**Submission Text**

Ken Blodgett Surface Transportation Board 395 E Street, S.W. Washington, DC 20423 ATTN: Office of Environmental Analysis, Docket No. 30186 Enclosed please find 58,927 individual public comments collected by CREDO Action for submission to the Tongue River Environmental Impact Statement review process. Individual comments may differ throughout, although the majority read as follows: "I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change." The comments have been split into 18 documents and 6 submissions in order to facilitate uploading to the Regulations.gov website. This is the second submission. Please contact me if you have any questions about the attached comment submissions. Sincerely, Josh Nelson Campaign Manager, CREDO Action jnelson@credoaction.com 415-369-2000

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

David Berger

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change.

Sincerely,

G Singleton

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's purpose is the transportation of coal. This activity would pollute the air and soil (coal dust) and threaten the health of communities along its route. It would also make it easier to mine coal, which significantly contributes to climate change. Therefore, the Tongue River Railroad would indirectly contribute to climate change, sufficient reason unto itself to deny the application. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Howard K. Beale Jr.

Haven't we learned enough through historical and health evidence that hauling coal contributes greatly to climate pollution? In fact, just look at the issues coal miners continually face since mining began. I strongly oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change.

Ken Blodgett
Surface Transportation Board
395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Adam Ramsey

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change.

Sincerely,

Robert Capaldi

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Sally J. Green

Surface Transportation Board
395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Alexandra trainor

ATTN: Office of Environmental Analysis Docket No. 30186

I join other Americans who oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change. In addition, the mercury vapors escaping from existing coal burning power plants into the atmosphere in China are already helping to destroy not only the air but the water. China should not be relying on American coal. For the sake of the American people whose lives would be adversely affected and the lands that would be changed forever, please reject the dirty coal-hauling Tongue River Railroad. We need to bend our efforts to climate change and not contribute to it. Coal should stay in the ground. Say "no".

Sincerely,

Alexandra Sale

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Michael Barnette

395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Margaret Heatherly

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Sharon Teagardin

395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Kris Smith-Lavoie

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Janice H Horn

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Jane Edsall

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Anne W. Hunnewell

395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Helen M Mendoza

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Michael Wilfrid Brown

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Ann Lehman Harmon

395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Ken Johnson

Surface Transportation Board
395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Anita Waytz

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Virginia Ramey

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Ruth Buxman
4399 Ave. 400

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

William F Slowinski
5516 W. 99th Place

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Cody J. Misplay

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change.

Sincerely,

William Grannell Jr.

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Mia D

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

William Chorneau

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change. Anyone that has lived along the railroads that coal trains regularly use, experience the following: Coal dust that will be blown off the top of the coal filling the open topped rail car; Pieces of coal, some weighing more than a pound each, falling off the tops of mounded coal piles filling the rail cars, imagine getting hit by something like that at fifty-five miles an hour; The clean up required, should, heaven forbid, there be an accident, and the train is derailed, hopefully that will never happen while passing through a rural community. I grew up in a rural community, in West Virginia, there were trains traveling through the center of town, frequently everyday. Each train had coal cars, tankers filled with chemicals and crude oil, box cars, and the occasional passenger cars. In dry weather, you could see the coal dust in the air as the coal cars passed by, at speeds of at least fifty-five miles per hour. Those families that required coal for cooking, or heating their homes only had to purchase coal during the coldest (and longest) winters. They only had to send their children down to the railroad right of way, along the tracks to pick up lumps of coal the size of a grown man's fist, that had fallen off the coal cars passing through town. If we truly have to sell coal to China, which will be returned to our nation in the form of pollutants, and harsher weather conditions due to global warming, our governmental agencies should make every effort to reduce pollution in our country as much as possible. Like it, or not, corporations from mainland (Communist) China, managed by officers and other ranks of their military forces, are already operating within the borders of the United States. They have been for many years. Under the terms of the newest "free trade" pact, if we refuse to transport the coal to mainland China, the United States will be sued in the court of the Secret International Tribunal, for "restraint of trade". Please take every precaution possible to protect the citizens, and environment of the United States, while we provide our enemies with the resources they need to destroy our former great nation. I know it is coming, so I will ask now that you mitigate the upcoming destruction of our national parks, as much as possible. Thank you.

Sincerely,

Michael J. Jarrett

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change. Coal was last century's brand of energy-- dirty, polluting, destructive of the landscape. Time to REJECT it!

Sincerely,

Katherine Miller

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Mary Ayers

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Damon Cook
12000 S. Wentworth Ave.

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Sarah Foster

ATTN: Office of Environmental Analysis Docket No. 30186

I write to express my opposition to the construction of the Tongue River Railroad. I urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change. The extraction of this coal would not benefit the energy needs of the United States,but it would put at risk the health and safety of local communities. We recently saw the impact of mining and its resulting waste when mining waste was spilled into the Colorado River. Even though this was gold mining waste, extraction of resources from the earth that lead to waste always increase the potential for this to happen. We must move away from such extraction practices and instead move towards sustaining, renewable energy policies. I urge the Surface Transportation Board to take the 'no action alternative' and move us closer to an energy policy that relies less on toxic and dirty extraction practices that mostly benefit multinational corporations at the expense of the health of people, local communities, and the planet.

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

John Ellis

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Marilyn F King

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Steven B Henderson

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the No Action alternative. The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change. Arch Coal wants to open what could become the country's largest coal mine in Montana and then haul that coal across the country to export to China, where it would add 2.5 billion tons of climate-warming pollutants to the atmosphere. Who would benefit from this scheme? A pitifully small number of miners would get lowpaying, extremely dirty, life-shortening jobs. Arch Coal's owners would be rewarded while its executives would doubtless "earn" obscenely massive bonuses. No one else would benefit. Who would lose from this project? Everyone who lives on Earth, and all those not yet born. The most devastating threats associated with Arch Coal's selfish project would be to the climate. After being burned in overseas power plants, the coal that would be mined and hauled by the proposed railroad would release over 60 million tons of carbon pollution EVERY YEAR. This is an amount approximately equal to Montana's annual greenhouse gas emissions. Approval of this project would undermine the modest gains in the Administration's just-released carbon rule aimed at reducing greenhouse gas emissions from coal-burning power plants. For these reasons, I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the No Action alternative.

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Julie Beer

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Franz Snyder

Obscene! You should be approving surface transportation for building wind and solar farms, not digging up more of these dirty dead dinosaurs adding more soot to a stressed out Mother Earth. 100% clean green renewable sustainable... if we can put a man on the Moon, it should be easy. Of course, if you don't care about the next generation or these communities along this rout, then you might want to cash in to collect whatever filthy lucre may be available from the looters and polluters who're looking for friends. Better hope you can spend it all while Mother Earth is still habitable for humans. Check into cash. $Cha-ca-ching! I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Marsha L. Benz

Ken Blodgett
Surface Transportation Board
395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Richard Rowland

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change.

Sincerely,

Sophie Flammier

ATTN: Office of Environmental Analysis Docket No. 30186

I urge you to take the ‘no action alternative’ on the proposed Tongue River Railroad, which would lead to more mining and transport of coal in and across Montana. Since Arch Coal is not bearing the external costs of its operations -- such as respiratory illnesses caused by air pollution, and global climate change caused by greenhouse-gas emissions -- their jobs and supposed economic benefits are offset by damages to public resources in Montana and around the world. Allowing this railroad to be built would further subsidize the coal industry's profits, to the detriment of the public: a policy exactly opposite to what a government should do for its citizens. Other ways to produce energy or improve energy efficiency could provide jobs and economic benefits without the severe drawbacks of coal. The current administration has been taking valuable steps toward reducing the mining and burning of coal. Keep consistent with those efforts by denying the Tongue River Railroad and the ensuing expansion of the coal industry in Montana.

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Robert McAleer

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad, intended to help export coal to China. I urge the Surface Transportation Board to take the 'no action alternative.' This railroad's transport of coal would significantly contributing to climate change. Coal mined and hauled by the proposed railroad would release (when burned in China) over 60 million tons of carbon pollution every year, doubling Montana's annual greenhouse gas emissions. Allowing this project to move forward contradicts the administration's efforts to address climate change.

Sincerely,

M M Kirby

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Valerie Sanderson

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Reva Damir

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Melanie Sharbono

Surface Transportation Board
395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Scott Blum

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

James Wadell Jr

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Melissa Brown

ATTN: Office of Environmental Analysis Docket No. 30186

I, along with probably more than 225 million Americans (i.e. 9 out of 10 Americans in recent surveys), who want more solar and wind power installed, rather than more fossil fuel and nuclear power, and along with more than 40.26 million supporters of Credo Action and the other organizations listed below, oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change. Ultimately, the most effective way to solve the climate crisis is to keep all fossil fuels in the ground. Right now, please urge President Obama to please suggest, recommend, set a guideline, or make it an urgent policy to not build or complete the construction of one single natural gas, nuclear, coal, oil, timber or biomass power plant anywhere in the US or the world – it is unquestionable and market-proven that they have been much more expensive to build than a solar, wind or geothermal power plant since 8/22/14 and 2012 – and solar and wind power are going to continue to get cheaper to build for the next 25 and 10 years, respectively. Please remember that as of 5/31/15, bids for building or selling wind power from utility-scale projects are now in the 2 cents to 3 cents per kWh range. As of 7/9/15, bids for building or selling solar power from utility-scale projects are now in the 3.87 cents to 5 cents per kWh range. These wind and solar utility-scale prices are much less than what it costs you to build a natural gas, nuclear, coal, oil, timber or biomass power plant. In your last 16 or so months, please hurry up and keep trying every one of your ideas to, massively and quickly, increase and schedule huge, new additional amounts of solar, wind, and geothermal electric power supply installations. Right now, just as Norway has already announced that their target is for all or nearly all new vehicles to be completely all-electric by 2025 and the Chair of the CARB intends to work for regulations that all new vehicles sold in California be zero or almost zero-emission vehicles by 2030, please urge President Obama, Secretary Foxx and Administrator McCarthy to set NHTSA and EPA fuel economy standards for all or nearly all new vehicles in the US to be completely all-electric by 2020, or by 2025 or by 2030. Modern, popular and mass-market all-electric cars have been produced by Nissan since 2011 and Tesla and Ford since 2012. Today, nearly every major car manufacturer already makes some all-electric cars or will deliver some mass production all-electric cars in the next couple of years. Since 7/7/15, BMW has already put an 18-wheel, all-electric freight truck into daily use. At a minimum, 12 major car manufacturers (including the top number 2, 3, 4, 5, 6, 11, 12, 14, 17 and 20 makers in the world), who together make, at a minimum, 58% of all the new cars and other vehicles in the world, have a strong or very strong focus on the fast production of all-electric and/or plug-in hybrid cars. Tesla, Nissan-Renault, GM, BMW, Mercedes and Audi all have a VERY STRONG focus on the fast production of all-electric and/or

plug-in hybrid cars. VW, Ford, Mitsubishi, Hyundai-Kia, Volvo and BYD also have a STRONG focus on the fast production of all-electric and/or plug-in hybrid cars. In addition, Honda (#8 in the world) continues to be committed to all-electric and/or plug-in hybrid car production. Toyota (#1 in the world) continues to produce and develop a huge number of hybrid electric and a great amount of plug-in hybrid cars. Some very popular, currently-produced or soon-to-be-produced, all-electic vehicles are the Nissan Leaf, the BMW i3, the Mercedes B-class ED, the Chevrolet Bolt (delivery end of 2016), the Chevrolet Spark, the VW e-Golf, the Kia Soul, the Ford Focus, the 2017 Tesla Model 3, the Tesla Model S, the Tesla Model X SUV (delivery end of 2015) and the 2018 Audi Q6 e-Tron SUV with 311 mile range. In addition, right now, please urge President Obama, Secretary Foxx and Administrator McCarthy to set all NHTSA and EPA fuel economy standards such that they equal or exceed the latest standards of the California Air Resources Board (CARB) for all vehicles. All vehicles includes every possible type of car, pickup truck, SUV, CUV, light-duty truck and van, medium-duty truck and van, heavy-duty truck and van, heavy-duty freight truck, bus and vocational vehicle and more. In your last 16 months or so, please hurry up and keep trying every one of your ideas to, massively and quickly, increase and schedule huge, additional amounts of new all-electric and plug-in hybrid cars, pickup trucks, SUVs, CUVs, light-duty trucks and vans, heavy-duty freight trucks and vans, buses and trains. In your last 16 months or so, please hurry up and keep trying every one of your ideas to, massively and quickly, cut huge, new additional amounts of carbon emissions from the coal, oil, natural gas, liquefied natural gas and other fossil fuel sectors. Thank you for seriously considering our requests and suggestions. ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Linda Catlin

395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Daniel Pastrana

395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the ‘no action alternative.’ The Tongue River Railroad’s transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration’s efforts to address climate change.

Sincerely,

Jona Johnson

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Jeremy Fischer

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Janet Simchuk

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Elizabeth Conlan

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

billl Carlson

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

D Hadley Finke

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Ashley E Council

Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Charla Kozelisky

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Brian A Luenow

As an American farmer, I see firsthand the drought, monster wildfires and profound disruptions to seasonality that climate change brings, and I know that to avoid the worst of it we need to leave some coal in the ground. As a Californian, I get to live with the knowledge that --even though I live in a rural area -- my life is possibly being shortened by the coal pollution I breathe every day, up to 30% of which actually comes from China, where the coal dug out of Wyoming and Montana is burned. As a human who understands that the age of coal is over, I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.'

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Lisa Cerra

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Lindsay Holland

Ken Blodgett
Surface Transportation Board
395 E Street, S.W.
Washington, DC 20423

ATTN: Office of Environmental Analysis Docket No. 30186

I oppose construction of the Tongue River Railroad and urge the Surface Transportation Board to take the 'no action alternative.' The Tongue River Railroad's transport of coal would pollute and threaten the health of communities along its route, while significantly contributing to climate change. Allowing this project to move forward directly contradicts the administration's efforts to address climate change.

Sincerely,

Patrick Flynn
