To whom it may concern:

Please count me as one who is VERY STRONGLY OPPOSED to the proposed sale of the EJ&E railroad to Canadian National. It is my understanding that CN's safety record leaves much to be desired. In addition, if this sale does go through and the train traffic increases as proposed I believe the safety of Lake Zurich residents, along with residents of all other communities affected, will be placed in needless peril as traffic snarls, the environment is further contaminated and needed access for emergency vehicles is further impaired.

I believe that if completed this transaction will bring huge disruptions to our area without providing any benefit.

In addition, I'm afraid that this will further depress our area real estate values.

Sincerely,

Lou M. Krueger
