Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-08

The E3+E crosses Washington St in West Chicago and the Union Pacific RR. 120 trains on the UP and 31 trains on the E3+E tracks will be impossible. The trains on the E3+E track will have to stop behind my house all the time. It makes a lot of noise now with only 10 trains a day.

Some trains can pass very quietly and others pass very loudly. The engineers should be taught to run them more quietly.

We live very close to the train tracks, about 25 feet to the right of way. We will be very impacted with more train noise.

Our property value will be greatly diminished.

We have lived for 40 years next to the tracks and enjoy the trains now. We wave to the engineers and they wave back.

I really want the Star train to come on the L3+E tracks
It will be a good environmental addition to our ~~area~~,

[illegible]

Joliet
