Subject

EG&E Railroad

I live in the Westside of Hoffman Estates. I also work at several schools in the Barrington area. I am very opposed to the possibility of increased trains traveling through this area. It will definitely affect the value of my house (which faces the forest preserve and railroad tracks). The noise will be deafening, the vibration of the house will be bothersome and the traffic delays that will be presented will be extremely agitating and annoying. I spend a great deal of my day traveling throughout Barrington which will also have horrible traffic delays due to the number and length of the trains that will be going through town. The increased trains will make my life Hell! Please reconsider this sale and the effect it will have on this community.
