Message: I respectfully but strongly oppose the CN acquisition of EJ&E Railroad based on the significant safety issues resulting from an almost tripling of rail traffic through the community of Joliet and Plainfield, IL. The residential population includes numerous housing developments with young families and children surrounding the rail line. In addition to the danger to children, the whole infrastructure related to police, fire, and commuter travel would be adversely affected. Quality of life and security will decrease as a result of increased pollution, emergency response, and potential accidents. Please reject approval for this acquisition and champion the cause of family and community! Thank you so much for considering my concerns.
