How will CN's proposed acquisition of the EJ&E impact you?

It will negatively impact the quality of life in the L2 area due to the increased traffic congestion resulting from # of trains and length of trains. Also - Concerns regarding hazardous waste being transported near two schools in Lake Zurich. Finally - will create problems for emergency response vehicles, school children and noise pollution in the area. CN is not welcome to expand their service & profits at the expense of quality of life in L2 area.
