Transcript:

I wanted to call and voice my concerns about the, about the railroad purchase. It's just that I live in the New Lennox area and it's gonna be an issue for me, um I go north everyday to work um, you know, the existing four or five trains a day, that's not an issue, but these trains being two miles, potentially, two miles or even longer, that's going to present a definite road traffic issue, there's no infrastructure built up. If there was overpasses or something like that, that might be okay, but I know New Lennox can't afford um those railroad crossings to upgrade everything. Vibration as well for people living close to the tracks and um also one big concern too is we have children soon here that we're going to be raising in the area and a big issue for me would be um, you know, getting the safety, such as if there's a fire, police need, something like that as well as getting um the children to school as well. So uh I just wanted to voice my concerns and hopefully you guys don't let this thing to go through. Uh it's really gonna negatively impact Will County across the board and um it's really gonna be a bad move for us. So, I appreciate the time and any questions 815-671-1522. Thank you
