Subject: Great Lakes Basin Railroad

I oppose the Great Lakes Basin Railroad not only as a Village Trustee of The Village of Grant Park but as a citizen of Grant Park.

This railroad would put residents safety at risk,decimate agricultural farmland and surround communities, lower property values and take away property from residents that have worked for years to make it their own.

I also am a mother of 2 boys, one of which is autistic that attend the Grant Park school district. This school district is one of the very best districts in the state of Illinois. Why would you think of taking that away from us. The railroad would basically make it where our school district would have to close. My husband and I came to this community to raise our children in the country setting of life. Don't let a man, Frank Patton,who is only out to make money for himself destroy an entire community that has worked so hard to be how it is today. Our children deserve to live their lives as they know it in this country farm town.

Jill Morse
Village of Grant Park Trustee
