Transcript:

I left a previous message, I think it was not very clear, so I would like to uh, I tried E-Filing, you can't get in it, um the problems I have with this um purchase of by the Candaian National the EJ&E it doesn't address anything about the railroad crossings, I mean this is going to be considerable burden on the taxpayers, it ignores METRA's Star Line, which was the EJ&E, public safety, it really will destroy the Village of Barrington there will be no shops or anything allowed there because of the amount of trains going through, the METRA passenger train was delayed twenty minutes the other day by freight and this is because Canadian National is already using the lines. I think this, it doesn't tell you how many trains they are going to put within the next five years, there's no over-sight by anybody, if engineers want to leave their engines idling as they have done in Bartlett, Illinois where they're getting a new crew there's no problem with that. I think you have totally ignored the taxpayers that are affected by this and just learning about the purchase of Canadian National. Thank you.
