Transcript:

I am not in favor of the railroads going through due to I have a child with asthma and another younger child and all of the emergency vehicles are on the other side of the railroad tracks, it would not get to us in case of an emergency. Plus we have a business in town that would affect us dramatically, and with these tough times in the economy, I think that you guys really need to consider helping people, not harming them, and if you're going to do this, you need to build a bridge over the highway and that should be part of the agreement. Thank you. Bye
