$ 1,493.5	$ 1,424.8
Mexico	1,244.1	1,372.5	1,289.2
Total revenues	$ 2,632.6	$ 2,866.0	$ 2,714.0

	December 31,	
	2020	2019
Property and equipment (including Concession assets), net		
U.S.	$ 5,594.6	$ 5,435.9
Mexico	3,403.2	3,370.4
Total property and equipment (including Concession assets), net	$ 8,997.8	$ 8,806.3

Note 20. Subsequent Events

Foreign Currency Hedging

During January 2021, the Company entered into several foreign currency forward contracts with an aggregate notional amount of $100.0 million and maturity dates in January and February 2021. These contracts obligate the Company to purchase a total of Ps.1,993.5 million at a weighted-average exchange rate of Ps.19.9 to each U.S. dollar. During January 2021, the Company entered into offsetting contracts with an aggregate notional amount of $58.9 million, which matured during January 2021 and obligated the Company to sell a total of Ps.1,195.3 million at a weighted-average exchange rate of Ps.20.3 to each U.S. dollar, resulting in cash paid of $1.1 million. As of the date of this filing, there were $40.0 million aggregate notional amount of contracts outstanding, which obligate the Company to purchase a total of Ps.798.2 million at a weighted average exchange rate of Ps.20.0 to each U.S. dollar.

The Company has not designated these foreign currency derivative instruments as hedging instruments for accounting purposes. The Company will measure the foreign currency derivative instruments at fair value each period and will recognize any change in fair value in foreign exchange gain (loss) within the consolidated statements of income.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

Not Applicable.

Item 9A. ***Controls and Procedures***

(a) Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2020. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2020, the design and operation of the Company's disclosure controls and procedures were effective to accomplish their objectives at a reasonable assurance level.

(b) Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as that term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter ended December 31, 2020 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Internal Control over Financial Reporting

The report of management on the Company's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) is included as "Management's Report on Internal Control over Financial Reporting" in Item 8, Financial Statements and Supplementary Data.

PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited the Company's financial statements contained herein, also audited the Company's internal control over financial reporting as of December 31, 2020. The audit report is included in Item 8, Financial Statements and Supplementary Data.

Item 9B. ***Other Information***

None.

Part III

The Company has incorporated by reference certain responses to the Items of this Part III pursuant to Rule 12b-23 under the Exchange Act and General Instruction G(3) to Form 10-K. The Company's definitive proxy statement for the 2020 annual meeting of stockholders ("Proxy Statement"), will be filed no later than 120 days after December 31, 2020.

Item 10. *Directors, Executive Officers and Corporate Governance*

(a) Directors of the Company

The sections of the Proxy Statement entitled "Proposal 1 — Election of Directors" and "The Board of Directors" are incorporated by reference herein.

(b) Executive Officers of the Company

See "Executive Officers of KCS and Subsidiaries" in Part I, Item 1 of this annual report incorporated by reference herein for information about the executive officers of the Company.

(c) Changes to Shareholder Nominating Procedures

None.

(d) Audit Committee and Audit Committee Financial Experts

The section of the Proxy Statement entitled "Board Committees — Audit Committee" is incorporated by reference herein.

(e) Compliance with Section 16(a) of the Exchange Act

The response to Item 405 of Regulation S-K under "Delinquent Section 16(a) Reports" in the Proxy Statement is incorporated by reference herein.

(f) Code of Ethics

The Company has adopted a Code of Business Conduct and Ethics ("Code of Ethics") that applies to directors, officers (including, among others, the principal executive officer, principal financial officer and principal accounting officer) and employees. The Company has posted its Code of Ethics on its website (www.kcsouthern.com) and will post on its website any amendments to, or waivers from, a provision of its Code of Ethics that apply to the Company's principal executive officer, principal financial officer or principal accounting officer as required by applicable SEC and NYSE rules and regulations.

Item 11. *Executive Compensation*

The sections of the Proxy Statement entitled "Compensation Discussion and Analysis", "Compensation Committee Report", "Executive Compensation", "Board Committees - Compensation Committee Interlocks and Insider Participation", and "Director Compensation" are incorporated by reference herein.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters***

The section of the Proxy Statement entitled "Beneficial Ownership" is incorporated by reference herein.

Equity Compensation Plan Information

The following table provides information as of December 31, 2020, about the common stock that may be issued upon the exercise of options, warrants and rights, as well as shares remaining available for future issuance under the Company's existing equity compensation plans.

Plan Category	Number of Securities to Be Issued upon Exercise of Outstanding Options, Warrants and Rights (i)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans-Excluding Securities Reflected in the First Column (ii)
Equity compensation plans:			
Approved by security holders	744,634	$ 112.90	6,326,987
Not approved by security holders	—	—	—
Total	744,634	$ 112.90	6,326,987

(i) Includes 571,948 outstanding options, 140,560 outstanding performance shares (at target), 8,834 outstanding deferred shares and dividend equivalents, and 23,292 ESPP shares purchased on December 31, 2020.

(ii) Includes 3,367,796 shares available for issuance under the 2009 Employee Stock Purchase Plan and 2,959,191 shares available for issuance under the 2017 Plan in the form of nonvested shares, bonus shares, performance units or performance shares or issued upon the exercise of options (including incentive stock options) or stock appreciation rights awarded under the 2017 Plan.

The Company has no knowledge of any arrangement the operation of which may at a subsequent date result in a change of control of the Company.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence***

The sections of the Proxy Statement entitled "Certain Transactions" and "Corporate Governance - Director Independence" are incorporated by reference herein.

Item 14. ***Principal Accountant Fees and Services***

The section of the Proxy Statement entitled "Independent Registered Public Accounting Firm" is incorporated by reference herein.

Part IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) List of Documents filed as part of this Report

(1) ***Financial Statements***

The consolidated financial statements and related notes, together with the report of PricewaterhouseCoopers LLP, Independent Registered Public Accounting Firm, appear in Item 8, Financial Statements and Supplementary Data.

(2) ***Financial Statement Schedules***

None.

(3) ***List of Exhibits***

(a) Exhibits

The Company has attached or incorporated by reference herein certain exhibits as specified below pursuant to Rule 12b-32 under the Exchange Act.

Exhibit	Description
3.1	Amended and Restated Certificate of Incorporation of Kansas City Southern, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K, filed on May 7, 2012 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.1.
3.1.1	Amendments to the Kansas City Southern Amended and Restated Certificate of Incorporation, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K filed on May 5, 2014 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.1.1.

($ in millions, except per share amounts)

Reconciliation of Diluted Earnings per Share to Adjusted Diluted Earnings per Share

	Year ended December 31, 2020
As reported	$ 6.54
Adjustments for:	
Write-off of software development costs	0.11
Restructuring charges	0.13
Foreign exchange loss	0.22
Foreign exchange component of income taxes	(0.04)
Adjusted - see (a) below	$ 6.96

(a) The Company believes adjusted diluted earnings per share is meaningful as it allows investors to evaluate the Company's performance for different periods on a more comparable basis by adjusting for the impact of changes in foreign currency exchange rates, and items that are not directly related to the ongoing operations of the Company. The income tax expense impacts related to these adjustments are calculated at the applicable statutory tax rate.

Reconciliation of Operating Ratio to Adjusted Operating Ratio

	Year ended December 31, 2020
Operating ratio as reported	61.9 %
Adjustment for write-off of software development costs	(0.5)%
Adjustment for restructuring charges	(0.7)%
Adjusted operating ratio - see (b) below	60.7 %

(b) The most directly comparable financial measure to adjusted operating ratio calculated and presented in accordance with U.S. GAAP is reported operating expenses divided by reported revenues. The Company believes adjusted operating ratio is meaningful as it allows investors to evaluate the Company's performance for different periods on a more comparable basis by adjusting for items that are not directly related to the ongoing operations of the Company.

Free Cash Flow

	Year ended December 31, 2020
Net cash provided by operating activities	$ 1,080.0
Net cash used for investing activities	(526.0)
Free cash flow - see (c) below	554.0
Net cash used for financing activities	(510.3)
Effect of exchange rate changes on cash	(4.3)
GAAP net increase in cash and cash equivalents	$ 39.4

(c) The most directly comparable financial measure to free cash flow calculated and presented in accordance with U.S. GAAP is net cash provided by operating activities less net cash used for investing activities. The Company believes free cash flow is a useful measure of liquidity as it demonstrates the Company's ability to generate cash for debt obligations, dividend payments, share repurchases, and other strategic opportunities.

KANSAS CITY SOUTHERN
2019 ANNUAL REPORT
(FILED WITH THE SEC ON JANUARY 24, 2020)

2019 | Annual Report

KANSAS CITY SOUTHERN

Kansas City Southern is a transportation holding company with two primary subsidiaries. The Kansas City Southern Railway Company is one of seven Class I railroads operating in the United States. Kansas City Southern de México, S.A. de C.V. is one of two large regional railroads in Mexico. KCS also owns 50% of the Panama Canal Railway Company in Panama. The combined North American rail network comprises approximately 6,700 route miles that link commercial and industrial markets in the United States and Mexico.

LETTER TO OUR STOCKHOLDERS

Patrick J. Ottensmeyer
President & Chief Executive Officer
Kansas City Southern

2019 was a pivotal year for Kansas City Southern (KCS or the Company). Operationally, the Company performed at or near record levels, which yielded exceptional financial results:

- **Revenue was $2.9 billion, up 6% from 2018**
- **Adjusted operating income* was $1.1 billion, a 9% increase over the prior year**
- **Adjusted diluted earnings per share* was $6.90, 16% higher than the year before**
- **Record free cash flow* of $453 million, up 54% over the prior year**

To understand how we got here, it is necessary first to look back. During the second half of 2018, the Company faced unique challenges stemming from exceptionally strong cross-border volume growth. These challenges revealed operational vulnerabilities throughout the network that compromised our customer service and our ability to grow. Heading into 2019, it was clear that to achieve our vision to consistently be the fastest-growing, best-performing, most customer-focused transportation company in North America, we needed to address these operational challenges head-on and make some bold changes.

After careful consideration, and with the support of the entire executive team, KCS elected to implement Precision Scheduled Railroading (PSR). Sameh Fahmy, KCS's executive vice president Precision Scheduled Railroading was brought on in February 2019 to lead this transformation and impart his substantial expertise.

Mr. Fahmy brought with him strong experience implementing and operating PSR networks. Recently, Mr. Fahmy served as a consultant at CSX, where he worked to optimize CSX's mechanical and engineering departments. Prior to his time at CSX, Mr. Fahmy spent 23 years at Canadian National overseeing the mechanical and engineering functions, improving their safety record, reducing expense, train delays and increasing freight car and locomotive availability.

With Mr. Fahmy at the helm and with support from across the organization, the Company began implementing this transformative operating model with the following objectives:

- Improve consistency and reliability of our service;
- Create the additional capacity required to realize growth opportunities;
- Improve asset utilization; and
- Optimize KCS's cost profile.

The Company embraced this new operating model, and by the second half of 2019, progress was taking hold. KCS began consistently posting all-time best velocity performance. Capacity on our network increased, and our capital intensity moderated. Perhaps most importantly, customer service surveys reflected the significant improvement to operations, and we began to recover business that we lost in 2018. Furthermore, our cross-border customers started rewarding KCS with new business.

Commercial Performance and KCS's Cross-Border Advantage

Overall, KCS reported a 1% volume decline in 2019, but that does not tell the entire story. Our volume performance is best understood by looking at the U.S., Mexico and cross-border segments of our network separately. Our intra-U.S. and intra-Mexico volumes were impacted by lower capital investment throughout the economy. This lower capital investment was driven by global trade uncertainty, excess truck capacity on both sides of the border, and slowing economic growth in Mexico.

Meanwhile, volumes on our franchise cross-border corridor grew an exceptional 11%, driven by growth in cross-border trade and improvements to network operations. A 105% increase in refined products and LPG exports to Mexico and a 13% increase in cross-border grain shipments led this growth. Additionally, our franchise cross-border intermodal volumes grew 9% in 2019, as customers increasingly took advantage of our rail network's safety and improving service to move consumer goods between the U.S. and Mexico.

In a year where overall rail industry volumes were down 3% on average, KCS's performance sets the Company apart, and offers our stockholders the opportunity to benefit from growth in North American trade. The connection that KCS's cross-border corridor provides between Mexico's industrial heartland and every major population center in the United States and Canada remains the Company's most important strategic asset. The strength of our cross-border franchise is unparalleled, and it is driving industry-leading volume growth.

Service quality is paramount across this key corridor. We compete directly with trucks to handle many cross-border commodities, and our export grain franchise depends on consistent and fluid cycle times to optimize use of assets dedicated to this strategic service. PSR is laying the groundwork for a sustainable competitive advantage in freight transportation, and we are using this competitive advantage to drive business to our network

Operational Performance

The Company's operational improvement surpassed all expectations. Mr. Fahmy has heightened focus and attention to detail, and instilled a relentless pursuit of operational excellence across the entire organization.

Mr. Fahmy is leading a core group of exceptional KCS associates from all departments in the Company's PSR implementation. This team of leaders is creating initiatives and setting targets that are driving sustainable improvements to operations and customer service. Departmental initiatives are widespread, from operations to human resources, to service design and marketing. The entire Company has responsibility for implementing PSR, and we are all committed to ensuring its success.

In 2019, the Company realized $58 million of savings attributed directly to the implementation of PSR. In addition to an improved cost structure, operational achievements like the following succinctly demonstrate the success that we had this year:

- Gross velocity, as measured in miles per hour, improved 22%;
- Terminal dwell, as measured in hours, improved 16%;
- Average train length in feet grew 3%;
- Car miles per day improved 19%; and
- Fuel efficiency as measured in gallons per 1,000 GTM's, improved 4%.

See page 111 for metric definitions and calculations.

Improved velocity and cycle times also have allowed the Company to reduce its active locomotive fleet by 16% from its Q4 2018 peak, and to reduce its system car fleet by 12% from the beginning of the year. We also redesigned our service in Mexico to improve asset efficiency, locomotive utilization and customer service. Mexico's mix of business skews heavily towards manifest, automotive and intermodal shipments. That mix allowed us to leverage general-purpose trains to forward like-destined railcars further into the network before the next work event. In doing so, we were able to make greater use of our facilities farther south in the network, freeing up critical capacity in central and northern Mexico.

And there is more to come. As we continue to 'peel the onion' as Mr. Fahmy would say, we find more room for improvement and additional ways to

optimize our operations for the benefit of our customers and our stockholders.

This heightened focus and discipline is truly becoming institutionalized and, with Mr. Fahmy's experienced leadership, a tremendous amount of learning has taken place. I have high confidence that this broad-based, cross-functional approach to PSR transformation will allow us to sustain this performance over the long-term.

Capital Allocation & Commitment to Stockholder Returns

KCS remains committed to safe and sustainable growth, and to the judicious and strategic use of its capital resources. To that end, the implementation of PSR is facilitating more efficient operations, and we are able to handle the same amount of traffic or more with fewer resources. We now need fewer locomotives and rail cars, and improvements to dwell and velocity are increasing yard and line-of-road capacity across the network. Our reduced capital intensity, combined with continued growth in operating income driven by the powerful combination of revenue growth and margin improvement, is positioning the Company for growth in stockholder value.

To reinforce our commitment to returning meaningful cash to our stockholders while maintaining a strong balance sheet and optimal credit profile, we announced a new capital allocation policy in November 2019:

- Approximately 40-50% of available cash deployed to capital projects and strategic investments;
- Approximately 50-60% of available cash deployed to share repurchases and dividends;
- Debt-to-EBITDA ratio maintained in the low 2x range.

KCS immediately executed on this policy with an 11% increase in its common stock quarterly dividend, and a new $2.0 billion share repurchase program that expires December 31, 2022. Simultaneously, the Company raised $850 million through a new senior note offering, and entered into a $550 million accelerated share repurchase program to complete $550 million of the $2 billion share repurchase authority.

The combination of share repurchases, dividends and accelerated share repurchases combined for a 118% increase in shareholder returns in 2019, accomplished while maintaining our targeted BBB credit rating and low 2x leverage ratio*.

U.S. – Mexico – Canada Agreement ("USMCA")

We are extremely pleased that the USMCA has now been approved in the U.S., Mexico, and Canada.

This agreement represents a modernization and improvement to the North American Free Trade Agreement ("NAFTA"), which was approved more than a quarter-century ago. Perhaps most importantly, USMCA removes uncertainty, and paves the path for new domestic and foreign investment driven by growth in trade between the U.S. and Mexico.

During this time of renegotiation, it is important to highlight that KCS never altered its capital investment strategy in Mexico. Since 2016, KCS' cross-border franchise volumes grew at an 11% CAGR. Our customers continued to do business in Mexico and we remained a supportive transportation partner. Acting as a voice for our customers, KCS also provided leadership and direction in influencing the new agreement. Looking forward, we will continue to be an outspoken advocate for integration of North American supply chains and their importance to our continent's global competitiveness.

Corporate Responsibility & Purpose

KCS is committed to making a meaningful contribution to the economic growth and prosperity of the nations and communities that we serve. We recognize the important role that a corporation plays in society, and we operate our business for the benefit all stakeholders, including our valued customers and stockholders, hardworking and dedicated employees, and the communities that we serve. We are mindful of the role that all of these stakeholders play in KCS's success, and we are committed to operating a railroad that benefits each of them.

KCS's commitment to corporate responsibility was highlighted by the following achievements and recognitions in 2019:

- Our fuel efficiency improved 4%, and through our fuel conservation and efficiency initiatives, we avoided the use of 14.5M gallons of diesel fuel, or 9.8% of total fuel consumption;
- 86% of respondents to our employee engagement and satisfaction survey recommend KCS as a great place to work;
- 46% of KCS's non-union new hires in the U.S. were women and/or people of color;
- 30% of our board of directors is female and 50% is ethnically or gender diverse;
- KCS achieved AA and B scores from MSCI and CDP, respectively;
- The Company was included in Newsweek magazine's first-ever ranking of America's Most Responsible Companies 2020, and Investor's Business Daily magazine's 50 Best ESG Companies.

We are excited to share these achievements with our stockholders because they are solid evidence of the Company's dedication to corporate responsibility, purpose and sustainability.

Looking Forward

2019 was a year of record achievements. But none of these achievements would have been possible without the women and men of KCS who worked tirelessly for the Company. Transformation is both difficult and uncomfortable; our employees responded to the challenge with extraordinary dedication and effort.

As we are finalizing this letter, the global business community is scrambling to respond to the coronavirus pandemic and the rapid outbreak of COVID-19. As of the date of this letter there are more questions than answers, and it is too early to know what impact this global health crisis will have on our business and outlook, or on society as a whole. I would like to remind you that Kansas City Southern has never been in better financial condition. Our debt ratings are solidly investment grade and our liquidity profile is very strong. Furthermore, the discipline and focus that we have institutionalized as part of our PSR transformation will serve us well as we respond to changing business conditions and the economic impact of the coronavirus pandemic.

KCS is on an exciting path. We have more opportunity to grow and improve our cost structure. I have never been more confident in the Company's future, or the opportunity to achieve our vision of industry-leading growth.

Item 1. ***Business***

COMPANY OVERVIEW

Kansas City Southern, a Delaware corporation, is a holding company with domestic and international rail operations in North America that are strategically focused on the growing north/south freight corridor connecting key commercial and industrial markets in the central United States with major industrial cities in Mexico. As used herein, "KCS" or the "Company" may refer to Kansas City Southern or, as the context requires, to one or more subsidiaries of Kansas City Southern. KCS and its subsidiaries had approximately 7,040 employees on December 31, 2019.

KCS controls and owns all of the stock of The Kansas City Southern Railway Company ("KCSR"), a U.S. Class I railroad founded in 1887. KCSR serves a ten-state region in the midwest and southeast regions of the United States and has the shortest north/south rail route between Kansas City, Missouri and several key ports along the Gulf of Mexico in Alabama, Louisiana, Mississippi and Texas.

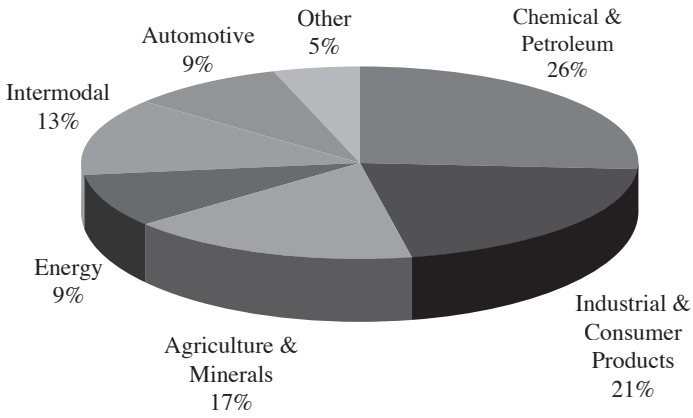
KCS controls and owns all of the stock of Kansas City Southern de México, S.A. de C.V. ("KCSM"). Through its 50-year concession from the Mexican government (the "Concession"), which could expire in 2047 unless extended, KCSM operates a key commercial corridor of the Mexican railroad system and has as its core route the most strategic portion of the shortest, most direct rail passageway between Mexico City and Laredo, Texas. Laredo is a principal international gateway through which a substantial portion of rail and truck traffic between the United States and Mexico crosses the border. KCSM serves most of Mexico's principal industrial cities and three of its major seaports. KCSM's rail lines provide exclusive rail access to the United States and Mexico border crossing at Nuevo Laredo, Tamaulipas. Under the Concession, KCSM has the right to use and operate the southern half of the rail bridge at Laredo, Texas, which spans the Rio Grande River between the United States and Mexico. The Company owns the northern half of this bridge through its ownership of Mexrail, Inc. ("Mexrail").

KCSM also provides exclusive rail access to the port of Lazaro Cardenas on the Pacific Ocean. The Mexican government developed the port at Lazaro Cardenas principally to serve Mexican markets and as an alternative to the U.S. west coast ports for Asian and South American traffic bound for North America.

The Company wholly owns Mexrail which, in turn, wholly owns The Texas Mexican Railway Company ("Tex-Mex"). Tex-Mex owns a 157-mile rail line extending from Laredo, Texas to the port city of Corpus Christi, Texas, which connects the operations of KCSR with KCSM.

The KCS coordinated rail network (KCSR, KCSM and Tex-Mex) comprises approximately 6,700 route miles extending from the midwest and southeast portions of the United States south into Mexico and connects with all other Class I railroads, providing shippers with an effective alternative to other railroad routes and giving direct access to Mexico and the southeast and southwest United States through alternate interchange hubs.

Panama Canal Railway Company ("PCRC"), an unconsolidated joint venture company owned equally by KCS and Mi-Jack Products, Inc. ("Mi-Jack"), was awarded a concession from the Republic of Panama to reconstruct and operate the Panama Canal Railway, a 47-mile railroad located adjacent to the Panama Canal that provides international container shipping companies with a railway transportation alternative to the Panama Canal. The concession was awarded in 1998 for an initial term of 25 years with an automatic renewal for an additional 25-year term. The Panama Canal Railway is a north-south railroad traversing the isthmus of Panama between the Atlantic and Pacific oceans.



Other subsidiaries and affiliates of KCS include the following:

- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned and consolidated subsidiary that provides employee services to KCSM;
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate that owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway." Norfolk Southern Corporation, through its wholly-owned subsidiary, The Alabama Great Southern Railroad Company, owns the remaining thirty percent of MSLLC;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and

- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for the deployment of Positive Train Control ("PTC"). See Government Regulation section for further information regarding PTC.

MARKETS SERVED

2019 Revenues
Business Mix

Chemical and petroleum. This commodity group includes products such as chemicals, plastics, petroleum, liquefied petroleum gas, and petroleum refined products, such as gasoline and diesel. KCS transports these products across its network and through interchanges with other rail carriers. The chemical and plastic products are used in the automotive, housing and packaging industries as well as in general manufacturing. KCS hauls petroleum products across its network and as U.S. petroleum refineries have continued to increase their refining capacity, they have coordinated with KCS to develop additional long-term storage opportunities which complement a fluid freight railroad operation.

Industrial and consumer products. This commodity group includes forest products as well as metals and scrap. Forest products consist of shipments to and from paper and lumber mills in the southeast United States timber-producing region that KCS serves directly and indirectly through its various short-line connections. The United States is an important source of pulp paper and scrap paper for Mexico that ships rail through our network. Metals and scrap consist of shipments of flat steel and long product as well as other minor moves of ores such as iron, zinc and copper. The majority of steel produced and metallic ore mined in Mexico are consumed within Mexico. Steel slab is used to make steel coils and plate-products that usually ship via rail. Higher-end finished products such as steel coils are used by Mexican manufacturers in automobiles, household appliances, the oil and gas industry, and other consumer goods that are imported from the United States through land borders and the seaports served by KCS's rail network. KCS also transports steel coils, plates and pipe from U.S. and Mexican-based mini-mills to locations in the U.S. and Mexico for oil drilling, appliance and automotive applications. This commodity group also includes U.S. military transports, Mexico and U.S. domestic cement shipments and appliances manufactured in Mexico that are imported into the United States.

Agriculture and minerals. The agriculture and minerals commodity group consists primarily of grain and food products. Shipper demand for agriculture products is affected by competition among sources of grain and grain products, as well as price fluctuations in international markets for key commodities. In the United States, KCS's rail lines receive and originate shipments of grain and grain products for delivery to feed mills, food and industrial consumers in the U.S. and Mexico. United States export grain shipments and Mexico import grain shipments include primarily corn, wheat, and soybeans. Food products consist mainly of soybean meal, grain meal, oils, distillers dried grains, corn syrup and sugar. Other shipments consist of a variety of products including ores, minerals, clay and glass used across North America.

Energy. The energy commodity group includes coal, frac sand, petroleum coke and crude oil. KCS hauls unit trains (trains transporting a single commodity from one source to one destination) of coal for electric generating plants in the central United States. The coal originates from the Powder River Basin in Wyoming and is interchanged to KCS at Kansas City, Missouri. Coal mined in the midwest United States is transported in non-unit trains to industrial consumers such as paper mills, steel mills, and cement companies. Frac sand originating primarily in Wisconsin, Illinois or Iowa is delivered to transloads located in northeast Texas, northern Louisiana and south Texas for distribution to gas and oil wells in the region. KCS transports petroleum coke from refineries in the United States to various industries in the U.S. and Mexico including export through the Pabtex terminal located in Port Arthur, TX. The majority of crude by rail business originates in Canada, with spot

shipments coming from west Texas, and is delivered to U.S. Gulf Coast refineries and tank farms in Texas, Louisiana, and Alabama.

Intermodal. The intermodal freight sector consists primarily of hauling freight containers or truck trailers on behalf of steamship lines, motor carriers, and intermodal marketing companies with rail carriers serving as long-distance haulers. KCS serves and supports the U.S. and Mexican markets, as well as cross-border traffic between the U.S. and Mexico. In light of the importance of trade between Asia and North America, the Company believes the Port of Lazaro Cardenas continues to be a strategically beneficial location for ocean carriers, manufacturers and retailers. Equally important, the foreign direct investment in Mexico has caused the KCS Mexico/U.S. cross border corridor to emerge as an increasingly important tool for the freight flow. The Company also provides premium service to customers over its line from Dallas through the Meridian Speedway— a critical link in creating the most direct route between the southwest and southeast/northeast U.S.

Automotive. KCS provides rail transportation to every facet of the automotive industry supply chain, including automotive manufacturers, assembly plants and distribution centers throughout North America. In addition, KCS transports finished vehicles imported and exported to and from various countries through a distribution facility at the Port of Lazaro Cardenas.

GOVERNMENT REGULATION

The Company's United States operations are subject to federal, state and local laws and regulations generally applicable to all businesses subject to federal preemption under certain circumstances. Rail operations are also subject to the regulatory jurisdiction of the Surface Transportation Board ("STB"), the Federal Railroad Administration ("FRA") and the Pipeline and Hazardous Materials Safety Administration ("PHMSA") of the U.S. Department of Transportation ("DOT"), the Occupational Safety and Health Administration ("OSHA"), as well as other federal and state regulatory agencies. The STB has jurisdiction over disputes and complaints involving certain rates and charges, routes and services, the sale or abandonment of rail lines, applications for line extensions and construction, and consolidation or merger with, or acquisition of control of, rail common carriers. DOT and OSHA each has jurisdiction under several federal statutes over a number of safety and health aspects of rail operations, including the transportation of hazardous materials. In 2008, the President of the United States signed the Rail Safety Improvement Act of 2008 into law, which, among other things, revised hours of service for train and certain other employees and mandated implementation of PTC at certain locations by the end of 2015. PTC is a technology designed to help prevent train-to-train collisions, overspeed derailments, incursions into rail work zones, and entry into main line track if a switch is misaligned at certain locations, including main line track where toxic inhalation hazard or poison inhalation hazard movements occur or where passenger operations occur. The Surface Transportation Extension Act of 2015 amended the PTC deadline set by the Rail Safety Improvement Act of 2008 to require implementation of PTC by the end of 2018, which was extended to December 31, 2020 for KCS, as certain other criteria were satisfied. By the end of 2018, the Company implemented PTC on all required sections of its rail network, locomotives and wayside assets. The implementation of PTC increased operating costs, and the number of employees the Company employs, and has required significant investments in new safety technology. The Company will continue to work with the Class I freight railroads and Amtrak to complete interoperability on or before December 31, 2020 and will continue to make investments in new safety technology.

KCS's U.S. subsidiaries are subject to extensive federal, state and local environmental regulations. These laws cover discharges to water, air emissions, toxic substances, and the generation, handling, storage, transportation and disposal of waste and hazardous materials. These regulations have the effect of increasing the costs, risks and liabilities associated with rail operations. Environmental risks are also inherent in rail operations, which frequently involve transporting chemicals and other hazardous materials.

Primary regulatory oversight of the Company's Mexican operations is provided by the Mexican Agencia Reguladora del Transporte Ferroviario ("Regulatory Agency of Rail Transportation" or "ARTF"). The ARTF establishes regulations concerning railway safety and operations, and is responsible for resolving disputes between railways and customers. KCSM must register its maximum rates with the ARTF and make regular reports to the ARTF and the Secretaría de Comunicaciones y Transportes ("Secretary of Communications and Transportation" or "SCT"). KCSM must provide reports on investments, traffic volumes, theft and vandalism on the general right of way, customer complaints, fuel consumption, number of locomotives, railcars and employees, and activities around maintenance of way, sidings and spurs, among other financial information and reports. The Company may freely set rates on a non-discriminatory basis. At any time, the ARTF may request additional information regarding the determination of such rates and may issue recommendations with respect to proposed rate increases. If the ARTF or another party considers there to be no effective competition, they may request an opinion from the Comisión Federal de

Competencia Económica ("Mexican Antitrust Commission" or "COFECE") regarding market conditions. If the COFECE determines that there is no effective competition for particular movements, the ARTF could set rates for those movements or grant limited trackage rights to another railroad while the condition of no effective competition remains.

KCSM holds a Concession from the Mexican government until June 2047 (exclusively through 2027, subject to certain trackage and haulage rights granted to other concessionaires), which is renewable under certain conditions for additional periods of up to 50 years. The Concession authorizes KCSM to provide freight transportation services over north-east rail lines which are a primary commercial corridor of the Mexican railroad system. KCSM is required to provide freight railroad services to all users on a fair and non-discriminatory basis and in accordance with efficiency and safety standards approved periodically by the Mexican government. KCSM has the right to use, but does not own, all track and buildings that are necessary for the rail lines' operation. KCSM is obligated to maintain the right of way, track structure, buildings and related maintenance facilities to the operational standards specified in the Concession agreement and to return the assets in that condition at the end of the Concession period. During the remainder of the Concession period, KCSM is required to pay the Mexican government an annual concession duty equal to 1.25% of gross revenues. The ARTF may request information to verify KCSM´s compliance with the Concession and any applicable regulatory framework.

The Company's Mexican operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment through the establishment of standards for water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. The Mexican government may bring administrative and criminal proceedings and impose economic sanctions against companies that violate environmental laws, and temporarily or even permanently close non-complying facilities.

Noncompliance with applicable legal provisions may result in the imposition of fines, temporary or permanent shutdown of operations or other injunctive relief, criminal prosecution or, with respect to KCSM, the termination of the Concession. KCS maintains environmental provisions that are believed by management to be appropriate with respect to known and existing environmental contamination of its properties that KCS may be responsible to remedy.

Government regulations are further discussed within Item 7, Management's Discussion and Analysis of Financial Information and Results of Operations — Other Matters.

COMPETITION

The Company competes against other railroads, many of which are much larger and have significantly greater financial and other resources. The railroad industry in North America is dominated by a few very large carriers. The larger U.S. western railroads (BNSF Railway Company and Union Pacific Railroad Company), in particular, are significant competitors of KCS because of their substantial resources and competitive routes.

In Mexico, KCSM's operations are subject to competition from other railroads, particularly Ferrocarril Mexicano, S.A. de C.V. ("Ferromex") and Ferrosur, S.A. de C.V. ("Ferrosur"), both controlled by Grupo Mexico S.A.B. de C.V. Ferromex and Ferrosur together are much larger and have significantly greater financial and other resources than KCSM, serving most of the major ports and cities in Mexico and together owning fifty percent of FTVM, which serves industries located in the Mexico City area.

The ongoing impact of past and future rail consolidation is uncertain. However, KCS believes that its investments and strategic alliances continue to competitively position the Company to attract additional rail traffic throughout its rail network.

The Company is subject to competition from motor carriers, barge lines and other maritime shipping, which compete across certain routes in KCS's operating areas. In the past, truck carriers have generally eroded the railroad industry's share of total transportation revenues. Intermodal traffic and certain other traffic face highly price sensitive competition, particularly from motor carriers. However, rail carriers, including KCS, have placed an emphasis on competing in the intermodal marketplace and working with motor carriers to provide end-to-end transportation of products.

While deregulation of U.S. freight rates has enhanced the ability of railroads to compete with each other and with alternative modes of transportation, this increased competition has generally resulted in downward pressure on freight rates since deregulation. Competition with other railroads and other modes of transportation is generally based on the rates charged, the quality and reliability of the service provided and the quality of the carrier's equipment for certain commodities.

RAIL SECURITY

The Company and its rail subsidiaries have continued to research, develop and implement multidisciplinary approaches to secure the Company's assets and personnel against transnational criminal organizations that actively target transportation networks. In addition, the Company has developed a variety of vertically integrated strategies to mitigate the risk terrorist attacks could pose to the Company, its personnel and assets. Many of the specific measures the Company utilizes for these efforts are required to be kept confidential through arrangements with government agencies, such as the Department of Homeland Security ("DHS"), or through jointly-developed and implemented strategies and plans with connecting carriers.

KCSR and KCSM developed a proprietary security plan based on an industry-wide plan developed by the Association of American Railroads ("AAR") members which focuses on comprehensive risk assessments in five areas — hazardous materials; train operations; critical physical assets; military traffic; and information technology and communications. The security plan is kept confidential, with access to the plan tightly limited to members of management with direct security and anti-terrorism implementation responsibilities. The Company participates with other AAR members in periodic drills under the industry plan to test and refine its various provisions.

The Company also uses information technology in various ways in its operations. The risks associated with this technology from cyber attacks has increased in recent years. The Company continues to monitor these threats and attempted cyber attacks, and has put in place various safeguards to protect the Company's operations as well as its assets and digital information from cyber attacks.

To protect the confidentiality and sensitivity of both the AAR plans and the proprietary strategies the Company has developed to safeguard against criminal enterprises, terrorism, and other security and safety threats, the following paragraphs will provide only a general overview of some of these efforts.

The Company's security activities range from periodically providing security awareness updates to KCS employees and including safety and security information on the Company's internet website (which can be found under the "Corporate Responsibility" tab at www.kcsouthern.com) to its ongoing implementation of security plans for rail facilities in areas labeled by the DHS as High Threat Urban Areas ("HTUAs"). The Company's other activities to bolster security against terrorism include, but are not limited to, the following:

- Conferring regularly with other railroads' security personnel and with industry experts on security issues;
- Routing shipments of certain chemicals, which might be toxic if inhaled, pursuant to federal regulations;
- Initiating a series of over 20 voluntary action items agreed to between AAR and DHS as enhancing security in the rail industry;
- Conducting constant and targeted security training as part of the scheduled training for operating employees and managers;
- Developing smartphone applications to ensure immediate information, live video and pictures from security supervisors and protection assets pertaining to potential operational risks;
- Developing a multi-layered security model using high-speed digital imaging, system velocity and covert and overt security filters to mitigate the risk of illicit activity;
- Measuring key security metrics to ensure positive risk mitigation and product integrity trends;
- Performing constant due diligence with the existing security model and by benchmarking rail security, including cyber security, on a world-wide basis to monitor threat streams related to rail incidents;
- Implementing a Tactical Intelligence Center by KCSM, which provides constant training with core members in new technology helping to prevent, detect, deter, deny and respond to potentially illicit activities; and
- Deploying an array of non-intrusive technologies including, but not limited to, digital video surveillance and analytics as part of an intelligent video security solution, including a closed circuit television platform with geo-fencing for intrusion detection, to allow for remote viewing access to monitor ports of entry, intermodal and rail yards.

In addition, the Company utilizes dedicated security personnel with extensive special operations forces, intelligence, and law enforcement backgrounds to oversee the ongoing and increasingly complex security efforts of the Company in both the United States and Mexico. While the risk of theft and vandalism is higher in Mexico, KCSM remains among the safest methods of transportation for freight shipments in Mexico. KCSM's record in rail safety is due in large part to the implementation of a

multi-layered safety and security process throughout the KCSM network. In addition to having its own internal system, the process is connected to, and supported by a high level of federal, state and local law enforcement. A primary focus of this effort involves maintaining constant diligence, intelligence and counterintelligence operations, technology-reporting applications and active vigilance while enhancing overall system velocity, which reduces the residual risk for incidents to occur.

RAILWAY LABOR ACT

Labor relations in the U.S. railroad industry are subject to extensive governmental regulation under the Railway Labor Act ("RLA"). Under the RLA, national labor agreements are renegotiated on an industry-wide scale when they become open for modification, but their terms remain in effect until new agreements are reached or the RLA's procedures (which include mediation, cooling-off periods, and the possibility of presidential intervention) are exhausted. Contract negotiations with the various unions generally take place over an extended period of time and the Company rarely experiences work stoppages during negotiations. Wages, health and welfare benefits, work rules and other issues have traditionally been addressed during these negotiations.

COLLECTIVE BARGAINING

Over 70% of KCSR employees are covered by collective bargaining agreements. These agreements do not have expiration dates, but rather remain in place until modified by subsequent agreements. KCSR participates in industry-wide multi-employer bargaining as a member of the National Carriers' Conference Committee (the "NCCC"), as well as local bargaining for agreements that are limited to KCSR's property. Multi-employer agreements are subject to a procedure that allows requests for changes to be served every five years. Long-term agreements were reached voluntarily or through the arbitration process during 2017 and 2018 covering all of the participating unions. The terms of these agreements will remain in effect until new agreements are reached in the next bargaining round. In November 2019, KCSR and its unions commenced negotiations in connection with the 2020 bargaining round.

KCSM Servicios union employees are covered by one labor agreement, which was signed on April 16, 2012, between KCSM Servicios and the Sindicato de Trabajadores Ferrocarrileros de la República Mexicana ("Mexican Railroad Union"), and which remains in effect during the period of the Concession, for the purpose of regulating the relationship between the parties. Over 75% of KCSM Servicios employees are covered by this labor agreement. The compensation terms under this labor agreement are subject to renegotiation on an annual basis and all other benefits are subject to negotiation every two years. The union labor negotiations with the Mexican Railroad Union have not historically resulted in any strike, boycott or other disruption in KCSM's business operations. During the third quarter of 2018, the compensation terms for the period covering July 1, 2018, to June 30, 2019, were finalized between KCSM Servicios and the Mexican Railroad Union. The parties are currently negotiating compensation terms and benefits that will apply from July 1, 2019 to June 30, 2020. The finalization of the compensation terms is not expected to have a significant effect on the consolidated financial statements.

INFORMATION ABOUT EXECUTIVE OFFICERS

All executive officers are elected annually and serve at the discretion of the Board of Directors. All of the executive officers have employment agreements with KCS and/or its subsidiaries.

Patrick J. Ottensmeyer — President and Chief Executive Officer— 62 — Served in this capacity since July 1, 2016. Mr. Ottensmeyer has been a director of KCS since July 1, 2016 and served as President of KCS since March 1, 2015. He served as Executive Vice President Sales and Marketing of KCS from October 16, 2008 through March 1, 2015. Mr. Ottensmeyer joined KCS in May 2006 as Executive Vice President and Chief Financial Officer.

Warren K. Erdman — Executive Vice President — Administration and Corporate Affairs — 61 — Served in this capacity since April 2010. Mr. Erdman served as Executive Vice President — Corporate Affairs from October 2007 until April 2010. He served as Senior Vice President — Corporate Affairs of KCS and KCSR from January 2006 to September 2007. Mr. Erdman served as Vice President — Corporate Affairs of KCS from April 15, 1997 to December 31, 2005 and as Vice President — Corporate Affairs of KCSR from May 1997 to December 31, 2005. Prior to joining KCS, Mr. Erdman served as Chief of Staff to United States Senator Kit Bond of Missouri from 1987 to 1997.

Brian D. Hancock — Executive Vice President and Chief Innovation Officer — 54 — Served in this capacity since October 1, 2018. Mr. Hancock served as Executive Vice President and Chief Marketing Officer from August 2015 until September 2018. Prior to joining KCS, Mr. Hancock served as Senior Vice President of Supply Chain for Family Dollar Stores, Inc., a variety store chain, from 2013 to July 2015. From 2011 to 2013, Mr. Hancock served as President – North America for

The Martin – Brower Company, L.L.C. From 2005 to 2011, he served as Vice President – Global Supply Chain for Whirlpool Corporation.

Jeffrey M. Songer — Executive Vice President and Chief Operating Officer — 50 — Served in this capacity since March 2016. Mr. Songer served as Senior Vice President Engineering and Chief Transportation Officer of the Company from August 2014 to February 2016 and as Vice President and Chief Engineer for KCSR from June 2012 to July 2014. Prior to serving as KCSR's Vice President and Chief Engineer, Mr. Songer served as Assistant Vice President — Engineering and Planning from March 2011 to June 2012, and as its General Director — Planning, Scheduling & Administration from January 2007 to March 2011.

Michael W. Upchurch — Executive Vice President and Chief Financial Officer — 59 — Served in this capacity since October 16, 2008. Mr. Upchurch joined KCS in March 2008 as Senior Vice President Purchasing and Financial Management. From 1990 through September 2006, Mr. Upchurch served in various senior financial leadership positions at Sprint Corporation, a telecommunications company, including Senior Vice President Financial Operations, Senior Vice President Finance Sprint Business Solutions and Senior Vice President Finance Long Distance Division.

José Guillermo Zozaya Delano — President and Executive Representative — KCSM — 67 — Served in this position since April 20, 2006. Mr. Zozaya has 35 years of experience in law and government relations, most recently as the Legal and Government Relations Director for ExxonMobil México, S.A. de C.V., a leading petrochemical company, where he spent nine years prior to joining KCSM.

Lora S. Cheatum — Senior Vice President — Human Resources — 63 — Served in this capacity since joining KCS in October 2014. Ms. Cheatum previously served as Senior Vice President Global Human Resources of Layne Christensen Company, a global water management, construction, and drilling company, from 2012 to October 2014. From 2010 to 2012, she served as Director — Field Operations at Fitness Together Holdings, Inc. Ms. Cheatum spent nine years with Kansas City Power & Light, from 2001 to 2010, where she was Vice President of Procurement and previously as Vice President Human Resources.

Michael J. Naatz — Executive Vice President and Chief Marketing Officer — 54 — Served in this capacity since October 1, 2018. Mr. Naatz served as Senior Vice President Operations Support and Chief Information Officer from August 2014 until September 2018 and as Senior Vice President and Chief Information Officer of the Company from May 2012 to July 2014. Prior to joining KCS, Mr. Naatz served as President of USF Holland, a YRC Worldwide, Inc. ("YRCW") company, a leading provider of transportation and global logistics services, from 2011 to May 2012. From 2010 to 2011, Mr. Naatz served as President and Chief Customer Officer - Customer Care Division at YRCW. From 2008 to 2010, he served as Executive Vice President and Chief Information & Service Officer at YRCW. From 2005 to 2007, he served as President — Enterprise Services Division at YRCW. From 1994 to 2005, he held various leadership positions with USF Corporation.

Suzanne M. Grafton — Vice President and Chief Accounting Officer — 44 — Served in this capacity since July 24, 2017. Ms. Grafton served as Vice President of Audit and Enterprise Risk Management of the Company from April 2016 to July 2017 and as Vice President of Accounting from May 2014 to March 2016. From September 2006 to May 2014, Ms. Grafton served in various accounting leadership positions at KCS.

Adam J. Godderz — General Counsel and Corporate Secretary — 45 — Served in this capacity since January 1, 2019. Mr. Godderz served as Associate General Counsel and Corporate Secretary of the Company from June 2018 to December 2018 and as Vice President of Labor Relations and Corporate Secretary from November 2015 to May 2018. From January 2013 to November 2015, Mr. Godderz served as Associate General Counsel and Corporate Secretary. From September 2007 to January 2013, Mr. Godderz served as Associate General Counsel at KCS.

AVAILABLE INFORMATION

KCS's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, and amendments to those reports, are available for download at no cost on KCS's website (www.investors.kcsouthern.com) as soon as reasonably practicable after the electronic filing of these reports is made with the Securities and Exchange Commission. In addition, KCS's corporate governance guidelines, ethics and legal compliance policy, and the charters of the Audit Committee, the Finance and Strategic Investments Committee, the Nominating and Corporate Governance Committee and the Compensation and Organization Committee of the Board of Directors are available on KCS's website.

See Item 8, Financial Statements and Supplementary Data — Note 1, Description of the Business and Note 20, Geographic Information for more information on the description and general development of the Company's business and financial information about geographic areas.

Item 1A. Risk Factors

KCS U.S. and Mexico rail common carrier subsidiaries are required by United States and Mexican laws, respectively, to transport hazardous materials, which could expose KCS to significant costs and claims.

Under United States federal statutes and applicable Mexican laws, KCS's common carrier responsibility requires it to transport hazardous materials. Any rail accident or other incident or accident on KCS's network, facilities, or at the facilities of KCS's customers involving the release of hazardous materials, including toxic inhalation hazard materials, could involve significant costs and claims for personal injury, property or natural resource damage, and environmental penalties and remediation in excess of the Company's insurance coverage for these risks, which could have a material adverse effect on KCS's consolidated financial statements. KCS is also required to comply with rules and regulations regarding the handling of hazardous materials. Noncompliance with these rules and regulations could subject KCS to significant penalties or other costs and exposure to litigation. Changes to these rules and regulations could also increase operating costs and negatively impact KCS's consolidated financial statements.

KCS's business is subject to regulation by federal, state and local legislatures and agencies that could impose significant costs on the Company's business operations.

KCS rail subsidiaries are subject to legislation and regulation enacted by federal, state and local legislatures and agencies in the U.S. and Mexico with respect to railroad operations, including with respect to health, safety, labor, environmental and other areas. Government regulation of the railroad industry is a significant determinant of the competitiveness and profitability of railroads. Changes in legislation or regulation could have a negative impact on KCS's ability to negotiate prices for rail services, could negatively affect competition among rail carriers, or could negatively impact operating practices, resulting in reduced efficiency, increased operating costs or increased capital investment, all of which could result in a material adverse effect on KCS's consolidated financial statements.

New economic regulation in the U.S. or Mexico in current or future proceedings could change the regulatory framework within which the Company operates which could materially change the Company's business and have a material adverse effect on the Company's consolidated financial statements.

As part of the Rail Safety Improvement Act of 2008 in the United States, Class I railroad carriers and passenger and commuter rail operators must implement PTC, a technology designed to help prevent train-to-train collisions, overspeed derailments, incursions into rail work zones, and entry into main line track if a switch is misaligned. PTC is required to be implemented at certain locations, including main line track where toxic inhalation hazard movements regularly occur or where passenger operations occur. The Surface Transportation Extension Act of 2015 amended the PTC deadline set by the Rail Safety Improvement Act to require implementation of PTC by the end of 2018, which was extended to December 31, 2020 for KCS, as certain other criteria were satisfied. KCS's failure to meet deadlines, including any extension, could result in fines, service interruptions or penalties and could have a material adverse effect on the Company's consolidated financial statements.

KCS's failure or inability to comply with applicable laws and regulations could have a material adverse effect on the Company's consolidated financial statements and operations, including fines, penalties, or limitations on operating activities until compliance with applicable requirements is achieved. Congress and government agencies may change the legislative or regulatory framework within which the Company operates without providing any recourse for any adverse effects on the Company's business that occur as a result of such change. Additionally, some of the regulations require KCS to obtain and maintain various licenses, permits and other authorizations. Any failure to obtain or maintain these licenses, permits, and other authorizations could have a material adverse effect on KCS's business operations.

KCSM's Mexican Concession is subject to revocation or termination in certain circumstances, which would prevent KCSM from conducting rail operations under the Concession and would have a material adverse effect on the Company's consolidated financial statements.

KCSM operates under the Concession granted by the Mexican government until June 2047, which is renewable for an additional period of up to 50 years, subject to certain conditions. The Concession gives KCSM exclusive rights to provide freight transportation services over its rail lines through 2027 (the first 30 years of the 50-year Concession), subject to certain

trackage and haulage rights granted to other concessionaires. The SCT and ARTF, which are principally responsible for regulating railroad services in Mexico, have broad powers to monitor KCSM's compliance with the Concession, and they can require KCSM to supply them with any technical, administrative and financial information they request. Among other obligations, KCSM must comply with the investment commitments established in its business plan, which forms an integral part of the Concession, and must update the plan every three years. The SCT treats KCSM's business plans confidentially. The SCT and ARTF also monitor KCSM's compliance with efficiency and safety standards established in the Concession. The SCT and ARTF review, and may amend, these standards from time to time.

Under the Concession, KCSM has the right to operate its rail lines, but it does not own the land, roadway or associated structures. If the Mexican government legally terminates the Concession, it would own, control, and manage such public domain assets used in the operation of KCSM's rail lines. All other property not covered by the Concession, including all locomotives and railcars otherwise acquired, would remain KCSM's property. In the event of early termination, or total or partial revocation of the Concession, the Mexican government would have the right to cause the Company to lease all service-related assets to it for a term of at least one year, automatically renewable for additional one-year terms for up to five years. The amount of rent would be determined by experts appointed by KCSM and the Mexican government. The Mexican government must exercise this right within four months after early termination or revocation of the Concession. In addition, the Mexican government would also have a right of first refusal with respect to certain transfers by KCSM of railroad equipment within 90 days after revocation of the Concession.

The Mexican government may also temporarily seize control of KCSM's rail lines and its assets in the event of a natural disaster, war, significant public disturbance or imminent danger to the domestic peace or economy. In such a case, the SCT may restrict KCSM's ability to operate under the Concession in such manner as the SCT deems necessary under the circumstances, but only for the duration of any of the foregoing events. Mexican law requires that the Mexican government pay compensation if it effects a statutory appropriation for reasons of the public interest. With respect to a temporary seizure due to any cause other than international war, the Mexican Regulatory Railroad Service Law and regulations provide that the Mexican government will indemnify an affected concessionaire for an amount equal to damages caused and losses suffered. However, these payments may not be sufficient to compensate KCSM for its losses and may not be made timely.

The SCT may revoke the Concession if KCSM is sanctioned for the same cause at least three times within a period of five years for any of the following: unjustly interrupting the operation of its rail lines or for charging rates higher than those it has registered with the ARTF; unlawfully restricting the ability of other Mexican rail operators to use its rail lines; failing to make payments for damages caused during the performance of services; failing to comply with any term or condition of the Mexican Regulatory Railroad Service Law and regulations or the Concession; failing to make the capital investments required under its three-year business plan filed with the SCT; or failing to maintain an obligations compliance bond and insurance coverage as specified in the Mexican Regulatory Railroad Service Law and regulations. In addition, the Concession would terminate automatically if KCSM changes its nationality or assigns or creates any lien on the Concession, or if there is a change in control of KCSM without the SCT's approval. The SCT may also terminate the Concession as a result of KCSM's surrender of its rights under the Concession, or for reasons of public interest or upon KCSM's liquidation or bankruptcy. If the Concession is terminated or revoked by the SCT for any reason, KCSM would receive no compensation and its interest in its rail lines, and all other fixtures covered by the Concession, as well as all improvements made by it, would revert to the Mexican government. Revocation or termination of the Concession could have a material adverse effect on the Company's consolidated financial statements.

KCS's ownership of KCSM and operations in Mexico subject it to economic and political risks.

The Mexican government has exercised, and continues to exercise, significant influence over the Mexican economy. Accordingly, Mexican governmental actions concerning the economy and state-owned enterprises could have a significant impact on Mexican private sector entities in general and on KCSM's operations in particular. KCS cannot predict the impact that the political landscape, including multiparty rule and civil disobedience, will have on the Mexican economy. Furthermore, KCS's consolidated financial statements and prospects may be affected by currency fluctuations, inflation, interest rates, regulation, taxation and other political, social and economic developments in or affecting Mexico.

The Mexican economy in the past has suffered balance of payment deficits and shortages in foreign exchange reserves. Although Mexico has imposed foreign exchange controls in the past, there are currently no exchange controls in Mexico. Any restrictive exchange control policy could adversely affect KCS's ability to obtain U.S. dollars or to convert Mexican pesos

("pesos" or "Ps.") into dollars for purposes of making payments. This could have a material adverse effect on KCS's consolidated financial statements.

The social and political situation in Mexico could adversely affect the Mexican economy and changes in laws, public policies and government programs could be enacted, which could have a material adverse effect on KCS's consolidated financial statements.

KCS depends on the stability, availability and security of its information technology systems to operate its business. Disruptions in KCS's information technology ("IT") systems could materially adversely affect the Company's business and operating results.

KCS relies on information technology in all aspects of its business. A significant disruption or failure of its IT systems, including its computer hardware, software, communications equipment, wayside equipment or locomotive onboard equipment could result in service interruptions, safety failures, security failures, regulatory compliance failures or other operational difficulties. Moreover, if KCS is not able to acquire new technology or to develop or implement new technology, KCS may suffer a competitive disadvantage, which could have a material adverse effect on KCS's consolidated financial statements.

The security risks associated with IT systems have increased in recent years because of the increased sophistication, activities and evolving techniques of perpetrators of cyber attacks. A failure in, or breach of, KCS's IT security systems, or those of its third party service providers, as a result of cyber attacks or unauthorized access to its network could disrupt KCS's business, result in the disclosure or misuse of confidential or proprietary information, increase its costs and/or cause losses and reputational damage. KCS also confronts the risk that a terrorist or nation-state sponsored group may seek to use its property, including KCS's information technology systems, to inflict major harm.

Although we have a comprehensive cybersecurity program designed to protect and preserve the integrity of our information technology systems, we have experienced and expect to continue to experience attempted cyber attacks of our IT systems or networks. However, none of these attempted cyber attacks to date had a material impact on our operations or financial condition. While we devote significant resources to network security, data encryption and other security measures to protect our systems and data, including our own proprietary information and the confidential and personally identifiable information of our customers, employees, and business partners, these measures cannot provide absolute security. The costs to eliminate or alleviate network security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and KCS's efforts to address these problems may not be successful, resulting potentially in the theft, loss, destruction or corruption of information that KCS stores electronically, as well as unexpected interruptions, delays or cessation of service, any of which could cause harm to KCS's business operations. Moreover, if a computer security breach or cyber-attack affects KCS's systems or results in the unauthorized release of proprietary or personally identifiable information, the Company's reputation could be materially damaged, customer confidence could be diminished, and KCS's operations could be impaired.

A significant disruption, failure or unauthorized access of KCS's information technology system could expose the Company to a risk of legal proceedings and potential liability and have a material adverse effect on KCS's consolidated financial statements. Further, legislative or regulatory action in these areas is evolving, and KCS may be unable to adapt its IT systems or to manage the IT systems of third parties to accommodate these changes.

Capacity constraints could materially adversely affect service and operating efficiency.

KCS may experience capacity constraints due to increased demand for rail services, unavailability of equipment, crew shortages, or extreme weather. Also, due to the interconnectivity between all railroads, especially in the U.S., congestion on other railroads could result in operational inefficiencies for KCS. Traffic congestion experienced in the U.S. or Mexican railroad system may result in overall traffic congestion which would impact the ability to move traffic to and from Mexico, which could result in operational inefficiencies for KCS and could have a material adverse effect on KCS's operations.

Significant expansions in the capacity of the Company's network can require a substantial amount of time and investment. Although KCS constantly monitors its network in an effort to optimize its rail services, there can be no assurance that such measures will adequately address capacity constraints on a timely basis.

Downturns in the United States economy or in trade between the United States and Asia or Mexico and fluctuations in the peso-dollar exchange rates could have material adverse effects on KCS's consolidated financial statements.

The level and timing of KCS's Mexican business activity is heavily dependent upon the level of United States-Mexican trade and the effects of current or future multinational trade agreements on such trade. The Mexican operations depend on the United States and Mexican markets for the products KCSM transports, the relative position of Mexico and the United States in these markets at any given time, and tariffs or other barriers to trade. Failure to preserve free trade provisions, or any other action imposing import duties or border taxes, could negatively impact KCS customers and the volume of rail shipments, and could have a material adverse effect on KCS's consolidated financial statements.

Downturns in the United States or Mexican economies or in trade between the United States and Mexico could have material adverse effects on KCS's consolidated financial statements and the Company's ability to meet debt service obligations. In addition, KCS has invested significant amounts in developing its intermodal operations, including the Port of Lazaro Cardenas, in part to provide Asian importers with an alternative to the west coast ports of the United States, and the level of intermodal traffic depends, to an extent, on the volume of Asian shipments routed through Lazaro Cardenas. Reductions in trading volumes, which may be caused by factors beyond KCS's control, including increased government regulations regarding the safety and quality of Asian-manufactured products, could have a material adverse effect on KCS's consolidated financial statements.

Additionally, fluctuations in the peso-dollar exchange rates could lead to shifts in the types and volumes of Mexican imports and exports. Although a decrease in the level of exports of some of the commodities that KCSM transports to the United States may be offset by a subsequent increase in imports of other commodities KCSM hauls into Mexico and vice versa, any offsetting increase might not occur on a timely basis, if at all. Future developments in United States-Mexican trade beyond the Company's control may result in a reduction of freight volumes or in an unfavorable shift in the mix of products and commodities KCSM carries.

Extreme volatility in the peso-dollar exchange rate may result in disruption of the international foreign exchange markets and may limit the ability to transfer pesos or to convert pesos into U.S. dollars. Although the Mexican government currently does not restrict, and for many years has not restricted, the right or ability of Mexican or foreign persons or entities to convert pesos into U.S. dollars or to transfer foreign currencies out of Mexico, the Mexican government could, as in the past, institute restrictive exchange rate policies that could limit the ability to transfer or convert pesos into U.S. dollars or other currencies for the purpose of making timely payments and meeting contractual commitments. Devaluation or depreciation of the peso against the U.S. dollar may also adversely affect U.S. dollar prices for KCS's securities.

Fluctuations in the peso-dollar exchange rates also have an effect on KCS's consolidated financial statements. A weakening of the peso against the U.S. dollar would cause reported peso-denominated revenues and expenses to decrease, and could increase reported foreign exchange loss due to the Company's net monetary assets that are peso-denominated. Exchange rate variations also affect the calculation of taxes under Mexican income tax law, and a strengthening of the peso against the U.S. dollar could cause an increase in the Company's cash tax obligation and effective income tax rate.

Severe weather or other natural disasters could result in significant business interruptions and expenditures and our insurance coverage may not be sufficient to cover damages to us or all of our liabilities.

The Company's operations may be affected by severe weather or other natural disasters. The Company operates in and along the Gulf of Mexico, and its facilities may be materially adversely affected by hurricanes, floods, fires, earthquakes and other extreme weather conditions that could also adversely affect KCS's shipping, agricultural, chemical and other customers. Severe weather or other natural disasters could result in significant business interruption and could have a material adverse effect on KCS's consolidated financial statements. Insurance to protect against loss of business and other related consequences resulting from these natural occurrences is subject to coverage limitations and may not be sufficient to cover all of KCS's damages or damages to others. This insurance may not continue to be available at commercially reasonable rates. Even with insurance, if any natural occurrence leads to a catastrophic interruption of services, this could have a material adverse effect on KCS's consolidated financial statements.

KCS's business may be adversely affected by changes in general economic or other conditions.

KCS's operations may be materially adversely affected by changes in the economic conditions of the industries and geographic areas that produce and consume the freight that KCS transports. The relative strength or weakness of the United

States and Mexican economies affects the businesses served by KCS. A significant and sustained decrease in crude oil prices could adversely affect the transport of crude oil by rail to the U.S. Gulf region as well as negatively impact railroad volumes related to equipment and other materials that support crude oil production. Prolonged negative changes in domestic and global economic conditions or disruptions of either or both of the financial and credit markets, including the availability of short and long-term debt financing, may affect KCS, as well as the producers and consumers of the commodities that KCS transports and may have a material adverse effect on KCS's consolidated financial statements.

The transportation industry is highly cyclical, generally tracking the cycles of the world economy. Although transportation markets are affected by general economic conditions, there are numerous specific factors within each particular market that may influence operating results. Some of KCS's customers do business in industries that are highly cyclical, including the energy, automotive, housing and agriculture industries. Any downturn or change in government policy in these industries could have a material adverse effect on operating results. Also, some of the products transported have had a historical pattern of price cyclicality which has typically been influenced by the general economic environment and by industry capacity and demand. KCS cannot assure that prices and demand for these products will not decline in the future, adversely affecting those industries and, in turn, could have a material adverse effect on the Company's consolidated financial statements.

Significant reductions in the volume of rail shipments due to economic or other conditions could have a material adverse effect on KCS's consolidated financial statements.

KCS may be subject to various claims and litigation that could have a material adverse effect on KCS's consolidated financial statements.

The Company may be exposed to the potential of various claims and litigation related to labor and employment, personal injury, commercial disputes, freight loss and other property damage, and other matters that arise in the normal course of business. Any material changes to litigation trends or a catastrophic rail accident or series of accidents involving any or all of property damage, personal injury, and environmental liability could have a material adverse effect on KCS's consolidated financial statements.

KCS competes against other railroads and other transportation providers.

The Company's domestic and international operations are subject to competition from other railroads, as well as from truck carriers, barge lines, and other maritime shippers. Many of KCS's rail competitors are much larger and have significantly greater financial and other resources than KCS, which may enable rail competitors to reduce rates and make KCS's freight services less competitive. KCS's ability to respond to competitive pressures by matching rate reductions and decreasing rates without adversely affecting gross margins and operating results will depend on, among other things, the ability to reduce operating costs. KCS's failure to respond to competitive pressures, and particularly rate competition, in a timely manner could have a material adverse effect on the Company's consolidated financial statements.

The railroad industry is dominated by a few large carriers. These larger railroads could attempt to use their size and pricing power to block other railroads' access to gateways and routing options that are currently and have historically been available. In addition, if there is future consolidation in the railroad industry in the United States or Mexico, there can be no assurance that it will not have a material adverse effect on the Company's consolidated financial statements.

Trucking, maritime, and barge competitors provide rate and service competition to the railroad industry. These competitors are able to use public rights-of-way, require substantially smaller capital investment and maintenance expenditures than railroads and allow for more frequent and flexible scheduling. Continuing competitive pressures, any reduction in margins due to competitive pressures, developments that increase the quality or decrease the cost of alternative modes of transportation in the locations in which the Company operates, or legislation or regulations that provide motor carriers with additional advantages, such as increased size of vehicles and reduced weight restrictions, could result in downward pressure on freight rates, which in turn could have a material adverse effect on the Company's consolidated financial statements. KCS may also experience operational or service difficulties related to network capacity, fluctuations in customers' demand for rail service, or other events that could have a material adverse effect on KCS's consolidated financial statements.

A key part of KCS's growth strategy is based upon the conversion of truck traffic to rail. There can be no assurance the Company will succeed in its efforts to convert traffic from truck to rail transport or that the customers already converted will be retained. If the railroad industry in general is unable to preserve its competitive advantages vis-à-vis the trucking industry, revenue growth could be adversely affected. Additionally, revenue growth could be affected by, among other factors, an

expansion in the availability, or an improvement in the quality, of the trucking services offered by carriers resulting from regulatory and administrative interpretations and implementation of certain provisions of current or future multinational trade agreements, and KCS's inability to grow its existing customer base and capture additional cargo transport market share because of competition from the shipping industry and other railroads.

KCS's business strategy, operations and growth rely significantly on agreements with other railroads and third parties.

Operation of KCS's rail network and its plans for growth and expansion rely significantly on agreements with other railroads and third parties, including joint ventures and other strategic alliances, as well as interchange, trackage rights, haulage rights and marketing agreements with other railroads and third parties that enable KCS to exchange traffic and utilize trackage the Company does not own. KCS's ability to provide comprehensive rail service to its customers depends in large part upon its ability to maintain these agreements with other railroads and third parties, and upon the performance of the obligations under the agreements by the other railroads and third parties. The termination of, or the failure to renew, these agreements could have a material adverse effect on KCS's consolidated financial statements. KCS is also dependent in part upon the financial strength and efficient performance of other railroads. There can be no assurance that KCS would not be materially adversely affected by operational or financial difficulties of other railroads.

KCS is subject to environmental regulations, which may impose significant costs on the Company's business operations.

KCS subsidiaries' operations are subject to environmental regulation enacted by federal, state and local legislatures in the U.S. and Mexico. From time to time, certain KCS facilities have not been in and may not be in compliance with environmental health and safety laws and regulations and there can be no assurance that KCS will always be in compliance with such laws and regulations in the future. Environmental liability under federal and state law in the United States can also extend to previously owned or operated properties, leased properties and properties owned by third parties, as well as to properties currently owned and used by the Company. Environmental liabilities may also arise from claims asserted by adjacent landowners or other third parties. Given the nature of its business, the Company incurs, and expects to continue to incur, environmental compliance costs, including, in particular, costs necessary to maintain compliance with requirements governing chemical and hazardous material shipping operations, refueling operations and repair facilities. KCS presently has environmental investigation and remediation obligations at certain sites, and will likely incur such obligations at additional sites in the future.

The Company's Mexican subsidiaries' operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment, including standards for, among other things, water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. Under applicable Mexican law and regulations, administrative and criminal proceedings may be brought and economic sanctions imposed against companies that violate environmental laws, and non-complying facilities may be temporarily or permanently closed. KCSM is also subject to the laws of various jurisdictions with respect to the discharge of materials into the environment and to environmental laws and regulations issued by the governments of each of the Mexican states in which KCSM's facilities are located. The terms of KCSM's Concession from the Mexican government also impose environmental compliance obligations on KCSM. Failure to comply with any environmental laws or regulations may result in the termination of KCSM's Concession or in fines or penalties that may affect profitability.

Liabilities accrued for environmental costs represent the Company's best estimate of the probable future obligation for the remediation and settlement of matters related to these sites. However, remediation costs may exceed such estimates, due to various factors such as evolving environmental laws and regulations, changes in technology, the extent of other parties' participation, discovery of unidentified environmental conditions and matters, developments in environmental surveys and studies, and the extent of corrective action that may ultimately be required. The Company cannot predict the effect, if any, that unidentified environmental matters or the adoption of unknown additional or more stringent environmental laws and regulations would have on KCS's consolidated financial statements.

KCS's failure or inability to comply with applicable environmental laws and regulations could have a material adverse effect on the Company's consolidated financial statements and operations, including fines, penalties, or limitations on operating activities until compliance with applicable requirements is achieved. Government entities may change the legislative or regulatory framework within which the Company operates that could result in adverse effects on the Company's business that occur as a result of such change. Additionally, some of the regulations require KCS to obtain and maintain various licenses, permits and other authorizations. Any failure to obtain or maintain these licenses, permits, and other authorizations could have a material adverse effect on KCS's business operations.

KCS's business is vulnerable to fluctuations in fuel costs and disruptions in fuel supplies.

KCS incurs substantial fuel costs in its railroad operations and these costs represent a significant portion of its transportation expenses. Significant price increases for fuel may have a material adverse effect on operating results. If KCS is unable to recapture its costs of fuel from its customers, operating results could be materially adversely affected. In addition, a severe disruption of fuel supplies resulting from supply shortages, political unrest, a disruption of oil imports, weather events, war, or otherwise, and the resulting impact on fuel prices could have a material adverse effect on KCS's consolidated financial statements.

Weaknesses in the short and long-term debt markets could negatively impact the Company's access to capital.

Due to the significant capital expenditures required to operate and maintain a safe and efficient railroad, the Company regularly obtains financing through the issuance of long-term debt instruments and short-term commercial paper, as well as credit facilities provided by financial institutions. Significant, sustained instability or disruptions of the capital markets, including debt markets, or the deterioration of the Company's financial condition due to internal or external factors, could restrict or prohibit access and could increase the cost of financing sources. A significant deterioration of the Company's financial condition could also reduce credit ratings to below investment grade, limiting its access to external sources of capital, and increasing the costs of short and long-term debt financing, and could have a material adverse effect on KCS's consolidated financial statements.

KCS's business may be affected by climate change and the market and regulatory responses to climate change.

Climate change could have a material adverse effect on operations and KCS's consolidated financial statements. Restrictions, caps, taxes, or other controls on emissions of greenhouse gases, including diesel exhaust, could significantly impact operations and increase operating costs. Restrictions on emissions could also affect KCS's customers that use commodities that KCS transports to produce energy, use significant amounts of energy in producing or delivering the commodities KCS transports, or manufacture or produce goods that consume significant amounts of energy or burn fossil fuels, including coal-fired power plants, chemical producers, farmers and food producers, and automakers and other manufacturers. Significant cost increases, government regulation, or changes of consumer preferences for goods or services relating to alternative sources of energy or emissions reductions could materially affect the markets for the commodities KCS transports, which in turn could have a material adverse effect on KCS's consolidated financial statements. Government incentives encouraging the use of alternative sources of energy could also affect certain customers and their respective markets for certain commodities KCS transports in an unpredictable manner that could alter traffic patterns, including, for example, the impacts of ethanol incentives on farming and ethanol producers. Moreover, increasing frequency, intensity and duration of extreme weather events such as flooding, storms and fires may result in substantial costs, including costs associated with response during the event, recovery from the event and preventive measures. Any of these factors, individually or in conjunction with one or more of the other aforementioned factors, or other unforeseen impacts of climate change could have a material adverse effect on KCS's consolidated financial statements.

A majority of KCS's employees belong to labor unions. Strikes or work stoppages could adversely affect operations.

The Company is a party to collective bargaining agreements with various labor unions in the United States and Mexico. As of December 31, 2019, over 70% and 75% of KCSR and KCSM Servicios employees, respectively, were covered by labor contracts subject to collective bargaining. The Company may be subject to, among other things, strikes, work stoppages or work slowdowns as a result of disputes under these collective bargaining agreements and labor contracts or KCS's potential inability to negotiate acceptable contracts with these unions. In the United States, because such agreements are generally negotiated on an industry-wide basis, determination of the terms and conditions of labor agreements have been and could continue to be beyond KCS's control. KCS may, therefore, be subject to terms and conditions in industry-wide labor agreements that could have a material adverse effect on its consolidated financial statements. In the United States and Mexico, KCS is seeking to modernize its collective bargaining agreements and benefit from technological advancements in the industry. If the unionized workers in the United States or Mexico were to engage in a strike, work stoppage or other slowdown; if other employees were to become unionized or if KCS and its unions were unable to agree on the terms and conditions in future labor agreements, KCS could experience a significant disruption of its operations and higher ongoing labor costs. Although the U.S. Railway Labor Act imposes restrictions on the right of United States railway workers to strike, there is no law in Mexico imposing similar restrictions on the right of railway workers in that country to strike. Additionally, labor law reform adopted by

Mexico introduces uncertainty into the existing union structure in Mexico, which may affect the risk of disruption in KCSM's operations.

KCS is dependent on certain key suppliers of core rail equipment.

KCS relies on a limited number of suppliers of core rail equipment (including locomotives, rolling stock equipment, rail and ties). The capital intensive nature and complexity of such equipment creates high barriers of entry for any potential new suppliers. If any of KCS's suppliers discontinue production or experience capacity or supply shortages, this could result in increased costs or difficulty in obtaining rail equipment and materials, which could have a material adverse effect on KCS's consolidated financial statements.

The unavailability of qualified personnel could adversely affect KCS's operations.

Changes in demographics, training requirements and the unavailability of qualified personnel could negatively affect KCS's ability to meet demand for rail service. Unforeseen increases in demand for rail services may exacerbate such risks, which could have a negative impact on KCS's operational efficiency and otherwise have a material adverse effect on KCS's consolidated financial statements.

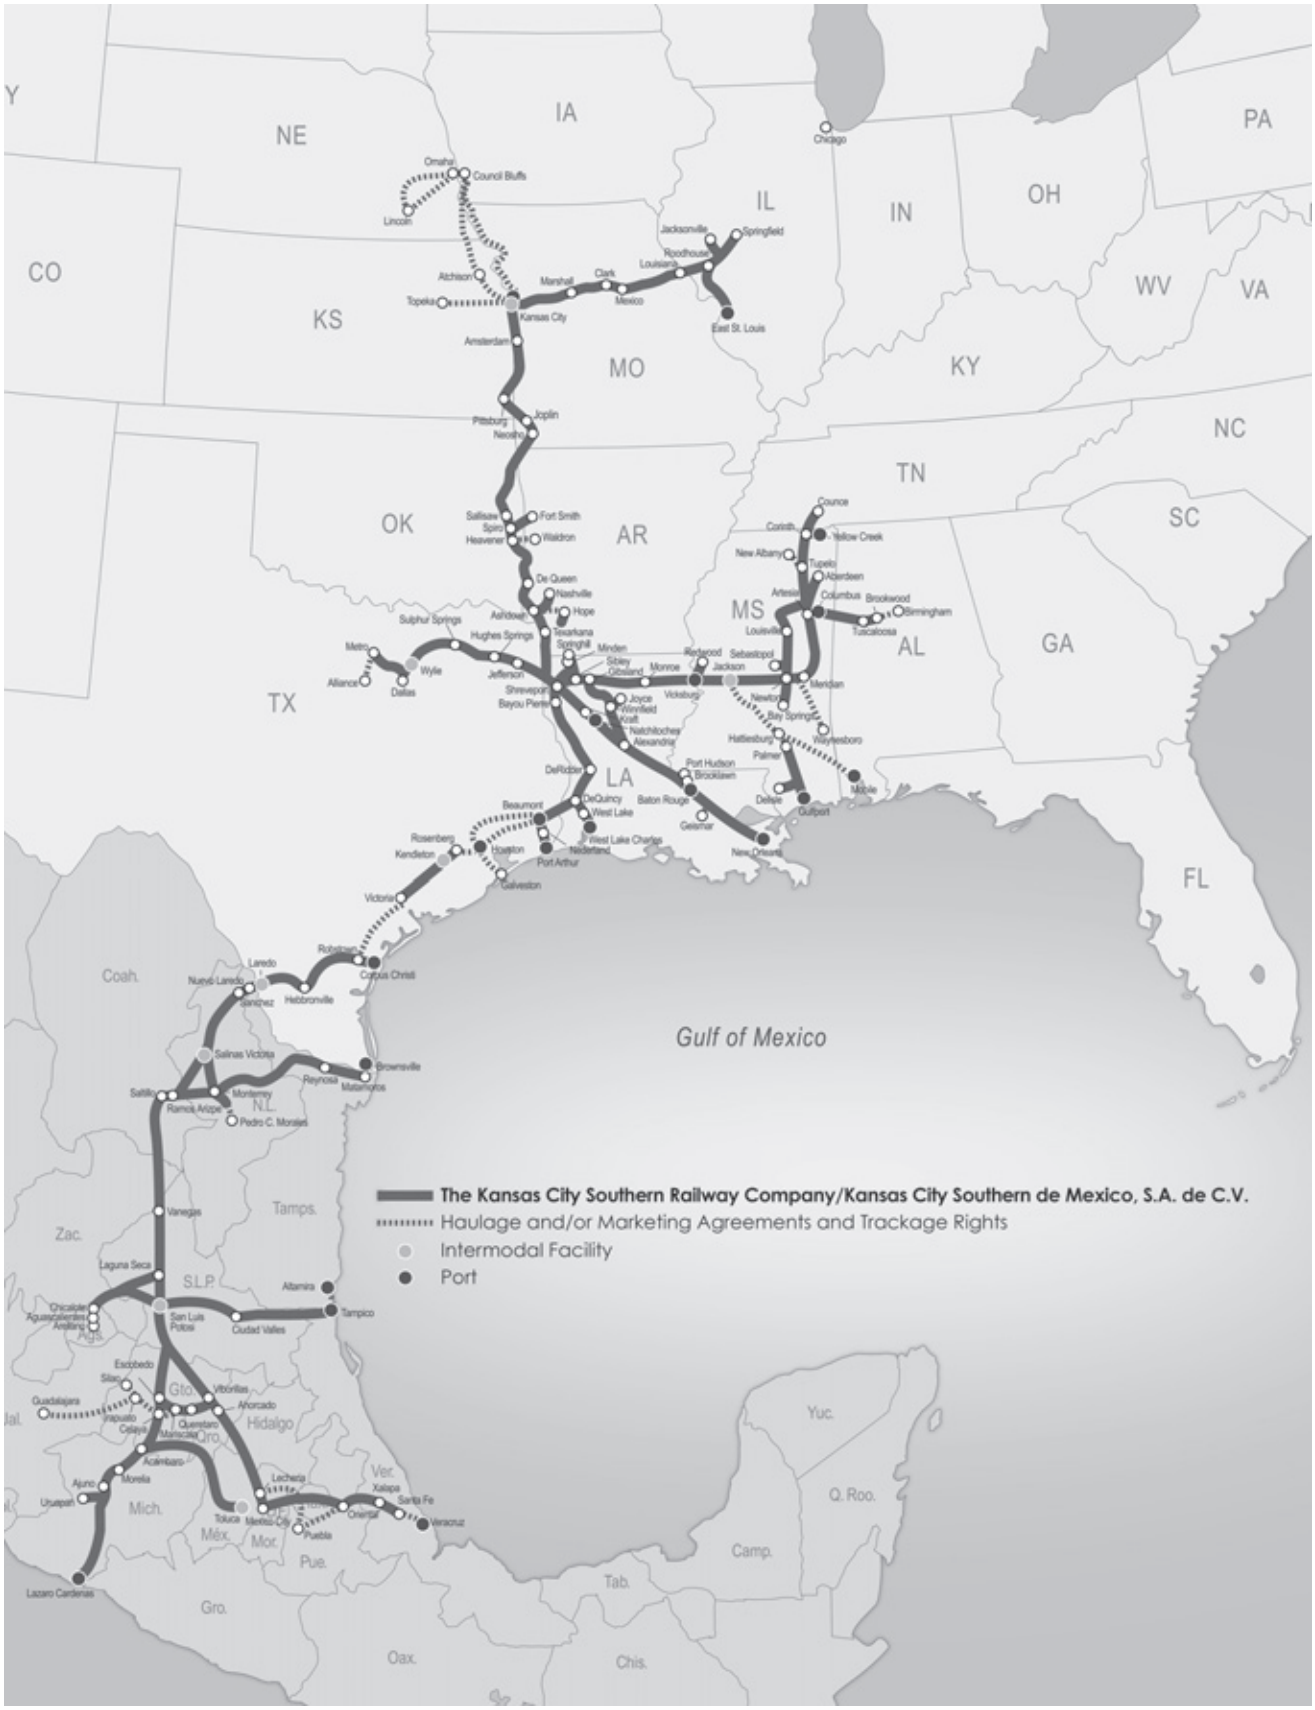
KCS's business may be affected by future acts of terrorism, war or other acts of violence or crime.

Terrorist attacks, such as an attack on the Company's chemical transportation activities, any government response thereto and war or risk of war could have a material adverse effect on KCS's consolidated financial statements. These acts may also impact the Company's ability to raise capital or its future business opportunities. KCS's rail lines and facilities could be direct targets or indirect casualties of acts of terror, which could cause significant business interruption and damage to KCS's property. In recent years, there have been reported incidents of train-related robberies in Mexico, including incidents involving KCSM's trains and infrastructure. Other acts of violence or crime could also materially adversely affect the Company's business.

As a result, acts of terrorism or war or acts of crime or violence could result in increased costs and liabilities and decreased revenues for KCS. In addition, insurance premiums charged for some or all of the applicable coverage currently maintained by KCS could increase dramatically or certain coverage may not be adequate to cover losses or may not be available in the future.

Item 1B. *Unresolved Staff Comments*

None.



Item 2. *Properties*

Track Configuration

The Kansas City Southern Railway Company ("KCSR") operates over a railroad system consisting of approximately 3,400 route miles in ten states from the midwest and southeast portions of the United States south to the Mexican border, which includes approximately 640 miles of trackage rights that permit KCSR to operate its trains with its crews over other railroads' tracks.

Under its concession from the Mexican government (the "Concession"), Kansas City Southern de México, S.A. de C.V. ("KCSM") has the right to operate approximately 3,300 route miles, but does not own the land, roadway, or associated structures, and additionally has approximately 550 miles of trackage rights. The Concession requires KCSM to make investments as described in a business plan filed every three years with the Mexican government. See Item 1A, Risk Factors — "KCSM's Mexican Concession is subject to revocation or termination in certain circumstances which would prevent KCSM from operating its railroad and would have a material adverse effect on the Company's consolidated financial statements."

Kansas City Southern Rail Network

Equipment Configuration

As of December 31, 2019 and 2018, KCS owned and leased the following units of equipment:

	2019			2018		
	Owned	Leased	Total	Owned	Leased	Total
Freight Cars:						
Box cars	2,106	716	2,822	3,178	991	4,169
Hoppers (covered and open top)	4,998	1,073	6,071	5,419	1,108	6,527
Gondolas	2,172	158	2,330	2,560	169	2,729
Automotive	3,316	535	3,851	3,316	742	4,058
Flat cars (intermodal and other)	1,121	1,075	2,196	1,142	1,075	2,217
Tank cars	—	477	477	4	570	574
Total	13,713	4,034	17,747	15,619	4,655	20,274
Locomotives:						
Freight	662	88	750	708	119	827
Switching	199	—	199	222	—	222
Total	861	88	949	930	119	1,049

Average Age (in Years) of Owned and Leased Locomotives:	2019	2018
Freight	15.5	15.3
Switching	45.8	44.4
All locomotives	21.9	21.5

Property and Facilities

KCS operates numerous facilities, including terminals for intermodal and other freight, rail yards for train-building, switching, storage-in-transit (the temporary storage of customer goods in rail cars prior to shipment) and other activities; offices to administer and manage operations; dispatch centers to direct traffic on the rail network; crew quarters to house train crews along the rail line; and shops and other facilities for fueling and maintenance and repair of locomotives, freight cars and other equipment.

Capital Expenditures

The Company's cash capital expenditures for the two years ended December 31, 2019 and 2018, and planned 2020 capital expenditures are included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Capital Expenditures. See also Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Critical Accounting Policies and Estimates — Capitalization, Depreciation and Amortization of Property and Equipment (including Concession Assets) regarding the Company's policies and guidelines related to capital expenditures.

Item 3. ***Legal Proceedings***

The Company is subject to various legal proceedings and claims that arise in the ordinary course of business. For more information on legal proceedings, see Item 1A, Risk Factors — "KCS may be subject to various claims and litigation that could have a material adverse effect on KCS's consolidated financial statements," Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Other Matters — Litigation, and Item 8, Financial Statements and Supplementary Data — Note 18, Commitments and Contingencies.

Item 4. ***Mine Safety Disclosures***

Not applicable.

Part II

Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Market Information

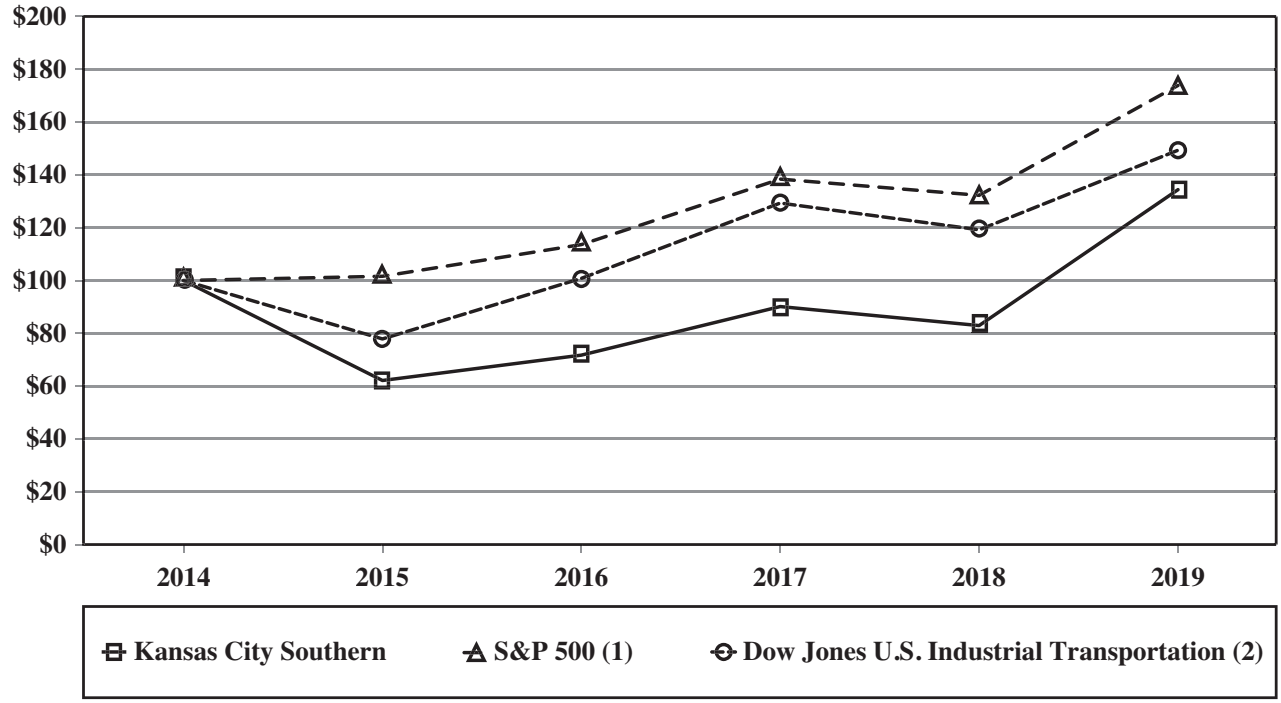
The Company's common stock is traded on the New York Stock Exchange under the ticker symbol "KSU".

Dividend Policy

Common Stock. Any declarations and payments of dividends to holders of the Company's common stock are at the discretion of the Board of Directors, and are based on many factors, including the Company's financial condition, earnings, capital requirements and other factors that the Board of Directors deems relevant. Subject to these qualifications, the Company expects to continue to pay dividends on an ongoing basis.

Holders

There were 1,941 record holders of KCS common stock on January 17, 2020; however, the number of actual holders of KCS common stock is greater due to the practice of brokerage firms registering many shares for clients in the brokerage firm's name.



Securities Authorized for Issuance Under Equity Compensation Plans

See Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters for information about securities authorized for issuance under KCS's equity compensation plans.

Performance Graph

The following graph shows the changes in value over the five years ended December 31, 2019, of an assumed investment of $100 in: (i) KCS's common stock; (ii) the stocks that comprise the Dow Jones U.S. Industrial Transportation Index; and (iii) the stocks that comprise the S&P 500 Index. The table following the graph shows the value of those investments on December 31 for each of the years indicated. The values for the assumed investments depicted on the graph and in the table have been calculated assuming that any cash dividends are reinvested.

COMPARISON OF FIVE YEAR CUMULATIVE TOTAL RETURN
Among Kansas City Southern, the S&P 500 Index
and the Dow Jones U.S. Industrial Transportation Index

	2014	2015	2016	2017	2018	2019
Kansas City Southern	$ 100.00	$ 62.07	$ 71.60	$ 90.03	$ 82.77	$ 134.37
S&P 500 [(1)]	100.00	101.38	113.51	138.29	132.23	173.86
Dow Jones U.S. Industrial Transportation [(2)]	100.00	77.85	100.82	129.29	119.16	149.32

(1) The S&P 500 is a registered trademark of Standard & Poor's, a division of S&P Global, Inc. The S&P 500 Index reflects the weighted average market value for 500 companies whose shares are traded on the New York Stock Exchange, American Stock Exchange and the Nasdaq Stock Market.

(2) The Dow Jones U.S. Industrial Transportation Index is a registered trademark of S&P Dow Jones Indices LLC, a division of S&P Global, Inc.

Purchases of Equity Securities

On November 12, 2019, the Company announced that the Board of Directors approved a new common share repurchase program, pursuant to which up to $2.0 billion in shares of common stock could be repurchased through December 31, 2022 (the "2019 Program"). The 2019 Program replaced KCS's $800.0 million common share repurchase program announced on August 15, 2017 (the "2017 Program"), and eliminated the $59.3 million of remaining authorization under the 2017 Program.

During 2019, KCS repurchased 2,053,770 shares of common stock for $242.4 million at an average price of $118.03 per share under the 2017 Program. Under the 2019 Program, the Company paid $550.0 million under two accelerated share repurchase ("ASR") agreements, receiving an initial delivery of 3,022,760 shares of common stock representing approximately 85% of the total shares to be received under the agreements. The ASR agreements are expected to be settled in the first quarter of 2020. In total during 2019, KCS repurchased 5,076,530 shares of common stock for $709.9 million under both the 2017 Program and the 2019 Program (which consists of the initial delivery of shares under the ASR agreements).

During 2019, KCS repurchased 5,770 shares of $25 par preferred stock for $0.1 million at an average price of $26.39 per share. See Item 8, Financial Statements and Supplementary Data — Note 16, Stockholders' Equity for additional information.

The following table presents stock repurchases during each month for the fourth quarter of 2019:

Period	(a) Total Number of Shares (or Units) Purchased [1]	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that may yet be purchased under the Plans or Programs
Common stock				
October 1-31, 2019	—	—	—	$ 59,329,074
November 1-30, 2019 [2]	3,022,760	$ 154.66	3,022,760	$ 1,532,500,000
December 1-31, 2019	—	—	—	$ 1,532,500,000
Total	3,022,760		3,022,760	
$25 Par preferred stock				
October 1-31, 2019	—	—	—	—
November 1-30, 2019	—	—	—	—
December 1-31, 2019	—	—	—	—
Total	—		—	

(1) All $25 par preferred stock repurchases were made other than through a publicly disclosed plan or program. Repurchases of $25 par preferred stock were made through open market purchases and/or privately negotiated transactions.

(2) On November 19, 2019, the Company paid $550.0 million under two ASR agreements and received an aggregate initial delivery of 3,022,760 shares, which represents approximately 85% of the total shares to be received under the agreements. The initial delivery of shares and their market price at time of delivery are included in the table above. The final number of shares repurchased and cost of shares repurchased will be based on the volume-weighted-average price of the Company's common stock during the term of the agreements, which are expected to be settled in the first quarter of 2020, at which time the Company will receive the remaining amount of shares. See Item 8, Financial Statements and Supplementary Data — Note 16, Stockholders' Equity for additional information.

Item 6. ***Selected Financial Data***

The selected financial data below *(in millions, except per share amounts)* should be read in conjunction with Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations as well as the consolidated financial statements and the related notes.

	2019	2018	2017	2016	2015
Earnings From Continuing Operations					
Revenues	$ 2,866.0	$ 2,714.0	$ 2,582.9	$ 2,334.2	$ 2,418.8
Operating expenses (i) (ii) (iii) (iv)	1,979.7	1,727.7	1,661.3	1,515.7	1,615.0
Operating income	$ 886.3	$ 986.3	$ 921.6	$ 818.5	$ 803.8
Net income (v) (vi) (vii)	$ 540.8	$ 629.4	$ 963.9	$ 479.9	$ 485.3
Earnings per common share:					
Basic	$ 5.42	$ 6.16	$ 9.18	$ 4.44	$ 4.41
Diluted	5.40	6.13	9.16	4.43	4.40
Financial Position					
Total assets	$ 9,786.8	$ 9,469.8	$ 9,198.7	$ 8,817.5	$ 8,341.0
Total long-term debt obligations, including current portion and short-term borrowings	3,246.0	2,689.4	2,619.4	2,478.2	2,401.1
Total stockholders' equity	4,422.5	4,813.0	4,548.9	4,089.9	3,914.3
Total equity	4,745.9	5,132.7	4,865.4	4,404.5	4,224.7
Other Data Per Common Share					
Cash dividends declared per common share	$ 1.48	$ 1.44	$ 1.38	$ 1.32	$ 1.32

(i) During 2019, the Company recognized pre-tax restructuring charges of $168.8 million within operating expenses related to the implementation of Precision Scheduled Railroading initiatives.

(ii) During 2018, the Company recognized a pre-tax gain of $17.9 million within operating expenses for insurance recoveries related to damage from Hurricane Harvey in 2017.

(iii) During 2018, 2017 and 2016, the Company recognized a pre-tax benefit of $37.7 million, $44.1 million and $62.8 million, respectively, within operating expenses related to a credit that was available for the excise tax included in the price of fuel that was purchased and consumed in locomotives and certain work equipment in Mexico. Effective January 1, 2019, the Company began recognizing the benefit as a reduction of income tax expense due to changes in Mexican tax law; and beginning April 30, 2019, railroads in Mexico are no longer eligible for the tax credit due to changes in Mexican tax regulations.

(iv) During 2015, the Company recognized pre-tax lease termination costs of $9.6 million within operating expenses due to the early termination of certain operating leases and the related purchase of equipment.

(v) During 2019, 2018 and 2015, the Company recognized pre-tax debt retirement and exchange costs of $1.1 million, $2.2 million and $7.6 million, respectively, related to debt retirement and restructuring activities that occurred during the periods.

(vi) During 2019, the Company recognized a $12.8 million net tax benefit related to the Mexican fuel excise tax credit generated through April 29, 2019, noted in (iii) above.

(vii) During 2017, the Company recognized a provisional $413.0 million net tax benefit, as a result of the Tax Cuts and Jobs Act (the "Tax Reform Act"), which was signed into law December 22, 2017. During 2018, the Company recognized a $20.9 million net tax benefit for adjustments to the provisional tax impacts of the Tax Reform Act recognized in 2017.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations***

The following is a discussion of Kansas City Southern's results of operations, certain changes in its financial position, liquidity, capital structure and business developments for the years ended December 31, 2019 and 2018. This discussion should be read in conjunction with the included consolidated financial statements, the related notes, and other information included in this report.

CAUTIONARY INFORMATION

The discussions set forth in this Annual Report on Form 10-K may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, may be forward-looking statements. In addition, management may make forward-looking statements orally or in other writings, including, but not limited to, in press releases, quarterly earnings calls, executive presentations, in the annual report to stockholders and in other filings with the Securities and Exchange Commission. Readers can usually identify these forward-looking statements by the use of such verbs as "may," "will," "should," "likely," "plans," "projects," "expects," "anticipates," "believes" or similar verbs or conjugations of such verbs. These statements involve a number of risks and uncertainties. Actual results could materially differ from those anticipated by such forward-looking statements. Such differences could be caused by a number of factors or combination of factors including, but not limited to, the factors identified below and those discussed under Item 1A, Risk Factors, of this Form 10-K. Readers are strongly encouraged to consider these factors and the following factors when evaluating any forward-looking statements concerning the Company:

- the outcome of claims and litigation, including those related to environmental contamination, personal injuries and property damage;
- changes in legislation and regulations or revisions of controlling authority;
- the adverse impact of any termination or revocation of Kansas City Southern de México, S.A. de C.V. ("KCSM")'s Concession by the Mexican government;
- United States, Mexican and global economic, political and social conditions;
- the effects of current and future multinational trade agreements on the level of trade among the United States, Mexico and Canada;
- the level of trade between the United States and Asia or Mexico;
- the effects of fluctuations in the peso-dollar exchange rate;
- natural events such as severe weather, fire, floods, hurricanes, earthquakes or other disruptions to the Company's operating systems, structures and equipment or the ability of customers to produce or deliver their products;
- the effects of adverse general economic conditions affecting customer demand and the industries and geographic areas that produce and consume the commodities KCS carries;
- the dependence on the stability, availability and security of the information technology systems to operate its business;
- the effect of demand for KCS's services exceeding network capacity or traffic congestion on operating efficiencies and service reliability;
- uncertainties regarding the litigation KCS faces and any future claims and litigation;
- the impact of competition, including competition from other rail carriers, trucking companies and maritime shippers in the United States and Mexico;
- KCS's reliance on agreements with other railroads and third parties to successfully implement its business strategy, operations and growth and expansion plans, including the strategy to convert customers from using trucking services to rail transportation services;
- compliance with environmental regulations;
- disruption in fuel supplies, changes in fuel prices and the Company's ability to recapture its costs of fuel from customers;

- material adverse changes in economic and industry conditions, including the availability of short and long-term financing, both within the United States and Mexico and globally;
- climate change and the market and regulatory responses to climate change;
- changes in labor costs and labor difficulties, including strikes and work stoppages affecting either operations or customers' abilities to deliver goods for shipment;
- KCS's reliance on certain key suppliers of core rail equipment;
- unavailability of qualified personnel; and
- acts of terrorism, war or other acts of violence or crime or risk of such activities.

Forward-looking statements reflect the information only as of the date on which they are made. The Company does not undertake any obligation to update any forward-looking statements to reflect future events, developments, or other information. If KCS does update one or more forward-looking statements, no inference should be drawn that additional updates will be made regarding that statement or any other forward-looking statements.

CORPORATE OVERVIEW

Kansas City Southern, a Delaware corporation, is a transportation holding company that has railroad investments in the U.S., Mexico and Panama. In the U.S., the Company serves the central and south central U.S. Its international holdings serve northeastern and central Mexico and the port cities of Lazaro Cardenas, Tampico and Veracruz, and a fifty percent interest in Panama Canal Railway Company provides ocean-to-ocean freight and passenger service along the Panama Canal. KCS's North American rail holdings and strategic alliances are primary components of the U.S.-Mexico-Canada-Agreement ("USMCA") railway system, linking the commercial and industrial centers of the U.S., Canada and Mexico. Its principal subsidiaries and affiliates include the following:

- The Kansas City Southern Railway Company ("KCSR"), a wholly-owned subsidiary;
- KCSM, a wholly-owned subsidiary;
- Mexrail, Inc. ("Mexrail"), a wholly-owned consolidated subsidiary which, in turn, wholly owns The Texas Mexican Railway Company ("Tex-Mex");
- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned subsidiary;
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate;
- Panama Canal Railway Company ("PCRC"), a fifty percent-owned unconsolidated affiliate;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate; and
- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate.

EXECUTIVE SUMMARY

Strategic Initiatives

During 2019, KCS started implementing principles of Precision Scheduled Railroading ("PSR"). The PSR principles focus on operational excellence and are intended to drive the following improvements:

- Customer service — improve and sustain consistency and reliability of service and create a more resilient and dependable network;
- Facilitating growth — additional capacity for new opportunities;
- Improving asset utilization — meet growing demand with the same or fewer assets; and
- Improving the cost profile of the Company — increased profitability driven by volume and revenue growth and improved productivity and asset utilization.

As a result of the PSR initiatives, management approved four separate restructuring plans during 2019, which resulted in restructuring charges during 2019 of $168.8 million within the consolidated statements of income. The PSR initiatives provided cost savings of approximately $58.0 million during 2019. The Company expects the PSR initiatives to provide incremental cost savings of approximately $61.0 million during 2020. Refer to Note 3, Restructuring Charges of the consolidated financial statements for more information.

The Company established the following key metrics and goals to measure PSR progress and performance:

	Year ended December 31,		Improvement/ (Deterioration)	FY 2020 Goal
	2019	2018		
Gross velocity (mph) (i)	13.5	11.1	22%	17.0
Terminal dwell (hours) (ii)	20.8	24.8	16%	18.0
Train length (feet) (iii)	5,981	5,812	3%	6,350
Car miles per day (iv)	110.9	93.3	19%	135.0
Fuel efficiency (gallons per 1,000 GTM's) (v)	1.31	1.37	4%	1.24

(i) Gross velocity is the average train speed between origin and destination in miles per hour calculated as the sum of the miles traveled divided by the sum of total transit hours. Transit hours are measured as the difference between a train's origin departure and destination arrival date and times broken down by segment across the train route (includes all time spent including crew changes, terminal dwell, delays, and incidents).

(ii) Terminal dwell is the average amount of time in hours between car arrival to and departure from the yard (excludes cars that move through a terminal on a run-through train, stored, bad ordered, and maintenance-of-way cars). Calculated by dividing the total number of hours cars spent in terminals by the total count of car dwell events.

(iii) Train length is the average length of a train across its reporting stations, including the origin and intermediate stations. Length of a train is the sum of car and locomotive lengths measured in feet.

(iv) Car miles per day is the miles a car travels divided by total transit days. Transit days are measured from opening event to closing event (includes all time spent in terminals and on trains).

(v) Fuel efficiency is calculated by taking locomotive fuel consumed in gallons divided by thousand gross ton miles ("GTM's") net of detours with no associated fuel gallons. GTM's are the movement of one ton of train weight over one mile calculated by multiplying total train weight by distance the train moved. GTM's exclude locomotive gross ton miles.

Operating performance improved during 2019 compared to 2018 due to the implementation of PSR initiatives. Improvements in velocity and dwell are largely due to increased focus on execution, refining service design, and equipment disposals that eliminated the worst performing assets during 2019. Additionally, the Company consolidated trains, which increased train length, improved fuel efficiency, and led to reduced crew costs.

The Company continues to focus on PSR principles in 2020 and has established more aggressive operational targets that will deliver improved customer service, facilitate growth, and drive better asset utilization while improving the cost profile of the Company.

2019 Financial Overview

Revenues in 2019 increased 6% from 2018, as a result of an increase of 6% in revenue per carload/unit due to mix, higher fuel surcharge, and positive pricing impacts, partially offset by the weakening of the Mexican peso against the U.S. dollar. Carloads were down 1% from 2018 primarily as declines in automotive and intermodal offset growth in refined fuel products and liquid petroleum gas shipments to Mexico, as well as favorable impacts of improved operations in northern Mexico, metals growth, and improved cycle times for agriculture and mineral shipments. Improved operations and cycle times are primarily the result of implementing PSR initiatives during 2019.

Operating expenses increased 15% compared to 2018, primarily due to restructuring charges as a result of PSR initiatives, exclusion and loss of the Mexican fuel excise tax credit as a reduction of operating expenses due to changes in Mexican tax law, and an increase in incentive compensation and wages. These increases were partially offset by cost savings from PSR initiatives. Operating expenses as a percentage of revenues ("operating ratio") increased to 69.1% in 2019 from 63.7% in 2018. Restructuring charges related to PSR initiatives increased 2019 operating ratio by 5.9 points.

The Company reported 2019 earnings per diluted share of $5.40, compared to 2018 earnings per diluted share of $6.13. The decrease in earnings per diluted share was due to decreased operating income described above and a higher effective tax rate. These decreases were partially offset by lower average outstanding shares as a result of shares repurchased during 2019 and a higher gain on foreign exchange.

RESULTS OF OPERATIONS

Year Ended December 31, 2019, compared with the Year Ended December 31, 2018

The following summarizes KCS's consolidated income statement components *(in millions):*

	2019	2018	Change
Revenues	$ 2,866.0	$ 2,714.0	$ 152.0
Operating expenses	1,979.7	1,727.7	252.0
Operating income	886.3	986.3	(100.0)
Equity in net earnings of affiliates	1.0	2.6	(1.6)
Interest expense	(115.9)	(110.0)	(5.9)
Debt retirement costs	(1.1)	(2.2)	1.1
Foreign exchange gain	17.1	7.8	9.3
Other income, net	1.0	2.4	(1.4)
Income before income taxes	788.4	886.9	(98.5)
Income tax expense	247.6	257.5	(9.9)
Net income	540.8	629.4	(88.6)
Less: Net income attributable to noncontrolling interest	1.9	2.0	(0.1)
Net income attributable to Kansas City Southern and subsidiaries	$ 538.9	$ 627.4	$ (88.5)

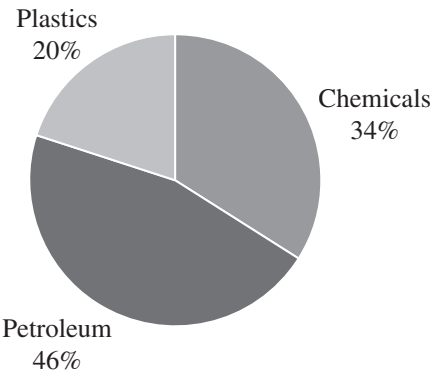
Revenues

The following summarizes revenues *(in millions),* carload/unit statistics *(in thousands)* and revenue per carload/unit:

	Revenues			Carloads and Units			Revenue per Carload/Unit		
	2019	2018	% Change	2019	2018	% Change	2019	2018	% Change
Chemical and petroleum	$ 737.2	$ 622.1	19%	337.4	297.9	13%	$ 2,185	$ 2,088	5%
Industrial and consumer products	610.4	591.0	3%	320.9	324.9	(1%)	1,902	1,819	5%
Agriculture and minerals	506.3	486.4	4%	253.3	241.9	5%	1,999	2,011	(1%)
Energy	246.2	256.3	(4%)	244.7	248.6	(2%)	1,006	1,031	(2%)
Intermodal	370.2	382.8	(3%)	979.8	1,030.4	(5%)	378	372	2%
Automotive	255.6	253.2	1%	154.9	161.9	(4%)	1,650	1,564	5%
Carload revenues, carloads and units	2,725.9	2,591.8	5%	2,291.0	2,305.6	(1%)	$ 1,190	$ 1,124	6%
Other revenue	140.1	122.2	15%						
Total revenues (i)	$ 2,866.0	$ 2,714.0	6%						
(i) Included in revenues:									
Fuel surcharge	$ 298.1	$ 253.1							

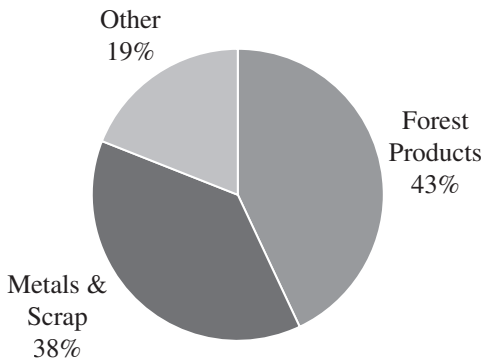
Revenues include revenue for transportation services and fuel surcharges. Revenues in 2019 increased 6% from 2018, as a result of an increase of 6% in revenue per carload/unit due to mix, higher fuel surcharge, and positive pricing impacts. Revenue per carload/unit was partially offset by the weakening of the Mexican peso against the U.S. dollar of approximately $3.0 million, compared to the prior year, for revenue transactions denominated in Mexican pesos. The average exchange rate of Mexican pesos per U.S. dollar was Ps.19.3 for 2019, compared to Ps.19.2 for 2018.

Carloads were down 1% primarily as declines in automotive and intermodal offset growth in refined fuel products and liquid petroleum gas shipments to Mexico, as well as favorable impacts of improved operations in northern Mexico, metals growth, and improved cycle times for agriculture and mineral shipments. Improved operations and cycle times are primarily the result of implementing PSR initiatives during 2019.



KCS's fuel surcharges are a mechanism to adjust revenue based upon changes in fuel prices above fuel price thresholds set in KCS's tariffs or contracts. Fuel surcharge revenue is calculated using a fuel price from a prior time period that can be up to 60 days earlier. In a period of volatile fuel prices or changing customer business mix, changes in fuel expense and fuel surcharge revenue may differ.

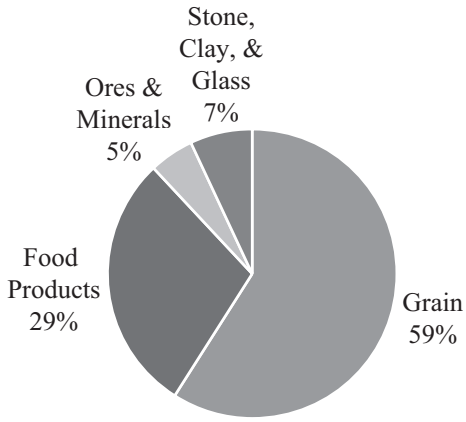
Fuel surcharge revenue increased $45.0 million for the year ended December 31, 2019, compared to the prior year, primarily due to increased fuel surcharge rates due to higher fuel costs as a result of the loss of the Mexican fuel excise tax credit and higher fuel prices.



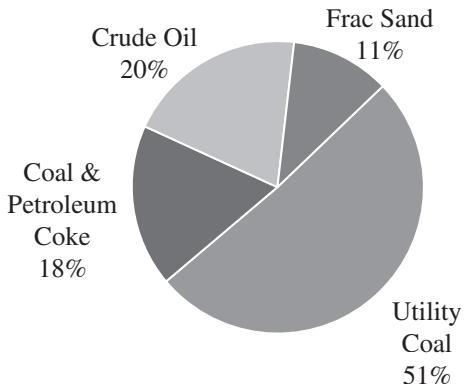
The following discussion provides an analysis of revenues by commodity group:

Chemical and petroleum. Revenues increased $115.1 million for the year ended December 31, 2019, compared to 2018, due to a 13% increase in carload/unit volumes and a 5% increase in revenue per carload/unit. Volumes increased primarily due to increased refined fuel products and liquid petroleum gas shipments to Mexico. Revenue per carload/unit increased due to longer average length of haul, positive pricing impacts, and higher fuel surcharge.

Revenues by commodity group for 2019



Industrial and consumer products. Revenue increased $19.4 million for the year ended December 31, 2019, compared to 2018, due to a 5% increase in revenue per carload/unit as a result of positive pricing impacts, higher fuel surcharge, and longer average length of haul. This increase was partially offset by a 1% decrease in carload/unit volumes primarily driven by paper shipments as a result of lower demand and available truck capacity, partially offset by an increase in metals volumes due to a customer's change in sourcing location.



Agriculture and minerals. Revenues increased $19.9 million for the year ended December 31, 2019 compared to 2018, due to a 5% increase in carload/unit volumes as a result of improved cycle times for grain and an increase in ores and minerals due to increased U.S. government infrastructure spending. This increase was partially offset by a 1% decrease in revenue per carload/unit due to negative mix impacts.

Revenues by commodity group for 2019

Energy. Revenues decreased $10.1 million for the year ended December 31, 2019, compared to 2018, due to a 2% decrease in carload/unit volumes and revenue per carload/unit. Volumes decreased due to crude oil attributable to decreasing Canadian crude spreads, and frac sand attributable to changes in sourcing patterns, partially offset by an increase in utility coal volumes caused by improved cycle times and demand. Revenue per carload/unit decreased due to shorter average length of haul and mix, partially offset by positive pricing impacts.

Intermodal. Revenues decreased $12.6 million for the year ended December 31, 2019, compared to 2018, due to a 5% decrease in carload/unit volumes, partially offset by a 2% increase in revenue per carload/unit. The volume decrease was primarily due to service interruption at Lazaro Cardenas due to teacher protests in the first quarter of 2019 and available truck capacity. Revenue per carload/unit increased due to higher fuel surcharge, partially offset by shorter average length of haul.

Automotive. Revenues increased $2.4 million for the year ended December 31, 2019, compared to 2018, due to a 5% increase in revenue per carload/unit due to higher fuel surcharge and positive pricing impacts, partially offset by shorter average length of haul. The increases were partially offset by a 4% decrease in carload/unit volumes as a result of auto plant shutdowns and lower overall automotive production in Mexico.

Operating Expenses

Operating expenses, as shown below (*in millions*), increased $252.0 million for the year ended December 31, 2019, compared to 2018, primarily due to restructuring charges as a result of PSR initiatives, exclusion and loss of the Mexican fuel excise tax credit as a reduction of operating expenses due to changes in Mexican tax law, and an increase in incentive compensation and wages. These increases were partially offset by cost savings from PSR initiatives. The weakening of the Mexican peso against the U.S. dollar resulted in an expense reduction of approximately $1.0 million for expense transactions denominated in Mexican pesos. The average exchange rate of Mexican pesos per U.S. dollar was Ps.19.3 for 2019 compared to Ps.19.2 for 2018.

			Change	
	2019	2018	Dollars	Percent
Compensation and benefits	$ 529.1	$ 495.7	$ 33.4	7%
Purchased services	219.2	200.7	18.5	9%
Fuel	340.4	348.2	(7.8)	(2%)

Total operating expenses	$ 1,979.7	$ 1,727.7	$ 252.0	15%

Compensation and benefits. Compensation and benefits increased $33.4 million for the year ended December 31, 2019, compared to 2018, due to increases in incentive compensation, wages and benefits, in-sourcing activities, and labor claims, partially offset by lower headcount and fewer hours worked as a result of PSR initiatives.

Purchased services. Purchased services expense increased $18.5 million for the year ended December 31, 2019, compared to 2018, due to higher repairs and maintenance expense, trackage rights, and corporate services. These increases were partially offset by savings from in-sourcing related to PSR initiatives.

Fuel. Fuel expense decreased $7.8 million for the year ended December 31, 2019, compared to 2018, due to increased efficiency of approximately $13.0 million and the weakening of the Mexican peso against the U.S. dollar of approximately $1.0 million, partially offset by increased consumption of approximately $7.0 million. PSR initiatives implemented during 2019 focused on improved fuel efficiency through train consolidation and use of technology. The average price per gallon was $2.57 in 2019, compared to $2.58 in 2018.

Mexican fuel excise tax credit. For the year ended December 31, 2019, the Company did not recognize a benefit within operating expenses for the Mexican fuel excise tax credit, due to changes in Mexican tax law effective January 1, 2019. For 2019, the benefit was recognized as a reduction of income tax expense within the consolidated statements of income rather than a reduction of operating expenses. Beginning April 30, 2019, railroads in Mexico are no longer eligible for the Mexican fuel excise tax credit due to changes in Mexican tax regulations. The Company recognized a benefit of $37.7 million within operating expenses for the year ended December 31, 2018. Refer to Item 8, Financial Statements and Supplementary Data — Note 4, Mexican Fuel Excise Tax Credit for more information.

Equipment costs. Equipment costs decreased $17.5 million for the year ended December 31, 2019, compared to 2018, due to lower car hire expense primarily as a result of reduced cycle times due to PSR initiatives. The decrease is also a result of lower lease expense as a result of a locomotive lease conversion in the second quarter of 2018.

Depreciation and amortization. Depreciation and amortization expense increased $4.0 million for the year ended December 31, 2019, compared to 2018, due to a larger asset base, including investments in positive train control, partially offset by decreases in estimates and lower depreciation as a result of PSR initiatives implemented during 2019.

Materials and other. Materials and other expense decreased $3.0 million for the year ended December 31, 2019, compared to 2018, due to lower derailment activity and a one-time vendor settlement, partially offset by increased employee expenses, increased property taxes, and parts credits recognized in the first half of 2018.

Restructuring charges. For the year ended December 31, 2019, the Company recognized $168.8 million of restructuring charges related to the implementation of PSR initiatives. Included in the restructuring charges were costs relating to the impairment of certain locomotives, rail cars and associated inventory parts, severance costs related to workforce reductions, and contract restructuring activities. Refer to Item 8, Financial Statements and Supplementary Data — Note 3, Restructuring Charges for more information.

Gain on insurance recoveries related to hurricane damage. During 2018, the Company partially settled its insurance claim for $35.5 million related to Hurricane Harvey. As a result of the nonrefundable partial settlement, the Company recognized a gain on insurance recoveries of $17.9 million, net of the self-insured retention and insurance receivable. Final settlement of the insurance claim is dependent upon costs incurred with an ongoing bridge construction project expected to be completed in 2020.

Non-Operating Expenses

Equity in net earnings of affiliates. Equity in net earnings of affiliates decreased $1.6 million for the year ended December 31, 2019, compared to 2018, due to FTVM losses related to the cancellation of Mexico City's new international airport in 2019. This decrease was partially offset by increased volumes at Panama Canal Railway Company ("PCRC").

Interest expense. Interest expense increased $5.9 million for the year ended December 31, 2019, compared to 2018, due to higher average debt balances. For the year ended December 31, 2019, the average debt balance (including commercial paper) was $2,826.6 million, compared to $2,698.7 million in 2018. The average interest rate for the years ended December 31, 2019 and 2018 was 4.1%.

Debt retirement costs. For the year ended December 31, 2019, debt retirement costs were $1.1 million, related to the write-off of previously capitalized debt issuance costs associated with the establishment of the new revolving credit facility in the first quarter of 2019 and the call premiums and write-off of unamortized debt issuance costs and original issue discounts associated with the redemption of the KCS and KCSM 2.35% Senior Notes in the fourth quarter of 2019. For the year ended December 31, 2018, debt retirement costs were $2.2 million, related to the call premiums and write-off of unamortized debt issuance costs and original issue discounts associated with the Company's various debt redemption activities.

Foreign exchange gain. For the years ended December 31, 2019 and 2018, foreign exchange gain was $17.1 million and $7.8 million, respectively. Foreign exchange gain includes the re-measurement and settlement of net monetary assets denominated in Mexican pesos and the gain on foreign currency derivative contracts.

For the years ended December 31, 2019 and 2018, the re-measurement and settlement of net monetary assets and liabilities denominated in Mexican pesos resulted in a foreign exchange gain of $3.0 million and $1.5 million, respectively.

The Company enters into foreign currency derivative contracts to hedge its net exposure to fluctuations in the Mexican cash tax obligation due to changes in the value of the Mexican peso against the U.S. dollar. For the years ended December 31, 2019 and 2018, foreign exchange gain on foreign currency derivative contracts was $14.1 million and $6.3 million, respectively.

Other income, net. Other income, net, decreased $1.4 million for the year ended December 31, 2019, compared to 2018 primarily due to an increase in postemployment benefits expense due to a change in discount rates.

Income tax expense. Income tax expense decreased $9.9 million for the year ended December 31, 2019, compared to 2018, due to lower pre-tax income as a result of restructuring charges related to PSR initiatives, partially offset by a higher effective tax rate. The increase in the effective tax rate was primarily due to the recognition of a $20.9 million tax benefit during 2018 related to adjustments to the provisional tax impacts of the Tax Cuts and Jobs Act (the "Tax Reform Act") for deemed mandatory repatriation and change in U.S. tax rate included in the consolidated financial statements for the year ended December 31, 2017 and fluctuations in the foreign exchange rate, partially offset by the inclusion of the Mexican fuel excise tax credit within the effective tax rate for the year ended December 31, 2019.

The Treasury Department issued proposed regulations in June 2019 that provide for a high-tax exception to the global intangible low-taxed income ("GILTI"). Specifically, if foreign earnings are subject to a foreign tax rate of at least 90% of the U.S. tax rate, an election can be made to not treat the high-taxed earnings as GILTI income. As currently proposed, the high-tax exception provisions would not be effective until taxable years beginning on or after the date the proposed regulations are finalized. The regulations as proposed should render the GILTI tax immaterial to the consolidated financial statements if and when they become effective.

The fluctuations of the Mexican peso during 2019 increased the Company's Mexican cash tax obligation by $8.9 million for the year ended December 31, 2019. The fluctuations of the Mexican peso during 2018 decreased the Company's Mexican cash tax obligation by $1.8 million for the year ended December 31, 2018.

Differences between the Company's effective income tax rate and the U.S. federal statutory income tax rate of 21% for 2019 and 2018 follow *(in millions):*

	2019		2018		Change	
	Dollars	Percent	Dollars	Percent	Dollars	Percent
Income tax expense using the statutory rate in effect	$ 165.6	21.0%	$ 186.2	21.0%	$ (20.6)	—
Tax effect of:						
Difference between U.S. and foreign tax rate	47.6	6.0%	46.1	5.2%	1.5	0.8%
Foreign exchange (i)	35.9	4.6%	21.8	2.5%	14.1	2.1%
Tax credits	(16.8)	(2.1%)	(14.2)	(1.6%)	(2.6)	(0.5%)
Mexican fuel excise tax credit, net (ii)	(12.8)	(1.6%)	—	—	(12.8)	(1.6%)
State and local income tax provision, net	11.5	1.5%	7.5	0.8%	4.0	0.7%
Withholding tax	9.5	1.2%	11.2	1.3%	(1.7)	(0.1%)
Global intangible low-taxed income ("GILTI") tax, net	2.7	0.3%	11.8	1.3%	(9.1)	(1.0%)
Change in U.S. tax rate	—	—	(2.2)	(0.3%)	2.2	0.3%
Deemed mandatory repatriation	—	—	(18.7)	(2.1%)	18.7	2.1%
Other, net	4.4	0.5%	8.0	0.9%	(3.6)	(0.4%)
Income tax expense	$ 247.6	31.4%	$ 257.5	29.0%	$ (9.9)	2.4%

(i) Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. The foreign exchange impact on income taxes includes the gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos which is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate. To hedge its exposure to this cash tax risk, the Company enters into foreign currency derivative contracts, which are measured at fair value each period and any change in fair value is recognized in foreign exchange gain (loss) within the consolidated statements of income. Refer to Note 12, Derivative Instruments for further information.

(ii) See discussion of the inclusion of the Mexican fuel excise tax credit, net within the effective tax rate in the Mexico Tax Reform section, below.

Mexico Tax Reform

In December 2018, the Mexican government enacted changes in the tax law effective January 1, 2019 ("Mexico 2019 Tax Reform"), which for 2019 eliminated the option to monetize the Mexican fuel excise tax credit by offsetting income tax withholding payment obligations. Previously, the Company had the option to monetize the Mexican fuel excise tax credit through income tax withholding and income tax obligations. As a result, the Company is allowed to offset the 2019 Mexican fuel excise tax credit only against its Mexico corporate income tax liability on the 2019 annual income tax return. The elimination of the option to apply the Mexican fuel excise tax credit to income tax withholding payment obligations required

the Company to recognize the credit as a reduction of income tax expense rather than a reduction of operating expenses. Beginning April 30, 2019, railroads in Mexico are no longer eligible for the Mexican fuel excise tax credit due to a change in Mexican tax regulations. Refer to Note 4, Mexican Fuel Excise Tax Credit of the consolidated financial statements for more information. Mexico 2019 Tax Reform also eliminated universal compensation for 2019 that allowed Mexican taxpayers to offset recoverable tax balances against balances due for other federal taxes.

In December 2019, the Mexican government enacted additional changes in the tax law effective January 1, 2020 ("Mexico 2020 Tax Reform"). Mexico 2020 Tax Reform excluded railroads from eligibility for the Mexican fuel excise tax credit. Mexico 2020 Tax Reform also included permanent changes to the Value Added Tax ("VAT") Law, Income Tax Law and Federal Fiscal Code which, among other things, requires certain VAT withholding, limits the deduction of interest expense and certain payments to related parties in preferential tax regimes, adopts a general anti-avoidance rule, beginning in 2021 requires mandatory disclosure of reportable transactions, and permanently eliminates universal compensation. The Company is continuing to evaluate the potential impact of Mexico 2020 Tax Reform to the 2020 consolidated financial statements.

See additional discussion on universal compensation in Liquidity and Capital Resources section below.

For a comparison of the Company's results of operations for the fiscal years ended December 31, 2017 to the year ended December 31, 2018, see *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* in the Company's Annual Report on Form 10-K for the year ended December 31, 2018, which was filed with the U.S. Securities and Exchange Commission on January 25, 2019.

LIQUIDITY AND CAPITAL RESOURCES

Overview

On November 12, 2019, the Company announced its new capital allocation policy (the "Policy") that was approved by the Company's Board of Directors (the "Board"). Pursuant to that Policy, the Company intends to deploy available cash in the following manner:

- Approximately 40-50% to capital projects and strategic investments; and
- Approximately 50-60% to share repurchases and dividends.

In connection with this new Policy, the Board also approved the following actions:

- An increase in the quarterly dividend on KCS's common stock from $0.36 to $0.40 per share. The Board declared a cash dividend on its outstanding common stock for this increased amount payable on January 22, 2020, to stockholders of record at the close of business on December 31, 2019, and
- A new $2.0 billion share repurchase program ("2019 Program"), expiring December 31, 2022. This new program replaced the $800 million stock repurchase authorization announced in 2017 under which the Company purchased approximately $741 million of Company stock.

During 2019, the Company invested $584.3 million in capital expenditures. See Capital Expenditures section for further details.

In November 2019, the Company paid $550.0 million under two accelerated share repurchase ("ASR") agreements and received an aggregate initial delivery of 3,022,760 shares, which represents approximately 85% of the total shares to be received under the agreements. The final number of shares repurchased and cost of shares repurchased will be based on the volume-weighted-average price of the Company's common stock during the term of the agreements, which are expected to be settled in the first quarter of 2020.

The Company's 2019 repurchases of common stock, which includes shares repurchased through the 2017 Program and the 2019 Program (which consists of the initial delivery of shares under the ASR agreements), totaled 5,076,530 shares at a total cost of $709.9 million. Remaining share repurchases are expected to be funded by cash on hand, cash generated from operations, and debt. Management's assessment of market conditions, available liquidity and other factors will determine the timing and volume of any future repurchases. Refer to Item 8, Financial Statements and Supplementary Data — Note 16, Stockholders' Equity for additional detail on the Company's common share repurchase program.

During 2019, the Company repurchased 5,770 shares of its $25 par preferred stock for $0.1 million at an average price of $26.39 per share.

During 2019, KCS entered into a new $600.0 million revolving credit facility which replaced its $800.0 million revolving credit facility. Additionally, KCS amended its commercial paper program to decrease maximum borrowings under the program from $800.0 million to $600.0 million, consistent with the new revolving credit facility.

On November 18, 2019, the Company issued $425.0 million principal amount of senior unsecured notes due November 15, 2029, which bear interest semiannually at a fixed annual rate of 2.875% (the "2.875% Senior Notes"), and $425.0 million principal amount of senior unsecured notes due November 15, 2069, which bear interest semiannually at a fixed annual rate of 4.20% (the "4.20% Senior Notes"). The net proceeds from the offerings were used to make payments under the ASR agreements, to redeem KCS's 2.35% senior notes due 2020 (the "KCS 2.35% Senior Notes"), and for general corporate purposes.

On November 18, 2019, KCS settled its four treasury lock agreements with an aggregate notional amount of $275.0 million, which resulted in cash paid of $25.8 million. This amount was included in accumulated other comprehensive loss and is being amortized to interest expense over the life of the new 2.875% Senior Notes, increasing the effective interest rate on the notes to 3.60%. The treasury lock agreements served to hedge the U.S. Treasury benchmark interest rate associated with the interest payments related to the anticipated refinancing of the KCS 2.35% Senior Notes and the KCSM 2.35% Senior Notes into new long-term debt instruments prior to maturity. Refer to Note 12, Derivative Instruments of the consolidated financial statements for further discussion of the treasury lock agreements.

On December 18, 2019, the Company redeemed all of the $275.0 million aggregate principal amount outstanding of the KCS 2.35% Senior Notes and the KCSM 2.35% Senior Notes, using cash on hand and proceeds from the issuance of KCS's 2.875% Senior Notes and 4.20% Senior Notes, at a redemption price equal to 100.084% of the principal amount of the notes redeemed, plus accrued interest and call premium.

The Company's financing instruments contain restrictive covenants that limit or preclude certain actions; however, the covenants are structured such that the Company expects to have sufficient flexibility to conduct its operations. The Company was in compliance with all of its debt covenants as of December 31, 2019.

For discussion regarding the agreements representing the indebtedness of KCS, refer to Note 13, Short-Term Borrowings and Note 14, Long-Term Debt of the consolidated financial statements.

During the first three quarters of 2019, the Company's Board of Directors declared quarterly cash dividends of $0.36 per share or $107.9 million on its common stock. During the last quarter of 2019, the Company's Board of Directors declared a cash dividend of $0.40 per share or $38.6 million on its common stock. Subject to the discretion of the Board of Directors, capital availability and a determination that cash dividends continue to be in the best interest of its stockholders, the Company intends to pay a quarterly dividend on an ongoing basis.

On December 31, 2019, total available liquidity (the cash balance plus revolving credit facility availability) was $748.8 million, compared to available liquidity at December 31, 2018 of $900.5 million. This decrease was primarily due to the reduction in the revolving credit facility availability discussed above.

As of December 31, 2019, the total cash and cash equivalents held outside of the U.S. in foreign subsidiaries was $20.3 million, after repatriating $206.1 million during 2019. The Company expects that this cash will be available to fund company operations without incurring significant additional income taxes.

Mexico 2019 Tax Reform eliminated universal compensation for 2019 that allowed Mexican taxpayers to offset recoverable tax balances against balances due for other federal taxes. This negatively impacted KCSM's 2019 cash flow by $57.5 million. The elimination of universal compensation was made permanent as part of the Mexico 2020 Tax Reform which could negatively impact the timing of KCSM's cash flow by up to $60.0 million in 2020 while awaiting refunds of value added tax from the Mexican government.

Cash Flow Information and Contractual Obligations

Summary cash flow data follows *(in millions):*

	2019	2018
Cash flows provided by (used for):		
Operating activities	$ 1,103.5	$ 945.7
Investing activities	(676.3)	(651.9)
Financing activities	(378.9)	(327.4)
Net increase (decrease) in cash and cash equivalents	48.3	(33.6)
Cash and cash equivalents beginning of year	100.5	134.1
Cash and cash equivalents end of year	$ 148.8	$ 100.5

During 2019, cash and cash equivalents increased $48.3 million as a result of the impacts discussed below.

Operating Cash Flows. Net cash provided by operating activities increased $157.8 million for 2019, as compared to 2018, primarily due to an increase in cash received for working capital items resulting mainly from the timing of certain receipts and lower income tax payments.

Investing Cash Flows. Net cash used for investing activities increased $24.4 million for 2019, as compared to 2018, due to a $66.9 million increase in capital expenditures and a $17.5 million increase in investments in and advances to affiliates, partially offset by a $59.9 million decrease in expenditures for the purchase or replacement of assets under existing operating leases. Additional information is included within the Capital Expenditure section of Liquidity and Capital Resources.

Financing Cash Flows. Net cash used for financing activities increased $51.5 million for 2019, as compared to 2018, due to a $550.0 million payment made under two accelerated share repurchase agreements in the fourth quarter of 2019 and an increase in repayment of long-term debt of $203.5 million, partially offset by an increase in proceeds from long-term debt of $348.1 million and a decrease in net repayment of short-term borrowings of $348.1 million.

For a comparison of liquidity and capital resources and the Company's cash flow activities for the fiscal year ended December 31, 2018 and 2017, see *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* in the Company's Annual Report on Form 10-K for the year ended December 31, 2018, which was filed with the U.S. Securities and Exchange Commission on January 25, 2019.

Contractual Obligations. The following table outlines the material obligations and commitments as of December 31, 2019 *(in millions):*

	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More than 5 years
Long-term debt and short-term borrowings (including interest and finance lease obligations) (i)	$ 6,219.5	$ 149.9	$ 271.4	$ 885.3	$ 4,912.9
Operating leases	141.6	50.3	53.0	29.9	8.4
Deemed mandatory repatriation tax (ii)	5.8	—	—	1.0	4.8
Obligations due to uncertainty in income taxes	2.2	—	—	2.2	—
Capital expenditure obligations (iii)	176.2	153.1	23.1	—	—
Other contractual obligations (iv)	448.0	79.7	120.5	88.8	159.0
Total	$ 6,993.3	$ 433.0	$ 468.0	$1,007.2	$ 5,085.1

(i) For variable rate obligations, interest payments were calculated using the December 31, 2019 rate. For fixed rate obligations, interest payments were calculated based on the applicable rates and payment dates.

(ii) U.S. federal income tax on deemed mandatory repatriation is payable over 8 years pursuant to the Tax Reform Act.

(iii) Capital expenditure obligations include minimum capital expenditures under the KCSM Concession agreement and other regulatory requirements.

(iv) Other contractual obligations include purchase commitments and certain maintenance agreements.

In the normal course of business, the Company enters into long-term contractual commitments for future goods and services needed for the operations of the business. Such commitments are not in excess of expected requirements and are not reasonably likely to result in performance penalties or payments that would have a material adverse effect on the Company's liquidity. Such commitments are not included in the above table.

The SCT requires KCSM to submit a three-year capital expenditures plan every three years. The most recent three-year plan was submitted in 2017 for the years 2018 — 2020. KCSM expects to continue capital spending at current levels in future years and will continue to have capital expenditure obligations past 2020, which are not included in the table above.

Off-Balance Sheet Arrangements

On November 2, 2007, PCRC completed an offering of $100.0 million of 7.0% senior secured notes due November 1, 2026 (the "Notes"). The Notes are senior obligations of PCRC, secured by certain assets of PCRC. KCS has pledged its shares of PCRC as security for the Notes. The Notes are otherwise non-recourse to KCS. The Company has agreed, along with Mi-Jack Products, Inc. ("Mi-Jack"), the other 50% owner of PCRC, to each fund 50% of any debt service reserve and liquidity reserve (reserves which are required to be established by PCRC in connection with the issuance of the Notes). As of December 31, 2019, the Company has issued a standby letter of credit in the amount of $5.6 million to fund its share of these reserves.

Capital Expenditures

KCS has funded, and expects to continue to fund, capital expenditures with operating cash flows and short and long-term debt.

The following table summarizes capital expenditures by type for the years ended December 31, 2019 and 2018, respectively *(in millions):*

	2019	2018
Roadway capital program	$ 264.9	$ 245.7
Locomotives and freight cars	182.8	101.2
Capacity	84.8	69.8
Positive train control	15.5	28.9
Information technology	29.8	35.4
Other	6.5	31.3
Total capital expenditures (accrual basis)	584.3	512.3
Change in capital accruals	2.9	8.0
Total cash capital expenditures	$ 587.2	$ 520.3
Purchase or replacement of assets under operating leases:		
Locomotives	$ —	$ 50.6
Freight cars	0.9	49.9
Office building	38.1	—
Total purchase or replacement of assets under operating leases (accrual basis)	39.0	100.5
Change in capital accruals	—	(1.6)
Total cash purchase or replacement of assets under operating leases	$ 39.0	$ 98.9

Generally, the Company's capital program consists of capital replacement and equipment. For 2020, internally generated cash flows are expected to fund cash capital expenditures, which are currently estimated to be below $500.0 million. In addition, the Company periodically reviews its equipment and property under operating leases. Any additional purchase or replacement of equipment and property under operating leases during 2020 is expected to be funded with internally generated cash flows and/or debt.

Property Statistics

The following table summarizes certain property statistics as of December 31:

	2019	2018
Track miles of rail installed	122	166
Cross ties installed (thousands)	627	651

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

KCS's accounting and financial reporting policies are in conformity with U.S. generally accepted accounting principles ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Management believes that the following accounting policies and estimates are critical to an understanding of KCS's historical and future performance. Management has discussed the development and selection of the following critical accounting estimates with the Audit Committee of KCS's Board of Directors and the Audit Committee has reviewed the selection, application and disclosure of the Company's critical accounting policies and estimates.

Capitalization, Depreciation and Amortization of Property and Equipment (including Concession Assets)

Due to the highly capital intensive nature of the railroad industry, capitalization and depreciation of property and equipment are a substantial portion of the Company's consolidated financial statements. Net property and equipment, including concession assets, comprised approximately 90% of the Company's total assets as of December 31, 2019, and related depreciation and amortization comprised approximately 18% of total operating expenses for the year ended December 31, 2019.

KCS capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. Direct costs are charged to capital projects based on the work performed and the material used. Indirect costs are allocated to capital projects as a standard percentage, which is evaluated annually, and applied to direct labor and material costs. Asset removal activities are performed in conjunction with replacement activities; therefore, removal costs are estimated based on a standard percentage of direct labor and indirect costs related to capital replacement projects. For purchased assets, all costs necessary to make the asset ready for its intended use are capitalized. Expenditures that significantly increase asset values, productive capacity, efficiency, safety or extend useful lives are capitalized. Repair and maintenance costs are expensed as incurred.

Property and equipment are carried at cost and are depreciated primarily on the group method of depreciation, which the Company believes closely approximates a straight line basis over the estimated useful lives of the assets measured in years. The group method of depreciation applies a composite rate to classes of similar assets rather than to individual assets. Composite depreciation rates are based upon the Company's estimates of the expected average useful lives of assets as well as expected net salvage value at the end of their useful lives. In developing these estimates, the Company utilizes periodic depreciation studies performed by an independent engineering firm. Depreciation rate studies are performed at least every three years for equipment and at least every six years for road property (rail, ties, ballast, etc.). The depreciation studies take into account factors such as:

- Statistical analysis of historical patterns of use and retirements of each asset class;
- Evaluation of any expected changes in current operations and the outlook for the continued use of the assets;
- Evaluation of technological advances and changes to maintenance practices;
- Historical and expected salvage to be received upon retirement;
- Review of accounting policies and assumptions; and
- Industry precedents and trends.

The depreciation studies may also indicate that the recorded amount of accumulated depreciation is deficient or in excess of the amount indicated by the study. Any such deficiency or excess is amortized as a component of depreciation expense over the remaining useful lives of the affected asset class, as determined by the study. The Company also monitors these factors in non-study years to determine if adjustments should be made to depreciation rates. The Company completed depreciation studies for KCSR and KCSM in 2019. The impacts of the studies were immaterial to the consolidated financial results for all periods.

Also under the group method of depreciation, the cost of railroad property and equipment (net of salvage or sales proceeds) retired or replaced in the normal course of business is charged to accumulated depreciation with no gain or loss recognized. Actual historical costs are retired when available, such as with equipment costs. The use of estimates in recognizing

the retirement of roadway assets is necessary as it is impractical to track individual, homogeneous network-type assets. Certain types of roadway assets are retired using statistical curves derived from the depreciation studies that indicate the relative distribution of the age of the assets retired. For other roadway assets, historical costs are estimated by deflating current costs using inflation indices and the estimated useful life of the assets as determined by the depreciation studies. The indices applied to the replacement value are selected because they closely correlate with the major costs of the items comprising the roadway assets. Because of the number of estimates inherent in the depreciation and retirement processes and because it is impossible to precisely estimate each of these variables until a group of assets is completely retired, the Company continually monitors the estimated useful lives of its assets and the accumulated depreciation associated with each asset group to ensure the depreciation rates are appropriate.

Estimation of the average useful lives of assets and net salvage values requires management judgment. Estimated average useful lives may vary over time due to changes in physical use, technology, asset strategies and other factors that could have an impact on the retirement experience of the asset classes. Accordingly, changes in the assets' estimated useful lives could significantly impact future periods' depreciation expense. Depreciation and amortization expense for the year ended December 31, 2019 was $350.7 million. If the weighted average useful lives of assets were changed by one year, annual depreciation and amortization expense would change approximately $11.0 million.

Gains or losses on dispositions of land or non-group property and abnormal retirements of railroad property are recognized through income. A retirement of railroad property would be considered abnormal if the retirement meets each of the following conditions: (i) is unusual in nature, (ii) is significant in amount, and (iii) varies significantly from the retirement profile identified through the depreciation studies. For the year ended December 31, 2019, KCS recognized a loss of $134.2 million from asset impairments of certain locomotives and railcars as a result of the implementation of PSR. There were no other significant gains or losses from abnormal retirements of property or equipment for the years ended December 31, 2018 and 2017. Refer to Note 3, Restructuring Charges of the consolidated financial statements for more information.

Costs incurred by the Company to acquire the Concession rights and related assets, as well as subsequent improvements to the Concession assets, are capitalized and amortized using the group method of depreciation over the lesser of the current expected Concession term, including probable renewal of an additional 50-year term, or the estimated useful lives of the assets and rights. The Company's ongoing evaluation of the useful lives of Concession assets and rights considers the aggregation of the following facts and circumstances:

- The Company's executive management is dedicated to ensuring compliance with the various provisions of the Concession and to maintaining positive relationships with the SCT and other Mexican federal, state, and municipal governmental authorities;
- During the time since the Concession was granted, the relationships between KCSM and the various Mexican governmental authorities have matured and the guidelines for operating under the Concession have become more defined with experience;
- There are no known supportable sanctions or compliance issues that would cause the SCT to revoke the Concession or prevent KCSM from renewing the Concession; and
- KCSM operations are an integral part of the KCS operations strategy, and related investment analyses and operational decisions assume that the Company's cross border rail business operates into perpetuity, and do not assume that Mexico operations terminate at the end of the current Concession term.

Based on the above factors, as of December 31, 2019, the Company continues to believe that it is probable that the Concession will be renewed for an additional 50-year term beyond the current term.

Long-lived assets are reviewed for impairment when events or circumstances indicate that the carrying amount of an asset may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the long-lived assets, the carrying value would be reduced to the estimated fair value. Future cash flow estimates for an impairment review would be based on the lowest level of identifiable cash flows, which are the Company's U.S. and Mexican operations. Other than the abnormal impairments related to the implementation of PSR, management did not identify any indicators of impairment for the years ended December 31, 2019 and 2018.

Income Taxes

Deferred income taxes represent a net asset or liability of the Company. For financial reporting purposes, management determines the current tax liability, as well as deferred tax assets and liabilities, in accordance with the asset and liability method of accounting for income taxes. The provision for income taxes is the sum of income taxes both currently payable and deferred into the future. Currently payable income taxes represent the liability related to the Company's U.S., state and foreign income tax returns for the current year and anticipated tax payments resulting from income tax audits, while the net deferred tax expense or benefit represents the change in the balance of net deferred tax assets or liabilities as reported on the balance sheet. The changes in deferred tax assets and liabilities are determined based upon the estimated timing of reversal of differences between the carrying amount of assets and liabilities for financial reporting purposes and the basis of assets and liabilities for tax purposes as measured using the currently enacted tax rates that will be in effect at the time these differences are expected to reverse. Additionally, management estimates whether taxable operating income in future periods will be sufficient to fully recognize any deferred tax assets. Valuation allowances are recorded as appropriate to reduce deferred tax assets to the amount considered likely to be realized.

Income tax expense related to Mexican operations has additional complexities such as the impact of exchange rate variations, which can have a significant impact on the effective income tax rate.

Management believes that the assumptions and estimates related to the provision for income taxes are critical to the Company's results of operations. For the year ended December 31, 2019, income tax expense totaled $247.6 million. For every 1% change in the 2019 effective rate, income tax expense would have changed by approximately $7.9 million. For further information on the impact of foreign exchange fluctuation on income taxes, refer to Item 7A, Quantitative and Qualitative Disclosures About Market Risk — Foreign Exchange Sensitivity.

OTHER MATTERS

Litigation. Occasionally, the Company is a party to various legal proceedings, regulatory examinations, investigations, administrative actions, and other legal matters, arising for the most part in the ordinary course of business, incidental to its operations. Included in these proceedings are various tort claims brought by current and former employees for job-related injuries and by third parties for injuries related to railroad operations. KCS aggressively defends these matters and has established liability provisions that management believes are adequate to cover expected costs. The outcome of litigation and other legal matters is always uncertain. KCS believes it has valid defenses to the legal matters currently pending against it, is defending itself vigorously, and has recorded accruals determined in accordance with U.S. GAAP, where appropriate. In making a determination regarding accruals, using available information, KCS evaluates the likelihood of an unfavorable outcome in legal or regulatory proceedings to which it is a party to and records a loss contingency when it is probable a liability has been incurred and the amount of the loss can be reasonably estimated. These subjective determinations are based on the status of such legal or regulatory proceedings, the merits of KCS's defenses and consultation with legal counsel. Actual outcomes of these legal and regulatory proceedings may materially differ from the current estimates. It is possible that resolution of one or more of the legal matters currently pending or threatened could result in losses material to KCS's consolidated results of operations, liquidity or financial condition.

Although it is not possible to predict the outcome of any legal proceeding, in the opinion of the Company's management, other than as described in Note 18, Commitments and Contingencies of the consolidated financial statements, such proceedings and actions should not, individually or in the aggregate, have a material adverse effect on the Company's consolidated financial statements.

Inflation. U.S. generally accepted accounting principles require the use of historical cost, which does not reflect the effects of inflation on the replacement cost of property. Due to the capital intensive nature of KCS's business, the replacement cost of these assets would be significantly higher than the amounts reported under the historical cost basis.

Recent Accounting Pronouncements. Refer to Note 2, Significant Accounting Policies of the consolidated financial statements for information relative to recent accounting pronouncements.

Regulatory Updates

USMCA. On January 16, 2020, the U.S. Senate approved the "USMCA Implementation Act" that had been approved by the U.S. House of Representatives on December 19, 2019. This legislation will now be sent to President Trump for signature. The agreement will not go into full effect until Canada gives its approval. Mexico passed the revised deal in December 2019.

North American trade is important to the Company and its business. The Company believes completion of the USMCA approval process and implementation of the agreement should create more certainty about such trade going forward, improving the cross-border environment in which the Company operates.

U.S. Tariff Imposition on Imports. The administration of U.S. President Donald J. Trump has implemented new U.S. tariffs that could impact global commerce. U.S. trading partners have responded by announcing retaliatory tariffs on some U.S. exports. At this time, the Company cannot determine the impacts these tariffs will have on the Company's consolidated financial statements.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk***

KCS is exposed to certain market risks including interest rate, commodity, and foreign exchange risks and utilizes various financial instruments that have certain inherent market risks. These instruments have been entered into for hedging rather than trading purposes. The following information, together with information included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 8, Financial Statements and Supplementary Data — Note 12, Derivative Instruments, describe the key aspects of certain financial instruments that have market risk to KCS.

The analysis presented below for each of the Company's market risks uses a sensitivity model based on hypothetical changes (increases or decreases) to market risks using defined parameters and assumptions to quantify the potential impacts to the consolidated statements of income. The hypothetical changes to market risks do not represent KCS's view of future market changes. The effect of a change in a particular assumption was calculated without adjusting any other assumptions. These market risks and the potential impacts to the consolidated statements of income for the current year, have not materially fluctuated, individually or in the aggregate from the preceding year; thus only current year information is presented below.

Interest Rate Sensitivity. The Company is subject to interest rate risk associated with its debt. Changes in interest rates impact the fair value of outstanding fixed-rate debt, but there is no impact to current earnings or cash flow. Based upon the borrowing rates available to KCS and its subsidiaries for indebtedness with similar terms and average maturities, the fair value of long-term debt was approximately $3,535.7 million and $2,661.3 million at December 31, 2019 and 2018, respectively, compared with a carrying value of $3,246.0 million and $2,689.4 million at December 31, 2019 and 2018, respectively.

Alternatively, changes in interest rates do not affect the fair value of variable rate debt, but affect future earnings and cash flows. The Company's floating-rate indebtedness includes commercial paper borrowings, and any outstanding borrowings under revolving credit facilities. At December 31, 2019 and 2018, KCS had no commercial paper or revolving credit facility borrowings outstanding.

Commodity Price Sensitivity. KCS periodically participates in diesel fuel purchase commitments and derivative financial instruments. At December 31, 2019 and 2018, KCS did not have any outstanding fuel derivative financial instruments. The Company also holds fuel inventories for use in operations. These inventories are not material to KCS's overall financial position. Fuel costs are expected to reflect market conditions in 2020; however, fuel costs are unpredictable and subject to a variety of factors outside the Company's control. Assuming annual consumption of 133 million gallons, a hypothetical 10 cent change in the price per gallon of fuel would cause a $13.3 million change in operating expenses. KCS mitigates the impact of increased fuel costs through fuel surcharge revenues from customers; however, in a period of volatile fuel prices or changing customer business mix, changes in fuel expense and fuel surcharge revenue may differ.

Foreign Exchange Sensitivity. KCS's foreign subsidiaries use the U.S. dollar as their functional currency; however, a portion of the foreign subsidiaries' revenues and expenses is denominated in Mexican pesos. Based on the volume of revenue and expense transactions denominated in Mexican pesos, revenue and expense fluctuations have historically offset.

The Company has exposure to fluctuations in the value of the Mexican peso against the U.S. dollar due to its monetary assets and liabilities that are denominated in Mexican pesos. Monetary assets and liabilities include cash, accounts receivable and payable and other items that will convert to cash in the future and are remeasured into dollars using the current exchange

rate. The remeasurement and settlement of monetary assets and liabilities is recognized in the consolidated statements of income as foreign exchange gains and losses. At December 31, 2019, the Company had Ps.1,956.9 million of net monetary assets denominated in Mexican pesos, as monetary assets exceeded monetary liabilities.

The following table presents the potential impacts to the consolidated statements of income that would result from a hypothetical change in the exchange rate of one Mexican peso per U.S. dollar at December 31, 2019:

	Hypothetical Change in Exchange Rate	Amount of Gain (Loss)	Affected Line Item in the Consolidated Statements of Income
Net monetary assets denominated in Mexican pesos at December 31, 2019:			
Ps.1,956.9 million	From Ps.18.8 to Ps.19.8	($5.2 million)	Foreign exchange gain (loss)
Ps.1,956.9 million	From Ps.18.8 to Ps.17.8	$5.8 million	Foreign exchange gain (loss)

Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. Most significantly, any gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate.

The following table presents the potential impacts to the effective income tax rate and income tax expense that would result from a hypothetical change in the exchange rate of one Mexican peso at December 31, 2019:

Hypothetical Change in Exchange Rate	Increase (Decrease) in Effective Income Tax Rate	Amount of Expense (Benefit)	Affected Line Item in the Consolidated Statements of Income
From Ps.18.8 to Ps.19.8	(2.0%)	($15.7 million)	Income tax expense (benefit)
From Ps.18.8 to Ps.17.8	2.2%	$17.5 million	Income tax expense (benefit)

The Company has executed, and expects to continue to execute foreign currency derivative instruments to hedge its exposure to fluctuations in the Mexican cash tax obligation due to changes in the value of the Mexican peso against the U.S. dollar. These derivative instruments have historically offset the effects of foreign currency changes on income tax expense (benefit) resulting in minimal impact to net income.

At December 31, 2019, the Company had outstanding foreign currency forward contracts with an aggregate notional amount of $105.0 million, which matured during January 2020 and obligated the Company to purchase a total of Ps.2,041.2 million at a weighted-average exchange rate of Ps.19.4 to each U.S. dollar. During January 2020, the Company entered into offsetting contracts with an aggregate notional amount of $108.6 million, which matured during January 2020 and obligated the Company to sell a total of Ps.2,041.2 million at a weighted-average exchange rate of Ps.18.8 to each U.S. dollar. Given the settlement during January 2020, the Company believes there was minimal market risk associated with these contracts at December 31, 2019.

During January 2020, the Company entered into several foreign currency forward contracts with an aggregate notional amount of $250.0 million maturing in February 2020. These contracts obligate the Company to purchase a total of Ps.4,751.5 million at a weighted-average exchange rate of Ps.19.0 to each U.S. dollar.

The following table presents the potential impacts to the consolidated statements of income that would result from a hypothetical change in the exchange rate of one Mexican peso at maturity date for the foreign currency forward contracts entered into during January 2020:

Aggregate notional amount:	Hypothetical Change in Exchange Rate	Amount of Gain (Loss)	Affected Line Item in the Consolidated Statements of Income
$250.0 million	From Ps.19.0 to Ps.20.0	($12.5 million)	Foreign exchange gain (loss)
$250.0 million	From Ps.19.0 to Ps.18.0	$13.9 million	Foreign exchange gain (loss)

The Company has not designated these foreign currency derivative instruments as hedging instruments for accounting purposes. The foreign currency derivative instruments will be measured at fair value each period and any change in fair value will be recognized in foreign exchange gain (loss) within the consolidated statements of income.

Management's Report on Internal Control over Financial Reporting

The management of Kansas City Southern is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. KCS's internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, management conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2019, based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control — Integrated Framework (2013)* (commonly referred to as the COSO Framework). Based on its evaluation, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2019, based on the criteria outlined in the COSO Framework.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2019, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which immediately follows this report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Kansas City Southern

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Kansas City Southern and its subsidiaries (the "Company") as of December 31, 2019 and 2018, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the years then ended, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for leases in 2019.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Capitalization of Self-Constructed Additions and Improvements to Property and Equipment (including Concession Assets)

As described in Note 2 to the consolidated financial statements, the Company's capitalized costs include costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. Expenditures that significantly increase asset values, productive capacity, efficiency, safety, or extend useful lives are capitalized. Indirect costs are allocated to capital projects as a standard percentage, which is evaluated annually, and applied to direct labor and material costs. For the year-ended December 31, 2019, the Company capitalized costs of $584.3 million.

The principal considerations for our determination that performing procedures relating to capitalization of self-constructed additions and improvements to property and equipment (including concession assets) is a critical audit matter are there was significant judgment by management to identify costs to capitalize, including which indirect costs relate to track structure and other self-constructed property, and the application of these indirect costs to capital projects. This in turn led to significant auditor judgment, subjectivity, and effort in performing procedures and evaluating the capitalization of costs to property and equipment (including concession assets).

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to capitalization of costs. These procedures also included, among others, testing management's process to identify which costs are capitalized and evaluating the reasonableness of assumptions used by management to determine which indirect costs relate to track structure and other self-constructed property and the application of those costs to capital projects.

We have served as the Company's auditor since 2017.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Kansas City Southern:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated statements of income, comprehensive income, changes in equity, and cash flows of Kansas City Southern and subsidiaries (the Company) for the year ended December 31, 2017, and the related notes (collectively, the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the results of its operations and its cash flows for the year ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audit provides a reasonable basis for our opinion.

See accompanying notes to consolidated financial statements.

Note 1. Description of the Business

Kansas City Southern ("KCS" or the "Company"), a Delaware corporation, is a holding company with principal operations in rail transportation.

The Company is engaged in the freight rail transportation business operating through a single coordinated rail network under one reportable business segment. The Company generates revenues and cash flows by providing its customers with freight delivery services both within its regions, and throughout North America through connections with other Class I rail carriers. KCS's customers conduct business in a number of different industries, including electric-generating utilities, chemical and petroleum products, paper and forest products, agriculture and mineral products, automotive products and intermodal transportation.

The primary subsidiaries of the Company consist of the following:

- The Kansas City Southern Railway Company ("KCSR"), a wholly-owned consolidated subsidiary. KCSR is a U.S. Class I railroad that services the midwest and southeast regions of the United States;
- Kansas City Southern de México, S.A. de C.V. ("KCSM"), a wholly-owned consolidated subsidiary which operates under the rights granted by the concession acquired from the Mexican government in 1997 (the "Concession") as described below;
- Mexrail, Inc. ("Mexrail"), a wholly-owned consolidated subsidiary; which wholly owns The Texas Mexican Railway Company ("Tex-Mex");
- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned consolidated subsidiary which provides employee services to KCSM; and
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate. MSLLC owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway".

Including equity investments in:

- Panama Canal Railway Company ("PCRC"), a fifty percent-owned unconsolidated affiliate which provides ocean to ocean freight and passenger services along the Panama Canal;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and
- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for the deployment of positive train control.

The KCSM Concession. KCSM holds a concession (the "Concession") from the Mexican government until June 2047 (exclusive service through 2027, subject to certain trackage and haulage rights granted to other concessionaires), which is renewable under certain conditions for additional periods of up to 50 years under the Concession. The Concession is to provide freight transportation services over north-east rail lines which are a primary commercial corridor of the Mexican railroad system. KCSM has the right to use, but does not own, all track and buildings that are necessary for the rail lines' operation. KCSM is required to pay the Mexican government an annual concession duty equal to 1.25% of gross revenues during the Concession period.

Employees and Labor Relations. KCSR participates in industry-wide multi-employer bargaining as a member of the National Carriers' Conference Committee, as well as local bargaining for agreements that are limited to KCSR's property. Approximately 70% of KCSR employees are covered by collective bargaining agreements.

KCSM Servicios union employees are covered by one labor agreement, which was signed on April 16, 2012, between KCSM Servicios and the Sindicato de Trabajadores Ferrocarrileros de la República Mexicana ("Mexican Railroad Union"), and which remains in effect during the period of the Concession, for the purpose of regulating the relationship between the parties. Approximately 75% of KCSM Servicios employees are covered by this labor agreement.

Union labor negotiations have not historically resulted in any strike, boycott, or other disruption in the Company's business operations.

Note 2. Significant Accounting Policies

Principles of Consolidation. The accompanying consolidated financial statements are presented using the accrual basis of accounting and include the Company and its majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Certain prior year amounts have been reclassified to conform to the current year presentation.

The equity method of accounting is used for all entities in which the Company or its subsidiaries have significant influence, but not a controlling interest. The Company evaluates less-than-majority-owned investments for consolidation pursuant to consolidation and variable interest entity guidance. The Company does not have any less-than-majority-owned investments requiring consolidation.

During the first quarter of 2019, the Company adopted Accounting Standards Update ("ASU") No. 2016-02, Leases, also known as Accounting Standard Codification ("ASC") Topic 842, which requires lessees to recognize for all operating leases a right-of-use asset and a lease obligation in the consolidated balance sheet. Expenses are recognized in the consolidated statement of income in a manner similar to previous accounting guidance. Lessor accounting under the new standard is substantially unchanged and is immaterial to the Company. The Company adopted the accounting standard using a prospective transition approach, which applies the provisions of the new guidance at the effective date without adjusting the comparative periods presented, with certain practical expedients available to ease the burden of adoption.

The Company elected the following practical expedients upon adoption: not to reassess whether any expired or existing contracts are or contain leases, not to reassess the lease classification for any expired or existing leases, not to reassess initial direct costs for any existing leases, not to separately identify lease and nonlease components (i.e. maintenance costs) except for fleet vehicles and real estate, and not to evaluate historical land easements under the new guidance. Additionally, the Company elected the short-term lease exemption policy, applying the requirements of ASC 842 to long-term leases (leases greater than 1 year).

Adoption of the new standard resulted in $175.2 million of additional right-of-use lease assets and lease liabilities as of January 1, 2019. The new standard did not have a significant impact on the consolidated statements of income. See Note 5, Leases for additional information.

Use of Estimates. The accounting and financial reporting policies of the Company conform to accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant items subject to such estimates and assumptions include those related to the recoverability and useful lives of assets and income taxes. Changes in facts and circumstances may result in revised estimates and actual results could differ from those estimates.

Revenue Recognition. The primary performance obligation for the Company is to move customers' freight from an origin to a destination. A performance obligation is created when a customer under a transportation contract or public tariff submits a bill of lading for the transport of goods. The Company recognizes revenue proportionally as a shipment moves from origin to destination, using the distance shipped to measure progress, as the customer simultaneously receives and consumes the benefit over time. Related expenses are recognized as incurred. Revenue associated with in-transit shipments at period end is

recognized based on the distance shipped as of the balance sheet date. Payment is received at the time or shortly after the performance obligation is satisfied.

The transaction price is generally in the form of a fixed fee determined at the inception of the transportation contract or the inception of the bill of lading. Certain customer agreements have variable consideration that are based on milestone achievements in the form of rebates, discounts or incentives. The Company makes judgments to determine whether the variable consideration is probable of occurring and should be included in the estimated transaction price at the beginning of the period to apply a more consistent rate throughout the year based on an analysis of historical experience with the customer, forecasted shipments and other economic indicators. The Company adjusts the estimate on a quarterly basis.

Other revenues, including switching, storage, and demurrage are distinct services and are recognized as services are performed or as contractual obligations are fulfilled. The consideration for other revenue is allocated between the separate services based upon the stand-alone transaction price.

Foreign Exchange Gain (Loss). For financial reporting purposes, foreign subsidiaries maintain records in U.S. dollars, which is the functional currency. The dollar is the currency that reflects the economic substance of the underlying events and circumstances relevant to the entity. Monetary assets and liabilities denominated in pesos are remeasured into dollars using current exchange rates. The difference between the exchange rate on the date of the transaction and the exchange rate on the settlement date, or balance sheet date if not settled, is included in the income statement as foreign exchange gain or loss.

Cash Equivalents. Short-term liquid investments with an initial maturity of three months or less are classified as cash and cash equivalents.

Accounts Receivable, net. Accounts receivable are net of an allowance for uncollectible accounts as determined by historical experience and adjusted for economic uncertainties or known trends. Accounts are charged to the allowance when a customer enters bankruptcy, when an account has been transferred to a collection agent or submitted for legal action, or when a customer is significantly past due and all available means of collection have been exhausted. At December 31, 2019 and 2018, the allowance for doubtful accounts was $7.0 million and $4.1 million, respectively. For the years ended December 31, 2019, 2018 and 2017, bad debt expense was $0.4 million, $0.3 million and $1.6 million, respectively.

Materials and Supplies. Materials and supplies consisting of diesel fuel, items to be used in the maintenance of rolling stock and items to be used in the maintenance or construction of road property are valued at the lower of average cost or net realizable value.

Derivative Instruments. Derivatives are measured at fair value and recorded on the balance sheet as either assets or liabilities. Changes in the fair value of derivatives are recorded either through current earnings or as other comprehensive income, depending on hedge designation. Gains and losses on derivative instruments classified as cash flow hedges are reported in other comprehensive income and are reclassified into earnings in the periods in which earnings are impacted by the variability of the cash flow of the hedged item.

Property and Equipment (including Concession Assets). KCS capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. For purchased assets, all costs necessary to make the asset ready for its intended use are capitalized. Expenditures that significantly increase asset values, productive capacity, efficiency, safety or extend useful lives are capitalized. Repair and maintenance costs are expensed as incurred.

Property and equipment are carried at cost and are depreciated primarily on the group method of depreciation, which the Company believes closely approximates a straight line basis over the estimated useful lives of the assets measured in years. The group method of depreciation applies a composite rate to classes of similar assets rather than to individual assets. Composite depreciation rates are based upon the Company's estimates of the expected average useful lives of assets as well as expected net salvage value at the end of their useful lives. In developing these estimates, the Company utilizes periodic depreciation studies performed by an independent engineering firm. Depreciation rate studies are performed at least every three years for equipment and at least every six years for road property (rail, ties, ballast, etc.). The Company performed depreciation studies for KCSR and KCSM in 2019. The impacts of the studies were immaterial to the consolidated financial results for all periods.

Under the group method of depreciation, the cost of railroad property and equipment (net of salvage or sales proceeds) retired or replaced in the normal course of business is charged to accumulated depreciation with no gain or loss recognized. Gains or losses on dispositions of land or non-group property and abnormal retirements of railroad property are recognized through income. A retirement of railroad property would be considered abnormal if the cause of the retirement is unusual in nature, is significant in amount, and varies significantly from the retirement profile identified through the depreciation studies.

Costs incurred by the Company to acquire the Concession rights and related assets, as well as subsequent improvements to the Concession assets, are capitalized and amortized using the group method of depreciation over the lesser of the current expected Concession term, including probable renewal of an additional 50-year term, or the estimated useful lives of the assets and rights.

Long-lived assets are reviewed for impairment when events or circumstances indicate that the carrying amount of an asset may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the long-lived assets, the carrying value would be reduced to the estimated fair value. Future cash flow estimates for an impairment review would be based on the lowest level of identifiable cash flows, which are the Company's U.S. and Mexican operations. Other than the abnormal impairments related to the implementation of Precision Scheduled Railroading ("PSR"), management did not identify any indicators of impairment for the years ended December 31, 2019 and 2018.

Leases. The Company leases transportation equipment, as well as office and other operating facilities, under various finance and operating leases. Operating lease right-of-use assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As the implicit rate is not readily determinable in most of the Company's lease agreements, the Company uses its estimated secured incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments. Lease expense is recognized on a straight-line basis over the lease term.

The Company determines if an arrangement is a lease or contains a lease at inception. The Company's leases have remaining lease terms of approximately 1 year to 10 years, which may include the option to extend the lease when it is reasonably certain the Company will exercise that option. The Company does not have lease agreements with residual value guarantees, sale leaseback terms or material restrictive covenants. Additionally, short-term leases and leases with variable lease costs are immaterial, and the Company does not have any sublease arrangements.

Goodwill. Goodwill represents the excess of the purchase price over the fair value of the net identifiable assets acquired in business combinations. As of December 31, 2019 and 2018, the goodwill balance was $13.2 million, which is included in other assets in the consolidated balance sheets. Goodwill is not amortized, but is reviewed at least annually, or more frequently as indicators warrant, for impairment. An impairment loss would be recognized to the extent that the carrying amount exceeds the reporting units' fair values. The Company performed its annual impairment review for goodwill as of November 30, 2019 and 2018, and concluded there was no impairment.

Investments and Impairment. The Company reviews equity method investments for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may not be recoverable in accordance with generally accepted accounting principles. This determination requires significant judgment. In making this judgment, the Company considers available quantitative and qualitative evidence in evaluating potential impairment of these investments. If it is determined that an indicator of impairment exists, the Company assesses whether the carrying value exceeds the fair value of the asset. If the carrying value of the investment exceeds its fair value, the Company will evaluate, among other factors, general market conditions, the duration and extent to which the carrying value is greater than the fair value, and KCS's intent and ability to hold, or plans to sell, the investment. The Company also considers specific adverse conditions related to the financial health of and business outlook for the investee, including industry and sector performance, changes in technology, and operational and financing cash flow factors. Once a decline in fair value is determined to be other-than-temporary, an impairment charge will be recorded and a new carrying basis in the investment will be established. No impairment charges were recognized during the years ended December 31, 2019, 2018 and 2017.

Fair Value of Financial Instruments. Non-financial assets and liabilities are recognized at fair value on a nonrecurring basis. These assets and liabilities are measured at fair value on an ongoing basis but are subject to recognition in the financial statements only in certain circumstances. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company determines the fair values of its financial instruments based on the fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy is broken down into three levels based upon the observability of inputs. Fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value in its entirety requires judgment and considers factors specific to the asset or liability.

Environmental Liabilities. The Company recognizes liabilities for remediation and restoration costs when the Company's obligation is probable and the costs can be reasonably estimated. Costs of future expenditures for environmental remediation and restoration are not discounted to their present value. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable. Costs of ongoing compliance activities related to current operations are expensed as incurred.

Personal Injury Claims. Personal injury claims in excess of self-insurance levels are insured up to certain coverage amounts, depending on the type of claim and year of occurrence. The Company's personal injury liability is based on actuarial studies performed on an undiscounted basis by an independent third party actuarial firm and reviewed by management. The liability is based on claims filed and an estimate of claims incurred but not yet reported. Adjustments to the liability are reflected as operating expenses in the period in which the adjustments are known. Legal fees related to personal injury claims are recognized in operating expense in the period incurred.

Health and Welfare and Postemployment Benefits. The Company provides certain medical, life and other postemployment benefits to certain active employees and retirees. The Company uses actuaries to assist management in measuring the benefit obligation and cost based on the current plan provisions, employee demographics, and assumptions about financial and demographic factors affecting the probability, timing and amount of expected future benefit payments. Significant assumptions include the discount rate, rate of increase in compensation levels, and the health care cost trend rate. Actuarial gains and losses determined at the measurement date (December 31) are recognized immediately in the consolidated statements of income.

Share-Based Compensation. The Company accounts for all share-based compensation in accordance with fair value recognition provisions. Under this method, compensation expense is measured at grant date fair value and is recognized over the requisite service period in which the award is earned. Forfeitures are recognized as they occur. The Company issues treasury stock to settle share-based awards.

Income Taxes. Deferred income tax effects of transactions reported in different periods for financial reporting and income tax return purposes are recognized under the asset and liability method of accounting for income taxes. This method gives consideration to the future tax consequences of the deferred income tax items and immediately recognizes changes in income tax laws in the year of enactment.

The Company has recognized a deferred tax asset, net of a valuation allowance, for net operating loss and tax credit carryovers. The Company projects sufficient future taxable income to realize the deferred tax asset recorded less the valuation allowance. These projections take into consideration assumptions about future income, future capital expenditures and inflation rates. If assumptions or actual conditions change, the deferred tax asset, net of the valuation allowance, will be adjusted to properly reflect the expected tax benefit.

Treasury Stock. The excess of repurchase price over par value of shares held in treasury is allocated between additional paid-in capital and retained earnings.

New Accounting Pronouncements

In June 2016, the FASB issued ASU 2016-13, "*Financial Instruments - Credit Losses."* The ASU sets forth a "current expected credit loss" (CECL) model which requires the Company to measure all expected credit losses for financial instruments held at the reporting date based on historical experience, current conditions, and reasonable supportable forecasts. This replaces the existing incurred loss model and is applicable to the measurement of credit losses on financial assets, including trade receivables. The new standard will become effective for the Company beginning with the first quarter 2020 and will not have a material impact on the Company's consolidated financial statements.

Note 3. Restructuring Charges

The Company is implementing certain principles of PSR, which focus on providing reliable customer service, facilitating growth, improving asset utilization, and improving the cost profile of the Company. As a result of the PSR initiatives, management approved four separate restructuring plans during 2019, which resulted in restructuring charges of $168.8 million. Management approved the fourth restructuring plan during the fourth quarter of 2019, which coincided with the preparation of the Company's annual financial statements, and recognized restructuring charges of $38.3 million in the consolidated statements of income.

Expenses related to these initiatives are shown in the following table (*in millions*):

	2019				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year-to-Date
Restructuring charges:					
Asset impairments	$ 62.5	$ 50.7	$ 8.6	$ 36.0	$ 157.8
Workforce reduction	3.2	—	3.4	0.4	7.0
Contract restructuring	1.8	0.3	—	1.9	4.0
Total restructuring charges	$ 67.5	$ 51.0	$ 12.0	$ 38.3	$ 168.8

Asset Impairments. The Company committed to plans to dispose of certain locomotives and freight cars to increase operational fluidity, reduce maintenance expense, and improve labor and fuel efficiency. Accordingly, the Company performed an impairment analysis to adjust the carrying amount of each asset to the lower of its depreciated book value or its estimated fair value, less costs to dispose, and stopped recognizing depreciation expense. During 2019, the Company sold 66 of 127 locomotives and 1,467 of 2,011 freight cars identified under the plans. The carrying amount of the remaining assets held for sale of $11.3 million is classified as other current assets within the consolidated balance sheets at December 31, 2019. Additionally, the Company wrote off parts inventory associated with the locomotive and freight car models that were disposed.

Workforce Reduction. The Company recognized severance costs associated with PSR initiatives focused on the cost profile of the Company and improving asset utilization by reducing the active locomotive fleet and rail cars online.

Contract Restructuring. The Company terminated certain third-party vendor contracts in order to drive operational efficiencies, which resulted in contract termination penalties.

Note 4. Mexican Fuel Excise Tax Credit

Fuel purchases in Mexico are subject to an excise tax that is included in the price of fuel. Through April 29, 2019, the Company was eligible for a credit for the excise tax included in the price of fuel that is purchased and consumed in locomotives and certain work equipment in Mexico. For years 2018 and 2017, the Mexican fuel excise tax credit ("IEPS credit") was utilized and realized through the offset of the total annual Mexico income tax liability and income tax withholding payment

obligations of KCSM, with no carryforward to future periods and recognized as a benefit in operating expenses on the consolidated statements of income.

In December 2018, the Mexican government enacted changes in the tax law effective January 1, 2019 ("Mexico 2019 Tax Reform"), which, among other things, for 2019 eliminated the option to monetize the IEPS credit by offsetting income tax withholding payment obligations. As a result, the Company is allowed to offset the 2019 IEPS credit only against its Mexico corporate income tax liability on the 2019 annual income tax return. The elimination of the option to apply the IEPS credit to income tax withholding payment obligations required the Company to recognize the IEPS credit as a reduction of income tax expense rather than a reduction of operating expenses for 2019.

On April 29, 2019, the Servicio de Administración Tributaria (the "SAT"), the Mexican equivalent of the IRS, published the Miscellaneous Fiscal Resolution for 2019 ("2019 Resolution"), which eliminated the Company's eligibility for the IEPS credit effective beginning April 30, 2019. During the period of eligibility in 2019, the Company generated IEPS credits resulting in a $12.8 million net tax benefit, which was recognized as a reduction to income tax expense within the consolidated statements of income for the year ended December 31, 2019.

Note 5. Leases

Leases	Classification	December 31, 2019 (*in millions*)
Assets		
Operating	Operating lease right-of-use assets	$ 158.4
Finance	Property and equipment (including Concession assets), net	8.7
Total leased assets		$ 167.1
Liabilities		
Current

Thereafter	8.4	—
Total lease payments	141.6	10.6
Less imputed interest	10.5	1.9
Total	$ 131.1	$ 8.7

As of December 31, 2019, the Company had additional operating leases that have not yet commenced of $3.3 million, which will commence during fiscal year 2020, and carry lease terms of 5 years.

Note 6. Revenue

Disaggregation of Revenue

The following table presents revenues disaggregated by the major commodity groups as well as the product types included within the major commodity groups *(in millions)*. The Company believes disaggregation by product type best depicts how cash flows are affected by economic factors. See Note 20, Geographic Information in the consolidated financial statements for revenues by geographical area.

	Years ended December 31,		
	2019 (ASC 606)	2018 (ASC 606)	2017 (ASC 605)

Major customers

No individual customer makes up greater than 10% of total consolidated revenues.

Contract Balances

The amount of revenue recognized in 2019 from performance obligations partially satisfied in the previous year was $21.9 million. The performance obligations that were unsatisfied or partially satisfied as of December 31, 2019, were $17.7 million, which represents in-transit shipments that are fully satisfied the following month.

A receivable is any unconditional right to consideration, and is recognized as shipments have been completed and the relating performance obligation has been fully satisfied. At December 31, 2019 and 2018, the accounts receivable, net balance was $274.2 million and $301.2 million, respectively. Contract assets represent a conditional right to consideration in exchange for goods or services. The Company did not have any contract assets at December 31, 2019 and 2018.

Contract liabilities represent consideration received in advance from customers, and are recognized as revenue over time as the relating performance obligation is satisfied. The amount of revenue recognized in 2019 that was included in the opening contract liability balance was $32.4 million. The Company has recognized contract liabilities within the accounts payable and accrued liabilities financial statement caption on the balance sheet. These are considered current liabilities as they will be settled in less than 12 months.

The following tables summarize the changes in contract liabilities *(in millions)*:

Contract liabilities	**Years ended December 31,**	
	2019 (ASC 606)	**2018 (ASC 606)**
Beginning balance	$ 32.4	$ 26.8
Revenue recognized that was included in the contract liability balance at the beginning of the period	(32.4)	(26.8)
Increases due to consideration received, excluding amounts recognized as revenue during the period	30.5	32.4
Ending balance	$ 30.5	$ 32.4

Note 7. Hurricane Harvey

In late August 2017, Hurricane Harvey made landfall on the Texas coast and caused flood damage to the Company's track infrastructure and significantly disrupted the Company's rail service. The Company filed a claim in the fourth quarter of 2017 under its insurance program for property damage, incremental expenses, and lost profits caused by Hurricane Harvey. In the third quarter of 2017, the Company recognized a receivable for probable insurance recovery offsetting the impact of incremental expenses recognized in the quarter. During 2018, the Company partially settled its insurance claim for $35.5 million. As a result of the nonrefundable partial settlement, the Company recognized gain on insurance recoveries of $17.9 million, net of the self-insured retention and insurance receivable. The Company received the nonrefundable cash proceeds of $25.5 million from the partial settlement in the fourth quarter of 2018. Final settlement of the insurance claim is dependent upon costs incurred with an ongoing bridge construction project expected to be completed in 2020.

Note 8. Earnings Per Share

Basic earnings per common share is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share adjusts basic earnings per common share for the effects of potentially dilutive common shares, if the effect is not anti-dilutive. Potentially dilutive common shares include the dilutive effects of shares issuable under the 2008 and 2017 Equity Incentive Plans and shares issuable upon the conversion of preferred stock to common stock.

The following table reconciles the basic earnings per share computation to the diluted earnings per share computation *(in millions, except share and per share amounts)*:

	2019	2018	2017
Net income available to common stockholders for purposes of computing basic and diluted earnings per share	$ 538.7	$ 627.2	$ 961.8
Weighted-average number of shares outstanding *(in thousands)*:			
Basic shares	99,316	101,852	104,728
Effect of dilution	431	418	312
Diluted shares	99,747	102,270	105,040
Earnings per share:			
Basic earnings per share	$ 5.42	$ 6.16	$ 9.18
Diluted earnings per share	$ 5.40	$ 6.13	$ 9.16

Potentially dilutive shares excluded from the calculation (*in thousands*):	2019	2018	2017
Stock options excluded as their inclusion would be anti-dilutive	121	117	150

Note 9. Property and Equipment (including Concession Assets)

The following tables list the major categories of property and equipment, including Concession assets, as well as the weighted-average composite depreciation rate for each category (*in millions*):

As of December 31, 2019	Cost	Accumulated Depreciation	Net Book Value	Depreciation Rates for 2019
Land	$ 224.9	$ —	$ 224.9	N/A
Concession land rights	141.1	(29.4)	111.7	1.0%
Rail and other track material	2,122.9	(373.3)	1,749.6	1.8-3.2%
Ties	1,738.4	(405.7)	1,332.7	1.4-5.0%
Grading	991.5	(179.4)	812.1	1.1%
Bridges and tunnels	823.8	(163.0)	660.8	1.2%

Construction in progress	170.2	—	170.2	N/A
Total property and equipment (including Concession assets)	$ 11,496.0	$ (2,689.7)	$ 8,806.3	N/A

(a) Other includes signals, buildings and other road assets.

As of December 31, 2018	Cost	Accumulated Depreciation	Net Book Value	Depreciation Rates for 2018
Land	$ 219.3	$ —	$ 219.3	N/A
Concession land rights	141.1	(27.9)	113.2	1.0%
Rail and other track material	2,064.4	(296.3)	1,768.1	2.4-2.9%
Ties	1,697.9	(465.6)	1,232.3	2.0-4.8%
Grading	978.2	(169.4)	808.8	0.9%
Bridges and tunnels	803.9	(153.8)	650.1	1.1%
Ballast	799.9	(223.9)	576.0	2.5-4.2%
Other (a)	1,367.2	(401.4)	965.8	3.2%
Total road property	7,711.5	(1,710.4)	6,001.1	2.8%
Locomotives	1,638.1	(436.3)	1,201.8	4.9%
Freight cars	1,034.1	(200.9)	833.2	2.7%
Other equipment	67.3	(29.0)	38.3	5.7%
Total equipment	2,739.5	(666.2)	2,073.3	4.1%
Technology and other	305.6	(173.9)	131.7	16.6%
Construction in progress	152.5	—	152.5	N/A
Total property and equipment (including Concession assets)	$ 11,269.5	$ (2,578.4)	$ 8,691.1	N/A

(a) Other includes signals, buildings and other road assets.

Concession assets, net of accumulated amortization of $678.1 million and $645.2 million, totaled $2,335.5 million and $2,260.4 million at December 31, 2019 and 2018, respectively.

Depreciation and amortization of property and equipment (including Concession assets) totaled $350.7 million, $346.7 million and $320.9 million, for 2019, 2018, and 2017, respectively.

Note 10. Other Balance Sheet Captions

Other Current Assets. Other current assets included the following items at December 31 *(in millions):*

	2019	2018
Refundable taxes	$ 67.3	$ 11.2
Advances to affiliates	47.3	6.3
Mexican fuel excise tax credit	—	30.9
Prepaid expenses	21.0	21.7
Other	19.4	3.3
Other current assets	$ 155.0	$ 73.4

Accounts Payable and Accrued Liabilities. Accounts payable and accrued liabilities included the following items at December 31 *(in millions):*

	2019	2018
Accounts payable	$ 157.1	$ 180.5
Income and other taxes	34.4	35.2
Accrued wages and vacation	79.0	60.9
Short-term operating lease liability	45.4	—
Derailments, personal injury and other claim provisions	38.5	44.0
Dividends payable	38.7	36.4
Contract liabilities	30.5	32.4
Interest payable	23.1	20.1
Other	26.6	27.4
Accounts payable and accrued liabilities	$ 473.3	$ 436.9

Note 11. Fair Value Measurements

The Company's assets and liabilities recognized at fair value have been categorized based upon a fair value hierarchy as described in Note 2, Significant Accounting Policies. As of December 31, 2019, the Company's derivative financial instruments are measured at fair value on a recurring basis and consist of foreign currency forward and option contracts, which are classified as Level 2 valuations. The Company determines the fair value of its derivative financial instrument positions based upon pricing models using inputs observed from actively quoted markets and also takes into consideration the contract terms as well as other inputs, including market currency exchange rates and in the case of option contracts, volatility, the risk-free interest rate and the time to expiration.

The Company's short-term financial instruments include cash and cash equivalents, accounts receivable, accounts payable and short-term borrowings. The carrying value of the short-term financial instruments approximates their fair value.

The fair value of the Company's debt is estimated using quoted market prices when available. When quoted market prices are not available, fair value is estimated based on current market interest rates for debt with similar maturities and credit quality. The carrying value of the Company's debt was $3,246.0 million and $2,689.4 million at December 31, 2019 and 2018, respectively. If the Company's debt were measured at fair value, the fair value measurements of the individual debt instruments would have been classified as Level 2 in the fair value hierarchy.

The fair value of the Company's financial instruments is presented in the following table *(in millions)*:

	December 31, 2019	December 31, 2018
	Level 2	Level 2
Assets		
Foreign currency derivative instruments	$ 2.5	$ 0.3
Liabilities		
Debt instruments	3,535.7	2,661.3
Treasury lock agreements	—	2.0

Note 12. Derivative Instruments

The Company enters into derivative transactions in certain situations based on management's assessment of current market conditions and perceived risks. Management intends to respond to evolving business and market conditions and in doing so, may enter into such transactions as deemed appropriate.

Credit Risk. As a result of the use of derivative instruments, the Company is exposed to counterparty credit risk. The Company manages this risk by limiting its counterparties to large financial institutions which meet the Company's credit rating standards and have an established banking relationship with the Company. As of December 31, 2019, the Company did not expect any losses as a result of default of its counterparties.

Interest Rate Derivative Instruments. In May 2017, the Company executed four treasury lock agreements with an aggregate notional value of $275.0 million and a weighted-average interest rate of 2.85%. The purpose of the treasury locks was to hedge the U.S. Treasury benchmark interest rate associated with future interest payments related to the anticipated refinancing of the $275.0 million, 2.35% senior notes due May 15, 2020 (the "2.35% Senior Notes"). The Company designated the treasury locks as cash flow hedges and recorded unrealized gains and losses in accumulated other comprehensive loss. During the fourth quarter of 2019, KCS issued $425.0 million principal amount of 2.875% senior notes due November 15, 2029 (the "2.875% Senior Notes"), effectively completing the refinancing of the 2.35% Senior Notes, and settled the treasury lock agreements, resulting in cash paid of $25.8 million. This amount was included in accumulated other comprehensive loss and is being amortized to interest expense over the life of the new 2.875% Senior Notes, increasing the effective interest rate on the notes to 3.60%. The settlement and amortization associated with the treasury lock agreements are classified as operating activities within the consolidated statements of cash flows.

Foreign Currency Derivative Instruments. The Company's Mexican subsidiaries have net U.S. dollar-denominated monetary liabilities which, for Mexican income tax purposes, are subject to periodic revaluation based on changes in the value of the Mexican peso against the U.S. dollar. This revaluation creates fluctuations in the Company's Mexican income tax expense and the amount of income taxes paid in Mexico. The Company hedges its exposure to this cash tax risk by entering into foreign currency forward contracts and foreign currency option contracts known as zero-cost collars.

The foreign currency forward contracts involve the Company's purchase of pesos at an agreed-upon weighted-average exchange rate to each U.S dollar. The zero-cost collars involve the Company's purchase of a Mexican peso call option and a simultaneous sale of a Mexican peso put option, with equivalent U.S. dollar notional amounts for each option and no net cash premium paid by the Company. The Company's foreign currency forward and zero-cost collar contracts are executed with counterparties in the U.S. and are governed by an International Swaps and Derivatives Association agreement that includes standard netting arrangements. Asset and liability positions from contracts with the same counterparty are net settled upon maturity/expiration and presented on a net basis in the consolidated balance sheets prior to settlement. There was no offsetting of derivative assets or liabilities in the consolidated balance sheets as of December 31, 2019 and 2018.

Below is a summary of the Company's 2019, 2018 and 2017 foreign currency derivative contracts *(amounts in millions, except Ps./USD)*:

Foreign currency forward contracts

	Contracts to purchase Ps./pay USD			Offsetting contracts to sell Ps./receive USD			
	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Cash received/ (paid) on settlement
Contracts executed in 2019 and outstanding at December 31, 2019	$ 105.0	Ps. 2,041.2	Ps. 19.4	—	—	—	—
Contracts executed in 2019 and settled in 2019	$ 400.0	Ps. 7,892.5	Ps. 19.7	$ 410.7	Ps. 7,892.5	Ps. 19.2	$ 10.7
Contracts executed in 2018 and settled in 2019	$ 20.0	Ps. 410.9	Ps. 20.5	$ 20.9	Ps. 410.9	Ps. 19.6	$ 0.9
Contracts executed in 2016 and settled in 2017	$ 340.0	Ps. 6,207.7	Ps. 18.3	$ 287.0	Ps. 6,207.7	Ps. 21.6	$ (53.0)

Foreign currency zero-cost collar contracts

	Notional amount	Cash received/ (paid) on settlement
Contracts executed in 2018 and settled in 2019	$ 120.0	$ 0.3
Contracts executed in 2018 and settled in 2018	$ 220.0	$ 3.9
Contracts executed in 2017 and settled in 2018	$ 80.0	$ 10.0
Contracts executed in 2017 and settled in 2017	$ 450.0	$ 42.2

The Company has not designated any of the foreign currency derivative contracts as hedging instruments for accounting purposes. The Company measures the foreign currency derivative contracts at fair value each period and recognizes any change in fair value in foreign exchange gain (loss) within the consolidated statements of income. The cash flows associated with these instruments is classified as an operating activity within the consolidated statements of cash flows.

The following table presents the fair value of derivative instruments included in the consolidated balance sheets at December 31 *(in millions)*:

		Derivative Assets	
	Balance Sheet Location	2019	2018
Derivatives not designated as hedging instruments:			
Foreign currency forward contracts	Other current assets	$ 2.5	$ —
Foreign currency zero-cost collar contracts	Other current assets	—	0.3
Total derivatives not designated as hedging instruments		2.5	0.3
Total derivative assets		$ 2.5	$ 0.3

		Derivative Liabilities	
	Balance Sheet Location	2019	2018
Derivatives designated as hedging instruments:			
Treasury lock agreements	Other noncurrent liabilities and deferred credits	$ —	$ 2.0
Total derivatives designated as hedging instruments		—	2.0
Total derivative liabilities		$ —	$ 2.0

The following tables present the effects of derivative instruments on the consolidated statements of income and consolidated statements of comprehensive income for the years ended December 31 *(in millions)*:

Derivatives in Cash Flow Hedging Relationships	Amount of Gain/(Loss) Recognized in OCI on Derivative			Location of Gain/(Loss) Reclassified from AOCI into Income	Amount of Gain/(Loss) Reclassified from AOCI into Income		
	2019	2018	2017		2019	2018	2017
Treasury lock agreements	$ (23.8)	$ 3.6	$ (5.6)	Interest expense	$ (0.2)	$ —	$ —
Total	$ (23.8)	$ 3.6	$ (5.6)		$ (0.2)	$ —	$ —

Derivatives Not Designated as Hedging Instruments	Location of Gain/(Loss) Recognized in Income on Derivative	Amount of Gain/(Loss) Recognized in Income on Derivative		
		2019	2018	2017
Foreign currency forward contracts	Foreign exchange gain	$ 14.1	$ —	$ (11.9)
Foreign currency zero-cost collar contracts	Foreign exchange gain	—	6.3	50.1
Total		$ 14.1	$ 6.3	$ 38.2

See Note 11, Fair Value Measurements, for the determination of the fair values of derivatives.

Note 13. Short-Term Borrowings

Commercial Paper. The Company's commercial paper program generally serves as the primary means of short-term funding. As of December 31, 2019, and 2018, KCS had no commercial paper outstanding. For the years ended December 31, 2019, 2018 and 2017, commercial paper borrowings were outstanding for less than 90 days and the related activity is presented on a net basis in the consolidated statements of cash flows.

Note 14. Long-Term Debt

Long-term debt at December 31 *(in millions):*

	2019			2018

Revolving Credit Facility

On March 8, 2019, KCS, with certain of its domestic subsidiaries named therein as guarantors, entered into a new 5-year, $600.0 million senior unsecured revolving credit facility (the "Revolving Credit Facility"), with a $25.0 million standby letter of credit facility which, if utilized, constitutes usage under the Revolving Credit Facility. The Revolving Credit Facility replaced KCS's existing $800.0 million revolving credit facility. The Revolving Credit Facility serves as a backstop for KCS's commercial paper program (the "Commercial Paper Program") which generally serves as the Company's primary means of short-term funding. The Commercial Paper Program was amended during 2019 to decrease maximum borrowings under the program from $800.0 million to $600.0 million, consistent with the Revolving Credit Facility.

Borrowings under the Revolving Credit Facility bear interest at floating rates. Depending on the Company's credit rating, the margin that KCS would pay above the London Interbank Offered Rate ("LIBOR") at any point is between 1.000% and 1.750%. As of December 31, 2019, the margin was 1.25% based on KCS's current credit rating.

The Revolving Credit Facility is guaranteed by KCSR, together with certain domestic subsidiaries named therein as guarantors and matures on March 8, 2024. The Revolving Credit Facility agreement contains representations, warranties,

covenants and events of default that are customary for credit agreements of this type. The occurrence of an event of default could result in the termination of the commitments and the acceleration of the repayment of any outstanding principal balance on the Revolving Credit Facility and the Commercial Paper Program.

The Revolving Credit Facility was categorized as a debt modification and the Company incurred $2.5 million of debt issuance costs during the first quarter of 2019, which were capitalized and will be amortized over the life of the related debt instrument. The Company recorded debt retirement costs of $0.6 million to write off previously capitalized debt issuance costs.

As of December 31, 2019 and 2018, KCS had no outstanding borrowings under a revolving credit facility.

Senior Notes

The Company's senior notes include certain covenants that are customary for these types of debt instruments issued by borrowers with similar credit ratings.

The KCS notes are KCS's general unsecured senior obligations and are unconditionally guaranteed, jointly and severally, on an unsecured senior basis by each current and future domestic subsidiary of KCS that from time to time guarantees the Revolving Credit Facility or any other debt of KCS or any of KCS's significant subsidiaries that is a guarantor (collectively, the "Note Guarantors").

KCSR's senior notes are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by KCS and each current and future domestic subsidiary of KCS that guarantees the Revolving Credit Facility or certain other debt of KCS or a note guarantor. KCSR's senior notes and the note guarantees rank pari passu in right of payment with KCSR's, KCS's and the Note Guarantors' existing and future unsecured, unsubordinated obligations.

KCSM's senior notes are denominated in U.S. dollars; are unsecured, unsubordinated obligations; rank pari passu in right of payment with KCSM's existing and future unsecured, unsubordinated obligations and are senior in right of payment to KCSM's future subordinated indebtedness.

Senior notes are redeemable at the issuer's option, in whole or in part, at any time, by paying the greater of either 100% of the principal amount to be redeemed and a formula price based on interest rates prevailing at the time of redemption and time remaining to maturity, plus, in each case, accrued interest thereon to, but excluding the redemption date. In addition, KCSM senior notes are redeemable, in whole but not in part, at KCSM's option at any time at a redemption price of 100% of their principal amount, plus any accrued unpaid interest in the event of certain changes in the Mexican withholding tax rate.

On November 18, 2019, KCS issued $425.0 million principal amount of senior unsecured notes due November 15, 2029 (the "2.875% Senior Notes"), which bear interest semiannually at a fixed annual rate of 2.875%. The 2.875% Senior Notes were issued at a discount to par value, resulting in a $0.4 million discount and a yield to maturity of 2.885%.

Additionally on November 18, 2019, KCS issued $425.0 million principal amount of senior unsecured notes due November 15, 2069 (the "4.20% Senior Notes"), which bear interest semiannually at a fixed annual rate of 4.20%. The 4.20% Senior Notes were issued at a discount to par value, resulting in a $2.1 million discount and a yield to maturity of 4.224%.

The net proceeds from the offerings were used to make payments under the accelerated share repurchase ("ASR") agreements, to redeem the KCS 2.35% Senior Notes, and for general corporate purposes.

On December 18, 2019, KCS and KCSM redeemed all of the $275.0 million aggregate principal amount of the 2.35% Senior Notes, using cash on hand and proceeds from the issuance of KCS's 2.875% and 4.20% Senior Notes, at a redemption price equal to 100.084% of the principal amount. The Company recorded debt retirement costs of $0.5 million for the call premiums and write-off of unamortized debt issuance costs and original issue discounts.

RRIF Loan Agreements

The following loans were made under the Railroad Rehabilitation and Improvement Financing ("RRIF") Program administered by the Federal Railroad Administration ("FRA"):

KCSR RRIF Loan Agreement. On February 21, 2012, KCSR entered into an agreement with the FRA to borrow $54.6 million to be used to reimburse KCSR for a portion of the purchase price of thirty new locomotives (the "Locomotives") acquired by KCSR in the fourth quarter of 2011. The loan bears interest at 2.96% annually and the principal balance amortizes

quarterly with a final maturity of February 24, 2037. The obligations under the financing agreement are secured by a first priority security interest in the Locomotives and certain related rights. In addition, the Company has agreed to guarantee repayment of the amounts due under the financing agreement and certain related agreements. The occurrence of an event of default could result in the acceleration of the repayment of any outstanding principal balance of the loan.

Tex-Mex RRIF Loan Agreement. On June 28, 2005, Tex-Mex entered into an agreement with the FRA to borrow $50.0 million to be used for infrastructure improvements in order to accommodate growing freight rail traffic related to the NAFTA corridor. The loan bears interest at 4.29% annually and the principal balance amortizes quarterly with a final maturity of July 13, 2030. The loan is guaranteed by Mexrail, which has issued a pledge agreement in favor of the lender equal to the gross revenues earned by Mexrail on per-car fees on traffic crossing the International Rail Bridge in Laredo, Texas. In addition, the Company has agreed to guarantee the scheduled principal payment installments due to the FRA from Tex-Mex under the loan agreement on a rolling five-year basis.

Locomotive Financing Agreements

During 2011, KCSM entered into financing agreements totaling $91.0 million to purchase locomotives. The agreements mature December 2020, are payable on a quarterly basis and contain annual interest rates of 9.311%. KCSM has secured the loans by transferring legal ownership of the locomotives to irrevocable trusts established by KCSM to which the lender is the primary beneficiary and KCSM has a right of reversion upon satisfaction of the obligations of the financing agreements.

KCSM's locomotive financing agreements contain representations, warranties and covenants typical of such equipment loan agreements. Events of default in the financing agreements include, but are not limited to, certain payment defaults, certain bankruptcy and liquidation proceedings and the failure to perform any covenants or agreements contained in the financing agreements. Any event of default could trigger acceleration of KCSM's payment obligations under the terms of the financing agreements.

Debt Covenants Compliance

The Company was in compliance with all of its debt covenants as of December 31, 2019.

Other Debt Provisions

Certain loan agreements and debt instruments entered into or guaranteed by the Company and its subsidiaries provide for default in the event of a specified change in control of the Company or particular subsidiaries of the Company.

Debt Maturities

Minimum annual payments for debt maturities are as follows *(in millions)*:

Years	Long-Term Debt	Net Present Value Finance Leases	Total
2020	$ 16.1	$ 1.9	$ 18.0
2021	4.2	2.1	6.3
2022	4.3	2.3	6.6
2023	649.1	2.3	651.4
2024	4.6	0.1	4.7
Thereafter	2,598.6	—	2,598.6
Total	$ 3,276.9	$ 8.7	$ 3,285.6

Note 15. Income Taxes

Current income tax expense represents the amounts expected to be reported on the Company's income tax returns, and deferred tax expense or benefit represents the change in net deferred tax assets and liabilities. Deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities as measured by the enacted tax rates that will be in effect when these differences reverse. Valuation allowances are recorded as appropriate to reduce deferred tax assets to the amount considered likely to be realized.

Tax Cuts and Jobs Act. On December 22, 2017, the President of the United States signed into law the Tax Cuts and Jobs Act (the "Tax Reform Act"). The legislation significantly changed U.S. tax law by, among other things, lowering corporate income tax rates, implementing a modified territorial tax system and imposing a repatriation tax on deemed repatriated earnings of foreign subsidiaries. The Tax Reform Act permanently reduced the U.S. corporate income tax rate from a maximum of 35% to a 21% rate, effective January 1, 2018.

Included in the Tax Reform Act were the global intangible low-taxed income ("GILTI") provisions. The Company elected to account for GILTI tax in the period in which it is incurred. The GILTI provisions require the Company to include in its U.S. income tax return foreign subsidiary earnings in excess of an allowable return on the foreign subsidiary's tangible assets.

Tax Expense (Benefit). Income tax expense (benefit) consists of the following components *(in millions):*

	2019	2018	2017
Current:			
Federal	$ 22.3	$ (10.5)	$ 47.3
State and local	1.8	0.7	0.6
Foreign	170.4	175.6	163.8
Total current	194.5	165.8	211.7
Deferred:

Investments	(52.4)	(49.7)
Other	(28.8)	(32.0)
Gross deferred tax liabilities	(1,262.5)	(1,180.9)
Net deferred tax liability	$ (1,128.0)	$ (1,079.9)

Tax Rates. Differences between the Company's effective income tax rate and the U.S. federal statutory income tax rate of 21% for 2019 and 2018 and 35% for 2017 follow *(in millions):*

	2019		2018		2017	
	Dollars	Percent	Dollars	Percent	Dollars	Percent
Income tax expense using the statutory rate in effect	$ 165.6	21.0%	$ 186.2	21.0%	$ 306.0	35.0%
Tax effect of:						
Difference between U.S. and foreign tax rate	47.6	6.0%	46.1	5.2%	(26.6)	(3.0%)
Foreign exchange (i)	35.9	4.6%	21.8	2.5%	31.6	3.6%
Tax credits	(16.8)	(2.1%)	(14.2)	(1.6%)	(8.4)	(1.0%)
Mexican fuel excise tax credit, net (ii)	(12.8)	(1.6%)	—	—	—	—
State and local income tax provision, net	11.5	1.5%	7.5	0.8%	8.3	1.0%
Withholding tax	9.5	1.2%	11.2	1.3%	8.1	0.9%
Global intangible low-taxed income ("GILTI") tax, net	2.7	0.3%	11.8	1.3%	—	—
Change in U.S. tax rate	—	—	(2.2)	(0.3%)	(487.6)	(55.8%)
Deemed mandatory repatriation	—	—	(18.7)	(2.1%)	74.6	8.6%
Other, net	4.4	0.5%	8.0	0.9%	4.4	0.5%
Income tax expense (benefit)	$ 247.6	31.4%	$ 257.5	29.0%	$ (89.6)	(10.2%)

(i) Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. The foreign exchange impact on income taxes includes the gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos which is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate. To hedge its exposure to this cash tax risk, the Company enters into foreign currency derivative contracts, which are measured at fair value each period and any change in fair value is recognized in foreign exchange gain (loss) within the consolidated statements of income. Refer to Note 12, Derivative Instruments in the consolidated financial statements for further information.

(ii) For further discussion of the Mexican fuel excise tax credit, refer to Note 4, Mexican fuel excise tax credit.

Difference Attributable to Foreign Investments. The Company asserts that all foreign earnings will be indefinitely reinvested to the extent of local needs and earnings that would be distributed in a taxable manner. The Company therefore intends to limit distributions to earnings previously taxed in the U.S., or earnings that would qualify for the 100 percent dividends received deduction provided for in the Tax Reform Act, and earnings that would not result in any significant foreign taxes. Therefore, the Company has not recognized a deferred tax liability on its investment in foreign subsidiaries.

Tax Carryovers. The Company has U.S. state net operating losses which are carried forward from 5 to 20 years and are analyzed each year to determine the likelihood of realization. The state loss carryovers arise from both combined and separate tax filings from as early as 1999 and may expire as early as December 31, 2020 and as late as December 31, 2039. The state loss carryover at December 31, 2019 was $351.9 million resulting in a state deferred tax asset of $22.5 million.

The Mexico federal loss carryovers at December 31, 2019, were $11.1 million and, if not used, will begin to expire in 2026. A deferred tax asset was recognized in prior periods for the expected future tax benefit of these losses which will be carried forward to reduce only Mexican income tax payable in future years.

The valuation allowance for deferred tax assets as of December 31, 2019 and 2018, was $4.4 million and $2.3 million, respectively, primarily attributable to state net operating loss carryovers. The Company believes it is more likely than not that reversals of existing temporary differences that will produce future taxable income and the results of future operations will generate sufficient taxable income to realize the deferred tax assets, net of valuation allowances, related to loss carryovers.

Uncertain Tax Positions. The accounting guidance for uncertainty in income taxes prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The guidance requires the Company to recognize in the consolidated financial statements the benefit of a tax position only if the impact is more likely than not of being sustained on audit based on the technical merits of the position. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (*in millions*):

	2019	2018
Balance at January 1,	$ 2.2	$ —
Additions for tax positions of prior years	—	2.2
Balance at December 31,	$ 2.2	$ 2.2

The unrecognized tax benefit would affect the effective income tax rate if recognized, and is reasonably possible to be resolved over the next twelve months as part of the Internal Revenue Service ("IRS") examination.

Interest and penalties related to uncertain tax positions are included in income before taxes on the consolidated statements of income. Accrued interest and penalties on unrecognized tax benefits and interest and penalty expense was immaterial to the consolidated financial statements for all periods presented.

Tax Contingencies. Tax returns filed in the U.S. for periods after 2015 and in Mexico for periods after 2012 remain open to examination by the taxing authorities. In 2018, the IRS initiated an examination of the 2016 U.S. federal tax return. During the first quarter of 2019, the Servicio de Administración Tributaria (the "SAT"), the Mexican equivalent of the IRS, initiated an audit of the KCSM 2013 and 2014 Mexico tax returns. The Company does not expect that these examinations will have a material impact on the consolidated financial statements. During the first quarter of 2017, the Company received audit assessments from the SAT for the KCSM 2009 and 2010 Mexico tax returns. In 2017, the Company commenced administrative actions with the SAT. During the first quarter of 2018, the audit assessments were nullified by the SAT. In the third quarter of 2018, the SAT issued new assessments and the Company filed administrative appeals with the SAT. The Company believes that it has strong legal arguments in its favor and it is more likely than not that it will prevail in any challenge of the assessments.

The Company litigated a Value Added Tax ("VAT") audit assessment from the SAT for KCSM for the year ended December 31, 2005. In November 2016, KCSM was notified of a resolution by the Mexican tax court annulling this assessment. The SAT appealed this resolution to the Mexican circuit court. In September 2017, KCSM was notified of a resolution by the circuit court which ordered the tax court to consider an argument made by KCSM in the original tax court proceeding that was not addressed in the tax court's November 2016 resolution. In October 2017, the tax court ruled that the arguments made by KCSM asserting that the SAT unduly extended the audit process were not valid, and also annulled the assessment consistent with the tax court's earlier November 2016 ruling. In December 2017, KCSM and the SAT filed an appeal with the Federal Courts of Appeals. KCSM's appeal was intended to preclude the SAT from issuing a new assessment. In November 2018, the Appeals Court issued a ruling denying the SAT appeal and permanently annulled the VAT assessment. The SAT is unable to appeal the decision. The Appeals Court also denied KCSM's appeal. In February 2019, the SAT issued a new assessment that conflicted with the tax court's guidelines. As such, in March 2019, KCSM filed a complaint with the tax court to require the SAT to follow the guidelines issued by the tax court that would result in no tax being assessed. In April 2019, the Company filed a nullification lawsuit with the tax court. In June 2019, the tax court ruled in favor of KCSM's legal complaint, and declared the new 2005 VAT assessment null and void. In August 2019, the SAT informed KCSM that it would not issue a new assessment.

KCSM has not historically assessed VAT on international import transportation services provided to its customers based on a written ruling that KCSM obtained from the SAT in 2008 stating that such services were not subject to VAT (the "2008 Ruling"). Notwithstanding the 2008 Ruling, in December 2013, the SAT unofficially informed KCSM of an intended implementation of new criteria effective as of January 1, 2014, pursuant to which VAT would be assessed on all international import transportation services on the portion of the services provided within Mexico. Additionally, in November 2013, the SAT filed an action to nullify the 2008 Ruling, potentially exposing the application of the new criteria to open tax years. In February 2014, KCSM filed an action opposing the SAT's nullification action. In December 2016, KCSM was notified of a resolution issued by the Mexican tax court confirming the 2008 Ruling. The SAT appealed this resolution. In October 2017, the circuit court resolved to not render a decision on the case but rather to send the SAT's appeal to the Supreme Court. In February 2018, the Supreme Court decided not to hear the case and remanded the SAT's appeal back to the circuit court for a decision. In July 2018, the circuit court ordered the tax court to consider certain arguments made by the SAT in the original court proceeding that were not addressed in the tax court's December 2016 resolution. In October 2018, the tax court issued a decision confirming the 2008 Ruling. The SAT has appealed this decision. The Company believes it is more likely than not that it will continue to prevail in this matter. Further, as of the date of this filing, the SAT has not implemented any new criteria regarding the assessment of VAT on international import transportation services. The Company believes it is probable that any unexpected nullification of the 2008 Ruling and the implementation of any new VAT criteria would be applied on a prospective basis, in which case, due to the pass-through nature of VAT, KCSM would begin to assess its customers for VAT on international import transportation services, resulting in no material impact to the Company's consolidated financial statements.

Fuel purchases in Mexico are subject to an excise tax that is included in the price of fuel. Through April 29, 2019, the Company was eligible for an IEPS credit for the excise tax included in the price of fuel that is purchased and consumed in locomotives and certain work equipment in Mexico. On April 29, 2019, the SAT published the 2019 Resolution, which eliminated locomotives as a type of equipment eligible for the IEPS credit beginning April 30, 2019. The Company believes the 2019 Resolution does not affect locomotives as equipment eligible for the IEPS credit generated from January 1, 2019 through April 29, 2019 and the Company should prevail in any challenge to this portion of the IEPS credit. KCSM filed a legal challenge to the 2019 Resolution based on various arguments, including, the SAT's lack of authority to change the treatment of

locomotives as equipment not eligible for IEPS credit adopted by the Mexico congress, and the discriminatory application against the rail industry. In December 2019, the Mexican court ruled in favor of the SAT. The Company does not plan on filing an appeal.

Note 16. Stockholders' Equity

Information regarding the Company's capital stock at December 31 follows:

	Shares Authorized		Shares Issued	
	2019	2018	2019	2018
$25 par, 4% noncumulative, preferred stock	840,000	840,000	649,736	649,736
$1 par, preferred stock	2,000,000	2,000,000	—	—
$.01 par, common stock	400,000,000	400,000,000	123,352,185	123,352,185

Shares outstanding at December 31:

	2019	2018
$25 par, 4% noncumulative, preferred stock	222,625	228,395
$.01 par, common stock	96,115,669	100,896,678

Share Repurchases. In November 2019, the Company announced a new common share repurchase program authorizing the Company to purchase up to $2.0 billion of its outstanding shares of common stock through December 31, 2022 (the "2019 Program"). Share repurchases may be made in the open market, through privately negotiated transactions, or through ASR transactions. The 2019 Program replaced KCS's $800.0 million common share repurchase program announced on August 15, 2017 (the "2017 Program"), and eliminated the $59.3 million of remaining authorization under the 2017 program.

Under an ASR agreement, the Company pays a specified amount to a financial institution and receives an initial delivery of shares. The final number and total cost of shares repurchased is then based on the volume-weighted average price of the Company's common stock during the term of the agreements. The transactions are accounted for as equity transactions with any excess of repurchase price over par value allocated between additional paid-in capital and retained earnings. At the time the shares are received, there is an immediate reduction in the weighted-average number of shares outstanding for purposes of the basic and diluted earnings per share computation.

During the fourth quarter of 2019, the Company paid $550.0 million under two ASR agreements and received an aggregate initial delivery of shares, which represents approximately 85% of the total shares to be received under the agreements. The final number and total cost of shares repurchased is then based on the volume-weighted-average price of the Company's common stock during the term of the agreements, which are expected to be settled when final shares are delivered. The terms of the ASR agreements, structured as outlined above, were as follows:

Third Party Institution	Agreement Date	Total Amount of Agreement *(in millions)*	Initial Shares Delivered	Fair Market Value of Initial Shares *(in millions)*	Weighted-Average Price Per Share
ASR Agreement #1	November 2019	$ 275.0	1,511,380	$ 233.75	$ 154.66
ASR Agreement #2	November 2019	275.0	1,511,380	233.75	$ 154.66
Total		$ 550.0	3,022,760	$ 467.5	$ 154.66

As of December 31, 2019, the remaining $82.5 million was recognized as a forward contract indexed to the Company's own common stock and included in capital surplus within additional paid-in capital in the accompanying consolidated balance sheets.

The Company's 2019 repurchases of common stock totaled 2,053,770 shares of common stock for $242.4 million under the 2017 Program, and 3,022,760 shares of common stock for $467.5 million under the 2019 Program (which consisted of initial delivery of shares under the ASR agreements.)

During 2019, the Company repurchased 5,770 shares of its $25 par preferred stock for $0.1 million at an average price of $26.39 per share.

Treasury Stock. Shares of common stock in treasury and related activity follow:

	2019	2018	2017
Balance at beginning of year	22,455,507	20,315,380	16,745,566
Shares repurchased	5,076,530	2,272,213	3,759,678
Shares issued to fund stock option exercises	(109,560)	(24,024)	(9,110)
Employee stock purchase plan shares issued	(72,707)	(62,866)	(76,401)
Nonvested shares issued	(124,031)	(51,191)	(124,519)
Nonvested shares forfeited	10,777	5,995	20,166
Balance at end of year	27,236,516	22,455,507	20,315,380

Cash Dividends on Common Stock. The following table presents the amount of cash dividends declared per common share by the Company's Board of Directors:

	2019	2018	2017
Cash dividends declared per common share	$ 1.48	$ 1.44	$ 1.38

Note 17. Share-Based Compensation

On May 4, 2017, the Company' stockholders approved the Kansas City Southern 2017 Equity Incentive Plan (the "2017 Plan"). Upon approval, the Company ceased issuing awards under the Kansas City Southern 2008 Stock Option and Performance Award Plan (the "2008 Plan"). The Board of Directors and its Compensation and Organization Committee had previously adopted the 2017 Plan, subject to stockholder approval, on January 26, 2017, and February 17, 2017, respectively. The 2017 Plan provides for the granting of up to 3,750,000 shares of the Company's common stock to eligible persons as defined in the 2017 Plan. Outstanding equity awards granted under the 2008 Plan and the 2017 Plan (the "Plans") are to be governed by the terms and conditions of each individual plan and the related award agreements.

Stock Options. The exercise price for options granted under the Plans equals the closing market price of the Company's stock on the date of grant. Options generally have a 3-year vesting period and are exercisable over the 10-year contractual term, except that options outstanding become immediately exercisable upon certain defined circumstances constituting a change in control of the Company. The grant date fair value is recorded to expense on a straight-line basis over the vesting period.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. The weighted-average assumptions used were as follows:

	2019	2018	2017
Expected dividend yield	1.33%	1.36%	1.52%
Expected volatility	26.38%	27.09%	30.74%
Risk-free interest rate	2.64%	2.80%	2.20%
Expected term *(years)*	5.7	6.0	6.0
Weighted-average grant date fair value of stock options granted	$ 27.70	$ 28.52	$ 24.49

The expected dividend yield is calculated as the ratio of dividends paid per share of common stock to the stock price on the date of grant. The expected volatility is based on the historical volatility of the Company's stock price over a term equal to the estimated life of the options. The risk-free interest rate is determined based on U.S. Treasury rates for instruments with terms approximating the expected term of the options granted, which represents the period of time the awards are expected to be outstanding and is based on the historical experience of similar awards.

A summary of stock option activity is as follows:

	Number of Shares	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value
			In years	In millions
Options outstanding at December 31, 2018	564,515	$ 83.24		
Granted	142,348	108.00		
Exercised	(109,560)	63.57		
Forfeited or expired	(789)	104.48		
Options outstanding at December 31, 2019	596,514	$ 92.73	6.2	$ 36.0
Exercisable at December 31, 2019	391,685	$ 86.42	4.9	$ 26.1

The aggregate intrinsic value in the table above, which is the amount by which the market value of the underlying stock exceeded the exercise price of outstanding options, represents the amount optionees would have realized if all in-the-money options had been exercised on the last business day of the period indicated.

Compensation cost of $2.6 million, $2.5 million, and $2.3 million was recognized for stock option awards for the years ended December 31, 2019, 2018, and 2017, respectively. The total income tax benefit recognized in the consolidated statements of income was $0.6 million, $0.6 million, and $0.8 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Additional information regarding stock option exercises appears in the table below *(in millions)*:

	2019	2018	2017
Aggregate grant-date fair value of stock options vested	$ 3.0	$ 1.9	$ 2.8
Intrinsic value of stock options exercised	7.2	1.0	0.2
Cash received from option exercises	7.0	1.8	0.7
Tax benefit from options exercised during the annual period	1.8	0.2	0.1

As of December 31, 2019, $1.4 million of unrecognized compensation cost relating to nonvested stock options is expected to be recognized over a weighted-average period of one year. At December 31, 2019, there were 3,179,090 shares available for future grants under the 2017 Plan.

Nonvested Stock. The Plans provide for the granting of nonvested stock awards to officers and other designated employees. The grant date fair value is based on the closing market price on the date of the grant. These awards are subject to forfeiture if employment terminates during the vesting period, which is generally 3 years or 5 years of vesting for employees. Awards granted to the Company's directors vest immediately on date of grant. The grant date fair value of nonvested shares is recorded to compensation expense on a straight-line basis over the vesting period.

A summary of nonvested stock activity is as follows:

	Number of Shares	Weighted-Average Grant Date Fair Value	Aggregate Intrinsic Value
			In millions
Nonvested stock at December 31, 2018	257,621	$ 96.61	
Granted	96,163	114.69	
Vested	(122,812)	101.67	
Forfeited	(10,777)	102.44	
Nonvested stock at December 31, 2019	220,195	$ 101.40	$ 33.7

The fair value (at vest date) of shares vested during the years ended December 31, 2019, 2018, and 2017 was $15.2 million, $10.4 million, and $5.9 million, respectively.

The weighted-average grant date fair value of nonvested stock granted during 2019, 2018, and 2017 was $114.69, $106.52 and $93.29, respectively. Compensation cost for nonvested stock was $10.1 million, $10.8 million, and $9.3 million for the years ended December 31, 2019, 2018, and 2017, respectively. The total income tax benefit recognized in the consolidated statements of income was $2.5 million, $2.6 million, and $3.5 million for the years ended December 31, 2019, 2018, and 2017, respectively.

As of December 31, 2019, $10.9 million of unrecognized compensation costs related to nonvested stock is expected to be recognized over a weighted-average period of 1.2 years.

Performance Based Awards. The Company granted performance based nonvested stock awards during 2019 (the "2019 Awards"), 2018 (the "2018 Awards") and 2017 (the "2017 Awards"). The awards granted provide a target number of shares that generally vest at the end of a 3-year requisite service period following the grant date. In addition to the service condition, the number of nonvested shares to be received depends on the attainment of defined Company-wide performance goals based on operating ratio ("OR") and return on invested capital ("ROIC") over a 3-year performance period. The awards are also subject to a revenue growth multiplier based on a 3-year performance period calculated as defined in the related award agreement that can range from 80% to 140% of the award earned based on the OR and ROIC achieved. The number of nonvested shares ultimately earned will range between zero to 200% of the target award.

A summary of performance based nonvested stock activity at target is as follows:

	Target Number of Shares *	Weighted-Average Grant Date Fair Value
Nonvested stock, at December 31, 2018	152,979	$ 91.74
Granted	50,681	110.13
Vested	(51,072)	82.71
Forfeited	(4,403)	104.47
Nonvested stock, at December 31, 2019	148,185	$ 100.76

* For the 2019 Awards and the 2018 Awards, participants in the aggregate can earn up to a maximum of 96,998 and 96,774 shares, respectively. For the 2017 Awards, the performance shares earned were 87,092.

The weighted-average grant date fair value of performance based nonvested stock granted during 2019, 2018 and 2017 was $110.13, $105.83 and $87.09, respectively. The Company expenses the grant date fair value of the awards which are probable of being earned over the performance periods. Compensation cost on performance based awards was $7.8 million, $5.8 million and $6.0 million for the years ended December 31, 2019, 2018 and 2017, respectively. Total income tax benefit recognized in the consolidated statements of income for performance based awards was $1.9 million, $1.5 million and $2.2 million for the years ended December 31, 2019, 2018 and 2017, respectively.

As of December 31, 2019, $5.3 million of unrecognized compensation cost related to performance based awards is expected to be recognized over a weighted-average period of eleven months. The fair value (at vest date) of shares vested for the year ended December 31, 2019 was $5.7 million.

Employee Stock Purchase Plan. The employee stock purchase plan (“ESPP”) provides substantially all U.S. full-time employees of the Company, certain subsidiaries and certain other affiliated entities, with the right to subscribe to an aggregate of 4.0 million shares of common stock of the Company. Under the ESPP, eligible employees may contribute, through payroll deductions, up to 10% of their regular base compensation during six-month purchase periods at a purchase price equal to 85% of the closing market price on either the exercise date or the offering date, whichever is lower.

At the end of each purchase period, the accumulated deductions are applied toward the purchase of the Company’s common stock. Both the discount in grant price and the share option purchase price are valued to derive the award’s fair value. The awards vest and the expense is recognized ratably over the offering period.

The following table summarizes activity related to the various ESPP offerings:

	Exercise Date			
	Date Issued	Purchase Price	Shares Issued	Received from Employees(i) In millions
July 2019 offering	January 3, 2020	$ 104.83	27,949	$ 2.9
January 2019 offering	July 2, 2019	81.83	36,735	3.0
July 2018 offering	January 3, 2019	81.13	35,972	2.9
January 2018 offering	July 2, 2018	90.07	32,271	2.9
July 2017 offering	January 4, 2018	89.18	30,595	2.7
January 2017 offering	July 5, 2017	68.70	40,293	2.8

(i) Represents amounts received from employees through payroll deductions for share purchases under applicable offering.

The fair value of the ESPP stock purchase rights is estimated on the date of grant using the Black-Scholes option pricing model. The weighted-average assumptions used for each of the respective periods were as follows:

	Year Ended December 31,		
	2019	2018	2017
Expected dividend yield	1.36%	1.22%	1.47%
Expected volatility	17.43%	13.29%	17.09%
Risk-free interest rate	2.31%	1.73%	0.89%
Expected term *(years)*	0.5	0.5	0.5
Weighted-average grant date fair value	$ 21.56	$ 18.66	$ 17.90

Compensation expense of $1.4 million, $1.3 million, and $1.3 million was recognized for ESPP option awards for the years ended December 31, 2019, 2018, and 2017, respectively. At December 31, 2019, there were 3.4 million remaining shares available for future ESPP offerings under the plan.

Note 18. Commitments and Contingencies

Concession Duty. Under KCSM's 50-year Concession, which could expire in 2047 unless extended, KCSM pays annual concession duty expense of 1.25% of gross revenues. For the year ended December 31, 2019, the concession duty expense, which is recorded within materials and other in operating expenses, was $18.9 million, compared to $17.8 million and $17.0 million for the same periods in 2018 and 2017, respectively.

Litigation. Occasionally, the Company is a party to various legal proceedings, regulatory examinations, investigations, administrative actions, and other legal matters, arising for the most part in the ordinary course of business, incidental to its operations. Included in these proceedings are various tort claims brought by current and former employees for job-related injuries and by third parties for injuries related to railroad operations. KCS aggressively defends these matters and has established liability provisions that management believes are adequate to cover expected costs. The outcome of litigation and other legal matters is always uncertain. KCS believes it has valid defenses to the legal matters currently pending against it, is defending itself vigorously, and has recorded accruals determined in accordance with U.S. GAAP, where appropriate. In making a determination regarding accruals, using available information, KCS evaluates the likelihood of an unfavorable outcome in legal or regulatory proceedings to which it is a party to and records a loss contingency when it is probable a liability has been

incurred and the amount of the loss can be reasonably estimated. These subjective determinations are based on the status of such legal or regulatory proceedings, the merits of KCS's defenses and consultation with legal counsel. Actual outcomes of these legal and regulatory proceedings may materially differ from the current estimates. It is possible that resolution of one or more of the legal matters currently pending or threatened could result in losses material to KCS's consolidated results of operations, liquidity or financial condition.

Environmental Liabilities. The Company's U.S. operations are subject to extensive federal, state and local environmental laws and regulations. The major U.S. environmental laws to which the Company is subject include, among others, the federal Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA," also known as the Superfund law), the Toxic Substances Control Act, the Clean Water Act, and the Hazardous Materials Transportation Act. CERCLA can impose joint and several liabilities for cleanup and investigation costs, without regard to fault or legality of the original conduct, on current and predecessor owners and operators of a site, as well as those who generate, or arrange for the disposal of, hazardous substances. The Company does not believe that compliance with the requirements imposed by the environmental legislation will impair its competitive capability or result in any material additional capital expenditures, operating or maintenance costs. The Company is, however, subject to environmental remediation costs as described in the following paragraphs.

The Company's Mexico operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment through the establishment of standards for water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. The Mexican government may bring administrative and criminal proceedings, impose economic sanctions against companies that violate environmental laws, and temporarily or even permanently close non-complying facilities.

The risk of incurring environmental liability is inherent in the railroad industry. As part of serving the petroleum and chemicals industry, the Company transports hazardous materials and has a professional team available to respond to and handle environmental issues that might occur in the transport of such materials.

The Company performs ongoing reviews and evaluations of the various environmental programs and issues within the Company's operations, and, as necessary, takes actions intended to limit the Company's exposure to potential liability. Although these costs cannot be predicted with certainty, management believes that the ultimate outcome of identified matters will not have a material adverse effect on the Company's consolidated financial statements.

Personal Injury. The Company's personal injury liability is based on semi-annual actuarial studies performed on an undiscounted basis by an independent third party actuarial firm and reviewed by management. This liability is based on personal injury claims filed and an estimate of claims incurred but not yet reported. Actual results may vary from estimates due to the number, type and severity of the injury, costs of medical treatments and uncertainties in litigation. Adjustments to the liability are reflected within operating expenses in the period in which changes to estimates are known. Personal injury claims in excess of self-insurance levels are insured up to certain coverage amounts, depending on the type of claim and year of occurrence. The personal injury liability as of December 31, 2019, is based on an updated actuarial study of personal injury claims through November 30, 2019, and review of December 2019 experience. For the years ended December 31, 2019 and 2018, the Company recognized increases of $0.2 million and $2.4 million, respectively, in personal injury liability, due to changes in estimates as a result of the Company's claims development and settlement experience.

The personal injury liability activity was as follows *(in millions):*

	2019	2018
Balance at beginning of year	$ 19.6	$ 19.3
Accruals	6.3	5.3
Changes in estimate	0.2	2.4
Payments	(5.2)	(7.4)
Balance at end of year	$ 20.9	$ 19.6

Tax Contingencies. Information regarding tax contingencies is included in Note 15, Income Taxes — Tax Contingencies.

Contractual Agreements. In the normal course of business, the Company enters into various contractual agreements related to commercial arrangements and the use of other railroads' or governmental entities' infrastructure needed for the operations of the business. The Company is involved or may become involved in certain disputes involving transportation rates, product loss or damage, charges, and interpretations related to these agreements. While the outcome of these matters cannot be predicted with certainty, the Company believes that, when resolved, these disputes will not have a material effect on its consolidated financial statements.

Credit Risk. The Company continually monitors risks related to economic changes and certain customer receivables concentrations. Significant changes in customer concentration or payment terms, deterioration of customer creditworthiness, bankruptcy, insolvency or liquidation of a customer, or weakening in economic trends could have a significant impact on the collectability of the Company's receivables and its operating results. If the financial condition of the Company's customers were to deteriorate and result in an impairment of their ability to make payments, additional allowances may be required. The Company has recorded provisions for uncollectability based on its best estimate as of December 31, 2019.

Panama Canal Railway Company ("PCRC") Guarantees and Indemnities. At December 31, 2019, the Company had issued and outstanding $5.6 million under a standby letter of credit to fulfill its obligation to fund fifty percent of the debt service reserve and liquidity reserve established by PCRC in connection with the issuance of the 7.0% Senior Secured Notes due November 1, 2026 (the "PCRC Notes"). Additionally, KCS has pledged its shares of PCRC as security for the PCRC Notes.

Note 19. Quarterly Financial Data (Unaudited)

	Fourth	Third	Second	First
	(In millions, except per share amounts)			
2019				
Revenues	$ 729.5	$ 747.7	$ 714.0	$ 674.8
Operating income (i)	236.0	282.0	208.0	160.3
Net income (iii)	127.9	180.6	129.1	103.2
Net income attributable to Kansas City Southern and subsidiaries	127.2	180.2	128.7	102.8
Per share data:				
Basic earnings per common share	$ 1.31	$ 1.81	$ 1.29	$ 1.02
Diluted earnings per common share	1.30	1.81	1.28	1.02
2018				
Revenues	$ 694.0	$ 699.0	$ 682.4	$ 638.6
Operating income (ii)(iv)	256.4	265.4	245.8	218.7
Net income (v)	161.8	174.0	148.7	144.9
Net income attributable to Kansas City Southern and subsidiaries	161.1	173.6	148.2	144.5
Per share data:				
Basic earnings per common share	$ 1.59	$ 1.71	$ 1.45	$ 1.41
Diluted earnings per common share	1.59	1.70	1.45	1.40

(i) During the first, second, third and fourth quarters of 2019, the Company recognized pre-tax restructuring charges of $67.5 million, $51.0 million, $12.0 million and $38.3 million, respectively, within operating expenses related to the implementation of PSR initiatives.

(ii) During the first, second, third, and fourth quarters of 2018, the Company recognized a pre-tax benefit of $9.2 million, $8.0 million, $9.4 million, and $11.1 million, respectively, within operating expenses related to a credit that was available for the excise tax included in the price of fuel that was purchased and consumed in locomotives and certain work equipment in Mexico. Effective January 1, 2019, the Company began recognizing the benefit as a reduction of income tax expense due to changes in Mexican tax law; and beginning April 30, 2019, railroads in Mexico are no longer eligible for the tax credit due to changes in Mexican tax regulations.

(iii) During the first, second, third, and fourth quarters of 2019, the Company recognized, net, a tax benefit of $6.8 million, expense of $1.9 million, and benefits of $3.7 million, and $4.2 million, respectively, related to the Mexican fuel excise tax credit generated through April 29, 2019, noted in (ii) above.

(iv) During the third and fourth quarters of 2018, the Company recognized a pre-tax gain of $9.4 million and $8.5 million, respectively, within operating expense for insurance recoveries related to damage from Hurricane Harvey in 2017.

(v) During the second and third quarters of 2018, the Company recognized discrete tax benefits of $4.3 million and $16.6 million, respectively, for adjustments to the provisional tax impacts of the Tax Reform Act.

Note 20. Geographic Information

The Company strategically manages its rail operations as one reportable business segment over a single coordinated rail network that extends from the midwest and southeast portions of the United States south into Mexico and connects with other Class I railroads. Financial information reported at this level, such as revenues, operating income and cash flows from operations, is used by corporate management, including the Company's chief operating decision-maker, in evaluating overall financial and operational performance, market strategies, as well as the decisions to allocate capital resources. The Company's chief operating decision-maker is the chief executive officer.

The following tables provide information by geographic area *(in millions)*:

	Years ended December 31,		
	2019	2018	2017
Revenues			
U.S.	$ 1,493.5	$ 1,424.8	$ 1,359.5
Mexico	1,372.5	1,289.2	1,223.4
Total revenues	$ 2,866.0	$ 2,714.0	$ 2,582.9

	December 31,	
	2019	2018
Property and equipment (including Concession assets), net		
U.S.	$ 5,435.9	$ 5,401.3
Mexico	3,370.4	3,289.8
Total property and equipment (including Concession assets), net	$ 8,806.3	$ 8,691.1

Note 21. Subsequent Events

Lease Termination

On January 10, 2020, the Company executed agreements that resulted in the termination of two existing leases covering 91 locomotives and the purchase of the underlying assets for a total cash purchase price of $78.0 million. This lease termination and purchase resulted in a decrease of the operating lease right-of-use asset and operating lease liability and 78 of the locomotives were subsequently recorded within property and equipment. The remaining 13 locomotives were impaired during the fourth quarter of 2019. The purchase of the impaired leased locomotives resulted in $6.0 million of make-whole payments recorded as incremental restructuring charges in the first quarter of 2020.

Foreign Currency Hedging

As of December 31, 2019, the Company had outstanding foreign currency forward contracts with an aggregate notional amount of $105.0 million, which matured during January 2020 and obligated the Company to purchase a total of Ps.2,041.2 million at a weighted-average exchange rate of Ps.19.4 to each U.S. dollar. During January 2020, the Company entered into offsetting contracts with an aggregate notional amount of $108.6 million, which matured during January 2020 and obligated the Company to sell a total of Ps.2,041.2 million at a weighted-average exchange rate of Ps.18.8 to each U.S. dollar.

During January 2020, the Company entered into several foreign currency forward contracts with an aggregate notional amount of $250.0 million and maturity dates in February 2020. These contracts obligate the Company to purchase a total of Ps.4,751.5 million at a weighted-average exchange rate of Ps.19.0 to each U.S. dollar.

The Company has not designated these foreign currency derivative instruments as hedging instruments for accounting purposes. The Company will measure the foreign currency derivative instruments at fair value each period and will recognize any change in fair value in foreign exchange gain (loss) within the consolidated statements of income.

Note 22. Condensed Consolidating Financial Information

Pursuant to Securities and Exchange Commission ("SEC") Regulation S-X Rule 3-10 "Financial statements of guarantors and issuers of guaranteed securities registered or being registered", the Company is required to provide condensed consolidating financial information for issuers of certain of its senior notes that are guaranteed.

As of December 31, 2019, KCS, the parent, had outstanding $3,186.2 million senior notes due through 2069. The senior notes are unsecured obligations of KCS, and are also jointly and severally and fully and unconditionally guaranteed on an unsecured senior basis by KCSR and certain 100% owned domestic subsidiaries of KCS (the "Guarantor Subsidiaries").

As of December 31, 2019, KCSR had outstanding $2.7 million principal amount of senior notes due through 2045. The senior notes are unsecured obligations of KCSR, and are also jointly and severally and fully and unconditionally guaranteed on an unsecured senior basis by KCS and the Guarantor Subsidiaries.

The following condensed and consolidating financial information (*in millions*) of KCS, KCSR, the Guarantor Subsidiaries and the other KCS subsidiaries that are not guarantors (the "Non-Guarantor Subsidiaries") are being presented in order to meet the reporting requirements under Rule 3-10 of Regulation S-X. Pursuant to Rule 3-10(d) and (f) of Regulation S-X, separate financial statements for the Issuer, the Parent and the Guarantor Subsidiaries are not required to be filed with the SEC as the subsidiary debt issuer and the guarantors are directly or indirectly 100% owned by the Parent and the guarantees are full and unconditional and joint and several.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

Not Applicable.

Item 9A. ***Controls and Procedures***

(a) Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2019. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2019, the design and operation of the Company's disclosure controls and procedures were effective to accomplish their objectives at a reasonable assurance level.

(b) Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as that term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter ended December 31, 2019 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Internal Control over Financial Reporting

The report of management on the Company's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) is included as "Management's Report on Internal Control over Financial Reporting" in Item 8, Financial Statements and Supplementary Data.

PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited the Company's financial statements contained herein, also audited the Company's internal control over financial reporting as of December 31, 2019. The audit report is included in Item 8, Financial Statements and Supplementary Data.

Item 9B. ***Other Information***

None.

Part III

The Company has incorporated by reference certain responses to the Items of this Part III pursuant to Rule 12b-23 under the Exchange Act and General Instruction G(3) to Form 10-K. The Company's definitive proxy statement for the 2019 annual meeting of stockholders ("Proxy Statement"), will be filed no later than 120 days after December 31, 2019.

Item 10. *Directors, Executive Officers and Corporate Governance*

(a) Directors of the Company

The sections of the Proxy Statement entitled "Proposal 1 — Election of Directors" and "The Board of Directors" are incorporated by reference herein.

(b) Executive Officers of the Company

See "Executive Officers of KCS and Subsidiaries" in Part I, Item 1 of this annual report incorporated by reference herein for information about the executive officers of the Company.

(c) Changes to Shareholder Nominating Procedures

None.

(d) Audit Committee and Audit Committee Financial Experts

The section of the Proxy Statement entitled "Board Committees — Audit Committee" is incorporated by reference herein.

(e) Compliance with Section 16(a) of the Exchange Act

The response to Item 405 of Regulation S-K under "Delinquent Section 16(a) Reports" in the Proxy Statement is incorporated by reference herein.

(f) Code of Ethics

The Company has adopted a Code of Business Conduct and Ethics ("Code of Ethics") that applies to directors, officers (including, among others, the principal executive officer, principal financial officer and principal accounting officer) and employees. The Company has posted its Code of Ethics on its website (www.kcsouthern.com) and will post on its website any amendments to, or waivers from, a provision of its Code of Ethics that apply to the Company's principal executive officer, principal financial officer or principal accounting officer as required by applicable SEC and NYSE rules and regulations.

Item 11. *Executive Compensation*

The sections of the Proxy Statement entitled "Compensation Discussion and Analysis", "Compensation Committee Report", "Executive Compensation", "Board Committees - Compensation Committee Interlocks and Insider Participation", and "Director Compensation" are incorporated by reference herein.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters***

The section of the Proxy Statement entitled "Beneficial Ownership" is incorporated by reference herein.

Equity Compensation Plan Information

The following table provides information as of December 31, 2019, about the common stock that may be issued upon the exercise of options, warrants and rights, as well as shares remaining available for future issuance under the Company's existing equity compensation plans.

Plan Category	Number of Securities to Be Issued upon Exercise of Outstanding Options, Warrants and Rights (i)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans-Excluding Securities Reflected in the First Column (ii)
Equity compensation plans:			
Approved by security holders	792,252	$ 94.98	6,593,887
Not approved by security holders	—	—	—
Total	792,252	$ 94.98	6,593,887

(i) Includes 606,514 outstanding options, 148,185 outstanding performance shares (at target), 9,604 outstanding deferred shares and dividend equivalents, and 27,949 ESPP shares purchased on December 31, 2019.

(ii) Includes 3,414,797 shares available for issuance under the 2009 Employee Stock Purchase Plan and 3,179,090 shares available for issuance under the 2017 Plan in the form of nonvested shares, bonus shares, performance units or performance shares or issued upon the exercise of options (including incentive stock options) or stock appreciation rights awarded under the 2017 Plan.

The Company has no knowledge of any arrangement the operation of which may at a subsequent date result in a change of control of the Company.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence***

The sections of the Proxy Statement entitled "Certain Transactions" and "Corporate Governance - Director Independence" are incorporated by reference herein.

Item 14. ***Principal Accountant Fees and Services***

The section of the Proxy Statement entitled "Independent Registered Public Accounting Firm" is incorporated by reference herein.

Part IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) List of Documents filed as part of this Report

(1) ***Financial Statements***

The consolidated financial statements and related notes, together with the reports of PricewaterhouseCoopers LLP, Independent Registered Public Accounting Firm and KPMG LLP, Independent Registered Public Accounting Firm, appear in Item 8, Financial Statements and Supplementary Data.

(2) ***Financial Statement Schedules***

None.

(3) ***List of Exhibits***

(a) Exhibits

The Company has attached or incorporated by reference herein certain exhibits as specified below pursuant to Rule 12b-32 under the Exchange Act.

Exhibit	Description
3.1	Amended and Restated Certificate of Incorporation of Kansas City Southern, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K, filed on May 7, 2012 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.1.
3.1.1	Amendments to the Kansas City Southern Amended and Restated Certificate of Incorporation, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K filed on May 5, 2014 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.1.1.
3.1.2	Amendment to the Kansas City Southern Amended and Restated Certificate of Incorporation, filed as Exhibit 3.1 to the Company's Current Report on Form 8-K filed on May 23, 2019 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.1.2.
3.2	Kansas City Southern Bylaws, amended and restated as of May 23, 2019, filed as Exhibit 3.2 to the Company's Current Report on Form 8-K filed on May 23, 2019 (File No. 1-4717), is incorporated herein by reference as Exhibit 3.2.
4.1	As permitted by Item 601(b)(4)(iii)(A) of Regulation S-K, the Company has not filed with this Annual Report on Form 10-K certain instruments defining the rights of holders of long-term debt of the Company and its subsidiaries because the total amount of securities authorized under any of such instruments does not exceed 10% of the total assets of the Company and its subsidiaries on a consolidated basis. The Company agrees to furnish a copy of any such agreements to the Securities and Exchange Commission upon request.
4.2	2043 Notes Indenture, dated April 29, 2013, among KCSR, the Guarantors and U.S. Bank National Association, as trustee and paying agent, filed as exhibit 4.1 to the Company's Current Report on Form 8-K filed on April 29, 2013 (File No. 1-4717), is incorporated herein by reference as Exhibit 4.2.
4.2.1	First Supplemental Indenture, dated November 23, 2015, among KCSR, the Guarantors and the U.S. Bank National Association, as trustee and paying agent, filed as exhibit 4.2 to the Company's Current Report on Form 8-K filed on November 24, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 4.2.1.
4.2.2	Form of Special Global Note representing KCSR's 4.30% Senior Notes due 2043, filed as Exhibit 4.2.4 to the Company's Registration Statement on Form S-4 filed on April 21, 2014 (File No. 333-195413), is incorporated herein by reference as Exhibit 4.2.2.
4.3	2023 KCSM Notes Indenture, dated May 3, 2013, filed as exhibit 4.2 to the Company's Current Report on Form 8-K filed on May 8, 2013 (File No. 1-4717), is incorporated herein by reference as Exhibit 4.3.
4.3.1	First Supplemental Indenture, dated November 23, 2015, filed as exhibit 4.6 to the Company's Current Report on Form 8-K filed on November 24, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 4.3.1.
4.3.2	Special Global Note representing the 3.0% Senior Notes due 2023, filed as Exhibit 4.5.3 to the Registration Statement on Form S-4 for KCSM, filed on August 26, 2013 (File No. 333-190820), is incorporated herein by reference as Exhibit 4.3.2.

Exhibit	Description
4.4	2023 Notes Indenture, dated October 29, 2013, among KCSR, the Guarantors and U.S. Bank National Association, as trustee and paying agent, filed as exhibit 4.1 to the Company's Current Report on Form 8-K filed on October 30, 2013 (File No. 1-4717), is incorporated herein by reference as Exhibit 4.4.
4.4.1	First Supplemental Indenture, dated November 23, 2015, among KCSR, the Guarantors and U.S. Bank National Association, as trustee and paying agent, filed as exhibit 4.1 to the Company's Current Report on Form 8-K filed on November 24, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 4.4.1.
4.4.2	Form of Special Global Note representing KCSR's 3.85% Senior Notes due 2023, filed as Exhibit 4.4.4 to the Company's Registration Statement on Form S-4 filed on April 21, 2014 (File No. 333-195413), is incorporated herein by reference as Exhibit 4.4.2.
4.5	2045 Notes Indenture, dated July 27, 2015, among KCSR, the Note Guarantors and U.S. Bank National Association, as trustee, filed as exhibit 4.1 to the Company's Current Report on Form 8-K filed on July 28, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 4.5.

Pursuant to the requirements of Section 13 or 15 (d) of the Securities Exchange Act of 1934, the Company has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Kansas City Southern

By: /S/ PATRICK J. OTTENSMEYER

Patrick J. Ottensmeyer
President, Chief Executive Officer and Director

January 24, 2020

POWER OF ATTORNEY

Know all people by these presents, that each person whose signature appears below constitutes and appoints Patrick J. Ottensmeyer and Michael W. Upchurch, and each of them, his or her true and lawful attorneys-in-fact and agents, with full power of substitution and resubstitution, for him or her and in his or her name, place and stead, in any and all capacities, to sign any amendments to this annual report on Form 10-K, and to file the same, with all exhibits thereto, with the Securities and Exchange Commission, granting unto said attorneys-in-fact and agents, and each of them, full power and authority to do and perform each and every act and thing requisite and necessary to be done in and about the premises, as fully and to all intents and purposes as he or she might or could do in person, hereby confirming all that said attorneys-in-fact and agents or either of them, or his or their substitute or substitutes, may lawfully do or cause to be done by virtue hereof.

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons on behalf of the Company and in the capacities indicated on January 24, 2020.

Signature	Title

($ in millions, except per share amounts)

Reconciliation of Diluted Earnings per Share to Adjusted Diluted Earnings per Share

	Year ended December 31, 2019
As reported	$ 5.40
Adjustments for:	
Restructuring charges	1.25
Debt retirement costs	0.01
Foreign exchange gain	(0.12)
Foreign exchange component of income taxes	0.36
Adjusted - see (a) below	$ 6.90

(a) The Company believes adjusted diluted earnings per share is meaningful as it allows investors to evaluate the Company's performance for different periods on a more comparable basis by adjusting for the impact of changes in foreign currency exchange rates, and items that are not directly related to the ongoing operations of the Company. The income tax expense impacts related to these adjustments are calculated at the applicable statutory tax rate.

Reconciliation of Operating Income to Adjusted Operating Income

	Year ended December 31, 2019
Operating income as reported	$ 886.3
Adjustment for restructuring charges	168.8
Adjusted operating income - see (b) below	$ 1,055.1

(b) The Company believes adjusted operating income is meaningful as it allows investors to evaluate the Company's performance for different periods on a more comparable basis by adjusting for items that are not directly related to the ongoing operations of the Company.

Free Cash Flow

	Year ended December 31, 2019
Net cash provided by operating activities	$ 1,103.5
Settlement of treasury lock agreements	25.8
Net cash used for investing activities	(676.3)
Free cash flow - see (c) below	453.0
Settlement of treasury lock agreements	(25.8)
Net cash used for financing activities	(378.9)
GAAP net increase in cash and cash equivalents	$ 48.3

(c) The Company believes free cash flow is a useful measure of liquidity as it demonstrates the Company's ability to generate cash for debt obligations, dividend payments, share repurchases, and other strategic opportunities. Free cash flow is defined as cash provided by operating activities, excluding the settlement on treasury lock agreements, less cash used in investing activities.

($ in millions)

Calculation of Adjusted Debt

	Year ended December 31, 2019
Long-term debt due within one year	$ 18.0
Long-term debt	3,228.0
Operating lease liabilities	131.1
Adjusted debt - see (d) below	$ 3,377.1

Calculation of Earnings Before Interest, Income Taxes, Depreciation and Amortization, Debt Retirement Costs, Equity in Net Earnings of Affiliates, Restructuring Charges, and Operating Lease Right-of-Use Assets Amortization

	Year ended December 31, 2019
Net income	$ 540.8
Interest expense	115.9
Income tax expense	247.6
Depreciation and amortization	350.7
EBITDA	$ 1,255.0
Adjustments:	
Equity in net earnings of affiliates	(1.0)
Debt retirement costs	1.1
Restructuring charges	168.8
Operating lease right-of-use assets amortization	53.7
Adjusted EBITDA - see (d) below	$ 1,477.6
Adjusted debt / Adjusted EBITDA - see (e) below	2.3

(d) Adjusted debt and EBITDA (earnings before interest, income taxes, depreciation and amortization, equity in net earnings of affiliates, debt retirement costs, restructuring charges, and operating lease right-of-use assets amortization) are considered non-GAAP financial measures under SEC Regulation G and Regulation S-K Item 10(e). As such, adjusted debt and EBITDA do not have any standardized meanings prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies.

(e) The Company believes adjusted debt to adjusted EBITDA ratio is a useful measure to management and investors as it demostrates the Company's ability to sustain given debt levels with the cash generated from operations.

Metric Definitions and Calculations

Gross velocity is the average train speed between origin and destination in miles per hour calculated as the sum of the miles traveled divided by the sum of total transit hours. Transit hours are measured as the difference between a train's origin departure and destination arrival date and times broken down by segment across the train route (includes all time spent including crew changes, terminal dwell, delays, and incidents).

Terminal dwell is the average amount of time in hours between car arrival to and departure from the yard (excludes cars that move through a terminal on a run-through train, stored, bad ordered, and maintenance-of-way cars). Calculated by dividing the total number of hours cars spent in terminals by the total count of car dwell events.

Train length is the average length of a train across its reporting stations, including the origin and intermediate stations. Length of a train is the sum of car and locomotive lengths measured in feet.

Car miles per day is the miles a car travels divided by total transit days. Transit days are measured from opening event to closing event (includes all time spent in terminals and on trains).

Fuel efficiency is calculated by taking locomotive fuel consumed in gallons divided by thousand gross ton miles ("GTM's") net of detours with no associated fuel gallons. GTM's are the movement of one ton of train weight over one mile calculated by multiplying total train weight by distance the train moved. GTM's exclude locomotive gross ton miles.
