Regarding the proposed purchase of the E&J tracks by CN I doubt I can add anything further to the comments that oppose this purchase. However, I will add that I was surprised at the STB meeting in Barrington the total, we'll call it arrogance of the CN representative I spoke with. The attitude was, the track is there, we're going to buy it, and were going to use it, so, to bad if it screws up your town and surrounding communities. Lastly, I have heard and read about this being for the "greater Good" of the Chicago area. Moving these trains does not solve a problem. It merely transfers it from one place to another! It is great for CN, but they simply take their problem and move it somewhere else. When does someone or some agency stand up and say NO! When do people, and the community they live in, stand ahead of a company simply out to make a few more dollars? To whoever reads this, what if it was your town?
