Most sulphur is produced in Alberta as a by-product of processing sour natural gas, refining crude oil and upgrading bitumen produced in the Alberta oil sands. Sulphur is a raw material used primarily in the manufacturing of sulphuric acid, which is used most extensively in the production of phosphate fertilizers. Demand for elemental sulphur rises with demand for fertilizers. Sulphuric acid is also a key ingredient in industrial processes ranging from smelting and nickel leaching to paper production.

4.7.2 Merchandise

CP's merchandise business represented approximately 37% of total freight revenues in 2014.

Merchandise products move in trains of mixed freight and in a variety of car types. Service involves delivering products to many different customers and destinations. In addition to traditional rail service, CP moves merchandise traffic through a network of truck-rail transload facilities and provides logistics services.

4.7.2.1 Forest Products

The Company's forest products business represented approximately 3% of total freight revenues in 2014.

Forest products traffic includes wood pulp, paper, paperboard, newsprint, lumber, panel and oriented strand board shipped from key producing areas in B.C., northern Alberta, northern Saskatchewan, Ontario and Quebec to destinations throughout North America.

4.7.2.2 Chemicals and Plastics

The Company's chemicals and plastics business represented approximately 10% of total freight revenues in 2014.

Petroleum products represent the largest segment of this business, followed by chemicals and plastics, respectively.

Petroleum products consist of commodities such as liquid petroleum gas ("LPG"), gasoline, diesel, condensate, asphalt and lubricant oils. The majority of the Company's Western Canadian petroleum

products traffic originates in Saskatchewan and in the Alberta Industrial Heartland, Canada's largest hydrocarbon processing region. The Bakken formation region in Saskatchewan and North Dakota is another source of condensate, LPG and natural gas liquids. Connectivity to several rail interline partners gives the Company access to refineries and export facilities in the Pacific Northwest, Northeast U.S. and Gulf Coast, as well as the Texas and Louisiana petrochemical corridor and port connections.

The Company's chemical traffic includes products such as ethylene glycol, styrene, sulphuric acid, methanol, sodium chlorate, caustic soda and soda ash. These shipments originate from Eastern Canada, Alberta, the U.S. Midwest and the Gulf of Mexico and move to end markets in Canada, the U.S. and overseas.

The most commonly shipped plastics products are polyethylene and polypropylene. Almost half of the Company's plastics originate in central and northern Alberta and move to various North American destinations.

4.7.2.3 Crude

The Company's crude business represented approximately 7% of total freight revenues in 2014.

Crude moves from origin facilities throughout Alberta, Saskatchewan and North Dakota. CP connects at these origin facilities with direct production as well as pipeline access. Oil sands products originating in Northern Alberta are delivered by pipeline systems to hub terminals in Edmonton, Hardisty and the Alberta Industrial Heartland, where rail and pipeline are the options for further transport. CP connects to numerous Saskatchewan oil plays, including Shaunavon, Lloydminster, Kerrobert and the Bakken, and CP has numerous facilities in the North Dakota Bakken oil producing zone.

CP's main crude unloading destination terminal is located in Albany, New York. This terminal is a rail-to-vessel operation that can reach refineries along the Canadian and U.S. East Coast, and the U.S. Gulf Coast. CP also accesses other refineries and terminals on the U.S. East Coast, Gulf Coast and West Coast through established foreign line partnerships.

4.7.2.4 Metals, Minerals and Consumer Products

The Company's metals, minerals and consumer products business represented approximately 11% of total freight revenues in 2014.

Metals, minerals and consumer products traffic include a wide array of commodities grouped under aggregates, steel, consumer products and non-ferrous metals.

Frac sand and cement are the dominant aggregates. Frac sand originates at mines located along the Company's network in Wisconsin and moves to a diverse set of shale plays across North America. The majority of the Company's cement traffic is shipped directly from production facilities in Alberta, Iowa and Ontario to energy and construction projects in North Dakota, Alberta, Manitoba and the U.S. Midwest.

CP transports steel in various forms from mills in Ontario, Saskatchewan and Iowa to a variety of industrial users. The Company carries base metals such as copper, lead, zinc and aluminum. CP also moves ores from mines to smelters and refineries for processing, and the processed metal to automobile and consumer products manufacturers.

Consumer products traffic consists of a diverse mix of goods, including food products, building materials, packaging products and waste products.

4.7.2.5 Automotive

The Company's automotive business represented approximately 6% of total freight revenues in 2014.

CP's automotive portfolio consists of four finished vehicle traffic segments: import vehicles that move through Port Metro Vancouver to Eastern Canadian markets; Canadian-produced vehicles that ship to the U.S. from Ontario production facilities; U.S.-produced vehicles that ship within the U.S. as well as cross-border into Canadian markets; and, Mexican-produced vehicles that ship to the U.S. and Canada. In addition to finished vehicles, CP ships automotive parts, machinery and pre-owned vehicles. A comprehensive network of automotive compounds is utilized to facilitate final delivery of vehicles to dealers throughout Canada and in the U.S.

4.7.3 Intermodal

The Company's intermodal business accounted for approximately 21% of total freight revenues in 2014.

Domestic intermodal freight consists primarily of manufactured consumer products moving in fifty three foot containers within North America. International intermodal freight moves in marine containers to and from ports and North American inland markets.

4.7.3.1 Domestic Intermodal

The Company's domestic intermodal business represented approximately 12% of total freight revenues in 2014.

CP's domestic intermodal business covers a broad spectrum of industries including food, retail, less-than truckload shipping, trucking, forest products and various other consumer-related products. Key service factors in domestic intermodal include consistent on-time delivery, the ability to provide door-to-door service and the availability of value-added services. The majority of the Company's domestic intermodal business originates in Canada where CP markets its services directly to retailers, providing complete door-to-door service and maintaining direct relationships with its customers. In the U.S., the Company's service is delivered mainly through wholesalers.

4.7.3.2 International Intermodal

The Company's international intermodal business represented approximately 9% of total freight revenues in 2014.

CP's international intermodal business consists primarily of containerized traffic moving between the ports of Vancouver, Montreal and New York and inland points across Canada and the U.S.

CP is a major carrier of containers moving via the ports of Montreal and Vancouver. Import traffic from the Port Metro Vancouver is mainly long-haul business destined for eastern Canada and the U.S. Midwest and Northeast. The Company's trans-Pacific service offers the shortest route between the Port Metro Vancouver and Chicago. CP works closely with the Port of Montreal, a major year-round East Coast gateway to Europe, to serve markets primarily in Canada and the U.S. Midwest. The Company's U.S. Northeast service connects eastern Canada with the ports of New York, offering a competitive alternative to trucks.

4.7.4 Fuel Cost Recovery Program

The short-term volatility in fuel prices may adversely or positively impact expenses and revenues. CP employs a fuel cost recovery program designed to automatically respond to fluctuations in fuel prices and help reduce volatility to changing fuel prices. Fuel surcharge revenue is earned on individual shipments primarily based on On Highway Diesel ("OHD"); as such, fuel surcharge revenue is a function of freight volumes.

4.7.5 Other Revenue

Other revenue is generated from leasing certain assets, switching fees, other arrangements including logistical services and contracts with passenger service operators.

4.7.6 Significant Customers

For each of the twelve months ended December 31, 2014, 2013 and 2012, no customer comprised more than 10% of total revenues and accounts receivable.

4.8 Railway Performance

CP focuses on safety, train operation productivity, increasing network efficiency and improving asset utilization. The following table summarizes the effect of the Company's Operating Plan based on industry-recognized performance indicators. Detailed definitions of the performance indicators listed below are included in Section 26, Glossary of Terms of the 2014 MD&A which is incorporated by reference herein.

For the year ended December 31[1]	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Operations Performance					
Freight gross ton-miles ("GTMs") (millions)	273,276	267,629	254,354	2	5
Revenue ton-miles ("RTMs") (millions)	149,849	144,249	135,032	4	7
Train miles (thousands)	36,625	37,817	40,270	(3)	(6)
Average train weight - excluding local traffic (tons)	8,046	7,573	6,709	6	13
Average train length - excluding local traffic (feet)	6,683	6,530	5,981	2	9
Average terminal dwell (hours)	8.7	7.1	7.5	23	(5)
Average train speed (mph)[2][3]	18.1	18.4	N/A	(2)	N/A
Fuel efficiency (U.S. gallons of locomotive fuel consumed /1,000 GTMs)[4]	1.03	1.06	1.15	(3)	(8)
Total employees (average)[5][6]	14,575	15,011	16,999	(3)	(12)
Workforce (end of period)[7]	14,698	14,977	16,907	(2)	(11)
Safety indicators					
FRA personal injuries per 200,000 employee-hours	1.67	1.71	1.56	(2)	10
FRA train accidents per million train-miles	1.26	1.80	1.69	(30)	7

(1) Certain prior period figures have been revised to conform with current presentation or have been updated to reflect new information.
(2) Incorporates a new reporting definition where average train speed measures the line-haul movement from origin to destination including terminal dwell hours, and excluding foreign railroad and customer delays.
(3) 2012 Average train speed information is not available for new reporting definition.
(4) Includes gallons of fuel consumed from freight, yard and commuter service but excludes fuel used in capital projects and other non-freight activities.
(5) An employee is defined as an individual, including trainees, who has worked more than 40 hours in a standard biweekly pay period. This excludes part time employees, contractors, and consultants.
(6) 2012 average number of employees has been adjusted for a strike.
(7) Workforce is defined as total employees plus part time employees, contractors, and consultants.

GTMs for 2014 were 273,276 million, a 2% increase compared with 267,629 million in 2013. This improvement was primarily due to higher shipments in Canadian grain, Crude, Domestic intermodal, and Metals, minerals and consumer products.

RTMs for 2014 were 149,849 million, an increase of 4% compared with 144,249 million in 2013. RTMs are discussed further in Section 8, Lines of Business of the 2014 MD&A.

Train miles for 2014 decreased by 3% compared with 2013, reflecting improvements in operating efficiency from longer, heavier trains.

Average train weight increased in 2014 by 473 tons, or 6%, from 2013. Average train length increased in 2014 by 153 feet, or 2%, from 2013. Average train weight and length benefited significantly from improvements in operating plan efficiency and increased volumes of bulk traffic conveyed in longer, heavier trains. Both of these improvements leverage the siding extensions completed in 2013 and 2014.

Average terminal dwell, the average time a freight car resides in a terminal, increased by 23% in 2014 to 8.7 hours from 7.1 hours in 2013. The unfavourable increase was primarily due to operational challenges in the U.S. Midwest.

Average train speed was 18.1 miles per hour in 2014, a decrease of 2%, from 18.4 miles per hour in 2013. The unfavourable decrease was primarily due to operational challenges in the U.S. Midwest. This decrease was partially offset by speed improvements in the fourth quarter of 2014 through improved asset velocity, decreased terminal dwell, and successful execution of the Company's operating plan.

Fuel efficiency improved by 3% in 2014 compared to 2013. This improvement is primarily due to the continued execution of the Company's fuel

conservation strategy and increased locomotive productivity from higher average train weights.

The average number of total employees for 2014 decreased by 436, or 3%, compared with 2013. This improvement was primarily due to job reductions as a result of continuing strong operational performance and natural attrition, partially offset by additional information technology ("IT") employees as a part of the Company's insourcing strategy.

The workforce on December 31, 2014 decreased by 279, or 2%, compared with December 31, 2013. This improvement was primarily due to job reductions as a result of continuing strong operational performance, natural attrition and fewer contractors.

Safety is discussed in Section 4.14, Safety.

4.9 Franchise Investment

Franchise investment is an integral part of the Company's multi-year capital program and supports growth initiatives. The Company's annual capital program typically includes investments in track and facilities (including rail yards and intermodal terminals); locomotives; IT; and freight cars and other equipment. On an accrual basis, CP invested approximately $3.9 billion in core assets from 2012 to 2014, with annual capital spending over this period averaging approximately 21% of revenues. This included approximately $2.6 billion invested in track and roadway, $500 million in rolling stock, $300 million in IT and $500 million in buildings and other.

4.9.1 Locomotive Fleet

The Company's locomotive fleet is comprised largely of high-adhesion alternating current ("AC") locomotives, which are more fuel efficient and reliable and have superior hauling capacity compared with standard direct current ("DC") locomotives. The Company's locomotive fleet now includes 827 AC locomotives. While AC locomotives represent approximately 70% of the Company's road-freight locomotive fleet, they handle approximately 89% of the workload. The Company's investment in AC locomotives has helped to improve service reliability and generate cost savings in fuel, equipment rents and maintenance. There was a reduction of the Company's active locomotive fleet by 24 locomotives during 2014.

Following is a synopsis of the Company's owned and leased locomotive fleet:

Number of Locomotives (owned and long-term leased)	Road Freight		Road	Yard	
Age in Years	AC	DC	Switcher	Switcher	Total
0-5	91	20	125	–	236
6-10	319	–	–	–	319
11-15	234	–	–	–	234
16-20	183	–	–	–	183
Over 20	–	328	235	43	606
Total	827	348	360	43	1,578

4.9.2 Railcar Fleet

CP owns, leases or manages approximately 45,700 freight cars. Approximately 20,800 are owned by CP, approximately 6,600 are hopper cars owned by Canadian federal and provincial government agencies, approximately 8,700 are leased on a short-term basis, 5,100 are held under long-term leases, and 4,500 in a railcar pool allocation. Short-term leases on approximately 1,700 cars are scheduled to expire during 2015, and the leases on approximately 11,300 additional cars are scheduled to expire before the end of 2019.

The Company's covered hopper car fleet, used for transporting grain for export, consists of owned, leased and managed cars. A portion of the fleet used to transport export grain is leased from the Government of Canada, with whom CP completed an operating agreement in 2007.

4.10 Operating Plan ("OP")

The Company's OP is the foundation for its scheduled railway operations, through which CP strives to provide quality service for customers and improve asset utilization to achieve high levels of efficiency. The key principles upon which the

Company's OP is built include moving freight cars across the network with as few handlings as possible, creating balance in directional flow of trains in CP corridors by day of week, and minimizing the time that locomotives and freight cars are idle.

Under the Company's OP, trains are scheduled to run consistently at times agreed upon with customers. To accomplish this, CP establishes a plan for each rail car that covers its entire trip from point of origin to final destination. Cars with similar destinations are consolidated into blocks. This reduces delays at intermediate locations by simplifying processes for employees, eliminating the duplication of work and helping to ensure traffic moves fluidly through rail yards and terminals. These measures improve transit times for shipments throughout CP's network and increase car availability for customers. The Company's OP also increases efficiency by more effectively scheduling employee shifts, locomotive maintenance, track repair, track renewal and material supply.

CP has capitalized on the new capabilities of its network and upgraded locomotive fleet to safely operate longer and heavier trains. This has reduced associated expenses, simplified the departure of shipments from points of origin and provided lower-cost capacity for growth.

The Company is committed to continuously improve scheduled railway operations as a means to achieve additional efficiencies that will avoid significant capital expenditures to accommodate growth.

4.11 Information Technology

As a 24-hour-a-day, 7-day-a-week business, CP relies heavily on IT systems to schedule and manage planning and operational components safely and efficiently. IT applications map out complex interconnections of freight cars, locomotives, facilities, tracks and train crews to meet more than 10,000 individual customer service commitments every day. Across the network, CP's suite of operating systems manages the overall movement of customers' shipments and provides railway employees with reliable data on shipment performance, transit times, connections with other trains, train and yard capacities, and locomotive requirements. Within the yards, individual shipments are matched to freight car blocks, which in turn are matched to trains that are scheduled according to CP's operating plan. The Company's IT applications provide the information needed to ensure that shipments are handled according to commercial agreements while meeting all regulatory requirements to ensure the safe movement of freight throughout North America.

4.12 Business Risks and Enterprise Risk Management

In the normal course of operations, CP is exposed to various business risks and uncertainties that can have an effect on the Company's financial condition. CP's Enterprise Risk Management ("ERM") program targets strategic risk areas to determine additional prevention or mitigation plans that can be undertaken to either reduce risk or enable opportunities to be realized. The ERM process instils discipline in the approach to managing risk at CP and has been a contributing factor in providing focus on key areas. CP has managed to mitigate a number of strategic business risks using this focused approach.

The risks and enterprise risk management are discussed in more detail in Section 22, Business Risks of the Company's 2014 MD&A.

4.13 Indemnifications

Pursuant to a trust and custodial services agreement with the trustee of the Canadian Pacific Railway Company Pension Plan, CP has undertaken to indemnify and save harmless the trustee, to the extent not paid by the fund, from any and all taxes, claims, liabilities, damages, costs and expenses arising out of the performance of the trustee's obligations under the agreement, except as a result of misconduct by the trustee. The indemnity includes liabilities, costs or expenses relating to any legal reporting or notification obligations of the trustee with respect to the defined contribution option of the pension plans or otherwise with respect to the assets of the pension plans that are not part of the fund. The indemnity survives the termination or expiry of the agreement with respect to claims and liabilities arising prior to the termination or expiry. At December 31, 2014, CP had not recorded a liability associated with this indemnification, as the Company does not expect to make any payments pertaining to it.

Pursuant to the Company's by-laws, CP indemnifies all of its current and former directors and officers. In

addition to the indemnity provided by the by-laws, CP also indemnifies its directors and officers pursuant to indemnity agreements. CP carries a liability insurance policy for directors and officers, subject to a maximum coverage limit and certain deductibles in cases where a director or officer is reimbursed for any loss covered by the policy.

4.14 Safety

Safety is a key priority and core strategy for the Company's management and Board of Directors. The Company's two main safety indicators – personal injuries and train accidents – follow strict U.S. Federal Railroad Administration ("FRA") reporting guidelines. Detailed definition of the safety indicators discussed below is included in Section 26, Glossary of Terms in the 2014 MD&A.

The FRA personal injury rate per 200,000 employee-hours for CP was 1.67 in 2014, compared with 1.71 in 2013 and 1.56 in 2012. The FRA train accident rate for CP in 2014 was 1.26 accidents per million train-miles, compared with 1.80 in 2013 and 1.69 in 2012. CP strives to continually improve its safety performance through the Company's key strategies and activities such as training and technology.

The Company's senior leaders in operations provide ongoing focus, leadership, commitment and support for efforts to improve the safety of the Company's operations as well as the safety and health of CP employees. The leadership team includes all of the Company's most senior representatives in operations from senior officers to leaders of different operation departments and is a key component of safety governance at CP. The Company's Safety Framework governs the safety management process, which involves more than 1,000 employees in planning and implementing safety-related activities. This management process, combined with planning that encompasses all operational functions, ensures a continuous and consistent focus on safety.

4.15 Environmental Protection

CP has implemented a comprehensive Environmental Management System, which uses the five elements of the ISO 14001 standard – policy, planning, implementation and operation, checking and corrective action, and management review – as described below. Further details are discussed in Section 22, Business Risks of the 2014 MD&A.

4.15.1 Policy

CP has adopted an Environmental Protection Policy and continues to develop and implement policies and procedures to address specific environmental issues and reduce environmental risk. Each policy is implemented with training for employees and a clear identification of roles and responsibilities.

CP is a partner in Responsible Care©, an initiative of the Chemistry Industry Association of Canada and the American Chemistry Council ("ACC") in the U.S., an ethic for the safe and environmentally sound management of chemicals throughout their life cycle. Partnership in Responsible Care© involves a public commitment to continually improve the industry's environmental, health and safety performance. CP completed its first Responsible Care© external verification in June 2002 and was granted "Responsible Care© practice-in-place" status. CP was successfully re-verified in 2005, 2008 and again in October of 2012. The next re-verification is planned for 2015.

4.15.2 Planning

CP prepares an annual Operations Environmental Plan, which include details of the Company's environmental goals and targets as well as high-level strategies. These plans are used by various departments to integrate key corporate environmental strategies into their business plans.

The Company also conducts comprehensive Risk Assessments on proposed new operations on CP property that have inherent environmental risk. The Risk Assessments identify appropriate mitigations to minimize risk and support the planning process.

4.15.3 Implementation and Operation

CP has developed specific environmental programs to address areas such as air emissions, wastewater,

management of vegetation, chemicals and waste, storage tanks and fuelling facilities, and environmental impact assessment. The Company's environmental specialists and consultants lead these programs.

The Company's focus is on preventing spills and other incidents that have a negative impact on the environment. As a precaution, CP has established a Strategic Emergency Response Contractor network and located spill equipment kits across Canada and the U.S. to ensure a rapid and efficient response in the event of an environmental incident. In addition, CP regularly updates and test emergency preparedness and response plans.

4.15.4 Environmental Contamination

The Company continues to be responsible for remediation work on portions of a property in the State of Minnesota and continues to retain liability accruals for remaining future anticipated costs. The costs are expected to be incurred over a period of approximately 10 years. The state's voluntary investigation and remediation program will oversee the work to ensure it is completed in accordance with applicable standards. CP currently estimates the remaining liability associated with these areas to be U.S. $20 million.

4.15.5 Checking and Corrective Action

The Company's environmental audits comprehensively, systematically and regularly assess CP facilities for compliance with legal and regulatory requirements and conformance to the Company's policies, which are based on legal requirements and accepted industry standards. Audits are scheduled based on risk assessment for each facility and are led by third-party environmental audit specialists supported by the Company's environmental staff.

Audits are followed by a formal Corrective Action Planning process that ensures findings are addressed in a timely manner. Progress is monitored against completion targets and reported quarterly to senior management.

4.15.6 Management Review

The Environmental Accrual Lead Team, which includes members of the Company's senior officers and leaders of CP environmental teams, completes quarterly reviews of changes to and the progress of the Environmental Accrual program. Senior management leaders provide oversight of health, safety, security and environment issues on an ongoing basis throughout the year. The CP Board of Directors' Safety, Operations and Environment Committee meets five times per year and conducts a review of environmental issues.

4.15.7 Expenditures

The Company spent $34 million in 2014 for environmental management, including amounts spent on ongoing operations, fuel conservation, capital upgrades and remediation. The Company spent $36 million for environmental management in 2013.

4.16 Insurance

CP maintains insurance policies to protect the Company's assets and to protect against liabilities. The Company's insurance policies include, but are not limited to, liability insurance, director and officer liability insurance, automobile insurance and property insurance. The property insurance program includes business interruption coverage and contingent business interruption coverage, which would apply in the event of catastrophic damage to the Company's infrastructure and specified strategic assets in the transportation network. CP believes its insurance is adequate to protect it from known and unknown liabilities. However, in certain circumstances, certain losses may not be covered or completely covered by insurance and the Company may suffer losses, which could be material.

4.17 Competitive Conditions

For a discussion of CP's competitive conditions in which the Company operates, please refer to Section 22, Business Risks included in the Company's 2014 MD&A.

5. DIVIDENDS

5.1 Declared Dividends and Dividend Policy

Dividends

Dividends declared by the Board of Directors in the last three years are as follows:

Dividend amount	Record date	Payment date
$0.3500	March 27, 2015	April 27, 2015
$0.3500	December 31, 2014	January 26, 2015
$0.3500	September 26, 2014	October 27, 2014
$0.3500	June 27, 2014	July 28, 2014
$0.3500	March 28, 2014	April 28, 2014
$0.3500	December 27, 2013	January 27, 2014
$0.3500	September 27, 2013	October 28, 2013
$0.3500	June 28, 2013	July 29, 2013
$0.3500	March 28, 2013	April 29, 2013
$0.3500	December 28, 2012	January 28, 2013
$0.3500	September 28, 2012	October 29, 2012
$0.3500	June 22, 2012	July 30, 2012
$0.3000	March 30, 2012	April 30, 2012

The Company's Board of Directors is expected to give consideration on a quarterly basis to the payment of future dividends. The amount of any future quarterly dividends will be determined based on a number of factors that may include the results of operations, financial condition, cash requirements and future prospects of the Company. The Board of Directors is, however, under no obligation to declare dividends and the declaration of dividends is wholly within their discretion. Further, the Company's Board of Directors may cease declaring dividends or may declare dividends in amounts that are different from those previously declared. Restrictions in the credit or financing agreements entered into by the Company or the provisions of applicable law may preclude the payment of dividends in certain circumstances.

6. CAPITAL STRUCTURE

6.1 Description of Capital Structure

The Company is authorized to issue an unlimited number of Common Shares, an unlimited number of First Preferred Shares and an unlimited number of Second Preferred Shares. At December 31, 2014, no First or Second Preferred Shares had been issued.

1) The rights, privileges, restrictions and conditions attached to the Common Shares are as follows:

   a) Payment of Dividends: The holders of the Common Shares will be entitled to receive dividends if, as and when declared by CP's Board of Directors out of the assets of the Company properly applicable to the payment of dividends in such amounts and payable in such manner as the Board may from time to time determine. Subject to the rights of the holders of any other class of shares of the Company entitled to receive dividends in priority to or rateably with the holders of the Common Shares, the Board may in its sole discretion declare dividends on the Common Shares to the exclusion of any other class of shares of the Company.

   b) Participation upon Liquidation, Dissolution or Winding Up: In the event of the liquidation, dissolution or winding up of the Company or other distribution of assets of the Company among its shareholders for the purpose of winding up its affairs, the holders of the Common Shares will, subject to the rights of the holders of any other class of shares of the Company entitled to receive the assets of the Company upon such a distribution in priority to or rateably with the holders of the Common Shares, be entitled to participate rateably in any distribution of the assets of the Company.

   c) Voting Rights: The holders of the Common Shares will be entitled to receive notice of and to attend all annual and special meetings of the shareholders of the Company and to one (1) vote in respect of each Common Share held at all such meetings, except at separate meetings of or on separate votes by the holders of another class or series of shares of the Company.

2) The rights, privileges, restrictions and conditions attaching to the First Preferred Shares are as follows:

   a) Authority to Issue in One or More Series: The First Preferred Shares may at any time or from time to time be issued in one (1) or more series. Subject to the following provisions, the Board may by resolution fix from time to time before the issue thereof the number of shares in, and determine the designation, rights, privileges, restrictions and conditions attaching to the shares of each series of First Preferred Shares.

   b) Voting Rights: The holders of the First Preferred Shares will not be entitled to receive notice of or to attend any meeting of the shareholders of the Company and will not be entitled to vote at any such meeting, except as may be required by law.

   c) Limitation on Issue: The Board may not issue any First Preferred Shares if by so doing the aggregate amount payable to holders of First Preferred Shares as a return of capital in the event of the liquidation, dissolution or winding up of the Company or any other distribution of the assets of the Company among its shareholders for the purpose of winding up its affairs would exceed $500,000,000.

   d) Ranking of First Preferred Shares: The First Preferred Shares will be entitled to priority over the Second Preferred Shares and the Common Shares of the Company and over any other shares ranking junior to the First Preferred Shares with respect to the payment of dividends and the distribution of assets of the Company in the event of any liquidation, dissolution or winding up of the Company or other distribution of the assets of the Company among its shareholders for the purpose of winding up its affairs.

e) Dividends Preferential: Except with the consent in writing of the holders of all outstanding First Preferred Shares, no dividend can be declared and paid on or set apart for payment on the Second Preferred Shares or the Common Shares or on any other shares ranking junior to the First Preferred Shares unless and until all dividends (if any) up to and including any dividend payable for the last completed period for which such dividend is payable on each series of First Preferred Shares outstanding has been declared and paid or set apart for payment.

3) The rights, privileges, restrictions and conditions attaching to the Second Preferred Shares are as follows:

a) Authority to Issue in One or More Series: The Second Preferred Shares may at any time or from time to time be issued in one (1) or more series. Subject to the following provisions, the Board may by resolution fix from time to time before the issue thereof the number of shares in, and determine the designation, rights, privileges, restrictions and conditions attaching to the shares of each series of Second Preferred Shares.

b) Voting Rights: The holders of the Second Preferred Shares will not be entitled to receive notice of or to attend any meetings of the shareholders of the Company and will not be entitled to vote at any such meeting, except as may be required by law.

c) Limitation on Issue: The Board may not issue any Second Preferred Shares if by so doing the aggregate amount payable to holders of Second Preferred Shares as a return of capital in the event of the liquidation, dissolution or winding up of the Company or any other distribution of the assets of the Company among its shareholders for the purpose of winding up its affairs would exceed $500,000,000.

d) Ranking of Second Preferred Shares: The Second Preferred Shares will be entitled to priority over the Common Shares of the Company and over any other shares ranking junior to the Second Preferred Shares with respect to the payment of dividends and the distribution of assets of the Company in the event of the liquidation, dissolution or winding up of the Company or any other distribution of the assets of the Company among its shareholders for the purpose of winding up of its affairs.

e) Dividends Preferential: Except with the consent in writing of the holders of all outstanding Second Preferred Shares, no dividend can be declared and paid on or set apart for payment on the Common Shares or on any other shares ranking junior to the Second Preferred Shares unless and until all dividends (if any) up to and including any dividend payable for the last completed period for which such dividend is payable on each series of Second Preferred Shares outstanding has been declared and paid or set apart for payment.

6.2 Security Ratings

The following information relating to the Company's credit ratings is provided as it may relate to the Company's financing costs, liquidity and operations. Specifically, credit ratings affect the Company's ability to obtain short-term and long-term financing and/or the cost of such financing. Additionally, the ability of the Company to engage in certain collateralized business activities on a cost effective basis depends on the Company's credit ratings. A reduction in the current rating on the Company's debt by its rating agencies, particularly a downgrade below investment grade ratings, or a negative change in the Company's ratings outlook could adversely affect the Company's cost of financing and/or its access to sources of liquidity and capital. In addition, changes in credit ratings may affect the Company's ability to, and/or the associated costs of: (i) entering into ordinary course derivative or hedging transactions and may require the Company to post additional collateral under certain of its contracts, and (ii) entering into and maintaining ordinary course contracts with customers and suppliers on acceptable terms and (iii) ability to self-insure certain leased or financed rolling stock assets as per common industry practice.

The Company's debt securities are rated by three approved rating organizations – Moody's, S&P and DBRS. The Company received two ratings upgrades in 2014 from all three agencies. In addition short-term ratings were assigned in 2014 to support a newly established U.S. commercial paper program. All ratings are shown in the table below:

Approved Rating Organization	Long-Term Debt Rating	Short-Term Debt Rating
Moody's Investors Service	Baa1	P-2
Standard & Poor's Corporation	BBB+	A-2
Dominion Bond Rating Service	BBB(High)	R-2(High)

As at December 31, 2014, the ratings provided by each of S&P, Moody's and DBRS have a stable outlook.

Credit ratings are intended to provide investors with an independent measure of the credit quality of an issue of securities and are indicators of the likelihood of payment and of the capacity and willingness of a company to meet its financial commitment on an obligation in accordance with the terms of the obligation. A description of the rating categories of each of the rating agencies in the table above is set out below.

Credit ratings are not recommendations to purchase, hold or sell securities and do not address the market price or suitability of a specific security for a particular investor and may be subject to revision or withdrawal at any time by the rating agencies. Credit ratings may not reflect the potential impact of all risks on the value of securities. In addition, real or anticipated changes in the rating assigned to a security will generally affect the market value of that security. There can be no assurance that a rating will remain in effect for any given period of time or that a rating will not be revised or withdrawn entirely by a rating agency in the future.

In the last two years, the Company has paid the customary fees, including annual surveillance fees covering its long-term debt securities, to the aforementioned credit rating agencies for their rating services.

The following table summarizes rating categories for respective rating agencies:

Moody's		S&P		DBRS		
Long Term	Short Term	Long Term	Short Term	Long Term	Short Term	
Aaa	P-1	AAA	A-1+	AAA	R-1 (high)	High Investment Grade
Aa1	P-1	AA+	A-1+	AA(high)	R-1 (high)	
Aa2	P-1	AA	A-1+	AA	R-1 (mid)	
Aa3	P-1	AA-	A-1+	AA(low)	R-1 (mid)	
A1	P-1	A+	A-1	A(high)	R-1 (low)	
A2	P-1	A	A-1	A	R-1 (low)	
A3	P-2	A-	A-2	A(low)	R-1 (low)	
Baa1	P-2	BBB+	A-2	BBB(high)	R-2 (high)	Investment Grade
Baa2	P-2	BBB	A-2	BBB	R-2 (mid)	
Baa3	P-3	BBB-	A-3	BBB(low)	R-2 (low) or R-3	
Ba1	NP	BB+	B	BB(high)	R-4	Below Investment Grade
Ba2	NP	BB	B	BB	R-4

October	205.51	220.20	180.13	207.68	32,875,428
November	207.30	212.19	192.09	193.16	14,191,326
December	193.76	198.50	170.51	192.69	27,334,064

8. DIRECTORS AND OFFICERS

Following are the names and municipalities of residence of the directors and officers of the Company, their positions and principal occupations within the past five years, the period during which each director has served as director of the Company, and the date on which each director's term of office expires.

8.1 Directors

Name and Municipality of Residence	Position Held and Principal Occupation within the Preceding Five Years[1]	Year of Annual Meeting at which Term of Office Expires (Director Since)
Gary F. Colter Mississauga, Ontario, Canada	Chairman, Canadian Pacific Railway Company and Canadian Pacific Railway Limited; President, CRS Inc. (Corporate restructuring and strategy consulting company)	2015 (2012)
William A. Ackman[3][4] New York, New York, U.S.A.	Founder, Chief Executive Officer Pershing Square Capital Management, L.P. (investment advisor)	2015 (2012)
Isabelle Courville[2][6] Rosemere, Quebec, Canada	Corporate Director	2015 (2013)
Paul G. Haggis[2][4] Canmore, Alberta, Canada	Chairman, Alberta Enterprise Corporation (investment in venture capital funds)	2015 (2012)
E. Hunter Harrison[6] Wellington, Florida, U.S.A.	Chief Executive Officer, Canadian Pacific Railway Company and Canadian Pacific Railway Limited	2015 (2012)
Paul C. Hilal[4][5] New York, New York, U.S.A.	Partner, Pershing Square Capital Management, L.P. (investment advisor)	2015 (2012)
Krystyna T. Hoeg, C.A.[3][5] Toronto, Ontario, Canada	Corporate Director	2015 (2007)
Rebecca MacDonald[3][5] Toronto, Ontario, Canada	Founder, Executive Chair, Just Energy Group Inc. (independent marketer of deregulated gas and electricity)	2015 (2012)
Dr. Anthony R. Melman[4][6] Toronto, Ontario, Canada	President and Chief Executive Officer, Acasta Capital (strategic and financial advisor)	2015 (2012)
Linda J. Morgan[2][6] Bethesda, Maryland, U.S.A.	Partner, Nossaman LLP (law firm)	2015 (2006)
Andrew F. Reardon[2][5] Marco Island, Florida, U.S.A.	Attorney, Reardon and Chasar LLP (law firm) Retired Chairman and CEO, TTX Company	2015 (2013)
Stephen C. Tobias[5][6] Garnett, South Carolina, U.S.A.	Former Vice-Chairman and Chief Operating Officer, Norfolk Southern Corporation (U.S. Class I railroad)	2015 (2012)

(1) G. Colter has been President of CRS Inc. since 2002. I. Courville has been Chair of the Laurentian Bank of Canada since March 2013 and was President, Hydro Quebec Distribution from 2011 to 2013 and President, Hydro Quebec TransEnergie from 2007 to 2011. P.G. Haggis was Chairman of Canadian Pacific Railway Company and Canadian Pacific Railway Limited from May 2012 to May 2014 and was Chairman of the Board of C.A. Bancorp Inc. (now known as Crosswinds Holdings Inc.) from July 2011 to March 2013. E.H. Harrison was President and Chief Executive Officer of Canadian National Railway from 2003 to 2009. L.J. Morgan was Partner from 2003 to 2012 at Covington & Burling LLP. A.F. Reardon was Chairman and Chief Executive Officer in 2008 and President and Chief Executive Officer from 2001 to 2008 of TTX Company. S.C. Tobias was Vice-Chairman and Chief Operating Officer of Norfolk Southern Corporation from 1998 to 2009.
(2) Member of the Audit Committee.
(3) Member of the Corporate Governance and Nominating Committee.
(4) Member of the Finance Committee.
(5) Member of the Management Resources and Compensation Committee.
(6) Member of the Safety, Operations and Environment Committee.

8.2 Cease Trade Orders, Bankruptcies, Penalties or Sanctions

Mr. Harrison was a director of Dynegy Inc. ("Dynegy") from March 9 to December 16, 2011 (Chairman from July 11 to December 16, 2011), as well as its Interim President and Chief Executive Officer from April 9 to July 11, 2011. On July 6, 2012, Dynegy filed a voluntary petition for relief under Chapter 11 of the U.S. Bankruptcy Code, such filing being primarily a technical step necessary to facilitate the restructuring of one or more Dynegy subsidiaries. Dynegy exited bankruptcy on October 1, 2012.

8.3 Senior Officers

As at February 23, 2015, the following were executive officers of CP:

Name and municipality of residence	Position held	Principal occupation within the preceding five years
E.H. Harrison Wellington, Florida, U.S.A.	Chief Executive Officer	Chief Executive Officer; President and Chief Executive Officer, Canadian Pacific Railway Company and Canadian Pacific Railway Limited; Chairman of the Board, Dynegy Inc.; Interim President and Chief Executive Officer, Dynegy Inc.; President and Chief Executive Officer, Canadian National Railway Company
K.E. Creel Chicago, Illinois, U.S.A.	President and Chief Operating Officer	President and Chief Operating Officer, Canadian Pacific Railway Company and Canadian Pacific Railway Limited; Executive Vice-President and Chief Operating Officer; Executive Vice-President, Operations, Canadian National Railway Company
B.W. Demosky Calgary, Alberta, Canada	Executive Vice-President and Chief Financial Officer	Executive Vice-President and Chief Financial Officer, Canadian Pacific Railway Company and Canadian Pacific Railway Limited; Chief Financial Officer, Suncor Energy Inc.; Senior Vice-President of Business Services, Suncor Energy Inc.
P. J. Edwards Calgary, Alberta, Canada	Vice-President, Human Resources and Labour Relations	Vice-President, Human Resources and Labour Relations; Vice-President Human Resources, Canadian Pacific Railway Company and Canadian Pacific Railway Limited; Vice-President Human Resources, Canadian National Railway Company
T.E. Marsh Calgary, Alberta, Canada	Senior Vice-President Sales and Marketing	Senior Vice-President Sales and Marketing; Executive Vice-President North America Trade Division, COSCO Container Lines Americas, Inc.
P. A. Guthrie, Q.C. Municipal District of Rockyview, Alberta, Canada	Chief Legal Officer and Corporate Secretary	Chief Legal Officer and Corporate Secretary; Vice-President, Law and Risk Management; Vice-President Law, Canadian Pacific Railway Company and Canadian Pacific Railway Limited
L. J. Pitz McLean, Virginia, U.S.A	Vice-President and Chief Risk Officer	Vice-President and Chief Risk Officer; Vice-President Security and Risk Management, Canadian Pacific Railway Company; Vice-President Risk Mitigation, Canadian National Railway Company
M. Redeker St. Albert, Alberta, Canada	Vice-President and Chief Information Officer	Vice-President and Chief Information Officer, Canadian Pacific Railway Company and Canadian Pacific Railway Limited; Chief Information Officer; Chief Technology Officer, ATB Financial
M. Wallace Calgary, Alberta, Canada	Vice-President, Corporate Affairs and Chief of Staff	Vice-President, Corporate Affairs and Chief of Staff; Canadian Pacific Railway Company and Canadian Pacific Railway Limited; Chief of Staff – Office of the President and CEO, Canadian Pacific Railway Company; Client Partner, Longview Communications Inc.; Head of Investor Relations, Husky Injection Molding Systems Inc.; Assistant Vice-President Public Affairs, Canadian National Railway Company

8.4 Shareholdings of Directors and Officers

As at December 31, 2014, the directors and executive officers of CPRL owned or controlled a total of 14,173,510 shares representing approximately 8.53% of the outstanding shares at that date (166,120,981). Mr. Ackman exercises control over the voting and disposition of 13,940,890 of such shares which are beneficially owned by Pershing Square Capital Management, L.P. and its affiliates.

9. LEGAL PROCEEDINGS AND REGULATORY ACTIONS

On July 6, 2013, a train carrying crude oil operated by Montreal Maine and Atlantic Railway ("MM&A") derailed and exploded in Lac-Mégantic, Quebec on a section of railway line owned by MM&A. The previous day CP had interchanged the train to MM&A, and after that interchange MM&A exercised exclusive control over the train.

Following this incident, the Minister of Sustainable Development, Environment, Wildlife and Parks of Quebec issued an order directing certain named parties to recover the contaminants and to clean up and decontaminate the derailment site. CP was added as a named party on August 14, 2013. CP is a party to an administrative appeal with respect to this order. No hearing date on the merits of CP's appeal has been scheduled.

A class action lawsuit has also been filed in the Superior Court of Quebec on behalf of a class of persons and entities residing in, owning or leasing property in, operating a business in or physically present in Lac-Mégantic. The lawsuit seeks damages caused by the derailment including for wrongful deaths, personal injuries, and property damages. CP was added as a defendant on August 16, 2013. The Superior Court of Quebec is not expected to release its judgment on the authorization of the class action before the end of February 2015.

In the wake of the derailment and ensuing litigation, MM&A filed for bankruptcy in Canada and the United States. In an Adversary Proceeding filed by the MM&A U.S. bankruptcy trustee against CP, Irving Oil and the World Fuel entities, CP has been accused of failing to ensure that World Fuel or Irving properly classified the oil lading and of not refusing to ship the oil in DOT-111 tank cars. CP intends to move to withdraw the bankruptcy court reference and will thereafter seek to have the claim against CP dismissed as federally preempted.

In addition, CP has received two damage to cargo notices of claims from the shipper of the oil on the derailed train, Western Petroleum. Western Petroleum has submitted U.S. and Canadian notices of claims for the same damages and, under the Carmack Amendment (the U.S. damage to cargo statute), seeks to recover for all injuries associated with, and indemnification for all claims arising from, the derailment. Both jurisdictions permit a shipper to recover the value of damaged lading against any carrier in the delivery chain, subject to limitations in the carrier's tariffs. CP's tariffs significantly restrict shipper damage claim rights.

At this early stage in the legal proceedings, any potential liability and the quantum of potential loss cannot be determined. Nevertheless, CP denies liability for MM&A's derailment and will vigorously defend itself in the proceedings described above and in any proceeding that may be commenced in the future.

10. TRANSFER AGENTS AND REGISTRARS

10.1 Transfer Agent

Computershare Investor Services Inc., with transfer facilities in Montreal, Toronto, Calgary and Vancouver, serves as transfer agent and registrar for CP's Common Shares in Canada.

Computershare Trust Company NA, Canton, Massachusetts, serves as co-transfer agent and co-registrar for CP's Common Shares in the U.S.

Requests for information should be directed to:

Computershare Investor Services Inc.
100 University Avenue, 8th Floor
Toronto, Ontario Canada
M5J 2Y1

11. INTERESTS OF EXPERTS

Deloitte LLP, Chartered Accountants, Calgary, Alberta, have issued their audit opinion dated February 23, 2015, in respect of the Company's consolidated financial statements as at December 31, 2014 and 2013 and for each of the years in the three-year period ended December 31, 2014. Deloitte LLP is independent with respect to the Company within the meaning of the Rules of Professional Conduct of the Institute of Chartered Accountants of Alberta and is independent within the meaning of the applicable rules and regulations adopted by the U.S. Securities and Exchange Commission and the Public Company Accounting Oversight Board (United States).

12. AUDIT COMMITTEE

12.1 Composition of the Audit Committee and Relevant Education and Experience

The following individuals comprise the entire membership of the Audit Committee ("the Committee"). All of the members of the Committee are independent.

I. Courville – Ms. Courville is a Corporate Director. From 2011 to 2013 she served as President of Hydro-Québec Distribution and from 2006 to 2011 she was President of Hydro-Québec TransÉnergie, both divisions of Hydro-Québec. Previously, she served as President of the Enterprise Group of Bell Canada and as President and Chief Executive Officer of Bell Nordiq Group (Télébec NorthernTel), a subsidiary of Bell Canada. Ms. Courville is currently Chair of the Board of Laurentian Bank of Canada, a director of Group TVA Inc. and a director of École Polytechnique de Montréal. Prior board memberships include Miranda Technologies Inc., Chamber of Commerce of Metropolitan Montreal, NPCC (Northeast Power Coordinating Council) and St. Justine Hospital Foundation. Ms. Courville holds a Bachelor's degree in Engineering Physics from the École Polytechnique de Montréal and a Bachelor's degree in Civil Law from McGill University.

P.G. Haggis – Mr. Haggis is Chairman of the Alberta Enterprise Corporation, and served as Chairman of C.A. Bancorp Inc. until March 2013. He serves as a director of Advantage Oil & Gas Ltd. and as an advisor to the Insurance Corporation of British Columbia (ICBC) since retiring as a director. Previously, Mr. Haggis was President and CEO of Ontario Municipal Employees Retirement System (OMERS) and President and CEO of Alberta Treasury Branches. Mr. Haggis graduated from the University of Western Ontario and is certified as a Chartered Director through McMaster University.

L.J. Morgan – Ms. Morgan is a Partner at Nossaman LLP, a premier transportation infrastructure law firm based in the United States. Prior to joining Nossaman in September of 2011, she was a Partner at Covington & Burling LLP, a United States based international law firm, where she chaired its transportation and government affairs practices. She also serves on the Board of Visitors for the Georgetown University Law Centre and the Business Advisory Committee for Northwestern University's Transportation Centre. Ms. Morgan was previously Chairman of the United States Surface Transportation Board, and its predecessor the Interstate Commerce Commission, from March 1995 to December 2002. Prior to joining the Interstate Commerce Commission, Ms. Morgan served as General Counsel to the Senate Committee on Commerce, Science and Transportation. She graduated from Vassar College with an A.B. and the Georgetown University Law Centre with a J.D., and is an alumna of the Program for Senior Managers in Government at Harvard University's John F. Kennedy School of Government.

A. F. Reardon – Mr. Reardon was an attorney at the law firm of Reardon & Chasar, LPA, which he co-founded in 2009 until he retired in December 2011. Prior to that, Mr. Reardon served as Chairman and Chief Executive Officer, and President and Chief Executive Officer from 2001 to 2008, and Vice President, Law and Human Resources from 1992 to 2000 of TTX Company, the leading railcar leasing company in North America. Previously, he was a Presidential Appointee to the Railroad Retirement Board and was the Senior Vice President, Law and Administration for Illinois Central Railroad. He is currently a director of Appvion Inc., a global manufacturer of thermal and carbonless paper. Mr. Reardon was a Presidential Appointee confirmed by the U.S. Senate from 1990-1992. He has also served on various railroad industry boards including TTX, Terminal Railroad Association of St. Louis, and the Peoria and Pekin Union Railway. Mr. Reardon holds a Bachelor's Degree from the University of Notre Dame, a Juris Doctor Degree from the University of Cincinnati and a Master's Degree in Taxation from Washington University Law School. He served as an officer in the United States Navy from 1967 to 1971.

12.2 Pre-Approval of Policies and Procedures

The Committee has adopted a written policy governing the pre-approval of audit and non-audit services to be provided to CP by the Company's independent auditors. The policy is reviewed annually and the audit and non-audit services to be provided by the Company's independent auditors, as well as the budgeted amounts for such services, are pre-approved at that time. The Company's

Comptroller must submit to the Committee at least quarterly a report of all services performed or to be performed by the Company's independent auditors pursuant to the policy. Any additional audit or non-audit services to be provided by the independent auditors either not included among the pre-approved services or exceeding the budgeted amount for such pre-approved services by more than 10% must be individually pre-approved by the Committee or its Chairman, who must report all such additional pre-approvals to the Committee at its next meeting following the granting thereof. The Company's independent auditors' annual audit services engagement terms and fees are subject to the specific pre-approval of the Committee. In addition, prior to the granting of any pre-approval, the Committee or its Chairman, as the case may be, must be satisfied that the performance of the services in question will not compromise the independence of the Company's independent auditors. The Company's Chief Internal Auditor monitors compliance with this policy.

12.3 Audit Committee Charter

The term "Corporation" herein shall refer to each of Canadian Pacific Railway Limited ("CPRL") and Canadian Pacific Railway Company ("CPRC"), and the terms "Board", "Directors", "Board of Directors" and "Committee" shall refer to the Board, Directors, Board of Directors, or Committee of CPRL or CPRC, as applicable.

A. Committee and Procedures

1. Purpose

The purposes of the Audit Committee (the "Committee") of the Board of Directors of the Corporation are to fulfill applicable public company audit committee legal obligations and to assist the Board of Directors in fulfilling its oversight responsibilities in relation to the disclosure of financial statements and information derived from financial statements, including:

- the review of the annual and interim financial statements of the Corporation;
- the integrity and quality of the Corporation's financial reporting and systems of internal control;
- the Corporation's compliance with applicable legal and regulatory requirements;
- the qualifications, independence, engagement, compensation and performance of the Corporation's external auditors; and
- the performance of the Corporation's internal audit function;

and to prepare, if required, an audit committee report for inclusion in the Corporation's annual management proxy circular, in accordance with applicable rules and regulations. In addition, the Committee will assist the Board with the identification of the principal risks of the Corporation's business and ensure the implementation of appropriate risk assessment and risk management policies and processes to manage these risks.

The Corporation's external auditors shall report directly to the Committee.

2. Composition of Committee

The members of the Committee of each of CPRL and CPRC shall be identical and shall be Directors of CPRL and CPRC, respectively. The Committee shall consist of not less than three and not more than the number of Directors who are not officers or employees of the Corporation, none of whom is either an officer or employee of the Corporation or any of its subsidiaries. Members of the Committee shall meet applicable requirements and guidelines for audit committee service, including requirements and guidelines with respect to being independent and unrelated to the Corporation and to having accounting or related financial management expertise and financial literacy, as set forth in applicable securities laws or the rules of any stock exchange on which the Corporation's securities are listed for trading. No Director shall be eligible to serve on the Committee if such Director currently serves on the audit committees of three public companies other than the Corporation, unless the Board of Directors has determined that such simultaneous service would not impair the ability of such member to effectively serve on the Committee. Determinations as to whether a

particular Director satisfies the requirements for membership on the Committee shall be affirmatively made by the full Board, upon recommendation from the Corporate Governance and Nominating Committee.

3. Appointment of Committee Members

Members of the Committee shall be appointed from time to time by the Board and shall hold office at the pleasure of the Board.

4. Vacancies

Where a vacancy occurs at any time in the membership of the Committee, it may be filled by the Board. The Board shall fill a vacancy whenever necessary to maintain a Committee membership of at least three Directors.

5. Committee Chair

The Board shall appoint a Chair for the Committee.

6. Absence of Committee Chair

If the Chair of the Committee is not present at any meeting of the Committee, one of the other members of the Committee who is present at the meeting shall be chosen by the Committee to preside at the meeting.

7. Secretary of Committee

The Committee shall appoint a Secretary who need not be a Director of the Corporation.

8. Meetings

The Committee shall meet at regularly scheduled meetings at least once every quarter and shall meet at such other times during each year as it deems appropriate, and as part of such meetings, shall meet in executive session without management being present. In addition, the Chair of the Committee or the Chairman of the Board or any two of its other members may call a meeting of the Committee at any time.

9. Quorum

Three members of the Committee shall constitute a quorum.

10. Notice of Meetings

Notice of the time and place of every meeting shall be given in writing by any means of transmitted or recorded communication, including facsimile, telex, telegram or other electronic means that produces a written copy, to each member of the Committee at least 24 hours prior to the time fixed for such meeting; provided however, that a member may in any manner waive a notice of a meeting. Attendance of a member at a meeting constitutes a waiver of notice of the meeting, except where a member attends a meeting for the express purpose of objecting to the transaction of any business on the grounds that the meeting is not lawfully called.

11. Attendance of Others at Meetings

At the invitation of the Chair of the Committee, other individuals who are not members of the Committee may attend any meeting of the Committee.

12. Procedure, Records and Reporting

Subject to any statute or the articles and by-laws of the Corporation, the Committee shall fix its own procedures at meetings, keep records of its proceedings and report to the Board when the Committee may deem appropriate (but not later than the next regularly scheduled meeting of the Board).

13. Delegation

The Committee may delegate from time to time to any person or committee of persons any of the Committee's responsibilities that may be lawfully delegated.

14. Report to Shareholders

The Committee shall prepare a report to shareholders or others, concerning the Committee's activities in the discharge of its

responsibilities, when and as required by applicable laws or regulations.

15. Guidelines to Exercise of Responsibilities

The Board recognizes that meeting the responsibilities of the Committee in a dynamic business environment requires a degree of flexibility. Accordingly, the procedures outlined in these Terms of Reference are meant to serve as guidelines rather than inflexible rules, and the Committee may adopt such different or additional procedures as it deems necessary from time to time.

16. Use of Outside Legal, Accounting or Other Advisers; Appropriate Funding

The Committee may retain, at its discretion, outside legal, accounting or other advisors, at the expense of the Corporation, to obtain advice and assistance in respect of any matters relating to its duties, responsibilities and powers as provided for or imposed by these Terms of Reference or otherwise by law.

The Committee shall be provided by the Corporation with appropriate funding, as determined by the Committee, for payment of:

(i) compensation of any outside advisers as contemplated by the immediately preceding paragraph;

(ii) compensation of any independent auditor engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the Corporation; or

(iii) ordinary administrative expenses that are necessary or appropriate in carrying out the Committee's duties.

All outside legal, accounting or other advisors retained to assist the Committee shall be accountable ultimately to the Committee.

17. Remuneration of Committee Members

No member of the Committee shall receive from the Corporation or any of its affiliates any compensation other than the fees to which he or she is entitled as a Director of the Corporation or a member of a committee of the Board. Such fees may be paid in cash and/or shares, options or other in-kind consideration ordinarily available to Directors.

B. Mandate of Committee

1. Committee Role:

The Committee's role is one of oversight. Management is responsible for preparing the interim and annual financial statements of the Corporation and for maintaining a system of risk assessment and internal controls to provide reasonable assurance that assets are safeguarded and that transactions are authorized, recorded and reported properly, for maintaining disclosure controls and procedures to ensure that it is informed on a timely basis of material developments and the Corporation complies with its public disclosure obligations, and for ensuring compliance by the Corporation with applicable legal and regulatory requirements. The external auditors are responsible for auditing the Corporation's financial statements.

In carrying out its oversight responsibilities: (i) each member of the Committee is entitled to, absent knowledge to the contrary, rely upon the accuracy and completeness of the Corporation's records and upon information, opinions, reports or statements presented by any of the Corporation's officers or employees, or consultants of the Corporation which the member reasonably believes are within such other person's professional or expert competence and who has been selected with reasonable care by or on behalf of the Corporation; and (ii) the Committee and its members do not provide any professional certification or special assurance as to the Corporation's financial statements or the external auditors' work.

The Committee shall:

External Auditors' Report on Annual Audit

a) obtain and review annually prior to the completion of the external auditors' annual

audit of the year-end financial statements a report from the external auditors describing:

(i) all critical accounting policies and practices to be used;

(ii) all alternative treatments of financial information within generally accepted accounting principles that have been discussed with management, the ramifications of the use of such alternative disclosures and treatments, and the treatment preferred by the external auditors; and

(iii) other material written communications between the external auditors and management, such as any management letter or schedule of unadjusted differences;

Management's/Internal Auditors' Reports on External Audit Issues

b) review any reports on the above or similar topics prepared by management or the internal auditors and discuss with the external auditors any material issues raised in such reports;

Annual Financial Reporting Documents and External Auditors' Report

c) meet to review with management, the internal auditors and the external auditors the Corporation's annual financial statements, the report of the external auditors thereon, the related Management's Discussion and Analysis, and the information derived from the financial statements, as contained in the Annual Information Form and the Annual Report. Such review will include obtaining assurance from the external auditors that the audit was conducted in a manner consistent with applicable law and will include a review of:

(i) all major issues regarding accounting principles and financial statement presentations, including any significant changes in the Corporation's selection or application of accounting policies or principles;

(ii) all significant financial reporting issues and judgments made in connection with the preparation of the financial statements, including the effects on the financial statements of alternative methods within generally accepted accounting principles;

(iii) the effect of regulatory and accounting issues, as well as off-balance sheet structures, on the financial statements;

(iv) all major issues as to the adequacy and effectiveness of the Corporation's internal controls and any special steps adopted in light of material control deficiencies and any consideration by the external auditors of fraud during the performance of the audit of the Corporation's annual financial statements; and

(v) the external auditors' judgment about the appropriateness and quality, not just the acceptability, of the accounting principles applied in the Corporation's financial reporting;

d) following such review with management and the external auditors, recommend to the Board whether to approve the audited annual financial statements of the Corporation and the related Management's Discussion and Analysis, and report to the Board on the review by the Committee of the information derived from the financial statements contained in the Annual Information Form and Annual Report;

Interim Financial Statements and MD&A

e) review with management, the internal auditors and the external auditors the Corporation's interim financial statements and its interim Management's Discussion and Analysis, and if thought fit, approve the interim financial statements and

interim Management's Discussion and Analysis and the public release thereof by management;

Earnings Releases, Earnings Guidance

f) review and discuss earnings press releases, including the use of "pro forma" or "adjusted" information determined other than in accordance with generally accepted accounting principles, and the disclosure by the Corporation of earnings guidance and other financial information to the public including analysts and rating agencies, it being understood that such discussions may, in the discretion of the Committee, be done generally (i.e., by discussing the types of information to be disclosed and the type of presentation to be made) and be satisfied that adequate procedures are in place for the review of such public disclosures and periodically assess the adequacy of those procedures;

Material Litigation, Tax Assessments, Etc.

g) review with management, the external auditors and, if necessary, legal counsel all legal and regulatory matters and litigation, claims or contingencies, including tax assessments, that could have a material effect upon the financial position of the Corporation, and the manner in which these matters may be, or have been, disclosed in the financial statements; and obtain reports from management and review with the Corporation's chief legal officer, or appropriate delegates, the Corporation's compliance with applicable legal and regulatory requirements;

Oversight of External Auditors

h) subject to applicable law relating to the appointment and removal of the external auditors, be directly responsible for the appointment, retention, termination and oversight of the external auditors; recommend to the Board the approval of compensation of the external auditors as such compensation relates to the provision of audit services; and be responsible for the resolution of disagreements between management and the external auditors regarding financial reporting;

Rotation of External Auditors' Audit Partners

i) review and evaluate the lead audit partner of the external auditors and assure the regular rotation of the lead audit partner and the audit partner responsible for reviewing the audit and other audit partners, as required by applicable law;

External Auditors' Internal Quality Control

j) obtain and review, at least annually, and discuss with the external auditors a report by the external auditors describing the external auditors' internal quality-control procedures, any material issues raised by the most recent internal quality-control review, or peer review, of the external auditors, or by any inquiry or investigation by governmental or professional authorities, within the preceding five years, respecting one or more independent audits carried out by the external auditors, and any steps taken to deal with any such issues;

External Auditors' Independence

k) review and discuss, at least annually (and prior to the engagement of any new external auditors), with the external auditors all relationships that the external auditors and their affiliates have with the Corporation and its affiliates in order to assess the external auditors' independence, including, without limitation:

   (i) obtaining and reviewing, at least annually, a formal written statement from the external auditors delineating all relationships that in the external auditors' professional judgment may reasonably be thought to bear on the independence of the external auditors with respect to the Corporation;

   (ii) discussing with the external auditors any disclosed relationships or services

that may affect the objectivity and independence of the external auditors; and

(iii) recommending that the Board take appropriate action in response to the external auditors' report to satisfy itself as to the external auditors' independence;

Policies Regarding Hiring of External Auditors' Employees, Former Employees

l) set clear policies for the hiring by the Corporation of partners, employees and former partners and employees of the external auditors;

Pre-Approval of Audit and Non-Audit Services Provided by External Auditors

m) be solely responsible for the pre-approval of all audit and non-audit services to be provided to the Corporation and its subsidiary entities by the external auditors (subject to any prohibitions provided in applicable law), and of the fees paid for the non-audit services; provided however, that the Committee may delegate, to an independent member or members of the Committee, authority to pre-approve such non-audit services, and such member(s) shall report to the Committee at its next scheduled meeting following the granting any pre-approvals granted pursuant to such delegated authority;

n) review the external auditors' annual audit plan (including scope, staffing, location, reliance on management and internal controls and audit approach);

o) review the external auditors' engagement letter;

Oversight of Internal Audit

p) oversee the internal audit function by being directly responsible for the appointment or dismissal of the Chief Internal Auditor, who shall report directly to the Committee and administratively to the Chief Legal Officer and Corporate Secretary; afford the Chief Internal Auditor unrestricted access to the Committee; review the charter, activities, internal audit plan, organizational structure, and the skills and experience of the Internal Audit Department; discuss with management and the external auditors the competence, performance, resources, and cooperation of the internal auditors; and approve, after discussion with management and proper performance evaluation, the compensation of the Chief Internal Auditor;

q) review and consider, as appropriate, any significant reports and recommendations issued by the Corporation or by any external party relating to internal audit issues, together with management's response thereto;

Internal Controls and Financial Reporting Processes

r) review with management, the internal auditors and the external auditors, the Corporation's financial reporting processes and its internal controls;

s) review with the internal auditors the adequacy of internal controls and procedures related to any corporate transactions in which Directors or officers of the Corporation have a personal interest, including the expense accounts of officers of the Corporation at the level of Vice-President and above and officers' use of corporate assets, and consider the results of any reviews thereof by the internal or external auditors;

CEO and Chairman Expenses

t) review, at least annually, a report on the expense claims of the Chief Executive Officer, as approved by the Chairman of the Board, and the expense claims of the Chairman of the Board, as approved by the Chair of the Audit Committee;

Complaints Processes

u) establish procedures for:

(i) the receipt, retention and treatment of complaints received by the Corporation regarding accounting, internal accounting controls or auditing matters; and

(ii) the confidential, anonymous submission by employees of the Corporation of concerns regarding questionable accounting or auditing matters;

and review periodically with management and the internal auditors these procedures and any significant complaints received;

Separate Meetings with External Auditors, Internal Audit, Management

v) meet separately with management, the external auditors and the internal auditors periodically to discuss matters of mutual interest, including any audit problems or difficulties and management's response thereto, the responsibilities, budget and staffing of the Internal Audit Department and any matter that they recommend bringing to the attention of the full Board;

Enterprise Risk Management

w) discuss risk assessment and risk management policies and processes to be implemented for the Corporation, review with management and the Corporation's internal auditors the effectiveness and efficiency of such policies and processes and their compliance with other relevant policies of the Corporation, and make recommendations to the Board with respect to any outcomes, findings and issues arising in connection therewith;

x) review management's program to obtain appropriate insurance to mitigate risks;

y) oversee risks that may have a material impact on the Corporation's financial statements;

Tax

z) review the Corporation's tax status and monitor its approach to tax strategy that may have a material impact on the Corporation's financial statements, including tax reserves and potential reassessments and audits;

Codes of Ethics

aa) monitor compliance with the Corporation's code of business ethics and the code of ethics applicable to the Chief Executive Officer and senior financial officers of the Corporation, as well as waivers from compliance therefrom, and ensure that any issues relating to financial governance which are identified by the Directors are raised with management;

Review of Terms of Reference

bb) review and reassess the adequacy of these Terms of Reference annually or otherwise as it deems appropriate and recommend changes to the Board;

Other

cc) perform such other activities, consistent with these Terms of Reference, the Corporation's articles and by-laws and governing law, as the Committee or the Board deems appropriate; and

dd) report regularly to the Board of Directors on the activities of the Committee.

December 16, 2014

12.4 Audit and Non-Audit Fees and Services

Deloitte LLP (“Deloitte”) was appointed as the independent auditor of the Company in May 2011 commencing fiscal year 2011.

In accordance with applicable laws and the requirements of stock exchanges and securities regulatory authorities, the Audit Committee of the Company must pre-approve all audit and non-audit services to be provided by the independent auditors. Fees payable to Deloitte LLP for the years ended December 31, 2014, and December 31, 2013, totaled $2,885,400 and $2,213,000, respectively, as detailed in the following table:

	Year ended December 31, 2014	Year ended December 31, 2013
Audit Fees	$ 2,184,800	$ 1,943,000
Audit-Related Fees	155,000	228,500
Tax Fees	295,600	41,500
All Other Fees	250,000	–
TOTAL	$ 2,885,400	$ 2,213,000

The nature of the services provided under each of the categories indicated in the table is described below:

12.4.1 Audit Fees

Audit fees were for professional services rendered for the audit and interim reviews of the Registrants’ annual financial statements and services provided in connection with statutory and regulatory filings or engagements, including the attestation engagement for the report from the independent registered public accounting firm on the effectiveness of internal controls over financial reporting, the audit or interim reviews of financial statements of certain subsidiaries and of various pension and benefits plans of the Registrants; special attestation services as may be required by various government entities; and general advice and assistance related to accounting and/or disclosure matters with respect to new and proposed U.S. accounting standards, securities regulations, and/or laws.

12.4.2 Audit-Related Fees

Audit-related fees were for assurance and related services reasonably related to the performance of the audit or review of the annual financial statements, but which are not reported under “Audit Fees” above. These services consisted of audit work related to securities filings; refinancing of subsidiary companies; and accounting training.

12.4.3 Tax Fees

Tax fees were for professional services related to tax compliance, tax planning and tax advice. These services consisted of: tax compliance including the review of tax returns; assistance with questions regarding corporate tax audits; tax planning and advisory services relating to common forms of domestic and international taxation (i.e. income tax, capital tax, goods and services tax, and value added tax); and access fees for taxation database resources.

12.4.4 All Other Fees

Fees disclosed under this category would be for products and services other than those described under “Audit Fees”, “Audit-Related Fees” and “Tax Fees” above. These finance services consisted of advice with respect to an internal reorganization initiative. There were no such services in 2013.

13. FORWARD-LOOKING INFORMATION

This AIF contains certain forward-looking statements within the meaning of the *Private Securities Litigation Reform Act of 1995* (U.S.) and other relevant securities legislation relating, but not limited to expected improvements in operating efficiency and fluidity, the ability of information technology to improve service and provide sophisticated billing options, the benefits of lean process and continuous improvement principles, the cost of environmental remediation and anticipated capital expenditures. Forward-looking information typically contains statements with words such as “anticipate”, “believe”, “expect”, “plan” or similar words suggesting future outcomes.

Readers are cautioned not to place undue reliance on forward-looking information because it is possible that the Company will not achieve predictions, forecasts, projections and other forms of forward-looking information. Current economic conditions render assumptions, although reasonable when made, subject to greater uncertainty. In addition, except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

By its nature, the Company’s forward-looking information involves numerous assumptions, inherent risks and uncertainties, including but not limited to the following factors: changes in business strategies; general North American and global economic, credit and business conditions; risks in agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demand; inflation; changes in laws and regulations, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; uncertainties of investigations, proceedings or other types of claims and litigation; labour disputes; risks and liabilities arising from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions on the financial position of pension plans and investments; and various events that could disrupt operations, including severe weather, droughts, floods, avalanches and earthquakes as well as security threats and the governmental response to them, and technological changes.

There are more specific factors that could cause actual results to differ materially from those described in the forward-looking statements contained in this AIF. These more specific factors are identified and discussed in Section 22, Business Risks and elsewhere in the Company’s 2014 MD&A.

14. ADDITIONAL INFORMATION

14.1 Additional Company Information

Additional information, including the Company's Consolidated Financial Statements, press releases and other required filing documents, are available on SEDAR at www.sedar.com in Canada, on EDGAR at www.sec.gov in the U.S. and on the Company website at www.cpr.ca. Copies of such documents, as well as the Company's Notice of Intention to Make a NCIB, may be obtained by contacting the Corporate Secretary's Office. The aforementioned information is issued and made available in accordance with legal requirements and is not incorporated by reference into this AIF except as specifically stated.

Additional information, including directors' and officers' remuneration and indebtedness, principal holders of CP securities and securities authorized for issuance under equity compensation plans, where applicable, is contained in the information circular for the Company's most recent annual meeting of shareholders at which directors were elected.

Additional financial information is provided in the Company's Consolidated Financial Statements and MD&A for the most recently completed financial year.

This information is also available on the Company's website at www.cpr.ca.

IT'S SIMPLE.

CANADIAN PACIFIC ANNUAL REPORT | 2014

CP

BEST SERVICE.

LOWEST COST.

The best service in the industry, with the lowest cost basis. That’s the CP story. Period.

This is not just about 2014’s record performance. Delivering the highest-quality service at the lowest cost in the industry is our story every year. That objective has driven the transformational change we’ve undergone over the past two-and-a-half years, and it will continue to guide us as we convert that change into growth going forward.

OPERATING RATIO IS JUST A NUMBER.

We achieved a 64.7 operating ratio for the full year 2014. That's excellent. We can and likely will do better in the future, but operating ratio is just a number.

We are not in this business to set operating ratio records. We are in this business to grow. The only meaningful way to do that is to serve customers better, at lower cost, than the competition. Safely. That's our focus.

APP VOL. 4, PAGE 425

THE BEST SERVICE. DEFINED.

While each customer has a unique mix of requirements, our definition of great service is the same for every customer: Do what you say you'll do. Very simple. Do exactly what you say you'll do, when you say you'll do it, every time.

Notice that we said simple, not easy. If it were easy, everyone would be doing it. We're not perfect, but we know this: When you consistently deliver as promised, customers will come to you, and stick with you. And so will smart shareholders.

LOWEST COST. NOT LOWEST PRICE.

When we say lowest cost, we don't mean lowest price. Delivering faster, better, more reliable service has value to our customers. We expect to be able to charge a fair price for that value.

Our service is not a commodity. Our prices are competitive, but we will walk away before we will compete solely on price. We are simply not interested in business we can't do at a fair profit. We have already proven our commitment to that philosophy. It will be our philosophy going forward.

LOWEST COST MEANS MORE FLEXIBILITY.

For CP, a lower cost basis does more than contribute to earnings. It gives us more flexibility. We can compete for business we couldn't even consider a few years ago, opening exciting new playing fields and expanding our options for driving the top line. And with a lower breakeven point, we are more durable in a downturn.

A low-cost position also allows us to be more agile. If one business declines, we can quickly re-purpose key assets or shift investments to serve other customers until it cycles back.

APP VOL. 4, PAGE 428

IT'S NOT ABOUT THE PRICE OF CRUDE.

Our story is not about crude oil prices. Or the weather, or the economy, or any other external force that's on people's minds at a given moment. We have built CP to thrive and grow in all market conditions. When we deliver the highest levels of service at the lowest cost, CP can weather any storm.

Remember that regardless of what's going on in the world, goods need to be moved. And when we execute our model, nobody, not even trucks, can move goods more efficiently and more reliably than CP.

APP VOL. 4, PAGE 429

WE ARE FOCUSED ON GROWTH.

We have improved more rapidly, more profoundly, more dramatically, than any other Class 1 railroad in history. But that's old news now.

What excites us is growth. Serving our customers. Competing for business. Excelling at the fundamentals. Getting up early every day and being the best we can be as railroaders.

As we become more and more successful at taking our lower-cost, higher-quality rail offering to market, we will grow. Then, everybody wins. Shareholders and customers, company and employees, families and communities.

APP VOL. 4, PAGE 430

SIMPLE.

BEST SERVICE. LOWEST COST.

If you remember nothing else from the 2014 CP Annual Report, remember these two simple concepts. Because boiled down to its essence, they have always been the CP story. And it is FAR from over.

APP VOL. 4, PAGE 431

DEAR SHAREHOLDERS:

What we achieved in 2014 was powerful. I'm not just talking about our record-breaking results. In a little over two years, we've succeeded in building CP into an industry leader. We've become the railroad I knew we could be the day I took this job.

Our financial results in 2014 were phenomenal. In the fourth quarter, we grew revenues by 10 per cent while posting a sub-60 operating ratio, proving our ability to manage costs while growing the top line. Our full-year numbers were equally impressive – revenue hitting an all-time high of $6.62 billion; reported earnings per share reached $8.46, and adjusted EPS climbed 32 per cent to $8.50. Our full-year operating ratio for 2014 was 64.7 per cent, a 520 basis-point improvement on an adjusted basis.

But the CP story is not about last year's numbers.

CP is now an industry leader instead of an industry underachiever. We have solidified our company as a leading low-cost provider delivering premium quality service. Our story now is all about converting those two important strengths into growth.

NEW PLAN, NEW PRIORITY

Last fall, we announced our plan to reach an aggressive set of goals for 2018, focused on growing revenue, increasing EPS and generating cash. We put out some big numbers – $10 billion in full-year revenue, double our EPS, $6 billion in cumulative cash flow before dividends. The plan includes carefully managing capital to drive growth at low incremental cost and continuing to improve our operating ratio.

We are going to invest in infrastructure to support growth, including strategic siding extensions and Centralized Traffic Control (CTC) technology. Our objective is to increase our network velocity, build capacity and enhance our ability to operate safely as we grow.

We are going to assess new business opportunities on a case-by-case basis. While our premium quality service opens high-value markets for us in merchandise and intermodal segments, our low-cost base gives us new flexibility in other segments to profitably balance price with volume and cash flow.

CONFIDENCE IN THE PLAN

I know our investors are viewing the current low crude prices with great concern. Many are seeing an energy sector downturn as a major challenge standing in the way of us achieving our 2018 goals. We remain confident in our plan.

We are not pinning our success as a railroad on the energy sector. Ours is a solid, highly diverse franchise, with a multitude of exciting growth opportunities. And by investor standards, four years is a long-term strategy. A lot can happen during that time. When crude cycles back, we're in a great position to benefit, but we are not dependent on it.

A SIMPLE FOCUS: LOWEST COST, BEST SERVICE.

There are plenty of opportunities left to lower our costs, and trust me, I'm sure you could still find a customer or two who are not thrilled with our service. We're going to keep getting better at this. We have gotten to where we are today by improving cost and service simultaneously. Anyone who knows me knows that the process of uncovering opportunities to improve in both areas will never end. That's a given, not our story.

This is our story. Four simple words. Lowest cost, best service. As a business, when you focus on that, when you achieve that, consistently and over time, everything else takes care of itself. That's what we're going to do.

MAXIMIZING VALUE AND RETURNS FOR OUR SHAREHOLDERS

As we pursue our growth objectives over the next four years, we will also take every opportunity to deliver value and investment returns to you, our shareholders.

With an improved balance sheet we were able to repurchase approximately 10.5 million shares in 2014, demonstrating our belief in the long-term prospects of the company. We also entered into a joint venture with a leading real estate firm in January of 2015 to assess, develop and implement strategies for realizing maximum long-term shareholder value from surplus land.

NEXT: CONVERTING LEADERSHIP INTO GROWTH

We're shifting our focus from cost control to growth after transforming this company in record time. We will always work to improve efficiency, but we've turned the corner. This is the next phase: Grow the business. I'm sure there will be challenges ahead, but I have no doubt that we're going to continue to achieve and surpass our goals. I thank you for your confidence and continued support.

Sincerely,

E. Hunter Harrison
Chief Executive Officer

This Management's Discussion and Analysis ("MD&A") is provided in conjunction with the Consolidated Financial Statements and related notes for the year ended December 31, 2014 prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). All information has been prepared in accordance with GAAP, except as described in Section 15, Non-GAAP Measures of this MD&A. Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars.

February 23, 2015

In this MD&A, "our", "us", "we", "CP", "Canadian Pacific" and "the Company" refer to Canadian Pacific Railway Limited ("CPRL"), CPRL and its subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL's subsidiaries, as the context may require. Other terms not defined in the body of this MD&A are defined in Section 26, Glossary of Terms.

Unless otherwise indicated, all comparisons of results for 2014 and 2013 are against the results for 2013 and 2012, respectively. Unless otherwise indicated, all comparisons of results for the fourth quarter of 2014 are against the results for the fourth quarter of 2013.

1. BUSINESS PROFILE

Canadian Pacific Railway Limited, through its subsidiaries, operates a transcontinental railway in Canada and the United States ("U.S.") and provides logistics and supply chain expertise. CP provides rail and intermodal transportation services over a network of approximately 13,700 miles, serving the principal business centres of Canada from Montreal, Quebec, to Vancouver, British Columbia ("B.C."), and the U.S. Northeast and Midwest regions. Our railway feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company's market reach east of Montreal in Canada, throughout the U.S. and into Mexico. The Company transports bulk commodities, merchandise freight and intermodal traffic. Bulk commodities include Canadian grain, U.S. grain, coal, potash, and fertilizers and sulphur. Merchandise freight consists of finished vehicles and automotive parts, chemicals and plastics, crude oil, forest products, and metals, minerals, and consumer products. Intermodal traffic consists largely of high-value, time-sensitive retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

2. STRATEGY

Canadian Pacific is driving change as it moves through its transformational journey to become the best railroad in North America, while creating long-term value for shareholders. The Company is focused on providing customers with industry leading rail service; driving sustainable, profitable growth; optimizing our assets; and reducing costs, while remaining a leader in rail safety.

Looking forward, CP is executing its strategic plan to become the lowest cost rail carrier centred on five key foundations, which are the Company's performance drivers.

Provide Service: Providing efficient and consistent transportation solutions for the Company's customers. "Doing what we say we are going to do" is what drives CP by providing a reliable product with a lower cost operating model. Centralized planning aligned with local execution is bringing the Company closer to the customer and accelerating decision-making.

Control Costs: Controlling and removing unnecessary costs from the organization, eliminating bureaucracy and continuing to identify productivity enhancements are the keys to success.

Optimize Assets: Through longer sidings, improved asset utilization, and increased train lengths, the Company is moving increased volumes with fewer locomotives and cars while unlocking capacity for future growth potential.

Operate Safely: Each year, CP safely moves millions of carloads of freight across North America while ensuring the safety of our people and the communities through which we operate. Safety is never to be compromised. Continuous research and development in state-of-the-art safety technology and highly focused employees ensure our trains are built for safe, efficient operations across our network.

Develop People: CP recognizes that none of the other foundations can be achieved without its people. Every CP employee is a railroader and the Company is shaping a new culture focused on a passion for service with integrity in everything it does. Coaching and mentoring managers into becoming leaders will help drive CP forward.

3. FORWARD-LOOKING INFORMATION

This MD&A and Annual Report contains certain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and other relevant securities legislation. These forward-looking statements include, but are not limited to, statements concerning the Company's defined benefit pension expectations for 2015 and through 2018, including our targeted revenues of $10 billion in 2018, our expected cumulative cash flow before dividends of $6 billion and our expected diluted EPS of more than double 2014 diluted EPS, as well as statements concerning the Company's operations, anticipated financial performance, business prospects and strategies, including statements concerning the anticipation that cash flow from operations and various sources of financing will be sufficient to meet debt repayments and obligations in the foreseeable future and concerning anticipated capital programs, statements regarding future payments including income taxes and pension contributions, and capital expenditures. Forward-looking information typically contains statements with words such as "anticipate", "believe", "expect", "plan" or similar words suggesting future outcomes.

Readers are cautioned not to place undue reliance on forward-looking information because it is possible that CP will not achieve predictions, forecasts, projections and other forms of forward-looking information. Current economic conditions render assumptions, although reasonable when made, subject to greater uncertainty. In addition, except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, including but not limited to the following factors: changes in business strategies; general North American and global economic, credit and business conditions; risks in agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demand; inflation; changes in laws and regulations, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; uncertainties of investigations, proceedings or other types of claims and litigation; labour disputes; risks and liabilities arising from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions on the financial position of pension plans and investments; and various events that could disrupt operations, including severe weather, droughts, floods, avalanches and earthquakes as well as security threats and the governmental response to them, and technological changes.

There are more specific factors that could cause actual results to differ materially from those described in the forward-looking statements contained in this MD&A. These more specific factors are identified and discussed in Section 22, Business Risks and elsewhere in this MD&A. Other risks are detailed from time to time in reports filed by CP with securities regulators in Canada and the United States.

Financial Assumptions

Financial expectations for 2015

The Company expects revenue growth to be 7-8%, operating ratio below 62% and adjusted earnings per share ("EPS") growth to be 25% or greater from 2014 annual Diluted EPS, excluding significant items, of $8.50, discussed further in Section 15, Non-GAAP Measures. Key assumptions for full year 2015 financial expectations include:

- no assumption on share buybacks beyond current Normal Course Issuer Bid ("NCIB") program expiring March 16, 2015;
- Canadian dollar to U.S. dollar exchange rate of $1.20;
- an income tax rate of 27.5%;
- defined benefit pension expense of approximately $45 million, compared to 2014 pension income of $52 million;
- capital expenditures of approximately $1.5 billion;
- average On Highway Diesel ("OHD") price of U.S. $2.70;
- average WTI price of U.S. $46; and
- 140,000 crude carloads.

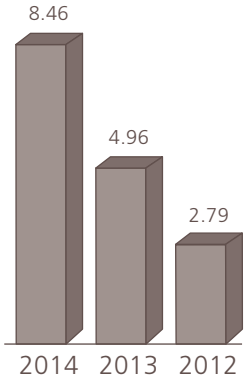
Defined benefit pension expectations for 2015

Defined benefit pension contributions are currently estimated to be between $80 million and $90 million in 2015, and between $50 million and $100 million in each year from 2016 to 2018. This contribution level reflects the Company's intentions with respect to the rate at which CP applies the voluntary prepayments made in previous years to reduce contribution requirements. Defined benefit pension expense for 2015 is expected to be approximately $45 million. These pension contributions and pension expense estimates are based on a number of economic and demographic assumptions and are sensitive to changes in the assumptions or to actual experience differing from the assumptions. Pensions are discussed further in Section 23, Critical Accounting Estimates.

Financial expectations through 2018

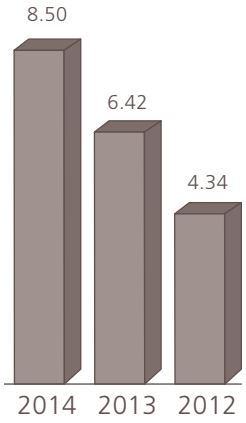
CP is targeting to grow revenues to $10 billion in 2018. Over the 2015 to 2018 time frame, CP also expects to generate cumulative cash flow before dividends, discussed further in Section 15, Non-GAAP Measures, of $6 billion and for Diluted EPS to more than double compared to 2014. Key assumptions to reaching these goals include:

- annual capital spending in the range of $1.4 billion to $1.6 billion;
- average fuel cost of U.S. $3.50 per U.S. gallon;
- Canadian to U.S. dollar exchange rate of 1.10; and
- income tax rate of 27.5%.



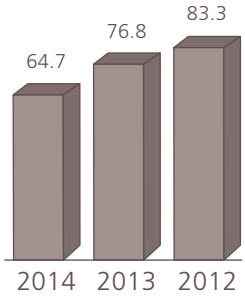
Undue reliance should not be placed on these assumptions and other forward-looking information.

4. ADDITIONAL INFORMATION

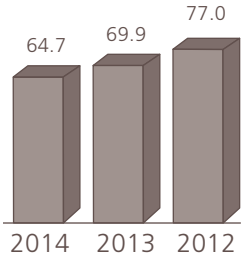


Additional information, including the Company's Consolidated Financial Statements, press releases and other required filing documents, are available on SEDAR at www.sedar.com in Canada, on EDGAR at www.sec.gov in the U.S. and on the Company website at www.cpr.ca. Copies of such documents, as well as the Company's Notice of Intention to Make a NCIB, may be obtained by contacting the Corporate Secretary's Office. The aforementioned documents are issued and made available in accordance with legal requirements and are not incorporated by reference into this MD&A.

5. FINANCIAL HIGHLIGHTS



For the year ended December 31 (in millions, except percentages and per share data)	**2014**	2013	2012
Revenues	**$ 6,620**	$ 6,133	$ 5,695
Operating income	**2,339**	1,420	949
Operating income, excluding significant items[1]	**2,335**	1,844	1,309
Net income	**1,476**	875	484
Basic earnings per share	**8.54**	5.00	2.82
Diluted earnings per share	**8.46**	4.96	2.79
Diluted earnings per share, excluding significant items[1]	**8.50**	6.42	4.34
Dividends declared per share	**1.4000**	1.4000	1.3500
Return on capital employed ("ROCE")[2]	**14.9%**	9.5%	6.9%
Operating ratio	**64.7%**	76.8%	83.3%
Operating ratio, excluding significant items[1]	**64.7%**	69.9%	77.0%
Free cash[1]	**725**	530	93
Total assets at December 31	**16,640**	17,060	14,727
Total long-term financial liabilities at December 31[3]	**5,746**	4,784	4,735



Diluted EPS ($)

Diluted EPS, excluding significant items ($)[1]

Operating ratio (%)

Operating ratio, excluding significant items (%)[1]

[1] These measures have no standardized meaning prescribed by GAAP and, therefore, unlikely to be comparable to similar measures of other companies. These earnings measures and significant items are discussed further in Section 15, Non-GAAP Measures along with a reconciliation of free cash to GAAP cash position.

[2] ROCE is defined as earnings before interest and taxes ("EBIT"), divided by the average for the year of total assets, less current liabilities, as measured under GAAP and it is discussed further in Section 15, Non-GAAP Measures.

[3] Total long-term financial liabilities excludes: deferred taxes of $2,773 million, $2,903 million and $2,092 million, and other non-financial long-term liabilities of $1,100 million, $898 million and $1,573 million for the years 2014, 2013 and 2012 respectively.

6. OPERATING RESULTS

Income

Operating income was $2,339 million in 2014, an increase of $919 million, or 65%, from $1,420 million in 2013. This increase was primarily due to:

- an asset impairment charge in 2013;
- higher volumes of traffic, as measured by revenue ton-miles ("RTMs"), generating higher freight revenue;
- efficiency savings generated from improved operating performance, asset utilization and insourcing of certain Information Technology ("IT") activities;
- lower pension expense;
- the favourable impact of the change in foreign exchange ("FX"); and
- lower casualty expense.

This increase in Operating income was partially offset by higher incentive and stock-based compensation resulting from improved corporate performance and higher wage and benefit inflation.

Operating income was $1,420 million in 2013, an increase of $471 million, or 50%, from $949 million in 2012. This increase was primarily due to:

- efficiency savings generated from improved operating performance, asset utilization and insourcing of certain IT activities;
- increased volumes of traffic, as measured by RTMs, generating higher freight revenue;
- higher freight rates;
- the net impact of a strike in the second quarter of 2012;
- labour restructuring charges in 2012 and associated experience gains in 2013;
- lower management transition costs and a favourable litigation settlement related to management transition in 2013; and
- the favourable impact of the change in FX.

This increase was partially offset by:

- a higher asset impairment charge in 2013 due to the anticipated sale of a portion of Dakota, Minnesota & Eastern ("DM&E") line west of Tracy, Minnesota ("DM&E West") compared to the impairment of various assets in 2012, discussed further in Section 9, Operating Expenses;
- higher volume variable expenses as a result of an increase in workload;
- higher incentive and stock-based compensation expenses;
- wage and benefit inflation; and
- higher depreciation and amortization expenses due to higher depreciable assets as a result of the Company's capital program.

Net income was $1,476 million in 2014, an increase of $601 million, or 69%, from $875 million in 2013. This increase was primarily due to higher Operating income, partially offset by an increase in Income tax expense.

Net income was $875 million in 2013, an increase of $391 million, or 81%, from $484 million in 2012. This increase was primarily due to higher Operating income and a decrease in Other income and charges due to advisory fees related to shareholder matters in 2012 and was partially offset by higher Income tax expenses due to the impact of higher earnings.

Diluted Earnings per Share

Diluted earnings per share was $8.46 in 2014, an increase of $3.50, or 71% from $4.96 in 2013. Excluding the two significant items totaling $0.04 per share, discussed further in Section 15, Non-GAAP Measures, Diluted EPS, excluding significant items, was $8.50 in 2014, an increase of $2.08, or 32%, from $6.42 in 2013. These increases were primarily due to higher Net income and lower average outstanding shares due to the share repurchase program.

Diluted EPS was $4.96 in 2013, an increase of $2.17, or 78% from $2.79 in 2012. Excluding the five significant items totaling $1.46 per share, discussed further in Section 15, Non-GAAP Measures, Diluted EPS, excluding significant items, was $6.42 in 2013, an increase of $2.08, or 48%, from $4.34 in 2012. These increases were primarily due to higher Net income.

Diluted EPS, excluding significant items, has no standardized meaning prescribed by GAAP and, therefore, may not be comparable to similar measures presented by other companies.

Operating Ratio

The operating ratio provides the percentage of revenues used to operate the railway, and is calculated as operating expenses divided by revenues. A lower percentage normally indicates higher efficiency in the operation of the railway. The Company's operating ratio was 64.7% in 2014, a decrease from 76.8% in 2013. This improvement was primarily due to an asset impairment charge in 2013, higher volumes of traffic generating higher freight revenues, and efficiency savings; partially offset by higher incentive and stock-based compensation resulting from improved corporate performance, and higher wage and benefit inflation.

The operating ratio, excluding significant items, discussed further in Section 15, Non-GAAP Measures, was 64.7% in 2014, a decrease from 69.9% in 2013. This improvement was primarily due to higher volumes generating higher freight revenues and efficiency savings, partially offset by higher incentive and stock-based compensation resulting from improved corporate performance, and higher wage and benefit inflation.

The operating ratio was 76.8% in 2013, a decrease from 83.3% in 2012. This improvement was primarily due to efficiency savings, increased volumes of traffic and higher freight rates, partially offset by a higher asset impairment charge.

The operating ratio, excluding significant items, discussed further in Section 15, Non-GAAP Measures, was 69.9% in 2013, a decrease from 77.0% in 2012. This improvement was primarily due to an increase in efficiency savings, increased volumes of traffic and higher freight rates.

Operating ratio, excluding significant items, has no standardized meaning prescribed by GAAP and, therefore, is unlikely to be comparable to similar measures presented by other companies.

Return on Capital Employed

The calculation of ROCE utilizes Earnings Before Interest and Taxes ("EBIT") on a rolling twelve month basis. ROCE was 14.9% at December 31, 2014, compared with 9.5% in 2013. This improvement was primarily due to higher earnings. Excluding the significant items in 2014 and 2013 from EBIT, Adjusted ROCE was 14.9% at December 31, 2014, compared with 12.4% in 2013. This improvement was primarily due to higher earnings.

ROCE was 9.5% at December 31, 2013, compared with 6.9% in 2012. This improvement was primarily due to higher earnings partially offset by a higher asset impairment charge. Excluding the significant items in 2013 and 2012 from EBIT, Adjusted ROCE was 12.4% at December 31, 2013, compared with 9.8% in 2012. This improvement was primarily due to higher earnings.

ROCE, Adjusted ROCE, EBIT and Adjusted EBIT and significant items are discussed further in Section 15, Non-GAAP Measures.

Impact of Foreign Exchange on Earnings

Fluctuations in foreign exchange affect the Company's results because U.S. dollar-denominated revenues and expenses are translated into Canadian dollars. U.S. dollar-denominated revenues and expenses increase (decrease) when the Canadian dollar weakens (strengthens) in relation to the U.S. dollar.

Canadian to U.S. dollar Average exchange rates	**2014**	2013	2012
For the year ended – December 31	**$ 1.10**	$ 1.03	$ 1.00
For the three months ended – December 31	**$ 1.13**	$ 1.04	$ 0.99

Canadian to U.S. dollar Exchange rates	**2014**	2013	2012
Beginning of year – January 1	**$ 1.06**	$ 0.99	$ 1.02
Beginning of quarter – April 1	**$ 1.11**	$ 1.02	$ 1.00
Beginning of quarter – July 1	**$ 1.07**	$ 1.05	$ 1.02
Beginning of quarter – October 1	**$ 1.12**	$ 1.03	$ 0.98
End of quarter – December 31	**$ 1.16**	$ 1.06	$ 0.99

Average Fuel Price

(U.S. dollars per U.S. gallon)	**2014**	2013	2012
For the year ended – December 31	**$ 3.41**	$ 3.47	$ 3.45
For the three months ended – December 31	**$ 3.11**	$ 3.51	$ 3.47

7. PERFORMANCE INDICATORS

For the year ended December 31[1]	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Operations Performance					
Freight gross ton-miles ("GTMs") (millions)	**273,276**	267,629	254,354	2	5
Revenue ton-miles ("RTMs") (millions)	**149,849**	144,249	135,032	4	7
Train miles (thousands)	**36,625**	37,817	40,270	(3)	(6)
Average train weight – excluding local traffic (tons)	**8,046**	7,573	6,709	6	13
Average train length – excluding local traffic (feet)	**6,683**	6,530	5,981	2	9
Average terminal dwell (hours)	**8.7**	7.1	7.5	23	(5)
Average train speed (mph)[2]	**18.1**	18.4	N/A	(2)	N/A
Fuel efficiency (U.S. gallons of locomotive fuel consumed /1,000 GTMs)	**1.03**	1.06	1.15	(3)	(8)
Total employees (average)[3]	**14,575**	15,011	16,999	(3)	(12)
Workforce (end of period)	**14,698**	14,977	16,907	(2)	(11)
Safety Indicators					
FRA personal injuries per 200,000 employee-hours	**1.67**	1.71	1.56	(2)	10
FRA train accidents per million train-miles	**1.26**	1.80	1.69	(30)	7

[1] Certain prior period figures have been revised to conform with current presentation or have been updated to reflect new information.

[2] 2012 average train speed information not available for new reporting definition.

[3] 2012 average number of employees has been adjusted for a strike.

The indicators listed in this table are key measures of the Company's operating performance. Definitions of these performance indicators are provided in Section 26, Glossary of Terms.

Operations Performance

GTMs for 2014 were 273,276 million, a 2% increase compared with 267,629 million in 2013. This improvement was primarily due to higher shipments in Canadian grain, Crude, Domestic intermodal, and Metals, minerals and consumer products.

RTMs for 2014 were 149,849 million, an increase of 4% compared with 144,249 million in 2013. RTMs are discussed further in Section 8, Lines of Business.

Train miles for 2014 decreased by 3% compared with 2013, reflecting improvements in operating efficiency from longer, heavier trains.

Average train weight increased in 2014 by 473 tons, or 6%, from 2013. Average train length increased in 2014 by 153 feet, or 2%, from 2013. Average train weight and length benefited significantly from improvements in operating plan efficiency and increased volumes of bulk traffic conveyed in longer, heavier trains. Both of these improvements leverage the siding extensions completed in 2013 and 2014.

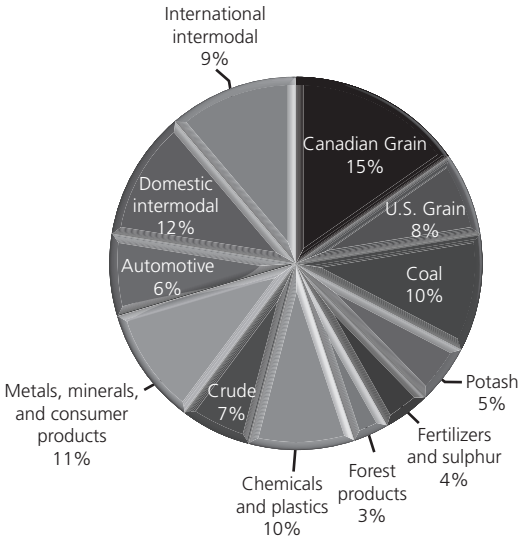
Average terminal dwell, the average time a freight car resides in a terminal, increased by 23% in 2014 to 8.7 hours from 7.1 hours in 2013. The unfavourable increase was primarily due to operational challenges in the U.S. Midwest.

Average train speed was 18.1 miles per hour in 2014, a decrease of 2%, from 18.4 miles per hour in 2013. The unfavourable decrease was primarily due to operational challenges in the U.S. Midwest. This decrease was partially offset by speed improvements in the fourth quarter of 2014 through improved asset velocity, decreased terminal dwell, and successful execution of the Company's operating plan.

Fuel efficiency improved by 3% in 2014 compared to 2013. This improvement is primarily due to the continued execution of the Company's fuel conservation strategy and increased locomotive productivity from higher average train weights.

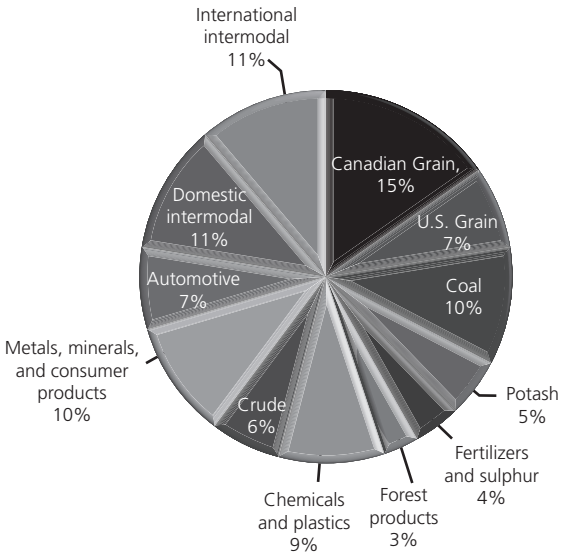
The average number of total employees for 2014 decreased by 436, or 3%, compared with 2013. This improvement was primarily due to job reductions as a result of continuing strong operational performance and natural attrition, partially offset by additional IT employees as part of the Company's insourcing strategy.

The workforce on December 31, 2014 decreased by 279, or 2%, compared with December 31, 2013. This improvement was primarily due to job reductions as a result of continuing strong operational performance, natural attrition and fewer contractors.



Safety Indicators

Safety is a key priority and core strategy for CP's management, employees and Board of Directors. The Company's two main safety indicators – personal injuries and train accidents – follow strict U.S. Federal Railroad Administration ("FRA") reporting guidelines.



The FRA personal injury rate per 200,000 employee-hours for CP was 1.67 in 2014, 1.71 in 2013 and 1.56 in 2012.

The FRA train accident rate for CP in 2014 was 1.26 accidents per million train-miles, compared with 1.80 in 2013 and 1.69 in 2012.

8. LINES OF BUSINESS

2014 Freight Revenues

2013 Freight Revenues

Total Revenue, Volumes and Freight Rates

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 6,464**	$ 5,982	$ 5,550	8	8
Other revenues (in millions)	**156**	151	145	3	4
Total revenues (in millions)	**$ 6,620**	$ 6,133	$ 5,695	8	8
Carloads (in thousands)	**2,684**	2,688	2,669	–	1
Revenue ton-miles (in millions)	**149,849**	144,249	135,032	4	7
Freight revenue per carload (dollars)	**$ 2,408**	$ 2,226	$ 2,079	8	7
Freight revenue per revenue ton-mile (cents)	**4.31**	4.15	4.11	4	1

The Company's revenues are primarily derived from transporting freight. Other revenue is generated from leasing of certain assets, switching fees, contracts with passenger service operators, and logistical management services. Changes in freight volumes generally contribute to corresponding changes in freight revenues and certain variable expenses, such as fuel, equipment rents and crew costs.

For each of the twelve months ended December 31, 2014, 2013 and 2012, no customer comprised more than 10% of total revenues and accounts receivable.

2014 TO 2013 COMPARATIVES

Freight Revenues

Freight revenues are earned from transporting bulk commodities, merchandise and intermodal goods, and include fuel recoveries billed to the Company's customers. Freight revenues were $6,464 million in 2014, an increase of $482 million, or 8% from $5,982 million in 2013. This increase was primarily due to:

- higher volumes in Canadian grain, Domestic intermodal, Crude, and Metals, minerals and consumer products;
- higher freight rates; and
- the favourable impact of the change in FX.

This increase was partially offset by:

- lower shipments in International intermodal and Automotive, primarily due to the exit of certain customer contracts;
- lower Fertilizers and sulphur shipments primarily due to sulphur production shutdowns; and
- lower shipments in certain lines of business in the first half of the year due to the impact of harsh winter operating conditions.

In 2014, RTMs, measuring the relative weight and distance of rail freight moved by the Company, increased by approximately 5,600 million, or 4% compared to the same period of 2013. This increase was primarily due to higher:

- Canadian originating shipments of grain;
- volumes in energy related commodities and frac sand; and
- Domestic intermodal shipments.

This increase was partially offset by lower:

- International intermodal shipments;
- Fertilizers and sulphur shipments; and
- U.S. originating thermal coal shipments.

Fuel Cost Recovery Program

CP employs a fuel cost recovery program designed to automatically respond to fluctuations in fuel prices and help reduce volatility to changing fuel prices. Fuel surcharge revenue is earned on individual shipments primarily based on OHD; as such, fuel surcharge revenue is a function of freight volumes. Short-term volatility in fuel prices may adversely or positively impact expenses and revenues.

Canadian Grain

For the year ended December 31	**2014**	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 988**	$ 869	$ 767	14	13
Carloads (in thousands)	**291**	256	248	14	3
Revenue ton-miles (in millions)	**26,691**	22,864	22,149	17	3
Freight revenue per carload (dollars)	**$ 3,391**	$ 3,397	$ 3,089	–	10
Freight revenue per revenue ton-mile (cents)	**3.70**	3.80	3.46	(3)	10

CP's Canadian grain business consists of whole grains, oilseeds and grain products originating in the Canadian prairies, moving to export outlets on the west and east coasts, as well as processors in Canada, U.S. and Mexico for domestic use. Canadian grain revenue was $988 million in 2014, an increase of $119 million, or 14% from $869 million in 2013. This increase was primarily due to higher shipments as a result of strong export demand and record Canadian crop production, partially offset by reduced freight rates.

U.S. Grain

For the year ended December 31	**2014**	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 503**	$ 431	$ 405	17	6
Carloads (in thousands)	**173**	182	185	(5)	(2)
Revenue ton-miles (in millions)	**11,724**	11,119	10,933	5	2
Freight revenue per carload (dollars)	**$ 2,909**	$ 2,359	$ 2,188	23	8
Freight revenue per revenue ton-mile (cents)	**4.29**	3.87	3.70	11	5

CP's U.S. grain traffic originates in key Midwest grain producing states and moves over multiple gateways within the U.S. for domestic use and to export outlets in the Pacific Northwest, Northeast U.S. and Gulf of Mexico. U.S. Grain revenue was $503 million in 2014, an increase of $72 million, or 17% from $431 million in 2013. This increase was primarily due to:

- higher freight rates;
- increased volume to the Pacific Northwest, which has a longer length of haul, in the second half of the year; and
- the favourable impact of the change in FX.

This increase was partially offset by the impact of harsh winter operating conditions in the first quarter of 2014.

Coal

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 621**	$ 627	$ 602	(1)	4
Carloads (in thousands)	**313**	330	337	(5)	(2)
Revenue ton-miles (in millions)	**22,443**	23,172	22,375	(3)	4
Freight revenue per carload (dollars)	**$ 1,985**	$ 1,904	$ 1,787	4	7
Freight revenue per revenue ton-mile (cents)	**2.77**	2.71	2.69	2	1

CP serves both the metallurgical and thermal coal markets. The Company's Canadian coal business consists primarily of metallurgical coal transported from Southeastern B.C. to the ports of Vancouver, B.C. and Thunder Bay, Ontario. CP's U.S. coal business consists primarily of the transportation of thermal coal and petroleum coke within the U.S. Midwest or for export through west coast ports. Coal revenue was $621 million in 2014, a decrease of $6 million, or 1% from $627 million in 2013. This decrease was primarily due to lower shipments of U.S. originating thermal coal, partially offset by higher Canadian originating shipments of metallurgical coal, and increased freight rates.

Potash

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 347**	$ 312	$ 281	11	11
Carloads (in thousands)	**118**	114	103	4	11
Revenue ton-miles (in millions)	**14,099**	13,231	12,221	7	8
Freight revenue per carload (dollars)	**$ 2,941**	$ 2,745	$ 2,711	7	1
Freight revenue per revenue ton-mile (cents)	**2.46**	2.36	2.29	4	3

The potash transported by CP originates in Saskatchewan and is shipped to the ports of Vancouver, B.C. and Portland, Oregon, as well as to other Canadian and U.S. destinations. Potash revenue was $347 million in 2014, an increase of $35 million, or 11% from $312 million in 2013. This increase was primarily due to:

- the favourable impact of the change in FX;
- higher shipments, driven by export volumes in the second half of 2014 and higher domestic shipments in the first half of 2014; and
- higher freight rates.

This increase was partially offset by the impact of harsh winter operating conditions in the first quarter of 2014.

Fertilizers and Sulphur

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 234**	$ 258	$ 239	(9)	8
Carloads (in thousands)	**61**	71	74	(14)	(4)
Revenue ton-miles (in millions)	**4,180**	4,939	4,837	(15)	2
Freight revenue per carload (dollars)	**$ 3,801**	$ 3,615	$ 3,213	5	13
Freight revenue per revenue ton-mile (cents)	**5.59**	5.22	4.96	7	5

Fertilizers and sulphur include chemical fertilizers shipped mainly from western Canada to various North American locations, and sulphur originating primarily in Alberta and moving to the Port Metro Vancouver, B.C. and a variety of U.S. and Canadian destinations. Fertilizers and sulphur revenue was $234 million in 2014, a decrease of $24 million, or 9% from $258 million in 2013. This decrease was primarily due to lower shipments resulting from weak demand and high inventory levels at destination, and a delayed return to full production of sulphur customer facilities. This decrease was partially offset by the favourable impacts of the change in FX and higher freight rates.

Forest Products

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 206**	$ 206	$ 193	–	7
Carloads (in thousands)	**59**	66	67	(11)	(1)
Revenue ton-miles (in millions)	**3,956**	4,619	4,713	(14)	(2)
Freight revenue per carload (dollars)	**$ 3,493**	$ 3,132	$ 2,895	12	8
Freight revenue per revenue ton-mile (cents)	**5.20**	4.46	4.11	17	9

Forest products include wood pulp, paper products, lumber, and panel transported from key producing areas in western Canada, Ontario and Quebec to various destinations in North America. Forest products revenue was $206 million in 2014, unchanged from 2013. Increases within Forest products were due to:

- strong lumber demand with existing customers;
- the favourable impact of the change in FX; and
- higher freight rates.

These increases were offset by the exit of certain lumber customer contracts in Western Canada and lower pulp and paper shipments due to customer production issues.

Chemicals and Plastics

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 637**	$ 565	$ 512	13	10
Carloads (in thousands)	**198**	197	193	1	2
Revenue ton-miles (in millions)	**13,635**	13,573	13,233	–	3
Freight revenue per carload (dollars)	**$ 3,214**	$ 2,857	$ 2,649	12	8
Freight revenue per revenue ton-mile (cents)	**4.67**	4.15	3.87	13	7

The Company's chemicals and plastics business includes a wide range of commodities including petroleum products, chemicals, plastics, and liquid petroleum gas ("LPG") products that ship across the Company's network. Chemicals and plastics revenue was $637 million in 2014, an increase of $72 million, or 13% from $565 million in 2013. This increase was primarily due to:

- the favourable impact of the change in FX;
- higher freight rates; and
- an increase in volume from strong demand for liquefied petroleum gas, fuel oils, asphalt and plastics in the second half of 2014.

This increase was partially offset by lower shipments of biofuels in the first half of the year that resulted from supply chain issues.

Crude

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 484**	$ 375	$ 206	29	82
Carloads (in thousands)	**110**	90	54	22	67
Revenue ton-miles (in millions)	**16,312**	13,898	7,303	17	90
Freight revenue per carload (dollars)	**$ 4,419**	$ 4,144	$ 3,828	7	8
Freight revenue per revenue ton-mile (cents)	**2.97**	2.70	2.80	10	(4)

The Company's crude origination franchise is located throughout Alberta, Saskatchewan and North Dakota and moves crude over connections with interline railroad partners to refining markets across North America. Crude revenue was $484 million in 2014, an increase of $109 million, or 29% from $375 million in 2013. This increase was primarily due to:

- increased shipments from Western Canada and the Bakken region;
- the favourable impact of the change in FX; and
- higher freight rates.

Metals, Minerals and Consumer Products

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 712**	$ 608	$ 550	17	11
Carloads (in thousands)	**253**	232	222	9	5
Revenue ton-miles (in millions)	**11,266**	10,404	9,933	8	5
Freight revenue per carload (dollars)	**$ 2,814**	$ 2,655	$ 2,482	6	7
Freight revenue per revenue ton-mile (cents)	**6.32**	5.90	5.55	7	6

CP's metals, minerals and consumer products business is a diverse mix of input materials, such as aggregates, steel, consumer products and non-ferrous metals which are shipped throughout North America. Metals, minerals and consumer products revenue was $712 million in 2014, an increase of $104 million, or 17% from $608 million in 2013. This increase was primarily due to:

- higher volumes, primarily as a result of strong frac sand demand;
- the favourable impact of the change in FX; and
- higher freight rates.

Automotive

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 357**	$ 403	$ 425	(11)	(5)
Carloads (in thousands)	**134**	146	162	(8)	(10)
Revenue ton-miles (in millions)	**1,953**	2,329	2,482	(16)	(6)
Freight revenue per carload (dollars)	**$ 2,670**	$ 2,758	$ 2,629	(3)	5
Freight revenue per revenue ton-mile (cents)	**18.26**	17.27	17.13	6	1

CP's automotive portfolio consists of four finished vehicle traffic segments: import vehicles that move through Port Metro Vancouver to Eastern Canadian markets; Canadian-produced vehicles that ship to the U.S. from Ontario production facilities; U.S.-produced vehicles that ship within the U.S. as well as cross-border into Canadian markets; and, Mexican-produced vehicles that ship to the U.S. and Canada. In addition to finished vehicles, CP ships automotive parts, machinery and pre-owned vehicles. Automotive revenue was $357 million in 2014, a decrease of $46 million, or 11% from $403 million in 2013. This decrease was primarily due to:

- a volume decline resulting from operational challenges in the U.S. Midwest following harsh winter operating conditions;
- the exit of a customer contract; and
- a reduction in long haul import traffic.

This decrease was partially offset by the favourable impact of the change in FX.

Domestic Intermodal

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 787**	$ 684	$ 653	15	5
Carloads (in thousands)	**428**	370	347	16	7
Revenue ton-miles (in millions)	**11,867**	10,276	9,718	15	6
Freight revenue per carload (dollars)	**$ 1,837**	$ 1,850	$ 1,885	(1)	(2)
Freight revenue per revenue ton-mile (cents)	**6.63**	6.65	6.73	–	(1)

Domestic intermodal business primarily involves the distribution of container shipments from a broad spectrum of industries within North America. Domestic intermodal revenue was $787 million in 2014, an increase of $103 million, or 15% from $684 million in 2013. This increase was primarily due to higher volumes including short-haul expressway service between Toronto and Montreal.

International Intermodal

For the year ended December 31	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Freight revenues (in millions)	**$ 588**	$ 644	$ 717	(9)	(10)
Carloads (in thousands)	**546**	634	677	(14)	(6)
Revenue ton-miles (in millions)	**11,723**	13,825	15,135	(15)	(9)
Freight revenue per carload (dollars)	**$ 1,077**	$ 1,016	$ 1,058	6	(4)
Freight revenue per revenue ton-mile (cents)	**5.02**	4.66	4.73	8	(1)

International intermodal traffic involves the movement of ocean-carrier owned marine containers through North American ports to inland markets, as well as export shipments of goods through those ports to Asia, Europe and beyond. International intermodal revenue was $588 million in 2014, a decrease of $56 million, or 9% from $644 million in 2013. This decrease was due to lower volumes as a result of the exit of certain customer contracts. This decrease was partially offset by:

- higher transcontinental container volumes from existing customers;
- higher freight rates; and
- the favourable impact of the change in FX.

Other Revenue

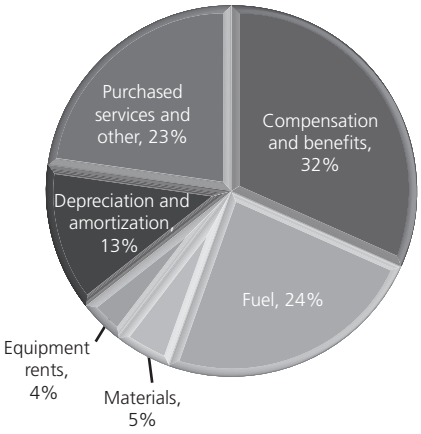
Other revenue was $156 million in 2014, an increase of $5 million, or 3% from $151 million in 2013. This increase was primarily due to higher leasing revenues.

2013 TO 2012 COMPARATIVES

Revenue variances below compare 2013 to 2012 figures.

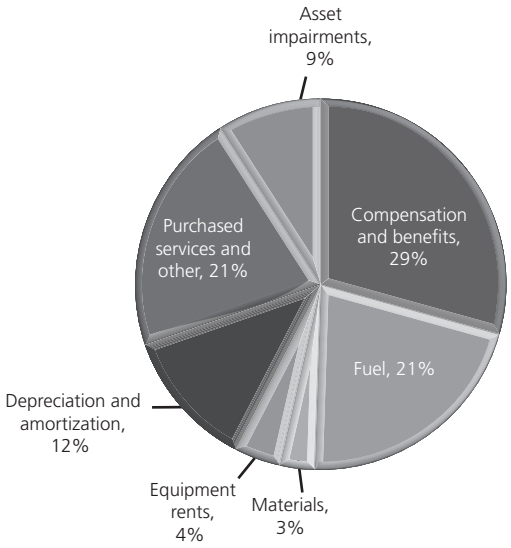
Freight Revenues

Freight revenues were $5,982 million in 2013, an increase of $432 million, or 8% from $5,550 million in 2012. This increase was primarily due to:



- higher shipments, as measured by RTMs, of Industrial and consumer products, Grain, Fertilizers and sulphur and Coal;
- increased freight rates;
- the favourable impact of the change in FX;
- the impact of a strike in 2012 on Canadian shipments; and
- higher fuel surcharge revenues due to an increase in traffic volumes with full margin coverage.

This increase was partially offset by lower shipments in Intermodal and Automotive and the impact of the network outages in the second quarter of 2013.



Other Revenue

Other revenue was $151 million in 2013, an increase of $6 million, or 4% from $145 million in 2012. This increase was primarily due to higher leasing and interline switching revenues.

9. OPERATING EXPENSES

2014 Operating expenses

2013 Operating expenses

For the year ended December 31 (in millions)	2014	2013	2012	% Change 2014 vs. 2013	% Change 2013 vs. 2012
Operating expenses					
Compensation and benefits[1][2]	**$ 1,352**	$ 1,385	$ 1,474	(2)	(6)
Fuel	**1,048**	1,004	999	4	1
Materials[2]	**193**	160	166	21	(4)
Equipment rents	**155**	173	206	(10)	(16)
Depreciation and amortization	**552**	565	539	(2)	5
Purchased services and other[1][2]	**985**	998	1,044	(1)	(4)
Asset impairments	**–**	435	265	(100)	64
Labour restructuring	**(4)**	(7)	53	43	–
Total operating expenses	**$ 4,281**	$ 4,713	$ 4,746	(9)	(1)

[1] As a result of management transition, $20 million and $22 million were charged in Compensation and benefits and Purchased services and other, respectively in 2012. The U.S. $9 million recovery due to the favourable settlement of litigation recorded in first quarter of 2013 and $5 million management transition costs recorded in fourth quarter of 2013 were charged to Purchased services and other and Compensation and benefits, respectively.

[2] Billings to third parties for the recovery of costs incurred for freight car repairs and servicing have been reclassified from Purchased services and other to Compensation and benefits and Materials within Operating expenses.

Operating expenses were $4,281 million in 2014, a decrease of $432 million, or 9%, from $4,713 million in 2013. This decrease was primarily due to:

- an asset impairment charge in 2013;
- efficiencies generated from improved operating performance, asset utilization, and insourcing of certain IT activities;
- lower pension expense; and
- lower casualty expense.

This decrease was partially offset by:

- the unfavourable impact of the change in FX;
- higher stock-based and incentive compensation;
- wage and benefit inflation;
- higher material costs for freight car and locomotive repairs, and increased track maintenance activities; and
- higher volume variable expenses as a result of an increase in workload, as measured by GTMs.

2014 TO 2013 COMPARATIVES

Compensation and Benefits

Compensation and benefits expense includes employee wages, salaries, fringe benefits and stock-based compensation. Compensation and benefits expense was $1,352 million in 2014, a decrease of $33 million, or 2%, from $1,385 million in 2013. This decrease was primarily due to:

- lower pension expense;
- lower costs achieved through a smaller workforce; and
- road and yard efficiencies as a result of continuing strong operational performance.

This decrease was partially offset by:

- higher incentive compensation;
- stock-based compensation primarily driven by the higher change in stock price;
- wage and benefit inflation;
- the unfavourable impact of the change in FX; and
- an increase in IT personnel as part of the Company's insourcing strategy, offset by efficiency savings recorded in Purchased services and other.

Fuel

Fuel expense consists mainly of fuel used by locomotives and includes provincial, state and federal fuel taxes. Fuel expense was $1,048 million in 2014, an increase of $44 million, or 4%, from $1,004 million in 2013. This increase was primarily due to the unfavourable change in FX and an increase in workload, as measured by GTMs.

This increase was partially offset by improvements in fuel efficiency as a result of increased train weights and focus on the fuel conservation strategies of the Company's operating plan, and reduced fuel prices.

Materials

Materials expense includes the cost of material used for track, locomotive, freight car, building maintenance and software sustainment. Materials expense was $193 million in 2014, an increase of $33 million or 21%, from $160 million in 2013. This increase was primarily due to increased freight car and locomotive repairs, and increased track maintenance activities.

Equipment Rents

Equipment rents expense includes the cost associated with using other companies' freight cars, intermodal equipment, and locomotives, net of rental income received from other railways for the use of CP's equipment. Equipment rents expense was $155 million in 2014, a decrease of $18 million or 10% from $173 million in 2013. This decrease is a result of operating efficiencies, resulting in the Company requiring fewer assets, thereby permitting the return or sublease of certain leased freight cars and locomotives. This decrease was offset by the unfavourable change in FX.

Depreciation and Amortization

Depreciation and amortization expense represents the charge associated with the use of track and roadway, buildings, rolling stock, information systems and other depreciable assets. Depreciation and amortization expense was $552 million for 2014, a decrease of $13 million, or 2%, from $565 million in the same period of 2013. This decrease was primarily due to:

- the favourable impact of depreciation studies implemented in 2014;
- a decrease in accelerated depreciation of IT assets; and
- lower depreciable assets resulting from the sale of DM&E West.

This decrease was partially offset by higher depreciable assets as a result of the Company's capital program as well as the change in FX.

Purchased Services and Other

For the year ended December 31 (in millions)	2014	2013	2012	% Change 2014 vs 2013	% Change 2013 vs 2012
Purchased services and other					
Support and facilities	**$ 383**	$ 392	$ 420	(2)	(7)
Track and operations[1]	**210**	219	196	(4)	12
Intermodal	**167**	159	153	5	4
Equipment[1]	**178**	180	190	(1)	(5)
Casualty	**35**	63	80	(44)	(21)
Other[1]	**44**	23	28	91	(18)
Land sales	**(32)**	(38)	(23)	(16)	65
Total Purchased services and other	**$ 985**	$ 998	$ 1,044	(1)	(4)

[1] Billings to third parties for the recovery of costs incurred for freight car repairs and servicing have been reclassified from Purchased services and other to Compensation and benefits and Materials within Operating expenses.

Purchased services and other expense encompasses a wide range of costs, including expenses for joint facilities, personal injuries and damage, environmental remediation, property and other taxes, contractor and consulting fees, insurance, and gains on land sales. Purchased services and other expense was $985 million in 2014, a decrease of $13 million, or 1% from $998 million in 2013. This decrease was primarily due to:

- efficiencies generated mainly from insourcing of certain IT activities, included in Support and facilities;
- lower casualty expense; and
- lower locomotive overhauls as certain older locomotives undergo a life extension program, included in Equipment.

This decrease was partially offset by:

- the unfavourable impact of the change in FX;
- higher engineering maintenance work and dismantling costs, included in Track and operations;
- an insurance recovery in 2013, related to flooding in 2011, reported in Other;
- higher corporate sponsorships and donations, reported in Other;
- higher intermodal expenses related to pick up and delivery service, reported in Intermodal;
- a favourable settlement of litigation in 2013 related to management transition, included in Other; and
- higher legal fees, reported in Support and facilities.

Asset Impairments

On January 2, 2014, the Company executed an agreement with Genesee & Wyoming Inc ("G&W") for the sale of the DM&E West resulting in a 2013 charge of $435 million ($257 million after tax) for an asset impairment and accruals for costs associated with the sale. Upon closing on May 30, 2014, the sale generated U.S. $218 million in gross proceeds (CDN $236 million).

Labour Restructuring

In the fourth quarter of 2012, CP recorded a charge of $53 million ($39 million after tax) for a labour restructuring initiative. The majority of the resulting position reductions were completed in 2013 and 2014 with the remaining positions to be eliminated in 2015. As a result of favourable experience, the Company recorded a recovery of $4 million ($3 million after tax) in the first quarter of 2014 and $7 million ($5 million after tax) in the fourth quarter of 2013 for the labour restructuring initiative recorded in 2012.

2013 TO 2012 COMPARATIVES

Operating expense variances below compare 2013 to 2012 figures.

Operating Expenses

Operating expenses were $4,713 million in 2013, a decrease of $33 million, or 1%, from $4,746 million in 2012. This decrease was primarily due to:

- efficiencies generated from improved operating performance, asset utilization, and insourcing of certain IT activities;
- higher labour restructuring charges in 2012 and associated experience gains in 2013;
- lower management transition costs, reflected in Compensation and benefits and Purchased services and other; and
- higher land sales in 2013.

This decrease was partially offset by:

- a higher asset impairment charge in 2013;
- higher volume variable expenses as a result of an increase in workload;
- the unfavourable impact of the change in FX;
- higher incentive compensation resulting from improved corporate performance and higher stock-based compensation;
- wage and benefit inflation; and
- higher depreciation and amortization expenses.

10. OTHER INCOME STATEMENT ITEMS

Other Income and Charges

Other income and charges consists of gains and losses from the change in foreign exchange on long-term debt ("FX on LTD") discussed further in Section 15, Non-GAAP Measures, and working capital, various costs related to financing, shareholder costs, equity income and other non-operating expenditures. Other income and charges was an expense of $19 million in 2014, compared with an expense of $17 million in 2013, an increase of $2 million, or 12%. This increase was primarily due to FX losses on U.S. denominated debt, partially offset by higher equity earnings.

Net Interest Expense

Net interest expense includes interest on long-term debt and capital leases. Net interest expense was $282 million in 2014, an increase of $4 million, or 1%, from $278 million in 2013. This increase was primarily due to the unfavourable impact of the change in FX rates on U.S. dollar denominated interest expense partially offset by higher interest income and the impact of principal repayments of debt securities.

Income Taxes

Income tax expense was $562 million in 2014, an increase of $312 million, or 125%, from $250 million in 2013. This increase was due to higher taxable earnings and a higher effective income tax rate in 2014.

The effective income tax rate for 2014 was 27.6%, compared with 22.2% for 2013.

The Company expects a normalized 2015 income tax rate of approximately 27.5%. The Company's 2015 outlook for its normalized income tax rate is based on certain assumptions about events and developments that may or may not materialize or that may be offset entirely or partially by other events and developments, discussed further in Section 22, Business Risks and Section 23, Critical Accounting Estimates. The Company expects to have an increase in cash tax payments in future years.

11. QUARTERLY FINANCIAL DATA

For the quarter ended (in millions, except per share data)	2014				2013			
	Dec. 31[1]	**Sep. 30**	**Jun. 30**	**Mar. 31[2]**	Dec. 31[3]	Sep. 30[4]	Jun. 30	Mar. 31[5]
Total revenue	**$1,760**	**$1,670**	**$1,681**	**$1,509**	$1,607	$1,534	$1,497	$1,495
Operating income	**708**	**621**	**587**	**423**	114	524	420	362
Net income	**451**	**400**	**371**	**254**	82	324	252	217
Basic earnings per share	**$ 2.66**	**$ 2.33**	**$ 2.13**	**$ 1.45**	$ 0.47	$ 1.85	$ 1.44	$ 1.25
Diluted earnings per share	**2.63**	**2.31**	**2.11**	**1.44**	0.47	1.84	1.43	1.24

[1] Significant item included in the fourth quarter of 2014 was a $12 million charge ($9 million after tax) due to foreign exchange translation on CP's U.S. dollar denominated long-term debt issued to facilitate the share repurchase program.

(2) Significant item included in the first quarter of 2014 was a recovery of $4 million ($3 million after tax) of the Company's 2012 labour restructuring initiative due to favourable experience gains, recorded in Compensation and benefits.

(3) Significant items included in the fourth quarter of 2013 were an asset impairment charge and accruals for future costs related to the sale of DM&E West totaling $435 million ($257 million after tax), a recovery of $7 million ($5 million after tax) of the Company's 2012 labour restructuring initiative and $5 million ($4 million after tax) of management transition costs.

(4) Significant item included in the third quarter of 2013 was an Income tax expense of $7 million as a result of the change in the province of British Columbia's corporate income tax rate, which required the re-calculation of the Company's Deferred income tax liability as at January 1, 2013.

(5) Significant item included in the first quarter of 2013 was a recovery of U.S. $9 million (U.S. $6 million after tax) from a litigation settlement related to management transition.

Quarterly Trends

Volumes and revenues from certain goods are stronger during different periods of the year. First-quarter revenues are typically lower mainly due to winter weather conditions, closure of the Great Lakes ports and reduced transportation of retail goods. Second and third-quarter revenues generally improve over the first quarter as fertilizer volumes are typically highest during the second quarter and demand for construction-related goods are generally highest in the third quarter. Revenues are typically strongest in the fourth quarter, primarily as a result of the transportation of grain after the harvest, fall fertilizer programs and increased demand for retail goods moved by rail. Operating income is also affected by seasonal fluctuations. Operating income is typically lowest in the first quarter due to lower freight revenue and higher operating costs associated with winter conditions. Net income is also influenced by seasonal fluctuations in customer demand and weather-related issues.

12. FOURTH-QUARTER SUMMARY

For the three months ended December 31 (in millions)	**2014**	2013	% Change
Total freight revenues	**$ 1,719**	$ 1,570	9
Other revenues	**41**	37	11
Total revenues	**1,760**	1,607	10
Total operating expenses	**1,052**	1,493	(30)
Operating income	**708**	114	521
Operating income, excluding significant items(1)	**708**	547	29
Net income	**451**	82	450
Basic earnings per share	**2.66**	0.47	466
Diluted earnings per share	**2.63**	0.47	460
Diluted earnings per share, excluding significant items(1)	**2.68**	1.91	40
Operating Ratio	**59.8%**	92.9%	(3,310) bps
Operating Ratio, excluding significant items(1)	**59.8%**	65.9%	(610) bps

(1) These measures have no standardized meaning prescribed by GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These significant items are discussed further in Section 15, Non-GAAP Measures.

Operating Results

Operating income was $708 million in the fourth quarter of 2014, an increase of $594 million, or 521%, from $114 million in the same period of 2013. This increase was primarily due to:

- an asset impairment charge in 2013;
- higher volumes of traffic, as measured by RTMs, generating higher freight revenue;
- efficiency savings generated from improved operating performance, asset utilization and insourcing of certain IT activities;
- lower fuel price; and
- the favourable impact of the change in FX.

This increase was partially offset by a reduction in Workers' Compensation Board ("WCB") liabilities mainly due to a higher discount rate and favourable claims experience in 2013, and higher wage and benefit inflation in 2014.

Net income was $451 million in the fourth quarter of 2014, an increase of $369 million, or 450%, from $82 million in the same period of 2013. The increase was primarily due to higher Operating income, partially offset by an increase in Income tax expense and Other income and charges.

Diluted Earnings per Share

Diluted EPS was $2.63 in the fourth quarter of 2014, an increase of $2.16, or 460%, from $0.47 in the same period of 2013. Diluted EPS, excluding significant items, discussed further in Section 15, Non-GAAP Measures, was $2.68 in fourth quarter of 2014, an increase of $0.77, or 40%, from $1.91 in the same period of 2013. These increases were primarily due to higher Net income and lower average outstanding shares due to the share repurchase program.

Operating Ratio

The operating ratio provides the percentage of revenues used to operate the railway, and is calculated as Total operating expenses divided by Total revenues. A lower percentage normally indicates higher efficiency in the operation of the railway. The operating ratio was 59.8% in the fourth quarter of 2014, compared with 92.9% in the same period of 2013. This improvement was primarily due to:

- an asset impairment charge in 2013;
- higher volumes generating higher freight revenues; and
- an increase in efficiency savings in 2014.

The operating ratio, excluding significant items, discussed further in Section 15, Non-GAAP Measures, was 59.8% in the fourth quarter of 2014, compared with 65.9% in the same period of 2013. This improvement was primarily due to higher volumes generating higher freight revenues and efficiency savings.

Freight Revenues

Freight revenues were $1,719 million in the fourth quarter of 2014, an increase of $149 million, or 9%, from $1,570 million in the same period of 2013. This increase was primarily due to:

- higher shipments in Domestic intermodal, Potash, Metals, minerals and consumer products, and Crude;
- the favourable impact of the change in FX; and
- higher freight rates.

This increase was partially offset by lower shipments in International intermodal and Automotive due to the exit of certain customer contracts, and lower coal traffic in the U.S.

Other Revenue

Other revenue was $41 million in the fourth quarter of 2014, an increase of $4 million or 11%, from $37 million in the same period of 2013. This increase was primarily due to higher leasing and interline switching revenues.

Operating Expenses

Operating expenses were $1,052 million in the fourth quarter of 2014, a decrease of $441 million, or 30%, from $1,493 million in the same period of 2013. This decrease was primarily due to:

- an asset impairment charge in 2013;
- efficiencies generated from improved operating performance, asset utilization, and insourcing of certain IT activities;
- lower fuel price;
- lower stock-based compensation primarily due to a stock price reduction in the quarter, compared to a strong increase in the fourth quarter of 2013;
- lower pension expense; and
- lower depreciation expense.

This decrease was partially offset by:

- the unfavourable impact of the change in FX;
- higher volume variable expenses as a result of an increase in workload, as measured by GTMs;

- higher wage and benefit inflation;
- a 2013 reduction in WCB liabilities mainly due to a higher discount rate and favourable claims experience; and
- an insurance recovery in the fourth quarter of 2013, related to flooding in 2011.

13. CHANGES IN ACCOUNTING POLICY

2014 Accounting Change

Unrecognized Tax Benefit Liability

In July 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, an amendment to FASB Accounting Standards Codification ("ASC") Topic 740. The amendments require an entity to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, with certain exception applied. This ASU is effective prospectively for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of this ASU is not expected to have a material impact to the Company's financial statements.

Future Accounting Changes

Reporting discontinued operations and disclosures of disposals of components

In April 2014, FASB issued ASU No. 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity, an amendment to FASB ASC Topic 205 and Topic 360. The update amends the definition of a discontinued operation in Topic 205, expands disclosure requirements for transactions that meet the definition of a discontinued operation and requires entities to disclose information about individually significant components that are disposed of or held for sale and do not qualify as discontinued operations. In addition, an entity is required to separately present assets and liabilities of a discontinued operation for all comparative periods and separately present assets and liabilities of assets held for sale in the initial period in which the disposal group is classified as held for sale on the face of the consolidated balance sheets. For each period in which assets and liabilities are separately presented on the consolidated balance sheets, those amounts should not be offset and presented as a single amount. This ASU will be effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2014 and will be applied prospectively. The adoption of this ASU is not expected to have a material impact to the Company's financial statements.

Revenue from contracts with customers

In May 2014, FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, a new FASB ASC Topic 606 which supersedes the revenue recognition requirements in Topic 605 and most industry-specific guidance throughout the Industry Topics of the Codification. This new standard requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the new standard requires enhanced disclosures about revenue to help users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. This ASU will be effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2016. Entities have the option of using either a full retrospective or a modified retrospective approach to adopt the ASU. The Company has not, at this time, ascertained the full impact on the consolidated financial statements from the adoption of this new standard but does not expect the impact to be material.

14. LIQUIDITY AND CAPITAL RESOURCES

The Company believes adequate amounts of cash and cash equivalents are available in the normal course of business to provide for ongoing operations, including the obligations identified in the tables in Section 20, Contractual Commitments and Section 21, Future Trends and Commitments. The Company is not aware of any trends or expected fluctuations in the Company's liquidity that would create any deficiencies. Liquidity risk is discussed further in Section 22, Business Risks. The following discussion of operating, investing and financing activities describes the Company's indicators of liquidity and capital resources.

Operating Activities

Cash provided by operating activities was $2,123 million in 2014, an increase of $173 million from $1,950 million in 2013. This increase was largely due to improved earnings partially offset by higher income taxes paid and an increase in accounts receivable resulting from higher customer billings.

Investing Activities

Cash used in investing activities was $750 million in 2014, a decrease of $847 million from $1,597 million in 2013. This decrease was primarily due to a reduction in Restricted cash and cash equivalents related to the collateralizing of letters of credit, discussed further in Section 20, Business Risks. In addition the decrease reflects the proceeds received in 2014 from the sale of DM&E West, partially offset by higher additions to properties.

Additions to properties ("capital programs") were $1,449 million in 2014, an increase of $213 million from $1,236 million in 2013. The increase, primarily in track and rolling stock investments, reflects CP's strategy of reinvesting in the plant, enhancing throughput and capacity, and optimizing existing assets.

Capital Programs

For the year ended December 31 (in millions, except for miles and crossties)	**2014**	2013	2012
Additions to properties			
Track and roadway	**$ 1,011**	$ 831	$ 744
Rolling stock	**219**	169	155
Information systems	**96**	110	105
Buildings and other	**150**	155	148
Total – accrued additions to properties	**1,476**	1,265	1,152
Less:			
Other non-cash transactions	**27**	29	4
Cash invested in additions to properties (per Consolidated Statements of Cash Flows)	**$ 1,449**	$ 1,236	$ 1,148
Track installation capital programs			
Track miles of rail laid (miles)	**492**	429	470
Track miles of rail capacity expansion (miles)	**21**	24	32
Crossties installed (thousands)	**1,040**	926	794

Track and roadway expenditures include the replacement and enhancement of the Company's track infrastructure. Of the $1,011 million additions in 2014, approximately $875 million was dedicated to the renewal of depleted assets; namely rail, ties, ballast, signals, bridges, and compliance with the Positive Train Control ("PTC") regulatory mandate. The remaining $136 million was targeted on network improvements to increase productivity, efficiency, and capacity.

Rolling stock investments encompass locomotives and freight cars. In 2014, expenditures on locomotives were approximately $123 million and were focused on the remanufacture of older four-axle yard units. Expenditures on freight cars were approximately $96 million and were largely acquisitions of existing units previously leased.

The remaining capital expenditures are allocated to information services, buildings, and other. In 2014, CP invested approximately $96 million in information systems primarily focused on insourcing, rationalizing, and modernizing core hardware and applications. Investments in buildings and other items were $117 million and included intermodal and automotive terminals, shop equipment, and facilities. Expenditures on intermodal containers were approximately $33 million and included replacement units for containers at the end of their service life and incremental units to meet growing demand.

Additions to properties ("capital programs") in 2015 are expected to be approximately $1.5 billion. Approximately 70% of planned capital programs are for track and roadway, 10% are for rolling stock assets, between 5% and 10% are for information services, and between 10% and 15% are for buildings and other.

CP intends to finance capital expenditures with available cash from operations, but may partially finance these expenditures with new debt, capital leases and temporary draws on the Company's credit facility. The Company's decisions on funding equipment acquisitions will be influenced by such factors as optimizing the Company's capital structure and maintaining the Company's debt covenants and investment grade rating, as well as the amount of cash flow CP believes can be generated from operations and prevailing capital market conditions.

Financing Activities

Cash used in financing activities was $1,630 million in 2014, as compared to $220 million in 2013. This increase was largely due to payments made to buy back shares under the share repurchase program, discussed further in Section 17, Shareholder Returns and a repayment of a capital lease. These uses of cash were partially offset by proceeds from the issuance of commercial paper of U.S. $675 million (CDN $771 million), discussed further in Section 22, Business Risks.

The Company has available, as sources of financing, up to U.S. $2 billion under its revolving credit facility and up to CDN $188 million under its bilateral letter of credit facilities, discussed further in Section 22, Business Risks.

Debt to Total Capitalization

Debt to total capitalization is the sum of long-term debt, long-term debt maturing within one year and short-term borrowing, divided by debt plus total Shareholders' equity as presented on the Company's Consolidated Balance Sheets. At December 31, 2014, the Company's debt to total

capitalization increased to 50.8%, compared with 40.7% at December 31, 2013. This increase was largely due to the share repurchase program discussed further in Section 17, Shareholder Returns, and issuance of U.S. $675 million in commercial paper. These increases were partially offset by an increase in equity driven by increased earnings in 2014.

Interest Coverage Ratio

Interest coverage ratio is used in assessing the Company's debt servicing capabilities. This ratio provides an indicator of the Company's debt servicing capabilities, and how these have changed, period over period and in comparison to the Company's peers. Interest coverage ratio is measured, on a rolling twelve month basis, as EBIT divided by Net interest expense, discussed further in Section 15, Non-GAAP Measures. At December 31, 2014, the Company's interest coverage ratio was 8.2, compared with 5.0 at December 31, 2013. This improvement was primarily due to year over year improvement in EBIT. In 2014, EBIT was impacted by FX on LTD, discussed further in Section 15, Non-GAAP Measures, and the recovery of prior year labour restructuring charges, while in 2013 EBIT was impacted by the recovery of prior year labour restructuring charges, asset impairment charges, and management transition costs, discussed further in Section 15, Non-GAAP Measures.

Excluding these significant items from EBIT, Adjusted interest coverage ratio was 8.3 at December 31, 2014, compared with 6.6 at December 31, 2013. This increase was primarily due to an increase in Adjusted EBIT. Adjusted interest coverage ratio, Adjusted EBIT, and significant items are discussed further in Section 15, Non-GAAP Measures.

Credit Measures

Credit ratings provide information relating to the Company's financing costs, liquidity and operations and affect the Company's ability to obtain short-term and long-term financing and/or the cost of such financing.

A mid-investment grade credit rating is an important measure in assessing the Company's ability to maintain access to public financing and to minimize cost of capital. It also affects the ability of the Company to engage in certain collateralized business activities on a cost effective basis, which is discussed further in Section 22, Business Risks.

Credit ratings and outlooks are based on the rating agencies' methodologies and can change from time to time to reflect their views of CP. Their views are affected by numerous factors including, but not limited to, the Company's financial position and liquidity along with external factors beyond the Company's control.

On April 16, 2014, Standard & Poor's Ratings Services raised CP's long-term corporate credit rating to "BBB" from "BBB-" and assigned a positive outlook to the rating.

On April 24, 2014, Moody's Investors Service upgraded CP's senior unsecured ratings to Baa2 from Baa3 and assigned a positive outlook to the rating.

On June 5, 2014, Dominion Bond Rating Service Limited ("DBRS") upgraded CP's Issuer Rating, Unsecured Debentures and Medium-Term Notes ratings to "BBB" from "BBB (low)" and assigned a positive outlook to the ratings.

On October 27, 2014, DBRS upgraded CP's Issuer Rating, Unsecured Debentures and Medium-Term Notes ratings to "BBB (high)" and assigned a stable outlook to the ratings. On November 4, 2014, DBRS assigned an "R-2 (high)" rating to the Company's U.S. $1 billion commercial paper program.

On November 4, 2014, Standard & Poor's Rating Services raised CP's long-term corporate credit rating to "BBB+" from "BBB", senior secured debt rating to "A" from "A-", senior unsecured debt rating to "BBB+" from "BBB" and assigned stable outlook to the rating. Separately, Standard & Poor's Rating Service assigned its "A-2" short-term corporate credit rating, and assigned its "A-2" global scale relating to the Company's US$1 billion commercial paper program.

On November 7, 2014, Moody's Investor Service upgraded CP's senior unsecured ratings to Baa1 from Baa2 and assigned a stable outlook to the rating. Separately, Moody's Investor Service assigned a "P-2" rating to the Company's U.S. $1 billion commercial paper program.

Adjusted net debt to Adjusted earnings before interest, tax, depreciation and amortization ("EBITDA") is a non-GAAP measure that management uses to evaluate CP's financial discipline with respect to capital markets credit sensitivities. The Company's goal is to maintain a degree of continuity and predictability for investors by meeting a minimum threshold.

Adjusted net debt to adjusted EBITDA for the years ended December 31, 2014, 2013, and 2012 was 2.3, 2.2, and 3.2 times, respectively. The increase between 2013 and 2014 is due to additional debt issued under the commercial paper program, offset by the improved net income at December 31, 2014. The decrease of 1.0 between 2012 and 2013 reflects the Company's improved net income and a net asset position for the Company's main Canadian defined benefit pension plan at December 31, 2013. Adjusted net debt to Adjusted EBITDA is discussed further in Section 15, Non-GAAP Measures.

Free Cash

Free cash and cash flow before dividends are Non-GAAP measures that management considers to be indicators of liquidity. These measures are discussed further in Section 15, Non-GAAP Measures.

CP generated positive free cash of $725 million in 2014, compared to $530 million in 2013. The improvement in free cash of $195 million was primarily due to improved earnings and proceeds received from the sale of DM&E West. This increase was partially offset by higher capital additions and higher income tax payments.

15. NON-GAAP MEASURES

The Company presents non-GAAP measures and cash flow information to provide a basis for evaluating underlying earnings and liquidity trends in the Company's business that can be compared with the results of operations in prior periods. In addition, these non-GAAP measures facilitate a multi-period assessment of long-term profitability allowing management and other external users of the Company's consolidated financial statements to compare profitability on a long-term basis with that of the Company's peers.

These non-GAAP measures exclude other significant items that are not among the Company's normal ongoing revenues and operating expenses. These non-GAAP measures have no standardized meaning and are not defined by GAAP and, therefore, may not be comparable to similar measures presented by other companies.

Operating expenses, excluding significant items, provide relevant and useful information for evaluating the effectiveness of the Company's operations and underlying business trends.

Operating income, excluding significant items, provides a measure of the profitability of the railway on an ongoing basis.

Income, excluding significant items, provides management with a measure of income on an ongoing basis.

Diluted earnings per share, excluding significant items, provides the same information on a per share basis.

Operating ratio, excluding significant items, calculated as operating expenses, excluding significant items divided by revenues, provides the percentage of revenues used to operate the railway on an ongoing basis.

Significant Items

Significant items are material transactions that may include, but are not limited to, restructuring and asset impairment charges, gains and losses on non-routine sales of assets and other items that are not normal course business activities.

In 2014, there were two significant items included in Net income as follows:

- in the fourth quarter, a $12 million charge ($9 million after tax) due to foreign exchange translation on CP's U.S. dollar denominated long-term debt issued to facilitate the share repurchase program; and
- in the first quarter, a recovery of $4 million ($3 million after tax) was recorded for CP's 2012 labour restructuring initiative due to favourable experience gains, recorded in Compensation and benefits.

In 2013, there were five significant items included in Net income as follows:

- in the fourth quarter, an asset impairment charge and accruals for future costs totaling $435 million ($257 million after tax) relating to the sale of DM&E West which closed in the second quarter of 2014;
- in the fourth quarter, management transition costs related to the retirement of the Company's Chief Financial Officer and the appointment of the new Chief Financial Officer of $5 million ($4 million after tax);
- in the fourth quarter, a recovery of $7 million ($5 million after tax) of the Company's 2012 labour restructuring initiative due to favourable experience gains, discussed further in Section 9, Operating Expenses;
- in the third quarter, an income tax expense of $7 million as a result of the change in the province of British Columbia's corporate income tax rate; and
- in the first quarter, a recovery of U.S. $9 million (U.S. $6 million after tax) related to settlement of certain management transition amounts which had been subject to legal proceedings.

In 2012, there were six significant items included in Net income as follows:

- in the fourth quarter, an asset impairment charge of $185 million ($111 million after tax) with respect to the option to build into the Powder River Basin and another investment;
- in the fourth quarter, an asset impairment charge of $80 million ($59 million after tax) related to a certain series of locomotives;
- in the fourth quarter, a labour restructuring charge of $53 million ($39 million after tax) as part of a restructuring initiative which was largely completed in 2013 and 2014, with the remaining positions to be eliminated in 2015, discussed further in Section 9, Operating Expenses;
- in the second quarter, a charge of $42 million ($29 million after tax) with respect to compensation and other management transition costs;

- during the first and second quarters, advisory fees of $27 million ($20 million after tax) related to shareholder matters; and
- in the second quarter, an income tax expense of $11 million as a result of the change in the province of Ontario's corporate income tax rate.

Reconciliation of Non-GAAP measures to GAAP measures

(in millions)	For the year ended December 31 2014	2013	2012	For the three months ended December 31 2014	2013
Operating expenses, excluding significant items[1]	**$ 4,285**	$ 4,289	$ 4,386	**$ 1,052**	$ 1,060

Operating ratio as reported	**64.7%**	76.8%	83.3%	**59.8%**	92.9%

Free Cash

Free cash and cash flow before dividends are non-GAAP measures that management considers to be indicators of liquidity. The measures are used by management to provide information with respect to the relationship between cash provided by operating activities and investment decisions and provide comparable measures for period to period changes. Free cash is calculated as cash provided by operating activities, less cash used in investing activities, excluding changes in restricted cash and cash equivalents and investment balances used to collateralize letters of credit, and dividends paid, adjusted for changes in cash and cash equivalents balances resulting from FX fluctuations. Cash flows provided by financing activities, excluding dividend payments, are not included in the computation of free cash. Cash flow before dividends is calculated as cash provided by operating activities less cash used in investing activities, excluding changes in restricted cash and cash equivalents and investment balances used to collateralize letters of credit.

Reconciliation of free cash to GAAP cash position[1]

(in millions)	For the year ended December 31 2014	2013	2012
Cash provided by operating activities	**$ 2,123**	$ 1,950	$ 1,328
Cash used in investing activities	**(750)**	(1,597)	(1,011)
Change in restricted cash and cash equivalents used to collateralize letters of credit[2]	**(411)**	411	–
Dividends paid	**(244)**	(244)	(223)
Effect of foreign currency fluctuations on U.S. dollar-denominated cash and cash equivalents	**7**	10	(1)
Free cash[1]	**$ 725**	$ 530	$ 93
Cash (used in) provided by financing activities, excluding dividend payment	**(1,386)**	24	193
Change in restricted cash and cash equivalents used to collateralize letters of credit[2]	**411**	(411)	–
(Decrease) increase in cash and cash equivalents, as shown on the Consolidated Statements of Cash Flows	**(250)**	143	286
Cash and cash equivalents at beginning of year	**476**	333	47
Cash and cash equivalents at end of year	**$ 226**	$ 476	$ 333

[1] Free cash and cash provided by financing activities, excluding dividend payment have no standardized meaning prescribed by GAAP and, therefore, are unlikely to be comparable to similar measures presented by other companies.

[2] Changes in Restricted cash and cash equivalents related to collateralized letters of credit are discussed further in Section 22, Business Risks.

Interest Coverage Ratio

Interest coverage ratio is used in assessing the Company's debt servicing capabilities. This ratio provides an indicator of the Company's debt servicing capabilities, and how these have changed, period over period and in comparison to the Company's peers. The ratio, measured as EBIT divided by Net interest expense, is reported quarterly and is measured on a twelve month rolling basis. Interest coverage ratio is discussed further in Section 14, Liquidity and Capital Resources.

The interest coverage ratio, excluding significant items, also referred to as Adjusted interest coverage ratio, is calculated as Adjusted EBIT divided by Net interest expense. By excluding significant items which affect EBIT, Adjusted interest coverage ratio provides a metric that is more comparable on a period to period basis. Interest coverage ratio and Adjusted interest coverage ratio are discussed further in Section 14, Liquidity and Capital Resources.

Calculation of Interest Coverage Ratio

(in millions, except for interest coverage ratio)	2014	2013	2012
EBIT[1]	**$ 2,320**	$ 1,403	$ 912
Adjusted EBIT[1]	**$ 2,328**	$ 1,827	$ 1,299
Net interest expense	**$ 282**	$ 278	$ 276
Interest coverage ratio[1]	**8.2**	5.0	3.3
Adjusted interest coverage ratio[1]	**8.3**	6.6	4.7

[1] Interest coverage ratio, Adjusted interest coverage ratio, EBIT and Adjusted EBIT have no standardized meanings prescribed by GAAP and, therefore, are unlikely to be comparable to similar measures of other companies.

ROCE

ROCE is an all-encompassing measure of performance which measures how productively the Company uses its assets. ROCE is defined as EBIT (on a rolling twelve month basis) divided by the average for the twelve months of total assets, less current liabilities excluding the current portion of long-term debt. ROCE, excluding significant items, also referred to as Adjusted ROCE, is calculated as Adjusted EBIT divided by the average for the twelve months of total assets, less current liabilities excluding the current portion of long-term debt. By excluding significant items which affect EBIT, Adjusted ROCE provides a metric that is more comparable on a period to period basis. ROCE and Adjusted ROCE are discussed further in Section 6, Operating Results.

Calculation of Adjusted ROCE

(in millions, except for percentages)	2014	2013	2012
EBIT for the year ended December 31[1]	**$ 2,320**	$ 1,403	$ 912
Adjusted EBIT for the year ended December 31[1]	**$ 2,328**	$ 1,827	$ 1,299
Average for the twelve months of total assets, less current liabilities excluding the current portion of long-term debt	**$ 15,617**	$ 14,711	$ 13,251
ROCE[1]	**14.9%**	9.5%	6.9%
Adjusted ROCE[1][2]	**14.9%**	12.4%	9.8%

[1] EBIT, Adjusted EBIT, ROCE and Adjusted ROCE have no standardized meaning prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies.

[2] Adjusted ROCE is defined as Adjusted EBIT divided by the average for twelve months of Total assets, less current liabilities, excluding current portion of long-term debt, as measured under GAAP.

Interest coverage ratio and ROCE include EBIT, a non-GAAP measure, which can be calculated as Operating income, less Other income and charges. Adjusted EBIT is calculated as Operating income, excluding significant items less Other income and charges, excluding significant items that are reported in Other income and charges on the Company's income statement. A reconciliation of Operating income to EBIT and Adjusted EBIT, each for the twelve months ended December 31, 2014 and 2013, is presented below:

Earnings before interest and tax (in millions)	**For the year ended December 31** **2014**	2013	2012
Adjusted EBIT[1]	**$ 2,328**	$ 1,827	$ 1,299
Add Significant items:			
Labour restructuring	**4**	7	(53)
Asset impairments	**–**	(435)	(265)
Management transition	**–**	4	(42)
Advisory costs related to shareholder matters	**–**	–	(27)
Impact of foreign exchange translation on USD denominated debt	**(12)**	–	–
EBIT[1]	**2,320**	1,403	912
Add:			
Other income and charges	**19**	17	37
Operating income as reported	**$ 2,339**	$ 1,420	$ 949

[1] EBIT and Adjusted EBIT have no standardized meanings prescribed by GAAP and, therefore, are unlikely to be comparable to similar measures presented by other companies. These earnings measures and significant items are described in this section.

Adjusted Debt to Adjusted EBITDA

Adjusted net debt to Adjusted EBITDA is a non-GAAP measure that management uses to evaluate CP's financial discipline with respect to capital markets' credit sensitivities. Adjusted debt is defined as Long-term debt, Long-term debt maturing within one year and short-term borrowing as reported on the Company's Consolidated Balance Sheets adjusted for unfunded pension and other benefits liability, net of tax and the net present value of operating leases, which is discounted by the Company's effective interest rate for each of the years presented. Adjusted EBITDA is calculated as Adjusted EBIT plus Depreciation and amortization, adjusted for net periodic pension and other benefit cost and operating lease expense.

The following tables reconcile Adjusted debt to Long-term debt and Adjusted EBITDA to Adjusted EBIT for the years ended December 31, 2014, 2013, and 2012.

Reconciliation of Adjusted net debt to Long-term debt

(in millions)	**2014**	2013	2012
Adjusted debt as at December 31	**$ 6,605**	$ 5,394	$ 6,247
Add:			
Net unfunded pension and other benefits liability, net of tax	**(365)**	–	(1,042)
Net present value of operating leases[1]	**(447)**	(518)	(515)
Long-Term debt as at December 31	**$ 5,793**	$ 4,876	$ 4,690

[1] Operating leases were discounted at the Company's effective interest rate for each of the periods presented.

Reconciliation of Adjusted EBITDA to Adjusted EBIT

(in millions)	2014	2013	2012
Adjusted EBITDA for the year ended December 31[1]	**$ 2,864**	$ 2,464	$ 1,957
Add:			
Adjustment for net periodic pension and other benefit cost	**137**	82	63
Operating lease expense	**(121)**	(154)	(182)
Depreciation and amortization	**(552)**	(565)	(539)
Adjusted EBIT for the year ended December 31[1]	**$ 2,328**	$ 1,827	$ 1,299

[1] Adjusted EBITDA and Adjusted EBIT have no standardized meanings prescribed by GAAP and, therefore, are unlikely to be comparable to similar measures presented by other companies. These earnings measures and significant items are described in this section.

16. BALANCE SHEET

Financial position at December 31 ($ millions)	2014	2013	Change	%	Changes during the year ended December 31, 2014, include:
Current Assets					
Cash and cash equivalents	226	476	(250)	(53)	See section 14, Liquidity and Capital Resources.
Restricted cash and cash equivalents	–	411	(411)	(100)	2013 amount pledged as collateral to letters of credit.
Accounts receivable, net	702	580	122	21	Increase primarily due to freight receivables due to higher customer billings.
Materials and supplies	177	165	12	7	Increase in engineering materials for 2015 projects, partially offset by lower fuel inventory.
Deferred income taxes	56	344	(288)	(84)	Decrease due to the use of income tax loss carry forwards and tax credits.
Other current assets	116	53	63	119	Increase primarily due to higher prepaid income taxes.
Current Liabilities					
Accounts payable and accrued liabilities	1,277	1,189	88	7	Increase primarily due to higher income and other taxes payable as well as amounts payable for CP common shares repurchased, discussed further in Section 17, Shareholder Returns.
Long-term debt maturing within one year	134	189	(55)	(29)	Decrease is primarily due to debt repayments of $183 million, partially offset by amounts reclassed from long term debt.
Non-current assets					
Investments	112	92	20	22	Increase due to equity earnings and FX on U.S. investment balances.
Properties	14,438	13,327	1,111	8	Increase due to capital additions and FX, partially offset by depreciation and assets reclassed to Assets held for sale.
Assets held for sale	182	222	(40)	(18)	Decrease due to completion of DM&E West sale in 2014, partially offset by the transfer of certain assets of D&H from properties, discussed further in Section 21, Future Trends and Commitments.
Goodwill and intangible assets	176	162	14	9	Increase primarily due to FX.
Pension asset	304	1,028	(724)	(70)	Decrease primarily due to lower discount rates, partially offset by investment returns on plan assets greater than expected.
Other assets	151	200	(49)	(25)	Decrease primarily due to settling of currency forwards and various other reductions.

Financial position at December 31 ($ millions)	2014	2013	Change	%	Changes during the year ended December 31, 2014, include:
Non-current liabilities					
Pension and other benefit liabilities	755	657	98	15	Increase primarily due to lower discount rates.
Other long-term liabilities	432	338	94	28	Increase due to higher share based liabilities from new grants and a higher share price compared to 2013.
Long-term debt	5,659	4,687	972	21	Increase due to the issuance of commercial paper, discussed further in Section 22, Business Risks, and FX, partially offset by amounts reclassed to current.
Deferred income taxes	2,773	2,903	(130)	(4)	Decrease primarily due to a recovery on other comprehensive loss, partially offset by deferred income tax expenses on earnings, utilization of loss carry-forwards, and FX.
Shareholders' equity					
Share capital	2,185	2,240	(55)	(2)	Decrease due to CP common shares repurchased, partially offset by shares issued under CP's stock option plans.
Additional paid-in capital	36	34	2	6	Increase due to stock option expense, partially offset by options exercised.
Accumulated other comprehensive loss	(2,219)	(1,503)	(716)	48	Increase primarily due to changes in pension and post-retirement defined benefit plans.
Retained earnings	5,608	6,326	(718)	(11)	Decrease due to CP common shares repurchased and dividends declared, partially offset by Net income.

17. SHAREHOLDER RETURNS

Share Capital

At February 20, 2015, 164,538,579 common shares and no preferred shares were issued and outstanding. In addition, CP has a Management Stock Option Incentive Plan ("MSOIP") under which key officers and employees are granted options to purchase CP shares. Each option granted can be exercised for one Common Share. At February 20, 2015, 2.6 million options were outstanding under the Company's MSOIP and Directors' Stock Option Plan, as well as stand-alone option agreements entered into with Mr. E. Hunter Harrison, Mr. Keith Creel and Mr. Bart Demosky. 2.5 million additional options may be issued in the future under the MSOIP and Directors' Stock Option Plan.

Stock Price

The market value per CP common share, as listed on the Toronto Stock Exchange was $223.75 at December 31, 2014, an increase of $63.10 per share from $160.65 at December 31, 2013. The market value per CP common share at December 31, 2013 was an increase of $59.75 per share from $100.90 at December 31, 2012.

Return on Capital Employed

ROCE is a measure of performance which measures how productively the Company uses its assets. ROCE was 14.9% at December 31, 2014, compared with 9.5% in the same period of 2013. This increase was primarily due to an increase in EBIT. ROCE is discussed further in Section 15, Non-GAAP Measures.

Cash Returned to Shareholders

On December 16, 2014, the Company's Board of Directors declared a quarterly dividend of $0.3500 per share, unchanged from 2013, on the outstanding common shares. The dividend is payable on January 26, 2015 to holders of record at the close of business on December 31, 2014.

Dividends

Dividends declared by the Board of Directors in the last three years are as follows:

Dividend amount	Record date	Payment date
$0.3500	March 27, 2015	April 27, 2015
$0.3500	December 31, 2014	January 26, 2015
$0.3500	September 26, 2014	October 27, 2014
$0.3500	June 27, 2014	July 28, 2014
$0.3500	March 28, 2014	April 28, 2014
$0.3500	December 27, 2013	January 27, 2014
$0.3500	September 27, 2013	October 28, 2013
$0.3500	June 28, 2013	July 29, 2013
$0.3500	March 28, 2013	April 29, 2013
$0.3500	December 28, 2012	January 28, 2013
$0.3500	September 28, 2012	October 29, 2012
$0.3500	June 22, 2012	July 30, 2012
$0.3000	March 30, 2012	April 30, 2012

Share Repurchase Program

On March 11, 2014, the Company announced a new share repurchase program to implement a normal course issuer bid ("NCIB") to purchase, for cancellation, up to 5.3 million common shares. On September 29, 2014, the Company announced the amendment of the bid to increase the maximum number of its Common Shares that may be purchased from 5.3 million to 12.7 million of its outstanding Common Shares, effective October 2, 2014. Under the filing, share purchases may be made during the twelve month period that began March 17, 2014, and ends March 16, 2015. The purchases are made at the market price on the day of purchase, with the net proceeds allocated to share capital up to the average carrying amount of the shares, and any excess allocated to retained earnings.

CP believes that the purchase of its shares from time to time is an appropriate and advantageous use of the Company's funds to maximize shareholder value.

Purchases of the Company's common shares may be made through the facilities of the TSX, the New York Stock Exchange ("NYSE") and alternative trading platforms by means of open market transactions or by such other means as may be permitted by the TSX and under applicable securities laws, including by private agreement pursuant to issuer bid exemption orders issued by applicable securities regulatory authorities. The purchase price for any common shares under the share repurchase program will be the market price at the time of purchase or such other price as may be permitted by the TSX. Any private purchase made under an exemption order issued by a securities regulatory authority will generally be at a discount to the prevailing market price. The actual number of common shares repurchased under the NCIB and the timing of any such purchases will be determined by the Company and there cannot be any assurances as to how many common shares will ultimately be acquired under the NCIB. From October 2, 2014 to December 31, 2014 the Company repurchased 5.2 million common shares for $1,102 million at an average price of $211.67 per share. From March 17, 2014 to December 31, 2014, the Company repurchased 10.5 million Common shares for $2,089 million at an average price of $199.42 per share.

18. FINANCIAL INSTRUMENTS

Fair Value of Financial Instruments

The Company categorizes its financial assets and liabilities measured at fair value in line with the fair value hierarchy established by GAAP that prioritizes, with respect to reliability, the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels. Level 1 inputs consist of quoted prices (unadjusted) in active markets for identical assets and liabilities and gives the highest priority to these inputs. Level 2 and 3 inputs are based on significant other observable inputs and significant unobservable inputs, respectively, and gives lower priority to these inputs.

When possible, the estimated fair value is based on quoted market prices and, if not available, estimates from third party brokers. For non-exchange traded derivatives classified in Level 2, the Company uses standard valuation techniques to calculate fair value. Primary inputs to these techniques include observable market prices (interest, foreign exchange and commodity) and volatility, depending on the type of derivative and nature of the underlying risk. The Company uses inputs and data used by willing market participants when valuing derivatives and considers its own credit default swap spread as well as those of its counterparties in its determination of fair value.

Carrying Value and Fair Value of Financial Instruments

The carrying values of financial instruments equal or approximate their fair values with the exception of long-term debt which has a fair value of approximately $6,939 million and a carrying value of $5,793 million at December 31, 2014. At December 31, 2013, long-term debt had a fair value of approximately $5,572 million and a carrying value of $4,876 million. The estimated fair value of current and long-term borrowings has been determined based on market information where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company at period end. All derivatives and long-term debt are classified as Level 2.

Financial Risk Management

Derivative Financial Instruments

Derivative financial instruments may be used to selectively reduce volatility associated with fluctuations in interest rates, foreign exchange rates, the price of fuel and stock-based compensation expense. Where derivatives are designated as hedging instruments, the relationship between the hedging instruments and their associated hedged items is documented, as well as the risk management objective and strategy for the use of the hedging instruments. This documentation includes linking the derivatives that are designated as fair value or cash flow hedges to specific assets or liabilities on the Consolidated Balance Sheets, commitments or forecasted transactions. At the time a derivative contract is entered into, and at least quarterly thereafter, an assessment is made whether the derivative item is effective in offsetting the changes in fair value or cash flows of the hedged items. The derivative qualifies for hedge accounting treatment if it is effective in substantially mitigating the risk it was designed to address.

It is not the Company's intent to use financial derivatives or commodity instruments for trading or speculative purposes.

Credit Risk Management

Credit risk refers to the possibility that a customer or counterparty will fail to fulfill its obligations under a contract and as a result create a financial loss for the Company.

The railway industry predominantly serves financially established customers and the Company has experienced limited financial losses with respect to credit risk. The credit worthiness of customers is assessed using credit scores supplied by a third party, and through direct monitoring of their financial well-being on a continual basis. The Company establishes guidelines for customer credit limits and should thresholds in these areas be reached, appropriate precautions are taken to improve collectability.

Counterparties to financial instruments expose the Company to credit losses in the event of non-performance. Counterparties for derivative and cash transactions are limited to high credit quality financial institutions, which are monitored on an on-going basis. Counterparty credit assessments are based on the financial health of the institutions and their credit ratings from external agencies. The Company does not anticipate non-performance that would materially impact the Company's financial statements. In addition, the Company believes there are no significant concentrations of credit risk.

Foreign Exchange Management

The Company conducts business transactions and owns assets in both Canada and the United States. As a result, the Company is exposed to fluctuations in value of financial commitments, assets, liabilities, income or cash flows due to changes in FX rates. The Company may enter into foreign exchange risk management transactions primarily to manage fluctuations in the exchange rate between Canadian and U.S. currencies. FX exposure is primarily mitigated through natural offsets created by revenues, expenditures and balance sheet positions incurred in the same currency. Where appropriate, the Company may negotiate with customers and suppliers to reduce the net exposure.

Occasionally the Company will enter into short-term FX forward contracts as part of its cash management strategy.

Net Investment Hedge

The FX gains and losses on long-term debt are mainly unrealized and can only be realized when U.S. dollar denominated long-term debt matures or is settled. The Company also has long-term FX exposure on its investment in U.S. affiliates. The majority of the Company's U.S. dollar denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. This designation has the effect of mitigating volatility on net income by offsetting long-term FX gains and losses on U.S. dollar denominated long-term debt and gains and losses on its net investment.

Foreign Exchange Forward Contracts

The Company may enter into FX forward contracts to lock-in the amount of Canadian dollars it has to pay on U.S. dollar denominated debt maturities.

At December 31, 2014, the Company had no remaining FX forward contracts to fix the exchange rate on U.S. dollar denominated debt maturities. At December 31, 2013, the Company had FX forward contracts to fix the exchange rate on U.S. $100 million of principal outstanding on a capital lease due in January 2014, U.S. $175 million of its 6.50% Notes due in May 2018, and U.S. $100 million of its 7.25% Notes due in May 2019. These derivatives, which were accounted for as cash flow hedges, guaranteed the amount of Canadian dollars that the Company would repay when these obligations mature.

During the three months ended March 31, 2014, the Company settled the FX forward contract related to the repayment of a capital lease due in January 2014 for proceeds of $8 million.

During the three months ended June 30, 2014, the Company de-designated and settled prior to maturity the FX forward contracts related to the repayment of its 6.5% Notes due in May 2018 and its 7.25% Notes due in May 2019 for proceeds of $17 million settled in the third quarter of 2014 with the offset recorded as realized gains of $3 million in Accumulated other comprehensive loss and $14 million in Retained earnings. Amounts remaining in Accumulated other comprehensive loss are being amortized to Other income and charges until the underlying debts, which were hedged, are repaid. The amount being amortized to Other income and charges in 2014 is not significant. At December 31, 2013, the unrealized gain derived from these FX forwards was $25 million of which $6 million was included in Other current assets and $19 million in Other assets with the offset reflected as an unrealized gain of $5 million in Accumulated other comprehensive loss and as an unrealized gain of $20 million in Retained earnings.

During 2014, the combined realized and unrealized foreign exchange gain was $3 million, recorded in Other income and charges relating to these settled derivatives, compared to an unrealized foreign exchange gain of $18 million in 2013. Gains recorded in Other income and charges were largely offset by unrealized losses on the underlying debt which the derivatives were designated to hedge.

Interest Rate Management

The Company is exposed to interest rate risk, which is the risk that the fair value or future cash flows of a financial instrument will vary as a result of changes in market interest rates. In order to manage funding needs or capital structure goals, the Company enters into debt or capital lease agreements that are subject to either fixed market interest rates set at the time of issue or floating rates determined by on-going market conditions. Debt subject to variable interest rates exposes the Company to variability in interest expense, while debt subject to fixed interest rates exposes the Company to variability in the fair value of debt.

To manage interest rate exposure, the Company accesses diverse sources of financing and manages borrowings in line with a targeted range of capital structure, debt ratings, liquidity needs, maturity schedule, and currency and interest rate profiles. In anticipation of future debt issuances, the Company may enter into forward rate agreements such as treasury rate locks, bond forwards or forward starting swaps, designated as cash flow hedges, to substantially lock in all or a portion of the effective future interest expense. The Company may also enter into swap agreements, designated as fair value hedges, to manage the mix of fixed and floating rate debt.

Forward Starting Swaps

During the fourth quarter of 2014, the Company entered into forward starting floating-to-fixed interest rate swap agreements ("forward starting swaps") totaling a notional U.S. $1.4 billion to fix the benchmark rate on cash flows associated with highly probable forecasted issuances of long-term notes. The effective portion of changes in fair value on the forward starting swaps are recorded in Accumulated other comprehensive loss, net of tax, as cash flow hedges until the probable forecasted note is issued. Subsequent to the notes issuance, amounts in Accumulated other comprehensive loss are reclassified to Net interest expense. As at December 31, 2014, the unrealized loss derived from the forward starting swaps was $46 million of which $21 million was included in Accounts payable and accrued liabilities and $25 million in Other long-term liabilities with the offset reflected in Other comprehensive (loss) income on the Company's Interim Consolidated Statements of Comprehensive Income (Loss).

Interest Rate Swaps

During the fourth quarter of 2014, the Company also entered into floating-to-fixed interest rate swap agreements totaling U.S. $600 million to hedge the variability in cash flow associated with fluctuations in interest rates on commercial paper issuances. These swaps expire in 2015 and are accounted for as a cash flow hedge. The effective portion of changes in fair value of the swaps is recorded in Accumulated other comprehensive loss, net of tax. Subsequent to the commercial paper issuance, the amounts recorded in Accumulated other comprehensive loss are reclassified to Net interest expense. At December 31, 2014, the unrealized gain, recorded in Other current assets on the Company's Consolidated Balance Sheets, was not significant. The offset was reflected in Other comprehensive (loss) income on the Company's Interim Consolidated Statements of Comprehensive Income (Loss).

At December 31, 2013, the Company had no outstanding interest rate swaps.

Treasury Rate Locks

At December 31, 2014, the Company had net unamortized losses related to interest rate locks, which are accounted for as cash flow hedges, settled in previous years totaling $21 million, as compared to net unamortized losses of $22 million at December 31, 2013. These amounts are composed of various unamortized gains and losses related to specific debts which are reflected in Accumulated other comprehensive loss and are amortized to Net interest expense in the period that interest on the related debt is charged. The amortization of these gains and losses resulted in a negligible increase to Net interest expense and Other comprehensive loss in 2014 and comparative periods.

Fuel Price Management

The Company is exposed to commodity risk related to purchases of diesel fuel. CP employs a fuel cost recovery program designed to automatically respond to fluctuations in fuel prices and help reduce volatility to changing fuel prices, and the potential reduction in net income due to increases in the price of diesel. Fuel expense constitutes a large portion of the Company's operating costs and volatility in diesel fuel prices can have a significant impact on the Company's income. Items affecting volatility in diesel prices include, but are not limited to, fluctuations in world markets for crude oil and distillate fuels, which can be affected by supply disruptions and geopolitical events.

The impact of variable fuel expense is mitigated substantially through fuel cost recovery programs which apportion incremental changes in fuel prices to shippers through price indices, tariffs, and by contract, within agreed upon guidelines. While these programs provide effective and meaningful coverage, residual exposure remains as the fuel expense risk may not be completely recovered from shippers due to timing and volatility in the market. In the past, to address the residual portion of CP's fuel costs not mitigated by its fuel cost recovery programs, CP had a systematic hedge program. As a result of improving coverage from its fuel cost recovery programs, CP exited its hedging program during the first quarter of 2013.

19. OFF-BALANCE SHEET ARRANGEMENTS

Guarantees

At December 31, 2014, the Company had residual value guarantees on operating lease commitments of $120 million. The maximum amount that could be payable under these and all of the Company's other guarantees cannot be reasonably estimated due to the nature of certain guarantees. All or a portion of amounts paid under certain guarantees could be recoverable from other parties or through insurance. The Company has accrued for all guarantees that it expects to pay. As at December 31, 2014, these accruals amounted to $3 million compared with $6 million as at December 31, 2013.

20. CONTRACTUAL COMMITMENTS

The accompanying table indicates the Company's obligations and commitments to make future payments for contracts, such as debt, capital lease and commercial arrangements.

Contractual Commitments

At December 31, 2014

Payments due by period (in millions)	**Total**	2015	2016 & 2017	2018 & 2019	2020 & beyond
Contractual commitments					
Long-term debt	**$ 5,673**	$ 131	$ 845	$ 1,164	$ 3,533
Capital lease	**150**	3	7	8	132
Operating lease[1]	**569**	114	155	98	202
Supplier purchase	**1,396**	217	266	208	705
Other long-term liabilities[2]	**648**	114	126	114	294
Total contractual commitments	**$ 8,436**	$ 579	$ 1,399	$ 1,592	$ 4,866

[1] Residual value guarantees on certain leased equipment with a maximum exposure of $120 million, discussed further in Section 19, Off-Balance Sheet Arrangements, are not included in the minimum payments shown above, as management believes that CP will not be required to make payments under these residual guarantees.

[2] Includes expected cash payments for restructuring, environmental remediation, asset retirement obligations, post-retirement benefits, workers' compensation benefits, long-term disability benefits, pension benefit payments for the Company's non-registered supplemental pension plan, deferred income tax liabilities and certain other long-term liabilities. Projected payments for post-retirement benefits, workers' compensation benefits and long-term disability benefits include the anticipated payments for years 2015 to 2024. Pension contributions for the Company's registered pension plans are not included due to the volatility in calculating them. Pension payments are discussed further in Section 23, Critical Accounting Estimates. Deferred income tax liabilities may vary resulting from changes in tax rates, tax regulations and the operating results of the Company. As the cash impact in any particular year cannot be reasonably determined, all long-term deferred tax liabilities have been reflected in the "2020 & beyond" category in this table. Deferred income taxes are discussed further in Section 23, Critical Accounting Estimates.

21. FUTURE TRENDS AND COMMITMENTS

Agreements and Recent Developments

Resolution of certain legal proceedings

In 2013, CP provided an interest free loan pursuant to a court order in the amount of $20 million to a corporation owned by a court appointed trustee ("the judicial trustee") to facilitate the acquisition of a building. The building was held in trust during the legal proceedings with regard to

CP's entitlement to an exercised purchase option of the building ("purchase option"). As at December 31, 2014, the loan of $20 million and the purchase option, book value of $8 million, were recorded as Other assets in the Company's Consolidated Balance Sheets.

In January 2015, CP reached a settlement with a third party that, following the sale of the building to an arm's length third party in February 2015, will result in CP receiving net proceeds of $59 million for the sale of the building and resolution of legal proceedings. The net proceeds would include repayment of the aforementioned loan to the judicial trustee. CP expects to record a gain of approximately $31 million ($27 million after-tax) to Purchased services and other in the first quarter of 2015.

Issuance of long-term debt and settlement of forward starting swaps

On January 28, 2015, CP announced the issuance of U.S. $700 million 2.900% 10-year Notes due February 1, 2025 for net proceeds of U.S. $694 million. This transaction closed on February 2, 2015. The net proceeds will be used for general corporate purposes, capital investments, and share repurchases.

On January 28, 2015, the Company settled a notional U.S. $700 million of forward starting swaps, designated as a cash flow hedge related to the issuance of the notes described above. The fair value of these derivative instruments was a loss of U.S. $50 million at the time of the settlement. Effective hedge losses were deferred in Accumulated other comprehensive loss and will be amortized to Net interest expense until the underlying notes, which were hedged, are repaid.

Joint venture with DREAM Unlimited

On January 20, 2015, CP announced it had an agreement to create a joint venture with DREAM Unlimited called DREAM Van Horne Properties. The joint venture was created to evaluate the Company's real estate, and to explore innovative ways to maximize value, including industrial, commercial and residential development.

Sale of the Delaware and Hudson Railway Company

On November 17, 2014, the Company announced a proposed agreement with Norfolk Southern Corporation ("NS") for the sale of approximately 283 miles of the Delaware and Hudson Railway Company Inc.'s line between Sunbury, Pennsylvania, and Schenectady, New York. The assets expected to be sold to NS upon completion of this transaction have been classified as Assets held for sale on the Company's Consolidated Balance Sheets. The assets continue to be reported at their carrying value as this is lower than their expected fair value. The sale to NS, when agreed, will be subject to regulatory approval by the U.S. Surface Transportation Board and is expected to close in 2015.

Legal Proceedings Related To Lac-Mégantic Rail Accident

On July 6, 2013, a train carrying crude oil operated by Montreal Maine and Atlantic Railway ("MM&A") derailed and exploded in Lac-Mégantic, Quebec on a section of railway line owned by MM&A. The previous day CP had interchanged the train to MM&A, and after that interchange MM&A exercised exclusive control over the train.

Following this incident, the Minister of Sustainable Development, Environment, Wildlife and Parks of Quebec issued an order directing certain named parties to recover the contaminants and to clean up and decontaminate the derailment site. CP was added as a named party on August 14, 2013. CP is a party to an administrative appeal with respect to this order. No hearing date on the merits of CP's appeal has been scheduled.

A class action lawsuit has also been filed in the Superior Court of Quebec on behalf of a class of persons and entities residing in, owning or leasing property in, operating a business in or physically present in Lac-Mégantic. The lawsuit seeks damages caused by the derailment including for wrongful deaths, personal injuries, and property damages. CP was added as a defendant on August 16, 2013. The Superior Court of Quebec is not expected to release its judgment on the authorization of the class action before the end of February 2015.

In the wake of the derailment and ensuing litigation, MM&A filed for bankruptcy in Canada and the United States. In an Adversary Proceeding filed by the MM&A U.S. bankruptcy trustee against CP, Irving Oil and the World Fuel entities, CP has been accused of failing to ensure that World Fuel or Irving Oil properly classified the oil lading and of not refusing to ship the oil in DOT-111 tank cars. CP intends to move to withdraw the bankruptcy court reference and will thereafter seek to have the claim against CP dismissed as federally preempted.

In addition, CP has received two damage to cargo notices of claims from the shipper of the oil on the derailed train, Western Petroleum. Western Petroleum has submitted U.S. and Canadian notices of claims for the same damages and, under the Carmack Amendment (the U.S. damage to cargo statute), seeks to recover for all injuries associated with, and indemnification for all claims arising from, the derailment. Both jurisdictions permit a shipper to recover the value of damaged lading against any carrier in the delivery chain, subject to limitations in the carrier's tariffs. CP's tariffs significantly restrict shipper damage claim rights.

At this early stage in the legal proceedings, any potential liability and the quantum of potential loss cannot be determined. Nevertheless, CP denies liability for MM&A's derailment and will vigorously defend itself in the proceedings described above and in any proceeding that may be commenced in the future.

Sale of the Dakota, Minnesota & Eastern Railroad West End

CP announced its intention to explore strategic options for a portion of its main line track of the DM&E, west of Tracy, Minnesota, on December 4, 2012. On January 2, 2014, the Company executed an agreement with G&W for the sale of DM&E West tracks between Tracy, Minnesota and Rapid City, South Dakota, and between Colony, Wyoming and Crawford, Nebraska. DM&E West encompasses approximately 660 miles and the sale closed on May 30, 2014 for U.S. $218 million (CDN $236 million) in gross proceeds.

Changes in Executive Officers

On May 7, 2014, CP announced Chief Executive Officer E. Hunter Harrison agreed to a contract extension with the railway for an additional year, and will remain with the Company until 2017. Effective October 29, 2014, Mr. Laird Pitz was appointed Vice-President and Chief Risk Officer. On January 21, 2015, the Company announced the appointment of Mr. Timothy Marsh as Senior Vice-President Sales and Marketing. Mr. Marsh replaces Jane O'Hagan who left the Company on May 29, 2014. On February 11, 2015, the Company announced that Executive Vice President and Chief Financial Officer Bart Demosky had decided to leave the Company. Mr. Demosky has agreed to stay on until May 31, 2015.

Changes in Board of Directors

Prior to the Company's shareholder meeting on May 1, 2014, it was announced that Mr. Richard Kelly would not stand for re-election as a member of the Company's Board of Directors. On May 1, 2014, the Company announced that Gary Colter was elected Chairman of the Company's Board of Directors. Mr. Colter replaced Paul Haggis who continues to serve as a director of the Company. Effective May 20, 2014, the Hon. Jim Prentice resigned as a member of the Company's Board of Directors. Mr. Prentice had been appointed to the Board on June 7, 2013.

Environmental

Cash payments related to the Company's environmental remediation program, described in Section 23, Critical Accounting Estimates, totaled $8 million in 2014, compared with $9 million in 2013 and $11 million in 2012. Cash payments for environmental initiatives are estimated to be approximately $16 million in 2015, $11 million in 2016, $9 million in 2017 and a total of approximately $57 million over the remaining years through 2024, which will be paid in decreasing amounts. All payments will be funded from general operations.

CP continues to be responsible for remediation work on portions of a property in the State of Minnesota and continues to retain liability accruals for remaining future expected costs. The costs are expected to be incurred over approximately 10 years. The state's voluntary investigation and remediation program will oversee the work to ensure it is completed in accordance with applicable standards.

Certain Other Financial Commitments

In addition to the financial commitments mentioned previously in Section 19, Off-Balance Sheet Arrangements and Section 20, Contractual Commitments, the Company is party to certain other financial commitments set forth in the table and discussed below.

Letters of Credit

Letters of credit are obtained mainly to provide security to third parties under the terms of various agreements, including workers' compensation and supplemental pension. CP is liable for these contractual amounts in the case of non-performance under these agreements. Letters of credit are accommodated through a revolving credit facility and the Company's bi-lateral letter of credit facility.

Capital Commitments

The Company remains committed to maintaining the current high level of plant quality and renewing the franchise. As part of this commitment, CP has entered into contracts with suppliers to make various capital purchases related to track programs. Payments for these commitments are due in 2015 through 2032. These expenditures are expected to be financed by cash generated from operations or by issuing new debt.

At December 31, 2014

Amount of commitments per period (in millions)	**Total**	2015	2016 & 2017	2018 & 2019	2020 & beyond
Commitments					
Letters of credit	**$ 412**	$ 412	$ –	$ –	$ –
Capital commitments	**427**	288	100	21	18
Total commitments	**$ 839**	$ 700	$ 100	$ 21	$ 18

Pension Plan Surplus and Deficit

A description of future expectations related to the Company's pension plans are included in Section 23, Critical Accounting Estimates.

Restructuring

Cash payments related to severance under all restructuring initiatives totaled $21 million in 2014, compared with $33 million in 2013 and $22 million in 2012. Cash payments for restructuring initiatives are estimated to be approximately $12 million in 2015, $6 million in 2016, $3 million in 2017, and a total of approximately $5 million over the remaining years through 2025. These amounts include residual payments to protected employees for previous restructuring plans that have been completed.

22. BUSINESS RISKS

In the normal course of operations, the Company is exposed to various business risks and uncertainties that can have an effect on financial condition. While some financial exposures are reduced through risk management strategies including the insurance and hedging programs CP has in place, there are certain circumstances where the financial risks are not fully insurable or are driven by external factors beyond the Company's influence or control.

As part of the preservation and delivery of value to the Company's shareholders, CP has developed an integrated Enterprise Risk Management framework to support consistent achievement of key business objectives through daily pro-active management of risk. The objective of the program is to actively manage those potential events that are identified through a thorough evaluation of risks. Each event identified is assessed based on the potential impact and likelihood, taking account of financial, environmental, and reputational impacts, and existing management control. Risk mitigation strategies are formulated to accept, treat, transfer, or eliminate the exposure to the identified events. Readers are cautioned that the following is not an exhaustive list of all the risks to which CP is exposed, nor will the Company's mitigation strategies eliminate all risks listed.

Competition

The Company faces significant competition for freight transportation in Canada and the U.S., including competition from other railways, pipelines, trucking and barge companies. Competition is based mainly on price, quality of service and access to markets. Competition with the trucking industry is generally based on freight rates, flexibility of service and transit time performance. The cost structure and service of competitors could impact the Company's competitiveness and have a materially adverse impact on business or operating results. Certain aspects of competition in Canada are also subject to regulation and are discussed further in Regulatory Authorities below.

To mitigate competition risk, the Company's strategies include:

- creating long-term value for customers and shareholders by profitably growing through collaborative supply chain solutions and aligned investments with customers, delivering competitive and reliable service, developing markets that are consistent with the network's strengths, enhancing network capability, and selective use of long-term contracts;
- renewing and maintaining infrastructure to enable safe and efficient operations;
- driving efficiency through the operating plan to reduce costs and enhance the quality and reliability of service; and
- exercising a disciplined yield approach to competitive contract renewals and bids.

Liquidity

Revolving Credit Facility

On September 26, 2014, CP terminated its existing revolving credit facility agreement dated November 29, 2013. On the same day, CP entered into a new revolving credit facility (the "facility") agreement with 15 highly rated financial institutions for a commitment amount of U.S. $2 billion. The facility includes a U.S. $1 billion five years portion and a U.S. $1 billion one year plus one year term out portion. The facility can accommodate draws of cash and/or letters of credit at market competitive pricing. At December 31, 2014, the facility was undrawn. The facility agreement requires the Company not to exceed a maximum debt to total capitalization ratio. At December 31, 2014, the Company satisfied the threshold stipulated in this financial covenant.

Commercial Paper Program

During the fourth quarter of 2014, the Company established a commercial paper program which enabled it to issue commercial paper up to a maximum aggregate principal amount of U.S. $1 billion in the form of unsecured promissory notes. The commercial paper program is backed by a U.S. $1 billion committed, revolving credit facility, which matures on September 26, 2016. As at December 31, 2014, the Company had total commercial paper borrowings of U.S. $675 million ($783 million in Canadian dollars) presented in Long-term debt on the Consolidated Balance Sheets as the Company has the intent and the ability to renew these borrowings on a long-term basis. The weighted-average interest rate on these borrowings was 0.44%. CP did not have a commercial paper program in 2013.

The Company presents issuances and repayments of commercial paper in the Consolidated Statements of Cash Flows on a net basis, all of which have a maturity of less than 90 days.

Bilateral Letter of Credit Facilities

During 2013, the Company entered into a series of committed and uncommitted bilateral letter of credit facility agreements with financial institutions to support its requirement to post letters of credit in the ordinary course of business. The agreements have varying expiration dates with the earliest expiry in August 2014. Under these agreements, the Company has the option to post collateral in the form of cash or cash equivalents, equal at least to the face value of the letter of credit issued. Collateral provided includes highly liquid investments purchased three months or less from maturity and is stated at cost, which approximates market value and is shown separately on the balance sheet as Restricted cash and cash equivalents on the Consolidated Balance Sheets.

At December 31, 2014, under its bilateral facilities the Company had letters of credit drawn of $412 million from a total available amount of $600 million. The Company can largely withdraw this collateral during any month.

Regulatory Authorities

The Company's railway operations are subject to extensive federal laws, regulations and rules in both Canada and the U.S. which directly affect how operations and business activities are managed.

Operations are subject to economic and safety regulation in Canada primarily by the Canadian Transportation Agency ("the Agency"), Transport Canada, the Canada Transportation Act ("CTA") and the Railway Safety Act. The CTA provides shipper rate and service remedies, including Final Offer Arbitration, competitive line rates and compulsory inter-switching in Canada. The Agency regulates the maximum revenue entitlement for the movement of grain, commuter and passenger access, charges for ancillary services and noise-related disputes. Transport Canada regulates safety-related aspects of railway operations in Canada.

The Company's U.S. operations are subject to economic and safety regulation by the STB and Federal Railroad Administration ("FRA"). The STB is an economic regulatory body with jurisdiction over railroad rate and service issues and reviewing proposed railroad mergers and other transactions. The FRA regulates safety-related aspects of CP's railway operations in the U.S. under the Federal Railroad Safety Act, as well as rail portions of other safety statutes.

Various other regulators directly and indirectly affect the Company's operations in areas such as health, safety, security, environmental and other matters. To mitigate statutory and regulatory impacts, CP is actively and extensively engaged throughout the different levels of government and regulators, both directly and indirectly through industry associations, including the Association of American Railroads ("AAR") and the Railway Association of Canada. No assurance can be given to the content, timing or effect on CP of any anticipated legislation or further legislative action.

Regulatory Change

On May 29, 2014, the Canadian Federal Government enacted the "Fair Rail for Grain Farmers Act" (the "Fair Rail Act"). This legislation requires the Company and Canadian National Railway Company to move a minimum amount of grain, which amount is determined by and may be adjusted by the federal cabinet. The federal cabinet has ordered continued weekly grain volume minimums for the period from November 30, 2014 to March 28, 2015. In addition, the Fair Rail Act expands the terms and conditions associated with the inter-switching provisions of the CTA in the provinces of Alberta, Saskatchewan and Manitoba, provides that the Agency make regulations specifying what constitutes operational terms that may be subject to service agreement arbitration and gives the Agency the power to order a railway to compensate any person who has incurred expenses because of a failure to meet obligations under Sections 113 and 114 of the CTA, or does not meet its obligations under the terms of a confidential contract that includes a compensation clause. Bill C-30 also amends the Canada Grain Act to permit the regulation of contracts relating to grain and the arbitration of disputes respecting the provisions of those contracts.

After the tragic accident in Lac-Mégantic, Quebec in July of 2013 involving a non-related short-line railroad, the Government of Canada implemented several measures pursuant to the Rail Safety Act and the Transportation of Dangerous Goods Act. These modifications implemented changes with respect to rules associated with securing unattended trains, the classification of crude oil being imported, handled, offered for transport or transported and the provision of information to municipalities through which dangerous goods are transported by rail. The U.S. federal government has taken similar actions. These changes do not have a material impact on CP's operating practices.

On November 19, 2013, the Agency initiated consultation on the current approach to determining the adequacy of railway third party liability coverage and solicited input on possible improvements to the current regulatory framework. The consultation period ended on May 9, 2014. The Company provided responses to the request for consultation. Based on the input received, the Agency may make changes to its administration of the current regulatory framework, propose revisions to the regulatory framework or consult again with stakeholders on any proposed regulatory changes with respect to railway third party liability coverage.

There is ongoing discussion with Canadian and American regulators concerning amendments to the regulation for the transportation of hazardous commodities including the tank cars used for the transportation of crude oil. The U.S. Pipeline and Hazardous Materials Safety Administration ("PHMSA"), in coordination with the FRA, issued a Notice of Proposed Rulemaking requesting comments on various possible new operational requirements and enhanced tank car standards for trains hauling large volumes of certain flammable liquids. Among other things, PHMSA's proposal calls for rail routing risk assessments; notification to state emergency response commissions; reduced operating speeds; enhanced braking; and enhanced standards for both new and existing tank cars. The AAR filed comments on behalf of the Class I railroads on September 30, 2014.

Transport Canada also issued its proposal to revise tank car standards for comments. It was generally consistent with the U.S. approach but did not include as many varied operating requirements. The Railway Association of Canada filed comments on behalf of its members, including CP, on August 29, 2014. CP does not own any tank cars used for commercial transportation of hazardous commodities.

Security

CP is subject to statutory and regulatory directives in Canada and the U.S. that address security concerns. CP plays a critical role in the North American transportation system. Rail lines, facilities, and equipment, including rail cars carrying hazardous materials, could be direct targets or indirect casualties of terrorist attacks. Regulations by the Department of Transportation and the Department of Homeland Security in the U.S. include speed restrictions, chain of custody and security measures which can impact service and increase costs for the transportation of hazardous materials, especially toxic inhalation materials. Legislative changes in Canada to the Transportation of Dangerous Goods Act are expected to add new security regulatory requirements similar to those in the U.S. In addition, insurance premiums for some or all of the Company's current coverage could increase significantly, or certain coverage may not be available to the Company in the future. While CP will continue to work closely with Canadian and U.S. government agencies, future decisions by these agencies on security matters or decisions by the industry in response to security threats to the North American rail network could have a materially adverse effect on business or operating results.

As the Company strives to ensure customers have unlimited access to North American markets, CP has taken the following steps to provide enhanced security and reduce the risks associated with the cross-border transportation of goods:

- to strengthen the overall supply chain and border security, the Company is a certified carrier in voluntary security programs, such as the Customs-Trade Partnership Against Terrorism and Partners in Protection;
- to streamline clearances at the border, CP has implemented several regulatory security frameworks that focus on the provision of advanced electronic cargo information and improved security technology at border crossings, including the implementation of the Vehicle and Cargo Inspection System at five of the Company's border crossings;
- to strengthen railway security in North America, the Company signed a revised voluntary Memorandum of Understanding with Transport Canada and worked with the AAR to develop and put in place an extensive industry-wide security plan to address terrorism and security-driven efforts seeking to restrict the routings and operational handlings of certain hazardous materials;
- to reduce toxic inhalation risk in high threat urban areas, CP works with the Transportation Security Administration; and
- to comply with U.S. regulations for rail security sensitive materials, CP has implemented procedures to maintain positive chain of custody and are performing annual route assessments to select and use the route posing the least overall safety and security risk.

Positive Train Control

In the U.S., the Rail Safety Improvement Act requires Class I railroads to implement, by December 31, 2015, interoperable PTC on main track in the U.S. that has passenger rail traffic or toxic inhalant hazard commodity traffic. The legislation defines PTC as a system designed to prevent train-to-train collisions, over-speed derailments, incursions into established work zone limits, and the movement of a train through a switch left in the wrong position. The FRA has issued rules and regulations for the implementation of PTC, and CP filed its PTC Implementation Plans in April 2010, which outlined the Company's solution for interoperability as well as its consideration of relative risk in the deployment plan. The Company is participating in industry and government working groups to evaluate the scope of effort that will be required to comply with these regulatory requirements, and to further the development of an industry standard interoperable solution that can be supplied in time to complete deployment. At this time CP estimates the cost to implement PTC as required for railway operations in the U.S. to be up to U.S. $328 million. As at December 31, 2014, total expenditures related to PTC were approximately $210 million, including approximately $26 million and $64 million for the fourth quarter and full year of 2014 respectively, discussed further in Section 14, Liquidity and Capital Resources.

Labour Relations

At December 31, 2014, approximately 77% of CP's workforce was unionized and approximately 75% of its workforce is located in Canada. Unionized employees are represented by a total of 39 bargaining units. Agreements are in place with all seven bargaining units that represent employees in Canada and all 32 bargaining units that represent employees in the Company's U.S. operations.

Canada

All of the Canadian bargaining agreements are in place through at least December 31, 2014. Agreements with unions representing Canadian running trades employees, Teamsters Canada Rail Conference ("TCRC"), and Canadian car and locomotive repair employees, Unifor, expired at the end of 2014. On February 14, 2015, a tentative 4-year agreement was reached with Unifor. On February 16, 2015, the Company and TCRC agreed to enter into binding arbitration after a day and a half work stoppage.

A tentative six year settlement was reached with the Canadian Rail Traffic Controllers on July 17, 2014. This agreement was ratified on August 27, 2014 and comes into effect on January 1, 2015. Agreements with the other four Canadian bargaining units expire at the end of 2017.

U.S.

The Company is party to collective agreements with fourteen bargaining units of the Soo Line subsidiary, thirteen bargaining units of the D&H subsidiary, and five bargaining units of the DM&E subsidiary.

Contracts with all fourteen bargaining units on Soo Line representing train service employees, car repair employees, locomotive engineers, yard supervisors, clerks, machinists, boilermakers and blacksmiths, electricians, sheet metal workers, and mechanical labourers are open for negotiation on January 1, 2015. Meetings have been scheduled with those bargaining units which have served formal notices, which to date include the International Association of Machinist and Aerospace Workers ("IAMAW") (machinists), the Transportation and Communications Union ("TCU") (clerical), the Brotherhood of Locomotive Engineers and Trainmen ("BLE&T") (engineers) and the Sheet Metal Air Rail Transportation – Transportation Division ("SMART-TD") (conductors).

On the D&H, contracts for all thirteen bargaining units, including locomotive engineers, train service employees, car repair employees, signal maintainers, yardmasters, electricians, machinists, mechanical labourers, track maintainers, clerks, police, engineering supervisors and mechanical supervisors are open for negotiation January 1, 2015. Meetings have been scheduled with those bargaining units which have served formal notices, including IAMAW (machinists), TCU (clerical, police, and mechanical and engineering supervisors) and BLE&T (engineers).

Agreements with three of the five bargaining units which cover all DM&E signal and communication workers, mechanics and maintenance of way workers open for negotiation on January 1, 2015. Negotiations, which opened January 1, 2014, continue for the agreement covering engineers and conductors on the former Iowa, Chicago, and Eastern Railroad ("IC&E") portion of DM&E.

An hourly rated agreement was ratified and implemented December 1, 2014 with SMART-TD, and will be amendable on January 1, 2018.

Environmental Laws and Regulations

The Company's operations and real estate assets are subject to extensive federal, provincial, state and local environmental laws and regulations governing emissions to the air, discharges to waters and the handling, storage, transportation and disposal of waste and other materials. If the Company is found to have violated such laws or regulations it could materially affect the Company's business or operating results. In addition, in operating a railway, it is possible that releases of hazardous materials during derailments or other accidents may occur that could cause harm to human health or to the environment. Costs of remediation, damages and changes in regulations could materially affect the Company's operating results and reputation.

The Company has implemented a comprehensive Environmental Management System to facilitate the reduction of environmental risk. CP's annual corporate Operations Environmental Plan states the current environmental goals, objectives and strategies.

Specific environmental programs are in place to address areas such as air emissions, wastewater, management of vegetation, chemicals and waste, storage tanks and fuelling facilities. CP has also undertaken environmental impact assessments and risk assessments to identify, prevent and mitigate environmental risks. There is continued focus on preventing spills and other incidents that have a negative impact on the environment. There is an established Strategic Emergency Response Contractor network and spill equipment kits are located across Canada and the U.S. to ensure a rapid and efficient response in the event of an environmental incident. In addition, emergency preparedness and response plans are regularly updated and tested.

The Company has developed an environmental audit program that comprehensively, systematically and regularly assesses the Company's facilities for compliance with legal requirements and the Company's policies for conformance to accepted industry standards. Included in this is a corrective action follow-up process and semi-annual review by the Safety, Operations and Environment Committee established by the Board of Directors.

CP focuses on key strategies, identifying tactics and actions to support commitments to the community. The Company's strategies include:

- protecting the environment;
- ensuring compliance with applicable environmental laws and regulations;
- promoting awareness and training;
- managing emergencies through preparedness; and
- encouraging involvement, consultation and dialogue with communities along the Company's lines.

Climate Change

In both Canada and the U.S., the federal governments have not designated railway transportation as a large final emitter with respect to greenhouse gas ("GHG") emissions. The railway transportation industry is currently not regulated with respect to GHG emissions, nor does CP operate under a regulated cap of GHG emissions. Growing support for climate change legislation is likely to result in changes to the regulatory framework in Canada and the U.S., however, the timing and specific nature of those changes are difficult to predict. Specific instruments such as carbon taxes, and technical and fuel standards have the ability to significantly affect the Company's capital and operating costs. Restrictions, caps and/or taxes on the emissions of GHG could also affect the markets for, or the volume of, the goods the Company transports.

The fuel efficiency of railways creates a significant advantage over trucking, which currently handles a majority of the market share of ground transportation. Although trains are already three times more fuel efficient than trucks on a per ton-mile basis, the Company continues to adopt new technologies to minimize the Company's fuel consumption and GHG emissions.

Potential physical risks associated with climate change include damage to railway infrastructure due to extreme weather effects, (e.g. increased flooding or winter storms). Improvements to infrastructure design and planning are used to mitigate the potential risks posed by weather events. The Company maintains flood plans, winter operating plans, an avalanche risk management program and geotechnical monitoring of slope stability.

Financial Risks

Pension Funding Volatility

A description of pension funding volatility related to the Company's pension plans are included in Section 23, Critical Accounting Estimates.

Fuel Cost Volatility

Fuel expense constitutes a significant portion of CP's operating costs and can be influenced by a number of factors, including, without limitation, worldwide oil demand, international politics, weather, refinery capacity, unplanned infrastructure failures, labour and political instability and the ability of certain countries to comply with agreed-upon production quotas.

The Company's mitigation strategy consists of fuel cost recovery programs which reflect changes in fuel costs that are included in freight rates. Freight rates will increase when fuel prices rise and will decrease when fuel costs decrease. While fluctuations in fuel cost are mitigated, the risk cannot be completely eliminated due to timing and the volatility in the market.

In the past, to address the residual portion of fuel costs not mitigated by fuel cost recovery programs, CP had an automatic hedging program. As a result of improving coverage from the Company's fuel cost recovery programs, CP exited its hedging program during the first quarter of 2013. Fuel price management is discussed further in Section 18, Financial Instruments.

Foreign Exchange Risk

Although CP conducts business primarily in Canada, a significant portion of its revenues, expenses, assets and liabilities including debt are denominated in U.S. dollars. The value of the Canadian dollar is affected by a number of domestic and international factors, including, without limitation, economic performance, and Canadian, U.S. and international monetary policies. Consequently, the Company's results are affected by fluctuations in the exchange rate between these currencies. On average, a $0.01 weakening (or strengthening) of the Canadian dollar increases (or reduces) EPS by approximately $0.07 per share. On an annualized basis, a $0.01 weakening (or strengthening) of the Canadian dollar positively (or negatively) impacts Freight revenues by approximately $35 million and negatively (or positively) impacts Operating expenses by approximately $16 million. Foreign exchange translation on the Company's U.S. dollar denominated long-term debt is excluded from these sensitivities. To manage this exposure to fluctuations in exchange rates between Canadian and U.S. dollars, CP may sell or purchase U.S. dollar forwards at fixed rates in future periods. In addition, changes in the exchange rate between the Canadian dollar and other currencies (including the U.S. dollar) make the goods transported by the Company more or less competitive in the world marketplace and may in turn positively or negatively affect revenues. Foreign exchange management is discussed further in Section 18, Financial Instruments.

Interest Rate Risk

In order to meet the Company's capital structure requirements, CP may enter into long-term debt agreements. These debt agreements expose CP to increased interest costs on future fixed debt instruments and existing variable rate debt instruments should market rates increase. In addition, the present value of the Company's assets and liabilities will also vary with interest rate changes. To manage interest rate exposure, CP may enter into forward rate agreements such as treasury rate locks or bond forwards that lock in rates for a future date, thereby protecting against interest rate increases. CP may also enter into swap agreements whereby one party agrees to pay a fixed rate of interest while the other party pays a floating rate. Contingent on the direction of interest rates, the Company may incur higher costs depending on the contracted rate. Interest rate management is discussed further in Section 18, Financial Instruments.

General and Other Risks

Transportation of Dangerous Goods and Hazardous Materials

Railways, including CP, are legally required to transport dangerous goods and hazardous materials as part of their common carrier obligations regardless of risk or potential exposure of loss. A train accident involving hazardous materials, including toxic inhalation of hazardous commodities such as chlorine and anhydrous ammonia could result in catastrophic losses from personal injury and property damage, which could have a material adverse effect on CP's operations, financial condition and liquidity.

Legal Proceedings Related to Lac-Mégantic Rail Accident

Legal proceedings related to the tragic accident at Lac-Mégantic, Quebec are discussed in Section 21, Future Trends and Commitments.

Supply Chain Disruptions

The North American transportation system is integrated. CP's operations and service may be negatively impacted by service disruptions of other transportation links such as ports, handling facilities, customer facilities, and other railways. A prolonged service disruption at one of these entities could have a material adverse effect on CP's operations, financial condition and liquidity.

Reliance on Technology and Technological Improvements

Information technology is critical to all aspects of the Company's business. While the Company has business continuity and disaster recovery plans in place, a significant disruption or failure of one or more of the information technology or communications systems could result in service interruptions or other failures and deficiencies which could have a material adverse effect on results of operations, financial condition and liquidity. If CP is unable to acquire or implement new technology, the Company may suffer a competitive disadvantage, which could also have an adverse effect on results of operations, financial condition and liquidity.

Qualified Personnel

Changes in employee demographics, training requirements, and the availability of qualified personnel, particularly locomotive engineers and train-persons, could negatively impact the Company's ability to meet demand for rail service. The Company has workforce planning tools and programs in place and are undertaking technological improvements to assist with manual tasks. Unpredictable increases in the demand for rail services may increase the risk of having insufficient numbers of trained personnel, which could have a material adverse effect on the Company's results of operations, financial condition and liquidity. In addition, changes in operations and other technology improvements may significantly impact the number of employees.

Severe Weather

CP is exposed to severe weather conditions including floods, avalanches, mudslides, extreme temperatures and significant precipitation that may cause business interruptions that can adversely affect the Company's entire rail network and result in increased costs, increased liabilities, and decreased revenue, which could have a material adverse effect on CP's operations, financial condition and liquidity.

Supplier Concentration

Due to the complexity and specialized nature of rail equipment and infrastructure, there can be a limited number of suppliers of this equipment and material available. Should these specialized suppliers cease production or experience capacity or supply shortages, this concentration of suppliers could result in CP experiencing cost increases or difficulty in obtaining rail equipment and materials. While CP manages this risk by sourcing key products and services from multiple suppliers whenever possible, widespread business failures of suppliers could have a material adverse effect on CP's operations, financial condition and liquidity.

General Risks

There are factors and developments that are beyond the influence or control of the railway industry generally and CP specifically which may have a material adverse effect on the Company's business or operating results. The Company's freight volumes and revenues are largely dependent upon the performance of the North American and global economies, which remains uncertain, and other factors affecting the volumes and patterns of international trade. CP's bulk traffic is dominated by grain, metallurgical coal, fertilizers and sulphur. Factors outside of CP's control which affect bulk traffic include:

- with respect to grain volumes, domestic production-related factors such as weather conditions, acreage plantings, yields and insect populations;
- with respect to coal volumes, global steel production;
- with respect to fertilizer volumes, grain and other crop markets, with both production levels and prices being important factors; and
- with respect to sulphur volumes, gas production levels in southern Alberta, industrial production and fertilizer production, both in North America and abroad.

The merchandise commodities transported by the Company include those relating to the forestry, energy, industrial, automotive and other consumer spending sectors. Factors outside of CP's control which affect this portion of CP's business include the general state of the North American economy, with North American industrial production, business investment and consumer spending being the general sources of economic demand. Housing, auto production and energy development are also specific sectors of importance. Factors outside of CP's control which affect the Company's intermodal traffic volumes include North American consumer spending and a technological shift toward containerization in the transportation industry that has expanded the range of goods moving by this means.

Adverse changes to any of the factors outside of CP's control which affect CP's bulk traffic, the merchandise commodities transported by CP or CP's intermodal traffic volumes or adverse changes to fuel prices could have a material adverse effect on CP's operations, financial condition and liquidity.

CP is also sensitive to factors including, but not limited to, natural disasters, security threats, commodity pricing, global supply and demand, and supply chain efficiency. Other business risks include: potential increases in maintenance and operational costs, uncertainties of litigation, risks and liabilities arising from derailments and technological changes.

23. CRITICAL ACCOUNTING ESTIMATES

To prepare consolidated financial statements that conform with GAAP, the Company is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reported periods. Using the most current information available, the Company reviews estimates on an ongoing basis, including those related to environmental liabilities, pensions and other benefits, property, plant and equipment, deferred income taxes, legal and personal injury liabilities and goodwill.

The development, selection and disclosure of these estimates, and this MD&A, have been reviewed by the Board of Directors' Audit Committee, which is comprised entirely of independent directors.

Environmental Liabilities

CP estimates the probable cost to be incurred in the remediation of property contaminated by past railway use. The Company screens and classifies sites according to typical activities and scale of operations conducted, and develops remediation strategies for each property based on the nature and extent of the contamination, as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants. CP also considers available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and ground water. The details of the estimates reflect the environmental liability at each property. The Company is committed to fully meeting regulatory and legal obligations with respect to environmental matters.

Liabilities for environmental remediation may change from time to time as new information about previously untested sites becomes known. The net liability may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, are not expected to be material to the Company's financial position, but may materially affect income in the period in which a charge is recognized. Material increases to costs would be reflected as increases to Other long-term liabilities and Accounts payable and accrued liabilities on the Company's Consolidated Balance Sheets and to Purchased services and other within Operating expenses on the Consolidated Statements of Income.

At December 31, 2014 and 2013, the accrual for environmental remediation on the Company's Consolidated Balance Sheets amounted to $91 million and $90 million respectively, of which the long-term portion amounting to $75 million in 2014 and $76 million in 2013 was included in Other long-term liabilities and the short-term portion amounting to $16 million in 2014 and $14 million in 2013 was included in Accounts payable and accrued liabilities. Total payments were $8 million in 2014 and $9 million in 2013. The U.S. dollar-denominated portion of the liability was affected by the change in FX, resulting in an increase in environmental liabilities of $6 million in 2014 and $4 million in 2013.

Pensions and Other Benefits

CP has defined benefit and defined contribution pension plans. Other benefits include post-retirement medical and life insurance for pensioners, and some post-employment workers' compensation and long-term disability benefits in Canada. Workers' compensation and long-term disability benefits are discussed in the Legal and Personal Injury Liabilities section below. Pension and post-retirement benefits liabilities are subject to various external influences and uncertainties.

Pension costs are actuarially determined using the projected-benefit method prorated over the credited service periods of employees. This method incorporates best estimates of expected plan investment performance, salary escalation and retirement ages of employees. The expected return on fund assets is calculated using market-related asset values developed from a five-year average of market values for the fund's public equity securities and absolute return strategies (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the fund's fixed income, real estate and infrastructure securities, subject to the market-related asset value not being greater than 120% of the market value nor being less than 80% of the market value.

The discount rate used to determine the benefit obligation is based on market interest rates on high-quality corporate debt instruments with matching cash flows. Unrecognized actuarial gains and losses in excess of 10% of the greater of the benefit obligation and the market-related value of plan assets are amortized over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 10 years). Prior service costs arising from collectively bargained amendments to pension plan benefit provisions are amortized over the term of the applicable union agreement. Prior service costs arising from all other sources are amortized over the expected average remaining service period of active employees who were expected to receive benefits under the plan at the date of amendment.

The obligations with respect to post-retirement benefits, including health care and life insurance, are actuarially determined and are accrued using the projected-benefit method prorated over the credited service periods of employees. The obligations with respect to post-employment benefits, including some workers' compensation and long-term disability benefits in Canada are the actuarial present value of benefits payable to employees with existing claims for injuries or disability.

Pension Liabilities and Pension Assets

The Company included pension benefit liabilities of $279 million in Pension and other benefit liabilities and $9 million in Accounts payable and accrued liabilities on the Company's December 31, 2014 Consolidated Balance Sheets. The Company also included post-retirement benefits accruals

of $387 million in Pension and other benefit liabilities and $20 million in Accounts payable and accrued liabilities on the Company's December 31, 2014 Consolidated Balance Sheets. Accruals for self-insured workers compensation and long-term disability benefit plans, including $89 million in Pension and other benefit liabilities, are discussed in the Legal and Personal Injury Liabilities section below.

The Company included pension benefit assets of $304 million in Pension assets on the Company's December 31, 2014 Consolidated Balance Sheets.

Net Periodic Benefit Costs

Net periodic benefit costs for pensions and post-retirement benefits were included in Compensation and benefits on the December 31, 2014 Consolidated Statement of Income. Combined net periodic benefit credits for pensions and post-retirement benefits (excluding self-insured workers compensation and long-term disability benefits) were $19 million in 2014, compared with net periodic benefit costs of $77 million in 2013.

Net periodic benefit credits for pensions were $44 million in 2014, compared with net periodic benefit costs of $50 million in 2013. The benefit credit portion related to defined benefit pensions was $52 million in 2014, compared with the benefit cost portion of $43 million in 2013. The benefit cost portion related to defined contribution pensions (equal to contributions) was $8 million in 2014, compared with $7 million for 2013. Net periodic benefit costs for post-retirement benefits were $25 million in 2014, compared with $27 million in 2013.

CP estimates net periodic benefit costs for defined benefit pensions to be approximately $45 million in 2015, and net periodic benefit costs for defined contribution pensions to be approximately $8 million in 2015. Net periodic benefit costs for post-retirement benefits in 2015 are not expected to differ materially from the 2014 costs.

Pension Plan Contributions

The Company made contributions of $80 million to the defined benefit pension plans in 2014, compared with $98 million in 2013.

The Company's main Canadian defined benefit pension plan accounts for 96% of CP's pension obligation and can produce significant volatility in pension funding requirements, given the pension fund's size, the many factors that drive the pension plan's funded status, and Canadian statutory pension funding requirements. 2011, 2010 and 2009 contributions included voluntary prepayments of $600 million in December 2011, $650 million in September 2010 and $500 million in December 2009 to the Company's main Canadian defined benefit pension plan. CP continues to have significant flexibility with respect to the rate at which these voluntary prepayments are applied to reduce future years' pension contribution requirements, which allows us to manage the volatility of future pension funding requirements.

CP estimates its aggregate pension contributions, including its defined benefit and defined contribution plan, to be in the range of $90 million to $100 million in 2015, and in the range of $60 million to $110 million per year from 2016 to 2018. These estimates reflect the Company's current intentions with respect to the rate at which CP will apply the 2009, 2010 and 2011 voluntary prepayments against contribution requirements in the next few years.

Future pension contributions will be highly dependent on the Company's actual experience with such variables as investment returns, interest rate fluctuations and demographic changes, on the rate at which previous years' voluntary prepayments are applied against pension contribution requirements, and on any changes in the regulatory environment. CP will continue to make contributions to the pension plans that, at a minimum, meet pension legislative requirements.

Pension Plan Risks

Fluctuations in the liability and net periodic benefit costs for pensions result from favourable or unfavourable investment returns and changes in long-term interest rates. The impact of favourable or unfavourable investment returns is moderated by the use of a market-related asset value for the main Canadian defined benefit pension plan's public equity securities and absolute return strategies. The impact of changes in long-term rates on pension obligations is partially offset by their impact on the pension funds' investments in fixed income assets.

The plans' investment policy provides a target allocation of approximately 46% of the plans' assets to be invested in public equity securities. As a result, stock market performance is a key driver in determining the pension funds' asset performance. If the rate of investment return on the plans' public equity securities in 2014 had been 10 percentage points higher (or lower) than the actual 2014 rate of investment return on such securities, 2015 net periodic benefit costs for pensions would be lower (or higher) by $22 million.

Changes in bond yields can result in changes to discount rates and to changes in the value of fixed income assets. If the discount rate as at December 31, 2014 had been higher (or lower) by 0.1% with no related changes in the value of the pension funds' investment in fixed income assets, 2015 net periodic benefit costs for pensions would be lower (or higher) by $13 million. However, a change in bond yields would also lead to a change in the value of the pension funds' investment in fixed income assets, and this change would partially offset the impact to net periodic benefit costs noted above.

The Company estimates that an increase in the discount rate of 0.1% would decrease the defined benefit pension plans' projected benefit obligations by approximately $155 million, and estimates that a decrease in the discount rate of 0.1% would increase the defined benefit pension plans' projected benefit obligations by approximately $158 million. Similarly, for every 0.1% the actual return on assets varies above (or below) the estimated return for the year, the value of the defined benefit pension plans' assets would increase (or decrease) by approximately $11 million.

Adverse experience with respect to these factors could eventually increase funding and pension expense significantly, while favourable experience with respect to these factors could eventually decrease funding and pension expense significantly.

Fluctuations in the post-retirement benefit obligation also can result from changes in the discount rate used. A 0.1% increase (decrease) in the discount rate would decrease (increase) the obligation by approximately $6 million.

CP continues to review its pensioner mortality experience to ensure that the mortality assumption continues to be appropriate, or to determine what changes to the assumption is needed.

In 2014, the Canadian Institute of Actuaries and the Society of Actuaries each published updated mortality tables based on broad pension plan experience in Canada and the U.S., respectively. CP's obligations for defined benefit pension and post-retirement benefit plans at December 31, 2014 are based on these new mortality tables, with adjustments to reflect actual plan mortality experience to the extent that credible experience data was available. The changes to the new mortality tables increased the obligations for pensions and post-retirement benefits by approximately $225 million.

During 2014, the Board of Directors' Finance Committee approved changes to the asset allocation policy, including new allocation ranges of 35% to 55% public equity, 20% to 40% fixed income, 4% to 20% real estate and infrastructure, and up to 18% absolute return strategies.

Property, Plant and Equipment

The Company follows the group depreciation method under which a single depreciation rate is applied to the total cost in a particular class of property, despite differences in the service life or salvage value of individual properties within the same class. CP performs depreciation studies of each property group approximately every three years to update depreciation rates. The depreciation studies are based on statistical analysis of historical retirements of properties in the group and incorporate engineering estimates of changes in current operations and of technological advances. CP depreciates the cost of properties, net of salvage, on a straight-line basis over the estimated useful life of the property group. The estimates of economic lives are uncertain and can vary due to technological changes or in the rate of wear. Additionally, the depreciation rates are updated to reflect the change in residual values of the assets in the class. Under the group depreciation method, retirements or disposals of properties in the normal course of business are accounted for by charging the cost of the property less any net salvage to accumulated depreciation. For the sale or retirement of larger groups of depreciable assets that are unusual and were not included in the Company's depreciation studies, CP records a gain or loss for the difference between net proceeds and net book value of the assets sold or retired.

Due to the capital intensive nature of the railway industry, depreciation represents a significant part of operating expenses. The estimated useful lives of properties have a direct impact on the amount of depreciation recorded as a component of Properties on the Company's Consolidated Balance Sheets. At December 31, 2014 and 2013, accumulated depreciation was $6,505 million and $6,184 million respectively.

Revisions to the estimated useful lives and net salvage projections for properties constitute a change in accounting estimate and are addressed prospectively by amending depreciation rates. It is anticipated that there will be changes in the estimates of weighted average useful lives and net salvage for each property group as assets are acquired, used and retired. Substantial changes in either the useful lives of properties or the salvage assumptions could result in significant changes to depreciation expense. For example, if the estimated average life of road locomotives, the largest asset group, increased (or decreased) by 5%, annual depreciation expense would decrease (or increase) by approximately $3 million.

The Company reviews the carrying amounts of properties when circumstances indicate that such carrying amounts may not be recoverable based on future undiscounted cash flows. When such properties are determined to be impaired, recorded asset values are revised to their fair values and an impairment loss is recognized.

Deferred Income Taxes

CP accounts for deferred income taxes based on the liability method. This method focuses on a Company's balance sheet and the temporary differences otherwise calculated from the comparison of book versus tax values. It is assumed that such temporary differences will be settled in the deferred income tax assets and liabilities at the balance sheet date.

In determining deferred income taxes, the Company makes estimates and assumptions regarding deferred tax matters, including estimating the timing of the realization and settlement of deferred income tax assets (including the benefit of tax losses) and liabilities. Deferred income taxes are calculated using enacted federal, provincial, and state future income tax rates, which may differ in future periods.

A deferred income tax expense of $354 million was included in Income tax expense for 2014 and $212 million was included in Income tax expense in 2013. The increase in deferred income tax expense in 2014 was primarily due to higher pre-tax income and the asset impairment charge in 2013. At December 31, 2014 and 2013, deferred income tax liabilities of $2,773 million and $2,903 million, respectively, were recorded as a long-term liability and are comprised largely of temporary differences related to accounting for properties. Deferred income tax benefits of $56 million realizable within one year were recorded as a current asset, compared to $344 million in 2013.

Legal and Personal Injury Liabilities

The Company is involved in litigation in Canada and the U.S. related to CP's business. Management is required to establish estimates of the potential liability arising from incidents, claims and pending litigation, including personal injury claims and certain occupation-related and property damage claims.

Accruals for incidents, claims and litigation, including WCB accruals, totaled $156 million, net of insurance recoveries, at December 31, 2014 and $158 million at December 31, 2013. At December 31, 2014 and 2013 respectively, the total accrual included $89 million and $89 million in Pension and other benefit liabilities, $15 million and $14 million in Other long-term liabilities and $53 million and $63 million in Accounts payable and accrued liabilities, partially offset by $nil and $7 million in Accounts receivable, and $1 million and $1 million in Other assets.

Legal Liabilities

These estimates are determined on a case-by-case basis. They are based on an assessment of the actual damages incurred and current legal advice with respect to settlements in other similar cases. CP employs experienced claims adjusters who investigate and assess the validity of individual claims made against us and estimate the damages incurred.

A provision for incidents, claims or litigation is recorded based on the facts and circumstances known at the time. CP accrues for likely claims when the facts of an incident become known and investigation results provide a reasonable basis for estimating the liability. The lower end of the range is accrued if the facts and circumstances permit only a range of reasonable estimates and no single amount in that range is a better estimate than any other. Additionally, for administrative expediency, a general provision for lesser value injury cases is kept. Facts and circumstances related to asserted claims can change, and a process is in place to monitor accruals for changes in accounting estimates.

Personal Injury Liabilities

With respect to claims related to occupational health and safety in the provinces of Quebec, Ontario, Manitoba and B.C., claims administered through the WCB are actuarially determined. In the provinces of Saskatchewan and Alberta, the Company is assessed for an annual WCB contribution. As a result, this amount is not subject to estimation by management.

Railway employees in the U.S. are not covered by a workers' compensation program, but are covered by U.S. federal law for railway employees. For accrual purposes, a combination of case-by-case analysis and statistical analysis is utilized.

Provisions for incidents, claims and litigation charged to income, which are included in Purchased services and other on the Consolidated Statements of Income, amounted to $29 million in 2014 and $40 million in 2013.

Goodwill

As part of the acquisition of DM&E in 2007, CP recognized goodwill of U.S. $147 million on the allocation of the purchase price, determined as the excess of the purchase price over the fair value of the net assets acquired. Since the acquisition, the operations of DM&E have been integrated with CP's U.S. operations and the related goodwill is allocated to CP's U.S. reporting unit. Goodwill is tested for impairment at least once per year as at October 1st. The goodwill impairment test determines if the fair value of the reporting unit continues to exceed its net book value, or whether an impairment charge is required. The fair value of the reporting unit is affected by projections of its profitability including estimates of revenue growth, which are inherently uncertain.

The 2014 and 2013 annual test for impairment determined that the fair value of CP's U.S. reporting unit exceeded the carrying value of the allocated goodwill by approximately 102% and 47%, respectively.

The impairment test was performed primarily using an income approach based on discounted cash flows. A discount rate of 10.0% was used, based on the Company's weighted average cost of capital. The 2013 impairment test also used a discount rate of 10.0%. A change in discount rates of 0.25% would change the valuation by 4.0% to 4.4%. The valuation used revenue growth projections ranging from 4.0% to 14.8% annually. The revenue growth projection in the 2013 impairment test was 4.0% to 7.4%. A change in the long term growth rate of 0.25% would change the valuation by 2.5% to 2.75%. A secondary approach used in the valuation was a market approach which included a comparison of implied earnings multiples of CP U.S. to trading earnings multiples of comparable companies. The derived value of CP U.S. using the income approach compared favourably with the trading multiples of other Class I railroads. The income approach was chosen over the market approach; however, both approaches conclude that the assets of CP U.S. are fairly valued.

Decreases to the profit projections, which could be caused by a prolonged economic recession, or increases to the discount rate used in the valuation, could require an impairment in future periods. The carrying value of CP's goodwill changes from period to period due to changes in the exchange rate. At December 31, 2014, goodwill was $164 million and was $150 million in 2013, the increase was primarily due to the favourable impact of the change in FX partially offset by the portion of goodwill effectively disposed with the sale of the DM&E West, discussed further in Section 9, Operating Expenses.

24. SYSTEMS, PROCEDURES AND CONTROLS

The Company's Chief Executive Officer and Chief Financial Officer are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the U.S. Securities Exchange Act of 1934 (as amended)) to ensure that material information relating to the Company is made known to them. The Chief Executive Officer and Chief Financial Officer have a process to evaluate these disclosure controls and are satisfied that they are effective for ensuring that such material information is made known to them.

25. 2014 GUIDANCE UPDATES

2014 Guidance

In the 2013 annual MD&A, the Company outlined that it expected revenue growth to be 6-7%, operating ratio to be 65% or lower and Diluted earnings per share ("EPS") growth to be 30% or greater from 2013 annual Diluted EPS, excluding significant items, of $6.42. CP also outlined that it expected to spend approximately $1.2 billion to $1.3 billion on capital programs in 2014.

Variance from 2014 Guidance

The Company's 2014 actual results for revenue growth, Operating ratio, and adjusted EPS growth were in line with the latest guidance as disclosed by the Company. Revenue growth was 8%, operating ratio was 64.7%, and adjusted EPS was $8.50, an increase of 32%. Adjusted operating ratio and adjusted EPS are discussed further in Section 15, Non-GAAP Measures. Capital expenditures of $1.4 billion were higher than guidance, discussed further in Section 14, Liquidity and Capital Resources.

26. GLOSSARY OF TERMS

AAR: Association of American Railroads, representing North America's freight railroads and Amtrak.

Agency: The Canadian Transportation Agency, a regulatory agency under the Canada Transportation Act ("CTA"). The Agency regulates the grain revenue cap, commuter and passenger access, Final Offer Arbitration, and charges for ancillary services and railway noise.

Average terminal dwell: The average time a freight car resides within terminal boundaries expressed in hours. The timing starts with a train arriving in the terminal, a customer releasing the car to the Company, or a car arriving that is to be transferred to another railway. The timing ends when the train leaves, a customer receives the car from CP or the freight car is transferred to another railway. Freight cars are excluded if they are being stored at the terminal or used in track repairs.

Average train length – excluding local traffic: The average train length is the sum of each car and locomotive's equipment length multiplied by the distance travelled, divided by train miles. Local trains are excluded from this measure.

Average train speed: The average speed measures the line-haul movement from origin to destination including terminal dwell hours calculated by dividing the total train miles traveled by the total hours operated. This calculation does not include delay time related to customer or foreign railways and excludes the travel time and distance traveled by: i) trains used in or around CP's yards; ii) passenger trains; and iii) trains used for repairing track.

Average train weight – excluding local traffic: The average gross weight of CP trains, both loaded and empty. This excludes trains in short haul service, work trains used to move CP's track equipment and materials and the haulage of other railways' trains on CP's network.

Car miles per car day: The total car-miles for a period divided by the total number of active cars. Total car-miles include the distance travelled by every car on a revenue-producing train and a train used in or around the Company's yards. A car-day is assumed to equal one active car-day. An active car is a revenue-producing car that is generating costs to CP on an hourly or mileage basis. Excluded from this count are i) cars that are not on the track or are being stored; ii) cars that are in need of repair; iii) cars that are used to carry materials for track repair; iv) cars owned by customers that are on the customer's tracks; and v) cars that are idle and waiting to be reclaimed by CP.

Carloads: Revenue-generating shipments of containers, trailers and freight cars.

Casualty expenses: Includes costs associated with personal injuries, freight and property damages, and environmental mishaps.

Class I railroads: a railroad earning a minimum of U.S. $452.7 million in revenues annually as defined by the Surface Transportation Board in the United States.

CP, the Company: CPRL, CPRL and its subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL's subsidiaries, as the context may require.

CPRL: Canadian Pacific Railway Limited.

D&H: Delaware and Hudson Railway Company, Inc., a wholly owned indirect U.S. subsidiary of CPRL.

DM&E: Dakota, Minnesota & Eastern Railroad Corporation, a wholly owned indirect U.S. subsidiary of CPRL.

Employee: An individual, including trainees, who has worked more than 40 hours in a standard biweekly pay period. This excludes part time employees, contractors, and consultants.

FRA: U.S. Federal Railroad Administration, a regulatory agency whose purpose is to promulgate and enforce rail safety regulations; administer railroad assistance programs; conduct research and development in support of improved railroad safety and national rail transportation policy; provide for the rehabilitation of Northeast Corridor rail passenger service; and consolidate government support of rail transportation activities.

FRA personal injury rate per 200,000 employee-hours: The number of personal injuries multiplied by 200,000 and divided by total employee hours. Personal injuries are defined as injuries that require employees to lose time away from work, modify their normal duties or obtain medical treatment beyond minor first aid. FRA Employee-hours are the total hours worked, excluding vacation and sick time, by all employees, excluding contractors.

FRA train accidents rate: The number of train accidents, multiplied by 1,000,000 and divided by total train-miles. Train accidents included in this metric meet or exceed the FRA reporting threshold of U.S. $10,500 or CDN $11,000 in damage.

Freight revenue per carload: The amount of freight revenue earned for every carload moved, calculated by dividing the freight revenue for a commodity by the number of carloads of the commodity transported in the period.

Freight revenue per RTM: The amount of freight revenue earned for every RTM moved, calculated by dividing the total freight revenue by the total RTMs in the period.

FX or Foreign Exchange: The value of the Canadian dollar relative to the U.S. dollar (exclusive of any impact on market demand).

GAAP: Accounting principles generally accepted in the United States of America.

GTMs or gross ton-miles: The movement of total train weight over a distance of one mile. Total train weight is comprised of the weight of the freight cars, their contents and any inactive locomotives. An increase in GTMs indicates additional workload.

Locomotive productivity: The daily average GTMs divided by the active road horsepower. Active road horsepower excludes locomotives in yard and short haul service, in repair status, in storage and in use on other railways.

Operating income: Calculated as total revenues less total operating expenses and is a common measure of profitability used by management.

Operating ratio: The ratio of total operating expenses to total revenues. A lower percentage normally indicates higher efficiency.

RTMs or revenue ton-miles: The movement of one revenue-producing ton of freight over a distance of one mile.

Soo Line: Soo Line Railroad Company, a wholly owned indirect U.S. subsidiary of CPRL.

STB: U.S. Surface Transportation Board, a regulatory agency with jurisdiction over railway rate and service issues and rail restructuring, including mergers and sales.

U.S. gallons of locomotive fuel consumed per 1,000 GTMs: The total fuel consumed in freight and yard operations, including yard and commuter service, but excluding fuel used in capital projects and other non-freight activities, for every 1,000 GTMs traveled. This is calculated by dividing the total amount of fuel issued to the Company's locomotives, by the total freight-related GTMs. The result indicates how efficiently CP is using fuel.

Workforce: The total employees plus part time employees, contractors and consultants.

Canadian Pacific Railway Limited
CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2014

Accounting Principles Generally Accepted In the United States of America

Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The information in this report is the responsibility of management. The consolidated financial statements have been prepared by management in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include some amounts based on management's best estimates and careful judgment. The consolidated financial statements include the accounts of Canadian Pacific Railway Limited, Canadian Pacific Railway Company and all of its subsidiaries (the "Company" or "CP"). The financial information of the Company included in the Company's Annual Report is consistent with that in the consolidated financial statements. The consolidated financial statements have been approved by the Board of Directors.

Our Board of Directors is responsible for reviewing and approving the consolidated financial statements and for overseeing management's performance of its financial reporting responsibilities. The Board of Directors carries out its responsibility for the consolidated financial statements principally through its Audit Committee (the "Audit Committee"), consisting of four members, all of whom are independent directors. The Audit Committee reviews the consolidated financial statements with management and the Independent Registered Public Accounting Firm prior to submission to the Board for approval. The Audit Committee meets regularly with management, internal auditors, and the Independent Registered Public Accounting Firm to review accounting policies, and financial reporting. The Audit Committee also reviews the recommendations of both the Independent Registered Public Accounting Firm and the Company's internal auditors for improvements to internal controls, as well as the actions of management to implement such recommendations. The internal auditors and Independent Registered Public Accounting Firm have full access to the Audit Committee, with or without the presence of management.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of the Company's internal control over financial reporting in accordance with the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *"Internal Control-Integrated Framework (2013)"*. Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2014.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2014 has been audited by Deloitte LLP, Independent Registered Public Accounting Firm, as stated in their report, which is included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Canadian Pacific Railway Limited:

We have audited the accompanying consolidated financial statements of Canadian Pacific Railway Limited and subsidiaries (the "Company"), which comprise the consolidated balance sheets as at December 31, 2014 and December 31, 2013, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of cash flows, and consolidated statements of changes in shareholders' equity for each of the years in the three-year period ended December 31, 2014, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Canadian Pacific Railway Limited and subsidiaries as at December 31, 2014 and December 31, 2013 and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014 in accordance with accounting principles generally accepted in the United States of America.

Other Matter

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2014, based on the criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 23, 2015 expressed an unqualified opinion on the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Canadian Pacific Railway Limited:

We have audited the internal control over financial reporting of Canadian Pacific Railway Limited and subsidiaries (the "Company") as of December 31, 2014, based on the criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as at and for the year ended December 31, 2014 of the Company and our report dated February 23, 2015 expressed an unmodified opinion on those financial statements.

CANADIAN PACIFIC RAILWAY LIMITED
Notes to Consolidated Financial Statements
December 31, 2014

Canadian Pacific Railway Limited ("CPRL"), through its subsidiaries (collectively referred to as "CP" or "the Company"), operates a transcontinental railway in Canada and the United States. CP provides rail and intermodal transportation services over a network of approximately 13,700 miles, serving the principal business centres of Canada from Montreal, Quebec, to Vancouver, British Columbia, and the U.S. Northeast and Midwest regions. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company's market reach east of Montreal in Canada, throughout the U.S. and into Mexico. CP transports bulk commodities, merchandise freight and intermodal traffic. Bulk commodities include grain, coal, fertilizers and sulphur. Merchandise freight consists of finished vehicles and automotive parts, as well as forest and industrial and consumer products. Intermodal traffic consists largely of retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

1 Summary of significant accounting policies

Generally accepted accounting principles in the United States of America ("GAAP")

These consolidated financial statements are expressed in Canadian dollars and have been prepared in accordance with GAAP.

Principles of consolidation

These consolidated financial statements include the accounts of CP and all its subsidiaries. The Company's investments in which it has significant influence are accounted for using the equity method. All intercompany accounts and transactions have been eliminated.

Use of estimates

The preparation of these consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the year, the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements. Management regularly reviews its estimates, including those related to environmental liabilities, pensions and other benefits, depreciable lives of properties, goodwill, deferred income tax assets and liabilities, as well as legal and personal injury liabilities based upon currently available information. Actual results could differ from these estimates.

Principal subsidiaries

The following list sets out CPRL's principal railway operating subsidiaries, including the jurisdiction of incorporation. All of these subsidiaries are wholly owned, directly or indirectly, by CPRL as at December 31, 2014.

Principal subsidiary	Incorporated under the laws of
Canadian Pacific Railway Company	Canada
Soo Line Railroad Company ("Soo Line")	Minnesota
Delaware and Hudson Railway Company, Inc. ("D&H")	Delaware
Dakota, Minnesota & Eastern Railroad Corporation ("DM&E")	Delaware
Mount Stephen Properties Inc. ("MSP")	Canada

Revenue recognition

Railway freight revenues are recognized based on the percentage of completed service method. The allocation of revenue between reporting periods is based on the relative transit time in each reporting period with expenses recognized as incurred. Volume rebates to customers are accrued as a reduction of freight revenues based on estimated volume and contract terms as freight service is provided. Other revenues, including passenger revenue, revenue from leasing certain assets, switching fees, and revenue from logistics services, are recognized as service is performed or contractual obligations are met. Revenues are presented net of taxes collected from customers and remitted to government authorities.

Cash and cash equivalents

Cash and cash equivalents include highly-liquid short-term investments that are readily convertible to cash with original maturities of three months or less, but exclude cash and cash equivalents subject to restrictions.

Restricted cash and cash equivalents

Cash and cash equivalents that are restricted as to withdrawal or usage, in accordance with specific agreements, are presented as restricted cash and cash equivalents on the balance sheets.

Foreign currency translation

Assets and liabilities denominated in foreign currencies, other than those held through foreign subsidiaries, are translated into Canadian dollars at the year-end exchange rate for monetary items and at the historical exchange rates for non-monetary items. Foreign currency revenues and expenses are translated at the exchange rates in effect on the dates of the related transactions. Foreign exchange gains and losses, other than those arising from the translation of the Company's net investment in foreign subsidiaries, are included in income.

The accounts of the Company's foreign subsidiaries are translated into Canadian dollars using the year-end exchange rate for assets and liabilities and the average exchange rates during the year for revenues, expenses, gains and losses. Foreign exchange gains and losses arising from the translation of these foreign subsidiaries' accounts are included in "Other comprehensive (loss) income". The majority of U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. As a result, unrealized foreign exchange ("FX") gains and losses on U.S. dollar-denominated long-term debt, designated as a hedge, are offset against foreign exchange gains and losses arising from the translation of foreign subsidiaries' accounts in "Other comprehensive (loss) income".

Pensions and other benefits

Pension costs are actuarially determined using the projected-benefit method prorated over the credited service periods of employees. This method incorporates management's best estimates of expected plan investment performance, salary escalation and retirement ages of employees. The expected return on fund assets is calculated using market-related asset values developed from a five-year average of market values for the fund's public equity securities and absolute return strategies (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the fund's fixed income, real estate and infrastructure securities, subject to the market-related asset value not being greater than 120% of the market value nor being less than 80% of the market value. The discount rate used to determine the projected benefit obligation is based on blended market interest rates on high-quality corporate debt instruments with matching cash flows. Unrecognized actuarial gains and losses in excess of 10% of the greater of the benefit obligation and the market-related value of plan assets are amortized over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 10 years). Prior service costs arising from collectively bargained amendments to pension plan benefit provisions are amortized over the term of the applicable union agreement. Prior service costs arising from all other sources are amortized over the expected average remaining service period of active employees who are expected to receive benefits under the plan at the date of amendment.

Costs for post-retirement and post-employment benefits other than pensions, including post-retirement health care and life insurance and some workers' compensation and long-term disability benefits in Canada, are actuarially determined on a basis similar to pension costs.

The over or under funded status of defined benefit pension and other post-retirement benefit plans are measured as the difference between the fair value of the plan assets and the benefit obligation, and are recognized on the balance sheets. In addition, any unrecognized actuarial gains and losses and prior service costs and credits that arise during the period are recognized as a component of "Other comprehensive (loss) income", net of tax.

Gains and losses on post-employment benefits that do not vest or accumulate, including some workers' compensation and long-term disability benefits in Canada, are included immediately in income as "Compensation and benefits".

Materials and supplies

Materials and supplies are carried at the lower of average cost or market and consist primarily of fuel and parts used in the repair and maintenance of track structures, equipment, locomotives and freight cars.

Properties

Fixed asset additions and major renewals are recorded at cost, including direct costs, attributable indirect costs and carrying costs, less accumulated depreciation and any impairment. When there is a legal obligation associated with the retirement of property, a liability is initially recognized at its fair value and a corresponding asset retirement cost is added to the gross book value of the related asset and amortized to expense over the estimated term to retirement. The Company reviews the carrying amounts of its properties whenever changes in circumstances indicate that such carrying amounts may not be recoverable based on future undiscounted cash flows. When such properties are determined to be impaired, recorded asset values are revised to their fair value.

The Company recognizes expenditures as additions to properties or operating expenses based on whether the expenditures increase the output or service capacity, lower the associated operating costs or extend the useful life of the properties and whether the expenditures exceed minimum physical and financial thresholds.

Much of the additions to properties, both new and replacement properties, are self-constructed. These are initially recorded at cost, including direct costs and attributable indirect costs, overheads and carrying costs. Direct costs include, among other things, labour costs, purchased services, equipment costs and material costs. Attributable indirect costs and overheads include incremental long-term variable costs resulting from the execution of capital projects. Indirect costs include largely local crew facilities, highway vehicles, work trains and area management costs. Overheads primarily include a portion of the cost of the Company's engineering department which plans, designs and administers these capital projects. These costs are allocated to projects by applying a measure consistent with the nature of the cost based on cost studies. For replacement properties, the project costs are allocated to dismantling and installation based on cost studies. Dismantling work is performed concurrently with the installation.

Ballast programs including undercutting, shoulder ballasting and renewal programs which form part of the annual track program are capitalized as this work, and the related added ballast material, significantly improves drainage which in turn extends the life of ties and other track materials. These costs are tracked separately from the underlying assets and depreciated over the period to the next estimated similar ballast program. Spot replacement of ballast is considered a repair which is expensed as incurred.

The costs of large refurbishments are capitalized and locomotive overhauls are expensed as incurred, except where overhauls represent a betterment of the locomotive in which case costs are capitalized.

The Company capitalizes development costs for major new computer systems.

The Company follows group depreciation which groups assets which are similar in nature and have similar economic lives. The property groups are depreciated on a straight-line basis reflecting their expected economic lives determined by studies of historical retirements of properties in the group and engineering estimates of changes in current operations and of technological advances. Actual use and retirement of assets may vary from current estimates, which would impact the amount of depreciation expense recognized in future periods. Rail and other track material in the U.S. are depreciated based directly on usage.

When depreciable property is retired or otherwise disposed of in the normal course of business, the book value, less net salvage proceeds, is charged to accumulated depreciation and if different than the assumptions under the depreciation study could potentially result in adjusted depreciation expense over a period of years. However, when removal costs exceed the salvage value on assets and the Company has no legal obligation to remove the assets, the removal costs incurred are charged to income in the period in which the assets are removed and are not charged to accumulated depreciation.

For the sale or retirement of larger groups of depreciable assets that are unusual and were not considered in depreciation studies, CP records a gain or loss for the difference between net proceeds and net book value of the assets sold or retired.

Equipment under capital lease is included in Properties and depreciated over the period of expected use.

Assets held for sale

Assets to be disposed that meet the held for sale criteria are reported at the lower of their carrying amount and fair value, less costs to sell, and are no longer depreciated.

Goodwill and intangible assets

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets upon acquisition of a business. Goodwill is assigned to the reporting units that are expected to benefit from the business acquisition which, after integration of operations with the railway network, may be different than the acquired business.

The carrying value of goodwill, which is not amortized, is assessed for impairment annually in the fourth quarter of each year, or more frequently as economic events dictate. The fair value of the reporting unit is compared to its carrying value, including goodwill. If the fair value of the reporting unit is less than its carrying value goodwill is potentially impaired. The impairment charge that would be recognized is the excess of the carrying value of the goodwill over the fair value of the goodwill, determined in the same manner as in a business combination.

Intangible assets with finite lives are amortized on a straight-line basis over the estimated useful lives of the respective assets. Favourable leases, customer relationships and interline contracts have amortization periods ranging from 15 to 20 years. When there is a change in the estimated useful life of an intangible asset with a finite life, amortization is adjusted prospectively.

Financial instruments

Financial instruments are contracts that give rise to a financial asset of one party and a financial liability or equity instrument of another party.

Financial instruments are recognized initially at fair value, which is the amount of consideration that would be agreed upon in an arm's length transaction between willing parties.

Subsequent measurement depends on how the financial instruments have been classified. Accounts receivable and investments, classified as loans and receivables, are measured at amortized cost, using the effective interest method. Certain equity investments, classified as available for sale, are

recognized at cost as fair value cannot be reliably established. Cash and cash equivalents are classified as held for trading and are measured at fair value. Accounts payable, accrued liabilities, short-term borrowings, dividends payable, other long-term liabilities and long-term debt, classified as other liabilities, are also measured at amortized cost.

Derivative financial instruments

Derivative financial and commodity instruments may be used from time to time by the Company to manage its exposure to risks relating to foreign currency exchange rates, stock-based compensation, interest rates and fuel prices. When CP utilizes derivative instruments in hedging relationships, CP identifies, designates and documents those hedging transactions and regularly tests the transactions to demonstrate effectiveness in order to continue hedge accounting.

All derivative instruments are classified as held for trading and recorded at fair value. Any change in the fair value of derivatives not designated as hedges is recognized in the period in which the change occurs in the Consolidated Statements of Income in the line item to which the derivative instrument is related. On the Consolidated Balance Sheets they are classified in "Other assets", "Other long-term liabilities", "Other current assets" or "Accounts payable and accrued liabilities" as applicable. Gains and losses arising from derivative instruments affect the following income statement lines: "Revenues", "Compensation and benefits", "Fuel", "Other income and charges", and "Net interest expense".

For fair value hedges, the periodic changes in values are recognized in income, on the same line as the changes in values of the hedged items are also recorded. For a cash flow hedge, the change in value of the effective portion is recognized in "Other comprehensive (loss) income". Any ineffectiveness within an effective cash flow hedge is recognized in income as it arises in the same income account as the hedged item. Should a cash flow hedging relationship become ineffective, previously unrealized gains and losses remain within "Accumulated other comprehensive loss" until the hedged item is settled and, prospectively, future changes in value of the derivative are recognized in income. The change in value of the effective portion of a cash flow hedge remains in "Accumulated other comprehensive loss" until the related hedged item settles, at which time amounts recognized in "Accumulated other comprehensive loss" are reclassified to the same income or balance sheet account that records the hedged item.

In the Consolidated Statements of Cash Flows, cash flows relating to derivative instruments designated as hedges are included in the same line as the related hedged items.

The Company from time to time enters into foreign exchange forward contracts to hedge anticipated sales in U.S. dollars, the related accounts receivable and future capital acquisitions. Foreign exchange translation gains and losses on foreign currency-denominated derivative financial instruments used to hedge anticipated U.S. dollar-denominated sales are recognized as an adjustment of the revenues when the sale is recorded. Those used to hedge future capital acquisitions are recognized as an adjustment of the property amount when the acquisition is recorded.

The Company from time to time enters into foreign exchange forward contracts as part of its short-term cash management strategy. These contracts are not designated as hedges due to their short-term nature and are carried on the Consolidated Balance Sheets at fair value. Changes in fair value are recognized in income in the period in which the changes occur.

The Company from time to time enters into interest rate swaps to manage the risk related to interest rate fluctuations. These swap agreements require the periodic exchange of payments without the exchange of the principal amount on which the payments are based. Interest expense on the debt is adjusted to include the payments owing or receivable under the interest rate swaps. These agreements are usually accounted for as cash flow hedges with gains and losses recorded in "Accumulated other comprehensive loss" and amortized to "Net interest expense" in the period that interest on the related debt is charged.

The Company from time to time enters into forward rate agreements to fix interest rates for anticipated issuances of debt. These agreements are usually accounted for as cash flow hedges with gains and losses recorded in "Accumulated other comprehensive loss" and amortized to "Net interest expense" in the period that interest on the related debt is charged.

Restructuring accrual

Restructuring liabilities are recorded at their present value. The discount related to liabilities is amortized to "Compensation and benefits" over the payment period. Provisions for labour restructuring are recorded in "Other long-term liabilities", except for the current portion, which is recorded in "Accounts payable and accrued liabilities".

Environmental remediation

Environmental remediation accruals, recorded on an undiscounted basis unless a reliably determinable estimate as to amount and timing of costs can be established, cover site-specific remediation programs. The accruals are recorded when the costs to remediate are probable and reasonably estimable. Certain future costs to monitor sites are discounted at a risk free rate. Provisions for environmental remediation costs are recorded in "Other long-term liabilities", except for the current portion, which is recorded in "Accounts payable and accrued liabilities".

Income taxes

The Company follows the liability method of accounting for income taxes. Deferred income tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates and laws that will be in effect when the differences are expected to reverse.

The effect of a change in income tax rates on deferred income tax assets and liabilities is recognized in income in the period during which the change occurs.

When appropriate, the Company records a valuation allowance against deferred tax assets to reflect that these tax assets may not be realized. In determining whether a valuation allowance is appropriate, CP considers whether it is more likely than not that all or some portion of CP's deferred tax assets will not be realized, based on management's judgment using available evidence about future events.

At times, tax benefit claims may be challenged by a tax authority. Tax benefits are recognized only for tax positions that are more likely than not sustainable upon examination by tax authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely to be realized upon settlement. A liability for "unrecognized tax benefits" is recorded for any tax benefits claimed in CP's tax returns that do not meet these recognition and measurement standards.

Investment and other similar tax credits are deferred on the Consolidated Balance Sheets and amortized to "Income tax expense" as the related asset is recognized in income.

Earnings per share

Basic earnings per share are calculated using the weighted average number of Common Shares outstanding during the year. Diluted earnings per share are calculated using the treasury stock method for determining the dilutive effect of options.

Stock-based compensation

CP follows the fair value based approach to account for stock options. Compensation expense and an increase in additional paid-in capital are recognized for stock options over their vesting period, or over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period, based on their estimated fair values on the grant date, as determined using the Black-Scholes option-pricing model.

Any consideration paid by employees on exercise of stock options is credited to share capital when the option is exercised and the recorded fair value of the option is removed from additional paid-in capital and credited to share capital.

Compensation expense is also recognized for deferred share units ("DSUs"), performance share units ("PSUs") and restricted share units ("RSUs") using the fair value method. Compensation expense is recognized over the vesting period, or for PSUs and DSUs only, over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period. Forfeitures of DSUs, PSUs and RSUs are estimated at issuance and subsequently at the balance sheet date.

The employee share purchase plan ("ESPP") gives rise to compensation expense that is recognized using the issue price by amortizing the cost over the vesting period or over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period.

2 Accounting changes

Implemented in 2014

Unrecognized Tax Benefit Liability

In July 2013, Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, an amendment to FASB Accounting Standards Codification ("ASC") Topic 740. The amendments require an entity to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, with certain exceptions. This ASU is effective prospectively for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of this ASU did not have a material impact to the Company's financial statements.

Future changes

Reporting discontinued operations and disclosures of disposals of components

In April 2014, the FASB issued ASU No. 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity, an amendment to FASB ASC Topic 205 and Topic 360. The update amends the definition of a discontinued operation in Topic 205, expands disclosure requirements for transactions that meet the definition of a discontinued operation and requires entities to disclose information about individually significant components that are disposed of or held for sale and do not qualify as discontinued operations. In addition, an entity is required to separately present assets and liabilities of a discontinued operation for all comparative periods and separately present assets and liabilities of assets held for sale in the initial period in which the disposal group is classified as held for sale on the face of the consolidated balance sheets. For each period in which assets and liabilities are separately presented on the consolidated balance sheets, those amounts should not be offset and presented as a single amount. This ASU will be effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2014, and will be applied prospectively. The adoption of this ASU is not expected to have a material impact to the Company's financial statements.

Revenue from contracts with customers

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, a new FASB ASC, Topic 606, which supersedes the revenue recognition requirements in Topic 605 and most industry-specific guidance throughout the Industry Topics of the Codification. This new standard requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the new standard requires enhanced disclosures about revenue to help users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. This ASU will be effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2016. Entities have the option of using either a full retrospective or a modified retrospective approach to adopt the ASU. The Company has not, at this time, ascertained the full impact on the consolidated financial statements from the adoption of this new standard but does not expect the impact to be material.

3 Asset impairments

(in millions of Canadian dollars)		2013	2012
Dakota, Minnesota & Eastern Railroad – West	(a)	$ 435	$ –
Powder River Basin impairment and other investment[1]	(b)	–	185
Impairment loss on locomotives	(c)	–	80
Asset impairment, before tax		$ 435	$ 265

[1] Includes impairment of other investment of $5 million.

(a) Dakota, Minnesota & Eastern Railroad – West

On January 2, 2014, the Company executed an agreement with Genesee & Wyoming Inc. ("G&W") for the sale of a portion of CP's DM&E line between Tracy, Minnesota and Rapid City, South Dakota, Colony, Wyoming and Crawford, Nebraska and connecting branch lines ("DM&E West"). The sale was subject to regulatory approval by the U.S. Surface Transportation Board ("STB").

At December 31, 2013, CP classified DM&E West as an asset held for sale carried at CDN$222 million, being its estimated fair value less estimated direct selling costs. As a result, the Company recorded an asset impairment charge and accruals for future costs associated with the sale totaling CDN$435 million ($257 million after-tax) in 2013. The components of the asset impairment charge and charge for the accruals, which are subject to closing adjustments, that were recorded against income as "Asset impairments" are as follows:

(in millions of Canadian dollars)	2013
Property, plant and equipment	$ 426
Intangible assets	2
Goodwill (Note 16)	6
Total asset impairment charge	434
Accruals for future costs	1
Total charge	$ 435

On May 30, 2014, the Company completed the sale of DM&E West to G&W for net proceeds of U.S. $218 million (CDN$236 million).

(b) Powder River Basin impairment

As part of the acquisition of DM&E in 2007, CP acquired the option to build a 260 mile extension of its network into coal mines in the Powder River Basin ("PRB").

Due to continued deterioration in the market for domestic thermal coal, including a sharp deterioration in 2012, in 2012 CP deferred plans to extend its rail network into the PRB coal mines indefinitely. As a result of this decision and in light of the declined market conditions, CP evaluated the recoverability of the carrying amount of PRB assets and determined that this exceeded the estimated fair value by $180 million. The estimated fair value represents the expected proceeds from the sale of the acquired land, as determined by a comparable market assessment. Other costs associated with the acquisition of DM&E accumulated by CP since acquisition have been written down to $nil. The amount of impairment associated with this indefinite deferral was $180 million ($107 million after-tax). The components of the PRB impairment that were charged against income as "Asset impairments" in 2012 are as follows:

(in millions of Canadian dollars)	2012
Option impairment	$ 26
Construction plans, including capitalized interest	134
Land, land option appraisals, including capitalized interest	20
Total impairment	$ 180

(c) Impairment loss on locomotives

In 2012, CP reached a decision to dispose of a certain series of locomotives to improve operating efficiencies, and accordingly performed an impairment test on these assets. The impairment test determined that the net book value of these locomotives exceeded their estimated fair value by $80 million. The estimated fair value represented the expected future cashflows from the disposal of these locomotives at that time. The impairment charge of $80 million ($59 million after-tax) was recorded in "Asset impairments" and charged against income.

The Company has determined no further impairment is required.

4 Labour restructuring

CP recorded a recovery of $4 million in 2014 ($3 million after-tax) (2013 – a recovery of $7 million, $5 million after tax; 2012 – a charge of $53 million, $39 million after tax) for a labour restructuring initiative in 2012 which was included in "Labour restructuring" in the Consolidated Statements of Income, and "Accounts payable and accrued liabilities" and "Other long-term liabilities" in the Consolidated Balance Sheets. The resulting position reductions were largely achieved by the end of 2014 with a small number expected to be completed in 2015.

At December 31, 2014, the provision for restructuring was $24 million (2013 – $50 million; 2012 – $89 million). The restructuring accrual was primarily for labour liabilities arising for restructuring plans, including those from prior year initiatives. Payments are expected to continue in diminishing amounts until 2025.

Set out below is a reconciliation of CP's liabilities associated with its restructuring accrual:

(in millions of Canadian dollars)	**2014**	2013	2012
Opening balance, January 1	**$ 50**	$ 89	$ 55
Accrued[1]	**(7)**	(8)	54
Payments	**(21)**	(33)	(22)
Amortization of discount[2]	**2**	2	2
Closing balance, December 31	**$ 24**	$ 50	$ 89

[1] Includes recoveries of $4 million in the first quarter of 2014 and of $7 million in 2013 related to the fourth quarter 2012 labour restructuring initiative charge of $53 million.
[2] Amortization of discount is charged to income as "Compensation and benefits".

5 Other income and charges

(in millions of Canadian dollars)	2014	2013	2012
Foreign exchange loss (gain) on long-term debt	**$ 11**	$ 2	$ (2)
Accretion income on long-term floating rate notes	**–**	–	(3)
Loss in fair value of long-term floating rate notes	**–**	–	1
Other foreign exchange losses (gains)	**–**	2	(1)
Advisory fees (related to shareholder matters)	**–**	–	27
Other	**8**	13	15
Total other income and charges	**$ 19**	$ 17	$ 37

6 Net interest expense

(in millions of Canadian dollars)	2014	2013	2012
Interest cost	**$ 301**	$ 296	$ 294
Interest capitalized to Properties	**(15)**	(13)	(15)
Interest expense	**286**	283	279
Interest income	**(4)**	(5)	(3)
Net interest expense	**$ 282**	$ 278	$ 276

Interest expense includes interest on capital leases of $12 million for the year ended December 31, 2014 (2013 – $19 million; 2012 – $19 million).

7 Income taxes

The following is a summary of the major components of the Company's income tax expense:

(in millions of Canadian dollars)	2014	2013	2012
Current income tax expense	**$ 208**	$ 38	$ 12
Deferred income tax expense			
Origination and reversal of temporary differences	**317**	183	144
Effect of tax rate increases	**–**	7	11
Effect of hedge of net investment in foreign subsidiaries	**42**	29	(9)
Tax credits	**–**	–	(4)
Other	**(5)**	(7)	(2)
Total deferred income tax expense	**354**	212	140
Total income taxes	**$ 562**	$ 250	$ 152
Income before income tax expense			
Canada	**$ 1,269**	$ 1,019	$ 464
Foreign	**769**	106	172
Total income before income tax expense	**$ 2,038**	$ 1,125	$ 636
Income tax expense			
Current			
Canada	**$ 50**	$ 4	$ 6
Foreign	**158**	34	6
Total current income tax expense	**208**	38	12
Deferred			
Canada	**292**	256	120
Foreign	**62**	(44)	20
Total deferred income tax expense	**354**	212	140
Total income taxes	**$ 562**	$ 250	$ 152

The provision for deferred income taxes arises from temporary differences in the carrying values of assets and liabilities for financial statement and income tax purposes and the effect of loss carry forwards. The items comprising the deferred income tax assets and liabilities are as follows:

(in millions of Canadian dollars)	**2014**	2013
Deferred income tax assets		
Restructuring liability	**$ 7**	$ 16
Amount related to tax losses carried forward	**28**	96
Liabilities carrying value in excess of tax basis	**214**	66
Future environmental remediation costs	**32**	31
Tax credits carried forward including minimum tax	**20**	72
Other	**69**	46
Total deferred income tax assets	**370**	327
Deferred income tax liabilities		
Properties carrying value in excess of tax basis	**3,052**	2,847
Other long-term assets carrying value in excess of tax basis	**–**	9
Other	**35**	30
Total deferred income tax liabilities	**3,087**	2,886
Total net deferred income tax liabilities	**2,717**	2,559
Current deferred income tax assets	**56**	344
Long-term deferred income tax liabilities	**$ 2,773**	$ 2,903

The Company's consolidated effective income tax rate differs from the expected statutory tax rates. Expected income tax expense at statutory rates is reconciled to income tax expense as follows:

(in millions of Canadian dollars, except percentage)	**2014**	2013	2012
Statutory federal and provincial income tax rate	**26.31%**	26.32%	26.09%
Expected income tax expense at Canadian enacted statutory tax rates	**$ 536**	$ 296	$ 166
Increase (decrease) in taxes resulting from:			
Items not subject to tax	**(5)**	(6)	(4)
Canadian tax rate differentials	**(1)**	(1)	(1)
Foreign tax rate differentials	**36**	(36)	(17)
Effect of tax rate increases	**–**	7	11
Tax credits	**–**	–	(4)
Other	**(4)**	(10)	1
Income tax expense	**$ 562**	$ 250	$ 152

The Company has no unrecognized tax benefits from capital losses at December 31, 2014 and 2013.

The Company has not provided a deferred liability for the income taxes, if any, which might become payable on any temporary difference associated with its foreign investments because the Company intends to indefinitely reinvest in its foreign investments and has no intention to realize this difference by a sale of its interest in foreign investments.

During the third quarter of 2013, legislation was enacted to increase the province of British Columbia's corporate income tax rate. As a result, the Company recalculated its deferred income taxes as at January 1, 2013 based on this change and recorded an income tax expense of $7 million in the third quarter of 2013.

During the second quarter of 2012, legislation was enacted to cancel the previously planned province of Ontario's corporate income tax rate reductions. As a result of these changes, the Company recorded an income tax expense of $11 million in the second quarter of 2012, based on its deferred income tax balances as at January 1, 2012.

At December 31, 2014, the Company had income tax operating losses carried forward of $94 million, which have been recognized as a deferred tax asset. Certain of these losses carried forward will begin to expire in 2026, with the majority expiring between 2029 and 2034. The Company also has minimum tax credits of approximately $15 million that will begin to expire in 2016 as well as investment tax credits of $5 million, certain of which will begin to expire in 2018.

It is more likely than not that the Company will realize the majority of its deferred income tax assets from the generation of future taxable income, as the payments for provisions, reserves and accruals are made and losses and tax credits carried forward are utilized.

The following table provides a reconciliation of uncertain tax positions in relation to unrecognized tax benefits for Canada and the United States for the year ended December 31, 2014:

(in millions of Canadian dollars)	**2014**	2013	2012
Unrecognized tax benefits at January 1	**$ 16**	$ 19	$ 19
Increase in unrecognized:			
Tax benefits related to the current year	**2**	4	2
Dispositions:			
Gross uncertain tax benefits related to prior years	**(1)**	(7)	(2)
Unrecognized tax benefits at December 31	**$ 17**	$ 16	$ 19

If these uncertain tax positions were recognized, all of the amount of unrecognized tax positions as at December 31, 2014 would impact the Company's effective tax rate.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of income tax expense in the Company's Consolidated Statements of Income. The total amount of accrued interest and penalties in 2014 was $1 million (2013 – credit of $1 million; 2012 – $nil). The total amount of accrued interest and penalties associated with the unrecognized tax benefit at December 31, 2014 was $5 million (2013 – $4 million; 2012 – $5 million).

The Company and its subsidiaries are subject to either Canadian federal and provincial income tax, U.S. federal, state and local income tax, or the relevant income tax in other international jurisdictions. The Company has substantially concluded all Canadian federal and provincial income tax matters for the years through 2009. The federal and provincial income tax returns filed for 2010 and subsequent years remain subject to examination by the taxation authorities.

All U.S. federal income tax returns and generally all U.S. state and local income tax returns are closed to 2007. The income tax returns for 2008 and subsequent years continue to remain subject to examination by the taxation authorities.

The Company does not anticipate any material changes to the unrecognized tax benefits previously disclosed within the next twelve months as at December 31, 2014.

8 Earnings per share

Basic earnings per share have been calculated using net income for the year divided by the weighted average number of shares outstanding during the year.

Diluted earnings per share have been calculated using the treasury stock method which assumes that any proceeds received from the exercise of in-the-money options would be used to purchase Common Shares at the average market price for the period. For purposes of this calculation, at December 31, 2014, there were 3.1 million dilutive options outstanding (2013 – 3.2 million; 2012 – 4.2 million).

The number of shares used in the earnings per share calculations is reconciled as follows:

(in millions)	**2014**	2013	2012
Weighted average basic shares outstanding	**172.8**	174.9	171.8
Dilutive effect of weighted average number of stock options	**1.6**	1.6	1.4
Weighted average diluted shares outstanding	**174.4**	176.5	173.2

In 2014, the number of options excluded from the computation of diluted earnings per share because their effect was not dilutive was 0.1 million (2013 – nil; 2012 – 0.2 million).

9 Other comprehensive (loss) income and accumulated other comprehensive loss

The components of "Accumulated other comprehensive loss", net of tax, are as follows:

(in millions of Canadian dollars)	2014	2013
Unrealized foreign exchange gain (loss) on translation of the net investment in U.S. subsidiaries	**$ 199**	$ (88)
Unrealized foreign exchange (loss) gain on translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries	**(84)**	193
Deferred losses on settled hedge instruments	**(16)**	(16)
Unrealized effective (losses) gains on cash flow hedges	**(34)**	3
Amounts for defined benefit pension and other post-retirement plans not recognized in income	**(2,282)**	(1,593)
Equity accounted investments	**(2)**	(2)
Accumulated other comprehensive loss	**$ (2,219)**	$ (1,503)

Components of other comprehensive (loss) income and the related tax effects are as follows:

(in millions of Canadian dollars)	Before tax amount	Income tax recovery (expense)	Net of tax amount
For the year ended December 31, 2014			
Unrealized foreign exchange gain (loss) on:			
Translation of the net investment in U.S. subsidiaries	**$ 287**	**$ –**	**$ 287**
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 20)	**(319)**	**42**	**(277)**
Change in derivatives designated as cash flow hedges:			
Realized loss on cash flow hedges recognized in income	**(3)**	**–**	**(3)**
Unrealized loss on cash flow hedges	**(46)**	**12**	**(34)**
Change in pension and other benefits actuarial gains and losses	**(873)**	**234**	**(639)**
Change in prior service pension and other benefit costs	**(68)**	**18**	**(50)**
Other comprehensive loss	**$ (1,022)**	**$ 306**	**$ (716)**
For the year ended December 31, 2013			
Unrealized foreign exchange gain (loss) on:			
Translation of the net investment in U.S. subsidiaries	$ 220	$ –	$ 220
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 20)	(217)	28	(189)
Change in derivatives designated as cash flow hedges:			
Realized loss on cash flow hedges recognized in income	(19)	–	(19)
Unrealized gain on cash flow hedges	18	–	18
Change in pension and other benefits actuarial gains and losses	1,603	(427)	1,176
Change in prior service pension and other benefit costs	78	(19)	59
Other comprehensive income	$ 1,683	$ (418)	$ 1,265

(in millions of Canadian dollars)	Before tax amount	Income tax recovery (expense)	Net of tax amount
For the year ended December 31, 2012			
Unrealized foreign exchange (loss) gain on:			
Translation of the net investment in U.S. subsidiaries	$ (58)	$ –	$ (58)
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (Note 20)	69	(9)	60
Change in derivatives designated as cash flow hedges:			
Realized gain on cash flow hedges recognized in income	6	(1)	5
Unrealized gain on cash flow hedges	3	–	3
Change in pension and other benefits actuarial gains and losses	(62)	12	(50)
Change in prior service pension and other benefit costs	12	(2)	10
Equity accounted investments	(2)	–	(2)
Other comprehensive loss	$ (32)	$ –	$ (32)

Changes in accumulated other comprehensive loss (AOCL) by component:

(in millions of Canadian dollars)	Foreign currency net of hedging activities[1]	Derivatives and other[1]	Pension and post-retirement defined benefit plans[1]	Total[1]
Opening balance, 2014	**$ 105**	**$ (15)**	**$ (1,593)**	**$ (1,503)**
Other comprehensive income (loss) before reclassifications	**10**	**(34)**	**(781)**	**(805)**
Amounts reclassified from accumulated other comprehensive loss	**–**	**(3)**	**92**	**89**
Net current-period other comprehensive income (loss)	**10**	**(37)**	**(689)**	**(716)**
Closing balance, 2014	**$ 115**	**$ (52)**	**$ (2,282)**	**$ (2,219)**
Opening balance, 2013	$ 74	$ (14)	$ (2,828)	$ (2,768)
Other comprehensive income (loss) before reclassifications	31	17	1,078	1,126
Amounts reclassified from accumulated other comprehensive loss	–	(18)	157	139
Net current-period other comprehensive income (loss)	31	(1)	1,235	1,265
Closing balance, 2013	$ 105	$ (15)	$ (1,593)	$ (1,503)

[1] Amounts are presented net of tax.

Amounts in Pension and post-retirement defined benefit plans reclassified from Accumulated other comprehensive loss

	2014	2013
Amortization of prior service costs[a]	**$ (68)**	$ (58)
Recognition of net actuarial loss[a]	**192**	272
Total before income tax	**$ 124**	$ 214
Income tax recovery	**(32)**	(57)

[a] Impacts Compensation and benefits on the Consolidated Statements of Income.

10 Change in non-cash working capital balances related to operations

(in millions of Canadian dollars)	**2014**	2013	2012
(Use) source of cash:			
Accounts receivable, net	**$ (112)**	$ (29)	$ (40)
Materials and supplies	**7**	(19)	7
Other current assets	**(75)**	5	15
Accounts payable and accrued liabilities	**56**	41	13
Change in non-cash working capital	**$ (124)**	$ (2)	$ (5)

11 Cash and cash equivalents

(in millions of Canadian dollars)	2014	2013
Cash	$ 226	$ 109
Short-term investments:		
Deposits with financial institutions	–	367
Total cash and cash equivalents	$ 226	$ 476

12 Accounts receivable, net

(in millions of Canadian dollars)	2014	2013
Freight	$ 535	$ 408
Non-freight	189	192
	724	600
Allowance for doubtful accounts	(22)	(20)
Total accounts receivable, net	$ 702	$ 580

The Company maintains an allowance for doubtful accounts based on expected collectability of accounts receivable. Credit losses are based on specific identification of uncollectible accounts, the application of historical percentages by aging category and an assessment of the current economic environment. At December 31, 2014, allowances of $22 million (2013 – $20 million) were recorded in "Accounts receivable, net". During 2014, provisions of $2 million of accounts receivable (2013 – $3 million; 2012 – $3 million) were recorded within "Purchased services and other".

13 Assets held for sale

On November 17, 2014, the Company announced a proposed agreement with Norfolk Southern Corporation ("NS") for the sale of approximately 283 miles of the Delaware and Hudson Railway Company, Inc.'s line between Sunbury, Pennsylvania, and Schenectady, New York. The assets expected to be sold to NS upon completion of this transaction have been classified as "Assets held for sale" on the Company's Consolidated Balance Sheets. The assets continue to be reported at their carrying value as this is lower than their expected fair value. The sale to NS, when agreed, will be subject to regulatory approval by the STB and is expected to close in 2015.

14 Investments

(in millions of Canadian dollars)	2014	2013
Rail investments accounted for on an equity basis	$ 82	$ 67
Other investments	30	25
Total investments	$ 112	$ 92

15 Properties

Other	4.5%	1,489	518	971	1,372	493	879
Total		$ 20,943	$ 6,505	$ 14,438	$ 19,511	$ 6,184	$ 13,327

[1] During 2014, CP capitalized costs attributable to the design and development of internal-use software in the amount of $69 million (2013 – $85 million; 2012 – $105 million). Current year depreciation expense related to internal use software was $70 million (2013 – $84 million; 2012 – $78 million).

Capital leases included in properties

(in millions of Canadian dollars)	2014 Cost	2014 Accumulated depreciation	2014 Net book value	2013 Cost	2013 Accumulated depreciation	2013 Net book value

16 Goodwill and intangible assets

(in millions of Canadian dollars)	Goodwill	Intangible assets Cost	Intangible assets accumulated amortization	Net carrying amount
Balance at December 31, 2012	$ 146	$ 24	$ (9)	$ 15
Amortization	–	–	(1)	(1)
Foreign exchange impact	10	–	–	–
DM&E West impairment (Note 3)	(6)	(2)	–	(2)
Balance at December 31, 2013	$ 150	$ 22	$ (10)	$ 12
Amortization	–	–	(1)	(1)
Foreign exchange impact	14	–	1	1
Balance at December 31, 2014	**$ 164**	**$ 22**	**$ (10)**	**$ 12**

As part of the acquisition of DM&E in 2007, CP recognized goodwill of U.S. $147 million on the allocation of the purchase price, determined as the excess of the purchase price over the fair value of the net assets acquired. Since the acquisition, the operations of DM&E have been integrated with CP's U.S. operations and the related goodwill is allocated to CP's U.S. reporting unit. Goodwill is tested for impairment at least once per year as at October 1st. The goodwill impairment test determines if the fair value of the reporting unit continues to exceed its net book value, or whether an impairment charge is required. The fair value of the reporting unit is affected by projections of its profitability including estimates of revenue growth, which are inherently uncertain.

Intangible assets of $12 million (2013 – $12 million), acquired in the acquisition of DM&E, include favourable leases, customer relationships and interline contracts.

The estimated amortization expense for intangible assets for 2015 to 2019 is insignificant each year.

17 Other assets

(in millions of Canadian dollars)	2014	2013
Unamortized fees on long-term debt	**$ 43**	$ 44
Long-term materials	**30**	31

Less: Long-term debt maturing within one year			**134**	189
			$ 5,659	$ 4,687

At December 31, 2014, the gross amount of long-term debt denominated in U.S. dollars was U.S. $4,047 million (2013 – U.S. $3,527 million).

Annual maturities and principal repayments requirements, excluding those pertaining to capital leases, for each of the five years following 2014 are (in millions): 2015 – $131; 2016 – $816; 2017 – $29; 2018 – $725; 2019 – $439.

A. These debentures and notes pay interest semi-annually and are unsecured, but carry a negative pledge.

B. The Secured Equipment Loan is collateralized by specific locomotive units with a carrying value of $63 million at December 31, 2014. The floating interest rate is calculated based on a six-month average Canadian Dollar Offered Rate (calculated based on an average of Bankers' Acceptance rates) plus 53 basis points (2014 – 1.89%; 2013 – 1.93%; 2012 – 1.97%). The Company makes blended payments of principal and interest semi-annually. Final repayment of the remaining principal balance of $53 million is due in August 2015.

C. The 5.41% Senior Secured Notes are collateralized by specific locomotive units with a carrying value of $135 million at December 31, 2014. The Company pays equal blended semi-annual payments of principal and interest. Final repayment of the remaining principal of U.S. $44 million is due in March 2024.

D. The 6.91% Secured Equipment Notes are full recourse obligations of the Company collateralized by a first charge on specific locomotive units with a carrying value of $131 million at December 31, 2014. The Company pays equal blended semi-annual payments of principal and interest up to and including October 2024.

E. The 5.57% Senior Secured Notes are secured by specific locomotive units and other rolling stock with a combined carrying value of $57 million at December 31, 2014. The Company pays equal blended semi-annual payments of principal and interest up to and including December 2024. Final repayment of the remaining principal of U.S. $33 million is due in December 2024.

F. The 7.49% Equipment Trust Certificates are secured by specific locomotive units with a carrying value of $110 million at December 31, 2014. The Company makes semi-annual payments that vary in amount and are interest-only payments or blended principal and interest payments. Final repayment of the remaining principal of U.S. $11 million is due in January 2021.

G. These Notes are secured by locomotives previously acquired by the Company with a carrying value of $127 million at December 31, 2014. The Company pays equal blended semi-annual payments of principal and interest up to and including December 2026. Final repayment of the remaining principal of U.S. $69 million is due in the fourth quarter of 2026.

H. These Notes are secured by locomotives previously acquired by the Company with a carrying value of $66 million at December 31, 2014. The Company pays equal blended semi-annual payments of principal and interest up to and including March 2027. Final repayment of the remaining principal of U.S. $35 million is due in March 2027.

I. At December 31, 2014, capital lease obligations included in long-term debt were as follows:

(in millions of Canadian dollars)	Year	Capital leases
Minimum lease payments in:		
	2015	$ 14
	2016	14
	2017	14
	2018	14
	2019	14
	Thereafter	160
Total minimum lease payments		230
Less: Imputed interest		(80)
Present value of minimum lease payments		150
Less: Current portion		(3)
Long-term portion of capital lease obligations		$ 147

During 2014, the Company had no additions to property, plant and equipment under capital lease obligations (2013 – $nil; 2012 – $nil).

The carrying value of the assets collateralizing the capital lease obligations was $224 million at December 31, 2014.

J. During the fourth quarter of 2014, the Company established a commercial paper program which enabled it to issue commercial paper up to a maximum aggregate principal amount of U.S. $1 billion in the form of unsecured promissory notes. The commercial paper program is backed by a U.S. $1 billion committed, revolving credit facility, which matures on September 26, 2016. As at December 31, 2014, the Company had total commercial paper borrowings of U.S. $675 million (CDN $783 million) presented in "Long-term debt" on the Consolidated Balance Sheets (2013 – $nil) as the Company has the intent and the ability to renew these borrowings on a long-term basis. The weighted-average interest rate on these borrowings was 0.44%.

The Company presents issuances and repayments of commercial paper in the Consolidated Statements of Cash Flows on a net basis, all of which have a maturity less than 90 days.

K. The Consolidated Debenture Stock, authorized by an Act of Parliament of 1889, constitutes a first charge upon and over the whole of the undertaking, railways, works, rolling stock, plant, property and effects of the Company, with certain exceptions.

L. During November 2013, CP extended its revolving credit agreement with 13 highly rated financial institutions and also contains an uncommitted accordion feature. At December 31, 2013, the facility was undrawn.

At September 26, 2014, the Company terminated its existing revolving credit facility agreement dated as of November 29, 2013. On the same day, CP entered into a new revolving credit facility (the "facility") agreement with 15 highly rated financial institutions for a commitment amount of U.S. $2 billion. The facility includes a U.S. $1 billion five year portion and a U.S. $1 billion one year plus one year term out portion. The facility can accommodate draws of cash and/or letters of credit at market competitive pricing. At December 31, 2014, the facility is undrawn. The agreement requires the Company not to exceed a maximum debt to total capitalization ratio. At December 31, 2014, the Company satisfied this threshold stipulated in the financial covenant.

The weighted average annualized interest rate of the facility for drawn funds was not applicable in 2014 and 2013 compared to 2.94% in 2012.

During 2013, the Company entered into a series of committed and uncommitted bilateral letter of credit facility agreements with financial institutions to support its requirement to post letters of credit in the ordinary course of business. Under these agreements, the Company had the option to post collateral in the form of cash or cash equivalents, equal at least to the face value of the letter of credit issued.

In October 2014, CP terminated its existing uncommitted demand bilateral letter of credit facility agreements and entered into bilateral letter of credit facility agreements with six highly rated financial institutions to support its requirement to post letters of credit in the ordinary course of business. Under these agreements, the Company has the option to post collateral in the form of cash or cash equivalents, equal at least to the face value of the letter of credit issued. These new agreements permit CP to withdraw amounts posted as collateral at any time; therefore, the amounts posted as collateral are presented as "Cash and cash equivalents" on the Company's Consolidated Balance Sheet.

At December 31, 2014, under its bilateral facilities the Company had letters of credit drawn of $412 million from a total available amount of $600 million. Prior to these bilateral agreements, letters of credit were drawn under the Company's revolving credit facility. At December 31, 2014, under the terms of the new bilateral letter of credit facilities, no cash and cash equivalents was recorded as "Restricted cash and cash equivalents" (2013 – $411 million).

20 Financial instruments

A. Fair values of financial instruments

The Company categorizes its financial assets and liabilities measured at fair value in line with the fair value hierarchy established by GAAP that prioritizes, with respect to reliability, the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels. Level 1 inputs consist of quoted prices (unadjusted) in active markets for identical assets and liabilities and give the highest priority to these inputs. Level 2 and 3 inputs are based on significant other observable inputs and significant unobservable inputs, respectively, and give lower priority to these inputs.

When possible, the estimated fair value is based on quoted market prices and, if not available, estimates from third party brokers. For non-exchange traded derivatives classified in Level 2, the Company uses standard valuation techniques to calculate fair value. Primary inputs to these techniques include observable market prices (interest, foreign exchange and commodity) and volatility, depending on the type of derivative and nature of the underlying risk. The Company uses inputs and data used by willing market participants when valuing derivatives and considers its own credit default swap spread as well as those of its counterparties in its determination of fair value.

The carrying values of financial instruments equal or approximate their fair values with the exception of long-term debt which has a fair value of approximately $6,939 million at December 31, 2014 (December 31, 2013 – $5,572 million) with a carrying value of $5,793 million (December 31, 2013 – $4,876 million). The estimated fair value of current and long-term borrowings has been determined based on market information where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company at period end. All derivatives and long-term debt are classified as Level 2.

B. Fair values of non-financial assets

At December 31, 2013, CP classified DM&E West as an asset held for sale carried at its estimated fair value less estimated direct selling costs (Note 3). The sale of DM&E West was completed during 2014. During 2012, CP reviewed certain properties for impairment (Note 3) and estimated the fair values of those properties. These estimated fair values were based on measurements classified as Level 3 which resulted in the recording of a total impairment charge in 2013 of $434 million and in 2012 of $265 million (Note 3). CP used third party information that was corroborated with other internal information to estimate the fair value of these properties.

C. Financial risk management

Derivative financial instruments

Derivative financial instruments may be used to selectively reduce volatility associated with fluctuations in interest rates, foreign exchange ("FX") rates, the price of fuel and stock-based compensation expense. Where derivatives are designated as hedging instruments, the relationship between the hedging instruments and their associated hedged items is documented, as well as the risk management objective and strategy for the use of the hedging instruments. This documentation includes linking the derivatives that are designated as fair value or cash flow hedges to specific assets or liabilities on the Consolidated Balance Sheets, commitments or forecasted transactions. At the time a derivative contract is entered into and at least quarterly thereafter, an assessment is made whether the derivative item is effective in offsetting the changes in fair value or cash flows of the hedged items. The derivative qualifies for hedge accounting treatment if it is effective in substantially mitigating the risk it was designed to address.

It is not the Company's intent to use financial derivatives or commodity instruments for trading or speculative purposes.

Credit risk management

Credit risk refers to the possibility that a customer or counterparty will fail to fulfil its obligations under a contract and as a result create a financial loss for the Company.

The railway industry predominantly serves financially established customers and the Company has experienced limited financial losses with respect to credit risk. The credit worthiness of customers is assessed using credit scores supplied by a third party, and through direct monitoring of their financial well-being on a continual basis. The Company establishes guidelines for customer credit limits and should thresholds in these areas be reached, appropriate precautions are taken to improve collectability.

Counterparties to financial instruments expose the Company to credit losses in the event of non-performance. Counterparties for derivative and cash transactions are limited to high credit quality financial institutions, which are monitored on an on-going basis. Counterparty credit assessments are based on the financial health of the institutions and their credit ratings from external agencies. The Company does not anticipate non-performance that would materially impact the Company's financial statements. In addition, the Company believes there are no significant concentrations of credit risk.

Foreign exchange management

The Company conducts business transactions and owns assets in both Canada and the United States. As a result the Company is exposed to fluctuations in value of financial commitments, assets, liabilities, income or cash flows due to changes in FX rates. The Company may enter into foreign exchange risk management transactions primarily to manage fluctuations in the exchange rate between Canadian and U.S. currencies. FX exposure is primarily mitigated through natural offsets created by revenues, expenditures and balance sheet positions incurred in the same currency. Where appropriate, the Company may negotiate with customers and suppliers to reduce the net exposure.

Occasionally the Company will enter into short-term FX forward contracts as part of its cash management strategy.

Net investment hedge

The FX gains and losses on long-term debt are mainly unrealized and can only be realized when U.S. dollar denominated long-term debt matures or is settled. The Company also has long-term FX exposure on its investment in U.S. affiliates. The majority of the Company's U.S. dollar denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. This designation has the effect of mitigating volatility on net income by offsetting long-term FX gains and losses on U.S. dollar denominated long-term debt and gains and losses on its net investment. The effective portion recognized in "Other comprehensive income" in 2014 was an unrealized foreign exchange loss of $319 million (2013 – unrealized loss of $217 million; 2012 – unrealized gain of $69 million) (Note 9). The ineffectiveness during 2014 was negligible (2013 – $nil; 2012 – $nil).

Foreign exchange forward contracts

The Company may enter into FX forward contracts to lock-in the amount of Canadian dollars it has to pay on U.S. denominated debt maturities.

At December 31, 2014, the Company had no remaining FX forward contracts to fix the exchange rate on U.S. denominated debt maturities. During 2014, the Company settled the FX forward contract related to the repayment of a capital lease due in January 2014 for proceeds of $8 million. The Company also settled, prior to maturity, the FX forward contracts related to the repayment of the 6.50% Notes due in May 2018 and its 7.25% Notes due in May 2019 for proceeds of $17 million with the offset recorded as realized gains of $3 million in "Accumulated other comprehensive loss" and $14 million in "Retained earnings". Amounts remaining in "Accumulated other comprehensive loss" are being amortized to "Other income and charges" until the underlying debts, which were hedged, are repaid.

During 2014, the combined realized and unrealized foreign exchange gains were $3 million and were recorded in "Other income and charges" (2013 – unrealized gain of $18 million; 2012 – unrealized loss of $4 million) in relation to these derivatives. Gains recorded in "Other income and charges" were largely offset by unrealized losses on the underlying debt which the derivatives were designated to hedge. Similarly, losses were largely offset by unrealized gains on the underlying debt.

At December 31, 2014, the Company expected that, during the next 12 months, a negligible amount of pre-tax gain would be reclassified to "Other income and charges".

At December 31, 2013, the unrealized gain derived from these FX forwards was $25 million of which $6 million was included in "Other current assets" and $19 million in "Other assets" with the offset reflected as unrealized gains of $5 million in "Accumulated other comprehensive loss" and $20 million in "Retained earnings".

Interest rate management

The Company is exposed to interest rate risk, which is the risk that the fair value or future cash flows of a financial instrument will vary as a result of changes in market interest rates. In order to manage funding needs or capital structure goals, the Company enters into debt or capital lease agreements that are subject to either fixed market interest rates set at the time of issue or floating rates determined by on-going market conditions. Debt subject to variable interest rates exposes the Company to variability in interest expense, while debt subject to fixed interest rates exposes the Company to variability in the fair value of debt.

To manage interest rate exposure, the Company accesses diverse sources of financing and manages borrowings in line with a targeted range of capital structure, debt ratings, liquidity needs, maturity schedule, and currency and interest rate profiles. In anticipation of future debt issuances, the Company may enter into forward rate agreements, that are designated as cash flow hedges, to substantially lock in all or a portion of the effective future interest expense. The Company may also enter into swap agreements, designated as fair value hedges, to manage the mix of fixed and floating rate debt.

Forward starting swaps

During the fourth quarter of 2014, the Company entered into forward starting floating-to-fixed interest rate swap agreements ("forward starting swaps") totaling a notional U.S. $1.4 billion to fix the benchmark rate on cash flows associated with highly probable forecasted issuances of long-term notes. The effective portion of changes in fair value on the forward starting swaps is recorded in "Accumulated other comprehensive loss", net of tax, as cash flow hedges until the probable forecasted notes are issued. Subsequent to the notes issuance, amounts in "Accumulated other comprehensive loss" are reclassified to "Net interest expense". As at December 31, 2014, the unrealized loss derived from the forward starting swaps was $46 million of which $21 million was included in "Accounts payable and accrued liabilities" and $25 million in "Other long-term liabilities" with the offset reflected in "Other comprehensive (loss) income" on the Consolidated Statements of Comprehensive Income.

Interest rate swaps

During the fourth quarter of 2014, the Company entered into floating-to-fixed interest rate swap agreements totaling U.S. $600 million to hedge the variability in cash flow associated with fluctuations in interest rates on commercial paper issuances. These swaps expire in 2015 and are accounted for as a cash flow hedge. The effective portion of changes in fair value of the swaps is recorded in "Accumulated other comprehensive loss", net of tax. Subsequent to the commercial paper issuance, the amounts recorded in "Accumulated other comprehensive loss" are reclassified to "Net interest expense". At December 31, 2014, the unrealized gain recorded in "Other current assets" on the Consolidated Balance Sheets, was not significant. The offset was reflected in "Other comprehensive (loss) income" on the Consolidated Statements of Comprehensive Income. At December 31, 2013, the Company had no outstanding interest rate swaps, nor did it enter into or unwind any such transactions during 2013.

Treasury rate locks

At December 31, 2014, the Company had net unamortized losses related to interest rate locks, which are accounted for as cash flow hedges, settled in previous years totaling $21 million (December 31, 2013 – $22 million). This amount is composed of various unamortized gains and losses related to specific debts which are reflected in "Accumulated other comprehensive loss" and are amortized to "Net interest expense" in the period that interest on the related debt is charged. The amortization of these gains and losses resulted in a negligible increase to "Net interest expense" and "Other comprehensive income" in 2014 (2013 – negligible; 2012 – negligible). At December 31, 2014, the Company expected that, during the next 12 months, a negligible amount of loss related to these previously settled derivatives would be reclassified to "Net interest expense".

Fuel price management

The Company is exposed to commodity risk related to purchases of diesel fuel and the potential reduction in net income due to increases in the price of diesel. Fuel expense constitutes a large portion of the Company's operating costs and volatility in diesel fuel prices can have a significant impact on the Company's income. Items affecting volatility in diesel prices include, but are not limited to, fluctuations in world markets for crude oil and distillate fuels, which can be affected by supply disruptions and geopolitical events.

The impact of variable fuel expense is mitigated substantially through fuel cost recovery programs which apportion incremental changes in fuel prices to shippers through price indices, tariffs, and by contract, within agreed upon guidelines. While these programs provide effective and meaningful coverage, residual exposure remains as the fuel expense risk may not be completely recovered from shippers due to timing and volatility in the market.

21 Other long-term liabilities

(in millions of Canadian dollars)	2014	2013
Provision for environmental remediation, net of current portion[1]	**$ 75**	$ 76
Provision for restructuring, net of current portion[2] (Note 4)	**13**	21
Deferred gains on sale leaseback transactions	**25**	31
Deferred revenue on rights-of-way license agreements, net of current portion	**33**	31
Stock-based compensation liabilities, net of current portion	**145**	69
Asset retirement obligations (Note 22)	**23**	24
Deferred retirement compensation	**24**	16
Deferred hedging losses (Note 20)	**25**	–
Other, net of current portion	**69**	70
Total other long-term liabilities	**$ 432**	$ 338

[1] As at December 31, 2014, the aggregate provision for environmental remediation, including the current portion was $91 million (2013 – $90 million).

[2] As at December 31, 2014, the aggregate provision for restructuring, including the current portion was $24 million (2013 – $50 million).

The deferred revenue on rights-of-way license agreements, and deferred gains on sale leaseback transactions are being amortized to income on a straight-line basis over the related lease terms. Deferred income credits are being amortized over the life of the related asset.

Environmental remediation accruals

Environmental remediation accruals cover site-specific remediation programs. The estimate of the probable costs to be incurred in the remediation of properties contaminated by past railway use reflects the nature of contamination at individual sites according to typical activities and scale of operations conducted. CP has developed remediation strategies for each property based on the nature and extent of the contamination, as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants, considering available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and ground water. The details of the estimates reflect the environmental liability at each property. Provisions for environmental remediation costs are recorded in "Other long-term liabilities", except for the current portion which is recorded in "Accounts payable and accrued liabilities". Payments are expected to be made over 10 years to 2024.

The accruals for environmental remediation represent CP's best estimate of its probable future obligation and include both asserted and unasserted claims, without reduction for anticipated recoveries from third parties. Although the recorded accruals include CP's best estimate of all probable costs, CP's total environmental remediation costs cannot be predicted with certainty. Accruals for environmental remediation may change from time to time as new information about previously untested sites becomes known, environmental laws and regulations evolve and advances are made in environmental remediation technology. The accruals may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, may materially affect income in the particular period in which a charge is recognized. Costs related to existing, but as yet unknown, or future contamination will be accrued in the period in which they become probable and reasonably estimable. Changes to costs are reflected as changes to "Other long-term liabilities" or "Accounts payable and accrued liabilities" on the Consolidated Balance Sheets and to "Purchased services and other" within operating expenses on the Consolidated Statements of Income. The amount charged to income in 2014 was $4 million (2013 – $6 million; 2012 – $4 million).

22 Asset retirement obligations

Asset retirement obligations are recorded in "Other long-term liabilities". The majority of these liabilities are discounted at 6.25%. Accretion expense is included in "Depreciation and amortization" on the Consolidated Statements of Income.

(in millions of Canadian dollars)	2014	2013
Opening balance, January 1	**$ 24**	$ 23
Accretion	**1**	1
Liabilities settled	**(1)**	–
Revision to estimated cash flows	**(1)**	–
Closing balance, December 31	**$ 23**	$ 24

Upon the ultimate retirement of grain-dependent branch lines, the Company has to pay a fee, levied under the Canada Transportation Act, of $30,000 per mile of abandoned track. The undiscounted amount of the liability was $38 million at December 31, 2014 (2013 – $39 million), which, when present valued, was $20 million at December 31, 2014 (2013 – $21 million). The payments are expected to be made in the 2015 – 2044 period.

The Company also has a liability for a joint facility that will have to be settled upon retirement based on a proportion of use during the life of the asset. The estimate of the obligation at December 31, 2014, was $21 million (2013 – $20 million), which, when present valued, was $3 million at December 31, 2014 (2013 – $3 million). For purposes of estimating this liability, the payment related to the retirement of the joint facility is anticipated to be made in 30 years.

23 Shareholders' equity

Authorized and issued share capital

The Company is authorized to issue an unlimited number of Common Shares, an unlimited number of First Preferred Shares and unlimited number of Second Preferred Shares. At December 31, 2014, no First or Second Preferred Shares had been issued.

An analysis of Common Share balances is as follows:

(number of shares in millions)	**2014**	2013	2012
Share capital, January 1	**175.4**	173.9	170.0
CP common shares repurchased	**(10.3)**	–	–
Shares issued under stock option plan	**1.0**	1.5	3.9
Share capital, December 31	**166.1**	175.4	173.9

The change in the "Share capital" balances includes $3 million (2013 – $5 million; 2012 – $6 million) related to the cancellation of the TSARs liability on exercise of tandem stock options, and $17 million (2013 – $24 million; 2012 – $70 million) of stock-based compensation transferred from "Additional paid-in capital".

Share repurchase

On February 20, 2014, the Board of Directors of the Company approved a share repurchase program, and in March 2014, the Company filed a new normal course issuer bid ("bid") to purchase, for cancellation, up to 5.3 million of its outstanding Common Shares. On September 29, 2014, the Company announced the amendment of the bid to increase the maximum number of its Common Shares that may be purchased from 5.3 million to 12.7 million of its outstanding Common Shares, effective October 2, 2014. Under the filing, share purchases may be made during the twelve month period that began March 17, 2014, and ends March 16, 2015. The purchases are made at the market price on the day of purchase, with consideration allocated to share capital up to the average carrying amount of the shares, and any excess allocated to retained earnings. The following table provides the activities under the share repurchase program:

	2014
Number of common shares repurchased	**10,476,074**
Weighted-average price per share[1]	**$ 199.42**
Amount of repurchase (in millions)[1]	**$ 2,089**

[1] Includes brokerage fees.

24 Pensions and other benefits

The Company has both defined benefit ("DB") and defined contribution ("DC") pension plans. At December 31, 2014, the Canadian pension plans represent approximately 99% of total combined pension plan assets and approximately 98% of total combined pension plan obligations.

The DB plans provide for pensions based principally on years of service and compensation rates near retirement. Pensions for Canadian pensioners are partially indexed to inflation. Annual employer contributions to the DB plans, which are actuarially determined, are made on the basis of being not less than the minimum amounts required by federal pension supervisory authorities.

CP reached agreements with all of the unions which it had been bargaining with in Canada in 2012. The new agreements introduced amendments to pension plans. Among other changes, the amendments established a cap on pension for each year of pensionable service, including a cap on some non-union employees' pensions. Under the amendments, plan participants will continue to earn additional pensionable years of service as before, but with a dollar limit on the pension amount for each year earned. Plan amendments resulting from collective bargaining are accounted for in the periods the new agreements are ratified. The plan amendments resulting from the December 2012 arbitration award were contingent on CP

making plan amendments for non-union employees, and consequently were accounted for in the period CP made such amendments. As a result of the plan amendments, the projected benefit obligation decreased by $135 million from December 31, 2012, with a corresponding increase to "Other comprehensive (loss) income" and a reduction of "Accumulated other comprehensive loss" as prior service credits. The prior service credits are recognized in net periodic pension expense over the remaining terms of the applicable union agreements (averaging approximately two years), and over the expected average remaining service life of non-union employees.

The Company has other benefit plans including post-retirement health and life insurance for pensioners, and post-employment long-term disability and workers' compensation benefits, which are based on Company-specific claims. At December 31, 2014, the Canadian other benefits plans represent approximately 96% of total combined other plan obligations.

The Finance Committee of the Board of Directors has approved an investment policy that establishes long-term asset mix targets which take into account the Company's expected risk tolerances. Pension plan assets are managed by a suite of independent investment managers, with the allocation by manager reflecting these asset mix targets. Most of the assets are actively managed with the objective of outperforming applicable benchmarks. In accordance with the investment policy, derivative instruments may be used to hedge or adjust existing or anticipated exposures.

To develop the expected long-term rate of return assumption used in the calculation of net periodic benefit cost applicable to the market-related value of assets, the Company considers the expected composition of the plans' assets, past experience and future estimates of long-term investment returns. Future estimates of investment returns reflect the expected annual yield on applicable fixed income capital market indices, and the long-term return expectation for public equity, real estate, infrastructure and absolute return investments and the expected added value (relative to applicable benchmark indices) from active management of pension fund assets.

The Company has elected to use a market-related value of assets for the purpose of calculating net periodic benefit cost, developed from a five-year average of market values for the plans' public equity and absolute return investments (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the plans' fixed income, real estate and infrastructure securities.

The benefit obligation is discounted using a discount rate that is a blended interest rate for a portfolio of high-quality corporate debt instruments with matching cash flows. The discount rate is determined by management with the aid of third-party actuaries.

Net periodic benefit cost

The elements of net periodic benefit cost for DB pension plans and other benefits recognized in the year included the following components:

	Pensions			Other benefits		
(in millions of Canadian dollars)	**2014**	2013	2012	**2014**	2013	2012
Current service cost (benefits earned by employees in the year)	**$ 106**	$ 135	$ 131	**$ 14**	$ 16	$ 19
Interest cost on benefit obligation	**477**	445	452	**23**	21	24
Expected return on fund assets	**(757)**	(746)	(752)	**–**	–	–
Recognized net actuarial loss (gain)	**190**	267	208	**(2)**	(11)	3
Amortization of prior service costs	**(68)**	(58)	2	**–**	–	–
Net periodic benefit cost (recovery)	**$ (52)**	$ 43	$ 41	**$ 35**	$ 26	$ 46

Projected benefit obligation, fund assets, and funded status

Information about the Company's DB pension plans and other benefits, in aggregate, is as follows:

	Pensions		Other benefits	
(in millions of Canadian dollars)	**2014**	2013	**2014**	2013
Change in projected benefit obligation:				
Benefit obligation at January 1	**$ 9,921**	$ 10,647	**$ 483**	$ 535
Current service cost	**106**	135	**14**	16
Interest cost	**477**	445	**23**	21
Employee contributions	**51**	50	**–**	–
Benefits paid	**(579)**	(602)	**(27)**	(33)
Foreign currency changes	**15**	13	**2**	2
Plan amendments and other	**–**	(135)	**–**	–
Actuarial loss (gain)	**1,369**	(632)	**22**	(58)
Projected benefit obligation at December 31	**$ 11,360**	$ 9,921	**$ 517**	$ 483

(in millions of Canadian dollars)	Pensions 2014	Pensions 2013	Other benefits 2014	Other benefits 2013
Change in fund assets:				
Fair value of fund assets at January 1	**$ 10,722**	$ 9,763	**$ 8**	$ 9
Actual return on fund assets	**1,088**	1,404	**–**	–
Employer contributions	**80**	98	**26**	32
Employee contributions	**51**	50	**–**	–
Benefits paid	**(579)**	(602)	**(27)**	(33)
Foreign currency changes	**14**	9	**–**	–
Fair value of fund assets at December 31	**$ 11,376**	$ 10,722	**$ 7**	$ 8
Funded status – plan surplus (deficit)	**$ 16**	$ 801	**$ (510)**	$ (475)

	2014		2013	
	Pension plans in surplus	**Pension plans in deficit**	Pension plans in surplus	Pension plans in deficit
Projected benefit obligation at December 31	**$ (10,878)**	**$ (482)**	$ (9,533)	$ (388)
Fair value of fund assets at December 31	**11,182**	**194**	10,561	161
Funded Status	**$ 304**	**$ (288)**	$ 1,028	$ (227)

All Other benefits plans were in a deficit position at December 31, 2014 and 2013.

Pension asset and liabilities in the Company's Consolidated Balance Sheets

Amounts recognized in the Company's Consolidated Balance Sheets are as follows:

(in millions of Canadian dollars)	Pensions 2014	Pensions 2013	Other benefits 2014	Other benefits 2013
Pension asset	**$ 304**	$ 1,028	**$ –**	$ –
Accounts payable and accrued liabilities	**(9)**	(9)	**(34)**	(36)
Pension and other benefit liabilities	**(279)**	(218)	**(476)**	(439)
Total amount recognized	**$ 16**	$ 801	**$ (510)**	$ (475)

The defined benefit pension plans' accumulated benefit obligation as at December 31, 2014 was $10,975 million (2013 – $9,578 million). The accumulated benefit obligation is calculated on a basis similar to the projected benefit obligation, except no future salary increases are assumed in the projection of future benefits.

The measurement date used to determine the plan assets and the accrued benefit obligation is December 31. The most recent actuarial valuation for pension funding purposes for the Company's main Canadian pension plan was performed as at January 1, 2014. During 2015, the Company expects to file a new valuation with the pension regulator.

Accumulated other comprehensive losses

Amounts recognized in accumulated other comprehensive losses are as follows:

(in millions of Canadian dollars)	Pensions 2014	Pensions 2013	Other benefits 2014	Other benefits 2013
Net actuarial loss:				
Other than deferred investment gains	**$ 3,895**	$ 2,982	**$ 86**	$ 61
Deferred investment gains	**(803)**	(738)	**–**	–
Prior service cost	**(20)**	(88)	**5**	5
Deferred income tax	**(858)**	(613)	**(23)**	(16)
Total (Note 9)	**$ 2,214**	$ 1,543	**$ 68**	$ 50

The unamortized actuarial loss and the unamortized prior service cost included in "Accumulated other comprehensive loss" that are expected to be recognized in net periodic benefit cost during 2015 are $264 million and a recovery of $5 million, respectively, for pensions and $4 million and $1 million, respectively, for other post-retirement benefits.

Actuarial assumptions

Weighted-average actuarial assumptions used were approximately:

(percentages)	**2014**	2013	2012
Benefit obligation at December 31:			
Discount rate	**4.09**	4.90	4.28
Projected future salary increases	**3.00**	3.00	3.00
Health care cost trend rate	**7.00**[1]	8.00[2]	8.00[2]
Benefit cost for year ended December 31:			
Discount rate	**4.90**	4.28	4.55
Expected rate of return on fund assets	**7.75**	7.75	7.75
Projected future salary increases	**3.00**	3.00	3.00
Health care cost trend rate	**7.50**[2]	8.00[2]	8.00[2]

[1] The health care cost trend rate is assumed to be 7.00% in 2015 and 2016, and then decreasing by 0.50% per year to an ultimate rate of 5.00% per year in 2020 and thereafter.
[2] The health care cost trend rate was previously assumed to be 7.00% in 2015 (7.50% in 2014), and then decreasing by 0.50% per year to an ultimate rate of 5.00% per year in 2019 and thereafter.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in the assumed health care cost trend rate would have the following effects:

(in millions of Canadian dollars) Favourable (unfavourable)	**One percentage point increase**	**One percentage point decrease**
Effect on the total of service and interest costs	$ –	$ –
Effect on post-retirement benefit obligation	(6)	6

In 2014, the Canadian Institute of Actuaries and the Society of Actuaries each published updated mortality tables based on broad pension plan experience in Canada and the U.S., respectively. CP's obligations for defined benefit pension and post-retirement benefit plans at December 31, 2014 are based on these new mortality tables, with adjustments to reflect actual plan mortality experience to the extent that credible experience data was available. The changes to the new mortality tables increased the obligations for pensions and post-retirement benefits by approximately $225 million.

Plan assets

Plan assets are recorded at fair value. The major asset categories are public equity securities, debt securities, real estate, infrastructure and absolute return investments. The fair values of the public equity and debt securities are primarily based on quoted market prices. Real estate values are based on annual valuations performed by external parties, taking into account current market conditions and recent sales transactions where practical and appropriate. Infrastructure values are based on the fair value of each fund's assets as calculated by the fund manager, generally using a discounted cash flow analysis that takes into account current market conditions and recent sales transactions where practical and appropriate. Absolute return investments are a portfolio of units of externally managed hedge funds and are valued by the fund administrators.

The Company's pension plan asset allocation, the current weighted average asset allocation targets and the current weighted average policy range for each major asset class, were as follows:

Asset allocation (percentage)	**Current asset allocation target**	**Current policy range**	**Percentage of plan assets at December 31 2014**	2013
Cash and cash equivalents	0.5	0 – 5	**1.7**	4.1
Fixed income	29.5	20 – 40	**21.9**	20.6
Public equity	46.0	35 – 55	**52.5**	49.6
Real estate and infrastructure	12.0	4 – 20	**7.6**	10.8
Absolute return	12.0	0 – 18	**16.3**	14.9
Total	100.0		**100.0**	100.0

Summary of the assets of the Company's DB pension plans at fair values

The following is a summary of the assets of the Company's DB pension plans at fair values at December 31, 2014 and 2013:

(in millions of Canadian dollars)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
December 31, 2014

Derivative liabilities[6][7]	–	(24)	–	(24)
	$ 5,438	$ 2,530	$ 2,754	$ 10,722

[1] Government & Corporate Bonds:
Fair values for bonds are based on market prices supplied by independent sources as of the last trading day.

[2] Mortgages:
The fair value measurement of $77 million (2013 – $52 million) of mortgages categorized as Level 2 is based on current market yields of financial instruments of similar maturity, coupon and risk factors.

[3] Real Estate:
The fair value of real estate investments of $654 million (2013 – $847 million) is based on property appraisals which use a number of approaches that typically include a discounted cash flow analysis, a direct capitalization income method and/or a direct comparison approach. Appraisals of real estate investments are generally performed semi-annually by qualified external accredited appraisers. There are no unfunded commitments for real estate as at December 31, 2014.

(4) Infrastructure:
Infrastructure fund values of $208 million (2013 – $314 million) are based on the fair value of the fund assets as calculated by the fund manager, generally using a discounted cash flow analysis that takes into account current market conditions and recent sales transactions where practical and appropriate. As at December 31, 2014, unfunded commitments for infrastructure was negligible (2013 – $23 million).

(5) Absolute Return:
The fair value of absolute return fund investments is based on the net asset value reported by the fund administrators. The funds have different redemption policies and periods. All hedge fund investments have contractual redemption frequencies, ranging from monthly to tri-annually, and redemption notice periods varying from 30 to 95 days. Hedge fund investments that have redemption dates less frequent than every four months or have restrictions on contractual redemption features at the reporting date are classified as Level 3. There are no unfunded commitments for absolute return investments as at December 31, 2014.

- Fund of hedge funds invest in a portfolio of hedge funds that allocate capital across a broad array of funds and/or investment managers.
- Multi-strategy funds include funds that invest in broadly diversified portfolios of equity, fixed income and derivative instruments.
- Credit funds invest in an array of fixed income securities.
- Equity funds invest primarily in U.S. and global equity securities.

(6) The Company's pension funds may utilize the following derivative instruments: equity futures to replicate equity index returns (Level 2); currency forwards to partially hedge foreign currency exposures (Level 2); bond forwards to reduce asset/liability interest rate risk exposures (Level 2); interest rate swaps to manage duration and interest rate risk (Level 2); credit default swaps to manage credit risk (Level 2); and options to manage interest rate risk and volatility (Level 2).

(7) At December 31, 2013, derivatives were primarily being used to partially hedge foreign currency exposures.

Portion of the assets of the Company's DB pension plans measured at fair value using unobservable inputs (Level 3)

During 2013 and 2014 the portion of the assets of the Company's DB pension plans measured at fair value using unobservable inputs (Level 3) changed as follows:

(in millions of Canadian dollars)	Real Estate	Infrastructure	Absolute Return	Total
As at January 1, 2013	$ 779	$ 333	$ –	$ 1,112
Contributions	–	–	1,500	1,500
Disbursements	(22)	(42)	–	(64)
Net realized gains	22	3	(2)	23
Increase in net unrealized gains	68	20	95	183
As at December 31, 2013	$ 847	$ 314	$ 1,593	$ 2,754
Contributions	–	–	29	29
Disbursements	(236)	(97)	–	(333)
Net transfer out of Level 3	–	–	(116)	(116)
Net realized gains	67	–	–	67
Increase (decrease) in net unrealized gains	(24)	(9)	239	206
As at December 31, 2014	**$ 654**	**$ 208**	**$ 1,745**	**$ 2,607**

Level 3 fair value measurements for absolute return, real estate and infrastructure investments are based on the net asset value reported by the fund administrator, property appraisals and discounted cash flow analysis, of which there are no reasonable alternative assumptions. Therefore it is not practicable to provide a sensitivity analysis.

Additional plan assets information

The Company's expected long-term target return is 7.75%, net of all fees and expenses. In identifying the asset allocation ranges, consideration was given to the long-term nature of the underlying plan liabilities, the solvency and going-concern financial position of the plan, long-term return expectations and the risks associated with key asset classes as well as the relationships of returns on key asset classes with each other, inflation and interest rates. When advantageous and with due consideration, derivative instruments may be utilized, provided the total value of the underlying assets represented by financial derivatives, excluding currency forwards, is limited to 30% of the market value of the fund.

When investing in foreign securities, the plans are exposed to foreign currency risk; the effect of which is included in the valuation of the foreign securities. The plans were 41% exposed to the U.S. dollar, 13% exposed to European currencies, and 5% exposed to various other currencies, as at December 31, 2014.

At December 31, 2014, fund assets consisted primarily of listed stocks and bonds, including 184,392 of the Company's Common Shares (2013 –129,444) at a market value of $41 million (2013 – $21 million) and 6.25% Unsecured Notes issued by the Company at a par value of $2 million (2013 – $2 million) and a market value of $2 million (2013 – $2 million).

Cash flows

In 2014, the Company contributed $88 million to its pension plans (2013 – $105 million; 2012 – $107 million), including $8 million to the DC plans (2013 – $7 million; 2012 – $5 million), $67 million to the Canadian registered and U.S. qualified DB pension plans (2013 – $86 million; 2012 – $89 million), and $13 million to the Canadian non-registered supplemental pension plan (2013 – $12 million; 2012 – $13 million). In addition, the Company made payments directly to employees, their beneficiaries or estates or to third-party benefit administrators of $26 million in 2014 (2013 – $32 million; 2012 – $35 million) with respect to other benefits.

Estimated future benefit payments

The estimated future defined benefit pension and other benefit payments to be paid by the plans for each of the next five years and the subsequent five-year period are as follows:

(in millions of Canadian dollars)	Pensions	Other benefits
2015	$ 562	$ 36
2016	579	35
2017	595	35
2018	610	34
2019	624	34
2020 – 2024	3,272	162

The benefit payments from the Canadian registered and U.S. qualified DB pension plans are payable from their respective pension funds. Benefit payments from the supplemental pension plan and from the other benefits plans are payable directly from the Company.

Defined contribution plan

Canadian non-unionized employees hired prior to July 1, 2010 had the option to participate in the Canadian DC plan. All Canadian non-unionized employees hired after such date must participate in this plan. Employee contributions are based on a percentage of salary. The Company matches employee contributions to a maximum percentage each year.

Effective July 1, 2010, a new U.S. DC plan was established. All U.S. non-unionized employees hired after such date must participate in this plan. Employees do not contribute to the plan. The Company annually contributes a percentage of salary.

The DC plans provide a pension based on total employee and employer contributions plus investment income earned on those contributions.

In 2014, the net cost of the DC plans, which generally equals the employer's required contribution, was $8 million (2013 – $7 million; 2012 – $5 million).

Contributions to multi-employer plans

Some of the Company's unionized employees in the U.S. are members of a U.S. national multi-employer benefit plan. Contributions made by the Company to this plan in 2014 in respect of post-retirement medical benefits were $4 million (2013 – $5 million; 2012 – $6 million).

25 Stock-based compensation

At December 31, 2014, the Company had several stock-based compensation plans, including stock option plan, various cash settled liability plans and an employee stock savings plan. These plans resulted in an expense in 2014 of $110 million (2013 – $92 million; 2012 – $64 million).

Accelerated vesting due to changes in the composition of the Board of Directors

Most of the stock-based compensation plans include a provision whereby vesting is accelerated should certain changes in the composition of the Board of Directors occur. These provisions were triggered on June 26, 2012 and the recognition of the revised vesting terms as outlined in the stock-based compensation plans resulted in a credit to "Compensation and benefits" of $8 million in the second quarter of 2012. From February 28, 2012, accelerated vesting will only occur when the definition of change of control under the stock-based compensation plans is triggered and the holder of the award is terminated without cause.

A. Stock Option Plan

Summary of stock options

The following table summarizes the Company's stock option plan as of December 31:

	Options outstanding		Nonvested options	
	Number of options	Weighted average exercise price	Number of options	Weighted average grant date fair value
Outstanding, January 1, 2014	3,360,483	$ 77.15	1,733,846	$ 25.35
New options granted	426,020	173.98	426,020	48.70
Exercised	(941,492)	64.76	–	–
Vested	–	–	(632,532)	23.58
Forfeited	(97,359)	132.67	(94,809)	36.71
Expired	(8,963)	102.52	(8,563)	28.63
Outstanding at December 31, 2014	2,738,689	94.35	1,423,962	32.35
Vested or expected to vest at December 31, 2014[1]	2,729,773	$ 94.19	N/A	N/A
Exercisable at December 31, 2014	1,314,727	$ 70.25	N/A	N/A

[1] As at December 31, 2014, the weighted average remaining term of vested or expected to vest options was 5.3 years with an aggregate intrinsic value of $355 million.

The following table provides the number of stock options outstanding and exercisable as at December 31, 2014 by range of exercise price and their related intrinsic aggregate value, and for options outstanding, the weighted-average years to expiration. The table also provides the aggregate intrinsic value for in-the-money stock options, which represents the amount that would have been received by option holders had they exercised their options on December 31, 2014 at the Company's closing stock price of $223.75.

	Options outstanding				Options exercisable		
Range of exercise prices	Number of options	Weighted average years to expiration	Weighted average exercise price	Aggregate intrinsic value (millions)	Number of options	Weighted average exercise price	Aggregate intrinsic value (millions)
$36.29 – $69.50	596,055	3.5	$ 55.63	$ 100	596,055	$ 55.63	$ 100
$69.51 – $74.55	794,950	6.7	73.08	120	469,950	72.87	71
$74.56 – $117.48	614,608	6.8	89.65	83	168,128	86.24	23
$117.49 – $222.88	733,076	8.7	152.84	52	80,594	129.76	8
Total[1]	2,738,689	6.5	$ 94.35	$ 355	1,314,727	$ 70.25	$ 202

[1] As at December 31, 2014, the total number of in-the-money stock options outstanding was 2,738,689 with a weighted-average exercise price of $94.35. The weighted-average year to expiration of exercisable stock options is 5.2 years.

Under the fair value method, the fair value of options at the grant date was approximately $21 million for options issued in 2014 (2013 – $20 million; 2012 – $28 million). The weighted average fair value assumptions were approximately:

	2014	2013	2012
Expected option life (years)[1]	**5.98**	6.25	6.03
Risk-free interest rate[2]	**1.66%**	1.60%	1.47%
Expected stock price volatility[3]	**29%**	30%	31%
Expected annual dividends per share[4]	**$ 1.40**	$ 1.40	$ 1.40
Estimated forfeiture rate[5]	**1.2%**	1.2%	1.2%
Weighted average grant date fair value of options granted during the year	**$ 48.88**	$ 35.40	$ 19.04

[1] Represents the period of time that awards are expected to be outstanding. Historical data on exercise behaviour or, when available, specific expectations regarding future exercise behaviour were used to estimate the expected life of the option.

(2) Based on the implied yield available on zero-coupon government issues with an equivalent remaining term at the time of the grant.
(3) Based on the historical stock price volatility of the Company's stock over a period commensurate with the expected term of the option.
(4) Determined by the current annual dividend at the time of grant. The Company does not employ different dividend yields throughout the contractual term of the option.
(5) The Company estimated forfeitures based on past experience. The rate is monitored on a periodic basis.

Certain of the Company's stock option plan are subject to post-vesting restrictions prior to expiry. The discount for these restrictions resulted in a reduction of the fair value at grant date of options issued in 2012 of $2 million. This discount was estimated using the fair value of put options that, together with the granted call options, mimicked the characteristics of the post-vesting restriction. The post-vesting restrictions do not relate to grants in 2013 and 2014.

In 2014, the expense for stock options (regular and performance) was $18 million (2013 – $17 million; 2012 – $24 million). At December 31, 2014, there was $16 million of total unrecognized compensation related to stock options which is expected to be recognized over a weighted-average period of approximately 1.3 years.

The total fair value of shares vested for the stock option plan during 2014 was $15 million (2013 – $5 million; 2012 – $34 million).

The following table provides information related to all options exercised in the stock option plan during the years ended December 31:

(in millions of Canadian dollars)	**2014**	2013	2012
Total intrinsic value	**$ 115**	$ 103	$ 118
Cash received by the Company upon exercise of options	**62**	83	198

B. Other Share-based Plans

Performance share units plan

During 2014, the Company issued 165,500 PSUs with a grant date fair value of $25 million. These units attract dividend equivalents in the form of additional units based on the dividends paid on the Company's Common Shares. PSUs vest and are settled in cash, or in CP common shares approximately three years after the grant date, contingent upon CP's performance (performance factor). The fair value of PSUs is measured, both on the grant date and each subsequent quarter until settlement, using a Monte Carlo simulation model. The model utilizes multiple input variables that determine the probability of satisfying the performance and market conditions stipulated in the grant.

In the second quarter of 2012, changes to the Board resulted in the immediate vesting of a pro-rata portion of all unvested PSUs with a total pay out of $31 million in 2012.

The performance period for the PSUs issued in 2014 is January 1, 2014 to December 31, 2016. The performance factors for these PSUs are Operating ratio, Free cash flow, Total Shareholder Return ("TSR") compared to the S&P/TSX60 index, and TSR compared to Class I railways. Beginning with PSUs granted in 2014, grant recipients who are eligible to retire and have provided six months of service during the performance period are entitled to the full award. Previous to 2014, only a pro-rata share of units was retained at retirement.

The performance period for the PSUs issued in the fourth quarter of 2012 and in 2013 is January 1, 2013 to December 31, 2015. The performance factors for these PSUs are Operating ratio, Free cash flow, Total Shareholder Return ("TSR") compared to the S&P/TSX60 index, and TSR compared to Class I railways.

The following table summarizes information related to the Company's PSUs as at December 31:

	2014	2013
Outstanding, January 1	**349,925**	200,702
Granted	**165,500**	206,405
Units, in lieu of dividends	**3,296**	3,498
Forfeited	**(57,938)**	(60,680)
Outstanding, December 31	**460,783**	349,925

In 2014, the expense for PSUs was $50 million (2013 – expense of $25 million; 2012 – expense recovery of $1 million). At December 31, 2014, there was $50 million of total unrecognized compensation related to PSUs which is expected to be recognized over a weighted-average period of approximately 1.4 years.

Deferred share units plan

The Company established the DSU plan as a means to compensate and assist in attaining share ownership targets set for certain key employees and Directors. A DSU entitles the holder to receive, upon redemption, a cash payment equivalent to the market value of a Common Share at the redemption date. DSUs vest over various periods of up to 48 months and are only redeemable for a specified period after employment is terminated.

Senior managers may elect to receive DSUs in lieu of cash payments for certain incentive programs. In addition, senior managers will be granted with a 25% company match of the amount elected when acquiring Common Shares to meet ownership targets. The election to receive eligible payments in DSUs is no longer available to a participant when the value of the participant's DSUs is sufficient to meet the Company's stock ownership guidelines. Senior managers have five years to meet their ownership targets.

An expense to income for DSUs is recognized over the vesting period for both the initial subscription price and the change in value between reporting periods.

The following table summarizes information related to the DSUs as of December 31:

	2014	2013
Outstanding, January 1	**332,221**	357,740
Granted	**58,460**	76,035
Units, in lieu of dividends	**2,572**	4,145
Forfeited	**(711)**	(2,372)
Redeemed	**(84,095)**	(103,327)
Outstanding, December 31	**308,447**	332,221

During 2014, the Company granted 58,460 DSUs with a grant date fair value of $9 million. In 2014, the expense for DSUs was $28 million (2013 – $32 million; 2012 – $23 million). At December 31, 2014, there was $3 million of total unrecognized compensation related to DSUs which is expected to be recognized over a weighted-average period of approximately 0.7 years.

Restricted share units plan

The Company issued 16,325 RSUs in 2014 with a grant date fair value of $3 million. The RSUs are notional full value shares that attract dividend equivalents in the form of additional units based on the dividends paid on the Company's Common Shares. RSUs have no performance factors attached to them and are subject to time vesting over various periods of up to 36 months. RSUs are settled in cash up to three years after the grant date. An expense to income for RSUs is recognized over the vesting period for both the initial subscription price and the change in value between reporting periods. In 2014, the expense for RSUs was $9 million (2013 – $10 million; 2012 – $7 million). At December 31, 2014, there was $3 million of total unrecognized compensation related to RSUs which is expected to be recognized over a weighted-average period of approximately 2.0 years.

The following table summarizes information related to the Company's RSUs as at December 31:

	2014	2013
Outstanding, January 1	**92,333**	173,234
Granted	**16,325**	–
Units, in lieu of dividends	**700**	1,304
Exercised	**(53,964)**	(70,211)
Forfeited	**(7,874)**	(11,994)
Outstanding, December 31	**47,520**	92,333

Summary of share based liabilities paid

The following table summarizes the total share based liabilities paid for each of the years ended December 31:

(in millions of Canadian dollars)	**2014**	2013	2012
Plan			
DSUs	**$ 17**	$ 17	$ 19
PSUs	**–**	–	55
RSUs	**12**	9	–
Total	**$ 29**	$ 26	$ 74

C. Employee share purchase plan

The Company has an employee share purchase plan whereby both employee and Company contributions are used to purchase shares on the open market for employees. The Company's contributions are expensed over the one-year vesting period. Under the plan, the Company matches $1 for every $3 contributed by employees up to a maximum employee contribution of 6% of annual salary.

The total number of shares purchased in 2014 on behalf of participants, including the Company contribution, was 176,906 (2013 – 271,934; 2012 – 445,951). In 2014, the Company's contributions totalled $5 million (2013 – $5 million; 2012 – $4 million) and the related expense was $5 million (2013 – $5 million; 2012 – $4 million).

26 Variable interest entities

The Company leases equipment from certain trusts, which have been determined to be variable interest entities financed by a combination of debt and equity provided by unrelated third parties. The lease agreements, which are classified as operating leases, have a fixed price purchase option which create the Company's variable interest and result in the trusts being considered variable interest entities.

Responsibility for maintaining and operating the leased assets according to specific contractual obligations outlined in the terms of the lease agreements and industry standards is the Company's. The rigor of the contractual terms of the lease agreements and industry standards are such that the Company has limited discretion over the maintenance activities associated with these assets. As such, the Company concluded these terms do not provide the Company with the power to direct the activities of the variable interest entities in a way that has a significant impact on the entities' economic performance.

The financial exposure to the Company as a result of its involvement with the variable interest entities is equal to the fixed lease payments due to the trusts. In 2014, lease payments after tax were $10 million. Future minimum lease payments, before tax, of $209 million will be payable over the next 16 years (Note 27).

The Company does not guarantee the residual value of the assets to the lessor; however, it must deliver to the lessor the assets in good operating condition, subject to normal wear and tear, at the end of the lease term.

As the Company's actions and decisions do not significantly affect the variable interest entities' performance, and the Company's fixed price purchase option is not considered to be potentially significant to the variable interest entities, the Company is not considered to be the primary beneficiary, and does not consolidate these variable interest entities.

27 Commitments and contingencies

In the normal course of its operations, the Company becomes involved in various legal actions, including claims relating to injuries and damage to property. The Company maintains provisions it considers to be adequate for such actions. While the final outcome with respect to actions outstanding or pending at December 31, 2014, cannot be predicted with certainty, it is the opinion of management that their resolution will not have a material adverse effect on the Company's financial position or results of operations.

Commitments

At December 31, 2014, the Company had committed to total future capital expenditures amounting to $427 million and operating expenditures relating to supplier purchase obligations, such as locomotive maintenance and overhaul agreements, as well as agreements to purchase other goods and services amounting to approximately $1.4 billion for the years 2015-2032 of which CP estimates approximately $700 million will be incurred in the next 5 years.

As at December 31, 2014, the Company's commitments under operating leases were estimated at $569 million in aggregate, with minimum annual payments in each of the next five years and thereafter as follows:

(in millions of Canadian dollars)	Operating leases
2015	$ 114
2016	88
2017	67
2018	55
2019	43
Thereafter	202
Total minimum lease payments	$ 569

Expenses for operating leases for the year ended December 31, 2014, were $121 million (2013 – $154 million; 2012 – $182 million).

Legal proceedings related to Lac-Mégantic rail accident

On July 6, 2013, a train carrying crude oil operated by Montreal Maine and Atlantic Railway ("MM&A") derailed and exploded in Lac-Mégantic, Quebec on a section of railway line owned by MM&A. The previous day CP had interchanged the train to MM&A, and after that interchange MM&A exercised exclusive control over the train.

Following this incident, the Minister of Sustainable Development, Environment, Wildlife and Parks of Quebec issued an order directing certain named parties to recover the contaminants and to clean up and decontaminate the derailment site. CP was added as a named party on August 14, 2013. CP is a party to an administrative appeal with respect to this order. No hearing date on the merits of CP's appeal has been scheduled.

A class action lawsuit has also been filed in the Superior Court of Quebec on behalf of a class of persons and entities residing in, owning or leasing property in, operating a business in or physically present in Lac-Mégantic. The lawsuit seeks damages caused by the derailment including for wrongful deaths, personal injuries, and property damages. CP was added as a defendant on August 16, 2013. The Superior Court of Quebec is not expected to release its judgment on the authorization of the class action before the end of February 2015.

In the wake of the derailment and ensuing litigation, MM&A filed for bankruptcy in Canada and the United States. In an Adversary Proceeding filed by the MM&A U.S. bankruptcy trustee against CP, Irving Oil and the World Fuel entities, CP has been accused of failing to ensure that World Fuel or Irving properly classified the oil lading and of not refusing to ship the oil in DOT-111 tank cars. CP intends to move to withdraw the bankruptcy court reference and will thereafter seek to have the claim against CP dismissed as federally preempted.

In addition, CP has received two damage to cargo notices of claims from the shipper of the oil on the derailed train, Western Petroleum. Western Petroleum has submitted U.S. and Canadian notices of claims for the same damages and, under the Carmack Amendment (the U.S. damage to cargo statute), seeks to recover for all injuries associated with, and indemnification for all claims arising from, the derailment. Both jurisdictions permit a shipper to recover the value of damaged lading against any carrier in the delivery chain, subject to limitations in the carrier's tariffs. CP's tariffs significantly restrict shipper damage claim rights.

At this early stage in the legal proceedings, any potential liability and the quantum of potential loss cannot be determined. Nevertheless, CP denies liability for MM&A's derailment and will vigorously defend itself in the proceedings described above and in any proceeding that may be commenced in the future.

28 Guarantees

In the normal course of operating the railway, the Company enters into contractual arrangements that involve providing certain guarantees, which extend over the term of the contracts. These guarantees include, but are not limited to:

- residual value guarantees on operating lease commitments of $120 million at December 31, 2014;
- guarantees to pay other parties in the event of the occurrence of specified events, including damage to equipment, in relation to assets used in the operation of the railway through operating leases, rental agreements, easements, trackage and interline agreements; and
- indemnifications of certain tax-related payments incurred by lessors and lenders.

The maximum amount that could be payable under these guarantees, excluding residual value guarantees, cannot be reasonably estimated due to the nature of certain of these guarantees. All or a portion of amounts paid under guarantees to other parties in the event of the occurrence of specified events could be recoverable from other parties or through insurance. The Company has accrued for all guarantees that it expects to pay. At December 31, 2014, these accruals amounted to $3 million (2013 – $6 million), recorded in "Accounts payable and accrued liabilities".

Indemnifications

Pursuant to a trust and custodial services agreement with the trustee of the Canadian Pacific Railway Company Pension Plan, the Company has undertaken to indemnify and save harmless the trustee, to the extent not paid by the fund, from any and all taxes, claims, liabilities, damages, costs and expenses arising out of the performance of the trustee's obligations under the agreement, except as a result of misconduct by the trustee. The indemnity includes liabilities, costs or expenses relating to any legal reporting or notification obligations of the trustee with respect to the defined contribution option of the pension plans or otherwise with respect to the assets of the pension plans that are not part of the fund. The indemnity survives the termination or expiry of the agreement with respect to claims and liabilities arising prior to the termination or expiry. At December 31, 2014, the Company had not recorded a liability associated with this indemnification, as it does not expect to make any payments pertaining to it.

29 Management transition

On May 17, 2012, following a proxy contest, Mr. Fred Green left his position as President and Chief Executive Officer of the Company. That same day, Mr. Stephen Tobias, a new Board member elected at the Company's annual shareholders meeting held on May 17, 2012, was appointed by the Board as Interim Chief Executive Officer and served in that role until June 28, 2012.

On June 28, 2012, Mr. E. Hunter Harrison was appointed by the Board as President and Chief Executive Officer. As a result of the appointment of Mr. Harrison, the Company recorded a charge of $38 million with respect to compensation and other transition costs, including $2 million of associated costs, in the second quarter of 2012. This charge was recorded in the Company's financial statements in "Compensation and benefits" and "Purchased services and other", in the amounts of $16 million and $22 million, respectively.

Included in this charge were amounts totalling $16 million in respect of deferred retirement compensation for Mr. Harrison and $20 million to Pershing Square Capital Management, L.P. ("Pershing Square") and related entities. In 2012, Pershing Square and related entities owned or control approximately 14% of the Company's outstanding shares, and two Board members, Mr. William Ackman and Mr. Paul Hilal, are partners of Pershing Square. The amount payable to Pershing Square and related entities was to reimburse them, on behalf of Mr. Harrison, for certain amounts they had previously paid to or incurred on behalf of Mr. Harrison pursuant to an indemnity in favour of Mr. Harrison in connection with losses suffered in legal proceedings commenced against Mr. Harrison by his former employer. The terms of Pershing Square's indemnity required Mr. Harrison to return any funds advanced under the indemnity in the event he accepted employment at CP. As a result, Mr. Harrison made it a precondition of accepting the Company's offer of employment that CP assumes the indemnity obligations and return the funds advanced by Pershing Square. As a result of the payment, the Company would have been entitled to enforce Mr. Harrison's rights in the aforementioned legal proceedings, allowing it to recover to the extent of Mr. Harrison's success in those proceedings; however on February 3, 2013 the Company and Mr. Harrison settled the legal proceedings with Mr. Harrison's former employer, providing the Company with partial recovery (U.S. $9 million) of the amounts in the dispute. The Company may receive repayment in other circumstances in the event of certain breaches by Mr. Harrison of his obligations under an employment agreement with the Company. Mr. Harrison was also granted stock options and DSUs upon commencing employment that had a grant date fair value of $12 million (Note 25).

In addition, the Company agreed to indemnify Mr. Harrison for certain other amounts, to a maximum of $3 million plus legal fees, but as a result of the settlement of the aforementioned legal proceedings, such indemnity is no longer applicable. Accordingly, no amount was accrued at December 31, 2012.

The Company also recorded a charge of $4 million in the second quarter of 2012 with respect to a retirement allowance for Mr. Green.

On February 5, 2013, as part of its long-term succession plan, the Company appointed Mr. Keith Creel as President and Chief Operating Officer. In connection with this appointment, Mr. Harrison's title changed to Chief Executive Officer.

30 Segmented information

Operating segment

The Company operates in only one operating segment: rail transportation. Operating results by geographic areas, railway corridors or other lower level components or units of operation are not reviewed by the Company's chief operating decision maker to make decisions about the allocation of resources to, or the assessment of performance of, such geographic areas, corridors, components or units of operation.

In the years ended December 31, 2014, 2013 and 2012, no one customer comprised more than 10% of total revenues and accounts receivable.

Geographic information

(in millions of Canadian dollars)	Canada	United States	Total
2014			
Revenues	**$ 4,655**	**$ 1,965**	**$ 6,620**
Long-term assets excluding financial instruments, mortgages receivable and deferred tax assets	**$ 10,114**	**$ 4,733**	**$ 14,847**
2013			
Revenues	$ 4,330	$ 1,803	$ 6,133
Long-term assets excluding financial instruments, mortgages receivable and deferred tax assets	$ 9,842	$ 4,237	$ 14,079
2012			
Revenues	$ 4,095	$ 1,600	$ 5,695
Long-term assets excluding financial instruments, mortgages receivable and deferred tax assets	$ 9,138	$ 4,249	$ 13,387

31 Reclassification of comparative figures

Billings to third parties for the recovery of costs incurred for freight car repairs and servicing have been reclassified from "Purchased services and other" to "Compensation and benefits" and "Materials" within "Operating expenses" in the Consolidated Statements of Income, in order to match the billings with the costs incurred on behalf of third parties. As a result, the changes to these components of "Operating expenses" for the year ended December 31, 2013 and 2012 are noted below. "Operating expenses" in total were unchanged as a result of this reclassification.

(in millions of Canadian dollars)	Compensation and benefits	Material	Purchased services and other
For the year ended December 31, 2013			
As previously reported	$ 1,418	$ 249	$ 876
(Decrease) increase	(33)	(89)	122
As reclassified	$ 1,385	$ 160	$ 998
For the year ended December 31, 2012			
As previously reported	$ 1,506	$ 238	$ 940
(Decrease) increase	(32)	(72)	104
As reclassified	$ 1,474	$ 166	$ 1,044

32 Subsequent events

Issuance of long-term debt and settlement of forward starting swaps

On January 28, 2015, CP announced the issuance of U.S. $700 million 2.900% 10-year Notes due February 1, 2025 for net proceeds of U.S. $694 million. This transaction closed on February 2, 2015.

On January 28, 2015, the Company settled a notional U.S. $700 million of forward starting swaps, designated as a cash flow hedge related to the issuance of the notes described above. The fair value of these derivative instruments was a loss of U.S. $50 million at the time of the settlement. Effective hedge losses were deferred in "Accumulated other comprehensive loss" and will be amortized to "Net interest expense" until the underlying notes, which were hedged, are repaid.

Resolution of certain legal proceedings

In 2013, CP provided an interest free loan pursuant to a court order in the amount of $20 million to a corporation owned by a court appointed trustee ("the judicial trustee") to facilitate the acquisition of a building. The building was held in trust during the legal proceedings with regard to CP's entitlement to an exercised purchase option of the building ("purchase option"). As at December 31, 2014, the loan of $20 million and the purchase option, book value of $8 million, were recorded as "Other assets" in the Company's Consolidated Balance Sheets.

In January 2015, CP reached a settlement with a third party that, following the sale of the building to an arm's length third party in February 2015, will result in CP receiving net proceeds of $59 million for the sale of the building and resolution of legal proceedings. The net proceeds would include repayment of the aforementioned loan to the judicial trustee. CP expects to record a gain of approximately $31 million ($27 million after-tax) to Purchased services and other in the first quarter of 2015.

CP HAS HEART

THE ARTERIES OF A NATION, THE PULSE OF COMMITMENT.

CP's new "CP Has Heart" community investment program has already contributed $1.97 million toward heart health education, medical advances and better quality care.

The vast majority of people today have at least one risk factor for heart disease. By 2020, experts believe heart disease will be the leading cause of death in the world, and CP has decided to step up and do something to help.

PUTTING OUR HEART INTO AN IMPORTANT CAUSE

"A railroad serves as the arteries of a nation, but at its heart is community." This is the sentiment behind our new CP Has Heart community investment program, formed to unify companywide efforts around a single cause to make a positive impact on the countless communities CP touches.

We launched the program through a partnership with the Heart and Stroke Foundation, tied to the Spruce Meadows Canadian Pacific Grand Prix and Canadian Pacific International, two world-class equestrian show jumping events. With every jump cleared, CP funded placement of automated external defibrillators and lifesaving training in locations where Calgary-area youth learn, gather and play.

Other 2014 program initiatives included a $1.3 million contribution to support paediatric cardiology research and care at the Children's Hospital, London Health Sciences Centre in Ontario, in association with the LPGA Canadian Pacific Women's Open golf tournament, and sponsorship of the CFL Grey Cup CP Has Heart Touchdown program, raising funds for critical cardiac care equipment. The sum total of contributions toward saving lives and improving heart health in 2014: $1.97 million.

THE START OF SOMETHING GREAT

Through CP Has Heart, we are excited about our potential to make a real difference in this highly preventable and increasingly treatable disease. Our activities and contributions in 2014 are just a start – we have many exciting initiatives and programs in the pipeline for 2015 and beyond.

CP HAS HEART

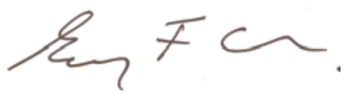
CHAIRMAN'S MESSAGE

DEAR FELLOW SHAREHOLDERS,

The year 2014 marked an important milestone for CP. It was the year in which we reached or surpassed the majority of the financial and operating goals the company set forth when we put a new management team in place in 2012.



The Board could not be more pleased with CP's progress. Thanks to the leadership and vision of CEO E. Hunter Harrison, the skills and experience of his management team, and the dedication of the entire CP workforce, the company achieved its objectives two years ahead of plan and has an ambitious growth strategy in place for 2018.

I was proud to be elected by the Board to be its new Chairman in May of 2014, as my friend and colleague Paul G. Haggis completed his term. The Board would like to express its heartfelt gratitude for Paul's fine leadership during a time of profound change at CP. We are fortunate that he has chosen to remain on the Board, serving on our Audit and Finance committees.

We would also like to express our appreciation to Jim Prentice, who left the CP Board after winning the Alberta Progressive Conservative leadership election to become Alberta's 16th premier in late 2014. Needless to say, Jim brought extraordinary leadership qualities along with a strong combination of government and corporate experience to his role on the Board. We will miss both his enthusiasm and wise counsel.

This is an exciting time to be associated with CP. It is a great honour to serve as Chairman of this great Canadian icon, once again an industry leader. We are confident in the company's continued success as it begins its next phase of growth.

With sincere appreciation,

Gary F. Colter
Chairman of the Board

SHAREHOLDER ADMINISTRATION

Common Shares

Computershare Investor Services Inc., with transfer facilities in Montreal, Toronto, Calgary and Vancouver, serves as transfer agent and registrar for the Common Shares in Canada. Computershare Trust Company NA, Canton, Massachusetts, serves as co-transfer agent and co-registrar for the Common Shares in the United States.

For information concerning dividends, lost share certificates, estate transfers or for change in share registration or address, please contact the transfer agent and registrar by telephone at 1-877-4-CP-RAIL (1-877-427-7245) toll free North America or International (514) 982-7555, visit their website at www.investorcentre.com/cp; or write to:

Computershare Investor Services Inc.

100 University Avenue, 8th Floor
Toronto, Ontario, Canada M5J 2Y1

INFORMATION REGARDING DIRECT REGISTRATION

The Direct Registration System, or DRS, allows registered holders to hold securities in "book entry" form without having a physical certificate issued as evidence of ownership. Instead, securities are held in the name of the registered holder and registered electronically on the issuer's records maintained by the issuer's transfer agent. If you are a registered holder of shares and wish to hold your shares using the DRS, please contact the transfer agent at the phone number or address shown above.

For more information about direct registration, log on to Computershare's website at www.investorcentre.com/cp and click on "Got a question? Ask Penny".

DIRECT DEPOSIT OF DIVIDENDS

Registered shareholders are offered the option of having their Canadian and U.S. dollar dividends directly deposited into their personal bank accounts in Canada and the United States on the dividend payment dates. Shareholders can enroll for direct deposit either by phone or by completing a direct deposit enrolment form. For more information about direct deposit, please contact Computershare Investor Services Inc. at 1-877-4-CP-RAIL (1-877-427-7245).

4% CONSOLIDATED DEBENTURE STOCK

Inquiries with respect to Canadian Pacific Railway Company's 4% Consolidated Debenture Stock should be directed as follows:

For stock denominated in U.S. currency – The Bank of New York Mellon at (212) 815-2719 or by e-mail at lesley.daley@bnymellon.com; and

For stock denominated in pounds Sterling – BNY Trust Company of Canada at (416) 933-8504 or by e-mail at marcia.redway@bnymellon.com.

MARKET FOR SECURITIES

The Common Shares of Canadian Pacific Railway Limited are listed on the Toronto and New York stock exchanges. The Debenture Stock of Canadian Pacific Railway Company is listed on the London Stock Exchange (UK pounds sterling) and on the New York Stock Exchange (U.S. currency).

DUPLICATE ANNUAL REPORTS

While every effort is made to avoid duplication, some Canadian Pacific Railway Limited registered shareholders may receive multiple copies of shareholder information mailings such as this Annual Report. Registered shareholders who wish to consolidate any duplicate accounts which are registered in the same name are requested to write to Computershare Investor Services Inc.

CORPORATE GOVERNANCE

CP's Board of Directors and management are committed to a high standard of corporate governance. They believe effective corporate governance calls for the establishment of processes and structures that contribute to the sound direction and management of the Corporation's business, with a view to enhancing shareholder value.

A detailed description of CP's approach to corporate governance is contained in its Management Proxy Circular issued in connection with the Corporation's Annual Meeting of Shareholders and in its Corporate Governance Principles and Guidelines which are available on CP's website at www.cpr.ca.

GOVERNANCE STANDARDS

Any significant differences between the Corporation's corporate governance practices and the corporate governance listing standards of the New York Stock Exchange ("NYSE Listing Standards") are set forth on CP's website at www.cpr.ca under About CP, "Corporate governance".

CHIEF EXECUTIVE OFFICER AND CHIEF FINANCIAL OFFICER CERTIFICATION

The certifications of the Chief Executive Officer and the Executive Vice-President and Chief Financial Officer of each of Canadian Pacific Railway Limited and Canadian Pacific Railway Company required by Section 302 of the Sarbanes-Oxley Act of 2002 (the "302 Certifications") and the rules promulgated by the U.S. Securities and Exchange Commission ("SEC") thereunder, have been filed with the SEC as an exhibit to the 2014 Annual Report of Canadian Pacific Railway Limited and Canadian Pacific Railway Company on Form 40-F. The 302 Certifications have also been filed in fulfillment of the requirements of CSA National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings.

2015 ANNUAL AND SPECIAL MEETING

The Annual and Special Meeting of Shareholders will be held on Thursday, May 14, 2015 in Calgary, Alberta.

SHAREHOLDER SERVICES

Shareholders having inquiries or wishing to obtain copies of the Corporation's Annual Information Form may contact Shareholder Services at 1-866-861-4289 or (403) 319-7538, or by e-mail at shareholder@cpr.ca, or by writing to:

COMPANY OVERVIEW

Kansas City Southern, a Delaware corporation, is a holding company with domestic and international rail operations in North America that are strategically focused on the growing north/south freight corridor connecting key commercial and industrial markets in the central United States ("U.S.") with major industrial cities in Mexico. As used herein, "KCS" or the "Company" may refer to Kansas City Southern or, as the context requires, to one or more subsidiaries of Kansas City Southern.

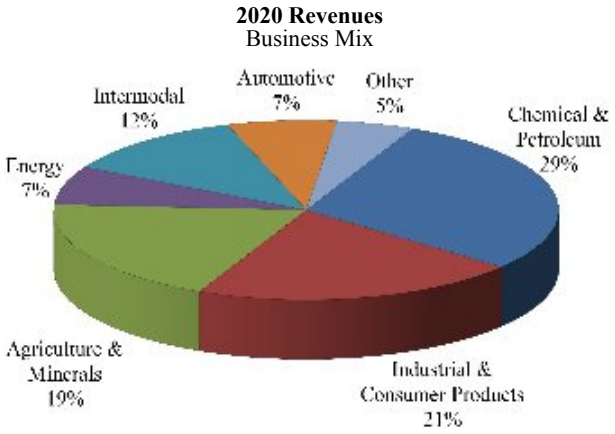
KCS controls and owns all of the stock of The Kansas City Southern Railway Company ("KCSR"), a U.S. Class I railroad founded in 1887. KCSR serves a ten-state region in the midwest and southeast regions of the United States and has the shortest north/south rail route between Kansas City, Missouri and several key ports along the Gulf of Mexico in Alabama, Louisiana, Mississippi and Texas.

KCS controls and owns all of the stock of Kansas City Southern de México, S.A. de C.V. ("KCSM"). Through its 50-year concession from the Mexican government (the "Concession"), which could expire in 2047 unless extended, KCSM operates a key commercial corridor of the Mexican railroad system and has as its core route the most strategic portion of the shortest, most direct rail passageway between Mexico City and Laredo, Texas. Laredo is a principal international gateway through which a substantial portion of rail and truck traffic between the United States and Mexico crosses the border. KCSM serves most of Mexico's principal industrial cities and three of its major seaports. KCSM's rail lines provide exclusive rail access to the United States and Mexico border crossing at Nuevo Laredo, Tamaulipas. Under the Concession, KCSM has the right to use and operate the southern half of the rail bridge at Laredo, Texas, which spans the Rio Grande River between the United States and Mexico. The Company owns the northern half of this bridge through its ownership of Mexrail, Inc. ("Mexrail").

KCSM also provides exclusive rail access to the port of Lazaro Cardenas on the Pacific Ocean. The Mexican government developed the port at Lazaro Cardenas principally to serve Mexican markets and as an alternative to the U.S. west coast ports for Asian and South American traffic bound for North America.

The Company wholly owns Mexrail which, in turn, wholly owns The Texas Mexican Railway Company ("Tex-Mex"). Tex-Mex owns a 160-mile rail line extending from Laredo, Texas to the port city of Corpus Christi, Texas, which connects the operations of KCSR with KCSM.

The KCS coordinated rail network (KCSR, KCSM and Tex-Mex, including trackage rights) comprises approximately 7,100 route miles extending from the midwest and southeast portions of the United States south into Mexico and connects with all other Class I railroads, providing shippers with an effective alternative to other railroad routes and giving direct access to Mexico and the southeast and southwest United States through alternate interchange hubs.



Panama Canal Railway Company ("PCRC"), an unconsolidated joint venture company owned equally by KCS and Mi-Jack Products, Inc. ("Mi-Jack"), was awarded a concession from the Republic of Panama to reconstruct and operate the Panama Canal Railway, a 47-mile railroad located adjacent to the Panama Canal that provides international container shipping companies with a railway transportation alternative to the Panama Canal. The concession was awarded in 1998 for an initial term of 25 years with an automatic renewal for an additional 25-year term. The Panama Canal Railway is a north-south railroad traversing the isthmus of Panama between the Atlantic and Pacific oceans.

Other subsidiaries and affiliates of KCS include the following:

- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned and consolidated subsidiary that provides employee services to KCSM;
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate that owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway." Norfolk Southern Corporation, through its wholly-owned subsidiary, The Alabama Great Southern Railroad Company, owns the remaining thirty percent of MSLLC;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and

- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for Positive Train Control ("PTC"). See Government Regulation section for further information regarding PTC.

MARKETS SERVED

Chemical and petroleum. This commodity group includes products such as chemicals, plastics, petroleum, liquefied petroleum gas, and petroleum refined products, such as gasoline and diesel. KCS transports these products across its network and through interchanges with other rail carriers. Refined fuels and liquefied petroleum gas groups of commodities supply Mexican demand. The chemical and plastic products are used in the automotive, housing and packaging industries as well as in general manufacturing. KCS hauls petroleum products across its network and as U.S. petroleum refineries have continued to increase their refining capacity, they have coordinated with KCS to develop additional long-term storage opportunities that complement a fluid freight railroad operation.

Industrial and consumer products. This commodity group includes forest products as well as metals and scrap. Forest products consist of shipments to and from paper and lumber mills in the southeast United States timber-producing region that KCS serves directly and indirectly through its various short-line connections. The United States is an important source of pulp paper and scrap paper for Mexico that ships by rail through KCS's network. Metals and scrap consist of shipments of flat steel and long product as well as other minor moves of ores such as iron, zinc and copper. The majority of steel produced and metallic ore mined in Mexico are consumed within Mexico. Steel slab is used to make steel coils and plate-products that usually ship via rail. Higher-end finished products such as steel coils are used by Mexican manufacturers in automobiles, household appliances, the oil and gas industry, and other consumer goods that are imported from the United States through land borders and the seaports served by KCS's rail network. KCS also transports steel coils, plates and pipe from U.S. and Mexican-based mini-mills to locations in the U.S. and Mexico for oil drilling, appliance and automotive applications. This commodity group also includes U.S. military transports, Mexico and U.S. domestic cement shipments and appliances manufactured in Mexico that are imported into the United States.

Agriculture and minerals. The agriculture and minerals commodity group consists primarily of grain and food products. Shipper demand for agriculture products is affected by competition among sources of grain and grain products, as well as price fluctuations in international markets for key commodities. In the United States, KCS's rail lines receive and originate shipments of grain and grain products for delivery to feed mills and food and industrial consumers in the U.S. and Mexico. United States export grain shipments and Mexico import grain shipments include primarily corn, wheat, and soybeans. Food products consist mainly of soybean meal, grain meal, oils, distillers dried grains, corn syrup and sugar. Other shipments consist of a variety of products including ores, minerals, clay and glass used across North America.

Energy. The energy commodity group includes coal, frac sand, petroleum coke and crude oil. KCS hauls unit trains (trains transporting a single commodity from one source to one destination) of coal for electric generating plants in the central United States. The coal originates from the Powder River Basin in Wyoming and is interchanged to KCS at Kansas City, Missouri. Coal mined in the midwest United States is transported in non-unit trains to industrial consumers such as paper mills, steel mills, and cement companies. Frac sand originating primarily in Wisconsin, Illinois or Iowa is delivered to transloads located in northeast Texas, northern Louisiana and south Texas for distribution to gas and oil wells in the region. Frac sand business in Mexico is primarily for industrial purposes such as auto glass and bottle manufacturing. KCS's shipments of frac sand to support the drilling industry have diminished over time as the use of in-basin frac sand has largely replaced frac sand originating in the upper Midwest. KCS transports petroleum coke from refineries in the United States to various industries in

the U.S. and Mexico including export through the Pabtex terminal located in Port Arthur, TX. The majority of crude by rail business originates in Canada, with spot shipments coming from west Texas, and is delivered to U.S. Gulf Coast refineries and tank farms in Texas, Louisiana, and Alabama.

Intermodal. The intermodal freight sector consists primarily of hauling freight containers or truck trailers on behalf of steamship lines, motor carriers, and intermodal marketing companies with rail carriers serving as long-distance haulers. KCS serves and supports the U.S. and Mexican markets, as well as cross-border traffic between the U.S. and Mexico. In light of the importance of trade between Asia and North America, the Company believes the Port of Lazaro Cardenas continues to be a strategically beneficial location for ocean carriers, manufacturers and retailers. Equally important, foreign direct investment in Mexico has caused the KCS Mexico/U.S. cross border corridor to emerge as an increasingly important tool for freight flow. The Company also provides premium service to customers over its line from Dallas through the Meridian Speedway— a critical link in creating the most direct route between the southwest and southeast/northeast U.S.

Automotive. KCS provides rail transportation to every facet of the automotive industry supply chain, including automotive manufacturers, assembly plants and distribution centers throughout North America. In addition, KCS transports finished vehicles imported and exported to and from various countries through a distribution facility at the Port of Lazaro Cardenas.

GOVERNMENT REGULATION

The Company's United States operations are subject to federal, state and local laws and regulations generally applicable to all businesses, subject to federal preemption under certain circumstances. Rail operations are also subject to the regulatory jurisdiction of the Surface Transportation Board ("STB"), the Federal Railroad Administration ("FRA") and the Pipeline and Hazardous Materials Safety Administration ("PHMSA") of the U.S. Department of Transportation ("DOT"), the Occupational Safety and Health Administration ("OSHA"), as well as other federal and state regulatory agencies. The STB has jurisdiction over disputes and complaints involving certain rates and charges, routes and services, the sale or abandonment of rail lines, applications for line extensions and construction, and consolidation or merger with, or acquisition of control of, rail common carriers. DOT and OSHA each has jurisdiction under several federal statutes over a number of safety and health aspects of rail operations, including the transportation of hazardous materials. In 2008, the President of the United States signed the Rail Safety Improvement Act of 2008 into law, which, among other things, revised hours of service for train and certain other employees and mandated implementation of PTC at certain locations by the end of 2015. PTC is a technology designed to help prevent train-to-train collisions, overspeed derailments, incursions into rail work zones, and entry into main line track if a switch is misaligned at certain locations, including main line track where toxic inhalation hazard or poison inhalation hazard movements occur or where passenger operations occur. The Surface Transportation Extension Act of 2015 amended the PTC deadline set by the Rail Safety Improvement Act of 2008 to require implementation of PTC by the end of 2018, and then further extended to December 31, 2020. By the end of 2018, the Company implemented PTC on all required sections of its rail network, locomotives and wayside assets. The Company completed interoperability with the required Class I freight railroads and Amtrak in June 2020 in compliance with the December 31, 2020 deadline. The implementation of PTC increased operating costs, and the number of employees the Company employs, and has required significant investments in new safety technology. The Company will continue to make investments in new safety technology.

KCS's U.S. subsidiaries are subject to extensive federal, state and local environmental regulations. These laws cover discharges to water, air emissions, toxic substances, and the generation, handling, storage, transportation and disposal of waste and hazardous materials. These regulations have the effect of increasing the costs, risks and liabilities associated with rail operations. Environmental risks are also inherent in rail operations, which frequently involve transporting chemicals and other hazardous materials.

Primary regulatory oversight of the Company's Mexican operations is provided by the Mexican Agencia Reguladora del Transporte Ferroviario ("Regulatory Agency of Rail Transportation" or "ARTF"). The ARTF establishes regulations concerning railway safety and operations, and is responsible for resolving disputes between railways and customers. KCSM must register its maximum rates with the ARTF and make regular reports to the ARTF and the Secretaría de Comunicaciones y Transportes ("Secretary of Communications and Transportation" or "SCT"). KCSM must provide reports on investments, traffic volumes, theft and vandalism on the general right of way, customer complaints, fuel consumption, number of locomotives, railcars and employees, and activities around maintenance of way, sidings and spurs, among other financial information and reports. The Company may freely set rates on a non-discriminatory basis up to the maximum rates registered with the ARTF. At any time, the ARTF may request additional information regarding the determination of such rates and may

issue recommendations with respect to proposed rate increases. If the ARTF or another party considers there to be no effective competition, they may request an opinion from the Comisión Federal de Competencia Económica ("Mexican Antitrust Commission" or "COFECE") regarding market conditions. If the COFECE determines that there is no effective competition for particular movements, the ARTF could set rates for those movements or grant limited trackage rights to another railroad while the condition of no effective competition remains.

KCSM holds a Concession from the Mexican government until June 2047 (exclusively through 2027, subject to certain trackage and haulage rights granted to other concessionaires), which is renewable under certain conditions for additional periods of up to 50 years. The Concession authorizes KCSM to provide freight transportation services over north-east rail lines, which are a primary commercial corridor of the Mexican railroad system. KCSM is required to provide freight railroad services to all users on a fair and non-discriminatory basis and in accordance with efficiency and safety standards approved periodically by the Mexican government. KCSM has the right to use, but does not own, all track and buildings that are necessary for the rail lines' operation. KCSM is obligated to maintain the right of way, track structure, buildings and related maintenance facilities to the operational standards specified in the Concession agreement and to return the assets in that condition at the end of the Concession period. During the remainder of the Concession period, KCSM is required to pay the Mexican government an annual concession duty equal to 1.25% of gross revenues. The ARTF may request information to verify KCSM´s compliance with the Concession and any applicable regulatory framework.

The Company's Mexican operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment through the establishment of standards for water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. The Mexican government may bring administrative and criminal proceedings and impose economic sanctions against companies that violate environmental laws, and temporarily or even permanently close non-complying facilities.

Noncompliance with applicable legal provisions may result in the imposition of fines, temporary or permanent shutdown of operations or other injunctive relief, criminal prosecution or, with respect to KCSM, the termination of the Concession. KCS maintains environmental provisions that are believed by management to be appropriate with respect to known and existing environmental contamination of its properties that KCS may be responsible to remedy.

Government regulations are further discussed within Item 7, Management's Discussion and Analysis of Financial Information and Results of Operations — Mexico Regulatory and Legal Updates.

COMPETITION

The Company competes against other railroads, many of which are much larger and have significantly greater financial and other resources. The railroad industry in North America is dominated by a few very large carriers. The larger U.S. western railroads (BNSF Railway Company and Union Pacific Railroad Company), in particular, are significant competitors of KCS because of their substantial resources and competitive routes.

In Mexico, KCSM's operations are subject to competition from other railroads, particularly Ferrocarril Mexicano, S.A. de C.V. ("Ferromex") and Ferrosur, S.A. de C.V. ("Ferrosur"), both controlled by Grupo Mexico S.A.B. de C.V. Ferromex and Ferrosur together are much larger and have significantly greater financial and other resources than KCSM, serving most of the major ports and cities in Mexico and together owning fifty percent of FTVM, which serves industries located in the Mexico City area.

The ongoing impact of past and future rail consolidation is uncertain. However, KCS believes that its investments and strategic alliances continue to competitively position the Company to attract additional rail traffic throughout its rail network.

The Company is subject to competition from motor carriers, barge lines and other maritime shipping, which compete across certain routes in KCS's operating areas. In the past, truck carriers have generally eroded the railroad industry's share of total transportation revenues. Intermodal traffic and certain other traffic face highly price sensitive competition, particularly from motor carriers. However, rail carriers, including KCS, have placed an emphasis on competing in the intermodal marketplace and working with motor carriers to provide end-to-end transportation of products.

While deregulation of U.S. freight rates has enhanced the ability of railroads to compete with each other and with alternative modes of transportation, this increased competition has generally resulted in downward pressure on freight rates

since deregulation. Competition with other railroads and other modes of transportation is generally based on the rates charged, the quality and reliability of the service provided and the quality of the carrier's equipment for certain commodities.

RAIL SECURITY

The Company and its rail subsidiaries have continued to research, develop and implement multidisciplinary approaches to secure the Company's assets and personnel against transnational criminal organizations that actively target transportation networks. In addition, the Company has developed a variety of vertically integrated strategies to mitigate the risk terrorist attacks could pose to the Company, its personnel and assets. Many of the specific measures the Company utilizes for these efforts are required to be kept confidential through arrangements with government agencies, such as the Department of Homeland Security ("DHS"), or through jointly-developed and implemented strategies and plans with connecting carriers.

KCSR and KCSM developed a proprietary security plan based on an industry-wide plan developed by the Association of American Railroads ("AAR") members which focuses on comprehensive risk assessments in five areas — hazardous materials; train operations; critical physical assets; military traffic; and information technology and communications. The security plan is kept confidential, with access to the plan tightly limited to members of management with direct security and anti-terrorism implementation responsibilities. The Company participates with other AAR members in periodic drills under the industry plan to test and refine its various provisions.

The Company also uses information technology in various ways in its operations. The risks associated with this technology from cyber attacks has increased in recent years. The Company continues to monitor these threats and attempted cyber attacks, and has put in place various safeguards to protect the Company's operations as well as its assets and digital information from cyber attacks.

To protect the confidentiality and sensitivity of both the AAR plans and the proprietary strategies the Company has developed to safeguard against criminal enterprises, terrorism, and other security and safety threats, the following paragraphs will provide only a general overview of some of these efforts.

The Company's security activities range from periodically providing security awareness updates to KCS employees and including safety and security information on the Company's internet website (which can be found under the "Corporate Responsibility" tab at www.kcsouthern.com) to its ongoing implementation of security plans for rail facilities in areas labeled by the DHS as High Threat Urban Areas ("HTUAs"). The Company's other activities to bolster security against terrorism include, but are not limited to, the following:

- Conferring regularly with other railroads' security personnel and with industry experts on security issues;
- Routing shipments of certain chemicals, which might be toxic if inhaled, pursuant to federal regulations;
- Initiating a series of over 20 voluntary action items agreed to between AAR and DHS as enhancing security in the rail industry;
- Conducting constant and targeted security training as part of the scheduled training for operating employees and managers;
- Developing smartphone applications to ensure immediate information, live video and pictures from security supervisors and protection assets pertaining to potential operational risks;
- Developing a multi-layered security model using high-speed digital imaging, system velocity and covert and overt security filters to mitigate the risk of illicit activity;
- Measuring key security metrics to ensure positive risk mitigation and product integrity trends;
- Performing constant due diligence with the existing security model and by benchmarking rail security, including cyber security, on a world-wide basis to monitor threat streams related to rail incidents;
- Implementing a Tactical Intelligence Center by KCSM, which provides constant training with core members in new technology helping to prevent, detect, deter, deny and respond to potentially illicit activities; and
- Deploying an array of non-intrusive technologies including, but not limited to, digital video surveillance and analytics as part of an intelligent video security solution, including a closed circuit television platform with geo-fencing for intrusion detection, to allow for remote viewing access to monitor ports of entry, intermodal and rail yards.

In addition, the Company utilizes dedicated security personnel with extensive special operations forces, intelligence, and law enforcement backgrounds to oversee the ongoing and increasingly complex security efforts of the Company in both the United States and Mexico. While the risk of theft and vandalism is higher in Mexico, KCSM remains among the safest methods of transportation for freight shipments in Mexico. KCSM's record in rail safety is due in large part to the implementation of a multi-layered safety and security process throughout the KCSM network. In addition to having its own internal system, the process is connected to, and supported by a high level of federal, state and local law enforcement. A primary focus of this effort involves maintaining constant diligence, intelligence and counterintelligence operations, technology-reporting applications and active vigilance while enhancing overall system velocity, which reduces the residual risk for incidents to occur.

RAILWAY LABOR ACT

Labor relations in the U.S. railroad industry are subject to extensive governmental regulation under the Railway Labor Act ("RLA"). Under the RLA, national labor agreements are renegotiated on an industry-wide scale when they become open for modification, but their terms remain in effect until new agreements are reached or the RLA's procedures (which include mediation, cooling-off periods, and the possibility of presidential intervention) are exhausted. Contract negotiations with the various unions generally take place over an extended period of time and the Company rarely experiences work stoppages during negotiations. Wages, health and welfare benefits, work rules and other issues have traditionally been addressed during these negotiations.

COLLECTIVE BARGAINING

Approximately 70% of KCSR employees are covered by collective bargaining agreements. These agreements do not have expiration dates, but rather remain in place until modified by subsequent agreements. KCSR participates in industry-wide multi-employer bargaining as a member of the National Carriers' Conference Committee (the "NCCC"), as well as local bargaining for agreements that are limited to KCSR's property. Multi-employer agreements are subject to a procedure that allows requests for changes to be served every five years. Long-term agreements were reached voluntarily or through the arbitration process during 2017 and 2018 covering all of the participating unions. The terms of these agreements will remain in effect until new agreements are reached in the next bargaining round. In November 2019, KCSR and its unions commenced negotiations in connection with the 2020 bargaining round.

KCSM Servicios union employees are covered by one labor agreement, which was signed on April 16, 2012, between KCSM Servicios and the Sindicato de Trabajadores Ferrocarrileros de la República Mexicana ("Mexican Railroad Union"), and which remains in effect during the period of the Concession, for the purpose of regulating the relationship between the parties. Approximately 79% of KCSM Servicios employees are covered by this labor agreement. The compensation terms under this labor agreement are subject to renegotiation on an annual basis and all other benefits are subject to negotiation every two years. The parties finalized negotiations over compensation terms and benefits that will apply until June 30, 2021, along with other terms.

Union labor negotiations have not historically resulted in any strike, boycott or other disruption in the Company's business operations.

INFORMATION ABOUT EXECUTIVE OFFICERS

All executive officers are elected annually and serve at the discretion of the Board of Directors. All of the executive officers have employment agreements with KCS and/or its subsidiaries.

Patrick J. Ottensmeyer — President and Chief Executive Officer— 63 — Served in this capacity since July 1, 2016. Mr. Ottensmeyer has been a director of KCS since July 1, 2016 and served as President of KCS since March 1, 2015. He served as Executive Vice President Sales and Marketing of KCS from October 16, 2008 through March 1, 2015. Mr. Ottensmeyer joined KCS in May 2006 as Executive Vice President and Chief Financial Officer.

Warren K. Erdman — Executive Vice President — Administration and Corporate Affairs — 62 — Served in this capacity since April 2010. Mr. Erdman served as Executive Vice President — Corporate Affairs from October 2007 until April 2010. He served as Senior Vice President — Corporate Affairs of KCS and KCSR from January 2006 to September 2007. Mr. Erdman served as Vice President — Corporate Affairs of KCS from April 15, 1997 to December 31, 2005 and as Vice President — Corporate Affairs of KCSR from May 1997 to December 31, 2005. Prior to joining KCS, Mr. Erdman served as Chief of Staff to United States Senator Kit Bond of Missouri from 1987 to 1997.

Brian D. Hancock — Executive Vice President and Chief Innovation Officer — 55 — Served in this capacity since October 1, 2018. Mr. Hancock served as Executive Vice President and Chief Marketing Officer from August 2015 until September 2018. Prior to joining KCS, Mr. Hancock served as Senior Vice President of Supply Chain for Family Dollar Stores, Inc., a variety store chain, from 2013 to July 2015. From 2011 to 2013, Mr. Hancock served as President – North America for The Martin – Brower Company, L.L.C. From 2005 to 2011, he served as Vice President – Global Supply Chain for Whirlpool Corporation.

Jeffrey M. Songer — Executive Vice President and Chief Operating Officer — 51 — Served in this capacity since March 2016. Mr. Songer served as Senior Vice President Engineering and Chief Transportation Officer of the Company from August 2014 to February 2016 and as Vice President and Chief Engineer for KCSR from June 2012 to July 2014. Prior to serving as KCSR's Vice President and Chief Engineer, Mr. Songer served as Assistant Vice President — Engineering and Planning from March 2011 to June 2012, and as its General Director — Planning, Scheduling & Administration from January 2007 to March 2011.

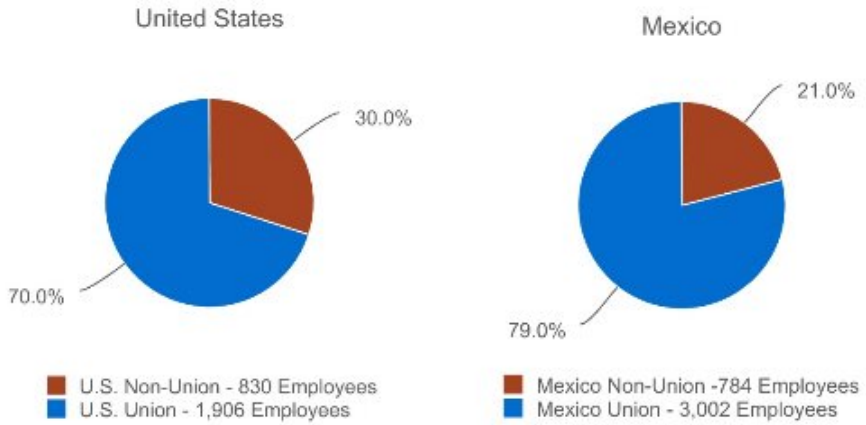
Michael W. Upchurch — Executive Vice President and Chief Financial Officer — 60 — Served in this capacity since October 16, 2008. Mr. Upchurch joined KCS in March 2008 as Senior Vice President Purchasing and Financial Management. From 1990 through September 2006, Mr. Upchurch served in various senior financial leadership positions at Sprint Corporation, a telecommunications company, including Senior Vice President Financial Operations, Senior Vice President Finance Sprint Business Solutions and Senior Vice President Finance Long Distance Division.

Oscar Augusto Del Cueto Cuevas — President, General Manager and Executive Representative — KCSM — 54 — Served in this capacity since August 1, 2020. Mr. Del Cueto previously served as KCSM Servicios Vice President and General Director from November 2018 to July 2020 and as KCSM Servicios Vice President-Operations from January 2013 to October 2018. Mr. Del Cueto joined KCSM in 2006 and held various leadership positions prior to 2013. He has nearly 30 years of railway industry experience, working in institutional relations, communication, operations, planning and logistics.

Lora S. Cheatum — Senior Vice President — Human Resources — 64 — Served in this capacity since joining KCS in October 2014. Ms. Cheatum previously served as Senior Vice President Global Human Resources of Layne Christensen Company, a global water management, construction, and drilling company, from 2012 to October 2014. From 2010 to 2012, she served as Director — Field Operations at Fitness Together Holdings, Inc. Ms. Cheatum spent nine years with Kansas City Power & Light, from 2001 to 2010, where she was Vice President of Procurement and previously as Vice President Human Resources.

Michael J. Naatz — Executive Vice President and Chief Marketing Officer — 55 — Served in this capacity since October 1, 2018. Mr. Naatz served as Senior Vice President Operations Support and Chief Information Officer from August 2014 until September 2018 and as Senior Vice President and Chief Information Officer of the Company from May 2012 to July 2014. Prior to joining KCS, Mr. Naatz served as President of USF Holland, a YRC Worldwide, Inc. ("YRCW") company, a leading provider of transportation and global logistics services, from 2011 to May 2012. From 2010 to 2011, Mr. Naatz served as President and Chief Customer Officer - Customer Care Division at YRCW. From 2008 to 2010, he served as Executive Vice President and Chief Information & Service Officer at YRCW. From 2005 to 2007, he served as President — Enterprise Services Division at YRCW. From 1994 to 2005, he held various leadership positions with USF Corporation.

Suzanne M. Grafton — Vice President and Chief Accounting Officer — 45 — Served in this capacity since July 24, 2017. Ms. Grafton served as Vice President of Audit and Enterprise Risk Management of the Company from April 2016 to July 2017 and as Vice President of Accounting from May 2014 to March 2016. From September 2006 to May 2014, Ms. Grafton served in various accounting leadership positions at KCS.



Adam J. Godderz — Senior Vice President — Chief Legal Officer and Corporate Secretary — 46 — Served in this capacity since February 1, 2020. Mr. Godderz served as General Counsel and Corporate Secretary from January 2019 to January 2020 and as Associate General Counsel and Corporate Secretary of the Company from June 2018 to December 2018. From November 2015 to May 2018, he served as Vice President of Labor Relations and Corporate Secretary. From January 2013 to November 2015, Mr. Godderz served as Associate General Counsel and Corporate Secretary. From September 2007 to January 2013, Mr. Godderz served as Associate General Counsel at KCS.

DESCRIPTION OF HUMAN CAPITAL RESOURCES

The employees of KCS are the Company's greatest asset. KCS employees are the foundation of the Company's success and keep the railroad moving every day, even during a global pandemic. The employees of KCS have a shared vision – to strive to be the fastest-growing, best-performing, most customer-focused transportation provider in North America.

A majority of the KCS workforce plays a critical role in the daily train operations and customer support. This portion of the workforce, including train crews, dispatchers, mechanical and engineering crews, field managers, and many others, cannot work from home. During the pandemic, these employees and freight rail transportation are part of what is deemed "critical infrastructure," essential to the economy and the communities KCS serves.

As of December 31, 2020, the Company had approximately 6,522 employees, with 58% based in Mexico and 42% based in the U.S. In 2020, approximately 75% of KCS employees were represented by a collective bargaining agreement.

In managing the Company's business, management focuses on a number of human capital measures and objectives rooted in the KCS Vision, Values and Culture (described further below, and as noted on the Company's website at https://www.kcsouthern.com/en-us/about-us/overview/vision-values, which is not incorporated into this Form 10-K) and include the following:

- ***Employee Health & Safety*** - KCS is committed to operating in a safe, secure and responsible manner for the benefit of its employees, customers and the communities KCS serves in the U.S. and Mexico. See below for further discussion of employee health and safety as well as noted in the Company's sustainability report at https://www.kcsouthern.com/corporate-responsibility/our-commitment/KCS-2019-Sustainability-Report.pdf (the sustainability report is not incorporated into this Form 10-K).
- ***Compensation and Benefits*** - KCS strives to offer competitive compensation, benefits and services that meets the needs of its employees including, short and long-term incentive packages, employee stock purchase plan, defined contribution plan, healthcare benefits, and wellness and employee assistance programs. Management monitors market compensation and benefits to be able to attract, retain, and promote employees and reduce turnover and its associated costs. In addition, KCS's short and long-term incentive programs are aligned with the Company's vision and key business objectives and are intended to motivate strong performance. KCS engages a nationally recognized outside consulting firm to objectively evaluate its compensation and benefits and benchmark them against industry peers and other similarly situated organizations.

For the year ended December 31, 2020, compensation and benefits expense totaled $476.5 million. See Item 7. *Management's Discussion and Analysis of Financial Condition and results of Operations* for further discussion of compensation and benefits expense.

- ***Productivity Measures*** – KCS measures productivity of its workforce by analyzing its headcount compared to total gross ton miles, which is the number of miles moved by a train multiplied by the total weight of the freight cars.

	Years Ended December 31,	
	2020	2019
Gross Ton Miles (GTM) (in millions) [(a)]	94,434	101,819
Average Employees - Total	6,655	7,069
Average Employees - Union	4,983	5,353
GTM's per Average Employee (in millions)	14.19	14.40

(a) Excludes Locomotive Gross Ton Miles

- ***KCS's Vision, Values and Culture ("KCS Culture")*** - The KCS Culture is critically important to KCS's success and is a set of guidelines, beliefs and behaviors that help define KCS and create a foundation for growth and success. KCS's strong culture and core values should allow KCS to fulfill its vision and continue to endure in times of stress. The KCS Culture helps guide how employees make decisions, treat each other and serve customers. All employees are responsible for upholding the KCS Culture and conformance with the KCS Culture statement is 25% of the annual performance appraisal process for all management employees. Management uses performance evaluations as a tool to help strengthen relationships with employees and KCS's Culture.

Employee Health and Safety Overview

Management seeks to instill a culture valuing employee health and safety at KCS via training, education, initiatives, equipment and a strict adherence to applicable safety rules as further described below.

Operational safety

KCS is subject to federal, state, and local government regulations in the U.S. and Mexico with regard to safety. These regulations direct safety practices in the placement of rail cars carrying certain commodities in the train, routes, inspection of equipment and track, security procedures, equipment design and construction, speed restrictions, and work rules.

Management strives to instill a culture of safety, providing on-the-job training and classroom instruction to employees. Many positions, such as locomotive engineers and conductors, have extensive requirements for certification and licensing, as required by federal regulation. Certification-eligibility is based on a variety of factors, including prior safety conduct of the applicant, compliance with applicable regulations, knowledge of operating rules and performance testing. The Company offers certification and training programs to operations groups as business needs require. These training programs focus on operating rules, safety rules, and procedures required for specific tasks.

KCS's operational testing program provides processes for ongoing validation and understanding of, and adherence to operating rules and procedures by employees, and allows management to identify, monitor and manage potential safety risks in the business. This training is designed to gauge employees' knowledge of and compliance with KCS rules and procedures and determine the need for remedial training or guidance. Testing plans are developed based upon, among other things, a particular location's risks, recent trends, injuries or accidents and prior operational test performance.

Safety technology

KCS uses advanced technologies to help employees enhance operational safety including the following:

- Advanced Inspection Equipment — KCS uses technology to monitor, in real-time, the approximately 7,100 route miles of track, bridges, and tunnels that KCS uses in its operations. KCS employees and contractors inspect railroad tracks using specialized equipment such as track geometry cars, ground-penetrating radar, and laser technology. Additionally, different types of wayside detectors are positioned along the rail network to monitor the condition of the wheels on passing trains. These specialized technologies alert railroads to potential defects and help enable KCS to schedule maintenance in a timely manner.

- PTC — Since 2008, KCSR has worked to implement PTC, the largest and most complex safety system in the history of the railroad industry. PTC is an advanced technology system designed to automatically stop a train before certain incidents occur and protect KCS's employees, customers and communities along the network. The Company has invested $257.4 million in PTC since 2008. PTC aims to prevent the following:
    - Train-to-train collisions;
    - Derailments caused by excessive train speed;
    - Train movements through misaligned track switches;
    - Unauthorized train entry into work zones.
- Asset Health Strategic Initiative ("AHSI") — AHSI is a multi-year rail industry program that applies information technology processes to help improve the safety and performance of freight cars and locomotives across North America. The program aims to help reduce mechanical service interruptions, improve the quality of railcar inspections, and increase rail yard and repair shop efficiencies by consolidating equipment information, including ownership information, repair and inspection history, and company recalls, among other things.

Health and Safety during COVID-19 pandemic

During the outbreak in March 2020 of the novel Coronavirus ("COVID-19"), which has been declared a pandemic, the U.S. and Mexico governments deemed rail transportation as "critical infrastructure" providing essential services during the global emergency. As a provider of critical infrastructure, Kansas City Southern has an obligation to keep employees working and freight operations moving. During this period, the Company strives to remain focused on protecting the health, safety, and well-being of its employees and the communities in which it operates while working to maintain the continuity of its business operations.

In response to the COVID-19 pandemic, KCS created a dedicated crisis team that implemented business continuity plans to help ensure the ongoing availability of its transportation services. KCS took a variety of health and safety measures, including separating dispatching and crew operations, implementing enhanced cleaning and hygiene protocols in its facilities and locomotives, implementing remote work policies where possible, performing temperature checks and requiring facial coverings. As a result, the Company did not experience significant COVID-19 related disruptions in its railroad operations during 2020. For the year ended December 31, 2020, the Company recognized approximately $10.0 million of expense related to COVID-19 for the protection of its employees and the continuity of business operations.

AVAILABLE INFORMATION

KCS's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, and amendments to those reports, are available for download at no cost on KCS's website (www.investors.kcsouthern.com) as soon as reasonably practicable after the electronic filing of these reports is made with the Securities and Exchange Commission. In addition, KCS's corporate governance guidelines, ethics and legal compliance policy, and the charters of the Audit Committee, the Finance and Strategic Investments Committee, the Nominating and Corporate Governance Committee and the Compensation and Organization Committee of the Board of Directors are available on KCS's website.

See Item 8, Financial Statements and Supplementary Data — Note 1, Description of the Business and Note 19, Geographic Information for more information on the description and general development of the Company's business and financial information about geographic areas.

Item 1A. Risk Factors

Risks Related to KCS's Operations and Business

Public health threats or outbreaks of communicable diseases could have a material adverse effect on the Company's operations and financial results.

The Company may face risks related to public health threats or outbreaks of communicable diseases. A widespread healthcare crisis, such as an outbreak of a communicable disease could adversely affect the global economy and the Company's and its business partners' ability to conduct business in the U.S. and Mexico for an indefinite period of time. COVID-19 has spread to multiple global regions, including the U.S. and Mexico, and has negatively impacted the global economy, disrupted

financial markets and international trade, resulted in increased unemployment levels and significantly impacted global supply chains, all of which negatively impacted the rail transportation industry and the Company's business. In an effort to halt the outbreak of COVID-19, both in the U.S. and Mexico, local, state, and federal governments have implemented various measures, including but not limited to, voluntary and mandatory quarantines, stay-at-home orders, travel restrictions, border closings, limitations on gatherings of people, and extended closures of nonessential businesses. The implementation of these measures resulted in a decline in demand that had a material impact on the Company's results of operations and financial condition during the year ended December 31, 2020. The Company's revenues decreased by approximately 8% during 2020, as compared to the prior year, and approximately $10.0 million in additional expenses were incurred due to COVID-19 as part of the Company providing a safe and healthy work environment for KCS employees.

Although the Company has taken numerous measures to overcome the adverse impact derived from the COVID-19 outbreak and continued with the Company's normal business activities, this pandemic could continue to materially impact revenues and profit. In addition, COVID-19 could:

- continue to impact customer demand of the Company's transportation services;
- continue to cause the Company to experience an increase in costs as a result of the Company's emergency measures, and delayed payments from customers;
- continue to cause delays and disruptions in the supply chain resulting in disruptions in the commercial operation dates of certain projects;
- continue to impact availability of qualified personnel; and
- cause other unpredictable events.

The situation surrounding COVID-19 remains fluid and for this reason, KCS cannot reasonably estimate with any degree of certainty the future impact COVID-19 may have on the Company's results of operations, financial position, and liquidity. The extent to which the COVID-19 pandemic may impact the Company's business, operating results, financial condition, or liquidity will depend on future developments, including the duration of the outbreak, travel restrictions, business and workforce disruptions, and the effectiveness of actions taken to contain and treat the disease.

Capacity constraints could materially adversely affect service and operating efficiency.

KCS may experience capacity constraints due to increased demand for rail services, unavailability of equipment, crew shortages, or extreme weather. Also, due to the interconnectivity between all railroads, especially in the U.S., congestion on other railroads could result in operational inefficiencies for KCS. Traffic congestion experienced in the U.S. or Mexican railroad system may result in overall traffic congestion which would impact the ability to move traffic to and from Mexico, which could result in operational inefficiencies for KCS and could have a material adverse effect on KCS's operations.

Significant expansions in the capacity of the Company's network can require a substantial amount of time and investment. Although KCS constantly monitors its network in an effort to optimize its rail services, there can be no assurance that such measures will adequately address capacity constraints on a timely basis.

KCS competes against other railroads and other transportation providers.

The Company's domestic and international operations are subject to competition from other railroads, as well as from truck carriers, barge lines, and other maritime shippers. Many of KCS's rail competitors are much larger and have significantly greater financial and other resources than KCS, which may enable rail competitors to reduce rates and make KCS's freight services less competitive. KCS's ability to respond to competitive pressures by matching rate reductions and decreasing rates without adversely affecting gross margins and operating results will depend on, among other things, the ability to reduce operating costs. KCS's failure to respond to competitive pressures, and particularly rate competition, in a timely manner could have a material adverse effect on the Company's consolidated financial statements.

The railroad industry is dominated by a few large carriers. These larger railroads could attempt to use their size and pricing power to block other railroads' access to gateways and routing options that are currently and have historically been available. In addition, if there is future consolidation in the railroad industry in the United States or Mexico, there can be no assurance that it will not have a material adverse effect on the Company's consolidated financial statements.

Trucking, maritime, and barge competitors provide rate and service competition to the railroad industry. These competitors are able to use public rights-of-way, require substantially smaller capital investment and maintenance expenditures than railroads and allow for more frequent and flexible scheduling. Continuing competitive pressures, any reduction in margins due to competitive pressures, developments that increase the quality or decrease the cost of alternative modes of transportation in the locations in which the Company operates, or legislation or regulations that provide motor carriers with additional advantages, such as increased size of vehicles and reduced weight restrictions, could result in downward pressure on freight rates, which in turn could have a material adverse effect on the Company's consolidated financial statements. KCS may also experience operational or service difficulties related to network capacity, fluctuations in customers' demand for rail service, or other events that could have a material adverse effect on KCS's consolidated financial statements.

A key part of KCS's growth strategy is based upon the conversion of truck traffic to rail. There can be no assurance the Company will succeed in its efforts to convert traffic from truck to rail transport or that the customers already converted will be retained. If the railroad industry in general is unable to preserve its competitive advantages vis-à-vis the trucking industry, revenue growth could be adversely affected. Additionally, revenue growth could be affected by, among other factors, an expansion in the availability, or an improvement in the quality, of the trucking services offered by carriers resulting from regulatory and administrative interpretations and implementation of certain provisions of current or future multinational trade agreements that are favorable to the trucking industry or unfavorable to the rail industry or KCS. Such actions may negatively impact KCS's ability to grow its existing customer base and capture additional cargo transport market share because of competition from the shipping industry and other railroads.

KCS's business strategy, operations and growth rely significantly on agreements with other railroads and third parties.

Operation of KCS's rail network and its plans for growth and expansion rely significantly on agreements with other railroads and third parties, including joint ventures and other strategic alliances, as well as interchange, trackage rights, haulage rights and marketing agreements with other railroads and third parties that enable KCS to exchange traffic and utilize trackage the Company does not own. KCS's ability to provide comprehensive rail service to its customers depends in large part upon its ability to maintain these agreements with other railroads and third parties, and upon the performance of the obligations under the agreements by the other railroads and third parties. The termination of, or the failure to renew, these agreements could have a material adverse effect on KCS's consolidated financial statements. KCS is also dependent in part upon the financial strength and efficient performance of other railroads. There can be no assurance that KCS would not be materially adversely affected by operational or financial difficulties of other railroads.

KCS depends on the stability, availability and security of its information technology systems to operate its business. Disruptions in KCS's information technology ("IT") systems could materially adversely affect the Company's business and operating results.

KCS relies on information technology in all aspects of its business. A significant disruption or failure of its IT systems, including its computer hardware, software, communications equipment, wayside equipment or locomotive onboard equipment could result in service interruptions, safety failures, security failures, regulatory compliance failures or other operational difficulties. Moreover, if KCS is not able to acquire new technology or to develop or implement new technology, KCS may suffer a competitive disadvantage, which could have a material adverse effect on KCS's consolidated financial statements.

The security risks associated with IT systems have increased in recent years because of the increased sophistication, activities and evolving techniques of perpetrators of cyber attacks. A failure in, or breach of, KCS's IT security systems, or those of its third party service providers, as a result of cyber attacks or unauthorized access to its network could disrupt KCS's business, result in the disclosure or misuse of confidential or proprietary information, increase its costs and/or cause losses and reputational damage. KCS also confronts the risk that a terrorist or nation-state sponsored group may seek to use its property, including KCS's information technology systems, to inflict major harm.

Although KCS has a comprehensive cyber security program designed to protect and preserve the integrity of its information technology systems, KCS has experienced and expects to continue to experience cyber attacks of its IT systems or networks. However, none of these cyber attacks to date had a material impact on KCS's operations or financial condition. While KCS devotes significant resources to network security, data encryption and other security measures to protect its systems and data, including its own proprietary information and the confidential and personally identifiable information of its customers, employees, and business partners, these measures cannot provide absolute security. The costs to eliminate or alleviate network security problems, bugs, viruses, ransomware, worms, malicious software programs and security

vulnerabilities could be significant, and KCS's efforts to address these problems may not be successful, resulting potentially in the theft, loss, destruction or corruption of information that KCS stores electronically, as well as unexpected interruptions, delays or cessation of service, any of which could cause harm to KCS's business operations. Moreover, if a computer security breach or cyber attack affects KCS's systems or results in the unauthorized release of proprietary or personally identifiable information, the Company's reputation could be materially damaged, customer confidence could be diminished, and KCS's operations could be impaired.

A significant disruption, failure or unauthorized access of KCS's information technology system could expose the Company to a risk of legal proceedings and potential liability and have a material adverse effect on KCS's consolidated financial statements. Further, legislative or regulatory action in these areas is evolving, and KCS may be unable to adapt its IT systems or to manage the IT systems of third parties to accommodate these changes.

Severe weather or other natural disasters could result in significant business interruptions that impact KCS's railroad operations and expenditures, and KCS's insurance coverage may not be sufficient to cover damages to KCS or all of KCS's liabilities.

The Company's railroad operations may be affected by severe weather or other natural disasters. The Company operates in and along the Gulf of Mexico, and its facilities, equipment, and railroad infrastructure may be materially adversely affected by hurricanes, floods, fires, earthquakes and other extreme weather conditions in the regions where the Company operates, and this could also adversely affect the Company's shipping, agricultural, chemical and other customers. Severe weather or other natural disasters could result in significant business interruption due to an increase in events such as train derailments or wash outs of track structure that could have a material adverse effect on KCS's consolidated financial statements. Insurance to protect against loss of business and other related consequences resulting from these natural occurrences is subject to coverage limitations and may not be sufficient to cover all of KCS's damages or damages to others. This insurance may not continue to be available at commercially reasonable rates. Even with insurance, if any natural occurrence leads to a catastrophic interruption of services, this could have a material adverse effect on KCS's consolidated financial statements.

KCS's business may be adversely affected by changes in general economic or other conditions.

KCS's operations may be materially adversely affected by changes in the economic conditions of the industries and geographic areas that produce and consume the freight that KCS transports. The relative strength or weakness of the United States and Mexican economies affects the businesses served by KCS. A significant and sustained decrease in crude oil prices could adversely affect the transport of crude oil by rail to the U.S. Gulf region as well as negatively impact railroad volumes related to equipment and other materials that support crude oil production. For example, energy revenues have historically decreased when oil prices decline due to lower frac sand and crude oil volumes. Prolonged negative changes in domestic and global economic conditions may affect KCS, as well as the producers and consumers of the commodities that KCS transports and may have a material adverse effect on KCS's consolidated financial statements.

The transportation industry is highly cyclical, generally tracking the cycles of the world economy. Although transportation markets are affected by general economic conditions, there are numerous specific factors within each particular market that may influence operating results. Some of KCS's customers do business in industries that are highly cyclical, including the energy, automotive, housing and agriculture industries. Any downturn or change in government policy in these industries could have a material adverse effect on operating results. Also, some of the products transported have had a historical pattern of price cyclicality which has typically been influenced by the general economic environment and by industry capacity and demand. KCS cannot assure that prices and demand for these products will not decline in the future, adversely affecting those industries and, in turn, this could have a material adverse effect on the Company's consolidated financial statements.

KCS may be subject to various claims and litigation that could have a material adverse effect on KCS's consolidated financial statements.

The Company is exposed to the potential of various claims and litigation related to labor and employment, personal injury, commercial disputes, freight loss and other property damage, and other matters that arise in the normal course of business. The Company may experience material judgments or incur significant costs to defend existing and future lawsuits. Although the Company maintains insurance to cover some of these types of claims and establishes reserves when appropriate, final amounts determined to be due on any outstanding matters may exceed the Company's insurance coverage or differ materially from the recorded reserves. Additionally, the Company could be impacted by adverse developments not currently reflected in the Company's reserve estimates. The Company is also subject to job-related personal injury and occupational

claims associated with the Federal Employer's Liability Act ("FELA"), which is applicable only to railroads. FELA's fault-based tort system produces results that are unpredictable and inconsistent as compared with a no-fault worker's compensation system. The variability inherent in this system could result in actual costs being different from the liability recorded. Any material changes to litigation trends or a catastrophic rail accident or series of accidents involving any or all of property damage, personal injury, and environmental liability could have a material adverse effect on KCS's consolidated financial statements.

A majority of KCS's employees belong to labor unions. Strikes or work stoppages could adversely affect operations.

The Company is a party to collective bargaining agreements with various labor unions in the United States and Mexico. As of December 31, 2020, approximately 70% and 79% of KCSR and KCSM Servicios employees, respectively, were covered by labor contracts subject to collective bargaining. The Company may be subject to, among other things, strikes, work stoppages or work slowdowns as a result of disputes under these collective bargaining agreements and labor contracts or KCS's potential inability to negotiate acceptable contracts with these unions. In the United States, because such agreements are generally negotiated on an industry-wide basis, determination of the terms and conditions of labor agreements have been and could continue to be beyond KCS's control. KCS is, therefore, subject to terms and conditions in industry-wide labor agreements that could have a material adverse effect on its consolidated financial statements. In the United States and Mexico, KCS is seeking to modernize its collective bargaining agreements and benefit from technological advancements in the industry. If the unionized workers in the United States or Mexico were to engage in a strike, work stoppage or other slowdown; if other employees were to become unionized or if KCS and its unions were unable to agree on the terms and conditions in future labor agreements, KCS could experience a significant disruption of its operations and higher ongoing labor costs. Although the U.S. Railway Labor Act imposes restrictions on the right of United States railway workers to strike, there is no law in Mexico imposing similar restrictions on the right of railway workers in that country to strike. Additionally, labor law reform adopted by Mexico introduces uncertainty into the existing union structure in Mexico, which may affect the risk of disruption in KCSM's operations.

KCS is dependent on certain key suppliers of core rail equipment.

KCS relies on a limited number of suppliers of core rail equipment (including locomotives, rolling stock equipment, rail and ties). The capital intensive nature and complexity of such equipment creates high barriers of entry for any potential new suppliers. If any of KCS's suppliers discontinue production or experience capacity or supply shortages, this could result in increased costs or difficulty in obtaining rail equipment and materials, which could have a material adverse effect on KCS's consolidated financial statements.

KCS's business is vulnerable to fluctuations in fuel costs and disruptions in fuel supplies.

KCS incurs substantial fuel costs in its railroad operations and these costs represent a significant portion of its transportation expenses. Significant price increases for fuel may have a material adverse effect on operating results. If KCS is unable to recapture its costs of fuel from its customers, operating results could be materially adversely affected. In addition, a severe disruption of fuel supplies resulting from supply shortages, political unrest, a disruption of oil imports, weather events, war, or otherwise, and the resulting impact on fuel prices could have a material adverse effect on KCS's consolidated financial statements.

KCS's business may be affected by future acts of terrorism, war or other acts of violence or crime.

Terrorist attacks and any government response thereto, and war or risk of war could have a material adverse effect on KCS's consolidated financial statements. KCS is involved in the transport of hazardous materials, which could result in KCS's rail lines, facilities, or equipment being direct targets or indirect casualties of acts of terror, which could cause significant business interruption and damage to KCS's property. As a result, acts of terrorism or war or acts of crime or violence could result in increased costs and liabilities and decreased revenues for KCS. In addition, insurance premiums charged for some or all of the applicable coverage currently maintained by KCS could increase dramatically or certain coverage may not be adequate to cover losses or may not be available in the future.

Risks Related to Laws and Regulations

KCS U.S. and Mexico rail common carrier subsidiaries are required by United States and Mexican laws, respectively, to transport hazardous materials, which could expose KCS to significant costs and claims.

Under United States federal statutes and applicable Mexican laws, KCS's common carrier responsibility requires it to transport hazardous materials. Any rail accident or other incident or accident on KCS's network, facilities, or at the facilities of KCS's customers involving the release of hazardous materials, including toxic inhalation hazard materials, could involve significant costs and claims for personal injury, property or natural resource damage, and environmental penalties and remediation in excess of the Company's insurance coverage for these risks, which could have a material adverse effect on KCS's consolidated financial statements. KCS is also required to comply with rules and regulations regarding the handling of hazardous materials. Noncompliance with these rules and regulations could subject KCS to significant penalties or other costs and exposure to litigation. Changes to these rules and regulations could also increase operating costs and negatively impact KCS's consolidated financial statements.

KCS's business is subject to regulation by federal, state and local legislatures and agencies that could impose significant costs on the Company's business operations.

KCS rail subsidiaries are subject to legislation and regulation enacted by federal, state and local legislatures and agencies in the U.S. and Mexico with respect to commercial terms with its customers and railroad operations, including with respect to health, safety, labor, environmental and other areas. Government regulation of the railroad industry is a significant determinant of the competitiveness and profitability of railroads. Changes in legislation or regulation could have a negative impact on KCS's ability to negotiate prices for rail services, could negatively affect competition among rail carriers, or could negatively impact operating practices, resulting in reduced efficiency, increased operating costs or increased capital investment, all of which could result in a material adverse effect on KCS's consolidated financial statements.

New economic regulation in the U.S. or Mexico in current or future proceedings could change the regulatory framework within which the Company operates which could materially change the Company's business and have a material adverse effect on the Company's consolidated financial statements.

KCS's failure or inability to comply with applicable laws and regulations could have a material adverse effect on the Company's consolidated financial statements and operations, including fines, penalties, or limitations on operating activities until compliance with applicable requirements is achieved. Congress and government agencies may change the legislative or regulatory framework within which the Company operates without providing any recourse for any adverse effects on the Company's business that occur as a result of such change. Additionally, some of the regulations require KCS to obtain and maintain various licenses, permits and other authorizations. Any failure to obtain or maintain these licenses, permits, and other authorizations could have a material adverse effect on KCS's business operations.

KCS is subject to environmental regulations, which may impose significant costs on the Company's business operations.

KCS subsidiaries' operations are subject to environmental regulation enacted by federal, state and local legislatures in the U.S. and Mexico. Environmental liability under federal and state law in the United States can also extend to previously owned or operated properties, leased properties and properties owned by third parties, as well as to properties currently owned and used by the Company. Environmental liabilities may also arise from claims asserted by adjacent landowners or other third parties. Given the nature of its business, the Company incurs, and expects to continue to incur, environmental compliance costs, including, in particular, costs necessary to maintain compliance with requirements governing chemical and hazardous material shipping operations, refueling operations and repair facilities. KCS presently has environmental investigation and remediation obligations at certain sites, and will likely incur such obligations at additional sites in the future.

The Company's Mexican subsidiaries' operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment, including standards for, among other things, water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. Under applicable Mexican law and regulations, administrative and criminal proceedings may be brought and economic sanctions imposed against companies that violate environmental laws, and non-complying facilities may be temporarily or permanently closed. KCSM is also subject to the laws of various jurisdictions with respect to the discharge of materials into the environment and to environmental laws and regulations issued by the governments of each of the Mexican states in which KCSM's facilities are located. The terms of KCSM's Concession from the Mexican government also impose environmental compliance obligations on KCSM. Failure to

comply with any environmental laws or regulations may result in the termination of KCSM's Concession or in fines or penalties that may affect profitability.

Liabilities accrued for environmental costs represent the Company's best estimate of the probable future obligation for the remediation and settlement of matters related to these sites. However, remediation costs may exceed such estimates, due to various factors such as evolving environmental laws and regulations, changes in technology, the extent of other parties' participation, discovery of unidentified environmental conditions and matters, developments in environmental surveys and studies, and the extent of corrective action that may ultimately be required. The Company cannot predict the effect, if any, that unidentified environmental matters or the adoption of unknown additional or more stringent environmental laws and regulations would have on KCS's consolidated financial statements.

KCS's failure or inability to comply with applicable environmental laws and regulations could have a material adverse effect on the Company's consolidated financial statements and operations, including fines, penalties, or limitations on operating activities until compliance with applicable requirements is achieved. Government entities may change the legislative or regulatory framework within which the Company operates that could result in adverse effects on the Company's business that occur as a result of such change. Additionally, some of the regulations require KCS to obtain and maintain various licenses, permits and other authorizations. Any failure to obtain or maintain these licenses, permits, and other authorizations could have a material adverse effect on KCS's business operations.

KCS's business may be affected by climate change and the market and regulatory responses to climate change.

Climate change could have a material adverse effect on KCS's operations and KCS's consolidated financial statements. Restrictions, caps, taxes, or other controls on emissions of greenhouse gases, including diesel exhaust, could significantly impact operations and increase operating costs. Restrictions on emissions could also affect KCS's customers that use commodities that KCS transports to produce energy, use significant amounts of energy in producing or delivering the commodities KCS transports, or manufacture or produce goods that consume significant amounts of energy or burn fossil fuels, including coal-fired power plants, chemical producers, farmers and food producers, and automakers and other manufacturers. Significant cost increases, government regulation, or changes of consumer preferences for goods or services relating to alternative sources of energy or emissions reductions could materially affect the markets for the commodities KCS transports, which in turn could have a material adverse effect on KCS's consolidated financial statements. Government incentives encouraging the use of alternative sources of energy could also affect certain customers and their respective markets for certain commodities KCS transports in an unpredictable manner that could alter traffic patterns, including, for example, the impacts of ethanol incentives on farming and ethanol producers. Moreover, increasing frequency, intensity and duration of extreme weather events such as flooding, storms and fires may result in substantial costs, including costs associated with KCS's response during the event, KCS's recovery from the event and preventive measures. Any of these factors, individually or in conjunction with one or more of the other aforementioned factors, or other unforeseen impacts of climate change could have a material adverse effect on KCS's consolidated financial statements.

Risks Related to KCS's Foreign Operations

KCSM's Mexican Concession is subject to revocation or termination in certain circumstances, which would prevent KCSM from conducting rail operations under the Concession and would have a material adverse effect on the Company's consolidated financial statements.

KCSM operates under the Concession granted by the Mexican government until June 2047, which is renewable for an additional period of up to 50 years, subject to certain conditions. The Concession gives KCSM exclusive rights to provide freight transportation services over its rail lines through 2027 (the first 30 years of the 50-year Concession), subject to certain trackage and haulage rights granted to other concessionaires. The SCT and ARTF, which are principally responsible for regulating railroad services in Mexico, have broad powers to monitor KCSM's compliance with the Concession, and they can require KCSM to supply them with any technical, administrative and financial information they request. Among other obligations, KCSM must comply with the investment commitments established in its business plan, which forms an integral part of the Concession, and must update the plan every three years. The SCT treats KCSM's business plans confidentially. The SCT and ARTF also monitor KCSM's compliance with efficiency and safety standards established in the Concession. The SCT and ARTF review, and may amend, these standards from time to time.

Under the Concession, KCSM has the right to operate its rail lines, but it does not own the land, roadway or associated structures. If the Mexican government legally terminates the Concession, it would own, control, and manage such public domain assets used in the operation of KCSM's rail lines. All other property not covered by the Concession, including all locomotives and railcars otherwise acquired, would remain KCSM's property. In the event of early termination, or total or partial revocation of the Concession, the Mexican government would have the right to cause the Company to lease all service-related assets to it for a term of at least one year, automatically renewable for additional one-year terms for up to five years. The amount of rent would be determined by experts appointed by KCSM and the Mexican government. The Mexican government must exercise this right within four months after early termination or revocation of the Concession. In addition, the Mexican government would also have a right of first refusal with respect to certain transfers by KCSM of railroad equipment within 90 days after revocation of the Concession.

The Mexican government may also temporarily seize control of KCSM's rail lines and its assets in the event of a natural disaster, war, significant public disturbance or imminent danger to the domestic peace or economy. In such a case, the SCT may restrict KCSM's ability to operate under the Concession in such manner as the SCT deems necessary under the circumstances, but only for the duration of any of the foregoing events. Mexican law requires that the Mexican government pay compensation if it effects a statutory appropriation for reasons of the public interest. With respect to a temporary seizure due to any cause other than international war, the Mexican Regulatory Railroad Service Law and regulations provide that the Mexican government will indemnify an affected concessionaire for an amount equal to damages caused and losses suffered. However, these payments may not be sufficient to compensate KCSM for its losses and may not be made timely.

The SCT may revoke the Concession if KCSM is sanctioned for the same cause at least three times within a period of five years for any of the following: unjustly interrupting the operation of its rail lines or for charging rates higher than those it has registered with the ARTF; unlawfully restricting the ability of other Mexican rail operators to use its rail lines; failing to make payments for damages caused during the performance of services; failing to comply with any term or condition of the Mexican Regulatory Railroad Service Law and regulations or the Concession; failing to make the capital investments required under its three-year business plan filed with the SCT; or failing to maintain an obligations compliance bond and insurance coverage as specified in the Mexican Regulatory Railroad Service Law and regulations. In addition, the Concession would terminate automatically if KCSM changes its nationality or assigns or creates any lien on the Concession, or if there is a change in control of KCSM without the SCT's approval. The SCT may also terminate the Concession as a result of KCSM's surrender of its rights under the Concession, or for reasons of public interest or upon KCSM's liquidation or bankruptcy. If the Concession is terminated or revoked by the SCT for any reason, KCSM would receive no compensation and its interest in its rail lines, and all other fixtures covered by the Concession, as well as all improvements made by it, would revert to the Mexican government. Revocation or termination of the Concession could have a material adverse effect on the Company's consolidated financial statements.

KCS's ownership of KCSM and operations in Mexico subject it to Mexican economic and political risks.

The Mexican government has exercised, and continues to exercise, significant influence over the Mexican economy. Accordingly, Mexican governmental actions concerning the economy and state-owned enterprises could have a significant impact on Mexican private sector entities in general and on KCSM's operations in particular. For example, KCSM operations could be impacted with the introduction of new legislation or policies to regulate the railway industry, the energy market, or labor conditions. KCS cannot predict the impact that the political landscape, including multiparty rule, social unrest and civil disobedience, will have on the Mexican economy or KCSM's operations. For example, from time to time, social unrest in Mexico has resulted in service interruptions on KCSM's right of ways due to blockages from teachers' protests. Furthermore, KCS's consolidated financial statements and prospects may be adversely affected by currency fluctuations, inflation, interest rates, regulation, taxation and other political, social and economic developments in or affecting Mexico.

The social and political situation in Mexico could adversely affect the Mexican economy and KCSM's operations, and changes in laws, public policies and government programs could be enacted, each of which could also have a material adverse effect on KCS's consolidated financial statements.

The Mexican economy in the past has suffered balance of payment deficits and shortages in foreign exchange reserves. Although Mexico has imposed foreign exchange controls in the past, there are currently no exchange controls in Mexico. Any restrictive exchange control policy could adversely affect KCS's ability to obtain U.S. dollars or to convert Mexican pesos into dollars for purposes of making payments. This could have a material adverse effect on KCS's consolidated financial statements.

Downturns in the United States economy or in trade between the United States and Asia or Mexico and fluctuations in the peso-dollar exchange rates could have material adverse effects on KCS's consolidated financial statements.

The level and timing of KCS's Mexican business activity is heavily dependent upon the level of United States-Mexican trade and the effects of current or future multinational trade agreements on such trade. The Mexican operations depend on the United States and Mexican markets for the products KCSM transports, the relative position of Mexico and the United States in these markets at any given time, and tariffs or other barriers to trade. Failure to preserve trade provisions conducive to trade, or any other action imposing import duties or border taxes, could negatively impact KCS customers and the volume of rail shipments, and could have a material adverse effect on KCS's consolidated financial statements.

Downturns in the United States or Mexican economies or in trade between the United States and Mexico could have material adverse effects on KCS's consolidated financial statements and the Company's ability to meet debt service obligations. In addition, KCS has invested significant amounts in developing its intermodal operations, including the Port of Lazaro Cardenas, in part to provide Asian importers with an alternative to the west coast ports of the United States, and the level of intermodal traffic depends, to an extent, on the volume of Asian shipments routed through Lazaro Cardenas. Reductions in trading volumes, which may be caused by factors beyond KCS's control, including increased government regulations regarding the safety and quality of Asian-manufactured products, could have a material adverse effect on KCS's consolidated financial statements.

Additionally, fluctuations in the peso-dollar exchange rates could lead to shifts in the types and volumes of Mexican imports and exports. Although a decrease in the level of exports of some of the commodities that KCSM transports to the United States may be offset by a subsequent increase in imports of other commodities KCSM hauls into Mexico and vice versa, any offsetting increase might not occur on a timely basis, if at all. Future developments in United States-Mexican trade beyond the Company's control may result in a reduction of freight volumes or in an unfavorable shift in the mix of products and commodities KCSM carries.

Extreme volatility in the peso-dollar exchange rate may result in disruption of the international foreign exchange markets and may limit the ability to transfer or convert Mexican pesos into U.S. dollars. Although the Mexican government currently does not restrict, and for many years has not restricted, the right or ability of Mexican or foreign persons or entities to convert pesos into U.S. dollars or to transfer foreign currencies out of Mexico, the Mexican government could, as in the past, institute restrictive exchange rate policies that could limit the ability to transfer or convert pesos into U.S. dollars or other currencies for the purpose of making timely payments and meeting contractual commitments. Devaluation or depreciation of the peso against the U.S. dollar may also adversely affect U.S. dollar prices for KCS's securities.

Fluctuations in the peso-dollar exchange rates also have an effect on KCS's consolidated financial statements. A weakening of the peso against the U.S. dollar would cause reported peso-denominated revenues and expenses to decrease, and could increase reported foreign exchange loss due to the Company's net monetary assets that are peso-denominated. Exchange rate variations also affect the calculation of taxes under Mexican income tax law, and a strengthening of the peso against the U.S. dollar could cause an increase in the Company's cash tax obligation and effective income tax rate.

General Risk Factors

The unavailability of qualified personnel could adversely affect KCS's operations.

Changes in demographics, training requirements and the unavailability of qualified personnel could negatively affect KCS's ability to meet demand for rail service. Unforeseen increases in demand for rail services may exacerbate such risks, which could have a negative impact on KCS's operational efficiency and otherwise have a material adverse effect on KCS's consolidated financial statements.

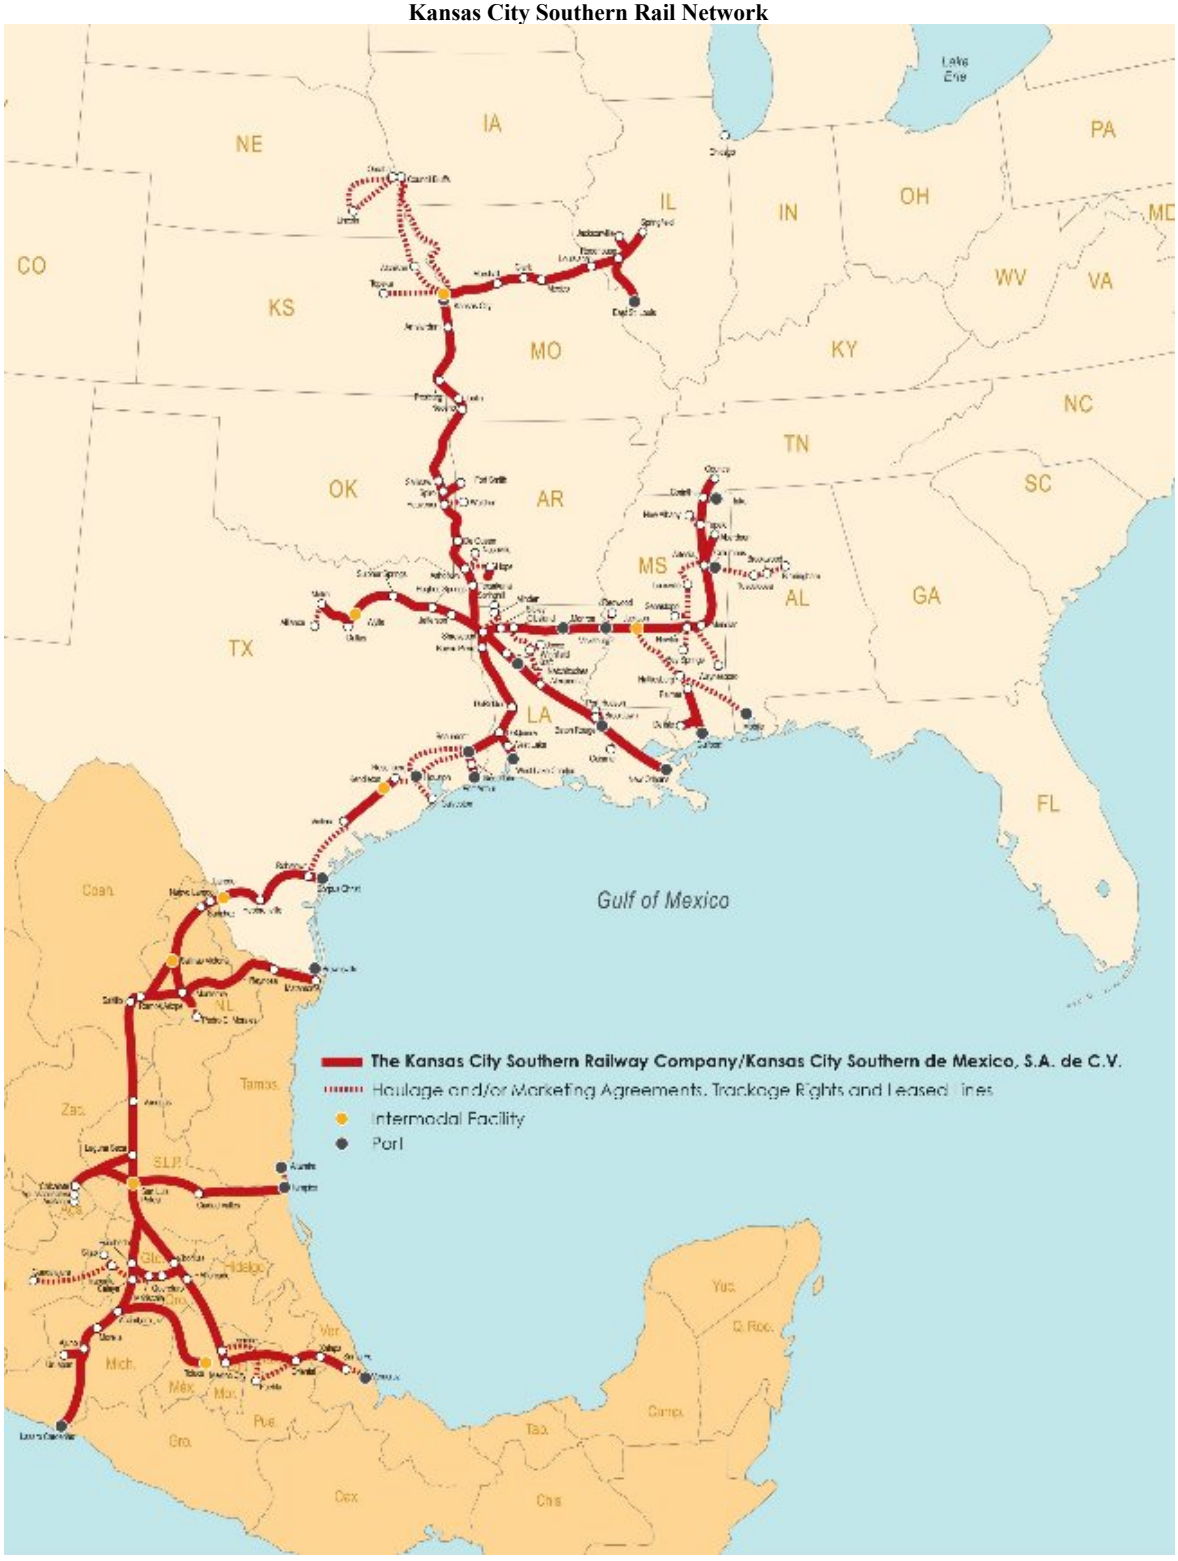
Weaknesses in the short and long-term debt markets could negatively impact the Company's access to capital.

Due to the significant capital expenditures required to operate and maintain a safe and efficient railroad, the Company regularly obtains financing through the issuance of long-term debt instruments and commercial paper from time-to-time, as well as credit facilities provided by financial institutions. Significant, sustained instability or disruptions of the capital markets, including credit markets, or the deterioration of the Company's financial condition due to internal or external factors, could restrict or prohibit access and could increase the cost of financing sources. A significant deterioration of the Company's financial condition could also reduce credit ratings to below investment grade, limiting its access to external sources of capital,

and increasing the costs of short and long-term debt financing, and could have a material adverse effect on KCS's consolidated financial statements.

Item 1B. ***Unresolved Staff Comments***

None.



Item 2. ***Properties***

Track Configuration

The Kansas City Southern Railway Company ("KCSR") operates over a railroad system consisting of approximately 3,300 route miles in ten states from the midwest and southeast portions of the United States south to the Mexican border, which includes approximately 640 miles of trackage rights that permit KCSR to operate its trains with its crews over other railroads' tracks.

Kansas City Southern de México, S.A. de C.V. ("KCSM") operates over a railroad system consisting of approximately 3,800 route miles. This includes approximately 3,300 route miles operated under its concession from the Mexican government (the "Concession"), and approximately 550 miles of trackage rights. Under the concession, KCSM does not own the land, roadway, or associated structures, but is provided the exclusive right to operate across these routes, while also requiring KCSM to make investments as described in a business plan filed every three years with the Mexican government. See Item 1A, Risk Factors — "KCSM's Mexican Concession is subject to revocation or termination in certain circumstances which would prevent KCSM from operating its railroad and would have a material adverse effect on the Company's consolidated financial statements."

Kansas City Southern Rail Network

Equipment Configuration

As of December 31, 2020 and 2019, KCS owned and leased the following units of equipment:

	2020			2019		
	Owned	Leased	Total	Owned	Leased	Total (i)
Freight Cars:						
Box cars	2,093	712	2,805	2,106	716	2,822
Hoppers (covered and open top)	4,883	865	5,748	4,998	1,073	6,071
Gondolas	2,423	1,180	3,603	2,424	1,179	3,603
Automotive	3,310	356	3,666	3,316	535	3,851
Flat cars (intermodal and other)	818	54	872	869	54	923
Tank cars	—	416	416	—	477	477
Total	13,527	3,583	17,110	13,713	4,034	17,747
Locomotives:						
Freight	759	—	759	662	88	750
Switching	198	—	198	199	—	199
Total	957	—	957	861	88	949

(i) KCS has reclassified 1,273 cars from Flat cars (intermodal and other) to Gondolas, which consists of 252 owned and 1,021 leased cars.

Average Age (in Years) of Owned and Leased Locomotives:	2020	2019
Freight	16.5	15.5
Switching	46.9	45.8
All locomotives	22.9	21.9

Property and Facilities

KCS operates numerous facilities, including terminals for intermodal and other freight, rail yards for train-building, switching, storage-in-transit (the temporary storage of customer goods in rail cars prior to shipment) and other activities; offices to administer and manage operations; dispatch centers to direct traffic on the rail network; crew quarters to house train crews along the rail line; and shops and other facilities for fueling and maintenance and repair of locomotives, freight cars and other equipment.

Capital Expenditures

The Company's cash capital expenditures for the two years ended December 31, 2020 and 2019, and planned 2021 capital expenditures are included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Capital Expenditures. See also Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Critical Accounting Policies and Estimates — Capitalization, Depreciation and Amortization of Property and Equipment (including Concession Assets) regarding the Company's policies and guidelines related to capital expenditures.

Item 3. ***Legal Proceedings***

The Company is subject to various legal proceedings and claims that arise in the ordinary course of business. For more information on legal proceedings, see Item 1A, Risk Factors — "KCS may be subject to various claims and litigation that could have a material adverse effect on KCS's consolidated financial statements," Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Other Matters — Litigation, and Item 8, Financial Statements and Supplementary Data — Note 17, Commitments and Contingencies.

Item 4. ***Mine Safety Disclosures***

Not applicable.

Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Market Information

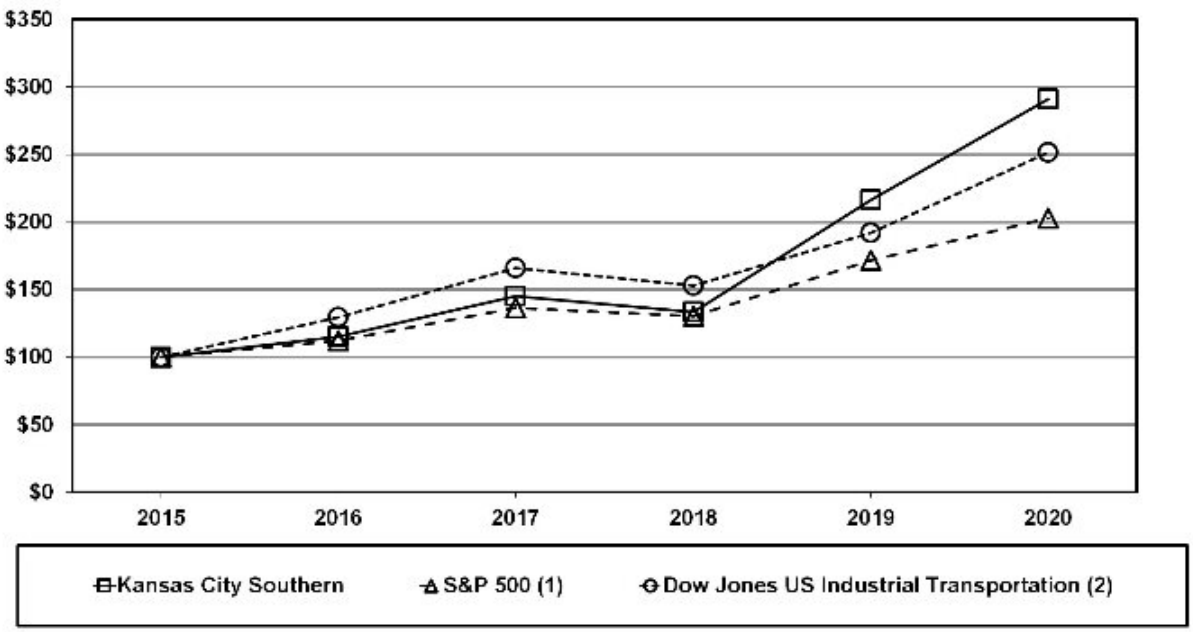
The Company's common stock is traded on the New York Stock Exchange under the ticker symbol "KSU".

Dividend Policy

Common Stock. Any declarations and payments of dividends to holders of the Company's common stock are at the discretion of the Board of Directors, and are based on many factors, including the Company's financial condition, earnings, capital requirements and other factors that the Board of Directors deems relevant. Subject to these qualifications, the Company expects to continue to pay dividends on an ongoing basis.

Holders

There were 2,037 record holders of KCS common stock on January 22, 2021; however, the number of actual holders of KCS common stock is greater due to the practice of brokerage firms registering many shares for clients in the brokerage firm's name.



Securities Authorized for Issuance Under Equity Compensation Plans

See Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters for information about securities authorized for issuance under KCS's equity compensation plans.

Performance Graph

The following graph shows the changes in value over the five years ended December 31, 2020, of an assumed investment of $100 in: (i) KCS's common stock; (ii) the stocks that comprise the Dow Jones U.S. Industrial Transportation Index; and (iii) the stocks that comprise the S&P 500 Index. The table following the graph shows the value of those investments on December 31 for each of the years indicated. The values for the assumed investments depicted on the graph and in the table have been calculated assuming that any cash dividends are reinvested.

COMPARISON OF FIVE YEAR CUMULATIVE TOTAL RETURN
Among Kansas City Southern, the S&P 500 Index
and the Dow Jones U.S. Industrial Transportation Index

	2015	2016	2017	2018	2019	2020
Kansas City Southern	$ 100.00	$ 115.34	$ 145.04	$ 133.34	$ 216.47	$ 291.27
S&P 500 [1]	100.00	111.96	136.40	130.42	171.49	203.04
Dow Jones U.S. Industrial Transportation [2]	100.00	129.51	166.08	153.07	191.82	251.63

(1) The S&P 500 is a registered trademark of Standard & Poor's, a division of S&P Global, Inc. The S&P 500 Index reflects the weighted average market value for 500 companies whose shares are traded on the New York Stock Exchange, American Stock Exchange and the Nasdaq Stock Market.

(2) The Dow Jones U.S. Industrial Transportation Index is a registered trademark of S&P Dow Jones Indices LLC, a division of S&P Global, Inc.

Purchases of Equity Securities

On November 10, 2020, the Company announced that the Board of Directors approved a new common share repurchase program, pursuant to which up to $3.0 billion in shares of common stock could be repurchased through December 31, 2023 (the "2020 Program"). The 2020 Program replaced KCS's $2.0 billion common share repurchase program announced on November 12, 2019 (the "2019 Program"), and eliminated the $588.3 million of remaining authorization under the 2019 Program.

During 2020, the Company entered into two accelerated share repurchase ("ASR") agreements under the 2019 Program, and paid $500.0 million. The agreements were settled during January 2021. During 2020, KCS repurchased 143,343 shares of common stock for $27.0 million under the 2020 Program, and 5,207,633 shares of common stock for $869.2 million under the 2019 Program. Refer to Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional detail on the Company's common share repurchase program and ASR agreements.

During 2020, KCS repurchased 7,426 shares of $25 par preferred stock for $0.2 million at an average price of $29.58 per share. See Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional information.

The following table presents stock repurchases during each month for the fourth quarter of 2020:

Period	(a) Total Number of Shares (or Units) Purchased [1]	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that may yet be purchased under the Plans or Programs
Common stock				
October 1-31, 2020 [2]	2,554,424	$ 179.30	2,554,424	$ 588,271,423
November 1-30, 2020	143,343	$ 188.24	143,343	$ 2,973,017,537
December 1-31, 2020	—	—	—	$ 2,973,017,537
Total	2,697,767		2,697,767	
$25 Par preferred stock				
October 1-31, 2020	—	—	—	—
November 1-30, 2020	2,970	$ 30.72	—	—
December 1-31, 2020	—	—	—	—
Total	2,970		—	

(1) All $25 par preferred stock repurchases were made other than through a publicly disclosed plan or program. Repurchases of $25 par preferred stock were made through open market purchases and/or privately negotiated transactions.

(2) On October 20, 2020, the Company paid $500.0 million under two ASR agreements and received an aggregate initial delivery of 2,374,168 shares. In January 2021, the ASR agreements were settled with the Company receiving 233,402 additional shares and a value of $75.0 million, which is not included in the number of shares or the average price paid per share in the table above. The average price paid per share upon completion of the ASR agreements was $191.75. See Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional information.

Item 6. ***Selected Financial Data***

The selected financial data below *(in millions, except per share amounts)* should be read in conjunction with Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations as well as the consolidated financial statements and the related notes.

	2020	2019	2018	2017	2016
Earnings From Continuing Operations					
Revenues	$ 2,632.6	$ 2,866.0	$ 2,714.0	$ 2,582.9	$ 2,334.2
Operating expenses (i) (ii) (iii) (iv)	1,629.6	1,979.7	1,727.7	1,661.3	1,515.7
Operating income	$ 1,003.0	$ 886.3	$ 986.3	$ 921.6	$ 818.5
Net income (v) (vi) (vii) (viii)	$ 619.1	$ 540.8	$ 629.4	$ 963.9	$ 479.9
Earnings per common share:					
Basic	$ 6.57	$ 5.42	$ 6.16	$ 9.18	$ 4.44
Diluted	6.54	5.40	6.13	9.16	4.43
Financial Position					
Total assets (ix)	$ 9,964.0	$ 9,786.8	$ 9,469.8	$ 9,198.7	$ 8,817.5
Total long-term debt obligations, including current portion and short-term borrowings	3,770.8	3,246.0	2,689.4	2,619.4	2,478.2
Total stockholders' equity	4,057.2	4,422.5	4,813.0	4,548.9	4,089.9
Total equity	4,383.6	4,745.9	5,132.7	4,865.4	4,404.5
Other Data Per Common Share					
Cash dividends declared per common share	$ 1.64	$ 1.48	$ 1.44	$ 1.38	$ 1.32

(i) During 2020, the Company recognized pre-tax expense of $13.6 million within operating expenses related to the write-off of software development costs.

(ii) During 2020 and 2019, the Company recognized pre-tax restructuring charges of $17.0 million and $168.8 million, respectively, within operating expenses related to the implementation of Precision Scheduled Railroading ("PSR") initiatives as well as the voluntary separation program.

(iii) During 2018, the Company recognized a pre-tax gain of $17.9 million within operating expenses for insurance recoveries related to damage from Hurricane Harvey in 2017.

(iv) During 2018, 2017 and 2016, the Company recognized a pre-tax benefit of $37.7 million, $44.1 million and $62.8 million, respectively, within operating expenses related to a credit that was available for the excise tax included in the price of fuel that was purchased and consumed in locomotives and certain work equipment in Mexico. Effective January 1, 2019, the Company began recognizing the benefit as a reduction of income tax expense due to changes in Mexican tax law; and beginning April 30, 2019, railroads in Mexico are no longer eligible for the tax credit due to changes in Mexican tax regulations.

(v) During 2020, the Company recognized a $14.5 million tax benefit for the reversal of 2018 and 2019 global intangible low-taxed income ("GILTI") tax expense recognized in prior years' consolidated financial statements, as the result of final regulations issued by the Treasury Department that provide for a high-tax exception to the GILTI tax retroactive to 2018.

(vi) During 2019 and 2018, the Company recognized pre-tax debt retirement costs of $1.1 million and $2.2 million, respectively, related to debt retirement and restructuring activities that occurred during the periods.

(vii) During 2019, the Company recognized a $12.8 million net tax benefit related to the Mexican fuel excise tax credit generated through April 29, 2019, noted in (iv) above.

(viii) During 2017, the Company recognized a provisional $413.0 million net tax benefit, as a result of the Tax Cuts and Jobs Act (the "Tax Reform Act"), which was signed into law December 22, 2017. During 2018, the Company recognized a $20.9 million net tax benefit for adjustments to the provisional tax impacts of the Tax Reform Act recognized in 2017.

(ix) During the first quarter of 2019, the Company adopted ASU No. 2016-02, Leases, also known as Accounting Standard Codification ("ASC") Topic 842. Prior to 2019, the Company accounted for leases under ASC Topic 840, Leases.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations***

The following is a discussion of Kansas City Southern's results of operations, certain changes in its financial position, liquidity, capital structure and business developments for the years ended December 31, 2020 and 2019. This discussion should be read in conjunction with the included consolidated financial statements, the related notes, and other information included in this report.

CAUTIONARY INFORMATION

The discussions set forth in this Annual Report on Form 10-K may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, may be forward-looking statements. In addition, management may make forward-looking statements orally or in other writings, including, but not limited to, in press releases, quarterly earnings calls, executive presentations, in the annual report to stockholders and in other filings with the Securities and Exchange Commission. Readers can usually identify these forward-looking statements by the use of such verbs as "may," "will," "should," "likely," "plans," "projects," "expects," "anticipates," "believes" or similar verbs or conjugations of such verbs. These statements involve a number of risks and uncertainties. Actual results could materially differ from those anticipated by such forward-looking statements. Such differences could be caused by a number of factors or combination of factors including, but not limited to, the factors identified below and those discussed under Item 1A, Risk Factors, of this Form 10-K. Readers are strongly encouraged to consider these factors and the following factors when evaluating any forward-looking statements concerning the Company:

- public health threats or outbreaks of communicable diseases, such as the ongoing COVID-19 pandemic and its impact on KCS's business, suppliers, consumers, customers, employees and supply chains;
- transportation of hazardous materials;
- United States, Mexican and global economic, political and social conditions;
- the adverse impact of any termination or revocation by the Mexican government of Kansas City Southern de México, S.A. de C.V.'s ("KCSM") Concession;
- changes in legislation and regulations or revisions of controlling authority;
- the effects of adverse general economic conditions affecting customer demand and the industries and geographic areas that produce and consume the commodities KCS carries;
- the effect of demand for KCS's services exceeding network capacity or traffic congestion on operating efficiencies and service reliability;
- KCS's reliance on agreements with other railroads and third parties to successfully implement its business strategy, operations and growth and expansion plans, including the strategy to convert customers from using trucking services to rail transportation services;
- the dependence on the stability, availability and security of the information technology systems to operate its business;
- acts of terrorism, war or other acts of violence or crime or risk of such activities;
- uncertainties regarding the litigation KCS faces and any future claims and litigation;
- the outcome of claims and litigation, including those related to environmental contamination, personal injuries and property damage;
- compliance with environmental regulations;
- natural events such as severe weather, fire, floods, hurricanes, earthquakes or other disruptions to the Company's operating systems, structures and equipment or the ability of customers to produce or deliver their products;
- Insurance coverage limitations;
- climate change and the market and regulatory responses to climate change;
- the impact of competition, including competition from other rail carriers, trucking companies and maritime shippers in the United States and Mexico;

- the effects of fluctuations in the peso-dollar exchange rate;
- changes in labor costs and labor difficulties, including strikes and work stoppages affecting either operations or customers' abilities to deliver goods for shipment;
- the effects of current and future multinational trade agreements on the level of trade among the United States, Mexico and Canada;
- the level of trade between the United States and Asia or Mexico;
- unavailability of qualified personnel;
- disruption in fuel supplies, changes in fuel prices and the Company's ability to recapture its costs of fuel from customers;
- KCS's reliance on certain key suppliers of core rail equipment; and
- material adverse changes in economic and industry conditions, including the availability of short and long-term financing, both within the United States and Mexico and globally.

Forward-looking statements reflect the information only as of the date on which they are made. The Company does not undertake any obligation to update any forward-looking statements to reflect future events, developments, or other information. If KCS does update one or more forward-looking statements, no inference should be drawn that additional updates will be made regarding that statement or any other forward-looking statements.

CORPORATE OVERVIEW

Kansas City Southern, a Delaware corporation, is a transportation holding company that has railroad investments in the U.S., Mexico and Panama. In the U.S., the Company serves the midwest and southeast regions of the U.S. Its international holdings serve northeastern and central Mexico and the port cities of Lazaro Cardenas, Tampico and Veracruz, and a fifty percent interest in Panama Canal Railway Company provides ocean-to-ocean freight and passenger service along the Panama Canal. KCS's North American rail holdings and strategic alliances are primary components of a railway system, linking the commercial and industrial centers of the U.S., Canada and Mexico. KCS's principal subsidiaries and affiliates include the following:

- The Kansas City Southern Railway Company ("KCSR"), a wholly-owned subsidiary;
- KCSM, a wholly-owned subsidiary;
- Mexrail, Inc. ("Mexrail"), a wholly-owned consolidated subsidiary which, in turn, wholly owns The Texas Mexican Railway Company ("Tex-Mex");
- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned subsidiary;
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate;
- Panama Canal Railway Company ("PCRC"), a fifty percent-owned unconsolidated affiliate;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate; and
- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate.

EXECUTIVE SUMMARY

COVID-19 Update

With the global outbreak of the Coronavirus Disease 2019 ("COVID-19") and the declaration of a pandemic by the World Health Organization on March 11, 2020, the U.S. and Mexico governments have deemed rail transportation as "critical infrastructure" providing essential services during this global emergency. As a provider of critical infrastructure, Kansas City Southern has an obligation to keep employees working and freight moving. KCS remains focused on protecting the health and well-being of its employees and the communities in which it operates while assuring the continuity of its business operations.

KCS created a dedicated crisis team that proactively implemented its business continuity plans to ensure the ongoing availability of its transportation services, while taking a variety of health and safety measures, including separating dispatching

and crew operations, implementing enhanced cleaning and hygiene protocols in its facilities and locomotives, implementing remote work policies, where possible, performing temperature checks and requiring facial coverings. As a result, to date, the Company has not experienced significant COVID-19 related disruptions in its railroad operations.

The Company began to experience the impacts of COVID-19 on customer demand in late March of 2020. Volumes significantly declined in the second quarter of 2020; however, by early June volumes began to rapidly rebound. By the end of the third quarter, weekly volumes were higher than pre-COVID-19 levels and had increased by approximately 60% from the lowest levels in the second quarter of 2020. Volumes remained relatively steady from the third quarter into the fourth quarter of 2020. For the year ended December 31, 2020, revenue decreased by 8% compared to the same period in 2019, primarily due to lower volumes as a result of COVID-19 and service interruptions at Lazaro Cardenas due to KCSM right-of-way blockages resulting from teachers' protests ("Teachers' Protests"), the weakening of the Mexican peso against the U.S dollar, and lower fuel surcharge due to lower fuel prices.

As revenues declined in the second quarter of 2020, the Company responded quickly and implemented a variety of cost-saving measures and accelerated Precision Scheduled Railroading ("PSR") initiatives by further consolidating trains, which increased train length and reduced crew costs. For the year ended December 31, 2020, operating expenses decreased by 18% compared to 2019, due to decreased restructuring charges, lower fuel prices, COVID-19 related volume declines, increased savings from PSR initiatives and the weakening of the Mexican peso against the U.S. dollar. See Strategic Initiatives for further discussion of PSR savings.

In the second quarter of 2020, the Company offered a voluntary separation program ("VSP") to its management employees, which resulted in a restructuring charge of $9.7 million for the year ended December 31, 2020, consisting of severance and benefit costs that will be paid out in either lump-sum payments or incrementally over a six to twelve-month period. Approximately 6% of management employees were irrevocably accepted into the voluntary separation program. Management expects the voluntary separation program reductions to result in annualized savings of approximately $11.0 million.

COVID-19 costs increased total expense for the year ended December 31, 2020 by approximately $10.0 million, primarily due to wages paid to certain high-risk employees who were allowed to stay home pursuant to a Mexican presidential decree, were symptomatic, or in quarantine, as well as expenses related to cleaning and decontamination of locomotives and other workspaces, and costs of protective gear for KCS employees.

KCS believes it has a strong liquidity position to continue business operations and service its debt obligations. As disclosed in the Liquidity and Capital Resources section, the Company has total available liquidity of $788.2 million as of December 31, 2020, consisting of cash on hand and a revolving credit facility, compared to available liquidity at December 31, 2019 of $748.8 million. Furthermore, the Company does not have any debt maturities until 2023. During the year ended December 31, 2020, KCS did not significantly alter the terms of its freight agreements with customers. Cash flows from operations remain strong; however, planned capital expenditures were reduced by $75.0 million, resulting in annual capital expenditures of $410.2 million in 2020. If the Company experienced another significant reduction in revenues, the Company would have additional alternatives to maintain liquidity, including decreases in capital expenditures and cost reductions as well as adjustments to its capital allocation policy. To date, the Company has not reduced or suspended its share repurchase program or dividend payments. See Liquidity and Capital Resources section for additional information.

KCS continues to monitor the rapidly evolving COVID-19 situation and guidance from international and domestic authorities, including federal, state, and local public health authorities and may take additional actions based on their recommendations. In these circumstances, there may be developments outside KCS' control requiring adjustments to operating plans. As such, given the dynamic nature of this situation, KCS cannot reasonably estimate with any degree of certainty the future impact COVID-19 may have on the Company's results of operations, financial position, and liquidity. See Part II, Item 1A - "Risk Factors" - "Public health threats or outbreaks of communicable diseases, including the ongoing COVID-19 pandemic, could have a material adverse effect on the Company's operations and financial results."

Strategic Initiatives

During 2019, KCS began implementing principles of PSR, focusing on operational excellence and driving the following improvements:

- Customer service — improve and sustain consistency and reliability of service and create a more resilient and dependable network;
- Facilitating growth — additional capacity for new opportunities;
- Improving asset utilization — meet growing or changing demand with the same or fewer assets; and,
- Improving the cost profile of the Company — increased profitability driven by volume and revenue growth and improved productivity and asset utilization.

As a result of the PSR initiatives in 2019, management approved four separate restructuring plans that totaled $168.8 million. The PSR plans included asset impairments, workforce reductions, and contract restructuring, which resulted in 2019 operating expense savings of approximately $58.0 million.

The Company established the following key metrics to measure PSR progress and performance:

	Years ended December 31,		Improvement/ (Deterioration)
	2020	2019	
Gross velocity (mph) (i)	15.1	13.5	12%
Terminal dwell (hours) (ii)	22.1	20.8	(6)%
Train length (feet) (iii)	6,671	5,981	12%
Car miles per day (iv)	110.6	110.9	—
Fuel efficiency (gallons per 1,000 GTM's) (v)	1.24	1.31	5%

(i) Gross velocity is the average train speed between origin and destination in miles per hour calculated as the sum of the miles traveled divided by the sum of total transit hours. Transit hours are measured as the difference between a train's origin departure and destination arrival date and times broken down by segment across the train route (includes all time spent including crew changes, terminal dwell, delays, and incidents).

(ii) Terminal dwell is the average amount of time in hours between car arrival to and departure from the yard (excludes cars that move through a terminal on a run-through train, stored, bad ordered, and maintenance-of-way cars). Calculated by dividing the total number of hours cars spent in terminals by the total count of car dwell events.

(iii) Train length is the average length of a train across its reporting stations, including the origin and intermediate stations. Length of a train is the sum of car and locomotive lengths measured in feet.

(iv) Car miles per day is the miles a car travels divided by total transit days. Transit days are measured from opening event to closing event (includes all time spent in terminals and on trains).

(v) Fuel efficiency is calculated by taking locomotive fuel consumed in gallons divided by thousand gross ton miles ("GTM's") net of detours with no associated fuel gallons. GTM's are the movement of one ton of train weight over one mile calculated by multiplying total train weight by distance the train moved. GTM's exclude locomotive gross ton miles.

As revenues declined rapidly in the second quarter of 2020 due to COVID-19, management accelerated PSR initiatives by rightsizing resources to volumes and further reduced costs. Train service plans were quickly adjusted as volumes began to decline and trains were consolidated, resulting in longer, more efficient trains. Record average train length reduced the number of train starts and crew costs, leading to operating efficiencies across the organization and record fuel efficiency. As volumes began to rebound rapidly in June and through the remainder of 2020, the Company remained focused on PSR initiatives and maintained cost reductions from consolidating trains and reducing crew costs. However, during the second half of 2020, the Company experienced four hurricanes and Teachers' Protests that negatively impacted the operating metrics for 2020.

At the beginning of 2020, the Company estimated incremental annual operating savings of approximately $61.0 million. Due to acceleration of PSR initiatives in the second quarter of 2020, the Company realized incremental annual operating savings of approximately $96.0 million. The Company estimates incremental annual savings of approximately $50.0 million in 2021 due to PSR initiatives. The Company remains focused on executing these strategic initiatives, which will deliver improved customer service, facilitate growth, and drive better asset utilization while improving the cost profile of the Company.

2020 Financial Overview

Revenues decreased 8% for the year ended December 31, 2020, as compared to 2019, due to a 6% decrease in carload/unit volumes and a 3% decrease in revenue per carload/unit. Revenues decreased primarily due to lower volumes as a result of COVID-19 and Teachers' Protests, the weakening of the Mexican peso against the U.S dollar, and lower fuel surcharge due to lower fuel prices.

Operating expenses decreased 18% compared to 2019, primarily due to decreased restructuring charges, lower fuel prices, COVID-19 related volume declines, increased savings from PSR initiatives and the weakening of the Mexican peso against the U.S. dollar. Operating expenses as a percentage of revenues ("operating ratio") decreased to 61.9% in 2020 from 69.1% in 2019.

The Company reported 2020 earnings per diluted share of $6.54, compared to 2019 earnings per diluted share of $5.40. The increase in earnings per diluted share was due to higher operating income, reduced income tax expense as a result of lower effective tax rate, and an increase in share repurchases. These increases were partially offset by a foreign exchange loss in 2020, compared to a gain in 2019, and an increase in interest expense due to the issuance of senior notes in the fourth quarter of 2019 and the second quarter of 2020.

RESULTS OF OPERATIONS

Year Ended December 31, 2020, compared with the Year Ended December 31, 2019

The following summarizes KCS's consolidated income statement components *(in millions):*

	2020	2019	Change
Revenues	$ 2,632.6	$ 2,866.0	$ (233.4)
Operating expenses	1,629.6	1,979.7	(350.1)
Operating income	1,003.0	886.3	116.7
Equity in net earnings (losses) of affiliates	(1.4)	1.0	(2.4)
Interest expense	(150.9)	(115.9)	(35.0)
Debt retirement costs	—	(1.1)	1.1
Foreign exchange gain (loss)	(29.6)	17.1	(46.7)
Other income, net	2.1	1.0	1.1
Income before income taxes	823.2	788.4	34.8
Income tax expense	204.1	247.6	(43.5)
Net income	619.1	540.8	78.3
Less: Net income attributable to noncontrolling interest	2.1	1.9	0.2
Net income attributable to Kansas City Southern and subsidiaries	$ 617.0	$ 538.9	$ 78.1

Revenues

The following summarizes revenues *(in millions),* carload/unit statistics *(in thousands)* and revenue per carload/unit:

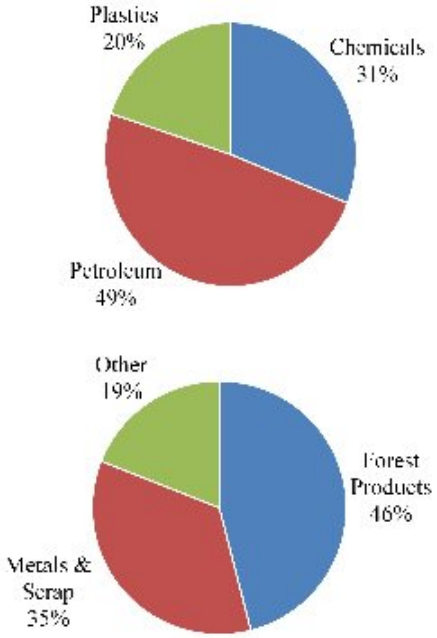
	Revenues			Carloads and Units			Revenue per Carload/Unit		
	2020	2019	% Change	2020	2019	% Change	2020	2019	% Change
Chemical and petroleum	$ 763.8	$ 737.2	4 %	356.7	337.4	6 %	$ 2,141	$ 2,185	(2 %)
Industrial and consumer products	537.7	610.4	(12 %)	300.5	320.9	(6 %)	1,789	1,902	(6 %)
Agriculture and minerals	505.4	506.3	—	251.0	253.3	(1 %)	2,014	1,999	1 %
Energy	195.0	246.2	(21 %)	210.0	244.7	(14 %)	929	1,006	(8 %)
Intermodal	319.1	370.2	(14 %)	924.5	979.8	(6 %)	345	378	(9 %)
Automotive	172.7	255.6	(32 %)	110.7	154.9	(29 %)	1,560	1,650	(5 %)
Carload revenues, carloads and units	2,493.7	2,725.9	(9 %)	2,153.4	2,291.0	(6 %)	$ 1,158	$ 1,190	(3 %)
Other revenue	138.9	140.1	(1 %)						
Total revenues (i)	$ 2,632.6	$ 2,866.0	(8 %)						
(i) Included in revenues:									
Fuel surcharge	$ 208.7	$ 298.1							

Revenues include revenue for transportation services and fuel surcharges. For the year ended December 31, 2020, revenues and carload/unit volumes decreased 8% and 6%, respectively, compared to 2019. Revenues decreased primarily due to lower volumes as a result of COVID-19 and Teachers' Protests, the weakening of the Mexican peso against the U.S dollar, and lower fuel surcharge due to lower fuel prices.

The volume declines in the intermodal and automotive business units were due to auto plant shutdowns and lower overall automotive production in Mexico as a result of COVID-19. In addition, intermodal volumes decreased as a result of Teachers' Protests. Frac sand and crude oil volumes within the Energy business unit decreased due to the decline in oil prices and industrial and consumer business unit was impacted by lower market demand as a result of COVID-19. These decreases were partially offset by increased volumes in the chemical and petroleum business unit primarily due to refined fuel product shipments to Mexico.

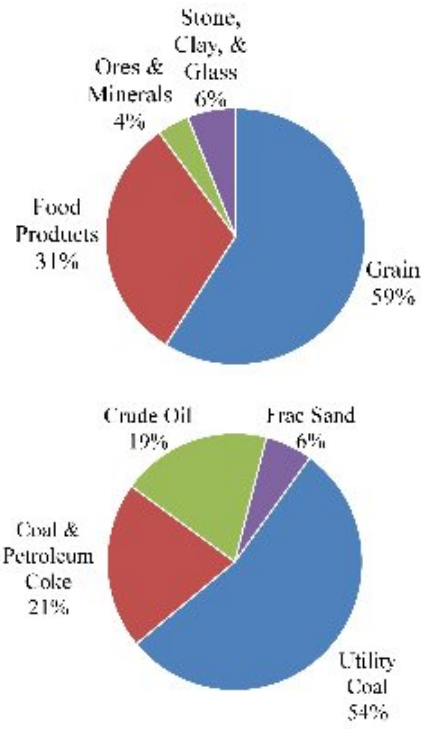
For the year ended December 31, 2020, revenue per carload/unit decreased by 3%, compared to the prior year, due to the weakening of the Mexican peso against the U.S. dollar, shorter average length of haul, and lower fuel surcharge, partially offset by positive pricing impacts and mix. The average exchange rate of Mexican pesos per U.S. dollar was Ps.21.5 for 2020, compared to Ps.19.3 for 2019, which resulted in a decrease to revenues of approximately $43.0 million.

KCS's fuel surcharges are a mechanism to adjust revenue based upon changes in fuel prices above fuel price thresholds set in KCS's tariffs or contracts. Fuel surcharge revenue is calculated using a fuel price from a prior time period that can be up to 60 days earlier. In a period of volatile fuel prices or changing customer business mix, changes in fuel expense and fuel surcharge revenue may differ.



Fuel surcharge revenue decreased $89.4 million for the year ended December 31, 2020, compared to the prior year, primarily due to lower fuel prices and volumes.

The following discussion provides an analysis of revenues by commodity group:



Chemical and petroleum. Revenues increased $26.6 million for the year ended December 31, 2020, compared to 2019, due to a 6% increase in carload/unit volumes, partially offset by a 2% decrease in revenue per carload/unit. Volumes increased due to refined fuel product shipments to Mexico. Revenue per carload/unit decreased due to shorter average length of haul, the weakening of the Mexican peso against the U.S. dollar, and lower fuel surcharge, partially offset by mix and positive pricing impacts.

Industrial and consumer products. Revenues decreased $72.7 million for the year ended December 31, 2020, compared to 2019, due to a 6% decrease in both carload/unit volumes and revenue per carload/unit. Volumes decreased primarily due to lower market demand as a result of the ongoing COVID-19 pandemic and weakness in the energy sector. Revenue per carload/unit decreased due to mix, the weakening of the Mexican peso against the U.S. dollar, lower fuel surcharge, and shorter average length of haul, partially offset by positive pricing impacts.

Revenues by commodity group for 2020

Revenues by commodity group for 2020

Agriculture and minerals. Revenues remained flat for year ended December 31, 2020, compared to 2019, as a 1% decrease in carload/unit volumes was offset by a 1% increase in revenue per carload/unit. Volumes decreased due to a decline in ores and minerals shipments due to lower demand as a result of weather delays impacting road infrastructure projects. Revenue per carload/unit increased due to mix, longer average length of haul, and positive pricing impacts, partially offset by lower fuel surcharge and the weakening of the Mexican peso against the U.S. dollar.

Energy. Revenues decreased $51.2 million for the year ended December 31, 2020, compared to 2019, due to a 14% decrease in carload/unit volumes and a 8% decrease in revenue per carload/unit. Utility coal volumes decreased as a result of low natural gas prices and warm weather. Frac sand and crude oil volumes decreased due to the declines in oil prices. In addition, frac sand volumes decreased as a result of in-basin sand competition. Revenue per carload/unit decreased due to mix, lower fuel surcharge, shorter average length of haul, and the weakening of the Mexican peso against the U.S. dollar, partially offset by positive pricing impacts.

Intermodal. Revenues decreased $51.1 million for the year ended December 31, 2020, compared to 2019, due to an 9% decrease in revenue per carload/unit and a 6% decrease in carload/unit volumes. Revenue per carload/unit decreased due to mix, shorter average length of haul, lower fuel surcharge, and the weakening of the Mexican peso against the U.S. dollar, partially offset by positive pricing impacts. Volumes decreased primarily due to COVID-19, auto plant shutdowns impacting cross-border traffic, and Teachers' Protests.

Automotive. Revenues decreased $82.9 million for the year ended December 31, 2020, compared to 2019, due to a 29% decrease in carload/unit volumes due to auto plant shutdowns and lower overall automotive production in Mexico as a result of COVID-19. In addition, revenue per carload/unit decreased 5% due to the weakening of the Mexican peso against the U.S. dollar, mix, and lower fuel surcharge, partially offset by positive pricing impacts.

Operating Expenses

Operating expenses, as shown below (*in millions*), decreased $350.1 million for the year ended December 31, 2020, compared to 2019, primarily due to decreased restructuring charges, lower fuel prices, COVID-19 related volume declines, increased savings from PSR initiatives and the weakening of the Mexican peso against the U.S. dollar.

The weakening of the Mexican peso against the U.S. dollar resulted in an expense reduction of approximately $36.0 million for expense transactions denominated in Mexican pesos. The average exchange rate of Mexican pesos per U.S. dollar was Ps.21.5 for 2020 compared to Ps.19.3 for 2019.

			Change	
	2020	2019	Dollars	Percent
Compensation and benefits	$ 476.5	$ 529.1	$ (52.6)	(10 %)
Purchased services	198.1	219.2	(21.1)	(10 %)
Fuel	219.8	340.4	(120.6)	(35 %)
Equipment costs	85.8	108.6	(22.8)	(21 %)
Depreciation and amortization	357.9	350.7	7.2	2 %
Materials and other	260.9	262.9	(2.0)	(1 %)
Write-off of software development costs	13.6	—	13.6	100 %
Restructuring charges	17.0	168.8	(151.8)	(90 %)
Total operating expenses	$ 1,629.6	$ 1,979.7	$ (350.1)	(18 %)

Compensation and benefits. Compensation and benefits decreased $52.6 million for the year ended December 31, 2020, compared to 2019, due to a decrease in headcount and work hours of approximately $54.0 million caused by volume declines as a result of COVID-19 and the continued application of PSR initiatives, the weakening of the Mexican peso against the U.S dollar of approximately $14.0 million and a decrease in incentive compensation of approximately $6.0 million, partially offset by wage inflation of approximately $17.0 million and approximately $5.0 million of wages related to COVID-19. Wages related to COVID-19 were paid to employees that were symptomatic, quarantined, or under a stay-at-home order per Mexican presidential decree for COVID-19.

Purchased services. Purchased services expense decreased $21.1 million for the year ended December 31, 2020, compared to 2019, due to decreases in repairs and maintenance and detour expense caused by COVID-19 related volume declines and the continued application of PSR initiatives of approximately $14.0 million, the weakening of the Mexican peso against the U.S. dollar of approximately $5.0 million, and savings from in-sourcing activities in 2019 related to PSR of approximately $2.0 million.

Fuel. Fuel expense decreased $120.6 million for the year ended December 31, 2020, compared to 2019, due to lower diesel fuel prices of approximately $37.0 million and $28.0 million in the U.S. and Mexico, respectively, lower consumption of approximately $17.0 million and $10.0 million in Mexico and the U.S., respectively, caused by volume declines as a result of the ongoing COVID-19 pandemic, increased efficiency of approximately $17.0 million and the weakening of the Mexican peso against the U.S. dollar of approximately $11.0 million. The average price per gallon was $1.90 in 2020, compared to $2.57 in 2019.

Equipment costs. Equipment costs decreased $22.8 million for the year ended December 31, 2020, compared to 2019, due to lower lease expense of approximately $17.0 million primarily due to the termination of locomotive leases during the second quarter of 2019 and the first quarter of 2020, and lower car hire expense of approximately $6.0 million primarily as a result of reduced cycle times due to PSR initiatives.

Depreciation and amortization. Depreciation and amortization expense increased $7.2 million for the year ended December 31, 2020, compared to 2019, due to a larger asset base, partially offset by lower depreciation as a result of PSR initiatives implemented during 2019.

Materials and other. Materials and other expense decreased $2.0 million for the year ended December 31, 2020, compared to 2019, due to lower employee expenses of approximately $13.0 million, the weakening of the Mexican peso against the U.S. dollar of approximately $6.0 million and lower materials and supplies expense of approximately $5.0 million. These decreases were partially offset by an increase in personal injury expense of approximately $10.0 million, a one-time, vendor settlement of approximately $5.0 million during 2019, higher derailments and casualty expense of approximately $4.0 million, and approximately $2.0 million of costs for decontamination services and enhanced facilities cleaning related to COVID-19.

Write-off of software development costs. For the year ended December 31, 2020, the Company recognized $13.6 million of expense related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use.

Restructuring charges. For the year ended December 31, 2020, the Company recognized $17.0 million of restructuring charges primarily related to the VSP of $9.7 million and the purchase of impaired, leased locomotives of $6.0 million. For the year ended December 31, 2019, the Company recognized $168.8 million of restructuring charges related to the implementation of PSR initiatives, which included the impairment of certain locomotives and rail cars, workforce reduction, and contract restructuring activities. Refer to Item 8, Financial Statements and Supplementary Data — Note 3, Restructuring Charges for more information.

Non-Operating Expenses

Equity in net earnings (losses) of affiliates. Equity in net earnings (losses) of affiliates decreased $2.4 million for the year ended December 31, 2020, compared to 2019, due to a decrease in net earnings from the operations of Panama Canal Railway Company as a result of lower container volumes due to a bridge strike in late June 2020 that shut down the railroad for approximately three months. In addition, equity in net earnings from the operations of TCM decreased due to increased tax expense and foreign exchange losses. These decreases were partially offset by an increase in equity in net earnings from the operations of FTVM as a result of losses recognized in 2019 related to the cancellation of Mexico City's new international airport.

Interest expense. Interest expense increased $35.0 million for the year ended December 31, 2020, compared to 2019, due to higher average debt balances. For the year ended December 31, 2020, the average debt balance (including commercial paper) was $3,679.4 million, compared to $2,826.6 million in 2019. The average interest rate for the years ended December 31, 2020 and 2019 was 4.1% for both periods.

Debt retirement costs. The Company did not incur debt retirement costs during 2020. For the year ended December 31, 2019, debt retirement costs were $1.1 million related to the write-off of previously capitalized debt issuance costs associated with the establishment of the new revolving credit facility in the first quarter of 2019 and the call premiums and write-off of unamortized debt issuance costs and original issue discounts associated with the redemption of the KCS and KCSM 2.35% senior notes in the fourth quarter of 2019.

Foreign exchange gain (loss). For the year ended December 31, 2020, foreign exchange loss was $29.6 million, compared to a gain of $17.1 million in 2019. Foreign exchange gain (loss) includes the re-measurement and settlement of net monetary assets denominated in Mexican pesos and the gain (loss) on foreign currency derivative contracts. The significant fluctuation in foreign exchange gain (loss) is a result of weakening of the Mexican peso against the U.S. dollar partially resulting from the increased market volatility driven by the global COVID-19 pandemic.

For the years ended December 31, 2020 and 2019, the re-measurement and settlement of net monetary assets and liabilities denominated in Mexican pesos resulted in a foreign exchange loss of $7.1 million and a gain of $3.0 million, respectively.

The Company enters into foreign currency derivative contracts to hedge its net exposure to fluctuations in the Mexican cash tax obligation due to changes in the value of the Mexican peso against the U.S. dollar. For the year ended December 31, 2020, foreign exchange loss on foreign currency derivative contracts was $22.5 million, compared to a gain of $14.1 million in 2019.

Other income, net. Other income, net, increased $1.1 million for the year ended December 31, 2020, compared to 2019 primarily due to an increase in miscellaneous income.

Income tax expense. Income tax expense decreased $43.5 million for the year ended December 31, 2020, compared to 2019, due to a lower effective tax rate. The decrease in the effective tax rate was primarily due to fluctuations in the foreign exchange rate and the issuance of final global intangible low-taxed income ("GILTI") regulations that provide for a high-tax exception to the GILTI tax retroactive to 2018. See the tax rates reconciliation below.

The Treasury Department issued final regulations in July 2020 that provide for a high-tax exception to the GILTI tax. Specifically, if foreign earnings are subject to a foreign tax rate of at least 90% of the U.S. tax rate, an election can be made to not treat the high-taxed earnings as GILTI income. The final regulations can apply retroactive to tax years beginning after December 31, 2017, and render the GILTI tax immaterial to the consolidated financial statements. The Company recognized a $14.5 million tax benefit in 2020 for the reversal of 2018 and 2019 GILTI tax expense recognized in prior years' consolidated financial statements.

The fluctuations of the Mexican peso during 2020 decreased the Company's Mexican cash tax obligation by $13.0 million for the year ended December 31, 2020. The fluctuations of the Mexican peso during 2019 increased the Company's Mexican cash tax obligation by $8.9 million for the year ended December 31, 2019.

Differences between the Company's effective income tax rate and the U.S. federal statutory income tax rate of 21% for 2020 and 2019 follow *(in millions):*

	2020		2019		Change	
	Dollars	Percent	Dollars	Percent	Dollars	Percent
Income tax expense using the statutory rate in effect	$ 172.9	21.0 %	$ 165.6	21.0 %	$ 7.3	—
Tax effect of:						
Difference between U.S. and foreign tax rate	44.1	5.4 %	47.6	6.0 %	(3.5)	(0.6 %)
GILTI tax, net	(14.5)	(1.8 %)	2.7	0.3 %	(17.2)	(2.1 %)
Tax credits	(13.8)	(1.7 %)	(16.8)	(2.1 %)	3.0	0.4 %
State and local income tax provision, net	12.5	1.5 %	11.5	1.5 %	1.0	—
Withholding tax	9.9	1.2 %	9.5	1.2 %	0.4	—
Foreign exchange (i)	(3.4)	(0.4 %)	35.9	4.6 %	(39.3)	(5.0 %)
Mexican fuel excise tax credit, net (ii)	—	—	(12.8)	(1.6 %)	12.8	1.6 %
Other, net	(3.6)	(0.4 %)	4.4	0.5 %	(8.0)	(0.9 %)
Income tax expense	$ 204.1	24.8 %	$ 247.6	31.4 %	$ (43.5)	(6.6 %)

(i) Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. The foreign exchange impact on income taxes includes the gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos which is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate. To hedge its exposure to this cash tax risk, the Company enters into foreign currency derivative contracts, which are measured at fair value each period and any change in fair value is recognized in foreign exchange gain (loss) within the consolidated statements of income. Refer to Note 11, Derivative Instruments for further information.

(ii) Not eligible for Mexican fuel excise tax credit for 2020. See discussion in the Mexico Tax Reform section below.

Mexico Regulatory and Legal Updates

Mexico Tax Reform. In December 2019, the Mexican government enacted changes in the tax law effective January 1, 2020 ("Mexico 2020 Tax Reform"). Mexico 2020 Tax Reform excluded railroads from eligibility for the Mexican fuel excise tax credit. Mexico 2020 Tax Reform also included permanent changes to the Value Added Tax ("VAT") Law, Income Tax Law and Federal Fiscal Code which, among other things, requires certain VAT withholding, limits the deduction of interest expense and certain payments to related parties in preferential tax regimes, adopts a general anti-avoidance rule, requires mandatory disclosure of reportable transactions beginning in 2021, and permanently eliminates universal compensation, which allowed Mexican taxpayers to offset recoverable tax balances against balances due for other federal taxes. As a result of the elimination of universal compensation, the refundable VAT balance increased to $103.1 million as of December 31, 2020. KCSM has a legal opinion supporting its right under Mexican law to recover the refundable VAT balance from the Mexican government and believes the VAT to be fully collectible.

See additional discussion on universal compensation in Liquidity and Capital Resources section below.

Proposed Changes to Law. KCSM currently insources its management and union employees, other than the President and Executive Representative of KCSM, from its affiliate, KCSM Servicios, a wholly-owned and consolidated subsidiary of the Company. On November 12, 2020, the President of Mexico filed an initiative before the Mexican Congress to amend several laws in order to prohibit outsourcing employees to third parties and insourcing employees from related, affiliate services companies. Under the proposed legislation, KCSM Servicios could be prohibited from providing certain outsourced employees to KCSM, resulting in some, if not all KCSM Servicios employees becoming employees of KCSM in order to be in compliance with the legislation. Failure to comply with the new law could result in a loss of tax deductions and VAT credits on third party and related party service payments and penalties. In December 2020, discussions and approval of this legislation were postponed until February 2021. The initiative will have preferential treatment when the Mexican Congress resumes its activities, which requires that action on the proposed legislation must be taken within 30 days. If approved, it is currently expected the changes will be effective immediately upon adoption, however the private sector is lobbying for a longer transition period.

Mexican employees are currently entitled under Mexican law to receive statutory profit sharing (Participacion a los Trabajadores de las Utilidades or "PTU") payments. The required cash payment to employees is equal to 10% of their employer's profit subject to PTU as prescribed by Mexican law, which differs from profit determined under U.S. GAAP.

KCSM Servicios's employees are eligible for PTU and receive PTU payments. KCSM does not have employees eligible for PTU under current law, and this proposed legislation does not change the Mexico PTU requirements. If the proposed legislation were to become law, some or possibly all of KCSM Servicios's employees may need to become employees of KCSM and thus, would be eligible to receive PTU from KCSM. Payment of PTU by KCSM to these employees, as calculated under current law, could have a material adverse effect on the consolidated financial results of the Company. However, the Mexican government may consider, as part of its negotiations with the private sector, limitations on the PTU distribution amount to employees in order to reduce the financial impact. As such, any incremental PTU expense cannot be determined as of the date of this filing due to the uncertainties surrounding this potential legislation.

For a comparison of the Company's results of operations for the fiscal years ended December 31, 2019 to the year ended December 31, 2018, see *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* in the Company's Annual Report on Form 10-K for the year ended December 31, 2019, which was filed with the U.S. Securities and Exchange Commission on January 24, 2020.

LIQUIDITY AND CAPITAL RESOURCES

Overview

On November 10, 2020, the Company announced that its Board of Directors (the "Board") approved updates to its capital allocation policy (the "Policy"). Pursuant to the updated Policy, the Company intends to continue deploying available cash in the following manner:

- Approximately 40-50% to capital projects and strategic investments; and
- Approximately 50-60% to share repurchases and dividends.

In addition, from time to time, the Company also plans to prudently use additional debt to support the revised policy and intends to increase its Debt-to-EBITDA ratio to the mid-2x range, consistent with its current ratings from Standard & Poor's, Fitch and Moody's Ratings.

In connection with this updated Policy, the Board also approved the following actions:

- An increase in the quarterly dividend on KCS's common stock from $0.40 to $0.44 per share. The Board declared a cash dividend on its outstanding common stock for this increased amount payable on January 20, 2021, to stockholders of record at the close of business on December 31, 2020. In April 2021, the Company will implement a quarterly dividend approach that targets a low 20% range payout; and
- A new $3.0 billion share repurchase program (the "2020 Program"), expiring December 31, 2023. This new program replaces the $2.0 billion stock repurchase authorization announced in 2019 (the "2019 Program") under which the Company purchased approximately $1.4 billion of Company stock.

During the fourth quarter of 2020, the Company entered into two accelerated share repurchase ("ASR") agreements under the 2019 Program, and paid $500.0 million. The agreements were settled during January 2021. During 2020, KCS repurchased 143,343 shares of common stock for $27.0 million under the 2020 Program, and 5,207,633 shares of common stock for $869.2 million under the 2019 Program. Refer to Item 8, Financial Statements and Supplementary Data — Note 15, Stockholders' Equity for additional detail on the Company's common share repurchase program and ASR agreements.

During 2020, the Company repurchased 7,426 shares of its $25 par preferred stock for $0.2 million at an average price of $29.58 per share.

During 2020, the Company invested $410.2 million in capital expenditures. See Capital Expenditures section for further details.

On April 22, 2020, the Company issued $550.0 million principal amount of senior unsecured notes due May 1, 2050, which bear interest semiannually at a fixed annual rate of 3.50% (the "3.50% Notes"). The net proceeds from the offering were used for general corporate purposes, including the repurchase of shares of the Company's common stock in the fourth quarter of 2020.

During 2020, the Company made remaining principal payments of approximately $12.0 million in repayment of its 9.311% locomotive financing agreements, which matured in December 2020.

At December 31, 2020, the Company had $444.7 million principal amount outstanding of 3.00% senior notes that mature May 15, 2023 (the "3.00% Notes") and $200.0 million principal amount outstanding of 3.85% senior notes that mature November 15, 2023 (the "3.85% Notes). The Company has the intention and ability to refinance the 3.00% Notes and the 3.85% Notes into a new long-term debt instruments prior to maturity. The Company has executed treasury lock agreements with an aggregate notional value of $650.0 million and a weighted-average interest rate of 1.58% to hedge the U.S. Treasury benchmark interest rate associated with any future interest payments related to the anticipated refinancing of the 3.00% Notes and the 3.85% Notes. See Note 11, Derivative Instruments for further discussion of the treasury lock agreements.

The Company's financing instruments contain restrictive covenants that limit or preclude certain actions; however, the covenants are structured such that the Company expects to have sufficient flexibility to conduct its operations. The Company has been, and expects to continue to be, in compliance with all of its debt covenants.

For discussion regarding the agreements representing the indebtedness of KCS, refer to Note 12, Short-Term Borrowings and Note 13, Long-Term Debt of the consolidated financial statements.

During the first three quarters of 2020, the Company's Board of Directors declared quarterly cash dividends of $0.40 per share or $113.6 million on its common stock. During the last quarter of 2020, the Company's Board of Directors declared a cash dividend of $0.44 per share or $40.1 million on its common stock. Subject to the discretion of the Board of Directors, capital availability and a determination that cash dividends continue to be in the best interest of its stockholders, the Company intends to pay a quarterly dividend on an ongoing basis.

On December 31, 2020, total available liquidity (the cash balance plus revolving credit facility availability) was $788.2 million, compared to available liquidity at December 31, 2019 of $748.8 million.

As of December 31, 2020, the total cash and cash equivalents held outside of the U.S. in foreign subsidiaries was $72.8 million, after repatriating $196.3 million during 2020. The Company expects that this cash will be available to fund company operations without incurring significant additional income taxes.

Beginning January 2019, Mexico tax reform for 2019 eliminated universal compensation that allowed Mexican taxpayers the ability to offset other tax obligations with refundable VAT. Mexico 2020 Tax Reform permanently eliminated universal compensation. This negatively impacted KCSM's cash flow by approximately $43.0 million and $60.0 million in 2020 and 2019, respectively, while awaiting refunds of the value added tax from the Mexican government. As of December 31, 2020, the refundable VAT balance was $103.1 million. KCSM has a legal opinion supporting its right under Mexican law to recover the refundable VAT balance from the Mexican government and believes the VAT to be fully collectible.

Cash Flow Information and Contractual Obligations

Summary cash flow data follows *(in millions):*

	2020	2019
Cash flows provided by (used for):		
Operating activities	$ 1,080.0	$ 1,104.0
Investing activities	(526.0)	(676.3)
Financing activities	(510.3)	(378.9)
Effect of exchange rate changes on cash	(4.3)	(0.5)
Net increase in cash and cash equivalents	39.4	48.3
Cash and cash equivalents beginning of year	148.8	100.5
Cash and cash equivalents end of year	$ 188.2	$ 148.8

During 2020, cash and cash equivalents increased $39.4 million as a result of the impacts discussed below.

Operating Cash Flows. Net cash provided by operating activities decreased $24.0 million for 2020, as compared to 2019, primarily due to increased cash paid to settle foreign currency derivative instruments and an increase in advance Mexican income tax payments, partially offset by payments made for settlement of a treasury lock in 2019.

Investing Cash Flows. Net cash used for investing activities decreased $150.3 million for 2020, as compared to 2019, due to a $175.3 million decrease in capital expenditures and a $29.3 million decrease in investments in and advances to affiliates, partially offset by a $39.2 million increase in expenditures for the purchase or replacement of assets under existing operating leases and a $9.2 million decrease in proceeds from disposal of property. Additional information is included within the Capital Expenditure section of Liquidity and Capital Resources.

Financing Cash Flows. Net cash used for financing activities increased $131.4 million for 2020, as compared to 2019, due to a decrease in proceeds from issuance long-term debt of $301.9 million and an increase in shares repurchased, including under ASR agreements, of $96.4 million, partially offset by a decrease in repayment of long-term debt of $267.0 million.

For a comparison of liquidity and capital resources and the Company's cash flow activities for the fiscal year ended December 31, 2019 and 2018, see *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* in the Company's Annual Report on Form 10-K for the year ended December 31, 2019, which was filed with the U.S. Securities and Exchange Commission on January 24, 2020.

Contractual Obligations. The following table outlines the material obligations and commitments as of December 31, 2020 *(in millions):*

	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More than 5 years
Long-term debt and short-term borrowings (including interest and finance lease obligations) (i)	$ 7,188.3	$ 155.1	$ 947.9	$ 262.9	$ 5,822.4
Operating leases	74.5	26.6	31.1	13.7	3.1
Obligations due to uncertainty in income taxes	2.2	0.6	—	1.6	—
Capital expenditure obligations (ii)	401.1	142.7	258.4	—	—
Other contractual obligations (iii)	444.3	93.4	123.5	103.2	124.2
Total	$ 8,110.4	$ 418.4	$ 1,360.9	$ 381.4	$ 5,949.7

(i) For variable rate obligations, interest payments were calculated using the December 31, 2020 rate. For fixed rate obligations, interest payments were calculated based on the applicable rates and payment dates.

(ii) Capital expenditure obligations include minimum capital expenditures under the KCSM Concession agreement and other regulatory requirements.

(iii) Other contractual obligations include purchase commitments and certain maintenance agreements.

In the normal course of business, the Company enters into long-term contractual commitments for future goods and services needed for the operations of the business. Such commitments are not in excess of expected requirements and are not reasonably likely to result in performance penalties or payments that would have a material adverse effect on the Company's liquidity. Such commitments are not included in the above table.

The SCT requires KCSM to submit a three-year capital expenditures plan every three years. The most recent three-year plan was submitted in 2020 for the years 2021 — 2023. KCSM expects to continue capital spending at current levels in future years and will continue to have capital expenditure obligations past 2023, which are not included in the table above.

Capital Expenditures

KCS has funded, and expects to continue to fund, capital expenditures with operating cash flows and short and long-term debt.

The following table summarizes capital expenditures by type for the years ended December 31, 2020 and 2019, respectively *(in millions):*

	2020	2019
Roadway capital program	$ 239.8	$ 264.9
Locomotives and freight cars	45.2	182.8
Capacity	65.4	84.8
Information technology	40.6	29.8
Positive train control	15.9	15.5
Other	3.3	6.5
Total capital expenditures (accrual basis)	410.2	584.3
Change in capital accruals	1.7	2.9
Total cash capital expenditures	$ 411.9	$ 587.2
Total cash purchase or replacement of assets under operating leases	$ 78.2	$ 39.0

Generally, the Company's capital program consists of capital replacement and equipment. For 2021, internally generated cash flows are expected to fund cash capital expenditures, which are currently estimated to be approximately 17% of revenue in 2021, assuming constant currency and fuel price. In addition, the Company periodically reviews its equipment and property under operating leases. Any additional purchase or replacement of equipment and property under operating leases during 2021 is expected to be funded with internally generated cash flows and/or debt.

Property Statistics

The following table summarizes certain property statistics as of December 31:

	2020	2019
Track miles of rail installed	89	122
Cross ties installed (thousands)	538	627

SUPPLEMENTAL GUARANTOR FINANCIAL INFORMATION

The following is a description of the terms and conditions of the guarantees with respect to senior notes for which KCS is an issuer or provides full and unconditional guarantee.

Note Guarantees

As of December 31, 2020, KCS had outstanding $3,736.2 million principal amount of senior notes due through 2069. The Kansas City Southern Railway Company ("KCSR") had outstanding $2.7 million principal amount of senior notes due through 2045 (together, the "Senior Notes"). The senior notes for which KCS is the issuer are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by each of KCS's current and future domestic consolidated subsidiaries that from time to time guarantees certain of KCS's credit agreements, or any other debt of KCS, or any of KCS's significant subsidiaries that is a guarantor (each, a "Guarantor Subsidiary," and collectively, the "Guarantor Subsidiaries"). In addition, the senior notes for which KCSR is the issuer are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by KCS and each of its current and future domestic consolidated subsidiaries that from time to time guarantees KCSR's credit agreement, or any other debt of KCSR or any of KCSR's significant subsidiaries that is a Guarantor Subsidiary. The obligations of each Guarantor Subsidiary under its note guarantee are limited as necessary to prevent such note guarantee from constituting a fraudulent conveyance under applicable law. A guarantee of the Senior Notes by KCS or a Guarantor Subsidiary is subject to release in the following circumstances: (i) the sale, disposition, exchange or other transfer (including through merger, consolidation, amalgamation or otherwise) of the capital stock of the Guarantor Subsidiary made in a manner not in violation of the indenture; (ii) the designation of the subsidiary as an "Unrestricted Subsidiary" under the indenture; (iii) the legal defeasance or covenant defeasance of the Senior Notes in accordance with the terms of the indenture; or (iv) the Guarantor Subsidiary ceasing to be KCS's subsidiary as a result of any foreclosure of any pledge or security interest securing KCS's Revolving Credit Facility or other exercise of remedies in respect thereof.

KCSM and any other foreign subsidiaries of KCS do not, and will not, guarantee the Senior Notes ("Non-Guarantor Subsidiaries").

The following tables present summarized financial information for KCS and the Guarantor Subsidiaries on a combined basis after intercompany transactions have been eliminated, including adjustments to remove the receivable and payable balances, investment in, and equity in earnings from the Non-Guarantor Subsidiaries.

Summarized Financial Information

Income Statements	**KCS and Guarantor Subsidiaries**	
	Years ended December 31,	
	2020	**2019**
Revenues	$ 1,368.7	$ 1,472.0
Operating expenses	846.9	1,068.5
Operating income	521.8	403.5
Income before income taxes	375.4	291.7
Net income	329.8	235.0

Balance Sheets	**KCS and Guarantor Subsidiaries**	
	December 31, 2020	**December 31, 2019**
Assets:		
Current assets	$ 298.8	$ 332.9
Property and equipment (including concession assets), net	4,751.3	4,596.3
Other non-current assets	110.8	156.9
Liabilities and equity:		
Current liabilities	$ 318.2	$ 313.5
Non-current liabilities	4,841.2	4,267.7
Noncontrolling interest	326.4	323.4

Excluded from current assets in the table above are $183.7 million and $95.2 million of current intercompany receivables due to KCS and the Guarantor Subsidiaries from the Non-Guarantor Subsidiaries as of December 31, 2020 and December 31, 2019, respectively. Excluded from current liabilities in the table above are $235.8 million and $55.0 million of current intercompany payables due to the Non-Guarantor Subsidiaries from KCS and the Guarantor Subsidiaries as of December 31, 2020 and December 31, 2019, respectively.

The Senior Notes are structurally subordinated to the indebtedness and other liabilities of the Non-Guarantor Subsidiaries. The Non-Guarantor Subsidiaries are separate and distinct legal entities and have no obligation, contingent or otherwise, to pay any amounts due pursuant to the Senior Notes or the indentures, or to make any funds available therefor, whether by dividends, loans, distributions or other payments. Any right that KCS or the Guarantor Subsidiaries have to receive any assets of any of the Non-Guarantor Subsidiaries upon the liquidation or reorganization of any Non-Guarantor Subsidiary, and the consequent rights of holders of Senior Notes to realize proceeds from the sale of any of a Non-Guarantor Subsidiary's assets, would be effectively subordinated to the claims of such Non-Guarantor Subsidiary's creditors, including trade creditors and holders of preferred equity interests, if any, of such Non-Guarantor Subsidiary. Accordingly, in the event of a bankruptcy, liquidation or reorganization of any of the Non-Guarantor Subsidiaries, the Non-Guarantor Subsidiaries will pay the holders of their debts, holders of preferred equity interests, if any, and their trade creditors before they will be able to distribute any of their assets to KCS or any Guarantor Subsidiary.

If a Guarantor Subsidiary were to become a debtor in a case under the U.S. Bankruptcy Code or encounter other financial difficulty, under federal or state fraudulent transfer or conveyance law, a court may avoid, subordinate or otherwise decline to enforce its guarantee of the Senior Notes. A court might do so if it is found that when such Guarantor Subsidiary entered into its guarantee of the Senior Notes, or in some states when payments became due under the Senior Notes, such Guarantor Subsidiary received less than reasonably equivalent value or fair consideration and either:

- was insolvent or rendered insolvent by reason of such incurrence;
- was left with unreasonably small or otherwise inadequate capital to conduct its business; or
- believed or reasonably should have believed that it would incur debts beyond its ability to pay.

The court might also avoid the guarantee of the Senior Notes without regard to the above factors, if the court found that a Guarantor Subsidiary entered into its guarantee with actual intent to hinder, delay or defraud its creditors.

A court would likely find that a Guarantor Subsidiary did not receive reasonably equivalent value or fair consideration for its guarantee of the Senior Notes, if such Guarantor Subsidiary did not substantially benefit directly or indirectly from the funding made available by the issuance of the Senior Notes. If a court were to avoid a guarantee of the Senior Notes provided by a Guarantor Subsidiary, holders of the Senior Notes would no longer have any claim against such Guarantor Subsidiary. The measures of insolvency for purposes of these fraudulent transfer or conveyance laws will vary depending upon the law applied in any proceeding to determine whether a fraudulent transfer or conveyance has occurred, such that the Company cannot predict what standards a court would use to determine whether or not a Guarantor Subsidiary was solvent at the relevant time or, regardless of the standard that a court uses, that the guarantee of a Guarantor Subsidiary would not be subordinated to such Guarantor Subsidiary's other debt. As noted above, each guarantee provided by a Guarantor Subsidiary includes a provision intended to limit the Guarantor Subsidiary's liability to the maximum amount that it could incur without causing the incurrence of obligations under its guarantee to be a fraudulent transfer or conveyance. This provision may not be effective to protect those guarantees from being avoided under fraudulent transfer or conveyance law, or it may reduce that Guarantor Subsidiary's obligation to an amount that effectively makes its guarantee worthless, and the Company cannot predict whether a court will ultimately find it to be effective.

On the basis of historical financial information, operating history and other factors, the Company believes that each of the Guarantor Subsidiaries, after giving effect to the issuance of its guarantee of the Senior Notes when such guarantee was issued, was not insolvent, did not have unreasonably small capital for the business in which it engaged and did not and has not incurred debts beyond its ability to pay such debts as they mature. The Company cannot predict, however, as to what standard a court would apply in making these determinations or that a court would agree with the Company's conclusions in this regard.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

KCS's accounting and financial reporting policies are in conformity with U.S. generally accepted accounting principles ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Management believes that the following accounting policies and estimates are critical to an understanding of KCS's historical and future performance. Management has discussed the development and selection of the following critical accounting estimates with the Audit Committee of KCS's Board of Directors and the Audit Committee has reviewed the selection, application and disclosure of the Company's critical accounting policies and estimates.

Capitalization, Depreciation and Amortization of Property and Equipment (including Concession Assets)

Due to the highly capital intensive nature of the railroad industry, capitalization and depreciation of property and equipment are a substantial portion of the Company's consolidated financial statements. Net property and equipment, including concession assets, comprised approximately 90% of the Company's total assets as of December 31, 2020, and related depreciation and amortization comprised approximately 22% of total operating expenses for the year ended December 31, 2020.

KCS capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. The Company has a process in place to determine which costs qualify for capitalization, which requires judgment. Direct costs are charged to capital projects based on the work performed and the material used. Indirect costs are allocated to capital projects as a standard percentage, which is evaluated annually, and applied to direct labor and material costs. Asset removal activities are performed in conjunction with replacement activities; therefore, removal costs are estimated based on a standard percentage of direct labor and indirect costs related to capital replacement projects. For purchased assets, all costs necessary to make the asset ready for its intended use are capitalized. Expenditures that significantly increase asset values, productive capacity, efficiency, safety or extend useful lives are capitalized. Repair and maintenance costs are expensed as incurred.

KCS capitalizes certain costs incurred in connection with developing or obtaining internal-use software. Capitalized software costs are included in "Property and Equipment" on the consolidated balance sheets. Costs incurred during the preliminary project and post-implementation stage, as well as maintenance and training costs, are expensed as incurred.

Property and equipment are carried at cost and are depreciated primarily on the group method of depreciation, which the Company believes closely approximates a straight line basis over the estimated useful lives of the assets measured in years. The group method of depreciation applies a composite rate to classes of similar assets rather than to individual assets. Composite depreciation rates are based upon the Company's estimates of the expected average useful lives of assets as well as expected net salvage value at the end of their useful lives. In developing these estimates, the Company utilizes periodic depreciation studies performed by an independent engineering firm. Depreciation rate studies are performed at least every three years for equipment and at least every six years for road property (rail, ties, ballast, etc.). The depreciation studies take into account factors such as:

- Statistical analysis of historical patterns of use and retirements of each asset class;
- Evaluation of any expected changes in current operations and the outlook for the continued use of the assets;
- Evaluation of technological advances and changes to maintenance practices;
- Historical and expected salvage to be received upon retirement;
- Review of accounting policies and assumptions; and
- Industry precedents and trends.

The depreciation studies may also indicate that the recorded amount of accumulated depreciation is deficient or in excess of the amount indicated by the study. Any such deficiency or excess is amortized as a component of depreciation expense over the remaining useful lives of the affected asset class, as determined by the study. The Company also monitors these factors in non-study years to determine if adjustments should be made to depreciation rates. The Company completed depreciation studies for KCSM in 2020 and KCSR in 2019. The impacts of the studies were immaterial to the consolidated financial results for all periods.

Also under the group method of depreciation, the cost of railroad property and equipment (net of salvage or sales proceeds) retired or replaced in the normal course of business is charged to accumulated depreciation with no gain or loss recognized. Actual historical costs are retired when available, such as with equipment costs. The use of estimates in recognizing the retirement of roadway assets is necessary as it is impractical to track individual, homogeneous network-type assets. Certain types of roadway assets are retired using statistical curves derived from the depreciation studies that indicate the relative distribution of the age of the assets retired. For other roadway assets, historical costs are estimated by deflating current costs using inflation indices and the estimated useful life of the assets as determined by the depreciation studies. The indices applied to the replacement value are selected because they closely correlate with the major costs of the items comprising the roadway assets. Because of the number of estimates inherent in the depreciation and retirement processes and because it is impossible to precisely estimate each of these variables until a group of assets is completely retired, the Company continually monitors the estimated useful lives of its assets and the accumulated depreciation associated with each asset group to ensure the depreciation rates are appropriate.

Estimation of the average useful lives of assets and net salvage values requires management judgment. Estimated average useful lives may vary over time due to changes in physical use, technology, asset strategies and other factors that could have an impact on the retirement experience of the asset classes. Accordingly, changes in the assets' estimated useful lives could significantly impact future periods' depreciation expense. Depreciation and amortization expense for the year ended December 31, 2020 was $357.9 million. If the weighted average useful lives of assets were changed by one year, annual depreciation and amortization expense would change approximately $11.0 million.

Gains or losses on dispositions of land or non-group property and abnormal retirements of railroad property are recognized through income. A retirement of railroad property would be considered abnormal if the retirement meets each of the following conditions: (i) is unusual in nature, (ii) is significant in amount, and (iii) varies significantly from the retirement profile identified through the depreciation studies. KCS recognized $1.3 million and $134.2 million as of December 31, 2020, and 2019, respectively, from asset impairments of certain locomotives and railcars as a result of the implementation of PSR. There were no other significant gains or losses from abnormal retirements of property or equipment for the year ended December 31, 2018. Refer to Note 3, Restructuring Charges of the consolidated financial statements for more information.

Costs incurred by the Company to acquire the Concession rights and related assets, as well as subsequent improvements to the Concession assets, are capitalized and amortized using the group method of depreciation over the lesser of the current expected Concession term, including probable renewal of an additional 50-year term, or the estimated useful lives of the assets and rights. The Company's ongoing evaluation of the useful lives of Concession assets and rights considers the aggregation of the following facts and circumstances:

- The Company's executive management is dedicated to ensuring compliance with the various provisions of the Concession and to maintaining positive relationships with the SCT and other Mexican federal, state, and municipal governmental authorities;
- During the time since the Concession was granted, the relationships between KCSM and the various Mexican governmental authorities have matured and the guidelines for operating under the Concession have become more defined with experience;
- There are no known supportable sanctions or compliance issues that would cause the SCT to revoke the Concession or prevent KCSM from renewing the Concession; and
- KCSM operations are an integral part of the KCS operations strategy, and related investment analyses and operational decisions assume that the Company's cross border rail business operates into perpetuity, and do not assume that Mexico operations terminate at the end of the current Concession term.

Based on the above factors, as of December 31, 2020, the Company continues to believe that it is probable that the Concession will be renewed for an additional 50-year term beyond the current term.

Impairment of long-lived assets

Long-lived assets, including property, plant and equipment, operating lease right-of-use assets and intangible assets with finite lives are reviewed for impairment and written down to fair value when events or circumstances indicate that the carrying amount of a long-lived asset or asset group may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the long-lived assets, the carrying value would be reduced to

the estimated fair value. Future cash flow estimates for an impairment review would be based on the lowest level of identifiable cash flows, which are the Company's U.S. and Mexican operations. During the year ended December 31, 2020, $13.6 million of expense was recognized related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use. Other than the abnormal impairments related to the implementation of Precision Scheduled Railroading ("PSR"), management did not identify any indicators of impairment for the years ended December 31, 2020 and 2019.

Income Taxes

Deferred income taxes represent a net asset or liability of the Company. For financial reporting purposes, management determines the current tax liability, as well as deferred tax assets and liabilities, in accordance with the asset and liability method of accounting for income taxes. The provision for income taxes is the sum of income taxes both currently payable and deferred into the future. Currently payable income taxes represent the liability related to the Company's U.S., state and foreign income tax returns for the current year and anticipated tax payments resulting from income tax audits, while the net deferred tax expense or benefit represents the change in the balance of net deferred tax assets or liabilities as reported on the balance sheet. The changes in deferred tax assets and liabilities are determined based upon the estimated timing of reversal of differences between the carrying amount of assets and liabilities for financial reporting purposes and the basis of assets and liabilities for tax purposes as measured using the currently enacted tax rates that will be in effect at the time these differences are expected to reverse. Additionally, management estimates whether taxable operating income in future periods will be sufficient to fully recognize any deferred tax assets. Valuation allowances are recorded as appropriate to reduce deferred tax assets to the amount considered likely to be realized.

Income tax expense related to Mexican operations has additional complexities such as the impact of exchange rate variations, which can have a significant impact on the effective income tax rate.

Management believes that the assumptions and estimates related to the provision for income taxes are critical to the Company's results of operations. For the year ended December 31, 2020, income tax expense totaled $204.1 million. For every 1% change in the 2020 effective rate, income tax expense would have changed by approximately $8.2 million. For further information on the impact of foreign exchange fluctuation on income taxes, refer to Item 7A, Quantitative and Qualitative Disclosures About Market Risk — Foreign Exchange Sensitivity.

OTHER MATTERS

Litigation. Occasionally, the Company is a party to various legal proceedings, regulatory examinations, investigations, administrative actions, and other legal matters, arising for the most part in the ordinary course of business, incidental to its operations. Included in these proceedings are various tort claims brought by current and former employees for job-related injuries and by third parties for injuries related to railroad operations. KCS aggressively defends these matters and has established liability provisions that management believes are adequate to cover expected costs. The outcome of litigation and other legal matters is always uncertain. KCS believes it has valid defenses to the legal matters currently pending against it, is defending itself vigorously, and has recorded accruals determined in accordance with U.S. GAAP, where appropriate. In making a determination regarding accruals, using available information, KCS evaluates the likelihood of an unfavorable outcome in legal or regulatory proceedings to which it is a party to and records a loss contingency when it is probable a liability has been incurred and the amount of the loss can be reasonably estimated. These subjective determinations are based on the status of such legal or regulatory proceedings, the merits of KCS's defenses and consultation with legal counsel. Actual outcomes of these legal and regulatory proceedings may materially differ from the current estimates. It is possible that resolution of one or more of the legal matters currently pending or threatened could result in losses material to KCS's consolidated results of operations, liquidity or financial condition.

Although it is not possible to predict the outcome of any legal proceeding, in the opinion of the Company's management, other than as described in Note 17, Commitments and Contingencies of the consolidated financial statements, such proceedings and actions should not, individually or in the aggregate, have a material adverse effect on the Company's consolidated financial statements.

Inflation. U.S. GAAP require the use of historical cost, which does not reflect the effects of inflation on the replacement cost of property. Due to the capital intensive nature of KCS's business, the replacement cost of these assets would be significantly higher than the amounts reported under the historical cost basis.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk***

KCS is exposed to certain market risks including interest rate, commodity, and foreign exchange risks and utilizes various financial instruments that have certain inherent market risks. These instruments have been entered into for hedging rather than trading purposes. The following information, together with information included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 8, Financial Statements and Supplementary Data — Note 11, Derivative Instruments, describe the key aspects of certain financial instruments that have market risk to KCS.

The analysis presented below for each of the Company's market risks uses a sensitivity model based on hypothetical changes (increases or decreases) to market risks using defined parameters and assumptions to quantify the potential impacts to the consolidated statements of income. The hypothetical changes to market risks do not represent KCS's view of future market changes. The effect of a change in a particular assumption was calculated without adjusting any other assumptions. These market risks and the potential impacts to the consolidated statements of income for the current year, have not materially fluctuated, individually or in the aggregate from the preceding year; thus only current year information is presented below.

Interest Rate Sensitivity. The Company is subject to interest rate risk associated with its debt. Changes in interest rates impact the fair value of outstanding fixed-rate debt, but there is no impact to current earnings or cash flow. Based upon the borrowing rates available to KCS and its subsidiaries for indebtedness with similar terms and average maturities, the fair value of long-term debt was approximately $4,368.6 million and $3,535.7 million at December 31, 2020 and 2019, respectively, compared with a carrying value of $3,770.8 million and $3,246.0 million at December 31, 2020 and 2019, respectively.

Changes in interest rates may impact the cost of future long-term debt issued by the Company, and as a result, represent interest rate risk to the Company. During 2020, the Company executed six 30-year treasury lock agreements with an aggregate notional value of $650.0 million and a weighted-average interest rate of 1.58%. The purpose of the treasury locks is to hedge the U.S. Treasury benchmark interest rate associated with future interest payments related to the anticipated refinancing of the $444.7 million principal amount of 3.00% senior notes due May 15, 2023 and the $200.0 million principal amount of 3.85% senior notes due November 15, 2023. The Company has designated the treasury locks as cash flow hedges, and for the year ended December 31, 2020, recognized an unrealized gain of $28.1 million, net of tax, in the consolidated statements of comprehensive income. A hypothetical 100 basis points change in the 30-year U.S. Treasury Rate would result in a change in unrealized gain or loss of approximately $147.0 million. Upon settlement in 2023, the unrealized gain or loss in accumulated other comprehensive income will be amortized to interest expense over the life of the future underlying debt issuances.

Alternatively, changes in interest rates do not affect the fair value of variable rate debt, but affect future earnings and cash flows. The Company's floating-rate indebtedness includes commercial paper borrowings, and any outstanding borrowings under revolving credit facilities. At December 31, 2020 and 2019, KCS had no commercial paper or revolving credit facility borrowings outstanding.

Commodity Price Sensitivity. KCS periodically participates in diesel fuel purchase commitments and derivative financial instruments. At December 31, 2020 and 2019, KCS did not have any outstanding fuel derivative financial instruments. The Company also holds fuel inventories for use in operations. These inventories are not material to KCS's overall financial position. Fuel costs are expected to reflect market conditions in 2021; however, fuel costs are unpredictable and subject to a variety of factors outside the Company's control. Assuming annual consumption of 117 million gallons, a hypothetical 10 cent change in the price per gallon of fuel would cause an $11.7 million change in operating expenses. KCS mitigates the impact of increased fuel costs through fuel surcharge revenues from customers; however, in a period of volatile fuel prices or changing customer business mix, changes in fuel expense and fuel surcharge revenue may differ.

Foreign Exchange Sensitivity. KCS's foreign subsidiaries use the U.S. dollar as their functional currency; however, a portion of the foreign subsidiaries' revenues and expenses is denominated in Mexican pesos. Based on the volume of revenue and expense transactions denominated in Mexican pesos, revenue and expense fluctuations have historically offset.

The Company has exposure to fluctuations in the value of the Mexican peso against the U.S. dollar due to its monetary assets and liabilities that are denominated in Mexican pesos. Monetary assets and liabilities include cash, accounts receivable and payable and other items that will convert to cash in the future and are remeasured into dollars using the current exchange rate. The remeasurement and settlement of monetary assets and liabilities is recognized in the consolidated statements of income as foreign exchange gains and losses. At December 31, 2020, the Company had Ps.2,688.8 million of net monetary assets denominated in Mexican pesos, as monetary assets exceeded monetary liabilities.

The following table presents the potential impacts to the consolidated statements of income that would result from a hypothetical change in the exchange rate of one Mexican peso per U.S. dollar at December 31, 2020:

	Hypothetical Change in Exchange Rate	Amount of Gain (Loss)	Affected Line Item in the Consolidated Statements of Income
Net monetary assets denominated in Mexican pesos at December 31, 2020:			
Ps.2,688.8 million	From Ps.19.9 to Ps.20.9	($6.4 million)	Foreign exchange gain (loss)
Ps.2,688.8 million	From Ps.19.9 to Ps.18.9	$7.1 million	Foreign exchange gain (loss)

Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. Most significantly, any gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate.

The following table presents the potential impacts to the effective income tax rate and income tax expense that would result from a hypothetical change in the exchange rate of one Mexican peso at December 31, 2020:

Hypothetical Change in Exchange Rate	Increase (Decrease) in Effective Income Tax Rate	Amount of Expense (Benefit)	Affected Line Item in the Consolidated Statements of Income
From Ps.19.9 to Ps.20.9	(1.3%)	($11.1 million)	Income tax expense (benefit)
From Ps.19.9 to Ps.18.9	1.5%	$12.2 million	Income tax expense (benefit)

The Company has executed derivative instruments to hedge its exposure to fluctuations in the Mexican cash tax obligation due to changes in the value of the Mexican peso against the U.S. dollar. These derivative instruments have historically offset the effects of foreign currency changes on income tax expense (benefit) resulting in minimal impact to net income. There were no outstanding foreign currency forward contracts as of December 31, 2020

During January 2021, the Company entered into several foreign currency forward contracts with an aggregate notional amount of $100.0 million, maturing in January and February of 2021. These contracts obligated the Company to purchase a total of Ps.1,993.5 million at a weighted-average exchange rate of Ps.19.9 to each U.S. dollar. During January 2021, the Company entered into offsetting contracts with an aggregate notional amount of $58.9 million, which matured during January 2021 and obligated the Company to sell a total of Ps.1,195.3 million at a weighted-average exchange rate of Ps.20.3 to each U.S. dollar, resulting in cash paid of $1.1 million. Given the settlement of these contracts during January 2021, the Company believes there was minimal market risk associated with these contracts at December 31, 2020. As of the date of this filing, there were $40.0 million aggregate notional amount of contracts outstanding, which obligate the Company to purchase a total of Ps.798.2 million at a weighted average exchange rate of Ps.20.0 to each U.S. dollar.

The following table presents the potential impacts to the consolidated statements of income that would result from a hypothetical change in the exchange rate of one Mexican peso at maturity date for the foreign currency forward contracts entered into during January 2021 and outstanding as of the date of this filing:

Aggregate notional amount:	Hypothetical Change in Exchange Rate	Amount of Gain (Loss)	Affected Line Item in the Consolidated Statements of Income
$40.0 million	From Ps.20.0 to Ps.21.0	($1.9 million)	Foreign exchange gain (loss)
$40.0 million	From Ps.20.0 to Ps.19.0	$2.1 million	Foreign exchange gain (loss)

The Company has not designated these foreign currency derivative instruments as hedging instruments for accounting purposes. The foreign currency derivative instruments will be measured at fair value each period and any change in fair value will be recognized in foreign exchange gain (loss) within the consolidated statements of income.

Item 8. ***Financial Statements and Supplementary Data***

All schedules are omitted because they are not applicable, are insignificant, or the required information is shown in the consolidated financial statements or notes thereto.

Management's Report on Internal Control over Financial Reporting

The management of Kansas City Southern is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. KCS's internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect material misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, management conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2020, based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control — Integrated Framework (2013)* (commonly referred to as the COSO Framework). Based on its evaluation, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2020, based on the criteria outlined in the COSO Framework.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2020, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which immediately follows this report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Kansas City Southern

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Kansas City Southern and its subsidiaries (the "Company") as of December 31, 2020 and 2019, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2020, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for leases in 2019.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Direct Costs that are Capitalized to Self-Constructed Property and Equipment (including Concession Assets)

As described in Note 2 to the consolidated financial statements, the Company capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. Expenditures that significantly increase asset values, productive capacity, efficiency, safety, or extend useful lives are capitalized. As disclosed by management, direct costs are charged to capital projects based on the work performed and the material used. Management has a process in place to determine which costs qualify for capitalization, which requires judgment. For the year-ended December 31, 2020, the Company capitalized costs of $410.2 million.

The principal considerations for our determination that performing procedures relating to direct costs that are capitalized to self-constructed property and equipment (including concession assets) is a critical audit matter are (i) the significance of direct costs and complexities in self-constructed property and equipment (including concession assets); (ii) the significant judgment by management in determining whether direct costs qualify for capitalization; and (iii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating evidence related to the capitalization of direct costs.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the capitalization of direct costs to self-constructed property and equipment (including concession assets). These procedures also included, among others, selecting a sample of direct costs and (i) obtaining evidence to support the accuracy of capitalized additions to self-constructed properties based on the work performed and the material used and (ii) evaluating whether these costs qualify for capitalization.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements)

Note 1. Description of the Business

Kansas City Southern ("KCS" or the "Company"), a Delaware corporation, is a holding company with principal operations in rail transportation.

The Company is engaged in the freight rail transportation business operating through a single coordinated rail network under one reportable business segment. The Company generates revenues and cash flows by providing its customers with freight delivery services both within its regions, and throughout North America through connections with other Class I rail carriers. KCS's customers conduct business in a number of different industries, including electric-generating utilities, chemical and petroleum products, paper and forest products, agriculture and mineral products, automotive products, and intermodal transportation.

The primary subsidiaries of the Company consist of the following:

- The Kansas City Southern Railway Company ("KCSR"), a wholly-owned consolidated subsidiary. KCSR is a U.S. Class I railroad that services the midwest and southeast regions of the United States;
- Kansas City Southern de México, S.A. de C.V. ("KCSM"), a wholly-owned consolidated subsidiary which operates under the rights granted by the concession acquired from the Mexican government in 1997 (the "Concession") as described below;
- Mexrail, Inc. ("Mexrail"), a wholly-owned consolidated subsidiary; which wholly owns The Texas Mexican Railway Company ("Tex-Mex");
- KCSM Servicios, S.A. de C.V. ("KCSM Servicios"), a wholly-owned consolidated subsidiary which provides employee services to KCSM; and
- Meridian Speedway, LLC ("MSLLC"), a seventy percent-owned consolidated affiliate. MSLLC owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway".

Including equity investments in:

- Panama Canal Railway Company ("PCRC"), a fifty percent-owned unconsolidated affiliate which provides ocean to ocean freight and passenger services along the Panama Canal;
- TFCM, S. de R.L. de C.V. ("TCM"), a forty-five percent-owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V. ("FTVM"), a twenty-five percent-owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and
- PTC-220, LLC ("PTC-220"), a fourteen percent-owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for positive train control.

The KCSM Concession. KCSM holds a concession (the "Concession") from the Mexican government until June 2047 (exclusive service through 2027, subject to certain trackage and haulage rights granted to other concessionaires), which is renewable under certain conditions for additional periods of up to 50 years under the Concession. The Concession is to provide freight transportation services over north-east rail lines which are a primary commercial corridor of the Mexican railroad system. KCSM has the right to use, but does not own, all track and buildings that are necessary for the rail lines' operation. KCSM is required to pay the Mexican government an annual concession duty equal to 1.25% of gross revenues during the Concession period.

Employees and Labor Relations. KCSR participates in industry-wide multi-employer bargaining as a member of the National Carriers' Conference Committee, as well as local bargaining for agreements that are limited to KCSR's property. Approximately 70% of KCSR employees are covered by collective bargaining agreements.

KCSM Servicios union employees are covered by one labor agreement, which was signed on April 16, 2012, between KCSM Servicios and the Sindicato de Trabajadores Ferrocarrileros de la República Mexicana ("Mexican Railroad Union"), and which remains in effect during the period of the Concession, for the purpose of regulating the relationship between the parties. Approximately 79% of KCSM Servicios employees are covered by this labor agreement.

Union labor negotiations have not historically resulted in any strike, boycott, or other disruption in the Company's business operations.

Note 2. Significant Accounting Policies

Principles of Consolidation. The accompanying consolidated financial statements are presented using the accrual basis of accounting and include the Company and its majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Certain prior year amounts have been reclassified to conform to the current year presentation.

The equity method of accounting is used for all entities in which the Company or its subsidiaries have significant influence, but not a controlling interest. The Company evaluates less-than-majority-owned investments for consolidation pursuant to consolidation and variable interest entity guidance. The Company does not have any less-than-majority-owned investments requiring consolidation.

During the first quarter of 2020, the Company adopted Accounting Standards Update ("ASU") 2016-13, "*Financial Instruments - Credit Losses*," which required the Company to measure all expected credit losses for financial instruments held at the reporting date based on historical experience, current conditions, and reasonable supportable forecasts. This replaced the existing incurred loss model and is applicable to the measurement of credit losses on financial assets, including trade receivables. Adoption of the new standard did not have a material impact on the Company's consolidated financial statements.

During the first quarter of 2020, the Company early adopted the SEC's, *Financial Disclosures About Guarantors and Issuers of Guaranteed Securities and Affiliates Whose Securities Collateralize a Registrant's Securities* rules, which simplify the disclosure requirements related to the Company's registered securities under Rule 3-10 of Regulation S-X. The final rule also allows for the simplified disclosure to be included within Management's Discussion and Analysis of Financial Condition and Results of Operations.

Use of Estimates. The accounting and financial reporting policies of the Company conform to accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant items subject to such estimates and assumptions include those related to the recoverability and useful lives of assets and income taxes. Changes in facts and circumstances may result in revised estimates and actual results could differ from those estimates.

Revenue Recognition. The primary performance obligation for the Company is to move customers' freight from an origin to a destination. A performance obligation is created when a customer under a transportation contract or public tariff submits a bill of lading for the transport of goods. The Company recognizes revenue proportionally as a shipment moves from origin to destination, using the distance shipped to measure progress, as the customer simultaneously receives and consumes the benefit over time. Related expenses are recognized as incurred. Revenue associated with in-transit shipments at period end is recognized based on the distance shipped as of the balance sheet date. Payment is received at the time or shortly after the performance obligation is satisfied.

The transaction price is generally in the form of a fixed fee determined at the inception of the transportation contract or the inception of the bill of lading. Certain customer agreements have variable consideration that are based on milestone achievements in the form of rebates, discounts or incentives. The Company makes judgments to determine whether the variable consideration is probable of occurring and should be included in the estimated transaction price at the beginning of the period to apply a more consistent rate throughout the year based on an analysis of historical experience with the customer, forecasted shipments and other economic indicators. The Company adjusts the estimate on a quarterly basis.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Other revenues, including switching, storage, and demurrage are distinct services and are recognized as services are performed or as contractual obligations are fulfilled. The consideration for other revenue is allocated between the separate services based upon the stand-alone transaction price.

Foreign Exchange Gain (Loss). For financial reporting purposes, foreign subsidiaries maintain records in U.S. dollars, which is the functional currency. The dollar is the currency that reflects the economic substance of the underlying events and circumstances relevant to the entity. Monetary assets and liabilities denominated in Mexican pesos ("pesos" or "Ps.") are remeasured into U.S. dollars ("dollars") using current exchange rates. The difference between the exchange rate on the date of the transaction and the exchange rate on the settlement date, or balance sheet date if not settled, is included in the income statement as foreign exchange gain or loss.

Cash Equivalents. Short-term liquid investments with an initial maturity of three months or less are classified as cash and cash equivalents.

Accounts Receivable, net. Accounts receivable are net of an allowance for uncollectible accounts as determined by historical experience and adjusted for economic uncertainties, known trends, and reasonable supportable forecasts. Accounts are charged to the allowance when a customer enters bankruptcy, when an account has been transferred to a collection agent or submitted for legal action, or when a customer is significantly past due and all available means of collection have been exhausted. At December 31, 2020 and 2019, the allowance for estimated credit losses was $7.8 million and $7.0 million, respectively. For the years ended December 31, 2020, 2019 and 2018, bad debt expense was $1.5 million, $0.4 million and $0.3 million, respectively.

Materials and Supplies. Materials and supplies consisting of diesel fuel, items to be used in the maintenance of rolling stock and items to be used in the maintenance or construction of road property are valued at the lower of average cost or net realizable value.

Derivative Instruments. Derivatives are measured at fair value and recorded on the balance sheet as either assets or liabilities. Changes in the fair value of derivatives are recorded either through current earnings or as other comprehensive income, depending on hedge designation. Gains and losses on derivative instruments classified as cash flow hedges are reported in other comprehensive income and are reclassified into earnings in the periods in which earnings are impacted by the variability of the cash flow of the hedged item.

Property and Equipment (including Concession Assets). KCS capitalizes costs for self-constructed additions and improvements to property including direct labor and material, indirect costs, and interest during long-term construction projects. For purchased assets, all costs necessary to make the asset ready for its intended use are capitalized. Expenditures that significantly increase asset values, productive capacity, efficiency, safety or extend useful lives are capitalized. Repair and maintenance costs are expensed as incurred. The Company has a process in place to determine which costs qualify for capitalization, which requires judgment.

KCS capitalizes certain costs incurred with developing or obtaining internal-use software. Costs incurred during the preliminary project and post-implementation stage, as well as maintenance and training costs are expensed as incurred.

Property and equipment are carried at cost and are depreciated primarily on the group method of depreciation, which the Company believes closely approximates a straight line basis over the estimated useful lives of the assets measured in years. The group method of depreciation applies a composite rate to classes of similar assets rather than to individual assets. Composite depreciation rates are based upon the Company's estimates of the expected average useful lives of assets as well as expected net salvage value at the end of their useful lives. In developing these estimates, the Company utilizes periodic depreciation studies performed by an independent engineering firm. Depreciation rate studies are performed at least every three years for equipment and at least every six years for road property (rail, ties, ballast, etc.). The Company completed depreciation studies for KCSM in 2020 and KCSR in 2019. The impacts of the studies were immaterial to the consolidated financial results for all periods.

Under the group method of depreciation, the cost of railroad property and equipment (net of salvage or sales proceeds) retired or replaced in the normal course of business is charged to accumulated depreciation with no gain or loss recognized.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Gains or losses on dispositions of land or non-group property and abnormal retirements of railroad property are recognized through income. A retirement of railroad property would be considered abnormal if the cause of the retirement is unusual in nature, is significant in amount, and varies significantly from the retirement profile identified through the depreciation studies.

Costs incurred by the Company to acquire the Concession rights and related assets, as well as subsequent improvements to the Concession assets, are capitalized and amortized using the group method of depreciation over the lesser of the current expected Concession term, including probable renewal of an additional 50-year term, or the estimated useful lives of the assets and rights.

Impairment of Long-Lived Assets. Long-lived assets, including property and equipment, operating lease right-of-use assets and intangible assets with finite lives are reviewed for impairment and written down to fair value when events or circumstances indicate that the carrying amount of a long-lived asset or asset group may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the long-lived assets, the carrying value would be reduced to the estimated fair value. Future cash flow estimates for an impairment review would be based on the lowest level of identifiable cash flows, which are the Company's U.S. and Mexican operations. During the year ended December 31, 2020, $13.6 million of expense was recognized related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use. Other than the abnormal impairments related to the implementation of Precision Scheduled Railroading ("PSR"), management did not identify any indicators of impairment for the years ended December 31, 2020 and 2019.

Leases. During the first quarter of 2019, the Company adopted ASU No. 2016-02, Leases, also known as Accounting Standard Codification ("ASC") Topic 842. Prior to 2019, the Company accounted for leases under ASC Topic 840, Leases and for the year ended December 31, 2018, had $49.3 million of rental expense under operating leases. The Company leases transportation equipment, as well as office and other operating facilities, under various finance and operating leases. Operating lease right-of-use assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As the implicit rate is not readily determinable in most of the Company's lease agreements, the Company uses its estimated secured incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments. Lease expense is recognized on a straight-line basis over the lease term.

The Company determines if an arrangement is a lease or contains a lease at inception. The Company's leases have remaining lease terms of approximately 1 year to 9 years, which may include the option to extend the lease when it is reasonably certain the Company will exercise that option. The Company does not separately identify lease and nonlease components (i.e. maintenance costs) except for fleet vehicles and real estate. The Company does not have lease agreements with residual value guarantees, sale leaseback terms or material restrictive covenants. Additionally, short-term leases and leases with variable lease costs are immaterial, and the Company does not have any sublease arrangements.

Goodwill. Goodwill represents the excess of the purchase price over the fair value of the net identifiable assets acquired in business combinations. As of December 31, 2020 and 2019, the goodwill balance was $13.2 million, which is included in other assets in the consolidated balance sheets. Goodwill is not amortized, but is reviewed at least annually, or more frequently as indicators warrant, for impairment. An impairment loss would be recognized to the extent that the carrying amount exceeds the reporting units' fair values. The Company performed its annual impairment review for goodwill during the fourth quarter of 2020 and 2019, and concluded there was no impairment.

Investments and Impairment. The Company reviews equity method investments for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may not be recoverable in accordance with generally accepted accounting principles. This determination requires significant judgment. In making this judgment, the Company considers available quantitative and qualitative evidence in evaluating potential impairment of these investments. If it is determined that an indicator of impairment exists, the Company assesses whether the carrying value exceeds the fair value of the asset. If the carrying value of the investment exceeds its fair value, the Company will evaluate, among other factors, general market conditions, the duration and extent to which the carrying value is greater than the fair value, and KCS's intent and ability to hold, or plans to sell, the investment. The Company also considers specific adverse conditions related to the financial health of and business outlook for the investee, including industry and sector performance, changes in technology, and operational and financing cash flow factors. Once a decline in fair value is determined to be other-than-temporary, an

impairment charge will be recorded and a new carrying basis in the investment will be established. No impairment charges were recognized during the years ended December 31, 2020 and 2019.

Fair Value of Financial Instruments. Non-financial assets and liabilities are recognized at fair value on a nonrecurring basis. These assets and liabilities are measured at fair value on an ongoing basis but are subject to recognition in the financial statements only in certain circumstances. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company determines the fair values of its financial instruments based on the fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy is broken down into three levels based upon the observability of inputs. Fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value in its entirety requires judgment and considers factors specific to the asset or liability.

Environmental Liabilities. The Company recognizes liabilities for remediation and restoration costs when the Company's obligation is probable and the costs can be reasonably estimated. Costs of future expenditures for environmental remediation and restoration are not discounted to their present value. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable. Costs of ongoing compliance activities related to current operations are expensed as incurred.

Personal Injury Claims. Personal injury claims in excess of self-insurance levels are insured up to certain coverage amounts, depending on the type of claim and year of occurrence. The Company's personal injury liability is based on actuarial studies performed on an undiscounted basis by an independent third party actuarial firm and reviewed by management. The liability is based on claims filed and an estimate of claims incurred but not yet reported. Adjustments to the liability are reflected as operating expenses in the period in which the adjustments are known. Legal fees related to personal injury claims are recognized in operating expense in the period incurred.

Health and Welfare and Postemployment Benefits. The Company provides certain medical, life and other postemployment benefits to certain active employees and retirees. The Company uses actuaries to assist management in measuring the benefit obligation and cost based on the current plan provisions, employee demographics, and assumptions about financial and demographic factors affecting the probability, timing and amount of expected future benefit payments. Significant assumptions include the discount rate, rate of increase in compensation levels, and the health care cost trend rate. Actuarial gains and losses determined at the measurement date (December 31) are recognized immediately in the consolidated statements of income.

Share-Based Compensation. The Company accounts for all share-based compensation in accordance with fair value recognition provisions. Under this method, compensation expense is measured at grant date fair value and is recognized over the requisite service period in which the award is earned. Forfeitures are recognized as they occur. The Company issues treasury stock to settle share-based awards.

Income Taxes. Deferred income tax effects of transactions reported in different periods for financial reporting and income tax return purposes are recognized under the asset and liability method of accounting for income taxes. This method gives consideration to the future tax consequences of the deferred income tax items and immediately recognizes changes in income tax laws in the year of enactment.

The Company has recognized a deferred tax asset, net of a valuation allowance, for net operating loss and tax credit carryovers. The Company projects sufficient future taxable income to realize the deferred tax asset recorded less the valuation

allowance. These projections take into consideration assumptions about future income, future capital expenditures and inflation rates. If assumptions or actual conditions change, the deferred tax asset, net of the valuation allowance, will be adjusted to properly reflect the expected tax benefit.

Treasury Stock. The excess of repurchase price over par value of shares held in treasury is allocated between additional paid-in capital and retained earnings.

Note 3. Restructuring Charges

COVID-19. In March 2020, the World Health Organization categorized Coronavirus Disease 2019 ("COVID-19") as a pandemic, and the President of the United States declared the COVID-19 outbreak a national emergency. The U.S. and Mexico governments have deemed rail transportation as "critical infrastructure" providing essential services during this global emergency. As a provider of critical infrastructure, Kansas City Southern has an obligation to keep employees working and freight moving. KCS remains focused on protecting the health and well-being of its employees and the communities in which it operates while assuring the continuity of its business operations.

On March 27, 2020, the U.S. government enacted the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") which includes modifications to the limitation on business interest expense and net operating loss provisions, and provides a payment delay of employer payroll taxes during 2020 after the date of enactment. Payments of approximately $11.0 million of employer payroll taxes otherwise due in 2020, were delayed with 50% due by December 31, 2021 and the remaining 50% by December 31, 2022. The CARES Act did not have a material impact on the Company's consolidated financial statements.

The Company began to experience the impacts of COVID-19 on customer demand in late March 2020. Volumes significantly declined in the second quarter of 2020; however, by early June volumes began to rapidly rebound. For the year ended December 31, 2020, revenues declined 8%, as compared to the same period in 2019, primarily due to lower volumes as a result of COVID-19 and service interruptions at Lazaro Cardenas due to KCSM right-of-way blockages from teachers' protests, lower fuel surcharge due to lower fuel prices and the weakening of the Mexican peso against the U.S dollar.

As revenues declined in the second quarter of 2020, the Company responded quickly and implemented a variety of cost-saving measures and accelerated PSR initiatives by further consolidating trains, which increased train length and reduced crew costs. In June of 2020, the Company offered a voluntary separation program, which resulted in a restructuring charge of $9.7 million for the year ended December 31, 2020, consisting of severance and benefit costs that will be paid out in either lump-sum payments or incrementally over a six to twelve-month period. Approximately 6% of management employees were irrevocably accepted into the voluntary separation program.

PSR. During 2019, the Company began implementing principles of PSR, which focus on providing reliable customer service, facilitating growth, improving asset utilization, and improving the cost profile of the Company. As a result of the PSR initiatives in 2019, management approved four separate restructuring plans that totaled $168.8 million. The restructuring plans were substantially completed in 2019.

During 2020, the Company recognized approximately $7.3 million in additional restructuring charges related to PSR. During the first quarter of 2020, the Company purchased 91 locomotives for $78.2 million that were part of two existing leases. Of the 91 locomotives, 13 were impaired during the fourth quarter of 2019. The purchase of the impaired lease locomotives resulted in $6.0 million of make-whole payments recognized as incremental restructuring charges in the first quarter of 2020. During the second quarter of 2020, the Company recognized approximately $1.3 million of restructuring charges from the disposal of held for sale equipment.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Expenses related to PSR initiatives and the voluntary separation program are shown in the following table (*in millions*):

	Years ended	
	December 31, 2020	December 31, 2019
Restructuring charges:		
Asset impairments	$ 7.3	$ 157.8
Workforce reduction	9.7	7.0
Contract restructuring	—	4.0
Total restructuring charges	$ 17.0	$ 168.8

Asset Impairments. During 2019, the Company committed to plans to dispose of certain locomotives and freight cars to increase operational fluidity, reduce maintenance expense, and improve labor and fuel efficiency. Accordingly, the Company performed an impairment analysis to adjust the carrying amount of each asset to the lower of its depreciated book value or its estimated fair value, less costs to dispose, and stopped recognizing depreciation expense. Additionally, the Company wrote-off parts inventory associated with the locomotive and freight car models that were disposed. During 2020, the purchase of impaired lease locomotives resulted in make-whole payments recognized as incremental restructuring charges.

Workforce Reduction. The Company recognized severance costs associated with the voluntary separation program and PSR initiatives which focused on improving the cost profile of the Company.

Contract Restructuring. The Company terminated certain third-party vendor contracts in order to drive operational efficiencies, which resulted in contract termination penalties.

Note 4. Leases

Leases	Classification	December 31, 2020	December 31, 2019

Total Revenues	$ 2,632.6	$ 2,866.0	$ 2,714.0

Major customers

No individual customer makes up greater than 10% of total consolidated revenues.

Contract Balances

The amount of revenue recognized in 2020 from performance obligations partially satisfied in the previous year was $17.7 million. The performance obligations that were unsatisfied or partially satisfied as of December 31, 2020, were $28.0 million, which represents in-transit shipments that are fully satisfied the following month.

A receivable is any unconditional right to consideration, and is recognized as shipments have been completed and the relating performance obligation has been fully satisfied. At December 31, 2020 and 2019, the accounts receivable, net balance

was $247.1 million and $274.2 million, respectively. Contract assets represent a conditional right to consideration in exchange for goods or services. The Company did not have any contract assets at December 31, 2020 and 2019.

Contract liabilities represent consideration received in advance from customers, and are recognized as revenue over time as the relating performance obligation is satisfied. The amount of revenue recognized in 2020 that was included in the opening contract liability balance was $30.2 million. The Company has recognized contract liabilities within the accounts payable and accrued liabilities financial statement caption on the balance sheet. These are considered current liabilities as they will be settled in less than 12 months.

The following tables summarize the changes in contract liabilities *(in millions)*:

Contract liabilities	**Years ended December 31,**	
	2020	**2019**
Beginning balance	$ 30.5	$ 32.4
Revenue recognized that was included in the contract liability balance at the beginning of the period	(30.2)	(32.4)
Increases due to consideration received, excluding amounts recognized as revenue during the period	29.6	30.5
Ending balance	$ 29.9	$ 30.5

Note 6. Hurricane Harvey

In late August 2017, Hurricane Harvey made landfall on the Texas coast and caused flood damage to the Company's track infrastructure and significantly disrupted the Company's rail service. The Company filed a claim in the fourth quarter of 2017 under its insurance program for property damage, incremental expenses, and lost profits caused by Hurricane Harvey. In the third quarter of 2017, the Company recognized a receivable for probable insurance recovery offsetting the impact of incremental expenses recognized in the quarter. During 2018, the Company partially settled its insurance claim for $35.5 million. As a result of the nonrefundable partial settlement, the Company recognized gain on insurance recoveries of $17.9 million, net of the self-insured retention and insurance receivable. The Company received the nonrefundable cash proceeds of $25.5 million from the partial settlement in the fourth quarter of 2018. Final settlement of the insurance claim is dependent upon costs incurred with an ongoing bridge construction project expected to be completed in 2021 and will be immaterial to the consolidated financial statements.

Note 7. Earnings Per Share

Basic earnings per common share is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share adjusts basic earnings per common share for the effects of potentially dilutive common shares, if the effect is not anti-dilutive. Potentially dilutive common shares include the dilutive effects of shares issuable under the 2008 and 2017 Equity Incentive Plans and shares issuable upon the conversion of preferred stock to common stock.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

The following table reconciles the basic earnings per share computation to the diluted earnings per share computation *(in millions, except share and per share amounts)*:

	2020	2019	2018
Net income available to common stockholders for purposes of computing basic and diluted earnings per share	$ 616.8	$ 538.7	$ 627.2
Weighted-average number of shares outstanding *(in thousands)*:			
Basic shares	93,826	99,316	101,852
Effect of dilution	489	431	418
Diluted shares	94,315	99,747	102,270
Earnings per share:			
Basic earnings per share	$ 6.57	$ 5.42	$ 6.16
Diluted earnings per share	$ 6.54	$ 5.40	$ 6.13

Potentially dilutive shares excluded from the calculation (*in thousands*):	2020	2019	2018
Stock options excluded as their inclusion would be anti-dilutive	75	121	117

Note 8. Property and Equipment (including Concession Assets)

The following tables list the major categories of property and equipment, including Concession assets, as well as the weighted-average composite depreciation rate for each category (*in millions*):

As of December 31, 2020	Cost	Accumulated Depreciation	Net Book Value	Depreciation Rates for 2020
Land	$ 227.5	$ —	$ 227.5	N/A
Concession land rights	141.1	(30.8)	110.3	1.0 %
Rail and other track material	2,147.5	(389.8)	1,757.7	1.8-3.2%
Ties	1,753.5	(420.2)	1,333.3	1.4-5.0%
Grading	998.5	(190.0)	808.5	1.0 %
Bridges and tunnels	858.5	(171.3)	687.2	1.3 %
Ballast	867.4	(245.3)	622.1	2.2-4.7%
Other (a)	1,549.0	(477.6)	1,071.4	2.7 %
Total road property	8,174.4	(1,894.2)	6,280.2	2.6 %
Locomotives	1,713.6	(478.7)	1,234.9	4.8 %
Freight cars	970.4	(210.6)	759.8	2.2 %
Other equipment	80.6	(36.6)	44.0	4.5 %
Total equipment	2,764.6	(725.9)	2,038.7	3.9 %
Technology and other	372.6	(253.4)	119.2	18.7 %
Construction in progress	221.9	—	221.9	N/A
Total property and equipment (including Concession assets)	$ 11,902.1	$ (2,904.3)	$ 8,997.8	N/A

(a) Other includes signals, buildings and other road assets.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

As of December 31, 2019	Cost	Accumulated Depreciation	Net Book Value	Depreciation Rates for 2019
Land	$ 224.9	$ —	$ 224.9	N/A
Concession land rights	141.1	(29.4)	111.7	1.0 %
Rail and other track material	2,122.9	(373.3)	1,749.6	1.8-3.2%
Ties	1,738.4	(405.7)	1,332.7	1.4-5.0%
Grading	991.5	(179.4)	812.1	1.1 %
Bridges and tunnels	823.8	(163.0)	660.8	1.2 %
Ballast	835.6	(236.4)	599.2	2.2-4.7%
Other (a)	1,449.9	(438.5)	1,011.4	3.0 %
Total road property	7,962.1	(1,796.3)	6,165.8	2.8 %
Locomotives	1,593.9	(429.7)	1,164.2	5.2 %
Freight cars	980.8	(196.6)	784.2	2.4 %
Other equipment	77.9	(30.4)	47.5	4.5 %
Total equipment	2,652.6	(656.7)	1,995.9	4.1 %
Technology and other	345.1	(207.3)	137.8	16.3 %
Construction in progress	170.2	—	170.2	N/A
Total property and equipment (including Concession assets)	$ 11,496.0	$ (2,689.7)	$ 8,806.3	N/A

(a) Other includes signals, buildings and other road assets.

Concession assets, net of accumulated amortization of $709.7 million and $678.1 million, totaled $2,383.5 million and $2,335.5 million at December 31, 2020 and 2019, respectively.

Depreciation and amortization of property and equipment (including Concession assets) totaled $357.9 million, $350.7 million and $346.7 million, for 2020, 2019, and 2018, respectively.

In the fourth quarter of 2020, $13.6 million of expense was recognized related to costs previously capitalized for the development of internal-use software. The development of the software was cancelled prior to completion and had no further use. The expense was recognized in write-off of software development costs in the consolidated statements of income.

Note 9. Other Balance Sheet Captions

Other Current Assets. Other current assets included the following items at December 31 *(in millions):*

	2020	2019
Refundable Mexican value added tax	$ —	$ 60.2
Prepaid income taxes	15.8	0.3
Advances to affiliates	9.2	47.3
Prepaid expenses	23.3	21.0
Property held for sale	3.6	11.3
Other	11.4	14.9
Other current assets	$ 63.3	$ 155.0

Accounts Payable and Accrued Liabilities. Accounts payable and accrued liabilities included the following items at December 31 *(in millions):*

	2020	2019
Accounts payable	$ 174.6	$ 157.1
Income and other taxes	27.3	34.4
Accrued wages and vacation	82.4	79.0
Short-term operating lease liability	24.6	45.4
Derailments, personal injury and other claim provisions	39.0	38.5
Dividends payable	40.2	38.7
Contract liabilities	29.9	30.5
Interest payable	26.2	23.1
Other	25.8	26.6
Accounts payable and accrued liabilities	$ 470.0	$ 473.3

Note 10. Fair Value Measurements

The Company's assets and liabilities recognized at fair value have been categorized based upon a fair value hierarchy as described in Note 2, Significant Accounting Policies. As of December 31, 2020, the Company's derivative financial instruments are measured at fair value on a recurring basis and consist of foreign currency forward and option contracts and treasury lock agreements, which are classified as Level 2 valuations. The Company determines the fair value of its derivative financial instrument positions based upon pricing models using inputs observed from actively quoted markets and also takes into consideration the contract terms as well as other inputs, including market currency exchange rates and in the case of option contracts, volatility, the risk-free interest rate and the time to expiration.

The Company's short-term financial instruments include cash and cash equivalents, accounts receivable, accounts payable and short-term borrowings. The carrying value of the short-term financial instruments approximates their fair value.

The fair value of the Company's debt is estimated using quoted market prices when available. When quoted market prices are not available, fair value is estimated based on current market interest rates for debt with similar maturities and credit quality. The carrying value of the Company's debt was $3,770.8 million and $3,246.0 million at December 31, 2020 and 2019, respectively. If the Company's debt were measured at fair value, the fair value measurements of the individual debt instruments would have been classified as Level 2 in the fair value hierarchy.

The fair value of the Company's financial instruments is presented in the following table *(in millions)*:

	December 31, 2020	December 31, 2019
	Level 2	Level 2
Assets		
Foreign currency derivative instruments	$ —	$ 2.5
Treasury lock agreements	35.6	—
Liabilities		
Debt instruments	4,368.6	3,535.7

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Note 11. Derivative Instruments

The Company enters into derivative transactions in certain situations based on management's assessment of current market conditions and perceived risks. Management intends to respond to evolving business and market conditions and in doing so, may enter into such transactions as deemed appropriate.

Credit Risk. As a result of the use of derivative instruments, the Company is exposed to counterparty credit risk. The Company manages this risk by limiting its counterparties to large financial institutions which meet the Company's credit rating standards and have an established banking relationship with the Company. As of December 31, 2020, the Company did not expect any losses as a result of default of its counterparties.

Interest Rate Derivative Instruments. During 2020, the Company executed six 30-year treasury lock agreements with an aggregate notional value of $650.0 million and a weighted-average interest rate of 1.58%. The purpose of the treasury locks is to hedge the U.S. Treasury benchmark interest rate associated with future interest payments related to the anticipated refinancing of the $444.7 million principal amount of 3.00% senior notes due May 15, 2023 (the "3.00% Senior Notes") and the $200.0 million principal amount of 3.85% senior notes due November 15, 2023 (the "3.85% Senior Notes"). The Company has designated the treasury locks as cash flow hedges and recorded unrealized gains and losses in accumulated other comprehensive income (loss). Upon settlement, the unrealized gain or loss in accumulated other comprehensive income (loss) will be amortized to interest expense over the life of the future underlying debt issuances.

In May 2017, the Company executed four treasury lock agreements with an aggregate notional value of $275.0 million and a weighted-average interest rate of 2.85%. The purpose of the treasury locks was to hedge the U.S. Treasury benchmark interest rate associated with future interest payments related to the anticipated refinancing of the $275.0 million, 2.35% senior notes due May 15, 2020 (the "2.35% Senior Notes"). The Company designated the treasury locks as cash flow hedges and recorded unrealized gains and losses in accumulated other comprehensive income (loss). During the fourth quarter of 2019, KCS issued $425.0 million principal amount of 2.875% senior notes due November 15, 2029 (the "2.875% Senior Notes"), effectively completing the refinancing of the 2.35% Senior Notes, and settled the treasury lock agreements, resulting in cash paid of $25.8 million. This amount was included in accumulated other comprehensive income (loss) and is being amortized to interest expense over the life of the new 2.875% Senior Notes, increasing the effective interest rate on the notes to 3.60%. The settlement and amortization associated with treasury lock agreements are classified as operating activities within the consolidated statements of cash flows.

Foreign Currency Derivative Instruments. The Company's Mexican subsidiaries have net U.S. dollar-denominated monetary liabilities which, for Mexican income tax purposes, are subject to periodic revaluation based on changes in the value of the Mexican peso against the U.S. dollar. This revaluation creates fluctuations in the Company's Mexican income tax expense and the amount of income taxes paid in Mexico. The Company hedges its exposure to this cash tax risk by entering into foreign currency forward contracts and foreign currency option contracts known as zero-cost collars.

The foreign currency forward contracts involve the Company's purchase of Mexican pesos and/or U.S. dollars at an agreed-upon weighted-average exchange rate to each U.S dollar or Mexican Peso. The zero-cost collars involve the Company's purchase of a Mexican peso call option and a simultaneous sale of a Mexican peso put option, with equivalent U.S. dollar notional amounts for each option and no net cash premium paid by the Company.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Below is a summary of the Company's 2020, 2019 and 2018 foreign currency derivative contracts *(amounts in millions, except Ps./USD)*:

Foreign currency forward contracts

	Contracts to sell Ps./receive USD			Offsetting contracts to purchase Ps./pay USD			
	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Cash received/(paid) on settlement
Contracts executed in 2020 and settled in 2020	$ 75.0	Ps. 1,555.5	Ps. 20.7	$ 78.0	Ps. 1,555.5	Ps. 20.0	$ (2.9)

	Contracts to purchase Ps./pay USD			Offsetting contracts to sell Ps./receive USD			
	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Notional amount	Notional amount	Weighted-average exchange rate *(in Ps./USD)*	Cash received/(paid) on settlement
Contracts executed in 2020 and settled in 2020	$ 555.0	Ps. 11,254.3	Ps. 20.3	$ 534.3	Ps. 11,254.3	Ps. 21.1	$ (20.7)
Contracts executed in 2019 and settled in 2020	$ 105.0	Ps. 2,041.2	Ps. 19.4	$ 108.6	Ps. 2,041.2	Ps. 18.8	$ 3.6
Contracts executed in 2019 and settled in 2019	$ 400.0	Ps. 7,892.5	Ps. 19.7	$ 410.7	Ps. 7,892.5	Ps. 19.2	$ 10.7
Contracts executed in 2018 and settled in 2019	$ 20.0	Ps. 410.9	Ps. 20.5	$ 20.9	Ps. 410.9	Ps. 19.6	$ 0.9

Foreign currency zero-cost collar contracts

	Notional amount	Cash received/(paid) on settlement
Contracts executed in 2018 and settled in 2019	$ 120.0	$ 0.3
Contracts executed in 2018 and settled in 2018	$ 220.0	$ 3.9
Contracts executed in 2017 and settled in 2018	$ 80.0	$ 10.0

The Company has not designated any of the foreign currency derivative contracts as hedging instruments for accounting purposes. The Company measures the foreign currency derivative contracts at fair value each period and recognizes any change in fair value in foreign exchange gain (loss) within the consolidated statements of income. The cash flows associated with these instruments is classified as an operating activity within the consolidated statements of cash flows.

Offsetting. The Company's treasury lock agreements and foreign currency forward and zero-cost collar contracts are executed with counterparties in the U.S. and are governed by an International Swaps and Derivatives Association agreement that includes standard netting arrangements. Asset and liability positions from contracts with the same counterparty are net settled upon maturity/expiration and presented on a net basis in the consolidated balance sheets prior to settlement. There was no offsetting of derivative assets or liabilities in the consolidated balance sheets as of December 31, 2020 and 2019.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

The following table presents the fair value of derivative instruments included in the consolidated balance sheets at December 31 *(in millions)*:

		Derivative Assets	
	Balance Sheet Location	2020	2019
Derivatives designated as hedging instruments:			
Treasury lock agreements	Other assets	$ 35.6	$ —
Total derivatives designated as hedging instruments		35.6	—
Derivatives not designated as hedging instruments:			
Foreign currency forward contracts	Other current assets	—	2.5
Total derivatives not designated as hedging instruments		—	2.5
Total derivative assets		$ 35.6	$ 2.5

The following tables present the effects of derivative instruments on the consolidated statements of income and consolidated statements of comprehensive income for the years ended December 31 *(in millions)*:

Derivatives in Cash Flow Hedging Relationships	Amount of Gain/(Loss) Recognized in OCI on Derivative			Location of Gain/(Loss) Reclassified from AOCI into Income	Amount of Gain/(Loss) Reclassified from AOCI into Income		
	2020	2019	2018		2020	2019	2018
Treasury lock agreements	$ 35.6	$ (23.8)	$ 3.6	Interest expense	$ (2.4)	$ (0.2)	$ —
Total	$ 35.6	$ (23.8)	$ 3.6		$ (2.4)	$ (0.2)	$ —

		2020	2019	2018
Foreign currency forward contracts	Foreign exchange gain (loss)	$ (22.5)	$ 14.1	$ —
Foreign currency zero-cost collar contracts	Foreign exchange gain (loss)	—	—	6.3
Total		$ (22.5)	$ 14.1	$ 6.3

See Note 10, Fair Value Measurements, for the determination of the fair values of derivatives.

Note 12. Short-Term Borrowings

Commercial Paper. The Company's commercial paper program generally serves as the primary means of short-term funding. As of December 31, 2020, and 2019, KCS had no commercial paper outstanding. For the years ended December 31, 2020, 2019 and 2018, commercial paper borrowings were outstanding for less than 90 days and the related activity is presented on a net basis in the consolidated statements of cash flows.

Revolving Credit Facility

KCS, with certain of its domestic subsidiaries named therein as guarantors, has a $600.0 million senior unsecured revolving credit facility (the "Revolving Credit Facility"), with a $25.0 million standby letter of credit facility which, if utilized, constitutes usage under the Revolving Credit Facility. The Revolving Credit Facility serves as a backstop for KCS's commercial paper program (the "Commercial Paper Program") which generally serves as the Company's primary means of short-term funding.

Borrowings under the Revolving Credit Facility bear interest at floating rates. Depending on the Company's credit rating, the margin that KCS would pay above the London Interbank Offered Rate ("LIBOR") at any point is between 1.000% and 1.750%. As of December 31, 2020, the margin was 1.25% based on KCS's current credit rating.

The Revolving Credit Facility is guaranteed by KCSR, together with certain domestic subsidiaries named therein as guarantors and matures on March 8, 2024. The Revolving Credit Facility agreement contains representations, warranties, covenants and events of default that are customary for credit agreements of this type. The occurrence of an event of default could result in the termination of the commitments and the acceleration of the repayment of any outstanding principal balance on the Revolving Credit Facility and the Commercial Paper Program.

As of December 31, 2020 and 2019, KCS had no outstanding borrowings under the revolving credit facility.

Senior Notes

The Company's senior notes include certain covenants that are customary for these types of debt instruments issued by borrowers with similar credit ratings.

The KCS notes are KCS's general unsecured senior obligations and are unconditionally guaranteed, jointly and severally, on an unsecured senior basis by each current and future domestic subsidiary of KCS that from time to time guarantees the Revolving Credit Facility or any other debt of KCS or any of KCS's significant subsidiaries that is a guarantor (collectively, the "Note Guarantors").

KCSR's senior notes are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by KCS and each current and future domestic subsidiary of KCS that guarantees the Revolving Credit Facility or certain other debt of KCS or a note guarantor. KCSR's senior notes and the note guarantees rank pari passu in right of payment with KCSR's, KCS's and the Note Guarantors' existing and future unsecured, unsubordinated obligations.

KCSM's senior notes are denominated in U.S. dollars; are unsecured, unsubordinated obligations; rank pari passu in right of payment with KCSM's existing and future unsecured, unsubordinated obligations and are senior in right of payment to KCSM's future subordinated indebtedness.

Senior notes are redeemable at the issuer's option, in whole or in part, at any time, by paying the greater of either 100% of the principal amount to be redeemed and a formula price based on interest rates prevailing at the time of redemption and time remaining to maturity, plus, in each case, accrued interest thereon to, but excluding the redemption date. In addition, KCSM senior notes are redeemable, in whole but not in part, at KCSM's option at any time at a redemption price of 100% of their principal amount, plus any accrued unpaid interest in the event of certain changes in the Mexican withholding tax rate.

On April 22, 2020, KCS issued $550.0 million principal amount of senior unsecured notes due May 1, 2050 (the "3.50% Senior Notes"), which bear interest semiannually at a fixed annual rate of 3.50%. The 3.50% Senior Notes were issued at a discount to par value, resulting in a $4.4 million discount and a yield to maturity of 3.543%. The net proceeds from the offering were used for general corporate purposes, including to repurchase shares of KCS's common stock.

RRIF Loan Agreements

The following loans were made under the Railroad Rehabilitation and Improvement Financing ("RRIF") Program administered by the Federal Railroad Administration ("FRA"):

KCSR RRIF Loan Agreement. On February 21, 2012, KCSR entered into an agreement with the FRA to borrow $54.6 million to be used to reimburse KCSR for a portion of the purchase price of thirty new locomotives (the "Locomotives") acquired by KCSR in the fourth quarter of 2011. The loan bears interest at 2.96% annually and the principal balance amortizes quarterly with a final maturity of February 24, 2037. The obligations under the financing agreement are secured by a first priority security interest in the Locomotives and certain related rights. In addition, the Company has agreed to guarantee repayment of the amounts due under the financing agreement and certain related agreements. The occurrence of an event of default could result in the acceleration of the repayment of any outstanding principal balance of the loan.

Tex-Mex RRIF Loan Agreement. On June 28, 2005, Tex-Mex entered into an agreement with the FRA to borrow $50.0 million to be used for infrastructure improvements in order to accommodate growing freight rail traffic related to the NAFTA corridor. The loan bears interest at 4.29% annually and the principal balance amortizes quarterly with a final maturity of July 13, 2030. The loan is guaranteed by Mexrail, which has issued a pledge agreement in favor of the lender equal to the gross revenues earned by Mexrail on per-car fees on traffic crossing the International Rail Bridge in Laredo, Texas. In addition, the Company has agreed to guarantee the scheduled principal payment installments due to the FRA from Tex-Mex under the loan agreement on a rolling five-year basis.

Locomotive Financing Agreements

During 2011, KCSM entered into financing agreements totaling $91.0 million to purchase locomotives. The agreements matured and final payment was made during December 2020. Prior to repayment, the financing agreements were payable on a quarterly basis and contained annual interest rates of 9.311%.

Debt Covenants Compliance

The Company was in compliance with all of its debt covenants as of December 31, 2020.

Other Debt Provisions

Certain loan agreements and debt instruments entered into or guaranteed by the Company and its subsidiaries provide for default in the event of a specified change in control of the Company or particular subsidiaries of the Company.

Debt Maturities

Minimum annual payments for debt maturities are as follows *(in millions)*:

Years	Long-Term Debt	Net Present Value Finance Leases	Total
2021	$ 4.1	$ 2.3	$ 6.4
2022	4.3	2.5	6.8
2023	649.2	2.4	651.6
2024	4.7	0.3	5.0
2025	5.1	—	5.1
Thereafter	3,143.5	—	3,143.5
Total	$ 3,810.9	$ 7.5	$ 3,818.4

Note 14. Income Taxes

Current income tax expense represents the amounts expected to be reported on the Company's income tax returns, and deferred tax expense or benefit represents the change in net deferred tax assets and liabilities. Deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities as measured by the enacted tax rates that will be in effect when these differences reverse. Valuation allowances are recorded as appropriate to reduce deferred tax assets to the amount considered likely to be realized.

Mexican Fuel Excise Tax Credit. Fuel purchases in Mexico are subject to an excise tax that is included in the price of fuel. Through April 29, 2019, the Company was eligible for a credit for the excise tax included in the price of fuel that is purchased and consumed in locomotives and certain work equipment in Mexico. For year 2018, the Mexican fuel excise tax credit ("IEPS credit") was utilized and realized through the offset of the total annual Mexico income tax liability and income tax withholding payment obligations of KCSM, with no carryforward to future periods and recognized as a benefit in operating expenses on the consolidated statements of income.

In December 2018, the Mexican government enacted changes in the tax law effective January 1, 2019 ("Mexico 2019 Tax Reform"), which, among other things, for 2019 eliminated the option to monetize the IEPS credit by offsetting income tax withholding payment obligations. As a result, the Company was allowed to offset the 2019 IEPS credit only against its Mexico corporate income tax liability on the 2019 annual income tax return. The elimination of the option to apply the IEPS credit to income tax withholding payment obligations required the Company to recognize the IEPS credit as a reduction of income tax expense rather than a reduction of operating expenses for 2019.

On April 29, 2019, the Servicio de Administración Tributaria (the "SAT"), the Mexican equivalent of the IRS, published the Miscellaneous Fiscal Resolution for 2019 ("2019 Resolution"), which eliminated the Company's eligibility for the IEPS credit effective beginning April 30, 2019. During the period of eligibility in 2019, the Company generated IEPS credits resulting in a $12.8 million net tax benefit, which was recognized as a reduction to income tax expense within the consolidated statements of income for the year ended December 31, 2019.

Tax Cuts and Jobs Act. On December 22, 2017, the President of the United States signed into law the Tax Cuts and Jobs Act (the "Tax Reform Act"). The legislation significantly changed U.S. tax law by, among other things, lowering corporate income tax rates, implementing a modified territorial tax system and imposing a repatriation tax on deemed repatriated earnings

of foreign subsidiaries. The Tax Reform Act permanently reduced the U.S. corporate income tax rate from a maximum of 35% to a 21% rate, effective January 1, 2018.

Included in the Tax Reform Act were the global intangible low-taxed income ("GILTI") provisions. The Company elected to account for GILTI tax in the period in which it is incurred. The GILTI provisions require the Company to include in its U.S. income tax return foreign subsidiary earnings in excess of an allowable return on the foreign subsidiary's tangible assets. The Treasury Department issued final regulations in July 2020 that provide for a high-tax exception to the GILTI tax that were retroactive to tax years beginning after December 31, 2017. The Company recognized a $14.5 million tax benefit in 2020 for the reversal of 2018 and 2019 GILTI tax expense recognized in prior years' consolidated financial statements.

Tax Expense. Income tax expense consists of the following components *(in millions):*

	2020	2019	2018
Current:			
Federal	$ (1.9)	$ 22.3	$ (10.5)
State and local	1.6	1.8	0.7
Foreign	155.0	170.4	175.6

Withholding tax	9.9	1.2 %	9.5	1.2 %	11.2	1.3 %
Foreign exchange (i)	(3.4)	(0.4 %)	35.9	4.6 %	21.8	2.5 %
Mexican fuel excise tax credit, net (ii)	—	—	(12.8)	(1.6 %)	—	—
Change in U.S. tax rate	—	—	—	—	(2.2)	(0.3 %)
Deemed mandatory repatriation	—	—	—	—	(18.7)	(2.1 %)
Other, net	(3.6)	(0.4 %)	4.4	0.5 %	8.0	0.9 %
Income tax expense	$ 204.1	24.8 %	$ 247.6	31.4 %	$ 257.5	29.0 %

(i) Mexican income taxes are paid in Mexican pesos, and as a result, the effective income tax rate reflects fluctuations in the value of the Mexican peso against the U.S. dollar. The foreign exchange impact on income taxes includes the gain or loss from the revaluation of the Company's net U.S. dollar-denominated monetary liabilities into Mexican pesos

which is included in Mexican taxable income under Mexican tax law. As a result, a strengthening of the Mexican peso against the U.S. dollar for the reporting period will generally increase the Mexican cash tax obligation and the effective income tax rate, and a weakening of the Mexican peso against the U.S. dollar for the reporting period will generally decrease the Mexican cash tax obligation and the effective tax rate. To hedge its exposure to this cash tax risk, the Company enters into foreign currency derivative contracts, which are measured at fair value each period and any change in fair value is recognized in foreign exchange gain (loss) within the consolidated statements of income. Refer to Note 11, Derivative Instruments in the consolidated financial statements for further information.

(ii) Not eligible for Mexican fuel excise tax credit subsequent to April 30, 2019. See previous discussion within footnote.

Difference Attributable to Foreign Investments. The Company asserts that all foreign earnings will be indefinitely reinvested to the extent of local needs and earnings that would be distributed in a taxable manner. The Company therefore intends to limit distributions to earnings previously taxed in the U.S., or earnings that would qualify for the 100 percent dividends received deduction provided for in the Tax Reform Act, and earnings that would not result in any significant foreign taxes. Therefore, the Company has not recognized a deferred tax liability on its investment in foreign subsidiaries.

Tax Carryovers. The Company has U.S. state net operating losses which are carried forward from 10 to 20 years and are analyzed each year to determine the likelihood of realization. The state loss carryovers arise from both combined and separate tax filings from as early as 1999 and may expire as early as December 31, 2021 and as late as December 31, 2040. The state loss carryover at December 31, 2020 was $367.7 million resulting in a state deferred tax asset of $22.0 million.

The Mexico federal loss carryovers at December 31, 2020, were $9.3 million and, if not used, will begin to expire in 2026. A deferred tax asset was recognized in prior periods for the expected future tax benefit of these losses which will be carried forward to reduce only Mexican income tax payable in future years.

The valuation allowance for deferred tax assets as of December 31, 2020 and 2019, was $3.5 million and $4.4 million, respectively, primarily attributable to state net operating loss carryovers. The Company believes it is more likely than not that reversals of existing temporary differences that will produce future taxable income and the results of future operations will generate sufficient taxable income to realize the deferred tax assets, net of valuation allowances, related to loss carryovers.

Uncertain Tax Positions. The accounting guidance for uncertainty in income taxes prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The guidance requires the Company to recognize in the consolidated financial statements the benefit of a tax position only if the impact is more likely than not of being sustained on audit based on the technical merits of the position. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (*in millions*):

	2020	2019
Balance at January 1,	$ 2.2	$ 2.2
Additions for tax positions of prior years	—	—
Balance at December 31,	$ 2.2	$ 2.2

The unrecognized tax benefit would affect the effective income tax rate if recognized, and is reasonably possible to be resolved over the next twelve months as part of an Internal Revenue Service (“IRS”) examination.

Interest and penalties related to uncertain tax positions are included in income before taxes on the consolidated statements of income. Accrued interest and penalties on unrecognized tax benefits and interest and penalty expense was immaterial to the consolidated financial statements for all periods presented.

Tax Contingencies. Tax returns filed in the U.S. for periods after 2015 and in Mexico for periods after 2012 remain open to examination by the taxing authorities. During the second quarter of 2020, the IRS initiated an examination of the 2017 deemed mandatory repatriation tax included in the 2017 U.S. federal tax return. In 2018, the IRS initiated an examination of the 2016 U.S. federal tax return. During the fourth quarter of 2020, the SAT initiated an audit of the KCSM 2015 Mexico tax

return. In 2019, the SAT initiated an audit of the KCSM 2013 and 2014 Mexico tax returns. The Company does not expect that these examinations will have a material impact on the consolidated financial statements. During the first quarter of 2017, the Company received audit assessments from the SAT for the KCSM 2009 and 2010 Mexico tax returns. In 2017, the Company commenced administrative actions with the SAT. During the first quarter of 2018, the audit assessments were nullified by the SAT. In the third quarter of 2018, the SAT issued new assessments and the Company filed administrative appeals with the SAT. The Company believes that it has strong legal arguments in its favor and it is more likely than not that it will prevail in any challenge of the assessments.

KCSM has not historically assessed value added tax ("VAT") on international import transportation services provided to its customers based on a written ruling that KCSM obtained from the SAT in 2008 stating that such services were not subject to VAT (the "2008 Ruling"). Notwithstanding the 2008 Ruling, in December 2013, the SAT unofficially informed KCSM of an intended implementation of new criteria effective as of January 1, 2014, pursuant to which VAT would be assessed on all international import transportation services on the portion of the services provided within Mexico. Additionally, in November 2013, the SAT filed an action to nullify the 2008 Ruling, potentially exposing the application of the new criteria to open tax years. In February 2014, KCSM filed an action opposing the SAT's nullification action. In December 2016, KCSM was notified of a resolution issued by the Mexican tax court confirming the 2008 Ruling. The SAT appealed this resolution. In October 2017, the circuit court resolved to not render a decision on the case but rather to send the SAT's appeal to the Supreme Court. In February 2018, the Supreme Court decided not to hear the case and remanded the SAT's appeal back to the circuit court for a decision. In July 2018, the circuit court ordered the tax court to consider certain arguments made by the SAT in the original court proceeding that were not addressed in the tax court's December 2016 resolution. In October 2018, the tax court issued a decision confirming the 2008 Ruling. The SAT appealed this decision. In September 2020, the Appeals Court dismissed the appeal filed by the SAT and confirmed the ruling issued by the tax court. The decision of the Appeals Court is final.

Refundable Mexican Value Added Tax. KCSM is not required to charge its customers VAT on international import or export transportation services, resulting in KCSM paying more VAT on its expenses than it collects from customers. These excess VAT payments are refundable under Mexican law. Prior to 2019, Mexican companies could offset its monthly refundable VAT balance with other tax obligations. In January 2019, Mexico tax reform eliminated the ability to offset other tax obligations with refundable VAT. From January 2019, KCSM has generated a refundable VAT balance of $103.1 million as of December 31, 2020, and filed refund claims with the SAT that are still under review. KCSM has a legal opinion supporting its right under Mexican law to recover the refundable VAT balance from the Mexican government and believes the VAT to be fully collectible. As of December 31, 2019, the KCSM refundable VAT balance was $60.2 million and was classified as a short-term asset. In the third quarter of 2020, the refundable VAT balance was reclassified from a short-term to long-term asset as result of the prolonged refund claim process.

Note 15. Stockholders' Equity

Information regarding the Company's capital stock at December 31 follows:

	Shares Authorized		Shares Issued	
	2020	2019	2020	2019
$25 par, 4% noncumulative, preferred stock	840,000	840,000	649,736	649,736
$1 par, preferred stock	2,000,000	2,000,000	—	—
$0.01 par, common stock	400,000,000	400,000,000	123,352,185	123,352,185

Shares outstanding at December 31:

	2020	2019
$25 par, 4% noncumulative, preferred stock	215,199	222,625
$0.01 par, common stock	91,047,107	96,115,669

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Share Repurchases. In November 2020, the Company announced a new common share repurchase program authorizing the Company to purchase up to $3.0 billion of its outstanding shares of common stock through December 31, 2023 (the "2020 Program"). Share repurchases may be made in the open market, through privately negotiated transactions, or through Accelerated Share Repurchase ("ASR") transactions. The 2020 Program replaced KCS's $2.0 billion common share repurchase program announced on November 12, 2019 (the "2019 Program"), and eliminated the $588.3 million of remaining authorization under the 2019 Program.

Under an ASR agreement, the Company pays a specified amount to a financial institution and receives an initial delivery of shares. The final number and total cost of shares repurchased is then based on the volume-weighted average price of the Company's common stock during the term of the agreements. The transactions are accounted for as equity transactions with any excess of repurchase price over par value allocated between additional paid-in capital and retained earnings. At the time the shares are received, there is an immediate reduction in the weighted-average number of shares outstanding for purposes of the basic and diluted earnings per share computation.

During 2019 and 2020, the Company entered into ASR agreements under the 2019 Program. The terms of the agreements, structured as outlined above, were as follows:

Third Party Institution	Agreement Date	Settlement Date	Total Amount of Agreement *(in millions)*	Initial Shares Delivered	Fair Market Value of Initial Shares *(in millions)*	Additional Shares Delivered	Fair Market Value of Additional Shares *(in millions)*	Total Shares Delivered	Weighted-Average Price Per Share
ASR Agreement #1	November 2019	March 2020	$ 275.0	1,511,380	$ 233.75	224,244	$ 41.25	1,735,624	$ 158.44
ASR Agreement #2	November 2019	March 2020	$ 275.0	1,511,380	$ 233.75	221,692	$ 41.25	1,733,072	$ 158.68
Total			$ 550.0	3,022,760	$ 467.5	445,936	$ 82.5	3,468,696	$ 154.66
ASR Agreement #3	October 2020	January 2021	$ 250.0	1,187,084	$ 212.50	116,314	$ 37.50	1,303,398	$ 191.81
ASR Agreement #4	October 2020	January 2021	$ 250.0	1,187,084	$ 212.50	117,088	$ 37.50	1,304,172	$ 191.69
Total			$ 500.0	2,374,168	$ 425.0	233,402	$ 75.0	2,607,570	$ 191.75

As of December 31, 2020, the remaining $75.0 million was recognized as a forward contract indexed to the Company's own common stock and included in capital surplus within additional paid-in capital in the accompanying consolidated balance sheets.

During 2020, KCS repurchased 143,343 shares of common stock for $27.0 million under the 2020 Program, and 5,207,633 shares of common stock for $869.2 million under the 2019 Program. In total under the 2019 Program, including shares received in January 2021 to settle the October 2020 ASR agreements, the Company has repurchased 8,463,795 shares of common stock for $1,411.7 million at an average price of $166.80 per share.

During 2020, the Company repurchased 7,426 shares of its $25 par preferred stock for $0.2 million at an average price of $29.58 per share.

Treasury Stock. Shares of common stock in treasury and related activity follow:

	2020	2019	2018
Balance at beginning of year	27,236,516	22,455,507	20,315,380
Shares repurchased	5,350,976	5,076,530	2,272,213
Shares issued to fund stock option exercises	(133,951)	(109,560)	(24,024)
Employee stock purchase plan shares issued	(51,658)	(72,707)	(62,866)
Nonvested shares issued	(111,003)	(124,031)	(51,191)
Nonvested shares forfeited	14,198	10,777	5,995
Balance at end of year	32,305,078	27,236,516	22,455,507

Cash Dividends on Common Stock. The following table presents the amount of cash dividends declared per common share by the Company's Board of Directors:

	2020	2019	2018
Cash dividends declared per common share	$ 1.64	$ 1.48	$ 1.44

Note 16. Share-Based Compensation

On May 4, 2017, the Company' stockholders approved the Kansas City Southern 2017 Equity Incentive Plan (the "2017 Plan"). Upon approval, the Company ceased issuing awards under the Kansas City Southern 2008 Stock Option and Performance Award Plan (the "2008 Plan"). The Board of Directors and its Compensation and Organization Committee had previously adopted the 2017 Plan, subject to stockholder approval, on January 26, 2017, and February 17, 2017, respectively. The 2017 Plan provides for the granting of up to 3,750,000 shares of the Company's common stock to eligible persons as defined in the 2017 Plan. Outstanding equity awards granted under the 2008 Plan and the 2017 Plan (the "Plans") are to be governed by the terms and conditions of each individual plan and the related award agreements.

Stock Options. The exercise price for options granted under the Plans equals the closing market price of the Company's stock on the date of grant. Options generally have a 3-year vesting period and are exercisable over the 10-year contractual term, except that options outstanding become immediately exercisable upon certain defined circumstances constituting a change in control of the Company. The grant date fair value is recorded to expense on a straight-line basis over the vesting period.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. The weighted-average assumptions used were as follows:

	2020	2019	2018
Expected dividend yield	1.04 %	1.33 %	1.36 %
Expected volatility	26.07 %	26.38 %	27.09 %
Risk-free interest rate	1.27 %	2.64 %	2.80 %
Expected term *(years)*	5.7	5.7	6.0
Weighted-average grant date fair value of stock options granted	$ 37.79	$ 27.70	$ 28.52

The expected dividend yield is calculated as the ratio of dividends paid per share of common stock to the stock price on the date of grant. The expected volatility is based on the historical volatility of the Company's stock price over a term equal to the estimated life of the options. The risk-free interest rate is determined based on U.S. Treasury rates for instruments with terms approximating the expected term of the options granted, which represents the period of time the awards are expected to be outstanding and is based on the historical experience of similar awards.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

A summary of stock option activity is as follows:

	Number of Shares	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value
			In years	In millions
Options outstanding at December 31, 2019	596,514	$ 92.73		
Granted	115,205	154.38		
Exercised	(133,951)	73.58		
Forfeited or expired	(5,820)	109.84		
Options outstanding at December 31, 2020	571,948	$ 109.46	6.6	$ 54.1
Exercisable at December 31, 2020	389,987	$ 97.81	5.6	$ 41.5

The aggregate intrinsic value in the table above, which is the amount by which the market value of the underlying stock exceeded the exercise price of outstanding options, represents the amount optionees would have realized if all in-the-money options had been exercised on the last business day of the period indicated.

Compensation cost of $4.0 million, $3.6 million, and $2.5 million was recognized for stock option awards for the years ended December 31, 2020, 2019, and 2018, respectively. The total income tax benefit recognized in the consolidated statements of income was $1.0 million, $0.9 million, and $0.6 million for the years ended December 31, 2020, 2019 and 2018, respectively.

Additional information regarding stock option exercises appears in the table below *(in millions)*:

	2020	2019	2018
Aggregate grant-date fair value of stock options vested	$ 3.7	$ 3.0	$ 1.9
Intrinsic value of stock options exercised	13.9	7.2	1.0
Cash received from option exercises	9.9	7.0	1.8
Tax benefit from options exercised during the annual period	3.5	1.8	0.2

As of December 31, 2020, $1.9 million of unrecognized compensation cost relating to nonvested stock options is expected to be recognized over a weighted-average period of eleven months. At December 31, 2020, there were 2,959,191 shares available for future grants under the 2017 Plan.

Nonvested Stock. The Plans provide for the granting of nonvested stock awards to officers and other designated employees. The grant date fair value is based on the closing market price on the date of the grant. These awards are subject to forfeiture if employment terminates during the vesting period, which is generally 3 years or 5 years of vesting for employees. Awards granted to the Company's directors vest immediately on date of grant. The grant date fair value of nonvested shares is recorded to compensation expense on a straight-line basis over the vesting period.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

A summary of nonvested stock activity is as follows:

	Number of Shares	Weighted-Average Grant Date Fair Value	Aggregate Intrinsic Value
			In millions
Nonvested stock at December 31, 2019	220,195	$ 101.40	
Granted	85,199	147.82	
Vested	(97,165)	104.86	
Forfeited	(14,198)	110.94	
Nonvested stock at December 31, 2020	194,031	$ 119.35	$ 39.6

The fair value (at vest date) of shares vested during the years ended December 31, 2020, 2019, and 2018 was $15.3 million, $15.2 million, and $10.4 million, respectively.

The weighted-average grant date fair value of nonvested stock granted during 2020, 2019, and 2018 was $147.82, $114.69 and $106.52, respectively. Compensation cost for nonvested stock was $10.5 million, $10.7 million, and $10.8 million for the years ended December 31, 2020, 2019, and 2018, respectively. The total income tax benefit recognized in the consolidated statements of income was $2.6 million for each of the three years ended December 31, 2020, 2019, and 2018.

As of December 31, 2020, $11.9 million of unrecognized compensation costs related to nonvested stock is expected to be recognized over a weighted-average period of 1.2 years.

Performance Based Awards. The Company granted performance based nonvested stock awards during 2020 (the "2020 Awards"), 2019 (the "2019 Awards") and 2018 (the "2018 Awards"). The awards granted provide a target number of shares that generally vest at the end of a 3-year requisite service period following the grant date. In addition to the service condition, the number of nonvested shares to be received depends on the attainment of defined Company-wide performance goals based on operating ratio ("OR") and return on invested capital ("ROIC") over a 3-year performance period. The awards are also subject to a revenue growth multiplier based on a 3-year performance period calculated as defined in the related award agreement that can range from 80% to 125% of the award earned based on the OR and ROIC achieved. The number of nonvested shares ultimately earned will range between zero to 200% of the target award.

A summary of performance based nonvested stock activity at target is as follows:

	Target Number of Shares *	Weighted-Average Grant Date Fair Value
Nonvested stock, at December 31, 2019	148,185	$ 100.76
Granted	49,068	157.75
Vested	(51,299)	87.10
Forfeited	(5,394)	117.94
Nonvested stock, at December 31, 2020	140,560	$ 124.98

* For the 2020 Awards and the 2019 Awards, participants in the aggregate can earn up to a maximum of 88,122 and 92,582 shares, respectively. For the 2018 Awards, the performance shares earned were 71,074.

The weighted-average grant date fair value of performance based nonvested stock granted during 2020, 2019 and 2018 was $157.75, $110.13 and $105.83, respectively. The Company expenses the grant date fair value of the awards which are probable of being earned over the performance periods. Compensation cost on performance based awards was $8.6 million, $8.2 million and $5.8 million for the years ended December 31, 2020, 2019 and 2018, respectively. Total income tax benefit

recognized in the consolidated statements of income for performance based awards was $2.1 million, $2.0 million and $1.5 million for the years ended December 31, 2020, 2019 and 2018, respectively.

As of December 31, 2020, $5.3 million of unrecognized compensation cost related to performance based awards is expected to be recognized over a weighted-average period of eleven months. The fair value (at vest date) of shares vested for the years ended December 31, 2020, 2019 and 2018 was $7.8 million, $5.7 million, and $3.5 million, respectively.

Employee Stock Purchase Plan. The employee stock purchase plan ("ESPP") provides substantially all U.S. full-time employees of the Company, certain subsidiaries and certain other affiliated entities, with the right to subscribe to an aggregate of 4.0 million shares of common stock of the Company. Under the ESPP, eligible employees may contribute, through payroll deductions, up to 10% of their regular base compensation during six-month purchase periods at a purchase price equal to 85% of the closing market price on either the exercise date or the offering date, whichever is lower.

At the end of each purchase period, the accumulated deductions are applied toward the purchase of the Company's common stock. Both the discount in grant price and the share option purchase price are valued to derive the award's fair value. The awards vest and the expense is recognized ratably over the offering period.

The following table summarizes activity related to the various ESPP offerings:

	Exercise Date			Received from Employees(i) In millions
	Date Issued	Purchase Price	Shares Issued	
July 2020 offering	January 5, 2021	$ 122.91	23,292	$ 2.9
January 2020 offering	July 2, 2020	126.90	23,709	3.0
July 2019 offering	January 3, 2020	104.83	27,949	2.9
January 2019 offering	July 2, 2019	81.83	36,735	3.0
July 2018 offering	January 3, 2019	81.13	35,972	2.9
January 2018 offering	July 2, 2018	90.07	32,271	2.9

(i) Represents amounts received from employees through payroll deductions for share purchases under applicable offering.

The fair value of the ESPP stock purchase rights is estimated on the date of grant using the Black-Scholes option pricing model. The weighted-average assumptions used for each of the respective periods were as follows:

	Years Ended December 31,		
	2020	2019	2018
Expected dividend yield	1.07 %	1.36 %	1.22 %
Expected volatility	30.55 %	17.43 %	13.29 %
Risk-free interest rate	1.01 %	2.31 %	1.73 %
Expected term *(years)*	0.5	0.5	0.5
Weighted-average grant date fair value	$ 35.14	$ 21.56	$ 18.66

Compensation expense of $1.7 million, $1.4 million, and $1.3 million was recognized for ESPP option awards for the years ended December 31, 2020, 2019, and 2018, respectively. At December 31, 2020, there were 3.4 million remaining shares available for future ESPP offerings under the plan.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Note 17. Commitments and Contingencies

Concession Duty. Under KCSM's 50-year Concession, which could expire in 2047 unless extended, KCSM pays annual concession duty expense of 1.25% of gross revenues. For the year ended December 31, 2020, the concession duty expense, which is recorded within materials and other in operating expenses, was $17.4 million, compared to $18.9 million and $17.8 million for the same periods in 2019 and 2018, respectively.

Litigation. Occasionally, the Company is a party to various legal proceedings, regulatory examinations, investigations, administrative actions, and other legal matters, arising for the most part in the ordinary course of business, incidental to its operations. Included in these proceedings are various tort claims brought by current and former employees for job-related injuries and by third parties for injuries related to railroad operations. KCS aggressively defends these matters and has established liability provisions that management believes are adequate to cover expected costs. The outcome of litigation and other legal matters is always uncertain. KCS believes it has valid defenses to the legal matters currently pending against it, is defending itself vigorously, and has recorded accruals determined in accordance with U.S. GAAP, where appropriate. In making a determination regarding accruals, using available information, KCS evaluates the likelihood of an unfavorable outcome in legal or regulatory proceedings to which it is a party to and records a loss contingency when it is probable a liability has been incurred and the amount of the loss can be reasonably estimated. These subjective determinations are based on the status of such legal or regulatory proceedings, the merits of KCS's defenses and consultation with legal counsel. Actual outcomes of these legal and regulatory proceedings may materially differ from the current estimates. It is possible that resolution of one or more of the legal matters currently pending or threatened could result in losses material to KCS's consolidated results of operations, liquidity or financial condition.

Environmental Liabilities. The Company's U.S. operations are subject to extensive federal, state and local environmental laws and regulations. The major U.S. environmental laws to which the Company is subject include, among others, the federal Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA," also known as the Superfund law), the Toxic Substances Control Act, the Clean Water Act, and the Hazardous Materials Transportation Act. CERCLA can impose joint and several liabilities for cleanup and investigation costs, without regard to fault or legality of the original conduct, on current and predecessor owners and operators of a site, as well as those who generate, or arrange for the disposal of, hazardous substances. The Company does not believe that compliance with the requirements imposed by the environmental legislation will impair its competitive capability or result in any material additional capital expenditures, operating or maintenance costs. The Company is, however, subject to environmental remediation costs as described in the following paragraphs.

The Company's Mexico operations are subject to Mexican federal and state laws and regulations relating to the protection of the environment through the establishment of standards for water discharge, water supply, emissions, noise pollution, hazardous substances and transportation and handling of hazardous and solid waste. The Mexican government may bring administrative and criminal proceedings, impose economic sanctions against companies that violate environmental laws, and temporarily or even permanently close non-complying facilities.

The risk of incurring environmental liability is inherent in the railroad industry. As part of serving the petroleum and chemicals industry, the Company transports hazardous materials and has a professional team available to respond to and handle environmental issues that might occur in the transport of such materials.

The Company performs ongoing reviews and evaluations of the various environmental programs and issues within the Company's operations, and, as necessary, takes actions intended to limit the Company's exposure to potential liability. Although these costs cannot be predicted with certainty, management believes that the ultimate outcome of identified matters will not have a material adverse effect on the Company's consolidated financial statements.

Personal Injury. The Company's personal injury liability is based on semi-annual actuarial studies performed on an undiscounted basis by an independent third party actuarial firm and reviewed by management. This liability is based on personal injury claims filed and an estimate of claims incurred but not yet reported. Actual results may vary from estimates due to the number, type and severity of the injury, costs of medical treatments and uncertainties in litigation. Adjustments to the liability are reflected within operating expenses in the period in which changes to estimates are known. Personal injury claims in excess of self-insurance levels are insured up to certain coverage amounts, depending on the type of claim and year of

occurrence. The personal injury liability as of December 31, 2020, is based on an updated actuarial study of personal injury claims through October 31, 2020, and review of the last two months' experience. For the years ended December 31, 2020 and 2019, the Company recognized increases of $9.4 million and $0.2 million, respectively, in personal injury liability, due to changes in estimates as a result of the Company's claims development and settlement experience.

The personal injury liability activity was as follows *(in millions):*

	2020	2019
Balance at beginning of year	$ 20.9	$ 19.6
Accruals	6.3	6.3
Changes in estimate	9.4	0.2
Payments	(5.3)	(5.2)
Balance at end of year	$ 31.3	$ 20.9

Tax Contingencies. Information regarding tax contingencies is included in Note 14, Income Taxes — Tax Contingencies.

Contractual Agreements. In the normal course of business, the Company enters into various contractual agreements related to commercial arrangements and the use of other railroads' or governmental entities' infrastructure needed for the operations of the business. The Company is involved or may become involved in certain disputes involving transportation rates, product loss or damage, charges, and interpretations related to these agreements. While the outcome of these matters cannot be predicted with certainty, the Company believes that, when resolved, these disputes will not have a material effect on its consolidated financial statements.

Credit Risk. The Company continually monitors risks related to economic changes and certain customer receivables concentrations. Significant changes in customer concentration or payment terms, deterioration of customer creditworthiness, bankruptcy, insolvency or liquidation of a customer, or weakening in economic trends could have a significant impact on the collectability of the Company's receivables and its operating results. If the financial condition of the Company's customers were to deteriorate and result in an impairment of their ability to make payments, additional allowances may be required. The Company has recorded provisions for uncollectability based on its best estimate as of December 31, 2020.

Panama Canal Railway Company ("PCRC") Guarantees and Indemnities. At December 31, 2020, the Company had issued and outstanding $5.6 million under a standby letter of credit to fulfill its obligation to fund fifty percent of the debt service reserve and liquidity reserve established by PCRC in connection with the issuance of the 7.0% Senior Secured Notes due November 1, 2026 (the "PCRC Notes"). Additionally, KCS has pledged its shares of PCRC as security for the PCRC Notes.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Per share data:				
Basic earnings per common share	$ 1.31	$ 1.81	$ 1.29	$ 1.02
Diluted earnings per common share	1.30	1.81	1.28	1.02

(i) During the first, second and third quarters of 2020, the Company recognized pre-tax restructuring charges of $6.0 million, $10.5 million and $0.5 million, respectively, within operating expenses related to the Company's VSP program and the purchase of impaired, leased locomotives.

(ii) During the fourth quarter of 2020, the Company recognized $13.6 million of pre-tax expense within operating expenses related to the write-off of software development costs.

(iii) During the first, second and third quarters of 2020, the Company recognized tax expense of $2.2 million and $2.0 million, and a benefit of $4.2 million, respectively, for GILTI tax expense recognized in the first and second quarters of 2020, and subsequently reversed in the third quarter of 2020 when GILTI regulations were finalized. Additionally, during the third quarter of 2020, the Company recognized a $14.5 million tax benefit for the reversal of 2018 and 2019 GILTI tax expense recognized in prior years' consolidated financial statements.

(iv) During the first, second, third and fourth quarters of 2019, the Company recognized pre-tax restructuring charges of $67.5 million, $51.0 million, $12.0 million and $38.3 million, respectively, within operating expenses related to the implementation of PSR initiatives.

(v) During the first, second, third, and fourth quarters of 2019, the Company recognized, net, a tax benefit of $6.8 million, expense of $1.9 million, and benefits of $3.7 million, and $4.2 million, respectively, related to the Mexican fuel excise tax credit generated through April 29, 2019. Prior to 2019, the Company recognized a pre-tax benefit within operating expenses related to a credit that was available for the excise tax included in the price of fuel that was purchased and consumed in locomotives and certain work equipment in Mexico. Effective January 1, 2019, the Company began recognizing the benefit as a reduction of income tax expense due to changes in Mexican tax law; and beginning April 30, 2019, railroads in Mexico are no longer eligible for the tax credit due to changes in Mexican tax regulations.

Kansas City Southern and Subsidiaries

Notes to Consolidated Financial Statements-(Continued)

Note 19. Geographic Information

The Company strategically manages its rail operations as one reportable business segment over a single coordinated rail network that extends from the midwest and southeast portions of the United States south into Mexico and connects with other Class I railroads. Financial information reported at this level, such as revenues, operating income and cash flows from operations, is used by corporate management, including the Company's chief operating decision-maker, in evaluating overall financial and operational performance, market strategies, as well as the decisions to allocate capital resources. The Company's chief operating decision-maker is the chief executive officer.

The following tables provide information by geographic area *(in millions)*:

	Years ended December 31,		
	2020	2019	2018
Revenues			
U.S.	$ 1,388.5	$ 1,493.5	$ 1,424.8
Mexico	1,244.1	1,372.5	1,289.2
Total revenues	$ 2,632.6	$ 2,866.0	$ 2,714.0

	December 31,	
	2020	2019
Property and equipment (including Concession assets), net		
U.S.	$ 5,594.6	$ 5,435.9
Mexico	3,403.2	3,370.4
Total property and equipment (including Concession assets), net	$ 8,997.8	$ 8,806.3

Note 20. Subsequent Events

Foreign Currency Hedging

During January 2021, the Company entered into several foreign currency forward contracts with an aggregate notional amount of $100.0 million and maturity dates in January and February 2021. These contracts obligate the Company to purchase a total of Ps.1,993.5 million at a weighted-average exchange rate of Ps.19.9 to each U.S. dollar. During January 2021, the Company entered into offsetting contracts with an aggregate notional amount of $58.9 million, which matured during January 2021 and obligated the Company to sell a total of Ps.1,195.3 million at a weighted-average exchange rate of Ps.20.3 to each U.S. dollar, resulting in cash paid of $1.1 million. As of the date of this filing, there were $40.0 million aggregate notional amount of contracts outstanding, which obligate the Company to purchase a total of Ps.798.2 million at a weighted average exchange rate of Ps.20.0 to each U.S. dollar.

The Company has not designated these foreign currency derivative instruments as hedging instruments for accounting purposes. The Company will measure the foreign currency derivative instruments at fair value each period and will recognize any change in fair value in foreign exchange gain (loss) within the consolidated statements of income.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

Not Applicable.

Item 9A. ***Controls and Procedures***

(a) Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2020. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2020, the design and operation of the Company's disclosure controls and procedures were effective to accomplish their objectives at a reasonable assurance level.

(b) Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as that term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter ended December 31, 2020 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Internal Control over Financial Reporting

The report of management on the Company's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) is included as "Management's Report on Internal Control over Financial Reporting" in Item 8, Financial Statements and Supplementary Data.

PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited the Company's financial statements contained herein, also audited the Company's internal control over financial reporting as of December 31, 2020. The audit report is included in Item 8, Financial Statements and Supplementary Data.

Item 9B. ***Other Information***

None.

Part III

The Company has incorporated by reference certain responses to the Items of this Part III pursuant to Rule 12b-23 under the Exchange Act and General Instruction G(3) to Form 10-K. The Company's definitive proxy statement for the 2020 annual meeting of stockholders ("Proxy Statement"), will be filed no later than 120 days after December 31, 2020.

Item 10. *Directors, Executive Officers and Corporate Governance*

(a) Directors of the Company

The sections of the Proxy Statement entitled "Proposal 1 — Election of Directors" and "The Board of Directors" are incorporated by reference herein.

(b) Executive Officers of the Company

See "Executive Officers of KCS and Subsidiaries" in Part I, Item 1 of this annual report incorporated by reference herein for information about the executive officers of the Company.

(c) Changes to Shareholder Nominating Procedures

None.

(d) Audit Committee and Audit Committee Financial Experts

The section of the Proxy Statement entitled "Board Committees — Audit Committee" is incorporated by reference herein.

(e) Compliance with Section 16(a) of the Exchange Act

The response to Item 405 of Regulation S-K under "Delinquent Section 16(a) Reports" in the Proxy Statement is incorporated by reference herein.

(f) Code of Ethics

The Company has adopted a Code of Business Conduct and Ethics ("Code of Ethics") that applies to directors, officers (including, among others, the principal executive officer, principal financial officer and principal accounting officer) and employees. The Company has posted its Code of Ethics on its website (www.kcsouthern.com) and will post on its website any amendments to, or waivers from, a provision of its Code of Ethics that apply to the Company's principal executive officer, principal financial officer or principal accounting officer as required by applicable SEC and NYSE rules and regulations.

Item 11. *Executive Compensation*

The sections of the Proxy Statement entitled "Compensation Discussion and Analysis", "Compensation Committee Report", "Executive Compensation", "Board Committees - Compensation Committee Interlocks and Insider Participation", and "Director Compensation" are incorporated by reference herein.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters***

The section of the Proxy Statement entitled "Beneficial Ownership" is incorporated by reference herein.

Equity Compensation Plan Information

The following table provides information as of December 31, 2020, about the common stock that may be issued upon the exercise of options, warrants and rights, as well as shares remaining available for future issuance under the Company's existing equity compensation plans.

Plan Category	Number of Securities to Be Issued upon Exercise of Outstanding Options, Warrants and Rights (i)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans-Excluding Securities Reflected in the First Column (ii)
Equity compensation plans:			
Approved by security holders	744,634	$ 112.90	6,326,987
Not approved by security holders	—	—	—
Total	744,634	$ 112.90	6,326,987

(i) Includes 571,948 outstanding options, 140,560 outstanding performance shares (at target), 8,834 outstanding deferred shares and dividend equivalents, and 23,292 ESPP shares purchased on December 31, 2020.

(ii) Includes 3,367,796 shares available for issuance under the 2009 Employee Stock Purchase Plan and 2,959,191 shares available for issuance under the 2017 Plan in the form of nonvested shares, bonus shares, performance units or performance shares or issued upon the exercise of options (including incentive stock options) or stock appreciation rights awarded under the 2017 Plan.

The Company has no knowledge of any arrangement the operation of which may at a subsequent date result in a change of control of the Company.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence***

The sections of the Proxy Statement entitled "Certain Transactions" and "Corporate Governance - Director Independence" are incorporated by reference herein.

Item 14. ***Principal Accountant Fees and Services***

The section of the Proxy Statement entitled "Independent Registered Public Accounting Firm" is incorporated by reference herein.

Part IV

Item 15. ***Exhibits and Financial Statement Schedules***

(a) List of Documents filed as part of this Report

10.2	Form of Director Indemnification Agreement, attached as Exhibit 10.2 to the Company's Form 10-K for the year ended December 31, 2001, filed on March 29, 2002 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.2.
10.3*	Directors Deferred Fee Plan, adopted August 20, 1982, as amended and restated effective May 2, 2007, filed as Exhibit 10.3 to the Company's Form 10-K for the year ended December 31, 2010, filed on February 9, 2011 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.3.
10.4*	Kansas City Southern Executive Plan (Amended and Restated January 23, 2018), filed as Exhibit 10.5 to the Company's Form 10-K for the year ended December 31, 2018, filed on January 25, 2019 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.4.
10.5*	Kansas City Southern Executive Deferred Compensation Plan, dated August 31, 2018, filed as Exhibit 10.1 to the Company's Form 10-Q for the quarter ended September 30, 2018, filed on October 19, 2018 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.5.
10.6*	Kansas City Southern Annual Incentive Plan, as amended and restated November 9, 2018, filed as Exhibit 10.7 to the Company's Form 10-K for the year ended December 31, 2018, filed on January 25, 2019 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.6.
10.7	English translation of concession title granted by the Secretaría de Comunicaciones y Transportes ("SCT") in favor of Ferrocarril del Noreste, S.A. de C.V. ("FNE"), dated December 2, 1996, filed as Exhibit 10.10 to the Company's Form 10-K for the year ended December 31, 2011, filed on February 8, 2012 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.7.
10.7.1	English translation of amendment, dated February 12, 2001, filed as Exhibit 10.10.1 to the Company's Form 10-K for the year ended December 31, 2011, filed on February 8, 2012 (File No. 1-4717), of concession title granted by SCT in favor of KCSM, formerly known as FNE, December 2, 1996, is incorporated herein by reference as Exhibit 10.7.1.
10.7.2	English translation of amendment no. 2, dated November 22, 2006, filed as Exhibit 10.10.2 to the Company's Form 10-K for the year ended December 31, 2011, filed on February 8, 2012 (File No. 1-4717), of concession title granted by SCT in favor of KCSM, formerly known as FNE, December 2, 1996, as amended February 12, 2001, is incorporated herein by reference as Exhibit 10.7.2.

Exhibit	Description
10.7.3	English translation of amendment no. 3, dated December 31, 2013, of concession title granted by SCT in favor of KCSM, formerly known as FNE, December 2, 1996, as amended February 12, 2001 and November 22, 2006, filed as Exhibit 10.8.3 to the Company's Form 10-K for the year ended December 31, 2016, filed on January 27, 2017 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.7.3.
10.7.4	English translation of amendment no. 4, dated December 20, 2017, of concession title granted by SCT in favor of KCSM, formerly known as FNE, December 2, 1996, as amended February 12, 2001, November 22, 2006 and December 31, 2013, filed as Exhibit 10.3 to the Company's Form 10-Q for the quarter ended March 31, 2019, filed on April 17, 2019 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.7.4.
10.7.5	English translation of amendment no. 5, dated April 27, 2018, of concession title granted by SCT in favor of KCSM, formerly known as FNE, December 2, 1996, as amended February 12, 2001, November 22, 2006, December 31, 2013 and December 20, 2017, filed as Exhibit 10.4 to the Company's Form 10-Q for the quarter ended March 31, 2019, filed on April 17, 2019 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.7.5.
10.8	Transaction Agreement, dated December 1, 2005, among the Company, KCSR, Norfolk Southern Corporation and The Alabama Great Southern Railroad Company (the "Transaction Agreement"), filed as Exhibit 10.46 to the Company's Form 10-K for the year ended December 31, 2005, filed on April 7, 2006 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.8.
10.8.1	Amendment No. 1 to the Transaction Agreement, dated January 17, 2006, filed as Exhibit 10.47 to the Company's Form 10-K for the year ended December 31, 2005, filed on April 7, 2006 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.8.1.
10.8.2	Amendment No. 2 to the Transaction Agreement, dated May 1, 2006, filed as Exhibit 10.2 to the Company's Form 10-Q for the quarter ended March 31, 2006, filed on May 9, 2006 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.8.2.
10.8.3	Limited Liability Company Agreement of Meridian Speedway, LLC, dated May 1, 2006, between the Alabama Great Southern Railroad Company and the Company, filed as Exhibit 10.3 to the Company's Form 10-Q for the quarter ended March 31, 2006, filed on May 9, 2006 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.8.3.
10.8.4	Amendment No. 1 and Waiver to Limited Liability Company Agreement, dated August 12, 2011, among Meridian Speedway, LLC, the Company, KCS Holdings, Inc. and The Alabama Great Southern Railroad Company, filed as Exhibit 10.2 to the Company's Form 10-Q for the quarter ended September 30, 2011, filed on October 21, 2011 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.8.4.
10.8.5	Amendment No. 2 to Limited Liability Company Agreement, dated December 9, 2013, among the Company, KCS Holdings, Inc. and The Alabama Great Southern Railroad Company, filed as Exhibit 10.11.5 to the Company's Form 10-K for the year ended December 31, 2016, filed on January 27, 2017 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.8.5.
10.9*	Kansas City Southern 2008 Stock Option and Performance Award Plan (Amended and Restated February 18, 2015) (the "2008 Plan"), filed as Exhibit 10.1 to the Company's Current Report on Form 8-K, filed on February 23, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.
10.9.1*	Form of Restricted Shares Award Agreement (Standard Form) under the 2008 Plan, filed as Exhibit 10.4 to the Company's Current Report on Form 8-K filed on February 23, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.1.
10.9.2*	Form of Non-Qualified Stock Option, Restricted Share and Performance Share Award Agreement (United States Employees) under the Kansas City Southern 2008 Stock Option and Performance Award Plan for the 2012 Long-Term Incentive Program, filed as Exhibit 10.3 to the Company's Current Report on Form 8-K filed on February 27, 2012 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.2.
10.9.3*	Form of Non-Qualified Stock Option, Restricted Share and Performance Share Award Agreement (United States Employees) under the Kansas City Southern 2008 Stock Option and Performance Award Plan for the 2013 Long-Term Incentive Program, filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed on February 27, 2013 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.3.
10.9.4*	Form of Non-Qualified Stock Option, Restricted Share and Performance Share Award Agreement (United States Employees) under the 2008 Plan for the 2014 Long-Term Incentive Program, filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed on February 26, 2014 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.4.

Exhibit	Description
10.9.5*	Form of Non-Qualified Stock Option, Restricted Share and Performance Share Award Agreement (Non-United States Employees) under the 2008 Plan for the 2014 Long-Term Incentive Program, filed as Exhibit 10.2 to the Company's Current Report on Form 8-K filed on February 26, 2014 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.5.
10.9.6*	Form of Non-Qualified Stock Option, Restricted Share and Performance Share Award Agreement (Employees) under the 2008 Plan for the 2015 Long-Term Incentive Program, filed as Exhibit 10.2 to the Company's Current Report on Form 8-K filed on February 23, 2015 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.6.
10.9.7*	Form of Non-Qualified Stock Option, Restricted Share and Performance Share Award Agreement (Employees) under the 2008 Plan for the 2016 Long-Term Incentive Program, filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed on February 25, 2016 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.7.
10.9.8*	Form of Non-Qualified Stock Option, Restricted Share and Performance Share Award Agreement under the 2008 Plan for the 2017 Long-Term Incentive Program, filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed on February 24, 2017 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.9.8.
10.10	Trackage Rights Agreement, dated February 9, 2010, between KCSM and Ferromex, filed as Exhibit 10.2 to the Company's Form 10-Q for the quarter ended March 31, 2010, filed on April 27, 2010 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.10.††
10.11	Form of Loan Agreement between Locomotives Structured Holdings LLC (as successor by assignment from General Electric Capital Corporation) and KCSM, dated September 1, 2011, filed as Exhibit 10.1 to the Company's Form 10-Q for the quarter ended September 30, 2011, filed on October 21, 2011 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.11.
10.12	Financing Agreement dated as of February 21, 2012, between The Kansas City Southern Railway Company and the United States of America represented by the Secretary of Transportation acting through the Administrator of the Federal Railroad Administration, filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed on February 22, 2012 (File No. 1-4717), is incorporated herein by reference as Exhibit 10.12.
10.13	Financing Agreement between The Texas-Mexican Railway Company and the Federal Railroad Administration, dated June 28, 2005, filed as Exhibit 10.3 to the Company's Quarterly Report on Form 10-Q, filed on August 15, 2005 (File No. 1-04717), are incorporated herein by reference as Exhibit 10.13.
10.13.1	Pledge Agreement between Mexrail, Inc. and the Federal Railroad Administration, and Guaranty of Mexrail, Inc. in favor of the Federal Railroad Administration, filed as Exhibit 10.4 to the Company's Quarterly Report on Form 10-Q, filed on August 15, 2005 (File No. 1-04717), are incorporated herein by reference as Exhibit 10.13.1.

/s/ HENRY J. MAIER Henry J. Maier	Director.
/S/ THOMAS A. MCDONNELL Thomas A. McDonnell	Director.

DESCRIPTION OF THE REGISTRANT'S SECURITIES REGISTERED PURSUANT TO SECTION 12 OF THE SECURITIES ACT OF 1934

The following description sets forth certain material terms and provisions of KCS's securities that are registered under Section 12 of the Securities Exchange Act of 1934, as amended.

DESCRIPTION OF CAPITAL STOCK

This description summarizes relevant provisions of Delaware law. The following summary does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the applicable provisions of Delaware law and KCS's Amended and Restated Certificate of Incorporation and Bylaws, copies of which are incorporated by reference as an exhibit to the Annual Report on Form 10-K of which this Exhibit 4(j) is a part. KCS encourages you to read its Amended and Restated Certificate of Incorporation, Bylaws and the applicable provisions of Delaware law for additional information. As used herein, "**KCS**" refers to Kansas City Southern.

Authorized Capital Stock

Under KCS's Amended and Restated Certificate of Incorporation, KCS is authorized to issue (i) 400,000,000 shares of common stock, par value $0.01 per share ("**Common Stock**"), (ii) 840,000 shares of 4% Noncumulative, Preferred Stock, par value $25.00 per share ("**4% Preferred Stock**"), and (iii) 2,000,000 shares of New Series Preferred Stock, par value $1.00 per share ("**New Series Preferred Stock**"). As of December 31, 2020, 123,352,185 shares of Common Stock were issued and 91,047,107 shares of Common Stock were outstanding and 649,736 shares of 4% Preferred Stock were issued and 215,199 shares of 4% Preferred Stock were outstanding. KCS's Common Stock and 4% Preferred Stock are listed on the New York Stock Exchange under the ticker symbol "KSU".

Common Stock

Holders of KCS's Common Stock are entitled to receive dividends when, as and if declared by KCS's board of directors ("**Board of Directors**") out of funds legally available for the payment of dividends, provided that, if any shares of 4% Preferred Stock or New Series Preferred Stock are outstanding, no dividends or other distributions may be made with respect to the Common Stock unless full required dividends on the shares of 4% Preferred Stock and New Series Preferred Stock have been paid, including accumulated dividends in the case of any series of New Series Preferred Stock designated to receive cumulative dividends. The agreements governing KCS's indebtedness may impose certain limitations on KCS's ability to pay cash dividends on its Common Stock.

Holders of KCS's Common Stock are entitled to one vote per share on any matter brought before the stockholders. In the event of the voluntary or involuntary dissolution, liquidation or winding up of KCS, holders of KCS's Common Stock are entitled to receive pro rata, after satisfaction in full of the prior rights of creditors (including holders of its indebtedness) and holders of any 4% Preferred Stock and New Series Preferred Stock, all of KCS's remaining assets available for distribution. The issuance of additional shares of 4% Preferred Stock or New Series Preferred Stock may result in a dilution in the voting power and relative equity interests of the holders of KCS's Common Stock and would subject the Common Stock to the prior dividend and liquidation rights of the additional 4% Preferred Stock and New Series Preferred Stock issued. KCS's Common Stock is not redeemable and has no preemptive rights.

Preferred Stock

4% Preferred Stock. Holders of KCS's 4% Preferred Stock are entitled to receive dividends up to but not exceeding the rate of 4% per annum, before any dividends are declared or paid to Common Stock or New Series Preferred Stock for the same period. Such dividends are not cumulative, and the Holders of the 4% Preferred Stock are not entitled to receive any other earnings or profits. In case of liquidation or dissolution of KCS, the holders of 4% Preferred Stock are entitled to receive payment up to the amount of the par value before any payment or liquidation is made upon the Common Stock or New Series Preferred Stock. Holders of KCS 4% Preferred Stock are entitled to one vote per share on any matter brought before the stockholders.

New Series Preferred Stock. KCS's Board of Directors is authorized to issue up to 2,000,000 shares of New Series Preferred Stock in one or more series and to fix and determine the number of shares of preferred stock of any series, to determine the designation of any such series, to increase or decrease the number of shares of any such series subsequent to the issue of shares of that series, and to determine or alter the rights, preferences, privileges and restrictions granted to or imposed upon any such series. As described above, there are currently no shares of New Series Preferred Stock outstanding.

Prior to the issuance of shares of each series of New Series Preferred Stock, KCS's Board of Directors is required to adopt resolutions and file a certificate of determination with the Secretary of State of the State of Delaware. The certificate of determination will fix for each series the designation and number of shares and the rights, preferences, privileges and restrictions of the shares including, but not limited to, the following:

- the title and stated value;
- voting rights, if any;
- any rights and terms of redemption (including sinking fund provisions);
- the dividend rate(s), period(s) and/or payment date(s) or method(s) of calculation;
- whether dividends are cumulative or non-cumulative, the date from which dividends will accumulate;
- the relative ranking and preferences of the preferred stock as to dividend rights and rights upon liquidation, dissolution or winding up of KCS's affairs;
- the terms and conditions, if applicable, upon which the preferred stock will be convertible into KCS's Common Stock, including the conversion price (or manner of calculation) and conversion period;
- the provision for redemption, if applicable;
- the provision for a sinking fund, if any;
- liquidation preferences;
- any limitations on issuance of any class or series of preferred stock ranking senior to or on a parity with the class or series of preferred stock as to dividend rights and rights upon liquidation, dissolution or winding up of KCS's affairs; and
- any other specific terms, preferences, rights, limitations or restrictions of the preferred stock.

All shares of preferred stock will, when issued, be fully paid and nonassessable and will not have any preemptive or similar rights.

In addition to the terms listed above, KCS will set forth in a prospectus supplement the following terms relating to the class or series of preferred stock being offered:

- the number of shares offered, the liquidation preference per share and the offering price;
- the procedures for any auction and remarketing, if any;
- any listing of the preferred stock on any securities exchange; and
- a discussion of any material and/or special U.S. federal income tax considerations.

Until the KCS's Board of Directors determines the rights of holders of a series of preferred stock, KCS cannot predict the effect of the issuance of any shares of preferred stock upon the rights of holders of its Common Stock. However, the effect could include one or more of the following:

- restricting dividends on KCS's Common Stock;
- diluting the voting power of KCS's Common Stock;
- impairing the liquidation rights of KCS's Common Stock; or
- delaying or preventing a change in control of KCS's without further action by its stockholders.

If issued, the preferred stock would rank, with respect to dividends and upon KCS's liquidation, dissolution or winding up:

- senior to all classes or series of KCS's Common Stock and to all of its equity securities ranking junior to the preferred stock;
- on a parity with all of KCS's equity securities the terms of which provide that the equity securities rank on a party with the preferred stock; and
- junior to all of KCS's equity securities the terms of which specifically provide that the equity securities rank senior to the preferred stock.

Certain Anti-takeover Effects

General. Certain provisions of KCS's Amended and Restated Certificate of Incorporation and Bylaws and the Delaware General Corporation Law, or DGCL, could make it more difficult to consummate an acquisition of control of KCS by means of a tender offer, a proxy fight, open market purchases or otherwise in a transaction not approved by its Board of Directors. The provisions described below may reduce KCS's vulnerability to an unsolicited proposal for the restructuring or sale of all or substantially all of its assets or an unsolicited takeover attempt which is unfair to its stockholders. The summary of the provisions set forth below does not purport to be complete and is qualified in its entirety by reference to KCS's Amended and Restated Certificate of Incorporation and Bylaws and the DGCL.

Business Combinations. Section 203 of the DGCL restricts a wide range of transactions ("**business combinations**") between a corporation and an interested stockholder. An "interested stockholder" is, generally, any person who beneficially owns, directly or indirectly, 15% or more of the corporation's outstanding voting stock. Business combinations are broadly defined to include (i) mergers or consolidations with, (ii) sales or other dispositions of more than 10% of the corporation's assets to, (iii) certain transactions resulting in the issuance or transfer of any stock of the corporation or any subsidiary to, (iv) certain transactions resulting in an increase in the proportionate share of stock of the corporation or any subsidiary owned by, or (v) receipt of the benefit (other than proportionately as a stockholder) of any loans, advances or other financial benefits by, an interested stockholder. Section 203 provides that an

interested stockholder may not engage in a business combination with the corporation for a period of three years from the time of becoming an interested stockholder unless (a) the board of directors approved either the business combination or the transaction which resulted in the person becoming an interested stockholder prior to the time that person became an interested stockholder; (b) upon consummation of the transaction which resulted in the person becoming an interested stockholder, that person owned at least 85% of the corporation's voting stock (excluding, for purposes of determining the voting stock outstanding, but not the outstanding voting stock owned by the interested stockholder, shares owned by persons who are directors and also officers and shares owned by certain employee stock plans); or (c) the business combination is approved by the board of directors and authorized by the affirmative vote of at least 66 2/3 % of the outstanding voting stock not owned by the interested stockholder. The restrictions on business combinations with interested stockholders contained in Section 203 of the DGCL do not apply to a corporation whose certificate of incorporation or bylaws contains a provision expressly electing not to be governed by the statute; however, neither KCS's Amended and Restated Certificate of Incorporation nor its Bylaws contains a provision electing to "opt-out" of Section 203.

Special Meetings. Pursuant to the DGCL, a special meeting of stockholders may be called by the board of directors or by any other person authorized to do so in the charter or the bylaws. KCS's Amended and Restated Certificate of Incorporation and Bylaws provides that special meetings of stockholders may only be called by the Board of Directors, the Chairman of the Board of Directors, the Chief Executive Officer of KCS, or by the Secretary at the written request in proper form of one or more stockholders of record who have continuously held for at least one year prior to the date such request is delivered to the Secretary a "net long position" (as defined in the Bylaws) in shares of common stock of KCS representing in the aggregate at least fifteen percent (15%) of the outstanding shares of common stock of KCS. Special meetings of the stockholders may not be called by any other person or persons.

Additional Authorized Shares of Capital Stock. The additional shares of authorized common stock and preferred stock available for issuance under KCS's Amended and Restated Certificate of Incorporation could be issued at such times, under such circumstances and with such terms and conditions as to impede a change in control.

Advance Notice Requirements. KCS's Bylaws establish advance notice procedures with regard to stockholder proposals relating to the nomination of candidates for election as directors or other business to be brought before meetings of the stockholders. These procedures provide that notice of stockholder proposals of these kinds must be timely given in writing to the Secretary of KCS before the meeting at which the action is to be taken. Generally, to be timely, notice of stockholder proposals must be received at the principal executive offices of KCS not less than 60 nor more than 90 days before the one-year anniversary of the previous year's annual meeting; provided, however , that in the event that no annual meeting was held in the previous year or if the date of the annual meeting is advanced by more than 30 days prior to or delayed more than 60 days after the one-year anniversary of the previous year's annual meeting, then, for notice by the stockholder to be timely, it must be received by the Secretary of KCS not earlier than the close of business on the 90th day prior to such annual meeting and not later than the close of business on the later of (i) the 60th day prior to such annual meeting or (ii) the tenth day following the day on which a Public Announcement (as defined in the Bylaws) of the date of such annual meeting is first made. The notice must contain certain information specified in the Bylaws.

No Written Consent of Stockholders. KCS's Amended and Restated Certificate of Incorporation requires all stockholder actions to be taken by a vote of the stockholders at an annual or special meeting, and does not permit its stockholders to act by written consent without a meeting.

DESCRIPTION OF DEBT SECURITIES

The following description of KCS's 3.85% Senior Notes due 2023 (the "**3.85% Notes**"), 3.00% Senior Notes due 2023 (the "**3.00% Notes**"), 4.30% Senior Notes due 2043 (the "**4.30% Notes**"), 4.95% Senior Notes due 2045 (the "**4.95% Notes**"), 3.125% Senior Notes due 2026 (the "**3.125% Notes**"), 4.70% Senior Notes due 2048 (the "**4.70% Notes**"), 2.875% Senior Notes due 2029 (the "**2.875% Notes**") and 4.20% Senior Notes due 2069 (the "**4.20% Notes**") and 3.50% Senior Notes due 2050 (the "**3.50% Notes**," and together with the 3.85% Notes, the 3.00% Notes, the 4.30% Notes, the 4.95% Notes, the 3.125% Notes, the 4.70% Notes, the 2.875% Notes and the 4.20% Notes, the "**Notes**") is a summary and does not purport to be complete. This description is qualified in its entirety by reference to the Indenture, dated December 9, 2015 (as amended or supplemented, the "**Indenture**"), among KCS, as issuer, the guarantors party thereto and U.S. Bank National Association, as trustee. While the terms summarized below will apply generally to any future debt securities KCS may offer, KCS will describe the particular terms of any debt securities that it may offer in more detail in the applicable prospectus supplement.

KCS has an effective registration statement on Form S-3ASR (File No.: 333-249927), which was filed with the Securities and Exchange Commission (the "**SEC**") on November 6, 2020 and covers the registration of the Notes. In addition, KCSR and KCSM each have outstanding debt securities that were registered under other registration statements filed prior to November 6, 2020.

The Notes

The Notes were issued under the Indenture, which provides that debt securities may be issued under the Indenture from time to time in one or more series. The Indenture does not limit the amount of debt securities that KCS may issue under the Indenture. KCS may, without the consent of the holders of any series of Notes, issue additional notes ("**Additional Notes**") of a series having the same terms as the Notes of such series, except for the public offering price and the issue date and, if applicable, the initial interest accrual date and the initial interest payment date. Any Additional Notes of a series, together with the Notes of such series, will constitute a single series of Notes and will vote together as one class on all matters with respect to such series of Notes; provided, however, that any Additional Notes that are not fungible with existing Notes of such series for U.S. federal income tax purposes will have a separate CUSIP, ISIN and other identifying number from the existing Notes of such series.

The 3.85% Notes. KCSR issued $200.0 million in aggregate principal amount of senior unsecured notes on October 29, 2013. During the fourth quarter of 2015, $195.0 million of such notes were exchanged for the equivalent amount of 3.85% Notes issued by KCS. The 3.85% Notes bear interest at 3.85% per annum, and will mature on November 15, 2023. Interest on the 3.85% Notes is payable semi-annually on May 15 and November 15 of each year to the holders of record at the close of business on the immediately preceding May 1 and November 1. As of December 31, 2020, $199.2 million aggregate principal amount of the 3.85% Notes was outstanding.

The 3.00% Notes. KCSM issued $450.0 million in aggregate principal amount of senior unsecured notes on May 3, 2013. During the fourth quarter of 2015, $439.1 million of such notes were exchanged for the equivalent amount of 3.00% Notes issued by KCS. The 3.00% Notes bear interest at 3.00% per annum, and will mature on May 15, 2023. Interest on the 3.00% Notes is payable semi-annually on May 15 and November 15 of each year to the holders of record at the close of business on the immediately preceding May 1 and November 1. As of December 31, 2020, $439.1 million aggregate principal amount of the 3.00% Notes was outstanding.

The 4.30% Notes. KCSR issued $450.0 million in aggregate principal amount of senior unsecured notes on April 29, 2013. During the fourth quarter of 2015, $437.6 million of such notes were exchanged for the equivalent amount of 4.30% Notes issued by KCS. The 4.30% Notes bear interest at 4.30% per

annum, and will mature May 15, 2043. Interest on the 4.30% Notes is payable semi-annually on May 15 and November 15 of each year to the holders of record at the close of business on the immediately preceding May 1 and November 1. As of December 31, 2020, $448.7 million aggregate principal amount of the 4.30% Notes was outstanding.

The 4.95% Notes. KCSR issued $500.0 million in aggregate principal amount of senior unsecured notes on July 27, 2015. During the fourth quarter of 2015, $476.7 million of such notes were exchanged for the equivalent amount of 4.95% Notes issued by KCS. The 4.95% Notes bear interest at 4.95% per annum, and will mature on August 15, 2045. Interest on the 4.95% Notes is payable semi-annually on June 1 and December 1 of each year to the holders of record at the close of business on the immediately preceding May 15 and November 15. As of December 31, 2020, $499.2 million aggregate principal amount of the 4.95% Notes was outstanding.

The 3.125% Notes. KCS issued $250.0 million in aggregate principal amount of the 3.125% Notes on May 16, 2016. The 3.125% Notes bear interest at 3.125% per annum, and will mature on June 1, 2026. Interest on the 3.125% Notes is payable semi-annually on June 1 and December 1 of each year to the holders of record at the close of business on the immediately preceding May 15 and November 15. As of December 31, 2020, $250.0 million aggregate principal amount of the 3.125% Notes was outstanding.

The 4.70% Notes. KCS issued $500.0 million in aggregate principal amount of the 4.70% Notes on May 3, 2018. The 4.70% Notes bear interest at 4.70% per annum, and will mature on May 1, 2048. Interest on the 4.70% Notes is payable semi-annually on May 1 and November 1 of each year to the holders of record at the close of business on the immediately preceding April 15 and October 15. As of December 31, 2020, $500.0 million aggregate principal amount of the 4.70% Notes was outstanding.

The 2.875% Notes. KCS issued $425.0 million in aggregate principal amount of the 2.875% Notes on November 18, 2019. The 2.875% Notes bear interest at 2.875% per annum, and will mature on November 15, 2029. Interest on the 2.875% Notes is payable semi-annually on May 15 and November 15 of each year to the holders of record at the close of business on the immediately preceding May 1 and November 1. As of December 31, 2020, $425.0 million aggregate principal amount of the 2.875% Notes was outstanding.

The 4.20% Notes. KCS issued $425.0 million in aggregate principal amount of the 4.20% Notes on November 18, 2019. The 4.20% Notes bear interest at 4.20% per annum, and will mature on November 15, 2069. Interest on the 4.20% Notes is payable semi-annually on May 15 and November 15 of each year to the holders of record at the close of business on the immediately preceding May 1 and November 1. As of December 31, 2020, $425.0 million aggregate principal amount of the 4.20% Notes was outstanding.

The 3.50% Notes. KCS issued $550.0 million in aggregate principal amount of the 3.50% Notes on April 22, 2020. The 3.50% Notes bear interest at 3.50% per annum, and will mature on May 1, 2050. Interest on the 3.50% Notes is payable semi-annually on May 1 and November 1 of each year to the holders of record at the close of business on the immediately preceding April 15 and October 15. As of December 31, 2020, $550.0 million aggregate principal amount of the 3.50% Notes was outstanding.

Note Guarantees

The Notes are unconditionally guaranteed, jointly and severally, on an unsecured senior basis, by each of KCS's current and future Domestic Subsidiaries that from time to time Guarantees the applicable Credit Agreement or any other Debt of KCS or any of KCS's Significant Subsidiaries that is a Guarantor. The obligations of each Guarantor under its Note Guarantee are limited as necessary to prevent that Note

Guarantee from constituting a fraudulent conveyance under applicable law. For the avoidance of doubt, KCSM and any other foreign Subsidiaries of KCS do not and will not Guarantee the Notes.

The Note Guarantee of a Guarantor will be released:

(1) in connection with any sale, disposition or transfer of all or substantially all of the assets of that Guarantor (including by way of merger or consolidation) to a Person that is not (either before or after giving effect to such transaction) KCS or a Guarantor;
(2) in connection with any sale, disposition or transfer of all of the Capital Stock of that Guarantor to a Person that is not (either before or after giving effect to such transaction) KCS or a Guarantor;
(3) upon the release or discharge of such Guarantors' Guarantee of the applicable Credit Agreement or under the Debt that triggered such Guarantor's Note Guarantee;
(4) upon the liquidation or dissolution of such Guarantor; provided that no Default or Event of Default shall occur as a result thereof or has occurred and is continuing; or
(5) upon defeasance or satisfaction and discharge of the Indenture as provided below under the captions "—Legal Defeasance and Covenant Defeasance" and "—Satisfaction and Discharge."

Ranking

The Notes are KCS's general unsecured senior obligations and rank equally in right of payment with all existing and future senior indebtedness of KCS and senior in right of payment to all of KCS's future subordinated indebtedness. The Notes are effectively subordinated to KCS's secured indebtedness, if any, to the extent of the value of the assets securing such indebtedness and are structurally subordinated to all liabilities of any of KCS's subsidiaries that are not Guarantors.

Each Note Guarantee is a general unsecured senior obligation of that Guarantor, ranks equally in right of payment with all existing and future senior indebtedness of that Guarantor and senior in right of payment to any future subordinated indebtedness of that Guarantor. Each Note Guarantee is effectively subordinated to any existing and future secured indebtedness of that Guarantor to the extent of the value of any collateral securing such indebtedness.

Payment on the Notes

Principal of, premium, if any, and interest on the Notes is payable, and the Notes may be exchanged or transferred, at the office of the paying agent in the City of New York; provided that, at KCS's option, payment of interest may be made by check mailed to the holders at their addresses as they appear in the Notes register.

Optional Redemption

General. Prior to the applicable Par Call Date, each series of Notes is redeemable in whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to the greater of (i) 100% of the principal amount of the Notes to be redeemed and (ii) the sum of the present values of the remaining scheduled payments of principal and interest on such series of Notes to be redeemed that would have been made if such Notes matured on the Par Call Date (exclusive of interest accrued to the date of redemption) discounted to the date of redemption on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the then-current Treasury Rate, plus (a) 20 basis points for the 3.85% Notes, the 3.00% Notes and the 2.875% Notes, (b) 25 basis points for the 4.30% Notes, the 3.125% Notes and the 4.70% Notes, (c) 30 basis points for the 4.95% Notes and the 4.20% Notes and (d) 35 basis points for the 3.50% Notes; plus, in each case, accrued interest thereon to but excluding the redemption date. On or after the applicable Par Call Date, the applicable series of Notes is redeemable in

whole or in part at any time and from time to time, at KCS's option, at a redemption price equal to 100% of the principal amount of the Notes to be redeemed plus accrued interest thereon to but excluding the redemption date.

Selection and Notice. If less than all of any series of Notes are to be redeemed at any time, the trustee will select the Notes of such series to be redeemed in compliance with the requirements of the principal national securities exchange, if any, on which such series of Notes is listed or, if such series of Notes is not listed on a national securities exchange, on a pro rata basis, by lot or by such other method as the applicable trustee in its sole discretion shall deem to be fair and appropriate; provided that no Note of $2,000 in principal amount or less shall be redeemed in part.

Notice of the redemption will be mailed to holders of a series of Notes to be redeemed by first-class mail at least 30 days but not more than 60 days prior to the redemption date, except that redemption notices may be mailed more than 60 days prior to a redemption date if the notice is issued in connection with a defeasance of such series of Notes or a satisfaction and discharge of the Indenture. Notices of redemption may not be conditional.

If any series of Note is to be redeemed in part only, the notice of redemption that relates to such series of Note shall state the portion of the principal amount of such series of Notes that is to be redeemed. A Note in principal amount equal to the unredeemed portion thereof will be issued in the name of the holder thereof upon cancellation of the original Note. On and after the redemption date, interest will cease to accrue on such series of Notes or portions of them called for redemption unless KCS defaults in making the applicable redemption price.

Certain Covenants

Limitation on Secured Indebtedness and Indebtedness of KCS's Subsidiaries that are not Guarantors

If KCS or any of KCS's Significant Subsidiaries that is a Guarantor creates or permits any lien of any kind upon (1) any stock, whether owned on the applicable Closing Date or thereafter acquired, of any of KCS's Significant Subsidiaries that is a Guarantor or (2) any indebtedness, whether owned on the applicable Closing Date or thereafter acquired, of KCS or any of KCS's Significant Subsidiaries that is a Guarantor, in each case, to secure any Debt (other than the applicable Notes) of KCS, any of KCS's Subsidiaries or any other person, KCS will cause the outstanding Notes to be secured equally and ratably with that Debt, unless the aggregate principal amount of all such secured Debt then outstanding (together with any Debt outstanding under clauses (1), (3), (4) and (5) of the following paragraph) would not exceed 10.0% of KCS's Consolidated Net Assets. This provision does not restrict any other property of KCS or its Subsidiaries. Subject to the following paragraph, the Indenture does not prohibit the sale by KCS or any of its Subsidiaries of any stock or indebtedness of any Subsidiary, including any Significant Subsidiary.

In addition, KCS shall not permit any Subsidiary of KCS that is not a Guarantor to incur any Debt, except (1) Debt with a final maturity of not more than 365 days, (2) intercompany Debt owed to KCS or any of its Subsidiaries, (3) Debt of any joint venture to which KCS or any of its Subsidiaries is a party, (4) any Existing KCSM Notes and any Secured Debt of any Subsidiary of KCS that is not a Guarantor, in each case, outstanding on the applicable Closing Date and (5) Debt not otherwise permitted by this paragraph in an aggregate principal amount, at any one time outstanding, not to exceed $150.0 million less the aggregate principal amount of any Existing KCSM Notes outstanding at the time of such incurrence (but not less than $0); *provided* that the limitations set forth in this paragraph shall not apply to Meridian Speedway, LLC.

Change of Control Repurchase Event

If a Change of Control Repurchase Event occurs, KCS will be required to make an offer to each holder with respect to a series of Notes to repurchase all or any part (equal to $2,000 or an integral multiple of $1,000 in excess thereof) of that holder's Notes at a repurchase price in cash equal to 101% of the aggregate principal amount of the Notes repurchased plus accrued interest, if any, to, but excluding, the date of repurchase. Within 30 days following a Change of Control Repurchase Event or, at KCS's option, prior to a Change of Control, but after the public announcement of the Change of Control, KCS will mail a notice to each holder of the Notes, with a copy to the applicable trustee, describing the transaction or transactions that constitute or may constitute the Change of Control Repurchase Event and offering to repurchase the Notes on the payment date specified in the notice, which date will be no earlier than 30 days and no later than 60 days from the date such notice is mailed. The notice shall, if mailed prior to the date of consummation of the Change of Control, state that the offer to purchase is conditioned on a Change of Control Repurchase Event occurring on or prior to the payment date specified in the notice. KCS will comply with the requirements of Rule 14e-1 under the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), and any other securities laws and regulations thereunder to the extent those laws and regulations are applicable in connection with the repurchase of the Notes as a result of a Change of Control Repurchase Event. To the extent that the provisions of any securities laws or regulations conflict with the Change of Control Repurchase Event provisions of the Notes, KCS will comply with the applicable securities laws and regulations and will not be deemed to have breached KCS's obligations under the Change of Control Repurchase Event provisions of the Notes by virtue of such conflict.

On the repurchase date following a Change of Control Repurchase Event, KCS will, to the extent lawful:

(1) accept for payment all Notes or portions of Notes properly tendered pursuant to KCS's offer;

(2) deposit with the paying agent an amount equal to the aggregate purchase price in respect of all Notes or portions of Notes properly tendered; and

(3) deliver or cause to be delivered to the trustee the Notes properly accepted, together with an officer's certificate stating the aggregate principal amount of Notes being purchased by KCS.

The paying agent will promptly mail to each holder of the Notes that are properly tendered the purchase price for the Notes, and the applicable trustee will promptly authenticate and mail (or cause to be transferred by book-entry) to each holder a new Note of the applicable series equal in principal amount to any unpurchased portion of any Notes surrendered; *provided* that each new Note will be in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof.

KCS will not be required to make an offer to repurchase Notes of a series upon a Change of Control Repurchase Event if (1) a third party makes such an offer in the manner, at the times and otherwise in compliance with the requirements for an offer made by KCS and such third party purchases all such Notes properly tendered and not withdrawn under its offer or (2) notice of redemption for all outstanding Notes of such series has been given pursuant to the Indenture as described above under the caption "—Optional Redemption."

Merger, Consolidation or Sale of Assets

Neither KCS nor any Guarantor will consolidate with, merge with or into, or sell, assign, convey, transfer, lease or otherwise dispose of all or substantially all of its property and assets (as an entirety or

substantially as an entirety in one transaction or a series of related transactions) to, any Person or permit any Person to merge with or into KCS or such Guarantor unless:

(1) KCS or such Guarantor shall be the continuing Person, or the Person (if other than KCS or such Guarantor) formed by such consolidation or into which KCS or such Guarantor is merged or that acquired or leased such property and its assets shall be a corporation organized and validly existing under the laws of the United States of America, any state thereof or the District of Columbia (or in the case of a Guarantor, a corporation, partnership, limited liability company or similar entity organized and validly existing under the laws of the jurisdiction under which such Guarantor was organized) and shall expressly assume, by a supplemental indenture, executed and delivered to the trustee, in form reasonably satisfactory to the trustee, all of the obligations of KCS or such Guarantor under the Notes, the Note Guarantee and the Indenture, as applicable; *provided* that this clause (1) shall not apply with respect to a Guarantor whose Note Guarantee is released as described in the second paragraph under the caption "—Note Guarantees";

(2) immediately after giving effect to such transaction, no Default or Event of Default shall have occurred and be continuing; and

(3) KCS delivers to the trustee an officer's certificate and an opinion of counsel, in each case stating that such consolidation, merger, sale, assignment, conveyance, transfer, lease or other deposition and such supplemental indenture complies with this covenant.

Events of Default

Each of the following is an "Event of Default" with respect to the Notes of a series:

(1) default in the payment of principal of (or premium, if any, on) any Note of such series when the same becomes due at maturity, upon acceleration, redemption or otherwise;

(2) default in the payment of interest on any Note of such series when due and such default continues for a period of 30 days;

(3) default in the performance of any covenant of KCS or a Guarantor in the Indenture (other than a default specified in clause (1) or (2) above), and such default continues for a period of 90 days after written notice by the applicable trustee or the holders of 25% or more in aggregate principal amount of the Notes of such series;

(4) a court having jurisdiction in the premises enters a decree or order for:

(A) relief in respect of KCS or a Guarantor in an involuntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect,

(B) appointment of a receiver, liquidator, assignee, custodian, trustee, sequestrator or similar official for KCS or a Guarantor or for all or substantially all of the property and assets of KCS or a Guarantor, or

(C) the winding-up or liquidation of the affairs of KCS or a Guarantor;

and, in each case, such decree or order shall remain unstayed and in effect for a period of 30 consecutive days with respect to the 3.85% Notes, the 3.00% Notes, the 4.30% Notes, the 4.95% Notes, the 3.125% Notes and the 4.70% Notes and for a period of 45 consecutive days with respect to the 2.875% Notes, the 4.20% Notes and the 3.50% Notes;

(5) KCS or a Guarantor:

(A) commences a voluntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect, or consents to the entry of an order for relief in an involuntary case under any such law,

(B) consents to the appointment of or taking possession by a receiver, liquidator, assignee, custodian, trustee, sequestrator or similar official for KCS or a Guarantor or for all or substantially all of the property and assets of KCS or a Guarantor, or

(C) effects any general assignment for the benefit of creditors;

(6) any Note Guarantee with respect to the Notes of such series ceases to be in full force and effect (except as contemplated by the terms of the Indenture) or any Guarantor or Person acting on behalf of such Guarantor denies or disaffirms such Guarantor's obligations under the Indenture or any Note Guarantee with respect to such series of Notes and such default continues for a period of 10 days after written notice by the applicable trustee or the holders of 25% or more in aggregate principal amount of the Notes of such series; and

(7) (A) the Concession Title shall cease to grant to KCSM the rights provided therein as of the applicable Closing Date and such cessation has had a material adverse effect on KCS and its Subsidiaries taken as a whole,

(B) (x) the Concession Title shall for any reason be terminated (other than as a result of the expiration or termination of the Concession Title in June 2047 or, if extended, on any other expiration date pursuant to its terms) and not reinstated within 30 days or (y) rights provided therein which were originally exclusive to KCSM shall become nonexclusive and the cessation of such exclusivity has had a material adverse effect on KCS and its Subsidiaries taken as a whole, or

(C) the operations of the Northeast Rail Lines shall be commandeered or repossessed (*a requisa*) for a period of 90 days or more.

If an Event of Default described above shall have occurred and is continuing, either the applicable trustee or the holders of at least 25% in aggregate principal amount of such series of Notes then outstanding may declare all outstanding Notes of such series to be due and payable immediately. The holders of a majority in aggregate principal amount of the Notes of such series then outstanding may, by notice to the trustee, on behalf of the holders of all of Notes of such series, rescind an acceleration or waive any existing Default or Event of Default and its consequences under the Indenture, except a continuing Default or Event of Default in the payment of interest or premium, if any, on, or the principal of, the Notes. For information as to the waiver of Defaults, see "—Amendment, Supplement and Waiver."

The holders of a majority in aggregate principal amount of such series of Notes then outstanding may direct the time, method and place of conducting any proceeding for any remedy available to the applicable trustee or exercising any trust or power conferred on the trustee with respect to such series of Notes. However, the trustee may refuse to follow any direction that conflicts with law or the Indenture, that may involve the trustee in personal liability, or that the trustee determines in good faith may be unduly prejudicial to the rights of holders of such series of Notes not joining in the giving of such direction and may take any other action it deems proper that is not inconsistent with any such direction received from holders of such series of Notes. A holder may not pursue any remedy with respect to the Indenture or the Notes of a series unless:

- the holder gives the trustee written notice of a continuing Event of Default;

- the holders of at least 25% in aggregate principal amount of such series of Notes then outstanding make a written request to the trustee to pursue the remedy;
- such holder or holders offer the trustee indemnity satisfactory to the trustee against any costs, liability or expense;
- the trustee does not comply with the request within 60 days after receipt of the request and the offer of indemnity; and
- during such 60-day period, the holders of a majority in aggregate principal amount of such series of Notes then outstanding do not give the trustee a direction that is inconsistent with the request.

However, such limitations do not apply to the right of any holder of Notes of a series to receive payment of the principal of, premium, if any, or interest on, such series of Notes or to bring suit for the enforcement of any such payment, on or after the due date expressed in such series of Notes, which right shall not be impaired or affected without the consent of the holder.

The Indenture requires certain of the KCS's officers to certify, on or before a date not more than 90 days after the end of each fiscal year, that a review has been conducted of KCS's activities and those of the Guarantors and of KCS's and the Guarantors' performance under the Indenture and that, to the best of such person's knowledge, KCS and the Guarantors have fulfilled all obligations thereunder, or, if there has been a Default in the fulfillment of any such obligation, specifying each such Default and the nature and status thereof. KCS will also be obligated to notify the applicable trustee of any Default or Defaults in the performance of any covenants or agreements under the Indenture.

Legal Defeasance and Covenant Defeasance

KCS may at any time, at the option of its Board of Directors evidenced by a resolution set forth in an officer's certificate, elect to have all of its obligations with respect to the outstanding Notes of each series and all obligations of the Guarantors with respect to the Note Guarantees thereof discharged ("**Legal Defeasance**") except for:

(1) the rights of holders of such series of Notes then outstanding to receive payments in respect of the principal of, or interest, or premium, if any, on, such Notes when such payments are due from the trust referred to below;

(2) KCS's obligations with respect to such series of Notes concerning issuing temporary Notes, registration of Notes, mutilated, destroyed, lost or stolen Notes and the maintenance of an office or agency for payment and money for security payments held in trust;

(3) the rights, powers, trusts, duties and immunities of the trustee, and the obligations of KCS and the Guarantors in connection therewith; and

(4) the Legal Defeasance and Covenant Defeasance provisions of the Indenture.

In addition, KCS may, at its option and at any time, elect to have the obligations of KCS and the Guarantors released with respect to certain covenants that are described in the Indenture ("**Covenant Defeasance**") and thereafter any omission to comply with those covenants will not constitute a Default or Event of Default. In the event Covenant Defeasance occurs, certain events (not including non-payment, bankruptcy, receivership, rehabilitation and insolvency events) described under "—Events of Default" will no longer constitute an Event of Default.

In order to exercise either Legal Defeasance or Covenant Defeasance with respect to the Notes of a series:

(1) KCS must irrevocably deposit with the applicable trustee, in trust, for the benefit of the holders of the applicable series of Notes, cash in U.S. dollars, non-callable Government Securities, or a combination of cash in U.S. dollars and non-callable Government Securities, in amounts as will be sufficient, in the opinion of a nationally recognized investment bank, appraisal firm or firm of independent public accountants, to pay the principal of, premium, if any, and interest on, such series of Notes then outstanding on the Stated Maturity thereof or on the applicable redemption date, as the case may be, and KCS must specify whether such series of Notes are being defeased to such Stated Maturity or to a particular redemption date;

(2) in the case of Legal Defeasance, KCS must deliver to the trustee an opinion of counsel (or opinions of counsel) confirming that (x) KCS has received from, or there has been published by, the Internal Revenue Service a ruling or (y) since the date of the issuance of such series of Notes, there has been a change in the applicable U.S. federal income tax law, in either case to the effect that, and based thereon such opinion of counsel will confirm that, the holders of such series of Notes then outstanding will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such Legal Defeasance and will be subject to federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Legal Defeasance had not occurred;

(3) in the case of Covenant Defeasance, KCS must deliver to the trustee an opinion of counsel (or opinions of counsel) confirming that the holders of such series of Notes then outstanding will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such Covenant Defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Covenant Defeasance had not occurred;

(4) no Default or Event of Default has occurred and is continuing on the date of such deposit (other than a Default or Event of Default resulting from the borrowing of funds to be applied to such deposit or liens securing such borrowing) and the deposit will not result in a breach or violation of, or constitute a default under, any other instrument to which KCS is a party or by which KCS is bound;

(5) such Legal Defeasance or Covenant Defeasance will not result in a breach or violation of, or constitute a default under, any material agreement or instrument (other than the Indenture) to which KCS or any of its Subsidiaries is a party or by which KCS or any of its Subsidiaries is bound;

(6) KCS must deliver to the trustee an officer's certificate stating that the deposit was not made by KCS with the intent of preferring the holders of such series of Notes over the other creditors of KCS with the intent of defeating, hindering, delaying or defrauding any creditors of KCS or others; and

(7) KCS must deliver to the trustee an officer's certificate and an opinion of counsel, each stating that all conditions precedent relating to the Legal Defeasance or the Covenant Defeasance have been complied with.

Satisfaction and Discharge

The Indenture with respect to the Notes of a series will be discharged and will cease to be of further effect as to all Notes of a series issued thereunder when:

(1) either:

(A) all Notes of such series that have been authenticated thereunder, except lost, stolen or destroyed Notes that have been replaced or paid and Notes for whose payment money has been deposited in trust and thereafter repaid to KCS, have been delivered to the trustee for cancellation; or

(B) all Notes of such series issued thereunder that have not been delivered to the trustee for cancellation have become due and payable by reason of the mailing of a notice of redemption or otherwise or will become due and payable within one year and KCS has irrevocably deposited or caused to be deposited with the trustee as trust funds in trust solely for the benefit of the holders of such series of Notes, cash in U.S. dollars, non-callable Government Securities, or a combination of cash in U.S. dollars and non-callable Government Securities, in amounts as will be sufficient, without consideration of any reinvestment of interest, to pay and discharge the entire indebtedness on such series of Notes not delivered to the trustee for cancellation for principal, premium, if any, and accrued interest to the Stated Maturity or redemption, as the case may be;

(2) no Default or Event of Default has occurred and is continuing on the date of the deposit (other than a Default or Event of Default resulting from the borrowing of funds to be applied to such deposit or liens securing such borrowing) and the deposit will not result in a breach or violation of, or constitute a default under, any other instrument to which KCS is a party or by which KCS is bound;

(3) KCS has paid or caused to be paid all sums payable by it under the Indenture with respect to the Notes of such series; and

(4) KCS has delivered irrevocable instructions to the trustee under the Indenture to apply the deposited money toward the payment of the Notes of such series issued thereunder at Stated Maturity or on the redemption date, as the case may be.

In addition, KCS must deliver an officer's certificate and an opinion of counsel to the trustee stating that all conditions precedent to satisfaction and discharge with respect to the Notes of such series have been satisfied.

Amendment, Supplement and Waiver

Except as provided in the next two succeeding paragraphs, the Indenture with respect to the Notes of a series, the Notes of such series and the Note Guarantees thereof may be amended or supplemented with the consent of the holders of a majority in aggregate principal amount of such series of Notes then outstanding (including consents obtained in connection with a purchase of, or tender offer or exchange offer for, such series of Notes), and any existing Default or Event of Default or compliance with any provision of the Indenture with respect to the Notes of such series, the Notes of such series or Note Guarantee thereof may be waived with the consent of the holders of a majority in aggregate principal amount of then outstanding Notes of such series (including consents obtained in connection with a purchase of, or tender offer or exchange offer for, such series of Notes).

Without the consent of each holder of Notes of a series affected, an amendment, supplement or waiver may not:

- change the Stated Maturity of the principal of, or any installment of interest on, any such series of Note;
- reduce the principal amount of, or premium, if any, or interest on, any such series of Note;
- change the place or currency of payment of principal of, or premium, if any, or interest on, any such series of Note;
- impair the right to institute suit for the enforcement of any payment on or with respect to any such series of Note;
- reduce the percentage or principal amount of such series of Notes outstanding, the consent of whose holders is necessary to modify or amend the Indenture or waive compliance with certain provisions of the Indenture or waive certain Defaults;
- waive a Default in the payment of principal of, premium, if any, or interest on, the Notes of such series; or
- release any Guarantor from any of its obligations under its applicable Note Guarantee or the Indenture, except as set forth under the caption "—Note Guarantees."

Notwithstanding the preceding, without the consent of any holder of a series of Notes, KCS, the Guarantors and the applicable trustee may amend or supplement the Indenture, the applicable series of Notes and the Note Guarantees with respect to the Notes of such series:

- to cure any ambiguity, omission, mistake, defect or inconsistency;
- to provide for uncertificated Notes in addition to or in place of certificated Notes of such series;
- to provide for the assumption of the obligations of KCS or a Guarantor to holders of the Notes of such series and the Note Guarantees with respect to the Notes of such series in the case of a merger or consolidation or a sale, assignment, transfer, conveyance, lease or other disposition of all or substantially all of the assets of KCS or such Guarantor, as applicable, in accordance with the terms of the Indenture;
- to make any change that would provide any additional rights or benefits to the holders of such series of Notes or that does not adversely affect the legal rights under the Indenture of any such holder;
- to comply with requirements of the SEC in order to effect or maintain the qualification of the Indenture under the Trust Indenture Act of 1939, as amended;
- to conform the text of the Indenture, the Note Guarantees with respect to the Notes of such series and the Notes of such series to any provision of the relevant "Description of Notes" in the applicable prospectus or the applicable confidential offering memorandum and consent solicitation statement to the extent that such provision in such "Description of Notes" was intended to be a verbatim recitation of a provision of the applicable Indenture or the Notes of such series;
- to add a Guarantor or release any Guarantor from its Note Guarantee with respect to the Notes of such series if such release is in accordance with the terms of the applicable Indenture; or
- to provide for the issuance of Additional Notes of such series in accordance with the limitations set forth in the Indenture.

Governing Law

The Notes, the Note Guarantees and the Indenture are governed by the laws of the State of New York.

Information Concerning the Trustee

KCS and its Subsidiaries maintain ordinary banking relationships with U.S. Bank National Association and its affiliates. In addition, U.S. Bank acts as trustee, transfer agent, principal, payment agent and registrar with respect to other debt securities issued by KCS and its Subsidiaries, and may do so again for future issuances of debt securities by KCS and its Subsidiaries.

Certain Definitions

Set forth below is a summary of certain of the defined terms used in the covenants and other provisions of the Indenture. Reference is made to the Indenture for the full definitions of all terms as well as any other capitalized term used herein for which no definition is provided.

"Below Investment Grade Ratings Event" means, with respect to a series of Notes, on any day within the 60-day period (which period shall be extended so long as the rating of such series of Notes is under publicly announced consideration for a possible downgrade by any of the Rating Agencies) after the earlier of (1) the occurrence of a Change of Control or (2) public notice by KCS of the occurrence of a Change of Control or KCS's intention to effect a Change of Control, that such series of Notes is rated below Investment Grade by two of the three Rating Agencies. Notwithstanding the foregoing, a Below Investment Grade Ratings Event otherwise arising by virtue of a particular reduction in rating shall not be deemed to have occurred in respect of a particular Change of Control (and thus shall not be deemed a Below Investment Grade Ratings Event for purposes of the definition of Change of Control Repurchase Event) if the Rating Agencies making the reduction in rating to which this definition would otherwise apply do not announce or publicly confirm or inform the trustee in writing at KCS's request that the reduction was the result, in whole or in part, of any event or circumstance comprised of or arising as a result of, or in respect of, the applicable Change of Control (whether or not the applicable Change of Control shall have occurred at the time of the ratings event).

"Business Day" means any calendar day that is not a Saturday, Sunday or legal holiday in New York, New York and on which banking institutions and trust companies are open for business in New York, New York.

"Capital Stock" means, with respect to any Person, any and all shares, interests, participations or other equivalents (however designated, whether voting or non-voting) in the equity of such Person, whether now outstanding or issued after the applicable Closing Date.

"Change of Control" means the consummation of any transaction (including, without limitation, any merger or consolidation) the result of which is that any "person" or "group" (as those terms are used in Section 13(d)(3) of the Exchange Act), other than KCS and its Subsidiaries, becomes the beneficial owner (as defined in Rules 13d-3 and 13d-5 under the Exchange Act), directly or indirectly, of more than 50% of the combined voting power of the total Voting Stock of KCS or other Voting Stock into which KCS's Voting Stock is reclassified, consolidated, exchanged or changed, measured by voting power rather than number of shares.

"Change of Control Repurchase Event" means the occurrence of both a Change of Control and a Below Investment Grade Ratings Event.

"Closing Date" means the date on which the applicable Notes were originally issued under the Indenture.

"Comparable Treasury Issue" means, with respect to each series of Notes, the U.S. Treasury security selected by an Independent Investment Banker as having a maturity comparable to the remaining term (as measured from the date of redemption assuming, in the case of the 2.875% Notes, the 4.20% Notes and the 3.50% Notes, such Notes matured on the applicable Par Call Date) ("**Remaining Life**") of the Notes of the applicable series to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the Remaining Life.

"Comparable Treasury Price" means, with respect to any redemption date, the average of the Reference Treasury Dealer Quotations for such redemption date.

"Concession Title" means KCSM's right for a period of 30 years to be the exclusive provider (subject to certain trackage rights) of freight transportation services over the Northeast Rail Lines and for an additional 20 years to be a non-exclusive provider of such services granted by the Mexican government pursuant to the Concession Title, subject in all cases to the terms and conditions of the Concession Title, as in effect on June 23, 1997 and as amended on February 12, 2001, November 22, 2006, December 31, 2013, December 20, 2017 and April 27, 2018.

"Consolidated Net Assets" means total assets after deducting therefrom all current liabilities as set forth on the most recent publicly filed balance sheet of KCS and its consolidated subsidiaries and computed in accordance with generally accepted accounting principles.

"Credit Agreement" means (1) with respect to the 3.85% Notes, the 3.00% Notes, the 4.30% Notes, the 4.95% Notes, the 3.125% Notes and the 4.70% Notes, the credit agreement, dated as of December 9, 2015, among KCS, the guarantors described therein, the lenders thereunder and the other parties thereto, as amended or supplemented from time to time, and (2) with respect to the 2.875% Notes, the 4.20% Notes and the 3.50% Notes, the credit agreement, dated as of March 8, 2019, among KCS, the guarantors described therein, the lenders thereunder and the other parties thereto, as amended or supplemented from time to time.

"Debt" means indebtedness for money borrowed or indebtedness evidenced by a bond, note, debenture or other evidence of indebtedness.

"Default" means any event that is, or after notice or passage of time or both would be, an Event of Default.

"Domestic Subsidiary" means a Subsidiary of KCS that was formed under the laws of the United States or any state of the United States or the District of Columbia.

"Existing KCSM Notes" means any 3.00% Senior Notes due 2023 issued by KCSM.

"Fitch" means Fitch Ratings Inc. and any successor thereto.

"Government Securities" means direct obligations of, obligations fully and unconditionally guaranteed by, or participation in pools consisting solely of (or repurchase transactions relating to) obligations of or obligations fully and unconditionally guaranteed by the United States of America for the payment of which guarantee or obligations the full faith and credit of the United States of America is pledged and which are not callable or redeemable at the option of KCS.

"Guarantee" means any obligation, contingent or otherwise, of any Person directly or indirectly guaranteeing any Debt of any other Person. The term "Guarantee" used as a verb has a corresponding meaning.

"Guarantor" means each subsidiary of KCS that executes a Note Guarantee, and its successors and assigns, in each case, until the Note Guarantee of such Person has been released in accordance with the provisions of the Indenture.

"Independent Investment Banker" means one of the Reference Treasury Dealers appointed by KCS.

"Investment Grade" means a rating of Baa3 or better by Moody's (or its equivalent under any successor rating categories of Moody's), a rating of BBB- or better by S&P (or its equivalent under any successor rating categories of S&P), a rating of BBB- or better by Fitch (or its equivalent under any successor rating categories of Fitch) and the equivalent investment grade credit rating from any additional Rating Agency or Rating Agencies selected by KCS.

"KCSM" means Kansas City Southern de México, S.A. de C.V., a sociedad anónima de capital variable organized under the laws of the United Mexican States.

"Moody's" means Moody's Investors Service, Inc. and any successor thereto.

"Northeast Rail Lines" means that portion of the Mexican railroad system that is the subject of the Concession Title.

"Note Guarantee" means each Guarantee of the obligations with respect to a series of Notes issued by a Person pursuant to the terms of the applicable Indenture.

"Par Call Date" means (1) with respect to the 3.85% Notes, August 15, 2023 (three months prior to the maturity date of the 3.85% Notes), (2) with respect to the 3.00% Notes, February 15, 2023 (three months prior to the maturity date of the 3.00% Notes), (3) with respect to the 4.30% Notes, November 15, 2042 (six months prior to the maturity date of the 4.30% Notes), (4) with respect to the 4.95% Notes, February 15, 2045 (six months prior to the maturity date of the 4.95% Notes), (5) with respect to the 3.125% Notes, March 1, 2026 (three months prior to the maturity date of the 3.125% Notes), (6) with respect to the 4.70% Notes, November 1, 2047 (six months prior to the maturity date of the 4.70% Notes), (7) with respect to the 2.875% Notes, August 15, 2029 (three months prior to the maturity date of the 2.875% Notes), (8) with respect to the 4.20% Notes, May 15, 2069 (six months prior to the maturity date of the 4.20% Notes)and (9) with respect to the 3.50% Notes, November 1, 2049 (six months prior to the maturity date of the 3.50% Notes).

"Person" means any individual, corporation, partnership, limited liability company, joint venture, association, joint stock company, trust, unincorporated organization, government or agency or political subdivision thereof or any other entity.

"Rating Agency" means (1) each of Moody's, S&P and Fitch and (2) if any of Moody's, S&P or Fitch ceases to rate the Notes or fails to make a rating of the Notes publicly available for reasons outside of KCS's control, a "nationally recognized statistical rating organization" as defined in Section 3(a)(62) of the Exchange Act, selected by KCS (as certified by a resolution of KCS's Board of Directors) as a replacement agency for Moody's, S&P or Fitch, or all of them, as the case may be, with respect to the Notes.

"Reference Treasury Dealer" means (1) with respect to the 3.85% Notes, the 3.00% Notes, the 4.30% Notes and the 4.95% Notes, each of BofA Securities, Inc., Citigroup Global Markets Inc., J.P.

Morgan Securities LLC and Morgan Stanley & Co. LLC (or their respective affiliates that are primary Government Securities dealers) and their respective successors and (2) with respect to the 3.125% Notes, the 4.70% Notes, the 2.875% Notes, the 4.20% Notes and the 3.50% Notes, each of BofA Securities, Inc., J.P. Morgan Securities LLC and Morgan Stanley & Co. LLC (or their respective affiliates that are primary Government Securities dealers) and their respective successors; provided, however, that if any Reference Treasury Dealer is not at the applicable time a primary Government Securities dealer (a "**Primary Treasury Dealer**"), KCS shall substitute therefor another Primary Treasury Dealer selected by it.

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue for the applicable Notes (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by such Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding such redemption date.

"S&P" means S&P Global Ratings, a division of S&P Global Inc., and any successor thereto.

"Secured Debt" means Debt secured by a lien, mortgage, pledge, charge, security interest or encumbrance of any kind on any property or assets.

"Significant Subsidiary" means, at any date of determination, any of KCS's Subsidiaries that, together with its Subsidiaries, (i) for KCS's most recent fiscal year, accounted for more than 10.0% of the consolidated revenues of KCS and its Subsidiaries or (ii) as of the end of such fiscal year, was the owner of more than 10.0% of the consolidated assets of KCS and its Subsidiaries, in each case as set forth on KCS's most recently available consolidated financial statements for such fiscal year.

"Stated Maturity" means, with respect to any installment of interest or principal on any series of indebtedness, the date on which the payment of interest or principal is scheduled to be paid in the documentation governing such indebtedness, and will not include any contingent obligations to repay, redeem or repurchase any such interest or principal prior to the date originally scheduled for the payment thereof.

"Subsidiary" means, with respect to any Person, any corporation, association or other business entity of which more than 50.0% of the voting power of the outstanding Voting Stock is owned, directly or indirectly, by such Person and one or more other Subsidiaries of such Person.

"Treasury Rate" means, on any redemption date, (i) the yield, under the heading which represents the average for the immediately preceding week, appearing in the most recently published statistical release designated "H.15(519)" or any successor publication which is published weekly by the Board of Governors of the Federal Reserve System and which establishes yields on actively traded U.S. Treasury securities adjusted to constant maturity under the caption "Treasury Constant Maturities," for the maturity corresponding to the applicable Comparable Treasury Issue (if no maturity is within three months before or after the Remaining Life, yields for the two published maturities most closely corresponding to such Comparable Treasury Issue shall be determined and the Treasury Rate shall be interpolated or extrapolated from such yields on a straight line basis, rounding to the nearest month) or (ii) if such release (or any successor release) is not published during the week preceding the calculation date or does not contain such yields, the rate per annum equal to the semi-annual equivalent yield to maturity of the related Comparable Treasury Issue, calculated using a price for that Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such redemption date. The Treasury Rate shall be calculated on the third Business Day preceding the redemption date.

"Voting Stock" means, with respect to any Person, all classes of Capital Stock of such Person then outstanding and entitled (without regard to the occurrence of any contingency) to vote in the election of directors, managers or trustees thereof.

Exhibit 31.1

PRINCIPAL EXECUTIVE OFFICER'S CERTIFICATION
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Patrick J. Ottensmeyer, certify that:

1. I have reviewed this annual report on Form 10-K of Kansas City Southern (the "registrant");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31.2

PRINCIPAL FINANCIAL OFFICER'S CERTIFICATION
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Michael W. Upchurch, certify that:

1. I have reviewed this annual report on Form 10-K of Kansas City Southern (the "registrant");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

U.S. Exchange Act Rule 14d-1(d) (*Cross-Border Third Party Tender Offer*) ☐

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933.

Emerging growth company ☐

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 7(a)(2)(B) of the Securities Act ☐

† The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act, or until this registration statement shall become effective on such date as the U.S. Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to Be Registered	Amount to Be Registered	Proposed Maximum Offering Price Per Share	Proposed Maximum Aggregate Offering Price	Amount of Registration Fee
Canadian Pacific Railway Limited common shares	264,723,380(1)	N/A	$16,669,128,225.64(2)	$1,545,228.19(3)

(1) Represents the maximum number of Canadian Pacific Railway Limited ("CPRL") common shares estimated to be issuable or subject to stock-based awards that may be assumed by the registrant upon the completion of the transaction described herein. The calculation of the number of CPRL common shares being registered is based on (a) the sum of (i) 90,789,609, an estimate of the maximum number of shares of common stock, par value $0.01 per share, of Kansas City Southern ("KCS") issued and outstanding as of September 27, 2021, and (ii) 1,000,744.6654, the maximum number of shares of KCS common stock issuable upon the exercise or settlement of KCS options and time-based and performance-based awards (collectively, the "KCS equity awards") with respect to KCS common stock (together, the "estimated number"), multiplied by (b) the exchange ratio of 2.884 CPRL common shares for each share of KCS common stock.

(2) Calculated pursuant to Rules 457(c), 457(f)(1) and 457(f)(3) promulgated under the Securities Act of 1933, as amended (the "U.S. Securities Act"), and solely for the purpose of calculating the registration fee. The proposed maximum aggregate offering price of the securities being registered was calculated based on (a) the product of (i) $271.60, the average of the high and low prices for shares of KCS common stock as reported on the New York Stock Exchange on September 24, 2021, multiplied by (ii) the estimated number (which represents the estimated maximum number of shares of KCS common stock that may be exchanged in the transactions contemplated by the merger agreement described herein, as described in footnote (1) above), minus (b) $8,261,131,829.89 (which represents the estimated aggregate amount of cash that will be paid by CPRL to the holders of shares of KCS common stock in the transactions contemplated by the merger agreement described herein). In accordance with Rule 416, this registration statement also covers an indeterminate number of CPRL common shares as may be issuable as a result of stock splits, stock dividends or similar transactions.

(3) The registration fee for the securities registered hereby has been calculated pursuant to Section 6(b) of the U.S. Securities Act, by multiplying the proposed maximum aggregate offering price for the securities by 0.0000927.

Table of Contents

The information contained in this proxy statement/prospectus is not complete and may be changed. A registration statement relating to these securities has been filed with the U.S. Securities and Exchange Commission. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This proxy statement/prospectus shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful.

PRELIMINARY—SUBJECT TO COMPLETION—DATED OCTOBER 1, 2021

PROXY STATEMENT OF KANSAS CITY SOUTHERN **PROSPECTUS OF CANADIAN PACIFIC RAILWAY LIMITED**

MERGER PROPOSED—YOUR VOTE IS VERY IMPORTANT

Dear Stockholders of Kansas City Southern:

On September 15, 2021, Kansas City Southern (which we refer to as "KCS"), Canadian Pacific Railway Limited (which we refer to as "CPRL"), Cygnus Merger Sub 1 Corporation, a direct wholly owned subsidiary of CPRL (which we refer to as "surviving merger sub") and Cygnus Merger Sub 2 Corporation, a direct wholly owned subsidiary of surviving merger sub (which we refer to as "first merger sub" and, together with surviving merger sub, the "merger subs"), entered into an Agreement and Plan of Merger (which, as it may be amended from time to time, we refer to as the "merger agreement") that provides for the acquisition of KCS by CPRL. On the terms and subject to the conditions set forth in the merger agreement, (1) first merger sub will merge with and into KCS (which we refer to as the "first merger") with KCS surviving the first merger as a wholly owned subsidiary of surviving merger sub, and (2) immediately following the effective time of the first merger (which we refer to as the "effective time"), KCS will merge with and into surviving merger sub (which we refer to as the "second merger," and, together with the first merger, the "transaction") with surviving merger sub surviving the second merger as a direct wholly owned subsidiary of CPRL.

At the effective time, each share of common stock, par value $0.01 per share, of KCS (which we refer to as "KCS common stock") issued and outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) that you own will be converted into the right to receive (a) 2.884 (which number we refer to as the "exchange ratio") CPRL common shares (which we refer to as the "CPRL common shares") and (b) $90.00 in cash, without interest (which we refer to, collectively, as the "merger consideration"), and each share of 4% noncumulative preferred stock of KCS, par value $25.00 (which we refer to as the "KCS preferred stock," and, together with the KCS common stock, the "KCS voting stock"), issued and outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) that you own will be converted into the right to receive $37.50 per share in cash, without interest (which we refer to as the "preferred merger consideration").

The exchange ratio is fixed and will not be adjusted to reflect changes in the price of KCS common stock or CPRL common shares prior to the effective time. The CPRL common shares issued in connection with the transaction will be listed on the New York Stock Exchange (which we refer to as the "NYSE") and the Toronto Stock Exchange (which we refer to as the "TSX"). Based on the number of shares of KCS common stock and CPRL common shares outstanding on [—], 2021, upon completion of the transaction, we expect that former holders of KCS common stock and KCS preferred stock (who we collectively refer to as "KCS stockholders") would own approximately [—]% of the outstanding CPRL common shares immediately after the first merger, persons who were CPRL shareholders immediately prior to the transaction would own approximately [—]% of the outstanding CPRL common shares. CPRL common shares are traded on the NYSE and the TSX under the symbol "CP." KCS

common stock and KCS preferred stock are traded on the NYSE under the symbols "KSU" and "KSU-P," respectively. We encourage you to obtain current quotes for the KCS common stock and CPRL common shares.

Because the exchange ratio is fixed, the market value of the merger consideration to holders of KCS common stock will fluctuate with the market price of the CPRL common shares and will not be known at the time that KCS stockholders vote on the transaction. Based on the closing price of CPRL common shares of $72.71 on the NYSE on August 9, 2021, the last full trading day prior to that on which CPRL submitted a revised offer to acquire KCS, the implied value of the merger consideration to holders of KCS common stock was approximately $299.70 per share of KCS common stock. On [—], 2021, the latest practicable trading day before the date of this proxy statement/prospectus, the closing price of CPRL common shares on the NYSE was $[—] per share, resulting in an implied value of the merger consideration to holders of KCS common stock of $[—] per share of KCS common stock.

At the special meeting of KCS's stockholders to be held on [—], 2021 (which we refer to as the "KCS special meeting"), KCS stockholders will be asked to consider and vote on (1) a proposal to adopt the merger agreement (which we refer to as the "KCS merger proposal"), (2) a proposal to approve, on a non-binding advisory basis, the compensation that may be paid or become payable to KCS's named executive officers that is based on or otherwise relates to the transaction and (3) a proposal to adjourn the KCS special meeting if there are insufficient votes to approve the KCS merger proposal or to ensure that any supplement or amendment to this proxy statement/prospectus is timely provided to KCS stockholders (which we collectively refer to as the "KCS proposals"). **The board of directors of KCS (which we refer to as the "KCS board") unanimously recommends that KCS stockholders vote "FOR" each of the KCS proposals at the KCS special meeting.**

We cannot complete the transaction unless the KCS merger proposal is approved by KCS stockholders. Your vote on these matters is very important, regardless of the number of shares you own. Whether or not you plan to attend the KCS special meeting, please promptly mark, sign and date the accompanying proxy card and return it in the enclosed postage-paid envelope or call the toll-free telephone number or use the internet as described in the instructions included with your proxy card in order to authorize the individuals named on your proxy card to vote your shares at the KCS special meeting.

This proxy statement/prospectus provides you with important information about the KCS special meeting, the transaction and each of the KCS proposals. We encourage you to read the entire document carefully, in particular the "Risk Factors" section on page 21 for a discussion of risks relevant to the transaction.

We look forward to the successful completion of the transaction.

As noted above, the KCS board unanimously recommends that KCS stockholders vote "FOR" the KCS merger proposal and each of the other KCS proposals.

Sincerely,

Patrick J. Ottensmeyer
President and Chief Executive Officer
Kansas City Southern

Sincerely,

Keith Creel
President and Chief Executive Officer
Canadian Pacific Railway Limited

NEITHER THE U.S. SECURITIES AND EXCHANGE COMMISSION NOR ANY U.S. STATE OR CANADIAN PROVINCIAL OR TERRITORIAL SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE SECURITIES TO BE ISSUED IN CONNECTION WITH THE TRANSACTION OR DETERMINED IF THIS PROXY STATEMENT/PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The date of this proxy statement/prospectus is [—], 2021, and it is first being mailed to KCS stockholders on or about [—], 2021.

ADDITIONAL INFORMATION

KCS and CPRL file annual, quarterly and other reports, proxy statements and other information with the U.S. Securities and Exchange Commission (which we also refer to as the "SEC"). This proxy statement/prospectus incorporates by reference important business and financial information about KCS and CPRL from documents that are not included in or delivered with this proxy statement/prospectus. For a listing of the documents incorporated by reference into this proxy statement/prospectus, see the section entitled "*Where You Can Find Additional Information*," on page 229. You can obtain copies of the documents incorporated by reference into this proxy statement/prospectus, without charge, from the SEC's website at www.sec.gov or on the System for Electronic Document Analysis and Retrieval (which we refer to as "SEDAR"), of the Canadian Securities Administrators, the Canadian equivalent of the SEC's system, at www.sedar.com.

You may also obtain copies of documents filed by KCS with the SEC from KCS's website at www.investors.kcsouthern.com under the tab "Financial Information" and then under the headings "Annual Reports & Proxy Statements" and "SEC Filings" and copies of documents filed by CPRL with the SEC and SEDAR from CPRL's website at investor.cpr.ca under the tab "Financials" and then under the headings "Annual Reports" and "SEC Filings."

We are not incorporating the contents of the websites of the SEC, KCS, CPRL or any other entity or any other website into this proxy statement/prospectus. We are providing the information about how you can obtain certain documents that are incorporated by reference into this proxy statement/prospectus at these websites only for your convenience.

You can also request copies of such documents incorporated by reference into this proxy statement/prospectus (excluding all exhibits, unless an exhibit has specifically been incorporated by reference into this proxy statement/prospectus), without charge, by requesting them in writing or by telephone from the appropriate company at the following addresses and telephone numbers:

Kansas City Southern
427 West 12th Street
Kansas City, Missouri 64105
Attention: Corporate Secretary
Telephone: 1-888-800-3690

Canadian Pacific Railway Limited
7550 Ogden Dale Road S.E.

proxy@mackenziepartners.com

You will not be charged for any of the documents that you request. If you would like to request documents, please do so by [—], 2021 (which is five business days before the date of the KCS special meeting) in order to receive them before the KCS special meeting.

ABOUT THIS PROXY STATEMENT/PROSPECTUS

This proxy statement/prospectus, which forms part of a registration statement on Form F-4 (File No. [—]) filed with the SEC by CPRL, constitutes a prospectus of CPRL under Section 5 of the U.S. Securities Act of 1933, as amended (which we refer to as the "U.S. Securities Act"), with respect to the CPRL common shares to be issued to holders of KCS common stock (which we refer to as "KCS common stockholders") pursuant to the Agreement and Plan of Merger, dated as of September 15, 2021, by and among CPRL, Cygnus Merger Sub 1 Corporation, Cygnus Merger Sub 2 Corporation and KCS, as it may be amended.

This proxy statement/prospectus also constitutes a notice of meeting and a proxy statement of KCS under Section 14(a) of the U.S. Securities Exchange Act of 1934, as amended (which we refer to as the "U.S. Exchange Act"), with respect to the KCS special meeting, at which KCS stockholders will be asked to consider and vote on, among other matters, a proposal to adopt the merger agreement.

You should rely only on the information contained in, or incorporated by reference into, this proxy statement/prospectus. No one has been authorized to provide you with information that is different from that contained in, or incorporated by reference into, this proxy statement/prospectus. This proxy statement/prospectus is dated [—], 2021. The information contained in this proxy statement/prospectus is accurate only as of that date or, in the case of information in a document incorporated by reference, as of the date of such document, unless the information specifically indicates that another date applies. Neither the mailing of this proxy statement/prospectus to KCS stockholders nor the issuance by CPRL of common shares under the merger agreement will create any implication to the contrary.

This proxy statement/prospectus does not constitute an offer to sell, or a solicitation of an offer to buy, any securities, or the solicitation of a proxy, in any jurisdiction in which it is unlawful to make any such offer or solicitation in such jurisdiction.

The information concerning CPRL and the merger subs contained in, or incorporated by reference into, this proxy statement/prospectus has been provided by CPRL, and information concerning KCS contained in, or incorporated by reference into, this proxy statement/prospectus has been provided by KCS.

Unless otherwise specified, currency amounts referenced in this proxy statement/prospectus are in U.S. dollars.

CPRL intends to mail to CPRL shareholders a management information circular relating to the special meeting of CPRL's shareholders to be held for the purpose of obtaining the approval of a majority of the votes cast by the holders of outstanding CPRL common shares represented in person or by proxy and entitled to vote on such matter in favor of the issuance of CPRL common shares in connection with the first merger. A copy of such circular will be made available on the website maintained by CPRL (investor.cpr.ca) and filed on SEDAR (www.sedar.com). The web address of CPRL has been included as an inactive textual reference only. The CPRL management information circular and website are not incorporated by reference into, and do not form a part of, this proxy statement/prospectus.

CURRENCY EXCHANGE RATE DATA

The following table shows, for the years and dates indicated, certain information regarding the Canadian dollar/U.S. dollar exchange rate, as reported by the Bank of Canada. Such exchange rate on September 29, 2021 was C$1.2741 = US$1.00.

All references in this proxy statement/prospectus to "$" or "US$" are to U.S. dollars, unless otherwise indicated. All references in this proxy statement/prospectus to "C$" are to Canadian dollars. The rates set forth below may differ from the actual rates used in CP's accounting processes and in the preparation of CP's consolidated financial statements or the unaudited pro forma financial information presented herein.

	Period End	Average	Low	High

NOTICE OF SPECIAL MEETING OF KCS STOCKHOLDERS TO BE HELD ON [—], 2021

YOUR VOTE IS VERY IMPORTANT

To the Stockholders of Kansas City Southern:

Notice is hereby given that Kansas City Southern (which we refer to as "KCS") will hold a special meeting of its stockholders (which we refer to as the "KCS special meeting") virtually via the internet on [—], 2021, beginning at [—], Central Time.

In light of the ongoing COVID-19 (coronavirus) pandemic, the KCS special meeting will be held in a virtual meeting format only, via live audio webcast, and there will not be a physical meeting location. You will be able to attend the KCS special meeting online and to vote your shares electronically at the meeting by visiting [—] (which we refer to as the "special meeting website").

The KCS special meeting will be held for the following purposes:

- to consider and vote on a proposal (which we refer to as the "KCS merger proposal") to adopt the Agreement and Plan of Merger, dated as of September 15, 2021 (which, as it may be amended from time to time, we refer to as the "merger agreement"), by and among Canadian Pacific Railway Limited (which we refer to as "CPRL"), Cygnus Merger Sub 1 Corporation, a Delaware corporation and direct wholly owned subsidiary of CPRL (which we refer to as "surviving merger sub"), Cygnus Merger Sub 2 Corporation, a Delaware corporation and direct wholly owned subsidiary of surviving merger sub (which we refer to as "first merger sub" and, together with surviving merger sub, the "merger subs") and KCS;
- to consider and vote on a proposal (which we refer to as the "KCS compensation proposal") to approve, on a non-binding, advisory basis, the compensation that may be paid or become payable to KCS's named executive officers that is based on or otherwise relates to the transactions contemplated by the merger agreement; and
- to consider and vote on a proposal (which we refer to as the "KCS adjournment proposal") to adjourn the KCS special meeting to solicit additional proxies if there are not sufficient votes at the time of the KCS special meeting to approve the KCS merger proposal or to ensure that any supplement or amendment to this proxy statement/prospectus is timely provided to KCS stockholders.

KCS will transact no other business at the KCS special meeting, except, subject to obtaining the prior written consent of CPRL, such business as may properly be brought before the KCS special meeting or any adjournment or postponement thereof. The accompanying proxy statement/prospectus, including the merger agreement attached thereto as Annex A, contains further information with respect to these matters.

KCS stockholders of record at the close of business on [—], 2021 (which we refer to as the "record date") will be entitled to notice of and to vote at the KCS special meeting or any adjournment of the KCS special meeting.

The board of directors of KCS (which we refer to as the "KCS board") has unanimously approved and declared advisable the merger agreement and the transactions contemplated by the merger agreement, including (1) the merger of first merger sub with and into KCS (which we refer to as the "first merger") and (2) the merger of KCS with and into surviving merger sub (which we refer to as the "second merger" and, together with the first merger, the "transaction") on the terms and subject to the conditions set forth in the merger agreement. **The KCS board unanimously recommends that KCS stockholders vote "FOR" the KCS merger proposal, "FOR" the KCS compensation proposal and "FOR" the KCS adjournment proposal.**

Your vote is very important, regardless of the number of shares that you own. The parties cannot complete the transactions contemplated by the merger agreement, including the transaction, without approval of

the KCS merger proposal. Assuming a quorum is present, the approval of the KCS merger proposal requires the affirmative vote of at least a majority of the outstanding shares of KCS voting stock, which includes the common stock of KCS, par value $0.01 per share, and 4% noncumulative preferred stock of KCS, par value $25.00 per share, voting together as a single class.

Whether or not you plan to attend the KCS special meeting via the special meeting website, KCS urges you to please promptly mark, sign and date the accompanying proxy and return it in the enclosed postage-paid envelope, which requires no postage if mailed in the United States, or to submit your votes electronically by calling the toll-free telephone number or using the internet as described in the instructions included with the accompanying proxy card, so that your shares may be represented and voted at the KCS special meeting. If you hold your shares through a broker, bank or other nominee in "street name" (instead of as a registered holder), please follow the instructions on the voting instruction form provided by your bank, broker or nominee to vote your shares. The list of KCS stockholders entitled to vote at the KCS special meeting will be available at our headquarters for examination by any KCS stockholder for any purpose germane to the meeting for a period of at least 10 days prior to the KCS special meeting. If you would like to examine the list of KCS stockholders of record, please contact KCS's Corporate Secretary at 1-888-800-3690 to schedule an appointment or request access. If our headquarters are closed for health and safety reasons related to the coronavirus pandemic during such period, the list of stockholders will be made available for examination electronically upon request to our Corporate Secretary, subject to our satisfactory verification of stockholder status. The list of KCS stockholders entitled to vote at the KCS special meeting will also be available for examination by any KCS stockholder during the KCS special meeting via the special meeting website at [—].

If you have any questions about the transaction, please contact KCS at 1-888-800-3690 or write to Kansas City Southern, 427 West 12th Street, Kansas City, Missouri 64105, Attention: Corporate Secretary.

If you have any questions about how to vote or direct a vote in respect of your shares of KCS voting stock, you may contact KCS's proxy solicitor, MacKenzie Partners, Inc., toll-free at 1-800-322-2885. Banks and brokers may call collect at 1-212-929-5500.

By Order of the Board of Directors,

Adam J. Godderz
Senior Vice President – Chief Legal Officer and Corporate Secretary

Kansas City, Missouri

Dated: [—], 2021

FREQUENTLY USED TERMS

Certain terms that are defined in and frequently used throughout this proxy statement/prospectus may be helpful for you to have in mind at the outset. Unless otherwise specified or if the context so requires, the following terms have the meanings set forth below for purposes of this proxy statement/prospectus:

- "alternative proposal" refers to any proposal, offer or indication of intent made by any third party relating to or concerning (i) a merger, reorganization, share exchange, consolidation, business combination, recapitalization or similar transaction involving CPRL or KCS, as applicable, in each case, as a result of which the shareholders or stockholders of CPRL or KCS, as applicable, immediately prior to such transaction would cease to own at least 75% of the total voting power of CPRL or KCS, as applicable, or the surviving entity (or any direct or indirect parent company thereof), as applicable, immediately following such transaction, (ii) the acquisition by any third party of more than 25% of the net revenues, net income or total assets of CPRL or KCS, as applicable, and its subsidiaries, on a consolidated basis, or (iii) the direct or indirect acquisition by any third party of more than 25% of the outstanding CPRL common shares or shares of KCS common stock, as applicable.
- "ARTF" refers to the Mexican *Agencia Reguladora del Transporte Ferroviario* (the Regulatory Agency of Rail Transportation of Mexico).
- "BofA Securities" refers to BofA Securities, Inc., financial advisor to KCS in connection with the transaction.
- "bridge facility" refers to the unsecured 364-day bridge facility in an aggregate principal amount of $8.5 billion contemplated under the commitment letter.
- "business day" refers to any day other than a Saturday, Sunday or a day on which the banks in New York, New York or Calgary, Canada, are authorized by law or executive order to be closed.
- "Canadian tax act" refers to the Income Tax Act (Canada), R.S.C., 1985, c.1 (5th Supp.) and the regulations thereunder.
- "cash consideration" refers to $90.00 in cash, without interest, per share of KCS common stock.
- "CBCA" refers to the Canada Business Corporations Act, R.S.C., 1985, c. C-44, as amended.
- "CFIUS" refers to the Committee on Foreign Investment in the United States.
- "closing" refers to the closing of the transaction.
- "closing date" refers to the date on which the closing of the transaction actually occurs.
- "CN" refers to Canadian National Railway Company, a Canadian corporation.
- "CN agreement" refers to the Agreement and Plan of Merger, dated as of May 21, 2021, among CN, Brooklyn Merger Sub, Inc. and KCS, which was terminated by KCS on September 15, 2021.
- "CN agreement termination payment" refers to the Company Termination Fee (as defined in the CN agreement) paid by KCS to CN.
- "CN proposal" refers to the unsolicited written proposal KCS received from CN on April 20, 2021 to acquire KCS for 1.059 CN common shares and $200.00 in cash per share of KCS common stock.
- "CN refund" refers to the CP Termination Fee Refund (as defined in the CN agreement) paid by KCS to an affiliate of CN.
- "CN termination amount refund" refers to $700.0 million in cash in return of such amount remitted by CPRL to KCS in connection with KCS's payment to CN of the CN agreement termination payment.
- "Code" refers to the U.S. Internal Revenue Code of 1986, as amended.
- "COFECE" refers to the *Comisión Federal de Competencia Económica* (the Mexican Antitrust Commission).

- "commitment letter" refers to the Commitment Letter, dated as of September 15, 2021, by and among GS Lending, BMO, CPRL and CPRC, in respect of an unsecured 364-day bridge facility in an aggregate principal amount of $8.5 billion.
- "completion of the CFIUS Process" means: (a) CFIUS has determined that there are no unresolved national security concerns with respect to the transactions contemplated by the merger agreement, and KCS and CPRL have received written notice from CFIUS that action under Section 721 has been concluded; (b) KCS and CPRL have received written notice from CFIUS that the transactions contemplated under the merger agreement are not "covered transactions" pursuant to Section 721; or (c) CFIUS has sent a report to the President of the U.S. requesting the decision of the President of the U.S. with respect to the transactions contemplated under the merger agreement and (i) the period under Section 721 during which the President of the U.S. may announce his decision to take action to suspend, prohibit or place any limitations on the transactions contemplated by the merger agreement has expired without any such action being threatened, announced or taken or (ii) the President of the U.S. has announced a decision not to, or otherwise declined to, take any action to suspend or prohibit the transactions contemplated by the merger agreement.
- "concession" refers to the Mexican government's 50-year concession to KCSM, through which KCSM operates a key commercial corridor of the Mexican railroad system.
- "control date" refers to the date on which CPRL is lawfully permitted to assume control over KCS's railroad operations pursuant to the STB final approval and following completion of the CFIUS process.
- "CP" refers to CPRL together with its subsidiaries.
- "CP termination payment" refers to the Company Termination Fee (as defined in the prior CP merger agreement).
- "CPRL" refers to Canadian Pacific Railway Limited, a Canadian corporation.
- "CPRL approvals" refers to (i) the filing of the certificates of merger in respect of the first merger and the second merger, (ii) authorizations from, or such other actions as are required to be made with or obtained from, the STB, (iii) authorizations from, or such other actions as are required to be made with or obtained from, the FCC, (iv) compliance with any applicable requirements of any antitrust laws, (v) authorizations from, or such other actions as are required to be made with or obtained from, COFECE and the IFT, (vi) the filing of notices with ARTF and SCT, (vii) compliance with the applicable requirements of the U.S. Securities Act, the U.S. Exchange Act and any applicable Canadian provincial or territorial securities laws, including the filing with the SEC of the Form F-4 (of which this proxy statement/prospectus forms a part) and the filing of a management information circular by CPRL with the Alberta Securities Commission and any other applicable securities commission or securities regulatory authority of a province or territory of Canada, (viii) compliance with the rules and regulations of the NYSE and the TSX, (ix) compliance with any applicable foreign or state securities or blue sky laws and (x) the other consents and/or notices set forth on the CPRL disclosure schedules, in each case as required in connection with the transactions contemplated by the merger agreement.
- "CPRL board" refers to the board of directors of CPRL.
- "CPRL common shares" refers to common shares in the capital of CPRL.
- "CPRL disclosure schedules" refers to the disclosure schedules to the merger agreement provided by CPRL.
- "CPRL shareholder approval" refers to the affirmative vote of a majority of the votes cast by the holders of outstanding CPRL common shares represented in person or by proxy and entitled to vote on such matter in favor of the issuance of CPRL common shares in connection with the first merger at the CPRL special meeting, or any adjournment or postponement thereof, in accordance with the rules and policies of the TSX.
- "CPRL shareholders" refers to the holders of CPRL common shares.

- "CPRL special meeting" refers to the special meeting of CPRL shareholders to be held on [—], 2021 and any adjournments or postponements thereof.
- "debt commitment letters" refers to the debt commitment letters delivered at signing of the merger agreement, including the commitment letter.
- "DGCL" refers to the Delaware General Corporation Law.
- "dissenting shares" refers to the shares of KCS common stock and KCS preferred stock held by KCS stockholders who do not vote for adoption of the merger agreement and who otherwise properly exercise and perfect appraisal rights for their shares in accordance with the DGCL.
- "effective time" refers to the effective time of the first merger.
- "end date" refers to February 21, 2022; provided, that to the extent the condition to obtain the authorizations required to be obtained from COFECE and the IFT with respect to the transactions contemplated by the merger agreement has not been satisfied or waived on or prior to February 21, 2022, but all other conditions to closing have been satisfied or waived (except for those conditions that by their nature are to be satisfied at the closing), the end date will be automatically extended to May 21, 2022.
- "excepted shareholder" refers to a KCS stockholder who would be treated as a "five-percent transferee shareholder" within the meaning of Treasury Regulations Section 1.367(a)-3(c)(5)(ii) of CPRL following the transaction who does not enter into a five-year gain recognition agreement in the form provided in Treasury Regulations Section 1.367(a)-8 or does not comply with the requirements of that agreement and Treasury Regulations Section 1.367(a)-8 for avoiding the recognition of gain.
- "exchange ratio" refers to 2.884 validly issued, fully paid and non-assessable CPRL common shares for each share of KCS common stock.
- "FCC" refers to the Federal Communications Commission.
- "first merger" refers to the proposed merger of first merger sub with and into KCS, resulting in KCS surviving as a direct, wholly owned subsidiary of surviving merger sub.
- "first merger sub" refers to Cygnus Merger Sub 2 Corporation, a Delaware corporation and a direct wholly owned subsidiary of surviving merger sub.
- "first surviving corporation" refers to KCS as the company that, under the merger agreement, survives the first merger under Delaware law as a direct wholly owned subsidiary of surviving merger sub at the effective time.
- "Form F-4" refers to the registration statement on Form F-4 pursuant to which the offer and sale of CPRL common shares in connection with the first merger will be registered pursuant to the U.S. Securities Act and in which this proxy statement/prospectus is included, together with any supplements thereto.
- "fractional share cash amount" refers to the amount (rounded down to the nearest cent) representing the proportionate interest in the net proceeds from the sale by the exchange agent, on behalf of all holders of fractional shares of KCS common stock, of the aggregated number of fractional CPRL common shares that would otherwise have been issuable to such holders as part of the merger consideration.
- "IFT" refers to the *Instituto Federal de Telecomunicaciones* (the Mexican Federal Telecommunications Institute).
- "intervening event" refers to an event, change, occurrence, or development that is unknown and not reasonably foreseeable to the applicable party's board of directors, as of the date of the merger agreement (or if known or reasonably foreseeable, the material consequences of which were not known or reasonably foreseeable as of the date of the merger agreement); provided, that the receipt, existence or terms of an alternative proposal will not be deemed to be an intervening event under the merger agreement.

- "IRS" refers to the U.S. Internal Revenue Service.
- "KCS" refers to Kansas City Southern, a Delaware corporation.
- "KCS adjournment proposal" refers to the proposal to adjourn the KCS special meeting to solicit additional proxies if there are not sufficient votes at the time of the KCS special meeting to approve the KCS merger proposal or to ensure that any supplement or amendment to this proxy statement/prospectus is timely provided to KCS stockholders.
- "KCS approvals" refers to (i) the filing of the certificates of merger in respect of the first merger and the second merger, (ii) authorizations from, or such other actions as are required to be made with or obtained from, the STB, (iii) authorizations from, or such other actions as are required to be made with or obtained from, the FCC, (iv) compliance with any applicable requirements of any antitrust laws, (v) authorizations from, or such other actions as are required to be made with or obtained from, the COFECE and the IFT, (vi) the filing of notices with the ARTF and the SCT, (vii) compliance with the applicable requirements of the U.S. Securities Act and the U.S. Exchange Act, including the filing with the SEC of the Form F-4 (of which this proxy statement/prospectus forms a part), (viii) compliance with the rules and regulations of the NYSE, (ix) compliance with any applicable foreign or state securities or blue sky laws and (x) the other consents and/or notices set forth on the KCS disclosure schedules, in each case, as required in connection with the transactions contemplated by the merger agreement.
- "KCS board" refers to the board of directors of KCS.
- "KCS common stock" refers to shares of common stock of KCS, par value $0.01 per share.
- "KCS common stockholders" refers to the holders of KCS common stock.
- "KCS compensation proposal" refers to the proposal that KCS stockholders will vote on at the KCS special meeting to approve, on a non-binding, advisory basis, the compensation that may be paid or become payable to KCS's named executive officers that is based on or otherwise relates to the transactions contemplated by the merger agreement.
- "KCS director deferred stock" refers to an award of director deferred stock that corresponds to shares of KCS common stock.
- "KCS equity awards" collectively refers to the KCS stock options, KCS restricted share awards, KCS performance share awards and KCS director deferred stock.
- "KCS merger proposal" refers to the proposal to adopt the merger agreement that KCS stockholders will vote on at the KCS special meeting.
- "KCS performance share award" refers to an award of performance shares that corresponds to shares of KCS common stock.
- "KCS preferred stock" refers to the 4% noncumulative preferred stock of KCS, par value $25.00 per share.
- "KCS proposals" collectively refers to the KCS merger proposal, the KCS compensation proposal and the KCS adjournment proposal.
- "KCS restricted share award" refers to an award of shares of KCS common stock granted subject to any vesting, forfeiture or other lapse restrictions.
- "KCS special meeting" refers to the special meeting of KCS stockholders to be held on [—], 2021.
- "KCS stock option" refers to an award of options to purchase shares of KCS common stock.
- "KCS stockholder approval" refers to the affirmative vote of the holders of a majority of the outstanding shares of KCS voting stock in favor of the adoption of the merger agreement.
- "KCS stockholders" collectively refers to the holders of KCS common stock and KCS preferred stock.

- "KCS voting stock" refers collectively to KCS common stock and KCS preferred stock, as a single class.
- "KCSM" refers to Kansas City Southern de México, S.A. de C.V., a wholly owned subsidiary of KCS.
- "KCSR" refers to The Kansas City Southern Railway Company, a wholly owned subsidiary of KCS.
- "MacKenzie" refers to MacKenzie Partners, Inc., a proxy solicitation firm retained by KCS to assist in the solicitation of proxies for the KCS special meeting.
- "material adverse effect" refers to, under the merger agreement and with respect to KCS or CPRL, as applicable, an event, change, occurrence, effect or development that (x) has a material adverse effect on the business, operations or financial condition of such party and its subsidiaries, taken as a whole, or (y) would prevent, materially delay or materially impair the ability (i) in the case of KCS, KCS, and (ii) in the case of CPRL, CPRL or either merger sub, to consummate the transactions contemplated by the merger agreement or, in the case of CPRL, to obtain the debt financing, but, solely in the case of clause (x), will not include events, changes, occurrences, effects or developments relating to or resulting from;
  - changes in general economic or political conditions or the securities, equity, credit or financial markets in general, or changes in or affecting domestic or foreign interest or exchange rates;
  - any decline in the market price or trading volume of such party's shares, or any change in the credit rating of such party or any of its securities (provided that the facts and circumstances underlying such decline or change may be taken into account in determining whether a material adverse effect in respect of such party has occurred to the extent not otherwise excluded by the definition thereof);
  - changes or developments in the industries in which such party or its subsidiaries operate;
  - changes in law or the interpretation or enforcement thereof after the date of the merger agreement;
  - the execution, delivery or performance of the merger agreement or the public announcement or pendency or consummation of the transactions contemplated thereby, including the impact thereof on the relationships, contractual or otherwise, of such party or any of its subsidiaries with employees, partnerships, customers or suppliers or governmental entities;
  - in the case of KCS, the identity of CPRL or any of its affiliates as the acquiror of KCS;
  - compliance with the terms of, or the taking or omission of any action required by, the merger agreement or consented to (after disclosure to the other party of all material and relevant facts and information) or requested by such party in writing;
  - any act of civil unrest, civil disobedience, war, terrorism, cyberterrorism, military activity, sabotage or cybercrime, including an outbreak or escalation of hostilities involving Canada, the U.S. or any other governmental entity or the declaration by any governmental entity of a national emergency or war, or any worsening or escalation of any such conditions threatened or existing on the date of the merger agreement;
  - any hurricane, tornado, flood, earthquake, natural disaster, act of God or other comparable events;
  - any pandemic, epidemic or disease outbreak (including COVID-19) or other comparable events;
  - changes in generally accepted accounting principles or the interpretation or enforcement thereof after the date of the merger agreement;
  - any litigation relating to or resulting from the merger agreement or the transactions contemplated thereby; or
  - any failure of such party to meet internal or published projections, forecasts, guidance or revenue or earning predictions; provided, that the facts and circumstances underlying any such failure may

be taken into account in determining whether a material adverse effect in respect of such party has occurred to the extent not otherwise excluded by the definition thereof;

except, with respect to the first, third, eighth, ninth, tenth, and eleventh bullets above, if the impact thereof is materially and disproportionately adverse to such party and its subsidiaries, taken as a whole, relative to the impact thereof on the operations in the railroad industry of other participants in such industry, the incremental material disproportionate impact may be taken into account in determining whether there has been a material adverse effect in respect of such party.

- "merger agreement" refers to the Agreement and Plan of Merger, dated as of September 15, 2021, among CPRL, surviving merger sub, first merger sub, and KCS, as it may be amended from time to time.
- "merger consideration" collectively refers to the share consideration and the cash consideration.
- "merger holdco" refers to Cygnus Holding Corp., a Delaware corporation and an indirect wholly owned subsidiary of CPRL.
- "merger subs" collectively refers to first merger sub and surviving merger sub.
- "Mexican antitrust authorities" collectively refers to the COFECE and the IFT.
- "Morgan Stanley" refers to Morgan Stanley & Co. LLC, financial advisor to KCS in connection with the transaction.
- "NYSE" refers to the New York Stock Exchange.
- "preferred merger consideration" refers to $37.50 in cash, without interest, per share of KCS preferred stock.
- "prior CP merger agreement" refers to the Agreement and Plan of Merger, dated as of March 21, 2021, among CPRL, surviving merger sub, first merger sub, and KCS, which was terminated by KCS on May 21, 2021.
- "qualifying transaction" refers to an alternative proposal in respect of KCS or CPRL (as applicable) (for these purposes, substituting in the definition of alternative proposal "50%" for "25%" and for "75%" in each place each such phrase appears) that is publicly proposed or publicly disclosed after the date of the merger agreement and prior to the KCS special meeting or CPRL special meeting (as applicable), and is not publicly withdrawn at least two business days prior to the KCS special meeting or CPRL special meeting (as applicable).
- "record date" refers to [—], 2021.
- "representatives" refers to the officers, employees, accountants, consultants, legal counsel, financial advisors, agents and other representatives of a given party.
- "SCT" refers to the *Secretaría de Comunicaciones y Transportes* (the Secretary of Communications and Transportation of Mexico).
- "SEC" refers to the U.S. Securities and Exchange Commission.
- "SEC's website" refers to www.sec.gov.
- "second effective time" refers to the effective time of the second merger.
- "second merger" refers to the merger of KCS (as the surviving entity of the first merger) with and into surviving merger sub, to occur immediately after the first merger, resulting in surviving merger sub surviving as a direct wholly owned subsidiary of CPRL.
- "second surviving corporation" refers, following the second merger, to surviving merger sub as the entity surviving the second merger as a direct wholly owned subsidiary of CPRL at the second effective time.

- "Section 721" refers to Section 721 of the Defense Production Act of 1950, as amended, and the regulations promulgated thereunder.
- "SEDAR" refers to the System for Electronic Document Analysis and Retrieval of the Canadian Securities Administrators.
- "share consideration" refers to 2.884 validly issued, fully paid and non-assessable CPRL common shares, for each share of KCS common stock.
- "special meeting website" refers to the website located at [—], where KCS stockholders will be able to attend the KCS special meeting online and vote their shares electronically.
- "STB" refers to the U.S. Surface Transportation Board.
- "STB denial" means that either (i) the STB final approval has not been obtained by December 31, 2023 or (ii) the STB has, by a final and non-appealable order, refused to provide the STB final approval.
- "STB final approval" refers to the final and non-appealable approval or exemption by the STB of the transactions contemplated by the merger agreement pursuant to 49 U.S.C. § 11323 *et seq*.
- "STB May 6 decision" refers to Decision No. 5 (Docket No. FD 36500) of the STB.
- "STB voting trust approval" refers to the approval or authorization of the STB to consummate the voting trust transaction.
- "superior proposal" refers to an unsolicited, bona fide written alternative proposal, made after the date of the merger agreement, substituting in the definition of alternative proposal "50%" for "25%" and for "75%" in each place each such phrase appears, made after September 15, 2021, that the applicable party's board of directors determines in good faith, after consultation with the applicable party's outside legal and financial advisors, and considering all legal, financial, financing and regulatory aspects of the proposal, the identity of the person(s) making the proposal and the likelihood of the proposal being consummated in accordance with its terms, would, if consummated, result in a transaction (A) that is more favorable to such party's shareholders or stockholders, as applicable from a financial point of view than the transactions contemplated by the merger agreement and (B) that is reasonably likely to be completed, taking into account any regulatory, financing or approval requirements and any other aspects considered relevant by such party's board of directors.
- "surviving merger sub" refers to Cygnus Merger Sub 1 Corporation, a Delaware corporation and a direct wholly owned subsidiary of CPRL.
- "total purchase consideration" collectively refers to the merger consideration, the preferred merger consideration, cash amounts payable at the effective time in respect of all KCS equity awards, amounts remitted by CPRL to KCS in connection with the CN agreement termination payment and CN refund, and other amounts as defined as consideration by the acquisition method of accounting.
- "transaction" collectively refers to the first merger and the second merger.
- "Treasury Regulations" refers to U.S. Treasury regulations promulgated under the Code.
- "trust stock" refers to all outstanding shares of the capital stock of the second surviving corporation at any time delivered to the trustee of the voting trust pursuant to the voting trust agreement.
- "trustee" refers to the person who will act as trustee of the voting trust established pursuant to the voting trust agreement, expected to be Mr. David L. Starling.
- "TSX" refers to the Toronto Stock Exchange.
- "U.S." refers to the United States of America.
- "U.S. Exchange Act" refers to the U.S. Securities Exchange Act of 1934, as amended.
- "U.S. Securities Act" refers to the U.S. Securities Act of 1933, as amended.

- "voting trust" refers to the independent, irrevocable voting trust to be established pursuant to the voting trust agreement.
- "voting trust agreement" refers to the voting trust agreement to be entered into by and among CPRL, merger holdco and the trustee following the second effective time.
- "voting trust transaction" refers to the deposit of all of the outstanding shares of capital stock of the second surviving corporation into an independent, irrevocable voting trust following the transaction.

QUESTIONS AND ANSWERS ABOUT THE TRANSACTION AND THE SPECIAL MEETING

The following are brief answers to certain questions that you, as a stockholder of KCS, may have regarding the transaction and the other matters being considered at the KCS special meeting. You are urged to carefully read this proxy statement/prospectus and the other documents referred to in this proxy statement/prospectus in their entirety because this section may not provide all the information that is important to you regarding these matters. Please refer to the section entitled "Summary" on page 1 for a summary of important information regarding the merger agreement and the transactions contemplated thereby. Additional important information is contained in the annexes to, and the documents incorporated by reference into, this proxy statement/prospectus. You may obtain the information incorporated by reference in this proxy statement/prospectus, without charge, by following the instructions under the section entitled "Where You Can Find Additional Information," on page 229.

Q: Why am I receiving this proxy statement/prospectus?

A: You are receiving this proxy statement/prospectus because KCS has agreed to be acquired by CPRL through (1) a merger of first merger sub with and into KCS, with KCS surviving as a wholly owned subsidiary of surviving merger sub, and (2) immediately thereafter, a merger of KCS with and into surviving merger sub, with surviving merger sub surviving the second merger as a direct wholly owned subsidiary of CPRL (which we refer to as the "second surviving corporation" following the second merger). The merger agreement, which governs the terms and conditions of the transaction, is attached to this proxy statement/prospectus as Annex A.

Your vote is required in connection with the transaction. KCS is sending these materials to KCS stockholders to help them decide how to vote their shares with respect to the adoption of the merger agreement, among other important matters.

Q: What matters am I being asked to vote on?

A: In order to complete the transaction, among other things, KCS stockholders must approve the proposal to adopt the merger agreement in accordance with the DGCL (which proposal we refer to as the "KCS merger proposal").

KCS is holding the KCS special meeting to obtain approval of the KCS merger proposal. At the KCS special meeting, KCS stockholders will also be asked to consider and vote on:

- a proposal to approve, on a non-binding, advisory basis, the compensation that may be paid or become payable to KCS's named executive officers that is based on or otherwise relates to the transactions contemplated by the merger agreement (which proposal we refer to as the "KCS compensation proposal"); and
- a proposal to adjourn the KCS special meeting to solicit additional proxies if there are not sufficient votes at the time of the KCS special meeting to approve the KCS merger proposal or to ensure that any supplement or amendment to this proxy statement/prospectus is timely provided to KCS stockholders (which proposal we refer to as the "KCS adjournment proposal").

Your vote is very important, regardless of the number of shares that you own. The approval of the KCS merger proposal is a condition to the obligations of the parties to complete the transaction. Neither the approval of the KCS compensation proposal nor the approval of the KCS adjournment proposal is a condition to the obligations of the parties to complete the transaction.

Q: When and where will the KCS special meeting take place?

A: The KCS special meeting will be held virtually via the internet on [—], 2021, beginning at [—], Central Time. The KCS special meeting will be held solely via live audio webcast and there will not be a physical meeting location. KCS stockholders will be able to attend the KCS special meeting online and vote their

shares electronically during the meeting by visiting [—] (which we refer to as the "special meeting website"). If you choose to attend the KCS special meeting and vote your shares during the KCS special meeting, you will need the control number located on your proxy card as described in the section entitled "*The KCS Special Meeting— Date, Time and Place of the KCS Special Meeting*" on page 40.

Even if you plan to attend the KCS special meeting, KCS recommends that you vote your shares in advance as described below so that your vote will be counted if you later decide not to or become unable to attend the KCS special meeting.

If you hold your shares in "street name", you must register in advance to attend the special meeting. To register you must submit proof of your proxy power (legal proxy) reflecting your holdings of our stock, along with your name and email address to Computershare. Requests for registration must be labeled as "Legal Proxy" and be received no later than [—], Eastern daylight time, on [—]. You will receive a confirmation email from Computershare of your registration. Requests for registration should be directed to Computershare at the following:

- By Email:

Forward the email from your broker, or attach an image of your legal proxy, to legalproxy@computershare.com.

Q: Does my vote matter?

A: Yes, your vote is very important, regardless of the number of shares that you own. The transaction cannot be completed unless, among other things, the KCS merger proposal is approved by KCS stockholders.

A failure to return or submit your proxy or to vote at the KCS special meeting as provided in this proxy statement/prospectus will have the same effect as a vote "**AGAINST**" the KCS merger proposal. The failure to return or submit your proxy and to attend the KCS special meeting will have no effect on the KCS compensation proposal (assuming a quorum is present) or the KCS adjournment proposal, but the failure of any shares present or represented by proxy at the KCS special meeting to vote on the proposal will have the same effect as a vote "**AGAINST**" the KCS compensation proposal and "**AGAINST**" the KCS adjournment proposal, as applicable. The KCS board unanimously recommends that you vote "**FOR**" the KCS merger proposal, "**FOR**" the KCS compensation proposal and "**FOR**" the KCS adjournment proposal.

Q: What will KCS stockholders receive for their shares if the transaction is completed?

A: Under the merger agreement, at the effective time, each share of common stock of KCS, par value $0.01 per share (which we refer to as "KCS common stock"), issued and outstanding immediately prior to the effective time of the first merger (which we refer to as the "effective time") (other than certain excluded shares as described in the merger agreement) will be converted into the right to receive (1) the "exchange ratio" of 2.884 validly issued, fully paid and non-assessable CPRL common shares (which we refer to as the "share consideration") and (2) $90.00 in cash, without interest (which we refer to as the "cash consideration" and, together with the share consideration, as the "merger consideration"), and each share of 4% noncumulative preferred stock of KCS, par value $25.00 per share (which we refer to as "KCS preferred stock"), issued and outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement), will be converted into the right to receive $37.50 in cash, without interest (which we refer to as the "preferred merger consideration"). Each holder of KCS common stock will receive cash (without interest and less any applicable withholding taxes) in lieu of any fractional CPRL common shares that such stockholder would otherwise receive as merger consideration in the transaction. Any cash amounts to be received by holders of KCS common stock in lieu of any fractional CPRL common shares will be rounded down to the nearest cent.

The exchange ratio is fixed and will not be adjusted to reflect changes in the price of KCS common stock or CPRL common shares prior to the effective time. The CPRL common shares issued in connection with the transaction will be listed on the New York Stock Exchange (which we refer to as the "NYSE") and the

Toronto Stock Exchange (which we refer to as the "TSX") under the symbol "CP." Based on the number of shares of KCS common stock and CPRL common shares outstanding on [—], 2021, upon completion of the transaction, we expect that former holders of KCS common stock would own approximately [—]% of the outstanding common shares of CPRL, and holders of CPRL common shares (whom we refer to as "CPRL shareholders") immediately prior to the transaction would own approximately [—]% of the outstanding common shares of CPRL. KCS common stock and KCS preferred stock are traded on the NYSE under the symbols "KSU" and "KSU-P," respectively. We encourage you to obtain current quotes for the CPRL common shares and the KCS common stock.

Because CPRL will issue a fixed number of CPRL common shares in exchange for each share of KCS common stock, the value of the merger consideration that holders of KCS common stock will receive in the transaction will depend on the market price of CPRL common shares at the effective time and will not be known at the time that KCS stockholders vote on the transaction. The market price of CPRL common shares that holders of KCS common stock receive at the effective time could be greater than, less than or the same as the market price of CPRL common shares on the date of this proxy statement/prospectus or at the time of the KCS special meeting. Accordingly, you should obtain current market quotations for CPRL common shares and KCS common stock before deciding how to vote with respect to the KCS merger proposal. Based on the closing price of CPRL common shares of $72.71 on the NYSE on August 9, 2021, the last full trading day prior to that on which CPRL submitted a revised offer to acquire KCS, the implied value of the merger consideration to holders of KCS common stock was approximately $299.70 per share of KCS common stock. On [—], 2021, the latest practicable trading day before the date of this proxy statement/prospectus, the closing price of CPRL common shares on the NYSE was $[—] per share, resulting in an implied value of the merger consideration to holders of KCS common stock of $[—] per share of KCS common stock.

For more information regarding the merger consideration to be received by KCS stockholders if the transaction is completed, see the section entitled "*The Merger Agreement—Merger Consideration*" on page 138.

Q: How does the KCS board recommend that I vote at the KCS special meeting?

A: The KCS board unanimously recommends that you vote "**FOR**" the KCS merger proposal, "**FOR**" the KCS compensation proposal and "**FOR**" the KCS adjournment proposal.

In considering the recommendations of the KCS board, KCS stockholders should be aware that KCS directors and executive officers have interests in the transaction that are different from, or in addition to, the interests of KCS stockholders generally. These interests may include the treatment of outstanding KCS stock options, KCS restricted share awards, KCS performance share awards and KCS director deferred stock (which we collectively refer to as "KCS equity awards") under the merger agreement, the potential payment of severance benefits and acceleration of outstanding KCS equity awards upon certain terminations of employment, retention awards and rights to ongoing indemnification and insurance coverage. For a more complete description of these interests, see the information provided in the section entitled "*The KCS Merger Proposal—Interests of KCS's Directors and Executive Officers in the Transaction*" on page 101.

Q: If my KCS stock is represented by physical stock certificates, should I send my stock certificates now?

A: No. After the transaction is completed, you will receive a transmittal form from the exchange agent with instructions for the surrender of your KCS stock certificates. ***Please do not send your stock certificates with your proxy card.***

Q: Who may vote at the KCS special meeting?

A: All holders of record of shares of KCS voting stock who held shares at the close of business on [—], 2021 (which we refer to as the "record date") are entitled to receive notice of, and to vote at, the KCS special

meeting. Shares held through the KCS 401(k) Plan must be voted prior to the meeting and by [—] Central Time on [—], 2021. Each such holder of KCS voting stock is entitled to cast one vote on each matter properly brought before the KCS special meeting for each share of KCS voting stock that such holder owned of record as of the record date. Attendance at the KCS special meeting is not required to vote. See below and the section entitled "*The KCS Special Meeting—Voting by Proxy or in Person*" on page 43 for instructions on how to vote your shares without attending the KCS special meeting.

Q: What is a proxy?

A: A proxy is a stockholder's legal designation of another person to vote shares owned by such stockholder on their behalf. The document used to designate a proxy to vote your shares of KCS voting stock is referred to as a "proxy card."

Q: How many votes does each share of KCS voting stock have?

A: Each KCS stockholder is entitled to one vote for each share of KCS voting stock held of record as of the record date. As of the record date, there were [—] outstanding shares of KCS voting stock.

Q: How many votes must be present to hold the KCS special meeting?

A: A quorum is the minimum number of shares required to be represented, either by the appearance of the stockholder in person (including virtually) or through representation by proxy, to hold a valid meeting.

Holders of a majority of the aggregate voting power of the KCS capital stock issued and outstanding and entitled to vote must be present via the special meeting website or represented by proxy at the KCS special meeting in order to constitute a quorum.

If a quorum is not present, the KCS special meeting may be adjourned or postponed until the holders of the number of shares of KCS voting stock required to constitute a quorum attend.

Q: Where will the CPRL common shares that I receive in the transaction be publicly traded?

A: The CPRL common shares to be issued to holders of KCS common stock in the transaction will be listed for trading on the NYSE and TSX under the symbol "CP."

Q: What happens if the transaction is not completed?

A: If the KCS merger proposal is not approved by KCS stockholders, or if the transaction is not completed for any other reason, KCS stockholders will not receive the merger consideration, the preferred merger consideration or any other consideration in connection with the transaction, and their shares of KCS stock will remain outstanding.

If the transaction is not completed, CPRL and KCS will each remain public companies independent of one another, the KCS common stock will continue to be listed and traded on the NYSE under the symbol "KSU" and the KCS preferred stock will continue to be listed and traded on the NYSE under the symbol "KSU-P."

In the event that the transaction is completed, but STB final approval is not obtained and CPRL is not permitted to acquire control over KCS's railroad operations, KCS stockholders will retain the merger consideration, the preferred merger consideration and any other consideration received in connection with the transaction, and thus will continue to hold any CPRL common shares issued in connection with the transaction.

If the merger agreement is terminated under specified circumstances, KCS may be required to pay CPRL a termination payment of $700.0 million and/or the CN termination amount refund of $700.0 million. If the merger agreement is terminated under specified circumstances, CPRL may be required to pay KCS a

termination payment of either $700.0 million or $1.0 billion, depending on the reason for termination. See the section entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*" on page 163 for a more detailed discussion of the termination payments.

Q: What is a "broker non-vote"?

A: Under the NYSE rules, banks, brokers and other nominees may use their discretion to vote "uninstructed" shares (i.e., shares of record held by banks, brokers or other nominees, but with respect to which the beneficial owner of such shares has not provided instructions on how to vote on a particular proposal) with respect to matters that are considered to be "routine," but not with respect to "non-routine" matters. All of the KCS proposals are "non-routine" matters under NYSE rules.

A "broker non-vote" occurs on an item when (1) a bank, broker or other nominee has discretionary authority to vote on one or more proposals to be voted on at a meeting of stockholders, but is not permitted to vote on other proposals without instructions from the beneficial owner of the shares, and (2) the beneficial owner fails to provide the bank, broker or other nominee with such instructions. Because all of the KCS proposals are non-routine matters under NYSE rules for which brokers do not have discretionary authority to vote, KCS does not expect there to be any broker non-votes at the KCS special meeting.

Q: What stockholder vote is required for the approval of each proposal at the KCS special meeting? What will happen if I fail to vote or abstain from voting on each proposal at the KCS special meeting?

A: *Proposal 1: KCS Merger Proposal*. Assuming a quorum is present at the KCS special meeting, approval of the KCS merger proposal requires the affirmative vote of at least a majority of the outstanding shares of KCS voting stock entitled to vote on the KCS merger proposal. Accordingly, a KCS stockholder's abstention from voting or the failure of any KCS stockholder to vote (including the failure of a KCS stockholder who holds their shares in "street name" through a bank, broker or other nominee to give voting instructions to such bank, broker or other nominee with respect to the KCS merger proposal) will have the same effect as a vote "**AGAINST**" the KCS merger proposal.

Proposal 2: KCS Compensation Proposal. Assuming a quorum is present at the KCS special meeting, approval of the advisory KCS compensation proposal requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS compensation proposal. Accordingly, if a KCS stockholder present in person (including virtually) at the KCS special meeting abstains from voting, or responds by proxy with an "abstain" vote, it will have the same effect as a vote cast "**AGAINST**" the KCS compensation proposal. If a KCS stockholder is not present in person (including virtually) at the KCS special meeting and does not respond by proxy, it will have no effect on the vote count for the KCS compensation proposal (assuming a quorum is present).

Proposal 3: KCS Adjournment Proposal. Approval of the KCS adjournment proposal requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS adjournment proposal (whether or not a quorum is present). Accordingly, if a KCS stockholder present in person (including virtually) at the KCS special meeting abstains from voting, or responds by proxy with an "abstain" vote, it will have the same effect as a vote cast "**AGAINST**" the KCS adjournment proposal. If a KCS stockholder is not present in person (including virtually) at the KCS special meeting and does not respond by proxy, it will have no effect on the vote count for such proposal.

Q: Why am I being asked to consider and vote on a proposal to approve, by non-binding, advisory vote, the compensation that may be paid or become payable to KCS's named executive officers (i.e., the KCS compensation proposal)?

A: Under SEC rules, KCS is required to seek a non-binding, advisory vote of its stockholders with respect to the compensation that may be paid or become payable to KCS's named executive officers that is based on or otherwise relates to the transactions contemplated by the merger agreement.

Q: What happens if KCS stockholders do not approve, by non-binding, advisory vote, the compensation that may be paid or become payable to KCS's named executive officers (i.e., the KCS compensation proposal)?

A: Because the vote to approve the KCS compensation proposal is advisory in nature, the outcome of the vote will not be binding upon KCS or the combined company, and the completion of the transaction is not conditioned or dependent upon the approval of the KCS compensation proposal. Accordingly, the compensation that is subject to the vote, which is described in the section entitled "*The KCS Merger Proposal—Interests of KCS's Directors and Executive Officers in the Transaction*" on page 101 of this proxy statement/prospectus, may be paid to KCS's named executive officers even if KCS's stockholders do not approve the KCS compensation proposal.

Q: How can I vote my shares at the KCS special meeting?

A: Shares held directly in your name as the stockholder of record of KCS may be voted during the KCS special meeting via the special meeting website. If you choose to vote your shares during the virtual meeting, you will need the control number included on your proxy card in order to access the special meeting website and to vote as described in the section entitled "*The KCS Special Meeting—Voting by Proxy or in Person*" on page 43.

If you hold your shares held in "street name", you must register in advance to attend the special meeting. To register you must submit proof of your proxy power (legal proxy) reflecting your holdings of our stock, along with your name and email address to Computershare. Requests for registration must be labeled as "Legal Proxy" and be received no later than [—], Eastern daylight time, on [—]. You will receive a confirmation email from Computershare of your registration. Requests for registration should be directed to Computershare at the following:

- By Email:

Forward the email from your broker, or attach an image of your legal proxy, to legalproxy@computershare.com.

Even if you plan to attend the KCS special meeting, KCS recommends that you vote your shares in advance as described below so that your vote will be counted if you later decide not to or become unable to attend the KCS special meeting.

Additional information on attending the KCS special meeting can be found under the section entitled "*The KCS Special Meeting*" on page 40.

Q: How do participants in the KCS 401(k) Plan vote?

A: If you participate in the KCS 401(k) and Profit Sharing Plan (the "KCS 401(k) Plan") and own shares of KCS common stock in your account, you should have received a full set of printed proxy materials, including a voting instruction form to instruct the trustee of the KCS 401(k) Plan how to vote the shares of KCS common stock held on your behalf. The trustee is required under the trust agreement to vote the shares in accordance with the instructions given on the voting instruction form. Voting instructions may also be given by Internet or telephone by participants in the KCS 401(k) Plan. The voting instruction form contains the Internet address and toll-free number. If voting instructions are not received from a participant, the trustee must vote those shares, as well as any unallocated shares, in the same proportions as the shares for which voting instructions were received from plan participants. Voting instructions by Internet or telephone must be given by [—], Central Time, on [—], 2021. Unless you give voting instructions by Internet or telephone, the voting instruction form should be returned in the envelope provided to Computershare. The voting instruction form should not be returned to us. KCS 401(k) Plan participants who wish to revoke their voting instructions must contact the trustee and follow its procedures.

Q: Are the votes of participants in the KCS 401(k) Plan confidential?

A: Under the terms of the KCS 401(k) Plan, the trustee is required to establish procedures to ensure that the instructions received from participants are held in confidence and not divulged, released or otherwise utilized in a manner that might influence the participants' free exercise of their voting rights.

Q: How can I vote my shares without attending the KCS special meeting?

A: Whether you hold your shares directly as the stockholder of record of KCS or beneficially in "street name," you may direct your vote by proxy without attending the KCS special meeting via the special meeting website. If you are a stockholder of record, you can vote by proxy over the internet, or by telephone or by mail by following the instructions provided in the enclosed proxy card. Please note that if you hold shares beneficially in "street name," you should follow the voting instructions provided by your bank, broker or other nominee.

Additional information on voting procedures can be found under the section entitled "*The KCS Special Meeting*" on page 40.

Q: What is the difference between holding shares as a stockholder of record and as a beneficial owner of shares held in "street name?"

A: If your shares of KCS voting stock are registered directly in your name with Computershare, the transfer agent for KCS, you are considered the stockholder of record with respect to those shares. As the stockholder of record, you have the right to vote your shares directly at the KCS special meeting. You may also grant a proxy for your vote directly to KCS or to a third party to vote your shares at the KCS special meeting.

If your shares of KCS voting stock are held by a bank, broker or other nominee, you are considered the beneficial owner of shares held in "street name." Your bank, broker or other nominee will send you, as the beneficial owner, a package describing the procedures for voting your shares and you must instruct the bank, broker or other nominee on how to vote them by following the instructions that the bank, broker or other nominee provides to you with these proxy materials. Most banks, brokers and other nominees offer the ability for stockholders to submit voting instructions by mail by completing a voting instruction card, by telephone, and by the internet.

Q: If my shares of KCS voting stock are held in "street name" by my bank, broker or other nominee, will my bank, broker or other nominee automatically vote those shares for me?

A: No. Your bank, broker or other nominee will only be permitted to vote your shares of KCS voting stock if you instruct your bank, broker or other nominee how to vote. You should follow the procedures provided by your bank, broker or other nominee regarding the voting of your shares. Under NYSE rules, banks, brokers and other nominees who hold shares of KCS voting stock in "street name" for their customers have authority to vote on "routine" proposals when they have not received instructions from beneficial owners. However, banks, brokers and other nominees are prohibited from exercising their voting discretion with respect to non-routine matters, which include all the KCS proposals. As a result, absent specific instructions from the beneficial owner of such shares, banks, brokers and other nominees are not empowered to vote such shares.

Since there are no items on the agenda that your broker has discretionary authority to vote upon, your shares will not be counted as present at the KCS special meeting for the purposes of determining a quorum if you fail to instruct your broker on how to vote on the KCS proposals. If you fail to submit any instruction to your bank, broker or other nominee, it will have no effect on the KCS compensation proposal, assuming that a quorum is otherwise present, and it will have no effect on the KCS adjournment proposal. However, failure to instruct your bank, broker or other nominee on how to vote will have the same effect as a vote "**AGAINST**" the KCS merger proposal.

Q: What should I do if I receive more than one set of voting materials for the KCS special meeting?

A: If you hold shares of KCS voting stock in "street name" and also directly in your name as a stockholder of record or otherwise, or if you hold shares of KCS voting stock in more than one brokerage account, you may receive more than one set of voting materials relating to the KCS special meeting.

Record Holders. For shares held directly, please complete, sign, date and return each proxy card (or cast your vote by telephone or via the internet as provided on each proxy card) or otherwise follow the voting instructions provided in this proxy statement/prospectus in order to ensure that all of your shares of KCS voting stock held directly by you are voted.

Shares in "street name." For shares held in "street name" through a bank, broker or other nominee, you should follow the procedures provided by your bank, broker or other nominee to make sure that you vote all of your shares held in "street name."

Q: If a stockholder gives a proxy, how are the shares of KCS voting stock voted?

A: Regardless of the method you choose to vote, the individuals named on the enclosed proxy card will vote your shares of KCS voting stock in the way that you indicate. For each item before the KCS special meeting, you may specify whether your shares of KCS voting stock should be voted for or against, or should abstain from voting.

Q: How will my shares of KCS voting stock be voted if I return a blank proxy?

A: If you sign, date and return your proxy and do not indicate how you want your shares of KCS voting stock to be voted, then your shares of KCS voting stock will be voted in accordance with the recommendations of the KCS board: "**FOR**" the KCS merger proposal, "**FOR**" the KCS compensation proposal and "**FOR**" the KCS adjournment proposal.

Q: Can I change my vote after I have submitted my proxy?

A: Any KCS stockholder giving a proxy has the right to revoke the proxy and change their vote before the proxy is voted at the KCS special meeting by doing any of the following:

- subsequently submitting a new proxy (including by submitting a proxy via the internet or telephone) for the KCS special meeting that is received by the deadline specified on the accompanying proxy card;
- giving written notice of your revocation to KCS's Corporate Secretary; or
- voting at the KCS special meeting.

Execution or revocation of a proxy will not in any way affect your right to attend the KCS special meeting and vote thereat. Written notices of revocation and other communications with respect to the revocation of proxies should be addressed to:

Kansas City Southern
427 West 12th Street,
Kansas City, Missouri 64105
1-888-800-3690
Attention: Corporate Secretary

For more information, see the section entitled "*The KCS Special Meeting—Revocability of Proxies and Changes to a KCS Stockholder's Vote*" on page 44.

Q: If I hold my shares in "street name," can I change my voting instructions after I have submitted voting instructions to my bank, broker or other nominee?

A: If your shares are held in the name of a bank, broker or other nominee and you previously provided voting instructions to your bank, broker or other nominee, you should follow the instructions provided by your bank, broker or other nominee to revoke or change your voting instructions.

Q: Where can I find the voting results of the KCS special meeting?

A: The preliminary voting results for the KCS special meeting are expected to be announced at the KCS special meeting. In addition, within four business days following certification of the final voting results KCS will file the final voting results of the KCS special meeting (or, if the final voting results have not yet been certified, the preliminary results) with the SEC on a Current Report on Form 8-K.

Q: Do KCS stockholders have dissenters' or appraisal rights?

A: Yes. If a KCS stockholder wants to exercise appraisal rights and receive the fair value of shares of KCS common stock or KCS preferred stock in cash instead of the merger consideration or preferred merger consideration, as applicable, then you must file a written objection with KCS prior to the KCS special meeting stating, among other things, that you will exercise your right to dissent if the transaction is completed. Also, you may not vote in favor of the KCS merger proposal and must follow other procedures, both before and after the KCS special meeting, as described in Annex D to this proxy statement/prospectus. Note that if you return a signed proxy card without voting instructions or with instructions to vote "**FOR**" the KCS merger proposal, then your shares will automatically be voted in favor of the KCS merger proposal and you will lose all appraisal rights available under Delaware law. A summary of these provisions can be found under "*The Merger Agreement—Shares Subject to Properly Exercised Appraisal Rights*" on page 138. Due to the complexity of the procedures for exercising the right to seek appraisal, KCS stockholders who are considering exercising such rights are encouraged to seek the advice of legal counsel. Failure to strictly comply with the applicable Delaware law provisions will result in the loss of the right of appraisal.

Q: Are there any risks that I should consider in deciding whether to vote for the approval of the KCS merger proposal?

A: Yes. You should read and carefully consider the risk factors set forth in the section entitled "*Risk Factors*" on page 21. You also should read and carefully consider the risk factors with respect to KCS and CPRL that are contained in the documents that are incorporated by reference into this proxy statement/prospectus.

Q: What happens if I sell my shares of KCS voting stock after the record date but before the KCS special meeting?

A: The record date is earlier than the date of the KCS special meeting. If you sell or otherwise transfer your shares of KCS voting stock after the record date but before the KCS special meeting, you will, unless special arrangements are made, retain your right to vote at the KCS special meeting.

Q: Who is paying for the KCS special meeting and this proxy solicitation?

A: KCS has engaged MacKenzie Partners, Inc. (which we refer to as "MacKenzie") to assist in the solicitation of proxies for the KCS special meeting. KCS estimates that it will pay MacKenzie a fee of approximately $[—], plus reimbursement for certain out-of-pocket fees and expenses. KCS has agreed to indemnify MacKenzie against various liabilities and expenses that relate to or arise out of its solicitation of proxies (subject to certain exceptions).

KCS also may be required to reimburse banks, brokers and other custodians, nominees and fiduciaries or their respective agents for their expenses in forwarding proxy materials to beneficial owners of KCS voting

stock. KCS's directors, officers and employees and CPRL's directors, officers and employees also may solicit proxies by telephone, by electronic means or in person. They will not be paid any additional amounts for soliciting proxies.

Q: When is CPRL's acquisition of KCS expected to be completed?

A: CPRL's acquisition of control over KCS's railroad operations will be completed in two stages. First, the transaction will occur and, following the post-closing contributions described in this proxy statement/prospectus, all of the outstanding shares of capital stock of the second surviving corporation, as successor to KCS, will be deposited by Cygnus Holding Corp., a Delaware corporation and an indirect wholly owned subsidiary of CPRL (which we refer to as "merger holdco") into an independent, irrevocable voting trust (which we refer to as the "voting trust") under a voting trust agreement (which we refer to as the "voting trust agreement") to be entered into by and among CPRL, merger holdco and the trustee, expected to be Mr. David L. Starling (whom we refer to as the "trustee"), pending receipt of the final and non-appealable approval or exemption by the U.S. Surface Transportation Board (which we refer to as the "STB") of the transactions contemplated by the merger agreement pursuant to 49 U.S.C. § 11323 *et seq.* (which we refer to as "STB final approval").

Subject to the satisfaction or waiver of the closing conditions described under the section entitled "*The Merger Agreement—Conditions that Must Be Satisfied or Waived for the Transaction to Occur*" on page 140, including approval of the KCS merger proposal by KCS stockholders, the transaction is expected to be completed in the first quarter of 2022. However, neither KCS nor CPRL can predict the actual date on which the transaction will be completed, or if the transaction will be completed at all, because completion of the transaction is subject to conditions and factors outside the control of both companies, including the receipt of certain required regulatory approvals. The merger agreement requires the first step of CPRL's acquisition of KCS to be completed by the end date of February 21, 2022 (provided, that to the extent the condition to obtain the authorizations required to be obtained from COFECE and the IFT with respect to the transactions contemplated by the merger agreement has not been satisfied or waived on or prior to February 21, 2022, but all other conditions to closing have been satisfied or waived (except for those conditions that by their nature are to be satisfied at the closing), the end date will be automatically extended to May 21, 2022).

Following completion of the first step of CPRL's acquisition of KCS through the transaction and pending receipt of STB final approval and approval from other applicable regulatory authorities in order to complete the combination of CPRL and KCS, all outstanding shares of capital stock of the second surviving corporation will be held in the voting trust. STB review of the transaction is expected to be completed in the second half of 2022. If STB final approval and approval from other applicable regulatory authorities is obtained, the voting trust would be terminated and CPRL (through its indirect wholly owned subsidiary, merger holdco) would acquire control over KCS's railroad operations. For more information on the required regulatory approvals, the applicable regulatory processes and the conditions to the completion of CPRL's acquisition of KCS, see the section entitled "*The KCS Merger Proposal—Regulatory Approvals Required for the Transaction*" on page 109.

Q: What equity stake will KCS stockholders hold in CPRL immediately following the transaction?

A: Based on the number of CPRL common shares and shares of KCS common stock outstanding on [—], 2021, at the effective time, former holders of KCS common stock are expected to own approximately [—]% of the outstanding CPRL common shares, and persons who were CPRL shareholders immediately prior to the transaction are expected to own approximately [—]% of the outstanding CPRL common shares. The relative ownership interests of CPRL shareholders and former holders of KCS common stock in CPRL immediately following the transaction will depend on the number of CPRL common shares and shares of KCS common stock issued and outstanding immediately prior to the transaction.

Q: If I am a holder of KCS common stock or KCS preferred stock, how will I receive the merger consideration or preferred merger consideration to which I am entitled?

A: If you hold your shares of KCS common stock or KCS preferred stock in book-entry form, whether through The Depository Trust Company or otherwise, you will not be required to take any specific actions to exchange your shares for CPRL common shares and the cash consideration. Your shares of KCS common stock or KCS preferred stock will, at the effective time, be automatically exchanged for, as applicable, the CPRL common shares and cash (including any cash in lieu of any fractional CPRL common shares) to which you are entitled. If you instead hold your shares of KCS common stock or KCS preferred stock in certificated form, then, after receiving the proper and completed documentation from you following the completion of the transaction, Computershare Investor Services Inc. or a bank or trust company or similar institution selected by CPRL with KCS's prior approval (which we refer to as the "exchange agent") will deliver to you the CPRL common shares and cash (including any cash in lieu of any fractional CPRL common shares) to which you are entitled as merger consideration or preferred merger consideration, as applicable. More information may be found in the sections entitled "*The Merger Agreement—Merger Consideration*" and "*The Merger Agreement—No Fractional Shares*" on pages 138 and 138, respectively.

Q: Will the CPRL common shares to be issued to holders of KCS common stock at the effective time be traded on an exchange?

A: Yes. It is a condition to the completion of the transaction that the CPRL common shares to be issued in connection with the first merger be approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing conditions. All CPRL common shares received by holders of KCS common stock in connection with the transaction will be listed on the NYSE and the TSX under the symbol "CP" and may be traded on the exchanges by stockholders.

CPRL common shares to be issued to KCS common stockholders in connection with the transaction will be freely transferable, except for CPRL common shares issued to any stockholder deemed to be an "affiliate" of CPRL for purposes of United States (which we refer to as the "U.S.") federal securities law. CPRL common shares to be issued to KCS common stockholders in connection with the transaction will not be legended and may be resold in Canada through registered dealers provided that (i) the trade is not a "control distribution" as defined in National Instrument 45-102—Resale of Securities of the Canadian securities administrators, (ii) no unusual effort is made to prepare the market or to create a demand for the CPRL common shares, (iii) no extraordinary commission or consideration is paid to a person in respect of such sale, and (iv) if the selling security holder is an insider or officer of CPRL, as the case may be, the selling security holder has no reasonable grounds to believe that CPRL is in default of applicable Canadian securities law. For more information, see the section entitled "*The KCS Merger Proposal—Restrictions on Resales of CPRL Common Shares Received in the Transaction*" on page 118.

Q: What are the material U.S. federal income tax consequences of the transaction?

A: CPRL and KCS intend that the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Internal Revenue Code of 1986, as amended (which we refer to as the "Code") and that Section 367(a)(1) of the Code will not apply to cause the transaction to result in gain recognition by holders of KCS common stock that exchange their shares of KCS common stock for the merger consideration (other than any such holder of KCS common stock who would be treated as a "five-percent transferee shareholder" (within the meaning of Section 1.367(a)-3(c)(5)(ii) of the U.S. Treasury regulations promulgated under the Code, which we refer to as the "Treasury Regulations") of CPRL following the transaction who does not enter into a five-year gain recognition agreement in the form provided in Treasury Regulations Section 1.367(a)-8 or does not comply with the requirements of that agreement and Treasury Regulations Section 1.367(a)-8 for avoiding the recognition of gain, which we refer to as an "excepted shareholder"). The obligation of KCS to complete the transaction is conditioned upon the receipt of an opinion from Wachtell, Lipton, Rosen & Katz, special counsel to KCS, or another nationally recognized tax

counsel, to the effect that, on the basis of facts, representations and assumptions set forth or referred to in such opinion, the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and that the transaction will not result in gain recognition under Section 367(a)(1) of the Code by holders of KCS common stock (other than any excepted shareholder).

Accordingly, on the basis of such opinion that the transaction will qualify as a reorganization and that Section 367(a) does not apply to require gain recognition, a U.S. holder (other than an excepted shareholder) that exchanges shares of KCS common stock for the merger consideration in the transaction will generally recognize gain (but not loss) in an amount equal to the lesser of: (i) the cash consideration (excluding cash received in lieu of fractional CPRL common shares, if any) received by such U.S. holder in the transaction; and (ii) the excess, if any, of (a) the sum of the cash consideration (excluding cash received in lieu of fractional CPRL common shares, if any) plus the fair market value of the share consideration (including any fractional CPRL common shares deemed received) received by such U.S. holder in exchange for its shares of KCS common stock in the transaction, over (b) such U.S. holder's tax basis in its shares of KCS common stock exchanged. In addition, a U.S. holder of KCS common stock generally will recognize gain or loss with respect to any cash received in lieu of fractional CPRL common shares.

The exchange of KCS preferred stock for cash pursuant to the transaction generally will be a taxable transaction for U.S. federal income tax purposes. U.S. holders of KCS preferred stock will generally recognize gain or loss in an amount equal to the difference, if any, between the amount of cash received with respect to their shares of KCS preferred stock pursuant to the transaction and their adjusted tax basis in such shares.

For the definition of "U.S. holder" and a more detailed discussion of the material U.S. federal income tax consequences of the transaction to U.S. holders, see the section entitled "*The KCS Merger Proposal—Certain U.S. Federal Income Tax Consequences*" on page 119.

The U.S. federal income tax consequences described above may not apply to all KCS stockholders. The tax consequences to KCS stockholders will depend on their individual situations. Accordingly, all KCS stockholders are urged to consult their own tax advisors for a full understanding of the particular tax consequences of the transaction to them.

Q: What are the material Canadian federal income tax consequences of the transaction?

A: A Canadian resident holder (as defined in the section entitled "*The KCS Merger Proposal—Certain Canadian Federal Income Tax Consequences*," on page 124) who disposes of their KCS common stock for CPRL common shares and cash consideration (including cash received in lieu of a fractional CPRL common share) in connection with the first merger will generally realize a capital gain (or capital loss) for Canadian federal income tax purposes equal to the amount by which the sum of the aggregate of the fair market value of the CPRL common shares and cash consideration received exceeds (or is less than) the adjusted cost base of the Canadian resident holder's KCS common stock determined immediately before the disposition and any reasonable costs of disposition.

A Canadian resident holder who disposes of their KCS preferred stock for cash consideration in connection with the first merger will generally realize a capital gain (or capital loss) for Canadian federal income tax purposes equal to the amount by which the cash consideration received exceeds (or is less than) the adjusted cost base of the Canadian resident holder's KCS preferred stock determined immediately before the disposition and any reasonable costs of disposition.

A non-Canadian resident holder (as defined in the section entitled "*The KCS Merger Proposal—Certain Canadian Federal Income Tax Consequences*," on page 124) will not be subject to tax under the Canadian tax act on any capital gain realized on a disposition of KCS common stock or KCS preferred stock, as the case may be, in connection with the first merger, or on a subsequent disposition of a CPRL common share acquired as result of the first merger, as applicable, unless the relevant share is "taxable Canadian property," and is not "treaty-protected property" (as those terms are defined in the Canadian tax act) of the non-Canadian resident holder, at the time of the disposition.

For more information, see the section entitled "*The KCS Merger Proposal—Certain Canadian Federal Income Tax Consequences*," on page 124.

Q: Is the exchange ratio subject to adjustment based on changes in the prices of KCS common stock or CPRL common shares? Can it be adjusted for any other reason?

A: For the share consideration portion of the merger consideration, for each share of KCS common stock, you will receive a fixed number of CPRL common shares equal to the exchange ratio of 2.884, not a number of shares that will be determined based on a fixed market value. The market value of CPRL common shares and the market value of KCS common stock at the effective time may vary significantly from their respective values on the date that the merger agreement was executed or at other dates, such as the date of this proxy statement/prospectus or the date of the KCS special meeting. Stock price changes may result from a variety of factors, including changes in CPRL's or KCS's respective businesses, operations or prospects, regulatory considerations, and general business, market, industry or economic conditions. The exchange ratio will not be adjusted to reflect any changes in the market value of CPRL common shares or the market value of KCS common stock. Therefore, the aggregate market value of the CPRL common shares that you are entitled to receive at the effective time could vary significantly from the value of such shares on the date of this proxy statement/prospectus or the date of the KCS special meeting. See the risk factor entitled "*Because the exchange ratio is fixed and the market price of shares of CPRL common shares has fluctuated and will continue to fluctuate, KCS stockholders cannot be sure of the value of the merger consideration they will receive in the transaction prior to the closing of the transaction*," on page 21.

However, the merger consideration will be equitably adjusted to provide you and CPRL with the same economic effect as contemplated by the merger agreement in the event of any further reclassification, stock split (including a reverse stock split), stock dividend or distribution, recapitalization, merger or other similar transaction involving KCS common stock or CPRL common shares prior to the effective time.

Q: What should I do now?

A: You should read this proxy statement/prospectus carefully and in its entirety, including the annexes, and return your completed, signed and dated proxy card(s) by mail in the enclosed postage-paid envelope or submit your voting instructions by telephone or over the internet as soon as possible so that your shares will be voted in accordance with your instructions.

Q: How can I find more information about KCS or CPRL?

A: You can find more information about KCS or CPRL from various sources described in the section entitled "*Where You Can Find Additional Information*," on page 229 of this proxy statement/prospectus.

Q: Whom do I call if I have questions about the KCS special meeting or the transaction?

A: If you have questions about the KCS special meeting or the transaction, or desire additional copies of this proxy statement/prospectus or additional proxies, you may contact:

MacKenzie Partners, Inc.
KCS Stockholders call toll-free from the U.S. and Canada
at 1-800-322-2885
or direct at 1-212-929-5500 from other locations
Banks and brokers may call collect at 1-212-929-5500

xxx

SUMMARY

This summary highlights information contained elsewhere in this proxy statement/prospectus and may not contain all of the information that might be important to you. KCS and CPRL urge you to read carefully the remainder of this proxy statement/prospectus, including the attached annexes, the documents incorporated by reference into this proxy statement/prospectus and the other documents to which KCS and CPRL have referred you. You may obtain the information incorporated by reference into this proxy statement/prospectus without charge by following the instructions in the section entitled "Where You Can Find Additional Information" on page 229. Each item in this summary includes a page reference to direct you to a more complete description of the topics presented in this summary.

Information about the Companies (page 133)

Canadian Pacific Railway Limited

7550 Ogden Dale Road S.E.
Calgary, Alberta T2C 4X9
1-403-319-7000

CPRL, together with its subsidiaries (which we collectively refer to as "CP"), owns and operates a transcontinental freight railway in Canada and the United States. CP provides rail and intermodal transportation services over a network of approximately 13,000 miles, connecting the Atlantic coast to the Pacific coast across six Canadian provinces and 11 U.S. states. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend CP's market reach in Canada, through the U.S. and into Mexico. CP transports bulk commodities, merchandise freight and intermodal traffic.

CPRL was incorporated on June 22, 2001, under the CBCA, and controls and owns all of the common shares of Canadian Pacific Railway Company (which we refer to as "CPRC"), which was incorporated in 1881 by Letters Patent pursuant to an Act of the Parliament of Canada and is governed by the CBCA. CPRL's registered, executive and corporate head office is located at 7550 Ogden Dale Road S.E., Calgary, Alberta T2C 4X9. CPRL common shares are listed on the NYSE and the TSX under the symbol "CP."

Additional information about CPRL can be found on its website at www.cpr.ca. The information contained in, or that can be accessed through, CPRL's website is not intended to be incorporated into this proxy statement/prospectus. For additional information about CPRL, see the section entitled "*Where You Can Find Additional Information*" on page 229.

Cygnus Merger Sub 1 Corporation

120 South 6th Street
Suite 800
Minneapolis, MN 55402
1-888-333-6370

Surviving merger sub, a Delaware corporation and a direct wholly owned subsidiary of CPRL, was formed solely for the purpose of facilitating the transactions contemplated by the merger agreement. Surviving merger sub has not carried on any activities or operations to date, except for those activities incidental to its formation and undertaken in connection with the transactions contemplated by the merger agreement. By operation of the second merger, KCS will merge with and into surviving merger sub. As a result, immediately following the second merger, surviving merger sub will survive as a direct wholly owned subsidiary of CPRL.

Following the closing of the transaction (which we refer to as the "closing"), all of the outstanding shares of capital stock of the second surviving corporation, as successor to KCS, will be deposited by merger holdco into the voting trust subject to the voting trust agreement, pending receipt of STB final approval.

Surviving merger sub's principal executive offices are located at 120 South 6th Street, Suite 800, Minneapolis, MN 55402, and its telephone number is 1-888-333-6370.

Cygnus Merger Sub 2 Corporation

120 South 6th Street
Suite 800
Minneapolis, MN 55402
1-888-333-6370

First merger sub, a Delaware corporation and a direct wholly owned subsidiary of surviving merger sub, was formed solely for the purpose of facilitating the transactions contemplated by the merger agreement. First merger sub has not carried on any activities or operations to date, except for those activities incidental to its formation and undertaken in connection with the transaction. By operation of the first merger, first merger sub will merge with and into KCS. As a result, KCS will survive as a direct wholly owned subsidiary of surviving merger sub, before immediately merging with and into surviving merger sub. Upon completion of the first merger, first merger sub will cease to exist as a separate entity.

First merger sub's principal executive offices are located at 120 South 6th Street, Suite 800, Minneapolis, MN 55402, and its telephone number is 1-888-333-6370.

Kansas City Southern

427 West 12th Street
Kansas City, MO 64105
1-816-983-1303

KCS, a Delaware corporation, is a holding company with domestic and international rail operations in North America that are strategically focused on the growing north/south freight corridor connecting key commercial and industrial markets in the central U.S. with major industrial cities in Mexico. As used below, "Kansas City Southern" may refer to KCS or, as the context requires, to one or more subsidiaries of KCS.

Kansas City Southern controls and owns all of the stock of The Kansas City Southern Railway Company (which we refer to as "KCSR"), a U.S. Class 1 railroad founded in 1887. KCSR serves a ten-state region in the Midwest and Southeast regions of the U.S. and has the shortest north/south rail route between Kansas City, Missouri and several key ports along the Gulf of Mexico in Alabama, Louisiana, Mississippi and Texas.

Kansas City Southern controls and owns all of the stock of Kansas City Southern de México, S.A. de C.V. (which we refer to as "KCSM"). Through its 50-year concession from the Mexican government (which we refer to as the "concession"), which could expire in 2047 unless extended, KCSM operates a key commercial corridor of the Mexican railroad system and has as its core route the most strategic portion of the shortest, most direct rail passageway between Mexico City and Laredo, Texas. Laredo is a principal international gateway through which a substantial portion of rail and truck traffic between the U.S. and Mexico crosses the border. KCSM serves most of Mexico's principal industrial cities and three of its major seaports. KCSM's rail lines provide exclusive rail access to the U.S. and Mexico border crossing at Nuevo Laredo, Tamaulipas. Under the concession, KCSM has the right to use and operate the southern half of the rail bridge at Laredo, Texas, which spans the Rio Grande River between the U.S. and Mexico. KCS owns the northern half of this bridge through its ownership of Mexrail, Inc. (which we refer to as "Mexrail").

KCSM also provides exclusive rail access to the port of Lazaro Cardenas on the Pacific Ocean. The Mexican government developed the port at Lazaro Cardenas principally to serve Mexican markets and as an alternative to the U.S. west coast ports for Asian and South American traffic bound for North America.

Kansas City Southern wholly owns Mexrail which, in turn, wholly owns The Texas Mexican Railway Company (which we refer to as "Tex-Mex"). Tex-Mex owns a 160-mile rail line extending from Laredo, Texas to the port city of Corpus Christi, Texas, which connects the operations of KCSR with KCSM.

The Kansas City Southern coordinated rail network (KCSR, KCSM and Tex-Mex, including trackage rights) comprises approximately 7,100 route miles extending from the Midwest and Southeast regions of the U.S. south into Mexico and connects with all other Class 1 railroads, providing shippers with an effective alternative to other railroad routes and giving direct access to Mexico and the Southeast and Southwest U.S. through alternate interchange hubs.

Panama Canal Railway Company (which we refer to as "PCRC"), an unconsolidated joint venture company owned equally by Kansas City Southern and Mi-Jack Products, Inc. (which we refer to as "Mi-Jack"), was awarded a concession from the Republic of Panama to reconstruct and operate the Panama Canal Railway, a 47-mile railroad located adjacent to the Panama Canal that provides international container shipping companies with a railway transportation alternative to the Panama Canal. The concession was awarded in 1998 for an initial term of 25 years with an automatic renewal for an additional 25-year term. The Panama Canal Railway is a north-south railroad traversing the isthmus of Panama between the Atlantic and Pacific oceans.

Other subsidiaries and affiliates of Kansas City Southern include the following:

- Meridian Speedway, LLC, a 70% owned consolidated affiliate that owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway." Norfolk Southern Corporation, through its wholly owned subsidiary, The Alabama Great Southern Railroad Company, owns the remaining 30% of MSLLC;
- TFCM, S. de R.L. de C.V., a 45% owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V., a 25% owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and
- PTC-220, LLC, a 14% owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for positive train control.

KCS is a public company. KCS common stock and KCS preferred stock are traded on the NYSE under the symbols "KSU" and "KSU-P," respectively. KCS's principal executive offices are located at 427 West 12th Street, Kansas City, MO 64105, and its telephone number is 1-816-983-1303.

Additional information about KCS can be found on its website at www.kcsouthern.com. The information contained in, or that can be accessed through, KCS's website is not intended to be incorporated into this proxy statement/prospectus. For additional information about KCS, see the section entitled "*Where You Can Find Additional Information*," on page 229.

Risk Factors (page 21)

The transactions contemplated by the merger agreement involve risks, some of which are related to the transaction. In considering the transaction, including whether to vote for the KCS merger proposal, the KCS

compensation proposal and the KCS adjournment proposal, you should carefully consider the information about these risks set forth under the section entitled "*Risk Factors*" on page 21, together with the other information included or incorporated by reference in this proxy statement/prospectus.

The Transaction and the Merger Agreement (page 49)

The merger agreement provides, among other things, that, upon the terms and subject to the satisfaction or waiver of the conditions set forth therein, (i) at the effective time, first merger sub will merge with and into KCS, with KCS surviving the first merger as a direct, wholly owned subsidiary of surviving merger sub, and (ii) immediately following the first merger at the effective time of the second merger (which we refer to as the "second effective time"), KCS will merge with and into surviving merger sub, with surviving merger sub surviving the second merger as a direct, wholly owned subsidiary of CPRL.

Immediately following the second merger and immediately prior to the deposit of all of the outstanding shares of capital stock of the second surviving corporation into the independent, irrevocable voting trust (which we refer to as the "voting trust transaction"), CPRL and certain subsidiaries of CPRL will be involved in an internal reorganization that will result in the second surviving corporation becoming an indirect wholly owned subsidiary of CPRL. See the section entitled "*The KCS Merger Proposal—Transaction Structure*," on page 47 for a description of each step involved in the internal reorganization.

The terms and conditions of the transaction are contained in the merger agreement, which is described in this proxy statement/prospectus and attached to this proxy statement/prospectus as Annex A. You are encouraged to read the merger agreement carefully, as it is the legal document that governs the transaction. All descriptions in this summary and elsewhere in this proxy statement/prospectus of the terms and conditions of the transaction are qualified in their entirety by reference to the full text of the merger agreement. For a summary of the merger agreement, see the section entitled "*The Merger Agreement*," on page 136.

Merger Consideration (page 48)

Upon the terms and subject to the conditions set forth in the merger agreement, at the effective time, each share of KCS common stock that is outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) will be converted automatically into the right to receive the merger consideration, being the share consideration of 2.884 validly issued, fully paid and non-assessable CPRL common shares and the cash consideration of $90.00 in cash, without interest, and each share of KCS preferred stock that is outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) will be converted into the right to receive the preferred merger consideration of $37.50 in cash, without interest.

The merger consideration and/or the preferred merger consideration will be equitably adjusted in the event of any stock dividend, subdivision, reorganization, reclassification, recapitalization, stock split, reverse stock split, combination or exchange of shares involving KCS common stock, KCS preferred stock or CPRL common shares prior to the effective time, to proportionally reflect such change.

For a full description of the treatment of KCS equity awards in the transaction, see the sections entitled "*The Merger Agreement—Treatment of KCS Equity Awards*" and "*The Merger Agreement—Merger Consideration*," on pages 140 and 138, respectively.

KCS Board of Directors' Recommendation (page 64)

The KCS board unanimously recommends that you vote "**FOR**" the KCS merger proposal, "**FOR**" the KCS compensation proposal and "**FOR**" the KCS adjournment proposal. For a description of some of the factors considered by the KCS board in reaching its decision to approve the merger agreement and additional

information on the recommendation of the KCS board that KCS stockholders vote to adopt the merger agreement, see the section entitled "*The KCS Merger Proposal—Recommendation of the KCS Board; KCS's Reasons for the Transaction*," on page 64.

The Voting Trust (page 168)

Certain activities of CPRL, KCS and their subsidiaries are regulated by the STB. STB approval or exemption is required for, among other things, CPRL's or merger holdco's acquisition of control of KCS. Upon consummation of the transaction, merger holdco will establish the voting trust. Following the transaction and pending STB final approval or exemption of the transaction pursuant to 49 U.S.C. § 11323 et seq., all of the outstanding shares of capital stock of the second surviving corporation will be deposited by merger holdco into the voting trust in accordance with the terms and conditions of the voting trust agreement. The trustee will agree to act as voting trustee in respect of the voting trust; in such capacity, the trustee will vote all shares of the capital stock of the second surviving corporation at any time delivered to the trustee of the voting trust pursuant to the voting trust agreement (which shares we refer to as "trust stock"). Although merger holdco will remain the beneficial owner of the trust stock, both it and CPRL will be unable to exercise control over KCS while the trust stock is held by the trustee. The deposit of the outstanding shares of capital stock of the second surviving corporation into the voting trust by merger holdco will insulate the second surviving corporation from control by CPRL or merger holdco until STB final approval has been either obtained (or is otherwise no longer required by law) or denied. The management and board of directors of KCS will continue to manage the second surviving corporation while its outstanding shares of capital stock are held in the voting trust, pursuing its independent business plan and growth strategies. For a summary of the terms of the voting trust, see the section entitled "The Voting Trust," on page 168.

Comparative Per Share Market Price Information (page 38)

The following table presents the closing price per share of CPRL common shares on the TSX and the NYSE and of KCS common stock on the NYSE on (a) March 19, 2021, the last full trading day prior to the public announcement of the signing of the prior CP merger agreement, (b) August 9, 2021, the last full trading day prior to that on which CPRL submitted a revised offer to acquire KCS, (c) September 14, 2021, the last full trading day prior to the public announcement of the signing of the merger agreement, and (d) September 30, 2021, the last practicable trading day prior to the mailing of this proxy statement/prospectus. This table also shows the implied value of the merger consideration payable for each share of KCS common stock, which was calculated by multiplying the closing price of CPRL common shares on the NYSE on those dates by the exchange ratio and adding $90.00 in respect of the cash consideration.

Date	CPRL common shares TSX[2] (C$)	CPRL common shares NYSE[2] (US$)	KCS common stock NYSE[2] (US$)	Equivalent value of merger consideration per share of KCS stock based on price of CPRL common shares on NYSE (US$)
March 19, 2021	94.85(1)	75.70(1)	224.16	308.31
August 9, 2021	91.50	72.71	269.60	299.70
September 14, 2021	86.48	68.14	280.00	286.52
September 30, 2021	82.71	65.07	270.64	277.66

(1) On May 13, 2021, CPRL effected a five-for-one share split of the issued and outstanding CPRL common shares (the "share split"). The per share amount listed herein has been retrospectively adjusted to reflect the share split.

(2) Share prices are based on closing prices.

Opinions of KCS's Financial Advisors (page 71)

Opinion of Morgan Stanley

Morgan Stanley & Co. LLC (which we refer to as "Morgan Stanley") was retained by the KCS board to act as its financial advisor in connection with the transaction. On September 15, 2021, Morgan Stanley rendered its oral opinion, which was confirmed by delivery of a written opinion dated September 15, 2021, to the KCS board to the effect that, as of such date, and based upon and subject to the assumptions made, procedures followed, matters considered and qualifications and limitations on the scope of the review undertaken by Morgan Stanley as set forth in its written opinion, the merger consideration to be received by the holders of shares of KCS common stock, other than shares held in treasury or held by CPRL, the merger subs or KCS (in each case, other than shares held on behalf of third parties) or shares with respect to which the holders thereof have not voted in favor of the adoption of the merger agreement or consented thereto in writing and who have properly exercised appraisal rights with respect thereto in accordance with, and who have complied with, Section 262 of the DGCL (collectively, "excluded shares"), under the merger agreement was fair from a financial point of view to such holders of KCS common stock.

The full text of Morgan Stanley's written opinion to the KCS board, dated September 15, 2021, which sets forth, among other things, the assumptions made, procedures followed, matters considered and qualifications and limitations on the scope of the review undertaken by Morgan Stanley in rendering its opinion, is attached to this proxy statement/prospectus as Annex B and is incorporated by reference herein in its entirety. The foregoing summary of Morgan Stanley's opinion is qualified in its entirety by reference to the full text of the opinion. You are encouraged to read Morgan Stanley's opinion, this section and the summary of Morgan Stanley's opinion below carefully and in their entirety. Morgan Stanley's opinion was for the benefit of the KCS board, in its capacity as such, and addressed only the fairness from a financial point of view of the merger consideration to be received by the holders of shares of KCS common stock (other than excluded shares) pursuant to the merger agreement as of the date of the opinion and did not address any other aspects or implications of the transaction. Morgan Stanley's opinion was not intended to, and does not, constitute an opinion or recommendation as to how the shareholders of KCS or CPRL should vote at the shareholders' meetings to be held in connection with the transaction.

Opinion of BofA Securities

On September 15, 2021, at a meeting of the KCS board held to evaluate the transaction, BofA Securities, Inc. ("BofA Securities"), KCS's financial advisor, delivered to the KCS board an oral opinion, which was confirmed by delivery of a written opinion dated September 15, 2021, to the effect that, as of the date of the opinion and based on and subject to various assumptions and limitations described in BofA Securities' written opinion, the merger consideration to be received in the transaction by holders of KCS common stock (other than excluded shares) was fair, from a financial point of view, to such holders.

The full text of BofA Securities' written opinion to the KCS board, which describes, among other things, the assumptions made, procedures followed, factors considered and limitations on the review undertaken, is attached as Annex C to this proxy statement/prospectus and is incorporated by reference herein in its entirety. The summary of BofA Securities' opinion included in this proxy statement/prospectus is qualified in its entirety by reference to the full text of BofA Securities' written opinion. BofA Securities delivered its opinion to the KCS board for the benefit and use of the KCS board (in its capacity as such) in connection with and for purposes of its evaluation of the transaction. BofA Securities' opinion does not address any other terms or other aspects or implications of the transaction and no opinion or view was expressed as to the relative merits of the transaction in comparison to other strategies or transactions that might be available to KCS or in which KCS might engage or as to the underlying business decision of KCS to

proceed with or effect the transaction. BofA Securities' opinion does not address any other aspect of the transaction and does not express any opinion or recommendation as to how any stockholder should vote or act in connection with the transaction or any related matter. See the section entitled "*The KCS Merger Proposal—Opinions of KCS's Financial Advisors—Opinion of BofA Securities,*" on page 84.

The KCS Special Meeting (page 40)

Date, Time and Place of the KCS Special Meeting

The KCS special meeting will be held virtually via the internet on [—], 2021 at [—], Central Time. In light of ongoing developments related to the COVID-19 (coronavirus) pandemic, KCS has elected to hold the KCS special meeting solely by means of remote communication via the internet. The KCS special meeting will be held solely via live audio webcast and there will not be a physical meeting location. KCS stockholders will be able to attend the KCS special meeting online and vote their shares electronically during the meeting by visiting the special meeting website at [—].

Record Date and Outstanding Shares of KCS Voting Stock

Only holders of record of shares of KCS voting stock outstanding as of the close of business on [—], 2021, the record date for the KCS special meeting, are entitled to notice of, and to vote at, the KCS special meeting or any adjournment or postponement of the KCS special meeting. KCS stockholders may cast one vote for each share of KCS voting stock that KCS stockholders own of record as of that record date.

Quorum

A quorum of KCS stockholders is necessary to transact business at the KCS special meeting. A quorum will exist at the KCS special meeting if holders of a majority of the aggregate voting power of the KCS capital stock issued and outstanding and entitled to vote are present in person (including virtually) or represented by proxy. All shares of KCS voting stock represented by a valid proxy and all abstentions will be counted as present for purposes of establishing a quorum. All of the KCS proposals are considered "non-routine" matters under the NYSE rules, and, therefore, brokers are not permitted to vote on any of the matters to be considered at the KCS special meeting unless they have received instructions from the beneficial owners. As a result, no "broker non-votes" are expected at the meeting, and shares held in "street name" will not be counted as present for the purpose of determining the existence of a quorum unless the beneficial owner provides their bank, broker or other nominee with voting instructions for at least one of the proposals brought before the KCS special meeting.

Required Vote to Approve the KCS Merger Proposal

Assuming a quorum is present at the KCS special meeting, approval of the KCS merger proposal requires the affirmative vote of at least a majority of the outstanding shares of KCS voting stock entitled to vote on the KCS merger proposal. Accordingly, a KCS stockholder's abstention from voting or the failure of any KCS stockholder to vote (including the failure of a KCS stockholder who holds their shares in "street name" through a bank, broker or other nominee to give voting instructions to such bank, broker or other nominee with respect to the KCS merger proposal) will have the same effect as a vote "**AGAINST**" the KCS merger proposal.

Required Vote to Approve the KCS Compensation Proposal

Assuming a quorum is present at the KCS special meeting, approval of the KCS compensation proposal requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS compensation proposal. Accordingly, if a KCS stockholder present in person (including virtually) at the KCS special meeting abstains

from voting, or responds by proxy with an "abstain" vote, it will have the same effect as a vote cast "**AGAINST**" the KCS compensation proposal. If a KCS stockholder is not present in person (including virtually) at the KCS special meeting and does not respond by proxy, it will have no effect on the vote count for the KCS compensation proposal (assuming a quorum is present).

Required Vote to Approve the KCS Adjournment Proposal

Approval of the KCS adjournment proposal requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS adjournment proposal (whether or not a quorum is present). Accordingly, if a KCS stockholder present in person (including virtually) at the KCS special meeting abstains from voting, or responds by proxy with an "abstain" vote, it will have the same effect as a vote cast "**AGAINST**" the KCS adjournment proposal. If a KCS stockholder is not present in person (including virtually) at the KCS special meeting and does not respond by proxy, it will have no effect on the vote count for such proposal.

Voting by Directors and Executive Officers

As of [—], 2021, the latest practicable date prior to the date of this proxy statement/prospectus, KCS directors and executive officers, and their affiliates, as a group, owned and were entitled to vote approximately [—]% of the total outstanding shares of KCS common stock and [—]% of the total outstanding shares of KCS preferred stock. Although no KCS director or executive officer has entered into any agreement obligating them to do so, KCS currently expects that all of its directors and executive officers will vote their shares "**FOR**" the KCS merger proposal, "**FOR**" the KCS compensation proposal and "**FOR**" the KCS adjournment proposal. See the section entitled "*The KCS Merger Proposal—Interests of KCS's Directors and Executive Officers in the Transaction*" on page 101 and the arrangements described in Part III of KCS's Annual Report on Form 10-K for the fiscal year ended December 31, 2020, KCS's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2021 and KCS's Definitive Proxy Statement on Schedule 14A for KCS's 2021 annual meeting of stockholders filed with the SEC on April 9, 2021, all of which are incorporated into this proxy statement/prospectus by reference.

The CPRL Special Meeting and Shareholder Approval (page 107)

Under Section 611(c) of the TSX Company Manual, security holder approval is required if the number of securities issued or issuable by a listed issuer in payment of the purchase price for an acquisition, exceeds 25% of the number of securities of the listed issuer which are outstanding, on a pre-acquisition, non-diluted basis. Under the terms of the merger agreement, CPRL has agreed to issue 2.884 CPRL common shares and $90.00 in cash, without interest, in exchange for each share of KCS common stock issued and outstanding immediately prior to the effective time. Issuances by KCS of shares of KCS common stock are restricted under the terms of the merger agreement, subject to certain limited exceptions or the prior written consent of CPRL. As a result, the actual number of CPRL common shares that will be issued at the effective time will depend on the number of shares of KCS common stock, KCS restricted share awards and KCS director deferred stock outstanding at such time.

CPRL shareholders will be required to approve the issuance of such number of CPRL common shares as is necessary under the merger agreement to issue the share consideration. As described in the TSX listing application to be filed by CPRL, based on the number of shares of KCS common stock outstanding as of September 9, 2021, CPRL anticipated up to 277,960,197 CPRL common shares to be issuable to KCS common stockholders under the terms of the merger agreement, which represents approximately 42% of the issued and outstanding CPRL common shares as of September 9, 2021 (which we refer to as the "CPRL common share issuance"). Accordingly, the TSX requires that the share issuance resolution be approved by an ordinary

resolution of CPRL shareholders (i.e., a majority of the votes cast by holders of outstanding CPRL common shares represented in person or by proxy and entitled to vote at the CPRL special meeting). Despite the fact that CPRL shareholders are being asked to approve the issuance of up to 277,960,197 CPRL common shares, based on the number of shares of KCS common stock outstanding as of September 9, 2021, CPRL expects that it would issue (at the direction of surviving merger sub and on behalf of surviving merger sub) up to approximately 264,723,997 CPRL common shares in the first merger and is seeking CPRL shareholder approval for the issuance of up to 13,236,200 additional CPRL common shares to accommodate the effects of rounding and for other administrative purposes in accordance with the policies of the TSX.

The actual number of CPRL common shares to be issued or reserved for issuance under the merger agreement will be determined immediately prior to the effective time based on the exchange ratio, the number of shares of KCS common stock outstanding at such time and the number of KCS restricted share awards and KCS director deferred stock outstanding at such time.

CPRL will be holding the special meeting of CPRL shareholders on [—], 2021 (which we refer to, including any adjournments or postponements thereof, as the "CPRL special meeting") to vote on the resolutions necessary to complete the transaction and other matters to be considered by the CPRL shareholders at such special meeting. In addition to the above-mentioned resolution approving the CPRL common share issuance, at the CPRL special meeting, CPRL shareholders entitled to vote at the CPRL special meeting will be asked to approve a special resolution authorizing and approving an amendment to the articles of CPRL to change its name to "Canadian Pacific Kansas City," which amendment is conditional upon completion of the combination of CPRL and KCS following receipt of STB final approval. CPRL will separately prepare the management information circular in accordance with applicable Canadian securities and corporate laws and distribute such management information circular to its shareholders in connection with the CPRL special meeting.

Listing of CPRL Common Shares (page 100)

The completion of the transaction is conditional upon the approval for listing of CPRL common shares issuable under the merger agreement on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing conditions, prior to the effective time.

Delisting and Deregistration of KCS Common Stock (page 101)

If the transaction is completed, KCS common stock will be delisted from the NYSE and deregistered under the U.S. Exchange Act, and KCS will no longer be required to file periodic reports with the SEC with respect to KCS common stock.

KCS has agreed to cooperate with CPRL and use its reasonable best efforts to take, or cause to be taken, all actions reasonably necessary, proper or advisable under applicable laws and rules and policies of the NYSE and the SEC to delist the KCS common stock from the NYSE and to terminate its registration under the U.S. Exchange Act as promptly as practicable after the effective time.

Debt Financing (page 118)

As of June 30, 2021, CP had total long-term debt of approximately C$8.7 billion (U.S.$7.0 billion converted at the Bank of Canada exchange rate on June 30, 2021) and KCS had total long-term debt of approximately U.S.$3.8 billion.

Under the Commitment Letter (which we refer to as the "commitment letter"), dated as of September 15, 2021, by and among Goldman Sachs Lending Partners LLC (which we refer to as "GS Lending"), the Bank of Montreal (which we refer to as "BMO"), CPRL and CPRC, BMO and GS Lending have committed to provide an

unsecured 364-day bridge facility (the "bridge facility") in an aggregate principal amount of U.S.$8.5 billion to bridge the debt financing required to fund a portion of the cash consideration and preferred merger consideration, and transaction fees and expenses associated with, the transaction. CPRL expects to pre-fund and reduce the commitments under the bridge facility with an offering of debt securities before the closing of the transaction into the voting trust.

Effective as of April 9, 2021, CPRL amended its existing revolving credit facility to modify certain provisions relating to the calculation of the financial covenant ratio in its credit facility. In addition, effective as of September 24, 2021, CPRL entered into an amendment to extend the two-year tranche and the five-year tranche of its existing revolving credit facility to September 27, 2023 and September 27, 2026, respectively. Effective as of September 29, 2021, CPRL entered into a further amendment to its existing revolving credit facility in order to provide financial covenant flexibility for the anticipated acquisition financing pertaining to the transaction, which is in place for a two-year period from the date the transaction closes.

In addition, pursuant to the credit agreement, dated as of September 15, 2021, by and among CPRL and CPRC, BMO, the other lenders and financial institutions party thereto and BMO, as administrative agent, CPRC borrowed the aggregate amount of U.S.$500 million in unsecured term loans, which have an initial six-month maturity. Borrowings under such credit facility, together with commercial paper issuance and cash on hand were used to enable CPRL to make certain remittances in connection with the payments made by KCS in connection with the termination of the CN agreement.

Certain U.S. Federal Income Tax Consequences (page 119)

CPRL and KCS intend that the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and that Section 367(a)(1) of the Code will not apply to cause the transaction to result in gain recognition by holders of KCS common stock that exchange their shares of KCS common stock for the merger consideration (other than any excepted shareholder). The obligation of KCS to complete the transaction is conditioned upon the receipt of an opinion from Wachtell, Lipton, Rosen & Katz, special counsel to KCS, or another nationally recognized tax counsel, to the effect that, on the basis of facts, representations and assumptions set forth or referred to in such opinion, the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and that the transaction will not result in gain recognition under Section 367(a)(1) of the Code by holders of KCS common stock (other than any excepted shareholder).

Accordingly, on the basis of such opinion that the transaction will qualify as a reorganization and that Section 367(a) does not apply to require gain recognition, a U.S. holder (other than an excepted shareholder) that exchanges shares of KCS common stock for the merger consideration in the transaction will generally recognize gain (but not loss) in an amount equal to the lesser of: (i) the cash consideration (excluding cash received in lieu of fractional CPRL common shares, if any) received by such U.S. holder in the transaction; and (ii) the excess, if any, of (a) the sum of the cash consideration (excluding cash received in lieu of fractional CPRL common shares, if any) plus the fair market value of the share consideration (including any fractional CPRL common shares deemed received) received by such U.S. holder in exchange for its shares of KCS common stock in the transaction, over (b) such U.S. holder's tax basis in its shares of KCS common stock exchanged. In addition, a U.S. holder of KCS common stock generally will recognize gain or loss with respect to any cash received in lieu of fractional CPRL common shares.

The exchange of KCS preferred stock for cash pursuant to the transaction generally will be a taxable transaction for U.S. federal income tax purposes. U.S. holders of KCS preferred stock will generally recognize gain or loss in an amount equal to the difference, if any, between the amount of cash received with respect to their shares of KCS preferred stock pursuant to the transaction and their adjusted tax basis in such shares.

For the definition of "U.S. holder" and a more detailed discussion of the material U.S. federal income tax consequences of the transaction to U.S. holders, see the section entitled "*The KCS Merger Proposal—Certain U.S. Federal Income Tax Consequences*," on page 119.

The U.S. federal income tax consequences described above may not apply to all KCS stockholders. The tax consequences to KCS stockholders will depend on their individual situations. Accordingly, all KCS stockholders are urged to consult their own tax advisors for a full understanding of the particular tax consequences of the transaction to them.

Certain Canadian Federal Income Tax Consequences (page 124)

A Canadian resident holder (as defined in the section entitled "*The KCS Merger Proposal—Certain Canadian Federal Income Tax Consequences*," on page 124) who disposes of their KCS common stock for CPRL common shares and cash consideration (including cash received in lieu of a fractional CPRL common share) in connection with the first merger will generally realize a capital gain (or capital loss) for Canadian federal income tax purposes equal to the amount by which the sum of the aggregate of the fair market value of the CPRL common shares and cash consideration received exceeds (or is less than) the adjusted cost base of the Canadian resident holder's KCS common stock determined immediately before the disposition and any reasonable costs of disposition.

A Canadian resident holder who disposes of their KCS preferred stock for cash consideration in connection with the first merger will generally realize a capital gain (or capital loss) for Canadian federal income tax purposes equal to the amount by which the cash consideration received exceeds (or is less than) the adjusted cost base of the Canadian resident holder's KCS preferred stock determined immediately before the disposition and any reasonable costs of disposition.

A non-Canadian resident holder (as defined in the section entitled "*The KCS Merger Proposal—Certain Canadian Federal Income Tax Consequences*," on page 124) will not be subject to tax under the Canadian tax act on any capital gain realized on a disposition of KCS common stock or KCS preferred stock, as the case may be, in connection with the first merger, or on a subsequent disposition of a CPRL common share acquired as a result of the first merger, as applicable, unless the relevant share is "taxable Canadian property," and is not "treaty-protected property" (as those terms are defined in the Canadian tax act) of the non-Canadian resident holder, at the time of the disposition.

For more information, see the section entitled "*The KCS Merger Proposal—Certain Canadian Federal Income Tax Consequences*," on page 124.

Accounting Treatment of the Transaction (page 108)

In accordance with accounting principles generally accepted in the U.S. ("U.S. GAAP"), CP will account for the transaction using the acquisition method of accounting for business combinations.

Upon the closing, and only for the period that the outstanding shares of capital stock of the second surviving corporation (as successor to KCS) are held in the voting trust, CPRL will account for its indirect 100% equity ownership of the second surviving corporation using the equity method of accounting. Once the STB has completed its review of the transaction and approved CPRL's acquisition of control of KCS, CPRL will consolidate KCS prospectively, and the equity method investment will be remeasured to fair value immediately before the consolidation occurs, with the resulting gain or loss recognized in net income. As the ultimate outcome of the transaction, assuming receipt of STB final approval, will be a business combination, the unaudited Pro Forma Financial Statements presented in this proxy statement/prospectus have been prepared on a consolidated basis on the basis of a business combination.

For a more detailed discussion of the accounting treatment of the transaction, see the section entitled "*The KCS Merger Proposal—Accounting Treatment of the Transaction*," on page 108.

Regulatory Approvals Required for the Transaction (page 109)

As more fully described in this proxy statement/prospectus and in the merger agreement, and subject to the terms and conditions of the merger agreement, KCS and CPRL have agreed to promptly obtain all necessary actions or nonactions, authorizations, permits, waivers, consents, clearances, approvals and expirations or terminations of waiting periods and make all necessary registrations, notices, notifications, petitions, applications, reports and other filings and take all steps as may be necessary, proper or advisable to obtain an approval, clearance or waiver from, or to avoid an action or proceeding by, any governmental entity (collectively, "consents").

KCS and CPRL are not currently aware of any material consents or other filings that are required prior to the combination of CPRL and KCS other than those described in this proxy statement/prospectus.

Although CPRL and KCS believe that they will receive the required authorizations and approvals described herein to complete the transactions contemplated by the merger agreement, there can be no assurance as to the timing of these consents and approvals, CPRL's or KCS's ultimate ability to obtain such consents or approvals (or any additional consents or approvals that may otherwise become necessary), or the conditions or limitations that such approvals may contain or impose. For more information regarding factors that could impact the closing of the transaction, see the section entitled "*Risk Factors*," on page 21.

For a more detailed discussion of the regulatory approvals required to close the transaction see the sections of this proxy statement/prospectus entitled "*The Merger Agreement—Conditions that Must Be Satisfied or Waived for the Transaction to Occur*" and "*The Merger Agreement—Regulatory Filings and Efforts; Other Actions*," on pages 140 and 159, respectively.

STB

The transactions contemplated by the merger agreement are subject to review by the STB pursuant to 49 U.S.C. 11323 *et seq.*, which prohibits the acquisition of control of two or more U.S. rail carriers subject to the jurisdiction of the STB by a person that is not a carrier and the acquisition or control of a U.S. rail carrier by a person that is not a carrier but that controls any number of carriers. STB approval or exemption is required for, among other things, CPRL's acquisition of control of KCS.

On April 23, 2021, the STB issued a decision finding that the waiver provision under 49 C.F.R. § 1180.0(b) applies to the CP/KCS transaction, and that the transaction will therefore be subject to the regulations set forth at 49 C.F.R. part 1180 (2000) rather than the 2001 version of those rules. Under the pre-2001 rules that govern the transaction, no formal STB approval is required for use of a voting trust. In March 2021, the parties agreed to seek, and sought, a written informal advisory opinion of the STB staff to the effect that the proposed deposit of all outstanding shares of capital stock of the second surviving corporation into the independent, irrevocable voting trust immediately following the completion of the post-closing contributions, subject to the voting trust agreement, would preclude unlawful control of KCS by CPRL and its affiliates and would not result in a violation of 49 U.S.C. 11323 (which we refer to as the "STB voting trust opinion").

On May 6, 2021, the STB issued a decision indicating that it had conducted a full review of the voting trust submitted to the STB Staff in March 2021 and granted approval for the use of the voting trust to consummate the transaction, subject to the condition that the voting trust agreement be modified to prohibit the trustee from owning securities of CPRL or its affiliates during the existence of the voting trust. CP made the requisite modification. The voting trust agreement proposed for use with the transaction is unchanged from that modified in response to the STB's May 6 decision.

On September 15, 2021, CPRL and KCS filed with the STB an Amended Notice of Intent indicating that they had entered a new agreement providing for CPRL's acquisition of KCS, that they would file an application seeking STB control approval on or shortly after October 20, 2021, and that CPRL intended to indirectly acquire the shares of KCS prior to receiving control approval via the use of a voting trust that was substantially identical to that reviewed and approved by the STB in its May 6 decision.

On September 30, 2021, the STB issued a decision confirming that the transaction described in the September 15 Amended Notice of Intent was the "same transaction" that had been noticed in March 2021 and that the STB's May 6, 2021 approval for CPRL's proposed use of a voting trust to acquire KCS applies to the voting trust proposed for use with the transaction agreed to on September 15.

Under the merger agreement, CPRL and KCS must use reasonable best efforts to prosecute all filings and other presentations made, and promptly make any subsequent filings or presentations, with the STB with diligence, diligently oppose any third party's objections to, appeals from or petitions to reconsider or reopen any approval, opinion, exemption or other authorization obtained from the STB, and take all such further action as in the reasonable judgment of CPRL and KCS may facilitate obtaining STB final approval.

CFIUS

The transactions contemplated by the merger agreement are subject to review by the Committee on Foreign Investment in the United States (which we refer to as "CFIUS") pursuant to Section 721 of the Defense Production Act of 1950, as amended, and the regulations promulgated thereunder (which we refer to as "Section 721"). Under the terms of the merger agreement, CPRL may not assume control over KCS's railroad operations until: (a) CFIUS has determined that there are no unresolved national security concerns with respect to the transactions contemplated by the merger agreement, and the parties have received written notice from CFIUS that action under Section 721 has been concluded; (b) the parties have received written notice from CFIUS that the transactions contemplated by the merger agreement are not "covered transactions" pursuant to Section 721; or (c) CFIUS has sent a report to the President of the U.S. requesting the decision of the President of the U.S. with respect to the transactions contemplated by the merger agreement and (i) the period under Section 721 during which the President of the U.S. may announce his decision to take action to suspend, prohibit or place any limitations on the transactions contemplated by the merger agreement has expired without any such action being threatened, announced or taken or (ii) the President of the U.S. has announced a decision not to, or otherwise declined to, take any action to suspend or prohibit the transactions contemplated by the merger agreement (which we collectively refer to as "completion of the CFIUS Process").

The merger agreement provides for CPRL and KCS to cooperate regarding the preparation and filing with CFIUS of a declaration and/or a joint voluntary notification in connection with the transactions contemplated by the merger agreement. Please refer to the section entitled "*The KCS Merger Proposal—Regulatory Approvals Required for the Transaction*," on page 109 for additional detail regarding CFIUS.

COFECE and the IFT

Pursuant to the Mexican Federal Economic Competition Law and the Federal Telecommunications and Broadcasting Law, consummation of the transactions contemplated by the merger agreement requires the approval of the *Comisión Federal de Competencia Económica* (the Mexican Antitrust Commission) (which we refer to as "COFECE") and the *Instituto Federal de Telecomunicaciones* (the Mexican Federal Telecommunications Institute) (which we refer to as the "IFT," and, together with COFECE, the "Mexican antitrust authorities"), autonomous constitutional entities responsible for enforcing the Federal Economic Competition Law in the sectors of their respective jurisdiction, including reviewing and authorizing concentrations, when applicable. Such notifications may be submitted in parallel, and the procedures follow the same rules and legal time frame.

The merger agreement provides that KCS, CPRL, first merger sub and surviving merger sub were obligated to promptly, but in any event no later than 30 business days after the date of the merger agreement, file any and all notifications and report forms to the Mexican antitrust authorities, in each case as required under applicable law with respect to the transactions contemplated by the merger agreement, and take all other actions necessary to cause the expiration or termination of the process under applicable law as soon as practicable after the date of the merger agreement (*i.e.*, September 15, 2021).

Notifications of the transaction were submitted to the Mexican antitrust authorities on [—], 2021. The Mexican antitrust authorities will each have 60 business days to review the transaction and issue a resolution (as such period is calculated and may be extended under Mexican law, as described in the Section entitled "*The KCS Merger Proposal—Regulatory Approvals Required for the Transaction*," on page 109). If the Mexican antitrust authorities do not issue a resolution within the relevant review period (including any extension, if applicable), the transaction will be deemed approved. Failure to obtain clearance from the Mexican antitrust authorities precludes the parties from closing the transaction in Mexico.

ARTF and SCT

KCS and CPRL (through KCSM) have filed notices with the Mexican Agencia Reguladora del Transporte Ferroviario (the Regulatory Agency of Rail Transportation of Mexico) (which we refer to as "ARTF") and the Secretaría de Comunicaciones y Transportes (the Secretary of Communications and Transportation of Mexico) (which we refer to as "SCT"), which are responsible for regulating railroad services in Mexico, prior to the effective time. The notice process is for informational purposes only, and no approval is required from either ARTF or SCT to consummate the transaction.

Mexican Rail Union

KCS has provided an informal notification to the Mexican rail union; no approval on the part of the Mexican rail union is required in order to consummate the transaction.

FCC

KCS is subject to regulation by the Federal Communications Commission (which we refer to as the "FCC") under the Communications Act of 1934, as amended. FCC approval of the transfer of KCS's FCC licenses will be required. Failure to receive FCC approval prior to transferring control of the FCC licenses could result in civil fines, revocation of the subject licenses, and/or other remedial actions by the FCC. Initial approval from the FCC is expected before closing into the voting trust.

In October 2021, CPRL and KCS anticipate filing all required applications for FCC consent to the transfer of control of the subject FCC licenses from KCS to the voting trust. While CPRL and KCS believe that FCC approval will ultimately be obtained, this approval is not assured.

Additionally, if the transaction is consummated, then the FCC will also preside over a similar post-closing approval process. CPRL and KCS anticipate, but cannot guarantee, that the FCC will ultimately approve this post-closing transfer of control of the FCC licenses. CPRL and KCS are not aware of any cases where FCC approval did not follow STB approval.

For a more detailed discussion of the regulatory approvals required for the transaction, see the section entitled "*The KCS Merger Proposal—Regulatory Approvals Required for the Transaction*," on page 109.

Treatment of KCS Equity Awards (page 140)

KCS Stock Options

Each option to purchase shares of KCS common stock (which we refer to as a "KCS stock option"), whether vested or unvested, that is outstanding as of immediately prior to the effective time will, at the effective time, become fully vested and be converted into the right to receive an amount of cash equal to (i) the excess, if any of (A) the value of the merger consideration over (B) the per share exercise price of such option multiplied by (ii) the total number of shares of KCS common stock subject to such option as of immediately prior to the effective time, less applicable tax withholding.

KCS Restricted Share Awards

Each award of shares of KCS common stock granted subject to any vesting, forfeiture or other lapse restrictions (which we refer to as a "KCS restricted share award") that is outstanding as of immediately prior to the effective time and was granted prior to March 21, 2021, will, at the effective time, become fully vested and be converted into the right to receive (i) the merger consideration in respect of each share of KCS common stock subject to such KCS restricted share award as of immediately prior to the effective time and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award, less applicable tax withholding.

Each KCS restricted share award that is outstanding as of immediately prior to the effective time and was granted on or after March 21, 2021, will, at the effective time, be converted into an award that entitles the holder thereof, upon vesting, to receive (i) an amount in cash equal to the value of the merger consideration in respect of each share of KCS common stock subject to such KCS restricted share award and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award. Each such cash-based award will have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding KCS restricted share award, except that such award will vest in full upon a qualifying termination.

KCS Performance Share Awards

Each award of performance shares that corresponds to shares of KCS common stock (which we refer to as a "KCS performance share award") that is outstanding as of immediately prior to the effective time will, at the effective time, be converted into an award that entitles the holder thereof, upon vesting, to receive an amount in cash equal to the value of the merger consideration multiplied by 200% of the target number of shares of KCS common stock covered by the KCS performance share award as of immediately prior to the effective time. Each such cash-based award will have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding KCS performance share award, except that performance-based vesting conditions will no longer apply and the award will vest in full upon a qualifying termination.

KCS Director Deferred Stock

Each share of director deferred stock of KCS that is outstanding as of immediately prior to the effective time, will, at the effective time, be converted into the right to receive the merger consideration, less applicable tax withholding.

Appraisal or Dissenters' Rights (page 113)

If the transaction is completed, KCS stockholders who do not vote in favor of the adoption of the merger agreement and who otherwise comply with the applicable provisions of Section 262 of the DGCL will be entitled

to exercise appraisal rights thereunder and obtain payment in cash for the fair value of their shares of KCS, subject to certain limitations under the DGCL. Any shares of KCS voting stock that are held by a KCS stockholder on the date of making an appraisal demand, who continues to own such shares through the effective time, who has not voted in favor of the adoption of the merger agreement and who has properly demanded appraisal for such shares in accordance with the DGCL will not be converted into the right to receive the merger consideration or preferred merger consideration, as applicable, and a KCS stockholder who holds such shares will have the right to obtain payment in cash for the fair value of their shares of KCS in lieu of the merger consideration or preferred merger consideration, as applicable, unless such KCS stockholder fails to perfect, effectively withdraws, waives or otherwise loses such stockholder's appraisal rights under the DGCL. If, after the effective time, such holder of KCS voting stock fails to perfect, effectively withdraws, waives or otherwise loses his, her or its appraisal rights, each such share will be treated as if it had been converted as of the effective time into a right to receive the merger consideration or preferred merger consideration, as applicable, without any interest thereon. Due to the complexity of the procedures for exercising your appraisal rights, KCS stockholders who are considering exercising such rights are encouraged to seek the advice of legal counsel. Failure to strictly comply with these provisions will result in the loss of appraisal rights. See the section entitled "*The KCS Merger Proposal—Appraisal or Dissenters' Rights*," on page 113, for additional information and the text of Section 262 of the DGCL, which is included as Annex D to this proxy statement/prospectus, which you are encouraged to read carefully and in their entirety.

Conditions to the Transaction (page 140)

Mutual Conditions to Completion

The respective obligations of each party to effect the transaction are subject to the satisfaction or waiver at or prior to the closing of the transaction of each the following conditions:

- obtaining the affirmative vote of the holders of a majority of the outstanding shares of KCS voting stock in favor of the adoption of the merger agreement (which we refer to as the "KCS stockholder approval");
- obtaining the affirmative vote in favor of the CPRL common share issuance by a majority of the votes cast by the holders of outstanding CPRL common shares represented in person or by proxy and entitled to vote on such matter at the CPRL special meeting or any adjournment or postponement thereof (which we refer to as the "CPRL shareholder approval");
- effectiveness of the Form F-4 (of which this proxy statement/prospectus forms a part) in accordance with the provisions of the U.S. Securities Act and no stop order suspending the effectiveness of the Form F-4 having been issued and remaining in effect and no proceeding to that effect having been commenced;
- no injunction or similar order by any court or other governmental entity of competent jurisdiction having been entered and continuing to be in effect that prohibits or makes illegal the consummation of the transaction or the voting trust transaction;
- the authorizations required to be obtained from COFECE and the IFT with respect to the transactions contemplated by the merger agreement having been obtained; and
- the CPRL common shares to be issued in the first merger having been approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing requirements.

Conditions to the Obligations of KCS

The obligation of KCS to effect the transaction is also subject to the satisfaction or waiver by KCS, at or prior to the closing of the transaction, of the following conditions:

- the representations and warranties of CPRL and each merger sub contained in the merger agreement being true and correct as of the date of the merger agreement and as of the date on which the closing occurs (which we refer to as the "closing date") as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date), subject to the materiality standards provided in the merger agreement;
- CPRL and each merger sub having performed in all material respects the obligations and complied in all material respects with all covenants required by the merger agreement to be performed or complied with by them prior to the closing;
- since September 15, 2021, no event, change, occurrence, effect or development having occurred that has had, or is reasonably likely to have, a material adverse effect on CPRL;
- KCS's receipt of a certificate of the chief executive officer or another senior officer of CPRL, certifying that the conditions set forth in the bullets directly above have been satisfied; and
- KCS's receipt of an opinion of Wachtell, Lipton, Rosen & Katz, or, if Wachtell, Lipton, Rosen & Katz is unable to provide such opinion, another nationally recognized tax counsel dated as of the closing date, to the effect that the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and the transaction will not result in gain recognition under Section 367(a)(1) of the Code by persons who are stockholders of KCS immediately prior to the effective time (with certain exceptions).

Conditions to the Obligations of CPRL and the Merger Subs

The obligations of CPRL and the merger subs to effect the transaction are also subject to the satisfaction or waiver by CPRL, at or prior to the closing of the transaction, of the following conditions:

- the representations and warranties of KCS contained in the merger agreement being true and correct as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date), subject to the materiality standards provided in the merger agreement;
- KCS having performed in all material respects the obligations and complied in all material respects with all covenants required by the merger agreement to be performed or complied with by it at or prior to the closing;
- since September 15, 2021, no event, change, occurrence, effect or development having occurred that has had, or is reasonably likely to have, a material adverse effect on KCS; and
- CPRL's receipt of a certificate of the chief executive officer or another senior officer of KCS, certifying that the conditions set forth in the bullets directly above have been satisfied.

No Solicitation (page 150)

The merger agreement generally restricts the ability of CPRL, KCS and their respective subsidiaries, directors and officers to: (i) solicit, initiate or knowingly encourage or knowingly facilitate any inquiry regarding, or the making or submission of any proposal, offer or indication of intent that constitutes, or would reasonably be expected to lead to, or result in, an alternative proposal, (ii) engage in, continue or otherwise participate in any discussions or negotiations with any person regarding an alternative proposal or any inquiry, proposal or offer that would reasonably be expected to lead to, or result in, an alternative proposal (except to notify such person

that the provisions of the merger agreement prohibit any such discussions or negotiations), (iii) furnish any nonpublic information relating to such party or its subsidiaries in connection with or for the purpose of facilitating an alternative proposal or any inquiry, proposal, offer or indication of intent that would reasonably be expected to lead to, or result in, an alternative proposal, (iv) recommend or enter into any other letter of intent, memorandum of understanding, agreement in principle, option agreement, acquisition agreement, merger agreement, joint venture agreement, partnership agreement or other similar agreement with respect to an alternative proposal, or (v) approve, authorize or agree to do any of the actions outlined in clauses (i)-(iv) above or otherwise knowingly facilitate any effort or attempt to make an alternative proposal.

However, prior to the time, but not after, in the case of KCS, the KCS stockholder approval is obtained or, in the case of CPRL, the CPRL shareholder approval is obtained, if such party receives a superior proposal or the relevant party's board of directors has determined in good faith after consultation with its outside legal and financial advisors that such proposal could reasonably be expected to lead to a superior proposal, such party may take various actions, including providing information in response to a request therefor (including non-public information) to the third party who made such alternative proposal (including its officers, employees, accountants, consultants, legal counsel, financial advisors and agents and other representatives, which we collectively refer to as "representatives," and prospective equity and debt financing sources) (subject to the terms and conditions of the merger agreement) and engaging or participating in discussions or negotiations with any such third party (including its representatives) regarding such alternative proposal.

CPRL and KCS are each required to promptly give notice to the other party if it or any of its representatives receives (i) any inquiries, proposals or offers with respect to an alternative proposal or (ii) any request for information that, to the knowledge of such party, has been or is reasonably likely to have been made in connection with any alternative proposal. CPRL or KCS, as applicable, will be required to thereafter keep the other party reasonably informed, on a reasonably current basis, of any material developments regarding any alternative proposal or any material change to the terms of any such alternative proposal and any material change to the status of any such discussions or negotiations with respect thereto.

For more detailed information, see the section entitled "*The Merger Agreement—No Solicitation*," on page 150.

Financing (page 154)

CPRL has agreed to use its reasonable best efforts, and will cause each of its subsidiaries to use its reasonable best efforts to obtain funds sufficient, together with cash and other sources of funds immediately available to CPRL on the closing date, for the satisfaction of CPRL's and its affiliates' obligations under the merger agreement and the debt commitment letters delivered at signing of the merger agreement, including the commitment letter (the "debt commitment letters"), including payment of the cash consideration and preferred merger consideration and any fees and expenses of or payable by CPRL, the merger subs, or CPRL's affiliates, and for any repayment or refinancing of any outstanding indebtedness of KCS and/or its subsidiaries contemplated by, or required in connection with the transaction (the "financing amounts"), including using reasonable best efforts to take, or cause to be taken, all actions, and do, or cause to be done, all things necessary, proper or advisable to obtain the proceeds of the financing contemplated by the debt commitment letters. Other than the commitment letter in respect of the bridge facility, all debt commitment letters have been terminated.

In the event any portion of the debt financing contemplated by the debt commitment letters becomes unavailable regardless of the reason therefor, (A) CPRL will promptly notify KCS in writing of such unavailability and the reason therefor and (B) CPRL will use its reasonable best efforts, and will cause each of its subsidiaries to use their reasonable best efforts, to obtain as promptly as practicable following the occurrence of such event, alternative debt financing for any such portion from alternative sources (the "alternative financing") in an amount sufficient, when taken together with cash and the other sources of immediately available funds to CPRL at the closing to pay the financing amounts and that do not include any conditions to the consummation of such

alternative financing that are more onerous than the conditions set forth in the debt commitment letters. To the extent requested in writing by KCS from time to time, CPRL will keep KCS informed on a reasonably current basis of the status of its efforts to arrange and consummate the debt financing. CPRL will promptly notify KCS in writing if there exists any actual or threatened material breach, default, repudiation, cancellation or termination by any party to the debt commitment letters or any definitive agreement and a copy of any written notice or other written communication from any financing party with respect to any actual material breach, default, repudiation, cancellation or termination by any party to the debt commitment letters or any definitive agreement or any provision thereof.

KCS has agreed to use its reasonable best efforts, and will cause each of its subsidiaries to use its reasonable best efforts, and each of them will use their reasonable best efforts to cause their respective representatives to use their reasonable best efforts, to provide customary cooperation, to the extent reasonably requested by CPRL in writing, in connection with the offering, arrangement, syndication, consummation, issuance or sale of any debt financing or alternative financing (provided, that such requested cooperation does not unreasonably interfere with the ongoing operations of KCS and its affiliates and is otherwise subject to certain specified limitations).

For more detailed information, see the section entitled "*The Merger Agreement—Financing*," on page 154.

Termination or Abandonment of the Merger Agreement (page 163)

Subject to conditions and circumstances described in the merger agreement, the merger agreement may be terminated and abandoned at any time prior to the effective time whether before or after any approval by the KCS stockholders or CPRL shareholders of the matters presented in connection with the transaction:

- by mutual written consent of KCS and CPRL;
- by either KCS or CPRL, if:
  - the effective time has not occurred on or before the end date; provided, that the party seeking to terminate the merger agreement has not breached in any material respect its obligations under the merger agreement in any manner that has been the primary cause of the failure to consummate the transaction on or before such date;
  - any governmental entity of competent jurisdiction has issued or entered an injunction or similar order that prohibits or makes illegal the consummation of the transaction or the voting trust transaction, and such injunction or similar order has become final and non-appealable; provided, that the party seeking to terminate the merger agreement has not breached in any material respect its obligations under the merger agreement in a manner that has been the primary cause of such injunction or order;
  - the KCS stockholder approval is not obtained at the KCS special meeting or at any adjournment or postponement thereof; or
  - the CPRL shareholder approval is not obtained at the CPRL special meeting or at any adjournment or postponement thereof;
- by KCS:
  - if there has been a breach or failure to perform in any material respect by CPRL or the merger subs of any representation, warranty, covenant or agreement set forth in the merger agreement and such breach or failure would result in a failure of certain conditions to closing and such breach or failure is not curable by the end date, or if curable by the end date, has not been cured within 45 business days after the giving of notice thereof by KCS; however, the right to terminate the merger agreement due to such a breach or failure will not be available to KCS if KCS is in material breach of any representation, warranty, agreement or covenant contained in the merger agreement;

- prior to receipt of the KCS stockholder approval, in order to enter into a definitive agreement providing for a KCS superior proposal; or
- prior to receipt of the CPRL shareholder approval if the board of directors of CPRL (which we refer to as the "CPRL board") has effected a change of recommendation; or

- by CPRL:
  - if there has been a breach or failure to perform in any material respect by KCS of any representation, warranty, covenant or agreement set forth in the merger agreement and such breach or failure would result in a failure of certain conditions to closing and such breach or failure is not curable by the end date, or if curable by the end date, has not been cured within 45 business days after the giving of notice thereof by CPRL; however, the right to terminate the merger agreement due to such a breach or failure will not be available to CPRL if CPRL or any merger sub is in material breach of any representation, warranty, agreement or covenant contained in the merger agreement; or
  - prior to receipt of the KCS stockholder approval, if the KCS board has effected a change of recommendation.

For a more detailed explanation of the termination provisions of the merger agreement, as well as a discussion of the effect of termination and potential termination payments, see the section entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*," on page 163.

Your Rights as a CPRL Shareholder Will Be Different from Your Rights as a KCS Stockholder (page 194)

At the effective time, each eligible share of KCS common stock will be converted into the right to receive the merger consideration, consisting of (1) 2.884 CPRL common shares and (2) $90.00 in cash, without interest. As a result, holders of KCS common stock will have different rights once they become CPRL shareholders due to differences between the organizational documents of CPRL and KCS and differences between Delaware law, where KCS is incorporated, and the laws of Canada, where CPRL is incorporated. For a summary of the material differences between the rights of CPRL shareholders and the existing rights of holders of KCS common stock, see the section entitled "*Comparison of Rights of CPRL Shareholders and KCS Stockholders*," on page 194.

Interests of KCS's Directors and Executive Officers in the Transaction (page 101)

In considering the recommendation of the KCS board to adopt the merger agreement, KCS stockholders should be aware that KCS's directors and executive officers have interests in the transaction that may be different from, or in addition to, the interests of KCS stockholders generally, including potential severance benefits, treatment of outstanding KCS equity awards in connection with the transaction, potential transaction bonuses, tax gross-ups with respect to taxes imposed under Section 4999 of the Code, and rights to ongoing indemnification and insurance coverage. The KCS board was aware of these interests and considered them, among other matters, in evaluating and negotiating the merger agreement, in reaching its decision to approve and declare advisable the merger agreement and the transactions contemplated by the merger agreement, and in recommending to KCS stockholders that the merger agreement be approved.

These interests are discussed in more detail in the section entitled "*The KCS Merger Proposal—Interests of KCS's Directors and Executive Officers in the Transaction*," on page 101. The KCS board was aware of the different or additional interests described herein and considered these interests along with other matters in approving and adopting the merger agreement.

RISK FACTORS

You should consider carefully the following risk factors, as well as the other information set forth in and incorporated by reference into this proxy statement/prospectus, before making a decision on the KCS merger proposal, the KCS compensation proposal and the KCS adjournment proposal. As CPRL shareholders following the effective time, holders of KCS common stock will be subject to all risks inherent in the business of CPRL in addition to the risks relating to KCS. The market value of CPRL common shares will reflect the performance of the business relative to, among other things, that of the competitors of CPRL and KCS and general economic, market and industry conditions. The value of your investment may increase or may decline and could result in a loss.

In addition, KCS's and CPRL's respective businesses are subject to numerous risks and uncertainties, including the risks and uncertainties described, in the case of KCS, in its Annual Report on Form 10-K for the year ended December 31, 2020 and its Quarterly Reports on Form 10-Q for the quarterly periods ended March 31, 2021 and June 30, 2021, and in the case of CPRL, in its Annual Report on Form 10-K for the year ended December 31, 2020 and its Quarterly Reports on Form 10-Q for the quarterly periods ended March 31, 2021 and June 30, 2021, each of which is incorporated by reference into this proxy statement/prospectus. For more information, please see the section entitled "Where You Can Find Additional Information" on page 229.

Risks Relating to the Transaction

Because the exchange ratio is fixed and the market price of shares of CPRL common shares has fluctuated and will continue to fluctuate, KCS stockholders cannot be sure of the value of the merger consideration they will receive in the transaction prior to the closing of the transaction.

At the effective time, each share of KCS common stock that is outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) will be converted into the right to receive 2.884 CPRL common shares and $90.00 in cash, without interest. Because the exchange ratio is fixed, the value of the share consideration will depend on the market price of CPRL common shares at the effective time. The market price of CPRL common shares has fluctuated since the date of the announcement of the transaction and is expected to continue to fluctuate from the date of this proxy statement/prospectus until the closing date, which could occur a considerable amount of time after the date hereof. Changes in the price of CPRL common shares may result from a variety of factors, including, among others, general market and economic conditions, changes in CPRL's and KCS's respective businesses, operations and prospects, risks inherent in their respective businesses, changes in market assessments of the likelihood that the proposed acquisition will be completed and/or the value that may be generated by the proposed acquisition and changes with respect to expectations regarding the timing of the proposed acquisition and regulatory considerations. Many of these factors are beyond KCS's and CPRL's control.

The CPRL common shares to be received by holders of KCS common stock at the effective time will have different rights from shares of KCS common stock.

At the effective time, holders of KCS common stock will no longer be stockholders of KCS but will instead become shareholders of CPRL. The rights of former holders of KCS common stock as stockholders will then be governed by Canadian law and by the terms of CPRL's articles of incorporation and by-laws, which are in some respects materially different than the terms of KCS's certificate of incorporation and by-laws, which currently govern the rights of KCS stockholders. See the section of this proxy statement/prospectus entitled "*Comparison of Rights of CPRL Shareholders and KCS Stockholders*," on page 194 for a discussion of the different rights associated with CPRL common shares and KCS common stock.

The transaction is subject to various closing conditions, including regulatory and stockholder/shareholder approvals as well as other uncertainties, and there can be no assurances as to whether and when it may be completed.

Closing of the transaction is subject to the satisfaction or waiver of a number of conditions specified in the merger agreement, and it is possible that such conditions may prevent, delay or otherwise materially adversely

affect the completion of the transaction. These conditions include, among other things: (1) receipt of the KCS stockholder approval; (2) receipt of the CPRL shareholder approval; (3) effectiveness of the Form F-4 (of which this proxy statement/prospectus forms a part) in accordance with the provisions of the U.S. Securities Act and no stop order suspending the effectiveness of the Form F-4 having been issued and remaining in effect and no proceeding to that effect having been commenced; (4) the absence of any injunction or similar order prohibiting or making illegal the consummation of the transaction or the voting trust transaction; (5) approval by COFECE and the IFT of the transactions contemplated by the merger agreement; (6) the CPRL common shares issuable in the first merger having been approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing requirements; (7) the accuracy of each party's representations and warranties, subject to certain materiality standards set forth in the merger agreement; (8) compliance by each party in all material respects with such party's obligations under the merger agreement; and (9) with respect to CPRL, the absence of a Company Material Adverse Effect, and with respect to KCS, the absence of a Parent Material Adverse Effect (as such terms are defined in the merger agreement).

The governmental authorities from which authorizations are required have broad discretion in administering the governing laws and regulations, and may take into account various facts and circumstances in their consideration of the transactions contemplated by the merger agreement. These governmental authorities may initiate proceedings or otherwise seek to prevent the transaction. As a condition to authorization of the transactions contemplated by the merger agreement, these governmental authorities also may impose requirements, limitations or costs, require divestitures or place restrictions on the conduct of CPRL's business after the combination of CPRL and KCS following receipt of STB final approval.

We cannot provide any assurance that all required consents and approvals will be obtained or that all closing conditions will otherwise be satisfied (or waived, if applicable), and, if all required consents and approvals are obtained and all closing conditions are satisfied (or waived, if applicable), we cannot provide any assurance as to the terms, conditions and timing of such consents and approvals or the timing of the completion of the transaction. Many of the conditions to completion of the transaction are not within either KCS's or CPRL's control, and neither company can predict when or if these conditions will be satisfied (or waived, if applicable). Any delay in completing the transaction could cause KCS and/or CPRL not to realize some or all of the benefits that each expects to achieve if the transaction is successfully completed within the expected timeframe.

In order to complete the transaction, CPRL and KCS must obtain certain governmental approvals, and if such approvals are not granted or are granted with conditions that become applicable to the parties, completion of the transaction may be delayed, jeopardized or prevented and the anticipated benefits of the transaction could be reduced.

No assurance can be given that the required consents, orders and approvals will be obtained or that the required conditions to the completion of the transaction will be satisfied. Even if all such consents, orders and approvals are obtained and such conditions are satisfied, no assurance can be given as to the terms, conditions and timing of such consents, orders and approvals. For example, these consents, orders and approvals may impose conditions on or require divestitures relating to the divisions, operations or assets of KCS and CPRL or may impose requirements, limitations or costs or place restrictions on the conduct of KCS's or CPRL's business, and if such consents, orders and approvals require an extended period of time to be obtained, such extended period of time could increase the chance that an adverse event occurs with respect to KCS or CPRL. Such extended period of time also may increase the chance that other adverse effects with respect to KCS or CPRL could occur, such as the loss of key personnel. Even if all necessary approvals are obtained, no assurance can be given as to the terms, conditions and timing of such approvals. For more information, see the sections entitled "*The KCS Merger Proposal—Regulatory Approvals Required for the Transaction*" and "*The Merger Agreement—Conditions that Must be Satisfied or Waived for the Transaction to Occur*," on pages 109 and 140, respectively.

The KCS special meeting may take place before all of the required regulatory approvals have been obtained and before all conditions to such approvals, if any, are known. Notwithstanding the foregoing, if the KCS merger

proposal is approved by KCS stockholders, KCS may not be required to seek further approval of KCS stockholders.

After CPRL's combination with KCS following receipt of STB approval, CPRL may fail to realize projected benefits and cost savings of the combination, which could adversely affect the value of CPRL common shares.

CPRL and KCS have operated and, until the receipt of STB final approval, will continue to operate (even while the voting trust is in effect), independently. The success of CPRL's combination with KCS will depend, in part, on CPRL's ability to realize the anticipated benefits and synergies from combining the businesses of KCS and CPRL following the (which we refer to as the "control date"), including operational and other synergies that we believe the combined company will achieve. The anticipated benefits and synergies of CPRL's combination with KCS may not be realized fully or at all, may take longer to realize than expected or could have other adverse effects that we do not currently foresee. Some of the assumptions that we have made, such as the achievement of operating synergies, may not be realized. The integration process may, for KCS and CPRL, result in the loss of key employees, the disruption of ongoing businesses or inconsistencies in standards, controls, procedures and policies. There could be potential unknown liabilities and unforeseen expenses associated with the transaction that were not discovered in the course of performing due diligence. Coordinating certain aspects of the operations and personnel of CPRL with KCS after the combination of CPRL and KCS following receipt of STB final approval will involve complex operational, technological and personnel-related challenges, which may be made more difficult in light of the COVID-19 pandemic. Additionally, the integration will require significant time and focus from management following the combination which may disrupt the business of the combined company.

The announcement and pendency of the transaction could adversely affect each of KCS's and CPRL's business, results of operations and financial condition.

The announcement and pendency of the transaction could cause disruptions in and create uncertainty surrounding KCS's and CPRL's business, including affecting KCS's and CPRL's relationships with its existing and future customers, suppliers and employees, which could have an adverse effect on KCS's or CPRL's business, results of operations and financial condition, regardless of whether the transaction is completed. In particular, KCS and CPRL could potentially lose important personnel as a result of the departure of employees who decide to pursue other opportunities in light of the transaction. KCS and CPRL could also potentially lose customers or suppliers, and new customer or supplier contracts could be delayed or decreased. The attention of KCS's and CPRL's respective management may be directed towards closing the transaction, including obtaining regulatory approvals and other transaction-related considerations and may be diverted from the day-to-day business operations of KCS and CPRL and matters related to the transaction may require commitments of time and resources that could otherwise have been devoted to other opportunities that might have been beneficial to KCS and CPRL. Additionally, the merger agreement requires each party to obtain the other party's consent prior to taking certain specified actions while the transaction is pending. These restrictions may prevent CPRL and KCS from pursuing otherwise attractive business opportunities prior to the closing of the transaction, and in some cases for KCS, completion of the combination. Any of these matters could adversely affect the businesses of, or harm the results of operations, financial condition or cash flows of CPRL and the market value of CPRL common shares.

If the transaction does not close, the prices of KCS common stock and CPRL common shares may fall to the extent that the current prices of KCS common stock and CPRL common shares reflect a market assumption that the transaction will close. In addition, the failure to close the transaction may result in negative publicity or a negative impression of KCS in the investment community and may affect KCS's and CPRL's relationship with employees, customers, suppliers and other partners in the business community.

KCS and CPRL will incur substantial transaction fees and costs in connection with the transaction.

KCS and CPRL have incurred and expect to incur additional material non-recurring expenses in connection with the transactions contemplated by the merger agreement, including costs relating to obtaining required approvals

and, in the case of KCS, compensation payments to its executives triggered by the change in control of KCS as a result of the transaction. KCS and CPRL have incurred significant financial services, accounting, tax and legal fees in connection with the process of negotiating and evaluating the terms of the transaction. Additional significant unanticipated costs may be incurred in the course of coordinating and combining the businesses of KCS and CPRL following receipt of STB final approval. Even if the transaction does not close, KCS and CPRL will need to pay certain costs relating to the transaction incurred prior to the date the transaction was abandoned, such as financial advisory, accounting, tax, legal, filing and printing fees. Such costs may be significant and could have an adverse effect on the parties' future results of operations, cash flows and financial condition. In addition to its own fees and expenses, if the merger agreement is terminated under specified circumstances, KCS will be required to pay to CPRL a $700.0 million termination payment and/or the $700.0 million CN termination amount refund. In addition to its own fees and expenses, if the merger agreement is terminated under specified circumstances, CPRL may be required to pay either $700.0 million or $1.0 billion to KCS, depending on the reason for the termination. For more information, see the section entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*," on page 163.

Significant demands will be placed on CPRL and KCS as a result of the combination of the two companies.

As a result of the combination of CPRL and KCS following receipt of STB final approval, significant demands will be placed on the managerial, operational and financial personnel and systems of CPRL and KCS. CPRL and KCS cannot assure you that their respective systems, procedures and controls will be adequate to support the expansion of operations following and resulting from the combination of the two companies. The future operating results of the combined company will be affected by the ability of its officers and key employees to manage changing business conditions and to implement and expand its operational and financial controls and reporting systems in response to the transaction.

The unaudited pro forma condensed consolidated financial information of KCS and CPRL is presented for illustrative purposes only and may not be indicative of the results of operations or financial condition of the combined company following the combination of CPRL and KCS following receipt of STB final approval.

The unaudited pro forma condensed consolidated financial information included in this proxy statement/prospectus has been prepared using the consolidated historical financial statements of CPRL and KCS, is presented for illustrative purposes only and should not be considered to be an indication of the results of operations or financial condition of the combined company after the combination of CPRL and KCS following receipt of STB final approval. In addition, the unaudited pro forma condensed consolidated financial information included in this proxy statement/prospectus is based in part on certain assumptions regarding the transaction. These assumptions may not prove to be accurate, and other factors may affect the combined company's results of operations or financial condition following the combination of CPRL and KCS following receipt of STB final approval. Accordingly, the historical information incorporated by reference in this proxy statement/prospectus and unaudited pro forma condensed consolidated financial information included in this proxy statement/prospectus does not necessarily represent the combined company's results of operations and financial condition had KCS and CPRL operated as a combined entity during the periods presented, or of the combined company's results of operations and financial condition after the combination of CPRL and KCS following receipt of STB final approval. The combined company's potential for future business success and operating profitability must be considered in light of the risks, uncertainties, expenses and difficulties typically encountered by recently combined companies.

In preparing the unaudited pro forma condensed consolidated financial information contained in this proxy statement/prospectus, CPRL has given effect to, among other items, the combination of CPRL and KCS following receipt of STB final approval, the payment of the merger consideration and the preferred merger consideration and the indebtedness of CPRL on a consolidated basis after giving effect to the combination of CPRL and KCS following receipt of STB final approval, including the indebtedness of KCS. The unaudited pro forma condensed consolidated financial information may not reflect all of the costs that are expected to be

incurred by KCS and CPRL in connection with the transaction. For more information, see the section entitled "*Unaudited Pro Forma Condensed Consolidated Financial Information*," on page 170, including the notes thereto.

The substantial additional indebtedness that CP will incur in connection with the transaction could adversely affect CP's (and after the combination of CPRL and KCS following receipt of STB final approval, the combined company's) financial position, including by decreasing its business flexibility, ability to satisfy its debt obligations and credit ratings.

After the combination of CPRL and KCS following receipt of STB final approval, the combined company will have substantially increased borrowings compared to CP's historical level of borrowings. CP's consolidated borrowings were approximately C$8.7 billion (U.S.$7.0 billion converted at the Bank of Canada exchange rate on June 30, 2021) as at June 30, 2021. The combined company's pro forma borrowings as at June 30, 2021, if the acquisition of KCS had been completed on that same date, would have been approximately U.S.$20.3 billion, of which U.S.$9.0 billion would have been at variable rates of interest when assuming borrowings for the transaction are made under the bridge facility.

CP expects to incur approximately U.S.$13.3 billion of additional debt in connection with the transaction, as a result of obtaining financing to complete the transaction and refinancing of debt assumed in the transaction as required. Also, in connection with the transaction, the existing indebtedness of KCS is expected to remain outstanding to the extent the transaction closes into the voting trust. This increased level of borrowings could have the effect, among other things, of reducing CP's liquidity and the combined company's flexibility to respond to changing business and economic conditions. Also, the combined company's ability to make payments of principal and interest on its indebtedness will depend upon its future performance, which will be subject to general economic, financial and business conditions, sufficient cash flow from KCS during the period in which it is in the voting trust, the implementation of the integration with KCS and other factors affecting its operations, many of which will be beyond the combined company's control.

Accordingly, the amount of cash required to service the combined company's increased borrowing levels and increased aggregate dividends after the combination of CPRL and KCS following receipt of STB final approval, and thus the demands on the combined company's cash resources, will be greater than the amount of cash flows required to service CP's borrowings and pay dividends prior to the combination. If CP completes the acquisition of KCS and obtains control of KCS but CP does not achieve the expected benefits and cost savings from the acquisition, or if the financial performance of the combined company does not meet current expectations, then CP's ability to service CP's indebtedness may be adversely impacted. The increased levels of borrowings and dividends after the combination of CPRL and KCS following receipt of STB final approval could also reduce funds available for the combined company's investments in research and development and capital expenditures and other activities and may create competitive disadvantages for the combined company relative to other companies with lower debt levels.

The agreements that will govern CP's indebtedness that would be incurred in connection with the acquisition of KCS may contain various affirmative and negative covenants that may, subject to certain customary exceptions, restrict the combined company's ability to, among other things, create liens over its property, change its line of business and/or merge or consolidate with any other person or sell or convey certain of its assets to another person. In addition, some of the agreements that will govern the combined company's new debt financings may contain financial covenants that will require it to maintain certain financial ratios. Various risks, uncertainties and events beyond the combined company's control could affect its ability to comply with these covenants and failure to comply with them could result in an event of default, which, if not cured or waived, could accelerate repayment obligations. Under these circumstances, the combined company may not have sufficient funds or other resources to satisfy all of its obligations.

CP's credit ratings impact the cost and availability of future borrowings and, accordingly, CP's cost of capital. CP's credit ratings reflect each credit rating organization's opinion of CP's financial and business strength,

operating performance and ability to meet CP's debt obligations. If any of CP's credit ratings are reduced, CP may not be able to sell additional debt securities, borrow money, refinance the transaction facilities if drawn or establish alternatives to the transaction facilities in the amounts, at the times or interest rates or upon the more favorable terms and conditions that might be available if CP's current credit ratings are maintained.

In addition, future borrowings under circumstances in which the combined company's debt is rated below investment grade may contain further restrictions that impose significant restrictions on the way the combined company operates after the combination of CPRL and KCS following receipt of STB final approval.

CPRL or KCS may waive one or more of the closing conditions without re-soliciting shareholder approval or stockholder approval, respectively.

Certain conditions to CPRL's and KCS's obligations, respectively, to close the transaction may be waived, in whole or in part, to the extent legally permissible, either unilaterally or by agreement of CPRL and KCS. In the event that any such waiver does not require re-solicitation of CPRL's shareholders or an amendment of this proxy statement/prospectus or any re-solicitation of proxies or voting cards, as applicable, the parties will have the discretion to close the transaction without seeking further approval of CPRL shareholders or KCS stockholders, as applicable.

The opinions of KCS's financial advisors rendered to the KCS board do not reflect changes in circumstances between the signing of the merger agreement and the closing of the transaction.

The KCS board has received opinions from Morgan Stanley and BofA Securities, KCS's financial advisors, dated September 15, 2021, to the effect that, as of the date of the opinions and based on and subject to assumptions made, procedures followed, matters considered and qualifications and limitations on the scope of review undertaken by each financial advisor as described in the written opinions, the merger consideration to be received pursuant to the merger agreement by holders of KCS common stock (other than excluded shares) was fair, from a financial point of view, to such holders, but has not obtained updated opinions as of the date of this proxy statement/prospectus. Changes in the operations and prospects of CPRL or KCS, general market and economic conditions and other factors that may be beyond the control of CPRL or KCS, and on which the forecasts and assumptions used by KCS's financial advisors in connection with rendering their respective opinions may have been based, may significantly alter the value of CPRL or KCS or the prices of the CPRL common shares or of the shares of KCS common stock by the time the transaction is completed. Each opinion did not speak as of the time the transaction will be completed or as of any date other than the date of such opinion and the KCS board does not anticipate asking its financial advisors to update their respective opinions. The KCS board's recommendation that KCS stockholders vote "**FOR**" approval of the KCS merger proposal, "**FOR**" the non-binding compensation advisory proposal and "**FOR**" the KCS adjournment proposal, however, is made as of the date of this proxy statement/prospectus.

For a description of the opinions that the KCS board received from its financial advisors, see the sections entitled "*The KCS Merger Proposal—Opinion of BofA Securities*" and "*The KCS Merger Proposal—Opinion of Morgan Stanley*" on pages 84 and 71, respectively. Copies of the opinions of Morgan Stanley and BofA Securities are attached as Annexes B and C to this proxy statement/prospectus and are incorporated by reference herein in its entirety.

While the transaction is pending and during the pendency of the voting trust, KCS is subject to business uncertainties and contractual restrictions that could materially adversely affect KCS's operating results, financial position and/or cash flows or result in a loss of employees, suppliers, vendors or customers.

The merger agreement generally requires KCS to use commercially reasonable efforts to conduct its business in all material respects in the ordinary course prior to the earlier of the termination of the merger agreement and the control date. In addition, the merger agreement includes a variety of specified restrictions on the conduct of

KCS's business, which, in the event the merger agreement is not earlier terminated, expire either on the closing date or the control date. Among other things and subject to the other terms of the merger agreement and certain other exceptions and limitations, KCS may not, outside of the ordinary course of business, incur additional indebtedness, issue additional shares of KCS's common stock outside of its equity incentive plans, repurchase common stock, pay dividends, acquire assets, securities or property, dispose of businesses or assets, enter into certain material contracts or make certain additional capital expenditures. KCS may find that these and other contractual restrictions in the merger agreement delay or prevent KCS from making certain changes, or limit its ability to make certain changes, during such period, even if KCS's management believes that making certain changes may be advisable. The pendency of the transaction may also divert management's attention and KCS's resources from ongoing business and operations.

During the period in which KCS is in the voting trust, its existing revolving credit agreement will remain in place, which includes certain limitations on dividends and distributions to its shareholders, including CPRL at such time. Such limitations may restrict the combined company from receiving the full benefit of the cash generated by KCS during such period.

KCS's employees, suppliers, vendors or customers may experience uncertainties about the effects of the transaction. It is possible that some employees, suppliers, vendors or customers and other parties with whom KCS has a business relationship may delay or defer certain business decisions or might decide to seek to terminate, change or renegotiate their relationship with KCS as a result of the proposed acquisition. Similarly, current and prospective employees may experience uncertainty about their future roles with KCS following completion of the transaction, which may materially and adversely affect KCS's ability to attract and retain key employees. If any of these effects were to occur, it could materially and adversely impact KCS's operating results, financial position, cash flows and/or stock price.

CP expects to refinance its credit facility entered into for the purpose of the transaction but cannot guarantee that it will be able to obtain new financing on terms acceptable to it or at all.

CP anticipates that the funds needed to consummate the transaction will be derived from a combination of some or all of: (i) cash on hand; (ii) borrowings under the credit facility which will be entered into for the purpose of the transaction, its existing credit facilities and/or new credit facilities; and (iii) the proceeds from the sale of new debt securities and the issuance of any commercial paper. While CP intends to refinance the credit facility for which it has obtained commitments for the purpose of the transaction, CP's ability to obtain any new debt financing will depend on, among other factors, prevailing market conditions and other factors beyond CP's control. CP cannot assure you that it will be able to obtain new debt financing on terms acceptable to it or at all on or before the maturity date of its credit facilities, and therefore any such failure to refinance could materially adversely affect its operations and financial condition.

In particular, CP has entered into the commitment letter to backstop permanent debt financings to fund a portion of the cash consideration and preferred merger consideration and transaction expenses. However, CP has not entered into definitive agreements for such debt financing, and the obligation of the lenders to provide the debt financing under the commitment letter is subject to a number of customary conditions. There can be no assurance that CP will be able to obtain the debt financing under the commitment letter. In the event that the debt financing contemplated above is not available, other financing may not be available on acceptable terms, in a timely manner or at all. If CP is unable to obtain debt financing, the transaction may be delayed or not be completed. CPRL's obligation to complete the transaction is not conditioned upon the receipt of any financing.

CPRL's combination with KCS is subject to final approval by the STB, and there can be no assurance as to whether and when it may be approved or if such approval will be granted with conditions applicable to the parties; accordingly, CPRL's combination with KCS may be delayed, jeopardized or prevented entirely and the anticipated benefits of the combination could be reduced.

Although the STB has approved the proposed voting trust agreement, there can be no assurance that third parties will not ask the STB to reconsider that approval. The STB also has the authority to impose conditions on its

approval of a control transaction to alleviate competitive or other concerns, and, if such conditions are imposed, the anticipated benefits of the combination of CPRL and KCS might be reduced. There is no assurance that STB final approval will be obtained or obtained on terms acceptable to CPRL.

In addition, under existing law, railroad competitors of CPRL and KCS and other interested parties may intervene to oppose the STB application or seek protective conditions in the event approval by the STB is granted, which might delay the approval process or reduce the anticipated benefits of the combination of CPRL and KCS. Furthermore, if the STB does not provide STB final approval or imposes conditions on its approval in a final order, and CPRL and KCS decide to appeal such final order from the STB, any such appeal might not be resolved for a substantial period of time after the entry of such order by the STB.

If either (i) STB final approval has not been obtained by December 31, 2023 or (ii) the STB has, by a final and non-appealable order, refused to provide STB final approval (which we refer to collectively as an "STB denial"), CPRL would be required to dispose of its initial investment in KCS. Similarly, if the STB imposes onerous conditions on STB final approval, CPRL may choose to dispose of its initial investment in KCS rather than agreeing to the conditions imposed by the STB. In either case, CPRL would be obligated under the voting trust agreement to directly or indirectly divest of the trust stock in a manner that is acceptable to the STB. CPRL and KCS expect that, in case of a divestiture, the market and divestiture alternatives for the trust stock might be limited, and such a disposition could cause CPRL to incur significant losses and expenses in connection with the transaction, which could have a significant adverse impact on the business and financial condition of CPRL.

Failure by KCS to successfully execute its business strategy and objectives may materially adversely affect the future results of the combined company and, consequently, the market value of CPRL common shares.

The success of the combination of CPRL and KCS will depend, in part, on the ability of KCS to successfully execute its business strategy, including making deliveries in a safe and reliable manner, minimizing service interruptions and investing in its infrastructure to maintain its rail system and serve its customer base. These objectives are capital intensive. Furthermore, KCS's business strategy, operations and plans for growth and expansion rely significantly on agreements with other railroads and third parties, including joint ventures and other strategic alliances, as well as interchange, trackage rights, haulage rights and marketing agreements with other railroads and third parties that enable KCS to exchange traffic and utilize trackage that it does not own. KCS's ability to provide comprehensive rail service to its customers depends in large part upon its ability to maintain these agreements with other railroads and third parties, and upon the performance of the obligations under the agreements by the other railroads and third parties. The termination of, or the failure to renew, these agreements could have a material adverse effect on KCS's consolidated financial statements and interfere with its business strategy, operations and plans for growth. If KCS is not able to achieve its business strategy, is not able to achieve its business strategy on a timely basis, or otherwise fails to perform in accordance with CPRL's expectations, the anticipated benefits of the combination of CPRL and KCS may not be realized fully or at all, and the combination may materially adversely affect the results of operations, financial condition and prospects of the combined company and, consequently, the market value of CPRL common shares.

Failure to complete the transactions contemplated by the merger agreement could negatively impact the price of KCS voting stock, and future business and financial results.

If the transactions contemplated by the merger agreement are not completed for any reason, including as a result of the failure to obtain the KCS stockholder approval or the CPRL shareholder approval, KCS's ongoing business may be materially and adversely affected and KCS would be subject to a number of risks, including the following:

- KCS may experience negative reactions from the financial markets, including negative impacts on trading prices of KCS common stock, and from KCS's employees, suppliers, vendors, regulators or customers;

- KCS will be required to pay CPRL a termination payment of $700.0 million, in consideration for the disposition by CPRL of its contractual rights under the merger agreement, if the merger agreement is terminated in certain circumstances, including because the KCS board has changed its recommendation in favor of the transaction or in certain circumstances where, after the date of the merger agreement, KCS enters into an agreement providing for an alternative proposal (for these purposes, substituting in the definition of alternative proposal "50%" for "25%" and for "75%" in each place each such phrase appears, and such proposal, a "qualifying transaction") in respect of KCS that is publicly proposed or publicly disclosed prior to, and not publicly withdrawn at least two business days prior to, the KCS special meeting following termination of the merger agreement;
- KCS will be required to pay to CPRL the $700.0 million CN termination amount refund if the merger agreement is terminated in certain circumstances, including (i) by KCS prior to receipt of the KCS stockholder approval, in order to enter into a definitive agreement providing for a superior proposal in respect of KCS; (ii) by CPRL on the basis of a breach by KCS of its representations, warranties, covenants or other agreements contained in the merger agreement; or (iii) by CPRL because the KCS board has effected a change of recommendation;
- the merger agreement places certain restrictions on the conduct of KCS's business, and such restrictions, the waiver of which is subject to the consent of CPRL, may prevent KCS from making certain material acquisitions, entering into or amending certain contracts, taking certain other specified actions or otherwise pursuing business opportunities during the pendency of the transaction or, with respect to certain actions, prior to the control date, that KCS would have made, taken or pursued if these restrictions were not in place; and
- matters relating to the transaction (including integration planning) will require substantial commitments of time and resources by KCS's management and the expenditure of significant funds in the form of fees and expenses, which would otherwise have been devoted to day-to-day operations and other opportunities that may have been beneficial to KCS as an independent company.

In addition, KCS could be subject to litigation related to any failure to complete the acquisition or related to any proceeding to specifically enforce KCS's performance obligations under the merger agreement.

If any of these risks materialize, they may materially and adversely affect KCS's business, financial condition, financial results and stock prices.

Directors and executive officers of KCS have interests in the transaction that may differ from the interests of KCS stockholders generally, including, if the transaction is completed, the receipt of financial and other benefits.

In considering the recommendations of the KCS board, KCS stockholders should be aware that KCS's directors and executive officers have interests in the transaction that are different from, or in addition to, the interests of KCS stockholders generally. These interests may include, among others, the treatment of outstanding KCS equity awards under the merger agreement, the potential payment of severance benefits and acceleration of outstanding KCS equity awards upon certain terminations of employment, retention awards and rights to ongoing indemnification and insurance coverage. These interests are described in more detail in the section entitled "*The KCS Merger Proposal—Interests of KCS's Directors and Executive Officers in the Transaction*," on page 101.

Except in specified circumstances, if the effective time has not occurred by the end date, either KCS or CPRL may choose not to proceed with the transaction.

Either KCS or CPRL may terminate the merger agreement if the effective time has not occurred by February 21, 2022 (*i.e.*, the end date); provided, that to the extent the condition to obtain the authorizations required to be obtained from COFECE and the IFT with respect to the transactions contemplated by the merger agreement has

not been satisfied or waived on or prior to February 21, 2022, but all other conditions to closing have been satisfied or waived (except for those conditions that by their nature are to be satisfied at the closing), the end date will be automatically extended to May 21, 2022. However, this right to terminate the merger agreement will not be available to KCS or CPRL if such party has breached in any material respect its obligations under the merger agreement in any manner that has been the primary cause of the failure to consummate the transaction on or before the end date. For more information, see the section entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*," on page 163.

There may be less publicly available information concerning CPRL than there is for issuers that are not foreign private issuers because, as a foreign private issuer, CPRL is exempt from a number of rules under the U.S. Exchange Act and is permitted to file less information with the SEC than issuers that are not foreign private issuers and CPRL, as a foreign private issuer, is permitted to follow home country practice in lieu of the listing requirements of NYSE, subject to certain exceptions.

For so long as CPRL remains a foreign private issuer under the U.S. Exchange Act, CPRL is exempt from certain rules under the U.S. Exchange Act. Although CPRL has chosen to file annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K with the SEC, CPRL is currently not required to do so. CPRL is also not required to file periodic reports and financial statements with the SEC as frequently or as promptly as companies whose securities are registered under the U.S. Exchange Act but are not foreign private issuers, or to comply with Regulation FD, which restricts the selective disclosure of material non-public information. In addition, CPRL is exempt from certain disclosure and procedural requirements applicable to proxy solicitations under Section 14 of the U.S. Exchange Act. The members of the CPRL board, officers and principal shareholders are exempt from the reporting and "short-swing" profit recovery provisions of Section 16 of the U.S. Exchange Act. Accordingly, there may be less publicly available information concerning CPRL than there is for companies whose securities are registered under the U.S. Exchange Act but are not foreign private issuers, and such information may not be provided as promptly as it is provided by such companies. In addition, certain information may be provided by CPRL in accordance with Canadian law, which may differ in substance or timing from such disclosure requirements under the U.S. Exchange Act. For example, disclosure with respect to CPRL annual meetings of shareholders will be governed by Canadian law. Further, as a foreign private issuer, under NYSE rules CPRL is subject to less stringent corporate governance requirements, although CPRL's current corporate governance practices are consistent with all applicable Canadian and U.S. regulatory guidelines and standards. Subject to certain exceptions, the rules of NYSE permit a foreign private issuer to follow its home country practice in lieu of the listing requirements of NYSE, including, for example, certain internal controls as well as board, committee and director independence requirements. CPRL is required to disclose any significant ways in which its corporate governance practices differ from those followed by U.S. domestic companies under NYSE listing standards in its annual report filed with the SEC or on its website. Accordingly, CPRL shareholders may not have the same protections afforded to shareholders of companies that are required to comply with all of the NYSE corporate governance requirements.

CPRL is organized under the laws of Canada and a substantial portion of its assets are, and many of its directors and officers reside, outside of the U.S. As a result, it may not be possible for shareholders to enforce civil liability provisions of the securities laws of the U.S. against CPRL, its officers, or members of the CPRL board.

CPRL is organized under the laws of Canada. A substantial portion of CPRL's assets are located outside the U.S., and many of CPRL's directors and officers and some of the experts named in this proxy statement/prospectus are residents of jurisdictions outside of the U.S. and the assets of such persons may be located outside of the U.S. As a result, it may be difficult for investors to effect service within the U.S. upon CPRL and those directors, officers and experts, or to enforce judgments obtained in U.S. courts against CPRL or such persons either inside or outside of the U.S., or to enforce in U.S. courts judgments obtained against CPRL or such persons in courts in jurisdictions outside the U.S., in any action predicated upon the civil liability provisions of the federal securities laws of the U.S.

There is no certainty that civil liabilities predicated solely upon the federal securities laws of the U.S. can be enforced in Canada, whether by original action or by seeking to enforce a judgment of U.S. courts. In addition, punitive damages awards in actions brought in the U.S. or elsewhere may be unenforceable in Canada.

Resales of CPRL common shares following the transaction may cause the market value of CPRL common shares to decline.

Based on the number of shares of KCS common stock, KCS restricted share awards and KCS director deferred stock outstanding as of September [—], 2021, CPRL expects to issue (at the direction of surviving merger sub and on behalf of surviving merger sub) up to approximately [—] CPRL common shares at the effective time in connection with the transaction. The issuance of these new CPRL common shares could have the effect of depressing the market value for CPRL common shares. The increase in the number of CPRL common shares may lead to sales of such CPRL common shares or the perception that such sales may occur, either of which may adversely affect the market for, and the market value of, CPRL common shares.

The market value of CPRL common shares may decline as a result of the combination of CPRL and KCS following receipt of STB final approval.

The market value of CPRL common shares may decline as a result of the combination of CPRL and KCS following receipt of STB final approval if, among other things, the combined company is unable to achieve the expected growth in revenues and earnings, or if the operational cost savings estimates in connection with the integration of KCS's and CPRL's businesses are not realized or if the transaction costs related to the transaction are greater than expected. The market value of CPRL common shares also may decline if the combined company does not achieve the perceived benefits of the combination as rapidly or to the extent anticipated by the market or if the effect of the combination on the combined company's financial position, results of operations or cash flows is not consistent with the expectations of financial or industry analysts. In addition, some KCS common stockholders may decide not to continue to hold the CPRL common shares they receive as a result of the transaction, and any such sales of CPRL common shares could have the effect of depressing their market price. Moreover, general fluctuations in stock markets could have a material adverse effect on the market for, or liquidity of, CPRL common shares, regardless of CPRL's actual operating performance after the combination of CPRL and KCS following receipt of STB final approval.

Current CPRL shareholders and KCS common stockholders will have a reduced ownership and voting interest after the transaction and will exercise less influence over the management of the combined company.

Based on the number of shares of KCS common stock, KCS restricted share awards and KCS director deferred stock outstanding as of September [—], 2021, at the effective time, CPRL expects to issue (at the direction of surviving merger sub and on behalf of surviving merger sub) up to approximately [—] CPRL common shares at the effective time in connection with the transaction. As a result, it is expected that, immediately after the effective time, former KCS common stockholders would own approximately [—]% of the outstanding CPRL common shares. See the section of this proxy statement/prospectus entitled "*The Merger Agreement—Treatment of KCS Equity Awards*," on page 140 for a more detailed explanation. Consequently, current CPRL shareholders in the aggregate will have less influence over the management and policies of the combined company than they currently have over the management and policies of CPRL, and KCS common stockholders in the aggregate will have significantly less influence over the management and policies of the combined company than they currently have over the management and policies of KCS.

KCS and CPRL may be targets of securities class action and derivative lawsuits which could result in substantial costs and may delay or prevent the transaction from being completed.

Securities class action lawsuits and derivative lawsuits are often brought against companies that have entered into merger agreements. Even if the lawsuits are without merit, defending against these claims can result in substantial costs and divert management time and resources. Additionally, if a plaintiff is successful in obtaining

an injunction prohibiting consummation of the transaction, then that injunction may delay or prevent the transaction from being completed.

The combined company may be exposed to increased litigation, which could have an adverse effect on the combined company's business and operations.

The combined company may be exposed to increased litigation from stockholders, customers, suppliers, consumers and other third parties due to the combination of CPRL's business and KCS's business following receipt of STB final approval. Such litigation may have an adverse impact on the combined company's business and results of operations or may cause disruptions to the combined company's operations.

If the transaction is not treated as a "reorganization" for U.S. federal income tax purposes, or if the requirements of Section 367(a) of the Code are not met, holders of KCS common stock may be required to recognize a greater amount of gain for U.S. federal income tax purposes upon their exchange shares of KCS common stock for the merger consideration.

Although KCS's obligation to complete the transaction is conditioned on its receipt of an opinion from external counsel, to the effect that, on the basis of facts, representations and assumptions set forth or referred to in such opinion, the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and that Section 367(a)(1) of the Code will not generally apply to cause the transaction to result in gain recognition to holders of KCS common stock (other than excepted shareholders), neither CPRL nor KCS has applied for, or expects to obtain, a ruling from the U.S. Internal Revenue Service (the "IRS") with respect to the U.S. federal income tax consequences of the transaction. Accordingly, no assurance can be given that the IRS will agree with the conclusions reached in such opinion or that it will not challenge the intended U.S. federal income tax consequences of the transaction. If the transaction were to fail to qualify as a reorganization for U.S. federal income tax purposes, U.S. holders (as defined below in the section entitled "*The KCS Merger Proposal—Certain U.S. Federal Income Tax Consequences*," on page 119) of KCS common stock would recognize gain or loss on their exchange of KCS common stock for the merger consideration. If the transaction qualified as a reorganization but were to fail to satisfy the requirements of Section 367(a)(1) of the Code, U.S. holders of KCS common stock would be required to recognize the full amount of any gain, but not loss, on their exchange of KCS common stock for the merger consideration.

For a more detailed discussion of the material U.S. federal income tax consequences of the transaction to U.S. holders, see the section entitled "*The KCS Merger Proposal—Certain U.S. Federal Income Tax Consequences*," on page 119.

The IRS may not agree that CPRL should be treated as a foreign corporation for U.S. federal income tax purposes.

Under current U.S. federal income tax law, a corporation generally will be considered to be a U.S. corporation for U.S. federal income tax purposes only if it is created or organized in the U.S. or under the law of the U.S. or of any State. Accordingly, under generally applicable U.S. federal income tax rules, CPRL, which is organized under the laws of Canada, would generally be classified as a foreign corporation. Section 7874 of the Code and the Treasury Regulations promulgated thereunder, however, contain specific rules that may cause a foreign corporation to be treated as a U.S. corporation for U.S. federal income tax purposes (or to be subject to certain other adverse tax consequences). CPRL believes that it should not be treated as a U.S. corporation for U.S. federal income tax purposes under Section 7874 of the Code immediately following the transaction. There can be no assurance, however, that the IRS will not take a contrary position or that the relevant U.S. federal income tax law will not be changed (possibly with retroactive effect) in a manner that would result in a contrary conclusion. If it were determined that CPRL is treated as a U.S. corporation for U.S. federal income tax purposes under Section 7874 of the Code and the Treasury Regulations promulgated thereunder, CPRL could be subject to substantial U.S. tax liability and its non-U.S. shareholders could be subject to U.S. withholding tax on any dividends.

CPRL and KCS may have difficulty attracting, motivating and retaining executives and other key employees in light of the combination of CPRL and KCS.

CPRL's success after its combination with KCS following receipt of STB final approval will depend in part on the ability of CPRL to retain key executives and other employees of CPRL and KCS with critical skills and knowledge which are crucial to achieve key milestones and synergy realization. To promote retention and incentivize the closing of the transaction, CPRL may implement a retention bonus program following the closing of the transaction for a select number of key individuals. In addition, upon the occurrence of the control date, CPRL may award key senior executives, including NEOs (but excluding the CEO), long-term performance-based equity awards, such as PSUs and/or stock options tied to the expected synergies of the combined company. These arrangements may require the payment of certain one-time retention, transition or other bonuses as determined by the CPRL board. The amounts and recipients under such programs have yet to be determined. Uncertainty about the effect of the transaction on CPRL and KCS employees may have an adverse effect on each of CPRL and KCS separately and consequently the combined company. This uncertainty may impair CPRL's and/or KCS's ability to attract, retain and motivate key personnel. Employee retention may be particularly challenging during the pendency of the transaction, as employees of CPRL and KCS may experience uncertainty about their future roles in the combined company.

Additionally, KCS's officers and employees may hold shares of KCS voting stock, and, if the transaction closes, these officers and employees may be entitled to the merger consideration or preferred merger consideration, as applicable, in respect of such shares of KCS voting stock. Under agreements between KCS and certain of its key employees, such employees could potentially resign from employment on or after the effective time following specified circumstances constituting good reason or constructive termination (as set forth in the applicable agreement) that could result in severance payments to such employees and accelerated vesting of their equity awards. These payments and accelerated vesting benefits, individually or in the aggregate, could make retention of KCS key employees more difficult.

Furthermore, if key employees of CPRL or KCS depart or are at risk of departing, including because of issues relating to the uncertainty and difficulty of integration, financial security or a desire not to become employees of the combined company, CPRL may have to incur significant costs in retaining such individuals or in identifying, hiring and retaining replacements for departing employees and may lose significant expertise and talent, and the combined company's ability to realize the anticipated benefits of the transaction may be materially and adversely affected. No assurance can be given that the combined company will be able to attract or retain key employees to the same extent that CP and KCS have been able to attract or retain employees in the past.

The merger agreement contains provisions that make it more difficult for CPRL and KCS to pursue alternatives to the transaction and may discourage other companies from trying to acquire KCS for greater consideration than what CPRL has agreed to pay.

The merger agreement contains provisions that make it more difficult for KCS to sell its business to a party other than CPRL, or for CPRL to sell its business. These provisions include a general prohibition on each party soliciting any alternative proposal. Further, there are only limited circumstances in which KCS may terminate the merger agreement to accept an alternative proposal and limited exceptions to each party's agreement that its board of directors will not withdraw or modify in a manner adverse to the other party the recommendation of its board of directors in favor of the adoption of the merger agreement. In the event that the KCS board makes an adverse recommendation change, then KCS may be required to pay to CPRL a termination payment of $700.0 million and the CN termination amount refund of $700.0 million. In the event that the CPRL board makes an adverse recommendation change, then CPRL may be required to pay to KCS a termination payment of $700.0 million. See "*The Merger Agreement—No Solicitation*" and "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*," on pages 150 and 163, respectively, of this proxy statement/prospectus.

The parties believe these provisions are reasonable and not preclusive of other offers, but these restrictions might discourage a third party that has an interest in acquiring all or a significant part of either KCS or CPRL from considering or proposing an alternative proposal.

If an alternative proposal to acquire KCS is made, consummation of the transaction may be delayed.

If an alternative proposal to acquire KCS is made, the attention of KCS's and CPRL's respective management may be diverted away from the transaction, which may delay or impede consummation of the transaction. Matters related to such alternative proposal, including any potential related litigation, may require commitments of time and resources of both parties and their respective representatives, which could otherwise have been devoted to the transaction.

The financial forecasts are based on various assumptions that may not be realized.

The financial estimates set forth in the forecasts included under the sections entitled "*The KCS Merger Proposal—KCS Unaudited Prospective Financial Information*" on page 96 were based on assumptions of, and information available to, the management team of KCS when prepared and these estimates and assumptions are subject to uncertainties, many of which are beyond the control of KCS and may not be realized. Many factors mentioned in this proxy statement/prospectus, including the risks outlined in this "*Risk Factors*" section and the events or circumstances described under "*Cautionary Statement Regarding Forward-Looking Statements*," will be important in determining the combined company's future results. As a result of these contingencies, actual future results may vary materially from the estimates. In view of these uncertainties, the inclusion of financial estimates in this proxy statement/prospectus is not and should not be viewed as a representation that the forecasted results will necessarily reflect actual future results.

The financial estimates set forth in the forecasts included under the sections entitled "*The KCS Merger Proposal—KCS Unaudited Prospective Financial Information*" on page 96 were based on assumptions that were not prepared with a view toward public disclosure, and such financial estimates were not prepared with a view toward compliance with published guidelines of any regulatory or professional body. Further, any forward-looking statement speaks only as of the date on which it is made, and KCS and CPRL do not undertake any obligation, other than as required by applicable law, to update the financial estimates in this proxy statement/prospectus to reflect events or circumstances after the date those financial estimates were prepared or to reflect the occurrence of anticipated or unanticipated events or circumstances. The prospective financial information included in this proxy statement/prospectus has been prepared by, and is the responsibility of, KCS's management. This prospective financial information was not prepared with a view toward compliance with published guidelines of the SEC or the guidelines established by the American Institute of Certified Public Accountants for preparation or presentation of prospective financial information. See "*The KCS Merger Proposal—KCS Unaudited Prospective Financial Information*" on page 96 for more information. PricewaterhouseCoopers LLP has not audited, reviewed, examined, compiled nor applied agreed-upon procedures with respect to the accompanying prospective financial information and, accordingly, PricewaterhouseCoopers LLP does not express an opinion or any other form of assurance with respect thereto. The PricewaterhouseCoopers LLP report incorporated by reference in this document relates to KCS's previously issued financial statements. It does not extend to the prospective financial information and should not be read to do so.

Exchange rate fluctuations may adversely affect the foreign currency value of CPRL common shares and any dividends.

CPRL common shares are quoted in Canadian dollars on the TSX and U.S. dollars on the NYSE. Dividends in respect of CPRL common shares, if any, are anticipated to be declared in Canadian dollars, consistent with CPRL's current dividend practice. CPRL's financial statements are prepared in Canadian dollars. Fluctuations in the exchange rate between the U.S. dollar and Canadian dollar will affect, among other matters, the U.S. dollar value of CPRL common shares and of any dividends in respect of such shares.

Risks Related to KCS's Business

You should read and consider the risk factors specific to KCS's business that will also affect the combined company following receipt of STB final approval. These risks are described in KCS's Annual Report on Form 10-K for the fiscal year ended December 31, 2020 and its Quarterly Reports on Form 10-Q for the quarterly periods ended March 31, 2021 and June 30, 2021, which are incorporated by reference into this proxy statement/prospectus, and in other documents that are incorporated by reference into this proxy statement/prospectus. See the section entitled "*Where You Can Find Additional Information*," on page 229 for the location of information incorporated by reference into this proxy statement/prospectus.

Risks Related to CPRL's Business

You should read and consider the risk factors specific to CPRL's business that will also affect the combined company following receipt of STB final approval. These risks are described in CPRL's Annual Report on Form 10-K for the fiscal year ended December 31, 2020 and its Quarterly Reports on Form 10-Q for the quarterly periods ended March 31, 2021 and June 30, 2021, which are incorporated by reference into this proxy statement/prospectus, and in other documents that are incorporated by reference into this proxy statement/prospectus. See the section entitled "*Where You Can Find Additional Information*," on page 229 for the location of information incorporated by reference into this proxy statement/prospectus.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

From time to time, CPRL and KCS make written or oral forward-looking statements within the meaning of certain securities laws, including the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995 and any applicable Canadian securities legislation. This proxy statement/prospectus, including information incorporated by reference into this proxy statement/prospectus, may contain certain forward-looking statements and forward-looking information (which we refer to as "FLI") to provide CPRL and KCS shareholders and potential investors with information about CPRL, KCS and their respective subsidiaries and affiliates, including each company's management's respective assessment of CPRL, KCS and their respective subsidiaries' future plans and operations, which FLI may not be appropriate for other purposes. FLI is typically identified by words such as "anticipate," "expect," "project," "estimate," "forecast," "plan," "intend," "target," "believe," "likely" and similar words suggesting future outcomes or statements regarding an outlook. All statements other than statements of historical fact may be FLI.

Although we believe that the FLI is reasonable based on the information available today and processes used to prepare it, such statements are not guarantees of future performance and you are cautioned against placing undue reliance on FLI. By its nature, FLI involves a variety of assumptions, which are based upon factors that may be difficult to predict and that may involve known and unknown risks and uncertainties and other factors which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by these FLI, including, but not limited to, the following: the timing and completion of the transaction, including receipt of regulatory and shareholder approvals and the satisfaction of other conditions precedent; interloper risk; the realization of anticipated benefits and synergies of the transaction and the timing thereof; the success of integration plans; the focus of management time and attention on the transaction and other disruptions arising from the transaction; changes in business strategy and strategic opportunities; estimated future dividends; financial strength and flexibility; debt and equity market conditions, including the ability to access capital markets on favorable terms or at all; cost of debt and equity capital; potential changes in the CPRL share price which may negatively impact the value of consideration offered to KCS shareholders; the ability of management of CPRL, its subsidiaries and affiliates to execute key priorities, including those in connection with the transaction; general Canadian, U.S., Mexican and global social, economic, political, credit and business conditions; risks associated with agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures, including competition from other rail carriers, trucking companies and maritime shippers in Canada, the U.S. and Mexico; North American and global economic growth; industry capacity; shifts in market demand; changes in commodity prices and commodity demand; uncertainty surrounding timing and volumes of commodities being shipped; inflation; geopolitical instability; changes in laws, regulations and government policies, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; changes in fuel prices; disruption in fuel supplies; uncertainties of investigations, proceedings or other types of claims and litigation; compliance with environmental regulations; labor disputes; changes in labor costs and labor difficulties; risks and liabilities arising from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; sufficiency of budgeted capital expenditures in carrying out business plans; services and infrastructure; the satisfaction by third parties of their obligations; currency and interest rate fluctuations; exchange rates; effects of changes in market conditions and discount rates on the financial position of pension plans and investments; trade restrictions or other changes to international trade arrangements; the effects of current and future multinational trade agreements on the level of trade among Canada, the U.S. and Mexico; climate change and the market and regulatory responses to climate change; anticipated in-service dates; success of hedging activities; operational performance and reliability; customer, shareholder, regulatory and other stakeholder approvals and support; regulatory and legislative decisions and actions; the adverse impact of any termination or revocation by the Mexican government of KCSM's concession; public opinion; various events that could disrupt operations, including severe weather, such as droughts, floods, avalanches and earthquakes, and cybersecurity attacks, as well as security threats and governmental response to them, and technological changes; acts of terrorism, war or other acts of violence or crime or risk of such activities; insurance coverage limitations; material adverse changes in economic and industry conditions,

including the availability of short- and long-term financing; and the pandemic created by the outbreak of COVID-19 and its variants, and resulting effects on economic conditions, the demand environment for logistics requirements and energy prices, restrictions imposed by public health authorities or governments, fiscal and monetary policy responses by governments and financial institutions, and disruptions to global supply chains.

We caution that the foregoing list of factors is not exhaustive and is made as of the date hereof. Additional information about these and other assumptions, risks and uncertainties can be found in reports and filings by CPRL and KCS with Canadian and U.S. securities regulators, including any proxy statement, prospectus, material change report, management information circular or registration statement to be filed in connection with the transaction. Reference should be made to "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations —Forward Looking Statements" in CPRL's and KCS's annual and interim reports on Form 10-K and 10-Q. Due to the interdependencies and correlation of these factors, as well as other factors, the impact of any one assumption, risk or uncertainty on FLI cannot be determined with certainty.

Except to the extent required by law, we assume no obligation to publicly update or revise any FLI, whether as a result of new information, future events or otherwise. All FLI in this proxy statement/prospectus is expressly qualified in its entirety by these cautionary statements.

For additional information about factors that could cause CPRL's and KCS's results to differ materially from those described in the forward-looking statements, please see the section entitled "*Risk Factors*," on page 21 as well as in the reports that KCS and CPRL have filed with the SEC and SEDAR, as applicable, described in the section entitled "*Where You Can Find Additional Information*," on page 229.

COMPARATIVE PER SHARE MARKET PRICE AND DIVIDEND INFORMATION

CPRL common shares are currently listed on the TSX and the NYSE under the symbol "CP" and KCS common stock is currently listed on the NYSE under the symbol "KSU."

The table below sets forth, for the periods indicated, the per share high and low sales prices for CPRL common shares as reported on the TSX and the NYSE and for KCS common stock as reported on the NYSE.

	CPRL Common Shares TSX		CPRL Common Shares NYSE		KCS Common Stock NYSE	
	High(2)	Low(2)	High(2)	Low(2)	High(2)	Low(2)
	(in C$)		(in US$)		(in US$)	
Annual information for the past five calendar years						
2020	89.11(1)	52.70(1)	69.80(1)	36.27(1)	204.13	100.54
2019	67.30(1)	47.10(1)	51.43(1)	34.88(1)	155.10	92.87
2018	57.74(1)	43.20(1)	44.56(1)	33.68(1)	119.88	90.84
2017	46.45(1)	37.95(1)	36.70(1)	28.29(1)	113.44	80.82
2016	41.37(1)	29.97(1)	31.26(1)	20.83(1)	99.47	64.35

(1) The per share amount listed herein has been retrospectively adjusted to reflect the share split.
(2) Share prices are based on closing prices.

The above table shows only historical data. The data may not provide meaningful information to KCS stockholders in determining whether to adopt the merger agreement. KCS stockholders are urged to obtain current market quotations for KCS common stock and CPRL common shares and to review carefully the other information contained in, or incorporated by reference into, this proxy statement/prospectus, when considering whether to adopt the merger agreement. For more information, see the section entitled "*Where You Can Find Additional Information*," on page 229.

The following table presents the closing price per share of CPRL common shares on the TSX and the NYSE and of KCS common stock on the NYSE on (a) March 19, 2021, the last full trading day prior to the public announcement of the signing of the prior CP merger agreement, (b) August 9, 2021, the last full trading day prior to that on which CPRL submitted a revised offer to acquire KCS, (c) September 14, 2021, the last full trading day prior to the public announcement of the signing of the merger agreement, and (d) September 30, 2021, the last practicable trading day prior to the mailing of this proxy statement/prospectus. This table also shows the implied

value of the merger consideration payable for each share of KCS common stock, which was calculated by multiplying the closing price of CPRL common shares on the NYSE on those dates by the exchange ratio and adding $90.00 in respect of the cash consideration.

Date	CPRL common shares TSX (C$)	CPRL common shares NYSE (US$)	KCS common stock NYSE (US$)	Equivalent value of merger consideration per share of KCS stock based on price of CPRL common shares on NYSE (US$)
March 19, 2021	94.85(1)	75.70(1)	224.16	308.31
August 9, 2021	91.50	72.71	269.60	299.70
September 14, 2021	86.48	68.14	280.00	286.52
September 30, 2021	82.71	65.07	270.64	277.66

(1) The per share amount of dividends listed herein has been retrospectively adjusted to reflect the share split.

KCS common stockholders will not receive the merger consideration until the effective time, which may occur a substantial period of time after the KCS special meeting, or not at all. There can be no assurance as to the trading prices of KCS common stock or CPRL common shares at the effective time. The market prices of KCS common stock and CPRL common shares are likely to fluctuate prior to the effective time and cannot be predicted. We urge you to obtain current market quotations for both KCS common stock and CPRL common shares.

The table below sets forth the dividends declared per CPRL common share and the dividends declared per share of KCS common stock for the periods indicated.

	CPRL (C$)	CPRL (US$)*	KCS (US$)
Nine Months Ended September 30, 2021	0.57(1)	0.46(1)	1.62
Year Ended December 31,			
2020	0.71(1)	0.53(1)	1.64
2019	0.63(1)	0.47(1)	1.48
2018	0.50(1)	0.39(1)	1.44
2017	0.44(1)	0.34(1)	1.38
2016	0.37(1)	0.28(1)	1.32

* Based on CPRL annual dividend converted to US$ at the Canadian dollar/U.S. dollar annual exchange rate, as reported by the Bank of Canada; CPRL dividend for nine months ended September 30, 2021 converted to US$ at the average Canadian dollar/U.S. dollar exchange rate from January 1, 2021 to September 30, 2021.

(1) The per share amount listed herein has been retrospectively adjusted to reflect the share split.

THE KCS SPECIAL MEETING

This proxy statement/prospectus is being provided to KCS stockholders in connection with the solicitation of proxies by the KCS board for use at the KCS special meeting and at any adjournments or postponements of the KCS special meeting. KCS stockholders are encouraged to read the entire document carefully, including the annexes to and documents incorporated by reference into this document, for more detailed information regarding the merger agreement and the transactions contemplated by the merger agreement.

Date, Time and Place of the KCS Special Meeting

The KCS special meeting is scheduled to be held virtually via the internet at [—] [a.m. / p.m.], on [—], 2021, beginning at [—], Central Time, unless postponed to a later date.

In light of ongoing developments with respect to the COVID-19 (coronavirus) pandemic, KCS has elected to hold the KCS special meeting solely by means of remote communication (via the internet). The KCS special meeting will be held solely via live audio webcast and there will not be a physical meeting location. KCS stockholders will be able to attend the KCS special meeting online and vote their shares electronically by visiting the special meeting website at [—]. KCS stockholders will need the control number found on their proxy card in order to access the special meeting website.

KCS will entertain questions at the KCS special meeting in accordance with the rules of conduct for the meeting to the extent that the question posed by a stockholder are relevant to the KCS special meeting and the proposals presented. Any questions or comments that are unrelated to the business of the KCS special meeting will not be addressed at the meeting.

Purpose of the KCS Special Meeting

At the KCS special meeting, KCS stockholders will be asked to consider and vote on the following proposals, which we collectively refer to as the "KCS proposals":

- **Proposal 1**: *Adoption of the Merger Agreement*. To consider and vote on the KCS merger proposal;
- **Proposal 2**: *Approval, on an Advisory (Non-Binding) Basis, of Certain Merger-Related Compensatory Arrangements with KCS's Named Executive Officers*. To consider and vote on the advisory KCS compensation proposal; and
- **Proposal 3**: *Adjournment of the KCS Special Meeting*. To consider and vote on the KCS adjournment proposal.

Recommendation of the KCS Board

The KCS board unanimously recommends that KCS stockholders vote:

- **Proposal 1:** "**FOR**" the KCS merger proposal;
- **Proposal 2:** "**FOR**" the KCS compensation proposal; and
- **Proposal 3:** "**FOR**" the KCS adjournment proposal.

At a special meeting of the KCS board held on September 12, 2021, the KCS board unanimously: (1) determined that it was in the best interests of KCS and its stockholders, and declared it advisable, to enter into the merger agreement; (2) approved the execution, delivery and performance of the merger agreement and the transactions contemplated by the merger agreement; (3) recommended that the stockholders of KCS adopt the merger agreement; and (4) directed that the merger agreement be submitted to a vote at a meeting of KCS's stockholders.

See also the section entitled "*The KCS Merger Proposal—KCS's Reasons for the Transaction; Recommendation of the KCS Board*," on page 64.

Record Date and Outstanding Shares of KCS Voting Stock

The record date to determine stockholders who are entitled to receive notice of and to vote at the KCS special meeting or any adjournments or postponements thereof is [—], 2021. As of the record date, there were [—] shares of KCS common stock and [—] shares of KCS preferred stock, issued and outstanding, for a total of [—] shares of KCS voting stock eligible to vote at the KCS special meeting.

Quorum; Abstentions and Broker Non-Votes

A quorum of KCS stockholders is necessary to conduct the KCS special meeting. The presence (including virtually) or representation by proxy, of the holders of a majority of the aggregate voting power of the KCS capital stock issued and entitled to vote at the KCS special meeting will constitute a quorum. Shares of KCS voting stock represented at the KCS special meeting by attendance via the special meeting website or represented by proxy and entitled to vote, but not voted, including shares for which a stockholder directs an "abstention" from voting, will be counted for purposes of determining a quorum. However, because all of the KCS proposals are considered "non-routine" matters under NYSE rules (as described below), shares held in "street name" will not be counted as present for the purpose of determining the existence of a quorum unless the stockholder provides their bank, broker or other nominee with voting instructions for at least one of the proposals before the KCS special meeting. If a quorum is not present, the KCS special meeting may be adjourned or postponed until the holders of the number of shares of KCS voting stock required to constitute a quorum attend.

Under the NYSE rules, banks, brokers or other nominees who hold shares in "street name" on behalf of the beneficial owner of such shares have the authority to vote such shares in their discretion on certain "routine" proposals when they have not received voting instructions from the beneficial owners. However, banks, brokers or other nominees are not allowed to exercise their voting discretion with respect to matters that under the NYSE rules, as applicable, are "non-routine." This can result in a "broker non-vote", which occurs on an item when (i) a bank, broker or other nominee has discretionary authority to vote on one or more "routine" proposals to be voted on at a meeting of stockholders, but is not permitted to vote on other "non-routine" proposals without instructions from the beneficial owner of the shares and (ii) the beneficial owner fails to provide the bank, broker or other nominee with voting instructions on a "non-routine" matter. All of the KCS proposals are considered "non-routine" matters under the NYSE rules, and banks, brokers or other nominees will not have discretionary authority to vote on any matter before the meeting. As a result, KCS does not expect any broker non-votes at the KCS special meeting and, if you hold your shares of KCS voting stock in "street name", your shares will not be represented and will not be voted on any matter unless you affirmatively instruct your bank, broker or other nominee how to vote your shares in accordance with the voting instructions provided by your bank, broker or other nominee. It is therefore critical that you cast your vote by instructing your bank, broker or other nominee on how to vote. Brokers will not be able to vote on any of the KCS proposals unless they have received voting instructions from the beneficial owners.

Required Vote

Except for the KCS adjournment proposal, the vote required to approve each of the KCS proposals listed below assumes the presence of a quorum at the KCS special meeting. As described above, KCS does not expect there to be any broker non-votes at the KCS special meeting.

Proposal	Required Vote	Effect of Certain Actions
Proposal 1: *KCS Merger Proposal*	Approval requires the affirmative vote of at least a majority of the shares of KCS voting stock outstanding as of the record date and entitled to vote on the KCS merger proposal (assuming a quorum is present).	Shares of KCS voting stock not present at the KCS special meeting, shares that are present and not voted on the KCS merger proposal, including due to the failure of any KCS stockholder who holds their shares in "street name" through a bank, broker or other nominee to give voting instructions to such bank, broker or other nominee with respect to the KCS merger proposal, and abstentions will have the same effect as a vote "**AGAINST**" the KCS merger proposal.
Proposal 2: *KCS Compensation Proposal*	Approval requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS compensation proposal (assuming a quorum is present).	Shares of KCS voting stock that are present and not voted on the KCS compensation proposal and abstentions will have the same effect as a vote "**AGAINST**" the KCS compensation proposal. Shares of KCS voting stock not present at the KCS special meeting will have no effect on the vote count for the KCS compensation proposal.
Proposal 3: *KCS Adjournment Proposal*	Approval requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS adjournment proposal (whether or not a quorum is present).	Shares of KCS voting stock that are present and not voted on the KCS adjournment proposal and abstentions will have the same effect as a vote "**AGAINST**" the KCS adjournment proposal. Shares of KCS voting stock not present at the KCS special meeting, including due to the failure of any KCS stockholder who holds their shares in "street name" through a bank, broker or other nominee to give voting instructions to such bank, broker or other nominee with respect to the KCS adjournment proposal, will have no effect on the a vote count for the KCS adjournment proposal.

Adjournment and Postponement

If a quorum is present at the KCS special meeting but there are not sufficient votes at the time of the KCS special meeting to approve the KCS merger proposal, then KCS stockholders may be asked to vote on the KCS adjournment proposal.

At any subsequent reconvening of the KCS special meeting at which a quorum is present, any business may be transacted that might have been transacted at the original meeting and all proxies will be voted in the same manner as they would have been voted at the original convening of the KCS special meeting, except for any proxies that have been effectively revoked prior to the time the proxy is voted at the reconvened meeting.

Voting by Directors and Executive Officers

As of [—], 2021, the latest practicable date prior to the date of this proxy statement/prospectus, KCS directors and executive officers, and their affiliates, as a group, owned and were entitled to vote approximately [—]% of the total outstanding shares of KCS common stock and [—]% of the total outstanding shares of KCS preferred stock, for a total of [—]% of the total outstanding shares of KCS voting stock. Although no KCS director or executive officer has entered into any agreement obligating them to do so, KCS currently expects that all of its directors and executive officers will vote their shares "FOR" the KCS merger proposal, "FOR" the KCS compensation proposal and "FOR" the KCS adjournment proposal. See the section entitled "*Interests of KCS's Directors and Executive Officers in the Transaction*," on page 101 and the arrangements described in Part III of KCS's Annual Report on Form 10-K for the fiscal year ended December 31, 2020, KCS's Quarterly Report on Form 10-Q for the quarters ended March 31, 2021 and June 30, 2021 and KCS's Definitive Proxy Statement on Schedule 14A for KCS's 2021 annual meeting of stockholders filed with the SEC on April 9, 2021, each of which are incorporated into this proxy statement/prospectus by reference.

Voting by Proxy or in Person

Voting and Submitting a Proxy for KCS Voting Stock Held by Holders of Record

If you are a KCS stockholder of record, you may vote at the KCS special meeting by proxy through the internet, by telephone or by mail, or by attending the KCS special meeting and voting via the special meeting website, as described below.

- **By Internet:** By visiting the internet address provided on the proxy card and following the instructions provided on your proxy card.
- **By Telephone:** By calling the number located on the proxy card and following the recorded instructions.
- **By Mail:** If you have received a paper copy of the proxy materials by mail, you may complete, sign, date and return by mail the enclosed proxy card in the envelope provided to you with your proxy materials.
- **Via the Special Meeting Website:** All stockholders of record may vote at the KCS special meeting by attending the meeting via the special meeting website. Stockholders who plan to attend the KCS special meeting will need the control number included on their proxy card in order to access the special meeting website and to attend and vote thereat.

Shares held through the KCS 401(k) Plan must be voted prior to the meeting and by [—] Central Time on [—], 2021.

Unless properly and timely revoked in one of the manners set forth in the section entitled "*The KCS Special Meeting—Revocability of Proxies and Changes to a KCS Stockholder's Vote*," on page 44, all duly executed proxies representing shares of KCS voting stock entitled to vote will be voted at the KCS special meeting and,

where a choice has been specified on the proxy card, will be voted in accordance with such specification. If you submit an executed proxy without providing instructions with respect to any proposal, then the KCS officers identified on the proxy will vote your shares consistent with the recommendation of the KCS board on such proposal. If you are a stockholder of record, proxies submitted over the internet or by telephone as described above must be received by [—] Central Time, on [—], 2021. To reduce administrative costs and help the environment by conserving natural resources, KCS asks that you vote through the internet or by telephone.

By executing and delivering a proxy in connection with the KCS special meeting, you designate certain KCS directors identified therein as your proxies at the KCS special meeting. If you deliver an executed proxy, but do not specify a choice with respect to any proposal properly brought before the KCS special meeting, such proxies will vote your underlying shares of KCS voting stock on such uninstructed proposal in accordance with the recommendation of the KCS board. KCS does not expect that any matter other than the KCS proposals will be brought before the KCS special meeting and the KCS by-laws provide that the only business that may be conducted at the KCS special meeting are those proposals brought before the meeting by or at the direction of the KCS board.

Voting and Submitting a Proxy for KCS Voting Stock Held in "Street Name"

If you hold your shares through a bank, broker or other nominee in "street name" instead of as a registered holder, you must follow the voting instructions provided by your bank, broker or other nominee in order to vote your shares. Your voting instructions must be received by your bank, broker or other nominee prior to the deadline set forth in the information from your bank, broker or other nominee on how to submit voting instructions. If you do not provide voting instructions to your bank, broker or other nominee with respect to a proposal, your shares of KCS voting stock will not be voted on that proposal as your bank, broker or other nominee does not have discretionary authority to vote on any of the KCS proposals; see the section entitled "*The KCS Special Meeting—Quorum; Abstentions and Broker Non-Votes*," on page 41.

If your are shares held in "street name", you must register in advance to attend the special meeting. To register you must submit proof of your proxy power (legal proxy) reflecting your holdings of our stock, along with your name and email address to Computershare. Requests for registration must be labeled as "Legal Proxy" and be received no later than [—], Eastern daylight time, on [—]. You will receive a confirmation email from Computershare of your registration. Requests for registration should be directed to Computershare at the following:

- By Email:
  Forward the email from your broker, or attach an image of your legal proxy, to legalproxy@computershare.com.

Revocability of Proxies and Changes to a KCS Stockholder's Vote

Any stockholder giving a proxy has the right to revoke it at any time before the proxy is voted at the KCS special meeting. If you are a KCS stockholder of record, you may revoke your proxy by any of the following actions:

- by voting again by internet or telephone as instructed on your proxy card before the closing of the voting facilities at [—], Central Time, on [—], 2021;
- by sending a signed written notice of revocation to KCS's Corporate Secretary, provided such statement is received no later than [—], 2021;
- by submitting a properly signed and dated proxy card with a later date that is received by KCS no later than the close of business on [—], 2021; or
- by attending the KCS special meeting via the special meeting website and requesting that your proxy be revoked or voting via the website as described above.

Only your last submitted proxy card will be considered.

Execution or revocation of a proxy will not in any way affect a stockholder's right to attend the KCS special meeting and vote thereat.

Written notices of revocation and other communications with respect to the revocation of proxies should be addressed to:

Kansas City Southern
427 West 12th Street,
Kansas City, Missouri 64105
1-888-800-3690
Attention: Corporate Secretary

If your shares are held in "street name" and you previously provided voting instructions to your broker, bank or other nominee, you should follow the instructions provided by your broker, bank or other nominee to revoke or change your voting instructions. You may also change your vote by submitting proof of your proxy power (legal proxy) reflecting your holdings of our stock, along with your name and email address to Computershare. Requests must be labeled as "Legal Proxy" and be received no later than [—], Eastern daylight time, on [—]. You will receive a confirmation email from Computershare. Requests should be directed to Computershare at the following:

- By Email: Forward the email from your broker, or attach an image of your legal proxy, to legalproxy@computershare.com.

Tabulation of Votes

The KCS board will appoint an independent inspector of elections for the KCS special meeting. The inspector of elections will, among other matters, determine the number of shares of KCS voting stock represented at the KCS special meeting to confirm the existence of a quorum, determine the validity of all proxies and ballots and certify the results of voting on all proposals submitted to KCS stockholders at the KCS special meeting.

Solicitation of Proxies; Expenses of Solicitation

KCS is soliciting proxies to provide an opportunity to all KCS stockholders to vote on agenda items at the KCS special meeting, whether or not the stockholders are able to attend the KCS special meeting or any adjournment or postponement thereof. KCS will bear the entire cost of soliciting proxies from its stockholders. In addition to the solicitation of proxies by mail, KCS will request that banks, brokers and other nominee record holders send proxies and proxy material to the beneficial owners of KCS voting stock and secure their voting instructions, if necessary. KCS may be required to reimburse those banks, brokers and other nominees on request for their reasonable expenses in taking those actions.

KCS has also retained MacKenzie to assist in soliciting proxies and in communicating with KCS stockholders and estimates that it will pay them a fee of approximately $[—] plus reimbursement for certain out-of-pocket fees and expenses. KCS also has agreed to indemnify MacKenzie against various liabilities and expenses that relate to or arise out of its solicitation of proxies (subject to certain exceptions). Proxies may be solicited on behalf of KCS or by KCS directors, officers and other employees in person, by mail, by telephone, by facsimile, by messenger, via the internet or by other means of communication, including electronic communication. Directors, officers and employees of KCS will not be paid any additional amounts for their services or solicitation in this regard.

Householding

The SEC has adopted rules that permit companies and intermediaries such as brokers to satisfy delivery requirements for proxy statements with respect to two or more stockholders sharing the same address by delivering a single proxy statement addressed to those stockholders. This process, which is commonly referred to

as “householding,” potentially provides extra convenience for stockholders and cost savings for companies. KCS and some brokers “household” proxy materials, delivering a single proxy statement to multiple stockholders sharing an address unless contrary instructions have been received from the affected stockholders. Once you have received notice from your broker or KCS that they or KCS will be householding materials to your address, householding will continue until you are notified otherwise or until you revoke your consent. If, at any time, you no longer wish to participate in householding and would prefer to receive a separate proxy statement, or if you are receiving multiple copies of the proxy statement and wish to receive only one, please notify your broker if your shares are held in a brokerage account, or KCS if you hold shares directly in your name. Written requests should be made to Kansas City Southern, 427 West 12th Street, Kansas City, Missouri 64105, Attention: Corporate Secretary, and oral requests may be made by calling KCS’s Corporate Secretary’s Office at 1-888-800-3690.

Assistance

If you need assistance voting or in completing your proxy card or have questions regarding the KCS special meeting, please contact MacKenzie, KCS’s proxy solicitor for the KCS special meeting:

MacKenzie Partners, Inc.
Shareholders call toll-free from the U.S. and Canada at 1-800-322-2885
or direct at 1-212-929-5500 from other locations
Banks and brokers may call collect at 1-212-929-5500.

KCS STOCKHOLDERS SHOULD CAREFULLY READ THIS PROXY STATEMENT/PROSPECTUS IN ITS ENTIRETY FOR MORE DETAILED INFORMATION CONCERNING THE MERGER AGREEMENT AND THE TRANSACTION. IN PARTICULAR, KCS STOCKHOLDERS ARE DIRECTED TO THE MERGER AGREEMENT, WHICH IS ATTACHED AS ANNEX A HERETO.

THE KCS MERGER PROPOSAL

This section of this proxy statement/prospectus describes the various aspects of the transaction and related matters. This section may not contain all of the information that is important to you. You should carefully read this entire proxy statement/prospectus and the documents incorporated by reference into this proxy statement/prospectus, including the full text of the merger agreement, a copy of which is attached to this proxy statement/prospectus as Annex A, for a more complete understanding of the transaction. In addition, important business and financial information about each of KCS and CPRL is included in or incorporated by reference into this proxy statement/prospectus. For a listing of the documents incorporated by reference into this proxy statement/prospectus, see the section entitled "Where You Can Find Additional Information" on page 229.

The approval by KCS stockholders of the KCS merger proposal is required by Section 251 of the DGCL and is a condition to the closing of the transaction.

Approval of the merger proposal requires the affirmative vote of a majority of the shares of KCS voting stock outstanding as of the close of business on the record date and entitled to vote. Abstentions will have the same effect as a vote "**AGAINST**" the proposal.

IF YOU ARE A KCS STOCKHOLDER, THE KCS BOARD UNANIMOUSLY RECOMMENDS THAT YOU VOTE "FOR" THE KCS MERGER PROPOSAL (PROPOSAL 1).

Transaction Structure

The merger agreement provides, among other things, that, subject to the terms and conditions set forth therein of the merger agreement, (i) at the effective time, first merger sub will merge with and into KCS with the separate corporate existence of first merger sub ceasing and KCS surviving as a direct wholly owned subsidiary of surviving merger sub (the first merger), and (ii) immediately following the first merger, KCS, as the entity surviving the first merger, will merge with and into surviving merger sub, with the separate corporate existence of KCS ceasing and surviving merger sub surviving as a direct wholly owned subsidiary of CPRL (the second merger). Immediately following the second merger, the following internal transactions will take place in sequential order: (i) CPRL will transfer all of the outstanding shares of capital stock of the second surviving corporation to CPRC as a capital contribution; (ii) CPRC will immediately thereafter transfer all of the outstanding shares of capital stock of the second surviving corporation to merger holdco as a capital contribution; (iii) merger holdco will immediately thereafter assume any indebtedness of the second surviving corporation owing to CPRC or its affiliates (being the amount borrowed by surviving merger sub to pay the cash consideration and preferred merger consideration) in consideration for a non-interest bearing promissory note issued by second surviving corporation to merger holdco, which promissory note will immediately thereafter be transferred to second surviving corporation as a capital contribution and the promissory note will accordingly be extinguished; and (iv) CPRC will immediately thereafter transfer all of the capital stock of merger holdco to Cygnus Canadian Holding Company Ltd., a corporation incorporated under the CBCA by CPRC and an indirect wholly owned subsidiary of CPRL (which we refer to as "Canadian holdco") as a capital contribution (which we collectively refer to as the "post-closing contributions"). Immediately following the post-closing contributions, CPRL will directly own CPRC which will, in turn, own Canadian holdco, which will, in turn, own merger holdco, which will, in turn, own the second surviving corporation. Immediately following the post-closing contributions, all of the outstanding shares of capital stock of the second surviving corporation, as successor to KCS, will be deposited by merger holdco into an independent, irrevocable voting trust subject to the terms and conditions of a voting trust agreement, by and among CPRL, merger holdco (a Delaware corporation and direct wholly owned subsidiary of Canadian holdco) and the trustee, substantially in the form attached to this proxy statement/prospectus as Exhibit A of the merger agreement attached to this proxy statement/prospectus as Annex A, pending receipt of STB final approval.

The terms and conditions of the transaction are contained in the merger agreement, which is described in this proxy statement/prospectus and attached to this proxy statement/prospectus as Annex A. You are encouraged to

read the merger agreement carefully, as it is the legal document that governs the transaction. All descriptions in this summary and elsewhere in this proxy statement/prospectus of the terms and conditions of the transaction are qualified in their entirety by reference to the full text of the merger agreement.

Merger Consideration

Under the merger agreement, at the effective time, each share of KCS common stock that is outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) will be converted automatically into the right to receive the share consideration, being 2.884 validly issued, fully paid and non-assessable CPRL common shares and the cash consideration, being $90.00 in cash, without interest, and each share of KCS preferred stock that is outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) will be converted into the right to receive the preferred merger consideration, being $37.50 in cash, without interest.

The merger consideration and/or the preferred merger consideration will be equitably adjusted in the event of any stock dividend, subdivision, reorganization, reclassification, recapitalization, stock split, reverse stock split, combination or exchange of shares involving KCS common stock, KCS preferred stock or CPRL common shares prior to the effective time, to proportionally reflect such change.

As used in this proxy statement/prospectus, the term “total purchase consideration” collectively refers to the merger consideration, the preferred merger consideration, cash amounts payable at the effective time in respect of all KCS equity awards, amounts remitted by CPRL to KCS in connection with the CN agreement termination payment and CN refund, and other amounts as defined as consideration by the acquisition method of accounting.

Based on the number of shares of KCS common stock, KCS restricted share awards and KCS director deferred shares outstanding as of [—], 2021, CPRL expects to issue (at the direction of surviving merger sub and on behalf of surviving merger sub) up to approximately [—] CPRL common shares to KCS common stockholders at the effective time under the merger agreement. The actual number of CPRL common shares to be issued under the merger agreement will be determined immediately prior to the effective time based on the exchange ratio, the number of shares of KCS common stock outstanding at such time and the number of KCS restricted share awards and KCS director deferred shares. Based on the number of shares of KCS common stock, KCS restricted share awards and KCS director deferred shares outstanding as of [—], 2021, and the number of CPRL common shares outstanding as of [—], 2021, immediately after the first merger, former KCS common stockholders are expected to own approximately [—]% of the issued and outstanding CPRL common shares.

Based on the closing price of CPRL common shares of $72.71 on the NYSE on August 9, 2021, the last full trading day prior to that on which CPRL submitted a revised offer to acquire KCS, the implied value of the merger consideration to holders of KCS common stock was approximately $299.70 per share of KCS common stock. The merger consideration provides a premium to KCS stockholders of approximately 34%, based on closing share price of CPRL common shares on August 9, 2021, and the unaffected closing price of KCS common stock on March 19, 2021, the last full trading day before the public announcement of the prior CP merger agreement. The implied value of the merger consideration will fluctuate, however, as the market price of CPRL common shares fluctuates, because the merger consideration that is payable per share of KCS common stock is a fixed fraction of a CPRL common share. As a result, the value of the merger consideration that KCS common stockholders will receive upon the closing of the transaction could be greater than, less than or the same as the value of the merger consideration on the date of this proxy statement/prospectus or at the time of the KCS special meeting. Accordingly, you are encouraged to obtain current share price quotations for KCS common stock and CPRL common shares before deciding how to vote with respect to the approval of the merger agreement. KCS common stock trades on the NYSE under the symbol “KSU” and CPRL common shares trade on the NYSE and the TSX under the symbol “CP.” The price of CPRL common shares on the NYSE is reported in U.S. dollars, while the price of CPRL common shares on the TSX is reported in Canadian dollars.

Background of the Transaction

The KCS board and senior management team periodically review and evaluate KCS's long-term strategy and the range of strategic opportunities that might be available to it to strengthen KCS's business and to enhance stockholder value. As part of this ongoing evaluation, management maintains a long-range plan (the "KCS long-range plan"), which is periodically updated and reviewed with the KCS board, that reflects management's financial and business outlook for KCS over a ten-year period. In addition, the KCS board and management team have, from time to time in the past, discussed and considered the possibility of entering into strategic transactions with other parties.

On July 29, 2020, Patrick Ottensmeyer, President and Chief Executive Officer of KCS, and Keith Creel, President and Chief Executive Officer of CPRL, had a lunch meeting at which they discussed a variety of industry topics. During this meeting, Mr. Creel raised whether KCS would be amenable to discussing a business combination of CPRL and KCS. No further actions were taken by the KCS management team or board at the time with respect to Mr. Creel's inquiry.

Beginning on July 31, 2020, several financial media outlets reported that an investor consortium was considering making a takeover proposal for KCS. Following these reports, the KCS board and senior management reached out to its financial advisor, Morgan Stanley, and its outside counsel, Wachtell, Lipton, Rosen & Katz ("Wachtell Lipton"), to discuss the reports and the question of how KCS should respond if a proposal were made.

On August 11, 2020, the KCS board met, together with members of senior management and representatives of Morgan Stanley and Wachtell Lipton, to discuss the financial media reports and the possibility of a proposal, including the KCS board's fiduciary duties under Delaware law and preliminary perspectives on valuation for KCS based on the KCS long-range plan and Wall Street research analyst forecasts. Thereafter, KCS reached out to BofA Securities to join Morgan Stanley as KCS's and the KCS board's financial advisor. KCS and the KCS board determined to engage both Morgan Stanley and BofA based on, among other things, each firm's overall reputation and experience as an investment banking firm, each firm's substantial experience in the transportation sector, and the belief that having the benefit of both firms' advice would be in the best interests of KCS and its stockholders.

On August 17, 2020, Robert Druten, the Chairman of the KCS board, and Mr. Ottensmeyer received an unsolicited written proposal from an investor consortium ("Party A") to acquire KCS for $195.00 per share in cash. The proposal indicated that Party A intended to finance the acquisition through a combination of equity financing and $6.5 billion in debt financing, and that Party A anticipated obtaining all regulatory approvals within four to six months of signing a definitive agreement. Messrs. Druten and Ottensmeyer notified the KCS board of the receipt of Party A's proposal and, later that day, Mr. Ottensmeyer and Michael Upchurch, the Executive Vice President and Chief Financial Officer of KCS, participated in a conversation with representatives of Party A to discuss the terms of the proposal.

A special meeting of the KCS board was convened on August 18, 2020, with members of senior management, and representatives of Morgan Stanley and Wachtell Lipton, to discuss Party A's proposal and potential next steps. Representatives of Morgan Stanley shared their perspectives on the financial terms of Party A's proposal. Members of management also reviewed the KCS long-range plan and the opportunities and risks associated with executing on KCS's long-term strategy. The KCS board discussed these considerations and perspectives and concluded that KCS should remain focused on its long-term strategic plans and should not pursue Party A's proposal. Messrs. Ottensmeyer and Upchurch subsequently conveyed the KCS board's conclusion to representatives of Party A.

On August 21, 2020, Mr. Creel called Mr. Ottensmeyer to propose that CPRL and KCS consider entering into a merger-of-equals transaction in which KCS stockholders would receive consideration consisting solely of CPRL common shares, in an at-market transaction. Mr. Creel expressed his view that, relative to the other Class I

railroad companies, a transaction involving CPRL and KCS would likely face the least amount of regulatory uncertainty given the companies' status as the two smallest Class I railroad companies in North America and their lack of geographic overlap. During the same week, a representative of Party A contacted Mr. Ottensmeyer to request a meeting to further discuss the possibility of a transaction.

During the following week, Jean-Jacques Ruest, President and Chief Executive Officer of CN, contacted Mr. Ottensmeyer telephonically to note the financial media reports regarding a possible takeover proposal. Mr. Ruest stated that, if KCS was interested in a sale, CN would be interested in discussing such a transaction. No further actions were taken by the KCS management team or board to engage with CN at the time.

On August 28, 2020, the KCS board met with members of senior management and a representative of Wachtell Lipton. The KCS board discussed Party A's request for a meeting and instructed Mr. Ottensmeyer to accept the request. Representatives of KCS management then reviewed possible exchange ratios implied by the historical trading prices of KCS common stock and CPRL common shares, as well as possible exchange ratios implied by the relative contributions of various financial metrics of KCS and CPRL. The KCS board discussed potential responses and determined not to take action with respect to CPRL's proposal at the time, pending Mr. Ottensmeyer's discussion with Party A and Party A's response. Mr. Ottensmeyer also described his conversation with Mr. Ruest of CN. In the days following the KCS board meeting, Messrs. Ottensmeyer and Upchurch had a discussion with representatives of Party A with respect to Party A's interest in a possible transaction.

On August 31, 2020, Party A submitted an updated, unsolicited written proposal to acquire KCS for $208.00 per share in cash, subject otherwise to the same terms and conditions set forth in Party A's August 17th proposal. The next day, Messrs. Ottensmeyer and Upchurch participated in a conversation with representatives of Party A to discuss the updated proposal.

A meeting of the KCS board was held on September 2, 2020, with members of senior management and representatives of Morgan Stanley, BofA Securities and Wachtell Lipton. Representatives of Morgan Stanley and BofA Securities discussed the terms of Party A's proposal and CPRL's proposal and presented preliminary perspectives on valuation for KCS based on the KCS long-range plan. After consideration of these and other factors, the KCS board again concluded that KCS should remain focused on its long-term strategic plans and determined that KCS should not pursue either Party A's proposal or CPRL's proposal. The KCS board did, however, believe that KCS should engage in discussions with CPRL about possible commercial opportunities or arrangements that could be in both companies' interests. Thereafter, Mr. Ottensmeyer communicated the KCS board's conclusions to representatives of Party A and to Mr. Creel.

From September to November 2020, the KCS board continued to discuss and review KCS's long-term strategic plan and strategic opportunities in consultation with senior management and KCS's external advisors. In addition, representatives of KCS and CPRL met on September 14 and 15, 2020 to discuss possible commercial opportunities or arrangements outside the context of a combination. The representatives of CPRL also provided their views on a potential at-market combination of KCS and CPRL.

On September 23, 2020, the KCS board met with members of management to further analyze and consider KCS's financial and business outlook and strategic options, including KCS's outlook as an independent company and an analysis of combinations with various other railroads. The KCS board also discussed the investor feedback received by KCS management following the publication of a September 9th financial media report that KCS had rejected the acquisition proposal that had reportedly been made for $208.00 per share in cash.

On October 20, 2020, the KCS board convened a meeting for informational purposes with members of management and representatives of Morgan Stanley, BofA Securities and Wachtell Lipton to discuss various strategic alternatives that might be available to the Company. This included a discussion led by representatives of Morgan Stanley and BofA Securities regarding illustrative buyout and ability-to-pay analyses with respect to Party A and various railroads who could be potential buyers.

On November 11, 2020, Mr. Ottensmeyer and Mr. Creel had a telephonic discussion on which they agreed that, given the political uncertainties following the recent U.S. election and the fact that KCS and CPRL were each focused on closing the fiscal year and preparing for the upcoming earnings season, KCS and CPRL would discontinue their discussions regarding potential commercial opportunities at such time and potentially revisit the idea of a strategic combination of the two companies in the future.

On November 17, 2020, Mr. Ottensmeyer received a call from a representative of another Class I railroad company expressing interest in a potential acquisition of a portion of KCS's assets. Mr. Ottensmeyer reported this conversation to the KCS board, but no further actions were taken by the KCS management team or KCS board to engage with such railroad company.

On November 23, 2020, representatives of Party A contacted Mr. Ottensmeyer to inform him that Party A intended to submit a revised proposal to acquire KCS for $230.00 per share in cash, which Party A submitted later that day. The revised proposal noted that Party A had high confidence that it would be able to obtain firm commitments from its equity partners and lenders once the parameters of a transaction had been agreed upon.

The KCS board met on December 2, 2020, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors, to discuss Party A's revised proposal and potential next steps. Mr. Upchurch discussed the KCS long-range plan and KCS's general strategic positioning. Representatives of Morgan Stanley and BofA Securities provided their preliminary perspectives on valuation for KCS based on the KCS long-range plan. The KCS board discussed the terms of Party A's proposal and the possibility of contacting CPRL, and potentially other Class I railroads, to determine their interest in submitting a proposal to acquire KCS. The KCS board reviewed potential synergy estimates and the possible merger consideration such parties could offer to KCS stockholders. The KCS board also discussed the timing and certainty of consummating a transaction with a Class I railroad company in light of the regulatory framework for such a transaction. Among other things, the KCS board and management team discussed the possibility of addressing potential uncertainties by employing a voting trust structure in which an acquiring Class I railroad would close the acquisition and immediately deposit the shares of KCS into an independent voting trust, with KCS stockholders receiving their merger consideration at that time and prior to the acquiror's receipt of final control approval from the STB.

After deliberation, the KCS board determined that Party A's proposal was not at a value that the KCS board was prepared to accept, but authorized management to begin providing Party A with due diligence materials, subject to the execution of a mutually acceptable confidentiality agreement, so that Party A could have an opportunity to submit an improved proposal. The KCS board also directed Mr. Ottensmeyer to notify Mr. Creel that KCS was now considering a potential transaction and would be willing to consider an acquisition proposal from CPRL that contemplated a significant control premium and a voting trust structure to address timing and regulatory issues. After consideration of the risks associated with a broader outreach effort, the KCS board determined not to contact other parties at the time and to revisit the question of reaching out to additional parties at a later date. After the KCS board meeting, Mr. Ottensmeyer reached out to Party A and to Mr. Creel with the messages determined by the KCS board.

On December 4, 2020, KCS entered into a confidentiality agreement with Party A, which contained customary standstill restrictions on Party A (which restrictions would terminate in the event any person acquired or became the owner of, or entered into a definitive agreement to acquire or become the owner of, more than 50% of the outstanding voting securities of KCS or assets of KCS representing more than 50% of its consolidated earning power).

On December 8, 2020, KCS entered into formal engagement letters with Morgan Stanley and with BofA Securities to provide advice to KCS and the KCS board with respect to KCS's strategic alternatives.

On December 9, 2020, CPRL submitted a written proposal to acquire KCS for 0.469 of a CPRL common share (equivalent to 2.345 shares after giving effect to the share split) and $77.00 in cash per share of KCS common stock (equal to approximately $235.00 per share of KCS common stock based on the market price of CPRL

common shares at the time). The proposal also contemplated that a transaction would be effectuated using a voting trust structure, which CPRL anticipated consummating within four months of signing a definitive agreement, with CPRL taking control of KCS following STB final approval within eight to twelve months thereafter. Mr. Ottensmeyer and other members of management subsequently participated in a call with Mr. Creel and other members of CPRL management to discuss the terms of CPRL's proposal. On December 9, 2020, KCS entered into a mutual confidentiality agreement with CPRL, which contained customary standstill restrictions on CPRL (which restrictions would terminate in the event any person acquired or became the owner of, or entered into a definitive agreement to acquire or become the owner of, more than 50% of the outstanding voting securities of KCS or assets of KCS representing more than 50% of its consolidated earning power).

On December 10, 2020, senior executives of each of CPRL and KCS (including Mr. Creel and Mr. Ottensmeyer) met, and CPRL presented the terms of its December 9 proposal.

The KCS board held a meeting on December 14, 2020 at which it discussed CPRL's proposal and the substance of the management team's conversation with CPRL. The KCS board then determined that CPRL's proposal was not at a value that the KCS board was prepared to accept, but authorized management to begin providing CPRL with due diligence materials under the mutual confidentiality agreement, so that CPRL could have an opportunity to submit an improved proposal.

Through December 2020, KCS provided Party A and CPRL with access to a virtual data room and various business and legal due diligence materials, including a copy of the KCS long-range plan and hosted management presentations and diligence sessions for the benefit of Party A and CPRL. CPRL also provided KCS with access to a virtual data room and various reverse diligence materials.

On December 22, 2020, the KCS board held a special meeting, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors. Mr. Upchurch presented an update to the KCS long-range plan, which had been adjusted upwards to reflect management's more optimistic financial and operational outlook for KCS as a result of the expected recovery from the COVID-19 pandemic and a lower cost structure resulting from an acceleration of Precision Scheduled Railroading initiatives. Members of management then provided an update regarding the status of Party A's and CPRL's ongoing diligence efforts, as well as internal discussions regarding the regulatory process and potential issues associated with a strategic transaction. Representatives of Morgan Stanley and BofA Securities also shared their perspectives on the financial terms of Party A's and CPRL's latest proposals and refreshed their perspectives on valuation for KCS to reflect the new financial terms of those proposals and the updated KCS long-range plan.

On December 28, 2020, Party A sent an updated written proposal to Messrs. Ottensmeyer and Upchurch to acquire KCS for $235.00 per share in cash. The proposal noted that, pursuant to the restrictions in its confidentiality agreement with KCS, Party A had not informed its equity partners or lenders of its recent conversations with KCS, but that Party A remained highly confident of the availability of financing for a transaction.

On December 30, 2020, Mr. Ottensmeyer reached out to Mr. Creel to alert him that KCS would need CPRL to promptly provide a revised offer if CPRL was still interested in pursuing a potential transaction, so that KCS could determine whether it would be willing to move towards a deal with CPRL or with a competing bidder.

On December 31, 2020, CPRL submitted an updated written proposal to acquire KCS for 0.489 of a CPRL common share (equivalent to 2.445 CPRL common shares after giving effect to the share split) and $78.00 in cash per share of KCS common stock (equal to approximately $248.00 per share of KCS common stock based on the market price of CPRL common shares at the time).

The KCS board met on January 7, 2021, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors. Mr. Ottensmeyer provided an update on the status of KCS's discussions with Party A and with CPRL and outlined potential next steps. Mr. Ottensmeyer offered his

perspective that a potential combination with CPRL would be attractive for KCS and its stockholders and his expectation that CPRL could further increase its purchase price given potential synergies. Members of the KCS board and management also entered into a discussion regarding the updated KCS long-range plan and a range of potential synergies for a combination with CPRL. Representatives of Morgan Stanley and BofA Securities provided their perspectives on the latest proposals received from Party A and from CPRL. The Company's Chief Legal Officer then described the expected regulatory approval process and potential timeline in the event KCS pursued a transaction with a Class I railroad company. After discussion, the KCS board determined not to accept either of the proposals that had been most recently submitted by Party A and by CPRL. The KCS board directed Mr. Ottensmeyer to communicate to representatives of each party that the KCS board was not prepared to proceed with a transaction at its proposed purchase price, but that the KCS board was willing to allow each party to complete its confirmatory due diligence (and, in the case of Party A, to reengage with its financing partners) with the expectation that the parties would complete diligence efforts by early-to-mid February and revert with their best and final offers. In addition, the KCS board again discussed the possibility of reaching out to other parties to ascertain their potential interest in a transaction, but, for the same reasons considered at its previous meeting on December 2, 2020, determined not to do so at the time and to revisit the question again in the future.

In the days following the meeting, Mr. Ottensmeyer communicated the KCS board's decisions to representatives of Party A and CPRL. Through the course of January and February 2021, members of KCS management, together with representatives of KCS's legal and financial advisors, continued to engage with and to address due diligence requests from Party A and from CPRL. Members of the KCS board also periodically met and consulted with members of management regarding the status of the process and to discuss transaction-related issues. On January 22 and 23, 2021, representatives of KCS, including Messrs. Druten and Ottensmeyer, met with representatives of CPRL to discuss CPRL's views on regulatory considerations and other issues relating to a potential combination with CPRL.

Following a meeting of the CPRL board on January 25, 2021, Mr. Creel contacted Mr. Ottensmeyer to discuss the potential transaction and the timeline to announcing a transaction. Mr. Ottensmeyer informed Mr. Creel that KCS expected to receive a revised offer from a competing bidder by mid-February and noted that the competing bidder's offer would not have the regulatory complexity and need for a voting trust structure that would exist in a transaction with CPRL. Mr. Ottensmeyer explained that KCS remained committed to evaluating offers from both CPRL and the competing bidder and continuing to hold working sessions with CPRL and its representatives to determine whether there was a path to a potential transaction with CPRL. Mr. Creel conveyed to Mr. Ottensmeyer that CPRL would be committed to engaging with KCS to complete its diligence and finalize the transaction structure and the terms of the merger agreement over the coming weeks, and that CPRL would be prepared to provide its final offer on value and price by mid-February, such that CPRL and KCS would be in a position to announce a transaction by the end of February 2021 should KCS choose to move forward with CPRL.

On January 26, 2021, the KCS board held a meeting with members of management and its legal advisors to specifically discuss potential regulatory considerations and issues relating to a strategic combination, including an assessment of the process for a voting trust transaction and obtaining final regulatory approval for the potential merger. The KCS board also convened meetings on February 4, 2021 and February 15, 2021, at which the KCS board reviewed the status of KCS's discussions with Party A and CPRL and discussed potential next steps.

On February 16, 2021, Mr. Creel called Mr. Ottensmeyer to inform him that CPRL would not be submitting a revised proposal until KCS confirmed that it had also received a revised competing proposal from the competing bidder. Mr. Ottensmeyer subsequently had separate discussions with both Mr. Creel and representatives of Party A regarding the status and timing with respect to the submission of revised bids.

On March 3, 2021, KCS received updated acquisition proposals from Party A and from CPRL. Party A's proposal contemplated an all-cash purchase price of $245.00 per share. The proposal indicated that Party A had re-engaged with its equity partners and that it was highly confident that the equity partners would be able to

secure final internal approvals upon confirmation of the key transaction terms over a two- to three-week period. The proposal also noted that Party A believed the credit committee approvals that its lenders had received in August 2020 remained valid, although it had not engaged in any recent discussions with its lenders in light of the restrictions in its confidentiality agreement with KCS. CPRL's proposal contemplated a purchase price of 0.489 of a CPRL common share (equivalent to 2.445 CPRL common shares after giving effect to the share split) and $81.00 in cash per share of KCS common stock (equal to approximately $260.00 per share of KCS common stock based on the market price of CPRL common shares at the time). The proposal indicated that CPRL anticipated consummating the voting trust transaction within four to six months after the signing of the merger agreement, with the acquisition of control within eight to twelve months thereafter. CPRL's proposal also contemplated a $400.0 million reverse termination fee payable to KCS in the event the merger agreement was terminated due to the inability to complete the voting trust transaction as a result of STB regulatory issues. Furthermore, CPRL's proposal contemplated the renaming of the combined company to "Canadian Pacific Kansas City", with the U.S. headquarters of the combined company to be located in Kansas City, and indicated that CPRL would be open to considering KCS director representation on its board following consummation of the voting trust transaction.

In the subsequent days, with the authorization of the KCS board, members of KCS management circulated a draft merger agreement to representatives of CPRL. The draft included, among other terms, a customary "fiduciary out" provision that would permit the KCS board to terminate its existing agreement with an acquirer in order to accept an alternative acquisition proposal from a third party under certain circumstances. In addition, the draft merger agreement provided to CPRL contemplated a reverse termination fee representing 7.0% of the transaction consideration (or approximately $1.7 billion based on CPRL's then proposed purchase price) and a one-way exchange ratio collar in which KCS stockholders would receive a fixed dollar amount of stock consideration in the event the acquirer's stock price fell below a specified threshold, up to a maximum number of shares.

On March 5, 2021, Mr. Ottensmeyer had a discussion with Mr. Creel regarding the key issues in the draft merger agreement received from KCS the prior day, including with respect to the transaction structure and regulatory termination fee size and structure as proposed in KCS's draft, as well as the one-way exchange ratio collar.

On March 6, 2021, the KCS board convened a meeting to discuss the updated proposals submitted by CPRL and Party A. Mr. Ottensmeyer reviewed the terms of each proposal and again expressed his views on the strategic options available to the Company. Representatives of Morgan Stanley and BofA Securities also shared their perspectives on the financial terms of the proposals. The directors discussed with members of management and representatives of the financial advisors the potential synergies from a transaction involving CPRL and the possible benefits and risks associated with accepting merger consideration that included an acquirer's common stock. Among other things, the KCS board discussed various mechanisms to protect against a potential decline in an acquirer's stock price, including the one-way exchange ratio collar proposed in the draft merger agreement provided to CPRL. The KCS board discussed again with the Company's legal advisors the regulatory uncertainties and timeline for a strategic combination. The KCS board then directed management and the financial advisors to ask Party A and CPRL to submit final proposals and merger agreement markups by no later than March 15, and to inform Party A that it could reach out to its lending sources to confirm financing. The KCS board also again considered whether or not to reach out to other parties. After considering, among other factors, the various risks associated with further opening up the process, and the "fiduciary out" provisions included in the proposed merger agreement, the KCS board determined to focus its efforts on negotiating a transaction with either Party A or CPRL and not to reach out to other potential counterparties at the time.

Following the KCS board meeting, representatives of KCS and their advisors sent a letter to representatives of each of Party A and CPRL outlining the process and request for final proposals. In addition, representatives of KCS sent a draft merger agreement to representatives of Party A. Similar to the draft merger agreement provided to CPRL, the draft merger agreement contemplated a customary "fiduciary out" provision that would permit the

KCS board to terminate its existing agreement with an acquirer in order to accept an alternative acquisition proposal under certain circumstances. It also included a reverse termination fee representing 7.0% of the transaction consideration (or approximately $1.6 billion based on Party A's then proposed purchase price) in the event the transaction did not close due to the failure to obtain financing.

On March 9, 2021, the finance committee of the KCS board held a meeting for the purpose of further analyzing and discussing the possible benefits and risks associated with accepting merger consideration that included an acquirer's common stock. At the meeting, representatives of Morgan Stanley and BofA Securities reviewed the mechanics of the one-way exchange ratio collar proposed in the draft merger agreement provided to CPRL and a range of other mechanisms that could be used to protect against a potential decline in an acquirer's stock price, together with a summary of the frequency with which such mechanisms had been employed or not employed in recent M&A transactions.

On March 10, 2021, KCS and CPRL executed a clean team agreement to facilitate the sharing of certain sensitive diligence materials. Also on March 10, 2021, representatives of the CPRL management team held a reverse due diligence call with representatives of KCS.

On March 11, 2021, Wachtell Lipton sent to Sullivan & Cromwell LLP, CPRL's outside counsel ("Sullivan & Cromwell"), an initial draft of the KCS disclosure schedules to the merger agreement.

On March 15, 2021, Party A and CPRL submitted revised acquisition proposals, including markups of the forms of merger agreement previously provided by KCS. Party A's proposal contemplated an all-cash purchase price of $250.00 per share, which it noted was its "final proposal." The proposal indicated that Party A's lenders had received full credit committee approvals to increase the overall debt financing to $10.3 billion and that all but one of Party A's equity partners had received the required internal approvals to fund the transaction (Party A informed KCS subsequently that this final approval had been obtained). CPRL's proposal contemplated merger consideration of 0.489 of a CPRL common share (equivalent to 2.445 CPRL common shares after giving effect to the share split), without any provision for a collar, and $86.00 in cash per share of KCS common stock (equal to approximately $268.00 per share of KCS common stock based on the market price of CPRL common shares at the time). CPRL's proposal also contemplated, among other things, an increased $800.0 million reverse termination fee and the elimination of the right of the KCS board to terminate the merger agreement in order to accept a superior proposal in certain circumstances.

On March 16, 2021, the KCS board met, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors, to review the proposals received from Party A and CPRL. Representatives of Morgan Stanley and BofA Securities reviewed the history of KCS's discussions with Party A and with CPRL, including the financial terms of the proposals that each party had submitted since August 2020. Representatives of Wachtell Lipton also provided an overview of the merger agreement markups delivered by Party A and CPRL. The KCS board entered into a discussion with members of management and representatives of the Company's financial advisors regarding Party A's proposed financing structure and its potential capacity to further increase its purchase price. It was the view of the KCS board based on this discussion, as well as Party A's statement that it had made its "final proposal", that Party A would have minimal room to further increase its offer. The KCS board considered these facts and perspectives, as well as the facts and perspectives previously discussed and reviewed at prior meetings, and determined to focus its efforts on negotiating a transaction with CPRL, subject to CPRL agreeing to specific improvements to the terms of its proposal. To that end, the KCS board directed Mr. Ottensmeyer to communicate to Mr. Creel that the KCS board would be willing to proceed with a transaction if CPRL were to improve its proposal by, among other things, increasing its contemplated exchange ratio from 0.489 to 0.5 of a CPRL common share, increasing the amount of the reverse termination fee from $800.0 million to $1.3 billion, and accepting the KCS board's right to terminate the merger agreement in order to accept a superior proposal in certain circumstances. A member of management and representatives of KCS's outside compensation advisor also reviewed the terms of a proposed retention

program and severance arrangements proposed to be submitted for approval by the KCS board were it to approve a transaction with CPRL. The KCS board discussed the terms of and reasons for the proposed retention program and severance arrangements.

Later that day, Mr. Ottensmeyer called Mr. Creel to communicate the KCS board's requests. Mr. Creel said that he would need to consult with members of the CPRL board. Mr. Creel subsequently responded by stating that CPRL was prepared to offer an increased merger consideration of $90 in cash and 0.489 of a CPRL common share (equivalent to 2.445 shares after giving effect to the share split) for each share of KCS common stock (equal to approximately $272 per share of KCS common stock based on the market price of CPRL common shares at the time), to increase the reverse termination fee to $1 billion, and to agree to the right of the KCS board to terminate the merger agreement to accept a superior proposal from a third party in certain circumstances. The following day, CPRL submitted a revised written proposal reflecting these terms. Mr. Ottensmeyer informed the KCS board of the terms of CPRL's proposal, and at the direction of the KCS board and management, representatives of Wachtell Lipton proceeded to negotiate final terms of the transaction documents with representatives of Sullivan & Cromwell, with the goal of announcing a signed merger agreement no later than the morning of March 21, 2021. From March 17 through March 20, 2021, representatives of Wachtell Lipton and Sullivan & Cromwell exchanged further revised drafts of the merger agreement and participated in calls to resolve the remaining open issues.

On March 20, 2021, the KCS board held a meeting, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors. A representative of Wachtell Lipton again discussed with the board its fiduciary duties under Delaware law. Thereafter, representatives of each of the financial advisors presented to the KCS board their respective financial analyses and each financial advisor rendered to the KCS board its oral opinion, which was subsequently confirmed in writing on the same date, to the effect that, as of such date and based upon and subject to the matters considered, the procedures followed, the assumptions made and various limitations of and qualifications to the review undertaken, as set forth in each financial advisor's respective written opinion, the consideration to be received in the transaction by holders of KCS common stock (other than certain excluded shares as described in the merger agreement) was fair, from a financial point of view, to such holders. The Wachtell Lipton representative then summarized the terms of the merger agreement compared to the terms previously reviewed. After further discussion and deliberation, the KCS board unanimously approved the merger agreement and resolved to recommend that the stockholders of KCS adopt the merger agreement. The KCS board also approved the proposed retention and severance arrangements previously discussed.

Following the completion of the KCS board meeting, representatives of Wachtell Lipton and Sullivan & Cromwell finalized the merger agreement, and in the early morning of March 21, 2021, KCS and CPRL executed the prior CP merger agreement. KCS and CPRL issued a joint press release announcing the transaction in the morning of March 21, 2021.

On March 22, 2021, representatives of CPRL submitted a letter to STB Staff requesting an informal opinion that CPRL's proposed voting trust agreement comported with the standards set forth in 49 C.F.R. § 1013.3(a).

On April 20, 2021, KCS received an unsolicited written proposal from CN (the "CN proposal") to acquire KCS for 1.059 common shares of CN and $200.00 in cash per share of KCS common stock (valued at $325.00 per share of KCS common stock based on the market price of CN common shares at the time). The proposal contemplated that CN and KCS would enter into a merger agreement with substantially similar terms to those of the prior CP merger agreement, including the use of a voting trust arrangement and a commitment to obtain regulatory approvals on the same terms as in the prior CP merger agreement.

The KCS board met on April 20, 2021, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors, for a preliminary review of the CN proposal. Representatives of Morgan Stanley and BofA Securities reviewed and discussed their preliminary perspectives

on the financial terms of the CN proposal in comparison to the financial terms of the prior CP merger agreement. The KCS board also reviewed potential synergy estimates for a combination with CN relative to the synergies estimated for the transaction with CPRL.

On April 23, 2021, the STB announced a decision that the waiver provision under 49 C.F.R. § 1180.0(b) applied to the proposed transaction between CPRL and KCS and stated that the agency's review of the transaction would be governed by the regulations set forth at 49 C.F.R. part 1180 (2000).

On April 24, 2021, the KCS board held a meeting, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors. Representatives of Morgan Stanley and BofA Securities again shared their perspectives on the financial terms of the CN proposal in comparison to the financial terms of the prior CP merger agreement. The KCS board reviewed the potential synergies for a combination with each of CPRL and CN and discussed with the advisors the likely capacity of each party to further increase its purchase price and other enhancements that could be requested of CPRL and CN with respect to the terms of a transaction. The KCS board also discussed the regulatory considerations and issues relating to a combination with CN relative to CPRL, including an assessment of the process for approval of the proposed voting trust and for obtaining final regulatory approval for the potential combination. After consideration of these facts and perspectives, as well as the facts and perspectives previously discussed and reviewed at the KCS board's April 20th meeting, the KCS board determined that the CN proposal could reasonably be expected to lead to a "Company Superior Proposal", as defined in the prior CP merger agreement (which we refer to as a "company superior proposal"). Accordingly, the KCS board determined that KCS should provide information to CN, and engage in discussions and negotiations with CN, with respect to the CN proposal. KCS management subsequently notified representatives of CN and CPRL of the KCS board's determination, after which KCS issued a press release announcing its decision and intent to engage in discussions with CN. On the evening of April 24, 2021, representatives of Cravath, Swaine & Moore LLP (which we refer to as "Cravath"), CN's outside counsel, sent to Wachtell Lipton proposed forms of a merger agreement and a voting trust agreement reflecting the terms described in the CN proposal.

On April 26, 2021, representatives of CN submitted an application to the STB requesting approval of CN's proposed voting trust agreement, pursuant to 49 C.F.R. § 1180.4(b)(4)(iv) (and not under the waiver provision under 49 C.F.R. § 1180.0(b)). Also on April 26, 2021, KCS entered into a confidentiality agreement and clean team agreement with CN in substantially the same forms as the confidentiality agreements entered into with CPRL and Party A, other than the absence of standstill provisions and other immaterial changes. Through the subsequent weeks, KCS provided CN with access to a virtual data room and various business and legal due diligence materials, including a copy of the KCS long-range plan. Representatives of CN participated in management presentations and diligence sessions hosted by KCS. In addition, CN provided KCS with access to a virtual data room and various reverse diligence materials.

On May 6, 2021, the STB announced a decision finding that the voting trust agreement proposed by CPRL was acceptable, subject to certain modifications.

On May 8, 2021, the KCS board convened a meeting with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors to discuss KCS's ongoing engagement with CN and potential next steps. Members of management and representatives of Wachtell Lipton reviewed the terms of CN's draft merger agreement and presented a proposed list of enhancements to request from CN with respect to the CN proposal, including (1) increasing the exchange ratio from 1.059 shares so that the transaction could qualify as a "reorganization" within the meaning of Section 368(a) of the Code, (2) increasing the reverse termination fee payable to KCS in the event the merger agreement was terminated due to the inability of the parties to complete the voting trust transaction as a result of STB regulatory issues from $1.0 billion to $2.0 billion, (3) requiring CN to reimburse KCS upon payment of the $700.0 million termination fee by KCS to CPRL in the event KCS terminated the prior CP merger agreement to enter into a merger agreement with CN and (4) enhancing the flexibility of KCS to undertake certain actions following the execution of a merger agreement with CN without CN's prior written consent, including with respect to the terms of KCS's retention program and

severance arrangements. The KCS board also reviewed a proposed timeline for soliciting a revised proposal from CN. The KCS board then directed management, together with KCS's legal advisors, to seek the enhancements to the CN proposal discussed with the KCS board and to request that CN submit a revised binding proposal so that the KCS board could be in a position to make a determination as to whether such revised proposal constituted a company superior proposal at a meeting scheduled for May 13, 2021. The KCS board also directed management to notify CPRL of the KCS board's intention to make a determination with respect to the CN proposal at its next meeting and to suggest that CPRL submit any revisions with respect to the prior CP merger agreement before such time.

Following the meeting, Mr. Ottensmeyer communicated the KCS board's requests to Mr. Ruest and to Mr. Creel. Representatives of Wachtell Lipton also reached out to Cravath to review the requested enhancements with respect to the CN proposal.

On May 11, 2021, representatives of Cravath contacted Wachtell Lipton to convey CN's responses to KCS's requested enhancements. The representatives of Cravath expressed that CN was prepared to accept several of KCS's requests for enhanced flexibility during the pendency of the transaction, including with respect to the terms of KCS's retention program and severance arrangements. The representatives of Cravath also expressed that CN was prepared to accept KCS's proposal that CN (or an affiliate of CN) reimburse KCS for the $700.0 million termination fee that would be payable by KCS to CPRL in connection with the termination of the prior CP merger agreement, subject to KCS refunding such reimbursement in the event (i) KCS terminated the merger agreement with CN in order to accept a superior proposal, (ii) CN terminated the merger agreement upon a change of recommendation by the KCS board, (iii) CN terminated the merger agreement on the basis of a breach by KCS of its representations, warranties or covenants in a manner that would entitle CN not to consummate the merger or (iv) CN terminated the merger agreement on the basis of the occurrence of a material adverse effect on the business and operations of KCS. The Cravath representatives indicated that CN was unwilling to increase the exchange ratio or the reverse termination fee.

On May 12, 2021, Mr. Ottensmeyer called Mr. Ruest to request that CN increase its exchange ratio so as to restore the $325.00 per share valuation of the CN proposal based on the current market price of CN common shares. Mr. Ottensmeyer further requested that CN consider increasing the amount of the reverse termination fee payable to KCS in the event the merger agreement was terminated due to the inability of the parties to complete the voting trust transaction as a result of STB regulatory issues. Mr. Ottensmeyer also spoke with Mr. Creel and encouraged CPRL to submit any proposed revisions to the prior CP merger agreement before the KCS board's next meeting.

On the morning of May 13, 2021, representatives of Cravath sent to representatives of Wachtell Lipton a proposed form of offer letter and revised drafts of the merger agreement and other transaction documents. CN's revised proposal contemplated an increase in the exchange ratio to 1.129 shares of CN common shares while maintaining the $200.00 per share cash component of the proposed consideration (restoring the $325.00 per share valuation of the CN proposal based on the closing price of CN common shares on May 12, 2021), an obligation by an affiliate of CN to reimburse KCS for the $700.0 million termination fee payable to CPRL (subject to KCS refunding such reimbursement in the event (i) KCS terminated the merger agreement with CN in order to accept a superior proposal, (ii) CN terminated the merger agreement upon a change of recommendation by the KCS board or (iii) CN terminated the merger agreement on the basis of a breach by KCS of its representations, warranties or covenants in a manner that would entitle CN not to consummate the merger), and enhanced flexibility on the part of KCS to undertake certain actions without CN's prior written consent during the pendency of the transaction, including with respect to the terms of KCS's retention program and severance arrangements. Through the morning and early afternoon, representatives of Wachtell Lipton and Cravath discussed various minor revisions to the transaction documents. Representatives of Cravath then submitted a binding offer letter on behalf of CN, together with proposed final and binding forms of merger agreement and schedules (collectively, the "revised CN proposal"). The offer letter indicated that the revised CN proposal could be accepted by KCS at any time prior to 5:00 pm Eastern Time on May 21, 2021.

On the afternoon of May 13, 2021, the KCS board met, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors, to discuss the revised CN proposal. The KCS board reviewed the terms of the revised CN proposal relative to the terms of the prior CP merger agreement and discussed various regulatory considerations relating to a combination with CN and with CPRL, including the STB's decision to apply the waiver provision under 49 C.F.R. § 1180.0(b) to the potential CPRL transaction and CPRL's receipt of STB voting trust approval. The KCS board discussed potential next steps and the requirements of the prior CP merger agreement with respect to any further engagement with CN. Among other things, the KCS board considered the fact that, in the event the KCS board determined that the revised CN proposal constituted a company superior proposal, KCS would be required to provide CPRL the opportunity for at least five business days to attempt to match the terms of the revised CN proposal prior to terminating the prior CP merger agreement and entering into a definitive agreement with CN. Representatives of Morgan Stanley and BofA Securities also provided to the KCS board their respective financial analyses. The representatives stated that they had each reviewed the terms of the revised CN proposal with their respective fairness committees and that, absent any material developments following the conclusion of the meeting, the financial advisors stood ready to deliver customary fairness opinions with respect to the revised CN proposal at such time as the KCS board were to consider terminating the prior CP merger agreement and entering into a merger agreement in relation to the revised CN proposal. The KCS board determined that the revised CN proposal constituted a company superior proposal and directed management to notify CPRL of the KCS board's intention to terminate the prior CP merger agreement and to enter into a definitive agreement with respect to the revised CN proposal unless, at the end of the five business day period following the notice, the KCS board determined that the revised CN proposal no longer constituted a company superior proposal. Members of KCS management communicated the KCS board's determination to representatives of CN and CPRL after the end of the meeting, and later on the evening of May 13, 2021, KCS issued a press release announcing the KCS board's determination.

On May 17, 2021, the STB announced a decision finding that application of the waiver provision under 49 C.F.R. § 1180.0(b) to a potential transaction between CN and KCS was not warranted and stated that the agency's review of the transaction would be governed by the regulations set forth at 49 C.F.R. part 1180, as adopted in Major Rail Consolidation Procedures, 5 S.T.B. 539 (2001). The STB also denied CN's motion to approve its proposed voting trust agreement as incomplete, without prejudice to filing a new motion.

On the morning of May 20, 2021, Mr. Creel contacted Mr. Ottensmeyer to notify him that CPRL did not intend to propose revisions to the prior CP merger agreement, explaining that, in CPRL's view, it would be destructive to CPRL's and KCS's mutual interests to engage in a bidding war with CN. Shortly thereafter, Mr. Creel publicly announced CPRL's intention not to increase its offer. Later that afternoon, the KCS board convened a meeting to discuss next steps with respect to the revised CN proposal. The KCS board reviewed again with KCS's financial and legal advisors the financial terms of the revised CN proposal in comparison to the financial terms of the prior CP merger agreement. The KCS board also discussed the regulatory considerations associated with pursuing a transaction with CN and CPRL, including the STB's determinations with respect to CN's and CPRL's proposed voting trust agreements, and considered the possibility of seeking additional enhancements to CN's proposal. The KCS board then directed management to reach out to CN to request a further increase in the exchange ratio so as to restore the $325.00 per share valuation of the CN proposal based on the current market price of CN common shares and a revised "escalating" reverse termination fee that would increase by $100.0 million per month in the event CN were unable to obtain STB voting trust approval within three months of the execution of a merger agreement with KCS.

Following the meeting, Mr. Ottensmeyer contacted Mr. Ruest to convey the requests from the KCS board. Later that evening, Mr. Ruest reached out to Mr. Ottensmeyer to indicate that CN was not willing to make any further changes to the revised CN proposal.

On the morning of May 21, 2021, the KCS board met again. Mr. Ottensmeyer updated the KCS board as to his conversations with Mr. Ruest, after which a discussion followed among the directors as to potential next steps. A representative of Wachtell Lipton discussed with the board its fiduciary duties under Delaware law. Thereafter,

representatives of each of the financial advisors presented to the KCS board their respective financial analyses and each financial advisor rendered to the KCS board its oral opinion, which was subsequently confirmed in writing on the same date, to the effect that, as of such date and based upon and subject to the matters considered, the procedures followed, the assumptions made and various limitations of and qualifications to the review undertaken, as set forth in each financial advisor's respective written opinion, the consideration to be received in the transaction with CN by holders of KCS common stock (other than certain excluded shares as described in the merger agreement) was fair, from a financial point of view, to such holders. After further discussion and deliberation, the KCS board unanimously determined that the revised CN proposal continued to constitute a company superior proposal and approved the termination of the prior CP merger agreement, KCS's payment of the $700.0 million CP termination payment to CPRL pursuant to the terms of the prior CP merger agreement and KCS's entry into the merger agreement with CN. The KCS board also approved the updated retention and severance arrangements set forth in the revised CN proposal.

Following the completion of the KCS board meeting, KCS management notified CPRL of the KCS board's determination, after which KCS terminated the prior CP merger agreement and paid the $700.0 million CP termination payment to CPRL. Shortly thereafter, KCS delivered an executed signature page to the CN agreement, which had already been executed by CN, and KCS and CN issued a joint press release announcing the transaction. Following execution of the CN agreement, an affiliate of CN reimbursed KCS for the $700.0 million CP termination payment paid to CPRL.

On May 26, 2021, representatives of KCS and CN jointly filed with the STB a renewed motion for approval of CN's proposed voting trust agreement. The motion included, among other things, a commitment by CN to divest KCS's 70-mile line between New Orleans and Baton Rouge following the consummation of a transaction and STB final approval.

On June 8, 2021, the STB issued a timetable for reviewing CN's proposed voting trust agreement. The STB directed KCS and CN to file certain additional materials relating to the financial condition of CN with the STB by June 14, 2021 and requested public comments on CN's proposed voting trust on June 28, 2021 and KCS's and CN's replies on July 6, 2021.

On June 22, 2021, CN filed with the SEC a preliminary Form F-4 registration statement with respect to the CN common shares issuable in the proposed merger with KCS. The registration statement included a preliminary proxy statement of KCS relating to the KCS stockholder meeting proposed to be convened to vote on the CN merger (the "KCS-CN merger approval stockholder meeting") .

On July 2, 2021, KCS fixed and announced August 19, 2021 as the date for the KCS-CN merger approval stockholder meeting.

On July 7, 2021, CN filed with the SEC a final prospectus with respect to the CN common shares issuable in the proposed merger with KCS and KCS filed a definitive proxy statement with respect to KCS-CN merger approval stockholder meeting.

On July 29, 2021, CPRL filed with the SEC a preliminary proxy statement in connection with the solicitation of votes against the CN merger at the KCS-CN merger approval stockholder meeting. On August 9, 2021, CPRL filed with the SEC a definitive proxy statement in connection with the solicitation of votes against the CN merger at the KCS-CN merger approval stockholder meeting.

On the morning of August 10, 2021, KCS received an unsolicited written proposal from CPRL (the "revised CPRL proposal") to acquire KCS for 2.884 CPRL common shares and $90.00 in cash per share of KCS common stock (valued at $300.00 per share of KCS common stock based on the market price of CPRL common shares at the time). The revised CPRL proposal contemplated that CPRL and KCS would enter into a merger agreement with substantially similar terms to those of the CN agreement and included proposed forms of a merger agreement and a voting trust agreement. The revised CPRL proposal indicated that, in connection with KCS's termination of the CN agreement, CPRL would remit $1.4 billion to KCS to reimburse KCS for the payment of

the $700.0 million termination payment that would be due to CN and the $700.0 million refund that would be due to an affiliate of CN with respect to the CN affiliate's reimbursement of the CP termination payment previously paid by KCS to CPRL. The revised CPRL proposal contemplated that KCS would be required to refund the full amount of the reimbursement in connection with the termination of a merger agreement under specified circumstances. In the afternoon of August 10, 2021, the STB announced that it expected to issue a decision on CN's proposed voting trust no later than August 31, 2021. The KCS board convened a meeting on the same day, together with members of senior management and representatives of KCS's legal advisors for a preliminary review of the revised CPRL proposal and to discuss the STB's announcement and potential next steps. The KCS board instructed Mr. Ottensmeyer to reach out to Mr. Ruest to inquire as to whether CN would be willing to increase its purchase price or otherwise improve the terms of its proposed merger in light of the receipt of the revised CPRL proposal and the STB's recent announcement.

On August 11, 2021, Mr. Ottensmeyer contacted Mr. Ruest to communicate the KCS board's inquiry. Later that day, Mr. Ruest indicated that CN was not prepared to increase its proposed purchase price or otherwise modify the terms of the proposed transaction, but that CN would support a decision by the KCS board (if the KCS board so decided) to adjourn the KCS-CN merger approval stockholder meeting to take place after the STB's announcement of a final ruling on the CN voting trust.

On August 12, 2021, the KCS board held a meeting, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors. Representatives of Morgan Stanley and BofA Securities shared their perspectives on the financial terms of the revised CPRL proposal in comparison to the financial terms of the CN agreement. The KCS board reviewed the potential synergies for a combination with each of CN and CPRL and discussed with management and the advisors the potential capacity of each party to further enhance the terms of a transaction, including the feedback Mr. Ottensmeyer had received from Mr. Ruest regarding CN's unwillingness to improve the terms of its proposal. The KCS board also discussed the feedback received from investors and the potential paths available to KCS and reviewed again the regulatory considerations and issues relating to a combination with CPRL relative to CN. The KCS board then determined that the revised CPRL proposal did not constitute, and could not reasonably be expected to lead to, a "Company Superior Proposal", as defined in the CN agreement (which, for purposes of the remainder of this section of this proxy statement/prospectus, we refer to as a "company superior proposal"). The KCS board also determined to adjourn the KCS-CN merger approval stockholder meeting in the event the STB did not release a public decision on the CN voting trust by August 17, 2021, at 6:00 p.m., Central Time. Shortly thereafter, KCS issued a press release announcing its decision. Because the STB had not yet released its decision on the CN voting trust, on August 19, 2021, KCS convened and adjourned the KCS-CN merger approval stockholder meeting until September 3, 2021.

On August 31, 2021, the STB announced a unanimous decision rejecting the use of a voting trust agreement in connection with the proposed transaction between KCS and CN. Later that day, Mr. Creel called Mr. Ottensmeyer to renew and reaffirm the terms of the revised CPRL proposal, which Mr. Creel conveyed in writing to Mr. Ottensmeyer shortly after the conclusion of their call, together with proposed forms of a merger agreement and a voting trust agreement. The letter indicated that the revised CPRL proposal would expire at 11:59 p.m., Eastern Time, on September 12, 2021, if KCS did not deliver evidence to CPRL by that time that KCS had delivered to CN notice of its intention to terminate the CN agreement and enter into a merger agreement with CPRL. At 8:00 p.m., Eastern Time, the KCS board convened a meeting, with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors, to discuss the developments of the day. After deliberation, in light of these developments, the KCS board determined to further adjourn the KCS-CN merger approval stockholder meeting.

On September 3, 2021, KCS convened and adjourned the KCS-CN merger approval stockholder meeting until September 24, 2021.

On the morning of September 4, 2021, the KCS board held a meeting, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors, to discuss the

revised CPRL proposal and potential next steps. Representatives of Morgan Stanley and BofA Securities again provided their perspectives on the financial terms of the revised CPRL proposal in comparison to the financial terms of the CN agreement. The KCS board reviewed an illustrative expected value comparison with respect to the CN and CPRL offers weighted, respectively, by a range of probabilities of consummating a voting trust transaction in connection with each offer. Mr. Ottensmeyer also informed the KCS board that Mr. Ruest had indicated that CN would be willing to join KCS in an appeal of the STB ruling denying approval of the CN voting trust, and would be willing to explore the possibility of pursuing a combination of KCS and CN without a voting trust, but that CN would not be willing to increase the merger consideration or the reverse termination fee that would be payable to KCS if regulatory approval were not obtained.

The KCS board then discussed a proposed list of potential enhancements to request from CN and CPRL. These included, with respect to CN, requests to appeal the STB decision and increase the proposed purchase price and reverse termination fee due to KCS (notwithstanding Mr. Ruest's statements to Mr. Ottensmeyer), and with respect to CPRL, requests to increase the proposed purchase price, reduce the amount of the reimbursement that would be refundable by KCS under certain circumstances from $1.4 billion to $700.0 million, permit KCS to pay a one-time special dividend to KCS stockholders prior to closing, revise the contemplated transaction structure so that the transaction could qualify as a "reorganization" within the meaning of Section 368(a) of the Code (as was contemplated in the prior CP merger agreement) and enhance the flexibility of KCS to undertake certain actions following the execution of a merger agreement with CPRL without CPRL's prior written consent (such as with respect to the terms of KCS's retention program and severance arrangements). The KCS board also reviewed a proposed timeline for soliciting revised proposals from CN and CPRL. After consideration of these perspectives, together with analysis of the STB's ruling on the CN voting trust and the other events of the week, the KCS board determined that the revised CPRL proposal could reasonably be expected to lead to a company superior proposal. Accordingly, the KCS board determined that KCS should provide information to CPRL, and engage in discussions and negotiations with CPRL, with respect to the revised CPRL proposal. The KCS board then directed management, together with KCS's legal advisors, to seek from CN and CPRL the enhancements discussed with the KCS board. KCS management subsequently notified representatives of CN and CPRL of the KCS board's determination, after which KCS issued a press release announcing its decision and intent to engage in discussions with CPRL.

Over the following week, KCS provided CPRL with renewed access to a virtual data room and various business and legal due diligence materials, including a copy of the KCS long-range plan, and responded to diligence requests and questions from CPRL. In addition, CPRL provided KCS with renewed access to a virtual data room and various reverse diligence materials, including a copy of CPRL's internal five-year financial forecast (the "CPRL five-year plan"). Additionally, during this time, members of KCS management and representatives of KCS's legal advisors discussed with their counterparts at CN and CPRL the proposed enhancements sought by the KCS board with respect to their respective proposals. On September 5, 2021, representatives of Wachtell Lipton sent to representatives of Sullivan & Cromwell a revised draft of the merger agreement reflecting these requested enhancements.

On September 6, 2021, Mr. Creel reached out to Mr. Ottensmeyer to express that CPRL was prepared to reduce the amount of the reimbursement that would be refundable by KCS under certain circumstances from $1.4 billion to $700.0 million, revise the contemplated transaction structure so that the transaction could qualify as a "reorganization" within the meaning of Section 368(a) of the Code and accept several of KCS's requests for enhanced flexibility during the pendency of the transaction, including with respect to the terms of KCS's retention program and severance arrangements. Mr. Creel indicated that CPRL was unwilling to accept KCS's other requests, including the request for any additional merger consideration and the ability to pay a one-time special dividend to KCS stockholders. On the next day, representatives of Sullivan & Cromwell sent to representatives of Wachtell Lipton revised drafts of the transaction documents reflecting the positions communicated by Mr. Creel. Representatives of Wachtell Lipton and Sullivan & Cromwell subsequently discussed various minor revisions to the transaction documents.

On September 9, 2021, Mr. Ruest reiterated CN's position that CN would be willing to pursue an appeal of the STB ruling and to explore the possibility of pursuing a combination of KCS and CN without a voting trust, but that CN would not be willing to increase its merger consideration or reverse termination fee.

On the night of September 11, 2021, representatives of Sullivan & Cromwell sent to representatives of Wachtell Lipton a binding offer letter, dated September 12, 2021, and final forms of merger agreement and other transaction documents (collectively, the "final CPRL proposal"). The binding offer letter indicated that the final CPRL proposal could be accepted at any time prior to 5:00 p.m. Eastern Time on September 20, 2021, assuming that the KCS board determined that the final CPRL proposal constituted a company superior proposal and KCS delivered to CN, no later than 11:59 p.m. Eastern Time on September 12, 2021, notice of KCS's intention to terminate the CN agreement and enter into a merger agreement with CPRL.

On the morning of September 12, 2021, the KCS board met, together with members of senior management and representatives of Morgan Stanley, BofA Securities and KCS's legal advisors, to discuss the final CPRL proposal. The KCS board reviewed the terms of the final CPRL proposal relative to the terms of the CN agreement and discussed potential next steps and the requirements of the CN agreement with respect to any further engagement with CPRL, including the obligation of KCS to provide CN the opportunity for at least five business days to attempt to match the terms of the final CPRL proposal in the event the KCS board determined that the final CPRL proposal constituted a company superior proposal. Representatives of Morgan Stanley and BofA Securities also provided to the KCS board their respective financial analyses. The representatives stated that they had each reviewed the terms of the final CPRL proposal with their respective fairness committees and that, absent any material developments following the conclusion of the meeting, the financial advisors stood ready to deliver customary fairness opinions with respect to the final CPRL proposal at such time as the KCS board were to consider terminating the CN agreement and accept the final CPRL proposal.

Following these presentations and discussions, the KCS board determined that the final CPRL proposal constituted a company superior proposal and directed management to notify CN of the KCS board's intention to terminate the CN agreement and to enter into a definitive agreement with respect to the final CPRL proposal unless, at the end of the five business day period following the notice, the KCS board determined that the final CPRL proposal no longer constituted a company superior proposal. After the end of the meeting, members of KCS management communicated the KCS board's determination to representatives of CN and CPRL and KCS issued a press release announcing the KCS board's determination.

On September 13, 2021, members of KCS and CN management and representatives of their respective legal advisors began discussing the possibility of entering into a waiver letter agreement pursuant to which CN would agree to waive the five business day match period under the CN agreement. Representatives of CN reiterated the position that CN was unwilling to offer any additional merger consideration or increase the amount of the reverse termination fee contemplated by CN's proposed transaction with KCS. On September 14, 2021, representatives of CN communicated to KCS that CN was prepared to enter into the waiver letter agreement. Shortly thereafter, representatives of KCS notified CPRL of CN's intention to waive the five business day match period under the CN agreement and that, as such, the KCS board would convene a meeting the next morning to make a final determination as to whether or not to terminate the CN agreement and accept the final CPRL proposal.

On the morning of September 15, 2021, the KCS board held a meeting. A representative of Wachtell Lipton discussed with the board its fiduciary duties under Delaware law. Thereafter, representatives of each of the financial advisors presented to the KCS board their respective financial analyses and each financial advisor rendered to the KCS board its oral opinion, which was confirmed by delivery of its written opinion dated September 15, 2021, to the effect that, as of such date and based upon and subject to the assumptions made, procedures followed, matters considered and qualifications and limitations on the scope of the review undertaken by such financial advisor, as set forth in such financial advisor's written opinion, the consideration to be received by holders of KCS common stock (other than certain excluded shares as described in the merger agreement) in the transaction with CPRL was fair, from a financial point of view, to such holders. The full text of the written opinion of each of Morgan Stanley and BofA Securities is attached to this proxy statement as Annexes B and C, respectively, and is incorporated by reference in this proxy statement in its entirety. See also the sections entitled

"*The KCS Merger Proposal—Opinion of Morgan Stanley*" and "*The KCS Merger Proposal—Opinion of BofA Securities*" on pages 71 and 84, respectively. After further discussion and deliberation, the KCS board unanimously determined that the final CPRL proposal continued to constitute a company superior proposal and approved the proposed waiver letter agreement with CN, termination of the CN merger agreement, KCS's payment of the $700.0 million CN agreement termination payment and the $700.0 million CN refund owed to CN (or its affiliates) under the terms of the CN agreement, and KCS's entry into the merger agreement with CPRL. The KCS board also approved the updated retention and severance arrangements set forth in the final CPRL proposal.

Following the completion of the KCS board meeting, KCS management notified CN of the KCS board's determination, after which KCS and CN entered into the waiver letter agreement and KCS terminated the CN agreement and paid the $700.0 million CN agreement termination payment. Shortly thereafter, KCS delivered an executed signature page to the merger agreement with CPRL, which had already been executed by CPRL, and KCS and CPRL issued a joint press release announcing the transaction. Following execution of the merger agreement, CPRL remitted to KCS $700.0 million in connection with the payment of the CN agreement termination payment made by KCS to CN, KCS paid the $700.0 million CN refund to an affiliate of CN, and CPRL remitted to KCS $700.0 million in connection with the payment of the CN refund made by KCS to an affiliate of CN.

Recommendation of the KCS Board; KCS's Reasons for the Transaction

At a special meeting held on September 15, 2021, the KCS board unanimously: (1) determined that it was in the best interests of KCS and its stockholders, and declared it advisable, to enter into the merger agreement with CPRL; (2) approved the execution, delivery and performance of the merger agreement and the transactions contemplated by the merger agreement (including the merger); (3) recommended that the stockholders of KCS adopt the merger agreement; and (4) directed that the merger agreement be submitted to a vote at a meeting of KCS's stockholders. **The KCS board unanimously recommends that KCS stockholders vote "FOR" the merger proposal.**

In evaluating the transaction and in reaching its determinations and making its recommendations with respect to the merger agreement, the KCS board consulted with KCS senior management and outside legal and financial advisors over the course of several meetings, and considered a number of factors, including the following material factors that weighed in favor of the transaction.

Strategic Considerations and Synergies:

- The KCS board believes the transaction will create the first rail network connecting the U.S., Mexico and Canada, with the ability to deliver dramatically expanded market reach for KCS and CPRL customers, provide new competitive transportation options, provide infrastructure, public safety and environmental benefits through truck to rail conversion opportunities, and support North American economic growth;
- The KCS board believes CPRL and KCS are the fastest growing Class I railroads, with significant success in the transformation to Precision Scheduled Railroading;
- The KCS board considered a synergy analysis (based on CPRL's synergies analysis) showing annualized EBITDA synergies for the combined company of approximately $990 million (plus $20 million of capital expenditure and depreciation and amortization synergies) expected to be realized within the first three years after the transaction, primarily by executing the combined growth strategies of KCS and CPRL with new efficiencies for customers and improved on-time performance under their respective PSR programs; the KCS board also considered a more conservative synergy analysis
  prepared by KCS management showing EBITDA synergies of approximately $377 million (plus

$23 million of capital expenditure and depreciation and amortization synergies) over three years, and assessed both synergy analyses in making its decision, as further described in the section entitled "*KCS Unaudited Prospective Financial Information*";

- The KCS board believes that the combined company will have the scale, balance sheet strength, financial flexibility, and free cash flow to fund future growth, and improved ability to access the capital markets on more favorable terms than available to KCS as an independent company, which would allow the combined company to be more competitive in capturing strategic opportunities;
- The KCS board received information from and had discussions with KCS's management, in consultation with outside financial advisors, regarding CPRL's business, results of operations, financial and market position, KCS management's expectations concerning the combined company's business and financial prospects, and historical and current trading prices of CPRL common shares;

Attractive Value and Mix of Consideration

- The KCS board considered the aggregate value and nature of the consideration to be received in the transaction by KCS stockholders, including:
  - that the merger consideration had an implied value per share of KCS common stock of $300, based on the closing price of CPRL common shares on the NYSE as of August 9, 2021 (the last full trading day prior to the date on which CPRL submitted the revised CPRL proposal), which represented a premium of approximately 34% to KCS stockholders based on the unaffected closing price of KCS common stock on March 19, 2021 (the last trading day before the KCS board's approval of and the announcement of the prior CP merger agreement);
  - that based on CPRL's market price on September 13, 2021, approximately 69% of the merger consideration consists of CPRL common shares, with the CPRL common shares to be issued to KCS common stockholders constituting approximately 28% of the outstanding shares of CPRL common shares following the transaction, offering KCS common stockholders the opportunity for meaningful ownership participation in the future earnings, dividends, synergies and growth of the combined company, a company which the KCS board considers to be an attractive investment for the reasons discussed above in the section entitled "*Strategic Considerations and Synergies*";
  - that based on CPRL's market price on September 13, 2021, approximately 31% of the merger consideration consists of cash, which provides KCS stockholders with immediate liquidity for a portion of their shares; and
  - that the first merger and the second merger, taken together, are intended to qualify as a "reorganization" within the meaning of Section 368(a) of the Code and that Section 367(a)(1) of the Code will not apply to cause the mergers to result in gain recognition by holders of KCS common stock that exchange their shares of KCS common stock for the merger consideration (other than any Excepted Shareholder), as more fully described in the section entitled "*Material U.S. Federal Income Tax Consequences*";

Attractive Strategic Alternative:

- The KCS board believes that the transaction with CPRL is attractive in comparison to the alternative of remaining independent and continuing to execute on KCS's long-range business strategy and is also attractive in comparison to other alternatives, including the CN agreement. In this regard, the KCS board considered:
  - the course and history of KCS's discussions and competitive negotiations with Party A and CN, including: (i) the fact that, after six rounds of bidding, Party A's last proposal to acquire KCS for

$250.00 per share in cash was significantly lower in value than both CN's and CPRL's proposals and did not offer the opportunity for ongoing participation in the combined company's future performance; and (ii) the fact that CN determined that it was unwilling to increase the consideration or otherwise enhance the transaction terms offered in its proposal to acquire KCS following the announcement by the STB of its unanimous decision to reject CN's proposed voting trust;

- the fact that the STB had already approved the CPRL voting trust, and that the merger agreement, including the form of voting trust, was substantially identical to the prior CP merger agreement but for the increase in the share consideration of the merger consideration;
- the confidence of CPRL in its ability to obtain approval for the full combination of CPRL and KCS as demonstrated by its willingness to close into a voting trust, as more fully described below under "*Terms of the Merger Agreement*";
- the fact that, in the six months following public announcement of the prior CP merger agreement, no party other than CN had submitted a competing proposal, and the fact that the merger agreement, like the CN agreement, would permit KCS to terminate the merger agreement to accept a superior proposal, subject to certain conditions, were an unsolicited proposal to be made after announcement of the transaction, as more fully described below under "*Terms of the Merger Agreement*";

Opinions of KCS's Financial Advisors

- The KCS board considered the financial presentations by KCS's financial advisors and the oral opinion of each such financial advisor rendered to the KCS board, which was confirmed by delivery of a written opinion dated September 15, 2021, to the effect that, as of such date and based upon and subject to the assumptions made, the procedures followed, matters considered and qualifications and limitations on the scope of the review undertaken by such financial advisor, as set forth in such financial advisor's written opinion, the consideration to be received by the holders of KCS common stock (other than certain excluded shares as described in the merger agreement) in the transaction was fair, from a financial point of view, to such holders. The full text of the written opinion of each of Morgan Stanley and BofA Securities is attached to this proxy statement as Annexes B and C, respectively, and is incorporated by reference in this proxy statement in its entirety. See also the sections entitled "The KCS Merger Proposal—Opinion of Morgan Stanley" and "The KCS Merger Proposal—Opinion of BofA Securities" on pages 71 and 84, respectively;

Timing and Likelihood of Completion of the Transaction

- The KCS board considered the willingness of CPRL to close into a voting trust, allowing KCS stockholders to receive the merger consideration immediately following the completion of the voting trust transaction, which is currently expected to be completed in the first quarter of 2022, rather than waiting for CPRL to obtain STB final approval from the STB before KCS stockholders would receive the merger consideration;
- The KCS board considered the limited closing conditions to the completion of the transaction, the absence of a financing condition or similar contingency that is based on CPRL's ability to obtain financing and the strong commitment made by CPRL to obtain regulatory approvals, as further described in the section entitled "*The KCS Merger Proposal—Regulatory Approvals Required for the Transaction*" on page 109 and "*The Merger Agreement—Regulatory Filings and Efforts; Other Actions*" on page 159;

Terms of the Merger Agreement

- The KCS board considered the ability of KCS, subject to specified limitations, to respond to and

engage in discussions regarding unsolicited third-party acquisition proposals under certain circumstances and, ultimately, to terminate the merger agreement in order to enter into a definitive agreement providing for a superior proposal to the merger with CPRL, subject to compliance with the procedural terms and conditions set forth in the merger agreement and the payment of the $700.0 million CP termination payment to CPRL and the $700.0 million CN termination amount refund, as further discussed in the section entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*" on page 163;

- The KCS board considered the terms of the merger agreement that restrict CPRL's ability to solicit alternative business combination transactions and to provide information to, or engage in discussions with, a third party interested in pursuing an alternative business combination transaction with CPRL, as further discussed in the section entitled "*The Merger Agreement—No-Solicitation*";
- The KCS board considered the obligation of CPRL to pay to KCS a termination payment of $1.0 billion upon termination of the merger agreement under specified circumstances, including if (i) the transaction has not been consummated by February 21, 2022 (or, in the event the authorizations required to be obtained from COFECE and the IFT with respect to the transactions contemplated by the merger agreement are the only outstanding conditions to be satisfied or waived as of February 21, 2022, by May 21, 2022) because there is an injunction or similar order prohibiting the transaction or the voting trust transaction arising out of the STB review process or under Section 721 or (ii) such an injunction or order has become final and non-appealable, in each case, as further discussed in the section entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*" on page 163;

Governance Matters

- The KCS board considered the fact that, following STB final approval (or at such earlier date following the closing of the transaction as may be approved by the STB), four KCS directors will be appointed to the CPRL board, which will allow for oversight of and input into the strategy of the combined company;

The KCS board weighed these factors that it viewed as supporting the merger agreement and the transaction against a number of potentially negative factors, including:

- the fact that completion of the transaction depends on certain factors outside of KCS's control, including regulatory approvals and CPRL shareholder approval, and that there can be no assurance that the conditions to the transaction will be satisfied even if the merger proposal is approved by KCS stockholders;
- the potential consequences of non-consummation of the transaction, including the potential negative impacts on KCS, its business and the trading price of its shares of common stock;
- CPRL's unwillingness to agree to adjustments in the fixed exchange ratio to protect against any decrease in the trading price of CPRL common shares prior to the consummation of the transaction;
- the terms of the merger agreement that restrict KCS's ability to solicit alternative acquisition proposals and to provide information to, or engage in discussions with, a third party interested in pursuing an alternative acquisition proposal, as further discussed in the section entitled "*The Merger Agreement—No Solicitation*" on page 150, though the KCS board also considered that such terms do not prevent such discussions if certain criteria are met;
- the obligation of KCS to pay to CPRL the CP termination payment of $700.0 million upon termination of the merger agreement and to pay to CPRL the $700.0 million CN termination amount refund in the event KCS accepts a superior proposal, though the KCS board determined that the obligation was reasonable and not preclusive or coercive;

- the potential for diversion of management and employee attention, and potential retention challenges, due to the possible effects of the announcement and pendency of the transaction, though the KCS board also considered and approved a retention program and severance arrangements in connection with the transaction, as discussed in the sections entitled "*Interests of KCS's Directors and Executive Officers in the Transaction—Executive Severance Arrangements*" on page 102 and "*Interests of KCS's Directors and Executive Officers in the Transaction—Retention Program*" on page 104;
- the difficulty and costs inherent in integrating large and diverse businesses;
- the fact that forecasts of future results of operations and synergies are necessarily estimates based on assumptions, and that for these and other reasons there is a risk of not realizing anticipated performance or capturing potential synergies and other benefits expected to be obtained as a result of the transaction; and
- the risks and other considerations of the type and nature described under the sections entitled "*Risk Factors*" on page 21 and "*Cautionary Statement Regarding Forward-Looking Statements*" on page 36.

The KCS board considered the factors described above as a whole, including through engaging in discussions with KCS senior management and KCS's outside legal and financial advisors. Based on this review and consideration, the KCS board unanimously concluded that these factors, on balance, supported a determination that the merger agreement and the transactions contemplated by the merger agreement, including the transaction, were advisable and in the best interests of KCS stockholders, and to make its recommendation to KCS stockholders that they vote to adopt the merger agreement.

In addition, the KCS board was aware of and considered the fact that KCS's directors and executive officers may have certain interests in the transaction that are different from, or in addition to, the interests of KCS stockholders generally, including the treatment of equity awards held by such directors and executive officers in the transaction, as described in the section entitled "*Interests of KCS's Directors and Executive Officers in the Transaction*" on page 101.

The foregoing discussion describes the material factors that the KCS board considered, but is not, and is not intended to be, exhaustive. The KCS board collectively reached the conclusion to approve the merger agreement and the consummation of the transactions contemplated by the merger agreement, including the merger, in light of the various factors described above and other factors that the members of the KCS board believed appropriate. In view of the complexity and wide variety of factors, both positive and negative, that the KCS board considered in connection with its evaluation of the transaction, the KCS board did not find it useful to, and did not attempt to, quantify, rank or otherwise assign relative or specific weights or values to any of the factors it considered in reaching its decision. In considering the factors discussed above, individual directors may have given different weights to different factors.

The foregoing discussion of the information and factors considered by the KCS board in approving the merger agreement is forward-looking in nature. This information should be read in light of the factors discussed in the section entitled "*Cautionary Statement Regarding Forward-Looking Statements*" on page 36.

Board of Directors and Management of CPRL after the Transaction

Board of Directors

All current members of the CPRL board will continue to serve as directors of the combined company. Under the merger agreement, CPRL has agreed to appoint four of the members of the KCS board to serve as directors on the CPRL board as of the control date, in each case until such director's successor is elected and qualified or the earlier of such director's death, resignation or removal, in each case in accordance with CPRL's constating documents. In the event that after the effective time any of such four directors indicates that he or she plans to resign as a director of KCS and is willing to become a director of CPRL, CPRL will be required to seek the approval of the STB in order for such director to be appointed prior to the control date.

Management

Following the effective time, the management and board of directors of KCS will continue to manage the second surviving corporation while its outstanding shares of capital stock are held in the voting trust, pursuing its independent business plan and growth strategies. Following receipt of STB final approval, CPRL (through its indirect wholly owned subsidiary, merger holdco) will acquire control of KCS, the two companies will be combined and Mr. Keith Creel, the current President and Chief Executive Officer of CPRL, will serve as Chief Executive Officer of the combined company as of the control date. The other members of the executive management team of CPRL following the control date have not yet been determined, and will be communicated in due course.

Information about the current directors and senior management of CPRL and KCS can be found in the documents listed under the section entitled "*Where You Can Find Additional Information*" on page 229.

CPRL's Reasons for the Transaction

At its meeting held on September 11, 2021, after due consideration and extensive consultation with CPRL's management and outside legal and financial advisors to both CPRL and the CPRL board, the CPRL board unanimously approved the merger agreement and the transactions contemplated by the merger agreement and authorized the issuance of CPRL common shares under the merger agreement. In doing so, the CPRL board considered the business, assets and liabilities, results of operations, financial performance, strategic direction and prospects of CPRL and KCS, with a view to the best interests of CPRL. In making its determination, the CPRL board considered a number of factors (which are not necessarily presented in order of relative importance) with a view to the best interests of CPRL, including the following:

- the creation, as a result of the transaction, of the first rail network connecting the U.S., Mexico and Canada and the expected ability to deliver significantly expanded market reach for customers served by CPRL and KCS and provide new competitive transportation service options, including new single-line hauls across the combined company's continent-wide network, while improving route efficiency and reducing transit times; the expected benefits to CPRL's business, assets, financial condition, results of operations, business plan and prospects after CPRL's combination with KCS following receipt of STB final approval, including the expected pro forma effect of the transaction on the combined company;
- the expectation that, after CPRL's combination with KCS following receipt of STB final approval, a single integrated rail system will connect premier ports on the U.S. Gulf, Atlantic and Pacific coasts with key overseas markets, and that CPRL and KCS's combined network will result in increased efficiency and simplicity for the combined company's customers, including grain, automotive, auto-parts, energy, intermodal and other shippers;
- the belief that CPRL's and KCS's cultures are aligned and rooted in the highest safety, service and performance standards and that CPRL and KCS are both committed to improving sustainability and have made science-based pledges in-line with the Paris Agreement to improve fuel efficiency and lower emissions in support of a more sustainable North American supply chain;
- the expectation that the combination will create a more competitive network, while remaining the smallest of six U.S. Class 1 railroads by revenue, and spur greater rail-to-rail competition and greater support for customers in growing their rail volumes;
- CPRL management's identification of approximately $1,000 million in annualized synergies (comprised of cost savings of $180 million and $820 million in EBITDA growth from market opportunities) expected to be realized within the first three years after receipt of STB final approval and the expectation that CPRL's combination with KCS following receipt of STB final approval would be accretive to CPRL's adjusted diluted earnings per share;
- the CPRL board's knowledge of, and CPRL's discussions with KCS management regarding, KCS's business operations, financial condition, earnings and prospects and its knowledge of CPRL's business,

operations, financial condition, earnings and prospects, taking into account KCS's publicly filed information and the results of CPRL's due diligence investigation of KCS;

- the expectation the combined company will benefit from the continued strong leadership of CPRL's experienced President and Chief Executive Officer and the addition of KCS's seasoned management team will bring valuable expertise and talent to the operations of the combined company;
- the exchange ratio is fixed and will not be adjusted for fluctuations in the market price of CPRL common shares or shares of KCS common stock between the date of the merger agreement and the closing of the transaction;
- the aggregate cash consideration is fixed, which gives CPRL additional certainty regarding the amount of cash required to be paid by CPRL to consummate the transaction;
- the belief, after a thorough review of other business combination and strategic opportunities reasonably available to CPRL, that the transaction represents the most attractive opportunity for CPRL and that its review did not present a better alternative;
- the ability of CPRL, in specified circumstances, to provide information to and to engage in discussions or negotiations with a third party that makes an unsolicited acquisition proposal, as further described in the section entitled "*The Merger Agreement – No Solicitation*," on page 150;
- the ability of the CPRL board, in specified circumstances, to change its recommendation to CPRL shareholders concerning the transaction, as further described in the section entitled "*The Merger Agreement—Change of Recommendation*," on page 152;
- other favorable terms of the merger agreement, including:
  - restrictions on KCS's ability to solicit alternative business combination transactions and to provide confidential due diligence information to, or engage in discussions with, a third party interested in pursuing an alternative business combination transaction with KCS, as further discussed in the section entitled "*The Merger Agreement—No Solicitation*" on page 150;
  - the obligation of KCS to pay CPRL a termination payment of $700.0 million upon termination of the merger agreement under specified circumstances and/or the CN termination amount refund of $700.0 million under specified circumstances; and
  - the requirement that KCS hold a stockholder vote on the adoption of the merger agreement, even though the KCS board may have withdrawn or changed its recommendation; and
- the probability that the conditions to the transaction will be satisfied.

In connection with its deliberations relating to the transaction, the CPRL board also considered potential risks and negative factors concerning the transactions contemplated by the merger agreement (which are not necessarily presented in order of relative importance), including the following:

- the risk that the KCS stockholders may not approve the KCS merger proposal or that CPRL shareholders may not approve the issuance of CPRL common shares to KCS common stockholders in connection with the transaction and the risk that the transaction might not be completed in a timely manner or at all, despite CPRL's efforts;
- the effect that the length of time from announcement until closing could have on the market price of CPRL common shares, CPRL's operating results (particularly in light of the significant costs incurred in connection with the transaction) and the relationships with CPRL's employees, CPRL shareholders, customers, suppliers, regulators, partners and others that do business with CPRL;
- the risk that the anticipated benefits of the transaction will not be realized in full or in part, including the risk that expected synergies will not be achieved or will not be achieved in the expected time frame;

- the risk that regulatory authorities may not approve the transaction or may impose burdensome terms or conditions, giving rise to increased pre-tax transaction costs, and the risk that divestitures or other accommodations required by antitrust regulatory authorities may decrease or eliminate the anticipated strategic and other benefits of the transaction to CPRL;
- the risk of diverting the attention of CPRL's senior management from other strategic priorities to implement the transaction and make arrangements for integration of CPRL's and KCS's operations and infrastructure following receipt of STB final approval;
- certain restrictions on the conduct of CPRL's business during the pendency of the transaction, including restrictions on CPRL's ability to solicit alternative business combination transactions, although the CPRL board believed that such restrictions were reasonable;
- the requirement that CPRL hold a shareholder vote on the issuance of CPRL common shares in connection with the first merger, even though the CPRL board may have withdrawn or changed its recommendation;
- the obligation of CPRL to pay KCS a termination payment of (i) $1.0 billion upon termination of the merger agreement if certain regulatory approvals are not obtained; or (ii) a termination payment of $700.0 million upon termination of the merger agreement under specified circumstances;
- the exchange ratio is fixed and will not be adjusted in the event that the market price of CPRL common shares increases relative to the market price of shares of KCS common stock between the date of the merger agreement and the closing of the transaction;
- the potential impact on the market price of CPRL common shares as a result of the issuance of the share consideration to KCS common stockholders;
- the ownership dilution to pre-merger holders of CPRL common shares as a result of the issuance of CPRL common shares in connection with the transaction;
- the risks associated with the occurrence of events that may materially and adversely affect the financial condition, properties, assets, liabilities, business or results of operations of KCS and/or its subsidiaries but not entitle CPRL to terminate the merger agreement; and
- the risks described in the section entitled "*Risk Factors*," on page 21.

After consideration of these factors, the CPRL board determined that, overall, the potential benefits of the transaction outweighed the potential risks.

The foregoing discussion of factors considered by the CPRL board is not intended to be exhaustive and may not include all the factors considered by the CPRL board. In view of the wide variety of factors considered in connection with its evaluation of the transaction and the complexity of these matters, the CPRL board did not attempt to quantify, rank or otherwise assign any relative or specific weights to the factors that it considered in reaching its determination to approve the merger agreement. In addition, individual members of the CPRL board may have given differing weights to different factors. The CPRL board conducted an overall review of the factors described above and other material factors, including through discussions with, and inquiry of, CPRL's management and outside legal and financial advisors.

The foregoing description of CPRL's consideration of the factors supporting the transaction is forward-looking in nature. This information should be read in light of the factors discussed in the section entitled "*Cautionary Statement Regarding Forward-Looking Statements*," on page 36.

Opinions of KCS's Financial Advisors

Opinion of Morgan Stanley

The KCS board retained Morgan Stanley to act as its financial advisor and to provide it with a financial opinion in connection with the transaction. KCS selected Morgan Stanley to act as its financial advisor based on Morgan

Stanley's qualifications, expertise and reputation and its knowledge of the industry, business and affairs of KCS. At the meeting of the KCS board on September 15, 2021, Morgan Stanley rendered its oral opinion, which was confirmed by delivery of a written opinion dated September 15, 2021, to the KCS board to the effect that, as of such date, and based upon and subject to the assumptions made, procedures followed, matters considered and qualifications and limitations on the scope of the review undertaken by Morgan Stanley as set forth in its written opinion, the merger consideration to be received by the holders of shares of KCS common stock (other than excluded shares) pursuant to the merger agreement was fair from a financial point of view to such holders of KCS common stock.

The full text of Morgan Stanley's written opinion to the KCS board, dated September 15, 2021, which sets forth, among other things, the assumptions made, procedures followed, matters considered and qualifications and limitations on the scope of the review undertaken by Morgan Stanley in rendering its opinion, is attached to this proxy statement/prospectus as Annex B and is incorporated by reference herein in its entirety. The foregoing summary of Morgan Stanley's opinion is qualified in its entirety by reference to the full text of the opinion. You are encouraged to read Morgan Stanley's opinion and the summary of Morgan Stanley's opinion below carefully and in their entirety. Morgan Stanley's opinion was for the benefit of the KCS board, in its capacity as such, and addressed only the fairness from a financial point of view of the merger consideration to be received by the holders of shares of KCS common stock (other than excluded shares) pursuant to the merger agreement as of the date of the opinion and did not address any other aspects or implications of the transaction. Morgan Stanley's opinion was not intended to, and does not, constitute advice or a recommendation as to how the shareholders of KCS or CPRL should vote at the shareholder meetings to be held in connection with the transaction.

In connection with rendering its opinion, Morgan Stanley, among other things:

(a) reviewed certain publicly available financial statements and other business and financial information of KCS and CPRL, respectively;
(b) reviewed certain internal financial statements and other financial and operating data concerning KCS and CPRL, respectively;
(c) reviewed the KCS management unaudited KCS projections, the KCS management assumed synergies and the KCS management unaudited CPRL projections (each as defined and described in the below section entitled "KCS Unaudited Prospective Financial Information"), in each case prepared by the management of KCS;
(d) reviewed information relating to certain strategic, financial and operational benefits anticipated from the transaction, prepared by the managements of KCS and CPRL, respectively;
(e) discussed the past and current operations and financial condition and the prospects of KCS, including information relating to certain strategic, financial and operational benefits anticipated from the transaction, with senior executives of KCS;
(f) discussed the past and current operations and financial condition and the prospects of CPRL, including information relating to certain strategic, financial and operational benefits anticipated from the transaction, with senior executives of CPRL;
(g) reviewed the reported prices and trading activity for KCS common stock and CPRL common shares;
(h) compared the financial performance of KCS and CPRL and the prices and trading activity of KCS common stock and CPRL common shares with that of certain other publicly-traded companies comparable with KCS and CPRL, respectively, and their securities;
(i) reviewed the financial terms, to the extent publicly available, of certain comparable acquisition transactions;
(j) participated in certain discussions and negotiations among representatives of KCS and CPRL and certain parties and their financial and legal advisors;

(k) reviewed a draft of the merger agreement dated September 10, 2021 (the "draft agreement"), the debt commitment letters, the STB May 6 decision, the form of the voting trust agreement, and certain related documents; and

(l) performed such other analyses, reviewed such other information and considered such other factors as Morgan Stanley deemed appropriate.

In arriving at its opinion, Morgan Stanley assumed and relied upon, without independent verification, the accuracy and completeness of the information that was publicly available or supplied or otherwise made available to Morgan Stanley by KCS and CPRL, respectively, and formed a substantial basis for its opinion. With respect to the KCS management unaudited KCS projections and the KCS management assumed synergies, Morgan Stanley assumed that they were reasonably prepared on bases reflecting the best currently available estimates and judgments of the management of KCS of the future financial performance of KCS. With respect to the KCS management unaudited CPRL projections, Morgan Stanley assumed that they were reasonably prepared on bases reflecting the best currently available estimates and judgments of the management of KCS of the future financial performance of CPRL, including following consummation of the transaction. In addition, Morgan Stanley assumed that the transaction will be consummated in accordance with the terms set forth in the merger agreement without any waiver, amendment or delay of any terms or conditions, including, among other things, (i) that the transaction will be treated as a tax-free reorganization pursuant to the Code, (ii) that CPRL will obtain financing in accordance with the terms set forth in the debt commitment letters, (iii) that the STB will permit the transaction to close into the voting trust in accordance with the terms of the STB May 6 decision and the voting trust agreement and (iv) that the definitive merger agreement would not differ in any material respect from the draft agreement. Morgan Stanley assumed that in connection with the receipt of all the necessary governmental, regulatory or other approvals and consents required for the transaction, no delays, limitations, conditions or restrictions will be imposed that would have a material adverse effect on the contemplated benefits expected to be derived in the transaction. Morgan Stanley relied upon, without independent verification, the assessment by the managements of KCS and CPRL of: (i) the strategic, financial and other benefits expected to result from the transaction; (ii) the timing and risks associated with the integration of KCS and CPRL; (iii) their ability to retain key employees of KCS and CPRL, respectively, and (iv) the validity of, and risks associated with, KCS and CPRL's existing and future technologies, intellectual property, products, services and business models. Morgan Stanley is not a legal, tax or regulatory advisor. Morgan Stanley is a financial advisor only and relied upon, without independent verification, the assessment of CPRL and KCS and their legal, tax or regulatory advisors with respect to legal, tax or regulatory matters. Morgan Stanley expressed no opinion with respect to the fairness of the amount or nature of the compensation to any of KCS's officers, directors or employees, or any class of such persons, relative to the merger consideration to be received by the holders of shares of KCS common stock in the transaction. Morgan Stanley's opinion does not address the relative merits of the transactions contemplated by the merger agreement as compared to other business or financial strategies that might be available to KCS, nor does it address the underlying business decision of KCS to enter into the merger agreement or proceed with any other transaction contemplated by the merger agreement. Morgan Stanley expressed no opinion with respect to the treatment of the KCS preferred stock, in the transaction. Morgan Stanley did not make any independent valuation or appraisal of the assets or liabilities of KCS or CPRL, nor was it furnished with any such valuations or appraisals. Morgan Stanley's opinion was necessarily based on financial, economic, market and other conditions as in effect on, and the information made available to Morgan Stanley as of, the date of its opinion. Events occurring after such date may affect Morgan Stanley's opinion and the assumptions used in preparing it, and Morgan Stanley did not assume any obligation to update, revise or reaffirm its opinion.

The following is a summary of the material financial analyses performed by Morgan Stanley in connection with the preparation of its opinion to the KCS board. The following summary is not a complete description of Morgan Stanley's opinion or the financial analyses performed and factors considered by Morgan Stanley in connection with its opinion, nor does the order of analyses described represent the relative importance or weight given to those analyses. The financial analyses summarized below include information presented in tabular format. In order to fully understand the financial analyses used by Morgan Stanley, the tables must be read together with the

text of each summary. The tables alone do not constitute a complete description of the financial analyses. The analyses listed in the tables and described below must be considered as a whole; considering any portion of such analyses and of the factors considered, without considering all analyses and factors, could create a misleading or incomplete view of the process underlying Morgan Stanley's opinion. Morgan Stanley considered a number of factors in analyzing the merger consideration. The fact that points in the ranges of implied equity value per share of KCS common stock derived below were less than or greater than the merger consideration is not necessarily dispositive in connection with Morgan Stanley's analysis of the merger consideration, but is one of many factors Morgan Stanley considered. Except as otherwise noted, the following quantitative information, to the extent that it is based on market data, is based on market data as it existed on or before September 13, 2021 and is not necessarily indicative of current market conditions.

In performing the financial analyses summarized below and in arriving at its opinion, Morgan Stanley, at the direction of the KCS board, used and relied upon the KCS management unaudited KCS projections, the KCS management assumed synergies and the KCS management unaudited CPRL projections. For more information, please see the section of this proxy statement captioned "*The KCS Merger Proposal – KCS Unaudited Prospective Financial Information*" on page 96.

Analyses Related to KCS

Discounted Cash Flow Analysis

Morgan Stanley performed a discounted cash flow analysis, which is designed to provide an implied value of a company by calculating the present value of the estimated future unlevered free cash flows and terminal value of such company. Morgan Stanley calculated a range of implied equity values per share of KCS common stock as of June 30, 2021, based on estimates of future unlevered free cash flows for the six months ending December 31, 2021 and fiscal years 2022 through 2029 contained in the KCS management unaudited KCS projections, including net debt of KCS as of June 30, 2021 of $3,787 million. Morgan Stanley also calculated a range of terminal values for KCS based on next twelve months ("NTM") EBITDA exit multiple range of 10.75x to 12.25x, which was selected based on Morgan Stanley's professional judgment and experience. The estimated unlevered free cash flows and the range of terminal values were then discounted to June 30, 2021 by applying a discount rate range of 6.1% to 7.3%, which was selected based on Morgan Stanley's professional judgment and experience, to reflect KCS's estimated weighted average cost of capital. Morgan Stanley used a discount rate range of 6.1% to 7.3% to reflect KCS's estimated weighted average cost of capital, which was calculated by multiplying the cost of each capital source (debt and equity) by its relevant weight, and then adding the products together to determine the value. Cost of equity was calculated using the Capital Asset Pricing Model ("CAPM"). The CAPM takes into account market risk premium, risk-free rate and beta of the underlying stock. Morgan Stanley used an EBITDA exit multiple range of 10.75x to 12.25x based on KCS's and comparable companies' EBITDA multiples over time.

This analysis indicated a range of implied equity values per share of KCS common stock of $226.00 to $280.00, in each case rounded to the nearest $1.00.

Morgan Stanley compared the foregoing range of implied equity values per share of KCS common stock to the closing trading price of KCS common stock as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $224.16 and the implied value of the merger consideration to be received by holders of shares of KCS common stock in the transaction as of September 13, 2021 of $288.00, rounded to the nearest $1.00.

Comparable Public Company Analysis

Morgan Stanley performed a comparable public company analysis, which attempts to provide an implied value of a company by comparing it to similar companies that are publicly traded. Morgan Stanley reviewed and

compared certain financial information of KCS with corresponding publicly available financial information for other Class 1 Rail companies that shared certain similar characteristics to KCS to derive an implied valuation range for KCS. The companies used in this comparison were the following:

- CPRL
- CN
- Union Pacific Corporation
- Norfolk Southern Corporation
- CSX Corporation

The above companies were chosen based on Morgan Stanley's knowledge of the industry and because they have businesses that may be considered similar to KCS's. Although none of such companies are identical or directly comparable to KCS, these companies are publicly traded companies with operations and/or other criteria, such as lines of business, markets, business risks, growth prospects, maturity of business and size and scale of business, that for purposes of its analysis Morgan Stanley considered similar to KCS.

For purposes of this analysis, Morgan Stanley analyzed the following statistics of each of these companies, based on public filings, publicly available research estimates and publicly available financial information published by Capital IQ as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) for KCS and CPRL, as of April 19, 2021 (which was the last trading day prior to the announcement of the CN proposal) for CN and as of September 13, 2021 for Union Pacific Corporation, Norfolk Southern Corporation and CSX Corporation:

- the ratio of aggregate value ("AV"), calculated as the market value of equity plus short-term debt, long-term debt, preferred equity and non-controlling interests, net of cash, cash equivalents and investments to estimated fiscal year 2022 EBITDA (which is referred to below as the "2022E AV/EBITDA Ratio"); and
- the ratio of stock price to estimated fiscal year 2022 earnings per share (which is referred to below as the "2022E P/E Ratio").

The results of Morgan Stanley's analysis were presented for the comparable companies, as indicated in the following table:

	2022E AV/EBITDA Ratio	2022E P/E Ratio
KCS	13.4x	21.4x
CPRL	14.6x	21.1x
CN	14.2x	22.5x
Union Pacific Corporation	12.9x	18.3x
Norfolk Southern Corporation	12.4x	18.4x
CSX Corporation	11.8x	18.1x
Mean	**13.2x**	**20.0x**
Median	**13.2x**	**19.8x**

Based on its analysis of the relevant metrics for each of the comparable companies and upon the application of its professional judgment and experience, Morgan Stanley selected representative ranges of 2022E AV/EBITDA Ratio and 2022E P/E Ratio and applied these ranges to KCS's estimated fiscal year 2022 EBITDA of $1,839 million based on consensus analyst estimates and of $1,827 million based on the KCS management unaudited KCS projections, and to KCS's estimated fiscal year 2021 earnings per share of $10.50 based on consensus analyst estimates and of $10.75 based on the KCS management unaudited KCS projections. For purposes of this analysis, Morgan Stanley utilized the KCS management unaudited KCS projections and

consensus analyst estimates. Morgan Stanley then calculated a range of implied equity values per share of KCS common stock as follows, in each case rounded to the nearest $1.00:

	Selected Representative Range	Implied Equity Value Per Share of KCS Common Stock
2022E AV/EBITDA Ratio (KCS management unaudited KCS projections)	12.0x – 14.5x	$ 199.00-$248.00
2022E P/E Ratio (KCS management unaudited KCS projections)	18.5x – 22.5x	$ 199.00-$242.00
2022E AV/EBITDA Ratio (Consensus)	12.0x – 14.5x	$ 200.00-$250.00
2022E P/E Ratio (Consensus)	18.5x – 22.5x	$ 194.00-$236.00

Morgan Stanley compared the foregoing ranges of implied equity values per share of KCS common stock to the closing trading price of KCS common stock as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $224.16 per share and the implied value of the merger consideration to be received by holders of shares of KCS common stock in the transaction as of September 13, 2021 of $288.00 per share, rounded to the nearest $1.00.

No company included in the comparable public company analysis is identical to KCS. In evaluating comparable companies, Morgan Stanley made judgments and assumptions with regard to industry performance, general business, economic, market and financial conditions and other matters, which are beyond the control of KCS. These include, among other things, the impact of competition on the business of KCS and the industry generally, industry growth, and the absence of any adverse material change in the financial condition and prospects of KCS and the industry, and in the financial markets in general. Mathematical analysis is not in itself a meaningful method of using comparable company data.

Morgan Stanley used a 12.0x to 14.5x representative range for 2022E AV/EBITDA Ratio for both KCS and CPRL. This range was based on market data multiples for KCS, CPRL and the four other public Class I railroads (CN, Union Pacific Corporation, CSX Corporation and Norfolk Southern Corporation). The KCS and CPRL market data were as of March 19, 2021 (the unaffected date for KCS's share price), the CN market data was as of April 19, 2021 (the unaffected date for CN's share price), and the Union Pacific Corporation, CSX Corporation and Norfolk Southern Corporation market data were as of September 13, 2021.

Summary Statistics for 2022E AV / EBITDA Ratio	
Minimum	11.8x
Median	13.2x
Mean	13.2x
Maximum	14.6x

Morgan Stanley used a 18.5x to 22.5x representative range for 2022E P/E Ratio for both KCS and CPRL. This range was based on market data multiples for KCS, CPRL and the four other public Class I railroads (CN, Union Pacific Corporation, CSX Corporation and Norfolk Southern Corporation). The KCS and CPRL market data were as of March 19, 2021 (the unaffected date for KCS's share price), the CN market data was as of April 19, 2021 (the unaffected date for CN's share price), and the Union Pacific Corporation, CSX Corporation and Norfolk Southern Corporation market data were as of September 13, 2021.

Summary Statistics for 2022E P / E Ratio	
Minimum	18.1x
Median	19.8x
Mean	20.0x
Maximum	22.5x

Precedent Transactions and Premia Paid Analysis

Morgan Stanley performed a precedent transactions analysis, which attempts to imply a value of a company based on publicly available financial terms and premia of selected transactions. Morgan Stanley reviewed the publicly available financial information for certain transactions in the railroad industry since June 1994.

For purposes of this analysis, based on publicly available financial information, Morgan Stanley analyzed the ratio of the implied AV to last twelve months EBITDA, referred to as the AV/LTM EBITDA Ratio, for each of the target companies in the selected transactions. The transactions reviewed, the date that each transaction was announced and the corresponding AV/LTM EBITDA Ratios were as follows:

Date Announced	Acquiror	Target	AV/LTM EBITDA Ratio	Transaction Value (in millions)
July 2019	Brookfield Infrastructure Partners L.P. / GIC Pte. Ltd.	Genesee & Wyoming Inc.	13.4x	$8,432
March 2017	GMexico Transportes S.A. de C.V.	Florida East Coast Railway Holdings Corp.	13.6x	$2,100
October 2016	Genesee & Wyoming Australia Pty Ltd.	Glencore Rail (NSW) Pty Limited	11.4x (1)	$866
October 2016	Macquarie Infrastructure and Real Assets	Genesee & Wyoming Australia Pty Ltd. (49%)	11.2x (1)	$1,534
March 2016	Rail Consortium(2)	Pacific National Holdings Pty Ltd.	10.3x	$6,594
February 2015	Genesee & Wyoming Inc.	Freightliner Group Limited (95%)	9.5x	$807
July 2012	Genesee & Wyoming Inc.	RailAmerica, Inc.	10.3x	$2,008
November 2009	Berkshire Hathaway Inc.	Burlington Northern Santa Fe Corp.	8.8x	$43,847
September 2007	Canadian Pacific Railway Limited	Dakota, Minnesota & Eastern Railroad Corporation	15.2x	$1,480
November 2006	Fortress Investment Group LLC	RailAmerica, Inc.	11.7x	$1,055
August 2005	Toll Holding Ltd.	Patrick Corporation	15.0x	$5,284
December 2004	Kansas City Southern	Transportacion Ferroviaria Mexicana, S.A. de C.V. (51%)	6.1x	$1,320
November 2003	Canadian National Railway Company	BC Rail Ltd.	14.4x	$1,204
January 2001	Canadian National Railway Company	Wisconsin Central Ltd.	9.8x	$1,191
February 1998	Canadian National Railway Company	Illinois Central Corp.	11.4x	$2,973
April 1997	CSX Corp. / Norfolk Southern Corporation	Conrail Inc.	12.1x	$12,329
August 1995	Union Pacific Corp.	Southern Pacific Rail Corp.	12.3x	$5,388
March 1995	Union Pacific Corp.	Chicago and North Western Holdings Corporation	8.4x	$2,614
June 1994	Burlington Northern Inc.	Santa Fe Pacific Corporation	7.2x	$5,087
Median			**11.4x**	

(1) G&W Australia transaction multiple was based on NTM projections since LTM were unavailable. All other transactions reflect AV/LTM EBITDA Ratios.

(2) Rail Consortium consists of CPP Investments Limited (33%), Global Infrastructure Partners Inc. (27%), China Investment Corporation (16%), GIC Pte. Ltd. (12%), and British Columbia Investment Management Corporation (12%).

The selected precedent transactions varied significantly based upon company scale, business risks, growth prospects and geography, as well as prevailing market trends. Based on its analysis of the relevant metrics for each of the precedent transactions and upon the application of its professional judgment and experience, Morgan Stanley selected a representative range of AV/LTM EBITDA Ratio and applied this range to KCS's last 12 months ("LTM") COVID-Adjusted EBITDA as of June 30, 2021 of $1,600 million as provided by KCS management, which reflects an add-back of $128 million, as provided by KCS management, for the estimated impact of COVID-19 for the third and the fourth quarters of 2020.

Based on this analysis, Morgan Stanley calculated a range of implied equity values per share of KCS common stock as follows, in each case rounded to the nearest $1.00:

	Selected Representative Range	Implied Equity Value Per Share of KCS Common Stock
AV/LTM EBITDA Ratio	11.0x – 15.0x	$ 151.00 – $221.00

Morgan Stanley also reviewed the premia paid for transactions announced between January 1, 2007 and December 31, 2020 with a publicly announced transaction value of more than $1,000 million, as published by Thomson Reuters. The premia paid were calculated based on each of (i) the target company's closing stock price and (ii) the 52-week high of the target company's stock price, in each case on the last trading day prior to the public announcement of the transactions. Based on its analysis of the relevant metrics and upon the application of its professional judgment and experience, Morgan Stanley (A) selected a representative range of premia of 15% to 35% with respect to the target companies' closing stock prices and applied this range of premia to the closing trading price of KCS common stock as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $224.16 and (B) selected a representative range of premia of (5%) to 20% with respect to the 52-week highs of such target companies' stock prices and applied this range of premia to the 52-week high price per share of KCS common stock as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $224.16.

Morgan Stanley's premia paid analysis was based on precedent transactions with transaction values greater than $1,000 million from 2007 to 2020. The multiple range of 11.0x to 15.0x for the precedent transactions analysis was selected based on Morgan Stanley's professional experience and judgment.

These analyses indicated ranges of implied equity values per share of KCS common stock of (i) $258.00 to $303.00 and (ii) $213.00 to $269.00, respectively, in each case rounded to the nearest $1.00.

Morgan Stanley compared the foregoing ranges of implied equity values per share of KCS common stock to the closing trading price of KCS common stock as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $224.16, and the implied value of the merger consideration to be received by holders of shares of KCS common stock in the transaction as of September 13, 2021 of $288.00, rounded to the nearest $1.00.

No company or transaction used in the precedent transactions or premia paid analysis is identical to KCS or the transaction. In evaluating the precedent transactions, Morgan Stanley made judgments and assumptions with regard to industry performance, general business, economic, market and financial conditions and other matters, which are beyond the control of KCS. These include, among other things, the impact of competition on the business of KCS or the industry generally, industry growth, and the absence of any adverse material change in the financial condition and prospects of KCS or the industry, and in the financial markets in general. Mathematical analysis is not in itself a meaningful method of using precedent transactions data.

Other Factors

Morgan Stanley observed certain additional factors that were not considered part of its financial analyses with respect to its opinion but were referenced for informational purposes, including, among other things, the following:

- *Historical Trading Range.* For reference only and not as a component of its fairness analysis, Morgan Stanley reviewed the low and high per share trading range of shares of KCS common stock for the 12-month period ending March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement). Morgan Stanley observed that during such period the trading range was $101.00 to $224.00 per share of KCS common stock, rounded to the nearest $1.00.
- *Equity Research Analysts' Price Targets.* For reference only and not as a component of its fairness analysis, Morgan Stanley reviewed the undiscounted price targets for shares of KCS common stock prepared and published by 20 equity research analysts as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement). These targets generally reflect each analyst's estimate of the future public market trading price of shares of KCS common stock. In order to better compare the equity analysts' stock price targets with the merger consideration, Morgan Stanley discounted each analyst's price target to present value by applying, for a one year discount period, a discount rate of 7.4%, selected by Morgan Stanley based on the application of its professional judgment and experience to reflect KCS's cost of equity. This analysis resulted in a discounted analyst price target range for shares of KCS common stock of $186.00 to $239.00 per share, rounded to the nearest $1.00. Morgan Stanley used a discount rate of 7.4% to reflect KCS's estimated cost of equity. Cost of equity was calculated using the CAPM. The CAPM takes into account market risk premium, risk-free rate and beta of the underlying stock.
- *Discounted Equity Value Analysis.* For reference only and not as a component of its fairness analysis, Morgan Stanley performed a discounted equity value analysis, which is designed to provide insight into a theoretical estimate of the future implied value of a company's common equity as a function of such company's estimated future earnings and a theoretical range of trading multiples. The resulting estimated future implied value of equity is subsequently discounted back to the present day at the company's cost of equity in order to arrive at an illustrative estimate of the present value for the company's theoretical future implied stock price. Morgan Stanley used a discount rate of 7.4% to reflect KCS's estimated cost of equity. Cost of equity was calculated using the CAPM. The CAPM takes into account market risk premium, risk-free rate and beta of the underlying stock. Morgan Stanley used a NTM P/E multiple range of 17.0x to 21.0x based on KCS's and comparable companies' NTM P/E multiples over time.

  In arriving at the estimated equity values per share of KCS common stock, Morgan Stanley selected a representative range of ratio of stock price to future earnings per share ("P/E Multiple") utilizing the next 12 months ("NTM") estimated earnings per share and applied this range of multiples to an estimate of fiscal year 2029 earnings per share from the KCS management unaudited KCS projections. Morgan Stanley then discounted the resulting equity values per share to June 30, 2021 at a discount rate of 7.4%, selected by Morgan Stanley based on the application of its professional judgment and experience to reflect KCS's cost of equity. Based on this analysis, Morgan Stanley derived a range of implied equity values per share of KCS common stock as follows, each rounded to the nearest $1.00:

	Selected Representative Range	Implied Equity Value Per Share of KCS common stock
P/E Multiple	17.0x–21.0x	$ 269.00–$328.00

Analyses Related to CPRL

Discounted Cash Flow Analysis

Morgan Stanley performed a discounted cash flow analysis, which is designed to provide an implied value of a company by calculating the present value of the estimated future unlevered free cash flows and terminal value of such company. Morgan Stanley calculated a range of implied equity values per CPRL common share as of June 30, 2021, based on estimates of future unlevered free cash flows for the six months ending December 31, 2021 and fiscal years 2022 through 2029 contained in the KCS management unaudited CPRL projections, including net debt of CPRL as of June 30, 2021 of $6,027 million. Morgan Stanley also calculated a range of terminal values for CPRL based on NTM EBITDA exit multiple range of 11.75x to 13.25x, which was selected based on Morgan Stanley's professional judgment and experience. The estimated unlevered free cash flows and the range of terminal values were then discounted to June 30, 2021 by applying a discount rate range of 5.4% to 6.7%, which was selected based on Morgan Stanley's professional judgment and experience, to reflect CPRL's estimated weighted average cost of capital. Morgan Stanley used a discount rate range of 5.4% to 6.7% to reflect CPRL's estimated weighted average cost of capital, which was calculated by multiplying the cost of each capital source (debt and equity) by its relevant weight, and then adding the products together to determine the value. Cost of equity was calculated using the CAPM. The CAPM takes into account market risk premium, risk-free rate and beta of the underlying stock. Morgan Stanley used an EBITDA exit multiple range of 11.75x to 13.25x based on CPRL's and comparable companies' EBITDA multiples over time.

This analysis indicated a range of implied equity values per CPRL common share of $76.00 to $93.00, in each case rounded to the nearest $1.00.

Morgan Stanley compared the foregoing range of implied equity values per CPRL common share to the closing trading price of CPRL common shares on September 13, 2021 of $68.55 and to the closing trading price per CPRL common share on March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $75.70 (taking into account the share split).

Comparable Public Company Analysis

Morgan Stanley performed a comparable public company analysis, which attempts to provide an implied value of a company by comparing it to similar companies that are publicly traded. Morgan Stanley reviewed and compared certain financial information of CPRL with corresponding publicly available financial information for other Class 1 Rail companies that shared certain similar characteristics to CPRL to derive an implied valuation range for CPRL. The companies used in this comparison were the following:

- KCS
- CN
- Union Pacific Corporation
- Norfolk Southern Corporation
- CSX Corporation

The above companies were chosen based on Morgan Stanley's knowledge of the industry and because they have businesses that may be considered similar to CPRL's. Although none of such companies are identical or directly comparable to CPRL, these companies are publicly traded companies with operations and/or other criteria, such as lines of business, markets, business risks, growth prospects, maturity of business and size and scale of business, that for purposes of its analysis Morgan Stanley considered similar to CPRL.

For purposes of this analysis, Morgan Stanley analyzed the following statistics of each of these companies, based on public filings, publicly available research estimates and publicly available financial information published by

Capital IQ as of March 19, 2021(which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) for KCS and CPRL, as of April 19, 2021 (which was the last trading day prior to the announcement of the CN proposal) for CN and as of September 13, 2021 for Union Pacific Corporation, Norfolk Southern Corporation and CSX Corporation:

- the 2022E AV/EBITDA Ratio; and
- the 2022E P/E Ratio.

The results of Morgan Stanley's analysis were presented for the comparable companies, as indicated in the following table:

	2022E AV/EBITDA Ratio	2022 E P/E Ratio
KCS	13.4x	21.4x
CPRL	14.6x	21.1x
CN	14.2x	22.5x
Union Pacific Corporation	12.9x	18.3x
Norfolk Southern Corporation	12.4x	18.4x
CSX Corporation	11.8x	18.1x
Mean	**13.2x**	**20.0x**
Median	**13.2x**	**19.8x**

Based on its analysis of the relevant metrics for each of the comparable companies and upon the application of its professional judgment and experience, Morgan Stanley selected representative ranges of 2022E AV/EBITDA Ratio and 2022E P/E Ratio and applied these ranges to CPRL's estimated fiscal year 2022 EBITDA of $3,900 million based on consensus analyst estimates and of $3,862 million based on the KCS management unaudited CPRL projections, and to CPRL's estimated fiscal year 2022 earnings per share of $3.63 based on consensus analyst estimates and of $3.67 based on the KCS management unaudited CPRL projections. For purposes of this analysis, Morgan Stanley utilized the KCS management unaudited CPRL projections and consensus analyst estimates.

Morgan Stanley then calculated a range of implied equity values per CPRL common share as follows, in each case rounded to the nearest $1.00:

	Selected Representative Range	Implied Equity Value Per CPRL Common Share
2022E AV/EBITDA Ratio (KCS management unaudited CPRL projections)	12.0x – 14.5x	$ 60.00-$74.00
2022E P/E Ratio (KCS management unaudited CPRL projections)	18.5x – 22.5x	$ 68.00-$82.00
2022E AV/EBITDA Ratio (Consensus)	12.0x – 14.5x	$ 61.00-$75.00
2022E P/E Ratio (Consensus)	18.5x – 22.5x	$ 67.00-$82.00

Morgan Stanley compared the foregoing ranges of implied equity values per CPRL common share to the closing trading price of CPRL common shares on September 13, 2021 of $68.55 and to the closing trading price on March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $75.70.

No company included in the comparable public company analysis is identical to CPRL. In evaluating comparable companies, Morgan Stanley made judgments and assumptions with regard to industry performance, general business, economic, market and financial conditions and other matters, which are beyond the control of CPRL. These include, among other things, the impact of competition on the business of CPRL and the industry generally, industry growth, and the absence of any adverse material change in the financial condition and prospects of CPRL and the industry, and in the financial markets in general. Mathematical analysis is not in itself a meaningful method of using comparable company data.

Other Factors

Morgan Stanley observed certain additional factors that were not considered part of its financial analyses with respect to its opinion but were referenced for informational purposes, including, among other things, the following:

- *Historical Trading Range.* For reference only and not as a component of its fairness analysis, Morgan Stanley reviewed the low and high per share trading range of CPRL common shares for the 12-month period ending March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement). Morgan Stanley observed that during such period the trading range was $36.00 to $77.00 per CPRL common share (taking into account the share split), rounded to the nearest $1.00.
- *Equity Research Analysts' Price Targets.* For reference only and not as a component of its fairness analysis, Morgan Stanley reviewed the undiscounted price targets for CPRL common shares prepared and published by 24 equity research analysts as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement). These targets generally reflect each analyst's estimate of the future public market trading price of CPRL common shares. In order to better compare the equity analysts' stock price targets with the trading price of CPRL common shares on September 13, 2021 of $68.55 and to the closing trading price of $75.70 on March 19, 2021 (which was the last trading day prior to the execution of the prior CP merger agreement), Morgan Stanley discounted each analyst's price target to present value by applying, for a one year discount period, a discount rate of 6.4%, selected by Morgan Stanley based on the application of its professional judgment and experience to reflect CPRL's cost of equity. This analysis resulted in a discounted analyst price target range for CPRL common shares of $64.00 to $76.00 per share, rounded to the nearest $1.00. Morgan Stanley used a discount rate of 6.4% to reflect CPRL's estimated cost of equity. Cost of equity was calculated using the CAPM. The CAPM takes into account market risk premium, risk-free rate and beta of the underlying stock.

Summary of Material Pro Forma Financial Analysis

Has/Gets Analysis

Morgan Stanley performed a Has/Gets Analysis to calculate the theoretical change in value for holders of KCS common stock resulting from the transaction based on a comparison of (i) the pro forma ownership by holders of KCS common stock of CPRL giving effect to the transaction, and (ii) the 100% ownership by holders of KCS common stock of the KCS common stock on a standalone basis. For KCS common stock on a standalone basis, Morgan Stanley used the reference range obtained in the discounted cash flow analysis described above under "*Summary of Material Financial Analyses of KCS – Discounted Cash Flow Analysis*." Morgan Stanley then performed the same analysis by calculating the range of implied per share equity values allocable to holders of KCS common stock on a pro forma basis, giving effect to the transaction, by assuming approximately 28% pro forma ownership, based on the number of CPRL common shares estimated to be issued to holders of KCS common stock in the transaction, utilizing the results of the standalone discounted cash flow analyses for KCS and CPRL described above under "*Summary of Material Financial Analyses of KCS – Discounted Cash Flow Analysis*" and under "*Summary of Material Financial Analyses of CPRL – Discounted Cash Flow Analysis*," and

taking into account the KCS management assumed synergies on the basis of (1) a projected $990 million in EBITDA synergies as provided by KCS management (referred to in this section as the "$990 million synergy case"), which also included $20 million of projected D&A and Capex synergies, for total projected gross synergies of $1,010 million, and (2) a projected $377 million in EBITDA synergies as provided by KCS management (referred to in this section as the "$377 million synergy case"), which also included $23 million of projected D&A and Capex synergies for total projected gross synergies of $400 million. Morgan Stanley then compared these implied per share equity value ranges, which were further adjusted by an estimated additional net debt from the transaction and $90.00 per share cash merger consideration, to the implied per share equity value ranges derived for KCS common stock on a standalone basis utilizing the results of the standalone discounted cash flow analysis for KCS described above.

This analysis yielded the following implied per share equity value ranges for KCS common stock on a standalone and on a pro forma basis (rounded to the nearest $1.00):

Implied Equity Value Per Share of KCS common stock		
Standalone	Pro-Forma $990 million synergy case	Pro-Forma $377 million synergy case
$226.00 - $280.00	$310.00 - $365.00	$291.00 - $343.00

Other Considerations

In connection with the review of the transaction by the KCS board, Morgan Stanley performed a variety of financial and comparative analyses for purposes of rendering its opinion. The preparation of a financial opinion is a complex process and is not necessarily susceptible to a partial analysis or summary description. In arriving at its opinion, Morgan Stanley considered the results of all of its analyses as a whole and did not attribute any particular weight to any analysis or factor it considered. Morgan Stanley believes that selecting any portion of its analyses, without considering all analyses as a whole, would create an incomplete view of the process underlying its analyses and opinion. In addition, Morgan Stanley may have given various analyses and factors more or less weight than other analyses and factors, and may have deemed various assumptions more or less probable than other assumptions. As a result, the ranges of valuations resulting from any particular analysis described above should not be taken to be Morgan Stanley's view of the actual value of KCS or CPRL.

In performing its analyses, Morgan Stanley made numerous assumptions with regard to industry performance, general business, regulatory, economic, market and financial conditions and other matters, which are beyond the control of KCS or CPRL. These include, among other things, the impact of competition on the businesses of KCS and CPRL or the industry generally, industry growth, and the absence of any adverse material change in the financial condition and prospects of KCS, CPRL or the industry, and in the financial markets in general. Any estimates contained in Morgan Stanley's analyses are not necessarily indicative of future results or actual values, which may be significantly more or less favorable than those suggested by such estimates.

Morgan Stanley conducted the analyses described above solely as part of its analysis of the fairness, from a financial point of view, of the merger consideration to be received by the holders of shares of KCS common stock (other than excluded shares) pursuant to the merger agreement, and in connection with the delivery of its opinion to the KCS board. These analyses do not purport to be appraisals or to reflect the prices at which shares of KCS common stock or CPRL common shares might actually trade.

The merger consideration to be received by the holders of shares of KCS common stock was determined through arm's-length negotiations between KCS and CPRL and was approved by the KCS board. Morgan Stanley acted as financial advisor to the KCS board during these negotiations but did not, however, recommend any specific merger consideration to KCS, nor opine that any specific merger consideration constituted the only appropriate merger consideration for the transaction. In addition, Morgan Stanley's opinion does not in any manner address the prices at which CPRL common shares will trade following consummation of the transaction or at any other time and Morgan Stanley expressed no opinion or recommendation as to how KCS's or CPRL's shareholders should vote at any shareholder meetings to be held in connection with the transaction.

Morgan Stanley's opinion and its presentation to the KCS board was one of many factors taken into consideration by the KCS board in deciding to approve the merger agreement. Consequently, the analyses as described above should not be viewed as determinative of the recommendation of the KCS board with respect to the merger consideration or of whether the KCS board would have been willing to agree to different merger consideration. Morgan Stanley's opinion was approved by a committee of Morgan Stanley investment banking and other professionals in accordance with its customary practice.

KCS has agreed to pay Morgan Stanley for its services in connection with the transaction an aggregate fee, which is currently estimated, based on the information available as of the date of announcement, to be approximately $63 million, a portion of which was paid upon the execution and announcement of the prior CP merger agreement in March 2021, a portion of which was paid to Morgan Stanley upon the rendering of a fairness opinion in connection with the CN agreement announced in May 2021, a portion of which was payable upon the rendering of its opinion in connection with the transaction and the remainder of which is payable upon the closing of the transaction. KCS has also agreed to reimburse Morgan Stanley for certain of its expenses incurred in performing its services, including fees and expenses of outside counsel to Morgan Stanley. In addition, KCS has agreed to indemnify Morgan Stanley and its affiliates, their respective directors, officers, agents and employees and each person, if any, controlling Morgan Stanley or any of its affiliates against certain liabilities and expenses, including certain liabilities under the federal securities laws, related to or arising out of Morgan Stanley's engagement.

In the two years prior to the date of its opinion, Morgan Stanley or its affiliates have provided financial advisory and financing services to KCS and its affiliates and have received aggregate fees of approximately $5 million to $15 million in connection with such services (which includes the fee received upon delivery of its opinion in connection with the prior CP merger agreement announced in March 2021 and the fee received upon delivery of its opinion in connection with the CN agreement announced in May 2021). In addition, Morgan Stanley or one of its affiliates is currently a lender to each of KCS and CPRL under their respective revolving credit facilities, and is also currently engaged to provide financing services to CPRL that are unrelated to the transaction, for which Morgan Stanley expects to receive customary fees. Morgan Stanley may also seek to provide financial advisory and financing services to KCS, CPRL and their respective affiliates in the future and would expect to receive fees for the rendering of these services.

Morgan Stanley is a global financial services firm engaged in the securities, investment management and individual wealth management businesses. Its securities business is engaged in securities underwriting, trading and brokerage activities, foreign exchange, commodities and derivatives trading, prime brokerage, as well as providing investment banking, financing and financial advisory services. Morgan Stanley, its affiliates, directors and officers may at any time invest on a principal basis or manage funds that invest, hold long or short positions, finance positions, and may trade or otherwise structure and effect transactions, for their own account or the accounts of its customers, in debt or equity securities or loans of CPRL, KCS, their respective affiliates or any other company, or any currency or commodity, that may be involved in the transaction, or any related derivative instrument.

Opinion of BofA Securities

KCS retained BofA Securities to act as its financial advisor in connection with the transaction. BofA Securities is an internationally recognized investment banking firm which is regularly engaged in the valuation of businesses and securities in connection with mergers and acquisitions, negotiated underwritings, secondary distributions of listed and unlisted securities, private placements and valuations for corporate and other purposes. KCS selected BofA Securities to act as KCS's financial advisor in connection with the transaction on the basis of BofA Securities' experience in transactions similar to the transaction, its reputation in the investment community and its familiarity with KCS and its business.

On September 15, 2021, at a meeting of the KCS board held to evaluate the transaction, BofA Securities delivered to the KCS board an oral opinion, which was confirmed by delivery of a written opinion dated

September 15, 2021, to the effect that, as of the date of the opinion and based on and subject to various assumptions and limitations described in BofA Securities' written opinion, the merger consideration to be received in the transaction by holders of KCS common stock (other than "excluded shares") was fair, from a financial point of view, to such holders.

The full text of BofA Securities' written opinion to the KCS board, which describes, among other things, the assumptions made, procedures followed, factors considered and limitations on the review undertaken, is attached as Annex C to this proxy statement/prospectus and is incorporated by reference herein in its entirety. The following summary of BofA Securities' opinion is qualified in its entirety by reference to the full text of BofA Securities' written opinion. BofA Securities delivered its opinion to the KCS board for the benefit and use of the KCS board (in its capacity as such) in connection with and for purposes of its evaluation of the mergers. BofA Securities' opinion does not address any other terms or other aspects or implications of the transaction and no opinion or view was expressed as to the relative merits of the transaction in comparison to other strategies or transactions that might be available to KCS or in which KCS might engage or as to the underlying business decision of KCS to proceed with or effect the transaction. BofA Securities' opinion does not address any other aspect of the transaction and does not express any opinion or recommendation as to how any stockholder should vote or act in connection with the transaction or any related matter.

In connection with rendering its opinion, BofA Securities, among other things:

(1) reviewed certain publicly available business and financial information relating to KCS and CPRL;
(2) reviewed certain internal financial and operating information with respect to the business, operations and prospects of KCS furnished to or discussed with BofA Securities by the management of KCS, including the KCS management unaudited KCS projections (as defined and described in the below section entitled "*KCS Unaudited Prospective Financial Information*") relating to KCS prepared by the management of KCS;
(3) reviewed certain internal financial and operating information with respect to the business, operations and prospects of CPRL furnished to or discussed with BofA Securities by the management of KCS, including the KCS management unaudited CPRL projections (as defined and described in the below section entitled "KCS Unaudited Prospective Financial Information,") relating to CPRL prepared by the management of KCS;
(4) reviewed the KCS management assumed synergies (as defined and described in the below section entitled "*KCS Unaudited Prospective Financial Information*") anticipated by the managements of KCS and CPRL to result from the transaction;
(5) discussed the past and current business, operations, financial condition and prospects of KCS with members of senior managements of KCS and CPRL, and discussed the past and current business, operations, financial condition and prospects of CPRL with members of senior managements of KCS and CPRL;
(6) reviewed the trading histories for KCS common stock and CPRL common shares and a comparison of such trading histories with the trading histories of other companies BofA Securities deemed relevant;
(7) compared certain financial and stock market information of KCS and CPRL with similar information of other companies BofA Securities deemed relevant;
(8) compared certain financial terms of the transaction to financial terms, to the extent publicly available, of other transactions BofA Securities deemed relevant;
(9) reviewed the draft agreement, the debt commitment letters, the STB May 6 decision, the form of the voting trust agreement, and certain related documents; and

(10) performed such other analyses and studies and considered such other information and factors as BofA Securities deemed appropriate.

In arriving at its opinion, BofA Securities assumed and relied upon, without independent verification, the accuracy and completeness of the financial and other information and data publicly available or provided to or otherwise reviewed by or discussed with BofA Securities and has relied upon the assurances of the managements of KCS and CPRL that they were not aware of any facts or circumstances that would make such information or data inaccurate or misleading in any material respect. With respect to the KCS management unaudited KCS projections, BofA Securities was advised by KCS, and assumed, that they were reasonably prepared on bases reflecting the best currently available estimates and good faith judgments of the management of KCS as to the future financial performance of KCS. With respect to the KCS management unaudited CPRL projections and the KCS management assumed synergies, in each case, BofA Securities was advised by KCS, and assumed, with the consent of KCS, that they were reasonably prepared on bases reflecting the best currently available estimates and good faith judgments of the management of KCS as to the future financial performance of CPRL and other matters covered thereby. BofA Securities also relied, at the direction of KCS, on the assessments of the managements of KCS and CPRL, respectively, as to CPRL's ability to achieve the KCS management assumed synergies and was advised by KCS and CPRL, and assumed, with the consent of KCS, that the KCS management assumed synergies would be realized in the amounts and at the times projected. BofA Securities did not make and was not provided with any independent evaluation or appraisal of the assets or liabilities (contingent or otherwise) of KCS or CPRL, nor did BofA Securities make any physical inspection of the properties or assets of KCS or CPRL. BofA Securities did not evaluate the solvency or fair value of KCS or CPRL under any state, federal or other laws relating to bankruptcy, insolvency or similar matters. BofA Securities assumed, at the direction of KCS, that the transaction would be consummated in accordance with the terms set forth in the merger agreement, without waiver, modification or amendment of any material term, condition or other agreement contemplated therein or thereby and that, in the course of obtaining the necessary governmental, regulatory and other approvals, consents, releases and waivers for the transaction, no delay, limitation, restriction or condition, including any divestiture requirements or amendments or modifications, would be imposed that would have an adverse effect on KCS, CPRL or the contemplated benefits of the transaction. BofA Securities also assumed, at the direction of KCS, that (i) the transaction would qualify for federal income tax purposes as a reorganization under the provisions of Section 368(a) of the Code, (ii) CPRL would obtain financing in accordance with the terms set forth in the commitment letters, (iii) the STB would permit the transaction to close into the voting trust in accordance with the terms of the STB May 6 decision and the voting trust agreement and (iv) the final executed merger agreement would not differ in any material respect from the draft agreement reviewed by BofA Securities.

BofA Securities expressed no view or opinion as to any terms or other aspects of the transaction (other than the merger consideration to the extent expressly specified in its opinion), including, without limitation, the form or structure of the transaction. BofA Securities' opinion was limited to the fairness, from a financial point of view, of the merger consideration to be received by the holders of shares of KCS common stock (other than excluded shares) in the transaction and no opinion or view was expressed with respect to any consideration to be received by the holders of KCS preferred stock or any other class of securities, creditors or other constituencies of any party. In addition, no opinion or view was expressed with respect to the fairness (financial or otherwise) of the amount, nature or any other aspect of any compensation to any of the officers, directors or employees of any party to the transaction, or class of such persons, relative to the merger consideration. Furthermore, no opinion or view was expressed as to the relative merits of the transaction in comparison to other strategies or transactions that might be available to KCS or in which KCS might engage or as to the underlying business decision of KCS to proceed with or effect the transaction. BofA Securities did not express any opinion as to what the value of CPRL common shares actually would be when issued or the prices at which KCS common stock or CPRL common shares would trade at any time, including following the announcement or consummation of the transaction. In addition, BofA Securities expressed no opinion or recommendation as to how any stockholder should vote or act in connection with the transaction or any related matter.

BofA Securities' opinion was necessarily based on financial, economic, monetary, market and other conditions and circumstances as in effect on, and the information made available to BofA Securities as of, the date of its opinion. While the credit, financial and stock markets have been experiencing unusual volatility, BofA Securities expressed no opinion or view as to any potential effects of such volatility on KCS, CPRL or the transaction. It should be understood that subsequent developments may affect BofA Securities' opinion, and BofA Securities does not have any obligation to update, revise, or reaffirm its opinion. The issuance of BofA Securities' opinion was approved by a fairness opinion review committee of BofA Securities.

The discussion set forth below in the subsections entitled "*—Summary of Material Financial Analyses of KCS*," "*—Summary of Material Financial Analyses of CPRL,*" and "*—Summary of Material Pro Forma Financial Analysis,*" beginning on pages 87, 91, and 93, respectively, represents a brief summary of the material financial analyses presented by BofA Securities to the KCS board in connection with its opinion. **The financial analyses summarized below include information presented in tabular format. In order to fully understand the financial analyses performed by BofA Securities, the tables must be read together with the text of each summary. The tables alone do not constitute a complete description of the financial analyses performed by BofA Securities. Considering the data set forth in the tables below without considering the full narrative description of the financial analyses, including the methodologies and assumptions underlying the analyses, could create a misleading or incomplete view of the financial analyses performed by BofA Securities.**

Summary of Material Financial Analyses of KCS

Selected Publicly Traded Companies Analysis.

BofA Securities reviewed publicly available financial and stock market information of the following five selected publicly traded companies in the rail transportation industry:

- Union Pacific Corporation
- CN
- CSX Corporation
- Norfolk Southern Corporation
- CPRL

BofA Securities reviewed, among other things, the closing price per share as of September 13, 2021 for Union Pacific Corporation, CSX Corporation and Norfolk Southern, as of April 19, 2021 for CN (which was the last trading day prior to the announcement of the CN proposal) and as of March 19, 2021 for CPRL (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement), as a multiple of Wall Street analyst consensus estimates of calendar year 2022 earnings per share ("EPS") for the applicable company (such multiples are referred to in this section as "2022E Price/EPS"). BofA Securities also reviewed the estimated enterprise value, calculated as the market value of equity plus short-term debt, long-term debt, preferred equity and non-controlling interest, minus cash, marketable securities and investments, as applicable ("EV") for each selected company, as a multiple of Wall Street analyst consensus estimates of calendar year 2022 EBITDA (such multiples are referred to in this section as "2022E EV/EBITDA"). Financial data of the selected companies were derived from their public filings and publicly available Wall Street research analysts' estimates published by FactSet as of September 13, 2021.

The results of BofA Securities' analysis were presented for the selected publicly traded companies, as indicated in the following table:

Company	Price/EPS 2022E	EV/EBITDA 2022E
Union Pacific Corporation	18.3x	12.8x
CN	22.6x	14.5x
CSX Corporation	18.2x	11.7x
Norfolk Southern Corporation	18.5x	12.4x
CPRL	21.2x	14.7x

The overall low to high 2022E Price/EPS multiples observed for the selected companies were 18.2x to 22.6x (with a mean of 19.8x and median of 18.5x). Based on BofA Securities' review of the 2022E Price/EPS multiples for the selected companies and on its professional judgment and experience, BofA Securities applied a 2022E Price/EPS multiple reference range of 18.5x to 22.0x to KCS management's estimated calendar year 2022 EPS as reflected in the KCS management unaudited KCS projections to calculate an implied equity value reference range per share of KCS common stock (rounded to the nearest $0.05). The selected multiple range of 18.5x to 22.0x was based on BofA Securities' professional judgment and experience as well as the observable range of the selected publicly traded companies.

The overall low to high 2022E EV/EBITDA multiples observed for the selected companies were 11.7x to 14.7x (with a mean of 13.2x and median of 12.8x). Based on BofA Securities' review of the 2022E EV/EBITDA multiples for the selected companies and on its professional judgment and experience, BofA Securities applied a 2022E EV/EBITDA multiple reference range of 12.0x to 15.0x to KCS management's estimated calendar year 2022 EBITDA as reflected in the KCS management unaudited KCS projections to calculate an implied equity value reference range per share of KCS common stock (rounded to the nearest $0.05). The selected multiple range of 12.0x to 15.0x was based on BofA Securities' professional judgment and experience as well as the observable range of the selected publicly traded companies.

This analysis indicated the following approximate implied equity value reference ranges per share of KCS common stock, as compared to the implied value of the merger consideration, calculated by adding the $90.00 in cash consideration to $198, the implied value of the 2.884 CPRL common shares included in the merger consideration based on the $68.55 closing price of CPRL common shares on September 13, 2021 ("implied consideration value"):

	Implied Equity Value Reference Range Per Share of KCS Common Stock	Implied Consideration Value
2022E Price/EPS	$ 198.90 - $236.55	
2022E EV/EBITDA	$198.60 – $258.40	$ 288

No selected publicly traded company used in this analysis is identical or directly comparable to KCS. Accordingly, an evaluation of the results of this analysis is not entirely mathematical. Rather, this analysis involves complex considerations and judgments concerning differences in financial and operating characteristics (reflected, among other things, in differences in historical trading levels of these companies) and other factors that could affect the public trading or other values of the companies to which KCS was compared.

Selected Precedent Transactions Analysis.

BofA Securities reviewed, to the extent publicly available, financial information relating to 21 selected transactions involving acquisitions of rail transportation companies since 1994. For each of these transactions, BofA Securities reviewed the merger values for each transaction based on the merger consideration paid to the

shareholders of the target company in the selected transactions (with the full transaction value implied for transactions with less than 100% being acquired), as multiples of estimates of the target company's EBITDA, for the last twelve months for the year in which the applicable transaction was announced except with respect to the Glencore Rail/Genesee & Wyoming Australia and the Genesee & Wyoming Australia/Macquarie Infrastructure & Real Assets transactions, where, in each case, such multiple was based on the estimated EBITDA for the twelve months following the announcement made in October 2016, and based on publicly available information at that time (such multiples are referred to in this section as "TV/LTM EBITDA").

Date Announced	Target	Acquiror	TV /LTM EBITDA	Transaction Value (1)
07/19	Genesee & Wyoming Inc.	Brookfield Infrastructure Partners L.P. / GIC Pte. Ltd.	13.4x	$ 8,432
03/17	Florida East Coast Railway Holdings Corp.	GMéxico Transportes S.A. de C.V.	13.6x	2,100
10/16	Glencore Rail (NSW) Pty Limited	Genesee & Wyoming Australia Pty Ltd	11.4x	866
10/16	Genesee & Wyoming Australia Pty Ltd. (49%)	Macquarie Infrastructure and Real Assets	11.2x	1,534
03/16	Pacific National Holdings Pty Ltd.	Rail Consortium(2)	10.3x	6,594
02/15	Freightliner Group Limited (95%)	Genesee & Wyoming Inc.	9.5x	807
07/12	RailAmerica, Inc.	Genesee & Wyoming Inc.	10.3x	2,008
11/09	Burlington Northern Santa Fe Corp.	Berkshire Hathaway Inc.	8.8x	43,847
09/07	Dakota, Minnesota & Eastern Railroad Corporation	Canadian Pacific Railway Limited	15.2x	1,480
05/07	Florida East Coast Industries Inc.	Fortress Investment Group LLC	NA	3,475
11/06	RailAmerica, Inc.	Fortress Investment Group LLC	11.7x	1,055
12/05	Meridian Speedway, LLC	Kansas City Southern (70%) / Norfolk Southern Corporation (30%)	NA	1,000
08/05	Patrick Corporation	Toll Holding Ltd.	15.0x	5,284
12/04	Transportacion Ferroviaria Mexicana, S.A. de C.V. (51%)	Kansas City Southern	6.1x	1,320
11/03	BC Rail Ltd.	Canadian National Railway Company	14.4x	1,204
01/01	Wisconsin Central Ltd.	Canadian National Railway Company	9.8x	1,191
02/98	Illinois Central Corp.	Canadian National Railway Company	11.4x	2,973
04/97	Conrail Inc.	CSX Corp./Norfolk Southern Corporation	12.1x	12,329
08/95	Southern Pacific Rail Corp.	Union Pacific Corp.	12.3x	5,388
03/95	Chicago and North Western Holdings Corporation	Union Pacific Corp.	8.4x	2,614
06/94	Santa Fe Pacific Corporation	Burlington Northern Inc.	7.2x	5,087

(1) Full transaction value implied when less than 100% stake. All amounts in USD millions.

(2) CPP Investments Limited (33%), Global Infrastructure Partners Inc. (27%), China Investment Corporation (16%), GIC Pte Ltd. (12%) and British Columbia Investment Management Corporation (12%).

The overall low to high TV/LTM EBITDA multiples of the target companies in the selected transactions were 6.1x to 15.2x (with a mean of 11.2x and a median of 11.4x).

Based on BofA Securities' review of the TV/LTM EBITDA multiples for the selected transactions and on its professional judgment and experience, BofA Securities applied a TV/LTM EBITDA multiple reference range of

11.5x to 14.0x to KCS's COVID-Adjusted EBITDA for the twelve month period ended June 30, 2021 of $1,600 million as provided by KCS management, which reflects an add-back of $128 million, as provided by KCS management, for the estimated impact of COVID-19 for the third quarter through the fourth quarter of 2020, to calculate a range of implied EV for KCS. BofA Securities then calculated an implied equity value reference range per share of KCS common stock (rounded to the nearest $0.05). The selected multiple range of 11.5x to 14.0x was based on BofA Securities' professional judgment and experience as well as the observable implied transaction multiples. This analysis indicated the following approximate implied equity value reference ranges per share of KCS common stock (rounded to the nearest $0.05), as compared to the implied consideration value:

Implied Equity Value Reference Range Per Share of KCS Common Stock	Implied Consideration Value
$160.10 - $203.75	$ 288

No selected precedent transaction used in this analysis or the applicable business or target company is identical or directly comparable to KCS or the transaction. Accordingly, an evaluation of the results of this analysis is not entirely mathematical. Rather, this analysis involves complex considerations and judgments concerning differences in financial and operating characteristics, market conditions and other factors that could affect the acquisition or other values of the companies or transactions to which KCS and the transaction were compared.

Discounted Cash Flow Analysis

BofA Securities performed a discounted cash flow analysis of KCS to calculate a range of implied present values per share of KCS common stock utilizing estimates of the standalone, unlevered, after-tax free cash flows that KCS was expected to generate during the six-month period ending December 31, 2021 and for the fiscal years 2022 through 2029 based on the KCS management unaudited KCS projections. BofA Securities calculated terminal values for KCS by applying a selected range of perpetuity growth rates of 2.25% to 2.75% to KCS's normalized free cash flows in the terminal year. BofA Securities then calculated implied equity value reference ranges per share of KCS common stock (rounded to the nearest $0.05) by deducting from this range of present values KCS's net debt, preferred equity and non-controlling interest as of June 30, 2021, as reflected in KCS's public filings, at the direction of KCS management, and dividing the result by the number of fully-diluted shares of KCS common stock outstanding (calculated on a treasury stock method basis, based on information provided by the management of KCS). The cash flows were discounted to present value as of June 30, 2021, utilizing mid-year discounting convention, and using a discount rate range of 6.0% to 7.5%, which was based on an estimate of KCS's weighted average cost of capital. A growth rate range of 2.25% to 2.75% was based on BofA Securities' professional judgment and experience and represents long-term growth outlook for the business. The discount rate range reflected KCS's estimated weighted average cost of capital, which was calculated by multiplying the estimated cost of each capital source (debt and equity) by its relevant weight, and then adding the products together. The estimated cost of equity was obtained using the capital asset pricing model (which takes into account the risk-free rate, the levered beta and the applicable equity market risk premium) and the estimated cost of debt was based on KCS's estimated borrowing cost. KCS's net debt as of June 30, 2021 was based on KCS's Form 10-Q for the quarter ended June 30, 2021, which reported debt of $3,780 million and cash of $326 million. The calculation for fully diluted shares was based on approximately 91 million common shares outstanding as provided by KCS management and other dilutive shares such as options, performance shares and deferred shares. Preferred equity of $5 million and non-controlling interest of $327 million were based on the balance sheet provided in KCS's Form 10-Q for the quarter ended June 30, 2021. This analysis indicated the following approximate implied equity value reference range per share of KCS common stock (rounded to the nearest $0.05), as compared to the implied consideration value:

Implied Equity Value Reference Range Per Share of KCS Common Stock	Implied Consideration Value
$206.00 - $351.95	$ 288

Other Factors

BofA Securities also noted certain additional factors that were not considered part of BofA Securities' financial analyses with respect to its opinion but were referenced for informational purposes, including, among other things the following:

- *52-Week Trading Range.* BofA Securities reviewed the trading range of the shares of KCS common stock for the 52-week period ended March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement), which was $100.54 to $224.16.
- *Wall Street Analysts Price Targets.* BofA Securities reviewed 20 publicly available equity research analyst price targets for the shares of KCS common stock available as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement), and noted that the range of such price targets (discounted by one year at KCS's estimated mid-point cost of equity of 7.7% and rounded to the nearest $0.05) was $185.70 to $238.65. The 7.7% discount rate applied by BofA reflected KCS's estimated mid-point cost of equity, which was selected based on KCS's observable cost of equity.
- *Present Value of Future Stock Price.* BofA Securities calculated a range of present values of KCS future stock prices discounted back to June 30, 2021 by using KCS' estimated calendar year 2029 EPS based on the KCS management unaudited KCS projections, a range of price to next twelve months EPS multiples of 16.0x to 22.0x and KCS's estimated mid-point cost of equity of 7.7%, as well as the expected future dividend payments as provided by KCS management, which indicated a range of implied present values of future stock prices of KCS common stock of $247.85 per share to $334.55 per share, in each case rounded to the nearest $0.05 per share. Multiples used were based on BofA Securities' professional judgment and experience as well as observable historical trading data of KCS and selected publicly traded companies. The discount rate (cost of equity) used was based on KCS's observable cost of equity.

Summary of Material Financial Analyses of CPRL

Selected Publicly Traded Companies Analysis.

BofA Securities reviewed publicly available financial and stock market information of the following five selected publicly traded companies in the rail transportation industry:

- Union Pacific Corporation
- CSX Corporation
- Norfolk Southern Corporation
- CN
- KCS

BofA Securities reviewed, among other things, the closing price per share as of September 13, 2021 for Union Pacific Corporation, CSX Corporation and Norfolk Southern, as of April 19, 2021 for CN (which was the last trading day prior to the announcement of the CN proposal) and as of March 19, 2021 for KCS (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement), as a multiple of Wall Street analyst consensus estimates of calendar year 2022 "EPS" for the applicable company (such multiples are referred to in this section as "2022E Price/EPS"). BofA Securities also reviewed the estimated "EV" for each selected company, as a multiple of Wall Street analyst consensus estimates of calendar year 2022 "EBITDA" (such multiples are referred to in this section as "2022E EV/EBITDA"). Financial data of the selected companies were derived from their public filings and publicly available Wall Street research analysts' estimates published by FactSet as of September 13, 2021.

The results of BofA Securities' analysis were presented for the selected publicly traded companies, as indicated in the following table:

Company	Price/EPS 2022E	EV/EBITDA 2022E
Union Pacific Corporation	18.3x	12.8x
CSX Corporation	18.2x	11.7x
Norfolk Southern Corporation	18.5x	12.4x
CN	22.6x	14.5x
KCS	21.4x	13.5x

The overall low to high 2022E Price/EPS multiples observed for the selected companies were 18.2x to 22.6x (with a mean of 19.8x and median of 18.5x). Based on BofA Securities' review of the 2022E Price/EPS multiples for the selected companies and on its professional judgment and experience, BofA Securities applied a 2022E Price/EPS multiple reference range of 18.5x to 22.0x to KCS management's estimated calendar year 2022 EPS as reflected in the KCS management unaudited CPRL projections to calculate an implied equity value reference range per share of CPRL common shares (rounded to the nearest $0.05). The selected multiple range of 18.5x to 22.0x was based on BofA Securities' professional judgment and experience as well as the observable range of the selected publicly traded companies.

The overall low to high 2022E EV/EBITDA multiples observed for the selected companies were 11.7x to 14.5x (with a mean of 13.0x and median of 12.8x). Based on BofA Securities' review of the 2022E EV/EBITDA multiples for the selected companies and on its professional judgment and experience, BofA Securities applied a 2022E EV/EBITDA multiple reference range of 12.0x to 15.0x to KCS management's estimated calendar year 2022 EBITDA as reflected in the KCS management unaudited CPRL projections to calculate an implied equity value reference range per share of CPRL common shares (rounded to the nearest $0.05). The selected multiple range of 12.0x to 15.0x was based on BofA Securities' professional judgment and experience as well as the observable range of the selected publicly traded companies.

This analysis indicated the following approximate implied equity value reference ranges per share of CPRL common shares, as compared to the closing price of the CPRL common shares on September 13, 2021 of $68.55 and the closing price of CPRL common shares on March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $75.70 (taking into account the share split):

	Implied Equity Value Reference Range Per Share of CPRL Common Stock
2022E Price/EPS	$ 67.80 - $80.65
2022E EV/EBITDA	$ 60.15 –$77.30

No selected publicly traded company used in this analysis is identical or directly comparable to CPRL. Accordingly, an evaluation of the results of this analysis is not entirely mathematical. Rather, this analysis involves complex considerations and judgments concerning differences in financial and operating characteristics (reflected, among other things, in differences in historical trading levels of these companies) and other factors that could affect the public trading or other values of the companies to which CPRL was compared.

Discounted Cash Flow Analysis

BofA Securities performed a discounted cash flow analysis of CPRL to calculate a range of implied present values per share of CPRL common shares utilizing estimates of the standalone, unlevered, after-tax free cash flows that CPRL was expected to generate during the six-month period ending December 31, 2021 and for the fiscal years 2022 through 2029 based on the KCS management unaudited CPRL projections. BofA Securities calculated terminal values for CPRL by applying a selected range of perpetuity growth rates of 2.25% to 2.75%

to CPRL's normalized free cash flows in the terminal year. BofA Securities then calculated implied equity value reference ranges per share of CPRL common shares (rounded to the nearest $0.05) by deducting from this range of present values CPRL's net debt as of June 30, 2021, as provided by KCS management, and adding net pension assets as of June 30, 2021, as reflected in CPRL's public filings, at the direction of KCS management, and dividing the result by the number of fully-diluted shares of CPRL common shares outstanding (calculated on a treasury stock method basis, based on information provided by the management of KCS). The cash flows were discounted to present value as of June 30, 2021, utilizing mid-year discounting convention, and using a discount rate range of 6.0% to 7.5%, which was based on an estimate of CPRL's weighted average cost of capital. A growth rate range of 2.25% to 2.75% was based on BofA Securities' professional judgment and experience and represents long-term growth outlook for the business. The discount rate range reflects CPRL's estimated weighted average cost of capital, which was calculated by multiplying the estimated cost of each capital source (debt and equity) by its relevant weight, and then adding the products together. The estimated cost of equity was obtained using the capital asset pricing model (which takes into account the risk-free rate, the levered beta and the applicable equity market risk premium) and the estimated cost of debt was based on CPRL's estimated borrowing cost. Net debt as of June 30, 2021 was based on the balance sheet provided in CPRL's Form 10-Q dated July 29, 2021, which reported debt of $6,978 million and cash of $714 million. The calculation of fully diluted shares was based on 666.8 million common shares outstanding and other dilutive shares such as options and performance shares. Net pension assets as of June 30, 2021 were based on the balance sheet provided in CPRL's Form 10-Q dated July 29, 2021, which reported $237 million.. This analysis indicated the following approximate implied equity value reference range per share of CPRL common shares (rounded to the nearest $0.05), as compared to the closing price of the CPRL common shares on September 13, 2021 of $68.55 and the closing price of the CPRL common shares on March 19, 2021(which was the last trading day prior to the announcement of the execution of the prior CP merger agreement) of $75.70:

Implied Equity Value Reference Range Per Share of CPRL Common Shares (taking into account the share split)
$67.25 - $111.50

Other Factors

BofA Securities also noted certain additional factors that were not considered part of BofA Securities' financial analyses with respect to its opinion but were referenced for informational purposes, including, among other things the following:

- *52-Week Trading Range.* BofA Securities reviewed the trading range of the shares of CPRL common shares for the 52-week period ended March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement), which was $36.27 to $76.75 (taking into account the share split).
- *Wall Street Analysts Price Targets.* BofA Securities reviewed 26 publicly available equity research analyst price targets for the CPRL common shares available as of March 19, 2021 (which was the last trading day prior to the announcement of the execution of the prior CP merger agreement), and noted that the range of such price targets (discounted by one year at CPRL's estimated mid-point cost of equity of 7.3% and rounded to the nearest $0.05) was $63.90 to $75.50 (taking into account the share split). The 7.3% discount rate reflects CPRL's estimated mid-point cost of equity, which was selected based on CPRL's observable cost of equity.

Summary of Material Pro Forma Financial Analysis

Has/Gets Analysis

BofA Securities performed a Has/Gets Analysis to calculate the theoretical change in value for holders of KCS common stock resulting from the transaction based on a comparison of (i) the pro forma ownership by holders of KCS common stock of CPRL after giving effect to the transaction, and (ii) the 100% ownership by holders of

KCS common stock of KCS common stock on a stand-alone basis. For KCS common stock on a stand-alone basis, BofA Securities used the reference range obtained in its discounted cash flow analysis described above under "*Summary of Material Financial Analyses of KCS – Discounted Cash Flow Analysis*." BofA Securities then performed the same analysis by calculating the range of implied per share equity values allocable to holders of KCS common stock on a pro forma basis, giving effect to the transaction, by assuming approximately 28% pro forma ownership, based on the number of shares of CPRL common shares estimated to be issued to holders of KCS common stock in the transaction, utilizing the results of the standalone discounted cash flow analyses for KCS and CPRL described above under "*Summary of Material Financial Analyses of KCS – Discounted Cash Flow Analysis*" and under "*Summary of Material Financial Analyses of CPRL – Discounted Cash Flow Analysis*," and taking into account the KCS management assumed synergies on the basis of (i) a projected $990 million in EBITDA synergies as provided by KCS management (referred to in this section as the "$990 million synergy case"), which also included $20 million of projected D&A and Capex synergies, for total projected gross synergies of $1,010 million, and (ii) a projected $377 million in EBITDA synergies as provided by KCS management (referred to in this section as the "$377 million synergy case"), which also included $23 million of projected D&A and Capex synergies for total projected gross synergies of $400 million. BofA Securities calculated the present value of the synergies (including after-tax costs to achieve such synergies) as of June 30, 2021 by using a discount rate range of 6.0% to 7.5%. The discount rate range of 6.0% to 7.5% was based on BofA Securities' professional judgment and experience and obtained using the capital asset pricing model for the estimated cost of equity (which takes into account the risk-free rate, the levered beta and the applicable equity market risk premium) and the estimated cost of debt. Estimated additional net debt of $10.3 billion was based on announced transaction debt of $8.5 billion and estimated transaction fees and expenses as well as inclusion of $1.4 billion in break fees and reimbursements. BofA Securities then compared these implied per share equity value reference ranges, which were further adjusted by an estimated additional net debt from the transaction and $90.00 per share cash consideration, to the implied per share equity value reference ranges derived for KCS on a standalone basis utilizing the results of the standalone discounted cash flow analysis for KCS described above.

This analysis yielded the following implied per share equity value reference ranges for KCS common stock on a stand-alone basis and on a pro forma basis (rounded to the nearest $1.00):

Range Per Share of KCS common stock	Implied Equity Value Reference	
	Pro-Forma $990 Million Synergy Case	Pro-Forma $377 Million Synergy Case
Stand-Alone		
$206 - $352	$290 - $444	$268 - $409

Miscellaneous

As noted above, the discussion set forth above in "*Summary of Material Financial Analyses of KCS*," "*Summary of Material Financial Analyses of CPRL*" and "*Summary of Material Pro Forma Financial Analysis*" represents a brief summary of the material financial analyses presented by BofA Securities to the KCS board in connection with its opinion, and is not a comprehensive description of all analyses undertaken or factors considered by BofA Securities in connection with its opinion. The preparation of a financial opinion is a complex analytical process involving various determinations as to the most appropriate and relevant methods of financial analysis and the application of those methods to the particular circumstances and, therefore, a financial opinion is not readily susceptible to partial analysis or summary description. BofA Securities believes that its analyses summarized above must be considered as a whole. BofA Securities further believes that selecting portions of its analyses and the factors considered or focusing on information presented in tabular format, without considering all analyses and factors or the narrative description of the analyses, could create a misleading or incomplete view of the processes underlying BofA Securities' analyses and opinion. The fact that any specific analysis has been referred to in the summary above is not meant to indicate that such analysis was given greater weight than any other analysis referred to in the summary.

In performing its analyses, BofA Securities considered industry performance, general business and economic conditions and other matters, many of which are beyond the control of KCS and CPRL. The estimates of the

future performance of KCS and CPRL in or underlying BofA Securities' analyses are not necessarily indicative of actual values or actual future results, which may be significantly more or less favorable than those estimates or those suggested by BofA Securities' analyses. These analyses were prepared solely as part of BofA Securities' analysis of the fairness, from a financial point of view, to the holders of KCS common stock of the merger consideration, to be received by such holders in the transaction and were provided to the KCS board in connection with the delivery of BofA Securities' opinion. The analyses do not purport to be appraisals or to reflect the prices at which a company might actually be sold or acquired or the prices at which any securities have traded or may trade at any time in the future. Accordingly, the estimates used in, and the ranges of valuations resulting from, any particular analysis described above are inherently subject to substantial uncertainty and should not be taken to be BofA Securities' view of the actual values of KCS or CPRL.

The type and amount of consideration payable in the transaction was determined through negotiations between KCS and CPRL, rather than by any financial advisor, and was approved by the KCS board. The decision to enter into the merger agreement was solely that of the KCS board. As described above, BofA Securities' opinion and analyses were only one of many factors considered by the KCS board in its evaluation of the transaction and should not be viewed as determinative of the views of the KCS board or management or any other party with respect to the transaction or the merger consideration.

KCS has agreed to pay BofA Securities for its services in connection with the transaction an aggregate fee, which is currently estimated, based on the information available as of the date of announcement, to be approximately $63 million, $5 million of which was paid to BofA Securities upon delivery of its opinion in connection with the execution of the prior CP merger agreement announced in March 2021, $2.5 million of which was paid upon delivery of BofA Securities' opinion in connection with the alternate proposed transaction involving CN announced in May 2021, $2.5 million of which is payable upon the rendering of its opinion in connection with the transaction and the remainder of which is payable upon the closing of the transaction. KCS also has agreed to reimburse BofA Securities for its expenses incurred in connection with BofA Securities' engagement and to indemnify BofA Securities, any of its affiliates, its and their respective directors, officers, employees and agents and each other person controlling BofA Securities or any of its affiliates, against certain liabilities, including liabilities under the federal securities laws, arising out of BofA Securities' engagement.

BofA Securities and its affiliates comprise a full service securities firm and commercial bank engaged in securities, commodities and derivatives trading, foreign exchange and other brokerage activities, and principal investing as well as providing investment, corporate and private banking, asset and investment management, financing and financial advisory services and other commercial services and products to a wide range of companies, governments and individuals. In the ordinary course of BofA Securities' businesses, BofA Securities and its affiliates may invest on a principal basis or on behalf of customers or manage funds that invest, make or hold long or short positions, finance positions or trade or otherwise effect transactions in equity, debt or other securities or financial instruments (including derivatives, bank loans or other obligations) of KCS, CPRL and certain of their respective affiliates.

BofA Securities and its affiliates in the past have provided, currently are providing, and in the future may provide, investment banking, commercial banking and other financial services to KCS and its affiliates and have received, or in the future may receive, compensation for the rendering of these services, including (i) having acted as a joint bookrunner on certain debt capital markets transactions for KCS, (ii) having acted as a dealer-manager on an accelerated share repurchase transaction for KCS and (iii) having acted or acting as administrative agent, co-lead arranger and joint bookrunner for, and as a lender (including a letter of credit lender) under, KCS's $600 million senior unsecured revolving credit facility due March 8, 2024. From September 1, 2019, through August 31, 2021, BofA Securities and its affiliates derived aggregate revenues from KCS and its affiliates of approximately $10.4 million for corporate and/or investment banking services, which includes the fee received upon delivery of its opinion in connection with the CN proposal.

In addition, BofA Securities and its affiliates in the past have provided, currently are providing, and in the future may provide, investment banking, commercial banking and other financial services to CPRL and its affiliates and

have received or in the future may receive compensation for the rendering of these services, including (i) having acted as a bookrunning manager and/or co-manager on certain debt capital markets transactions for CPRL, (ii) having acted or acting as a lender under CPRL's $1.3 billion revolving credit facility, which consists of a $1.0 billion tranche and a $300 million tranche, which was amended on September 24, 2021 to extend the maturity dates of such tranches to September 27, 2026 and September 27, 2023, respectively, and (iii) having provided or providing certain treasury services and products to CPRL. From September 1, 2019, through August 31, 2021, BofA Securities and its affiliates derived aggregate revenues from CPRL of approximately $6.6 million for corporate and/or investment banking services. In addition, BofA Securities received a customary fee of less than $100,000 in connection with its commitment to act as a lender under CPRL's amended revolving credit facility, which was received subsequent to such period.

KCS Unaudited Prospective Financial Information

The prospective financial information included in this section has been prepared by, and is the responsibility of, KCS's management. This prospective financial information was not prepared with a view toward compliance with published guidelines of the SEC or the guidelines established by the American Institute of Certified Public Accountants for preparation or presentation of prospective financial information.

Neither Deloitte LLP nor PricewaterhouseCoopers LLP has audited, reviewed, examined, compiled nor applied agreed-upon procedures with respect to the accompanying prospective financial information and, accordingly, neither Deloitte LLP nor PricewaterhouseCoopers LLP expresses an opinion or any other form of assurance with respect thereto. The PricewaterhouseCoopers LLP report incorporated by reference in this document relates to KCS's previously issued financial statements. It does not extend to the prospective financial information and should not be read to do so.

Summary of KCS Prospective Financial Information

KCS Unaudited Prospective Financial Information

As described under the section of this proxy statement/prospectus entitled "*The KCS Merger Proposal—Background of the Transaction*," on page 49, KCS management maintains the KCS long-range plan, which is periodically updated and reviewed with the KCS board, that reflects KCS management's financial and business outlook for KCS over a ten-year period. This KCS long-range plan was reviewed by the KCS board in connection with its consideration of a transaction with CPRL, CN and other potential strategic alternatives throughout the latter half of 2020 continuing through its meeting on September 15, 2021. The KCS long-range plan included certain unaudited prospective financial information concerning KCS on a standalone basis for the fiscal years ending December 31, 2021 through December 31, 2029. We refer to these unaudited projections as the "KCS management unaudited KCS projections". The KCS management unaudited KCS projections were provided to Morgan Stanley and BofA Securities, which were directed by KCS management to use and rely upon the KCS management unaudited KCS projections for purposes of their respective financial analyses and fairness opinions. In addition, certain of the KCS management unaudited KCS projections were provided to CPRL, the CPRL board and their respective financial advisors, BMO, Goldman Sachs and Evercore.

In connection with the transaction, KCS management also prepared certain unaudited prospective financial information concerning CPRL on a standalone basis using (i) the CPRL five-year plan (as prepared by CPRL management and provided to KCS management) and (ii) extrapolations prepared by KCS management on the basis of the CPRL five-year plan for the fiscal years ending December 31, 2026 through December 31, 2029. Such unaudited prospective financial information was translated into U.S. dollar amounts from the original Canadian dollar amounts presented in the CPRL five-year plan based on an assumed foreign exchange ratio of 1.25x. We refer to these unaudited projections as the "KCS management unaudited CPRL projections," and the KCS management unaudited KCS projections and the KCS management unaudited CPRL projections, collectively, as the "KCS management unaudited projections". The KCS management unaudited CPRL

projections were provided to the KCS board in connection with its consideration of the transaction as well as to Morgan Stanley and BofA Securities, which were directed by KCS management to use and rely upon the KCS management unaudited CPRL projections for purposes of their respective financial analyses and fairness opinions.

The KCS management unaudited projections were prepared treating KCS and CPRL, respectively, on a standalone basis, without giving effect to the transaction, including any impact of the negotiation or execution of the transaction, the expenses that may be incurred in connection with the transaction or the consummation thereof, the potential synergies that may be achieved by the combined company as a result of the transaction, the effect of any business or strategic decision or action that has been or will be taken as a result of the merger agreement having been executed or in anticipation of the transaction, or the effect of any business or strategic decisions or actions which would likely have been taken if the merger agreement had not been executed but which were instead altered, accelerated, postponed or not taken in anticipation of the transaction.

In connection with the transaction, KCS management prepared pro forma analyses, which were presented to the KCS board, that included CPRL's estimated potential earnings before interest, taxes, depreciation and amortization (which we refer to as "EBITDA") synergies of $990 million (consisting of $810 million from revenue synergies and $180 million from operating and expense synergies), together with an alternative case showing a lower estimate of potential EBITDA synergies of $377 million (consisting of $222 million from revenue synergies and $155 million from operating and expense synergies). The primary difference between the two cases was a more conservative assumption on revenue synergies (specifically the combined company's share of bulk commodities) in the $377 million EBITDA synergies case. The assumptions used in the $990 million EBITDA synergies case were based on CPRL's assessment of market opportunities that the combined company could reasonably be expected to capture, leading to a substantially greater estimate of revenue synergies. KCS management believed, however, that for purposes of the KCS board's consideration of the transaction, the KCS board should also consider a synergies estimate reflecting the more conservative assumptions. The $377 million EBITDA synergies case also used slightly more conservative assumptions with respect to operating and expense synergies. The pro forma analyses, in each case, assumed a phase-in of synergies over the three years following CPRL's receipt of STB final approval, beginning in fiscal year 2023. KCS management, among other things, assumed that the aggregate cost of achieving the projected synergies would be, with respect to the $990 million synergies case, $180 million, and with respect to the $377 million synergies case, $155 million, with half of the costs to be incurred in the first year of the phase-in and the remaining half to be incurred in the second year of the phase-in. KCS management also assumed, with respect to the $990 million synergies case, no dissynergies, $20 million of capital expenditure and depreciation and amortization synergies and a one-time capital investment of $50 million, and, with respect to the $377 million synergies case, $50 million of dissynergies and $23 million of capital expenditure and depreciation and amortization synergies. These assumed dissynergies or additional synergies were subtracted from or added to the EBITDA synergies estimates. The assumed EBITDA synergies, including the cost to achieve such synergies, included in the two cases (which we refer to collectively as the "KCS management assumed synergies") are not reflected in the KCS management unaudited projections. The KCS management assumed synergies were provided to Morgan Stanley and BofA Securities, which were directed by KCS management to use and rely upon the KCS management assumed synergies for purposes of their respective financial analyses and fairness opinions.

Other than annual financial guidance provided to investors, which is generally updated each quarter, KCS does not as a matter of course make public long-term forecasts or projections as to future performance, revenues, earnings or other results, due to, among other reasons, the inherent difficulty of accurately predicting financial performance for future periods and the uncertainty of the underlying assumptions and estimates. However, the financial projections by KCS management are being included in this proxy statement/prospectus to give shareholders access to certain non-public information provided to the KCS board and KCS's financial advisors and to CPRL and the CPRL board and their respective financial advisors. The inclusion of the financial projections by KCS should not be regarded as an indication that the KCS board, KCS, the CPRL board, CPRL, Morgan Stanley, BofA Securities, BMO, Goldman Sachs or Evercore or any other recipient of this information

considered, or now considers, it to be an assurance of the achievement of future results or an accurate prediction of future results, and they should not be relied on as such.

This prospective financial information was not prepared with a view toward compliance with published guidelines of the SEC or the guidelines established by the American Institute of Certified Public Accountants for preparation or presentation of prospective financial information, or GAAP, but, in the view of KCS's management were prepared on a reasonable basis, reflected the best available estimates and judgments at the time of preparation, and presented as of the time of preparation, to the best of KCS's management's knowledge and belief, the expected course of action and the expected future financial performance of KCS or CPRL, as applicable. However, this information is not fact and should not be relied upon as being necessarily indicative of future results, and readers of this proxy statement/prospectus are cautioned not to place undue reliance on the KCS management unaudited projections or the KCS management assumed synergies. Although KCS's management believes there is a reasonable basis for the KCS management unaudited projections and the KCS management assumed synergies, KCS cautions stockholders that future results could be materially different from the KCS management unaudited projections and the KCS management assumed synergies. This summary of the KCS management unaudited projections and the KCS management assumed synergies is included in this proxy statement/prospectus because the KCS management unaudited projections and the KCS management assumed synergies were provided to KCS's financial advisors and to the KCS board for purposes of considering and evaluating the transaction and the merger agreement.

Other than annual financial guidance provided to investors, CPRL does not as a matter of course share with third parties long-term forecasts or projections as to future performance, revenues, earnings or other results due to, among other reasons, the inherent difficult of accurately predicting financial performance for future periods and the uncertainty of underlying assumptions and estimates. CPRL's management prepared and provided to KCS's management the CPRL five-year plan solely in connection with KCS's consideration of a transaction with CPRL. The fact that the CPRL five-year plan was provided to KCS management should not be regarded as an indication that the CPRL board, CPRL, KCS or any other recipient of the CPRL five-year plan considered, or now considers, it to be an assurance of the achievement of future results or an accurate prediction of future results of CPRL, and it should not be relied on as such.

The KCS management unaudited projections and the KCS management assumed synergies are subject to estimates and assumptions in many respects and, as a result, subject to interpretation. While presented with numerical specificity, the KCS management unaudited projections and the KCS management assumed synergies are based upon a variety of estimates and assumptions that are inherently uncertain, though considered reasonable by KCS's management as of the date of their preparation. These estimates and assumptions may prove to be inaccurate for any number of reasons, including general economic conditions, industry trends, the regulatory environment, competition, and the risks discussed in this proxy statement/prospectus under the sections entitled "*Cautionary Statement Regarding Forward-Looking Statements*" and "*Risk Factors*" beginning on pages 36 and 21, respectively. See also "*Where You Can Find Additional Information*" beginning on page 229. The KCS management unaudited projections and the KCS management assumed synergies also reflect assumptions as to certain business decisions that are subject to change. Because the KCS management unaudited projections were developed for KCS on a standalone basis without giving effect to the transaction, they do not reflect any divestitures or other restrictions that may be imposed in connection with the receipt of any necessary governmental or regulatory approvals, any synergies that may be realized as a result of the transaction or any changes to KCS's or CPRL's operations or strategy that may be implemented after completion of the transaction. There can be no assurance that the KCS management unaudited projections or the KCS management assumed synergies will be realized, and actual results may differ materially from those shown. Generally, the further out the period to which the KCS management unaudited projections and the KCS management assumed synergies relate, the less predictable and more unreliable the information becomes.

The KCS management unaudited projections contain certain non-GAAP financial measures that KCS believes are helpful in understanding its past financial performance and future results. KCS management regularly uses a

variety of financial measures that are not in accordance with GAAP for forecasting, budgeting and measuring financial performance. The non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable GAAP measures. While KCS believes that these non-GAAP financial measures provide meaningful information to help investors understand the operating results and to analyze KCS's financial and business trends on a period-to-period basis, there are limitations associated with the use of these non-GAAP financial measures. These non-GAAP financial measures are not prepared in accordance with GAAP, are not reported by all of KCS's competitors and may not be directly comparable to similarly titled measures of KCS's competitors due to potential differences in the exact method of calculation.

Financial measures included in projections provided to a financial advisor and a board of directors in connection with a business combination transaction are excluded from the definition of "non-GAAP financial measures" under the rules of the SEC, and therefore such financial measures are not subject to SEC rules regarding disclosures of non-GAAP financial measures, which may otherwise require a reconciliation of a non-GAAP financial measure to a GAAP financial measure. Reconciliations of non-GAAP financial measures were not provided to and were not relied on by Morgan Stanley or BofA Securities for purposes of their respective financial analyses and opinions or by the KCS board in connection with its consideration of the transaction, nor were they provided to CPRL or its financial advisors. Accordingly, a reconciliation of these non-GAAP financial measures has not been provided.

None of KCS, CPRL, the combined company or their respective affiliates, advisors, officers, directors or other representatives can provide any assurance that actual results will not differ from the KCS management unaudited projections or the KCS management assumed synergies, and none of them undertakes any obligation to update, or otherwise revise or reconcile, the KCS management unaudited projections or the KCS management assumed synergies to reflect circumstances existing after the date the KCS management unaudited projections or the KCS management assumed synergies were prepared or to reflect the occurrence of future events, even in the event that any or all of the assumptions underlying the KCS management unaudited projections or the KCS management assumed synergies, as applicable, are shown to be in error. Except as required by applicable securities laws, KCS does not intend to make publicly available any update or other revision to the KCS management unaudited projections or the KCS management assumed synergies, even in the event that any or all assumptions are shown to be in error. None of KCS or its affiliates, advisors, officers, directors or other representatives has made or makes any representation to any KCS stockholder or other person regarding KCS's ultimate performance compared to the information contained in the KCS management unaudited projections or the KCS management assumed synergies or that forecasted results will be achieved. KCS has made no representation to CPRL, in the merger agreement or otherwise, concerning the KCS management unaudited projections or the KCS management assumed synergies.

The prospective financial information included in this document has been prepared by, and is the responsibility of, KCS management. Neither PricewaterhouseCoopers LLP nor Deloitte LLP have audited, reviewed, examined, compiled nor applied agreed-upon procedures with respect to the accompanying prospective financial information and, accordingly, neither PricewaterhouseCoopers LLP nor Deloitte LLP express an opinion or any other form of assurance with respect thereto. The PricewaterhouseCoopers LLP report incorporated in this document relates to KCS's previously issued financial statements, and the Deloitte LLP reports incorporated in this document relate to CPRL's previously issued financial statements. These reports do not extend to the prospective financial information and should not be read to do so.

The following table presents a summary of the KCS management unaudited KCS projections that were reviewed by the KCS board in connection with its consideration of the transaction and provided to Morgan Stanley and BofA Securities for purposes of their respective financial analyses and fairness opinions. In addition, certain of the KCS management unaudited KCS projections were provided to CPRL.

(Dollars in millions)	FY'21	FY'22	FY'23	FY'24	FY'25	FY'26	FY'27	FY'28	FY'29
Revenue	$ 2,992	$ 3,292	$ 3,554	$ 3,748	$ 3,946	$ 4,143	$ 4,344	$ 4,556	$ 4,770
EBITDA(1)	1,551	1,827	2,033	2,174	2,318	2,462	2,610	2,768	2,928
Capital Expenditures	500	541	586	618	651	684	717	752	787
EPS(2)	8.29	10.75	12.60	14.21	16.06	18.04	20.20	22.60	25.20
Unlevered Free Cash Flow(3)	364(4)	779	940	1,013	1,089	1,164	1,242	1,324	1,408

(1) EBITDA is defined as earnings before interest, taxes, depreciation and amortization.
(2) EPS is defined as diluted earnings per share adjusted for the depreciation component of income tax driven by the difference in the Mexican peso to U.S. dollar exchange rate that existed at the time assets in Mexico were put into service and the current Mexican peso to U.S. dollar exchange rate.
(3) Unlevered Free Cash Flow is defined as EBITDA less depreciation and amortization, plus other income, less other expenses, tax affected, plus depreciation and amortization, adjusted for changes in net working capital, less capital expenditures and less other investing activities. The calculation of Unlevered Free Cash Flow was not expressly included in the KCS management unaudited KCS projections but was derived from the KCS management unaudited KCS projections and is included for reference.
(4) Figure represents July – December 2021.

The following table presents a summary of the KCS management unaudited CPRL projections that were provided to the KCS board in connection with its consideration of the transaction as well as to Morgan Stanley and BofA Securities for purposes of their respective financial analyses and fairness opinions.

(Dollars in millions)	FY'21	FY'22	FY'23	FY'24	FY'25	FY'26	FY'27	FY'28	FY'29
Revenue	$ 6,580	$ 7,086	$ 7,498	$ 7,875	$ 8,287	$ 8,694	$ 9,111	$ 9,551	$ 9,995
EBITDA(1)	3,526	3,862	4,127	4,376	4,652	4,943	5,242	5,558	5,878
Capital Expenditures	1,260	1,240	1,200	1,224	1,249	1,310	1,373	1,439	1,506
Unlevered Free Cash Flow(2)	852(3)	1,989	2,267	2,457	2,666	2,603	2,775	2,958	3,143

(1) EBITDA is defined as earnings before interest, taxes, depreciation and amortization.
(2) Unlevered Free Cash Flow is defined as EBITDA less depreciation and amortization, plus other income, less other expenses, tax affected, plus depreciation and amortization, less capital expenditures, less other cash/non-cash expenses, plus land sales and others and plus increase in deferred tax liability.
(3) Figure represents July – December 2021.

Listing of CPRL Common Shares

It is a condition to the completion of the transaction that the CPRL common shares issuable under the merger agreement are approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing requirements.

CPRL must use its reasonable best efforts to cause the CPRL common shares to be issued in the first merger to be approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing conditions, prior to the effective time. Listing will be subject to CPRL fulfilling all the listing requirements of the NYSE and TSX. There can be no assurance that the CPRL common shares will be accepted for listing on the NYSE or the TSX.

Delisting and Deregistration of KCS Common Stock

If the transaction is completed, KCS common stock will be delisted from the NYSE and deregistered under the U.S. Exchange Act, and KCS will no longer be required to file periodic reports with the SEC with respect to KCS common stock.

KCS has agreed to cooperate with CPRL and use its reasonable best efforts to take, or cause to be taken, all actions reasonably necessary, proper or advisable under applicable laws and rules and policies of the NYSE and the SEC to delist the KCS common stock from the NYSE and to terminate its registration under the U.S. Exchange Act as promptly as practicable after the effective time.

Interests of KCS's Directors and Executive Officers in the Transaction

In considering the recommendations of the KCS board, KCS stockholders should be aware that the directors and executive officers of KCS have interests in the transaction that are different from, or in addition to, the interests of KCS stockholders generally. The KCS board was aware of these interests and considered them, among other matters, in evaluating and negotiating the merger agreement, in reaching its decision to approve and declare advisable the merger agreement and the transactions contemplated by the merger agreement, and in recommending to KCS stockholders that the merger agreement be adopted. KCS stockholders should take the interests described below into account in deciding whether to vote "**FOR**" the KCS merger proposal. Note that the transaction will constitute a "change in control" for purposes of the KCS compensation arrangements described below. For purposes of this section, a "qualifying termination" generally means (i) a termination by CPRL, KCS or any of their respective subsidiaries without "cause" or (ii) a termination of employment with "good reason," in each case occurring during the period that begins on the effective time and ends on the second anniversary of the control date.

For purposes of this disclosure, the named executive officers of KCS are as follows:

Name of Executive Officer	Position
Patrick J. Ottensmeyer	President and Chief Executive Officer
Michael W. Upchurch	Executive Vice President and Chief Financial Officer
Jeffrey M. Songer	Executive Vice President Strategic Merger Planning
Brian D. Hancock(1)	Executive Vice President and Chief Innovation Officer
Michael J. Naatz	Executive Vice President and Chief Marketing Officer

(1) Mr. Hancock's employment with KCS terminated on July 2, 2021.

For purposes of this disclosure, the other executive officers are John F. Orr, Executive Vice President, Operations; Warren K. Erdman, Executive Vice President, Administration and Corporate Affairs; Oscar Augusto Del Cueto Cuevas, KCSM President, General Manager and Executive; Representative Lora S. Cheatum, Senior Vice President and Chief Human Resources Officer; Suzanne M. Grafton, Vice President and Chief Accounting Officer; and Adam J. Godderz, Senior Vice President and Chief Legal Officer and Corporate Secretary.

Treatment of KCS Equity Awards

Treatment of KCS Stock Options. Each KCS Stock Option, whether vested or unvested, that is outstanding as of immediately prior to the effective time will, at the effective time, become fully vested and be converted into the right to receive an amount of cash equal to (i) the excess, if any of (A) the value of the merger consideration over (B) the per share exercise price of such option multiplied by (ii) the total number of shares of KCS common stock subject to such option as of immediately prior to the effective time, less applicable tax withholding.

Treatment of KCS Restricted Share Awards. Each KCS restricted share award that is outstanding as of immediately prior to the effective time and was granted prior to March 21, 2021, will, at the effective time, become fully vested and be converted into the right to receive (i) the merger consideration in respect of each share of KCS common stock subject to such KCS restricted share award as of immediately prior to the effective time and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award, less applicable tax withholding.

Each KCS restricted share award that is outstanding as of immediately prior to the effective time and was granted on or after March 21, 2021, will, at the effective time, be converted into an award that entitles the holder thereof, upon vesting, to receive (i) an amount in cash equal to the value of the merger consideration in respect of each share of KCS common stock subject to such KCS restricted share award and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award. Each such cash- based award will have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding KCS restricted share award, except that such award will vest in full upon a qualifying termination.

Treatment of KCS Performance Share Awards. Each award of performance shares that corresponds to shares of KCS common stock (which we refer to as a "KCS performance share award") that is outstanding as of immediately prior to the effective time will, at the effective time, be converted into an award that entitles the holder thereof, upon vesting, to receive an amount in cash equal to the value of the merger consideration multiplied by 200% of the target number of shares of KCS common stock covered by the KCS performance share award as of immediately prior to the effective time. Each cash-based award will have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding KCS performance share award, except that performance-based vesting conditions will no longer apply and the award will vest in full upon a qualifying termination.

Treatment of Director Deferred Stock Awards. Each share of director deferred stock of KCS that is outstanding as of immediately prior to the effective time, will, at the effective time, be converted into the right to receive the merger consideration, less applicable tax withholding.

For an estimate of the value of unvested equity awards that would vest assuming that the transaction closes on December 31, 2021 and each of the named executive officers experiences a qualifying termination on that date, see "*Quantification of Potential Payments and Benefits to KCS's Named Executive Officers in Connection with the Transaction*" below on page 105. The estimated aggregate value of unvested and outstanding equity awards and any corresponding accrued but unpaid cash dividends held by all six KCS executive officers, other than the KCS named executive officers, that would vest assuming that the transaction closes on December 31, 2021 and all such executive officers experience qualifying terminations on that date is $16,646,120 (in the aggregate). Additionally, upon the completion of the merger, non-employee directors of KCS will receive amounts previously earned in connection with their service on the board of directors of KCS that were deferred in the form of KCS director deferred stock awards.

Executive Severance Arrangements

Each of KCS's executive officers is party to a severance agreement with KCS. In connection with the transactions contemplated by the merger agreement, on September 15, 2021, KCS entered into letter agreements with seven of KCS's executive officers, including each of KCS's named executive officers other than Mr. Hancock. The letter agreements: (1) provide that the protection period for enhanced change in control severance (the "protection period") will run from the date the transaction is completed through the two-year anniversary of the control date; (2) clarify that, for purposes of determining an executive officer's pro-rata bonus and target bonus portion of cash severance, the "target award" will be the greater of the target award for the calendar year in which the executive officer's employment is terminated and the target award for the calendar year in which the change in control occurs and (3) for Mr. Upchurch and two executive officers who are not

named executive officers, establish the multiple applicable to the base salary and target bonus components of his or her severance during the protection period at three times in exchange for waiving certain rights these officers had under their severance agreement in connection with the change in control resulting from the transaction.

In addition, in consideration of (1) certain acknowledgments from the applicable executive officers that the completion of the transaction will not, in and of itself, constitute "good reason" under the executive officers' severance arrangements and (2) the extension by one year of the post-termination non-competition period for each of the executive officers other than Mr. Songer, the letter agreements provide that, in the event that an executive officer receives any payments or benefits that are subject to tax under Section 4999 of the Code, the executive officer will receive a payment that puts the executive officer in the same after-tax position as though such tax did not apply.

One executive officer who is not a named executive officer is party to an employment agreement with KCS that was in effect prior to entry into the merger agreement and already provided for a make-whole payment and severance benefits as described below.

One executive officer who is not a named executive officer and was not previously party to a severance agreement, entered into an employment agreement with KCS providing for severance payments and benefits consistent with those provided to the other executive officers, as described in the paragraph below, as well as a make-whole payment on the same terms and conditions described above.

One executive officer who is not a named executive officer is entitled to receive 90 days of salary, plus an additional 20 days of salary for each year of service upon a qualifying termination, as well as other statutory benefits in connection with the executive officer's service, pursuant to Mexican law.

Upon a qualifying termination, each executive officer, other than the executive officer described in the immediately preceding paragraph, will be entitled to receive:

(i) cash severance equal to:

(A) three times the sum of the executive officer's base salary and target bonus, in the case of Messrs. Ottensmeyer, Upchurch and two executive officers who are not named executive officers;

(B) two times the sum of the executive officer's base salary and target bonus, in the case of Messrs. Songer, Naatz and one executive officer who is not a named executive officer; and

(C) 320% of base salary for two executive officers who are not named executive officers,

(ii) for all executive officers, other than two executive officers who are not named executive officers, the executive officer's target bonus for the fiscal year in which the termination occurs, prorated for the number of days in the calendar year prior to the executive officer's termination of employment,

(iii) for all executive officers, other than one executive officer who is not a named executive officer, monthly cash reimbursement payments for the difference between the monthly COBRA premium paid by the executive officer and the monthly premium amount paid by similarly situated active executives of KCS for an 18-month period,

(iv) for one executive officer, who is not a named executive officer, regardless of whether he incurs a qualifying termination, three years of continued participation in all of KCS's health, benefit, welfare, retirement and other similar plans, including employee stock ownership plans, and

(v) for all executives, other than two executive officers, who are not named executive officers, outplacement benefits for one year, with a maximum value of $25,000.

The severance amounts described in clause (i) above are payable in equal installments over 12 months.

Other than in the case of one executive officer who is not a named executive officer, the severance benefits described above are subject to the executive officer executing an arbitration agreement and signing a general release of employment-related claims in favor of KCS. In addition, the agreements include, for each executive officer other than one executive officer who is not a named executive officer, a prohibition on competition for a period of two years following the executive officer's termination of employment (one year for each of Messrs. Songer and Hancock and one executive officer who is not a named executive officer), and a perpetual non-disparagement obligation and employee and customer non-solicitation restrictions that apply for a period of two years following the executive officer's termination of employment (one year for each of Messrs. Songer and Hancock and one executive officer who is not a named executive officer). All executive officers are also subject to a perpetual confidentiality obligation.

The estimated value of the make-whole payment for each named executive officer is set forth below in the table entitled "Golden Parachute Compensation Table" and, for purposes of this quantification, does not reflect the impact of any common approaches to mitigating potential tax exposure under Section 4999 of the Code, such as ascribing value to post-closing non-competition covenants or otherwise treating amounts paid as reasonable compensation for services rendered following the closing. Based on the same assumptions set forth in the subsection below entitled "*Quantification of Potential Payments and Benefits to KCS's Named Executive Officers in Connection with the Transaction*" and in footnote 4 to the "Golden Parachute Compensation Table," the estimated aggregate make-whole payments for all of KCS's executive officers who are not named executive officers would be $8,121,350, which value is a conservative estimate and does not reflect the impact of any common approaches to mitigating potential tax exposure under Section 4999 of the Code, such as ascribing value to post-closing non-competition covenants or otherwise treating amounts paid as reasonable compensation for services rendered following the closing.

The estimated value of the severance payments and benefits for each of the named executive officers is set forth below in the table entitled "Golden Parachute Compensation Table." Based on the same assumptions set forth in the subsection below entitled "*Quantification of Potential Payments and Benefits to KCS's Named Executive Officers in Connection with the Transaction*" and in footnote 1 to the "Golden Parachute Compensation Table," the estimated aggregate cash severance payment for all of KCS's executive officers who are not named executive officers, is $10,417,300, of which the portion applicable to the non-U.S. executive officer was converted from pesos to USD based on the September 27, 2021 exchange rate published by the Bank of Mexico.

Retention Program

KCS has established a cash-based retention program for KCS employees that is designed to promote retention, incentivize the completion of the transaction and reward extraordinary effort. Each award granted pursuant to the retention program will vest and become payable in two installments: (1) 25% on the earlier of (a) the closing date and (b) February 21, 2022, and (2) 75% on the earlier of (a) ninety (90) days after the control date and (b) June 1, 2023, subject, in each case, to the recipient's continued employment through the applicable vesting dates; *provided, however*, that if the recipient experiences a qualifying termination, then the recipient will be entitled to any then unpaid portion of the recipient's award. KCS has granted retention awards in the amount of $2,120,000; $1,082,000; $1,076,000 and $1,018,000 to each of Messrs. Ottensmeyer, Upchurch, Songer and Naatz, respectively. KCS has granted retention awards equal to $4,384,500 in the aggregate to the KCS executive officers who are not named executive officers.

Treatment of 2021 and 2022 Bonuses

KCS and CPRL have agreed that, with respect to the 2021 and 2022 annual bonuses for all employees, including the executive officers, if the control date has not occurred prior to the date that such annual bonuses are payable,

KCS will be permitted to pay such bonuses at the greater of (i) target performance and (ii) 130% of actual performance, but in no event greater than 200% of target, and if the control date has occurred prior to the date that such annual bonuses are payable, then CPRL will pay such bonuses at the applicable greater of amount.

Continued Indemnification and Insurance

From and after the effective time, CPRL and the second surviving corporation will indemnify and hold harmless each current and former director, officer or employee of KCS and each person who served as a director, officer, member, trustee or fiduciary of another corporation, partnership, joint venture, trust, pension or other employee benefit plan or enterprise at the request of or for the benefit of KCS or its subsidiaries, in each case determined as of the effective time, against any costs or expenses, judgments, fines, losses, claims, damages, obligations, costs, liabilities and amounts paid in settlement incurred in connection with any actual or threatened claim, action, suit, proceeding or investigation, whether civil, criminal, administrative or investigative, arising out of, relating to or in connection with any action or omission occurring or alleged to have occurred at or prior to the effective time, whether asserted or claimed prior to, at or after the effective time.

Prior to the effective time, KCS will obtain and fully pay for "tail" insurance policies with a claims period of at least six years from and after the effective time with respect to directors' and officers' liability insurance and fiduciary liability insurance on terms and conditions providing substantially equivalent benefits as KCS's existing policies with respect to matters existing or occurring at or prior to the effective time, subject to certain limitation and premium thresholds. For additional details regarding the indemnification and insurance described herein, see the discussion under the section entitled "*The KCS Merger Proposal—Indemnification and Insurance*," on page 157.

Arrangements with CPRL

As of the date hereof, none of our executive officers has entered into any agreement with CPRL or any of its affiliates regarding employment with CPRL or one or more of its affiliates following the consummation of the transaction. Prior to or following the control date certain of our executive officers may have discussions, or may enter into agreements with, CPRL or one of its affiliates regarding employment with CPRL or one or more of its affiliates.

Quantification of Potential Payments and Benefits to KCS's Named Executive Officers in Connection with the Transaction

The information set forth in the table below is intended to comply with Item 402(t) of the SEC's Regulation S-K, which requires disclosure of information about certain compensation for each named executive officer KCS that is based on, or otherwise related to, the transaction. For additional details regarding the terms of the payments and benefits described herein, see the discussion under the subsection entitled "*Interests of KCS's Directors and Executive Officers in the Transaction*," on page 101. The amounts shown in the table below are estimates based on multiple assumptions that may or may not actually occur or be accurate on the relevant date, including the assumptions described below and in the footnotes to the table, and do not reflect certain compensation actions that may occur after the date hereof and before the transaction closes. For purposes of calculating such amounts, the following assumptions were used:

- The relevant price per share of KCS common stock is $273.70, which is the average closing price per share of KCS common stock as reported on the NYSE over the first five business days following the first public announcement of the transaction on September 15, 2021;
- The transaction closes on December 31, 2021, which is the assumed closing date solely for purposes of the disclosure in this section;
- Each named executive officer of KCS experiences a qualifying termination on the assumed closing date of December 31, 2021 and immediately following the closing of the transaction;

- Each named executive officer's base salary rate and annual target bonus remain unchanged from those in effect as of September 27, 2021; and
- Each named executive officer's unvested and outstanding equity awards are as of September 27, 2021 and no named executive officer receives any additional equity grants on or prior to the completion of the transaction.

For purposes of this golden parachute disclosure, "single trigger" refers to payments and benefits that arise as a result of the closing of the transaction and "double trigger" refers to payments and benefits that require two conditions, which are the closing of the transaction and a qualifying termination of employment.

Golden Parachute Compensation Table

Named Executive Officer	Cash ($)(1)	Equity($)(2)	Benefits($)(3)	Make-Whole Payments($)(4)	Total ($)
Patrick J. Ottensmeyer	10,176,000	29,700,200	33,837	11,504,794	51,414,831
Michael W. Upchurch	4,328,000	6,953,418	51,558	3,497,027	14,830,003
Jeffrey M. Songer	3,443,200	7,801,906	51,558	3,104,394	14,401,058
Brian D. Hancock(5)	—	—	—	—	—
Michael J. Naatz	3,104,900	6,814,903	51,508	2,886,389	12,857,700

(1) *Cash Severance and Retention Bonus for Named Executive Officers*. Pursuant to each named executive officer's severance agreement and the amendments to those severance agreements, as applicable, upon a qualifying termination, each named executive officer will become entitled to a cash severance payment equal to (i) the applicable multiple of the applicable named executive officer's base salary and target bonus award plus (ii) the prorated target bonus award for the fiscal year in which the termination occurs. The applicable multiple is 3.0 for Messrs. Ottensmeyer and Upchurch and 2.0 for all other named executive officers. These cash severance payments are conditioned upon the named executive officer executing an arbitration agreement and signing a general release of employment-related claims in favor of KCS. In addition, the named executive officers are subject to non-competition and non-solicitation provisions that apply for a period of two years following the executive officer's qualifying termination of employment (one year for each of Messrs. Songer and Hancock). This column also includes the value of the named executive officer's retention bonus, if any.

The amounts in this column are considered "double trigger" amounts as they will generally only become payable in the event of a qualifying termination of employment following the completion of the transaction or, in the case of the retention bonuses, based on the named executive officer's continued employment for a specified period of time. For additional disclosure related to the amounts disclosed in this column, see the subsections above entitled "*Executive Severance Arrangements*" and "*Retention Program*."

Named Executive Officer	Base Salary Component of Severance ($)	Bonus Component of Severance ($)	Prorated Current-Year Bonus ($)	Retention Bonus ($)	Total ($)
Patrick J. Ottensmeyer	3,180,000	3,657,000	1,219,000	2,120,000	10,176,000
Michael W. Upchurch	1,623,000	1,217,250	405,750	1,082,000	4,328,000
Jeffrey M. Songer	1,076,000	860,800	430,400	1,076,000	3,443,200
Brian D. Hancock	—	—	—	—	—
Michael J. Naatz	1,018,000	712,600	356,300	1,018,000	3,104,900

(2) *Outstanding and Unvested Equity Awards*. The amounts in this column represent the estimated value that may be received by the KCS named executive officers in respect of their unvested and outstanding KCS equity awards. The KCS unvested stock options will vest and be converted at the effective time into the right to receive a cash payment. The value of the cash payment for the KCS stock options is calculated by multiplying the excess of $273.70 over the per share exercise price of the applicable KCS stock option by the number of shares subject to that KCS stock option. The value of the cash payment for the KCS restricted

share awards is calculated by multiplying the number of shares subject to the KCS restricted share award by $273.70 and then adding the accrued but unpaid cash dividends corresponding to each share subject to that KCS restricted share award. The KCS performance share awards will be converted into a cash-based award equal to $273.70 multiplied by 200% of the target number of shares covered by the KCS Performance Share Award. The amounts payable with respect to the KCS stock options and the KCS restricted share awards in this column are considered "single trigger" amounts, as such awards will become payable solely as a result of the closing of the transaction. The amounts payable with respect to the KCS performance share awards are considered "double trigger" amounts, as such awards will become payable in the event of a qualifying termination following the closing of the transaction. The table below assumes that the closing date occurs on December 31, 2021 and reflects the outstanding and unvested equity awards as of September 27, 2021 based on a per share value of $273.70, less the applicable exercise price in the case of stock options.

Named Executive Officer	Value of Unvested Stock Options ($)	Value of Unvested Restricted Share Awards ($)	Value of Unvested Performance Share Awards ($)	Total ($)
Patrick J. Ottensmeyer	4,642,402	3,456,299	21,601,499	29,700,200
Michael W. Upchurch	1,085,604	821,881	5,045,933	6,953,418
Jeffrey M. Songer	1,033,410	1,978,199	4,790,297	7,801,906
Brian D. Hancock	—	—	—	—
Michael J. Naatz	985,402	1,257,069	4,572,432	6,814,903

(3) *Benefits*. The amounts in this column represent the estimated value of the KCS-paid group health care plan continuation coverage during the 18-month period following a qualifying termination of employment for each of the named executive officers and outplacement services of $25,000 for each of the named executive officers. The amounts in this column are considered "double-trigger" amounts as they will only become payable in the event of a qualifying termination of employment following the closing of the transaction.

(4) *Make-Whole Payments*. The amounts listed in this column represent the estimated make-whole payment each named executive officer could become entitled to receive on a "double-trigger" basis upon a qualifying termination of employment following the closing of the transaction (and, for purposes of this quantification, does not contemplate any common approaches to mitigating potential tax exposure under Section 4999 of the Code, such as ascribing value to post-closing non-competition covenants or otherwise treating amounts paid as reasonable compensation for services rendered following the closing). However, in the event that a named executive officer is subject to excise taxes under Section 4999 of the Code solely as a result of "single-trigger" payments and benefits, that named executive officer would also be entitled to receive a make-whole payment, as applicable. In addition to the assumptions described immediately prior to the table above, the amounts in this column are calculated based on a 20% excise tax rate and each named executive officer's estimated effective tax rate, including a federal marginal income tax rate of 37% and applicable federal, state, local and payroll taxes. The actual amount of the make whole-payment for each named executive officer, if any, will not be determinable until after the closing of the transaction. For additional disclosure related to the amounts disclosed in this column, see the sections above titled "*—Executive Severance Arrangements*."

(5) *Mr. Hancock's Separation*. On June 7, 2021, Mr. Hancock notified KCS of his intention to retire effective July 2, 2021. In connection with his retirement, Mr. Hancock entered into a Confidential Separation Agreement and Full and General Release, dated June 8, 2021 with KCS, pursuant to which Mr. Hancock will receive payments totaling $2,000,000 through July 2, 2022, as well as company-provided subsidized medical insurance through such date. Mr. Hancock is not receiving any compensation as a result of the transaction and his unvested KCS equity awards were forfeited upon his retirement.

The CPRL Special Meeting and Shareholder Approval

CPRL shareholders will be required to approve the issuance of such number of CPRL common shares as is necessary under the merger agreement to issue the share consideration. As described in the TSX listing

application to be filed by CPRL, based on the number of shares of KCS common stock outstanding as of September 9, 2021, CPRL anticipated up to 277,960,197 CPRL common shares to be issuable to KCS common stockholders under the terms of the merger agreement, which represents approximately 42% of the issued and outstanding CPRL common shares as of September 9, 2021.

Accordingly, the TSX requires that the share issuance resolution be approved by an ordinary resolution of CPRL shareholders (i.e., a majority of the votes cast by holders of outstanding CPRL common shares represented in person or by proxy and entitled to vote at the CPRL special meeting). Despite the fact that CPRL shareholders are being asked to approve the issuance of up to 277,960,197 CPRL common shares, based on the number of shares of KCS common stock outstanding as of September 9, 2021, CPRL expects that it would issue (at the direction of surviving merger sub and on behalf of surviving merger sub) up to 264,723,997 CPRL common shares in the first merger and is seeking CPRL shareholder approval for the issuance of up to 13,236,200 additional CPRL common shares to accommodate the effects of rounding and for other administrative purposes in accordance with the policies of the TSX.

At the close of business on [—], 2021, there were approximately [—] shares of KCS common stock outstanding (including [—] shares of KCS common stock subject to outstanding KCS restricted share awards) and an aggregate of [—] shares of KCS common stock issuable in connection with KCS director deferred stock. Additionally, up to an aggregate of [—] shares of KCS common stock are issuable under KCS options and KCS performance share awards outstanding and exercisable prior to the effective time. On this basis, up to [—] CPRL common shares may be issued or reserved for issuance under the merger agreement as share consideration to holders of shares of KCS common stock and holders of KCS restricted share awards and KCS director deferred stock. Immediately following the first merger, former holders of KCS common stock are expected to own approximately [—]% of the outstanding CPRL common shares, on a fully diluted basis ([—]% on a basic basis).

The actual number of CPRL common shares to be issued or reserved for issuance under the merger agreement will be determined immediately prior to the effective time based on the exchange ratio, the number of shares of KCS common stock outstanding at such time and the number of KCS restricted share awards and KCS director deferred stock outstanding at such time.

CPRL will be holding the CPRL special meeting to vote on the resolutions necessary to complete the transaction and other matters to be considered by the CPRL shareholders at such special meeting. In addition to the above-mentioned resolution approving the issuance of CPRL common shares to KCS common stockholders in connection with the transaction, at the CPRL special meeting, CPRL shareholders will be asked to approve a special resolution authorizing and approving an amendment to CPRL's articles to change its name to "Canadian Pacific Kansas City," which amendment is conditional upon the occurrence of the control date. CPRL will separately prepare the management information circular in accordance with applicable Canadian securities and corporate laws and distribute such management information circular to its shareholders in connection with the CPRL special meeting.

Accounting Treatment of the Transaction

In accordance with U.S. GAAP, the transaction will be accounted for as a business combination applying the acquisition method of accounting. Accordingly, the total purchase consideration paid by CPRL in connection with the transaction will be allocated to KCS's net assets based on their fair values as of the closing of the transaction. The excess of the total purchase consideration over the fair value of the identifiable assets acquired and liabilities assumed from KCS at their respective net fair value of such assets and liabilities will be recorded as goodwill. The results of operations of KCS will be included in CP's consolidated results of operations only for periods subsequent to the closing of the transaction.

Upon the closing, and only for the period that the outstanding shares of capital stock of the second surviving corporation (as successor to KCS) are held in the voting trust, CPRL will account for its indirect 100% equity

ownership of the second surviving corporation using the equity method of accounting. Once the STB has completed its review of the transaction and approved CPRL's acquisition of control of KCS, CPRL will consolidate KCS prospectively, and the equity method investment will be remeasured to fair value immediately before the consolidation occurs, with the resulting gain or loss recognized in net income. As the ultimate outcome of the transaction, assuming receipt of STB final approval, will be a business combination, the Unaudited Pro Forma Condensed Consolidated Financial Information presented in this proxy statement/prospectus have been prepared on a consolidated basis on the basis of a business combination.

Regulatory Approvals Required for the Transaction

As more fully described in this proxy statement/prospectus and in the merger agreement, and subject to the terms and conditions of the merger agreement, KCS and CPRL have agreed to promptly obtain all necessary actions or nonactions, authorizations, permits, waivers, consents, clearances, approvals and expirations or terminations of waiting periods and make all necessary registrations, notices, notifications, petitions, applications, reports and other filings and take all steps as may be necessary, proper or advisable to obtain an approval, clearance or waiver from, or to avoid an action or proceeding by, any governmental entity.

KCS and CPRL are not currently aware of any material consents or other filings that are required prior to the combination of CPRL and KCS other than those described in this proxy statement/prospectus. There can be no assurance, however, if and when any of the consents required to be obtained for the transactions contemplated by the merger agreement will be obtained or as to the conditions or limitations that such approvals may contain or impose.

Although CPRL and KCS believe that they will receive the required authorizations and approvals described below to complete the transactions contemplated by the merger agreement, there can be no assurance as to the timing of these consents and approvals, CPRL's or KCS's ultimate ability to obtain such consents or approvals (or any additional consents or approvals that may otherwise become necessary), or the conditions or limitations that such approvals may contain or impose.

For more information see the sections of this proxy statement/prospectus entitled "*The Merger Agreement—Conditions that Must Be Satisfied or Waived for the Transaction to Occur*" and "*The Merger Agreement—Regulatory Filings and Efforts; Other Actions*," on pages 140 and 159, respectively.

STB

Certain activities of CPRL, KCS and their subsidiaries are regulated by the STB. The provisions of subtitle IV, title 49 of the United States Code require approval of, or the granting of an exemption from approval by, the STB for (i) the acquisition of control of two or more carriers subject to the jurisdiction of the STB by a person that is not a carrier and (ii) the acquisition or control of a carrier by a person that is not a carrier but that controls any number of carriers. STB approval or exemption is required for, among other things, CPRL's acquisition of control of KCS.

The parties intend to consummate the transaction prior to having obtained STB final approval for CPRL to control KCS, through the use of a voting trust. A voting trust is a mechanism that allows the transfer of beneficial ownership of the shares of a rail carrier to an acquiror, while keeping that rail carrier independent and avoiding premature control of that rail carrier pending STB review of the proposed transaction. Accordingly, the outstanding shares of capital stock of the second surviving corporation (as successor to KCS) would remain in the voting trust pending the STB's review of CPRL's acquisition of control of KCS. On May 6, 2021, the STB issued a decision indicating that it had conducted a full review of the voting trust submitted to the STB Staff in March 2021 and granted approval for the use of the voting trust to consummate the transaction, subject to the condition that the voting trust agreement be modified to prohibit the trustee from owning securities of CPRL or its affiliates during the existence of the voting trust. CPRL made the requisite modification. The voting trust

agreement proposed for use with the transaction is unchanged from that modified in respect to the STB's May 6 decision.

Under the merger agreement, CPRL will, via the post-closing contributions, cause the contribution of all of the outstanding shares of capital stock of the second surviving corporation to merger holdco, an indirect wholly owned subsidiary of CPRL. CPRL and merger holdco intend, immediately after the closing of the transaction and the post-closing contributions, to deposit the certificates for all of the outstanding shares of capital stock of the second surviving corporation into the voting trust to ensure that CPRL and merger holdco do not acquire and directly or indirectly exercise control over KCS and its affiliates prior to obtaining necessary STB approval or exemption. Instead, the outstanding shares of capital stock of the second surviving corporation would be held in trust and voted by the trustee.

With CPRL's and KCS's planned use of the voting trust arrangement, under the terms of the voting trust agreement approved by the STB on May 6, 2021, substantially in the form of Exhibit A of the merger agreement attached to this proxy statement/prospectus as Annex A, the trustee would hold such shares of capital stock of the second surviving corporation (i) until the receipt of STB final approval, or (ii) if STB final approval is denied, until the trust stock is disposed of. The voting trust agreement provides that the trustee will vote all trust stock in favor of any proposal or action necessary or desirable to effect, or consistent with the effectuation of, the transactions contemplated by the merger agreement, and, until the STB has issued a final order approving the transaction and common control of KCS by CPRL, against any proposed merger, business combination or similar transaction involving KCS but not involving CPRL or one of its affiliates. The voting trust agreement contains other terms and conditions designed to ensure that neither merger holdco nor CPRL will control KCS during the pendency of the STB proceedings. In addition, the voting trust agreement provides that CPRL or its affiliates will be entitled to receive any cash dividend paid by KCS.

On March 22, 2021, CPRL and KCS (collectively, the "applicants") submitted a prefiling notification (the "prefiling notification") to file the appropriate and necessary documentation seeking STB final approval for CPRL to control KCS (which we refer to as the "STB approval application"). The applicants also submitted a motion for protective order and petition to establish a procedural schedule to the STB. On the same day, the applicants sent to the STB staff a copy of the original proposed form of the voting trust agreement, which was attached to the prior CP merger agreement as Exhibit A, and sought an informal opinion that the voting trust would comply with STB standards. On March 23, 2021, the applicants filed an errata to the prefiling notification and asked that the STB substitute a revised prefiling notification.

In the prefiling notification, the applicants noted that the proposed transaction was subject to the regulations set forth at 49 C.F.R. pt. 1180 (2000) rather than the version of those regulations adopted in 2001 pursuant to the waiver for transactions involving KCSR described in 49 C.F.R. § 1180.0(b). 49 C.F.R. § 1180.0(b) provides, in pertinent part, that the STB "will waive application of the regulations contained in this subpart for a consolidation involving [KCSR] and another Class 1 railroad and instead will apply the regulations in this subpart A in effect before July 11, 2001 . . . unless [the STB is] shown why such a waiver should not be allowed."

On April 23, 2021, the STB issued a decision finding that the waiver provision under 49 C.F.R. § 1180.0(b) applies to the transaction, and that the transaction will therefore be subject to the regulations set forth at 49 C.F.R. part 1180 (2000) rather than the 2001 version of those rules.

As noted above, on May 6, 2021, the STB issued a decision indicating that it had conducted a full review of the voting trust agreement submitted to the STB Staff in March 2021 and granted approval for the use of the voting trust to consummate the transaction, subject to the condition that the voting trust agreement be modified to prohibit the trustee from owning securities of CPRL or its affiliates during the existence of the voting trust. CPRL made the requisite modification. The voting trust agreement proposed for use with the transaction is unchanged from that modified in response to the STB's May 6 decision.

On September 15, 2021, CPRL and KCS filed with the STB an Amended Notice of Intent indicating that they had entered a new agreement providing for CPRL's acquisition of KCS, that they would file an application seeking STB control approval on or shortly after October 20, 2021, and that CPRL intended to indirectly acquire the shares of KCS prior to receiving control approval via the use of a voting trust that was substantially identical to that reviewed and approved by the STB in its May 6 decision.

On September 30, 2021, the STB issued a decision confirming that the transaction described in the September 15 Amended Notice of Intent was the "same transaction" that had been noticed in March 2021 and that the STB's May 6, 2021 approval for CPRL's proposed use of a voting trust to acquire KCS applies to the voting trust proposed for use with the transaction agreed to on September 15.

Under the merger agreement, each of CPRL and KCS is obligated to use its reasonable best efforts to (x) file the STB approval application within thirty days after the date of the merger agreement and (y) obtain, as promptly as practicable, STB final approval.

Under the merger agreement, CPRL and KCS must use reasonable best efforts to prosecute all filings and other presentations made, and promptly make any subsequent filings or presentations, with the STB with diligence, diligently oppose any third party's objections to, appeals from or petitions to reconsider or reopen any approval, opinion, exemption or other authorization obtained from the STB, and take all such further action as in the reasonable judgment of CPRL and KCS may facilitate obtaining STB final approval.

STB final approval is required in order to transfer control of the trust stock from the trustee to merger holdco. If an STB denial occurs, CPRL will be obligated to, directly or indirectly, divest the trust stock in accordance with the voting trust agreement, during a period of two years after such STB denial or such extension of the two-year period as the STB may approve. Any such post-closing disposition would be subject to the jurisdiction of the STB to oversee CPRL's divestiture of the trust stock.

CFIUS

The transactions contemplated by the merger agreement are subject to review by CFIUS pursuant to Section 721. Under the terms of the merger agreement, CPRL may not assume control over KCS's railroad operations until the parties have obtained completion of the CFIUS Process.

The merger agreement provides for CPRL and KCS to cooperate regarding the preparation and filing with CFIUS of a declaration and/or a joint voluntary notification in connection with the transactions contemplated by the merger agreement. If the parties opt to file a declaration, CFIUS will initiate a 30-calendar-day review period, at the end of which, if it determines that there are no unresolved national security concerns, CFIUS will conclude all action under Section 721. Alternatively, CFIUS may (a) inform the parties that it is not able to conclude action under Section 721 on the basis of the declaration and that the parties may file a written notice to seek written confirmation from CFIUS that action under Section 721 has been concluded; (b) request that the parties file a written notice; or (c) initiate a unilateral review of the transactions contemplated by the merger agreement. If the parties opt to file a written notice (whether in the first instance or after failing to obtain completion of the CFIUS process through a declaration filing) CFIUS will initiate a 45-calendar-day review period, at the end of which it may (a) determine that there are no unresolved national security concerns and conclude all action under Section 721; or (b) determine that certain circumstances warrant additional review, and commence an investigation for up to an additional 45 calendar days (which may be extended by an additional 15 days in extraordinary circumstances). If CFIUS has no unresolved national security concerns at the end of the investigation, it will inform the parties it has concluded all action under Section 721. If CFIUS has unresolved national security concerns at the end of the investigation, it may send a report to the President of the United States, who may act to suspend or prohibit the transactions contemplated by the merger agreement.

At any time during the course of the CFIUS review or investigation, CFIUS may request that the parties take actions to mitigate any national security concerns it has identified. Where CFIUS has completed all action with

respect to the transactions contemplated by the merger agreement or the President of the United States has announced a decision not to exercise his authority under Section 721 with respect to the transactions contemplated by the merger agreement, the President and CFIUS may not take any further action under Section 721 with respect to the transactions contemplated by the merger agreement.

COFECE and the IFT

Pursuant to the Mexican Federal Economic Competition Law and the Federal Telecommunications and Broadcasting Law, consummation of the transactions contemplated by the merger agreement requires the approval of COFECE and the IFT, autonomous constitutional entities responsible for enforcing the Federal Economic Competition Law in the sectors of their respective jurisdiction, including reviewing and authorizing concentrations, when applicable. Such notifications may be submitted in parallel, and the procedures follow the same rules and legal time frame (as described below); nonetheless, in non-telecom transactions, the notification process before the IFT is usually more expeditious than the process before COFECE.

The merger agreement provides that KCS, CPRL, first merger sub and surviving merger sub were obligated to promptly, but in any event no later than 30 business days after the date of the merger agreement, file any and all notifications and report forms to the Mexican antitrust authorities, in each case as required under applicable law with respect to the transactions contemplated by the merger agreement, and take all other actions necessary to cause the expiration or termination of the process under applicable law as soon as practicable.

Notifications of the transaction were submitted to the Mexican antitrust authorities on [—], 2021. Each of the Mexican antitrust authorities has 10 business days from the date the notifications were submitted to issue a request for information ("RFI"), and the parties to such proceedings will have 10 business days to respond (subject to an extension of up to 10 additional business days upon prior request). Once the response to such RFI is fulfilled, the Mexican antitrust authorities will each have 15 business days to issue a second RFI, and the parties will have 15 business days to respond (subject to extensions of up to 55 additional business days upon prior request). It is possible, but highly unlikely, that the Mexican antitrust authorities will not issue an RFI.

The Mexican antitrust authorities will each have 60 business days to review the transaction and issue a resolution from (i) the date on which the first RFI is fulfilled, (ii) if a second RFI is submitted, the date on which the second RFI is fulfilled, or (iii) if no RFI is submitted, the date notifications of the transaction were submitted to the Mexican antitrust authorities. Further, in complex cases, the Mexican antitrust authorities can extend the review period for up to 40 additional business days.

If the Mexican antitrust authorities identify competition concerns to the parties, the parties will have the opportunity, at any point after the initial notification is submitted and before the review process has been completed, to offer conditions on which approval by the Mexican antitrust authorities will be contingent. If such conditions are offered, the term for the Mexican antitrust authorities to issue a resolution will be restarted. If the Mexican antitrust authorities do not issue a resolution within the relevant review period (including any extension, if applicable), the transaction will be deemed approved. Failure to obtain clearance from the Mexican antitrust authorities precludes the parties from closing the transaction in Mexico. The statutory review periods have not yet commenced in this jurisdiction.

ARTF and SCT

KCS and CPRL (through KCSM) have filed notices with ARTF and SCT, which are responsible for regulating railroad services in Mexico, prior to the effective time. The purpose of such notices is to inform ARTF and SCT of the change in the indirect participation in the capital stock of KCSM upon completion of the transactions contemplated by the merger agreement. The notice process is for informational purposes only, and no approval is required from either ARTF or SCT to consummate the transaction. As part of this notice process, ARTF and/or SCT may request information from the new indirect shareholders of KCSM and of any change in the percentages of direct shareholding.

Mexican Rail Union

KCS has provided an informal notification to the Mexican rail union; no approval on the part of the Mexican rail union is required in order to consummate the transaction.

FCC

KCS is subject to regulation by the FCC under the Communications Act of 1934, as amended. KCS holds, controls, and/or leases various licenses issued by the FCC for the operation of radio and microwave facilities and the use of associated spectrum over certain defined geographic areas. KCS uses its radio and microwave facilities to support its railroad operations and public safety related to those operations. FCC approval of the transfer of KCS's FCC licenses will be required. Failure to receive FCC approval prior to transferring control of the FCC licenses could result in civil fines, revocation of the subject licenses, and/or other remedial actions by the FCC. Initial approval from the FCC is expected before closing into the voting trust.

In October 2021, CPRL and KCS anticipate filing all required applications for FCC consent to the transfer of control of the subject FCC licenses from KCS to the voting trust. Applications for FCC consent are potentially subject to public comment and possible oppositions of third parties, and require the FCC affirmatively to determine that the transfer of control serves the public interest. While CPRL and KCS believe that FCC approval will ultimately be obtained, this approval is not assured. CPRL and KCS anticipate, but cannot guarantee, receiving approval by the first quarter of 2022.

Additionally, if the transaction is consummated, then the FCC will also preside over a similar post-closing approval process, which would require the filing of an application for authorization of transfer of control of the FCC licenses from the voting trust to CPRL. CPRL and KCS anticipate, but cannot guarantee, that the FCC will ultimately approve this post-closing transfer of control of the FCC licenses. CPRL and KCS are not aware of any cases where FCC approval did not follow STB approval.

Appraisal or Dissenters' Rights

General

If you hold one or more shares of KCS voting stock, you may be entitled to appraisal rights under Delaware law and have the right to dissent from the transaction, have your shares appraised by the Delaware Court of Chancery and receive the "fair value" of such shares (exclusive of any element of value arising from the accomplishment or expectation of the transaction) as of the effective time in place of the merger consideration or the preferred merger consideration, as applicable, as determined by such court, if you strictly comply with the procedures specified in Section 262 of the DGCL, subject to certain limitations under the DGCL. Any such KCS stockholder awarded "fair value" for their shares by the court would receive payment of that fair value in cash, together with interest, if any, in lieu of the right to receive the merger consideration or the preferred merger consideration, as applicable. The following discussion is not a full summary of the law pertaining to appraisal rights under the DGCL and is qualified in its entirety by the full text of Section 262 of the DGCL, the full text of which is attached as Annex D to this proxy statement/prospectus and is incorporated herein by reference. All references in Section 262 of the DGCL and in this summary to a "stockholder" are to the holder of record of shares of KCS voting stock. The following discussion does not constitute any legal or other advice, nor does it constitute a recommendation that you exercise your rights to seek appraisal under Section 262 of the DGCL.

Under Section 262 of the DGCL, KCS, not less than 20 days prior to the KCS special meeting, must notify each stockholder who was a KCS stockholder on the record date for notice of the KCS special meeting and who is entitled to exercise appraisal rights, that appraisal rights are available and include in the notice a copy of Section 262 of the DGCL. This proxy statement/prospectus constitutes the required notice to KCS stockholders that appraisal rights are available in connection with the transaction. A holder of KCS voting stock who wishes to exercise appraisal rights or who wishes to preserve the right to do so should review the following discussion and

the text of Section 262 of the DGCL carefully. Failure to comply timely and properly with the requirements of Section 262 of the DGCL may result in the loss of appraisal rights. A KCS stockholder who loses his, her or its appraisal rights will be entitled to receive the merger consideration and/or the preferred merger consideration, as applicable.

How to Exercise and Perfect Your Appraisal Rights. If you are a KCS stockholder wishing to exercise the rights to seek an appraisal of your shares, you must do ALL of the following:

- you must not vote in favor of the adoption of the merger agreement. Because a proxy that is signed and submitted but does not otherwise contain voting instructions will, unless properly and timely revoked, be voted in favor of the adoption of the merger agreement; if you vote by proxy and wish to exercise your appraisal rights, you must vote against the adoption of the merger agreement or abstain from voting your shares;
- you must deliver to KCS a written demand for appraisal of your shares before the vote on the adoption of the merger agreement at the KCS special meeting and such demand must reasonably inform KCS of your identity and your intention to demand appraisal of your shares of KCS voting stock;
- you must continuously hold the shares from the date of making the demand through the closing of the transaction. You will lose your appraisal rights if you transfer such shares before the closing of the transaction; and
- you or second surviving corporation must file a petition in the Delaware Court of Chancery requesting a determination of the fair value of such shares within 120 days after the closing of the transaction. The second surviving corporation is under no obligation to file any such petition in the Delaware Court of Chancery and has no intention of doing so. Accordingly, it is the obligation of the KCS stockholders to initiate all necessary action to perfect their appraisal rights in respect of shares of KCS voting stock within the time prescribed in Section 262 of the DGCL.

Voting, electronically at the KCS special meeting or by proxy, against, abstaining from voting on or failing to vote on the adoption of the merger agreement will not constitute a written demand for appraisal as required by Section 262 of the DGCL. The written demand for appraisal must be in addition to and separate from any proxy or vote.

Who May Exercise Appraisal Rights. Only a holder of record of shares of KCS voting stock issued and outstanding at the time a demand for appraisal is made and that continue to be issued and outstanding and held of record by such holder immediately prior to the effective time may assert appraisal rights for the shares of KCS voting stock registered in that holder's name. A demand for appraisal must be executed by or on behalf of the stockholder of record, fully and correctly, as the stockholder's name appears on the stock certificates (or in the stock ledger). The demand for appraisal must reasonably inform KCS of the identity of the stockholder and that the stockholder intends to demand appraisal of his, her or its KCS voting stock. **Beneficial owners who do not also hold their shares of KCS voting stock of record may not directly make appraisal demands to KCS. The beneficial holder must, in such cases, have the owner of record, such as a bank, brokerage firm or other nominee, submit the required demand in respect of those shares of KCS voting stock of record.** A record owner, such as a bank, brokerage firm or other nominee, who holds shares of KCS voting stock as a nominee for others, may exercise his, her or its right of appraisal with respect to the shares of KCS voting stock held for one or more beneficial owners, while not exercising this right for other beneficial owners. In that case, the written demand should state the number of shares of KCS voting stock as to which appraisal is sought. Where no number of shares of KCS voting stock is expressly mentioned, the demand will be presumed to cover all shares of KCS voting stock held in the name of the record owner.

IF YOU HOLD YOUR SHARES IN BANK OR BROKERAGE ACCOUNTS OR OTHER NOMINEE FORMS, AND YOU WISH TO EXERCISE APPRAISAL RIGHTS, YOU SHOULD CONSULT WITH

YOUR BANK, BROKERAGE FIRM OR OTHER NOMINEE, AS APPLICABLE, TO DETERMINE THE APPROPRIATE PROCEDURES FOR THE BANK, BROKERAGE FIRM OR OTHER NOMINEE TO MAKE A DEMAND FOR APPRAISAL OF THOSE SHARES. IF YOU HAVE A BENEFICIAL INTEREST IN SHARES HELD OF RECORD IN THE NAME OF ANOTHER PERSON, SUCH AS A BANK, BROKERAGE FIRM OR OTHER NOMINEE, YOU MUST ACT PROMPTLY TO CAUSE THE RECORD HOLDER TO FOLLOW PROPERLY AND IN A TIMELY MANNER THE STEPS NECESSARY TO PERFECT YOUR APPRAISAL RIGHTS.

If you own shares of KCS voting stock jointly with one or more other persons, as in a joint tenancy or tenancy in common, demand for appraisal must be executed by or for you and all other joint owners. An authorized agent, including an agent for two or more joint owners, may execute the demand for appraisal for a stockholder of record; however, the agent must identify the record owner and expressly disclose the fact that, in exercising the demand, such person is acting as agent for the record owner. If you hold shares of KCS voting stock through a broker who in turn holds the shares through a central securities depository nominee such as Cede & Co., a demand for appraisal of such shares must be made by or on behalf of the depository nominee and must identify the depository nominee as record holder.

If you elect to exercise appraisal rights under Section 262 of the DGCL, you should mail or deliver a written demand to:

Kansas City Southern
427 West 12th Street,
Kansas City, Missouri 64105
1-888-800-3690
Attention: Corporate Secretary

The Second Surviving Corporation's Actions After the Closing of the Transaction. If the transaction closes, the second surviving corporation will give written notice of the closing of the transaction within 10 days after the closing of the transaction to you if you did not vote in favor of adoption of the merger agreement and you made a written demand for appraisal in accordance with Section 262 of the DGCL. At any time within 60 days after the closing of the transaction, if you have not commenced an appraisal proceeding or joined such a proceeding as a named party, you have the right to withdraw the demand and to accept the merger consideration or the preferred merger consideration, as applicable, in accordance with the merger agreement for your shares of KCS voting stock. Within 120 days after the closing of the transaction, but not later, either you, provided you have complied with the requirements of Section 262 of the DGCL, or the second surviving corporation may commence an appraisal proceeding by filing a petition in the Delaware Court of Chancery, with a copy served on the second surviving corporation in the case of a petition filed by you, demanding a determination of the fair value of the shares of KCS voting stock held by all dissenting stockholders who are entitled to appraisal rights. The second surviving corporation is under no obligation to file an appraisal petition and has no intention of doing so. If you desire to have your shares appraised, you should initiate any petitions necessary for the perfection of your appraisal rights within the time periods and in the manner prescribed in Section 262 of the DGCL.

Within 120 days after the closing of the transaction, provided you have complied with the provisions of Section 262 of the DGCL, you will be entitled to receive from the second surviving corporation, upon your written request, a statement setting forth the aggregate number of shares not voted in favor of the adoption of the merger agreement and with respect to which KCS has received demands for appraisal, and the aggregate number of holders of those shares. The second surviving corporation must mail this statement to you within the later of 10 days of receipt of the request or 10 days after expiration of the period for delivery of demands for appraisal. If you are the beneficial owner of shares of KCS voting stock held in a voting trust or by a nominee on your behalf you may, in your own name, file an appraisal petition or request from the second surviving corporation the statement described in this paragraph. As noted above, however, a demand for appraisal may only be made by or on behalf of a holder of record of shares of KCS voting stock. If a petition for appraisal is duly filed by you or

another record holder of KCS voting stock who has properly exercised his or her appraisal rights in accordance with the provisions of Section 262 of the DGCL, the second surviving corporation will then be obligated, within 20 days after receiving service of a copy of the petition, to provide the office of the Register in Chancery in which the petition was filed with a duly verified list containing the names and addresses of all stockholders who have demanded an appraisal of their shares and with whom agreements as to the value of their shares have not been reached. Upon the filing of any such petition, the Delaware Court of Chancery may order the Register in Chancery to give notice of the time and place fixed for the hearing on the petition by registered or certified mail to the second surviving corporation and to the stockholders shown on such duly verified list at the addresses therein stated. Such notice will also be published at least one week before the day of the hearing in at least one newspaper of general circulation published in the City of Wilmington, Delaware, or in another publication deemed advisable by the Delaware Court of Chancery. The costs of these notices are borne by the second surviving corporation. The Delaware Court of Chancery will then determine which stockholders are entitled to appraisal rights and may require the stockholders demanding appraisal who hold certificated shares to submit their stock certificates to the Register in Chancery for notation thereon of the pendency of the appraisal proceedings and the Delaware Court of Chancery may dismiss from the proceedings any stockholder who fails to comply with this direction. If immediately before a merger the shares of the class or series of stock of the constituent corporation as to which appraisal rights are available were listed on a national securities exchange, the Delaware Court of Chancery shall dismiss the proceedings as to all holders of such shares who are otherwise entitled to appraisal rights unless (1) the total number of shares entitled to appraisal exceeds 1% of the outstanding shares of the class or series eligible for appraisal, (2) the value of the consideration provided in the transaction for such total number of shares exceeds $1 million or (3) the merger was approved pursuant to Section 253 or 267 of the DGCL. The KCS voting stock is listed on NYSE and therefore this provision may be applicable in respect thereof, to the extent that KCS voting stock continues to be listed on NYSE until immediately before the transaction.

After determination of the stockholders entitled to appraisal of their shares of KCS voting stock, the appraisal proceeding will be conducted as to the shares of KCS voting stock owned by such stockholders, in accordance with the rules of the Delaware Court of Chancery, including any rules specifically governing appraisal proceedings. The Delaware Court of Chancery will thereafter determine the fair value of the shares of KCS voting stock at the closing of the transaction held by dissenting stockholders who have properly exercised their appraisal rights, exclusive of any element of value arising from the accomplishment or expectation of the transaction, together with interest, if any, to be paid. Unless the Delaware Court of Chancery in its discretion determines otherwise for good cause shown, and except as otherwise provided in Section 262 of the DGCL, interest from the closing of the transaction through the date of payment of the judgment will be compounded quarterly and will accrue at 5% over the Federal Reserve discount rate (including any surcharge) as established from time to time during the period between the closing of the transaction and the date of payment of the judgment. At any time before the entry of judgment in the proceedings, the second surviving corporation may pay to each KCS stockholder entitled to appraisal an amount in cash (which will be treated as an advance against the payment due to such KCS stockholder), in which case interest shall accrue after such payment only upon the sum of (1) the difference, if any, between the amount so paid and the fair value of the shares as determined by the Delaware Court of Chancery and (2) interest theretofore accrued, unless paid at that time. When the fair value is determined, the Delaware Court of Chancery will direct the payment of the fair value of the shares, together with interest, if any, by the second surviving corporation to the KCS stockholders entitled thereto. Payment will be so made to each such stockholder, in the case of holders of uncertificated stock forthwith, and in the case of holders of shares of KCS voting stock represented by certificates upon the surrender to the second surviving corporation of such stockholder's certificates.

In determining the fair value, the Delaware Court of Chancery is required to take into account all relevant factors. In *Weinberger* v. *UOP, Inc.*, the Delaware Supreme Court discussed the factors that could be considered in determining fair value in an appraisal proceeding, stating that "proof of value by any techniques or methods which are generally considered acceptable in the financial community and otherwise admissible in court" should be considered and that "[f]air price obviously requires consideration of all relevant factors involving the value of

a company." The Delaware Supreme Court has stated that, in making this determination of fair value, the court must consider market value, asset value, dividends, earnings prospects, the nature of the enterprise and any other factors which could be ascertained as of the closing date which throw any light on future prospects of the combined company. Section 262 of the DGCL provides that fair value is to be "exclusive of any element of value arising from the accomplishment or expectation of the transaction." In *Cede & Co.* v. *Technicolor, Inc.*, the Delaware Supreme Court stated that such exclusion is a "narrow exclusion [that] does not encompass known elements of value," but which rather applies only to the speculative elements of value arising from such accomplishment or expectation. In *Weinberger*, the Delaware Supreme Court construed Section 262 of the DGCL to mean that "elements of future value, including the nature of the enterprise, which are known or susceptible of proof as of the date of the merger and not the product of speculation, may be considered."

An opinion of an investment banking firm as to the fairness from a financial point of view of the consideration payable in a merger is not an opinion as to, and does not in any manner address, fair value under Section 262 of the DGCL. The fair value of shares of KCS voting stock as determined under Section 262 of the DGCL could be greater than, the same as, or less than the value of the merger consideration and/or the preferred merger consideration, as applicable.

CPRL does not anticipate offering more than the merger consideration or preferred merger consideration, as applicable, to any KCS stockholder exercising appraisal rights and reserves the rights to make a voluntary cash payment pursuant to subsection (h) of Section 262 of the DGCL and to assert, in any appraisal proceeding, that, for purposes of Section 262 of the DGCL, the "fair value" of a share of KCS voting stock is less than the value of the merger consideration or preferred merger consideration, as applicable. No representation is made as to the outcome of the appraisal of fair value as determined by the Delaware Court of Chancery.

If no party files a petition for appraisal within 120 days after the closing date or, assuming the shares of KCS voting stock remain listed on a national securities exchange immediately before the transaction, if neither of the ownership thresholds above has been satisfied, then all KCS stockholders will lose the right to an appraisal, and will instead receive the merger consideration and/or the preferred merger consideration, as applicable, described in the merger agreement, without interest thereon, less any withholding taxes.

The Delaware Court of Chancery may determine the costs of the appraisal proceeding and may allocate those costs to the parties as the Delaware Court of Chancery determines to be equitable under the circumstances. Each KCS stockholder party to the appraisal proceeding is responsible for its own attorneys' fees and expert witnesses' fees and expenses, although, upon application of a stockholder, the Delaware Court of Chancery may order all or a portion of the expenses incurred by any stockholder in connection with the appraisal proceeding, including, without limitation, reasonable attorneys' fees and the fees and expenses of experts, to be charged pro rata against the value of all shares of KCS voting stock entitled to appraisal.

If you have duly demanded an appraisal in compliance with Section 262 of the DGCL you may not, on or after the effective date of the transaction, vote the shares of KCS voting stock subject to the demand for any purpose or receive any dividends or other distributions on those shares, except dividends or other distributions payable to holders of record of KCS voting stock as of a record date prior to the effective date of the transaction.

If you have not commenced an appraisal proceeding or joined such a proceeding as a named party, you may withdraw a demand for appraisal and accept the merger consideration by delivering a written withdrawal of the demand for appraisal and an acceptance of the merger to the second surviving corporation, except that any attempt to withdraw made more than 60 days after the effective date of the merger will require written approval of the second surviving corporation, and no appraisal proceeding in the Delaware Court of Chancery will be dismissed as to any stockholder without the approval of the Delaware Court of Chancery. Such approval may be conditioned on the terms the Delaware Court of Chancery deems just; provided, however, that this provision will not affect the right of any KCS stockholder that has made an appraisal demand but who has not commenced an appraisal proceeding or joined such proceeding as a named party to withdraw such stockholder's demand for

appraisal and to accept the terms offered in the transaction within 60 days after the effective date of the transaction. If you fail to perfect, successfully withdraw your demand for appraisal, or otherwise lose your appraisal rights, your shares of KCS voting stock will be converted into the right to receive the merger consideration or preferred merger consideration, as applicable, without interest thereon, less any withholding taxes.

Failure to follow the steps required by Section 262 of the DGCL for perfecting appraisal rights may result in the loss of your appraisal rights. In that event, you will be entitled to receive the per share merger consideration for your shares of KCS voting stock in accordance with the merger agreement. In view of the complexity of the provisions of Section 262 of the DGCL, if you are a KCS stockholder and are considering exercising your appraisal rights under the DGCL, you are urged to consult your own legal and financial advisor.

THE PROCESS OF DEMANDING AND EXERCISING APPRAISAL RIGHTS REQUIRES COMPLIANCE WITH THE PREREQUISITES OF SECTION 262 OF THE DGCL. IF YOU WISH TO EXERCISE YOUR APPRAISAL RIGHTS, YOU ARE URGED TO CONSULT WITH YOUR OWN LEGAL AND FINANCIAL ADVISORS IN CONNECTION WITH COMPLIANCE UNDER SECTION 262 OF THE DGCL. TO THE EXTENT THERE ARE ANY INCONSISTENCIES BETWEEN THE FOREGOING SUMMARY AND SECTION 262 OF THE DGCL, THE DGCL WILL GOVERN.

Restrictions on Resales of CPRL Common Shares Received in the Transaction

The CPRL common shares to be issued in connection with the transaction will be registered under the U.S. Securities Act and will be freely transferable under the U.S. Securities Act and the U.S. Exchange Act, except for shares issued to any shareholder who may be deemed to be an "affiliate" of CPRL for purposes of Rule 144 under the U.S. Securities Act. Persons who may be deemed to be affiliates include individuals or entities that control, are controlled by, or are under the common control with CPRL and may include the executive officers, directors and significant shareholders of CPRL. This proxy statement/prospectus does not cover resale of CPRL common shares received by any person at the effective time, and no person is authorized to make use of this proxy statement/prospectus in connection with any such resale.

The CPRL common shares to be received by holders of KCS common stock in connection with the transaction will not be legended and may be resold in Canada through registered dealers provided that (i) the trade is not a "control distribution" as defined in National Instrument 45-102—*Resale of Securities* of the Canadian securities administrators, (ii) no unusual effort is made to prepare the market or to create a demand for the CPRL common shares, (iii) no extraordinary commission or consideration is paid to a person in respect of such sale, and (iv) if the selling security holder is an insider or officer of CP, as the case may be, the selling security holder has no reasonable grounds to believe that CP is in default of applicable Canadian securities law.

Dividend Policy

Subject to applicable law and the approval of the KCS board and the CPRL board, as applicable, KCS and CPRL will coordinate the declaration, setting of record dates and payment dates of dividends on KCS common stock and CPRL common shares so that holders of KCS common stock do not receive dividends on both KCS common stock and CPRL common shares received in the transaction in respect of any calendar quarter to which such dividend relates or fail to receive a dividend on either KCS common stock or CPRL common shares received in the transaction for any calendar quarter.

Debt Financing

As of June 30, 2021, CP had total long-term debt of approximately C$8.7 billion (U.S.$7.0 billion converted at the Bank of Canada exchange rate on June 30, 2021) and KCS had total long-term debt of approximately U.S.$3.8 billion.

Pursuant to the commitment letter, BMO and GS Lending have committed to provide an unsecured 364-day bridge facility in an aggregate principal amount of U.S.$8.5 billion to bridge the debt financing required to fund a portion of the cash consideration and preferred merger consideration, and transaction fees and expenses associated with, the transaction. CPRL expects to reduce the commitments under the bridge facility with an offering of debt securities before the closing of the transaction into the voting trust.

Effective as of April 9, 2021, CPRL amended its existing revolving credit facility to modify certain provisions relating to the calculation of the financial covenant ratio in its credit facility. In addition, effective as of September 24, 2021, CPRL entered into an amendment to extend the two year tranche and the five year tranche of its existing revolving credit facility to September 27, 2023 and September 27, 2026, respectively. Effective as of September 29, 2021, CPRL entered into a further amendment to its existing revolving credit facility in order to provide financial covenant flexibility for the anticipated acquisition financing pertaining to the transaction, which is in place for a two-year period from the date the transaction closes.

In addition, pursuant to the credit agreement, dated as of September 15, 2021, by and among CPRL and CPRC, BMO, the other lenders and financial institutions party thereto and BMO, as administrative agent, CPRC borrowed the aggregate amount of U.S.$500 million in unsecured term loans, which have an initial six-month maturity. Borrowings under such credit facility, together with commercial paper issuance and cash on hand were used to enable CPRL to make certain remittances in connection with the payments made by KCS in connection with the termination of the CN agreement.

Certain U.S. Federal Income Tax Consequences

The following discussion is a general summary based on present law of certain U.S. federal income tax considerations that may be relevant to (i) U.S. holders (as defined below) of KCS common stock who exchange their shares of KCS common stock for the merger consideration in connection with the transaction, (ii) U.S. holders of KCS preferred stock who exchange their shares of KCS preferred stock for the preferred merger consideration in connection with the transaction, and (iii) U.S. holders who hold and dispose of CPRL common shares received in the transaction. This discussion is based upon the Code, U.S. Treasury regulations promulgated under the Code (which we refer to as the "Treasury Regulations"), judicial authorities and published positions of the IRS, all as currently in effect, and all of which are subject to change or differing interpretations possibly with retroactive effect, and any such change or differing interpretation could affect the accuracy of the statements and conclusions set forth herein.

This discussion is for general information only and is not a complete description of all tax considerations that may be relevant to KCS stockholders; it is not a substitute for tax advice. It applies only to holders that hold their shares of KCS common stock or KCS preferred stock, and, in the case of holders of KCS common stock receiving CPRL shares in connection with the transaction, will hold the CPRL common shares received in the transaction, as capital assets within the meaning of Section 1221(a) of the Code (generally, property held for investment) and that use the U.S. dollar as their functional currency. It does not apply to holders who hold both KCS preferred stock and either KCS common stock or CPRL common shares. In addition, it does not describe all of the U.S. federal income tax considerations that may be relevant to KCS stockholders in light of their particular circumstances, nor does it apply to holders subject to special rules under the U.S. federal income tax laws, such as banks or other financial institutions, insurance companies, tax-exempt entities and organizations, dealers, traders in securities that elect to mark-to-market, regulated investment companies, real estate investment trusts, partnerships and other pass-through entities (including S-corporations) and investors therein, U.S. expatriates, pension funds, individual retirement and other tax-deferred accounts, "controlled foreign corporations," "passive foreign investment companies," "personal holding companies," persons liable for the alternative minimum tax, persons required to accelerate the recognition of any item of gross income as a result of such income being recognized on an "applicable financial statement," persons that directly, indirectly or constructively, own or at any time during the five-year period ending on the closing date owned, 5% or more of the total combined voting power or value of any class of KCS or CPRL stock, excepted shareholders, persons who received their shares of

KCS voting stock through the exercise of employee stock options or otherwise as compensation or through a tax-qualified retirement plan, holders of KCS voting stock who exercise appraisal or dissenters' rights, U.S. holders that hold their shares of KCS voting stock, or who will hold the CPRL common shares, in connection with a permanent establishment or fixed base outside the United States, or holders that hold their shares of KCS voting stock or CPRL common shares as part of a hedge, straddle, conversion, constructive sale or other integrated or risk reduction financial transaction. This summary also does not address any considerations relating to U.S. federal taxes other than the income tax (such as estate or gift taxes), any U.S. state and local, or non-U.S. tax laws or considerations, the Medicare tax on net investment income, any considerations with respect to any withholding required under the Foreign Account Tax Compliance Act of 2010 (including the Treasury Regulations promulgated thereunder and any intergovernmental agreements entered in connection therewith and any laws, regulations or practices adopted in connection with any such agreement), or, except as expressly addressed below, any reporting requirements.

As used in this section, "U.S. holder" means a beneficial owner of shares of KCS voting stock, and, in the case of any holder of KCS common stock that has received CPRL shares in connection with the transaction, a beneficial owner of CPRL common shares received in the transaction, that is, for U.S. federal income tax purposes: (i) a citizen or individual resident of the United States, (ii) a corporation, or other entity or arrangement taxable as a corporation, created or organized in or under the laws of the United States, any state thereof or the District of Columbia, (iii) a trust if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust; or (iv) an estate the income of which is subject to U.S. federal income taxation regardless of its source.

The U.S. federal income tax treatment of a partner in a partnership (or other entity or arrangement treated as a partnership for U.S. federal income tax purposes) exchanging its shares of KCS voting stock for the merger consideration or preferred merger consideration, as applicable, or holding or disposing of CPRL common shares, generally will depend on the status of the partner and the activities of the partnership. Partnerships and persons treated as partners in partnerships that hold shares of KCS voting stock should consult their own tax advisors regarding the specific U.S. federal income tax consequences to them of participating in the transaction and acquiring, owning and disposing of CPRL common shares.

The following discussion does not purport to be a complete analysis or discussion of all U.S. federal income tax considerations relating to the transaction or to the ownership and disposition of CPRL common shares. All holders of KCS voting stock should consult their own tax advisors as to the specific tax consequences to them of the transaction and of the ownership and disposition of CPRL common shares, including with respect to reporting requirements and the applicability and effect of any U.S. federal, state, local, non-U.S. or other tax laws in light of their particular circumstances.

Holders of KCS voting stock that are not U.S. holders should consult their own tax advisors regarding the possibility that, in the event the applicable withholding agent is unable to determine whether any cash consideration should be treated as a dividend for applicable U.S. federal income tax purposes, such withholding agent may withhold U.S. federal withholding tax at a rate of 30% (or such lower rate as may be specified by an applicable income tax treaty) on the entire amount of cash consideration payable to them in the transaction, and such holders should consult their own tax advisors as to the possible desirability and timing of selling any CPRL common shares or shares of KCS voting stock that they own.

Under Section 367(a) of the Code and the Treasury Regulations thereunder, special rules may apply to a U.S. holder that actually or constructively owns 5% or more, by vote or value, of the issued and outstanding stock of CPRL immediately after the completion of the transaction. Any such U.S. holder is urged to consult such U.S. holder's own tax adviser regarding the U.S. federal income tax consequences of the transaction with regard to such U.S. holder's particular circumstances**, including with respect to the possibility of entering into a "gain recognition agreement" and otherwise complying with the requirements of that agreement and Treasury Regulations Section 1.367(a)-8 for avoiding the recognition of gain**.

U.S. Federal Income Tax Consequences

The Transaction

CPRL and KCS intend that the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and that Section 367(a)(1) of the Code will not apply to cause the transaction to result in gain recognition by holders of KCS common stock that exchange their shares of KCS common stock for the merger consideration (other than any excepted shareholder). The obligation of KCS to complete the transaction is conditioned upon the receipt of an opinion from Wachtell, Lipton, Rosen & Katz, special counsel to KCS, or another nationally recognized tax counsel, to the effect that, on the basis of facts, representations and assumptions set forth or referred to in such opinion, the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code and that the transaction will not result in gain recognition under Section 367(a)(1) of the Code by holders of KCS common stock (other than any excepted shareholder). This opinion will be based on certain facts, representations, assumptions and statements, including those contained in the merger agreement and in tax representation letters provided by CPRL and KCS. If any of these facts, representations, assumptions or statements underlying the tax opinion described above is or becomes incorrect, incomplete, or is violated, the validity of, and the conclusions reached in, such tax opinion may be affected or jeopardized, and the U.S. federal income tax consequences of the transaction could differ materially from those discussed below. In addition, the opinion will be subject to certain qualifications and limitations as set forth therein.

Moreover, the opinion will not be binding on the IRS or the courts, and neither CPRL nor KCS intends to obtain a ruling from the IRS with respect to the tax consequences of the transaction. Consequently, no assurance can be given that the IRS will not assert, or that a court will not sustain, a position contrary to any of the conclusions set forth in such opinion or the tax consequences described in the discussion below. In particular, if the transaction were to fail to qualify as a reorganization for U.S. federal income tax purposes, U.S. holders of KCS common stock would be required to recognize gain or loss on their exchange of KCS common stock for the merger consideration. If the transaction qualified as a reorganization but were to fail to satisfy the requirements of Section 367(a)(1) of the Code, U.S. holders would be required to recognize the full amount of any gain, but not loss, on their exchange of KCS common stock for the merger consideration.

On the basis of the opinion described above that the transaction will be treated as a "reorganization" within the meaning of Section 368(a) of the Code and that Section 367(a)(1) of the Code will not generally apply to cause the transaction to result in gain recognition to U.S. holders of KCS common stock that exchange their shares of KCS common stock for the merger consideration (other than any excepted shareholder), the following discussion describes the material U.S. federal income tax consequences of the transaction to U.S. holders of KCS common stock (other than excepted shareholders).

Tax Consequences to U.S. Holders of KCS Common Stock of the Transaction

U.S. holders of KCS common stock that exchange their shares of KCS common stock for a combination of CPRL common shares and cash in the transaction will generally recognize gain (but not loss) in an amount equal to the lesser of: (i) the amount of cash (excluding cash received in lieu of fractional CPRL common shares, if any) received by such U.S. holder in the transaction; and (ii) the excess, if any, of (a) the sum of the amount of cash (excluding cash received in lieu of fractional CPRL common shares, if any) plus the fair market value of the CPRL common shares (including any fractional CPRL common shares deemed received) received by such U.S. holder in exchange for its shares of KCS common stock in the transaction, over (b) such U.S. holder's tax basis in its shares of KCS common stock exchanged. The tax basis of a U.S. holder of KCS common stock in such U.S. holder's KCS common stock will generally be equal to the amount paid for such stock.

Subject to the discussion below regarding potential dividend treatment, any such gain will generally be capital gain. Any such capital gain will be long-term capital gain if, as of the effective time, the U.S. holder's holding period with respect to the surrendered shares of KCS common stock exceeds one year. A non-corporate U.S. holder's long-term capital gain may be taxed at lower rates.

In certain circumstances, cash consideration received in a transaction otherwise qualifying as a reorganization may be characterized as a dividend for U.S. federal income tax purposes rather than capital gain where the payment of such cash consideration has the effect of a distribution of a dividend. Whether the payment of such consideration has that effect is generally determined by treating the cash as if it were the proceeds of a hypothetical redemption by the acquirer (or its parent) of additional share consideration deemed issued in the acquisition. If the receipt of cash in such deemed redemption would be treated as a distribution to the U.S. holder with respect to CPRL under the tests set forth in Section 302 of the Code, the gain recognized pursuant to the transaction by such U.S. holder would be treated as dividend income to the extent of such U.S. holder's ratable share of the accumulated earnings and profits as calculated for U.S. federal income tax purposes. The IRS has ruled that gain is generally not recharacterized as a dividend under this rule in the case of an exchanging shareholder in a public corporation whose relative stock interest is minimal and who exercises no control with respect to corporate affairs. Based on this and other applicable legal authority, and on the relevant facts (including the relative amount of the cash component of the merger consideration), cash consideration received by holders of KCS common stock in the transaction is generally not expected to be treated as a dividend. However, these rules are complex and because the possibility of dividend treatment depends upon each U.S. holder's particular circumstances, including the application of constructive ownership rules, U.S. holders should consult their tax advisors regarding the application of the foregoing rules to them.

The aggregate tax basis of the CPRL common shares a U.S. holder receives in the transaction (including any fractional CPRL common shares deemed received) will generally be the same as such U.S. holder's aggregate tax basis in its shares of KCS common stock surrendered in exchange therefor, decreased by the amount of cash (excluding cash received in lieu of fractional shares, if any) such U.S. holder receives and increased by the amount of gain (excluding any gain recognized with respect to cash received in lieu of a fractional share), if any, such U.S. holder recognizes in the transaction. The holding period of the CPRL common shares received by a U.S. holder in the transaction will include such U.S. holder's holding period in the shares of KCS common stock surrendered in the transaction.

U.S. holders who hold shares of KCS common stock with differing tax bases and/or holding periods, which generally occurs when blocks of shares are purchased at different times or at different prices, should consult with their own tax advisors with respect to the particular U.S. federal income tax consequences of the transaction to them.

A U.S. holder who receives cash in lieu of a fractional CPRL share in the transaction generally will be treated as having received such fractional share in the transaction and then as having received cash in exchange for such fractional CPRL share. Gain or loss generally will be recognized based on the difference between the amount of cash received in lieu of the fractional CPRL share and the portion of the U.S. holder's aggregate tax basis in the shares of KCS common stock surrendered allocable to the fractional CPRL share. Any such gain or loss generally will be capital gain or loss, which will be long-term capital gain or loss if the holding period for the shares of KCS common stock is more than one year on the closing date of the transaction. A non-corporate U.S. holder's long-term capital gain may be taxed at lower rates. Deductions for capital losses are subject to limitations.

Tax Consequences to U.S. holders of KCS preferred stock of the Transaction

The exchange of shares of KCS preferred stock for cash in the transaction will be a taxable transaction for U.S. federal income tax purposes. In general, a U.S. holder of KCS preferred stock whose shares of KCS preferred stock are converted into the right to receive cash in the transaction will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference, if any, between the amount of cash received with respect to such shares (determined before the deduction of any applicable withholding taxes, as described below under "*Backup Withholding and Information Reporting*") and the U.S. holder's adjusted tax basis in such shares. A U.S. holder's adjusted tax basis in KCS preferred stock will generally equal the price the U.S. holder paid for such KCS preferred stock. Any such capital gain or loss will be long-term capital gain or loss where the U.S.

holder's holding period for such KCS preferred stock is more than one year on the closing date of the transaction. A non-corporate U.S. holder's long-term capital gain may be taxed at lower rates. Deductions for capital losses are subject to limitations. If a U.S. holder acquired different blocks of KCS preferred stock at different times or different prices, such U.S. holder must determine its adjusted tax basis, gain or loss and holding period separately with respect to each block of KCS preferred stock.

U.S. holders who hold both KCS common stock and KCS preferred stock should consult with their own tax advisors with respect to the particular U.S. federal income tax consequences of the transaction to them.

U.S. Federal Income Taxation of U.S. Holders of CPRL Shares

Passive Foreign Investment Company Considerations

Based on the composition of CPRL's current gross assets and income and the manner in which CPRL expects to operate its business in future years, CPRL believes, and the following discussion assumes, that CPRL will not be classified as a passive foreign investment company (a "PFIC") for U.S. federal income tax purposes for its current taxable year and does not expect to be so classified in the foreseeable future. The tests to determine whether a company is a PFIC apply annually and a company's status can change depending, among other things, on changes in the composition and relative value of its gross receipts and assets, changes in its operations and changes in the market value of its stock. Accordingly, there can be no assurance that CPRL will not be a PFIC for its current or any future taxable year. If CPRL were to be a PFIC for any taxable year during which a U.S. holder owned CPRL common shares, such U.S. holder generally would be subject, in that taxable year and all subsequent taxable years (whether or not CPRL continued to be a PFIC), to materially adverse U.S. federal income tax consequences, including that gain from a sale or other disposition of CPRL common shares, as well as certain distributions on CPRL common shares, would be subject to tax at the highest ordinary income tax rates and an interest charge and U.S. holders would be subject to additional information reporting requirements. U.S. holders should consult their own tax advisors as to the potential application of the PFIC rules.

Dividends

Subject to the preceding discussion of special rules applicable to PFICs, the gross amount of any distribution of cash with respect to CPRL common shares will be included in a U.S. holder's gross income as a dividend to the extent of CPRL's current and accumulated earnings and profits as determined under U.S. federal income tax laws. CPRL does not expect to maintain calculations of earnings and profits for U.S. federal income tax purposes. Therefore, a U.S. holder should expect that any such distribution will generally be treated as a dividend from foreign sources when actually or constructively received. Dividends will not be eligible for the dividends-received deduction generally available to U.S. corporations. Dividends received from a "qualified foreign corporation" by eligible non-corporate U.S. holders that satisfy a minimum holding period and certain other requirements generally will be taxed at the preferential rate applicable to qualified dividend income. CPRL will be treated as a qualified foreign corporation if its shares are readily tradable on an established securities market in the United States or CPRL qualifies for comprehensive benefits under the U.S.-Canada income tax treaty and CPRL is not a PFIC for either the taxable year of distribution or prior taxable years. U.S. Treasury guidance indicates that shares listed on the NYSE will be considered readily tradable on an established securities market in the United States. There can be no assurance, however, that CPRL common shares will be considered readily tradable on an established securities market in future years.

Dividends paid in a currency other than U.S. dollars will be included in income in a U.S. dollar amount based on the exchange rate in effect on the date the dividend is distributed, whether or not the currency is converted into U.S. dollars at that time. A U.S. holder's tax basis in the non-U.S. currency will equal the U.S. dollar amount included in income. Any gain or loss realized on a subsequent conversion or other disposition of the non-U.S. currency for a different U.S. dollar amount generally will be U.S. source ordinary income or loss. If dividends paid in a currency other than U.S. dollars are converted into U.S. dollars on the day they are distributed, a U.S. holder generally will not be required to recognize foreign currency gain or loss in respect of the dividend income.

U.S. holders must include any tax withheld from a dividend payment in this gross amount even though they do not in fact receive such withheld tax. Subject to certain limitations, Canadian tax withheld and paid over to Canada will be creditable or deductible against U.S. holders' U.S. federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to preferential tax rates for qualified dividend income. To the extent a refund of the tax withheld is available to U.S. holders under Canadian law or under the U.S.-Canada income tax treaty, the amount of tax withheld that is refundable will not be eligible for credit against such U.S. holders' U.S. federal income tax liability.

Sales or Other Dispositions of CPRL Shares

Subject to the preceding discussion of special rules applicable to PFICs, a U.S. holder generally will recognize capital gain or loss on the sale or other disposition of CPRL common shares in an amount equal to the difference between the U.S. dollar value of the amount realized and the U.S. holder's adjusted tax basis in the CPRL common shares disposed. Any gain or loss generally will be treated as arising from U.S. sources and will be long-term capital gain or loss if the U.S. holder's holding period exceeds one year. Deductions for capital loss are subject to significant limitations.

Backup Withholding and Information Reporting

In general, information reporting requirements may apply to cash payments made to U.S. holders in connection with the transaction and in respect of CPRL common shares, unless an exemption applies. Backup withholding tax may apply to amounts subject to information reporting if the applicable stockholder fails to provide an accurate taxpayer identification number, fails to report all interest and dividends required to be shown on its U.S. federal income tax returns or otherwise fails to establish an exemption from backup withholding. U.S. holders can claim a credit against their U.S. federal income tax liability for the amount of any backup withholding tax and a refund of any excess, provided that all required information is timely provided to the IRS. U.S. holders should consult their own tax advisors as to their qualification for exemption from backup withholding and the procedure for establishing an exemption.

THE DISCUSSION ABOVE IS A GENERAL SUMMARY. IT DOES NOT COVER ALL TAX MATTERS THAT MAY BE OF IMPORTANCE TO A PARTICULAR HOLDER. THE TAX CONSEQUENCES OF THE TRANSACTION AND OF HOLDING AND DISPOSING OF CPRL SHARES WILL DEPEND ON A HOLDER'S SPECIFIC SITUATION. EACH HOLDER IS URGED TO CONSULT SUCH HOLDER'S OWN TAX ADVISOR ABOUT THE TAX CONSEQUENCES TO IT OF THE TRANSACTION AND HOLDING AND DISPOSING OF CPRL SHARES IN LIGHT OF THE HOLDER'S OWN CIRCUMSTANCES, AS WELL AS THE APPLICABILITY AND EFFECT OF ANY U.S. FEDERAL, STATE, LOCAL, FOREIGN OR OTHER TAX LAWS.

Certain Canadian Federal Income Tax Consequences

This summary is based on the description of the transaction set out in this proxy statement/prospectus, the current provisions of the Canadian tax act, relevant jurisprudence, and an understanding of the current administrative policies and practices of the Canada Revenue Agency (which we refer to as the "CRA") published in writing prior to the date hereof. This summary takes into account all specific proposals to amend the Canadian tax act publicly announced by or on behalf of the Minister of Finance (Canada) prior to the date hereof (which we refer to as the "proposed amendments") and assumes that all proposed amendments will be enacted in the form proposed; however, no assurances can be given that the proposed amendments will be enacted as proposed, or at all. This summary does not otherwise take into account or anticipate any changes in law or administrative policy or assessing practice whether by legislative, administrative or judicial action, nor does it take into account tax legislation or considerations of any province, territory or foreign jurisdiction, which may differ from those discussed herein.

This summary is of a general nature only and is not exhaustive of all possible Canadian federal income tax considerations applicable to the transaction. The income and other tax consequences of acquiring, holding or disposing of securities will vary depending on a holder's particular status and circumstances, including the country, province or territory in which the holder resides or carries on business. This summary is not intended to be, nor should it be construed to be, legal or tax advice to any particular holder. No representations are made with respect to the income tax consequences to any particular holder. Holders resident or subject to taxation in a jurisdiction other than Canada should be aware that the transaction may have tax consequences both in Canada and in such other jurisdiction. Such consequences are not described herein. Holders should consult their own tax advisors with respect to the income tax consequences of the transaction in their particular circumstances, including the application and effect of the income and other tax laws of any applicable country, province, state or local tax authority.

Application

The following summary describes the principal Canadian federal income tax considerations generally applicable under the Canadian tax act to a beneficial owner of KCS common stock or KCS preferred stock, as the case may be, who disposes, or is deemed to have disposed, of KCS common stock or KCS preferred stock, as applicable, in connection with the first merger and who, for the purposes of the Canadian tax act and at all relevant times, (i) deals at arm's length with and is not affiliated with CPRL, the merger subs or KCS; and (ii) holds all KCS common stock and KCS preferred stock, and will hold all CPRL common shares acquired pursuant to the first merger, as applicable (which we refer to, collectively, in this portion of the summary as the "Securities") as capital property (which we refer to in this portion of the summary as a "holder"). Generally, the Securities will be considered to be capital property to a holder for purposes of the Canadian tax act, provided that the holder does not use or hold those Securities in the course of carrying on a business and has not acquired such Securities in one or more transactions considered to be an adventure or concern in the nature of trade.

This summary is not applicable to a holder: (i) that is a "financial institution" for the purposes of the "mark-to-market property" rules, (ii) that is a "specified financial institution," (iii) an interest in which would be a "tax shelter investment," (iv) that has elected to determine its "Canadian tax results" in a currency other than Canadian currency pursuant to the functional currency reporting rules, (v) that has entered or will enter into, in respect of any Securities, a "derivative forward agreement" or a "synthetic disposition arrangement," (vi) that is a partnership, or (vii) in respect of which KCS is a "foreign affiliate," all within the meaning of the Canadian tax act. Any such holders should consult their own tax advisors with respect to the particular Canadian federal income tax consequences to them of the transaction.

Additional considerations, not discussed herein, may be applicable to a holder that is a corporation resident in Canada and is, or becomes, or does not deal at arm's length for purposes of the Canadian tax act with a corporation resident in Canada that is or becomes, as part of a transaction or series of transactions or events that includes the acquisition of CPRL common shares, controlled by a non-resident person, or if no single non-resident person has or acquires control, by a group of non-resident persons not dealing with each other at arm's length for purposes of the "foreign affiliate dumping" rules in section 212.3 of the Canadian tax act. Such holders should consult their own tax advisors.

This summary does not address issues relevant to KCS voting stock holders who acquired their KCS common stock or KCS preferred stock on the exercise of an employee stock option or pursuant to another employee incentive award. Such holders should consult their own tax advisors.

Canadian Currency

For the purposes of the Canadian tax act, subject to certain exceptions (including where a taxpayer has made an election to compute its "Canadian tax results" in a currency other than Canadian currency), all amounts relating to the acquisition, holding or disposition of KCS common stock, KCS preferred stock and CPRL common shares

(including dividends, adjusted cost base and proceeds of disposition), as applicable, must be converted into Canadian dollars for the purposes of the Canadian tax act. Amounts denominated in a foreign currency must be converted into Canadian dollars using the exchange rate quoted by the Bank of Canada for the day on which the amount arose, or, if there is no such rate quoted for the particular day, the closest preceding day for which such a rate is quoted, in accordance with the Canadian tax act.

Holders Resident in Canada

The following portion of the summary is generally applicable to a holder who, at all relevant times and for purposes of the Canadian tax act and any applicable income tax treaty or convention, is or is deemed to be resident in Canada and is not exempt from tax under Part I of the Canadian tax act (which we refer to in this portion of the summary as a "Canadian resident holder").

Disposition of KCS Common Stock

A Canadian resident holder who disposes of KCS common stock in connection with the first merger will realize a capital gain (or capital loss) equal to the amount, if any, by which the proceeds of disposition, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base to the Canadian resident holder of its KCS common stock, determined immediately before the disposition. The proceeds of disposition to the Canadian resident holder will be equal to the sum of the aggregate of the fair market value of the CPRL common shares and the cash consideration received on the disposition (including cash received in lieu of a fractional CPRL common share). For a description of the tax treatment of capital gains and capital losses, see the subsection entitled "*Taxation of Capital Gains and Capital Losses*," on page 128.

U.S. tax, if any, levied on any gain realized on a disposition of shares of KCS common stock in connection with the first merger may be eligible for a foreign tax credit under the Canadian tax act to the extent and under the circumstances described in the Canadian tax act. Canadian resident holders should consult their own tax advisors with respect to the availability of a foreign tax credit, having regarding to their particular circumstances.

The cost to a Canadian resident holder of CPRL common shares received by that Canadian resident holder as a result of the first merger will be equal to their fair market value at the time they are acquired by such Canadian resident holder. For purposes of determining the adjusted cost base of CPRL common shares, the cost of the CPRL common shares acquired must be averaged with the adjusted cost base of all other CPRL common shares held by the Canadian resident holder as capital property, subject to the detailed provisions of the Canadian tax act.

Disposition of KCS Preferred Stock

A Canadian resident holder who disposes of KCS preferred stock as a result of the first merger will realize a capital gain (or capital loss) equal to the amount, if any, by which the proceeds of disposition, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base to the Canadian resident holder of its KCS preferred stock, determined immediately before the disposition. The proceeds of disposition to the Canadian resident holder will be equal to the cash consideration received on the disposition of the Canadian resident holder's KCS preferred stock. For a description of the tax treatment of capital gains and capital losses, see the subsection entitled "*Taxation of Capital Gains and Capital Losses*," on page 128.

U.S. tax, if any, levied on any gain realized on a disposition of shares of KCS preferred stock in connection with the first merger may be eligible for a foreign tax credit under the Canadian tax act to the extent and under the circumstances described in the Canadian tax act. Canadian resident holders should consult their own tax advisors with respect to the availability of a foreign tax credit, having regarding to their particular circumstances.

Appraisal Rights

A Canadian resident holder who disposes of KCS common stock or KCS preferred stock on the valid exercise of appraisal rights will realize a capital gain (or capital loss) equal to the amount, if any, by which the proceeds of disposition, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base to the Canadian resident holder of its KCS common stock or KCS preferred stock, as applicable, determined immediately before the disposition. The proceeds of disposition to the Canadian resident holder will be equal to the cash consideration received on the disposition. For a description of the tax treatment of capital gains and capital losses, see the subsection entitled "*Taxation of Capital Gains and Capital Losses*," on page 128. Canadian resident holders who are considering exercising appraisal rights should consult their tax advisors for the tax and other implications thereof.

U.S. tax, if any, levied on any gain realized on a disposition of shares of KCS common stock or KCS preferred stock on the exercise of appraisal rights may be eligible for a foreign tax credit under the Canadian tax act to the extent and under the circumstances described in the Canadian tax act. Canadian resident holders should consult their own tax advisors with respect to the availability of a foreign tax credit, having regarding to their particular circumstances.

Dividends on CPRL Common Shares (Post-Transaction)

A Canadian resident holder who is an individual (other than certain trusts) will be required to include in income any dividends received or deemed to be received on the CPRL common shares, and will be subject to the gross-up and dividend tax credit rules applicable to taxable dividends received from taxable Canadian corporations, including the enhanced gross-up and dividend tax credit rules applicable to any dividends designated by CPRL as "eligible dividends" as defined in the Canadian tax act. Although there can be no assurance that any dividend paid by CPRL will be designated as an "eligible dividend," CPRL has posted notification on its website that, unless otherwise indicated, dividends on CPRL common shares are designated as "eligible dividends" for purposes of the Canadian tax act. Dividends received or deemed to be received by an individual and certain trusts may give rise to a liability for minimum tax under the Canadian tax act.

Dividends received (or deemed to be received) on a CPRL common share by a Canadian resident holder that is a corporation will be included in computing such Canadian resident holder's income for the taxation year and will generally also be deductible in computing its taxable income for that taxation year. In certain circumstances, a dividend received (or deemed to be received) by a Canadian resident holder that is a corporation may be deemed to be proceeds of disposition or a capital gain pursuant to subsection 55(2) of the Canadian tax act. Canadian resident holders that are corporations should consult their own tax advisors regarding their particular circumstances. A Canadian resident holder that is a "private corporation" or a "subject corporation," each as defined in the Canadian tax act, will generally be liable to pay an additional tax under Part IV of the Canadian tax act, all or a portion of which may be refundable in certain circumstances, on dividends received, or deemed to be received, on a CPRL common share to the extent such dividends are deductible in computing the Canadian resident holder's taxable income. A Canadian resident holder of CPRL common shares that is, throughout the year, a "Canadian-controlled private corporation," as defined in the Canadian tax act, may be subject to an additional tax (all or a portion of which may be refundable in certain circumstances) on its "aggregate investment income," which is defined to include dividends that are not deductible in computing taxable income.

Disposition of CPRL Common Shares (Post-Transaction)

A Canadian resident holder who disposes or is deemed to dispose of a CPRL common share after the transaction will recognize a capital gain (or a capital loss) equal to the amount, if any, by which the proceeds of disposition, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base to the Canadian resident holder of such CPRL common share, determined immediately before the disposition. For a description of the tax treatment of capital gains and capital losses, see the subsection entitled "*Taxation of Capital Gains and Capital Losses*" immediately below.

Taxation of Capital Gains and Capital Losses

Generally, one-half of any capital gain realized by a Canadian resident holder in a taxation year will be included in computing the Canadian resident holder's income in that taxation year as a taxable capital gain and one-half of any capital loss realized in a taxation year (which we refer to as an "allowable capital loss") must be deducted from the taxable capital gains realized by the Canadian resident holder in the same taxation year, in accordance with the rules contained in the Canadian tax act. Allowable capital losses in excess of taxable capital gains realized by a Canadian resident holder in a particular taxation year may be carried back and deducted in any of the three preceding taxation years or carried forward and deducted in any subsequent taxation year against net taxable capital gains realized by the Canadian resident holder in such taxation year, subject to and in accordance with the rules contained in the Canadian tax act.

Capital gains realized by an individual and certain trusts may give rise to a liability for minimum tax under the Canadian tax act. A Canadian resident holder that is, throughout the year, a "Canadian-controlled private corporation," as defined in the Canadian tax act, may be subject to an additional tax (all or a portion of which may be refundable in certain circumstances) on its "aggregate investment income," which is defined to include taxable capital gains.

The amount of any capital loss realized by a Canadian resident holder that is a corporation on the disposition of a CPRL common share may be reduced by the amount of dividends received or deemed to be received by it on such share (or on a share for which the share has been substituted) to the extent and under the circumstances prescribed by the Canadian tax act. Similar rules may apply where a corporation is a member of a partnership or a beneficiary of a trust that owns shares, directly or indirectly through a partnership or a trust. Canadian resident holders to whom these rules may apply should consult their own tax advisors.

Eligibility for Investment

Based on the current provisions of the Canadian tax act and subject to the provision of any particular plan, provided that the CPRL common shares are listed on a "designated stock exchange," within the meaning of the Canadian tax act (which currently includes the TSX and the NYSE), or CPRL is otherwise a "public corporation" (other than a "mortgage investment corporation") for purposes of the Canadian tax act, the CPRL common shares will be qualified investments under the Canadian tax act for a trust governed by a registered retirement savings plan (which we refer to as "RRSP"), a registered retirement income fund (which we refer to as "RRIF"), a registered disability savings plan (which we refer to as "RDSP"), a registered education savings plan (which we refer to as "RESP"), a tax-free savings account (which we refer to as "TFSA") or a deferred profit sharing plan, each as defined in the Canadian tax act.

Notwithstanding the foregoing, if the CPRL common shares are "prohibited investments," within the meaning of the Canadian tax act, for a particular RRSP, RRIF, RDSP, RESP or TFSA, the annuitant of the RRSP or RRIF, the holder of the TFSA or RDSP, or the subscriber of the RESP, as the case may be, will be subject to a penalty tax under the Canadian tax act. The CPRL common shares will generally not be a "prohibited investment" for these purposes unless the annuitant under the RRSP or RRIF, the holder of the TFSA or RDSP, or the subscriber of the RESP, as applicable, (i) does not deal at arm's length with CPRL for purposes of the Canadian tax act, or (ii) has a "significant interest," as defined in the Canadian tax act, in CPRL. In addition, the CPRL common shares will generally not be a "prohibited investment" if the CPRL common shares are "excluded property" for purposes of the prohibited investment rules for an RRSP, RRIF, RDSP, RESP or TFSA. Annuitants under RRSPs or RRIFs, holders of TFSAs or RDSPs, and subscribers of RESPs should consult their own tax advisors as to whether the CPRL common shares will be prohibited investments in their particular circumstances.

Holders Not Resident in Canada

The following portion of the summary is generally applicable to a holder who, at all relevant times and for purposes of the Canadian tax act, is not, and is not deemed to be, a resident of Canada and does not use or hold, and is not deemed to use or hold, KCS common stock or KCS preferred stock, as the case may be, and will not use or hold, or be deemed to use or hold, CPRL common shares, as applicable, in a business carried on in Canada (which we refer to in this portion of the summary as a "non-Canadian resident holder"). This portion of the summary is not generally applicable to a non-Canadian resident holder that is: (i) an insurer carrying on an insurance business in Canada and elsewhere or (ii) an "authorized foreign bank" (as defined in the Canadian tax act).

The following portion of the summary assumes that none of the KCS common stock, KCS preferred stock, or CPRL common shares will constitute "taxable Canadian property" to any particular non-Canadian resident holder at any time. Generally, KCS common stock, KCS preferred stock, or CPRL common shares, as the case may be, will not constitute taxable Canadian property to a non-Canadian resident holder at a particular time, provided that the applicable shares are listed at that time on a "designated stock exchange" (which currently includes the NYSE and the TSX), unless at any particular time during the 60-month period that ends at that time (i) one or any combination of (a) the non-Canadian resident holder, (b) persons with whom the non-Canadian resident holder does not deal at arm's length, and (c) partnerships in which the non-Canadian resident holder or a person described in (b) holds a membership interest directly or indirectly through one or more partnerships, owned 25% or more of the issued shares of any class or series of the capital stock of KCS or CPRL, as the case may be, and (ii) more than 50% of the fair market value of KCS common stock, KCS preferred stock or CPRL common shares, as the case may be, was derived directly or indirectly from one or any combination of: (A) real or immovable properties situated in Canada, (B) "Canadian resource properties" (as defined in the Canadian tax act), (C) "timber resource properties" (as defined in the Canadian tax act), and (D) options in respect of, or interests in, any of the foregoing property whether or not the property exists. In certain circumstances set out in the Canadian tax act, shares which are not otherwise "taxable Canadian property" may be deemed to be "taxable Canadian property."

KCS has represented in the merger agreement that, at no time during the 60 months immediately preceding the effective time, will more than 50% of the fair market value of KCS voting stock be derived, directly or indirectly, from one or any combination of the properties listed in (ii)(A) to (D) above. Assuming the accuracy of this representation, the KCS common stock and KCS preferred stock will not be "taxable Canadian property" to non-Canadian resident holders at the time of their disposition in connection with the first merger for purposes of the Canadian tax act.

Disposition of KCS Common Stock or KCS Preferred Stock in Connection with the First Merger

A non-Canadian resident holder will not be subject to tax under the Canadian tax act on any capital gain realized on a disposition of KCS common stock or KCS preferred stock, as the case may be, in connection with the first merger unless the shares are "taxable Canadian property" to the non-Canadian resident holder and the shares are not "treaty-protected property" of the non-Canadian resident holder, each within the meaning of the Canadian tax act. Non-Canadian resident holders whose KCS common stock and KCS preferred stock are "taxable Canadian property" should consult their own tax advisors for advice having regard to their particular circumstances, including whether their KCS common stock and KCS preferred stock constitute "treaty-protected property." As shares of the capital stock of a U.S. corporation, the KCS common stock and KCS preferred stock will generally be "treaty-protected property" for a non-Canadian resident holder who is a resident of the United States for purposes of, and entitled to benefits under, the U.S.-Canada income tax treaty.

Appraisal Rights

A non-Canadian resident holder will not be subject to tax under the Canadian tax act on any capital gain realized on a disposition of KCS common stock or KCS preferred stock, as the case may be, pursuant to the valid exercise of appraisal rights unless the shares are "taxable Canadian property" to the non-Canadian resident holder and the shares are not "treaty-protected property" of the non-Canadian resident holder, each within the meaning of the Canadian tax act.

Dividends on CPRL Common Shares (Post-Transaction)

Dividends paid or credited, or deemed to be paid or credited, on CPRL common shares to a non-Canadian resident holder generally will be subject to Canadian withholding tax at a rate of 25% of the gross amount of the dividend, unless the rate is reduced under the provisions of an applicable income tax convention between Canada and the non-Canadian resident holder's jurisdiction of residence. For example, the rate of withholding tax under the U.S.-Canada income tax treaty applicable to a non-Canadian resident holder who is a resident of the United States for the purposes of such treaty, is the beneficial owner of the dividend and who is entitled to all of the benefits under such treaty, generally will be 15%. CPRL will be required to withhold the required amount of withholding tax from the dividend, and remit it to the CRA for the account of the non-Canadian resident holder. Non-Canadian resident holders who may be eligible for a reduced rate of withholding tax on dividends pursuant to an applicable income tax convention should consult their own tax advisors with respect to taking all appropriate steps in this regard.

Disposition of CPRL Common Shares (Post-Transaction)

A non-Canadian resident holder will not be subject to tax under the Canadian tax act on any capital gain realized on a disposition of CPRL common shares, unless the shares are "taxable Canadian property" to the non-Canadian resident holder and the shares are not "treaty-protected property" of the non-Canadian resident holder, each within the meaning of the Canadian tax act.

THE ADVISORY COMPENSATION PROPOSAL

Pursuant to Section 14A of the Exchange Act and Rule 14a-21(c) thereunder, KCS is required to submit to a non-binding, advisory stockholder vote certain compensation that may be paid or become payable to KCS's named executive officers that is based on or otherwise relates to the transaction as disclosed in the section entitled "*Interests of KCS's Directors and Executive Officers in the Transaction*," on page 101. The KCS compensation proposal gives KCS stockholders the opportunity to express their views on the merger-related compensation of KCS's named executive officers.

Accordingly, KCS is asking KCS stockholders to vote "**FOR**" the adoption of the following resolution, on a non-binding, advisory basis:

> "RESOLVED, that the compensation that may be paid or become payable to KCS's named executive officers that is based on or otherwise relates to the transaction, as disclosed pursuant to Item 402(t) of Regulation S-K under the heading '*Interests of KCS's Directors and Executive Officers in the Transaction*' including the associated narrative discussion and the agreements, plans, arrangements or understandings pursuant to which such compensation may be paid or become payable, are hereby APPROVED."

The vote on the KCS compensation proposal is a vote separate and apart from the vote to adopt the merger agreement. Accordingly, if you are a KCS stockholder, you may vote to approve the KCS merger proposal, and vote not to approve the KCS compensation proposal, and vice versa. The vote on the KCS compensation proposal is advisory and non-binding. As a result, if the transaction is completed, the merger-related compensation may be paid to KCS's named executive officers to the extent payable in accordance with the terms of the compensation agreements and arrangements even if KCS stockholders do not approve the KCS compensation proposal.

The KCS board unanimously recommends a vote "FOR" the KCS compensation proposal.

Assuming a quorum is present at the KCS special meeting, approval of the KCS compensation proposal requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS compensation proposal. Accordingly, if a KCS stockholder present in person (including virtually) at the KCS special meeting abstains from voting, or responds by proxy with an "abstain" vote, it will have the same effect as a vote cast "**AGAINST**" the KCS compensation proposal. If a KCS stockholder is not present in person (including virtually) at the KCS special meeting and does not respond by proxy, it will have no effect on the vote count for the KCS compensation proposal (assuming a quorum is present).

IF YOU ARE A KCS STOCKHOLDER, THE KCS BOARD UNANIMOUSLY RECOMMENDS THAT YOU VOTE "FOR" THE KCS COMPENSATION PROPOSAL (PROPOSAL 2).

THE KCS ADJOURNMENT PROPOSAL

The KCS special meeting may be adjourned to another time and place in order to permit the solicitation of additional proxies if there are not sufficient votes to approve the KCS merger proposal or to ensure that any supplement or amendment to this proxy statement/prospectus is timely provided to KCS stockholders.

KCS is asking its stockholders to authorize the holder of any proxy solicited by the KCS board to vote in favor of any adjournment or postponement of the KCS special meeting to solicit additional proxies if there are not sufficient votes to approve the KCS merger proposal or to ensure that any supplement or amendment to this proxy statement/prospectus is timely provided to KCS stockholders.

The KCS board unanimously recommends that KCS stockholders vote "FOR" the proposal to adjourn the KCS special meeting if necessary.

Approval of the KCS adjournment proposal requires the affirmative vote of at least a majority of the shares of KCS voting stock present at the KCS special meeting in person (including virtually) or represented by proxy and entitled to vote on the KCS adjournment proposal (whether or not a quorum is present). Accordingly, if a KCS stockholder present in person (including virtually) at the KCS special meeting abstains from voting, or responds by proxy with an "abstain" vote, it will have the same effect as a vote cast "**AGAINST**" the KCS adjournment proposal. If a KCS stockholder is not present in person (including virtually) at the KCS special meeting and does not respond by proxy, it will have no effect on the vote count for such proposal.

IF YOU ARE A KCS STOCKHOLDER, THE KCS BOARD UNANIMOUSLY RECOMMENDS THAT YOU VOTE "FOR" THE KCS ADJOURNMENT PROPOSAL (PROPOSAL 3).

INFORMATION ABOUT THE COMPANIES

Canadian Pacific Railway Limited

7550 Ogden Dale Road S.E.
Calgary, Alberta T2C 4X9
1-403-319-7000

CP owns and operates a transcontinental freight railway in Canada and the United States. CP provides rail and intermodal transportation services over a network of approximately 13,000 miles, connecting the Atlantic coast to the Pacific coast across six Canadian provinces and 11 U.S. states. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend CP's market reach in Canada, through the U.S. and into Mexico. CP transports bulk commodities, merchandise freight and intermodal traffic.

CPRL was incorporated on June 22, 2001, under the CBCA, and controls and owns all of the common shares of CPRC which was incorporated in 1881 by Letters Patent pursuant to an Act of the Parliament of Canada and is governed by the CBCA. CPRL's registered, executive and corporate head office is located at 7550 Ogden Dale Road S.E., Calgary, Alberta T2C 4X9. CPRL common shares are listed on the NYSE and the TSX under the symbol "CP."

Additional information about CPRL can be found on its website at www.cpr.ca. The information contained in, or that can be accessed through, CPRL's website is not intended to be incorporated into this proxy statement/prospectus. For additional information about CPRL, see the section entitled "*Where You Can Find Additional Information*" on page 229.

Cygnus Merger Sub 1 Corporation

120 South 6th Street
Suite 800
Minneapolis, MN 55402
1-888-333-6370

Surviving merger sub, a Delaware corporation and a direct wholly owned subsidiary of CPRL, was formed solely for the purpose of facilitating the transactions contemplated by the merger agreement. Surviving merger sub has not carried on any activities or operations to date, except for those activities incidental to its formation and undertaken in connection with the transactions contemplated by the merger agreement. By operation of the second merger, KCS will merge with and into surviving merger sub. As a result, immediately following the second merger, surviving merger sub will survive the transaction as a direct wholly owned subsidiary of CPRL.

Immediately following the second merger, the post-closing contributions will take place and, as a result thereof, CPRL will directly own CPRC which will, in turn, own Canadian holdco, which will, in turn, own merger holdco, which will, in turn, own the second surviving corporation.

Surviving merger sub's principal executive offices are located at 120 South 6th Street, Suite 800, Minneapolis, MN 55402, and its telephone number is 1-888-333-6370.

Cygnus Merger Sub 2 Corporation

120 South 6th Street
Suite 800
Minneapolis, MN 55402
1-888-333-6370

First merger sub, a Delaware corporation and a direct wholly owned subsidiary of surviving merger sub, was formed solely for the purpose of facilitating the transactions contemplated by the merger agreement. First merger

sub has not carried on any activities or operations to date, except for those activities incidental to its formation and undertaken in connection with the transactions contemplated by the merger agreement. By operation of the first merger, first merger sub will merge with and into KCS. As a result, KCS will survive as a direct wholly owned subsidiary of surviving merger sub, before immediately merging with and into surviving merger sub. Upon completion of the first merger, first merger sub will cease to exist as a separate entity.

First merger sub's principal executive offices are located at 120 South 6th Street, Suite 800, Minneapolis, MN 55402, and its telephone number is 1-888-333-6370.

Kansas City Southern

427 West 12th Street
Kansas City, MO 64105
1-816-983-1303

KCS, a Delaware corporation, is a holding company with domestic and international rail operations in North America that are strategically focused on the growing north/south freight corridor connecting key commercial and industrial markets in the central U.S. with major industrial cities in Mexico. As used below, "Kansas City Southern" may refer to KCS or, as the context requires, to one or more subsidiaries of KCS.

Kansas City Southern controls and owns all of the stock of KCSR, a U.S. Class 1 railroad founded in 1887. KCSR serves a ten-state region in the Midwest and Southeast regions of the U.S. and has the shortest north/south rail route between Kansas City, Missouri and several key ports along the Gulf of Mexico in Alabama, Louisiana, Mississippi and Texas.

Kansas City Southern controls and owns all of the stock of KCSM. Through its 50-year concession from the Mexican government, which could expire in 2047 unless extended, KCSM operates a key commercial corridor of the Mexican railroad system and has as its core route the most strategic portion of the shortest, most direct rail passageway between Mexico City and Laredo, Texas. Laredo is a principal international gateway through which a substantial portion of rail and truck traffic between the U.S. and Mexico crosses the border. KCSM serves most of Mexico's principal industrial cities and three of its major seaports. KCSM's rail lines provide exclusive rail access to the U.S. and Mexico border crossing at Nuevo Laredo, Tamaulipas. Under the concession, KCSM has the right to use and operate the southern half of the rail bridge at Laredo, Texas, which spans the Rio Grande River between the U.S. and Mexico. KCS owns the northern half of this bridge through its ownership of Mexrail.

KCSM also provides exclusive rail access to the port of Lazaro Cardenas on the Pacific Ocean. The Mexican government developed the port at Lazaro Cardenas principally to serve Mexican markets and as an alternative to the U.S. west coast ports for Asian and South American traffic bound for North America.

Kansas City Southern wholly owns Mexrail which, in turn, wholly owns Tex-Mex. Tex-Mex owns a 160-mile rail line extending from Laredo, Texas to the port city of Corpus Christi, Texas, which connects the operations of KCSR with KCSM.

The Kansas City Southern coordinated rail network (KCSR, KCSM and Tex-Mex, including trackage rights) comprises approximately 7,100 route miles extending from the Midwest and Southeast regions of the U.S. south into Mexico and connects with all other Class 1 railroads, providing shippers with an effective alternative to other railroad routes and giving direct access to Mexico and the Southeast and Southwest U.S. through alternate interchange hubs.

PCRC, an unconsolidated joint venture company owned equally by Kansas City Southern and Mi-Jack, was awarded a concession from the Republic of Panama to reconstruct and operate the Panama Canal Railway, a 47-mile railroad located adjacent to the Panama Canal that provides international container shipping companies

with a railway transportation alternative to the Panama Canal. The concession was awarded in 1998 for an initial term of 25 years with an automatic renewal for an additional 25-year term. The Panama Canal Railway is a north-south railroad traversing the isthmus of Panama between the Atlantic and Pacific oceans.

Other subsidiaries and affiliates of Kansas City Southern include the following:

- Meridian Speedway, LLC, a 70% owned consolidated affiliate that owns the former KCSR rail line between Meridian, Mississippi and Shreveport, Louisiana, which is the portion of the rail line between Dallas, Texas and Meridian known as the "Meridian Speedway." Norfolk Southern Corporation, through its wholly owned subsidiary, The Alabama Great Southern Railroad Company, owns the remaining 30% of MSLLC;
- TFCM, S. de R.L. de C.V., a 45% owned unconsolidated affiliate that operates a bulk liquid terminal in San Luis Potosí, Mexico;
- Ferrocarril y Terminal del Valle de México, S.A. de C.V., a 25% owned unconsolidated affiliate that provides railroad services as well as ancillary services in the greater Mexico City area; and
- PTC-220, LLC, a 14% owned unconsolidated affiliate that holds the licenses to large blocks of radio spectrum and other assets for positive train control.

KCS is a public company; KCS common stock and KCS preferred stock are traded on the NYSE under the symbols "KSU" and "KSU-P," respectively. KCS's principal executive offices are located at 427 West 12th Street, Kansas City, MO 64105, and its telephone number is 1-816-983-1303.

Additional information about KCS can be found on its website at www.kcsouthern.com. The information contained in, or that can be accessed through, KCS's website is not intended to be incorporated into this proxy statement/prospectus. For additional information about KCS, see the section entitled "*Where You Can Find Additional Information*," on page 229.

Information Concerning the Combined Company

Following the control date, subject to approval by the TSX and NYSE, the combined company intends to change its name to "Canadian Pacific Kansas City." The combined company will carry on the combined businesses of CPRL and KCS, with a successor to KCS as an indirect wholly owned subsidiary of CPRL. CPRL will continue to be governed by the CBCA, while the wholly owned successor to KCS will be governed by the DGCL.

Calgary, Alberta will be the global headquarters of the combined company. Following STB final approval, CPRL will acquire control of KCS, the two companies will be combined and Mr. Keith Creel, the current President and Chief Executive Officer of CPRL, will serve as the Chief Executive Officer of the combined company. The transaction, subject to STB final approval, will combine the two railroads to create the first rail network connecting the U.S., Mexico, and Canada.

THE MERGER AGREEMENT

The summary of the material provisions of the merger agreement below and elsewhere in this proxy statement/prospectus is qualified in its entirety by reference to the full text of the merger agreement, a copy of which is attached to this proxy statement/prospectus as Annex A and is incorporated by reference into this proxy statement/prospectus. This summary does not purport to be complete and may not provide all of the information about the merger agreement that might be important to you. You are urged to read the merger agreement carefully and in its entirety because it is the legal document that governs the transactions described in this proxy statement/prospectus.

Explanatory Note Regarding the Merger Agreement and the Summary of the Merger Agreement

The merger agreement and the summary of its terms in this proxy statement/prospectus are included solely to provide you with information about the terms and conditions of the merger agreement. The terms and information in the merger agreement are not intended to provide any other public disclosure of factual information about CPRL, KCS, first merger sub and surviving merger sub or any of their respective subsidiaries or affiliates. The representations, warranties and covenants made in the merger agreement by CPRL, KCS, first merger sub and surviving merger sub were made solely for the purposes of the merger agreement and as of specific dates and are qualified and subject to important limitations and exceptions agreed to by CPRL, KCS, first merger sub and surviving merger sub in connection with negotiating the terms of the merger agreement. In particular, in your review of the representations and warranties contained in the merger agreement and described in this summary, it is important to bear in mind that the representations and warranties were negotiated with the principal purpose of establishing the circumstances in which a party to the merger agreement may have the right to not complete the transaction if the representations and warranties of the other party prove to be untrue or incorrect, and allocating risk between the parties to the merger agreement, rather than establishing matters as facts. The representations and warranties may also be subject to a contractual standard of materiality or material adverse effect different from those generally applicable to shareholders and reports and documents filed with the SEC or on SEDAR, are qualified by certain matters contained in certain reports publicly filed with the SEC and on SEDAR, and in some cases were qualified by the matters contained in the respective confidential disclosure schedules that CPRL and KCS delivered to each other in connection with the merger agreement, which disclosures were not included in the merger agreement attached to this proxy statement/prospectus as Annex A. Moreover, information concerning the subject matter of the representations and warranties, which do not purport to be accurate as of the date of this proxy statement/prospectus, may have changed since the date of the merger agreement, which subsequent information may or may not be fully reflected in KCS's or CPRL's public disclosures. Investors are not third-party beneficiaries under the merger agreement except for the limited purposes expressly set forth therein and should not rely on the representations and warranties or any descriptions thereof as characterizations of the actual state of facts or condition of the parties thereto or any of their respective subsidiaries or affiliates.

Accordingly, the representations and warranties and other provisions of the merger agreement should not be read alone, but instead should be read together with the information provided elsewhere in this proxy statement/prospectus, the documents incorporated by reference into this proxy statement/prospectus, and reports, statements and filings that CPRL and KCS file with the SEC and CPRL files on SEDAR from time to time. For more information, see the section entitled "*Where You Can Find Additional Information*," on page 229.

Structure, Closing and Effectiveness of the Transaction

The merger agreement provides, among other things, that, upon the terms and subject to the satisfaction or waiver of the conditions set forth therein, (1) at the effective time, first merger sub will merge with and into KCS, with KCS surviving the first merger as a direct, wholly owned subsidiary of surviving merger sub, and (2) immediately following the first merger at the second effective time, KCS will merge with and into surviving

merger sub, with surviving merger sub surviving the second merger as a direct, wholly owned subsidiary of CPRL. The closing will occur at 8:30 a.m., New York City time, on the second business day after all of the closing conditions set forth in the merger agreement are satisfied or waived (other than those conditions that by their nature are to be satisfied at the closing, but subject to satisfaction or waiver of those conditions), or at such other time as CPRL and KCS may agree in writing. For more information, see the section entitled "*The Merger Agreement—Conditions that must be Satisfied or Waived for the Transaction to Occur*," on page 140. The transaction will become effective when the respective certificates of merger have been duly filed with the Secretary of State of the State of Delaware or at such later time as agreed by the parties to be specified in such certificates of merger.

Immediately following the second merger and the post-closing contributions, all of the outstanding shares of capital stock of the second surviving corporation, as successor to KCS, will be deposited by merger holdco into the voting trust subject to the voting trust agreement, the form of which is attached as Exhibit A to the merger agreement, pending STB final approval.

Effects of the Transaction

First Merger

The merger agreement provides that the directors of KCS as of immediately prior to the effective time will serve as the directors of the first surviving corporation as of the effective time, the officers of KCS as of immediately prior to the effective time will serve as the officers of the first surviving corporation as of the effective time, the certificate of incorporation of first merger sub as in effect immediately prior to the effective time will be the certificate of incorporation of the first surviving corporation following the effective time, and the by-laws of first merger sub as in effect immediately prior to the effective time will be the by-laws of the first surviving corporation following the effective time.

Second Merger

The merger agreement provides that the directors of the first surviving corporation as of immediately prior to the second effective time will serve as the directors of the second surviving corporation as of the second effective time, the officers of the first surviving corporation as of immediately prior to the second effective time will serve as the officers of the second surviving corporation following the second effective time, the certificate of incorporation of surviving merger sub as in effect immediately prior to the second effective time will be the certificate of incorporation of the second surviving corporation following the second effective time, and the by-laws of surviving merger sub as in effect immediately prior to the second effective time will be the by-laws of the second surviving corporation following the second effective time.

Post-Control Date Governance and Other Matters

The parties will take all actions necessary to designate and appoint four of the directors of KCS as of immediately prior to the effective time to serve as directors on the CPRL board as of the control date, in each case until such director's successor is elected and qualified or such director's earlier death, resignation or removal, in each case in accordance with CPRL's constating documents. In the event that after the effective time any of such four directors indicates that he or she plans to step down as a director of KCS and is willing to become a director of CPRL, CPRL will be required to seek the approval of the STB to allow such director to be appointed as a director of CPRL as soon as practicable and prior to the control date.

As promptly as practicable following the control date, CPRL will (i) change the name of CPRL to "Canadian Pacific Kansas City" and (ii) recognize Kansas City, Missouri as the location of the headquarters of CPRL's United States business and operations.

Merger Consideration

Under the merger agreement, at the effective time, each share of KCS common stock that is outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) will be automatically converted into the right to receive (1) 2.884 CPRL common shares and (2) $90.00 in cash, without interest, and each share of KCS preferred stock that is outstanding immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) will be converted into the right to receive $37.50 in cash, without interest.

The merger consideration and/or the preferred merger consideration will be equitably adjusted in the event of any stock dividend, subdivision, reorganization, reclassification, recapitalization, stock split, reverse stock split, combination or exchange of shares involving KCS common stock, KCS preferred stock or CPRL common shares prior to the effective time, to proportionally reflect such change.

No Fractional Shares

No fractional CPRL common shares will be issued in connection with the first merger and no certificates or scrip representing fractional CPRL common shares will be delivered on the conversion of shares of KCS common stock. Each holder of shares of KCS common stock who would otherwise have been entitled to receive as a result of the first merger a fraction of a CPRL common share (after aggregating all shares represented by the certificates and book-entry shares delivered by such holder) will receive, in lieu of such fractional CPRL common share, cash (without interest) in an amount (rounded down to the nearest cent) representing such holder's proportionate interest in the net proceeds from the sale by the exchange agent, on behalf of all such holders, of the aggregated number of fractional CPRL common shares that would otherwise have been issuable to such holders as part of the merger consideration (which we refer to as the "fractional share cash amount"). As soon as practicable after the effective time, the exchange agent will, on behalf of all such holders of fractional CPRL common shares, effect the sale of all such CPRL common shares that would otherwise have been issuable as part of the merger consideration at the then-prevailing prices on the NYSE through one or more member firms of the NYSE. After the proceeds of such sale have been received, the exchange agent will determine the applicable fractional share cash amount payable to each applicable holder in respect of its fractional CPRL common shares and will make such amounts available to such holders in accordance with the merger agreement. The payment of cash in lieu of fractional CPRL common shares to such holders is not a separately bargained-for consideration and solely represents a mechanical rounding-off of the fractions in the exchange. No such holder will be entitled to dividends, voting rights or any other rights in respect of any fractional CPRL common share that would otherwise have been issuable as part of the merger consideration.

Shares Subject to Properly Exercised Appraisal Rights

The dissenting shares will not be converted into the right to receive the merger consideration or the preferred merger consideration, as applicable, to which the holders of such shares would otherwise be entitled under the merger agreement, but will instead be cancelled and converted into the right to receive judicially determined "fair value" of such shares at the effective time. If, after the effective time, any such holder fails to perfect or effectively withdraws or loses such rights, such dissenting shares will thereafter no longer be considered dissenting shares and will be treated as if they had been converted into, at the effective time, the right to receive the merger consideration or preferred merger consideration, as applicable, without any interest thereon. See the subsection of this proxy statement/prospectus entitled "*Appraisal or Dissenters' Rights*," on page 113.

Surrender of KCS Common Stock

Prior to the effective time, CPRL will, on behalf of surviving merger sub, deposit or cause to be deposited with the exchange agent in trust for the benefit of holders of shares of KCS common stock and KCS preferred stock,

(i) cash sufficient to pay the aggregate cash consideration payable in respect of the KCS common stock and the aggregate preferred merger consideration and (ii) evidence of CPRL common shares in book-entry form representing the number of CPRL common shares sufficient to deliver the aggregate share consideration deliverable in respect of the KCS common stock.

As soon as reasonably practicable after the effective time and not later than three business days following the closing date, CPRL will cause the exchange agent to mail to each holder of record of shares of KCS common stock or KCS preferred stock whose shares were converted into the right to receive the merger consideration or the preferred merger consideration, as applicable, a letter of transmittal to the exchange agent and instructions for use in effecting the surrender of book-entry shares or certificates in exchange for the merger consideration or the preferred merger consideration, as applicable.

On the surrender of certificates (or effective affidavits of loss in lieu of a certificate) or book-entry shares to the exchange agent, together with a duly completed and validly executed letter of transmittal, or, in the case of book-entry shares, receipt of an "agent's message" by the exchange agent, and such other documents as may customarily be required by the exchange agent, the holder of such certificates (or effective affidavits of loss in lieu thereof) or book-entry shares will be entitled to receive in exchange the merger consideration or the preferred merger consideration, as applicable, together with any fractional share cash amount and any dividends or other distributions payable with respect to such shares following the effective time). No interest will be paid or accrued on any amount payable on due surrender of certificates (or effective affidavits of loss in lieu thereof) or book-entry shares. If payment of the merger consideration or preferred merger consideration, as applicable, is to be made to a person other than the person in whose name the surrendered certificate is registered, it will be a condition precedent of payment that (A) the certificate so surrendered will be properly endorsed or will be otherwise in proper form for transfer and (B) the person requesting such payment will have paid any transfer and other similar taxes required by reason of the payment of the merger consideration or preferred merger consideration, as applicable, to a person other than the registered holder of the certificate surrendered or will have established that such tax either has been paid or is not required to be paid.

In the case of any certificate that has been lost, stolen or destroyed, on the making of an affidavit of that fact by the person claiming such certificate to be lost, stolen or destroyed and, if required by the exchange agent, the posting by such person of a bond in customary amount as indemnity against any claim that may be made against it with respect to such certificate, the exchange agent will issue in exchange for such lost, stolen or destroyed certificate the merger consideration (together with the fractional share cash amount and any dividends or other distributions deliverable with respect to such shares following the effective time) or the preferred merger consideration, as applicable, payable with respect to the shares of KCS common stock or KCS preferred stock represented by such lost, stolen or destroyed certificate.

Withholding

The exchange agent, KCS, CPRL and each merger sub, as applicable, will be entitled to deduct and withhold from any amounts otherwise payable to holders of KCS common stock or KCS preferred stock pursuant to the conversion of shares and exchange of certificates such amounts as are required to be withheld or deducted under the Code, or under any provision of state, local or foreign tax law with respect to the making of such payment; provided, however, that the representation and warranty of KCS regarding the value of its stock not being attributable to real property in Canada contained in the merger agreement is true as of the effective time, no deduction or withholding will be made under the laws of Canada (or any province of Canada) from any such amounts (subject to certain specifically enumerated exceptions in the merger agreement) except to the extent that any such deduction or withholding will be required by a change in law after the date of the merger agreement. To the extent that amounts are so deducted or withheld and timely paid over to the relevant governmental entity, such deducted or withheld amounts will be treated for all purposes of the merger agreement as having been paid to the person in respect of which such deduction or withholding was made.

Treatment of KCS Equity Awards

KCS Stock Options

Each KCS stock option, whether vested or unvested, that is outstanding as of immediately prior to the effective time will, at the effective time, become fully vested and be converted into the right to receive an amount of cash equal to (i) the excess, if any of (A) the value of the merger consideration over (B) the per share exercise price of such option multiplied by (ii) the total number of shares of KCS common stock subject to such option as of immediately prior to the effective time, less applicable tax withholding.

KCS Restricted Share Awards

Each KCS restricted share award that is outstanding as of immediately prior to the effective time and was granted prior to March 21, 2021, will, at the effective time, become fully vested and be converted into the right to receive (i) the merger consideration in respect of each share of KCS common stock subject to such KCS restricted share award as of immediately prior to the effective time and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award, less applicable tax withholding.

Each KCS restricted share award that is outstanding as of immediately prior to the effective time and was granted on or after March 21, 2021, will, at the effective time, be converted into an award that entitles the holder thereof, upon vesting, to receive (i) an amount in cash equal to the value of the merger consideration in respect of each share of KCS common stock subject to such KCS restricted share award and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award. Each such cash- based award will have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding KCS restricted share award, except that such award will vest in full upon a qualifying termination.

KCS Performance Share Awards

Each KCS performance share award that is outstanding as of immediately prior to the effective time will, at the effective time, be converted into an award that entitles the holder thereof, upon vesting, to receive an amount in cash equal to the value of the merger consideration multiplied by 200% of the target number of shares of KCS common stock covered by the KCS performance share award as of immediately prior to the effective time. Each cash-based award will have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding KCS performance share award, except that performance-based vesting conditions will no longer apply and the award will vest in full upon a qualifying termination.

KCS Director Deferred Stock Awards

Each share of director deferred stock of KCS that is outstanding as of immediately prior to the effective time, will, at the effective time, be converted into the right to receive the merger consideration, less applicable tax withholding.

Conditions that Must be Satisfied or Waived for the Transaction to Occur

Mutual Conditions to Completion

The respective obligations of each party to effect the transaction are subject to the satisfaction or waiver by CPRL and KCS at or prior to the closing of the transaction of the following conditions:

- the affirmative vote of the holders of a majority of the outstanding shares of KCS voting stock in favor of the adoption of the merger agreement by KCS stockholders;

- the affirmative vote of a majority of the votes cast by the holders of outstanding CPRL common shares represented in person or by proxy and entitled to vote on such matter in favor of issuance of CPRL common shares in connection with the transaction by CPRL shareholders;
- the Form F-4 (of which this proxy statement/prospectus forms a part) having become effective in accordance with the provisions of the U.S. Securities Act and no stop order suspending the effectiveness of the Form F-4 having been issued and remaining in effect and no proceeding to that effect having been commenced;
- no injunction or similar order by any court or other governmental entity of competent jurisdiction having been entered and continuing to be in effect that prohibits or makes illegal the consummation of the transaction or the voting trust transaction;
- the authorizations required to be obtained from COFECE and the IFT with respect to the transactions contemplated by the merger agreement having been obtained; and
- the CPRL common shares to be issued in the first merger having been approved for listing on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing requirements.

Conditions to the Obligations of KCS

The obligation of KCS to effect the transaction is also subject to the satisfaction or waiver by KCS at or prior to the closing of the transaction of the following conditions:

- certain representations and warranties of CPRL and each merger sub in the merger agreement relating to the capitalization of CPRL and the absence of certain changes or events that would have a material adverse effect being true and correct in all respects, each as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date), except for *de minimis* inaccuracies;
- certain representations and warranties of CPRL in the merger agreement relating to the qualification, organization, existence and good standing of CPRL and the merger subs, the issued and outstanding shares of CPRL and the absence of any subscriptions, options, warrants, calls, convertible securities or other similar agreements relating to the issuance, transfer, redemption or acquisition of shares of CPRL or its subsidiaries, the requisite power and authority of CPRL and the merger subs to enter into the merger agreement, and no finders or brokers being true and correct in all material respects, each as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date);
- all other representations and warranties of CPRL and each merger sub in the merger agreement that are qualified by material adverse effect being true and correct in all respects as so qualified, each as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date);
- all other representations and warranties of CPRL and the merger subs in the merger agreement being true and correct as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date), except where the failure of such representations and warranties to be true or correct, individually or in the aggregate, would not have or would not reasonably be expected to have, individually or in the aggregate, a material adverse effect on CPRL;
- each of CPRL and the merger subs having performed in all material respects all obligations and complied in all material respects with all covenants required by the merger agreement to be performed or complied with by them prior to the closing of the transaction;
- since September 15, 2021, no event, change, occurrence, effect or development having occurred that has had, or is reasonably likely to have, a material adverse effect on CPRL;

- KCS's receipt of a certificate of the chief executive officer or another senior officer of CPRL, certifying that the conditions set forth in the bullets directly above have been satisfied; and
- KCS's receipt of an opinion of Wachtell, Lipton, Rosen & Katz, or, if Wachtell, Lipton, Rosen & Katz is unable to provide such opinion, another nationally recognized tax counsel dated as of the closing date, to the effect that the transaction will qualify as a "reorganization" within the meaning of Section 368(a) of the Code, and the transaction will not result in gain recognition under Section 367(a)(1) of the Code by persons who are stockholders of KCS immediately prior to the effective time (with certain exceptions).

Conditions to the Obligations of CPRL and the Merger Subs

The obligations of CPRL and each merger sub to effect the transaction are also subject to the satisfaction or waiver by CPRL at or prior to the closing of the transaction of the following conditions:

- certain representations and warranties of KCS in the merger agreement relating to the capitalization of KCS and the absence of certain changes or events that would have a material adverse effect being true and correct in all respects, each as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date), except for *de minimis* inaccuracies;
- certain representations and warranties of KCS in the merger agreement relating to the qualification, organization, existence and good standing of KCS, the issued and outstanding capital stock of KCS and the absence of any subscriptions, options, warrants, calls, convertible securities or other similar agreements relating to the issuance, transfer, redemption or acquisition of capital stock of KCS or its subsidiaries, the requisite power and authority of KCS to enter into the merger agreement, the KCS board to approve the merger agreement and resolving to recommend that KCS stockholder adopt the merger agreement and no finders or brokers being true and correct in all material respects, each as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date);
- all other representations and warranties of KCS in the merger agreement that are qualified by material adverse effect being true and correct in all respects as so qualified, each as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case, as of such date);
- all other representations and warranties of KCS in the merger agreement being true and correct as of the date of the merger agreement and as of the closing date as though made as of the closing date (except to the extent expressly made as of an earlier date, in which case as of such date), except where the failure of such representations and warranties to be true or correct, individually or in the aggregate, would not have or would not reasonably be expected to have, individually or in the aggregate, a material adverse effect on KCS;
- KCS having performed in all material respects all obligations and complied in all material respects with all covenants required by the merger agreement to be performed or complied with by it prior to the closing of the transaction;
- since September 15, 2021, no event, change, occurrence, effect or development having occurred that has had, or is reasonably likely to have, a material adverse effect on KCS; and
- CPRL's receipt of a certificate of the chief executive officer or another senior officer of KCS, certifying that the conditions set forth in the bullets directly above have been satisfied.

Frustration of Closing Conditions

None of CPRL, the merger subs or KCS may rely on the failure of any condition described above to be satisfied as a basis for not consummating the transaction or for terminating the merger agreement if such failure was caused by such party's material breach of any covenant or agreement of the merger agreement.

Representations and Warranties

The merger agreement contains a number of representations and warranties made by each of KCS, CPRL and the merger subs solely for the benefit of KCS, on the one hand, or CPRL and the merger subs, on the other hand, that are subject in some cases to important exceptions and qualifications including, among other things, as to materiality and material adverse effect. Furthermore, the assertions embodied in those representations and warranties are qualified by information in KCS's and CPRL's respective public filings and in the confidential disclosure schedules that the parties have exchanged in connection with signing the merger agreement, which disclosure schedules are not reflected in the merger agreement and will not otherwise be publicly disclosed. The confidential disclosure schedules contain information that modifies, qualifies and creates exceptions to the representations and warranties set forth in the merger agreement. See the section entitled "*The Merger Agreement—Material Adverse Effect*," on page 144 for a definition of material adverse effect applicable to each of KCS and CPRL. The representations and warranties were used for the purpose of allocation of risk between the parties to the merger agreement rather than establishing matters of fact. For the foregoing reasons, these descriptions, representations and warranties should not be read alone.

The representations and warranties of KCS, CPRL and the merger subs in the merger agreement relate to, among other things:

- due organization, valid existence, good standing, corporate power and authority, qualification to do business, organizational documents and ownership of their respective subsidiaries;
- capital structure, including in particular the number of shares of equity-based awards issued and outstanding and the absence of certain debt and securities;
- corporate power and authority to enter into the merger agreement and to complete the transactions contemplated by the merger agreement, board recommendations, requisite stockholder/shareholder approvals and the enforceability of the merger agreement;
- consents and approvals relating to the execution, delivery and performance of the merger agreement, including required filings with, and the consents and approvals of, government entities in connection with the transactions contemplated by the merger agreement;
- absence of conflicts with or breaches of its or its subsidiaries' governing documents, certain contracts or applicable laws as a result of the execution, delivery and performance of the merger agreement and the completion of the transactions contemplated by the merger agreement;
- filings with the SEC pursuant to the U.S. Exchange Act or U.S. Securities Act and, with respect to CPRL, with applicable Canadian securities regulators, since December 31, 2018;
- compliance with the applicable listing and corporate governance rules and regulations of the NYSE and the TSX;
- internal controls over financial reporting and disclosure controls and procedures;
- preparation of financial statements in compliance with U.S. GAAP;
- financial statements and fair presentation of consolidated financial position;
- no undisclosed liabilities;
- compliance with laws since December 31, 2018, and possession of requisite permits;
- compliance with anti-corruption, anti-bribery and anti-money-laundering laws and export and sanctions regulations in the past five years and institution of compliance policies since December 31, 2018;
- environmental matters;
- matters related to employee benefit plans, and labor and employment;
- the absence of any event, change, occurrence or development that has had or would reasonably be expected to have a material adverse effect on KCS or CPRL, as applicable, since December 31, 2020;

- the absence of certain investigations, litigation, orders and injunctions;
- accuracy of the information supplied for inclusion in this proxy statement/prospectus and in the management information circular to be provided to CPRL shareholders;
- tax matters;
- receipt of fairness opinions of financial advisors;
- required stockholder/shareholder approvals;
- affiliate transactions;
- brokers' fees in connection with the transactions contemplated by the merger agreement; and
- inapplicability of certain anti-takeover statutes or regulations or anti-takeover provisions in organizational documents.

The merger agreement also contains representations and warranties made by KCS as to, among other things:

- intellectual property matters;
- title to assets and title to properties (including real property) matters;
- matters with respect to certain material contracts;
- matters with respect to certain suppliers and customers;
- insurance matters; and
- the termination of the CN agreement and payment of the CN agreement termination payment and the CN refund;

The merger agreement also contains representations and warranties made by CPRL as to, among other things:

- debt financing matters;
- solvency; and
- absence of ownership by CPRL and its subsidiaries and either merger sub and their subsidiaries, of KCS common stock or certain securities, contract rights or derivative positions (other than the one share of KCS common stock acquired by CPRL on August 3, 2021).

Material Adverse Effect

Specified representations and warranties in the merger agreement are subject to materiality or material adverse effect qualifications (that is, such representations or warranties will not be deemed to be untrue or incorrect unless their failure to be true or correct, individually or in the aggregate, has had or would reasonably be expected to have a material adverse effect).

Under the merger agreement, a "material adverse effect" with respect to KCS or CPRL, as applicable, is defined as an event, change, occurrence, effect or development that (x) has a material adverse effect on the business, operations or financial condition of such party and its subsidiaries, taken as a whole, or (y) would prevent, materially delay or materially impair the ability of (i) in the case of KCS, KCS, and (ii) in the case of CPRL, CPRL or either merger sub, to consummate the transactions contemplated by the merger agreement or, in the case of CPRL, to obtain the debt financing required to fund the cash component of, and transaction fees and expenses associated with, the transaction, but, solely in the case of clause (x), will not include events, changes, occurrences, effects or developments relating to or resulting from:

- changes in general economic or political conditions or the securities, equity, credit or financial markets in general, or changes in or affecting domestic or foreign interest or exchange rates;

- any decline in the market price or trading volume of such party's shares, or any change in the credit rating of such party or any of its securities (provided, that the facts and circumstances underlying such decline or change may be taken into account in determining whether a material adverse effect in respect of such part has occurred to the extent not otherwise excluded by the definition thereof);
- changes or developments in the industries in which such party or its subsidiaries operate;
- changes in law or the interpretation or enforcement thereof after the date of the merger agreement;
- the execution, delivery or performance of the merger agreement or the public announcement or pendency or consummation of the transactions contemplated thereby, including the impact thereof on the relationships, contractual or otherwise, of such party or any of its subsidiaries with employees, partnerships, customers or suppliers or governmental entities;
- in the case of KCS, the identity of CPRL or any of its affiliates as the acquiror of KCS;
- compliance with the terms of, or the taking or omission of any action required by, the merger agreement or consented to (after disclosure to the other party of all material and relevant facts and information) or requested by such party in writing;
- any act of civil unrest, civil disobedience, war, terrorism, cyberterrorism, military activity, sabotage or cybercrime, including an outbreak or escalation of hostilities involving Canada, the U.S. or any other governmental entity or the declaration by any governmental entity of a national emergency or war, or any worsening or escalation of any such conditions threatened or existing on the date of the merger agreement;
- any hurricane, tornado, flood, earthquake, natural disaster, act of God or other comparable events;
- any pandemic, epidemic or disease outbreak (including COVID-19) or other comparable events;
- changes in generally accepted accounting principles or the interpretation or enforcement thereof after the date of the merger agreement;
- any litigation relating to or resulting from the merger agreement or the transactions contemplated thereby; or
- any failure of such party to meet internal or published projections, forecasts, guidance or revenue or earning predictions (provided, that the facts and circumstances underlying any such failure may be taken into account in determining whether a material adverse effect in respect of such party has occurred to the extent not otherwise excluded by the definition thereof);

except, with respect to the first, third, eighth, ninth, tenth, and eleventh bullets above, if the impact thereof is materially and disproportionately adverse to such party and its subsidiaries, taken as a whole, relative to the impact thereof on the operations in the railroad industry of other participants in such industry, the incremental material disproportionate impact may be taken into account in determining whether there has been a material adverse effect in respect of such party.

Conduct of Business Pending the Transaction

KCS

From and after the date of the merger agreement and prior to earlier of the control date and the termination of the merger agreement, except (i) as may be required by applicable law, (ii) as may be agreed in writing by CPRL (which consent will not be unreasonably withheld, delayed or conditioned), (iii) as may be expressly contemplated, required or expressly permitted by the merger agreement or (iv) as set forth in the disclosure schedules to the merger agreement provided by KCS (which we refer to as the "KCS disclosure schedules"), KCS will, and will cause its subsidiaries to, use its commercially reasonable efforts to (A) conduct its business in all material respects in the ordinary course of business in accordance with the capital allocation policy set forth on the KCS disclosure schedules, and (B) preserve intact in all material respects its business organization and

maintain existing relationships and goodwill with governmental entities, customers, suppliers, licensors, licensees, creditors, lessors, distributors, employees, contractors and business associates.

From and after the date of the merger agreement until the earlier of the control date and the termination of the merger agreement, except (w) as may be required by applicable law, (x) as may be agreed in writing by CPRL (which consent will not be unreasonably withheld, delayed or conditioned), (y) as may be expressly contemplated, required or expressly permitted by the merger agreement or (z) as set forth in the KCS disclosure schedules, KCS:

- will not, and will not permit any of its subsidiaries that is not wholly owned to, authorize or pay any dividends on or make any distribution with respect to its outstanding shares of capital stock (whether in cash, assets, stock or other securities of KCS or its subsidiaries), except (A) quarterly cash dividends paid by KCS on the outstanding shares of KCS common stock consistent with the KCS capital allocation policy, appropriately adjusted to reflect any stock dividends, subdivisions, splits, combinations or other similar events relating to the shares of KCS common stock, (B) dividends paid by KCS on the outstanding shares of KCS preferred stock in accordance with the terms thereof and (C) dividends and distributions paid by subsidiaries of KCS to KCS or to any of KCS's other wholly owned subsidiaries;
- will not, and will not permit any of its subsidiaries to, split, combine or reclassify any of its capital stock or issue or authorize or propose the issuance of any other securities in respect of, in lieu of or in substitution for shares of its capital stock, except as may be permitted by certain interim operating covenants contained in the merger agreement, and except for any such transaction by a wholly owned subsidiary of KCS that remains a wholly owned subsidiary after consummation of such transaction;
- will not, and will not permit any of its subsidiaries to except in the ordinary course of business, hire any employee or engage any independent contractor (who is a natural person) or terminate the employment of any employee of KCS or any of its subsidiaries or increase the compensation or other benefits payable or provided to KCS's or any of its subsidiaries' directors or employees, except that, notwithstanding the foregoing, except as required pursuant to the terms of any KCS benefit plan in effect as of the date of the merger agreement, KCS will not, and will not permit any of its subsidiaries to (A) grant any transaction or retention bonuses, (B) grant any KCS equity awards or other equity or long-term incentive compensation awards, or (C) subject to certain exceptions, enter into any employment, change of control, severance or retention agreement with any employee of KCS or any of its subsidiaries;
- will not, and will not permit any of its subsidiaries to, materially change financial accounting policies or procedures or any of its methods of reporting income, deductions or other material items for financial accounting purposes, except as required by U.S. GAAP or SEC rule or policy;
- will not adopt any amendments to the organizational documents of KCS or any of its significant subsidiaries, other than amendments solely to effect ministerial changes to such documents;
- except for transactions among KCS and its wholly owned subsidiaries or among KCS's wholly owned subsidiaries, will not, and will not permit any of its subsidiaries to, issue, sell, pledge, dispose of or encumber, or authorize the issuance, sale, pledge, disposition or encumbrance of, any shares of its capital stock or other ownership interests in KCS or any subsidiaries of KCS or any securities convertible into, exercisable for or exchangeable for any such shares or ownership interests or take any action to cause to be vested any otherwise unvested KCS equity award (except as otherwise provided by the terms of the merger agreement or the express terms of any such KCS equity award), other than (A) issuances of shares of KCS common stock in respect of any exercise of or settlement of KCS equity awards outstanding on the date of the merger agreement or as may be granted after the date of the merger agreement as permitted under certain interim operating covenants contained in the merger agreement, (B) permitted liens and (C) pursuant to existing agreements in effect prior to the execution of the merger agreement (or refinancings thereof permitted pursuant to certain interim operating covenants contained in the merger agreement);

- except for transactions among KCS and its subsidiaries or among KCS's wholly owned subsidiaries, will not, and will not permit any of its subsidiaries to, purchase, redeem or otherwise acquire any shares of its capital stock or any rights, warrants or options to acquire any such shares, other than the acquisition of shares of KCS common stock from a holder of KCS equity awards in satisfaction of withholding obligations or in payment of the exercise price;
- will not, and will not permit any of its subsidiaries to, sell, lease, license, transfer, exchange or swap, or subject to any lien (other than permitted liens), or otherwise dispose of, any material portion of its businesses, properties or assets, including the capital stock of its subsidiaries but excluding intellectual property, other than in the ordinary course of business, and except (A) pursuant to existing agreements in effect prior to the execution of the merger agreement (or refinancings thereof permitted pursuant to certain interim operating covenants contained in the merger agreement), (B) transactions among KCS and its subsidiaries or among KCS's subsidiaries or (C) for consideration not in excess of $25 million individually or $50 million in the aggregate;
- will not, and will not permit any of its subsidiaries to, settle, pay, discharge or satisfy any action, other than any action that involves only the payment of monetary damages not in excess of $15 million for any individual action or $25 million in the aggregate over the amount reflected or reserved against in the audited consolidated balance sheet of KCS and its subsidiaries as of December 31, 2020 (or the notes thereto) relating to such actions and would not result in (x) the imposition of any order that would restrict the future activity or conduct of KCS or any of its subsidiaries (excluding, for the avoidance of doubt, releases of claims, confidentiality and other *de minimis* obligations customarily included in monetary settlements) or (y) a finding or admission of a violation of law;
- will not, and will not permit any of its subsidiaries to, terminate or permit any material KCS permit to lapse, other than in accordance with the terms and regular expiration thereof, or fail to apply on a timely basis for any renewal of any renewable material KCS permit (excluding, in each case, any KCS permit that KCS, in its reasonable judgment, no longer believes to be material or necessary to the conduct of its businesses);
- will not, and will not permit any of its subsidiaries to, adopt or enter into a plan of complete or partial liquidation, dissolution, merger, consolidation, restructuring, recapitalization or other reorganization of KCS or any of its subsidiaries, except for any such transactions between or among KCS's subsidiaries or between or among any of KCS's subsidiaries and KCS;
- will not, and will not permit any of its subsidiaries to, enter into any new line of business that is not reasonably related to the existing business lines of KCS and its subsidiaries;
- will not, and will not permit any of its subsidiaries to, reorganize, restructure or combine any railroads or railroad operations if any such action would result in KCS's subsidiaries other than KCSR being classified as a Class 1 railroad by the STB; and
- will not, and will not permit any of its subsidiaries to enter into any consent decree or similar agreement that, individually or in the aggregate, is material to KCS and its subsidiaries, taken as a whole.

In addition, from and after the date of the merger agreement and prior to the earlier of the effective time and the date, if any, on which the merger agreement is earlier terminated pursuant to its terms (the "interim period"), except (w) as may be required by applicable law, (x) as may be agreed in writing by CPRL (which consent will not be unreasonably withheld, delayed or conditioned), (y) as may be expressly contemplated, required or expressly permitted by the merger agreement or (z) as set forth in the KCS disclosure schedules, KCS:

- will not, and will not permit any of its subsidiaries to, incur, assume or guarantee, any indebtedness for borrowed money, other than in the ordinary course of business, except for (A) any indebtedness among KCS and its wholly owned subsidiaries or among KCS's wholly owned subsidiaries, (B) any indebtedness incurred to replace, renew, extend, refinance or refund any existing indebtedness of KCS

or its subsidiaries (including indebtedness incurred to repay or refinance related fees, expenses, premiums and accrued interest), (C) guarantees or credit support provided by KCS or any of its subsidiaries for indebtedness of KCS or any of its wholly owned subsidiaries, to the extent such indebtedness is (1) in existence on the date of the merger agreement or (2) incurred in compliance with certain interim operating covenants contained in the merger agreement, (D) indebtedness incurred pursuant to agreements in effect prior to the execution of the merger agreement (or replacements, renewals, extensions or refinancings thereof) and (E) other indebtedness in an aggregate principal amount outstanding at any time incurred by KCS or any of its subsidiaries that is consistent with the KCS capital allocation policy;

- will not, and will not permit any of its subsidiaries to, make any loans, advances, guarantees or capital contributions to or investments in any person (other than between KCS or any of its wholly owned subsidiaries, on the one hand, and any of KCS's wholly owned subsidiaries, on the other hand) in excess of $35 million individually or $50 million in the aggregate;
- will not, and will not permit any of its subsidiaries to, enter into any contract with a term greater than two years, that may not be terminated by KCS or any of its subsidiaries without cause, and would have been a KCS material contract had it been entered into prior to the merger agreement, terminate or modify, amend or waive any material rights under any KCS material contract in any material respect in a manner that is adverse to KCS, in each case, other than in the ordinary course of business or as otherwise contemplated by certain interim operating covenants contained in the merger agreement;
- will not, and will not permit any of its subsidiaries to, acquire assets (other than pursuant to any capital expenditures permitted by certain interim operating covenants contained in the merger agreement) from any other person with a fair market value or purchase price in excess of $25 million individually or $50 million in the aggregate in any transaction or series of related transactions, in each case, including any amounts or value reasonably expected to be paid in connection with a future earn-out, purchase price adjustment, release of "holdback" or similar contingent payment obligation, or that could reasonably be expected to prevent, materially delay or materially impair the ability of KCS to consummate the transactions contemplated by the merger agreement, other than acquisitions of inventory or other goods in the ordinary course of business;
- will not, and will not permit any of its subsidiaries to, make or authorize any capital expenditures other than (A) capital expenditures not in excess of $700 million in the aggregate in any 12-month period or (B) other capital expenditures to the extent necessary to restore service to KCS railroads, repair improvements on KCS real estate or guarantee safety in the event of railroad accidents or incidents (natural or otherwise) affecting railroad operations or real estate;
- other than consistent with past practice, will not (A) make (other than in the ordinary course of business), change or revoke any material tax election, (B) change any material method of tax accounting or tax accounting period, (C) file any amended tax return with respect to any material tax, (D) settle or compromise any material tax proceeding for an amount in excess of $10 million individually or $25 million in the aggregate over the amount reflected or reserved against in the balance sheet (or the notes thereto) included in any forms, statements, certifications, documents and reports furnished or filed by KCS to the SEC relating thereto or enter into any closing agreement relating to any material tax, (E) surrender any right to claim a material tax refund, or (F) agree to an extension or waiver of the statute of limitations with respect to the assessment of any material tax without notifying CPRL in writing reasonably promptly after entering any such agreement;
- will not, and will not permit any of its subsidiaries to become a party to, establish, adopt, materially amend, commence participation in or terminate any collective bargaining agreement or other agreement with a labor union, works council or similar organization;
- will not, and will not permit any of its subsidiaries to terminate or fail to exercise renewal rights with respect to any insurance policies of KCS and its subsidiaries in a manner that would (after taking into

account any replacement insurance policies) materially and adversely affect the overall insurance coverage of KCS and its subsidiaries, taken as a whole;
- will not, and will not permit any of its subsidiaries to, sell, transfer, lease, license, mortgage, pledge, surrender, encumber, divest, or otherwise dispose of any KCS intellectual property (other than permitted liens) material to the business of KCS or any of its subsidiaries, except for non-exclusive licenses of KCS intellectual property granted in the ordinary course of business;
- will not, and will not permit any of its subsidiaries to, abandon or otherwise allow to lapse or expire any material registered KCS intellectual property, other than lapses or expirations of any registered KCS intellectual property that is at the end of its maximum statutory term (with renewals); and
- will not, and will not permit any of its subsidiaries to, agree, in writing or otherwise, to take any of the foregoing actions, including those prohibited prior to the control date.

Nothing contained in the merger agreement gives CPRL or either merger sub, directly or indirectly, the right to control or direct KCS's or its subsidiaries' operations prior to the control date. Prior to the control date, KCS will exercise, consistent with the terms and conditions of the merger agreement and the voting trust agreement and subject to applicable law, complete control and supervision over its and its subsidiaries' operations.

CPRL

During the interim period, except (i) as may be required by applicable law, (ii) as may be agreed in writing by KCS (which consent will not be unreasonably withheld, delayed or conditioned), (iii) as may be expressly contemplated, required or expressly permitted by the merger agreement or (iv) as set forth in the disclosure schedules to the merger agreement provided by CPRL (the "CPRL disclosure schedules"), CPRL will, and will cause its subsidiaries to, use its commercially reasonable efforts to (A) conduct its business in all material respects in the ordinary course of business and (B) preserve intact in all material respects its business organization and maintain existing relationships and goodwill with governmental entities, customers, suppliers, licensors, licensees, creditors, lessors, distributors, employees, contractors and business associates.

During the interim period, except (w) as may be required by applicable law, (x) as may be agreed in writing by KCS (which consent will not be unreasonably withheld, delayed or conditioned), (y) as may be expressly contemplated, required or expressly permitted by the merger agreement or (z) as set forth in the CPRL disclosure schedules, CPRL:
- will not, and will not permit any of its subsidiaries that is not wholly owned to, authorize or pay any dividends on or make any distribution with respect to its outstanding shares of capital stock (whether in cash, assets, stock or other securities of CPRL or its subsidiaries), except (A) regular quarterly cash dividends paid by CPRL on the CPRL common shares consistent with past practice, appropriately adjusted to reflect any stock dividends, subdivisions, splits, combinations or other similar events relating to the CPRL common shares, (B) dividends paid by CPRL on the outstanding shares of perpetual 4% consolidated debenture stock of CPRL in accordance with the terms thereof and (C) dividends and distributions paid by subsidiaries of CPRL to CPRL or to any of CPRL's other wholly owned subsidiaries;
- will not, and will not permit any of its subsidiaries to, split, combine or reclassify any of its capital stock or issue or authorize or propose the issuance of any other securities in respect of, in lieu of or in substitution for shares of its capital stock, except for any such transaction by a wholly owned subsidiary of CPRL that remains a wholly owned subsidiary after consummation of such transaction;
- will not, and will not permit any of its subsidiaries to, materially change financial accounting policies or procedures or any of its methods of reporting income, deductions or other material items for financial accounting purposes, except as required by U.S. GAAP or rule or policy of the SEC or the Canadian securities administrators;

- will not adopt any amendments to the organizational documents of CPRL, other than amendments solely to effect ministerial changes to such documents;
- except for transactions among CPRL and its wholly owned subsidiaries or among CPRL's wholly owned subsidiaries, will not, and will not permit any of its subsidiaries to, issue, sell, pledge, dispose of or encumber, or authorize the issuance, sale, pledge, disposition or encumbrance of, any shares of its capital stock or other ownership interests in any subsidiaries of CPRL or any securities convertible into, exercisable for or exchangeable for any such shares or ownership interests or take any action to cause to be vested any otherwise unvested CPRL equity award (except as otherwise provided by the terms of the merger agreement or the express terms of any such CPRL equity award), other than (A) issuances of CPRL common shares (x) in respect of any exercise of or settlement of CPRL equity awards outstanding on the date of the merger agreement, (y) as permitted under the debt commitment letters or (z) as may be granted after the date of the merger agreement in the ordinary course of business, (B) the grant of CPRL equity awards or other equity compensation awards in the ordinary course of business (and the issuance or transfer of any CPRL common shares in connection therewith), (C) any permitted liens and (D) pursuant to existing agreements in effect prior to the execution of the merger agreement;
- will not, and will not permit any of its subsidiaries to, sell, lease, license, transfer, exchange or swap, or subject to any lien (other than permitted liens), or otherwise dispose of, any material portion of its businesses, properties or assets, including the capital stock of its subsidiaries, other than in the ordinary course of business, and except (A) pursuant to existing agreements in effect prior to the execution of the merger agreement, (B) transactions among CPRL and its subsidiaries or among CPRL's subsidiaries or (C) for consideration not in excess of $50 million individually or $100 million in the aggregate;
- will not, and will not permit any of its subsidiaries to, adopt or enter into a plan of complete or partial liquidation, dissolution, merger, consolidation, restructuring, recapitalization or other reorganization of CPRL or any of its subsidiaries, except for any such transactions between or among CPRL's subsidiaries; and
- will not, and will not permit any of its subsidiaries to, agree, in writing or otherwise, to take any of the foregoing actions.

During the interim period, CPRL will not, and will cause its affiliates not to, directly or indirectly (whether by plan of arrangement, amalgamation, business combination, merger, consolidation or otherwise), acquire, purchase, lease or license or otherwise enter into a transaction with (or agree to acquire, purchase, lease or license or otherwise enter into a transaction with) any business, corporation, partnership, association or other business organization or division or part thereof, or any securities or collection of assets, if doing so could reasonably be expected to: (i) impose any material delay in the obtaining of, or materially increase the risk of not obtaining, any consent of any governmental entity necessary to consummate the transactions contemplated by the merger agreement or the expiration or termination of any applicable waiting period; (ii) materially increase the risk of any governmental entity entering an order prohibiting the consummation of the transactions contemplated by the merger agreement; (iii) materially increase the risk of not being able to remove any such order on appeal or otherwise; or (iv) otherwise prevent or materially delay the consummation of the transactions contemplated by the merger agreement (including the debt financing).

No Solicitation

CPRL and KCS have agreed they each will not, and they each will cause their respective subsidiaries and their and their respective directors and officers not to, and will use reasonable best efforts to cause their other representatives, not to, directly or indirectly:

- solicit, initiate or knowingly encourage or knowingly facilitate any inquiry regarding, or the making or submission of any proposal, offer or indication of intent that constitutes, or would reasonably be expected to lead to, or result in, an alternative proposal;

- engage in, continue or otherwise participate in any discussions or negotiations with any person regarding an alternative proposal or any inquiry, proposal or offer that would reasonably be expected to lead to, or result in, an alternative proposal (except to notify such person that the provisions of the merger agreement prohibit any such discussions or negotiations);
- furnish any nonpublic information relating to such party or its subsidiaries in connection with or for the purpose of facilitating an alternative proposal or any inquiry, proposal offer or indication of intent that would reasonably be expected to lead to, or result in, an alternative proposal;
- recommend or enter into any other letter of intent, memorandum of understanding, agreement in principle, option agreement, acquisition agreement, merger agreement, joint venture agreement, partnership agreement or other similar agreement with respect to an alternative proposal (except for permitted confidentiality agreements as discussed below); or
- approve, authorize or agree to do any of the foregoing or otherwise knowingly facilitate any effort or attempt to make an alternative proposal.

Prior to the time, but not after, in the case of KCS, the KCS stockholder approval is obtained or, in the case of CPRL, the CPRL shareholder approval is obtained, in response to an unsolicited, *bona fide* written alternative proposal that did not result from such party's violation of the non-solicitation provisions contained in the merger agreement, CPRL or KCS, as applicable, may (including through their representatives) contact the third party making such alternative proposal to clarify the terms and conditions of the alternative proposal. If such alternative proposal constitutes a superior proposal or the relevant party's board of directors determines in good faith after consultation with outside legal and financial advisors that such alternative proposal could reasonably be expected to lead to a superior proposal, the following actions may be taken:

- such party may furnish non-public information to the third party who made such alternative proposal (including its representatives and prospective equity and debt financing sources) in response to a request for such non-public information if prior to furnishing such information, CPRL or KCS, as applicable, receives from the third party making such alternative proposal, an executed confidentiality agreement with confidentiality and use provisions that, in each case, are not less restrictive in the aggregate to such third party than the terms in the Confidentiality Agreement, dated as of December 9, 2020, between CPRL and KCS are to the other party (it being understood that such confidentiality agreement does not need to include any "standstill" or similar provisions or otherwise prohibit the making or amendment of any alternative proposal); provided, however, that if the third party making such alternative proposal is a known competitor of such party, such party will not provide any commercially sensitive non-public information to such third party other than in accordance with customary "clean room" or other similar procedures designed to limit the disclosure of competitively sensitive information; and
- such party may engage in discussions or negotiations with the third party (including its representatives) with respect to the alternative proposal.

CPRL and KCS are each required to promptly give notice to the other party if it or its representatives receive (i) any inquiries, proposals or offers with respect to an alternative proposal or (ii) any request for information that, to the knowledge of such party, has been or is reasonably likely to have been made in connection with any alternative proposal. Such notice is required to include the name of the applicable third party and the material terms and conditions of such inquiries, proposals or offers (including, if applicable, complete copies of any written requests, proposals or offers and any other material documents, including proposed agreements). CPRL or KCS, as applicable, will be required to thereafter keep the other party reasonably informed, on a reasonably current basis, of any material developments regarding any alternative proposal or any material change to the terms of any such alternative proposal and any material change to the status of any such discussions or negotiations with respect thereto.

Change of Recommendation

Except as permitted by the merger agreement, neither party's board of directors (including any committee thereof) may:

- withhold, withdraw, qualify or modify (or propose publicly to withhold, withdraw, qualify or modify): (i) in the case of the KCS board, its recommendation to the KCS stockholders to adopt the merger agreement and the transactions contemplated by the merger agreement; and (ii) in the case of the CPRL board, the recommendation to the CPRL shareholders to approve the CPRL common share issuance in connection with the first merger;
- fail to include (i) in the case of KCS, the KCS recommendation in this proxy statement/prospectus or (ii) in the case of CPRL, the CPRL recommendation in the management information circular, and;
- if any alternative proposal that is structured as a tender offer or exchange offer for the outstanding CPRL common shares or shares of KCS common stock, as applicable, fail to recommend within ten business days after its commencement, against acceptance of such tender offer or exchange offer by its shareholders or stockholders, as applicable;
- approve, adopt, recommend, or declare advisable any alternative proposal or publicly propose to approve, adopt, recommend or declare advisable any alternative proposal; or
- approve, adopt, recommend or declare advisable or enter into any letter of intent, memorandum of understanding, agreement in principle, acquisition agreement, merger agreement, option agreement, joint venture agreement, partnership agreement or other agreement (other than a confidentiality agreement referred to and entered into in compliance with the section of the merger agreement described above under the subsection below entitled "*No Solicitation*" with respect to any alternative proposal).

The taking of any of the actions set forth above will constitute a "change of recommendation."

Furthermore, each of KCS and CPRL will (and will cause its subsidiaries and its and their respective directors and officers to, and will use its reasonable best efforts to cause its other representatives to) promptly terminate any existing discussions and negotiations conducted prior to the date of the merger agreement with any person (other than CPRL, KCS or any of their respective affiliates or representatives) with respect to any alternative proposal, or proposal or transaction that could reasonably be expected to lead to or result in an alternative proposal. Each of KCS and CPRL will promptly terminate all physical and electronic data access previously granted to such persons and request that any such persons promptly return or destroy all confidential information concerning KCS or CPRL, as applicable, and any of its subsidiaries and provide prompt written confirmation thereof.

Prior to the time, in the case of KCS, the KCS stockholder approval is obtained or, in the case of CPRL, the CPRL shareholder approval is obtained, the board of directors of KCS or CPRL, as applicable, may:

- In response to a superior proposal, effect a change of recommendation and/or, in the case of KCS, cause KCS to terminate the merger agreement to enter into a definitive agreement providing for a superior proposal, if: (i) KCS or CPRL, as applicable, has given the other party written notice of its intent to take such action at least five business days in advance, setting forth a description of the terms and conditions of the superior proposal that is the basis for such action (and including the identity of the person making the superior proposal and a copy of the proposed definitive agreement for such superior proposal, if any); (ii) KCS or CPRL, as applicable, negotiates in good faith during such five-business-day period with the other party (to the extent such other party wishes to negotiate) to enable such other party to make such amendments to the terms of the merger agreement as would permit the KCS board or the CPRL board, as applicable, not to effect a change of recommendation in connection with such superior proposal or in the case of KCS, not to cause KCS to terminate the merger agreement in connection with the entry into a definitive agreement providing for a superior proposal; and (iii) at the end of such five-business-day period, prior to taking action to effect a change of recommendation

(or, in the case of KCS, terminating the merger agreement), the KCS board or the CPRL board, as applicable, takes into account any firm commitments by the other party to amend the terms of the merger agreement made in writing and any other proposals or information offered by the other party in response to the superior proposal, as applicable, during the five-business-day period, and concludes that the superior proposal would continue to constitute a superior proposal if such amendments were to be given effect. For purposes of the aforementioned negotiation period, any material modification to the terms of the superior proposal (including any change in the amount or, if applicable, form of consideration) will be deemed to be a new alternative proposal, except that references to five business days will be deemed to be references to three business days.

- In response to an intervening event, effect a change of recommendation, if the KCS board or the CPRL board, as applicable, determines in good faith, after consultation with the applicable party's outside legal counsel, that the failure of the KCS board or the CPRL board, as applicable, to take such action would be reasonably likely to be inconsistent with its fiduciary duties under applicable law; provided, that the KCS board or the CPRL board, as applicable, will not be entitled to make such a change in recommendation unless: (i) KCS or CPRL, as applicable, has given the other party written notice of its intent to take such action at least five business days in advance, setting forth a description of the applicable intervening event; and (ii) at the end of such five business day period, prior to taking action to effect a change of recommendation, the KCS board or the CPRL board, as applicable, takes into account any firm commitments to amend the terms of the merger agreement made in writing and any other proposals or information offered by the other party in response to the intervening event and determines in good faith, after consultation with its outside legal counsel, that the failure of the KCS board or the CPRL board, as applicable, to make such change of recommendation would continue to be reasonably likely to be inconsistent with its fiduciary duties under applicable law if such amendments were to be given effect.

As further described in the section below entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement*," if (i) CPRL terminates the merger agreement due to the KCS board making a change of recommendation, or if KCS terminates the merger agreement to enter into a definitive agreement providing for a superior proposal, KCS will be required to pay CPRL a termination payment of $700.0 million and the $700.0 million CN termination amount refund, and (ii) if KCS terminates the merger agreement due to the CPRL board making a change of recommendation, CPRL will be required to pay a termination payment of $700.0 million.

The merger agreement will not prohibit KCS or CPRL, or each of their board of directors or any committees thereof, from complying with their respective disclosure obligations under applicable law, rules or policies of the NYSE or the TSX, as applicable.

Efforts to Obtain Required Stockholder/Shareholder Votes

KCS will take all action necessary in accordance with applicable law and its organizational documents to set a record date for, duly give notice of, convene and hold a meeting of its stockholders following the mailing of this proxy statement/prospectus for the purpose of obtaining the KCS stockholder approval as soon as reasonably practicable following the date when this proxy statement/prospectus and Form F-4 is declared effective by the SEC (referred to as the "clearance date"). Unless KCS has made a change of recommendation in compliance with the provisions of the merger agreement, KCS will include its recommendation for the KCS stockholders to vote to adopt the merger agreement in this proxy statement/prospectus, and will solicit, and use its reasonable best efforts to obtain, the KCS stockholder approval at the KCS special meeting (including by soliciting proxies in favor of the adoption of the merger agreement) as soon as reasonably practicable.

KCS will cooperate with and keep CPRL informed on a reasonably current basis regarding its solicitation efforts and voting results following the dissemination of this proxy statement/prospectus to its shareholders. KCS may adjourn or postpone the KCS special meeting (i) to allow time for the filing and dissemination of any

supplemental or amended disclosure document that the KCS board has determined in good faith (after consultation with its outside legal counsel) is required to be filed and disseminated under applicable law, (ii) if as of the time that the KCS special meeting is originally scheduled (as set forth in this proxy statement/prospectus) there are insufficient shares of KCS voting stock represented (either in person (including virtually) or represented by proxy) to constitute a quorum necessary to conduct the business of the KCS special meeting, (iii) to allow reasonable additional time to solicit additional proxies necessary to obtain the KCS stockholder approval, (iv) to comply with applicable law or (v) with the prior written consent of CPRL (which will not be unreasonably withheld, conditioned or delayed). Without the prior written consent of CPRL (which will not be unreasonably withheld, conditioned or delayed), the adoption of the merger agreement will be the only matter (other than matters of procedure and matters required by applicable law to be voted on by KCS stockholders in connection with the adoption of the merger agreement) that KCS will propose to be acted on by KCS stockholders at the KCS special meeting.

CPRL will take all action necessary in accordance with applicable law and its organizational documents to set a record date for, duly give notice of, convene and hold a meeting of its shareholders following the mailing of the management information circular for the purpose of obtaining the CPRL shareholder approval as soon as reasonably practicable following the clearance date. Unless CPRL has made a change of recommendation in compliance with the provisions of the merger agreement, CPRL will include the CPRL recommendation in the management information circular, and will solicit, and use its reasonable best efforts to obtain, the CPRL shareholder approval at the CPRL special meeting (including by soliciting proxies in favor of the CPRL common share issuance) as soon as reasonably practicable.

CPRL will cooperate with and keep KCS informed on a reasonably current basis regarding its solicitation efforts and voting results following the dissemination of the management information circular to its shareholders. CPRL may adjourn or postpone the CPRL special meeting (i) to allow time for the filing and dissemination of any supplemental or amended disclosure document that the CPRL board has determined in good faith (after consultation with its outside legal counsel) is required to be filed and disseminated under applicable law, (ii) if as of the time that the CPRL special meeting is originally scheduled (as set forth in the management information circular) there are insufficient CPRL common shares represented (either in person (including virtually) or by proxy) to constitute a quorum necessary to conduct the business of the CPRL special meeting, (iii) to allow reasonable additional time to solicit additional proxies necessary to obtain the CPRL shareholder approval, (iv) to comply with applicable law or (v) with the prior written consent of KCS (which will not be unreasonably withheld, conditioned or delayed). Without the prior written consent of KCS (which will not be unreasonably withheld, conditioned or delayed), the approval of the CPRL common share issuance will be the only matter (other than matters of procedure and matters required by applicable law to be voted on by CPRL shareholders in connection with the adoption of the merger agreement) that CPRL will propose to be acted on by the shareholders of CPRL at the CPRL special meeting.

The obligations of KCS and CPRL to hold the meetings of their respective stockholders and shareholders will not be affected solely by the making of a change of recommendation or solely by the commencement of or announcement or disclosure, or communication to KCS or CPRL, of any alternative proposal.

Financing

Debt Financing

CPRL has agreed to use its reasonable best efforts, and will cause each of its subsidiaries to use its reasonable best efforts to obtain funds sufficient, together with cash and other sources of funds immediately available to CPRL on the closing date, for the satisfaction of CPRL's obligations under the merger agreement and the debt commitment letters, including payment of the cash consideration and preferred merger consideration and any fees and expenses of or payable by CPRL, the merger subs or CPRL's affiliates, and for any repayment or refinancing of the financing amounts. CPRL has agreed to use its reasonable best efforts to take, or cause to be taken, all actions, and do, or cause to be done, all things necessary, proper or advisable to obtain the proceeds of

the financing contemplated by the debt commitment letters on the terms and subject only to the conditions described in the debt commitment letters, including (i) maintaining in effect the debt commitment letters, (ii) negotiating and entering into definitive agreements with respect to the debt financing consistent with the terms and conditions contained therein on or prior to the closing date, (iii) satisfying on a timely basis all conditions in the debt commitment letters and the definitive agreements within CPRL's control and complying with its obligations under the debt commitment letters and (iv) enforcing its rights under the debt commitment letters, in each case in a timely and diligent manner. Other than the commitment letter, all debt commitment letters have been terminated.

In the event any portion of the debt financing contemplated by the debt commitment letters becomes unavailable regardless of the reason therefor, (A) CPRL will promptly notify KCS in writing of such unavailability and the reason therefor and (B) CPRL will use its reasonable best efforts, and will cause each of its subsidiaries to use their reasonable best efforts, to obtain as promptly as practicable following the occurrence of such event, alternative financing for any such portion from alternative sources in an amount sufficient, when taken together with cash and the other sources of immediately available funds to CPRL at the closing of the transaction to pay the financing amounts and that do not include any conditions to the consummation of such alternative financing that are more onerous than the conditions set forth in the debt commitment letters. To the extent requested in writing by KCS from time to time, CPRL will keep KCS informed on a reasonably current basis of the status of its efforts to arrange and consummate the debt financing. CPRL will promptly notify KCS in writing if there exists any actual or threatened material breach, default, repudiation, cancellation or termination by any party to the debt commitment letters or any definitive agreement and a copy of any written notice or other written communication from any financing party with respect to any actual material breach, default, repudiation, cancellation or termination by any party to the debt commitment letters or any definitive agreement or any provision thereof.

CPRL has acknowledged and agreed that compliance with the foregoing obligations will not relieve CPRL of its obligations to consummate the transactions contemplated by the merger agreement whether or not the debt financing is available and that the receipt or availability of any funds or financing (including the debt financing contemplated by the debt commitment letters) by CPRL or any other financing or other transactions will not be a condition to any of CPRL's obligations under the merger agreement.

Cooperation of KCS

KCS has agreed to use its reasonable best efforts, and will cause each of its subsidiaries to use its reasonable best efforts, and each of them will use their reasonable best efforts to cause their respective representatives to use their reasonable best efforts, to provide customary cooperation, to the extent reasonably requested by CPRL in writing, in connection with the offering, arrangement, syndication, consummation, issuance or sale of any debt financing or alternative financing (provided, that such requested cooperation does not unreasonably interfere with the ongoing operations of KCS or its affiliates and is otherwise subject to certain specified limitations), including, to the extent so requested, using reasonable best efforts to:

- furnish promptly to CPRL financing information regarding KCS and its subsidiaries in connection with the debt financing;
- assist CPRL in its preparation of the customary pro forma financial statements in connection with the debt financing;
- provide reasonable and customary assistance to CPRL and the financing parties in their marketing efforts in connection with all or any portion of the debt financing;
- make senior management of KCS available, at reasonable times and locations and upon reasonable prior notice, to participate in meetings and other customary syndication activities;
- cause KCS's independent registered accounting firm to provide customary assistance with the debt financing;

- provide customary authorization letters authorizing the distribution of KCS's information to prospective lenders in connection with a syndicated bank financing;
- assist in obtaining or updating corporate and facility credit ratings;
- assist in the negotiation and preparation of any credit agreement, indenture, note, purchase agreement, underwriting agreement, guarantees and customary closing certificates, in each case as contemplated in connection with the debt financing;
- make introductions of CPRL to KCS's existing lenders and facilitate relevant coordination between CPRL and such lenders;
- cooperate with internal and external counsel of CPRL in connection with providing customary back-up certificates and factual information regarding any legal opinion that such counsel may be required to deliver in connection with the debt financing;
- deliver, at least three business days prior to closing of the transaction, to the extent reasonably requested in writing at least nine business days prior to closing, all documentation and other information regarding KCS and its subsidiaries that any financing party reasonably determines is required by regulatory authorities under applicable "know your customer" and anti-money-laundering rules and regulations and, to the extent required by any financing party, beneficial ownership certificates;
- at CPRL's written request, provide all reasonable assistance to CPRL in connection with any steps CPRL may determine are necessary or desirable to take to (A) obtain consent for the change of control under KCS's revolving credit agreement arising from the transaction and/or (B) prepay some or all amounts outstanding under KCS's revolving credit agreement;
- at CPRL's written request, cooperate with and use reasonable best efforts to provide all reasonable assistance to CPRL in connection with any amendments to certain financing agreements;
- on the closing date but immediately following the closing of the transaction, at CPRL's request (which may be prior to the closing date), execute such documentation as is reasonably requested so that KCS can assume the debt commitment letter in respect of KCS's revolving credit agreement (to the extent the debt commitments thereunder have not been terminated at closing of the transaction in accordance with their terms); and
- consent to the use of KCS's and its subsidiaries' logos in connection with the debt financing.

Employee Matters

From and after the effective time, KCS will, and to the extent within its control, CPRL will cause KCS to, honor all KCS benefit plans in accordance with their terms as in effect immediately before the effective time. For a period of one year following the control date, CPRL will provide, or will cause to be provided, to each current employee of KCS and its subsidiaries (i) base compensation and cash and equity target incentive opportunities that, in each case, are no less favorable than were provided to the KCS employee immediately before the effective time (it being understood that in lieu of equity compensation awards, CPRL may provide KCS employees who, as of immediately prior to the effective time were eligible to receive KCS equity awards, long-term incentive awards that are settled in cash in an amount sufficient to replace the grant date value of the KCS employee's equity compensation opportunity prior to the effective time; provided, that, subject to certain exceptions, such long-term incentive awards will have the same terms and conditions as those applicable to the equity awards granted by CPRL to its similarly situated employees) and (ii) employee benefits that are no less favorable in the aggregate than the employee benefits provided to the KCS employee immediately before the effective time. Without limiting the generality of the foregoing, (A) CPRL will or will cause the second surviving corporation to provide to each KCS employee whose employment terminates during the one-year period following the control date under circumstances that would give rise to severance benefits under the KCS benefit plans set forth on the KCS disclosure schedules, severance benefits in accordance with the terms of the

applicable KCS severance plan in which such KCS employee is eligible to participate immediately prior to the effective time and (B) during such one-year period following the control date, severance benefits offered to each KCS employee will be determined taking into account all service with KCS, its subsidiaries (and including, on and after the effective time, the second surviving corporation and any of its affiliates) and without taking into account any reduction after the effective time in compensation paid or benefits provided to such KCS employee.

If the control date occurs before February 1, 2022, then no later than March 15, 2022, CPRL will, or will cause the second surviving corporation to, pay to each KCS employee who participates in a KCS annual bonus plan (or any successor plan of CPRL and its subsidiaries) an annual bonus payment in respect of calendar year 2021 in an amount that is based on the achievement of the applicable performance goals at the greater of (i) target performance and (ii) 130% of actual performance, but in no event greater than 200% of target. If the control date occurs on or after February 1, 2022 but before February 1, 2023, then no later than March 15, 2023, CPRL will or will cause the second surviving corporation to, pay to each KCS employee who participates in a KCS annual bonus plan (or any successor plan of CPRL and its subsidiaries) an annual bonus payment in respect of calendar year 2022 in an amount that is based on the achievement of the applicable performance goals at the greater of (i) target performance and (ii) 130% of actual performance, but in no event greater than 200% of target.

For all purposes (including for purposes of vesting, eligibility to participate and level of benefits) under the employee benefit plans of CPRL and its subsidiaries providing benefits to any KCS employees after the control date, each KCS employee will be credited with his or her years of service with KCS and its subsidiaries and their respective predecessors before the control date, to the same extent as such KCS employee was entitled, before the control date, to credit for such service under any similar KCS benefit plan in which such KCS employee participated or was eligible to participate immediately prior to the control date; provided that the foregoing will not apply (x) for benefit accrual under defined benefit pension plans, (y) for purposes of qualifying for subsidized early retirement benefits or (z) to the extent that its application would result in a duplication of benefits. In addition, (i) each KCS employee will be immediately eligible to participate in any new plans to the extent coverage under such new plan is comparable to a KCS benefit plan in which such KCS employee participated immediately before the control date, and (ii) for purposes of each new plan providing medical, dental, pharmaceutical, vision and any other insurance benefits to any KCS employee, CPRL will cause all preexisting condition exclusions and actively-at-work requirements of such new plan to be waived for such employee and his or her covered dependents, unless such conditions would not have been waived under the comparable plans of KCS or its subsidiaries in which such employee participated immediately prior to the control date, and CPRL will cause any eligible expenses incurred by such employee and his or her covered dependents during the portion of the plan year of the old plans ending on the date such employee's participation in the corresponding new plan begins to be taken into account under such new plan for purposes of satisfying all deductible, coinsurance and maximum out-of-pocket requirements applicable to such employee and his or her covered dependents for the applicable plan year as if such amounts had been paid in accordance with such new plan.

The provisions described in this section are solely for the benefit of the parties to the merger agreement, and no current or former director, employee or consultant or any other person will be a third-party beneficiary of the merger agreement, and nothing in the merger agreement will be construed as an amendment to any KCS benefit plan or other compensation or benefit plan or arrangement for any purposes or otherwise will prevent CPRL, the second surviving corporation or any of their affiliates from terminating the employment of any KCS employee.

Indemnification and Insurance

KCS, CPRL and the merger subs agree that all rights to exculpation, indemnification and advancement of expenses now existing in favor of the current or former directors, officers or employees of KCS or its subsidiaries as provided in their respective organizational documents or in any agreement will survive the transaction and will continue at and after the effective time in full force and effect. For a period of six years after the effective time, CPRL and the second surviving corporation will maintain in effect the exculpation, indemnification and advancement of expenses provisions of KCS's and any KCS subsidiary's organizational

documents as in effect immediately prior to the effective time or in any indemnification agreements of KCS or any of its subsidiaries with any of their respective directors, officers or employees as in effect immediately prior to the effective time, and will not amend, repeal or otherwise modify any such provisions in any manner that would adversely affect the rights thereunder of any individuals who at the effective time were current or former directors, officers or employees of KCS or any of its subsidiaries; provided, that all rights to indemnification in respect of any proceeding pending or asserted or any claim made within such period will continue until the final disposition of such proceeding or resolution of such claim, even if beyond such six-year period. From and after the control date, CPRL will assume, be jointly and severally liable for, and honor, guarantee and stand surety for, and will cause the second surviving corporation and its subsidiaries to honor, in accordance with their respective terms, the indemnification and insurance covenants contained in the merger agreement.

Each of CPRL and the second surviving corporation will, to the fullest extent permitted under applicable law, indemnify and hold harmless (and advance funds in respect of each of the foregoing or any related expenses to) each current and former director, officer or employee of KCS or any of its subsidiaries and each person who served as a director, officer, member, trustee or fiduciary of another corporation, partnership, joint venture, trust, pension or other employee benefit plan or enterprise at the request of or for the benefit of KCS or its subsidiaries (which we refer to, together with such person's heirs, executors, administrators, successors and assigns, collectively as the "KCS indemnified parties") against any costs or expenses, judgments, fines, losses, claims, damages, obligations, costs, liabilities and amounts paid in settlement in connection with any actual or threatened claim, action, suit, proceeding or investigation, whether civil, criminal, administrative or investigative, arising out of, relating to or in connection with any action or omission occurring or alleged to have occurred at or prior to the effective time, whether asserted or claimed prior to, at or after the effective time. In the event of any such proceeding, CPRL and the second surviving corporation will cooperate with the indemnified party in the defense of any such proceeding.

For a period of six years from the effective time, CPRL and the second surviving corporation will cause to be maintained in effect the current policies of directors' and officers' liability insurance and fiduciary liability insurance maintained by KCS and its subsidiaries with respect to matters arising on or before the effective time; provided, that after the effective time, CPRL and the second surviving corporation will not be required to pay annual premiums in excess of 300% of the last aggregate annual premium paid by KCS prior to September 15, 2021 in respect of the coverage required to be obtained pursuant thereto, but in such case will purchase as much coverage as reasonably practicable for such amount. KCS will purchase, prior to the effective time, a six-year prepaid "tail" policy on terms and conditions providing substantially equivalent benefits as the current policies of directors' and officers' liability insurance and fiduciary liability insurance maintained by KCS and its subsidiaries with respect to matters arising on or before the effective time, covering without limitation the transactions contemplated by the merger agreement, and the purchase of such "tail" policy will be deemed to discharge and satisfy the obligations of KCS and the second surviving corporation pursuant to the immediately preceding sentence; provided, that KCS will not commit or spend on such "tail" policy, in the aggregate, more than 300% of the last aggregate annual premium paid by KCS prior to the date of the merger agreement for KCS's current policies of directors' and officers' liability insurance and fiduciary liability insurance, and if the cost of such "tail" policy would otherwise exceed such limit, KCS will be permitted to purchase as much coverage as reasonably practicable for up to such limit. CPRL and the second surviving corporation will cause such policy to be maintained in full force and effect, for its full term, and cause all obligations under the policy to be honored by the second surviving corporation, and no other party will have any further obligation to purchase or pay for insurance under the merger agreement.

CPRL will pay all reasonable expenses, including reasonable attorneys' fees, that may be incurred by any indemnified party in enforcing the indemnity and other obligations provided in the indemnification and insurance provisions contained in the merger agreement.

The rights of each KCS indemnified party under the merger agreement will be in addition to, and not in limitation of, any other rights such indemnified party may have under the organizational documents of KCS or

any of its subsidiaries or the second surviving corporation, any other indemnification arrangement, the DGCL or otherwise. The indemnification and insurance provisions contained in the merger agreement will survive the consummation of the transaction and are expressly intended to benefit, and are enforceable by, each of the KCS indemnified parties.

Regulatory Filings and Efforts; Other Actions

General Obligations

Subject to the merger agreement, each of the parties thereto will (and will cause each of their respective affiliates to) promptly take, or cause to be taken, all actions, and to promptly do, or cause to be done, and to assist and cooperate with the other parties in doing, all things necessary, proper or advisable under applicable laws to cause the conditions to closing set forth in the merger agreement to be satisfied and to consummate and make effective the transactions contemplated by the merger agreement as promptly as practicable after the date of the merger agreement and in any event prior to the end date, including

- obtaining all necessary actions or nonactions, authorizations, permits, waivers, consents, clearances, approvals and expirations or terminations of waiting periods, including the KCS approvals and the CPRL approvals, from governmental entities and making all necessary registrations, notices, notifications, petitions, applications, reports and other and filings and taking all steps as may be necessary, proper or advisable to obtain an approval, clearance or waiver from, or to avoid an action or proceeding by, any governmental entity;
- obtaining all necessary consents from third parties;
- defending any actions, lawsuits or other legal proceedings, whether judicial or administrative, challenging the merger agreement or the consummation of the transactions contemplated by the merger agreement (including the voting trust), or seeking to prohibit or delay the closing of the transaction; and
- the execution and delivery of any additional instruments necessary, proper or advisable to consummate, and to fully carry out the purposes of the transactions contemplated by the merger agreement.

Except as otherwise permitted under the merger agreement, KCS, CPRL and each merger sub will not (and will cause their subsidiaries not to) take or agree to take any action that would be reasonably likely to prevent or materially delay the closing of the transaction.

Filings with the STB

With respect to filings made or to be made with the STB:

- on May 6, 2021, the STB issued a decision indicating that it had conducted a full review of the proposed voting trust submitted to the STB Staff in March 2021 (and attached as Exhibit A to the prior CP merger agreement) and granted approval for the use of the voting trust as modified in accordance with the decision to consummate the transaction;
- on May 10, 2021, CPRL submitted to the STB a copy of the form of voting trust agreement attached reflecting the modifications required by the STB's May 6 decision;
- on September 15, 2021, CPRL and KCS filed with the STB an Amended Notice of Intent indicating that they had entered a new agreement providing for CPRL's acquisition of KCS, that they would file an application seeking STB control approval on or shortly after October 20, 2021, and that CPRL intended to indirectly acquire the shares of KCS prior to receiving control approval via the use of a voting trust that was substantially identical to that reviewed and approved by the STB in its May 6 decision;
- on September 30, 2021, the STB issued a decision confirming that the transaction described in the September 15 Amended Notice of Intent was the "same transaction" that had been noticed in March 2021 and that the STB's May 6, 2021 approval for CPRL's proposed use of a voting trust to acquire KCS applies to the voting trust proposed for use with the transaction agreed to on September 15;
- each of CPRL and KCS will file the STB control approval application with the STB for the approval of the transactions contemplated by the merger agreement as promptly as practicable and use its

reasonable best efforts to (A) make such filing within 30 days after the date of the merger agreement and (B) obtain, as promptly as practicable, STB final approval;

- each of CPRL and KCS will use its reasonable best efforts to (A) prosecute all such filings and other presentations made, and promptly make any subsequent filings or presentations, with the STB with diligence, (B) diligently oppose any third party's objections to, appeals from or petitions to reconsider or reopen any approval, opinion, exemption or other authorization obtained from the STB, and (C) take all such further action as in the reasonable judgment of CPRL and KCS may facilitate obtaining STB final approval;
- each of CPRL and KCS will promptly furnish any information requested by CFIUS prior to filing of the draft CFIUS joint voluntary notification and/or joint notice with CFIUS, including information relating to the voting trust transaction;
- following the closing of the transaction, in the event of an STB denial or failure to obtain completion of the CFIUS process, or as may be required in connection with obtaining STB final approval, CPRL will devise and implement the process and strategy to directly or indirectly sell or otherwise dispose of the shares or assets of the second surviving corporation (the "post-closing disposition"), subject to any jurisdiction of the STB to oversee the post-closing disposition; and
- following the closing of the transaction, KCS and its successors will cooperate with CPRL and will (and will cause each of its subsidiaries to) use its reasonable best efforts to take all actions reasonably requested by CPRL and do or cause to be done all things necessary, proper or advisable on its part to assist CPRL in its process to effect the post-closing disposition.

Regulatory Filings and Obligations

KCS, CPRL and each merger sub will:

- promptly, but no later than 30 business days after the date of the merger agreement, file any and all notification and report forms to the COFECE and the IFT required under applicable law with respect to the transactions contemplated by the merger agreement, and take all other actions necessary to cause the expiration or termination of any applicable waiting periods under applicable law as soon as practicable after the date of the merger agreement;
- take all actions with CFIUS as may be advisable under applicable law to obtain completion of the CFIUS process with respect to the transactions contemplated by the merger agreement, including:
    - promptly, but no later than ten business days after the date of the merger agreement, jointly providing notification to CFIUS of the execution of the merger agreement (initial notifications to CFIUS were provided on March 22, 2021 and September 24, 2021);
    - promptly, and no later than ten business days after the closing of the transaction, submitting a draft CFIUS joint voluntary notification to CFIUS;
    - submitting a final joint notice to CFIUS after promptly resolving all comments to the draft CFIUS joint voluntary notification from CFIUS; and
    - in the case of a CFIUS declaration, submitting a CFIUS joint voluntary notification if CFIUS so requests or informs the parties that it is not able to conclude action under Section 721 with respect to the transactions contemplated by the merger agreement on the basis of such CFIUS declaration;
- cooperate with each other in:
    - determining whether any other filings are required to be made with, or consents are required to be obtained from, or with respect to, any third parties or governmental entities, including under other applicable antitrust laws and/or in connection with the KCS approvals and CPRL approvals, in connection with the execution and delivery of the merger agreement and the consummation of the transactions contemplated by the merger agreement; and

- promptly making all such filings and timely obtaining all such consents;
- supply to any governmental entity as promptly as practicable any additional information or documents that may be requested pursuant to any law or by such governmental entity, including responding to any request for information from CFIUS in the applicable time frame set forth in 31 C.F.R. Part 800, subject to any extensions of such time that may be granted by CFIUS staff upon request of a party to the joint notice; and
- other than with respect to the STB final approval, take or cause to be taken, all other actions and do, or cause to be done, all other things necessary, proper or advisable to consummate and make effective the transactions contemplated by the merger agreement, including taking all such further action as may be necessary to resolve such objections, if any, as any state antitrust enforcement authorities, CFIUS or other governmental entity or other person may assert under any law (including in connection with the KCS approvals and CPRL approvals) with respect to the transactions contemplated by the merger agreement, and to avoid or eliminate each and every impediment under any law that may be asserted by any governmental entity with respect to the transaction so as to enable the closing of the transaction to occur as promptly as practicable after the date of the merger agreement, including:
  - proposing, negotiating, committing to and effecting, by consent decree, hold separate order or otherwise, the sale, divestiture, license, hold separate or disposition of any and all of the share capital or other equity interest, assets (whether tangible or intangible), products or businesses of CPRL and its subsidiaries or of KCS and its subsidiaries; and
  - otherwise taking or committing to take any actions that after the closing date would limit CPRL's or its subsidiaries' (including the second surviving corporation's) freedom of action with respect to, or their ability to retain, one or more of their subsidiaries' (including the second surviving corporation's) assets (whether tangible or intangible), products or businesses, in each case as may be required in order to avoid the entry of, or to effect the dissolution of, any injunction, temporary restraining order or other order that would otherwise have the effect of preventing or delaying the closing of the transaction;

provided, that neither KCS nor any of its subsidiaries will be required to become subject to, or consent or agree to or otherwise take any action with respect to, any requirement, condition, understanding, agreement or order to sell, divest, license, hold separate or otherwise dispose of, or to conduct, restrict, operate, invest or otherwise change the assets, operations or business of KCS or any of its subsidiaries, unless such requirement, condition, understanding, agreement or order is binding on or otherwise applicable to KCS or its subsidiaries only from and after the effective time in the event that the closing occurs.

Notwithstanding the foregoing, other than with respect to the STB final approval, the merger agreement does not require CPRL or any of its affiliates to take any action, or commit to take any action, or agree to any condition or restriction in connection with obtaining any CPRL approvals that would reasonably be expected to have a material adverse effect with respect to CPRL and its subsidiaries, taken as a whole, after giving effect to the transaction (measured on a scale relative to KCS and its subsidiaries, taken as a whole).

Cooperation and Consultation

Each of KCS, CPRL and the merger subs will cooperate and consult with each other in connection with the making of all registrations, filings, notifications, communications, submissions and any other actions pursuant to the provisions in the merger agreement summarized in this section, and, subject to applicable legal limitations and the instructions of any governmental entity, KCS, on the one hand, and CPRL and each merger sub, on the other hand, will keep each other apprised of the status of matters relating to the completion of the transactions contemplated by the merger agreement, including promptly informing and furnishing the other with copies of notices or other communications received or given by CPRL or KCS, as the case may be, or any of their respective subsidiaries, from or to any third party and/or any governmental entity with respect to such transactions. Subject to applicable law relating to the exchange of information, KCS, on the one hand, and CPRL

and each merger sub, on the other hand, will permit counsel for the other party reasonable opportunity to review in advance, and consider in good faith the views of the other party in connection with, any proposed notifications or filings and any written communications or submissions, and with respect to any such notification, filing, written communication or submission, any documents submitted therewith to any governmental entity.

Each of KCS, CPRL and the merger subs agrees not to initiate or agree to participate in any meeting or discussion, either in person or by telephone or videoconference, with any governmental entity in connection with the transaction unless it consults with the other party in advance and, to the extent not prohibited by such governmental entity, gives the other party the opportunity to attend and participate.

CPRL will, acting reasonably, devise and implement the strategy and timing for obtaining any consents required under any applicable law in connection with the transactions contemplated by the merger agreement and CPRL will, for the avoidance of doubt, have the final authority over the development, presentation and conduct of the STB case. CPRL will take the lead in all meetings and communications with any governmental entity in connection with obtaining such consents; provided, that CPRL will consult in advance with KCS and in good faith take KCS's views into account regarding the overall strategy and timing. KCS and its subsidiaries will not initiate any such discussions or proceedings with any governmental entity, or take or agree to take any actions, restrictions or conditions with respect to obtaining any consents in connection with the transactions contemplated by the merger agreement without the prior written consent of CPRL.

If any administrative or judicial action or proceeding, including any proceeding by a private party, is instituted (or threatened to be instituted) challenging any transaction contemplated by the merger agreement as violative of any law, each of KCS, CPRL and the merger subs will cooperate in all respects with each other and will contest and resist any such action or proceeding and to have vacated, lifted, reversed or overturned any action, decree, judgment, injunction or other order, whether temporary, preliminary or permanent, that is in effect and that prohibits, prevents or restricts consummation of the transactions contemplated by the merger agreement.

Voting Trust Agreement

Subject to the merger agreement, applicable law and to the rules, regulations and practices of the STB, the voting trust agreement may be modified or amended at any time by CPRL and merger holdco in their sole discretion, including to reflect changes requested by the STB or CFIUS; provided, that:

- prior to the effective time, the voting trust agreement may not be modified or amended without the prior written consent of KCS unless such modification or amendment is not inconsistent with the merger agreement and is not adverse to KCS or its stockholders and would not reasonably be expected to have a material and adverse effect on the STB voting trust approval;
- whether prior to or after the effective time, the voting trust agreement may not be modified or amended without the prior written consent of KCS if such modification or amendment would reasonably be expected to materially increase the liability exposure of the board of directors of the second surviving corporation under applicable law; and
- any modification to the Voting Trust Agreement would be submitted to the STB for review and approval and the STB would have authority to compel amendment of the Voting Trust Agreement or compliance by the Trustee with any divestiture order or other directive.

No power of the second surviving corporation, CPRL or any of its affiliates provided for in the voting trust agreement may be exercised in a manner which violates the merger agreement.

Other Covenants and Agreements

CPRL and KCS have agreed in the merger agreement to various other covenants and agreements regarding various matters, including with respect to:

- each party providing the other party with reasonable access, subject to compliance with applicable laws, to such party's businesses, properties, personnel, agents, contracts, commitments, books and records and other reasonably requested information during the period prior to the effective time and, in the case of KCS, prior to the control date;
- cooperation between CPRL and KCS in the preparation and filing of this proxy statement/prospectus and the management information circular and coordination of the KCS special meeting and CPRL special meeting, including commercially reasonable efforts to cause the two meetings to occur on the same calendar day (and in any event as close in time as possible);
- each party taking such actions as are necessary to complete the transactions contemplated by the merger agreement if any takeover statute is or may become applicable to the transactions contemplated by the merger agreement;
- cooperation between KCS, CPRL and the merger subs in connection with public announcements regarding the transactions contemplated by the merger agreement;
- cooperation with CPRL and the use of reasonable best efforts by KCS to delist KCS common stock from the NYSE and deregister KCS common stock under the U.S. Exchange Act as promptly as practicable after the effective time;
- the use of reasonable best efforts by CPRL to cause the CPRL common shares that are to be issued in the first merger to be listed on the NYSE, subject to official notice of issuance, and the TSX, subject to customary listing conditions, prior to the effective time;
- each party taking reasonably necessary or advisable steps to cause any dispositions of KCS equity securities and any acquisitions of CPRL equity securities, pursuant to the transactions contemplated by the merger agreement by each individual who is subject to the reporting requirements of Section 16(a) of the U.S. Exchange Act to be exempt under Rule 16b-3 promulgated under the U.S. Exchange Act;
- KCS giving CPRL the reasonable opportunity to participate in the defense or settlement of any stockholder litigation brought against KCS or the KCS board relating to the transactions contemplated by the merger agreement and KCS refraining from compromising or settling, or agreeing to compromise or settle, any such stockholder litigation without the prior written consent of CPRL (which will not be unreasonably withheld, conditioned or delayed);
- certain tax matters;
- coordination between the parties of the declaration, setting of record dates and payment dates of dividends on KCS common stock; and
- CPRL and surviving merger sub executing and delivering written stockholder consents of the merger subs adopting and approving the merger agreement.

Termination or Abandonment of the Merger Agreement

The merger agreement may be terminated and abandoned at any time prior to the effective time whether before or after any approval by the KCS stockholders or the CPRL shareholders of the matters presented in connection with the transaction:

- by mutual written consent of KCS and CPRL;
- by either KCS or CPRL, if:
    - the effective time has not occurred on or before the end date; provided, that the party seeking to terminate the merger agreement has not breached in any material respect its obligations

under the merger agreement in any manner that has been the primary cause of the failure to consummate the transaction on or before such date;

- any court or other governmental entity of competent jurisdiction has issued or entered an injunction or similar order that prohibits or makes illegal the completion of the transaction or the voting trust transaction, and such order or injunction has become final and non-appealable; provided, that the party seeking to terminate the merger agreement has not breached in any material respect its obligations under the merger agreement in a manner that has been the primary cause of such injunction or order;
- the KCS stockholder approval is not obtained at the special meeting or at any adjournment or postponement thereof; or
- the CPRL shareholder approval is not obtained at the CPRL special meeting or at any adjournment or postponement thereof; or

- by KCS:
  - if there has been a breach or failure to perform in any material respect by CPRL or the merger subs of any representation, warranty, covenant or agreement set forth in the merger agreement and such breach or failure would result in a failure of certain conditions to closing and such breach or failure is not curable prior to the end date, or if curable prior to the end date, has not been cured within 45 business days after the giving of notice thereof by KCS; however, the right to terminate the merger agreement due to such a breach or failure will not be available to KCS if KCS is in material breach of any representation, warranty, agreement or covenant contained in the merger agreement;
  - prior to receipt of the KCS stockholder approval, in order to enter into a definitive agreement providing for a superior proposal in respect of KCS; or
  - prior to receipt of the CPRL shareholder approval, if the CPRL board has effected a change of recommendation; or
- by CPRL:
  - if there has been a breach or failure to perform in any material respect by KCS of any representation, warranty, covenant or agreement set forth in the merger agreement and such breach or failure would result in a failure of certain conditions to closing and such breach or failure is not curable prior to the end date, or if curable prior to the end date, has not been cured within 45 business days after the giving of notice thereof by CPRL; however, the right to terminate the merger agreement due to such a breach or failure will not be available to CPRL if CPRL or any merger sub is in material breach of any representation, warranty, agreement or covenant contained in the merger agreement; or
  - prior to receipt of the KCS stockholder approval, if the KCS board has effected a change of recommendation.

Effect of Termination

Except as described in the section below entitled "*The Merger Agreement—Termination or Abandonment of the Merger Agreement—Termination Fees*," on page 165, if the merger agreement is validly terminated in accordance with its terms, the merger agreement will be null and void and there will be no liability on the part of KCS, CPRL, either merger sub or their respective subsidiaries or affiliates, except that (i) certain provisions of the merger agreement will survive such termination, including those relating to termination payments and confidentiality, and (ii) no such termination will relieve any party for liability for such party's fraud or willful and material breach of any covenant or obligation contained in the merger agreement prior to its termination.

Termination Fees

KCS has agreed to pay a termination payment of $700.0 million to CPRL, in consideration for CPRL's disposition of its contractual rights under the merger agreement, if:

- the merger agreement is terminated by KCS prior to receipt of the KCS stockholder approval, in order to enter into a definitive agreement providing for a superior proposal in respect of KCS;
- the merger agreement is terminated by CPRL because, prior to receipt of the KCS stockholder approval, the KCS board has effected a change of recommendation; or
- (i) after the date of the merger agreement, a qualifying transaction in respect of KCS is publicly proposed or publicly disclosed prior to, and not publicly withdrawn at least two business days prior to, the KCS special meeting; (ii) the merger agreement is terminated by (A) either party as a result of the occurrence of the end date prior to receipt of the KCS stockholder approval or due to the failure to obtain the KCS stockholder approval or (B) CPRL for KCS having breached or failed to perform in any material respect any of its representations, warranties, covenants or other agreement contained in the merger agreement (as described above); and (iii) concurrently with or within 12 months after such termination KCS consummates a qualifying transaction or enters into a definitive agreement providing for a qualifying transaction and later consummates such transaction.

CPRL has agreed to pay or cause to be paid a termination payment of $700.0 million to KCS, in consideration for KCS's disposition of its contractual rights under the merger agreement, if:

- the merger agreement is terminated by KCS prior to receipt of the CPRL shareholder approval because the CPRL board has effected a change of recommendation; or
- (i) after the date of the merger agreement, a qualifying transaction in respect of CPRL is publicly proposed or publicly disclosed prior to, and not publicly withdrawn at least two business days prior to, the CPRL special meeting; (ii) the merger agreement is terminated by (A) either party for the effective time not occurring on or before the end date prior to the receipt of the CPRL shareholder approval or due to the failure to obtain the CPRL shareholder approval or (B) KCS for CPRL or either merger sub having breached or failed to perform in any material respect any of their representations, warranties, covenants or other agreements contained in the merger agreement (as described above); and (iii) concurrently with or within 12 months after such termination CPRL consummates a qualifying transaction or enters into a definitive agreement providing for a qualifying transaction and later consummates such transaction.

CPRL has also agreed to pay or cause to be paid a termination payment of $1.0 billion to KCS if CPRL or KCS terminates the merger agreement in connection with (i) the effective time not occurring on or before the end date as a result of an injunction or order entered or issued by a governmental entity pursuant to the Interstate Commerce Commission Termination Act of 1995, the Surface Transportation Board Reauthorization Act of 2015 or any other law relating to the regulation of the railroad industry (which we refer to collectively as "railroad laws"), or Section 721, which continues to be in effect that prohibits or makes illegal the consummation of the transaction or the voting trust transaction, and, in any such case, all of the other mutual conditions to the obligations of CPRL and KCS and all of the other conditions to the obligations of CPRL and the merger subs to effect the transaction have been satisfied or waived (except for those conditions that by their nature are to be satisfied at the closing; provided, that such conditions were then capable of being satisfied if the closing had taken place) and no breach by KCS of its regulatory efforts obligations has contributed materially and substantially to the failure of such regulatory conditions to be satisfied or (ii) a final and non-appealable order of a governmental entity pursuant to any railroad law or Section 721 prohibiting or making illegal the consummation of the transaction or the voting trust transaction; provided, that the party seeking to terminate the merger agreement has not breached in any material respect its obligations under the merger agreement in a manner that has been the primary cause of such order.

KCS has agreed to pay to CPRL the CN termination amount refund of $700.0 million in cash if:

- the merger agreement is terminated by KCS prior to receipt of the KCS stockholder approval, in order to enter into a definitive agreement providing for a superior proposal in respect of KCS;
- the merger agreement is terminated by CPRL because KCS has breached or failed to perform in any material respect any of its representations, warranties, covenants or other agreements contained in the merger agreement, which breach or failure to perform (A) would result in a failure of a condition of CPRL and merger subs' obligations or CPRL and KCS's obligations and (B) cannot be cured by the end date or, if curable, was not cured within 45 business days following CPRL's delivery of written notice to KCS stating CPRL's intention to terminate the merger agreement and the basis for such termination; or
- the merger agreement is terminated by CPRL because, prior to receipt of the KCS stockholder approval, the KCS board has effected a change of recommendation.

Any termination payment payable will be paid as proceeds in consideration for the disposition of the receiving party's rights under the merger agreement. The $700.0 million CN termination amount refund will not constitute a penalty, but will constitute a refund and return of amounts previously remitted or caused to be remitted by CPRL to KCS, and be payable as a consequence of the disposition of the rights of the recipient under the merger agreement. Subject to the exceptions and qualifications in the merger agreement, KCS and CPRL are required to gross-up any termination payment or the $700.0 million CN termination amount refund payable by them for certain required tax withholdings or deductions.

Expenses

Except as set forth in the merger agreement, all costs and expenses incurred in connection with the merger agreement and the transactions contemplated thereby will be paid by the party incurring or required to incur such expenses, except that all filing fees paid by any party in respect of any regulatory filing (including any filings under antitrust laws and/or in respect of consents and approvals listed in the disclosure schedules) will be borne by CPRL.

Modification, Amendment or Waiver

At any time prior to the effective time, whether before or after receipt of the KCS stockholder approval and the CPRL shareholder approval, any provision of the merger agreement may be amended or waived only if such amendment or waiver is in writing and signed, in the case of an amendment, by KCS, CPRL and each merger sub, or in the case of a waiver, by the party against whom the waiver is to be effective; provided, that (a) after receipt of the KCS stockholder approval, if any such amendment or waiver will by applicable law or in accordance with the rules and regulations of the NYSE require further approval of the stockholders of KCS, the effectiveness of such amendment or waiver will be subject to the approval of the stockholders of KCS and (b) after receipt of the CPRL shareholder approval, if any such amendment or waiver shall by applicable law or in accordance with the rules and regulations of the NYSE or the TSX require further approval of the shareholders of CPRL, the effectiveness of such amendment or waiver will be subject to the approval of the shareholders of CPRL. No failure or delay by any party in exercising any right under the merger agreement will operate as a waiver of such right nor will any single or partial exercise thereof preclude any other or further exercise of any other right under the merger agreement. The rights and remedies therein provided will be cumulative and not exclusive of any rights or remedies provided by law.

Specific Enforcement; Remedies

Each party agrees that, in the event of any breach or threatened breach by any other party of any covenant or obligation contained in the merger agreement, the non-breaching party will be entitled (in addition to any other remedy that may be available to it whether in law or equity, including monetary damages) to obtain (i) a decree or order of specific performance to enforce the observance and performance of such covenant or obligation and (ii) an injunction restraining such breach or threatened breach.

In circumstances where CPRL is obligated to consummate the transaction and the transaction has not been consummated, CPRL and each merger sub expressly acknowledge and agree that KCS and its stockholders will be entitled (in addition to any other remedy that may be available to it whether in law or equity, including monetary damages) to enforce specifically CPRL's and each merger sub's obligations to consummate the transaction.

Each party further agrees that no other party or any other person will be required to obtain, furnish or post any bond or similar instrument in connection with or as a condition to obtaining any remedy referred to in the specific performance section of the merger agreement, as summarized above, and each party irrevocably waives any right it may have to require the obtaining, furnishing or posting of any such bond or similar instrument.

Governing Law

The merger agreement is governed by the law of the State of Delaware without giving effect to any choice or conflict of law provision or rule (whether of the State of Delaware or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than the State of Delaware.

THE VOTING TRUST

The summary of certain terms of the voting trust below and elsewhere in this proxy statement/prospectus is qualified in its entirety by reference to the full text of the form of the voting trust agreement, a copy of which is attached as Exhibit A to the merger agreement, which is incorporated by reference into this proxy statement/prospectus. This summary does not purport to be complete and may not provide all of the information about the voting trust that might be important to you. You are urged to read the form of voting trust agreement carefully and in its entirety because it is the legal document that governs the transaction.

Under the voting trust agreement, immediately following the post-closing contributions, merger holdco will deposit or cause to be deposited with the trustee the certificates of all of the outstanding shares of capital stock of the second surviving corporation, creating an irrevocable voting trust in respect of the trust stock. Upon depositing the trust stock, merger holdco will receive voting trust certificates representing the deposited shares (which we collectively refer to as the "trust certificates"). In its capacity as the trustee, the trustee will be required to vote all trust stock as further described below. Although merger holdco will remain the beneficial owner of the trust stock, CPRL and merger holdco will be unable to exercise control over KCS while the trust stock is held by the trustee.

The voting trust agreement requires the trustee to vote all trust stock in favor of any proposal or action necessary or desirable to effect, or consistent with the effectuation of, the transactions contemplated by the merger agreement, and, until the STB has issued a final order approving the transaction and common control of KCS by CPRL, against any proposed merger, business combination or similar transaction involving KCS but not involving CPRL or one of its affiliates. On other matters (including the election or removal of directors), the trustee generally will vote the trust stock in the trustee's sole discretion, unless merger holdco, as the holder of a trust certificate, with the prior written approval of the STB, directs the trustee as to any such vote with respect to the trust stock represented by such trust certificate. Under the voting trust agreement, the trustee is generally prohibited from exercising the voting powers of the trust stock in any way that would create any dependence or intercorporate relationship between (i) CPRL or its affiliates, on the one hand, and (ii) KCS or its affiliates, on the other hand, and is also prohibited from selling, leasing, assigning, transferring, alienating, pledging, encumbering or hypothecating the trust stock and/or any major assets of KCS.

Pending the termination of the voting trust, the trustee will pay to merger holdco, as registered holder of the trust certificates, all cash dividends and cash distributions on the trust stock. Under the voting trust agreement, and notwithstanding the foregoing, CPRL may at any time cause merger holdco to sell or otherwise dispose of all or any part of the trust stock, subject to obtaining any necessary regulatory approvals. With respect to any such sale or disposal proposed, the voting trust agreement provides that the trustee must take all actions reasonably requested by merger holdco (including, without limitation, exercising all voting rights in respect of the trust stock in favor of any proposal or action necessary or desirable to effect, or consistent with the effectuation of, such sale or disposition by merger holdco). The voting trust agreement provides that, in the event the STB final approval is granted, or in the event that the law is amended to allow CPRL or its affiliates to acquire control of KCS without obtaining STB final approval or other governmental approval (and upon delivery of an opinion of independent counsel selected by the STB that no order of the STB or other governmental authority is required), the trustee will transfer the trust stock to or upon the order of merger holdco, as registered holder of the trust certificates, and the voting trust shall terminate.

The voting trust agreement provides that, in the event that there has been an STB denial, CPRL will use its reasonable best efforts to, directly or indirectly, (i) sell the trust stock to one or more eligible purchasers, or (ii) otherwise dispose of the trust stock, during a period of two years after such STB denial or such extension of the two-year period as the STB may approve. Any such disposition will be subject to the jurisdiction of the STB to oversee CPRL's direct or indirect divestiture of the trust stock. In connection with such an event, the trustee would continue to perform its duties under the voting trust agreement and, if CPRL fails to so sell or distribute the trust stock during such period, the trustee will as soon as practicable sell the trust stock for cash to one or

more eligible purchasers in such manner and for such price as the trustee in its discretion deems reasonable after consultation with CPRL. For purposes of the voting trust agreement, an "eligible purchaser" is a person or entity not affiliated with CPRL and that has all necessary regulatory authority, if any, to purchase the trust stock. CPRL must cooperate with the trustee in so disposing of the trust stock and the trustee must act in accordance with any direction made by CPRL as to any specific terms or method of disposition, to the extent not inconsistent with the requirements of the terms of any STB or court order. The proceeds of the sale or other disposition would be distributed to merger holdco (or, if applicable, one or more other wholly owned subsidiaries of CPRL), as registered holder(s) of the trust certificates.

The voting trust agreement provides that the trustee will receive reasonable and customary compensation for all services rendered under the voting trust agreement and will be indemnified by CPRL.

Neither the trustee nor any affiliate of the trustee may have (i) any officers, or members of their respective boards or directors, in common with CPRL or any of its affiliates, or (ii) any direct or indirect business arrangements or dealings, financial or otherwise, with CPRL or any of its affiliates, other than dealings pertaining to establishment and carrying out of the trust. During the term of the trust, the trustee will not own any stock or securities of CPRL or any of its affiliates; provided that, the trustee may own interests in any independently managed diversified mutual fund that owns stock or securities of CPRL and/or any of its affiliates. Neither CPRL nor its affiliates may purchase the stock or securities of the trustee or any affiliate of the trustee.

Subject to applicable law and to the rules, regulations and practices of the STB, until the voting trust agreement is executed, CPRL may amend the terms thereof in its sole discretion; provided that (x) prior to the completion of the post-closing contributions, as described in the merger agreement, the voting trust agreement may not be modified or amended without the prior written consent of KCS unless such modification or amendment is not inconsistent with the merger agreement, is not adverse to KCS and its stockholders and would not reasonably be expected to have a material and adverse effect on receipt of the STB voting trust approval; (y) the voting trust agreement may not be modified or amended without the prior written consent of KCS if such modification or amendment would reasonably be expected to materially increase the liability exposure of the board of directors of the second surviving corporation under applicable law; and (z) any modification to the Voting Trust Agreement would be submitted to the STB for review and approval and the STB would have authority to compel amendment of the Voting Trust Agreement or compliance by the Trustee with any divestiture order or other directive. Following the execution of the voting trust agreement, the voting trust agreement may only be modified or amended by agreement executed by the trustee, CPRL, merger holdco and any other registered holder(s) of the trust certificates (a) pursuant to an order of the STB, (b) with the prior approval of the STB, (c) in order to comply with any order of the STB, or (d) upon receipt of an opinion of counsel satisfactory to the trustee and the registered holder(s) of trust certificates that an order of the STB approving such modification or amendment is not required and that the amendment is authorized under the merger agreement and is consistent with the regulations of the STB regarding voting trusts.

On May 6, 2021, the STB issued a decision indicating that it had conducted a full review of the voting trust submitted to the STB Staff in March 2021 and granted approval for the use of the voting trust to consummate the transaction, subject to the condition that the voting trust agreement be modified to prohibit the trustee from owning securities of CPRL or its affiliates during the existence of the voting trust. CPRL made the requisite modification. The voting trust agreement proposed for use with the transaction is unchanged from that modified in respect to the STB's May 6 decision.

On September 15, 2021, CPRL and KCS filed with the STB an Amended Notice of Intent indicating that they had entered a new agreement providing for CPRL's acquisition of KCS, that they would file an application seeking STB control approval on or shortly after October 20, 2021 and that CPRL intended to indirectly acquire the shares of KCS prior to receiving control approval via the use of a voting trust that was substantially identical to that reviewed and approved by the STB in its May 6 decision.

On September 30, 2021, the STB issued a decision confirming that the transaction described in the September 15 Amended Notice of Intent was the "same transaction" that had been noticed in March 2021 and that the STB's May 6, 2021 approval for CPRL's proposed use of a voting trust to acquire KCS applies to the voting trust proposed for use with the transaction agreed to on September 15.

For more information, see "*The KCS Merger Proposal—Regulatory Approvals Required for the Transaction*," on page 109.

UNAUDITED PRO FORMA CONDENSED CONSOLIDATED FINANCIAL INFORMATION

On September 15, 2021, CPRL, surviving merger sub and first merger sub entered into the merger agreement with KCS. Following the satisfaction or waiver of the conditions to CPRL's and KCS's obligations to effect the transaction, including obtaining CPRL shareholder approval and KCS stockholder approval and certain other regulatory approvals, (1) first merger sub will merge with and into KCS with KCS surviving the first merger as a wholly owned subsidiary of surviving merger sub, and (2) immediately following the effective time, KCS will merge with and into surviving merger sub with surviving merger sub surviving the second merger as a direct wholly owned subsidiary of CPRL (together referred to as the "transaction"). Immediately following the second merger and the post-closing contributions, all of the outstanding shares of capital stock of surviving merger sub, as successor to KCS, will be deposited by merger holdco into the voting trust subject to the voting trust agreement, pending STB final approval.

Following the transaction, once STB final approval and approval from other applicable regulatory authorities is obtained, CPRL (through its wholly owned subsidiary, merger holdco), would be permitted to acquire control of KCS, the voting trust would be terminated and CPRL (through merger holdco) would acquire control over KCS's railroad operations (which we refer to, together with the transaction, for purposes of the pro forma financial information (as defined below), as the "acquisition"). Following the acquisition, the combined entity will be named Canadian Pacific Kansas City ("CPKC").

Under the merger agreement, CPRL has agreed to pay, on behalf of surviving merger sub (i) holders of KCS common stock issued and outstanding as of immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) an amount per share equal to the cash consideration of US$90 in cash, without interest, and the share consideration of 2.884 CPRL common shares and (ii) holders of KCS preferred stock issued and outstanding as of immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) an amount per share equal to the preferred merger consideration of US$37.50 in cash, without interest. The total purchase consideration, including the merger consideration and preferred merger consideration, to be paid in the transaction and including the amounts remitted by CPRL in respect of the CN agreement termination payment and CN refund is estimated to be C$35.4 billion, based on the CPRL common share price of US$68.19 and the U.S. dollar to Canadian dollar exchange rate at September 16, 2021 of 1.2674. An increase (decrease) of 5% in the price of CPRL common shares would cause a C$1,141 million increase (decrease) in the estimated value of the merger consideration, and correspondingly, in the estimated value of Goodwill and intangible assets. A one-cent increase/(decrease) in the Canadian dollar relative to the U.S. dollar would cause a $262 million increase/(decrease) in the estimated value of the total consideration, and correspondingly, in the estimated value of Goodwill and intangible assets.

The following unaudited pro forma condensed consolidated statements of income for the year ended December 31, 2020 and the six months ended June 30, 2021 combine the historical consolidated statements of income of CPRL and KCS, after giving effect to the acquisition and other adjustments (as defined below) as if they had occurred on January 1, 2020. The unaudited pro forma condensed consolidated balance sheet as of June 30, 2021 combines the historical consolidated balance sheets of CPRL and KCS, after giving effect to the acquisition and other adjustments as if they had occurred on June 30, 2021. We refer to these unaudited pro forma condensed consolidated statements of income and unaudited pro forma condensed consolidated balance sheet as the "pro forma financial information."

Adjustments in the pro forma condensed consolidated financial information to align KCS's income statement and balance sheet amounts to CPRL's presentation, CPRL's and KCS's transaction and related financing costs incurred and expected to be incurred, and the associated income tax impacts of recognizing these costs are defined here as "other adjustments". For the purposes of the pro forma financial information, all CP and KCS transaction and related financing costs incurred, or to be incurred, to effect the acquisition, have been included in other adjustments on the basis that all such costs are incurred to achieve the final acquisition as defined above.

The pro forma financial information has been prepared for illustrative and informational purposes only in accordance with Regulation S-X Article 11, "Pro Forma Financial Information" to illustrate the estimated effects of the acquisition and certain other related transactions and adjustments described below (collectively, "adjustments" or "transaction accounting adjustments"). The pro forma financial information is based on various adjustments and assumptions and is not necessarily indicative of what CPKC's consolidated statement of income or consolidated balance sheet actually would have been had the acquisition and other adjustments been completed as of the dates indicated or will be for any future periods. The pro forma financial information does not purport to project the future financial position or operating results of CPKC following the completion of the acquisition. The pro forma financial information does not include adjustments to reflect any potential revenue or operational synergies or cost savings that may be achievable in connection with the acquisition. The pro forma financial information does not reflect any divestitures or any other actions that may be required by regulatory or governmental authorities in connection with obtaining regulatory approvals and clearances for the transaction.

The pro forma financial information has been prepared using the acquisition method of accounting under U.S. GAAP, with CPRL being the accounting acquirer in the acquisition. The pro forma adjustments are preliminary and will be different from the adjustments based on final acquisition accounting when completed, and the differences could be material.

Following the closing date, and until STB final approval is obtained and CPRL (through merger holdco) acquires control of KCS, CPRL expects to account for its 100% indirect equity ownership investment in KCS using the equity method of accounting. The pro forma financial information has been prepared on the assumption that CPRL (through merger holdco) has assumed control of KCS as the ultimate outcome of the acquisition will be a business combination of CPRL and KCS.

The pro forma financial information reflects pro forma adjustments CPRL believes are necessary to present fairly CPKC's pro forma results of income and financial position following the completion of the acquisition as of and for the periods indicated. The pro forma adjustments are based on currently available information and assumptions CPRL believes are, under the circumstances and given the information available at this time, reasonable, directly attributable to the acquisition, and reflective of adjustments necessary to report CPKC's financial condition and results of operations as if CPRL completed the acquisition.

NOTES TO UNAUDITED CONSOLIDATED PRO FORMA FINANCIAL STATEMENTS

CANADIAN PACIFIC KANSAS CITY
Notes to Pro Forma Condensed Consolidated Financial Information (unaudited)

As at and for the six months ended June 30, 2021 and for the year ended December 31, 2020

1. Basis of presentation:

On September 15, 2021, CPRL, surviving merger sub and first merger sub entered into the merger agreement with KCS. Following the satisfaction or waiver of the conditions to CPRL's and KCS's obligations to effect the transaction, including obtaining the CPRL shareholder approval and KCS stockholder approval and certain other regulatory approvals, (1) first merger sub will merge with and into KCS with KCS surviving the first merger as a wholly owned subsidiary of surviving merger sub, and (2) immediately following the effective time, KCS will merge with and into surviving merger sub with surviving merger sub surviving the second merger as a direct wholly owned subsidiary of CPRL. Immediately following the second merger and the post-closing contributions, all of the outstanding shares of capital stock of surviving merger sub, as successor to KCS, will be deposited by merger holdco into the voting trust subject to the voting trust agreement, pending STB final approval. Following the transaction, and once STB final approval and approval from other applicable regulatory authorities is obtained, CPRL (through its wholly owned subsidiary, merger holdco), would be permitted to acquire control of KCS. The voting trust would be terminated and CPRL (through merger holdco) would then acquire control over KCS's railroad operations. Following the acquisition, the combined entity will be named Canadian Pacific Kansas City.

Under the merger agreement, CPRL has agreed to pay, on behalf of surviving merger sub (i) holders of KCS common stock issued and outstanding as of immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) an amount per share equal to the cash consideration of US$90.00 in cash, without interest, and the share consideration of 2.884 CPRL common shares and (ii) holders of KCS preferred stock issued and outstanding as of immediately prior to the effective time (other than certain excluded shares as described in the merger agreement) an amount per share equal to US$37.50 in cash, without interest. The total purchase consideration to be paid in the transaction is estimated to be C$35.4 billion, based on the CPRL common share price of US$68.19 and the U.S. dollar to Canadian dollar exchange rate at September 16, 2021 of 1.2674. An increase (decrease) of 5% in the price of CPRL common shares would cause a C$1,141 million increase (decrease) in the estimated value of the total consideration, and correspondingly, in the estimated value of Goodwill and intangible assets. A one-cent increase (decrease) in the Canadian dollar relative to the U.S. dollar would cause a C$262 million increase (decrease) in the estimated value of the total consideration, and correspondingly, in the estimated value of Goodwill and intangible assets.

Under the merger agreement, at the effective time, (1) each option to purchase shares of KCS common stock, whether vested or unvested, that is outstanding as of immediately prior to the effective time will, at the effective time, become fully vested and be converted into the right to receive an amount in cash equal to (i) the excess, if any, of (a) the merger consideration value over (b) the exercise price per share of KCS common stock of such option multiplied by (ii) the total number of shares of KCS common stock subject to such option as of immediately prior to the effective time, less applicable tax withholding (if any) with respect to the payment of such cash; (2) each award of shares of KCS common stock granted subject to any vesting, forfeiture or other lapse restrictions that is outstanding as of immediately prior to the effective time and was granted prior to March 21, 2021, will, at the effective time, be converted into the right to receive (i) the merger consideration in respect of each share of KCS common stock subject to such KCS restricted share award as of immediately prior to the effective time and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award, less applicable tax withholding (if any) with respect to the payment of such merger consideration or cash; (3) each award of shares of KCS common stock granted subject to any vesting, forfeiture or other lapse restrictions that is outstanding as of immediately prior to the effective time and was granted on or after

March 21, 2021, will, at the effective time, be converted into an award that entitles the holder to receive (i) an amount in cash equal to the merger consideration value in respect of each share of KCS common stock subject to such KCS restricted share award and (ii) the accrued but unpaid cash dividends corresponding to
each share of KCS common stock subject to such KCS restricted share award (where each such cash-based award described in this clause (3) will have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding KCS restricted share award, except that such award will vest in full upon a qualifying termination); and (4) each award of performance shares that corresponds to shares of KCS common stock that is outstanding as of immediately prior to the effective time will, at the effective time, be converted into an award that entitles the holder thereof, upon vesting, to receive an amount in cash equal to the merger consideration value in respect of each share of KCS common stock subject to such KCS performance share award, with the number of shares of KCS common stock subject to each such award equal to 200% of the target number of shares of KCS common stock covered by each such award as of immediately prior to the effective time.

CPRL and CPRC have arranged a commitment for a bridge facility on the terms set out in the debt commitment letters that, if needed, will be available to CPRC, through surviving merger sub, to fund the cash consideration payable to the KCS stockholders. The floating interest rate on the bridge facility is assumed to be 4.5% and, if drawn, the facility will mature 364 days post closing of the transaction. CPRL anticipates CPRC issuing a series of term notes with varying maturity dates that ultimately will be used to fund the cash consideration.

The unaudited Pro Forma Condensed Consolidated Financial Information (the “pro forma financial information”) has been prepared for inclusion in the proxy statement/prospectus which forms a part of the registration statement filed on Form F-4 with respect to CPRL’s common shares to be issued in the transaction.

The pro forma financial information has been prepared from:

- The Interim Consolidated Financial Statements of CPRL as at and for the six months ended June 30, 2021 included in CPRL’s Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2021;
- The Interim Consolidated Financial Statements of KCS as at and for the six months ended June 30, 2021 included in KCS’s Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2021;
- The Consolidated Financial Statements of CPRL as at and for the year ended December 31, 2020 as included in CPRL’s Annual Report on Form 10-K for the year ended December 31, 2020; and
- The Consolidated Financial Statements of KCS as at and for the year ended December 31, 2020 as included in KCS’s Annual Report on Form 10-K for the year ended December 31, 2020.

Upon the closing, and only for the period that the outstanding shares of the capital stock of the second surviving corporation (as successor to KCS) are held in the voting trust, CPRL will account for its 100% indirect equity ownership of the second surviving corporation using the equity method of accounting. Once the STB has completed its review of the transaction and approved CPRL’s acquisition of control of KCS, CPRL will consolidate KCS prospectively and CPRL will remeasure the equity method investment to fair value immediately before KCS is consolidated, with any resulting gain or loss recognized in net income. As the ultimate outcome of the transaction, assuming receipt of STB final approval, will be a business combination, the unaudited pro forma financial information presented in this proxy statement/prospectus has been prepared on the basis of a business combination beginning at the assumed effective time of the transaction.

The pro forma financial information includes all adjustments necessary to be consistent with U.S. GAAP and in accordance with Article 11. The unaudited Pro Forma Condensed Consolidated Balance Sheet (the "pro forma balance sheet") gives effect to the acquisition as if it had occurred on June 30, 2021. The unaudited Pro Forma Condensed Consolidated Statements of Income for the six months ended June 30, 2021 and the year ended December 31, 2020 (collectively, the "pro forma statements of income") give effect to the acquisition as if it occurred on January 1, 2020. The pro forma financial information does not include adjustments to reflect any potential revenue or operational synergies or cost savings that may be achievable in connection with the transaction contemplated therein.

The pro forma financial information may not be indicative of the results that actually would have occurred if the events reflected therein had been in effect on the dates indicated or of the results that may be obtained in the future. The pro forma financial information should be read in conjunction with the consolidated financial statements of CPRL and KCS referred to above.

2. Principles of consolidation:

The pro forma financial information has been prepared on the basis that CPRL will account for the acquisition as a purchase of KCS using the acquisition method pursuant to Accounting Standards Codification 805 "Business Combinations" ("ASC 805"). Under the acquisition method, assets and liabilities of KCS are recorded at their fair value on the date of the acquisition and the total consideration is allocated to the tangible and intangible assets acquired and liabilities assumed.

The adjustments to the pro forma financial information are preliminary and have been made solely for the purpose of presenting the pro forma financial information, which are necessary to comply with applicable disclosure and reporting requirements. The allocation of the estimated consideration is pending finalization of various estimates, inputs and analyses. Since this pro forma financial information has been prepared based on preliminary estimates of consideration and fair values attributable to the purchase of KCS, the actual amounts eventually recorded for the purchase accounting, including the identifiable intangibles and goodwill, may differ materially from the information presented. Refer to note 4.

3. Presentation currency:

CPRL's consolidated financial statements are presented in Canadian dollars whilst the consolidated financial statements of KCS are presented in U.S. dollars. For purposes of the pro forma financial information, the balance sheet of KCS has been translated to Canadian dollars at the June 30, 2021 foreign exchange rate and the statements of income for the year ended December 31, 2020 and the six months ended June 30, 2021 have been translated to Canadian dollars at the average foreign exchange rates for the respective periods.

A summary of the translation of KCS's financial statements is as follows:

Balance Sheet

As at June 30, 2021

4. Preliminary purchase price calculation:

The acquisition described in Note 1 "Basis of Presentation" of this pro forma financial information is anticipated to result in the following estimated purchase price allocation:

(in millions of Canadian dollars)

Consideration	
(i) Common shares issued	$ 22,620
(ii) Cash on common stock	10,352
(iii) Cash on preferred stock	10
(iv) Cash paid for CN agreement termination payment and CN refund (see note 4(i))	1,773
(v) Settlement of stock based compensation in cash	148
(v) Settlement of stock based compensation in shares	51
(v) Pre-transaction compensation for performance share awards	32
Total consideration	$ 34,986
(vi) Estimated fair value of non controlling interest	405
Total	$ 35,391

(i) Based on the closing price of CPRL common shares as at September 16, 2021 multiplied by the number of shares of KCS common stock outstanding excluding restricted share awards multiplied by the exchange ratio of 2.884 and multiplied by the foreign exchange rate (see note 4(a)).

(ii) Represents the cash consideration of US$90 paid for each share of KCS common stock outstanding excluding restricted share awards as at June 30, 2021 multiplied by the foreign exchange rate as at September 16, 2021.

(iii) Represents the cash consideration of US$37.50 paid for each share of KCS preferred stock outstanding as at June 30, 2021 multiplied by the foreign exchange rate as at September 16, 2021.

(iv) Consideration paid by CPRL of US$1,400 million (C$1,773 million) in connection with the CN agreement termination payment and CN refund (see note 4(i)).

(v) As part of the transaction the outstanding KCS equity awards are settled in cash and stock (see notes 4(a) and 5(f)).

(vi) Refer to 4(b) for a description of the non controlling interest.

Fair value of the assets acquired and liabilities assumed

Total identifiable net assets	5,102	30,289		35,391

Under the acquisition method, the acquired assets and liabilities assumed are measured at their estimated fair value at the date of acquisition with the exception of income tax, operating lease liabilities and right-of-use assets.

The purchase price allocation is preliminary and will change as a result of several factors, including:

i. Finalization of the fair value measurement of assets acquired and liabilities assumed;
ii. Changes in the Canadian—U.S. dollar and Mexican peso—U.S. dollar foreign exchange rates;
iii. Actual number of shares of KCS common stock and KCS preferred stock issued and outstanding as of immediately prior to the closing of the transaction;
iv. The price of CPRL common shares at the closing date;
v. Actual amounts paid to settle the outstanding KCS equity awards;
vi. Actual transaction costs incurred by KCS; and
vii. The remeasurement of the equity method investment in KCS that is held in the voting trust prior to the control date, which remeasurement will occur immediately before CPRL acquires control of KCS.

a) Consideration

The value of the CPRL common shares to be issued in the transaction of approximately US$68.19 per share is based on the closing price of CPRL common shares as of September 16, 2021, with such date being a date reasonably in proximity to the date of preparation of the pro forma financial information. The final purchase price equation will be based on the closing price of CPRL common shares on the date the transaction is completed.

The number of issued and outstanding shares of KCS common stock was based on the shares outstanding at June 30, 2021 being 90,947,526 shares of KCS common stock and 214,542 shares of KCS preferred stock.

As part of the transaction, the outstanding KCS equity awards are settled in cash and stock. The preliminary purchase price equation is based on an estimated payment to holders of the KCS equity awards of approximately C$231 million, net of the proceeds on the exercise of KCS stock options (note 1).

An increase (decrease) of 5% in the price of CPRL common shares would cause a C$1,141 million increase (decrease) in the estimated value of the total consideration, and correspondingly, in the estimated value of Goodwill and intangible assets. A one-cent increase (decrease) in the Canadian dollar relative to the U.S. dollar would cause a C$262 million increase (decrease) in the estimated value of the total consideration, and correspondingly, in the estimated value of Goodwill and intangible assets.

b) Fair value of non controlling interest

As of the date of this proxy statement/prospectus, the fair value of the interest held by others in Meridian Speedway LLC cannot be reasonably estimated and has been currently reflected at the carrying amount. When CPRL has finalized its determination of the fair value of the non controlling interest, the value ultimately determined could be materially different, with a corresponding impact on the amount of Goodwill and intangible assets.

c) Other assets

The value of the right of use assets, which is included in this financial statement caption, is reduced by C$2 million to equal the remaining lease liability relating to these assets, in accordance with the requirements of ASC 805. In addition, goodwill included in the accounts of KCS of C$16 million, which is reported in this caption, is eliminated.

d) KCS transaction costs

Estimated transaction costs of C$169 million expected to be incurred by KCS have been added to Accounts payable and accrued liabilities. The estimated transaction costs are preliminary and may change.

e) Long-term debt

The change in value of Long-term debt reflects the adjustment to record the debt at its estimated fair value.

f) Goodwill and intangible assets

At the date of preparation of this pro forma financial information, certain fair value adjustments have been made as identified above; however, the fair values of KCS's identifiable assets and liabilities assumed and the impact of applying acquisition accounting have not been fully determined. After reflecting the fair value adjustments made herein, the excess of the total consideration over the recognized amounts has been presented in Goodwill and intangible assets at C$30,299 million. Once detailed valuations and related calculations are completed, a material portion of this amount could be attributable to Properties, Goodwill and intangible assets, Other assets, Other long term liabilities, and the related Deferred income tax balances.

g) Historical shareholders' equity

The historical shareholders' equity will be eliminated as part of the acquisition.

h) Income taxes

The adjustment to income tax relates to the deferred tax impact of the pro forma adjustments to the balance sheet as a result of the preliminary purchase price calculation. The adjustment to income tax is calculated at an estimated effective rate of approximately 21% for 2021, and mainly relates to the fair value adjustment for long-term debt (see note 4(e)) and the elimination of the tax impact of the CP termination payment (see note 4(i)).

i) CP termination payment, CN agreement termination payment and CN refund

Included in accounts payable and accrued liabilities of KCS is US$700 million (C$868 million) related to the reimbursement by CN (or an affiliate of CN) of the CP termination payment on May 21, 2021. On September 15, 2021, KCS terminated the CN agreement and repaid this amount to CN. As such, this amount is not reflected in the liabilities assumed in the acquisition.

The CN agreement termination payment and CN refund paid by CPRL to KCS in respect of KCS's termination payments to CN (or an affiliate of CN) totaling US$1,400 million (C$1,773 million) have been reflected as part of the consideration paid to acquire KCS ("the CN termination payments").

5. Other transaction accounting adjustments:

Explanations of the other transaction accounting adjustments to the pro forma financial information are as follows:

a) Reclassification adjustments

Certain reclassification adjustments have been made to the pro forma financial information to make the presentation conform to the presentation adopted by CPRL. At this time, CPRL is not aware of any material differences in accounting policies that would have a material impact on the pro forma financial information. Following the acquisition, CPRL will conduct a review of KCS's accounting policies in an effort to determine if there are any additional material differences that require reclassification of KCS's revenues, expenses, assets or liabilities to conform to CPRL's accounting policies and classifications. As a result of that review, CPRL may identify differences between the accounting policies of the two companies that, when conformed, could have a material impact on the pro forma financial information.

The following reclassification adjustments have been made in the pro forma financial information:

Pro forma balance sheet

- Revised presentation of KCS operating lease right-of-use asset and the related lease liability to classify the amounts into the financial statement captions used by CPRL.
- Reclassified a portion of KCS's "Other long-term liabilities" to Pension and other benefits liabilities to classify the amounts into the financial statement captions used by CPRL.

Pro forma statements of income

- CPRL has aggregated its revenue into a single financial statement caption for purpose of the condensed presentation used in the pro forma statements of income.
- CPRL includes foreign exchange (gain) loss in the financial statement caption titled other (income) expense. The foreign exchange (gain) loss incurred by KCS has been reclassified into this caption.
- CPRL includes equity in net (earnings) losses from affiliates in the financial statement caption titled other (income) expense. KCS's equity in net (earnings) losses from affiliates has been reclassified into this caption.
- CPRL does not include impairment or the write off of software costs as a separate financial statement caption in the income statement. The write off of software development costs incurred by KCS has been reclassified into Purchased services and other expenses.

- CPRL does not present restructuring costs on a separate financial statement caption in the income statement. The lease-related restructuring costs incurred by KCS have been reclassified into Equipment rents and the compensation-related restructuring costs have been reclassified into Compensation and benefits.
- CPRL does not present a financial statement caption representing materials and other and amounts classified in this caption by KCS have been reclassified into Materials and Purchased services and other.

b) Transaction costs

The amount of transaction costs incurred and expected to be incurred by CPRL and its affiliates of C$184 million and by KCS of C$230 million, throughout the various stages of the acquisition, have been recognized in the pro forma statement of income for the year ended December 31, 2020 in Purchased services and other. As a result, C$131 million of transaction costs recognized in Purchased services and other by CPRL and C$50 million recognized as Merger costs by KCS, for the six months ended June 30, 2021 have been removed and reflected in 2020 to reflect the acquisition as if it occurred on January 1, 2020.

CPRL's Other (income) expense financial statement caption for the six months ended June 30, 2021 includes C$212 million of which C$167 million related to changes in the fair value on foreign exchange forward contracts and forward starting floating-to-fix interest rate swaps associated with the anticipated acquisition of KCS and C$45 million related to bridge financing fees associated with the anticipated funding of KCS. This amount and the associated deferred tax impact, have been removed from the statement of income for the six months ended June 30, 2021 and reflected in 2020 along with additional amounts of C$61 million expected to be incurred by CPRL, as the pro forma statements of income reflect the acquisition as if it occurred on January 1, 2020.

Additionally, the pro forma balance sheet as at June 30, 2021 has been adjusted to include transaction costs expected to be incurred as at that date of C$113 million by CPRL and C$169 million by KCS, as discussed above.

Included in KCS's Merger costs for the six-month period ended June 30, 2021, is the C$873 million (US$700 million) CP termination payment made to CPRL. This amount included in the pro forma statement of income for the six months ended June 30, 2021 has been eliminated.

In the six months ended June 30, 2021, CPRL recorded a non-recurring, merger termination payment of C$845 million (US$700 million) received in relation to the termination of the first merger agreement with KCS (i.e., the CP termination payment). This merger termination payment, along with the associated current tax impact, has been removed from the pro forma statement of income for the six months ended June 30, 2021 and has been reflected in the pro forma statement of income for the year ended December 31, 2020 as the pro forma statements of income reflect the acquisition as if it occurred on January 1, 2020.

The CN termination payments have been included as a cost of the acquisition (note 4 (i)).

The estimated transaction costs and tax deductibility are preliminary, may change and are non-recurring adjustments.

c) Debt and finance expenses

Part of the consideration associated with the acquisition of KCS is the CN termination payments of US$1,400 million (approximately C$1,773 million based on the US to Canadian dollar exchange rate as of the date that the termination payments were made). A portion of the termination payments totalling

US$400 million (C$506 million) of such remittances were funded by existing cash resources with the remaining balance of US$1,000 million (C$1,267 million) being funded by short-term borrowings including commercial paper and a short-term loan facility that was established by CPRC and CPRL. The average cost of such short-term borrowings is approximately 1%. Interest costs related to these facilities has been included in the pro forma statements of income based on the assumption that CPRC and CPRL will continue to finance a portion of the CN termination payments through its short-term borrowing facilities. Interest expense includes C$6 million and C$13 million for the six months ended June 30, 2021 and the year ended December 31, 2020, respectively, associated with these borrowings.

CPRL and CPRC have arranged a commitment for a bridge facility in an aggregate principal amount of US$8.5 billion on the terms set out in the debt commitment letters that, if needed, will be available to CPRC, through surviving merger sub, to fund the cash consideration payable to the KCS stockholders for the preferred stock, and the common stock, as well as the cash settlement for the stock based compensation awards. The pro forma balance sheet includes an amount of C$10,510 million assumed to be borrowed under this facility for these purposes. The floating interest rate on the bridge facility is assumed to be 4.5% and if drawn, the facility will mature 364 days after closing of the transaction. Interest costs related to this facility have been included in the pro forma statements of income based on the assumption that CPRC and CPRL will continue to finance the remaining cash consideration through the bridge facility for its full term. Net interest expense includes C$237 million and C$474 million for the six months ended June 30, 2021 and the year ended December 31, 2020, respectively, associated with these borrowings.

Bridge facility fees expensed through Other (income) and expense associated with the bridge facility for the six months ended June 30, 2021 of C$45 million have been removed in the pro forma statement of income for the six months ended June 30, 2021 and the expected total expense of C$50 million has been recorded as an Other (income) expense in the pro forma statement of income for the year ended December 31, 2020.

CPRL anticipates CPRC issuing a series of term notes with varying maturity dates that ultimately will be used, by surviving merger sub, to fund the cash consideration. It is currently expected that term notes will be issued prior to consummating the transaction such that the bridge facility will not be drawn. The impact of a 240 basis point (2.4%) increase (decrease) in the rate of borrowing, relating to funds drawn under the bridge facility, would increase (decrease) interest expense by approximately C$252 million per annum.

The debt assumed upon the acquisition of KCS is recorded in the purchase equation at fair value. The change in fair value is amortized into Net interest expense over the remaining term of the underlying debt instrument using the effective interest rate method. As a result, adjustments of C$24 million and C$52 million have been recorded as a reduction of Net interest expense in the pro forma statements of income for the 6 months ended June 30, 2021 and the year ended December 31, 2020, respectively.

Upon the closing of the transaction, it is presumed that CP has designated all incremental U.S. dollar-denominated borrowings as a foreign currency hedge of its net investment in foreign operations. Accordingly, foreign exchange gains and losses, from the dates of designation, on the translation of the U.S. dollar-denominated borrowings would be included in Other comprehensive income (loss).

d) Income taxes

The adjustment to income tax relates to the deferred tax impact of certain pro forma adjustments to the statement of income calculated at a KCS statutory rate of 21% for 2020 and 2021 for KCS related adjustments and a CP statutory rate of 26% for 2020 and 2021 for CP related adjustments. The tax treatment of the pro forma adjustments is preliminary and may change.

e) Depreciation and amortization expense

The excess of the total purchase consideration over the recognized amounts of net assets has been presented as Goodwill and intangible assets in the pro forma balance sheet. No depreciation or amortization has been recorded in relation to this amount and the determination of the amount that will be associated with depreciable and amortizable assets is not yet known. For every $1 billion recorded as depreciable and amortizable assets, CPRL's annual Depreciation and amortization expense would increase by C$40 million, assuming a 4% depreciation and amortization rate. The depreciation and amortization rate of 4% approximates CPRL's estimated annual rate of depreciation and amortization. See the section entitled – "*Cautionary Statement Regarding Forward-Looking Statements*" on page 36.

f) Post transaction compensation adjustments

The pro forma statement of income includes various adjustments to Compensation and benefits cost as summarized in the table noted below.

(in millions of Canadian dollars)	Six months ended June 30, 2021	Year ended December 31, 2020
Share-based compensation (i)	$ 6	$ 43
Cash-based retention payments (ii)	—	67
Share-based retention payments (iii)	1	4
Other (iv)	—	12
Total	$ 7	$ 126

Amounts related to cash-based retention payments, share-based retention payments and other payments of C$83 million are shown as an increase to Accounts payable and accrued liabilities on the pro forma balance sheet.

i) Share-based compensation

The vesting of certain share-based compensation arrangements of KCS are accelerated upon occurrence of the transaction. Share-based arrangements that vest upon the closing of the transaction are reflected as part of the transaction's purchase price (note 4).

Unvested KCS performance share awards will be converted into a cash-based award that entitles the holder thereof, upon vesting at the end of the three-year requisite service period, to receive an amount in cash equal to the merger consideration value for each performance share award held multiplied by a performance factor of 200%. The fair value of the KCS's performance share awards attributable to pre-transaction service that will be assumed by CPRL as at the closing date is estimated at C$32 million, and forms part of the consideration paid by CPRL to acquire KCS. This amount is included within Accounts payable and accrued liabilities and in Other long-term liabilities on the pro forma balance sheet. The compensation cost attributed to post-transaction services resulted in an adjustment to Compensation and benefits expense of C$6 million and C$43 million reflected in the pro forma statements of income for the six months ended June 30, 2021 and for the year ended December 31, 2020, respectively.

ii) Cash-based retention payments

KCS has established a cash-based retention program for KCS employees. Each award granted pursuant to the retention program will vest and become payable in two installments: (1) 25% on the earlier of (a) the date on which the closing date occurs and (b) February 21, 2022, and (2) 75% on the earlier of (a) ninety (90) days after the date that CPRL acquires control of KCS and (b) June 1, 2023, subject, in each case, to the

recipient's continued employment through the applicable vesting dates; provided, however, that if the recipient experiences a qualifying termination, then the recipient will be entitled to any then unpaid portion of the recipient's award.

The pro forma financial information gives effect to the acquisition of control of KCS, for income statement purposes, on January 1, 2020, as such, the maximum amount payable under this retention program of C$67 million has been recorded in Compensation and benefits expenses for the year ended December 31, 2020.

iii) Share-based retention payments

KCS has established a restricted share-based retention program whereby employees and officers have received 17,934 KCS restricted share awards with a vesting period of not less than one year. In connection with the transaction, the unvested KCS restricted share awards will be converted into a right to receive (i) an amount in cash equal to the merger consideration value in respect of each restricted share award, and (ii) the accrued but unpaid cash dividends corresponding to each share of KCS common stock subject to such KCS restricted share award, upon vesting. The pro forma adjustment to Compensation and benefits expenses includes C$1 million and C$4 million for the six months ended June 30, 2021 and the year ended December 31, 2020, respectively, associated with this retention program.

iv) Other compensation adjustment

Pursuant to the transaction, KCS employees who participate in the KCS annual bonus are eligible for an additional bonus payment that is based on the achievement of the applicable performance goals at the greater of (1) target performance and (2) 130% of actual performance, but in no event greater than 200% of target. An adjustment of C$12 million is reflected within Compensation and benefits expenses in the statement of income for the year ended December 31, 2020 representing the incremental bonus that would have been recorded had the adjustment been reflected in the annual bonus plan for the 2020 calendar year. This adjustment will not recur in the statement of income beyond twelve months after the transaction.

g) Cost savings and synergies

The pro forma financial information does not include adjustments to reflect any potential revenue synergies or cost savings that may be achievable in connection with the acquisition.

6. Pro forma earnings per share:

The earnings per common share has been based on the following:

For the six months ended June 30, 2021

(millions of shares)	Basic	Diluted
CPRL's weighted average common shares outstanding for the period	666.6	669.8
CPRL common shares issued upon the closing of the transaction	262.3	262.3
Pro forma weighted average number of common shares outstanding	928.9	932.1

For the year ended December 31, 2020

(millions of shares)	Basic	Diluted
CPRL's weighted average common shares outstanding for the period	677.2	679.9
CPRL common shares issued upon the closing of the transaction	262.3	262.3
Pro forma weighted average number of common shares outstanding	939.5	942.2

For the year ended December 31, 2020, the number of basic and diluted CPRL common shares has been adjusted to give effect to the 5 for 1 share split that occurred in the second quarter of 2021.

BENEFICIAL OWNERSHIP OF SECURITIES

Security Ownership of Certain Beneficial Owners and Management of KCS

To KCS's knowledge, the following table sets forth certain information regarding the beneficial ownership of KCS common stock as of September 27, 2021 (except as noted in the footnotes below) with respect to: (i) each person known by KCS to beneficially own more than 5% of the shares of KCS common stock issued and outstanding, (ii) each member of the KCS board, (iii) each named executive officer of KCS, and (iv) all current directors and executive officers as a group. KCS has determined beneficial ownership in accordance with the rules of the SEC.

KCS is not aware of any beneficial owner of more than 5% of the "KCS preferred stock." None of KCS's directors or executive officers owns any shares of KCS preferred stock. No officer or director of KCS owns any equity securities of any subsidiary of KCS. Beneficial ownership is generally defined as either the sole or shared power to vote or dispose of the shares. Except as otherwise noted, the beneficial owners have the sole power to vote and dispose of the KCS voting stock.

Beneficial Owners	**Common Stock(1)**	**Percent of Class(1)**
The Vanguard Group	9,881,055(2)	10.86%
Massachusetts Financial Services Company	6,725,646(3)	7.39%
BlackRock, Inc.	7,278,423(4)	8.00%
Directors		
Lydia I. Beebe Director	2,028(5)	*
Lu M. Córdova Director	10,031(6)	*
Robert J. Druten Director	14,117(7)	*
Antonio O. Garza, Jr. Director	4,448	*
David Garza-Santos Director	2,648	*
Janet H. Kennedy Director	3,402	*
Mitchell J. Krebs Director	4,087	*
Henry J. Maier Director	9,087	*
Thomas A. McDonnell Director	106,965(8)	*
Patrick J. Ottensmeyer Director; President and Chief Executive Officer	243,915(9)	*
Executive Officers	**Common Stock(1)**	**Percent of Class(1)**
Brian D. Hancock Executive Vice President and Chief Innovation Officer	100(10)	*
Michael J. Naatz Executive Vice President and Chief Marketing Officer	22,951(11)	*
Jeffrey M. Songer Executive Vice President and Chief Operating Officer	49,236(12)	*
Michael W. Upchurch Executive Vice President and Chief Financial Officer	65,167(13)	*

Executive Officers	Common Stock(1)	Percent of Class(1)
All Directors and Executive Officers as a Group (19 Persons)	695,919(14)	*

* Less than 1% of the outstanding shares.

(1) This column includes KCS common stock, including restricted shares, beneficially owned by officers, directors, nominees for director and beneficial owners of more than 5% of KCS common stock. In accordance with SEC rules, this column also includes shares that may be acquired upon the exercise of options or other convertible securities that are exercisable or convertible on the record date, or will become exercisable or convertible within 60 days of that date, which are considered beneficially owned. In computing the number of shares beneficially owned by a person and the percentage ownership of that person, shares subject to options or other convertible securities held by that person that are exercisable or convertible on the record date, or exercisable or convertible within 60 days of the record date, are deemed outstanding. These shares are not, however, deemed outstanding for the purpose of computing the percentage ownership of any other person. In addition, under applicable law, shares that are held indirectly are considered beneficially owned. Directors, nominees for director and executive officers may also be deemed to own, beneficially, shares included in the amounts shown above which are held in other capacities. The holders may disclaim beneficial ownership of shares included under certain circumstances. A list of KCS executive officers is included in KCS's Annual Report on Form 10-K for the year ended December 31, 2020 and KCS's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2021. See page i of this proxy statement/prospectus for instructions on how to obtain copies of the Form 10-K of Form 10-Q.

(2) The address of The Vanguard Group ("Vanguard") is 100 Vanguard Blvd., Malvern, PA 19355. Based on a Schedule 13G/A, filed February 10, 2021, Vanguard reports sole voting power of 0 shares, shared voting power of 194,019 shares, sole power to dispose of 9,431,213 shares and shared power to dispose of 449,842 shares.

(3) The address of Massachusetts Financial Services Company ("MFS") is 111 Huntington Avenue, Boston, MA 02199. Based on a Schedule 13G/A, filed February 11, 2021, MFS reports sole voting power of 6,547,489 shares and sole dispositive power of 6,725,646 shares.

(4) The address of BlackRock, Inc. is 55 East 52nd Street, New York, NY 10055. Based on a Schedule 13G/A, filed January 29, 2021, BlackRock, Inc. reports sole voting power of 6,318,835 shares and sole dispositive power of 7,278,423 shares.

(5) Ms. Beebe's shares are held in a revocable living trust for which she and her spouse are the trustees with sole voting and dispositive power.

(6) Ms. Córdova's shares are held in a revocable living trust for which she is the trustee with sole voting and dispositive power.

(7) Mr. Druten's beneficial ownership includes 100 shares held by a charitable foundation for which Mr. Druten disclaims beneficial ownership.

(8) Mr. McDonnell's beneficial ownership includes 66,965 shares held in a trust for which he is the trustee with sole voting and dispositive power, and 40,000 shares held by a charitable foundation for which Mr. McDonnell disclaims beneficial ownership.

(9) Mr. Ottensmeyer's beneficial ownership includes 17,276 restricted shares, 118,815 shares that may be acquired through options that are exercisable as of, or will become exercisable within 60 days of, the record date, and 260 shares allocated to his account in the KCS 401(k) Plan.

(10) Mr. Hancock's employment with the Company terminated on July 2, 2021.

(11) Mr. Naatz's beneficial ownership includes 4,530 restricted shares and 10,025 shares that may be acquired through options that are exercisable as of, or will become exercisable within 60 days of, the record date.

(12) Mr. Songer's beneficial ownership includes 7,143 restricted shares and 17,267 shares that may be acquired through options that are exercisable as of, or will become exercisable within 60 days of, the record date.

(13) Mr. Upchurch's beneficial ownership includes 4,120 restricted shares and 37,845 shares that may be acquired through options that are exercisable as of, or will become exercisable within 60 days of, the record date and 200 shares held jointly with his children.

(14) The number includes 46,671 restricted shares, 243,106 shares that may be acquired through options that are exercisable as of, or will become exercisable within 60 days of, the record date, 49,641 shares held jointly, 50,921 shares otherwise held indirectly, with 40,100 shares disclaimed.

Security Ownership of Certain Beneficial Owners and Management of CPRL

To CPRL's knowledge, the following table sets forth certain information regarding the beneficial ownership of CPRL common shares as of September 27, 2021, by (i) each person known by CPRL to beneficially own more than 5% of the CPRL common shares, (ii) each director (who was serving as a director as of that date) and nominee for director, (iii) each named executive officer of CPRL and (iv) all current directors and executive officers as a group. CPRL has determined beneficial ownership in accordance with the rules of the SEC.

Beneficial Owners	Common Shares	Percent of Class

(a) See Directors' Profiles in "Item 10. Directors, Executive Officers and Corporate Governance" of CPRL's 10-K/A for the fiscal year ended December 31, 2020, for disclosure with respect to director deferred stock units. The address of each director is c/o Canadian Pacific, 7550 Ogden Dale Road S.E., Calgary, Alberta, T2C 4X9.

(b) See "Compensation Details – Deferred Compensation Plans" in Item 11. Executive Compensation of CPRL's 10-K/A for the fiscal year ended December 31, 2020, for disclosure with respect to named executive officer deferred share units. The address of each executive officer is c/o Canadian Pacific, 7550 Ogden Dale Road S.E., Calgary, Alberta, T2C 4X9.

(c) The common shares owned by Mr. Creel comprise (i) 1,220,720 shares issuable upon the exercise of stock options that have vested or will vest within the next 60 days and (ii) 92,946 shares held by Mr. Creel directly.

(d) The common shares owned by Mr. Velani comprise (i) 152,880 shares issuable upon the exercise of stock options that have vested or will vest within the next 60 days and (ii) 3,509 shares held by Mr. Velani directly.

(e) The common shares owned by Mr. Brooks comprise (i) 105,435 shares issuable upon the exercise of stock options that have vested or will vest within the next 60 days and (ii) 11,579 shares held by Mr. Brooks directly.

(f) The common shares owned by Mr. Redd comprise (i) 77,925 shares issuable upon the exercise of stock options that have vested or will vest within the next 60 days and (ii) 5,763 shares held by Mr. Redd directly.

(g) The common shares owned by Mr. Ellis comprise (i) 71,665 shares issuable upon the exercise of stock options that have vested or will vest within the next 60 days and (ii) 5,508 shares held by Mr. Ellis directly.

(h) Based upon statements in the Schedule 13F filed by TCI Fund Management Limited (TCI Fund) and Christopher Hohn on August 16, 2021, TCI Fund and Mr. Hohn have (i) shared voting power over 55,860,385 common shares; and (ii) shared dispositive power of 55,860,385 common shares. The Children's Investment Master Fund (TCIF) is the investment manager of TCI Fund and CIFF Capital UK LP (CIFF). Mr. Hohn, as managing director of TCIF, may be deemed to beneficially own the shares held by the TCI Fund and CIFF. The address of each of TCI Fund and Mr. Hohn is 7 Clifford Street, London W1S 2FT, United Kingdom.

COMPARISON OF RIGHTS OF CPRL SHAREHOLDERS AND KCS STOCKHOLDERS

General

CPRL is organized under the federal laws of Canada and, accordingly, the rights of CPRL shareholders will be governed principally by the CBCA, CPRL's restated articles of incorporation, as amended (which we refer to as "CPRL's articles"), and CPRL's By-Law No. 1 and By-Law No. 2, as amended (which we refer to collectively as "CPRL's by-laws"). KCS is incorporated in the State of Delaware, and the rights of KCS stockholders are governed by the DGCL and the KCS certificate of incorporation, as amended (which we refer to as KCS's "certificate of incorporation"), and by-laws, as amended and restated (which we refer to as KCS's "by-laws"). At the effective time, each share of KCS common stock that is issued and outstanding immediately prior to the effective time will be converted into the right to receive the merger consideration. As a result, KCS common stockholders will become shareholders of CPRL and their rights will be governed principally by the CBCA, CPRL's articles and CPRL's by-laws.

Material Differences Between the Rights of Shareholders of CPRL and Stockholders of KCS

The following is a summary of material differences between the rights of CPRL shareholders under the CBCA, CPRL's articles and CPRL's by-laws and the existing rights of KCS stockholders under the DGCL, KCS's certificate of incorporation and KCS's by-laws. While KCS and CPRL believe that the following summary covers all of the material differences, it may not contain all of the information that is important to you. The following summary does not include a complete description of all differences between the rights of CPRL shareholders and KCS stockholders, nor does it include a complete discussion of the respective rights of CPRL shareholders and KCS stockholders.

The following summary is qualified in its entirety by reference to the CBCA, CPRL's articles and CPRL's by-laws, the DGCL, KCS's certificate of incorporation and by-laws and the various other documents referred to in this summary. You are urged to carefully read this entire proxy statement/prospectus, the relevant provisions of the CBCA and the DGCL, CPRL's articles and CPRL's by-laws, KCS's certificate of incorporation and by-laws, and each other document referred to in this proxy statement/prospectus for a more complete understanding of the differences between the rights of a KCS shareholder and the rights of a CPRL stockholder. KCS has filed with the SEC its certificate of incorporation and by-laws referenced in this summary of shareholder rights, and CPRL has filed with the SEC CPRL's articles and CPRL's by-laws referenced in this summary of shareholder rights. For more information, see the section entitled "*Where You Can Find Additional Information*," on page 229. References to a "holder" in the following summary are to the registered holder of the applicable shares.

Provision	CPRL	KCS
Authorized Share Capital	CPRL is authorized to issue an unlimited number of common shares, an unlimited number of First Preferred Shares and an unlimited number of Second Preferred Shares. Holders of CPRL common shares are entitled to all of the applicable rights and obligations provided under the CBCA, CPRL's articles and CPRL's by-laws.	The aggregate number of shares of stock that KCS has the authority to issue is 402.84 million, consisting of 400 million shares of KCS common stock, 840 thousand shares of KCS preferred stock and 2 million shares of new series preferred stock, par value $1.00 per share (which we refer to as the "new series preferred stock").
Preferred Shares	The First Preferred Shares and Second Preferred Shares may at any time or from time to time each be issued in one or more series. The CPRL board may by resolution	Holders of KCS preferred stock are entitled to receive dividends up to but not exceeding the rate of 4% per annum, before any dividends are declared or paid to

Provision	CPRL	KCS
	of the directors (and without further resolution of shareholders) fix from time to time before the issue thereof the number of shares in, and determine the designation, rights, privileges, restrictions and conditions attaching to the shares of, each series of First Preferred Shares or Second Preferred Shares. The CPRL board may not issue any First Preferred Shares or Second Preferred Shares, as applicable, if by so doing the aggregate amount payable to holders of First Preferred Shares or Second Preferred Shares, as applicable, as a return of capital in the event of the liquidation, dissolution or winding up of CPRL or any other distribution of the assets of CPRL among its shareholders for the purpose of winding up its affairs would exceed $500,000,000. Holders of First Preferred Shares and Second Preferred Shares will not be entitled to receive notice of or to attend any CPRL shareholder meetings and will not be entitled to vote at such meetings, except as required by law. In addition to the rights attaching to any series of preferred shares, holders of CPRL's preferred shares are entitled to all of the applicable rights and obligations provided under the CBCA and CPRL's articles and CPRL's by-laws.	common stock or new series preferred stock for the same period. Such dividends are not cumulative, and the holders of the KCS preferred stock are not entitled to receive any other earnings or profits. In case of liquidation or dissolution of KCS, the holders of KCS preferred stock are entitled to receive payment up to the amount of the par value before any payment or liquidation is made upon the common stock or new series preferred stock. Holders of KCS preferred stock are entitled to one vote per share on any matter brought before the stockholders. The KCS board is authorized to issue up to 2 million shares of new series preferred stock in one or more series and to fix and determine the number of shares of preferred stock of any series, to determine the designation of any such series, to increase or decrease the number of shares of any such series subsequent to the issue of shares of that series, and to determine or alter the rights, preferences, privileges and restrictions granted to or imposed upon any such series. As of the date of this proxy statement, there are currently no shares of new series preferred stock outstanding.
Variation of Rights Attaching to a Class or Series of Shares	Under the CBCA, the rights attaching to CPRL common shares may be varied only through an amendment of CPRL's articles authorized by special resolution of CPRL's shareholders, including, if applicable, a separate special resolution of the holders of the affected class or series of shares in accordance with the provisions of the CBCA.	Under KCS's certificate of incorporation, the board of directors is authorized to issue up to 2 million shares of new series preferred stock in one or more series and to fix and determine the number of shares of preferred stock of any series, to determine the designation of any such series, to increase or decrease the number of shares of any such series subsequent to the issue of shares of that series, and to determine or alter the rights, preferences, privileges and restrictions granted to or imposed upon any such series.
Consolidation and Division; Subdivision	Under the CBCA, the issued shares of a class or series of CPRL shares may be changed into a different number of shares of the same class or series or into the same	Under the DGCL, the issued shares of KCS common stock may be combined into a smaller number of shares or split into a greater number of shares through an

Provision	CPRL	KCS
	or a different number of shares of other classes or series through an amendment to its articles authorized by special resolution of CPRL shareholders, including, if applicable, a separate special resolution of the holders of the affected class or series of shares in accordance with the provisions of the CBCA.	amendment to KCS's certificate of incorporation.
Reduction of Share Capital	Under the CBCA, CPRL may, by a special resolution of CPRL shareholders, reduce its stated capital for a class or series of shares for any reason, provided there are no reasonable grounds for believing that (i) CPRL is, or after the proposed reduction of its stated capital would be, unable to pay its liabilities as they become due, or (ii) after the proposed reduction of its stated capital, the realizable value of CPRL's assets would be less than the aggregate of its liabilities.	Under the DGCL, KCS, by an affirmative vote of at least a majority of the KCS board, may reduce its capital by reducing or eliminating the capital associated with shares of capital stock that have been retired, by applying some or all of the capital represented by shares purchased, redeemed, converted or exchanged or by transferring to surplus the capital associated with certain shares of its stock. No reduction of capital may be made unless the assets of KCS remaining after the reduction are sufficient to pay any debts for which payment has not otherwise been provided.
Distributions and Dividends; Repurchases and Redemptions	*Distributions/Dividends* Under the CBCA, CPRL shareholders are entitled to receive dividends if, as and when declared by the directors of CPRL, subject to prior satisfaction of preferential dividends applicable to any preferred shares. Under CPRL's articles, subject to the rights of the holders of any other class of shares of CPRL entitled to receive dividends in priority to or rateably with the holders of CPRL common shares, the CPRL board may in its sole discretion declare dividends on the CPRL common shares to the exclusion of any other class of shares of CPRL. Under the CBCA, the CPRL board may declare and pay dividends to the holders of CPRL common shares or CPRL preferred shares provided there are no reasonable grounds for believing that: (i) CPRL is, or would after the payment be, unable to pay its liabilities as they become due; and (ii) the realizable value of CPRL's assets	*Distributions/Dividends* Under the DGCL, KCS stockholders are entitled to receive dividends if, as and when declared by the KCS board. The KCS board may declare and pay a dividend to KCS stockholders out of surplus or, if there is no surplus, out of net profits for the year in which the dividend is declared or the immediately preceding fiscal year, or both, provided that such payment would not reduce capital below the amount of capital represented by all classes of outstanding stock having a preference as to the distribution of assets upon liquidation. A dividend may be paid in cash, in shares of common stock or in other property. In addition, as described above, holders of KCS preferred stock are entitled to certain dividends as set forth in the KCS certificate of incorporation. *Repurchases/Redemptions* Under the DGCL, KCS may redeem or repurchase shares of its own common stock, except that generally it may not

Provision	CPRL	KCS
	would as a result of the payment be less than the aggregate of CPRL's liabilities and the stated capital of all classes of CPRL's shares. With respect to the payment of dividends and the distribution of assets of CPRL in the event of any liquidation, dissolution or winding up of CPRL or the other distribution of the assets of CPRL among its shareholders for the purpose of winding up its affairs, the First Preferred Shares are entitled to priority over both the Second Preferred Shares, the CPRL common shares, and over any other shares ranking junior to the First Preferred Shares. The Second Preferred Shares are entitled to priority over the holders of the CPRL common shares and over any other shares ranking junior to the Second Preferred Shares. Dividends cannot be declared and paid on Second Preferred Shares or CPRL common shares or any other shares ranking junior to the First Preferred Shares or Second Preferred Shares without the consent in writing of all holders of the First Preferred Shares or Second Preferred Shares outstanding, as applicable, unless and until all dividends (if any) up to and including any dividend payable for the last completed period for which such dividend is payable on each series of First Preferred Shares or Second Preferred Shares outstanding, respectively, has been declared and paid or set apart for payment. *Repurchases/Redemptions* Under the CBCA, CPRL may repurchase its own shares, provided there are no reasonable grounds for believing that (i) CPRL is, or would be after the payment for the purchase of such shares, unable to pay its liabilities as they become due and (ii) the realizable value of CPRL's assets would after the payment for the purchase of such shares be less than the aggregate of CPRL's liabilities and the stated capital of all classes of CPRL's shares	redeem or repurchase those shares if the capital of KCS is impaired at the time or would become impaired as a result of the redemption or repurchase of such shares. If KCS were to designate and issue shares of a series of preferred stock that is redeemable in accordance with its terms, such terms would govern the redemption of such shares. Repurchased and redeemed shares may be retired or held as treasury shares. Shares that have been repurchased but have not been retired may be resold by KCS for such consideration as the KCS board may determine in its discretion. *Purchases by Subsidiaries of KCS* Under the DGCL, KCS common stock may be acquired by subsidiaries of KCS without stockholder approval. Shares of such common stock owned by a majority-owned subsidiary are neither entitled to vote nor counted as outstanding for quorum purposes.

Provision	CPRL	KCS
	Under the CBCA, CPRL may purchase or redeem any redeemable shares issued by it at prices not exceeding the redemption price, or as calculated according to a formula, stated in CPRL's articles; provided CPRL may only purchase or redeem its redeemable shares if there are no reasonable grounds for believing that (i) CPRL is, or would be after the payment for the purchase or redemption of such shares, unable to pay its liabilities as they become due and (ii) the realizable value of CPRL's assets would after the payment for the purchase or redemption of such shares be less than the aggregate of CPRL's liabilities and the amount that would be required to pay the holders of CPRL's shares that have a right to be paid, on a redemption or in a liquidation, rateably with or before the holders of the shares to be purchased or redeemed, to the extent that the amount has not been included in its liabilities. Under the CBCA, neither CPRL nor subsidiaries of CPRL may hold CPRL shares, unless it is holding such shares solely in the capacity of a personal representative, or by way of security for the purposes of a transaction entered into in the ordinary course of business that includes the lending of money.	
Lien on Shares, Calls on Shares and Forfeiture of Shares	Under the CBCA, shares must be fully paid prior to issue, and are non-assessable. CPRL shares will not be issued until the consideration for the shares is fully paid in money or in property or past services that are not less in value than the fair equivalent of the money that CPRL would have received if the shares had been issued for money. The determination of whether property or past services are the fair equivalent of monetary consideration will be made by the CPRL board.	Under the DGCL, KCS may issue the whole or any part of its shares of common stock or preferred stock as partly paid and subject to call for the remainder of the consideration to be paid therefor. When the whole of the consideration payable for shares of KCS has not been paid in full, and the assets of KCS must be insufficient to satisfy the claims of creditors, each holder of shares not paid in full must be bound to pay the unpaid balance due for such shares.
Voting Rights	The holders of CPRL common shares are entitled to receive notice of and to attend all annual and special meetings of the shareholders of CPRL and to one vote in respect of each common share held at all	Each share of KCS common stock or KCS preferred stock entitles the holder to one vote at all meetings of KCS stockholders.

Provision	CPRL	KCS
	such meetings, except at separate meetings of or on separate votes by the holders of another class or series of shares of CPRL. The holders of the First Preferred Shares and Second Preferred Shares will not be entitled to receive notice of or to attend any meeting of the shareholders of CPRL and will not be entitled to vote at any such meeting, except as may be required by law.	
Number of Directors	Under the CPRL's articles, the actual number of directors on the CPRL board may be determined from time to time by resolution of the directors, provided that the CPRL board consists of at least five and at most 20 directors.	KCS's by-laws provide that the number of directors constituting its board of directors must not be less than three nor more than 18, the exact number of directors to be determined from time to time by resolution adopted by a majority of the whole board of directors, and such exact number must be 18 until otherwise determined by resolution adopted by a majority of the whole KCS board. The KCS board currently has ten directors.
Qualification of Directors	No person will be elected or appointed a director if the person is disqualified from being a director under the CBCA. A director ceases to hold office when the director ceases to be qualified as a director under the CBCA or CPRL's articles. No person will be eligible for election as a director of CPRL unless nominated in accordance with the nomination procedures provided for in CPRL's by-laws. *Nomination Procedures* Nominations of persons for election to the CPRL board may be made at any annual meeting of shareholders, or at any special meeting of shareholders if one of the purposes for which the special meeting was called is the election of directors: (i) by or at the direction of the CPRL board, including pursuant to a notice of meeting; (ii) by or at the direction or request of one or more shareholders pursuant to a proposal made in accordance with the provisions of the CBCA, or a requisition of the shareholders made	Unless otherwise approved by the KCS board, no person who has attained the age of 75 will be eligible to be nominated or to serve as a member, but any person who shall attain the age of 75 during the term of directorship to which they were elected shall be eligible to serve the remainder of such term. No former CEO of KCS is eligible to be elected or appointed.

Provision	CPRL	KCS
	in accordance with the provisions of the CBCA; or (iii) by any person (a "Nominating Shareholder"): (A) who, at the close of business on the date of the giving of the notice provided for in CPRL's by-laws and on the record date for notice of such meeting of shareholders, is entered in the securities register as a holder of one or more shares carrying the right to vote at such meeting or who beneficially owns shares that are entitled to be voted at such meeting; and (B) who complies with the notice procedures set forth in CPRL's by-laws (see the information set forth in the table below in the section entitled "*Notice of Shareholder Nominations and Proposals*").	
Citizenship and Residency of Directors	The CBCA requires that at least 25% of the directors of CPRL (or if CPRL ever has less than four directors, at least one director) must be resident Canadians.	Not applicable.
Election of Directors	Subject to the CBCA and CPRL's articles, CPRL's by-laws provide that nominations of persons for election to the CPRL board may be made at any annual meeting of shareholders, or at any special meeting of shareholders if one of the purposes for which the special meeting was called is the election of directors. Under the CBCA, the CPRL board has the ability to appoint additional directors between shareholder meetings without shareholder approval, provided that such additional number does not exceed one third of the number of directors elected at the most recent shareholder meeting. Per the requirements of the TSX, CPRL has a majority voting policy, which requires any director nominee who does not receive at least a majority of votes in their favor in an uncontested election to immediately tender their resignation from the CPRL board. This policy does not apply to contested elections in which the number of director nominees for election is greater than the number of director positions on the	Directors are elected at the annual meeting of stockholders or at a special meeting called for such purpose and hold office until the annual meeting for the year in which his or her term expires or until his or her successor is elected and qualified. Directors of KCS are elected by the affirmative vote of a majority of the votes cast, in person or by proxy, for or against each director by the holders of outstanding shares of common stock or preferred stock entitled to vote for the election of directors; provided that if the number of nominees, as of the time of mailing of KCS's proxy statement with respect to such meeting, exceeds the number of directors to be elected, the stockholders will instead elect the directors by a plurality vote.

Provision	CPRL	KCS
	board, in which case directors are elected by a plurality of votes cast. There are amendments to the CBCA pending that, once in force, will require a majority voting standard be used for uncontested elections of directors of distributing corporations governed by the CBCA, such as CPRL.	
Cumulative Voting	Under the CBCA, cumulative voting is only permitted if the articles of a corporation specifically provide for it. CPRL's articles do not provide for cumulative voting.	KCS's certificate of incorporation does not provide for cumulative voting.
Vacancies	The CBCA generally allows a vacancy on the board of directors to be filled by a quorum of directors, except a vacancy resulting from an increase in the number or the minimum or maximum number of directors or a failure to elect the number or minimum number of directors provided for in the articles. Any vacancy among the directors resulting from an increase in the number of directors as so determined may be filled by resolution of the directors.	The KCS board has the power to fill all vacancies and newly created directorships by a majority of the directors then in office.
Votes to Govern	At all meetings of the CPRL board, every question must be decided by a majority of the votes cast. The chairman of any meeting may vote as a director.	Under KCS's by-laws, a majority of the KCS board at a meeting duly assembled constitutes a quorum for the transaction of business except as otherwise provided by statute, KCS's certificate of incorporation or by KCS's by-laws. The act of a majority of the directors present at a meeting at which a quorum is present will be the act of the KCS board. In the absence of a quorum, a majority of the directors present may adjourn the meeting from time to time until a quorum be present, without notice other than by announcement at the meeting.
Duties of Directors	Under the CBCA, the directors of CPRL owe a statutory fiduciary duty to CPRL. The directors have a duty to manage, or supervise the management of, the business and affairs of CPRL. In exercising their powers and discharging their duties, the directors must: (i) act honestly and in good faith with a view to the best interests of CPRL; and (ii) exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances. When acting with a view to the best interests of CPRL, the directors	Under Delaware law, the directors of KCS owe a duty of care and a duty of loyalty. The duty of care requires that directors act on an informed basis after due consideration of the relevant materials and appropriate deliberation. The duty of care also requires that directors exercise care in overseeing and investigating the conduct of corporate employees. The duty of loyalty requires directors to act in what they reasonably believe to be the best interests of the company and its stockholders without any conflict of interest. A party

Provision	CPRL	KCS
	may consider, but are not limited to, the following factors: (a) the interests of shareholders, employees, retirees and pensioners, creditors, consumers and governments; (b) the environment; and (c) the long-term interests of CPRL. Provided that the directors consider the interests of stakeholders and make a decision that is reasonable in light of the circumstances, Canadian courts will not generally question the decision. Canadian courts will scrutinize the process by which the directors make their decisions and the apparent objectives of their actions. If business decisions have been made honestly, prudently, in good faith, on reasonable grounds, and on an individual basis, Canadian courts will generally decline to substitute their own opinion for that of the board of directors, even where subsequent events may cast doubt on the directors' determination. Under the CBCA, the directors of CPRL may delegate their duties to a managing director who is a resident Canadian or committee of directors and delegate to such managing director or committee any of the powers of the directors, or to an officer of CPRL; provided, that the directors may not delegate the power to: (i) submit to the CPRL shareholders any question or matter requiring the approval of the shareholders; (ii) fill a vacancy among the directors or in the office of auditor, or appoint additional directors; (iii) issue securities except as authorized by the directors; (iv) issue shares of a series except as authorized by the directors; (v) declare dividends; (vi) purchase, redeem or otherwise acquire shares issued by CPRL; (vii) pay a commission to any person in consideration of the person's purchasing or agreeing to purchase	challenging the propriety of a decision of a board of directors typically bears the burden of rebutting the applicability of the "business judgment rule" presumption, which presumes that directors acted in accordance with the duties of care and loyalty. Notwithstanding the foregoing, Delaware courts may subject directors' conduct to enhanced scrutiny of, among other matters, defensive actions taken in response to a threat to corporate control and approval of a transaction resulting in a sale of control of the corporation. Under Delaware law, a member of the board of directors, or a member of any committee designated by the board of directors, must, in the performance of such member's duties, be fully protected in relying in good faith upon the records of the corporation and upon such information, opinions, reports or statements presented to the corporation by any of the corporation's officers or employees, or committees of the board of directors, or by any other person as to matters the member reasonably believes are within such other person's professional or expert competence and who has been selected with reasonable care by or on behalf of the corporation.

Provision	CPRL	KCS
	shares of CPRL from CPRL or from any other person, or procuring or agreeing to procure purchasers for any such shares except as authorized by the directors; (viii) approve a management information circular; (ix) approve a takeover bid circular or directors' circular; (x) approve any financial statements of CPRL; or (xi) adopt, amend or repeal by-laws.	
Conflicts of Interest of Directors and Officers	Under the CBCA, each of the directors and officers of CPRL must disclose to CPRL, in writing or by requesting to have it entered in the minutes of meetings of directors or of meetings of committees of directors, the nature and extent of any interest that he or she has in a material contract or material transaction, whether made or proposed, with CPRL, if the director (i) is a party to the contract or transaction, (ii) is a director or an officer, or an individual acting in a similar capacity, of a party to the contract or transaction, or (iii) has a material interest in a party to the contract or transaction. A director who discloses such a conflict of interest will not vote on any resolution to approve the contract or transaction, unless the contract or transaction relates primarily to his or her remuneration as a director, officer, employee, agent or mandatory of CPRL or an affiliate, is for indemnity or insurance of directors of CPRL, or is with an affiliate of CPRL. Where CPRL enters into a contract or transaction with a director of CPRL, or with another person or entity of which a director of CPRL is a director or officer or in which a director of CPRL has a material interest, the director or officer is not accountable to CPRL or its shareholders if (i) disclosure of the interest was made as described above, (ii) the directors of CPRL approved the contract or transaction, and	Under Delaware law, a contract or transaction in which a director has an interest will not be voidable solely for this reason if (i) the material facts about such interested director's interest are disclosed or are known to the board of directors or an informed and properly functioning independent committee thereof, and a majority of disinterested directors or such committee in good faith authorizes the transaction by the affirmative vote of a majority of the disinterested directors, (ii) the material facts about such interested director's relationship or interest are disclosed or are known to the stockholders entitled to vote on such transaction, and the transaction is specifically approved in good faith by vote of the majority of shares entitled to vote thereon or (iii) the transaction is fair to the corporation as of the time it is authorized, approved or ratified. The mere fact that an interested director is present and voting on a transaction in which he or she is interested will not itself make the transaction void. Interested directors may be counted in determining the presence of a quorum at a meeting of the board of directors or of a committee that authorizes the contract or transaction. Under Delaware law, an interested director could be held liable for a transaction in which such director derived an improper personal benefit.

Provision	CPRL	KCS
	(iii) the contract or transaction was reasonable and fair to CPRL when it was approved. Despite the foregoing, even if a director's interest is not disclosed as described above, provided the director was acting honestly and in good faith, such director is not accountable to CPRL or to its shareholders in respect of a transaction or contract in which the director has an interest; provided, that: (i) the contract or transaction is approved or confirmed by special resolution at a meeting of the CPRL shareholders; (ii) disclosure of the interest was made to the CPRL shareholders in a manner sufficient to indicate its nature before the contract or transaction was approved or confirmed; and (iii) the contract or transaction was reasonable and fair to CPRL when it was approved or confirmed.	
Shareholders' Disclosure of Interests in Shares	CPRL shareholders are not required to disclose their interests in shares of CPRL, except in limited circumstances, including when nominating a candidate for election as a director, making certain other shareholder proposals or requisitioning a meeting of shareholders in accordance with each of the CBCA and CPRL's by-laws. Under the U.S. Exchange Act, all beneficial owners of holders of 5% or greater of CPRL's outstanding share capital must report their holdings to the SEC on "Schedule 13G" if the holdings are passive and held not with an intent to acquire control and on "Schedule 13D" if the holdings are non-passive and held with an intent to acquire control. In accordance with applicable Canadian securities laws, a CPRL shareholder is required to disclose their interest in CPRL's shares where such shareholder's holdings equal or exceed 10% of the voting rights attached to the voting securities.	Neither the DGCL nor KCS's certificate of incorporation or by-laws impose an obligation with respect to disclosure by stockholders of their interests in KCS voting stock, except as part of a stockholders' nomination of a director or stockholder proposals to be made at an annual meeting. Under the U.S. Exchange Act, all beneficial owners of holders of 5% or greater of the outstanding shares of KCS's capital stock must report their holdings to the SEC on "Schedule 13G" if the holdings are passive and held not with an intent to acquire control and on "Schedule 13D" if the holdings are non-passive and held with an intent to acquire control.

Provision	CPRL	KCS
Record Dates	Under the CBCA, the CPRL board may fix a record date for the purpose of determining shareholders entitled to receive payment of a dividend or entitled to participate in a liquidation distribution or for any other purpose, other than to establish a shareholder's right to receive notice of or to vote at a meeting, which record date must be not more than 60 days before the day on which the particular action is to be taken. If no record date is fixed by the CPRL board, the record date will be at the close of business on the day on which the directors pass the resolution in respect of the applicable action. Under the CBCA, the CPRL board may fix a record date for the purpose of determining shareholders entitled to receive notice of and vote at a meeting of shareholders, which record date must be not less than 21 days and not more than 60 days before the date of the meeting. If no record date is fixed by the CPRL board, the record date for the determination of shareholders entitled to receive notice of or vote at a meeting of shareholders will be at the close of business on the day immediately preceding the day on which the notice is given, or if no notice is given, the day on which the meeting is held. If a record date is fixed, unless notice of the record date is waived in writing by every holder of a share of the class or series affected, notice thereof will be given, not less than seven days before the date so fixed, (i) by advertisement in a newspaper published or distributed in the place where CPRL has its registered office and in each place in Canada where it has a transfer agent or where a transfer of its shares may be recorded; and (ii) by written notice to each stock exchange in Canada on which the shares of CPRL are listed for trading.	Under KCS's by-laws, the directors may fix a record date to determine the stockholders entitled to receive payment of any dividend or other distribution or allotment of any rights or the stockholders entitled to exercise any rights in respect of any change, conversion or exchange of stock, or for the purpose of any other lawful action, which record date must not precede the date upon which the resolution fixing the record date is adopted by the board of directors, and which record date must be not more than 60 days prior to such action. If no record date is fixed, the record date for determining stockholders for any such purpose will be at the close of business on the day on which the board of directors adopts the resolution relating thereto. Under KCS's by-laws, the directors may fix a record date to determine the stockholders entitled to notice of any meeting of stockholders or any adjournment thereof, which record date must not precede the date upon which the resolution fixing the record date is adopted by the board of directors, and which record date must not be more than 60 nor less than 10 days before the date of such meeting. If the board of directors so fixes a date, such date will also be the record date for determining the stockholders entitled to vote at such meeting unless the board of directors determines, at the time it fixes such record date, that a later date on or before the date of the meeting will be the date for making such determination. If no record date is fixed by the board of directors, the record date for determining stockholders entitled to notice of and to vote at a meeting of stockholders will be at the close of business on the day next preceding the day on which notice is given, or, if notice is waived, at the close of business on the day next preceding the day on which the meeting is held. A determination of stockholders of record entitled to notice of or to vote at a meeting of stockholders will apply to any

Provision	CPRL	KCS
		adjournment of the meeting; provided, however, that the board of directors may fix a new record date for determination of stockholders entitled to vote at the adjourned meeting, and in such case will also fix as the record date for stockholders entitled to notice of such adjourned meeting the same or an earlier date as that fixed for determination of stockholders entitled to vote at the adjourned meeting.
Annual Meetings of Shareholders	Under the CBCA, the CPRL board must call an annual meeting of shareholders not later than 15 months after holding the last preceding annual meeting but no later than six months after the end of CPRL's preceding financial year. Under the CBCA and CPRL's articles, meetings of CPRL shareholders will be held on a date and at such place in Canada or the United States as determined by the CPRL board, including but not limited to Chicago, Illinois, Minneapolis, Minnesota, Saint Paul, Minnesota and New York, New York. At an annual meeting, shareholders will receive the financial statements of CPRL and the auditor's report, elect directors of CPRL and appoint CPRL's auditor. All other business that may properly come before an annual meeting of shareholders or any business coming before a special meeting of shareholders is considered special business. For special business to be properly brought before a meeting, it must be specified in the notice of meeting and include (i) the nature of that business in sufficient detail to permit the shareholder to form a reasoned judgment thereon; and (ii) the text of any special resolution to be submitted to the meeting.	Under the DGCL, an annual meeting of stockholders is required for the election of directors and for such other proper business as may be conducted thereat. The Delaware Court of Chancery may order a corporation to hold an annual meeting if a corporation has failed to hold an annual meeting for a period of 13 months after its last annual meeting. The KCS by-laws provide that the annual meeting of stockholders will be held at the time and place determined by KCS's board of directors, and that meetings of the stockholders may be within or without the State of Delaware.
Meeting Notice Provisions	Under the CBCA, notice of the time and place of a meeting of CPRL shareholders must be given not less than 21 days and not more than 60 days before the meeting to each director, to the auditor and to each shareholder entitled to vote at the meeting.	Under the DGCL and the KCS by-laws, written notice of annual and special meetings of KCS stockholders must be given not less than 10 nor more than 60 days before the date of the meeting to each stockholder entitled to vote at such meeting as of the record date for determining the

Provision	CPRL	KCS
	Notice of a meeting of shareholders at which special business is to be transacted must state (i) the nature of that business in sufficient detail to permit the shareholder to form a reasoned judgment thereon; and (ii) the text of any special resolution to be submitted to the meeting. *Method of Giving Notices* Any notice, communication or document to be given, sent, delivered or served under the CBCA, the regulations thereunder, CPRL's articles, CPRL's by-laws or otherwise, to a shareholder, director, officer or auditor must be sufficiently given if delivered personally to the person to whom it is to be given or if delivered to the person's recorded address or if mailed to the person at the person's recorded address by prepaid ordinary or air mail or if sent to the person at the person's recorded address by any means of prepaid transmitted or recorded communication, including facsimile, or other electronic means. A notice so delivered will be deemed to have been given when it is delivered personally or to the recorded address as aforesaid; a notice so mailed will be deemed to have been given when deposited in a post office or public letter box; and a notice so sent by any means of transmitted or recorded communication will be deemed to have been given when dispatched or delivered to the appropriate communication company or agency or its representative for dispatch.	stockholders entitled to notice of the meeting. The KCS by-laws provide that notice of an annual and special meeting of stockholders must be in writing and state the purpose for which the special meeting is called.
Notice of Shareholder Nominations and Proposals	In addition to any other applicable requirements, for a nomination to be made by a Nominating Shareholder, the Nominating Shareholder must have given timely notice thereof in proper written form to the secretary of CPRL at the principal executive offices of CPRL in accordance with CPRL's by-laws. To be timely, a Nominating Shareholder's notice to the secretary of CPRL must be made: (i) in the case of an annual meeting of shareholders, not less than 30 days	Under KCS's by-laws, a KCS stockholder wishing to nominate a director for election to the KCS board must provide written notice, in proper form, within the following time periods: (i) *annual meetings*: not less than 60 nor more than 90 days prior to the anniversary of the preceding annual meeting, provided that in the event that the date of the annual meeting is more than 30 days before or more than 60 days after such anniversary, notice must be received not later than 90 days prior to the day on which the

Provision	CPRL	KCS
	prior to the date of the annual meeting of shareholders; provided, however, that in the event that the annual meeting of shareholders is to be held on a date that is less than 50 days after the date on which the first public announcement of the date of the annual meeting was made, notice by the Nominating Shareholder may be made not later than the close of business on the tenth day following the notice date; and (ii) in the case of a special meeting (which is not also an annual meeting) of shareholders called for the purpose of electing directors (whether or not called for other purposes as well), not later than the close of business on the fifteenth day following the day on which the first public announcement of the date of the special meeting of shareholders was made. To be in proper written form, a Nominating Shareholder's notice to the secretary of CPRL must set forth: (i) as to each person whom the Nominating Shareholder proposes to nominate for election as a director: (A) the name, age, business address and residential address of the person; (B) the principal occupation or employment of the person for the last five years; (C) the status of such person as a "resident Canadian" as defined in the CBCA; (D) the class or series and number of shares in the capital of CPRL which are controlled or which are owned beneficially or of record by the person as of the record date for the meeting of shareholders (if such date shall then have been made publicly available and shall have occurred) and as of the date of such notice; and (E) any other information relating to the person that would be required to be disclosed in a dissident's proxy circular in connection with	annual meeting is held and not later than the later of (i) the 60th day prior to the annual meeting or (ii) the 10th day following the day on which a notice of the date of the annual meeting was mailed or public announcement of the date of such meeting is first made by KCS, whichever occurs first; and (ii) *special meetings*: not earlier than 90 days before such special meeting and not later than the later of the 60th day prior to such special meeting or the 10th day following the day on which the date of the special meeting and the nominees to be elected is first announced. The public announcement of an adjournment or postponement of an annual meeting of stockholders will not commence a new time period for the giving of a stockholder's notice as described above. To be in proper form, the notice of nomination must include certain information about the nominating stockholder (including any beneficial owner on whose behalf the nomination is made or their affiliates, associates or others acting in concert therewith) and the nominee, including any beneficial ownership interests in KCS.

Provision	CPRL	KCS
	solicitations of proxies for election of directors in accordance with the CBCA and applicable Canadian securities laws; and (ii) as to the Nominating Shareholder giving the notice, any information relating to such Nominating Shareholder that would be required to be made in a dissident's proxy circular in connection with solicitations of proxies for election of directors in accordance with the CBCA and applicable Canadian securities laws. All information to be provided in a timely notice must be provided as of the date of such notice. If requested by CPRL, the Nominating Shareholder must update such information forthwith so that it is true and correct in all material respects as of the record date for the meeting of shareholders. Notice given to the secretary of CPRL pursuant to CPRL's by-laws may only be given by personal delivery, facsimile transmission or by email (to the secretary of CPRL), and is deemed to have been given and made only at the time it is served by personal delivery, email or sent by facsimile transmission (provided that receipt of confirmation of such transmission has been received) to the secretary at the address of the principal executive offices of CPRL; provided, that if such delivery or electronic communication is made on a day which is a not a business day or later than 5:00 p.m. (Calgary time) on a day which is a business day, then such delivery or electronic communication will be deemed to have been made on the subsequent day that is a business day. Notwithstanding the foregoing, CPRL may, in its sole discretion, waive any requirement described in this section of the table entitled "*Notice of Shareholder Nominations*" pursuant to CPRL's by-laws.	
Proxy Access	Under the CBCA, CPRL shareholders may nominate candidates for election to the	KCS's by-laws provide that eligible stockholders may submit stockholder

Provision	CPRL	KCS
	board through the shareholder proposal mechanism provided for under the CBCA (provided such shareholder either owns, as registered or beneficial holder, or has the support of shareholders who own, as registered or beneficial holders, such number of shares either equal to 1% of the outstanding voting shares of CPRL or having a fair market value of C$2,000 for a period of at least six months prior to the nomination) and provided such shareholder complies with the notice procedures in CPRL's by-laws (see the information set forth in the table above in the section entitled "*Notice of Shareholder Nominations and Proposals*").	nominees to the KCS board for inclusion in KCS's proxy materials. The number of stockholders nominees may not exceed the greater of (i) two or (ii) 20% of the number of directors in office, or, if such amount is not a whole number, the closest whole number below 20%. In order to be eligible to submit stockholder nominees, such stockholder or stockholders must have owned continuously for at least three years, as of the date that the proxy access notice is received and as of the record date for the annual meeting, a number of shares that represents 3% of the total voting power of KCS's outstanding shares of capital stock entitled to vote. The aggregate number of stockholders whose share ownership may be counted for the purposes of satisfying the ownership requirement may not exceed 20.
Calling Special Meetings of Shareholders	Under the CBCA, the CPRL board may call a special meeting of shareholders at any time. In addition, holders of 5% or more of the outstanding shares of CPRL that carry the right to vote at a meeting sought to be held may requisition a shareholders meeting. The requisition must be sent to CPRL and each of its directors and state the business to be transacted at the meeting. The CPRL board must call a meeting of shareholders to transact the business stated in the requisition within 21 days of receiving the requisition; otherwise the shareholder may call the meeting. The CPRL board is not required to call a meeting upon receiving a requisition by a shareholder if (i) the business stated in the requisition is of a proscribed nature, (ii) a record date has already been fixed and notice provided in respect of a meeting, or (iii) the CPRL board has already called a meeting and given notice of such meeting.	KCS's by-laws provide that special meetings of stockholders for any purpose or purposes may be called only by the chair of the KCS board, the KCS board, the KCS CEO, or the KCS Corporate Secretary at the written request in proper form of one or more stockholders of record who have continuously held for at least one year prior to the date such request is delivered to the KCS Corporate Secretary KCS common stock representing in the aggregate at least 15% of the outstanding shares of KCS common stock. Special meetings must be called pursuant to a resolution stating the purpose or purposes thereof, to be held at such place (within or without the State of Delaware), date and hour determined by the KCS board or its chair, as applicable, and designated in the notice thereof. At any such special meeting any business properly brought before the meeting may be transacted.
Shareholder Action by Written Consent	The CBCA allows any matters required to be voted on at a meeting of shareholders to be approved by CPRL shareholders via written resolution signed by all of the shareholders entitled to vote on the matter.	KCS's certificate of incorporation provides that no actions may be taken by waiver of written notice and consent by stockholders in lieu of meeting.
Quorum of Shareholders	A quorum for the transaction of business at any meeting of shareholders must be at	KCS's by-laws provide that the holders of a majority of the aggregate voting power of

Provision	CPRL	KCS
	least two persons present in person, each being a shareholder entitled to vote thereat or a duly appointed proxyholder for or representative of such a shareholder and together holding or representing in the aggregate not less than 25% of the outstanding shares of CPRL entitled to be voted at the meeting.	the capital stock issued and outstanding and entitled to vote, present in person or represented by proxy, will constitute a quorum for the transaction of business at all meetings of the stockholders, except as otherwise required by the DGCL, KCS's certificate of incorporation or by-laws. Where a separate vote by a class or series or classes or series is required, a majority of the outstanding shares of such class or series or classes or series, present in person or represented by proxy, will constitute a quorum (as to such class or series) entitled to take action with respect to that vote on that matter, except as otherwise provided by law, KCS's certificate of incorporation or by-laws. Abstentions and non-votes by brokers are counted as present for purposes of determining a quorum.
Adjournment of Shareholder Meetings	Under the CBCA, the shareholders may adjourn the meeting if a quorum is not present at the opening of the meeting. If a meeting of the CPRL shareholders is adjourned for less than 30 days it will not be necessary to give notice of the adjourned meeting, other than by announcement at the meeting that it is adjourned. If a meeting of CPRL shareholders is adjourned by one or more adjournments for an aggregate of 30 days or more, notice of the adjourned meeting will be given as for an original meeting, in accordance with the provisions of the CBCA.	KCS's by-laws provide that if a quorum is not present or represented at any meeting of the stockholders, then either (i) the chair of the meeting, or (ii) the holders of a majority of the shares entitled to vote at the meeting, present in person or represented by proxy, will have power to adjourn the meeting from time to time, without notice other than announcement at the meeting, until a quorum is present or represented. At such adjourned meeting at which a quorum is present or represented, any business may be transacted that might have been transacted at the meeting as originally noticed. When a meeting is adjourned to another time and/or place, unless KCS's by-laws otherwise require, notice need not be given of the adjourned meeting if the time and place thereof are announced at the meeting at which the adjournment is taken. At the adjourned meeting, KCS may transact any business which might have been transacted at the original meeting. If the adjournment is for more than 30 days or a new record date for stockholders entitled to vote is fixed for the adjourned meeting, a notice of the adjourned meeting shall be given to each stockholder of record entitled to vote at the meeting.

Provision	CPRL	KCS
Amendments to Articles or Certificate of Incorporation	Under the CBCA, an amendment to CPRL's articles requires approval by special resolution, being a majority of not less than two-thirds of the votes cast, in person or by proxy, in respect of the resolution at a meeting of CPRL shareholders, including, if applicable, a separate special resolution of the holders of any separately affected class of shares in accordance with the provisions of the CBCA.	Any proposal to amend, alter, change or repeal any provision of KCS's certificate of incorporation, requires approval by the affirmative vote of both a majority of the members of the KCS board then in office and a majority vote of the voting power of all of the shares of KCS's capital stock entitled to vote generally in the election of directors, voting together as a single class. However, any proposal to amend, alter, change or repeal the provisions of KCS's certificate of incorporation that would amend, alter, change or repeal any of the powers, preferences or rights vested in the holders of KCS preferred stock requires approval by the affirmative vote of two-thirds of the voting power of all of the shares of KCS's preferred stock, voting together as a single class, in addition to any other vote or approval required by statute.
Amendments to By-laws	The CPRL board may, by resolution, make, amend or repeal any by-law that regulates the business or affairs of CPRL. Where the directors make, amend or repeal a by-law, they are required under the CBCA to submit the by-law, or the amendment or repeal of a by-law, to the CPRL shareholders at the next meeting of shareholders and the shareholders may confirm, reject or amend the by-law, by an ordinary resolution. If the by-law, amendment or repeal is rejected by the shareholders, or the directors do not submit the by-law, amendment or repeal to the shareholders as required, the by-law, amendment or repeal ceases to be effective and no subsequent resolution of the directors to make, amend or repeal a by-law having substantially the same purpose or effect is effective until it is confirmed or confirmed as amended by the shareholders.	The KCS by-laws may be amended, or new by-laws may be adopted, by the KCS board at any regular or special meeting of the KCS board, if such amendment or adoption is approved by a majority of the entire KCS board.
Rights of Inspection	Under the CBCA, CPRL shareholders and creditors of CPRL and their personal representatives may examine: (i) CPRL's articles and CPRL's by-laws, and all amendments thereto, and a copy of any unanimous shareholder agreement; (ii) minutes of meetings and resolutions of	Under Section 220 of the DGCL, a stockholder or its agent has a right to inspect KCS's stock ledger, a list of all of its stockholders and its other books and records during the usual hours of business upon written demand stating his purpose (which must be reasonably related to such

Provision	CPRL	KCS
	CPRL shareholders; (iii) copies of all notices of directors or notices of change of directors; and (iv) CPRL's securities register, during the usual business hours of CPRL, and may take extracts from the records, free of charge, and any other person may do so on payment of a reasonable fee.	person's interest as a stockholder). If KCS refuses to permit such inspection or refuses to reply to the request within five business days of the demand, the stockholder may apply to the Delaware Court of Chancery for an order to compel such inspection.
Shareholder Suits	*Derivative Action*: Under the CBCA, a "complainant" (as such term is defined in this table under "*Oppression Remedy*" below) may apply to a court for leave to bring a derivative action in the name and on behalf of CPRL or any of its subsidiaries, or to intervene in an existing action to which CPRL or any of its subsidiaries, for the purpose of prosecuting, defending or discontinuing the action on behalf of CPRL or its subsidiary. However, under the CBCA, no action may be brought and no intervention in an action may be made unless a court is satisfied that: (i) the complainant has given notice to the board of directors of CPRL or its subsidiary of the complainant's intention to apply to the court for such leave not less than 14 days before bringing the application if the board of directors of CPRL or its subsidiary do not bring, diligently prosecute or defend or discontinue the action; (ii) the complainant is acting in good faith; and (iii) it appears to be in the interests of CPRL or its subsidiary that the action be brought, prosecuted, defended or discontinued. Under the CBCA, the court in a derivative action may make any order it determines to be appropriate, including, without limitation, an order authorizing the complainant or any other person to control the conduct of the action, an order giving directions for the conduct of the action, an order directing that any amount determined to be payable by a defendant in the action will be paid, in whole or in part, directly to former and present security holders of CPRL or its subsidiary instead of to CPRL or its subsidiary and an order requiring CPRL or its subsidiary to pay reasonable legal fees incurred by the complainant in	Generally, KCS is subject to potential liability under the federal securities laws and under Delaware law. Under the DGCL, a stockholder may bring a derivative action on behalf of the corporation to enforce the rights of the corporation. Generally, a person may institute and maintain such a suit only if such person was a stockholder at the time of the transaction that is the subject of the suit or his or her shares thereafter devolved upon him or her by operation of law. The DGCL also requires that the derivative plaintiff make a demand on the directors of the corporation to assert the corporate claim before the suit may be prosecuted by the derivative plaintiff, unless such demand would be futile. In certain circumstances, class action lawsuits are available to stockholders. The DGCL does not provide for a remedy similar to the oppression remedy under the CBCA; however, stockholders are entitled to remedies for violation of a director's fiduciary duties under Delaware common law.

Provision	CPRL	KCS
	connection with the action. A complainant is not required to give security for costs in a derivative action. *Oppression Remedy*: The CBCA provides an oppression remedy that enables a court to make any order, including, without limitation, an order: (i) restraining the conduct complained of; (ii) appointing a receiver or receiver-manager; (iii) to regulate CPRL's affairs by amending CPRL's articles or CPRL's by-laws or creating or amending a unanimous shareholder agreement; (iv) directing an issue or exchange of securities; (v) appointing directors in place of or in addition to all or any of the directors then in office; (vi) directing CPRL or any other person, to purchase securities of a security holder; (vii) directing CPRL or any other person, to pay a security holder any part of the monies that the security holder paid for securities; (viii) varying or setting aside a transaction or contract to which CPRL is a party and compensating CPRL or any other party to the transaction or contract; (ix) requiring CPRL, within a time specified by the court, to produce to the court or an interested person financial statements in the required form or an accounting in such other form as the court may determine; (x) compensating an aggrieved person; (xi) directing rectification of the registers or other records of CPRL; (xii) liquidating and dissolving CPRL; (xiii) directing an investigation under the CBCA to be made; and	

Provision	CPRL	KCS
	(xiv) requiring the trial of any issue. An application under the oppression remedy may be made by a "complainant," which means: (i) a registered holder or beneficial owner, and a former registered holder or former beneficial owner, of a security of CPRL or any of its affiliates; (ii) a director or an officer or a former director or former officer of CPRL or any of its affiliates; (iii) the director appointed under the CBCA; or (iv) any other person who, in the discretion of a court, is a proper person to make such an application.	
Enforcement of Civil Liabilities Against Foreign Persons	A judgment for the payment of money rendered by a federal or provincial court in Canada based on civil liability would generally be enforceable elsewhere in Canada. A judgment for the payment of money rendered by a court in the United States based on civil liability would not be automatically enforceable in federal or provincial courts of Canada. The party seeking enforcement would first have to commence proceedings at the appropriate level of court in the Canadian jurisdiction in which enforcement is sought and obtain an order from that court for the recognition and enforcement of the judgment. The following requirements must generally be met before the foreign monetary judgment will be recognized and enforceable in a Canadian court: (i) the foreign court must have properly asserted jurisdiction; (ii) the judgment must not have been obtained by fraud or in a manner contrary to natural justice; (iii) the judgment must be final and conclusive; and	A judgment for the payment of money rendered by a court in the U.S. federal court or any state court based on civil liability generally would be enforceable elsewhere in the U.S.

Provision	CPRL	KCS
	(iv) the judgment is not for a penalty, taxes or enforcement of a foreign public law, or otherwise contrary to Canadian public policy.	
Limitation of Personal Liability of Directors and Officers	Under the CBCA, no provision in a contract, CPRL's articles, CPRL's by-laws or a resolution of CPRL's board of directors or shareholders relieves a director or officer of CPRL from the duty to act in accordance with the CBCA or the regulations thereunder or relieves them from liability for a breach thereof. No director or officer will be liable for the acts, receipts, neglects or defaults of any other director, officer, employee or agent, or for joining in any receipt or act for conformity, or for any loss, damage or expense happening to CPRL through the insufficiency or deficiency of title to any property acquired by, for or on behalf of CPRL, or for the insufficiency or deficiency of any security in or upon which any of the moneys of CPRL are placed out or invested, or for any loss or damage arising from the bankruptcy, insolvency or tortuous act of any person with whom any moneys, securities or effects are lodged or deposited, or for any loss, conversion, misapplication or misappropriation of or any damage resulting from any dealings with any moneys, securities or other assets belonging to CPRL, or for any other loss, damage or misfortune whatever which may happen in the execution of the duties of the director's or officer's respective office or trust or in relation thereto unless the same happens by or through the director's or officer's failure to act honestly and in good faith with a view to the best interests of CPRL and to exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances.	KCS's certificate of incorporation provides that, to the fullest extent permitted by the DGCL, a director of KCS will not be personally liable to KCS or its stockholders for monetary damages for breach of fiduciary duty as a director.
Indemnification of Directors and Officers	Under the CBCA, CPRL may indemnify its directors and officers, its former directors and officers or another individual who acts or acted at CPRL's request as a director or officer, or an individual acting in a similar capacity, of another entity (an	Section 145 of the DGCL provides that a corporation may indemnify directors and officers as well as other employees and individuals against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement in connection

Provision	CPRL	KCS
	"indemnifiable person") against all costs, charges and expenses, including an amount paid to settle an action or satisfy a judgment, reasonably incurred by the indemnifiable person in respect of any civil, criminal, administrative, investigative or other proceeding in which the indemnifiable person is involved because of that association with CPRL or other entity, provided that: (i) the indemnifiable person acted honestly and in good faith with a view to the best interests of CPRL, or, as the case may be, to the best interests of the other entity for which the individual acted as director or officer or in a similar capacity at CPRL's request; and (ii) in the case of a criminal or administrative action or proceeding that is enforced by a monetary penalty, the indemnifiable person had reasonable grounds for believing that the indemnifiable person's conduct was lawful. CPRL may advance funds to an indemnifiable person for the costs, charges and expenses of a proceeding referred to above; provided, however, that the indemnifiable person will repay the funds if the individual does not fulfill the above-mentioned conditions. An indemnifiable person is also entitled to indemnity from CPRL in respect of all costs, charges and expenses reasonably incurred by the indemnifiable person in connection with the defense of any civil, criminal, administrative, investigative or other proceeding to which the indemnifiable person is subject because of the indemnifiable person's association with CPRL or other entity, if the indemnifiable person: (i) was not judged by the court or other competent authority to have committed any fault or omitted to do	with any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, in which such person is made a party by reason of the fact that the person is or was a director, officer, employee or agent of the corporation (other than a derivative action), if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the corporation and, with respect to any criminal action or proceeding, had no reasonable cause to believe such person's conduct was unlawful. A similar standard is applicable in the case of derivative actions, except that indemnification only extends to expenses (including attorneys' fees) incurred in connection with the defense or settlement of such action, and the statute requires court approval before there can be any indemnification where the person seeking indemnification has been found liable to the corporation. The statute provides that it is not exclusive of other indemnification that may be granted by KCS's by-laws, disinterested director vote, stockholder vote, agreement or otherwise. The KCS by-laws provide that, to the full extent provided under Section 145 of the DGCL, KCS will indemnify each person who at any time is, or will have been, a director, officer or employee of KCS, and is threatened to be or is made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that they are, or were, a director, officer or employee of KCS, or served at the request of KCS as a director, officer, employee or trustee of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred in connection with any such action, suit or proceeding.

Provision	CPRL	KCS
	anything that the indemnifiable person ought to have done; and (ii) fulfills the conditions first set out above. In the case of a derivative action, indemnity may be made only with court approval, if the indemnifiable person fulfills the requirements first mentioned above. In addition, CPRL may, under the CBCA, purchase and maintain insurance for the benefit of an indemnifiable person against such liabilities and in such amounts as the CPRL board may from time to time determine and are permitted by the CBCA. CPRL must indemnify a director or officer of CPRL, a former director or officer of CPRL or a person who acts or acted at CPRL's request as a director or officer of a body corporate of which CPRL is or was a shareholder or creditor, and the heirs and legal representatives thereof, to the extent permitted by the CBCA or otherwise by law.	
Appraisal/Dissent Rights	The CBCA provides that CPRL shareholders are entitled to exercise dissent rights and to be paid the fair value of their shares as determined in accordance with the provisions of the CBCA by following the dissent procedures set out therein, if CPRL: (i) is subject to an order in respect of an "arrangement" (as such term is defined in the CBCA) in accordance with the provisions of the CBCA; (ii) resolves to amend its articles to add, change or remove any provisions restricting or constraining the issue, transfer or ownership of shares of that class; (iii) resolves to amend its articles to add, change or remove any restriction on the business or businesses that CPRL may carry on; (iv) resolves to amalgamate, other than an amalgamation with a parent or a	Under the DGCL, a stockholder may dissent from, and receive payments in cash for, the fair value of his or her shares as appraised by the Delaware Court of Chancery in the event of certain mergers and consolidations. However, stockholders do not have appraisal rights if the shares of stock they hold, at the record date for determination of stockholders entitled to vote at the meeting of stockholders to act upon the merger or consolidation, or on the record date with respect to action by written consent, are either (i) listed on a national securities exchange or (ii) held of record by more than 2,000 holders. Further, no appraisal rights are available to stockholders of the surviving corporation if the merger did not require the vote of the stockholders of the surviving corporation. Notwithstanding the foregoing, appraisal rights are available if stockholders are required by the terms of the merger agreement to accept for their shares

Provision	CPRL	KCS
	subsidiary or an amalgamation with a sister corporation, in each case in accordance with the provisions of the CBCA; (v) resolves to be continued under the laws of another jurisdiction; (vi) resolves to sell, lease or exchange all or substantially all its property other than in the ordinary course of business; or (vii) resolves to carry out a going-private transaction or a squeeze-out transaction (as such terms are defined in the CBCA). A shareholder is not entitled to dissent if an amendment to CPRL's articles is effected by a court order approving a reorganization (as defined in the CBCA) or by a court order made in connection with an action for an oppression remedy. CPRL shareholders are not entitled to dissent or appraisal rights under the CBCA in connection with the transactions contemplated by the merger agreement.	anything other than (a) shares of stock of the surviving corporation, (b) shares of stock of another corporation that will either be listed on a national securities exchange or held of record by more than 2,000 holders, (c) cash instead of fractional shares or (d) any combination of clauses (a)—(c). Appraisal rights are also available under the DGCL in certain other circumstances, including in certain parent-subsidiary corporation mergers and in certain circumstances where the certificate of incorporation so provides. The KCS certificate of incorporation does not provide for appraisal rights in any additional circumstance.
Approval of Extraordinary Transactions; Anti-Takeover Provisions	Under the CBCA, a merger, consolidation, sale, lease, exchange or other disposition of all or substantially all of the property of CPRL other than in the ordinary course of business of CPRL, including an amalgamation (other than an amalgamation with a parent or a subsidiary or an amalgamation with a sister corporation in accordance with the provisions of the CBCA) and an arrangement (as defined in the CBCA), or a dissolution of CPRL, is generally required to be approved by special resolution, being a majority of not less than two-thirds of the votes cast, in person or by proxy, in respect of the resolution at a meeting of CPRL shareholders. Additionally, Multilateral Instrument 61-101—*Protection of Minority Security Holders in Special Transactions* (which we refer to as "MI 61-101") of the Canadian Securities Administrators contains detailed	A sale, lease or exchange of all or substantially all of a corporation's assets, a merger or consolidation of a corporation with another corporation or a dissolution of a corporation generally requires the approval of the corporation's board of directors and, with limited exceptions, the affirmative vote of at least a majority of the shares of KCS voting stock outstanding as of the record date and entitled to vote. KCS is subject to the provisions of Section 203 of the DGCL. In general, Section 203 prohibits a publicly held Delaware corporation from engaging in a business combination with any interested stockholder for a three-year period following the time that such stockholder becomes an interested stockholder, unless the board of directors approves the business combination or the transaction by which such stockholder becomes an interested stockholder, in either case, before the

Provision	CPRL	KCS
	requirements in connection with, among other transactions, "related party transactions" and "business combinations." A related party transaction means, generally, any transaction by which an issuer, directly or indirectly, consummates one or more specified transactions with a related party, including purchasing or disposing of an asset, issuing securities or assuming liabilities. "Related party," as defined in MI 61-101, includes (i) directors and senior officers of the issuer, (ii) holders of voting securities of the issuer carrying more than 10% of the voting rights attached to all the issuer's outstanding voting securities and (iii) holders of a sufficient number of any securities of the issuer to materially affect control of the issuer. A "business combination" means, generally, any amalgamation, arrangement, consolidation, amendment to share terms or other transaction, as a consequence of which the interest of a holder of an equity security may be terminated without the holder's consent. MI 61-101 requires, subject to certain exceptions, specific detailed disclosure in the proxy (information) circular sent to security holders in connection with a related party transaction or business combination where a meeting is required and, subject to certain exceptions, the preparation of a formal valuation of the subject matter of the related party transaction or business combination and any non-cash consideration offered in connection therewith, and the inclusion of a summary of the valuation in the proxy circular. MI 61-101 also requires, subject to certain exceptions, that an issuer not engage in a related party transaction or business combination unless, in addition to any other required shareholder approvals, the disinterested shareholders of the issuer have approved the related party transaction or business combination by a simple majority of the votes cast.	stockholder becomes an interested stockholder, the interested stockholder acquires 85% of the corporation's outstanding voting stock in the transaction by which such stockholder becomes an interested stockholder, or the business combination is subsequently approved by the board of directors and authorized at a meeting of stockholders by the affirmative vote of the holders of at least two-thirds of the corporation's outstanding voting stock not owned by the interested stockholder.
Compulsory Acquisitions	The CBCA provides that if an offer is made to shareholders of a distributing	Not applicable.

Provision	CPRL	KCS
	corporation (as defined in the CBCA), such as CPRL, at approximately the same time to acquire all of the shares of a class of issued shares, including an offer made by a distributing corporation to repurchase all of the shares of a class of its shares (which we refer to as a "takeover bid") and such offer is accepted within 120 days of the takeover bid by holders of not less than 90% of the shares (other than the shares held by the offeror or an affiliate or associate of the offeror) of any class of shares to which the takeover bid relates, then the offeror is entitled to acquire the shares held by those holders of securities of that class who did not accept the takeover bid either on the same terms on which the offeror acquired shares under the takeover bid or for payment of the fair value of such holder's shares as determined in accordance with the dissent right procedures under the CBCA.	
Rights Upon Liquidation	Under the CBCA, CPRL may liquidate and dissolve by special resolution of the holders of each class of CPRL shares, whether or not such CPRL shareholders are otherwise entitled to vote. In the event of the liquidation, dissolution, or winding up of CPRL or other distribution of assets of CPRL among its shareholders for the purpose of winding up its affairs, the holders of CPRL common shares are, subject to the rights of the holders of any other class of shares of CPRL entitled to receive the assets of CPRL upon such a distribution in priority to or rateably with the holders of CPRL common shares, entitled to participate rateably in any distribution of the assets of CPRL. With respect to any distribution of assets of CPRL in the event of any liquidation, dissolution or winding up of CPRL or the other distribution of the assets of CPRL among its shareholders for the purpose of winding up its affairs, the First Preferred Shares are entitled to priority over both the Second Preferred Shares and the CPRL	KCS's certificate of incorporation provides: (i) In case of liquidation or dissolution of KCS, the holders of KCS preferred stock will be entitled to receive payment in the amount of the par value thereof before any payment or liquidation is made upon new series preferred stock or the common stock, and will not thereafter participate further in the property of KCS or the proceeds of the sale thereof. (ii) In the event of any liquidation, dissolution or winding up of KCS, whether voluntary or involuntary, each series of new series preferred stock will be subordinate to the KCS preferred stock but will have preference and priority over the common stock for payment of the amount to which such series of new series preferred stock will be entitled in accordance with the provision thereof and each holder of new series preferred stock will be entitled to be paid in full his shares of such amount, or have a sum sufficient for the payment in full set aside, after the holders of KCS preferred stock have received payment of the amounts to which they are entitled upon

Provision	CPRL	KCS
	common shares and over any other shares ranking junior to the First Preferred Shares, and the Second Preferred Shares are entitled to priority over the holders of the CPRL common shares and over any other shares ranking junior to the Second Preferred Shares.	liquidation or dissolution or winding up of KCS, but before any payments will be made to the holders of the common stock. If, upon liquidation, dissolution or winding up of KCS, the assets of KCS or proceeds thereof, distributable among the holders of the shares of all series of new series preferred stock are insufficient to pay in full the preferential amount aforesaid, then such assets, or the proceeds thereof, will be distributed among such holders ratably in accordance with the respective amounts which would be payable if all amounts payable thereon were paid in full. (iii) After the payment to the holders of KCS preferred stock and new series preferred stock of all such amounts to which they are entitled, as above provided, the remaining assets and funds of KCS will be divided and paid to the holders of common stock.

LEGAL MATTERS

Bennett Jones LLP, Canadian counsel to CPRL, has opined upon the validity of the CPRL common shares offered by this proxy statement/prospectus.

EXPERTS

CPRL

The financial statements and related financial statement schedule, incorporated into this proxy statement/prospectus by reference from CPRL's Annual Report on Form 10-K for the year ended December 31, 2020, and the effectiveness of CPRL's internal control over financial reporting have been audited by Deloitte LLP, an independent registered public accounting firm, as stated in their reports, which are incorporated herein by reference. Such financial statements and financial statement schedule have been so incorporated in reliance upon the reports of such firm given upon their authority as experts in accounting and auditing.

KCS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated into this proxy statement/prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2020, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

ENFORCEABILITY OF CIVIL LIABILITIES

CPRL is organized under the laws of Canada. A substantial portion of CPRL's assets are located outside the U.S., and many of CPRL's directors and officers and some of the experts named in this proxy statement/prospectus are residents of jurisdictions outside of the U.S. As a result, it may be difficult for investors to effect service within the U.S. upon CPRL and those directors, officers and experts, or to realize in the U.S. upon judgments of courts of the U.S. predicated upon civil liability of CPRL and such directors, officers or experts under U.S. federal securities laws. There is uncertainty as to the enforceability in Canada by a court in original actions, or in actions to enforce judgments of U.S. courts, of the civil liabilities predicated upon U.S. federal securities laws.

OTHER MATTERS

As of the date of this proxy statement/prospectus, the KCS board knows of no matters that will be presented for consideration at the KCS special meeting other than as described in this proxy statement/prospectus. If any other matters properly come before KCS stockholders at the KCS special meeting, or any adjournment or postponement thereof, and are voted upon, the enclosed proxy will be deemed to confer discretionary authority on the individuals that it names as proxies to vote the shares represented by the proxy as to any of these matters. The individuals named as proxies intend to vote in accordance with the recommendation of the KCS board.

FUTURE SHAREHOLDER PROPOSALS

KCS

The transaction is expected to be completed in the first quarter of 2022. Until the transaction is completed, KCS's stockholders will continue to be entitled to attend and participate in KCS stockholder meetings, including the annual meeting, if any. If the transaction is completed, KCS will have no public stockholders and there will be no public participation in any future meetings of the stockholders of KCS. However, if the transaction is not completed, KCS stockholders will continue to be entitled to attend and participate in KCS stockholder meetings.

The KCS by-laws set forth the advance notice requirements that stockholders must follow in order to either make a director nomination or bring any other business at any annual or special meeting of the KCS stockholders, and explicitly provide that the procedure provided in the KCS by-laws is the exclusive means for a stockholder to make such nominations or proposals (other than proposals submitted for inclusion in the proxy statement governed by Rule 14a-8 of the Exchange Act). The KCS by-laws provide that to be properly brought before a meeting, a proposal must be brought (i) pursuant to KCS's proxy materials with respect to such meeting, (ii) by or at the direction of the KCS board or (iii) by a KCS stockholder who (A) was a stockholder of record both at the time of giving notice for the meeting and at the time of the meeting and is entitled to vote at the meeting and (B) has timely complied in proper written form with the procedures set forth in the KCS by-laws. In addition, the KCS by-laws (x) expand the required disclosure regarding KCS stockholders making proposals or nominations to include, among other things, disclosure of all ownership interests, class and number of shares owned, hedges, derivative and/or short positions, hedging or other transactions, profit interests, options, any voting or dividend rights with respect to any shares of securities of KCS, any material interests of such stockholder (and beneficial owner, if any) in the nomination or proposal, and any other information that would be required in a solicitation of proxies for the nomination or proposal, and (y) require a KCS stockholder nominating a person for election as a director to include in the advance notice certain biographical information about each such nominee, a fully completed director's questionnaire on the form supplied by KCS, a written representation of such nominee as to any voting commitments or related transactions, and an agreement by such nominee to comply with KCS's corporate governance, conflict of interest, confidentiality and stock ownership and trading policies and guidelines.

A KCS stockholder (or a group of up to 20 KCS stockholders) owning at least 3% of aggregate voting power of the KCS voting stock continuously for at least three years and complying with the other requirements in KCS's by-laws may nominate and include in KCS's proxy materials director nominees constituting up to 20% of the KCS board or two persons, whichever is greater. Written notice of a proxy access nomination for inclusion in KCS's proxy materials for KCS's 2022 Annual Meeting of Stockholders must have been received by KCS, Attention: Corporate Secretary, at its principal executive office not earlier than the close of business on November 10, 2021 and no later than the close of business on December 10, 2021. The nominating stockholder or group of stockholders also must deliver the information required by KCS's by-laws, and each nominee must meet the qualifications required by KCS's by-laws.

KCS stockholders who intend to present a proposal or nominate candidates for election to the KCS board at KCS's 2022 Annual Meeting of Stockholders, without including such proposal in KCS's proxy statement, must provide KCS's Corporate Secretary with written notice of such proposal not earlier than the close of business on February 19, 2022 and not later than the open of business on March 21, 2022; provided, however, that if an annual meeting is to be held more than 30 days before, or more than 60 days after May 20, 2022, notice by the stockholder to be timely must be delivered not earlier than the 90th day prior to the annual meeting and not later than the later of (i) the 60th day prior to such annual meeting or (ii) the tenth day following the day on which public announcement of the date of the annual meeting was first made.

HOUSEHOLDING OF PROXY MATERIALS

The SEC has adopted rules that permit companies and intermediaries such as brokers to satisfy delivery requirements for proxy statements with respect to two or more stockholders sharing the same address by delivering a single proxy statement addressed to those stockholders. This process, which is commonly referred to as "householding," potentially provides extra convenience for stockholders and cost savings for companies. KCS and some brokers "household" proxy materials, delivering a single proxy statement to multiple stockholders sharing an address unless contrary instructions have been received from the affected stockholders. Once you have received notice from your broker or KCS that they or KCS will be householding materials to your address, householding will continue until you are notified otherwise or until you revoke your consent. If, at any time, you no longer wish to participate in householding and would prefer to receive a separate proxy statement, or if you are receiving multiple copies of the proxy statement and wish to receive only one, please notify your broker if your shares are held in a brokerage account, or KCS if you hold shares directly in your name. Written requests should be made to Kansas City Southern, 427 West 12th Street, Kansas City, Missouri 64105, Attention: Corporate Secretary, and oral requests should be made by calling KCS's Corporate Secretary's Office at 1-888-800-3690.

WHERE YOU CAN FIND ADDITIONAL INFORMATION

KCS files annual, quarterly and current reports, proxy statements and other information with the SEC. CPRL files or furnishes annual reports, current reports and other information with the SEC under the U.S. Exchange Act. As CPRL is a "foreign private issuer," under the rules adopted under the U.S. Exchange Act it is exempt from certain of the requirements of the U.S. Exchange Act, including the proxy and information provisions of Section 14 of the U.S. Exchange Act and the reporting and liability provisions applicable to officers, directors and significant stockholders under Section 16 of the U.S. Exchange Act.

You may read and copy these reports, statements or other information filed by KCS or CPRL at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Call the SEC at 1-800-SEC-0330 for further information on the public reference room. You may also obtain copies of this information by mail from the Public Reference Section of the SEC, 100 F Street, N.E., Washington, D.C. 20549, at prescribed rates, from commercial document retrieval services, and at the website maintained by the SEC at www.sec.gov. The information contained on the SEC's website is not incorporated by reference into this proxy statement/prospectus.

You may also access the SEC filings and obtain other information about KCS and CPRL through the websites maintained by KCS and CPRL at www.investors.kcsouthern.com and investor.cpr.ca, respectively. The information contained in those websites is not incorporated by reference into, or in any way part of, this proxy statement/prospectus. You should not rely on such information in deciding whether to approve the KCS merger proposal unless such information is in this proxy statement/prospectus or has been incorporated by reference into this proxy statement/prospectus.

CPRL files reports, statements and other information with the applicable Canadian securities regulatory authorities. CPRL's filings are electronically available to the public from SEDAR at www.sedar.com. The information contained on SEDAR is not incorporated by reference into this proxy statement/prospectus.

Incorporation of Certain Documents by Reference

The SEC allows KCS and CPRL to "incorporate by reference" information into this proxy statement/prospectus. This means that KCS and CPRL can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is considered to be a part of this proxy statement/prospectus, except for any information that is superseded by information that is included directly in this proxy statement/prospectus or incorporated by reference subsequent to the date of this proxy statement/prospectus.

This proxy statement/prospectus incorporates by reference the documents listed below that KCS and CPRL have previously filed with the SEC. They contain important information about the companies and their financial condition. The following documents, which were filed by the companies with the SEC, are incorporated by reference into this proxy statement/prospectus (other than, in each case, documents or information deemed to have been furnished and not filed in accordance with SEC rules):

CPRL Filings with the SEC (File No. 001-01342)	**Period and/or Filing Date**
Annual Report on Form 10-K	Year ended December 31, 2020
Annual Report on Form 10-K/A	Year ended December 31, 2020
Quarterly Report on Form 10-Q	Quarterly period ended March 31, 2021, and June 30, 2021
Current Report on Form 8-K	Filed January 11, 2021, January 26, 2021, January 27, 2021, February 1, 2021, February 2, 2021, February 10, 2021, February 10, 2021, February 18, 2021,

CPRL Filings with the SEC (File No. 001-01342)	Period and/or Filing Date

KCS Filings with the SEC (File No. 001-04717)	Period and/or Filing Date
Annual Report on Form 10-K	Year ended December 31, 2020
Quarterly Reports on Form 10-Q	Quarterly period ended March 31, 2021, and June 30, 2021
Definitive proxy statement on Form DEF 14A	Filed April 9, 2021
Current Reports on Form 8-K	Filed January 22, 2021, March 2, 2021, March 16, 2021, March 22, 2021, March 30, 2021, April 16, 2021, April 21, 2021, May 21, 2021, May 25, 2021, June 11, 2021, July 16, 2021, August 9, 2021 and September 15, 2021.

* Other than the portions of those documents not deemed to be filed.

All documents filed by KCS and CPRL under Section 13(a), 13(c), 14 or 15(d) of the U.S. Exchange Act from the date of this proxy statement/prospectus to the completion of the offering will also be deemed to be incorporated into this proxy statement/prospectus by reference other than the portions of those documents not deemed to be filed. These documents include periodic reports, such as Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K (excluding any information furnished pursuant to Item 2.02 or Item 7.01 of any current report on Form 8-K under the U.S. Exchange Act), and proxy statements.

In addition, the description of CPRL common shares contained in CPRL's registration statements under Section 12 of the U.S. Exchange Act is incorporated by reference.

KCS and CPRL also incorporate by reference the merger agreement attached to this proxy statement/prospectus as Annex A.

CPRL has supplied all information contained into this proxy statement/prospectus relating to CPRL, and KCS has supplied all information contained in or incorporated by reference into this proxy statement/prospectus relating to KCS.

Any statement contained in a document incorporated or deemed to be incorporated by reference herein will be deemed to be modified or superseded for purposes of this proxy statement/prospectus to the extent that a statement contained herein or in any other subsequently filed document which also is or is deemed to be incorporated by reference herein modifies or supersedes such statement. Any such statement so modified or superseded will not be deemed, except as so modified or superseded, to constitute a part of this proxy statement/prospectus.

You may also obtain copies of any document incorporated in this proxy statement/prospectus, without charge, by requesting them in writing or by telephone from the appropriate company at the addresses below, or from the

SEC through the SEC's website at www.sec.gov. KCS stockholders and CPRL shareholders may request a copy of such documents by contacting:

Kansas City Southern
427 West 12th Street
Kansas City, Missouri 64105
Attention: Corporate Secretary
Telephone: 1-888-800-3690

Canadian Pacific Railway Limited
7550 Ogden Dale Road S.E.
Calgary, Alberta, T2C 4X9
Attention: Office of the Corporate Secretary
Telephone: 1-403-319-7000

In addition, you may obtain copies of any document incorporated into this proxy statement/prospectus, without charge, by visiting the websites maintained by KCS and CPRL at www.investors.kcsouthern.com and investor.cpr.ca, respectively.

If you would like to request documents, please do so by [—], 2021, to receive them before the KCS special meeting. If you request any incorporated documents from us, we will mail them to you by first class mail, or another equally prompt means, within one business day after we receive your request.

KCS and CPRL have not authorized anyone to give any information or make any representation about the transaction, the KCS special meeting or KCS and CPRL that is different from, or in addition to, that contained in this proxy statement/prospectus or in any of the materials that KCS and CPRL have incorporated into this proxy statement/prospectus by reference. Therefore, if anyone does give you information of this sort, you should not rely on it. The information contained in this proxy statement/prospectus is accurate only as of the date of this proxy statement/prospectus unless the information specifically indicates that another date applies, and neither the mailing of this proxy statement/prospectus to stockholders nor the issuance of CPRL common shares in the transaction should create any implication to the contrary.

AGREEMENT AND PLAN OF MERGER, dated as of September 15, 2021 (this "Agreement"), by and among Canadian Pacific Railway Limited, a Canadian corporation ("Parent"), Cygnus Merger Sub 1 Corporation, a Delaware corporation and a direct wholly owned subsidiary of Parent ("Surviving Merger Sub"), Cygnus Merger Sub 2 Corporation, a Delaware corporation and a direct wholly owned subsidiary of Surviving Merger Sub ("First Merger Sub" and, together with Surviving Merger Sub, "Merger Subs") and Kansas City Southern, a Delaware corporation (the "Company").

W I T N E S S E T H:

WHEREAS, Parent desires to acquire the Company on the terms and subject to the conditions set forth in this Agreement;

WHEREAS, in furtherance of such acquisition, and on the terms and subject to the conditions set forth in this Agreement and in accordance with the General Corporation Law of the State of Delaware (the "DGCL"), (a) First Merger Sub shall be merged with and into the Company (the "First Merger"), with the Company surviving the First Merger as a direct wholly owned Subsidiary of Surviving Merger Sub, and (b) immediately following the First Merger, the Company shall be merged with and into Surviving Merger Sub (the "Second Merger" and, together with the First Merger, the "Mergers"), with Surviving Merger Sub surviving the Second Merger as a direct, wholly owned subsidiary of Parent;

WHEREAS, the board of directors of the Company (the "Company Board") has unanimously (a) determined that it is in the best interests of the Company and its stockholders, and declared it advisable, to enter into this Agreement, (b) approved the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated hereby, including the Mergers, and (c) resolved to recommend that the stockholders of the Company adopt this Agreement and directed that such matter be submitted for consideration of the stockholders of the Company at the Company Stockholder Meeting;

WHEREAS, the board of directors of Parent (the "Parent Board") has unanimously (a) determined that it is in the best interests of Parent to enter into this Agreement, (b) approved and declared advisable the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated hereby, including the Mergers and the Debt Financing, and (c) resolved to recommend that the shareholders of Parent approve the issuance of Parent Common Shares in connection with the First Merger (the "Parent Share Issuance") and directed that such matter be submitted for consideration of the shareholders of Parent at the Parent Shareholder Meeting;

WHEREAS, the board of directors of Surviving Merger Sub has unanimously (a) determined that it is in the best interests of Surviving Merger Sub and its sole stockholder, and declared it advisable, to enter into this Agreement, (b) approved the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated hereby, including the Mergers, and (c) resolved to recommend that the sole stockholder of Surviving Merger Sub adopt this Agreement and directed that such matter be submitted for consideration of the sole stockholder of Surviving Merger Sub;

WHEREAS, the board of directors of First Merger Sub has unanimously (a) determined that it is in the best interests of First Merger Sub and its sole stockholder, and declared it advisable, to enter into this Agreement, (b) approved the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated hereby, including the Mergers, and (c) resolved to recommend that the sole stockholder of First Merger Sub approve this Agreement and directed that such matter be submitted for consideration of the sole stockholder of First Merger Sub;

WHEREAS, for U.S. federal income tax purposes, it is intended that (a) the Mergers, taken together, shall qualify (i) as a "reorganization" within the meaning of Section 368(a) of the Code and (ii) for an exception

to the general rule of Section 367(a)(1) of the Code, and (b) this Agreement be, and is hereby adopted as, a "plan of reorganization" for purposes of Sections 354, 361 and 368 of the Code and the Treasury Regulations promulgated thereunder;

WHEREAS, pursuant to Decision No. 5 (Docket No. FD 36500) of the Surface Transportation Board (the "STB"), dated May 6, 2021, Parent has obtained the approval of the STB (the "STB Voting Trust Approval") to deposit or cause the deposit of all outstanding shares of the Second Surviving Corporation (as defined below) into an irrevocable voting trust (the "Voting Trust" and such deposit, the "Voting Trust Transaction"), subject to the voting trust agreement in the form attached hereto as Exhibit A (the "Voting Trust Agreement"); and

WHEREAS, Parent, Merger Subs and the Company desire to make certain representations, warranties, covenants and agreements specified herein in connection with this Agreement.

NOW, THEREFORE, in consideration of the foregoing and the representations, warranties, covenants and agreements contained herein, and intending to be legally bound hereby, Parent, Merger Subs and the Company agree as follows:

ARTICLE 1

THE MERGERS

Section 1.1 The Mergers. On the terms and subject to the conditions set forth in this Agreement:

(a) at the First Effective Time and in accordance with the DGCL, First Merger Sub shall merge with and into the Company, the separate corporate existence of First Merger Sub shall cease and the Company shall continue its corporate existence under Delaware law as the surviving corporation in the First Merger (the "First Surviving Corporation") and a direct wholly owned Subsidiary of Surviving Merger Sub; and

(b) immediately following the First Merger, at the Second Effective Time, and in accordance with the DGCL, the First Surviving Corporation shall merge with and into Surviving Merger Sub, the separate corporate existence of the First Surviving Corporation shall cease and Surviving Merger Sub shall continue its corporate existence under Delaware law as the surviving corporation in the Second Merger (the "Second Surviving Corporation") and a direct wholly owned Subsidiary of Parent.

Section 1.2 Closing. The closing of the Mergers (the "Closing") shall take place (a) at the offices of Wachtell, Lipton, Rosen & Katz, 51 West 52nd Street, New York, New York 10019, at 8:30 a.m., New York City time, on the second Business Day after the satisfaction or waiver (to the extent permitted by applicable Law) of the conditions set forth in Article 6 (other than those conditions that by their nature are to be satisfied at the Closing, but subject to the satisfaction or waiver of such conditions) or (b) at such other place, time and date as the Company and Parent may agree in writing. The date on which the Closing actually occurs is referred to as the "Closing Date."

Section 1.3 Effective Times. Subject to the provisions of this Agreement, at the Closing, (a) the Company shall cause a certificate of merger in connection with the First Merger (the "First Certificate of Merger") to be executed, acknowledged and filed with the Secretary of State of the State of Delaware in accordance with the applicable provisions of the DGCL and (b) immediately following the filing of the First Certificate of Merger, the First Surviving Corporation shall cause a certificate of merger in connection with the Second Merger (the "Second Certificate of Merger") to be executed, acknowledged and filed with the Secretary of State of the State of Delaware in accordance with the applicable provisions of the DGCL. The First Merger shall become effective at such time as the First Certificate of Merger has been duly filed with the Secretary of

State of the State of Delaware or at such later time as may be agreed by the Company and First Merger Sub in writing and specified in the First Certificate of Merger in accordance with the DGCL (the effective time of the First Merger being herein referred to as the "First Effective Time") and the Second Merger shall become effective at such time as the Second Certificate of Merger has been duly filed with the Secretary of State of the State of Delaware or at such later time as may be agreed by the First Surviving Corporation and Surviving Merger Sub in writing and specified in the Second Certificate of Merger in accordance with the DGCL, but in any event immediately following the First Effective Time (the effective time of the Second Merger being herein referred to as the "Second Effective Time").

Section 1.4 Effects of the Mergers. The Mergers shall have the effects set forth in this Agreement and the applicable provisions of the DGCL.

Section 1.5 Organizational Documents of the First Surviving Corporation and the Second Surviving Corporation. Subject to Section 5.11:

(a) at the First Effective Time: (i) the certificate of incorporation of First Merger Sub as in effect immediately prior to the First Effective Time (amended so that the name of the First Surviving Corporation shall be "Kansas City Southern") shall be the certificate of incorporation of the First Surviving Corporation until thereafter amended in accordance with the DGCL and such certificate of incorporation; and (ii) the bylaws of First Merger Sub as in effect immediately prior to the First Effective Time (amended so that the name of the First Surviving Corporation shall be "Kansas City Southern") shall be the bylaws of the First Surviving Corporation until thereafter amended in accordance with the DGCL and such bylaws; and

(b) at the Second Effective Time: (i) the certificate of incorporation of Surviving Merger Sub as in effect immediately prior to the Second Effective Time (amended so that the name of the Second Surviving Corporation shall be "Kansas City Southern"), shall be the certificate of incorporation of the Second Surviving Corporation until thereafter amended in accordance with DGCL and such certificate of incorporation and (ii) the bylaws of Surviving Merger Sub as in effect immediately prior to the Second Effective Time (amended so that the name of the Second Surviving Corporation shall be "Kansas City Southern") shall be the bylaws of the Second Surviving Corporation.

Section 1.6 Directors and Officers of the First Surviving Corporation. (a) The directors of the Company as of immediately prior to the First Effective Time shall be the initial directors of the First Surviving Corporation as of the First Effective Time and shall hold office until their respective successors are duly elected and qualified, or their earlier death, resignation or removal and (b) the officers of the Company as of immediately prior to the First Effective Time shall be the initial officers of the First Surviving Corporation as of the First Effective Time and shall hold office until their respective successors are duly elected and qualified, or their earlier death, resignation or removal.

Section 1.7 Directors and Officers of the Second Surviving Corporation. (a) The directors the First Surviving Corporation as of immediately prior to the Second Effective Time shall be the initial directors of the Second Surviving Corporation as of the Second Effective Time and shall hold office until their respective successors are duly elected and qualified, or their earlier death, resignation or removal and (b) the officers of the First Surviving Corporation as of immediately prior to the Second Effective Time shall be the initial officers of the Second Surviving Corporation as of the Second Effective Time and shall hold office until their respective successors are duly elected and qualified, or their earlier death, resignation or removal.

Section 1.8 Post-Closing Contributions. Immediately following the Second Effective Time, Parent shall, or shall cause its Affiliates to, take all actions necessary to undertake the steps set forth in Section 1.8 of the Parent Disclosure Schedules (the "Post-Closing Contributions").

ARTICLE 2

CONVERSION OF SHARES; EXCHANGE OF CERTIFICATES

Section 2.1 Effect of the Mergers on Capital Stock.

(a) At the First Effective Time, by virtue of the First Merger and without any action on the part of the Company, Surviving Merger Sub or the holders of any securities of the Company or Surviving Merger Sub:

(i) Conversion of Company Common Stock. Each share of Company Common Stock that is outstanding immediately prior to the First Effective Time, but excluding Excluded Shares and Dissenting Shares, shall be converted automatically into the right to receive (A) a number of Parent Common Shares equal to the Exchange Ratio (the "Share Consideration"), subject to Section 2.1(e) with respect to fractional Parent Common Shares, and (B) $90.00 in cash (the "Cash Consideration" and, together with the Share Consideration, the "Merger Consideration"). All shares of Company Common Stock that have been converted into the right to receive the Merger Consideration as provided in this Section 2.1(a) shall be automatically cancelled and cease to exist on the conversion thereof, and uncertificated shares of Company Common Stock represented by book-entry form ("Common Book-Entry Shares") and each certificate that, immediately prior to the First Effective Time, represented any such shares of Company Common Stock (each, a "Common Certificate") shall thereafter represent only the right to receive the Merger Consideration (including the right to receive, pursuant to Section 2.1(e), the Fractional Share Cash Amount) into which the shares of Company Common Stock represented by such Common Book-Entry Share or Common Certificate have been converted pursuant to this Section 2.1(a)(i).

(ii) Treatment of Excluded Shares. Each share of Company Common Stock or Company Preferred Stock that is directly owned by the Company (as treasury stock or otherwise), Parent or either Merger Sub immediately prior to the First Effective Time, other than shares held on behalf of third parties, shall be cancelled and shall cease to exist, and no consideration shall be delivered in exchange therefor (such shares, the "Cancelled Shares"). Each share of Company Common Stock that is owned by any wholly owned Subsidiary of the Company or Parent (other than either Merger Sub) immediately prior to the First Effective Time, other than shares held on behalf of third parties, shall automatically be converted into the right to receive such number of Parent Common Shares equal to (A) the Cash Consideration *divided by* the Parent Share Price *plus* (B) the Exchange Ratio (each such share, together with the Cancelled Shares, the "Excluded Shares").

(iii) Conversion of First Merger Sub Common Stock. Each share of common stock, par value $0.01 per share, of First Merger Sub outstanding immediately prior to the First Effective Time shall be converted into and become one validly issued, fully paid and nonassessable share of common stock, par value $0.01 per share, of the First Surviving Corporation with the same rights, powers and privileges as the shares so converted and shall constitute the only outstanding shares of capital stock of the First Surviving Corporation. From and after the First Effective Time, all certificates representing the common stock of First Merger Sub shall be deemed for all purposes to represent the number of shares of common stock of the First Surviving Corporation into which they were converted in accordance with the immediately preceding sentence.

(iv) Conversion of Company Preferred Stock. Each share of Company Preferred Stock that is outstanding immediately prior to the First Effective Time, but excluding Dissenting Shares and Cancelled Shares, shall be converted automatically into the right to receive $37.50 per share in cash (the "Preferred Merger Consideration"). All shares of Company Preferred Stock that have been converted into the right to receive the Preferred Merger Consideration as provided in this Section 2.1(a)(iv) shall be automatically cancelled on the conversion thereof and shall cease to exist, and uncertificated shares of Company Preferred Stock represented by book-entry form ("Preferred Book-Entry Shares") and each certificate that, immediately prior to the First Effective Time, represented any such shares of Company Preferred Stock (each, a "Preferred Certificate") shall thereafter represent only the right to receive the Preferred Merger

Consideration into which the shares of Company Preferred Stock represented by such Preferred Book-Entry Share or Preferred Certificate have been converted pursuant to this Section 2.1(a)(iv).

(b) At the Second Effective Time, by virtue of the Second Merger and without any action on the part of the Second Surviving Corporation, Surviving Merger Sub or the holders of any securities of the Second Surviving Corporation or Surviving Merger Sub, (i) each share of common stock, par value $0.01 per share, of Surviving Merger Sub issued and outstanding immediately prior to the Second Effective Time shall remain outstanding, all of which shares shall be held by Parent and which shall not be affected by the Second Merger and (ii) each share of common stock of the First Surviving Corporation issued and outstanding immediately prior to the Second Effective Time shall be cancelled and shall cease to exist, and no consideration shall be paid with respect thereto, such that, immediately following the Second Merger, the Second Surviving Corporation shall be a direct wholly owned Subsidiary of Parent.

(c) Dissenters' Rights. Any provision of this Agreement to the contrary notwithstanding, if required by the DGCL (but only to the extent required thereby), shares of Company Common Stock or Company Preferred Stock that are issued and outstanding immediately prior to the First Effective Time (other than the Cancelled Shares) and that are held by holders of such shares who have not voted in favor of the adoption of this Agreement or consented thereto in writing and who have properly exercised appraisal rights with respect thereto in accordance with, and who have complied with, Section 262 of the DGCL with respect to any such shares held by any such holder (the "Dissenting Shares") shall not be converted into the right to receive the Merger Consideration or the Preferred Merger Consideration, as applicable, and holders of such Dissenting Shares shall be entitled to receive payment of the fair value of such Dissenting Shares in accordance with the provisions of such Section 262, unless and until any such holder fails to perfect or effectively withdraws or loses its rights to appraisal and payment under the DGCL. If, after the First Effective Time, any such holder fails to perfect or effectively withdraws or loses such rights, such Dissenting Shares shall thereafter be no longer considered Dissenting Shares under this Agreement and shall be treated as if they had been converted into, at the First Effective Time, the right to receive the Merger Consideration or the Preferred Merger Consideration, as applicable, without any interest thereon, in accordance with Section 2.1(a). At the First Effective Time, any holder of Dissenting Shares shall cease to have any rights with respect thereto, except the rights provided in Section 262 of the DGCL and as provided in the previous sentence. The Company shall give Parent (i) prompt notice of any demands received by the Company for appraisals of shares of Company Common Stock or Company Preferred Stock under Section 262 of the DGCL and (ii) the opportunity to direct all negotiations and proceedings with respect to such demands. The Company shall not, except with the prior written consent of Parent (which consent shall not be unreasonably withheld, delayed or conditioned), make any payment with respect to any such demands for appraisal or settle, offer to settle or approve any withdrawal of any such demands.

(d) Certain Adjustments. If, between the date of this Agreement and the First Effective Time, the outstanding shares of Company Common Stock or Company Preferred Stock or the outstanding Parent Common Shares shall have been changed into a different number of shares or a different class of shares by reason of any stock dividend, subdivision, reorganization, reclassification, recapitalization, stock split, reverse stock split, combination or exchange of shares, the Merger Consideration and/or the Preferred Merger Consideration, as applicable, shall be equitably adjusted, without duplication, to proportionally reflect such change.

(e) No Fractional Shares.

(i) No fractional Parent Common Shares shall be issued in connection with the First Merger and no certificates or scrip representing fractional Parent Common Shares shall be delivered on the conversion of shares of Company Common Stock pursuant to Section 2.1(a)(i). Each holder of shares of Company Common Stock who would otherwise have been entitled to receive as a result of the First Merger a fraction of a Parent Common Share (after aggregating all shares represented by the Common Certificates and Common Book-Entry Shares delivered by such holder) shall receive, in lieu of such fractional Parent

Common Share, cash (without interest) in an amount (rounded down to the nearest cent) representing such holder's proportionate interest in the net proceeds from the sale by the Exchange Agent, on behalf of all such holders, of the aggregated number of fractional Parent Common Shares that would otherwise have been issuable to such holders as part of the Merger Consideration (the "Fractional Share Cash Amount").

(ii) As soon as practicable after the First Effective Time, the Exchange Agent shall, on behalf of all such holders of fractional Parent Common Shares, effect the sale of all such Parent Common Shares that would otherwise have been issuable as part of the Merger Consideration at the then-prevailing prices on the NYSE through one or more member firms of the NYSE. After the proceeds of such sale have been received, the Exchange Agent shall determine the applicable Fractional Share Cash Amount payable to each applicable holder and shall make such amounts available to such holders in accordance with Section 2.2(b). The payment of cash in lieu of fractional Parent Common Shares to such holders is not a separately bargained-for consideration and solely represents a mechanical rounding-off of the fractions in the exchange.

(iii) No such holder shall be entitled to dividends, voting rights or any other rights in respect of any fractional Parent Common Share that would otherwise have been issuable as part of the Merger Consideration.

Section 2.2 Exchange of Certificates.

(a) Exchange Agent. Prior to the First Effective Time, Parent and Surviving Merger Sub shall designate Computershare Investor Services Inc. or a bank or trust company or similar institution selected by Parent to serve as exchange agent hereunder and approved in advance by the Company in writing (which approval shall not be unreasonably withheld, conditioned or delayed) (the "Exchange Agent"). Prior to the First Effective Time, Parent shall, on behalf of Surviving Merger Sub, deposit or shall cause to be deposited, with the Exchange Agent, in trust for the benefit of holders of shares of Company Common Stock and Company Preferred Stock, (i) cash in U.S. dollars sufficient to pay (A) the aggregate Cash Consideration payable pursuant to Section 2.1(a)(i) and (B) the aggregate Preferred Merger Consideration payable pursuant to Section 2.1(a)(iv) and (ii) evidence of Parent Common Shares in book-entry form representing the number of Parent Common Shares sufficient to deliver the aggregate Share Consideration deliverable pursuant to Section 2.1(a)(i). Parent agrees to deposit, or cause to be deposited, with the Exchange Agent from time to time, as needed, cash sufficient to pay any dividends and other distributions pursuant to Section 2.2(c). Any such cash and book-entry shares deposited with the Exchange Agent shall be referred to as the "Exchange Fund."

(b) Payment Procedures.

(i) As soon as reasonably practicable after the First Effective Time and in any event not later than the third Business Day following the Closing Date, Parent shall cause the Exchange Agent to mail to each holder of record of shares of Company Common Stock or Company Preferred Stock whose shares were converted into the right to receive the Merger Consideration or the Preferred Merger Consideration, as applicable, pursuant to Section 2.1, (A) a letter of transmittal with respect to Book-Entry Shares (to the extent applicable) and Certificates (which shall specify that delivery shall be effected, and risk of loss and title to Certificates shall pass, only on delivery of Certificates (or effective affidavits of loss in lieu thereof) to the Exchange Agent and shall be in such form and have such other provisions as Parent and the Company may mutually reasonably agree), and (B) instructions for use in effecting the surrender of Book-Entry Shares (to the extent applicable) or Certificates (or effective affidavits of loss in lieu thereof) in exchange for the Merger Consideration or the Preferred Merger Consideration, as applicable.

(ii) On surrender of Certificates (or effective affidavits of loss in lieu thereof) or Book-Entry Shares to the Exchange Agent, together with such letter of transmittal, duly completed and validly executed in accordance with the instructions thereto, or, in the case of Book-Entry Shares, receipt of an "agent's message" by the Exchange Agent, and such other documents as may customarily be required by the

Exchange Agent, the holder of such Certificates (or effective affidavits of loss in lieu thereof) or Book-Entry Shares shall be entitled to receive in exchange therefor, and the Exchange Agent shall be required to promptly deliver to each such holder, the Merger Consideration or the Preferred Merger Consideration, as applicable, into which the shares represented by such Certificates or Book-Entry Shares have been converted pursuant to this Article 2 (together with any Fractional Share Cash Amount and any dividends or other distributions payable pursuant to Section 2.2(c)). No interest shall be paid or accrued on any amount payable on due surrender of Certificates (or effective affidavits of loss in lieu thereof) or Book-Entry Shares. If payment of the Merger Consideration or Preferred Merger Consideration, as applicable, is to be made to a Person other than the Person in whose name the surrendered Certificate is registered, it shall be a condition precedent of payment that (A) the Certificate so surrendered shall be properly endorsed or shall be otherwise in proper form for transfer and (B) the Person requesting such payment shall have paid any transfer and other similar Taxes required by reason of the payment of the Merger Consideration or Preferred Merger Consideration, as applicable, to a Person other than the registered holder of the Certificate surrendered or shall have established that such Tax either has been paid or is not required to be paid.

(iii) The Exchange Agent, the Company, Parent and each Merger Sub, as applicable, shall be entitled to deduct and withhold from any amounts otherwise payable to holders of Company Common Stock or Company Preferred Stock pursuant to this Article 2 such amounts as are required to be withheld or deducted under the Internal Revenue Code of 1986, as amended (the "Code"), or under any provision of state, local or foreign Tax Law with respect to the making of such payment; it being understood that, provided that the representation and warranty of the Company in Section 3.15(c) is true and correct as of the First Effective Time, no deduction or withholding shall be made under the Laws of Canada (or any province thereof) from any such amounts (other than, for greater certainty, (A) any dividend or other distribution referenced in Section 2.2(c), and (B) amounts referred to in Section 2.3 that are attributable to personal services performed by the applicable payee in Canada or any province thereof or by an applicable payee who is a resident, for income Tax purposes, of Canada) except to the extent that any such deduction or withholding shall be required by a change in Law after the date of this Agreement. To the extent that amounts are so deducted or withheld and timely paid over to the relevant Governmental Entity, such deducted or withheld amounts shall be treated for all purposes of this Agreement as having been paid to the Person in respect of which such deduction or withholding was made.

(c) Treatment of Unexchanged Shares. No dividends or other distributions, if any, with a record date after the First Effective Time with respect to Parent Common Shares shall be paid to the holder of any unsurrendered shares of Company Common Stock to be converted into Parent Common Shares pursuant to Section 2.1(a)(i) until such holder shall surrender such shares of Company Common Stock in accordance with this Section 2.2. After the surrender in accordance with this Section 2.2 of a share of Company Common Stock to be converted into Parent Common Shares pursuant to Section 2.1(a)(i), the holder thereof shall be entitled to receive (in addition to the Merger Consideration and the Fractional Share Cash Amount payable to such holder pursuant to this Article 2) any such dividends or other distributions, without any interest thereon, which theretofore had become payable with respect to the Parent Common Shares represented by such share of Company Common Stock, less such withholding or deduction for any Taxes required by applicable Law.

(d) Closing of Transfer Books. At the First Effective Time, the stock transfer books of the Company shall be closed, and there shall be no further registration of transfers on the stock transfer books of the First Surviving Corporation of the shares of Company Common Stock or Company Preferred Stock that were outstanding immediately prior to the First Effective Time. If, after the First Effective Time, Certificates or Book-Entry Shares are presented to the Second Surviving Corporation, Parent or the Exchange Agent for transfer or any other reason, the holder of any such Certificates or Book-Entry Shares shall be given a copy of the letter of transmittal referred to in Section 2.2(b) and instructed to comply with the instructions in that letter of transmittal in order to receive the consideration to which such holder is entitled pursuant to this Article 2.

(e) Termination of Exchange Fund. Any portion of the Exchange Fund (including the proceeds of any investments thereof) that remains undistributed to the former holders of shares of Company Common Stock or Company Preferred Stock on the first anniversary of the First Effective Time shall thereafter be delivered, at the direction of Surviving Merger Sub, to Parent on demand, and any former holders of shares of Company Common Stock or Company Preferred Stock who have not surrendered their shares in accordance with this Article 2 shall thereafter look only to Parent for payment of their claim for the Merger Consideration (together with the Fractional Share Cash Amount and any dividends or other distributions payable pursuant to Section 2.2(c)) or Preferred Merger Consideration, as applicable, without any interest thereon, on due surrender of their shares.

(f) No Liability. Anything herein to the contrary notwithstanding, none of the Company, Parent, either Merger Sub, the First Surviving Corporation, the Second Surviving Corporation, the Exchange Agent or any other Person shall be liable to any former holder of shares of Company Common Stock or Company Preferred Stock for any amount properly delivered to a public official pursuant to any applicable abandoned property, escheat or similar Law. Any portion of the Exchange Fund that remains undistributed to the holders of Company Common Stock or Company Preferred Stock as of immediately prior to the date on which the Exchange Fund would otherwise escheat to, or become property of, any Governmental Entity shall cease to represent any claim of any kind or nature and shall be deemed to be surrendered for cancellation to Parent.

(g) Investment of Exchange Fund. The Exchange Agent shall invest all cash included in the Exchange Fund as reasonably directed by Parent; provided, that any investment of such cash shall be limited to direct short-term obligations of, or short-term obligations fully guaranteed as to principal and interest by, the U.S. government; provided, further, that no such investment or loss thereon shall affect the amounts payable to holders of Certificates (or effective affidavits of loss in lieu thereof) or Book-Entry Shares pursuant to this Article 2, and following any losses from any such investment, Parent shall promptly provide, on behalf of Surviving Merger Sub, additional funds to the Exchange Agent for the benefit of the holders of shares of Company Common Stock or Company Preferred Stock. Any interest and other income resulting from such investments shall be paid to or at the direction of Parent pursuant to Section 2.2(e).

(h) Lost Certificates. In the case of any Certificate that has been lost, stolen or destroyed, on the making of an affidavit of that fact by the Person claiming such Certificate to be lost, stolen or destroyed and, if required by the Exchange Agent, the posting by such Person of a bond in customary amount as indemnity against any claim that may be made against it with respect to such Certificate, the Exchange Agent shall issue in exchange for such lost, stolen or destroyed Certificate the Merger Consideration (together with the Fractional Share Cash Amount and any dividends or other distributions deliverable pursuant to Section 2.2(c)) or the Preferred Merger Consideration, as applicable, payable in accordance with Section 2.1 with respect to the shares of Company Common Stock or Company Preferred Stock represented by such lost, stolen or destroyed Certificate.

Section 2.3 Treatment of Company Equity Awards.

(a) Each option to purchase shares of Company Common Stock (each, a "Company Option"), whether vested or unvested, that is outstanding as of immediately prior to the First Effective Time shall, at the First Effective Time, become fully vested and be converted into the right to receive an amount in cash equal to (i) the excess, if any of (A) the Merger Consideration Value over (B) the exercise price per share of Company Common Stock of such Company Option *multiplied by* (ii) the total number of shares of Company Common Stock subject to such Company Option as of immediately prior to the First Effective Time. Parent shall or shall cause the Second Surviving Corporation or one of its Subsidiaries, as applicable, to deliver to the holders of Company Options the cash amounts described in the immediately preceding sentence, less such amounts as are required to be withheld or deducted under the Code or any provision of state, local or foreign Tax Law with respect to the making of such payment, promptly but no later than the next scheduled payroll of the Company that is at least four Business Days after the First Effective Time. For the avoidance of doubt, any Company Option that has an exercise price per share of Company Common Stock that is greater than or equal to the Merger Consideration Value shall be cancelled at the First Effective Time for no consideration or payment.

(b) Each award of shares of Company Common Stock granted subject to any vesting, forfeiture or other lapse restrictions (each, a "Company Restricted Share Award") that is outstanding as of immediately prior to the First Effective Time, shall, at the First Effective Time, become fully vested and be converted into the right to receive (i) the Merger Consideration in respect of each share of Company Common Stock subject to such Company Restricted Share Award as of immediately prior to the First Effective Time and (ii) the accrued but unpaid cash dividends corresponding to each share of Company Common Stock subject to such Company Restricted Share Award. Parent shall or shall cause the Second Surviving Corporation or one of its Subsidiaries, as applicable, to pay to the holders of Company Restricted Share Awards the cash amounts and Parent Common Shares described in the immediately preceding sentence, less such amounts as are required to be withheld or deducted under the Code or any provision of state, local or foreign Tax Law with respect to the making of such payment, promptly but no later than the next scheduled payroll of the Company that is at least four Business Days after the First Effective Time.

(c) Each award of performance shares that corresponds to shares of Company Common Stock (each, a "Company Performance Share Award") that is outstanding as of immediately prior to the First Effective Time, shall, at the First Effective Time, be converted into an award that entitles the holder thereof, upon vesting, to receive an amount in cash equal to the Merger Consideration Value in respect of each share of Company Common Stock subject to such Company Performance Share Award, with the number of shares of Company Common Stock subject to each such award equal to 200% of the target number of shares of Company Common Stock covered by each such award as of immediately prior to the First Effective Time. Except as otherwise provided in this Section 2.3(c), each cash-based award covered by this Section 2.3(c) shall have the same terms and conditions (including vesting terms and conditions) as applied to the corresponding Company Performance Share Award; provided, that the performance-based vesting conditions shall no longer apply, the award will be subject only to service-based vesting, and each such award shall vest in full upon a Qualifying Termination.

(d) Each share of director deferred stock (each, a "Director Deferred Share") that is outstanding as of immediately prior to the First Effective Time, shall, at the First Effective Time, be converted into the right to receive the Merger Consideration. Parent shall or shall cause the Second Surviving Corporation or one of its Subsidiaries, as applicable, to deliver to the holders of Director Deferred Shares the cash amounts and Parent Common Shares described in the immediately preceding sentence, less such amounts as are required to be withheld or deducted under the Code or any provision of state, local or foreign Tax Law with respect to the making of such payment, promptly but no later than the next scheduled payroll of the Company that is at least four Business Days after the First Effective Time.

(e) Prior to the First Effective Time, the Company, through the Company Board or an appropriate committee thereof, shall adopt such resolutions as may reasonably be required in its discretion to effectuate the actions contemplated by this Section 2.3.

(f) Notwithstanding anything in Section 2.3(a), Section 2.3(b) or Section 2.3(c) to the contrary, but subject to Section 5.1(b), (i) to the extent the terms of any Company Option, Company Restricted Share Award or Company Performance Share Award granted on or after March 21, 2021 and not in violation of this Agreement expressly provide for treatment in connection with the occurrence of the First Effective Time that is different from the treatment prescribed by this Section 2.3, or (ii) as mutually agreed by the parties hereto and a holder of any Company Option, Company Restricted Share Award or Company Performance Share Award, then in each case, the terms of such Company Option, Company Restricted Share Award or Company Performance Share Award, as applicable, shall control (and the applicable provisions of this Section 2.3 shall not apply).

ARTICLE 3

REPRESENTATIONS AND WARRANTIES OF THE COMPANY

Except as disclosed in the Company SEC Documents furnished or filed prior to the date of this Agreement (including any documents incorporated by reference therein and excluding any disclosures set forth in

any "risk factors" section or in any "forward-looking statements" section to the extent they are forward-looking statements or cautionary, predictive or forward-looking in nature) or in the disclosure schedules delivered by the Company to Parent concurrently with the execution of this Agreement (the "Company Disclosure Schedules") (it being agreed that disclosure of any item in any section or subsection of the Company Disclosure Schedules shall be deemed disclosed with respect to any other section or subsection of this Agreement and the Company Disclosure Schedules to the extent that the relevance thereof is reasonably apparent on its face), the Company represents and warrants to Parent and each Merger Sub as follows as of the date of this Agreement and as of the Closing Date (other than such representations and warranties that are expressly made as of a certain date, which are made as of such date):

Section 3.1 Qualification, Organization, Subsidiaries.

(a) The Company is a corporation duly incorporated, validly existing and in good standing under the laws of the state of Delaware. Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, each of the Company's Subsidiaries is a legal entity duly organized, validly existing and (where such concept is recognized) in good standing under the Laws of its respective jurisdiction of incorporation or organization, as applicable. Each of the Company and its Subsidiaries has all requisite corporate or similar power and authority to own, lease and operate its properties and assets and to carry on its business as presently conducted and is qualified to do business and is in good standing as a foreign corporation in each jurisdiction where the ownership, leasing or operation of its assets or properties or conduct of its business requires such qualification, except, in each case, as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect. The Company has made available to Parent true, complete and correct copies of the Organizational Documents of the Company and each of its Significant Subsidiaries, each as amended prior to the date of this Agreement, and each as made available to Parent is in full force and effect.

(b) All of the outstanding shares of capital stock or voting securities of, or other equity interests in, each of the Company's Subsidiaries have been validly issued and are owned by the Company, by another Subsidiary of the Company or by the Company and another Subsidiary of the Company, free and clear of all Liens other than restrictions imposed by applicable securities Laws or the Organizational Documents of any such Subsidiary or any Permitted Liens.

Section 3.2 Capitalization.

(a) The authorized share capital of the Company consists of 400,000,000 shares of Company Common Stock, 840,000 shares of Preferred Stock, par value $25 per share (the "Company Preferred Stock") and 2,000,000 shares of New Series Preferred Stock, par value $1 per share (the "Company New Series Preferred Stock"). As of September 9, 2021, there were (i) 90,976,580 shares of Company Common Stock issued and outstanding (including 187,529 shares of Company Common Stock subject to Company Restricted Share Awards but no shares of Company Common Stock underlying outstanding Company Performance Share Awards and not including shares held in treasury), (ii) 32,375,605 shares of Company Common Stock held in treasury, (iii) 214,542 shares of Company Preferred Stock issued and outstanding (not including shares held in treasury), (iv) 435,194 shares of Company Preferred Stock held in treasury, (v) no shares of Company New Series Preferred Stock issued and outstanding, (vi) Company Options to purchase an aggregate of 571,189 shares of Company Common Stock issued and outstanding, (vii) 116,358 shares of Company Common Stock underlying outstanding Company Performance Share Awards if performance conditions are satisfied at the target level, and (viii) 10,082.6654 shares of Company Common Stock underlying outstanding Director Deferred Shares. All outstanding shares of Company Common Stock are, and all such shares that may be issued prior to the Effective Time will be when issued, duly authorized and validly issued as fully paid and nonassessable, and are not subject to and were not issued in violation of any preemptive or similar right, purchase option, call or right of first refusal or similar right. To the Knowledge of the Company, as of the date hereof, no Person is the beneficial owner of ten percent or more of the issued shares of the Company Common Stock. The Company ESPP was terminated effective as of June 30, 2021, and no participant has any purchase rights thereunder.

(b) Except as set forth in Section 3.2(a) or as required by the terms of the Company Benefit Plans, as of the date of this Agreement, (i) the Company does not have any shares of its capital stock issued or outstanding, other than shares of Company Common Stock that have become outstanding after September 9, 2021, which were reserved for issuance as of September 9, 2021 as set forth in Section 3.2(a), and (ii) there are no outstanding subscriptions, options, warrants, calls, convertible securities or other similar rights, agreements or commitments relating to the issuance of capital stock of the Company or any of the Company's Subsidiaries to which the Company or any of the Company's Subsidiaries is a party obligating the Company or any of the Company's Subsidiaries to (A) issue, transfer or sell any shares of capital stock of the Company or any of the Company's Subsidiaries or securities convertible into, exercisable for or exchangeable for such shares, (B) grant, extend or enter into any such subscription, option, warrant, call, convertible securities or other similar right, agreement or arrangement, or (C) redeem or otherwise acquire any such shares of capital stock.

(c) Neither the Company nor any of its Subsidiaries has outstanding bonds, debentures, notes or other similar obligations, the holders of which have the right to vote (or which are convertible into, exercisable for or exchangeable for securities having the right to vote) with the stockholders of the Company on any matter. No Subsidiary of the Company owns any capital stock of the Company. Except for its interests (i) in its Subsidiaries and (ii) in any Person in connection with any joint venture, partnership or other similar arrangement with a third party, the Company does not own, directly or indirectly, any capital stock of, or other equity interests in any Person.

(d) Except for any voting trust agreement entered into in compliance with Section 5.8(c) of this Agreement, there are no voting trusts or other agreements or understandings to which the Company or any of its Subsidiaries is a party with respect to the voting of the capital stock of the Company or any of its Subsidiaries.

(e) Section 3.2(e) of the Company Disclosure Schedules lists each Subsidiary of the Company, its jurisdiction of organization and the percentage of its equity interests directly or indirectly held by the Company.

Section 3.3 Corporate Authority Relative to This Agreement; Consents and Approvals; No Violation.

(a) The Company has the requisite corporate power and authority to enter into this Agreement and, subject to receipt of the Company Stockholder Approval, to perform its obligations hereunder and to consummate the transactions contemplated hereby. Except for the Company Stockholder Approval and the filing of the First Certificate of Merger and the Second Certificate of Merger with the Secretary of State of the State of Delaware, no other corporate proceedings on the part of the Company are necessary to authorize the execution and delivery of this Agreement and the consummation of the transactions contemplated hereby. This Agreement has been duly and validly executed and delivered by the Company and, assuming this Agreement constitutes the valid and binding agreement of Parent and each Merger Sub, constitutes the valid and binding agreement of the Company, enforceable against the Company in accordance with its terms, except that (i) such enforcement may be subject to applicable bankruptcy, insolvency, reorganization, moratorium or other similar Laws, now or hereafter in effect, relating to creditors' rights generally and (ii) equitable remedies of specific performance and injunctive and other forms of equitable relief may be subject to equitable defenses and to the discretion of the court before which any proceeding therefor may be brought (collectively, the "Enforceability Exceptions").

(b) The Company Board at a duly called and held meeting has unanimously (i) determined that it is in the best interests of the Company and its stockholders, and declared it advisable, to enter into this Agreement, (ii) approved the execution, delivery and performance of this Agreement and the consummation of the Mergers and the other transactions contemplated hereby and (iii) resolved to recommend that the stockholders of the Company adopt this Agreement (the "Company Recommendation") and directed that such matter be submitted for consideration of the stockholders of the Company at the Company Stockholder Meeting.

(c) The execution, delivery and performance by the Company of this Agreement and the consummation of the Mergers and the other transactions contemplated hereby by the Company do not and will

not require the Company or any of its Subsidiaries to procure, make or provide prior to the Closing Date any consent, approval, authorization or permit of, action by, filing with or notification to any United States or foreign, state, provincial, territorial or local governmental or regulatory agency, commission, court, body, entity or authority (each, a "Governmental Entity"), other than (i) the filing of the First Certificate of Merger and the Second Certificate of Merger, (ii) authorizations from, or such other actions as are required to be made with or obtained from, the STB, (iii) authorizations from, or such other actions as are required to be made with or obtained from, the Federal Communications Commission (the "FCC"), (iv) compliance with any applicable requirements of any Antitrust Laws, (v) authorizations from, or such other actions as are required to be made with or obtained from, the COFECE and the IFT, (vi) the filing of notices with the ARTF and the SCT, (vii) compliance with the applicable requirements of the Securities Act and the Exchange Act, including the filing with the SEC of the Form F-4 (including the Proxy Statement/Prospectus), (viii) compliance with the rules and regulations of the NYSE, (ix) compliance with any applicable foreign or state securities or blue sky laws and (x) the other consents and/or notices set forth on Section 3.3(c) of the Company Disclosure Schedules (clauses (i) through (x), collectively, the "Company Approvals"), and other than any consent, approval, authorization, permit, action, filing or notification the failure of which to make or obtain would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

(d) Assuming compliance with the matters referenced in Section 3.3(c) and receipt of the Company Approvals and the Company Stockholder Approval, the execution, delivery and performance by the Company of this Agreement and the consummation by the Company of the Mergers and the other transactions contemplated hereby, do not and will not (i) contravene or conflict with the organizational or governing documents of the Company or any of its Subsidiaries, (ii) contravene or conflict with or constitute a violation of any provision of any Law binding on or applicable to the Company or any of its Subsidiaries or any of their respective properties or assets or (iii) result in any violation of, or default (with or without notice or lapse of time, or both) under, or give rise to a right of termination, cancellation or acceleration of any obligation or to the loss of a benefit under any Contract, instrument, permit, concession, franchise, right or license binding on the Company or any of its Subsidiaries, other than, in the case of clauses (ii) and (iii), any such contravention, conflict, violation, default, termination, cancellation, acceleration, right or loss that would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

Section 3.4 Reports and Financial Statements.

(a) The Company has filed or furnished, on a timely basis, all forms, statements, certifications, documents and reports required to be filed or furnished by it with the SEC pursuant to the Exchange Act or the Securities Act since December 31, 2018 (the forms, statements, certifications, documents and reports so filed or furnished by the Company and those filed or furnished to the SEC subsequent to the date of this Agreement, including any amendments thereto, the "Company SEC Documents"), each of which, in each case as of its date, or, if amended, as finally amended prior to the date of this Agreement, complied, or if not yet filed or furnished, will comply in all material respects with the applicable requirements of the Securities Act, the Exchange Act and the Sarbanes-Oxley Act, as the case may be, and no Company SEC Document as of its date (or, if amended or superseded by a filing prior to the date of this Agreement, as of the date of such amended or superseding filing) contained, and no Company SEC Documents filed with or furnished to the SEC subsequent to the date of this Agreement will contain, any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading.

(b) The Company is in compliance in all material respects with the applicable listing and corporate governance rules and regulations of the NYSE. Except as permitted by the Exchange Act, including Sections 13(k)(2) and 13(k)(3) thereunder, or the rules and regulations promulgated by the SEC, since December 31, 2018, neither the Company nor any of its Affiliates has made, arranged or modified (in any material way) any extensions of credit in the form of a personal loan to any executive officer or director of the Company.

(c) The consolidated financial statements (including all related notes and schedules) of the Company included in the Company SEC Documents (or, if any such Company SEC Document is amended or superseded by a filing prior to the date of this Agreement, such amended or superseding Company SEC Document) fairly presented in all material respects the consolidated financial position of the Company and its consolidated Subsidiaries, as at the respective dates thereof, and the consolidated results of their operations and their consolidated cash flows for the respective periods then ended (subject, in the case of the unaudited statements, to normal year-end audit adjustments and to any other adjustments described therein, including the notes thereto) and were prepared in all material respects in conformity with GAAP (except, in the case of the unaudited financial statements, as permitted by the SEC) applied on a consistent basis during the periods involved (except as may be indicated therein or in the notes thereto).

Section 3.5 Internal Controls and Procedures.

(a) The Company has established and maintains disclosure controls and procedures as required by Rule 13a-15 under the Exchange Act. Such disclosure controls and procedures are effective in providing reasonable assurance that all information required to be disclosed by the Company is recorded and reported on a timely basis to the individuals responsible for the preparation of the Company's filings with the SEC and other public disclosure documents.

(b) The Company maintains a system of internal controls over financial reporting (as defined in Rule 13a-15 under the Exchange Act) that is effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP and includes policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company in all material respects, (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and to maintain accountability for assets, that access to assets is permitted only in accordance with authorizations of management and directors of the Company and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company, and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on its financial statements. The records, systems, controls, data and information of the Company and its Subsidiaries that are used in the systems of disclosure controls and procedures and of financial reporting controls and procedures described above are recorded, stored, maintained and operated under means that are under the exclusive ownership and direct control of the Company or a wholly owned Subsidiary of the Company or its accountants, except as would not reasonably be expected to adversely affect or disrupt, in any material respect, the Company's systems of disclosure controls and procedures and of financial reporting controls and procedures or the reports generated thereby.

(c) The Company's management has completed an assessment of the effectiveness of the Company's internal controls over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act for the year ended December 31, 2020, and such assessment concluded that such controls were effective. The Company has disclosed, based on its most recent evaluation of its internal controls prior to the date of this Agreement, to the Company's auditors and the audit committee of the Company Board, (i) any significant deficiencies and material weaknesses in the design or operation of internal controls over financial reporting that are reasonably likely to adversely affect the Company's ability to record, process, summarize and report financial information and (ii) any fraud, whether or not material, that involves management or other employees who have a significant role in internal control over financial reporting. As of the date of its most recent audited financial statements, neither the Company nor its auditors had identified any significant deficiencies or material weaknesses in its internal controls over financial reporting and, as of the date of this Agreement, to the Knowledge of the Company, nothing has come to its attention that has caused it to believe that there are any material weaknesses or significant deficiencies in such internal controls. To the Knowledge of the Company, since December 31, 2018, no material complaints from any source regarding accounting, internal accounting controls or auditing matters, and no

concerns from Company employees regarding questionable accounting or auditing matters, have been received by the Company. To the Knowledge of the Company, since December 31, 2018, no attorney representing the Company or any of its Subsidiaries, whether or not employed by the Company or any of its Subsidiaries, has reported evidence of a violation of securities Laws, breach of fiduciary duty or similar violation by the Company or any of its officers, directors, employees or agents to the Company's chief legal officer, audit committee (or other committee designated for the purpose) of the Company Board pursuant to the rules adopted pursuant to Section 307 of the Sarbanes-Oxley Act or any Company policy contemplating such reporting, including in instances not required by those rules.

Section 3.6 No Undisclosed Liabilities. Except (a) as disclosed, reflected or reserved against in the audited consolidated balance sheet of the Company and its Subsidiaries as of December 31, 2020, and the footnotes to such consolidated balance sheet, in each case set forth in the Company's report on Form 10-K for the fiscal year ended December 31, 2020, (b) as expressly permitted or contemplated by this Agreement, (c) for liabilities or obligations that have been discharged or paid in full, (d) for liabilities arising in connection with obligations under any existing Contract (except to the extent such liabilities arose or resulted from a breach or a default of such Contract), (e) for liabilities and obligations incurred in the Ordinary Course of Business since December 31, 2020 (the "Company Balance Sheet Date"); or (f) as would not have, individually or in the aggregate, a Company Material Adverse Effect, neither the Company nor any Subsidiary of the Company has any liabilities or obligations that would be required by GAAP to be reflected on a consolidated balance sheet of the Company and its Subsidiaries.

Section 3.7 Compliance with Law; Permits.

(a) The Company and its Subsidiaries have been since December 31, 2018 in compliance with and not in default under or in violation of any federal, state, local or foreign law, statute, ordinance, rule, regulation, judgment, Order, injunction or decree of any Governmental Entity (collectively, "Laws" and each, a "Law") applicable to the Company and its Subsidiaries, except where such non-compliance, default or violation would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

(b) The Company and its Subsidiaries are in possession of all franchises, grants, concessions, authorizations, licenses, permits, easements, variances, exceptions, consents, certificates, approvals, clearances, tariffs, qualifications, registrations and orders of any Governmental Entities ("Permits") necessary for the Company and the Company's Subsidiaries to own, lease and operate their properties and assets or to carry on their businesses as they are now being conducted (such Permits, the "Company Permits"), except where the failure to have any of the Company Permits would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect. All Company Permits are in full force and effect and are not subject to any administrative or judicial proceeding that would reasonably be expected to result in modification, termination or revocation thereof, and the Company and each of its Subsidiaries is in compliance with the terms and requirements of such Company Permit, except where the failure to be in full force and effect or in compliance or where such proceeding would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

(c) Neither the Company nor any of its Subsidiaries has received any written notice that the Company or its Subsidiaries is in violation of any Law applicable to the Company or any of its Subsidiaries or any Permit, except for such violations that would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect. There are no Actions pending, threatened in writing or, to the Knowledge of the Company, otherwise threatened that would reasonably be expected to result in the revocation, withdrawal, suspension, non-renewal, termination, revocation, or adverse modification or limitation of any such Permit, except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

Section 3.8 Anti-Corruption; Anti-Bribery; Anti-Money Laundering.

(a) The Company, its Subsidiaries and, to the Knowledge of the Company, each of their directors, officers, employees, agents and each other Person acting on behalf of the Company or its Subsidiaries are in all material respects in compliance with and for the past five years, have in all material respects complied with (a) the Foreign Corrupt Practices Act of 1977, as amended (the "FCPA"), and (b) the provisions of all anti-bribery, anti-corruption and anti-money laundering Laws of each jurisdiction in which the Company and its Subsidiaries operate or have operated and in which any agent thereof is conducting or has conducted business on behalf of the Company or any of its Subsidiaries ("Anti-Corruption Laws"). The Company and its Subsidiaries have since December 31, 2018 (i) instituted policies and procedures that are reasonably designed to ensure compliance in all material respects with the FCPA and other anti-bribery, anti-corruption and anti-money laundering Laws in each jurisdiction in which the Company or any of its Subsidiaries operate and (ii) maintained such policies and procedures in full force and effect in all material respects.

(b) None of the Company, its Subsidiaries or, to the Knowledge of the Company, any of their directors, officers and employees and each other Person acting on behalf of the Company or its Subsidiaries has, in the past five years, directly or indirectly, violated any, or been subject to actual or, to the Knowledge of the Company, pending or threatened Proceedings, settlements or enforcement actions alleging violations on the part of any of the foregoing Persons of the FCPA or Anti-Corruption Laws or any terrorism financing Law.

(c) None of the Company, its Subsidiaries or, to the Knowledge of the Company, any of their directors, officers and their employees or any other Person acting on behalf of the Company or its Subsidiaries has, in the past five years: (i) directly or indirectly, paid, offered or promised to pay, or authorized or ratified the payment of any monies, gifts or anything of value (A) which would violate any applicable Anti-Corruption Law, including the FCPA, applied for purposes hereof as it applies to domestic concerns, or (B) to any national, provincial, municipal or other Government Official or any political party or candidate for political office for the purpose of (x) influencing any act or decision of such official or of any Governmental Entity, (y) to obtain or retain business, or direct business to any Person or (z) to secure any other improper benefit or advantage; or (ii) aided, abetted, caused (directly or indirectly), participated in, or otherwise conspired with, any Person to violate the terms of any Order.

Section 3.9 Sanctions.

(a) For the past five years, the Company and each of its Subsidiaries has been, and currently is, in all material respects in compliance with relevant economic sanctions and export control Laws in jurisdictions in which the Company or any of its Subsidiaries do business or are otherwise subject to jurisdiction, including the United States International Traffic in Arms Regulations, the Export Administration Regulations, and United States sanctions Laws and regulations administered by the United States Department of the Treasury's Office of Foreign Assets Control or the United States Department of State (collectively "Export and Sanctions Regulations").

(b) None of the Company or any of its Subsidiaries, or, to the Knowledge of the Company, any director, officer, agent, employee or other Person acting on behalf of any of the Company or its Subsidiaries, in their capacity as such, is currently, or has in the past five years: (i) a Sanctioned Person or (ii) engaging in any dealings or transactions with, or for the benefit of, any Sanctioned Person or in any Sanctioned Country, to the extent such activities would cause the Company to violate applicable Export and Sanctions Regulations.

(c) For the past five years, the Company and its Subsidiaries have (i) instituted policies and procedures that are reasonably designed to ensure compliance in all material respects with the Export and Sanctions Regulations in each jurisdiction in which the Company and its Subsidiaries operate or are otherwise subject to jurisdiction and (ii) maintained such policies and procedures in full force and effect in all material respects.

(d) For the past five years, neither the Company nor any of its Subsidiaries (w) has been found in violation of, charged with or convicted of, any Export and Sanctions Regulations, (x) to the Knowledge of the Company, is under investigation by any Governmental Entity for possible violations of any Export and Sanctions Regulation, (y) has been assessed civil penalties under any Export and Sanctions Regulations or (z) has filed any voluntary disclosures with any Governmental Entity regarding possible violations of any Export and Sanctions Regulations.

Section 3.10 Environmental Laws and Regulations.

(a) Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect: (i) the Company and its Subsidiaries have for the past five years conducted their respective businesses in compliance with all applicable Environmental Laws; (ii) for the past five years, neither the Company nor any of its Subsidiaries has received any written notices, demand letters or written requests for information from any Governmental Entity alleging that the Company or any of its Subsidiaries is in violation of or has liability under any Environmental Law and there are no legal, administrative, arbitral or other proceedings, claims or actions pending, or to the Knowledge of the Company threatened, against the Company or any of its Subsidiaries alleging any violation of or liability relating to any Environmental Law, in each case other than with respect to matters that have been fully resolved; (iii) to the Knowledge of the Company, there has been no treatment, storage or release of any Hazardous Substance in violation of or as could reasonably be expected to result in liability under any applicable Environmental Law from any properties currently or formerly owned or leased or held under concession by the Company or any of its Subsidiaries or any predecessor; and (iv) neither the Company nor any Subsidiary is subject to any agreement, order, judgment, decree or agreement by or with any Governmental Entity or other third party imposing any liability or obligation relating to any Environmental Law.

(b) The generality of any other representations and warranties in this Agreement notwithstanding, the representations and warranties in this Section 3.10 shall be deemed to be the Company's sole and exclusive representations and warranties in this Agreement with respect to Environmental Laws, Hazardous Substances and any other environmental matters.

Section 3.11 Employee Benefit Plans; Labor Matters.

(a) Section 3.11(a) of the Company Disclosure Schedules lists all material Company Benefit Plans.

(b) The Company has made available to Parent, with respect to each material Company Benefit Plan, each writing constituting a part of such Company Benefit Plan, including all amendments thereto.

(c) Except as would not have, individually or in the aggregate, a Company Material Adverse Effect: (i) each Company Benefit Plan (including any related trusts) has been maintained and administered in compliance with its terms and with applicable Law, including ERISA and the Code to the extent applicable thereto; (ii) each Company Benefit Plan intended to be "qualified" within the meaning of Section 401(a) of the Code has received a favorable determination letter from the Internal Revenue Service or is entitled to rely on a favorable opinion issued by the Internal Revenue Service, (iii) no Company Benefit Plan is subject to Title IV of ERISA, (iv) no employee benefit plan of the Company or its Subsidiaries is a Multiemployer Plan or a plan subject to Title IV of ERISA that has two or more contributing sponsors, at least two of whom are not under common control, (v) all contributions or other amounts payable by the Company or any of its Subsidiaries with respect to each Company Benefit Plan in respect of current or prior plan years have been paid or accrued in accordance with GAAP and (vi) there are no pending, threatened or, to the Knowledge of the Company, anticipated claims (other than claims for benefits in accordance with the terms of the Company Benefit Plans) by, on behalf of or against any of the Company Benefit Plans or any trusts related thereto.

(d) With respect to any Multiemployer Plan contributed to by the Company or any ERISA Affiliate, neither the Company nor any ERISA Affiliate has incurred any withdrawal liability under Title IV of ERISA

which remains unsatisfied as to an amount that would reasonably be expected to result in, individually or in the aggregate, material liability to the Company and its Subsidiaries, taken as a whole.

(e) Except as provided in this Agreement or required by applicable Law, the consummation of the transactions contemplated by this Agreement will not, either alone or in combination with another event, (i) entitle any current or former employee or director of the Company or any of its Subsidiaries to severance pay, or any other payment from the Company or its Subsidiaries, (ii) accelerate the time of payment or vesting, or increase the amount of, compensation due to any such employee or consultant, (iii) directly or indirectly cause the Company to transfer or set aside any assets to fund any material benefits under any Company Benefit Plan or (iv) limit or restrict the right to merge, materially amend, terminate or transfer the assets of any Company Benefit Plan on or following the First Effective Time.

(f) The execution and delivery of this Agreement, stockholder or other approval of this Agreement or the consummation of the transactions contemplated by this Agreement would not, either alone or in combination with another event, result in the payment of any "excess parachute payment" as defined Section 280G(b)(1) of the Code.

(g) The Company is not a party to nor does it have any obligation under any Company Benefit Plan to compensate, indemnify or reimburse any person for excise Taxes payable pursuant to Section 4999 of the Code or for additional Taxes payable pursuant to Section 409A of the Code.

(h) The Company and its Subsidiaries are in compliance with their obligations pursuant to all notification and bargaining obligations arising under any Company Labor Agreements, except as would not have, individually or in the aggregate, a Company Material Adverse Effect.

(i) Except as would not reasonably be expected to result in, individually or in the aggregate, material liability to the Company and its Subsidiaries, taken as a whole as of the date of this Agreement, (A) there are no strikes or lockouts with respect to any employees of the Company or any of its Subsidiaries; (B) to the Knowledge of the Company, there is no union organizing effort pending or threatened against the Company or any of its Subsidiaries; (C) there is no labor dispute or labor arbitration proceeding pending or, to the Knowledge of the Company, threatened against the Company or any of its Subsidiaries (other than, in each case, routine grievances, including those brought by unions or other collectively represented employees, to be heard by the applicable Governmental Entity); and (D) there is no slowdown, or work stoppage in effect or, to the Knowledge of the Company, threatened with respect to employees of the Company or any of its Subsidiaries;.

(j) Except as would not have, individually or in the aggregate, a Company Material Adverse Effect, since December 31, 2018, the Company and its Subsidiaries have complied with all applicable Laws with respect to employment and employment practices (including all applicable Laws, rules and regulations regarding wage and hour requirements, employee and worker classification, immigration status, discrimination in employment, harassment, employee health and safety, and collective bargaining).

(k) The consent or consultation of, or the rendering of formal advice by, any labor or trade union, works council or similar organization is not required for the Company to enter into this Agreement or to consummate any of the transactions contemplated hereby other than any consent, consultation or formal advice, the failure of which to obtain or, in the case of consultation, engage in, would not delay or prevent the consummation of the transactions contemplated by this Agreement or otherwise reasonably be expected to result in, individually or in the aggregate, material liability to the Company and its Subsidiaries, taken as a whole as of the date of this Agreement.

Section 3.12 Absence of Certain Changes or Events.

(a) Since the Company Balance Sheet Date through the date of this Agreement, there has not been any event, change, occurrence or development that has had or would reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect.

(b) From the Company Balance Sheet Date through the date of this Agreement, the Company and its Subsidiaries have conducted their respective businesses in all material respects in the Ordinary Course of Business.

Section 3.13 Investigations; Litigation. Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, as of the date of this Agreement: (a) to the Knowledge of the Company, there is no investigation or review pending or threatened by any Governmental Entity with respect to the Company or any of the Company's Subsidiaries; and (b) there are no Actions pending (or, to the Knowledge of the Company, threatened) against or affecting the Company or any of the Company's Subsidiaries, or any of their respective assets or properties at law or in equity before, and there are no Orders of, any Governmental Entity against or affecting the Company or any of the Company's Subsidiaries, or any of their respective assets or properties.

Section 3.14 Company Information. The information supplied or to be supplied by the Company for inclusion in (i) the proxy statement relating to the Company Stockholder Meeting, which will be used as a prospectus of Parent with respect to the Parent Common Shares issuable in connection with the First Merger (together with any amendments or supplements thereto, the "Proxy Statement/Prospectus"), (ii) the registration statement on Form F-4 pursuant to which the offer and sale of Parent Common Shares in connection with the First Merger will be registered pursuant to the Securities Act and in which the Proxy Statement/Prospectus will be included as a prospectus of Parent (together with any amendments or supplements thereto, the "Form F-4") or (iii) the management information circular relating to the Parent Shareholder Meeting (together with any amendments or supplements thereto, the "Management Information Circular") will not, at the time the Proxy Statement/Prospectus is first mailed to the Company's stockholders, at the time the Management Information Circular is first mailed to Parent's shareholders, at the time of the Company Stockholder Meeting and the Parent Shareholder Meeting or at the time the Form F-4 (and any amendment or supplement thereto) is declared effective, contain any untrue statement of a material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading; provided, that no representation or warranty is made by the Company with respect to statements made therein based on information supplied by Parent or either Merger Sub for inclusion or incorporation by reference therein.

Section 3.15 Tax Matters.

(a) Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect: (i) the Company and each of its Subsidiaries have prepared and timely filed (taking into account any extension of time within which to file) all Tax Returns required to be filed by any of them under applicable Law with the appropriate Governmental Entity and all such filed Tax Returns are complete and accurate; (ii) the Company and each of its Subsidiaries have paid all Taxes required to be paid under applicable Law to the appropriate Governmental Entity and have withheld all Taxes required to be withheld by any of them (including in connection with amounts paid or owing to any employee, independent contractor, creditor, customer, stockholder or other third party), except, in the case of clauses (i) and (ii), with respect to matters contested in good faith or for which adequate reserves have been established in accordance with GAAP; (iii) as of the date of this Agreement, there are not pending or, to the Knowledge of the Company, threatened in writing, any audits, examinations, investigations or other proceedings in respect of Taxes of the Company or any of its Subsidiaries, and neither the Company nor any of its Subsidiaries has received written notice within the past six years of any claim made by a Governmental Entity in a jurisdiction where the Company or any of its Subsidiaries, as applicable, does not file a Tax Return, that the Company or such Subsidiary is or may be subject to income taxation by, or have an obligation to file an income Tax Return in, that jurisdiction (and, solely in the case of the CRA, has not received such written notice within the past eight years); (iv) there are no liens for Taxes on any property of the Company or any of its Subsidiaries, except for Permitted Liens; (v) neither the Company nor any of its Subsidiaries has been a "controlled corporation" or a "distributing corporation" in any distribution occurring during the two-year period ending on the date of this Agreement that was purported or

intended to be governed by Section 355 of the Code; (vi) neither the Company nor any of its Subsidiaries has participated in any "listed transaction" within the meaning of Treasury Regulations Section 1.6011-4(b)(2); (vii) neither the Company nor any of its Subsidiaries (A) is a party to or is bound by any Tax sharing, allocation or indemnification agreement or arrangement (other than such an agreement or arrangement (1) exclusively between or among the Company and/or its Subsidiaries or (2) not primarily related to Taxes and entered into in the Ordinary Course of Business), (B) has been a member of an affiliated, consolidated, unitary or combined group filing a consolidated federal income Tax Return (other than a group the common parent of which is or was the Company or any of its Subsidiaries), or (C) has any liability for the Taxes of any Person (other than the Company or any of its Subsidiaries) under Treasury Regulations Section 1.1502-6 (or any similar provision of federal, state, local or non-U.S. Law), as a transferee or successor; (viii) each Mexican Subsidiary of the Company has complied with all of its obligations to disclose reportable schemes within the meaning of Article 199 of the Federal Fiscal Code (*Código Fiscal de la Federación*); (ix) each Mexican Subsidiary of the Company has fulfilled all of its Mexican Income Tax and VAT Law obligations with respect to the labor structure that it has in place, including the 6% withholding tax obligation under Article 1-A, subsection IV of the VAT Law and the obligation to receive the information contained in Article 27, subsection V of the Mexican Income Tax Law in effect before 2020, and no Tax benefit has been claimed in respect of any Mexican Tax invoice issued in favor of any Mexican Subsidiaries of the Company by a Person included on the list published on the webpage of the Mexican Tax Authorities and/or in the Mexican Official Gazette (Diario Oficial de la Federación) in terms of article 69-B of the Mexican Federal Tax Code; and (x) neither the Company nor any of its Subsidiaries will be required to include any item of income in, or to exclude any item of deduction from, taxable income in any taxable period (or portion thereof) ending after the Closing Date as a result of (A) any closing agreement, installment sale, or open transaction disposition, (B) any accounting method change or agreement with any Governmental Entity or (C) any election pursuant to Section 965(h) of the Code, in each case, made prior to the Closing.

(b) Neither the Company nor any of its Subsidiaries has taken or agreed to take any action or knows of any fact, agreement, plan or other circumstance that is reasonably likely to (i) prevent or impede the Mergers, taken together, from qualifying as a "reorganization" within the meaning of Section 368(a) of the Code, (ii) cause the stockholders (other than any Excepted Stockholder) of the Company to recognize gain pursuant to Section 367(a)(1) of the Code, (iii) cause Parent to be treated as a "domestic corporation" pursuant to Section 7874(b) of the Code as a result of the Mergers, or (iv) prevent or impede the Company from being able to deliver the executed Company Tax Certificate at Closing. As of the date of this Agreement, the Company believes it will be able to provide the Company Tax Certificate at the Closing.

(c) At no time during the 60 months immediately preceding the First Effective Time will more than 50% of the fair market value of the Company's capital stock have been derived, directly or indirectly, from one or any combination of: real or immovable property situated in Canada, Canadian resources properties, timber resource properties and options in respect of, or interests in, any such property (whether or not such property exists), each within the meaning of the CITA.

(d) The generality of any other representations and warranties in this Agreement notwithstanding, the representations and warranties in this Section 3.15 and, to the extent applicable, Section 3.11 shall be deemed to be the Company's sole and exclusive representations and warranties in this Agreement with respect to Tax matters.

Section 3.16 Intellectual Property; IT Assets; Privacy.

(a) Section 3.16(a) of the Company Disclosure Schedule sets forth a true, correct and complete list as of the date hereof of all material Registered Company Intellectual Property. Each such material item of Registered Company Intellectual Property is, to the Knowledge of the Company, subsisting and not invalid or unenforceable. No such material Registered Company Intellectual Property (other than any applications for Registered Company Intellectual Property) has expired or been cancelled or abandoned, except in accordance

with the expiration of the term of such rights, or in the Ordinary Course of Business based on a reasonable business judgement of the Company.

(b) The Company and its Subsidiaries (i) own or have a written, valid and enforceable right to use all material Intellectual Property used in or necessary for the operation of their respective businesses and (ii) own all right, title, and interest in all Company Intellectual Property, free and clear of all Liens (other than Permitted Liens), in each case, except as has not been and would not reasonably be expected to be, individually or in the aggregate, material to the business of the Company and its Subsidiaries, taken as a whole. To the Knowledge of the Company, no Company Intellectual Property material to any business of the Company and its Subsidiaries is subject to any Order or Contract materially and adversely affecting the Company's and its Subsidiaries' ownership or use of, or any rights in or to, any such Intellectual Property.

(c) Except as has not had and would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, since December 31, 2018, to the Knowledge of the Company, the operation of the business of the Company and its Subsidiaries has not infringed, violated or otherwise misappropriated any Intellectual Property of any third Person. Except as has not had and would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, (i) to the Knowledge of the Company, since December 31, 2018, no third Person has infringed, violated or otherwise misappropriated any Company Intellectual Property and (ii) to the Knowledge of the Company, there is, and there has been since December 31, 2018, no pending claim or asserted claim in writing asserting that the Company or any Subsidiary has infringed, violated or otherwise misappropriated, or is infringing, violating or otherwise misappropriating, any Intellectual Property of any third Person.

(d) The Company and its Subsidiaries have received from each Person (including current and former employees and contractors) who has created or developed any material Intellectual Property for or on behalf of the Company or any of its Subsidiaries, a written, valid, enforceable, present assignment of such Intellectual Property to the Company or its applicable Subsidiary.

(e) The Company and its Subsidiaries own all right, title and interest in and to the Company IT Assets, free and clear of any Liens other than Permitted Liens, except as has not been and would not reasonably be expected to be, individually or in the aggregate, material to the business of the Company and its Subsidiaries, taken as a whole. To the Knowledge of the Company, the Company and its Subsidiaries own or have a written valid and enforceable right to use all IT Assets, except as has not been and would not reasonably be expected to be, individually or in the aggregate, material to the business of the Company and its Subsidiaries, taken as a whole. Except as has not been and would not reasonably be expected to be, individually or in the aggregate, material to the business of the Company and its Subsidiaries, taken as a whole, the Company and each of its Subsidiaries have taken reasonable steps and implemented reasonable safeguards, consistent with best industry practices, to protect the IT Assets from any unauthorized access, use or other security breach. The IT Assets: (i) operate and perform in all material respects as required by the Company and its Subsidiaries for the operation of their respective businesses, (ii) since December 31, 2018, except as, individually or in the aggregate, has not resulted in, and is not reasonably expected to result in, material liability to, or material disruption of the business operations of, the Company and its Subsidiaries, (A) have not malfunctioned or failed, suffered unscheduled downtime, or been subject to unauthorized access, use or other security breach, and (B) have been free from any viruses, Trojan horses, spyware or other malicious code.

(f) The Company and its Subsidiaries have taken commercially reasonable measures to protect the confidentiality of the material Trade Secrets owned by the Company and its Subsidiaries, and to the Knowledge of the Company, no such material Trade Secrets has been used or discovered by or disclosed to any Person except pursuant to written, valid and enforceable non-disclosure agreements protecting the confidentiality thereof, which agreements have not been breached in any material respect.

(g) Since December 31, 2018, the Company and its Subsidiaries have in all material respects complied with all Privacy Laws and with its and their privacy policies and other contractual commitments

relating to privacy, security or processing of personal information or data. Except as has been and would not reasonably be expected to be, individually or in the aggregate, material to the business of the Company and its Subsidiaries, taken as a whole, since December 31, 2018, neither the Company nor any of its Subsidiaries has received any written threat, notice or claim alleging (i) non-compliance with any Privacy Laws or with such privacy policies or contractual commitments or (ii) a violation of any third Person's rights under Privacy Laws or such privacy policies or contractual commitments, including any third Person's rights with respect to Sensitive Data. Except as has not been and would not reasonably be expected to be, individually or in the aggregate, material to the business of the Company and its Subsidiaries, taken as a whole, since December 31, 2018, to the Knowledge of the Company, there has been no unauthorized access, use, processing, transfer or disclosure, or any loss or theft, of Sensitive Data or other personal or personally identifiable information that are protected by Privacy Laws while such Sensitive Data or such other personal or personally identifiable information was in the possession or control of the Company, its Subsidiaries or third-party vendors or service providers.

Section 3.17 Title to Assets. Except as would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect, the Company or one of its Subsidiaries has good and valid title to all tangible assets owned by the Company or any of its Subsidiaries as of the date of this Agreement, free and clear of all Liens other than Permitted Liens, or good and valid leasehold interests in all tangible assets leased or subleased by the Company or any of its Subsidiaries as of the date of this Agreement, or good and valid rights under the corresponding concession in all tangible assets held subject to such concession by the Company or any of its Subsidiaries as of the date of this Agreement.

Section 3.18 Title to Properties.

(a) Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, each Contract under which the Company or any of its Subsidiaries is the landlord, sublandlord, tenant, subtenant or occupant (a "Company Real Property Lease") with respect to material real property leased, subleased, held under concession, licensed or otherwise occupied (whether as tenant, subtenant or pursuant to other occupancy arrangements) by the Company or any of its Subsidiaries (collectively, including the improvements thereon, "Company Leased Real Property") is valid and binding on the Company or the Subsidiary thereof party thereto, and, to the Knowledge of the Company, each other party thereto. Neither the Company nor any of its Subsidiaries is currently subleasing, licensing or otherwise granting any person the right to use or occupy a material portion of the Company Leased Real Property that would reasonably be expected to adversely affect the existing use of the remaining portion of the Company Leased Real Property by the Company or its Subsidiaries in the operation of their business thereon, except as would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect. Except as would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect, there is no uncured default by the Company or any of its Subsidiaries under any Company Real Property Lease or, to the Knowledge of the Company, by any other party thereto, and, to the Knowledge of the Company, no event has occurred that with the lapse of time or the giving of notice or both would reasonably be expected to constitute a default thereunder by the Company or any of its Subsidiaries or by any other party thereto. As of the date of this Agreement, neither the Company nor any of its Subsidiaries has received any written notice of termination or cancelation, and to the Knowledge of the Company, no termination or cancelation is threatened, under any material Company Real Property Lease.

(b) Except as would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect, the Company or its Subsidiaries has good and valid title to all of the real property owned by the Company and its Subsidiaries (the "Owned Real Property").

(c) Except as would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect, neither the Company nor any of its Subsidiaries has received written notice of any condemnation proceeding or proposed action or agreement for taking in lieu of condemnation, nor is any such proceeding, action or agreement pending before a Governmental Entity or, to the Knowledge of the Company, threatened, with respect to any portion of any Owned Real Property.

Section 3.19 Opinion of Financial Advisor. The Company Board has received the opinions of BofA Securities, Inc. and Morgan Stanley & Co. LLC, substantially to the effect that, as of the date of such opinions and subject to the assumptions, limitations, qualifications and other matters stated therein, the Merger Consideration to be received by the holders of Company Common Stock (other than the Excluded Shares and the Dissenting Shares) in the First Merger pursuant to this Agreement is fair, from a financial point of view, to such holders.

Section 3.20 Required Vote of the Company Stockholders. The affirmative vote of the holders of a majority of the outstanding shares of Company Voting Stock in favor of the adoption of this Agreement (the "Company Stockholder Approval") is the only vote of holders of securities of the Company that is required to approve this Agreement and the transactions contemplated hereby, including the Mergers.

Section 3.21 Material Contracts.

(a) Except for this Agreement, agreements filed as exhibits to the Company SEC Documents or as set forth in Section 3.21 of the Company Disclosure Schedules, as of the date of this Agreement, neither the Company nor any of its Subsidiaries is a party to or expressly bound by any Contract (excluding any Company Benefit Plan) that:

(i) would constitute a "material contract" (as such term is defined in Item 601(b)(10) of Regulation S-K of the Securities Act);

(ii) is a Company Real Property Lease pursuant to which the Company or any of its Subsidiaries leases real property that is material to the business of the Company and its Subsidiaries, taken as a whole;

(iii) contains restrictions on the right of the Company or any of its Subsidiaries to engage in activities competitive with any Person or to solicit customers or suppliers anywhere in the world, other than restrictions (A) pursuant to limitations on the use by the Company or its Subsidiaries of rail lines set forth in the agreements conveying those lines or granting rights to operate them, (B) that are part of the terms and conditions of any "requirements" or similar agreement under which the Company or any of its Subsidiaries has agreed to procure goods or services exclusively from any Person, or (C) that are not material to the business of the Company and its Subsidiaries, taken as a whole;

(iv) grants "most favored nation" status that, following the Mergers, would apply to Parent and its Subsidiaries, including the Company and its Subsidiaries;

(v) provides for the formation, creation, operation, management or control of any joint venture, partnership or other similar arrangement with a third party;

(vi) is an indenture, credit agreement, loan agreement, note, or other Contract providing for indebtedness for borrowed money of the Company or any if its Subsidiaries (other than indebtedness among the Company and/or any of its Subsidiaries) in excess of $50 million;

(vii) is a settlement, conciliation or similar Contract that would require the Company or any of its Subsidiaries to pay consideration of more than $20 million after the date of this Agreement or that contains material restrictions on the business and operations of the Company or any of its Subsidiaries;

(viii) provides for the acquisition or disposition by the Company or any of its Subsidiaries of any business (whether by merger, sale of stock, sale of assets or otherwise), or any real property, that would, in each case, reasonably be expected to result in the receipt or making by the Company or any Subsidiary of the Company of future payments in excess of $25 million;

(ix) is an acquisition agreement that contains material "earn-out" or other material contingent payment obligations;

(x) obligates the Company or any Subsidiary of the Company to make any future capital investment or capital expenditure outside the Ordinary Course of Business and in excess of $50 million;

(xi) provides for the procurement of services or supplies from a Company Top Supplier by the Company or any of its Subsidiaries, or provides for sales to a Company Top Customer by the Company or any of its Subsidiaries;

(xii) limits or restricts the ability of the Company or any of its Subsidiaries to declare or pay dividends or make distributions in respect of their capital stock, partner interests, membership interests or other equity interests;

(xiii) other than any sales and marketing Contracts entered into the Ordinary Course of Business, is a Contract pursuant to which the Company or any of its Subsidiaries is a party, or is otherwise bound, and the contracting counterparty of which (A) is a Governmental Entity or (B) to the Knowledge of the Company, has entered into such Contract in its capacity as a prime contractor or other subcontractor of any Contract with a Governmental Entity and such Contract imposes upon the Company obligations or other liabilities due to such Governmental Entity; or

(xiv) is a Contract pursuant to which (A) the Company or any of its Subsidiaries is granted any license or other right with respect to Intellectual Property of another Person, where such Contract is material to the business of the Company or any of its Subsidiaries (other than non-exclusive licenses for unmodified, commercially available "off-the-shelf" software that have been granted on standardized, generally available terms); or (B) the Company or any of its Subsidiaries grants to another Person any license or other right with respect to any material Company Intellectual Property.

Each Contract of the type described in clauses (i) – (xiv) of this Section 3.21(a) is referred to herein as a "Company Material Contract."

(b) True, correct and complete copies of each Company Material Contract have been publicly filed with the SEC prior to the date of this Agreement or otherwise made available to Parent. Neither the Company nor any Subsidiary of the Company is in breach of or default under the terms of any Company Material Contract where such breach or default would reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect. To the Knowledge of the Company, as of the date of this Agreement, no other party to any Company Material Contract is in breach of or default under the terms of any Company Material Contract where such breach or default would reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect. Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, as of the date of this Agreement, each Company Material Contract is a valid and binding obligation of the Company or the Subsidiary of the Company that is party thereto and, to the Knowledge of the Company, of each other party thereto, and is in full force and effect, subject to the Enforceability Exceptions.

Section 3.22 Suppliers and Customers.

(a) Section 3.22(a) of the Company Disclosure Schedules sets forth a correct and complete list of (i) the top 10 suppliers (each a "Company Top Supplier") and (ii) the top 10 customers (each a "Company Top Customer"), respectively, by the aggregate dollar amount of payments to or from, as applicable, such supplier or customer, during the calendar year 2020.

(b) Except as would not, individually or in the aggregate, reasonably be expected to be material to the Company and its Subsidiaries, taken as a whole, since December 31, 2019 through the date of this Agreement, (i) there has been no termination of or a failure to renew the business relationship of the Company or its Subsidiaries with any Company Top Supplier or any Company Top Customer and (ii) no Company Top Supplier or Company Top Customer has notified the Company or any of its Subsidiaries that it intends to terminate or not renew its business.

Section 3.23 Canadian Assets and Revenues. Neither the aggregate value of the assets in Canada of the Company, nor the gross revenues from sales in or from Canada generated from those assets, exceeds CDN $93 million as determined in accordance with Part IX of the Competition Act (Canada).

Section 3.24 Insurance Policies. Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, (i) the Company and its Subsidiaries maintain insurance coverage with reputable insurers in such amounts and covering such risks as the Company reasonably believes, based on past experience, is adequate for the businesses and operations of the Company and its Subsidiaries (taking into account the cost and availability of such insurance), (ii) each insurance policy maintained by the Company or any of its Subsidiaries is in full force and effect, (iii) all premiums due by the Company or any of its Subsidiaries with respect to such insurance policies have been paid and (iv) the Company and its Subsidiaries are in compliance with all contractual requirements applicable thereto contained in such insurance policies. Neither the Company nor any of its Subsidiaries has received, as of the date of this Agreement, written notice of any pending or threatened cancellation with respect to any of its material insurance policies.

Section 3.25 Affiliate Party Transactions. Since December 31, 2018 through the date of this Agreement, there have been no material transactions, agreements, arrangements or understandings between the Company or any of its Subsidiaries, on the one hand, and any Person owning 5% or more of the Company Common Stock or any Affiliate of such Person or any director or executive officer of the Company or any of its Affiliates (or any relative thereof), on the other hand, or that would be required to be disclosed by the Company under Item 404 under Regulation S-K under the Securities Act and that have not been so disclosed in the Company SEC Documents, other than Ordinary Course of Business employment agreements and similar employee and indemnification arrangements otherwise set forth on the Company Disclosure Schedules.

Section 3.26 Finders or Brokers. Except for BofA Securities, Inc. and Morgan Stanley & Co. LLC, neither the Company nor any of its Subsidiaries has employed or engaged any investment banker, broker or finder in connection with the transactions contemplated by this Agreement who would be entitled to any fee or any commission in connection with or on consummation of the Mergers.

Section 3.27 Takeover Laws. Assuming the representations and warranties of Parent and each Merger Sub set forth in Section 4.22 are true and correct, as of the date of this Agreement, no "fair price," "moratorium," "control share acquisition," "business combination" or other form of anti-takeover statute or regulation or any anti-takeover provision in the certificate of incorporation or bylaws of the Company is, and the Company has no rights plan, "poison pill" or similar agreement that is, applicable to this Agreement, the Mergers or the other transactions contemplated hereby.

Section 3.28 CN Agreement. Concurrently with the execution of this Agreement, the Agreement and Plan of Merger, dated as of May 21, 2021, by and among Canadian National Railway Company ("CN"), Brooklyn Merger Sub, Inc. and the Company (the "CN Agreement"), was terminated by the Company in accordance with its terms, and the Company (i) has paid or caused to be paid to CN the "Company Termination Fee" (as defined in the CN Agreement) and (ii) will pay or cause to be paid to Brooklyn US Holding, Inc., a wholly-owned Subsidiary of CN, the CP Termination Fee Refund (as defined in the CN Agreement), each in accordance with the terms of the CN Agreement. There have not been any amendments or modifications to the CN Agreement prior to its termination. As of the date of this Agreement, the Company has not received notice of any breach of the CN Agreement.

Section 3.29 No Other Representations or Warranties; No Reliance. The Company acknowledges and agrees that, except for the representations and warranties contained in Article 4, none of Parent, either Merger Sub or any other Person acting on behalf of Parent or either Merger Sub has made or makes, and the Company has not relied on, any representation or warranty, whether express or implied, with respect to Parent, either Merger Sub, their respective Subsidiaries or their respective businesses, affairs, assets, liabilities, financial condition, results of operations, future operating or financial results, estimates, projections, forecasts, plans or

prospects (including the reasonableness of the assumptions underlying such estimates, projections, forecasts, plans or prospects) or with respect to the accuracy or completeness of any other information provided or made available to the Company or any of its representatives by or on behalf of Parent or either Merger Sub. The Company acknowledges and agrees that none of Parent, either Merger Sub or any other Person acting on behalf of Parent or either Merger Sub has made or makes, and the Company has not relied on, any representation or warranty, whether express or implied, with respect to any projections, forecasts, estimates or budgets made available to the Company or any of its representatives of future revenues, future results of operations (or any component thereof), future cash flows or future financial condition (or any component thereof) of Parent, either Merger Sub, or any of their respective Subsidiaries.

ARTICLE 4

REPRESENTATIONS AND WARRANTIES OF PARENT AND MERGER SUBS

Except as disclosed in the Parent Public Documents furnished or filed prior to the date of this Agreement (including any documents incorporated by reference therein and excluding any disclosures set forth in any risk factor section or in any "forward-looking statements" section to the extent they are forward-looking statements or cautionary, predictive or forward-looking in nature) or in the disclosure schedules delivered by Parent to the Company concurrently with the execution of this Agreement (the "Parent Disclosure Schedules") (it being agreed that disclosure of any item in any section or subsection of the Parent Disclosure Schedules shall be deemed disclosed with respect to any other section or subsection of this Agreement and the Parent Disclosure Schedules to the extent that the relevance thereof is reasonably apparent on its face), Parent and each Merger Sub jointly and severally represent and warrant to the Company as follows as of the date of this Agreement and as of the Closing Date (other than such representations and warranties that are expressly made as of a certain date, which are made as of such date):

Section 4.1 Qualification, Organization, Subsidiaries.

(a) Each of Parent and the Merger Subs is a legal entity duly organized, validly existing and in good standing under the Laws of its respective jurisdiction of incorporation, organization or formation, as applicable. Except as would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect, each of Parent's Subsidiaries is a legal entity duly organized, validly existing and (where such concept is recognized) in good standing under the Laws of its respective jurisdiction of incorporation or organization, as applicable. Each of Parent and the Merger Subs and each of their respective Subsidiaries has all requisite corporate or similar power and authority to own, lease and operate its properties and assets and to carry on its business as presently conducted and is qualified to do business and is in good standing as a foreign corporation in each jurisdiction where the ownership, leasing or operation of its assets or properties or conduct of its business requires such qualification, except, in each case, as would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect. Parent has made available to the Company true, complete and correct copies of Parent and each Merger Sub's Organizational Documents, each as amended prior to the date of this Agreement, and each as made available to the Company is in full force and effect.

(b) All of the outstanding shares of capital stock or voting securities of, or other equity interests in, each of Parent's wholly owned Subsidiaries have been validly issued and are owned by Parent, by another Subsidiary of Parent or by Parent and another Subsidiary of Parent, free and clear of all Liens other than restrictions imposed by applicable securities Laws or the Organizational Documents of any such Subsidiary or any Permitted Liens.

Section 4.2 Capitalization.

(a) The authorized share capital of Parent consists of an unlimited number of Parent Common Shares, an unlimited number of First Preferred Shares (the "Parent First Preferred Shares") and an unlimited number of

Second Preferred Shares (the "Parent Second Preferred Shares"). As of September 9, 2021, there were (i) 666,927,198 Parent Common Shares issued and outstanding, (ii) no Parent First Preferred Shares issued and outstanding, (iii) no Parent Second Preferred Shares issued and outstanding, (iv) £3,448,025 stated amount of Perpetual 4% Consolidated Debenture Stock of Parent denominated in pounds sterling issued and outstanding; (v) $30,270,800 stated amount of Perpetual 4% Consolidated Debenture Stock of Parent denominated in U.S. dollars issued and outstanding, (vi) Parent Options to purchase an aggregate of 7,518,954 Parent Common Shares issued and outstanding, (vii) 893,379 notional Parent Common Shares underlying outstanding Parent DSU Awards, (viii) 1,526,084 notional Parent Common Shares underlying outstanding Parent PSU Awards if performance conditions are satisfied at the target level, (ix) 60,854 notional Parent Common Shares underlying outstanding Parent RSU Awards and (x) 3,317,128 Parent Common Shares reserved for issuance under the Parent Share Plans. All outstanding Parent Common Shares are, and, when issued and delivered in accordance with the terms of this Agreement, the Parent Common Shares to be issued as part of the Merger Consideration will be, duly authorized and validly issued as fully paid and nonassessable, listed and posted for trading on the NYSE and the TSX, and not subject to or issued in violation of any preemptive or similar right, purchase option, call or right of first refusal or similar right. The Parent Common Shares to be issued as part of the Merger Consideration shall not be subject to any resale restrictions under applicable Canadian Securities Laws provided that the conditions set forth in subsection 2.6(3) (paragraphs 2 through 5) of National Instrument 45-102 – *Resale of Securities* of the Canadian Securities Administrators are satisfied in respect of any such trade.

(b) Except as set forth in Section 4.2(a) or as required by the terms of the Parent Benefit Plans, as of the date of this Agreement, (i) Parent does not have any shares of its capital stock issued or outstanding, other than Parent Common Shares that have become outstanding after September 9, 2021, which were reserved for issuance as of September 9, 2021 as set forth in Section 4.2(a), and (ii) there are no outstanding subscriptions, options, warrants, calls, convertible securities or other similar rights, agreements or commitments relating to the issuance of capital stock of Parent or any of Parent's Subsidiaries to which Parent or any of Parent's Subsidiaries is a party obligating Parent or any of Parent's Subsidiaries to (A) issue, transfer or sell any shares of capital stock of Parent or any of Parent's Subsidiaries or securities convertible into, exercisable for or exchangeable for such shares, (B) grant, extend or enter into any such subscription, option, warrant, call, convertible securities or other similar right, agreement or arrangement, or (C) redeem or otherwise acquire any such shares of capital stock.

(c) Neither Parent nor any of its Subsidiaries has outstanding bonds, debentures, notes or other similar obligations, the holders of which have the right to vote (or which are convertible into, exercisable for or exchangeable for securities having the right to vote) with the shareholders of Parent on any matter.

(d) There are no voting trusts or other agreements or understandings to which Parent or any of its Subsidiaries is a party with respect to the voting of the Parent Common Shares or other capital stock of the Parent or, except for any voting trust agreement entered into in compliance with Section 5.8(c) of this Agreement, capital stock of any of Parent's Subsidiaries.

Section 4.3 Corporate Authority Relative to This Agreement; Consents and Approvals; No Violation.

(a) Each of Parent and the Merger Subs has all requisite power and authority to enter into this Agreement and, subject to receipt of the Parent Shareholder Approval, to perform its obligations hereunder and to consummate the transactions contemplated hereby. Except for (i) the Parent Shareholder Approval, (ii) the adoption of this Agreement by Parent, as the sole stockholder of Surviving Merger Sub (which such adoption shall occur immediately following the execution of this Agreement), (iii) the approval of this Agreement by Parent, as the sole stockholder of First Merger Sub (which such approval shall occur immediately following the execution of this Agreement) and (iv) the filing of the First Certificate of Merger and the Second Certificate of Merger with the Secretary of State of the State of Delaware, no other proceedings on the part of Parent or either Merger Sub are necessary to authorize the execution and delivery of this Agreement and the consummation of the transactions contemplated hereby. This Agreement has been duly and validly executed and delivered by Parent and each Merger Sub and, assuming this Agreement constitutes the valid and binding agreement of the Company,

this Agreement constitutes the valid and binding agreement of Parent and each Merger Sub, enforceable against each of Parent and each Merger Sub in accordance with its terms, subject to the Enforceability Exceptions.

(b) (i) The Parent Board at a duly called and held meeting has unanimously (A) determined that it is in the best interests of Parent to enter into this Agreement, (B) approved the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated hereby, including the Mergers and the Debt Financing and (C) resolved to recommend that the holders of Parent Common Shares approve the Parent Share Issuance (the "Parent Recommendation") and directed that such matter be submitted for consideration of the shareholders of Parent at the Parent Shareholder Meeting; (ii) the board of directors of Surviving Merger Sub has unanimously (A) determined that it is in the best interests of Surviving Merger Sub and its sole stockholder, and declared it advisable, to enter into this Agreement, (B) approved the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated hereby, including the Mergers, and (C) resolved to recommend that the sole stockholder of Surviving Merger Sub adopt this Agreement and directed that such matter be submitted for consideration of the sole stockholder of Surviving Merger Sub; and (i) the board of directors of First Merger Sub has unanimously (A) determined that it is in the best interests of First Merger Sub and its sole stockholder, and declared it advisable, to enter into this Agreement, (B) approved the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated hereby, including the Mergers and (C) resolved to recommend that the sole stockholder of First Merger Sub approve this Agreement and directed that such matter be submitted for consideration of the sole stockholder of First Merger Sub.

(c) The execution, delivery and performance by Parent and each Merger Sub of this Agreement and the consummation of the Mergers and the other transactions contemplated hereby by Parent and each Merger Sub do not and will not require Parent, either Merger Sub or any of their Subsidiaries to procure, make or provide prior to the Closing Date any consent, approval, authorization or permit of, action by, filing with or notification to any Governmental Entity or other third party, other than (i) the filing of the First Certificate of Merger and the Second Certificate of Merger, (ii) authorizations from, or such other actions as are required to be made with or obtained from, the STB, (iii) authorizations from, or such other actions as are required to be made with or obtained from, the FCC, (iv) compliance with any applicable requirements of any Antitrust Laws, (v) authorizations from, or such other actions as are required to be made with or obtained from, the COFECE and the IFT, (vi) the filing of notices with the ARTF and the SCT, (vii) compliance with the applicable requirements of the Securities Act, the Exchange Act and the Canadian Securities Laws, including the filing with the SEC of the Form F-4 (including the Proxy Statement/Prospectus) and the filing of the Management Information Circular with the Canadian Securities Administrators, (viii) compliance with the rules and regulations of the NYSE and the TSX, (ix) compliance with any applicable foreign or state securities or blue sky laws and (x) the other consents and/or notices set forth on Section 4.3(c) of the Parent Disclosure Schedules (clauses (i) through (x), collectively, the "Parent Approvals"), and other than any consent, approval, authorization, permit, action, filing or notification the failure of which to make or obtain would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect.

(d) Assuming compliance with the matters referenced in Section 4.3(c) and receipt of the Parent Approvals and the Parent Shareholder Approval, the execution, delivery and performance by Parent and each Merger Sub of this Agreement and the consummation by Parent and each Merger Sub of the Mergers and the other transactions contemplated hereby, do not and will not (i) contravene or conflict with the organizational or governing documents of Parent or any of its Subsidiaries, (ii) contravene or conflict with or constitute a violation of any provision of any Law binding on or applicable to Parent or any of its Subsidiaries or any of their respective properties or assets, or (iii) result in any violation of, or default (with or without notice or lapse of time, or both) under, or give rise to a right of termination, cancellation or acceleration of any obligation or to the loss of a benefit under any Contract, instrument, permit, concession, franchise, right or license binding on Parent or any of its Subsidiaries, other than, in the case of clauses (ii) and (iii), any such contravention, conflict, violation, default, termination, cancellation, acceleration, right, loss or Lien that would not reasonably be expected to have, individually or in the aggregate, a Parent Material Adverse Effect.

Section 4.4 Reports and Financial Statements.
